HOMECOMING EDITION '65

ALICE IN DAIRYLAND

Miss Kathy Kenas — Brandon, Wisconsin
Home Economics Major

WISCONSIN STATE UNIVERSITY
Stevens Point

A Bit About Alice in Dairyland

A 5'5" green-eyed 20-year old lass who admits that, although a farm-born and farm-oriented young lady, she doesn't milk cows or do the other chores normally associated with rural living is the new agricultural ambassadoress for Wisconsin.

Miss Kathy Kenas, of Brandon, Wis., was chosen as her state's 18th Alice in Dairyland in June. She will reign in that capacity for one year as a public relations employee of the Wisconsin Department of Agriculture.

Miss Kenas explains her lack of milking ability by pointing to the rest of the family — Mr. and Mrs. Robert A. Kenas, her parents, and seven brothers ranging in age from six to 21.

In fact, home economics is her field at Stevens Point State University where she completed her sophomore year before entering the 1965 contest. She was one of two finalists chosen in a regional event at Omro, Wis., near

her home, and then withstood the challenge of 21 other hopefuls in the final competition.

Kathy has been an active participant in organizations both at high school and university as well as 4-H and church groups. She made the honor roll at Stevens Point, likes to swim and sew and enjoys watching football.

She confesses that her travels from Brandon were heretofore rather limited, but this was changed quickly. Her first visit out of Wisconsin was made only one week after her coronation when she acted as the state's official hostess at the International Lions Club convention in Los Angeles. Before her year as "Alice" ends in 1966, she will have clocked thousands of miles in Wisconsin and thousands more in visits to many leading cities of the nation while extolling the virtues of her state's excellent dairy products and other food production.

Predict 7,000 WSU Students in 1973

The projected enrollment at Wisconsin State University here has been revised upward to 7,022 in 1973.

The university had 2,897 students in the fall of 1963. In 1953 the figure was 759.

The prediction comes from the staff of the Coordinating Committee for Higher Education, which said the enrollment at all public universities and colleges in Wisconsin will climb from 61,930 last fall to 141,102 by 1973.

WSU had been estimating an enrollment of 6,000 for 1972. The increase of more than 1,000 in the latest prediction is not accounted for solely or even primarily by the extra year in the forecast period.

Other factors include the growing percentage of youths going on to college, an expected reduction in the rate of college dropouts, and the expansion of graduate school opportunities in the state college system.

WSU President James Albertson said he saw no reason to challenge the Coordinating Com-

mittee's predictions. Past estimates of enrollment growth have tended to be conservative, he said. Albertson noted that when he predicted 6,000 students for 1972 his figure was challenged as being too high.

The Coordinating Committee indicated a good many "ifs" enter into the picture and could change actual registration figures.

Enrollments, said the report, could be affected by changes in tuition and fee schedules; the adequacy of public and private housing; availability of vocational-technical training; changes in admission and retention policies for students; and a number of other factors.

Thirteen new two-year university and state university branch campuses are planned between now and 1973. Their impact is difficult to predict, the report said. On the one hand, the branches may drain off freshman and sophomore enrollments, but they may result in an increase in juniors and seniors at existing institutions.

A University is Only As Good As Its Alumni Make It

By Gregorio Borlaza

By a lucky stroke of fate I had the privilege of undergoing an internship in College Administration from January to August, 1965. During this period I had a chance to study the interesting history of the University, observe its campus life, and participate in the deliberations of some of its highest administrative and academic councils. Because of these many valuable experiences I have developed the feeling of gratitude and loyalty of an alumnus, although I have not actually earned the status of one. May I be permitted, therefore, to address the alumni of WSU - Stevens Point as an alumnus would address his fellow alumni.

The great universities of this country owe their greatness, to a large extent, to their alumni. By their outstanding services in the fields of politics, education, science, arts and letters, etc., these alumni have brought fame and glory to their Alma Mater, as a result of which the enrollment has increased in

size and in the extent of the geographical areas served. Growth in enrollment necessarily brings about an increase in curricular offerings and a multiplication of the demand for professional and administrative staffs, buildings, libraries, laboratories and other facilities. At times the demand increases so rapidly as to strain the regular finances of the institutions concerned. It is here where the alumni have been of much help.

A recent publication of the University of Wisconsin at Madison shows that thousands of its alumni have been contributing a substantial amount yearly to enable the University to develop certain programs which it would otherwise have been difficult to undertake. As in most other big universities the alumni of the University of Wisconsin have established a foundation which undertakes the annual fund raising for the Alma Mater.

The alumni of WSU-Stevens Point can do no less. This is a good time to begin because the seventy-fifth anniversary of the establishment of our University is due in four short years. I have turned over to Mr. Gotham an amount which is very insignificant, but which I consider very valuable because of the circumstances under which it came to my hands. I was guest speaker at a luncheon meeting of the Lions Club one day. Following their usual practice I was requested to draw a number, and the owner of that lucky number, Lion Leo T. Gwidt, got the contents of the "bank" for the day which consisted of dimes "deposited" by the members present. In the spirit of good will the lucky winner gave the two handfuls of coins to me, saying, "You have won it."

Such an extraordinary gift, I thought, should not be spent for an ordinary purpose, so I turned it over to Mr. Gotham in the hope that it may serve as a tiny acorn which my fellow alumni will have nursed into a giant oak by the time the seventy-fifth anniversary of our Alma Mater comes around.

President Albertson
Dean Jenkins

Construction of New Classroom Building

Construction of the new classroom building which will be ready for occupancy in September, 1966, is now above ground level.

At the ground breaking ceremonies on May 7, 1965, President James H. Albertson expressed appreciation to the legislature and to the people of the state for making available the money for this much needed building. He pointed out that the building will serve not only the present student body but also students for generations to come. As part of the entire University, it will help the faculty fulfill its purpose of making students "better able to live in a world of ideas." Participating in the ground breaking ceremonies were the contractors, members of the student body, and members of the faculty building committee.

The faculty committee respon-

sible for planning the building realized that most classroom buildings are constructed to fit the needs and instructional practices at the time they are built and that within ten or fifteen years are found to be awkward as educational trends change. The committee, therefore, decided that the building should be of such flexible design that it could be modified with ease in future years.

Fred Loewen of the State Bureau of Engineering is the architect. He designed a four story building, one of the few completely modular buildings in the state.

Each of the first three stories is designed with long clear-spans which will allow the quick removal or addition of interior walls so that the fifty classrooms and seminars can be increased or decreased in size and number depending on future needs. The building is so planned that the heavy student traffic will be on the first two floors which include one large lecture room and the general classrooms varying in size from twenty-student seminars to one-hundred-student classrooms. In addition to general classrooms on the third floor, there are some specialized facilities such as foreign language, psychology, business education, and economics laboratories.

The fourth floor will house 80 faculty offices, and a central office for clerical services, duplicating operations, and mail distribution.

The entire building is air-conditioned. All classrooms are equipped for audio and visual aids, including television programs. Some classrooms are equipped to originate television programs when this instruction method is adopted. In addition to steps at the entrances, there are ramps for handicapped students who may also use elevator service between floors.

The members of the building committee are: Professors Boylan, Burress, Crow, Faust, Jensen, and Dean Jenkins. Professor Robert Lewis served as advisor to the committee on audio-visual problems.

Director of Student Financial Aids Appointed

Appointed to the newly created position of Director of Student Financial Aids is Robert G. Rossmiller, formerly of Merrill Senior High School. Mr. Rossmiller completed his M.A. at the University of Wisconsin with advanced graduate study at Marquette University and Purdue University.

Prior to being named to this position Mr. Rossmiller served as Director of Guidance for Merrill Senior High School. He had been associated with the Merrill School System as classroom teacher and guidance counselor for 19 years. Two years were spent as a professional scout executive with Samoset Council.

In 1951 he married the former Elaine Broeren of Thorp, a former W.S.U. student. The family of three daughters (Kathie, Linda, Ann) and one son (Jon) moved with their parents on July 19.

Mr. Rossmiller has been on the job since July 26.

Included in the new position will be general supervision and coordination of three areas: scholarships, loans, and employment. The expanded enrollment and the increased kinds and number of aid programs has made such a position necessary. A number of schools in Wisconsin have moved in this direction in the past few years. There is a rapidly growing organization known as the Midwest Association of Student Financial Aids Administrators.

He is currently a member of the Executive Committee of the Central Wisconsin Education Association and of the Wisconsin Personnel and Guidance Association. He holds memberships in the WEA, WPGA, CWPGA, APGA, and is a life member of NEA.

Former Nebraska Family Attend Point

"I am pleased to be a graduate of the WSU-Stevens Point, having gone to summer schools, night schools, and Saturday sessions for the past 12 years, receiving my degree in February, 1965. I took two years of Normal Training in my junior and senior year in high school back in 1933-1935, in Nebraska. I took a State Board Examination which entitled me to teach three years. I taught five years in Nebraska from 1937 through 1942. I then married, and came to Wisconsin to live. I was out of the teaching profession for eleven years. When our two children were both in school, I began teaching in Wisconsin in 1953. Our son, Errol was beginning first grade. He is now

a graduate of the senior class of 1965 at Waupaca and will begin his freshman year at WSU-Stevens Point this fall. Our daughter, Rheta, has completed her second year at WSU-Stevens Point and is attending the University of Hawaii in Honolulu this summer. She accompanied her classmate, Gerry Campos, another WSU student to her home in Hawaii and resided with Gerry's family there this summer. The girls will both be back to Stevens Point University this fall. Thus, we will be in close contact with the University for the next few years.

Mrs. Verdell L. Sorensen '65
Route 3, Waupaca, Wisconsin

An Invitation to Pointer Alums

Homecoming is rapidly approaching on WSU's campus. Wouldn't you enjoy meeting your former classmates and touring the growing campus? Here's your chance! The students at WSU, Stevens Point, invite all Pointer Alums to the 1965 Homecoming Festivities, scheduled for October 7-8-9.

Many activities are being planned for you. Friday afternoon will be the dedication of the new University Center Addition. Friday evening will be the Homecoming Assembly Program during which the Queen will be coronated. A special section is to be reserved for "Alums Only" at the Assembly. The Parade this year will be Saturday morning at 10:30. The theme for Homecoming this year is "Curtail Hillsdale".

An Alumni Luncheon has been planned for Alums at the University Center Saturday following the parade. The meal this year includes Boneless Breast of Chicken and is only \$1.75 per person. Reservations should be made by Friday, September 24. Alums with husbands or wives are welcome. Enclose your check when sending in your reservation to: Alumni Office, Wisconsin State University, Stevens Point, Wis., 54481.

The game is scheduled for 1:30. We play the Dales of Hillsdale, Michigan. At half time you will enjoy an impressive show. A reserved section has been assigned

to Alums. We are anticipating a packed stadium, so let's come Alums!

Following the game, Alums and Faculty will meet at the Allen Center for a Coffee Hour. Here you can converse with faculty members and Student Organization Leaders. They will enjoy seeing you and taking you on a tour of our rapidly expanding campus.

Other activities planned include sorority and fraternity banquets early Saturday evening. The Homecoming Dance from 9:00 to 1:00 a.m. at the Field House will complete Saturday's events.

Alumni Headquarters will be established in the University Center. If you register, others will know of your presence. Assistance will be provided in locating motels, hotels and restaurants.

To assist us with our planning, fill in the blank below and return it with your check by September 24th to the Alumni Office, Wisconsin State University, Stevens Point, Wis., and mark your envelope to read **Homecoming**.

We want this year's Homecoming to be one of the best. We need your help. Make your reservation early. Tell your Alumni friends about the occasion. Everyone is invited.

Sincerely yours,
1965 Student Homecoming Comm.
Diane Spurgeon, Chm.-Alumni Act

ALUMNI LUNCHEON RESERVATION — 1.75 per person

I am enclosing \$..... for tickets for the Alumni

Luncheon to be held Saturday, October 8 at 11:30 in the University Center.

Summer Theatre Enjoyed Successful Season

The Summer Theatre, sponsored by the Department of Speech and Drama was a great success this past summer. Audiences were bigger than ever, and the weather was better than ever. The cast, gathered together by Bill Kramer of our own staff and Jack Poggi of New York City, worked together extremely well. Many of this summer's group are in the category of semi-professional actors, and all of them make or plan to make their livelihood somewhere in the areas of professional or educational theatre.

Jack Poggi, who directed COME BLOW YOUR HORN, BOY MEETS GIRL and THIEVES CARNIVAL, has done work with the Berghoff Studio and has done several plans off Broadway. He has a very good sense of humor and a good sense of stage business which made his shows very imaginative. Bill Kramer of the WSU staff directed ANOTHER PART OF THE FOREST and BUS STOP.

Aiding these directors was a capable cast of ten actors who brought a great deal of variation to their work. Carol Nav-

ratil of the University of Maryland, for example, played a young girl "crazy for love" in one play and an aged, religious fanatic in the next. In BUS STOP she played a night club entertainer. Otts Laupus of Baltimore looked like he was enjoying every role he played, but appeared to be having the most fun as a middle-aged, next - to - broke, banker in THIEVES CARNIVAL. This was quite a change for Otts who had been playing either disappointed lovers or cowboys most of the summer. Sparkling in a leading role in THIEVES CARNIVAL was WSU alumna, Beata Schmeller. Jack Moran, who had been working in Boston, usually entertained the cast and crew by doing musical comedy dance routines whenever he had a chance; sometimes he was accompanied by Tony Brafu who has had many roles in musicals and operas. Perhaps the most spectacular evening of the summer was the stormy night during BUS STOP when the lights went out, and we had to finish the performance by candle and flashlight. Corny as it may seem, "The show must go on."

From the Office of the Director of Housing

Twenty two hundred and thirty-six students will be provided housing accommodations in nine residence halls on the campus this year with the opening of two new residence halls named for Oscar W. Neale and Robert D. Baldwin. Construction of the tenth residence hall for the campus is now underway. In addition bids are being considered for two additional residence halls to be opened in the fall of 1967.

The construction of the residence halls provides high quality housing and food service for the students at moderate rates. Staffed with professionally trained personnel they serve the important function of contributing to the academic program of the University.

It is through the residence hall staff and programs that the incoming student is introduced to

university life. Favorable conditions for study as well as individual and group seminars help the student bridge the gap from high school to the University.

Through participation in residence hall living and programs, the students learn to share in a community where responsibility, mutual respect, and cooperation are essential.

The residence halls are considered as extensions of the classroom. The student residents are encouraged to informally discuss ideas and issues raised in their classes. Faculty are invited to the residence halls to meet informally with students on subjects of mutual interest. Educational and cultural programs are brought to the residence halls.

The residence hall staff utilizes opportunities provided by frequent contacts with the students to further the students' academic and personal development. Assisting students in the development and formation of values which become continually challenged in the university community is another way in which university housing serves as a center of learning.

Fred Leafgren

Editor's Note: Mr. Fred Leafgren' has been recently appointed Director of Housing for the University. He comes from Slippery Rock State College where he had served as Dean of Men for the past three years. He received his Bachelor's Degree from the University of Illinois and his Master's Degree from Michigan State University. He is presently completing his Doctoral at Michigan State University. While attending Michigan State University, he was a member of the Residence Hall staff and was an instructor in the College of Education.

Summer European Tour Planned

The Central Wisconsin Education Association and the Wisconsin State University, Stevens Point under the academic leadership of Dr. G. Haferbecker, Vice President for Academic Affairs,

and Dr. P. A. Kroner, Chairman of the Foreign Language Department, is in the process of preparing an "Adventure in Education" trip to Europe in the summer, 1966. The purpose of this

trip is to familiarize American educators of all levels and others interested with the various educational systems in different European countries, to meet foreign colleagues in the teaching profession, to exchange ideas with them, to enjoy the cultural aspects of the European countries, and to acquaint the participants with parts of Europe of unusual interest and beauty.

Depending on the beginning of summer recess, our adventure will start between June 7 and 16 and last 35 days exclusive of the flight from Chicago to Frankfurt, Germany.

In order to ensure the maximum of comfort, the group will travel mostly across Germany, Austria, Italy, and Switzerland by first class trains. To save time we will use air transportation from Zurich, Switzerland, to Copenhagen, Copenhagen to Stockholm, Stockholm to Oslo, Oslo to London, and London to Chicago. Excellent English speaking guides will accompany the group through the different cities and explain in a lively and entertaining way the artistic and historical meaning of places visited, their cultural associations and recount legends and anecdotes which are attached to them.

An interesting program of academic meetings in each of the main cities is being prepared by tour leaders and in collaboration with the Ministry of Education of the various countries. This program, as well as a very attractive program of entertainment, carefully selected for different countries, including concerts, operas, operettas, regional music and theater festivals, and events of religious or folkloric character, will be announced to participants in spring, 1966.

In the hotels where the group will stay, our sense of well-being will be somehow heightened. These will be truly European hotels with good beds and food, and with an old tradition of courtesy and personal care. Tips and taxes are included throughout the tour. Not included in our approximate cost of \$1,000 per person are expenses of personal nature: passport fees, laundry, beverages, extra dishes at breakfast and

after dinner coffee which in Europe is never included in the menu. We shall enjoy a variety of good cuisine twice daily — breakfast and dinner.

Here are some of the highlights of our "Adventure in Education 1966" GERMANY — From KOBLENZ, located at the junction of the Rhine and Moselle rivers, we travel by Rhine Steamer through the romantic, legend-laden region of the middle Rhine to Mayence.

"OLD HEIDELBERG," famous in song and story, picturesquely situated in the Neckar Valley, contains Germany's oldest and most famous University and the majestic ruins of the castle overlooking the town. It will give us an insight into German student life. Morning city sightseeing by motorcoach, with guide driving to visit Old Town with Town Hall, Holy Ghost Church, University with Students' Prison, Students' Inn "Red Ox," the Castle with the Big Cask and beautiful views of the town and Neckar Valley (interior visits: Student's Prison, Students' Inn, courtyard, terrace and caves of Castle with Big Cask).

ROTHENBURG, a walled town, with its ancient towers and ramparts intact, has been described as a "fairy-tale" city. At Whitsuntide, the festival of the "master Quaff" is held in honor of the old mayor who, in order to save the town from ruin, is reputed to have quaffed in one draught a three-liter mug of wine.

MUNICH is the capital of Bavaria and former residence of the Bavarian kings. It is a noted center of art and science (picture galleries "German Museum"), beautiful parks, landscape zoo "Hellabrunn." It is the seat of world-famous breweries and gateway to the Bavarian Alps.

AUSTRIA — SALZBURG. The Romans founded Salzburg, the barbarians destroyed her and a Saint restored the city more than 1200 years ago. Today Salzburg is a city for "Every man." It is the staunch bulwark of the noblest of the arts—music. The Salzburg Festival is the leading event in the Alpine Provinces.

VIENNA, beautiful city on the Danube, cultural center of middle Europe, was founded in 100 A.D. The multitude of museums, churches, palaces and concert halls emphasize the city's cultural richness. Morning city sightseeing by motorcoach, with guide, covering the most important historical sights of Vienna, among them the Hofburg, the Gothic St. Stephen's Cathedral (1258) and the 17th century Capuchin Church, containing the imperial vaults. This is the burial place of the Hapsburge, among them Empress Maria Theresa (1780), Francis I and their children and the unhappy Crown Prince Rudolf, who died at Mayerling. Nearby is St. Charles Church, the University (1365), the second oldest in the German-speaking countries; City Hall, the Burgtheater, Houses of Parliament, two State Museums, the newly re-opened Opera House and the Spanish Riding School, but highlighting this tour is the visit to Schoenbrunn Castle, with its glorious and vast French park.

Afternoon excursion by motorcoach, with guide to the Vienna woods, touring the beautiful surrounding districts of Vienna, as well as many historic places and buildings, such as the Cistercian Monastery of Heiligenkrauz.

ITALY — VENICE, is a dream city of fantastic beauty, built out of the sea on more than one hundred islands. It is the only city in the world in which the mechanical rhythm of modern life has never disturbed an unchanged atmosphere which is created by a wonderful fusion of art and nature.

Afternoon city sightseeing by gondola, with guide, riding along the Grand Canal. Stop at the Ca "Rezzonico Palace, then proceed under the Rialto Bridge along the inner canals as far as the Church of Sts. John and Paul. View the equestrian monument of Collieni, a masterpiece of Verrocchio, and end the tour with a visit to a local lace school.

FLORENCE, a city of unique charm, center of remarkable craftsmanship, a source of inspiration, patronized more than ever by air lovers and tourists in search of enjoyment, beauty and

lovely environs.

Morning city sightseeing by motorcoach, with guide, visiting the Medici Chapels with MICHELANGELO'S masterpieces, St. Lawrence's Church, Cathedral, Baptistery, Giotto's Campanile, Vile dei Colli, Piazzale Michelangelo (panoramic view of the city), Pitti Palace and Gallery.

ROME, the "Eternal City," metropolis of Mediterranean civilization and universally known for its rich monuments, is a marvel of contrasts of different civilizations.

Morning city sightseeing by motorcoach, with guide, visiting the Borghese and Museum, the Pantheon, the Janiculum Hill and the Basilica of St. Peter within the boundaries of the Vatican.

Afternoon city sightseeing by motorcoach, with guide, driving via the Capitoline Hill, the Roman Forum, the Palatine Hill, the Imperial Fora, the Basilica of St. Paul outside the walls, the Colosseum and the Church of St. Peter in Chains with the splendid statue of Moses by Michelangelo.

SWITZERLAND — LUCERNE, nestled on the lower end of the celebrated Lake of Four Cantons, surrounded by Rigi, Pilatus, and other noble mountain peaks, enjoys one of the most beautiful natural settings in the world.

Half-day sightseeing excursion to Mt. Pilatus by rail to Alpanchstad; by rack-and-pinion railway to Pilatus Kulm. Extensive views from the Esel and from the wonderful Galleries. Return the same way.

ZURICH, the largest town in Switzerland and the commercial and manufacturing capital, lies at the northern extremity of the lake of Zurich, both banks being dotted with manufacturing villages among picturesque agricultural surroundings.

DENMARK — COPENHAGEN is the prosperous capital of Denmark. An abundance of night clubs, restaurants, dance floors and variety shows make Copenhagen one of the gayest European capitals. In the evening a visit to TIVOLI GARDENS.

Half-day city sightseeing by motorcoach, with guide, passing all the principal buildings and monuments. Then a tour by

motorboat thru the harbour and canals. At the Little Mermaid, a stop will be made.

SWEDEN — STOCKHOLM, frequently mentioned as the "Venice of the North," stretches from the wooded mainland over an archipelago of hundreds of islands to the Baltic. It is one of the most beautiful and delightful cities in Europe.

Morning city sightseeing tour by motorcoach, with guide, includes inside visits to the world famous City Hall and the Riddarholm Church.

Afternoon excursion by motorcoach, with guide to Drottningholm Palace, driving through some typical pleasant garden suburbs to the Royal Residence where a walk is taken in the beautiful park and a visit is made to the Royal Palace and the world famous theatre.

NORWAY — OSLO, the Viking Capital, is the smallest of the Scandinavian capitals, yet the most interesting to the tourist. The city is surrounded by beautiful country at the inner end of the Oslo Fjord, where hundreds of vessels continually ply to and from Norwegian and foreign ports.

ENGLAND — LONDON, steeped in tradition, is rich in relics of the past-famous buildings on quaint streets, old churches, cozy inns. In its brilliant West End are found fashionable shopping districts, royal palaces, museums and fine hotels.

Morning city sightseeing by motorcoach, with guide, visiting the British Museum, St. James's Palace, Buckingham Palace with Changing of the Guard, Whitehall, Scotland Yard, The Temple, The Monument, The Tower of London, visit Tower and inspect the famous Crown Jewels, Bank of Eng-

land, Royal Exchange, Mansion House, Bow Church, St. Paul's Cathedral with visit, Fleet Street (the street of ink), Ye Olde Cheshire Cheese, Law Courts, The Old Curiosity Shop of Charles Dickens.

Full-day excursion by motorcoach, with guide to Shakespeare Country visiting Oxford, Stratford-on-Avon, Shakespeare's House, Anne Hathaway's Cottage, Warwick Castle, Banbury.

Applications are accepted in Room 128, Main Building, Wisconsin State University, Stevens Point.

A personal check of \$100 per person payable to CWEA Europe Tour should be mailed to: CWEA European Tour. In care of Dr. P. A. Kroner Wisconsin State University Stevens Point, Wisconsin 54481

The check serves as a deposit for reservations on the tour and the amount is refundable in full if you cancel your reservation before April 15. For cancellations after this date actual expenses from \$25 to \$50 will be deducted from the deposit.

The balance is payable in three equal amounts on or before November 1, 1965, February 1, 1966, and May 1, 1966. Payments will also be accepted on a monthly basis.

We would like to give all CWEA members the opportunity to join in this adventure; however, since we are limited in number to 44 participants, we will accept registration on a first-come-first-served basis.

Membership of each traveler or his spouse or close relative in the CWEA is required for a six month period prior to the trip. Membership for 1965-66 is \$1.50.

REGISTRATION FORM

I enclose my check for \$100.00 per person, made payable to CWEA European Tour, as a refundable deposit on the tour.

Report from the Dean of the Graduate School 1965-66

Three courses will be offered in the graduate program during the first semester. (1) Education 209, Psychological Foundations of Education and (2) English 248, American Novelists II will be available on Tuesday nights and (3) Sociology 202, Intergroup Relations on Saturday mornings. During the second semester, (1) Education 208, Philosophical Foundations of Education, (2) Speech 201, Foundations of Oral Communication, and (3) History 201, Great Issues in Western History will be offered.

Several graduate students have taken advantage of Saturday and evening courses to accelerate their program. This opportunity was significant to the ten candidates who received their M.S. degrees at the August convocation.

It is now possible to take the

comprehensive examinations at various times during the year. Students who plan to graduate at a summer session convocation are advised to write their examinations before the session begins. Other candidates may wish to take the exams after completing all course work. The degree may be conferred at any regularly scheduled degree-granting time.

The summer enrollment of 141 was somewhat less than expected but many late changes in plans undoubtedly affected the total. There are hopes for complete programs in more areas beginning in the summer of 1966. If there is sufficient demand, expanded offerings in existing areas will be available along with new programs. Work is in progress on programs in biology, mathematics, and foreign language.

Dr. Edgar Pierson

Rev. Saito Moves to Eau Claire

Rev. Perry Saito

The Rev. Perry H. Saito, pastor of St. Paul's Methodist Church and a leader in the human rights field in Wisconsin, has been transferred to the

Lake Street Methodist Church in Eau Claire.

The appointment was made in Green Bay by Bishop Ralph Taylor Alton of Madison, at the annual meeting of the East Wisconsin Conference of the Methodist Church.

The Rev. Mr. Saito's successor will be the Rev. Theodore W. Schwartz of the First Methodist Church, Washington, Iowa.

The Rev. Mr. Saito came here in 1954 and his 11-year tenure as pastor is the longest in St. Paul's 108-year history.

The Rev. Mr. Saito is of Japanese descent. St. Paul's, with 800 members, is considered the largest all-white congregation in the nation with a non-white pastor.

His new parish in Eau Claire has about 1,500 members, and the Rev. Mr. Saito will be aided by an associate pastor.

A native of Medford, Ore., he was ordained to Chicago and came to Stevens Point from Beloit, where he was associate

pastor of the First Methodist Church. At St. Paul's, he succeeded the Rev. Jans J. Vander Graf, now of St. Louis, Mo.

When the Rev. Mr. Saito came to Stevens Point, the Methodist Church was at Strongs Avenue and Brawley Street. A drive was started in 1958 to raise funds for a new church, and it received unexpected emphasis on Easter night in 1959 when the old building burned.

A new church, education building and fellowship hall were completed at 530 Wilshire Boulevard in 1961. Last year, the congregation built a new parsonage at 1100 Jordan Lane.

The Rev. Mr. Saito's wife, Fumi, is well known here as a singer. They have five children, ranging in age from seven to 20.

The new pastor of St. Paul's, the Rev. Mr. Schwartz, is a native of Lincoln, Neb., and a graduate of Nebraska Wesleyan University.

After serving in the Navy in World War II, he attended seminary at Boston University. In 1954, he received his doctorate in group development at the Iliff School of Theology in Denver, Colo.

The Rev. Mr. Schwartz has served pastorates in Nebraska and Iowa.

His wife, Mrs. Phyllis Schwartz, is a junior high

Rev. Ted Schwartz

school English and reading teacher and has been reading consultant for Washington County, Iowa. She is a graduate of Nebraska Wesleyan and has taken graduate work at the University of Chicago.

The Schwartzes have a daughter, Debbie, who graduated from Washington High School and will be a freshman next fall at Skidmore College, Saratoga Springs, N. Y.

The family moved to Stevens Point in June.

WSU Graduate Takes Dictation from Eisenhower

Former President Dwight Eisenhower while vacationing in Minocqua this summer got in some paper work after humid and foggy weather caused a change in plans for some fishing.

Carole Rynar of Phillips a recent graduate of Stevens Point State and summertime secretary for the Minocqua Country Club,

spent the morning taking dictation from Eisenhower. He and his host, Harold Young of New York, returned her to the club and she spent the early afternoon typing the dictation. Miss Rynar will teach at Lodi in the fall. She said Eisenhower was "so easy to work for . . . so very nice."

New Band Director Appointed

Mr. Thomas Braeuer was appointed Band Director at Wisconsin State University, Stevens Point, February, 1965. He is assuming his responsibilities this September, and will be in charge of the Marching and Concert Band, teaching clarinet, directing the woodwind ensemble.

Mr. Braeuer has been music supervisor of the City of Santa Fe, New Mexico. Working under him there were seven music teachers in the vocal and instrumental areas. Mr. Braeuer had been in Santa Fe for eight years and during that time built up an amiable reputation in the Southwest. His high school band has received 1st division ratings each of the seven years that he has been there. This last year they received three one plus ratings which was the highest rating for any school band in the competition. His junior high school band has constantly received 1st division ratings, as well as his choruses which he directed during his first year or two while he was at Santa Fe.

Before going to Santa Fe, Braeuer served for two years as supervisor of music and band director in Morenci, Arizona where his band received first division ratings in the Arizona Music Festival.

He is past president of the Eastern Arizona Music Educator's Association as well as the North Central New Mexico Music Educator's Association.

Braeuer attended the University of Michigan when he worked with Wm. D. Revelli and was drum major of the University of Michigan band and played in the Symphony Orchestra under Thor Johnson. Braeuer is a graduate of the Jordan College of Music in Indianapolis and took graduate work at Columbia University where he was awarded the Master of Arts degree. He is a clarinet player and has performed with the Official Air Transport Command Band, the Indianapolis Philharmonic, the Santa Fe Opera Orchestra, and has studied clarinet

inet with Carl Bartlett of the University of Illinois, William Stubbins, of the University of Michigan; Richard Bassett of the National Symphony Orchestra; Henry Christmann, Sr. of the New York Philharmonic Symphony and Nilo Hovey of Butler University.

Braeuer developed the first music department at the Boys Clubs of America while serving as music director of the Milwaukee Boys Club. When teaching in Hammond, Indiana, his high school band received 1st division ratings from the Northern Indiana Music Educator's Association meeting.

Concerning his evaluation of the quality of our music department, Mr. Braeuer has this to say:

"Even though I have been working with bands in the Southwest for the past ten years, I have managed to keep up with what is going on in the band world throughout the rest of the country.

My many band director friends have informed me that your music department is one of the very best in the state of Wisconsin, so may I say I will be most happy to work with you and your department starting this September."

Director of Campus Laboratory School Reports

The function of the Campus Laboratory School has changed significantly the past two years. Experimentation and research has replaced the function of student teaching. All student teaching is conducted in school systems of Central Wisconsin.

The need for experimentation in methodology, context and learning is frequently voiced by educators, politicians, school boards, psychologists and parents. The Campus Laboratory School provides a setting for such experimentation.

Evidence of the new role is some of the new innovations instituted in the Campus Laboratory School curriculum. The fourth grade, this year, will continue the project in violin instruction began last year. The children learn to play the violin via a method of teaching based on theory developed by Shinicki Suzuki. This theory starts with the premise that all children are born with great potentialities and that each individual has within himself the capacity for developing these talents to a high level. The program encourages each child to set his own pace and realize the satisfaction of achievement.

At the junior high level students are planning their own program for one day per week. Teachers counsel with students individually to help them set realistic goals for achievement. This program, as well as the one discussed previously, emphasizes

the individual. Students work on a variety of projects; library research and recreation reading, research in the science laboratory, developing reading speed and comprehensive skills, working on an out project, rehearsing for a musical show, working with an instructor on special projects, using the language laboratory, using programmed materials in math learning about computers or the slide rule, and a host of other activities. This program will be developed further to incorporate more grade levels and days during the week. This program implements a major goal of the Campus Laboratory School, namely, individualized instruction, that is helping students to establish goals for themselves and achieving them.

Mr. Coaty, the fifth grade instructor, has utilized belt recording devices to help individualize instruction in the language arts. This includes learning to type on electric typewriters. The skill of typing is then used for classroom activities including writing themes, spelling tests, newspaper, and special assignments. It is interesting to note that penmanship and language skills have improved considerably.

Planned for this school year, 1965-66, is highly individualized, non-graded, primary program. More emphasis will be placed upon individualized instruction throughout the entire Campus Laboratory School.

T. J. Snowden

Promotions Announced at WSU-Stevens Point

Promotions of 17 faculty members were announced recently which were authorized by the Board of Regents. These changes included:

From instructor to assistant professor: **BIOLOGY** - Gordon Geeseman; **LIBRARY** - John D. Gillesby and Alice Padden; **GEOGRAPHY** - John D. Kapter; **ECONOMICS** - Milton E. Sorensen.

From assistant professor to associate professor: **MUSIC**-Dean

G. Blair; **SPEECH** - Gerald F. Johnson; **FOREIGN LANGUAGE** -Alexandra Kaminska; **LIBRARY** -Syble E. Mason; **GEOGRAPHY** -William M. McKinney and Maurice E. Perret; **HISTORY** -Waclaw W. Soroka; and **MATHEMATICS** - Henry H. Thoyre.

From associate professor to professor: **ENGLISH** - Michael J. Fortune and Joseph J. Roney; **EDUCATIONAL** - Hildegard R. Kuse; and **SPEECH** - Alice L. Peet.

From the School of Fine Arts

Dr. Robert Cantrick, Dean

Mozart's opera "The Marriage of Figaro," and Tennessee Williams' play, "Summer and Smoke," will be among the outstanding events scheduled for the fall season by departments in the School of Fine Arts. Alumni and friends returning to the campus during the fall will find one or more programs in the arts available to them every week from September to Christmas. For their convenience in making plans, a complete calendar is included in this issue, giving dates, times and places.

Seldon Faulkner, Chairman of the Department of Speech and Drama, announces that William's well-known modern drama will open the theater season on October 13th through 16th. The second play of the season will be Noel Coward's "Private Lives," scheduled for December 8th through 11th. Following an annual custom, the department will be host to several high school groups during the fall, notably the forensic clinic on Saturday, October 2nd and the district drama contest on Saturday, October 30th. Two evening hours of interpretive reading are scheduled, one on Monday, November 1st and the other on Monday, November 29th.

Herbert Sandmann, Acting Chairman of the Art Department during Henry Runke's first-semester leave, announces that the art exhibition series will open in the library theater gallery October 18th with a show of prints by A. Thrall. The second exhibition of the fall season will open just before Thanksgiving and run until Christmas vacation. It will feature the sculptures of L. Wineberg.

Hugo Marple, Chairman of the Department of Music, announces the production of Mozart's famous "Figaro" November 17th through 20th in the University Auditorium. The gay tunes and sparkling libretto of this opera have made it a favorite of audiences for generations. That

traditional presentation of the Christmas season Handel's "Messiah," will be hung in the field house Sunday evening, December 5th, with both townspeople and students invited to participate. The Stevens Point Symphony Orchestra has programmed Donald Rupert of the piano faculty as the soloist for during the last week of October. The symphony, which last year entered into a closer working relationship with the University, had one of its most successful seasons in 1964-65. University support will be renewed during the 1965-66 season. A number of the music faculty will give solo recitals during the fall, most of them on Sunday evenings. The fall concert of the choir will be given just preceding Thanksgiving, on Tuesday, November 23rd, in the University Auditorium.

The past summer was notable for the continuing progress of the Summer Theater and the Point Music Camp, as well as for the introduction of a new series, entitled "Artists at Work." The latter was the brainchild of a faculty committee, and it featured artists in five different fields, who took the audiences "behind the scenes" to show how a work of art comes into being. A highlight of the series was the appearance of the New York dancer, Ruth Currier.

Enrollment in the Point Music Camp reached a record 550. Participating students from both the senior and junior high school level enrolled in a broad program of activities including orchestra, choir, band, private instruction, and various classes. The senior and junior high school level enrolled in a broad program of activities including orchestra, choir, band, private instruction, and various classes. The camp faculty included, for the first time, a woodwind quintet which performed on several evening concerts, including one of the "artists at work"

programs. The camp's newest venture, the junior high school string orchestra program, doubled its enrollment.

Summer Theater audiences were bigger than ever — 300 to 400, week in and week out, rain or shine. The resident com-

pany of 10 actors and two directors, most of them semi-professionals from the East, were enthusiastically received. William Kramer, Assistant Professor of Speech, was the director.

New Speech Department Chairman Selected

One of the top college theater directors in the country has joined the WSU faculty this fall as professor of drama and chairman of the department of speech and drama. He is Seldon Faulkner, formerly director of the University Theater at the University of Colorado, Boulder.

Mr. Faulkner graduated cum laude with the B.A. degree from Shurtleff College, Alton, Illinois, in 1953. He took his M.A. dramatic arts at St. Louis University in 1954, and then moved on to the State University of Iowa to earn his Ph.D. in dramatic arts in 1957. From 1957 to 1959 he was on the faculty of St. Louis University, where his duties included the direction of the University theater and theater history. In 1959 he moved to the University of Colorado, where he remained until this year. Considered by the University of Iowa as one of their outstanding grad-

uates, he was recalled in the summer of 1964 to direct the summer opera program in Iowa City.

In 1961 Mr. Faulkner directed the Far East tour of the University of Colorado theater production for the American Educational Theater Association, the U.S.O., and the departments of state and defense. The production was the musical comedy, "Bells are Ringing." Traveling some 25,00 miles, the troupe visited Japan, Korea, Formosa, Phillipines, Guam, and Hawaii, performing for Americans and university students. During the tour Mr. Faulkner was invited to be guest lecturer at Waseda University in Tokyo, the Toshi Cultural Center in Tokyo, Dongkook University in Seoul, Korea, Chungang University in Seoul, and Taipei International House in Taipei, Formosa.

Musical theater has been one of Mr. Faulkner's chief interests. Notable among the many musical comedies he produced in Colorado was his direction of "Brigadoon," with the Denver Symphony Orchestra at the Red Rocks Music Festival.

Mr. Faulkner is a member of the College Curriculum Committee of the American Educational Theater Association, as well as of the AETA Music Theater project. He is a member of the American National Theater and Academy.

While in college, "Scotty" Faulkner met and married Dona Clark, a student of music education. The Faulknors now have two children: Julie, age 7½ and John, age 6. They are residing on Union Street at the corner of Maria Drive in Stevens Point.

Thirty Years of Singing

A history of the MEN'S GLEE CLUB of W.S.U.

At the direction of President James H. Albertson, a story of the MEN'S GLEE CLUB was completed this summer by its Director with the able assistance of LELAND M. BURROUGHS, PROFESSOR EMERITUS.

The hundred pages are a story of the origin, purpose, Constitution, and experiences of the over eight hundred men who have been members of this unique, non-credit organization.

THE MEN'S GLEE CLUB began when a group of twenty eight young men decided that they wanted to have a male chorus. "We're not opera singers but we like to sing," was their challenge. They met one day in October, 1933 with late President FRANK S. HYER, and asked NORMAN KNUTZEN, then fresh from his affiliation with the LAWRENCE GLEE CLUB to become their director. Intent on hearing a singing group open to any male student with voice enough and interest in singing as a group, it has continued, with the exception of World War 2 years, into the present, and shows no inclination to change its purpose or its service.

Rather than the formal chapter by chapter plan, the story moved along through the early years, the first one-day tour to high schools at Antigo, Merrill, and Rhinelander, to the later years when it has taken Spring Vacation tours to Miami, (three times), New York, (Twice), Washington D. C.; New Orleans, and Denver.

Outstanding experiences of the GLEE CLUB at home and away

through eight states with a total number of over five hundred concerts before national and state number of over five hundred conventions, church concerts, high school assemblies, civic groups, and many types of informal concerts. Among the interesting pages are letters from alumni now scattered over the United States and foreign countries.

While the plan has been rather to have this a story rather than a study with statistical information about miles traveled, costs, and other factual paragraphs, this tells of the number of times the club has sung in Wisconsin towns and cities together with an alphabetized list of the members (from the start), together with the complete repertoire of over four hundred songs.

The part dealing with the Annual Banquets brings in our faithful Masters of Ceremony who have not missed a gathering in over twenty years — EDWARD PLANK and GILBERT FAUST. There is also a page recording the ACCOMPANISTS pages with the HONORARY GOLD KEY MEMBERS, a Page from DR. WILLIAM CLEMENTS — A Twenty Five Year member of the GLEE CLUB, and still very active.

Another feature, too large to include in the story properly, is a large framed map of Wisconsin showing the towns and cities where the boys have sung. It was prepared by Prof. Raymond Specht of the CARTOGRAPHY COURSE, and drawn by Alex Millar, a student, and also a member of the 1965 GLEE CLUB.

A special acknowledgement by the Director closes the story.

Dr. Trytten Reports for the Chemistry Department

A National Science Foundation grant of \$24,000, matched by an equal amount from the state, has enabled us to modernize our chemistry department, in keeping with the surroundings in the new science building.

The effect of the grant is being felt at all levels. Several new experiments have been added in the general chemistry

course, and more will be added next year. The sophomore quantitative analysis course has been completely overhauled; much of the traditional gravimetry and volumetry has been eliminated or included in the general chemistry course, and experiments on potentiometric titrations, pH titrations, spectrophotometry (we now have

enough spectros for a class of 20), and an introduction to other instrumental methods have been included.

The addition of two Rubicon potentiometers, two conductivity bridges, a DK recording spectro, and a Beckmann IR-5 makes our physical chemistry laboratory considerably more exciting. Physical chemistry is now required for a major; one semester is the minimum, and we strongly recommend two. In fact, within the next year or two the requirement will be raised to a full year of physical for all majors. Physical chemistry classes are now larger — 8 this year, at least a dozen next year.

Our biochemistry course also profited from the NSF grant, to the extent of a high-speed centrifuge, a precision constant-temperature bath and a Warburg respiratory apparatus. With the help of this equipment, we can offer an up-to-date and interesting laboratory program in biochemistry. This course has become our most popular "100" course in chemistry; there are 30 students in it this year.

Two courses beyond physical, which have been in the catalog several years but offered only "when demand warranted," will be put on a yearly basis beginning in the fall of 1966. They are Chem 141, advanced inorganic, and Chem 140, advanced analytical. The latter can now

be an instrumental analysis course, complete with ion exchangers, gas chromatographs, and the aforementioned spectros, particularly the DK-2 and the IR-5. We still have our old hand-operated polarograph. But we have a new potentiometric recording titrator; won't the boys in Chem 140 enjoy using that!

Besides the NSF grant, the physics and chemistry collaborated on a successful request for a \$12,000 grant from the Atomic Energy Commission. This year we have concentrated our attention on the development of a modern nuclear physics course, complete with laboratory. Next year we will work on incorporating some radiochemistry work into our chemistry courses, particularly physical and advanced analytical.

One man will be added to the chemistry staff next year. That will give us an 11-man staff. We will be running 7 sections of Chemistry 4a-b (renumbered 7-8), 9 sections of Chemistry 2a-b (renumbered 5-6), and three sections of Chemistry 1, for a total of 19 sections. They will probably average about 27 students per section, which will mean about 500 students taking freshman chemistry alone. Can you remember when the total enrollment of the college was less than 500? Many of you can.

Biology Department News

Homecoming open house for Alumni who majored in the Department will be at 9 a.m. Saturday and again for a period of time after the game. Come and meet your friends, tour our facilities, and visit with the staff. Mr. Searles and Mr. Bowen have left us to accept positions elsewhere. Mr. Simpson has a one-year leave of absence to obtain his Ph.D. at Iowa State University. During the absence of Mr. Simpson, Arol Epple is acting chairman. In addition to filling these vacancies, five additional staff members have been employ-

ed.

Of interest to visiting alumni at Homecoming will be our audio-tutorial program for teaching botany. We are one of the few schools in the nation to be using this program. It is so different a teaching method that you will have to see it to believe it. The program centers around 32 tape decks that are arranged in individual booths in the laboratory.

The Department welcomes you to its open house! Bring your family and your friends. Be sure to come! So-long for now; we hope to see you at Homecoming.

Edmund G. Facklam Winner of the 1965 Professional Study Award

Edmund G. Facklam, principal and teacher at the Manawa Graded School, Manawa, was the recipient of \$200 for the 1965 Professional Study Award in original elementary research and study. Mr. Ervin S. Yanke, West Allis, chairman of the Scholarship Committee presented the award at the Annual Wisconsin Elementary School Principals Convention in May.

Mr. Facklam's paper is titled A Survey of Physical Education Programs and Facilities for

Grades Seven and Eight of Selected Schools in Waupaca County. Some of the objectives that the Scholarship Committee set up for the Professional Study Award were: to encourage studies and research in the field of elementary education; to make this material available to teachers, principals, and others working in the elementary field; and to improve the education for the boys and girls in our schools.

Members of the judging panel were: Dr. Gordon Boardman of the State Department of Public Instruction, Dr. M. Vere DeVault of the University of Wisconsin, Madison and Mr. Walter Engelke, Principal of the Nakoma School, Madison, who acted as chairman of the committee.

A fifteen-hundred word summary of the research study will be submitted by Mr. Facklam and will appear in the fall issue of the Elementary Principals publication.

Mr. Angus Rothwell, State Superintendent of Public Instruction; Mr. Hal Goodnough, speaker for the evening; Mr. Carroll Swenson, retiring president of WESPA; Miss Helen Ferslev, Green Bay, NESPA president; and Alice in Dairyland were honored guests at the speakers table where Mr. and Mrs. Facklam were also seated. Approximately 600 people attended the banquet.

Point Art Major Receives Awards at Exhibition

William Landwehr, '64 now teaching at the Whitnall High School, Hales Corners, has exhibited his productions at numerous centers, fairs, festivals and art salons. Beginning in 1962 at the Wisconsin State Fair, he has exhibited at Madison, Decorah, Iowa, Racine, Milwaukee, Minneapolis, Waukesha, and Stevens Point. Finan-

cial Awards from \$100 to \$150 have been received and honorable mention in other exhibits. Mr. Landwehr is a member of the Wisconsin Painters and Sculptors, Inc., Milwaukee Area Teachers of Art Association, and the Wisconsin Art Education Association. He is married and the father of one son.

Recent Pointer Receives Promotion

Robert J. West, '62, assistant director of the Miami University Center since December 1962, has resigned, effective July 31, to become manager of the University of Michigan's new North Campus Common at Ann Arbor.

The Common serves an entirely new campus adjacent to Michigan's Central Campus. A \$2,000,000 building now devoted primarily to food services, it is to be expanded soon through addition of a conference center provided by a \$2,000,000 grant from the Chrysler Corporation.

West also will be in charge of all vending operations on the new campus.

West came to Miami from the staff of the student union at Ball State University, Muncie, Ind., to become assistant to Richard T. Bystrom, director of the Miami University Center. Bob graduated from W.S.U. — Stevens Point with a major in economics.

The facility which he will direct at Ann Arbor is a student center in addition to the

Michigan Men's Union and the Michigan Women's League. When expanded, it is expected to serve a wide variety of student and public activities.

Pointer Commended as a Leading Wausau Educator

Miss Aileen Collins '44, who has held numerous important positions in the education programs for over 35 years was recently honored as a leading Wausau educator. Since she began her educational career in 1930 at the Langlade County Normal to her present position as reading specialist and school psychologist in Wausau, she has taught in rural and state praded schools and in several grades in the Wausau school system. Through summer schools and extension courses and two years on the W.S.U. — Stevens Point campus, she earned her bachelor's degree in 1944. She has since earned the master's degree and attended summer sessions at various universities to add 30 more graduate credits to her record. The latest sum-

mer study '64 was a three week workshop for emotionally disturbed children at the University of Arizona. Most of her summers are devoted to workshops in reading or other subjects related to her present assignment. When her study has been completed, she takes time to visit areas of interest with numerous side trips on her return. Her home at 416 Maple Street contains items of interest that she has gathered while traveling not only at great distances but throughout Wisconsin. In describing her present work which she considers to be most interesting and challenging, Miss Collins reflects the youthful spirit and enthusiasm which has prompted her recognition as a leading Wausau educator.

Mrs. Williams Honored at Retirement Dinner at WSU

Mrs. Mildrede Williams, assistant professor of education at Wisconsin State University's Campus Laboratory School, was honored at a retirement dinner recently at the University Center.

Mrs. Williams, who has taught for 35 years, has been at the Campus School here for 25 years. For the past 23 years she has served as 3rd grade supervisor there. She retired at the end of the second semester.

Mrs. Williams received a B.A. degree in primary education in 1932 from Iowa State Teacher's College and an M.A. from Teachers College, Columbia University, in 1940. Mrs. Williams also did advanced degree work at the University of Hawaii, Honolulu, in the summer sessions of 1951 and 1954, and took a WSU European study tour in 1962.

She was married to Lt. William C. Williams Jr. of the U.S. Air Force, who was killed during maneuvers at Dodd Field, San Antonio, Texas. Their only child, Prof. William Appleman Williams, is a member of the history department, University of Wisconsin, Madison.

Memberships are held by Mrs. Williams in the Wisconsin Education Association, the National Ed-

ucation Association, Association of Wisconsin State University Faculties, Wisconsin Association of Childhood Education International, Delta Kappa Gamma, Kappa Delta Pi, Sigma Tau Delta, Order of Eastern Star and the Wisconsin Society for Ornithology. For years she was a member of the American Association of University Women and the Presbyterian Choir and for seven years she served as adviser for the Tau Gamma Beta Sorority, now Delta Zeta.

During World War II, Mrs. Williams was the chairman of social committee which planned and carried out a weekly canteen dance and party for the U. S. Air Force Cadets trained here and later for the Navy men who were housed in the first floor of the Campus School.

She has served on many college committees including the "president's committee" which was faculty elected to aid in the selection of a new president for this university.

Mrs. Williams was born and raised in Atlantic, Iowa. She has a home there but she plans to live in Stevens Point for the present.

Dr. Lehman Reports for the English Department

The English Department at Stevens Point is getting more and more notice throughout the state system.

Part of this is due to the increasing number of published works of members of the department and part is due to the great increase in the number of Ph.D.'s in English.

A list of the English Department members who have published in their areas of interest would include:

Mr. Burress in censorship and folklore; Mr. Chapman in Negro poetry and Whitman; Mr. Fortune in Dante; Mr. Friedman in parts of a novel; Mr. Lehman in rhetoric and Shakespeare; Mr. Stevens in Arnold and Galsworthy.

Ph.D.'s in the department are:

Lee A. Burress, Jr., Chairman, Abraham Chapman, Michael J. Fortune, Alan Lehman, Leon E. Lewis, Joel C. Mickelson, Joseph J. Rondy, Mary Elizabeth Smith and Earl E. Stevens.

Wilfred G. Richert, who is starting his third year in the department, will receive his Ph.D. at the end of the current semester. Working on Ph.D.'s in the university teacher improvement program are Richard W. Doxtator and Hazel Koskenlinna. Ten years ago there was only one Ph.D. in the English Department at Stevens Point.

The English Department is considered one of the strongest English Departments in the State University System.

Maria Head Gets Notice of Transfer

Sister Mary Adalbert, principal at Maria High School, has been transferred to another post for the 1965-66 school year.

She completed the prescribed six-year term in 1964 at Maria, was asked to continue as the school's principal for another year. Her successor will be named by Provincial Mother Mary Eustella of the Sisters of St. Joseph of the Third Order of St. Francis.

For the summer, Sister Adalbert remained at Maria to work out class schedules and check

the building for needed repairs.

She was honored for her years of service at Maria during Class Day exercises at the school.

Sister Adalbert came to Maria in 1954 as a teacher in the business department. After a year's leave of absence in 1957-58, during which she completed work on a master's degree in educational administration, she returned to Maria as principal in the fall of 1958.

At the program, Kathleen Skalski, Student Council president, introduced the president of each division, who presented gifts to Sister Adalbert, and said that "because of her we have grown and are continuing to grow in wisdom, service and love."

"A foundation gives stability to a building. The deeper and firmer the foundation, the higher and sturdier the building," stated vice-president Sister Mary Bonizella.

She said a school's effectiveness is determined largely by the person in charge. "A high school principal," she asserted, "must have the energy of a harnessed volcano, the efficiency of a computer, the memory of an elephant, the understanding of a psychiatrist, the wisdom of Solomon, the perseverance of a spider, the patience of a turtle trying to cross a freeway in rush hour, the decisiveness of a general, the diplomacy of an ambassador and the financial acumen of a Wall Street Wizard."

She credited Sister Adalbert with these qualities.

Pointer Grad Heads Guidance

From the Counseling Laboratory at Indiana State College, Terre Haute, we have learned that Gerald Foster, '55, is the present director. He completed the requirement for his master's degree at the University of Michigan in 1960 and his doctorate in counseling psychology in 1962. His duties include personal counseling, teaching un-

dergraduates psychology courses, and graduate courses in guidance and counseling. His family has grown from five to seven with a daughter enrolling at Indiana University this fall. His home was Marshfield. He began his teaching career at Oconto. W.S.U. is proud of the progress our graduates have made.

Pointer Grad Elected President of ACEI

Dr. Dell C. Kjer of North Texas State University was installed as president of the 93,000 member Association for Childhood Education International this summer in New York City.

He thus becomes the first man ever to head ACEI, one of the nation's oldest education groups. The organization has field and collegiate chapters in the United States and many foreign countries. It publishes the professional journal *Childhood Education*.

Chosen by a mail ballot of ACEI members, Dr. Kjer was installed for a two-year term during a general session. The installation highlights the final day of the association's week-long annual study conference which opened Easter Sunday.

On hand for the ceremony was Dr. Kjer's family: Dr. Richard S. Hambleman, Mrs. Mary Glenn Peery and Dr. Peggy R. Wildman of the NTSU education faculty; and NTSU students, Elizabeth Robertson, Grand Prairie; Nancy Nobles, Orange; and John Teddlie, Houston.

Dr. Kjer has served the association the last two years as vice-president of Kindergarten education. He has been a member of ACEI's bulletin planning committee and executive board.

In Denton his election was termed by Dr. A. Witt Blair, dean of the NTSU School of Education, as "among the highest

honors any member of our faculty has ever received."

Founded under its present name in 1930, ACEI is an outgrowth of the International Kindergarten Union, dating back to 1892.

From its organization and first meeting under its present name in 1930, ACEI has led other national organizations to adopt many of its initial practices — such as the use of study groups, conference themes and general meeting procedures.

In his 31 years of teaching experience, Dr. Kjer has worked with students at every level from the nursery school through graduate school. He joined the NTSU School of Education faculty in 1950.

A native of Wisconsin, Dr. Kjer graduated from Wisconsin State University in August 1942 and received his master's and doctor's degrees from the George Peabody College for Teachers.

He is a faculty sponsor for the NTSU chapter of ACEI and a member of numerous professional organizations, including the National Education Agency's Department of Elementary - Kindergarten - Nursery, the National Association for the Education of Young Children, American Association of University Professors, Kappa Delta Pi, honor society in education, and Phi Delta Kappa, national professional education fraternity.

Miss Vivian Culver is Author of Book

A native of Almond and a former student at Wisconsin State University is the author of her second book on nursing.

Miss Vivian Culver, curriculum specialist, practical nurse education, State Department of Education, Florida, is the author of a new 6th edition textbook for nursing, "The Practical Nurse."

The ex-Almond resident was the author of what was labeled the 5th edition of "The Practical Nurse," published in 1959, also on nursing practices. The recently published new edition

has been adopted for use in 40 states and five Canadian provinces. It also is used by the armed services here and abroad.

Miss Culver, sister of L. D. Culver, Minocqua, currently Agency Co-ordinator for district 2, conducted a week — long workshop on "Wisconsin Practical Nursing Program" for nursing instructors at the University of Wisconsin — Madison, in May. The conference was sponsored and initiated by the Department of Nursing of the University Extension Division.

According to a brochure prepared by the publisher, the 573-page new edition is "A strikingly redesigned and high effective learning tool for practical nursing students. It is a textbook covering the entire scope of the practical nursing curriculum, revolving around the patient's nursing needs and the knowledge students require to provide them." Coverage ranges from basic knowledge of anatomy and the etiology of illness to detailed information on the specific duties, techniques and responsibilities of the practical nurse, according to the brochure.

Miss Culver, daughter of the late Mr. and Mrs. Oscar Culver, spent her early years in Almond where she was graduated from high school. Her

father owned and operated a flour and feed mill there for many years. After attending the local university, Miss Culver taught school for several years before going to nursing school at Michael Reese Hospital, Chicago.

Miss Culver, a registered nurse, has bachelor and master's degrees in education. She was formerly education director, Florida State Board of Nursing; executive secretary and educational consultant, North Carolina Board of Nurse Registration and Nursing Education; director of nursing education, Broadlawn Hospital School of Nursing, Des Moines, Iowa; and educational director and instructor, Christ Hospital School of Nursing, Topeka, Kansas.

Pointer Grad of '13 Author of Astronomy Book

A welcomed visitor to the campus this summer to note changes which have taken place over the years was Clifford N. Anderson, formerly of Scandinavia, Wisconsin. He is now living in Florida 2605 Castilla Isle Fort Lauderdale, Fla. but finds his return to Wisconsin both pleasant and rewarding.

At the age of 15, when he had completed the 9th grade at Scandinavia, he enrolled at the State Normal School in the three year course. In June, 1913, he received a diploma.

His undergraduate and graduate studies were in Physics at the University of Wisconsin and in Waterpower Engineering as an American-Scandinavian Foundation Fellow to Norway. The greater part of his career has been in radio system engineering with the American Telephone and Telegraph Company and the Bell Telephone Laboratories. In 1923, while with the former, he was engaged in the analysis of considerable radio-transmission data obtained in connection with engineering the first radio-telephone circuit between New York and London. It was during this period that he discovered the relation of solar disturbances and abnormal radio transmission data obtained in connection with engineering the first radio telephone circuit between

New York and London. It was during this period that he discovered the relation of solar disturbances and abnormal radio transmission, the first to do so. His studies of the periodicity of sunspots and other aspects of solar disturbances led to his extending his interest to more general astronomy. He has taught Engineering Physics at the University of Wisconsin, Communication Systems at Cornell University and Solid State Devices at the University of Miami. His service in the U. S. Navy in World War I was in aviation as a Radio Ensign and in World War II in Loran design as a Commander. He is a Fellow in the Institute of Electrical and Electronic Engineers.

Mr. Anderson has just published with Vantage Press, Inc. New York, his book entitled, *The Solar System and the Constellations*. This has been designed as a guidebook for the layman and the amateur astronomers and presents the solar system, the constellations, biographical sketches of astronomers (chronologically arranged to show milestones in the history of astronomy), moon charts, star charts, and photographs of most of the interesting celestial objects that fascinate man, and a 40-page list of stars, clusters, nebulae and radio sources.

Pointer Alums

CATHERINE (RECODY) SCHLAIS, '65, is teaching first grade in New Glarus, Wis. this year. Her husband, Dennis, a 1964 graduate of WSU, received a project assistantship through the University of Wisconsin, Madison (Extension Division) the past summer. He also has an appointment for the 1965-66 school year. The two are living in New Glarus.

JOHN CHECK, '52, his wife, and three children (Gregory, 10, Deborah Anne, 7, Patricia Anne, 4) have been at the University of Michigan, Flint College, since receiving his degree at the University of Wisconsin. In the past several years articles written by Dr. Check have appeared in state journals and newspapers in Michigan and outlying states. During the second semester of the 1966-67 school year research in the area of Creativity will be conducted by him. Presently most of his time is devoted in compiling materials for the remaining chapters for a textbook in Methods of Teaching Arithmetic which is to be in galley proofs by September of 1966. Teckla Check, his wife, is back at school enrolled at the Flint Junior College. With duties of the house and her obligations to her children as well as school assignments, she does find a little time for bridge with the Faculty Wives and an occasional bowling date. The Checks live at 817 Dell Avenue, Flint, Michigan.

EVERETT R. MOORE, '54, is Director of Pupil Personnel Services and School Psychologist of the Watertown School System, Watertown, Wisconsin. He received a M.S. degree in guidance and counseling in 1955 from the University of Wisconsin, Madison and has done post master's work at UW-Madison and Marquette. Mr. Moore serves as State Coordinator for Wisconsin members and chapters of Phi Delta Kappa, professional fraternity. He is active in civic affairs and organizations—Loyal Order of Moose, American Legion, and Masonic Lodge. He is married and has two children. The Moores live at 121 N. Concord Avenue, Watertown Wis. A graduate of 1958, FRANK D. HANSEN has been teaching mathematics at Preble High School, Green Bay, Wis. since graduation. He received four National Science Foundation summer grants, resulting in the Master of Science degree with a mathematics major from the University of Oregon in 1963. During the summer of 1964 he traveled through six European countries.

HELEN GRUETZMACHER, '63, taught for two years at the Butte des Morte Junior High School, Menasha, Wis. in the field of home economics. The past summer she attended the University of Hawai and enrolled in a course on "Foods of the Pacific." She also toured Hawaii and va-

cationed there. This fall she is teaching home economics at Charles B. Whitnall High School, Hales Corners, Wisconsin.

DON L. DANIELSON, a 1959 graduate, is married to the former Marie Casberg, a graduate of 1960. They have three children, Mark, 5, Marsha, 3, and Marie, 1. Don taught general science and conservation in a Detroit suburb for four years. He assisted the late Prof. R. L. Weaver at the School of Natural Resources, University of Michigan while completing M.S. requirements in conservation. He accepted a one-year (1961) NSF grant to Wayne State University, Detroit, in Recent Advances in Biology. In August, 1963 he accepted a position with the Milwaukee Public Museum. The museum fieldwork has included film production in Door County, Horicon Marsh, Buena Vista Marsh, Isle Royale and Ontario. The Danielsons live at 2944 S. Wentworth, Milwaukee.

EARL STREL, '61, recently completed one month of applied sales training at the International headquarters of Cutter Laboratories at Berkeley, California.

BETH (JAHNKE) HOSKINS, '60, is retiring from teaching for the present time after four years. She is married to Larry E. Hoskins, a graduate from WSU-River Falls, and they have one child at present, Jolene Jenice, who is 3 years old. They are expecting another child in October. Last year Beth taught at New Richmond Jr. High School and also was supervisor of Stout student teachers. The Hoskins live at 419 E. Spring St., River Falls, Wis.

JOSEPH J. RUCINSKI, '58, received a Master of Science degree from the University of Wisconsin, Madison in August, 1964. He is married to the former CAROL MIDLIKOSKI who is a 1965 graduate of WSU. Mr. Rucinski taught sixth grade at Eau Claire for five years; he was Principal (half time) at Marshfield for two years. He now serves as Supervising Principal of Washington, Jefferson and Nasonville Schools. The Rucinskis live at 111 Parkview Terrace, Marshfield, Wis.

During the summer of 1965 ISABELLE M. BRANDT, '63, traveled to Perth, Australia. She spent eight weeks there, plus two weeks in Canberra. She also made short stops in Denver, Los Angeles, Hawaii, Bangkok, New Delhia, and New York. Isabelle teaches at the Winkler School in Niles, Michigan. ROSS R. PAPKE, '53, who has served as district administrator for the Montello School System, is working on a United States Office of Education project at Madison. He is serving as the researcher for Project S-356, "A Synthesis of Research Pertaining to School Buildings Conducted by Educators and Architects." Mr. Papke obtained a master's degree

in education administration at the University of Wisconsin, and previously taught in Brookfield. He is married and has one daughter. DAVE WILLIAMS, '39, a 26-year veteran of teaching and principalship in the Janesville school system, is heading the new Jackson Elementary School in Janesville. He received his M.S. degree from the University of Wisconsin in 1952. Williams was honored in 1964 for his 25 years in education. REV STASSELL ACCEPTED FOR INTERNSHIP

The REV. DONALD M. STASSEL, son of Mr. and Mrs. Fred Stassel, Route 4, Mosinee, former Stevens Point residents, has started his duties in a clinical pastoral internship training program at State Hospital No. 1, Fulton, Mo.

Prior to his acceptance in the program, which he began June 8 and will complete Aug. 31, 1965, the Rev. Mr. Stassel was pastor of the First Methodist Church, Union Grove.

In the Fulton program, which is under the leadership of chaplain supervisor, the Rev. William F. Rogers, Ph.D. the Rev. Mr. Stassel works in psychotherapy and psychiatry and preaches in juvenile wards with mentally disturbed in mental hospitals.

The Rev. Mr. Stassel was appointed to the Union Grove church on June 1, 1960, by Bishop H. Clifford Northcott. The following June 15, he was accepted at Southern Wisconsin Colony and Training School and subsequently appointed by Bishop Ralph T. Alton as a part-time Protestant chaplain there. Since July 1961 he has served as administrator of the Protestant chaplaincy program. He was vice president of the Teacher-Parent Council of the Racine-Kenosha County Teachers College for two successive terms.

At the 1964 spring quarterly conference of the Union Grove church, it was voted unanimously to have the pastor return for the 1964-65 conference year.

RANDOLPH W. FACKLAM, '42, has been appointed by the Wisconsin Rapids Board of Vocational, Technical and Adult Education to the full time administrative position of student services coordinator. He joined the VTA School staff in 1946 as an instructor of social science and English. In 1950 he was appointed principal of the continuation program and in 1962 he became a part-time student services coordinator in the post high school program of the school. Mr. Facklam received his master's degree from the University of Wisconsin and has taken advanced study at the University of Wisconsin and Stout State University.

Serving as Principal at the State School for Visually Handicapped is 1951 graduate ROBERT OKRAY. He received his M.S. degree at Superior State University. He took special education work for working with the visually handicapped and was a teacher and administrator in public schools for 11

years prior to his current assignment.

CLAUDIA YELK, who graduated at mid-year ('65), is presently serving as art instructor at Alonzo Aldrich Junior High School in Beloit, Wis. During the past summer she had served as arts and crafts instructor at a private girls' camp in Vermont.

MR. and MRS. JACK BURROUGHS, who teach at the Appleton High School, are one of Fox Valley's teaching teams. Mr. Burroughs, '36, a biology teacher, has an English minor; his wife, an English teacher, has a biology minor. Mr. and Mrs. Burroughs have been teaching together at the school for nine years. Before that time, Mrs. Burroughs, '41, who is head of the English department, served as a substitute teacher, tutored the homebound, and was librarian at Appleton Public Library and the Institute of Paper Chemistry. The couple is part of a large family of teachers. Mr. Burroughs' father has been head of the English department at WSU, and his mother teaches English at Stevens Point High School. His sister and brother-in-law are teachers in the Wausau Public School System, and Mrs. Burroughs' sister teaches English.

CHARLES GRABSKI, '62, joined the staff of the Taylor County Welfare Department at Medford, Wis. as a second case worker. He is married and has two children.

Mrs. PETER WYSOCKI, '65 will be teaching third grade in Poynette, Wis. She is the former SHARON ENGLISH of Merrill.

THOMAS TALAREK, Two Rivers, who was graduated from WSU in Jan., 1965 with a B.S. degree from the school of applied arts and sciences, has been engaged as a ranger at Everglade National Park.

Serving as an administrative assistant in the industrial relations department of Consolidated Papers, Inc., Wisconsin Rapids, is GERALD MENZEL, '59. After earning his bachelor's degree at WSU, he worked toward a master's degree at the University of Illinois.

BRUCE WITTENWYLER, '63, is teaching English at the Wisconsin Heights High School, Mazomanie, Wis. He graduated from WSU and also attended WSU-Whitewater.

RICHARD YENCHESKY, '60, has been named to the post of community school director in the Menominee Public School System (Wis.). His functions will be to direct a community program where public school facilities are widely used by local citizens. He will also work with the city's recreation department in coordinating a broader phase of that program. Yenchesky spent two years on the faculty at Stephenson High from 1960 to 1962 and served as assistant coach. He taught two years at Wausaukee High and served as head football coach and basketball coach from 1962 to 1964. He resigned his teaching and coaching position at Wausaukee at the

end of the 1964 term to accept a scholarship grant at the Mott Foundation in Flint to study for the role of community school director. Yenchesky earned a master's degree from Northern Michigan University in secondary school administration and community school administration.

TED FRITSCH, '42, who played fullback for the Green Bay Packers for 9 years, is presently director of athletics and football coach at Green Bay Premontre High School. Fritsch is well known to Packer backers for his outstanding performances with the Green Bay football club during the years from 1942 to 1951. After his graduation from WSU in 1942, he went immediately into the Packer organization. He took the position at Premontre in 1952 upon his retirement from the Packers.

ROBERT CHESEBRO, '60, has accepted a teaching position in the music department of Furman University, Greenville, S.C., for the academic year of 1965-66. Prior to this appointment he taught in the public schools of Hammond, Ind. He received a master's degree at Indiana University, Bloomington.

A graduate student in the University of Illinois School of Music, Urbana, PATRICIA (VAN SANT) FRILL, '63, presented her senior graduate recital on April 11, 1965. She received a Master's degree in music at the spring graduation.

ROBERT SCHACHT, '63, has assumed the position of fisheries biologist for the Iowa Conservation Commission office in Independence. He worked at various area stations before being assigned at Independence. In his new position Mr. Schacht will do general fishery research, including population estimating.

GARY EVJEN, '65, has started work in the Samoset Council scout offices at Wausau following a six-week training period in Schiff Scout Reservation at Mendham, N. J. He is the new district Boy Scout executive assigned to Rib Mountain District, which covers virtually all of Marathon County. He is married and has a daughter. He and his family live at 1312 Fifth St. in Wausau, Wis.

DR. BERNADINE H. PETERSON, '45, will transfer from Kansas State University at Manhattan,

Kan., to the University of Wisconsin, Madison, on Sept. 1, 1965. Dr. Peterson is a native of Neillsville and a 1941 graduate of Neillsville High School. She received her bachelor of science degree from WSU and was awarded master and doctorate degrees from the Madison university. During the past three years she has been on the Kansas University staff and previously taught at the University of Kansas in Lawrence, Kan. She will be assigned to the home economics education department at Madison.

GERALD SCHEEL, '56, has accepted a new position as football and wrestling coach at Greendale High School (Wis.) for the fall. He had been with the West Allis school system for eight years prior to this move. He earned his master's degree at the University of Wisconsin, Madison. He and his wife have four children. First-grade teacher, EILEEN HANSON, '64 began her teaching career in Door County, with training at the Door-Kewaunee Normal School and taught in rural, state-graded and village schools there until 1942. In 1942, she attended Kansas City Business Institute and worked in Washington, D. C. in the Radar Division of the Bureau of Ship of the Navy Department until 1946. Mr. and Mrs. Hansen moved to Poynette, Wis. in 1950. Mrs. Hansen's first grade of 1951, her first Poynette class, graduated from high school in Poynette in the class of 1964. In 1964 Mrs. Hansen received her Bachelor of Science degree from WSU.

Serving as principal of schools at Wisconsin Dells, Wis. is 1951 graduate, RONALD PIEKARSKI. Prior to this he served as supervising teacher for Portage County for several years and then became Portage County Superintendent of Schools. In Wisconsin Dells Mr. Piekarski is active in Kiwanis Club work, as well as other civic work for the city. He and his family take active part in the Dells Tourist Attractions Enterprises, helping tourists find their way around the many attractions offered there. Also in his activities for the betterment of the Dells was his participation in needy work at Waubeek, a camp for crippled children. Mr. Piekarski received her Master's Degree at Madison.

Strei of St. Paul Park, Minnesota announce the birth of twins, Adam William and Jane Elizabeth were born on Tuesday, July 27, 1965. They are the brother and sister of Jeffrey, age 3½.

In Memorium

Miss Ruth Hull, 71, a retired teacher, passed away at her home in Sheboygan, Wis. She had been in ill health for a number of years. Miss Hull graduated from WSU in 1914. She taught in a private school in Sherry (Wood County) and at Mattoon before returning to school and receiving her bachelor's degree from Lawrence College in Appleton in 1917. Later, she earned a master's degree in Latin at the University of Iowa. An English and Latin teacher, she taught in high schools in Park Falls, Sparta and Rugby, N.D., before going in Sheboygan in 1924. She taught at Central State High School there for 34 years before retiring in 1958. She is survived by her brother, who is retired editor of the Stevens Point Daily Journal, and two nieces.

Mrs. Walter Densch, 59, Beloit, Wis., died April 27 at a Beloit hospital. Mrs. Densch, the former Ruth Jaquish, was a graduate of WSU and had taught in schools in the Stevens Point area for a time. She was also supervising teacher at Algoma, Wis. Survivors include her husband; two sons and two daughters.

Funeral services for Mrs. Nina L. Olson, Stevens Point, were held at St. Stephen's Catholic Church on May 13, 1965. Mrs. Olson, the daughter of the late Mr. and Mrs. Judd Chenevert, attended Stevens Point schools, including WSU—then the Stevens Point Normal. She taught in city schools and was principal of the Grant School. Surviving are two sons, Don A., Two Rivers, and Robert T., Aurora, Ill. Prosper F. Kluck, 71, Stevens Point, died on May 9, 1965 at St. Michael's Hospital. A highway construction contractor throughout the Midwest and East, Mr. Kluck

attended high school in Stevens Point and was graduated from WSU when it was called the Normal School. He was associated with highway construction since 1921. In 1946, he formed a company with his sons, Kluck Construction Co., Inc.

Mrs. J. M. Bolon, 68, a resident of Stanley, Wis., died suddenly on May 1, 1965. She received her B.A. degree at WSU in 1944 and worked at the University of Alaska, Fairbanks, and the University of Salzburg, Austria, on her Master's Degree. Mrs. Bolon was an English and speech teacher in Stanley since 1948, which position she held at the time for her death. She was a world-wide traveler and enjoyed an extensive three months' world trip last summer.

Robert P. Kennedy, class of 1931, of 1743 N. 47th Street, Milwaukee, Wis., passed away in Stevens Point on June 9, 1965. Mr. Kennedy was Branch Office Claim Manager for Kemper Insurance. He is survived by his wife, formerly Josephine Terrill, also a graduate of the class of 1931, and by fourteen children.

Mrs. Edna M. Huhn, 67, Village of Almond, died on August 17, 1965 after a lingering illness. She was the daughter of Mr. and Mrs. Frank Trickey. She attended the Waushara County College and after graduation from the college attended Wisconsin State University—Stevens Point. Mrs. Huhn taught school in the Eager District School at Deerfield, and in the Oasis School in Waushara County, as well as in Merton, Tony, and Stratford. She also taught at the Spiritland Elementary School in the Town of Almond and in the Village of Almond schools.
