We need help maintaining momentum of excellence

By Chancellor Philip Marshall

The longer a person is at UW-SP, the clearer it becomes that this is a very good university and a very special institution.

Some of our programs have been excellent for a long time. Others have developed only recently. A decade ago

the dance program was virtually non-existent. Today, it is one of the very best in the Midwest. The program in managerial accounting is in its sixth year. Yet its graduates have consistently passed the CPA examinations in greater percentages than any other university in Wisconsin, and two alumni have scored in the top 100 in the United States (out of more than 60,000 people taking the test each exam period).

The program in natural resources is much older, having been started by Professor Fred Schmeckle in the 1930s. But its growth to prominence is more recent. The first full-time dean of the College of Natural Resources was not appointed until 1971. Dean Daniel Trainer is still with us and the College of Natural Resources is now the largest (and best) in the country.

UW-SP excels in nonacademic areas as well. Wellness is synonymous with UW-SP and the entire community of Stevens Point. The Pointer basketball

program under coach Dick Bennett has become one of the most solid and respected across the nation.

What are the reasons for the success of these and other programs? In each case the answer is people, very special people. It certainly is not money—not with the level of support provided by the state. Once one of the highest states in tax support per student, Wisconsin now is one of the lower ones in that category, being well below the middle. However, the decline in support has leveled off in recent years and shows some promise of a gradual rise.

The real question is why are those people here? That is a much harder question to answer. The new arrivals come because of those already here. The latter are here because of those who preceded them. Somehow, for reasons we'll never know (unless we want to attribute it to Point Beer), a critical mass of such individuals was assembled and others were attracted to it. Now, even when valued members leave to accept other challenges, as Bob Taylor (the former head of the Division of Business and Economics) and Dick Bennett (the former men's basketball coach) have done recently, other quality performers take their places. Excellence continues.

But these dedicated teachers need help; much more help than they have received in the recent past. They need more help from the state, and that may be forthcoming. But they also need more help from you, the alumni and friends of The University of Wisconsin-Stevens Point. In particular they need a more aggressive and effective annual fund drive which supports scholarships for the recruitment of outstanding students to be taught by these outstanding professors.

Currently we receive too little from too few. In future years we plan to increase the attention we pay to this aspect of our development operation. We will work to increase both the percentage of alumni who contribute and the average gift. This is essential as we work to sustain and even increase the margin of excellence of this university.

Old Main Building

A peek into the future

Enrollment is expected to remain quite close to its present count of 9,000 and construction will probably rise at UW-SP in the next six years, according to assistant chancellor David Coker.

He highlighted future plans for improvement and expansion at the university for a recent meeting of the City Plan Commission.

Most immediate will be installation of a new telephone system this summer. It will put phones in all residence hall rooms and have computer access and video capabilities.

Library functions also will be automated and integrated with other UW System schools.

Recently approved by the state was the addition of a paper science laboratory between the Science Building and the College of Natural Resources. Construction of the \$2.1 million project, which will simulate a mini-paper processing plant, is set to begin in 1986.

Landscaping work and improving a walkway in an administrative block near the University Center is a project campus officials hope to work on this year.

A triangular parking area bounded by Fourth Avenue and Stanley and Reserve streets could be paved before this fall. It will be for visitors so they can park closer to the hub of campus,

he said. The university also would like to acquire adjacent property so the unusual configuration of the lot could be changed.

Uses of other campus parking lots may be switched around also.

A new swimming pool at the physical education building is "desperately needed," Coker said. UW-SP officials hope it is included in the 1987-89 biennial budget.

DeBot Residence Center is to be remodeled in 1987-89. Remodeling and exploring alternative uses for Allen Center also are planned.

Creating a new concert hall in the Fine Arts building is targeted for 1989-90. An addition to the College of Natural Resources also is planned.

The university will continue to explore land acquisitions.

Acquisition of homes on Portage Street is unlikely, except for residences at the Reserve Street corner, said special assistant Mary Williams.

UW-SP anticipates no appreciable enrollment drop in the next several years, Coker said. Forecasts of fewer students have not materialized, he said, noting that enrollment has made modest gains.

He asked city officials to consider making the length of Reserve Street one way, perhaps with diagonal parking.

Curricular developments

Special education

The Department of Public Instruction has certified UW-SP to prepare teachers to serve the state's emotionally disturbed and mildly/moderately retrained elementary and secondary students.

In addition, DPI has provided UW-SP's School of Education with the first certification of a multicategorical teacher preparation program. It is designed to meet a growing need in elementary and secondary schools for teachers who are qualified to serve children with different handicapping conditions in the same classroom.

This new program is geared largely for small school districts in the state. In these places, it is commonplace to have children with a variety of mildly and moderately handicapping conditions, but too few of them in each category to justify separate classrooms and teachers. As a result of provisions in the multicategorical certification, students can now be in one classroom, regardless of their handicap, providing their needs are quite similar.

Multicategorical certification covers the areas of learning disabilities (which has been a specialty area within UW-SP's School of Education for many years), emotional disturbance and mild/moderate retardation.

Students may pursue certification in one or all three of these areas of exceptional education in addition to the regular teacher preparation program. They can obtain it at either the undergraduate or graduate level.

New conservatory

A new Conservatory for Creative Expression that provides noncredit instruction and involvement in the arts for area residents of all ages—particularly children and youth—was established at UW-SP.

Paul Palombo, dean of fine arts, said that offerings are in the areas of theatre, visual art, dance and music.

The conservatory director is Dee Martz who also is a part-time member of UW-SP's music department teaching staff as head of its chamber music program.

Instruction is provided on Saturdays, late afternoons and evenings by university faculty plus area residents who have experience as teachers in specialty areas of the arts.

Registration for classes, which vary in lengths of time, are conducted Mondays through Fridays in Room A202 of the Fine Arts Center. For more information, people may call (715) 346-2787 (ARTS). Cost of classes range from \$15 to \$70; private lessons in music are more expensive.

Physical education

A new curriculum area in physical education for exceptional children has been established in UW-SP's School of Health, Physical Education, Recreation and Athletics.

Seven new courses were added to complement the new program.

New minors, options

UW-SP has received approval to expand its curricular offerings in natural resources, mathematics, home economics and to plan a new major in musical theater.

All of the programs respond to growing career opportunities.

In natural resources, new minors were okayed in forest recreation and land use planning. The resource management major was revised to include options for specialization in youth programming and camp management, environmental education and interpretation, and land use planning. A new option in wastewater was added to the water resources major.

In mathematics, a minor was added in applied mathematics. Also, the name of the department was changed from mathematics and computer science to mathematics and computing.

The dietetics major was divided so students may pursue options either in general dietetics or community nutrition. A noncertification option in home economics education was granted to be pursued by people interested in teaching careers out of schools in roles as county home economists.

A bachelor of fine arts degree in musical theater can be planned, the regents staff said. When the proposal is completed, a final decision will be made on the proposed major. Locally, faculty are hoping to have all of the paperwork completed and approved so the major can be implemented within two years.

Semester in Greece

UW-SP has expanded its overseas offerings and now includes an annual spring semester of classes in Greece.

Helen Corneli, director of the Office of International Programs, said the first group left in early January and returned at the end of April. The leader was Professor William (Pete) Kelley of the communication faculty. He is a specialist in classical rhetoric which had its origins in ancient Greece.

About 25 students were accepted for the group which was headquartered most of the time at a hotel in Athens.

Besides Kelley, several Greek educators were contracted to teach the UW-SP classes. Mrs. Corneli said it is not difficult to find "fine teachers" because throughout Europe "there are a lot of underemployed academicians."

Greece is the ninth country where UW-SP has arranged semester study abroad since its Office of International Programs was established about 15 years ago. This fall, groups are in Spain, Germany, Poland, England and Taiwan. Next spring, there'll be groups going to Australia and England in addition to Greece. There also have been overseas campus operations in India and Malaysia.

People interested in participating may contact Mrs. Corneli. Older adults, including senior citizens, often join traditional aged students on the trips as noncredit participants.

Special events for UW-SP's graduates, friends

Homecoming to be Oct. 5

Here's a potpourri of information, especially for alumni and friends of UW-SP.

Homecoming '85 is scheduled for Saturday, Oct. 5. There'll be a parade at 10 a.m. (possibly on Main Street in the downtown area which is undergoing considerable revitalization and expansion because of mall construction); pig roast from 11 a.m. to 1 p.m. on the lawn in front of Old Main; football game at 1:30 p.m. at Goerke Park featuring the Pointers and the Whitewater Warhawks; Fifth Quarter cocktail party immediately after the game at the University Center; and homecoming dinner and program to induct new members of the Pointer Athletic Hall of Fame at 6 p.m. in the University Center. (Several scholarships and special awards by the athletic director will be presented at the dinner party.)

Alumni gather June 9

The annual UW-SP Alumni Day will be the afternoon of June 9, a Sunday.

Graduates and friends of the institution are invited to attend. They are not required to make reservations unless they intend to stay for the dinner in the evening.

Members of the classes of 1935 and 1960 will be special guests on the 50th and 25th anniversaries of their commencements.

The day's schedule: welcoming reception and registration, 1:30 to 2:30 p.m. in the main lounge of the University Center; brief program and slide presentation, 2:30 p.m.; campus tour, 3 p.m.; cocktails, 4 to 5:30 p.m.; dinner and awards presentation, 5:30 p.m.

Dance for scholarships

Paul and Patti Adamski, Nick and Dianne Somers and David and Mary Miller headed the committee of "Friends of the University" who sponsored the 17th annual UW-SP Benefit Ball on April 27. Each year, about \$4,000 is raised at the event for student scholarships.

Help sought on addresses

Your help is requested. The staff in the Office of Alumni/Development report that a recent conversion of alumni information stored in UW-SP's main computer has resulted in "glaring errors" in several records. If your mailing label is incorrectly addressed or if you believe something in your record may need to be corrected, please notify the Office of Alumni/Development immediately. Use the reply form found at the bottom of this column.

Elizabeth Dole, secretary of the U.S. Department of Transportation, was the keynote speaker May 1 at the 10th biennial Laird Youth Leadership Workshop on campus for nearly 300 area high school student leaders. The event is hosted by Melvin Laird, former U.S. Congressman and former secretary of the U.S. Department of Defense. Jack Potter, left, is president of the Laird Foundation which is the sponsor in conjunction with UW-SP, headed by Chancellor Philip Marshall, right.

Alumni swim, dive meet

There are tentative plans for a second annual alumni swimming and diving meet on homecoming day, Oct. 5. Coach Red Blair said the success of a similar event during last year's homecoming prompted participants to request the competition be held each year. Here's Blair's summary of the day: "Dave Kaster and Dan Jesse had the most exciting race in the 100 breast, Dave with a time of 1:04.6 and Dan, 1:04.9. Dan Netzer, sprinter, took the honors for being the oldest swimmer in the water (he competed here from 1965 to 1969). Netzer joined three other swimmers from the 1960s to comprise a 200 free relay. Other members were Mark Brodhagen, Tom Rozga and Jeff Pagels. Pagels impressed the varsity by swimming in every event in the meet—seven individual events and two relays. Big John Walsh was back to throw a few dives and demonstrate that he can still handle the boards. Others who took part were Russ Hessler, Tim Andryk, Brad Thatcher, Brian Botsford, and Chris Morse.

Natural resources reunion

The first of what is expected to be a series of reunions for alumni of the UW-SP College of Natural Resources was held April 19 at the Concourse Hotel in Madison. Staff in the Office of Alumni/Development will assist natural resources faculty in arranging future events. Any suggestions?

Four 'Hall of Fame' inductees

Four sport stars from UW-SP's past will be honored at homecoming Oct. 5 as inductees in the Pointer Athletic Hall of Fame.

They are Forest "Scotty" McDonald of Highway 54, Plover, who played football and basketball on campus from 1926 to 1929; Harold Paukert, 620 Valley Rd., Kohler, football, basketball and track from 1924 to 1928; C. W. "Sonny" Redders, 108 Dogwood, Summerville, S.C., football from 1961 to 1963 and 1965; and Reed Giordana, 913 Desnoyer, Kaukauna, football from 1974 to 1977.

Giordana, 913 Desnoyer, Kaukauna, football from 1974 to 1977. They will be special guests at all homecoming day activities. Their formal induction will be at an evening banquet in the University Center. Tickets for that event will go on sale in September in the Alumni/Development office in Old Main.

Athletic fundraiser

The second annual Point Invitational Golf-Tennis-Racquetball Outing will be June 17 at Sentryworld in Stevens Point.

Competition is slated for both men and women. Guests will be welcome. Participants will join UW-SP coaches and officials for a day of fun and also receive prizes and mementos. A cocktail party and dinner will follow the competition. For more information, contact Don Amiot, Athletic Director, UW-Stevens Point, Stevens Point, WI 54481, phone 715-346-3257 or 715-346-6398.

Last year, 112 golfers entered the event. "This year we have added tennis and racquetball in order to improve our attendance," Amiot said.

Reunions set during homecoming

Members of two social fraternities and natural resource graduates will have alumni reunions during homecoming day, Oct. 5.

The Alpha Phi Omegas will observe the 30th anniversary of their group's formation on campus with a morning brunch. The night before, a party is scheduled in the hospitality room of the Point Brewery. Marc Kramer of Stevens Point, is in charge of arrangements.

Sigma Tau Gamma's 20th anniversary will be marked with a full day of activities, according to its faculty adviser Oliver "Bud" Steiner. In addition, members of its forerunning organization, Alpha Beta Rho local fraternity, will join the Sig Taus in marking the 30th anniversary of their group. There'll be a breakfast and meeting, luncheon, evening dinner and party.

The natural resources alumni will gather immediately after the football game in the hospitality room of the Point Brewery.

Hospitality room

A hospitality room will be in operation Sunday, Aug. 25 for students and their parents who will be at UW-SP prior to the opening of fall semester classes. The UW-SP Alumni Association will host a reception in the Heritage Room of the University Center, serving free coffee and donuts throughout much of the day.

About you, about us and about our paper

Services to Alumni

There are numerous services provided to alumni via the staff of the UW-SP Office of Alumni and Development. Make your requests known by phone or letter to Leonard Gibb, director of development; Karen Engelhard, director of alumni; or Scott Schultz, coordinator of alumni activities. Their address is Old Main Building, UW-Stevens Point, Stevens Point, WI 54481. Their phone number is (715) 346-3811.

One of their services is the publication and dissemination of this news magazine. More than 30,000 copies of it are published and mailed to people in all parts of the world. The editor is John Anderson, assisted by Marilyn Thompson, Sarah Clanton, Steve Swan, Mary Sipiorski and Virginia Crandell plus several talented students,

all in the Office of News and Publications. Design is by Mark Pohlkamp and photography is by Mike Brisson and company in the Office of Educational Media Services.

Do you have information to share with your fellow alumni via publication in this news magazine? Are you moving? Or, do you need our assistance?

For whatever reason, we'd like to hear from you. If you are moving, though, we would especially appreciate being notified.

We are concerned about mailings for several reasons. We want to be as thorough as possible in reaching our alums. We also want, and need, to be cost effective in our mailings because we pay a fee to keep your mailing address current if you neglect to keep us informed when you move. The enclosed form can be used.

The enclosed form can be mailed to the Alumni Office, Main Building, UW-Stevens Point, Stevens Point, WI 54481

NEWS FOR POINTER ALUMNUS: _____

Achievements of faculty

Poet wins \$5,000

A poet at UW-SP is one of three state writers who received \$5,000 literary fellowships Jan. 30 from Governor Anthony Earl.

Richard Behm, who has taught in the English department the past nine years, plans to use the money this summer to attend a workshop for writers and to continue his work on two books of poetry.

Richard Behm

He and poet Martha Milalyi of Eau Claire, and fiction writer Michael Finley of Milwaukee, received the fellowships which were sponsored by the Wisconsin Arts Board and presented by the governor in ceremonies in the state capitol in Madison.

Sixty-five writers competed for the prizes, winners of which were chosen by a national panel of judges. Entrants were required to have had manuscripts for at least 20 poems or one book accepted by "reputable" publishers.

In 1983, Behm won a \$2,500 fellowship for artists from the Wisconsin Arts Board. Previously, he received \$1,800 from the same public agency, \$1,000 from the National Endowment for the Arts and smaller amounts from several other sources for publication of "SONG," a literary magazine of which he is founder and editor. He also is the founder and editor of "Exchange: A Newsletter for Teachers of Writing" published by the UW-SP Writing Laboratory.

Behm has written manuscripts for five books of poetry and has had more than 200 of his poems published in literary magazines and anthologies. His books currently in process are *A Belief in Alchemy* which contains poems about how the world can be changed through the imagination, and *Sketches from the Lunatic Gallery* which includes "portraits" of people or "maybe self portraits" which deal with the "edge of madness in all of us."

Arthur Herman pens another book about Buddhist philosophy, history

"Both Eastern and Western philosophies are concerned with the same basic problem—how can men and women lead better lives?" says a teacher and author of a recently published book about Buddhism.

Arthur L. Herman, professor of philosophy at UW-SP, has written and published six books and numerous articles about Eastern thought and religions. His most recent book, *An Introduction to Buddhist Thought, a Philosophic History of Indian Buddhism*, was published by University Press of America.

He currently is working on the third edition of *Philosophies Man Lives By*, co-authored with Robert F.

Davidson of the University of Florida, to be published by Holt, Rinehart and Winston this summer.

Most of Herman's texts have been written for students in his own classes and are now being used in universities throughout the country. He says they were created to introduce students to Asian and Indian philosophies, and to philosophical thought in general.

Herman describes his books as "problem-oriented"; their purpose is to set up and solve the problems people face in living and being human. And all people, regardless of the area of the world in which they live, face the same quandaries, according to the author.

Busch gets accolades in national journal

The National Association for Campus Activities (NACA) has cited Robert Busch, director of the UW-SP University Centers, as one of the top six administrators in his field in the United States.

Busch was featured in a salute to people who have pursued successful careers in the campus activities field in the association's October magazine.

He was elevated from director of

Robert Busch

student activities to the head of the centers in 1978 after he served as the national chairman of the NACA. The Wisconsin chapter of NACA has, for the past eight years, been giving the Robert W. Busch Award as its highest recognition to a member demonstrating exemplary service.

Busch, who has served UW-SP since 1967, was quoted in the magazine, "Programming," as attributing his success to the fact that "I have been fortunate enough to find professional directions that interest me and allow me to do something that is beneficial to a segment of society."

Head of trustees

Myrvin Christopherson, a professor/administrator at the University of Wisconsin-Stevens Point, has been elected chairman of the 12-member board of trustees for Palmer College of Chiropractic in Davenport, Ia.

He is the first person who is not a chiropractor to head the board. He succeeds Dr. Joseph P. Mazzarelli of Pennsauken, N.J. who held the post for eight years.

Myrvin Christopherson

The college, founded in the 1890s, serves about 1,800 students and is the nation's oldest and largest chiropractic college.

Christopherson, who is associate dean of the College of Fine Arts and head of the Division of Communication at UW-SP, was originally chosen to serve as a trustee because of his consulting services in communication to state, national and international chiropractic associations and because he has been a longtime chiropractic patient.

He also serves as a trustee for Palmer-West, a college in Sunnyvale, Calif.

Christopherson has been on the UW-SP faculty since 1969.

Professor, alumnus honored

A faculty member and alumnus from UW-SP were honored by the state chapter of the Soil and Conservation Society of America during a recent annual meeting at Camp Upham Woods near Wisconsin Dells.

Donald Last, who has a joint appointment as a resource management specialist for UW-SP and as a soil and water specialist for UW-

Donald Last

Extension, was installed as president of the 300-plus member organization.

William Horvath, a 1962 graduate, who now serves as regional representative for the National Association of Conservation Districts, was a recipient of one of four awards. Horvath is headquartered in Stevens Point.

Last has held several different offices in the state chapter during his 15-year association with it. He also has been chairman of the environmental conservation education committee and of the outdoor recreation committee. In those capacities he was involved in compiling a list of conservation employers in the state for people interested in career opportunities; selecting environmental/conservation resource materials for state teachers; drafting a chapter position statement on wetland use; and revising Wisconsin's trespass and recreational land user liability law.

Horvath was cited for exceptional leadership and was given a framed commendation recognizing him for leadership in a variety of projects.

He served more than a year in the Wisconsin Assembly as a state representative from the 71st District which includes Stevens Point. He was involved in promoting new legislation including groundwater protection, hunting, and a landowner's trespass bill. He has served in an advisory capacity to the Wisconsin Department of Natural Resources on soil conservation and hunter-landowner relations.

Fabiano shows off his neon

"Neon Construcs," artist Daniel Fabiano's one-man sabbatical show was featured in February in UW-SP's Edna Carlsten Gallery.

Fabiano, who was granted a sabbatical from UW-SP last year, traveled to Los Angeles and San Francisco to research neon art and its uses. He took extensive photographs of California architecture, neon signs and marquees and visited art museums and galleries in California.

He also worked with Batya Friedman, a computer artist at Berkeley, to assist in the development of computer/media design courses at UW-SP.

Fabiano has combined drawing,

painting and sculpture with light to create his newest works. He says his goal was to harness the energy of light and to complement its energy with the energies of existing forms. His idea was to achieve a harmony of existence between technology and nature.

"Neon light has fascinated me since childhood," he states. "It has been part of our society since the early 1900s, and has provided us with the most vibrant visual statements ever produced."

A Kenosha native, Fabiano has been a member of the faculty at UW-SP since 1967.

Paper industry salutes Kocurek

Michael J. Kocurek, chair of UW-SP's paper science department, has been named to the honorary position of fellow of the 23,000-member Technical Association of Pulp and Paper Industry (TAPPI).

At 42, he was the youngest person and the first academician to join the rank of the select organizational fellowship.

TAPPI is the world's largest pro-

Michael Kocurek

fessional association of paper engineers and scientists, and the organization chose to honor Kocurek for his professional achievements in education and outreach and for the consultation services he has provided to the industry.

In 1970 when he joined the UW-SP faculty, he became the first person to head his new department and has served as chair continuously since.

National metric award to Cable

The United States Metric Association has given one of its four annual service awards to Professor William Cable, a metric and mathematics education specialist in UW-SP's Department of Mathematics and Computing. Cable received an engraved pen desk set at an association meeting in San Antonio, Texas.

He was cited for his work in promoting the organization and being a

William Cable

leader in its continuing activities to prepare the nation for the eventual conversion to the metric system of measurements. He is in his second two-year term as a regional director representing 15 states in the association.

Cable and faculty colleague Gilbert Mages have been surveying leaders in businesses and industries about their level of involvement in metrication and are finding that despite low public interest and minimal federal government involvement in a conversion, the firms are moving ahead with it.

In November, Cable and Mages will explain their involvement in metric education to the National Council of Teachers of Mathematics which will meet in Milwaukee.

Grant for Sepsenwol

A biology professor at UW-SP has received a \$55,000 grant from the National Science Foundation to research reproductive processes of an intestinal parasite.

Professor Sol Sepsenwol is on sabbatical from UW-SP this academic year at UW-Madison attempting to isolate and analyze a sperm activation substance in the nematode *Ascaris*, an intestinal parasite of pigs.

The biologist says his studies are of immediate interest to those interested in the control of parasitic infestations. Nematodes are one of the largest animal groups and are of major economic and medical importance, according to Sepsenwol. The research also will provide basic information about the general phenomenon of sperm activation in many animals including man.

Sepsenwol, who holds a Ph.D. from the University of Chicago, came to UW-SP in 1978. He formerly was an instructor and served as a research associate under a Rockefeller Foundation Grant at Northwestern University.

Pearson Appointed

John C. Pearson, professor of education at UW-SP, has been chosen for membership in the National Defense Executive Reserve of the Federal Emergency Management Agency.

In June, he will attend a national conference in Washington, D.C., where President Reagan will be one of the speakers at the week-long event.

Members of the NDER can be activated by an executive order of the President. They are executive-level individuals who possess skills or expertise that may be required during a national emergency.

Plaudits for PRIDE

Three staff members of UW-SP's Programs Recognizing Individual Determination through Education (PRIDE) have received awards from a 10-state organization.

Jim Vance, acting director of PRIDE, Jack Messing, former director, and Linda Herek, coordinator of academic support services, were recognized by the Mid-America Association of Education Opportunity Program Personnel (MAEOPP) at its 10th annual conference in Lake Geneva.

Vance, who served as last year's president of the association and the conference's keynote speaker, was given the Plaque of Presidents Award, a 10th anniversary award, a watch and an outstanding leadership award from the MAEOPP board of directors and recognition from his staff at UW-SP.

Messing, who has been with the PRIDE office for 13 years, has returned to full-time teaching in the UW-SP mathematics and computing department. MAEOPP presented him with the Institutional Support Award for his contributions to PRIDE and to the association.

Herek received the President's Award for her dedicated service to educational excellence. In addition to assisting the director of PRIDE at UW-SP, she served as co-chairperson of the ninth and tenth regional conventions and was co-author of a plan for conference development with Vance.

The Mid-America Association, which had its birth at UW-SP, according to Vance, now has more than 500 members throughout the midwest. It represents federal and state-funded programs which provide improved educational opportunities for minority and nontraditional students.

Vance became the acting director of UW-SP's PRIDE program in January. His office and its staff provide counseling and special assistance beyond the classroom to help students of all races succeed academically. He has been with UW-SP's academic staff since 1972.

Fred Copes chosen 'citizen ambassador'

A UW-SP biologist is one of 10 American "citizen ambassadors" on a mission this spring exchanging ideas on fisheries research with scientists in China, Japan and Korea.

Frederick A. Copes' involvement in the program is scheduled from May 24 to June 14 under sponsorship of People to People International.

"The project will enable us to get to know members of the East Asian fisheries community and to discover which of their problems are similar to and which are different from ours," according to Bernard E. Skud, past president of the American Institute of Fishery Research Biologists who is choosing the 'ambassadors' as the delegation leader.

In addition to teaching, Copes also has been one of the leaders in a continuing study on the Lake Michigan fish. He has had more than a decade of involvement with the federally-funded Wisconsin Cooperative Fishery Research Unit, which is headquartered at UW-SP. He has served as president of the Wisconsin Chapter of the American Fisheries Society and as vice president and research adviser of the North American Native Fishes Association.

Fred Copes

In reports to his East Asian counterparts, Copes intends to explain Lake Michigan's transformation in becoming "more healthy" with a corresponding threat of being overharvested by commercial fishermen. He expects to refer to his extensive work on the ecology of Wisconsin's native non-game fishes such as minnows and chubs.

The mission is sponsored by an organization founded by President Eisenhower in 1956 to bring together technical and scientific teams from around the world to improve international understanding and friendship.

Houlihan pens mystery

A new, bonafide author of mystery/adventure stories has emerged as the result of an ambitious project last fall by members of a UW-SP editing and publishing class.

Professor Daniel Houlihan of the communication department and a 20-year teaching veteran at UW-SP, has penned a 130-page commercially-printed paperback entitled, "Sean Murphy."

The class, believed a rarity in American higher education because its students transform raw manuscripts to bookform, is the publisher.

"Sean Murphy" is the story of a college teacher who helps solve the mystery surrounding the murder of one of his students. Houlihan says there is little similarity between characters in the book and people he has worked with, taught, or ever known, though the setting is a fictitious Wisconsin college town "because this is the kind of place I'm most familiar with."

The plot centers on Murphy's interest in learning, as he approaches age 40, a new way of defending himself. He practices throwing objects with speed and accuracy.

Jay Cravens becomes fellow in forestry

Jay Cravens, who is putting past experiences of managing the nation's woodlands to use in his second career as a professor at UW-SP has been elected to the honorary position of Fellow of the Society of American Foresters (SAF).

About 10 people in the state hold the title bestowed by the 23,000-member national organization. One of them is William Sylvester, a retired UW-SP faculty member and onetime chief forester of Trees for Tomorrow in northern Wisconsin.

Cravens has been an active SAF member and holder of committee assignments for 35 years.

He currently is adviser of its student chapter at UW-SP.

Jay Cravens

Since coming to UW-SP in 1976, he has helped put a stamp of excellence on its forestry program that is widely acknowledged. The result has been a high rate of placement for graduates and stability in enrollments while all forestry majors have had sharp declines in student participation.

Cravens' work with young foresters is part of the basis for his selection to be a society fellow.

During a career of more than 25 years as a federal employee, he rose to one of the top positions in the U.S. Forest Service. He recalls seeing "people come into the Forest Service who didn't understand how it worked." When he retired and began pursuing a longtime ambition to become a teacher, he was drawn to UW-SP because its forestry program offers students practical experience to "grow professionally even before they graduate."

Cravens has helped embellish the offerings, and one of the new credit programs involves an actual timber harvest with students doing everything from negotiating contracts with landowners, cutting the wood and then marketing it.

Tapes for teachers

A UW-SP professor is co-author/project developer of a three-part color videotape which illustrates how teachers can assess and remediate children's learning and behavior problems.

Nancy Kaufman, of the UW-SP School of Education, announced that work she recently completed with

Nancy Kaufman

Maureen Baumgartner and Janet Reinhardtson, both of the UW-Eau Claire faculty, will be marketed nationally by Hubbard Scientific of Northbrook, Ill.

The hour and one-half of programming is a dramatic portrayal of collaboration between regular and special education teachers dealing with problems of children with special needs.

The "new focus of the tapes," she says, is on how regular and special education can be tied together.

"Teaching: A Problem Solving Venture" includes separate 30-minute tapes on observation, collaboration and intervention.

Cost of the project was financed with a \$15,000 grant.

Win sabbaticals

Ten faculty members at the University of Wisconsin-Stevens Point have been granted sabbaticals to spend a semester away from their classrooms working on special research projects.

The UW System Board of Regents has approved sabbaticals for about 150 faculty members in the state system, to be used either in the fall of 1985 or winter/spring of 1986.

The UW-SP recipients are: Mark Brueggeman, assistant professor of art, who will create a series of large fiber sculptures entitled "The Dancer, Not the Dance."

Roger Bullis, associate professor of communication, who will compile and edit an anthology, "Computer Quandaries: The Social Impact of the Information Revolution," and organize curriculum materials for use in the university's new Computer Information Systems major;

Kent Hall, professor of biology, who will develop lecture and laboratory materials for use in UW-SP's animal physiology courses;

Hamid Hekmat, professor of psychology, who will plan a new course in health psychology, including subjects such as alleviation of sleep disorders, anxiety and stress management and chronic pain reduction;

David Hillier, associate professor of biology, who will work on the application of microcomputer simulations and data analyses to the ecology curriculum;

Norman Keats, professor of art, who will study vacuum forming techniques for use in design, sculpture and painting classes;

Marge Miller, associate professor of education, who will revise an undergraduate course in kindergarten techniques and develop a new graduate course in kindergarten programming;

Charles H. Rumsey, assistant professor of history, who will work on the revision and development of courses in the areas of technology and contemporary issues;

Edward M. Stern, associate professor of biology, who will produce an illustrated key to the freshwater mussels of Wisconsin for use in the aquatic biology curriculum;

Earl Spangenberg, associate professor of natural resources, who will develop curriculum materials on the interaction between nonpoint pollution control legislation and management practices in forestry and agriculture.

Price commended

A commendation has been given to a UW-SP professor for his role in creating a new method of teaching and helping stimulate interest in the Serbo-Croatian language in this country.

Robert Price has been on a three-member team writing materials to accompany a standard textbook on

Robert Price

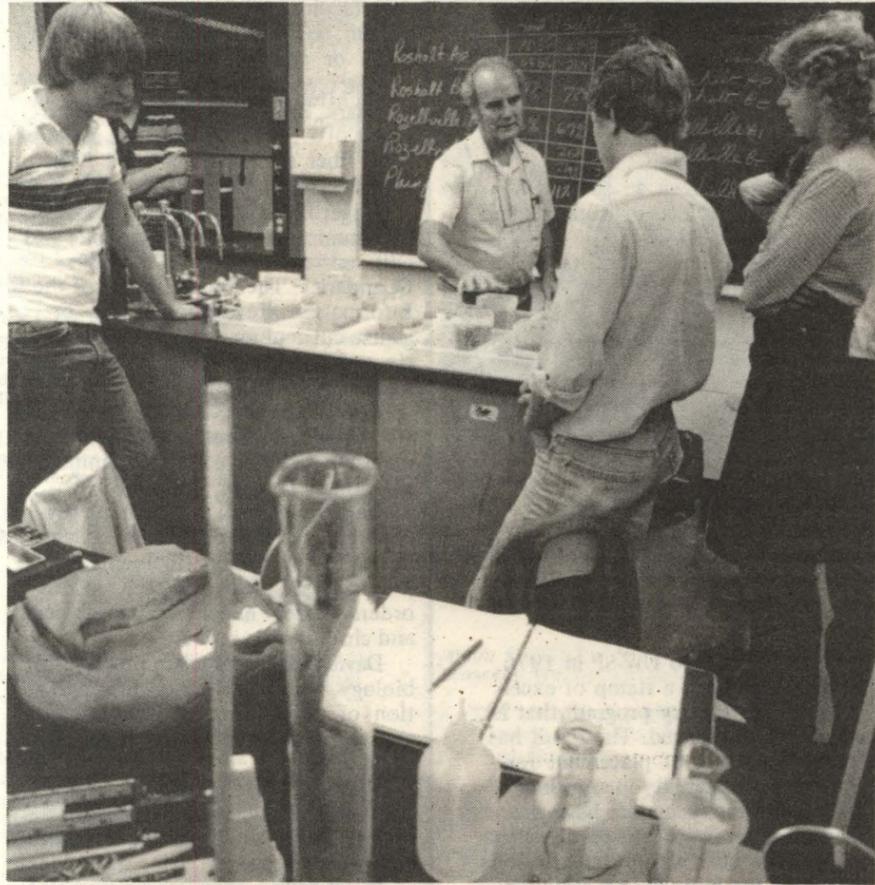

Serbo-Croatian. The project has been sponsored by the National Endowment for the Humanities at the Center for Slavic and East European Studies, Ohio State University in Columbus.

The center at Ohio State currently is involved in a program to draft materials for seven Slavic and East European languages: Bulgarian, Czech, Hungarian, Polish, Russian, Ukrainian as well as Serbo-Croatian. Price was the only Wisconsin educator invited to participate in the project.

At UW-SP since 1972, Price is a professor of foreign language specializing in Russian. He also directs the Russian and East Central European Studies Program on campus.

UW-SP's role in environmental protection

Taxidermy donated

Largest in nation

The largest undergraduate natural resources program in the United States is at UW-SP, according to a survey by the Society of American Foresters.

Based on enrollments recorded at public and private colleges and universities in the fall of 1983, UW-SP had a total of 1701 students or about 340 more than Colorado State University of Fort Collins which previously ranked in second place.

Robert Engelhard, assistant to the dean of the UW-SP College of Natural Resources, said the survey does not do rankings according to excellence, "but I am convinced there certainly is a correlation between quality and size."

The survey was conducted among 50 institutions across the country. The UW-SP census represented about 12 percent of the total count of students in some phase of undergraduate natural resources in all of those schools.

Educating undergraduates is "our forte—and look what we've done with it," Engelhard said. With the level of funding received from the state, he added that "taxpayers of Wisconsin have one of the most efficient and effective programs in the nation."

With 586 students in the program, the undergraduate degree program in forestry ranks the largest of the schools in the survey. The State University of New York at Syracuse is in second place.

The undergraduate major in wildlife had 392 students, nearly one fourth of all the students in that field who were counted in the national survey. Colorado State had 262 students in wildlife.

The survey also reports that six of the institutions with natural resources programs offered undergraduate majors in pulp and paper science. Of them, UW-SP had the largest enrollment with 217, followed by North Carolina State University with 189.

There are two other undergraduate paper science majors in the United States, one at Miami University in Oxford, Ohio, and the other at Western Michigan University in Kalamazoo but, neither is as large as the one in Stevens Point. They were not included in the survey because they are not part of a natural resources program at their campuses.

It has been about 16 years since UW-SP graduated its first woman with

a degree in what today is the College of Natural Resources. Now, there are 362 women enrolled in the program on both the graduate and undergraduate levels, which is second nationally to Colorado State with 524 in all categories.

Conservation courses were begun at UW-SP about 50 years ago. The first undergraduate major in conservation education on an American campus was established there in the mid 1940s. In 1970, after several related majors were added, the program was reorganized to form the College of Natural Resources. There are now majors in forestry, soil science, resource management, wildlife, water resources, paper science, and other offerings in waste water management, environmental law enforcement, forest recreation and environmental education.

The enrollment has tripled under the leadership of Daniel Trainer, who has been the dean since 1971.

Trainer observed that, "Our quality has grown with the numbers of students, and that is reflected in the high placement rates of our graduates. In fact our placement record is double the national average."

Across the United States, there has been a sharp decline in natural resources enrollment while UW-SP has maintained its size. Trainer believes the job placement record of the institution has played a key role in averting losses. "We're also helped by the fact that we have many graduates who are now coming back to us for people they need to hire."

The dean paid tribute to the role which James Newman played in the development of the college. Newman, who died Jan. 20, had served the institution for 25 years as a specialist in forestry and for 13 years as the assistant dean.

"He was one of the keys in making the whole thing happen," Trainer said, adding that Newman believed in the importance of having an integrated approach to the management of natural resources. Today, students pursue a major but also are educated in all phases of the environment.

A New Lisbon taxidermist has donated the mounted birds, animals, and fish he has collected for more than 60 years to UW-SP's College of Natural Resources.

Louis Loboda's gift included 168 mounted birds, 26 animals and several fish.

"It's an exceptional collection that will complement things we already have and fill in the gaps of other things we had been hoping to acquire someday," according to Daniel Trainer, dean of the college.

Trainer said the collection will be used in classrooms for instructional purposes and in displays for the public.

It is now illegal to mount some of the birds and animals that Loboda preserved years ago. Included in this category are eagles, hawks, owls, and songbirds. There are, for example, 11 species of owls from across the country.

Trainer was especially interested in the fact Loboda has collected every

kind of grouse. "We didn't have some of these in our own collection," he added.

Animal mounts include 15 deer heads, one large bull moose head, squirrels and a two-week-old black bear cub that had been found dead in the winter den after its mother had died.

The fish include a 54-pound muskellunge, 11½ pound walleye and a 6½ pound largemouth bass.

Birds include old squaws, a Chinese mandarin duck, surf scoters, peregrine falcon, osprey, goshawk, loons, great blue herons, cormorants, snowy and American egrets, sandhill cranes, king rail, black-crowned night heron, gallinule, pie-billed grebe and greater and lesser yellowlegs.

Loboda, 86, is a retired mail carrier from New Lisbon. He began doing taxidermy work in the 1920s and was a taxidermy apprentice for the now-famed Wisconsin wildlife artist, Owen Gromme.

Anderson helps West Germans with forest grouse project

A wildlife professor at UW-SP was enlisted by a state in West Germany to help save its large forest grouse from extinction.

Professor Raymond Anderson spent one week at Hofen/Enz in Baden Wurtemberg last fall, conferring with forest and wildlife managers on proposed efforts to re-establish populations of the capercaillie.

Anderson was chosen for the job largely because of his expertise in using small transmitting radios to monitor whereabouts and activities of endangered animals and birds.

Raymond Anderson

In West Germany, this kind of telemetry research has never been conducted, so the professor was asked to give demonstrations and training to government workers, and to even

secure the equipment from U.S. distributors.

Capercaillie, which are the largest Old World grouse and are about the size of turkeys, require a diverse habitat in both forest types and open ground.

In many respects, the professor said that working on the project in West Germany was little different than it would have been if he were given the assignment in the United States.

Anderson was invited to West Germany by Helmuth Weiss, forester in charge of wildlife management for Baden Wurtemberg, which is located in the Black Forest region.

Weiss was interested in the fact that Anderson has been involved with telemetry projects to monitor prairie chickens, turkeys, deer, bear, frogs, grouse, sandhill crane, pine marten, turtles, loons and hawks.

Anderson's invitation to Germany prompted Daniel Trainer, dean of UW-Stevens Point's College of Natural Resources, to reflect on the fact that the program which "has not only become known and respected on the state and national levels, now has an international reputation as well. This speaks well for the professional contributions our faculty have made."

Water students do research in an area stream.

Forestry graduates do well finding jobs in state agency

Graduates of UW-SP were placed in nearly all of the forestry positions that were filled last summer by the state's Department of Natural Resources (DNR).

Hiring was done through the state civil service testing and interviewing processes.

Of 23 people hired, 18 were alumni of UW-SP. The others included two graduates of UW-Madison and three graduates of out-of-state institutions.

Daniel Trainer, dean of the UW-SP College of Natural Resources, said he

An experiment has begun in Columbia County to address the question of how local units of government can cope with increasing amounts of municipal garbage.

A pilot project to continue to 1986 is investigating the feasibility of turning solid waste and sludge from sewage treatment plants into compost.

If successful, the experiment will be used as a model for similar endeavors across the state.

"I'm very optimistic about what we are doing," says Professor Aga Razvi, associate professor of natural resources at UW-SP, who has been contracted as a special consultant to oversee the project.

Benefits that could accrue from the experiment are expected to help solve problems county and municipal governments face about how to dispose

was pleased with the success rate logged by former students in the program he heads. But he added that it is not a new phenomenon. Stevens Point graduates have been faring "very well" in recent years in securing DNR jobs.

In addition to the forestry area, Stevens Point natural resources graduates fare well in winning DNR positions in the fields of parks, game/fish management and environmental law enforcement.

of sludge from sewage treatment plants, how to reduce need for landfill sites, how to minimize increasing costs of handling garbage and how to avoid being a contributor to the groundwater contamination problem.

At the urging of State Rep. Robert Thompson (D-Poynette), the Wisconsin Legislature appropriated \$250,000 for Columbia County to develop a low technology, low capital composting system.

The goal is to devise a process of mixing nonhazardous solid wastes and sewage treatment plant sludges into compost for landscaping, horticultural and agricultural uses.

Work on the project began late last fall in a 300-foot converted hog barn three miles north of Lodi, off County Highway J.

Forestry Hall of Fame established on campus

A public ceremony Oct. 19 at UW-SP marked the induction of the first three members of the state's new Forestry Hall of Fame.

A permanent display in the UW-SP Natural Resources Building was dedicated with Fred Wilson of Madison, the only one of the three inductees who is living, as the honored guest.

Wilson celebrated his 97th birthday several days previously. He was the Wisconsin Conservation Department's first chief ranger for fire control and held the title of superintendent of the Cooperative Forestry Division from 1932 to his retirement in 1952.

Those who were posthumously inducted were the late Robert Goodman who founded the Goodman Lumber Co., served as chairman of the Wisconsin Conservation Commission

from 1931 to 1939 and the person for whom the Village of Goodman in Marinette County is named; and Edward Merriam Griffith who was Wisconsin's first state forester, serving in the position from 1904 to 1915 with offices in Madison.

The permanent exhibit carries a pricetag of about \$8,000 and was financed entirely by donations from about 20 firms and individuals plus the state's Society of American Foresters Section.

It is comprised of two L-shaped interfacing units with dimensions of 17 by 11 feet. It was designed by Gretchen Penn and constructed by Emery Olson and his staff of the buildings and maintenance division of the university.

Big gift from IBM

International Business Machines Corp. is helping UW-SP offer "the most advanced undergraduate instruction in the world" for application of computer technology to pulping and papermaking processes, according to the program director.

Professor Robert Rouda announced that IBM has given nearly \$100,000 worth of equipment, software and a dedicated telephone line to the university's new Computer Simulation Laboratory for Paper Science and Engineering.

IBM's gift was spurred by company officials' desire to have local students and faculty explore new ways the firm's Advanced Control System computer installations can be used in the forest and related industries.

The gift package includes four high resolution color graphic terminals, a four-color printer, digital communication equipment and the high speed communication line that has been leased to link UW-SP with Purdue University in West Lafayette, Ind.

IBM has provided nearly \$2 million worth of its products, including a 4341 mainframe computer, to support research in Purdue's Chemical Engineering Department and to be the base for satellite projects at UW-SP and at Northwestern University in Evanston, Ill.

The corporate donation complements a laboratory with five personal computers purchased earlier by the UW-SP Paper Science Foundation and \$50,000 in planned microcomputing equipment to be financed with proceeds from a fund drive currently being conducted by the foundation.

The laboratory makes it possible for UW-SP students to pull together all simulated computer-directed operations for a fictitious paper mill. Experiments and study can focus on process dynamics and control systems plus the design of process control strategies. "We can optimize mill production to maximize products while minimizing impact on resources and the environment," Rouda said.

The professor said he hopes to use the IBM gift in developing an on-line model of a paper machine and associated process control equipment both

for research and for the training of students on campus and in mill settings.

He expects the use of the telephone line will result in the detection and correction of problems in the use of remote communication of high-resolution color graphics.

The university as a whole is benefiting by having the most up-to-date computer systems available for observation. Students and faculty in disciplines other than paper science may observe the technology.

The experience students will have in the lab will make UW-SP paper science graduates, who already are in strong demand across the country, even more employable and for even higher level beginning positions, the professor predicted. "More importantly, it will equip our students with the tools and skills needed to help their companies compete successfully on the world market, and to solve problems they will encounter in this increasingly technological and computerized society."

Job placement of UW-SP paper science graduates has been 100 percent each year since the university turned out its first class in 1973. The average starting salary for graduates in 1984 was \$27,500—the highest amount for new degree holders in all academic disciplines at UW-SP.

The university's offerings in paper science now have the largest enrollment of any similar program in the United States with 212 students, according to a recent survey by the Society of American Foresters. "We are the recognized leader for our specialized work in computer modeling and simulation for teaching pulp and paper engineering on the undergraduate level," added the 17-year veteran of the UW-SP faculty.

Rouda said Purdue is connected to the BITNET communication network. "We now have direct, on-line computer-based communications from Stevens Point to about 300 large computers located at more than 100 universities in North America and Europe. We have just begun to think about the uses and the impact of having this type of inter-faculty communication available," he stated.

Once a family residence, this structure now is the visitor center for the Schmeckle Reserve.

Visitor center opened

UW-SP has provided a gift for nature lovers.

The Schmeckle Reserve Visitor Center has been opened for use by students and faculty in the College of Natural Resources and the public.

The facility is the former home of the Ed and Rosemarie Wojcik family on North Point Drive, directly across from the Sentry World maintenance building. It serves as a place where organizations can hold meetings, where nature interpretation programs can be conducted, where people can go when they need advice on questions about wildlife, where orientation can be provided to users of the nearly 200-acres of land in the reserve, and where UW-SP students can do research and gain practical experience in some phase of natural resources.

"We definitely needed more identity with the community and wanted more people to know about it, use it and support it," said Ron Zimmerman in reference to the reserve which he has directed since 1978.

What is expected to be developed at the visitor center may draw much greater visibility and public usage of the facility than ever envisioned. The relatively new Wisconsin Conservation Hall of Fame Foundation is planning to make the building the permanent home for its commemorative displays.

A permanent display in the center honors the late Fred Schmeckle, a visionary science professor who, a half century ago, began developing courses in conservation at UW-SP. Now referred to as the father of the College of Natural Resources, he is the person for whom the nature preserve is named.

The center was created with a shoestring budget.

Proud of the honor given to her father, Mrs. Wilma Waterstreet and her husband, Gene, of Sturgeon Bay were donors of \$1,000 for the purchase of materials to use in transforming the house to a visitor center. The UW-SP Foundation provided about \$600 for special lighting commonly used in museums. The Bill Cook Chapter of the Isaak Walton League donated \$700 for the purchase of materials to construct a boardwalk leading from a trail in the reserve to the center.

Hans Vetter donated building materials and the late Richard Vetter provided new windows through the former Vetter Manufacturing Co. which include large ones that give wide exposure to the reserve from the center's south exposure.

Professor Robert Rouda works with several paper science students in UW-SP's Computer Simulation Laboratory.

Innovations in education

A famous violin gets a new home at UW-SP

About 200 years ago, according to legend, Mozart played a certain violin while visiting King Louis XVI and Marie Antoinette at their French palace, Versailles.

Now, a young professor at UW-SP uses it to entertain local residents and to stimulate interest in music among his students.

The multi-faceted story that led to the recent placement of this and one other priceless instrument in the custody of UW-SP stems from the love of classical music and enterprise of the

Wolfgang Mozart

late Edmund Bukolt, a longtime businessman who served as president of Lullabye Furniture Corp.

By the time of his death in 1965, Bukolt had become widely known as an accomplished violinist. He occupied the first violin chair in symphony orchestras here and at Oshkosh, Clintonville, Fond du Lac, Wausau and La Crosse.

But what wasn't common knowledge was his collection of the "Quintet of the Masters" comprised of: the violin made by Hieronimus and Antonius Amati in 1595 for King Henry IV of France (the one believed to have been played by Mozart), a cello made by Antonio Stradivarius in 1731, a viola made by Giovanni Baptista Guarneri in 1773, a violin made by Guiseppe Guarnerius in 1740, and a bass made by Giovanni Rogeri in about 1730.

Bukolt assembled the quintet via purchases from the Lyon and Healy Company of Chicago. He also acquired a quintet of bows made by Francois Tourte and F. N. Voirin, who were

among the most noted creators of this delicate equipment. The bow with the cello brought to Stevens Point was once owned by Victor Herbert.

Bukolt invited some of the Midwest's finest musicians to join him in his home in playing the instruments, without audiences, in what might be described in contemporary jargon as a highbrow jam session.

Publicity shy, he never let it be known what he had done as a collector and consequently, how he arranged for the "quintet" to become a public treasure. Exactly 25 years ago he and a group of friends interested in the arts formed the Copernicus Culture Foundation of Stevens Point and named it for the astronomer who was one of the most famous men in the history of Poland, their ancestral homeland. Without fanfare, the instruments were donated to the foundation, and in 1964 they were placed on long-term loan to the University of Wisconsin-Madison music faculty.

Last year the foundation decided to bring the violin and cello back to Stevens Point to enhance the expanding string program at UW-SP. The three other instruments remained on loan to UW-Madison.

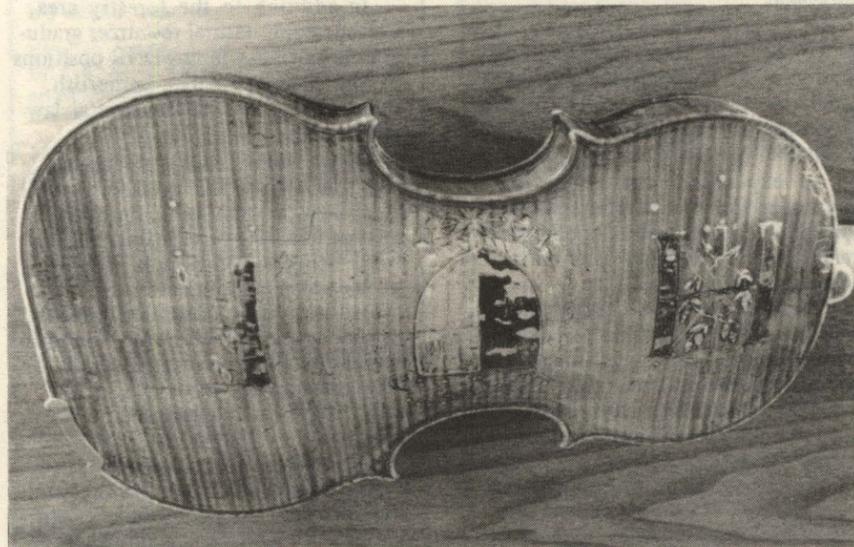

The violin by the Amati brothers was assigned to Professor Vasile Beluska and the Stradivarius cello was placed with Professor Kathleen Franceschi.

Beluska says his violin has an "old Italian tone which is clear and very sweet."

Miss Franceschi will be waiting for awhile to use the cello because it is being repaired.

To Beluska, Miss Franceschi and their colleague, pianist Charles Goan, who together organized their own performing arts trio in 1983, the opportunity to use the prized instruments prompted them to seek an extraordinary way of expressing their gratitude. They decided to name their group the Bukolt Trio.

Because they are rare, special security provisions have been made

The history of King Henry IV's violin is elaborately recorded on the backside of the instrument.

for the instruments. However, while priceless in one sense, the violin and cello have limited value to anyone other than the rightful owner (Copernicus Culture Foundation) because they are registered and could never be sold by anyone else for a true worth.

In the early 1900s, Frederic Emery penned a book, "The Violinist's Encyclopedic Dictionary." In the frontispiece, he featured a photograph of the violin now being used by Beluska, and also devoted considerable space and description to the instrument known as "Henry Fourth."

Emery wrote that it was made 55 years after the first recorded violin appeared in Brescia (Italy). He also noted that many generations of French monarchs had a set of Amati violins in their court until the French Revolution when all were destroyed in the attack on Versailles, except the one now at UW-Stevens Point.

Emery noted this particular violin may have been given by a French king to one of his courtiers and later became the property of an ambassador from London.

The back of the violin is decorated with the coat of arms of Henry IV, his name and the inscription, "by grace of God, King of France and Navarre." Within the violin, the maker states that it was decorated by his most distinguished pupils.

The instrument was brought to the United States in 1879 and had about two owners before it became the property of Lyon and Healy of Chicago.

Miss Franceschi's cello was described, presumably by a Lyon and Healy employe, as "one of the very finest to leave Stradivari's shop. It is called the 'Giese' in honor of a former owner, Fritz Giese, an eminent Belgian cellist who is believed to have received it as a gift from King Leopold I of Belgium. Giese played it as the first cellist of the Boston Symphony. Its quality of tone is so superior, that it is believed unsurpassed by any cello in existence today."

By assembling the "Quintet of the Masters," Bukolt fulfilled a lifelong dream, according to his friends.

Johnsons offer advice to parents of stutterers

"There are about three million people in this country who stutter. Add to that figure, the number of family members and associates of stutterers, and we have about 50 million Americans who are affected by this disfluency," says a professor of communicative disorders at UW-SP.

Gerald F. Johnson and his wife, Maxine, a speech and language pathologist for the Stevens Point Public Schools, have written an article entitled, "Signals: For Parents of Children Who Stutter." It appeared in a recent edition of "Speak Easy Newsletter," a publication dedicated to people who stutter.

The couple also has presented findings at a symposium of the Speak Easy International Foundation at Montclair State College in New Jersey.

Their strongest message for parents who notice their child having speech problems is, "Get him or her to a professional speech therapist as soon as possible."

"Most kids have a period of speech disfluency at some time, but serious disorders can be distinguished through early assessment by a clinician, Johnson says. "The tendency used to be to wait and see if the problem corrected itself, but we have found the earlier treatment is started, the better the results."

Johnson speaks from personal experience. He has been what he calls a "hard-core stutterer" since he was 3. But he didn't start an effective program of therapy until he was 23 while studying speech correction at Western Michigan University under Charles Van Riper.

Gerald and Maxine Johnson

"Stuttering touches every aspect of a person's life," he continues. Our society is not very accommodating to individuals who are perceived as 'different,' such as those with speech disorders."

"It's difficult enough to think before you speak, but imagine having to also think about how your mouth will work," he says.

That's one reason why clinicians, such as those in the UW-SP School of Communicative Disorders, emphasize self concepts among the people they serve. "Ego is a positive term as far as we're concerned and people who stutter usually have problems with the way they view themselves," Johnson says.

Another of the couple's tips for people is to slow down, not only their speech patterns but their whole way of

speech. If they talk slowly, the atmosphere is more calming and pleasant. It indicates they have time to talk to their child, and the child will learn to imitate this more melodic way of speaking.

Johnson attributes the rhythm and melody used in singing to the phenomenon of hard-core stutterers, such as Mel Tillis, being able to sing without hesitation.

"That and using other people's words. It's easier for stutterers to say things they're not closely associated with. I had a student years ago who changed her name because she couldn't say the name she had been given at birth without stuttering. The new one she could enunciate without any trouble," Johnson says.

The Johnsons have developed 10 commandments for parents to use in watching for and changing behavior within their families:

1. Communicate
2. Layer your behavioral objectives (not all things are important)
3. Be an objective analyzer—watch for the signals
4. Reorganize and modify behavior
5. Exhibit your talent—do not be afraid of being/doing wrong
6. Accept imperfection—especially that which cannot be eliminated or modified
7. Participate in your child's therapy
8. Develop consistency, stability, quantity, and quality in your life and relationships
9. Find goodness in yourself and be good to yourself
10. Be positive-forward moving-optimistic.

Class about future teaches students to cope with change

Crystal balls are not common fixtures in William Kirby's class on the future at UW-SP. He doesn't believe it is possible to predict most of what will be.

Instead, he approaches the elusive subject by helping his students learn how to cope with change.

After a dozen years both studying and lecturing about the future, he has been transformed from pessimism to hopefulness about what lies ahead. That has happened thanks to lessons from history.

Kirby now concludes that mankind has, for generations, been demonstrating increased durability and inventiveness in coping with challenges and problems. So why lose sleep?

He uses the issue of overpopulation as an example. There is less fear of it than there was just a few years ago, he suggests, because people in many nations where it has become a serious threat are beginning to take control of the matter.

Part of every student's assignment from Kirby is to develop a "big worries list," with as many as 25 topics such as nuclear holocaust, great famines, dissolution of the family and so forth. The purpose is to show class members they can worry themselves sick over things they can do little to correct.

From that exercise, the students move to an investigation of the future of individuals and about issues they can more realistically approach such as their own emotional, physical, moral, intellectual and spiritual states.

The class also touches on the history of the future, dealing with predictions that have been made throughout recorded time. "I might emphasize that most predictions have been wrong," the professor says.

"Book of Predictions" is one of several publications he recommends to his students because it lists prognostications of contemporary thinkers as well as a compilation of erroneous

forecasts from the past.

Kirby sees part of his teaching role as impressing upon students the importance of being realistic about how much they can do alone or in groups to help make the world a better place.

On a related issue, he argues that today's collegians aren't as apathetic as their critics charge. Young people are becoming less fearful of the future and do not sense as much desperation as they once did.

Also, their interests are changing. There's merit in all of that, the professor believes. "When students are quieter, they can think more clearly."

Some of the discussions in Kirby's classes are on the future in Wisconsin, based on what's happening elsewhere in the world.

Forecasts with such foundations receive his endorsements because he believes they help erase personal provincialism that develops naturally because people of the world are still limited in their interactions. The professor definitely likes world views.

Kirby speaks about his subject with authority. He has served the past year as head of the American Education Research Association's special interest group on the future.

In addition to presiding over its most recent conclave in Chicago in April, Kirby discussed issues in education he believes need consideration.

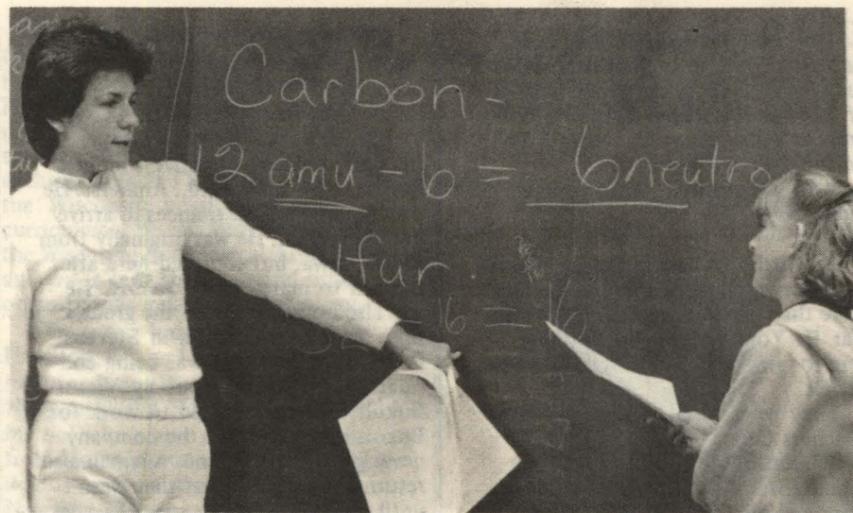

Besides more attention to computers and their role in society, he suggested there that teachers do more to encourage the study of foreign languages in this shrinking planet. And for a society offering more free time to individuals, and with a population still filled with plenty of worriers, he believes the subject of relaxation is increasingly important to pursue.

Kirby is a native of Baltimore with a Ph.D. from the University of Maryland. He has taught in UW-SP's School of Education since 1968.

William Kirby and his students.

They're finally speaking the same language

A student teacher and one of her pupils in a Stevens Point classroom.

Education is likely to make a giant stride forward when school children, their parents, teachers and college professors all speak the same language about learning.

That theory is being advanced by a faculty member at UW-SP.

Robert Schmatz makes his claim as one among many American educators who have become disciples of Madeline Hunter, developer of a teaching method which bears her name.

Schmatz spent part of last summer in a program Hunter conducted at the University of California-Los Angeles where she has been a psychologist and laboratory grade school principal for many years.

The Hunter method is featured in several new courses on mastery teaching that Schmatz has helped develop for both the graduate and undergraduate levels in UW-SP's School of Education.

If responses to the offerings at UW-SP are similar to those being reported elsewhere, the most enthusiasm will come from experienced teachers returning to colleges and universities to bolster their credentials.

Nationally, according to Schmatz, teachers believe pursuit of the Hunter method is one of the most promising forms of professional improvement.

Concepts in the method aren't billed as new ideas; instead, they are presented as reorganized approaches to teaching techniques that have been successful throughout history.

Schmatz says Hunter "articulates the obvious."

That may be the reason why veteran educators have received it enthusiastically. They can use their own classroom experiences as they re-examine many of the basic topics that were presented to them as college students.

In a recent news account about the Hunter method's implementation in the Eau Claire school system, Terrance Sheridan, the district superintendent

observed: "There is nothing new in these learning principles that I or anyone else didn't learn in our first college psychology course. But we didn't learn them in as meaningful a manner as it is applied in the Hunter method."

Schmatz says the Hunter method's common language about education is particularly useful to college students still preparing themselves for classroom careers.

It is important, Schmatz adds, for teachers to recognize early that to be successful, they must have an understanding of classroom practices that can be clearly communicated with school administrators and parents, as well as pupils.

According to the professor, some of those classroom practices touch on the areas of:

- student motivation,
- teaching for re-enforcement and the transfer of knowledge so something learned in one situation can also be applied in other matters,
- extending student thinking to higher levels,
- structuring effects of lesson planning,
- classroom discipline.

Student motivation is attempted by raising a level of concern so students can realize what they learn is important and has relevance to other things. Students also are informed of the minimum level of competency which they are to attain. Grades are given to them on a regular basis so they are always aware of the rate of their progress.

Re-enforcement is applied broadly including emphasis on knowledge learned as something to be used in different classroom situations and especially future assignments.

Assertive discipline is advocated because it involves teachers and principals communicating to students and their parents about appropriate behavior and consequences of deviating from it.

Collection of rare books donated to UW-SP

More than 2,000 books from the collection of the late Stanley Edgar Hyman, a noted American literary critic, have been given to UW-SP for incorporation into its library holdings.

"It's a very useful collection" and is already getting considerable use from faculty and students, according to Elizabeth Davidson, a bibliographer at the Albertson Learning Resources Center. "It fills a lot of gaps in our own collection."

It may be the largest gift of books to the library in her 20 years on the staff. For sure, it was the most interesting to process, and working with the project was "exciting," Mrs. Davidson added.

She believes there may have been

as many as 50 volumes that were placed in the rare book collection under special security. For example, a 17th century edition of John Foxe's "Book of Martyrs" may be worth as much as \$1,000 according to one appraisal.

Hyman, who died in 1970, had been a staff writer for the New Yorker, author of 11 books on literary criticism and a regular contributor to Atlantic near the end of his life. He also taught about 25 years at Bennington College in Vermont. His best known book is "The Tangled Bank" about the works of Charles Darwin, Karl Marx, Sigmund Freud and Sir James George Frazer.

The donor was Hyman's widow, Phoebe Pettingell of Denby Island near Three Lakes. She said she wanted the books to go to a place where they would be used regularly, and where

the library would be large enough to absorb the collection. She thought specifically of UW-SP because of her connections with fellow Episcopalians in Stevens Point who are associated with the university and with people involved in the school's Suzuki Talent Education Program, in which her son has participated.

The books reflect "a man of many interests," Mrs. Davidson said. Many of them are about folklore, anthropology, and religion as well as literary criticism.

A graduate of Syracuse University, Hyman was particularly interested in myth ritual and literature and his lecture course on that topic was, for years, foremost in popularity among Bennington students, his widow recalls. As one of his students there, she recalls his long held theory that myths

derive from religion instead of misunderstood history.

In his role as a literary critic, she said her husband was instrumental in advancing the writing career of Flannery O'Connor and in "discovering" John Barth.

Also a writer, Ms. Pettingell is a poetry critic for the New Leader, penning a monthly column, "On Poetry." Her works appear in a variety of other magazines and in "The Living Church."

Hyman's first wife also was a writer. She was the widely acclaimed Shirley Jackson whose best known work was "The Lottery." One of the books in the collection given to UW-SP was on Scottish ballads. Inside the cover, is written a greeting by Hyman to her on their 25th wedding anniversary. Ms. Jackson preceded Hyman in death in 1965.

Nostalgia

Remember the Air Force base in Stevens Point?

The lead paragraph may have surprised some local residents when they read a lengthy article in January of 1984 in the Reach Section of the Stevens Point Journal, written by Editor George Rogers.

With permission, the article is reprinted.

An Air Force base in Stevens Point?

There was one, of sorts, in the city more than 40 years ago, during World War II. Young men were training here for air combat in Europe and the Pacific.

They were based at Central State Teachers College (now the University of Wisconsin-Stevens Point). Their training was a mixture of classroom work and military drill, with a taste of flying.

Two of them, along with their instructors, died in plane crashes here.

The first trainees arrived Feb. 27, 1943, and the last ones left May 25, 1944.

As many as 350 men were stationed here at a time; in all, about 1,200 trained here.

At the end, the unit was called the 3057th Army Air Forces Base Unit, College Training, Air Crew. But during most of its existence it was well known as the 97th College Training Detachment, and it is as the 97th that townspeople remember it.

The college was more than pleased to have the trainees. Its student body had been decimated by the war as young men entered the armed services and young women went to work in defense plants.

William C. Hansen, college president at the time, later wrote, "It was obvious that the college would be left with a faculty considerably larger than would ordinarily be defensible for the enrollment." The regents and the presidents of the state colleges were concerned that the Legislature would cut their appropriations, he said.

But at this time the Army Air Force was forming training detachments at colleges throughout the country. Central State Teachers College applied for one and got it.

As the first trainees arrived and marched from the depot to Nelson Hall, one of the officers of the detachment said, "The men are in good condition and their morale is high. They feel they're going to like Stevens Point."

The trainees came from all parts of the country.

One of them, W. R. (Dick) Hudson, met a local girl, Peggy Lewis, married her after the war and settled in Stevens Point. They live at 1000 Green Ave.

(Editor's note: Another member of the unit was John Alleman, who now lives at 6961 Dulske Rd., Amherst. He was among the first trainees to arrive in the program. He was originally from Eldon, Iowa, but returned here after the war to marry Betty Menzel. He was also hoping to be on the ground floor of a new business in Stevens Point—an airline that was being considered for establishment by Victor Bukolt. Alleman wanted to work for Bukolt as a pilot, but the company never got off the ground. Alleman also returned to UW-SP, but that wasn't until recently when he spent two semesters here studying home economics. He had undergone heart surgery and was interested in studying nutrition and its effects on his recovery.)

Hudson, who grew up in New Mexico, had gone through diesel engineering school in California and planned to be an engineer on a fishing boat. But with the draft breathing down his neck, he decided he'd rather fly than hike, and he enlisted in the Air Force in August 1942.

In the fall of 1943 he was sent to Stevens Point. He recalls it as good duty. During their free time, while the weather stayed warm, he and fellow trainees hitched rides to the Waupaca Chain o' Lakes.

From here he was sent to California for more training. All the trainees, Hudson said, wanted to be pilots, but the Air Force also had need for navigators, gunners, bombardiers and flight engineers. Hudson became a tail gunner and emergency engineer on a four-engine bomber, a B-24. He served in the Pacific, flying combat missions over Truk, Iwo Jima and other Japanese bases. Supposedly, flight crews were to be sent home after 25 missions, but Hudson said the number kept being raised. Eventually, he flew 40 missions.

Flying for 11 or 12 hours over water in a land-based plane, with a reception from Japanese fighter planes at the far end, was unnerving, he said, "but luckily we made it."

Not all the men who trained here did. The number of casualties is not known, but it probably was substantial.

The two who died in plane crashes while stationed in Stevens Point were Lloyd O. Murray, 20, of Columbia, Mo., and Clifford R. Sabo, 18, of Choteau, Mont.

Murray died with his instructor, Raymond E. Larson, 28, Janesville, on March 24, 1944. Their plane reportedly went into a spin at high altitude and failed to pull out. It crashed a half-mile south of Highway 10, at the east edge of the big Jordan Swamp near Ellis, coming to earth close to a pulp-cutting crew.

Sabo and his instructor, Robert L. Anderson, 27, of Champaign, Ill., died when their plane burst into flames and crashed as it approached the south edge of the Municipal Airport.

The men who trained here were quartered in Nelson Hall, formerly a women's dormitory. For a time some of them also stayed in the Training School, now the UW-SP Communication Building. It was the second time that Nelson Hall had served as a military barracks. During World War I, it housed a Student Army Training Corps unit.

The men of the 97th were supposed to be here for 20 weeks, but some were run through the course more quickly, President Hansen said.

The men came in and were shipped out by rail—the Soo Line had passenger service in those days.

Capt. Fred Philippo commanded the detachment from the beginning until March 1944, when he was transferred to the European theater.

His second in command, Lt. John Beebe, succeeded him.

A. E. Padags, manager of the Municipal Airport, was the chief civilian flight instructor.

The training needs of the Army Air Force gradually diminished, and in February 1944, a year after the local detachment was created, it began to be phased out. The following May, on the night before the last men left, the college gave a dinner for them at Nelson Hall and the Whiting Hotel sponsored a dance.

A dozen officers and enlisted men, members of the permanent party, stayed on a little longer to wrap up details, and then the 97th became history.

The community was sorry to see them go—including the young women. There was, after all, a local shortage of young men because of the military draft and enlistments.

Besides training airmen, the 97th had helped Central State Teachers College over a hump. Without the servicemen, the campus would have been an empty place. To illustrate, the spring graduating class in 1944 consisted of 66 students, every one a woman.

By the fall of 1945 a trickle of returning servicemen began enrolling in American colleges, and aided by the GI Bill, it soon became a flood.

Troops who were stationed at UW-SP during World War II stayed in Nelson Hall and had many formations on the lawn in front of Old Main where this picture was taken more than 40 years ago.

Alfred James Herrick—teacher educator recalled

The history lesson about UW-SP in this edition of Pointer Alumnus centers on Alfred James Herrick who played a major role in preparing several thousand students for careers as teachers.

James Herrick

He was an alumnus of the Stevens Point Normal—class of 1902—who returned to the school as a faculty member in 1912 and stayed until his retirement in 1945.

For the first eight years he was here, Mr. Herrick directed the high school division and taught science. During the 25 remaining years of his campus career, he was director and principal of the Training School.

Many Stevens Point children received their elementary and junior high school education at the Training School, later known as the Campus Laboratory School. Education majors on the college level did their "practice teaching" there. (The building which housed the school is now the Communication Arts Center.)

A resolution passed by the UW-SP faculty after his death noted that Mr. Herrick's "most outstanding personal characteristic... was his tenacity of purpose which, combined with a remarkable sense of sincerity and honesty, was the cornerstone of all his thoughts. He was a man of great mental ability, of broad vision, and had a true sense of educational values."

Mr. Herrick was a native of Augusta who became principal of the grade school in Whitehall after his graduation from the Stevens Point Normal. He was instrumental in founding the high school in Whitehall of which he became principal. He later served as principal of the Cumberland High School. Mr. Herrick pursued additional course work at UW-Madison before joining the faculty of his alma mater in Stevens Point.

He brought prestige to UW-SP through his contributions to professional educational journals, as a public speaker, and through his service as a president of the Wisconsin Teachers Association.

A file in the university archives of some of Mr. Herrick's correspondence, reveals his foresight during World War II in the changes education would take with the return of servicemen and peacetime. He called for major revisions in the curricula, for a new thrust in adult education and test-out opportunities for veterans in courses in which they would possess previously-earned knowledge through earlier study or life experience.

At the time of his retirement at age 70, he observed that his responsibilities in coordinating teacher placement for local education graduates had changed drastically in a decade.

Said he: "During the Depression years, graduates were frantically trying to find jobs. School executives would come to my office and would examine

credentials with a fine comb. Only graduates with exactly the right qualifications would be considered.

"Nowadays, those same school executives come into the office and say of a graduate—what salary does she want? Then he will hire her before somebody else does.

"A few years ago, I had to placate irate parents who demanded that non-existent teaching positions be found for their graduating sons and daughters. Now it's a question of placating harassed superintendents who are much disturbed because there aren't enough teachers to fill positions."

In the six years of his retirement prior to his death in 1951, Mr. Herrick enjoyed his hobbies of woodworking and fishing. He had four children, all of whom received either diplomas or degrees from UW-SP.

He was the father of four children. His son, Virgil, followed closely in the father's career path by directing the University of Wisconsin Laboratory School in Madison. The son also became known as one of the nation's foremost authorities on handwriting.

Faculty obituaries

George Dixon, 1920-1984

George Dixon, 64, first chairman of UW-SP's sociology department, died Dec. 12 at his home in the Town of Plover following a long illness.

His body was cremated. No funeral service was held.

A longtime foe of nuclear power plants and nuclear warfare, Dixon worked actively in the 1970s to halt the

George Dixon

Wisconsin Public Service Corp. from constructing a nuclear power plant in Rudolph. It was never built.

Appropriately, a memorial was established in his name after his death

for Nuke Watch, 315 W. Gorham St., Madison.

Dixon joined the UW-SP faculty in 1954 and served until 1976 when he retired because of ill health. At that time, he said he took greatest pride in the fact he was involved in the development of the peace studies program on campus. In addition, he led what is believed to have been the first archaeological dig sponsored by the university. It was in about 1957 in the Town of Plover, and the findings gave initial proof that an Effigy Mound Culture had existed in Portage County.

In the late 1960s, Dixon did one of the early research projects on childless couples, and reported on his study at a professional meeting. Based on interviews conducted over a period of about 15 years, he learned that "a lot of people who are childless didn't want babies, and a lot of other people in the same category felt a hatred from many members of society for not having had babies.

During the Vietnam Conflict, he was among the most vocal anti-war activists in Stevens Point.

Dixon served on the state Legislative Council's Public Welfare Committee, the governor's Commission on Aging Population, participated in the governor's Commission on Human Rights and served as consultant in sociology, anthropology and social psychology in the Wisconsin revision of school curriculums. He was vice president of the Wisconsin Sociological Association and was a member of several other organizations related to sociology.

Dixon was born Feb. 7, 1920, in Hazelton, Pa., and served in the Army infantry during World War II, including Normandy and Naples. He received his bachelor's and master's degrees from Montana State University and his doctorate from the University of Nebraska. Before coming to Stevens Point, he taught at the University of North Dakota for two years and the University of Nebraska for one year.

Dixon's survivors include his wife, the former Gertrude Auren, whom he married Dec. 21, 1942, in Fort Benning, Ga.; one daughter, Cassandra Dixon, Madison; one grandson; one brother and four sisters.

James Newman 1925-1985

James G. Newman, 59, one of the principal architects of UW-SP's forestry program, died of cancer Jan. 20 at his home, 609 Linwood Ave., Park Ridge.

He had been under medical treatment about 15 months.

A memorial service was held Jan. 26 in Michelsen Concert Hall in

James Newman

UW-SP's Fine Arts Center. The body was cremated. A memorial fund was established in the UW-SP Foundation for the College of Natural Resources.

Newman's association with UW-SP spanned 25 years.

He taught half time, was a coach and part-time student in 1952-53 and returned as a full-time professor in 1961 in the former conservation department. He did much of the work in developing the forestry major which was established in the late 1960s. Today, UW-SP ranks number one in the nation in the size of its undergraduate program on that subject with more than 500 students.

Since the UW-SP College of Natural Resources was created in 1970, he served most of the time until last fall as assistant dean. He also was acting dean in 1980-81. He was the senior member of the college's faculty which now numbers about 40.

Newman's other major contributions to UW-SP include an active role in the planning of the Natural Resources building; development of the summer field program which will be moved next spring to a new camp, Treehaven, near Tomahawk; and development of overseas summer field study for students in Germany. He and colleague Robert Engelhard led the first student group to the Black Forest in 1972.

He was president of the Wisconsin section of the Society of American Foresters in 1983 and chaired a committee for the national society in 1978 that was responsible for developing activities to involve college students. In 1971, former Gov. Patrick Lucey chose him to review timber management policies on state-owned land, and in 1983 Gov. Anthony Earl appointed him chairman of the new Council on Forest Productivity.

Born August 14, 1925, in Akron, Ohio, he was the son of Gilbert C. and Esther Newman. He grew up in Akron and later earned a bachelor's degree from Michigan State University, a master's from the University of Akron and a Ph.D. from Michigan State.

He served in the U.S. Navy from 1943 to 1946.

He began his career in natural resources as a ranger and nature interpreter at Yellowstone National Park and then served from 1950 to 1952 with the U.S. Forest Service in Quincy, Calif., and Laona, Wis. His first teaching post was at UW-SP, and later he served on the faculties of high schools in Oconto, Green Bay and his native Akron, before returning to the university.

Newman was married June 12, 1954 in Wabeno to Vivian Hofman who survives. Other survivors are two sons, James Jr., and Jon, both at home; two daughters, Mrs. Timothy (Linnea) Newman-Michalaki of Blaine, Minn., and Patricia of Madison; and one sister, Mrs. Andrew (Alice) Kmetko of Wheeling, Ill.

Arnold M. Maahs, 1909-1985

Arnold M. Maahs, who taught sociology at UW-SP from 1966 to 1979, died of cancer March 10 at his home in Tilleda, Shawano County. He was 75.

His funeral was held March 13 at Peace Lutheran Church in Tilleda.

Arnold Maahs

Burial was in the church cemetery. Memorials were established in his name for the Tilleda 4-H Club and a scholarship fund at his church.

Maahs was a world traveler, educator, chaplain, parish minister, film producer, freelance writer and photographer, lecturer and small business-

man. He most recently operated a tree nursery in Tilleda, which received national attention in "Money" magazine. The nursery was described as a growing business that emphasizes economical prices as well as quality in its full line of seeds and nursery stock.

He earned a bachelor of divinity degree from Capitol University, Ohio. He served a pastorate in Pittsburgh for Romanian immigrants. When World War II began, he enlisted in the Air Force as a chaplain and served in New Guinea for three years. He was promoted to lieutenant colonel.

During the war, he developed an interest in motion pictures which grew to a career as a lecturer on travel and adventure. In 1946, he and his wife and three children began a six-year trip around the world, that culminated in a film he made on New Guinea. The film raised \$750,000 for the American Lutheran Church missionary activities on the island. The family also traveled to Australia, India and Germany for the church, making motion pictures in each country. He returned to Tilleda

in 1952. He worked as a lecturer on world travel for agencies in Chicago, Boston, Atlanta and Los Angeles.

He received master's and doctorate degrees in 1956 from the University of Pittsburgh. He then made films on the St. Lawrence Seaway, Hawaii and Alaska. From 1964 to 1967, he was commander of a reinforcement training unit of the Army's 5027th Infantry Division in Wausau. He began teaching at the UW-Stevens Point in 1966. He was promoted to full professor in 1970 and retired in 1979. His fields were sociology, population, human relations and minorities.

He was born on March 6, 1909 in the Town of Seneca to the Late Henry and Rose Maahs. He married Mildred (Molly) Felts on July 1, 1929 in Waukegan, Ill. She survives. He was a member of Peace Lutheran Church, Tilleda, and active in the Tilleda Advancement Club.

Besides his wife, the survivors are one son, two daughters, one brother, four grandchildren and three great-grandchildren.

Summer workshop set in chemistry

UW-SP has received a \$20,500 grant from the National Science Foundation to conduct a workshop in chemistry this summer for 20 area high school teachers. The project is aimed at helping the teachers make chemistry more fun for secondary students during initial encounters with the subject.

Led by Professors Oliver Andrews and Steven Wright, the workshop participants will explore visualization of chemistry concepts—why it is important and how to effectively teach using a mental picture approach.

The sessions will be four hours per day, three days per week between June 11 and July 3. The teachers will receive three graduate credits and have their tuition and fees waived. In addition, stipends of \$25 per day and allowances for housing and travel will be provided.

Application information may be obtained from the Department of Chemistry, Science Building, UW-SP, Stevens Point, Wis. 54481, phone (715) 346-2888.

Youth, adults will study environment

Environmental-related programs for both youth and adults are planned during the summer of 1985 at UW-SP's Central Wisconsin Environmental Station on Sunset Lake.

Teachers are eligible to earn credit for participation in "Encounters of the Environmental Kind" from June 17 to 21, and for involvement in a Boundary Waters canoe trip Aug. 3 to 10.

Senior citizens age 60 and older may participate in "The Lake States through the Eyes of Wisconsin's Great Naturalists" as part of an Elderhostel program July 21 to 26.

Youth programs are: "Nature Adventure Camp" for boys and girls between ages of nine and 13, in four separate weekly sessions from mid-June to mid-July; "Natural Resources Careers Workshop" for high school students, three separate weekly sessions—one in June, one in July and one in August; "Youth in College" for gifted and talented students in grades six through 10, July 28 to Aug. 9; and "Lake Superior Wilderness Trek" for junior and senior high school students, July 6 to 13.

Information about the programs may be requested by phone or letter. The address is Central Wisconsin Environmental Station, Amherst Junction, Wis., 54407. The phone number is (715) 346-2028.

Institute to probe 'Bad Guys' of history

An expense-paid institute for public and parochial elementary and secondary school teachers on "Historical Bad Guys: Machiavelli, Hitler and Mao Tse-tung" is scheduled for this summer at UW-SP.

It will be offered in three two-week modules and may be taken for two, four or six graduate credits in history or may be audited between June 10 and July 19.

With a grant of nearly \$21,500 from the Wisconsin Humanities Committee, the university will waive tuition and fees and provide stipends to cover other expenses. Participation will be limited to 30 teachers from the state.

Instructors will be three members of UW-SP's history faculty: Donald Dietrich who will teach the section on Hitler, Stephen Pistono on Machiavelli, and Hugh D. Walker on Mao Tse-tung.

Inquiries can be directed to Professor Pistono in care of the history department in the Professional Studies Building, phone (715) 346-2334.

Student achievements

Sig Taus win national honors at convention

The student chapter of a social fraternity at UW-SP was chosen last summer for national recognition including the designation of its adviser and one of its members as best in the nation for advising and acting, respectively.

Oliver "Bud" Steiner, longtime adviser to Gamma Beta chapter of Sigma Tau Gamma at UW-SP, was named the top adviser in the U.S. among 80 groups nationwide. He was recognized at the 31st Grand Chapter

Bud Steiner

meeting held recently in Milwaukee. Steiner also is director of the North Central Region, which hosted the conference.

In addition, the UW-SP student chapter donated \$1,000 to the Sigma Tau Gamma Foundation in Steiner's name, designating him as a Wilson C. Morris Fellow. The fellowships honor people who have made outstanding contributions to the fraternity.

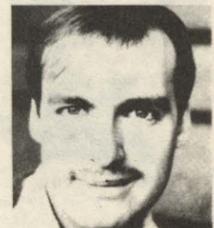

Student Lawrence J. Lukasavage of Stevens Point, a senior theatre arts major, received the 1984 Performing Arts Award from the national fraternity. He is the third recipient of the honor established by the organization in 1982.

Lukasavage, who served the UW-SP chapter as president last year, has performed in university and community theatre productions. He was a member of the cast of "Secret in the Toyroom," a locally produced anti-child abuse play which has toured throughout the state. A student senator, Lukasavage also has served on the residence hall council and is a member of the ROTC rifle team.

Jeff Gress of Antigo, who was graduated from UW-SP in May with a business degree, was among the top 10 contenders for the fraternity's "Man of the Year" award. He received honorable mention for his contributions to the local chapter, including

serving as president for two years and developing the organization's constitution and bylaws. He currently is working for the McDonald Corp. in Rockford, Ill.

In addition, Gamma Beta Chapter was presented with a certificate of achievement for obtaining an "A" rating in the Chapter Standards Program. This designation is based on number of pledges, members, reports filed and the overall scholarship of its members.

Larry Lukasavage

The chapter also received a Robert Magel Jones Charitable Projects Award for its work at the Portage County Home. Throughout last winter and spring, its members and their auxiliary "Little Sisters" spent one Sunday afternoon each month playing cards and bingo and visiting with senior citizens. The fraternity provided the prizes.

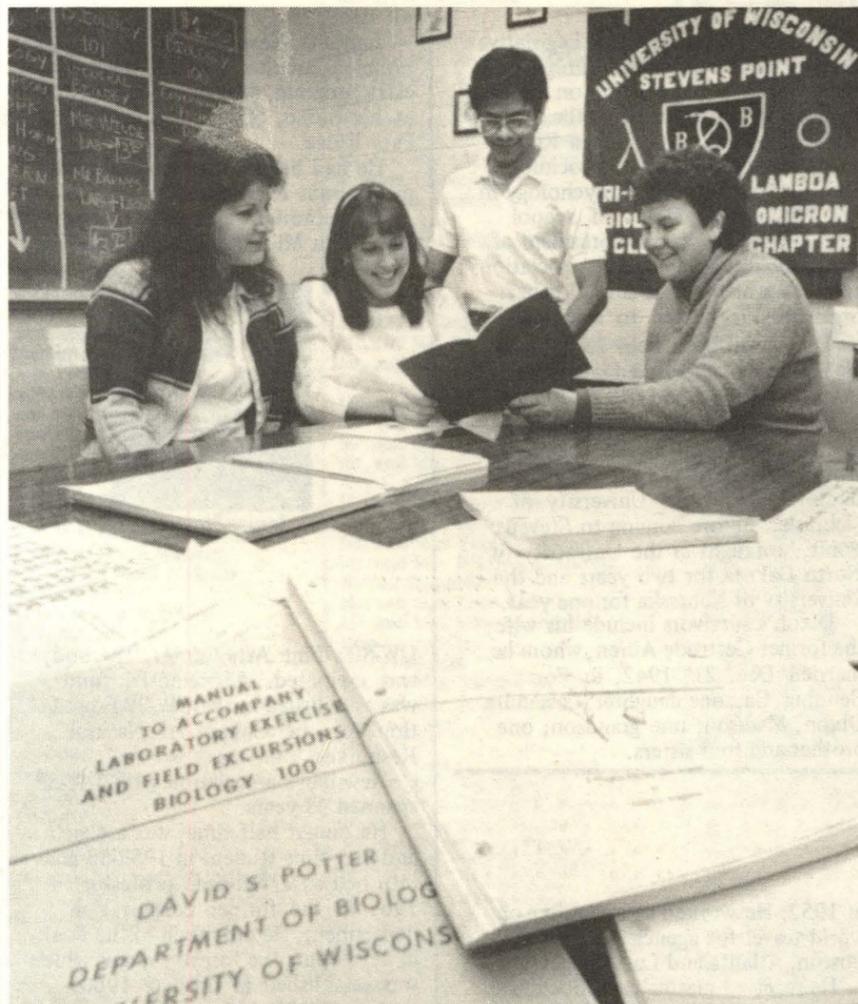

State Queen

Deborah Strauss, who will be graduated from UW-SP in May, is the reigning Miss Wisconsin USA. She is from Thiensville and a 1980 graduate of Homestead High School.

Deborah Strauss

The 1984 Miss Stevens Point, she qualifies by virtue of her state title to participate in the USA pageant May 6 in Lakeland, Fla. The finals of that event will be televised nationally.

Officers of a student biology organization sold lab manuals to raise money to attend a national convention where their organization was rated best in the nation.

Biology chapter ranked No.1

For the second time in four years, a student organization at UW-SP has been named number one in the nation by a national biology society.

Beta Beta Beta Biological Society has chosen UW-SP's Lambda Omicron chapter to receive the Lloyd M. Bertholf Award for Chapter Excellence for 1983-84. It was selected from among 320 student organizations nationwide.

Twenty-six Lambda Omicron members and their adviser, Kent Hall of the UW-SP biology faculty, attended the national convention in Tempe,

Ariz. The delegation from UW-SP was the largest at the meeting.

The recognitions for chapter excellence are given annually to the clubs judged most effective in the areas of scholarship, participation and programming. During the past six years, the UW-SP chapter has received two first place awards, one second and one third.

In addition, Marijane Russell of Wausau placed second in the mammalian physiology section and Todd Varnes of Middleton took third in the behavior and ecology category.

History society among best in United States

A student group at UW-SP has received an honorable mention award from an international history honor society.

Phi Alpha Theta selected UW-SP's Iota Delta chapter to be among 27 student organizations throughout the U.S. recognized for outstanding achievements.

The local chapter, which is open to history majors with high grade point averages, has about 20 active members. The group organized several activities during the last academic year, including an awards ceremony for the history department; history advising sessions; a major panel discussion about World War II in the East, accompanied by a display at the library; and a regional conference attended by Phi Alpha Theta chapters from throughout the state held at UW-SP this spring.

The organization's faculty adviser, Neil Lewis, was named adviser of the year by the Campus Leader's Association, and several of its members were chosen for university-wide recognition and history department awards.

Chapter officers for 1983-84 were headed by Patricia Newman of Park Ridge as president.

To promote arbor groups on campuses

The International Society of Arboriculture has designated students at UW-SP to help in the establishment of new chapters at institutions of higher education across the United States.

There is only one student group aligned with the society, and it is at UW-SP.

The international officers recently allocated \$710 in response to a proposal from UW-SP to conduct an outreach project in academe.

The money is being used by local students for travel to other campuses. The first trip was to Michigan State University in East Lansing.

But there'll be other activities as well. A newsletter developed at UW-SP will be expanded to include a quarterly edition for national distribution to urban forestry students. In addition, a job referral service will be started, and monthly announcements will be distributed. UW-SP students will continue holding an activity night at the society's international meetings each year. The next one will be in Milwaukee.

Five years ago, students of urban forestry formed their own organization at UW-SP. The state chapter of ISA recognized it in 1981 and the international body designated it as a special interest group in 1982.

Robert Miller of the College of Natural Resources faculty, is adviser to the student organization.

Wildlife chapter wins top state recognition

A student organization at UW-SP has been designated as "outstanding" in an award from the state chapter of the Wildlife Society.

The student Wildlife Society was commended for the high calibre of activities during the 1983-84 academic year.

This is the first time the student group has been so honored, according to Kirk Beattie, UW-SP faculty member and outgoing president of the state society. The award is usually given to individuals for outstanding research or accomplishments in the field.

Some of the student chapter's activities included: recycling collections; book and t-shirt sales; a reptile show; presentations and exhibits in public schools and libraries; field trips; goose banding, vegetation sampling, seed collecting and shrub planting; osprey nest platform construction, bluebird nestbox construction, and nestbox inspection; participation in the annual sandhill crane count; general meetings with guest speakers; and attendance at conferences.

The group has a membership of about 150 students. Last year's officers were headed by Robin Bouta of Clontarf, Minn.

Students walk so eagles can fly

UW-SP's Environmental Council has contributed \$3,400 toward the preservation of three acres of land in Eagle Valley, a nature preserve in southwestern Wisconsin.

The Eagle Foundation, a non-profit environmental group dedicated to preserving Bald Eagle nesting areas, has presented the UW-SP organization with a certificate citing the donation. The foundation also presented a signed and framed eagle print by nature artist K. Carlson to the UW-SP council.

The money was raised through a series of Eagle Walks, 200-mile hikes in support of the nation's endangered symbol, held annually for the past three years during UW-SP's spring breaks.

A fourth Eagle Walk was from March 29 to April 6.

During their walks, students, who pay their own expenses, encourage members of the public to make financial contributions to their cause. Donors also may send their checks directly to the Eagle Foundation, Box 155, Apple River, Ill. Proceeds are used to help maintain the 1400-acre preserve where an eagle roosting area has sheltered up to 50 of these birds on some winter nights.

Good news for tree growers

Fertilizing pine tree stands may have "dramatic" results in future timber production in some parts of the state, according to a professor at UW-SP.

James E. Johnson, a forester in the UW-SP College of Natural Resources, says growth rates of some pines on moist, infertile sites could improve by 40 to 50 percent.

There have been several trial fertilization projects in lake states regions in recent years, Johnson reports, with the greatest responses from nitrogen, phosphorous and lime additions.

The procedure is considered expensive by timber producers, but Johnson believes that it will be wise for large growers/users such as paper companies to begin making plans to pursue it in certain areas, particularly Central Wisconsin where the water table is high and nutrients are absent in the sandy soil.

A problem in Wisconsin is that "we must be able to recognize where the best response (to fertilization) would be," but no system has been established to test forest soils. "We need a lot more research work to be done," he explains.

Alumni board officers chosen

The University of Wisconsin-Stevens Point Alumni Association has three new members on its board of directors.

They are Dean Van Order, class of 1979, of Stevens Point; Lewis Drobnick, class of 1940, Omro; and Chet Polka, class of 1952, Berlin. They will serve three-year terms.

In addition, William Horvath of Stevens Point has been re-elected to a second one-year term as president and Pat Curry of Wisconsin Rapids, was re-elected to a second term as vice president.

Re-elected to three-year terms as directors were Marion Fey and D. Patrick Vaughn of Wisconsin Rapids, Kenneth Kulick and Richard Toser of Stevens Point, and Bruce Menzel and John Taylor of Milwaukee.

The total board numbers 25, and its members make selections of new directors and officers.

At their recent meeting on campus, the directors made plans for continued involvement in raising money for student scholarships and assisting at special university events, other fund raising, student recruitment and general development projects.

High tech communications system planned for UW-SP

People as well as computers and word processors will communicate with one another via a new telephone/information system currently being installed at UW-SP.

The AT&T System 85 with a fiber optic backbone will link every office and every dormitory room on campus in one of the first installations of its kind on an American campus.

Officials at AT&T said the equipment will be operational in August. The cost will be about \$1.3 million to be defrayed in seven years with savings from current expenditures for maintaining a Centrex system.

The only system like it in Wisconsin was recently installed at the Marine Bank in Milwaukee.

Even with a reduced bill, the university will significantly increase phone and other communication services on campus. Beyond several phones on each floor of a dormitory, only about 20 rooms are now equipped with private lines. Every room will have a phone and private line in the new system.

Students currently wanting a phone in their rooms are required to pay an installation fee and regular rates which for two people average nearly \$25 per month over two semesters. The cost

under the new system will be about \$3 per person per month.

Further, a plan to lease long distance lines is expected to provide additional savings to students.

The most unusual aspect of the new technology will be in the area of data access.

Information and data will be exchanged through the system between university computers and personal computers, data terminals and other devices including word processors.

Students with personal computers in their dorm rooms will have the capabilities, for example, of securing data from the library 24 hours per day.

Gil Regnier, Area Vice President for AT&T Systems, said the system at UW-SP is "our leading edge product and one we'll be enhancing with software additions throughout the 1980's."

AT&T was chosen to provide the service after the university, with assistance from the Wisconsin Department of Administration, used a modified bidding procedure to solicit proposals from firms across the country involved in information systems.

Lensmire reveals his magic

Advice to teachers wanting to do "some magic" in their classrooms: Assign students to work and study together, to help each other and to be responsible for one another's learning, says Warren Lensmire, a UW-SP professor who retired in December.

Lensmire's recommendations comprise cooperative grouping which he believes is one of the most effective approaches to teaching he has ever observed.

"Years ago, we emphasized competition, but the results weren't nearly as good," he recalls.

Warren Lensmire

Lensmire tested many theories through 41½ years in the field of education. Sold on the idea of encouraging children to share problems and talents, to seek help and offer assistance, he concludes simply: "It really works."

Teaching colleagues could become more successful in self-improvement too, he believes, by doing the same things.

Lensmire's optimism about his profession is much like his personality. He believes smiles and kind words are among life's best tools.

The professor says improved salaries have made a major difference in attracting more highly skilled people into the teaching profession. And, he endorses policies being enacted in colleges and universities across the country which require people to demonstrate specific competencies when they begin teacher training programs and again when they are ready for graduation. preparation programs on the undergraduate level will become a reality soon, he predicts.

The professor has a view of teaching that extends from his childhood. His mother and uncle were teachers and instilled an interest in their profession in him. Though he never practiced the trade, he learned cheese-making from his father and maintained a state license until a few years ago.

Lensmire was born and reared in the farm country between Marathon City and Edgar and became a certified

teacher in 1940, after completing a two-year course at UW-SP. Many of the people whose names are on campus buildings were his professors. He later earned a bachelor's degree on campus, a master's from UW-Madison and did additional graduate study at several institutions across the country.

He taught six years in rural schools of Marathon County, was principal of the elementary school one year, and librarian and English instructor in the high school one year in Marathon City, librarian at Pulaski Community Schools for three years, and president of the Wood County Teachers College in Wisconsin Rapids for 10 years prior to its closing, and at UW-SP the past 19 years.

Lensmire was UW-SP's specialist in the area of individually guided instruction. He also has been and will continue to be the university's link to area public schools as facilitator for staff in-service instruction. His services have been provided to about 35 school districts. More recently, he has also been a facilitator of the Wisconsin Reform and Improvement of Secondary Education Program.

He is a former executive secretary of the School Masters Association of Central Wisconsin, a life member of the Central Wisconsin Educators, executive secretary of the Wisconsin Individually Guided Education Coordinator's Committee and a member of the organization's same board at the national level. For the Wisconsin Department of Public Instruction, he has served on its curriculum committee as an outgrowth of active participation in the Wisconsin Association of Supervision and Curriculum Development. He is a past president of the UW-SP Alumni Association.

In 1983, the Wisconsin Association of Teacher Educators gave him its "Supervisor of the Year" Award.

For the past two years, Lensmire has been serving the university on a half-time basis. He plans to maintain more limited involvement with the institution through continued service to the Wisconsin Valley League of Schools.

Foreign travel, gardening, reading and visits at the homes of his five children and five grandchildren also are planned. He and his wife, Grace, are spending winters at their home in Spring Hill northwest of Tampa, Fla., and summers at a home near Lake Du Bay. In education, he hopes to use his talents in support of children at his church in Knowlton and to continue studying new teacher strategies and methods.

Bangstad heads choirs

Gary P. Bangstad, a Minnesota native, is UW-SP's new director of choral activities.

Bangstad's duties at UW-SP include conducting the Oratorio Chorus and the University Choir and directing the annual Madrigal Dinner held each December. He also coordinates activities in the university's choral and vocal areas.

Bangstad comes to UW-SP following a year spent as a Visiting Scholar at the University of Illinois pursuing post-doctoral studies with Louis Halsey.

He formerly served on the faculties of Willamette University, Salem, Ore.,

Shorter College, Rome, Ga., and the University of South Florida, Tampa, Fla., as well as having taught at high schools in Minnesota and Illinois.

He holds a bachelor's degree from Gustavus Adolphus College, St. Peter, Minn., a master's degree from the University of Illinois at Champaign-Urbana, and an Ed.D. in Music from Arizona State University at Tempe.

Bangstad has sung under Robert Shaw in the Atlanta Symphony and Chamber Choruses, Helmuth Rilling in the Oregon Bach Festival Chorus and Margaret Hillis in the Chicago Symphony Chorus.

Professor Gary Bangstad posed with his choir in the Fine Arts Center.

Judy heads business

A Silver Spring, Md., man who has been a teacher, private consultant to business and a management officer in the U.S. Army Medical Service Corps, assumed duties in January as head of the Division of Business/Economics at UW-SP.

Richard Judy

Richard B. Judy, 50, retired from a 26-year military career to assume the position vacated last summer by Robert Taylor. After three years on campus, Taylor took over leadership of the business program at the University of Louisville in Kentucky.

A native of Cincinnati, Judy has a bachelor's degree in biology and chemistry from Franklin College in Indiana, an M.B.A. in management and organization behavior/international business, and completed his dissertation

this year for a Ph.D. in strategic management/organization behavior from Indiana University.

A member of the Army since 1958, he has advanced to the rank of lieutenant colonel and has held the title of chief of staff of operations at the General Officer Command in Rockville, Md., since 1983. He served previously as director of plans, operations, training and security at Walter Reed Army Medical Center in Washington, D.C. His assignments have included a three-year tour in Germany and from 1966 to 1968 in the combat zone of Vietnam. He has also been a science instructor for the Army's Academy of Health Sciences.

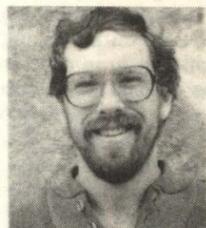

In his private time, Judy has operated R. J. Associates, Consultants to Management, the past seven years in Maryland, and has taught management courses at Indiana University, St. Leo College in Atlanta, Ga., and the Catholic University of America in Washington, D.C.

He received both the Outstanding Teacher Award from the Indiana University Alumni Association and the Distinguished Teaching Award from the Graduate School of Business there in 1980. St. Leo College named him its outstanding professor.

Jazz studies program director announced

Michael Irish of Wisconsin Rapids, is the new director of jazz studies in the music department at UW-SP.

He heads the new program in jazz/commercial music within the bachelor

Michael Irish

of music curricula on campus. Offerings include courses in large jazz ensemble, jazz combo, guitar ensemble, jazz arranging, improvisation and private guitar lessons.

Irish also directs the UW-SP Jazz Ensemble which is a "laboratory" for students to gain practical experience. The performing group makes numerous appearances throughout the state each year and generates money used for student scholarships.

A native of Laona, he received his bachelor of music education degree from Northern Michigan University in Marquette and his master's degree from UW-SP.

He has appeared with the groups led by Don Ellis, Harold Jones and Rob McConnell. Irish currently is a regular member of the Lowell Ives Orchestra which appears at Carlton West in Green Bay. Among the celebrities his groups have accompanied are Carol Lawrence, Rodney Dangerfield and Bob Hope.

Miss Clawson will leave administration

Alice L. Clawson, who has headed the School of Health, Physical Education, Recreation and Athletics at UW-SP since 1980, will return to full-time teaching this summer.

She will turn over her administrative responsibilities to John L. Munson, who will serve with the dual title of acting head of the school and acting assistant dean of the College of Professional Studies.

His appointment will be for one year, while a search and screen committee works to recruit a permanent successor, according to Arthur

Fritschel, dean of the College of Professional Studies.

Miss Clawson, who has a doctorate from Texas Woman's University, has been on the UW-SP faculty since 1966. Munson, who like Miss Clawson is a native of Ohio, has been at UW-SP since 1975 when he earned a doctorate from Ohio State University.

In addition to teaching at UW-SP as a specialist in elementary school physical education and motor development, he also has served as coach of the Pointer wrestling team. He doubts whether he will retain his coaching duties while in his administrative post.

The change of leadership will be at the beginning of the fall semester in August.

A summer highlight

Open house to mark Environmental Station's anniversary

An open house on July 20 will mark the 10th anniversary of UW-SP's Central Wisconsin Environmental Station.

The station, for many years a Boy Scout camp before being put to use by UW-SP's College of Natural Resources, is located on Sunset Lake east of Nelsonville.

Alumni of the practicum courses, internships and former staff are invited to be among the special guests. People

in those categories unable to attend are encouraged to send letters which will be posted during the party.

The open house is scheduled from 1 to 5 p.m. Tours, entertainment and refreshments will be provided. At 2:30 p.m., a brief program is scheduled. Chancellor Philip Marshall, former Chancellor and Governor Lee Dreyfus and current Governor Anthony Earl have been invited to be speakers.

Since its start in 1975 more than

120,000 people have participated in programs offered at the station. More than 300 students from the College of Natural Resources have been involved in leadership roles. Many of the visitors have been school children from the region.

The UW-SP Foundation has sponsored the development of the station with donations and in-kind gifts from area individuals and businesses.

Rick Wilke, who has directed the

station since it opened, says he would like to provide mailings to former students which will provide updates on the facility. Requests to be added to the mailing lists may be sent to him at the station by way of the Amherst Junction Post Office.

Wilke, who was named this spring as outstanding teacher of the year in the College of Natural Resources, is an alumnus of UW-SP who later received a doctorate from the University of Southern Illinois at Carbondale.

Emerson School children compared notes at the conclusion of their field trip to the Central Wisconsin Environmental Station.

Emerson School students from Stevens Point participated in a "jam a quack" game at the Central Wisconsin Environmental Station.

The work of beavers on the grounds of the Central Wisconsin Environmental Station are a perennial favorite among young visitors.

Terry Porter--Pointer great--ends collegiate career

Taking a lead from radio commentator Paul Harvey, there is the news about UW-SP basketball player Terry Porter which people read and hear about, and then there is the rest of the story.

Little more can be said or written about Terry Porter, the basketball player. He has been the subject of numerous articles in such nationally circulated publications as *Sports Illustrated* plus reports on the Associated Press, United Press International and ESPN. Either through honors or stories, virtually every move he has made on the basketball court has been documented.

Among his many honors are first team All-American by the NAIA and National Association of Basketball Coaches, most valuable player in the WSUC two straight years, NAIA All-National Tournament two straight years, and selection to post-season all-star games in Lexington, Ky.; Portsmouth, Va.; and Honolulu this season.

In addition, he concluded his UW-SP career as the school's all-time leading scorer with 1,585 points, is first in steals, 171; second in assists, 440 (one out of first), and 12th in rebounding, 450.

The rest of the story that few know about focuses on the private life of Terry Porter.

Porter, a thoughtful senior who is majoring in communication, admits that how he is perceived off the basketball court is important to him.

"I hope people see me as a good guy who is easy going and easy to get to know. I hope people don't think I have an ego problem and realize that I really like being around people.

"It bothers me a little that some people see me as only a basketball player. I feel there is a lot more to me than that."

Being around people is a Porter trademark, whether he likes it or not. Requests for his time are numerous and range from speaking to grade school children in Rosholt about Martin Luther King to adults in area service clubs about the game he loves.

Porter was secluded from the press and from making special appearances

from mid-season to season's end. He admits it was a relief but adds he does enjoy speaking opportunities.

"I don't get nervous speaking. If I have a good knowledge of the subject I feel comfortable. I do enjoy speaking to groups, but it was a relief not having to do the interviews during the season. It gave me more time to reflect on a game and to enjoy a win.

"I don't think I was overwhelmed by all of the attention. Things just seemed to slip when the attention got intense."

Porter does feel that the interviews he has done have helped him in his communication major.

"I plan on going into TV or radio after school and I think this whole experience has helped prepare me for it."

Overzealous fans or media personnel occasionally make unusual requests which Porter admits go with his territory, but there are parts of a photo sessions with *Sports Illustrated* which especially stick out in his mind.

"The photographer from SI was a woman and I couldn't believe some of the poses that she had me do. Most of them were on my waterbed with just shorts on. I thought there was something wrong with her.

"The most fun request was also *Sports Illustrated* when they had Coach Bennett and me shooting buckets at Goerke Park. It was fun just to goof around with coach."

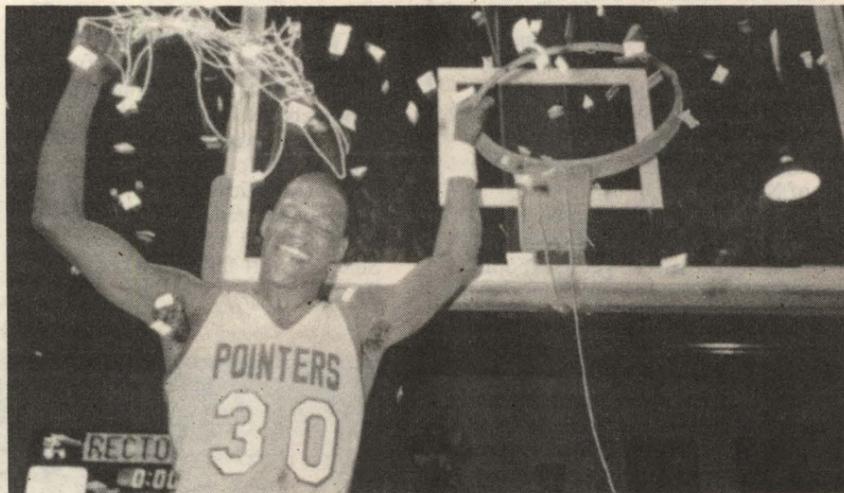

Porter admits that the rare chances he has to be alone are important to him.

"I get the urge to be alone a lot. I think every human has that need where you just need that time.

"It bothers me when I do get a moment alone and the phone will ring with an interview request or some other request. That is important time to me."

Because of his commitment to excelling as a basketball player, Porter has been a year-round resident of Stevens Point. It has meant the sacrifice of constantly being away from his family.

"My family is very important to

Terry Porter

me," Porter declared. "But with my commitment to basketball I had to make a decision.

"I would definitely like to see more of them but there just isn't the time right now. When this season is over spending time with my family will be a priority.

"The community has kind of become my family for now. Certain people have been like mother and father to me and I am thankful for that."

Despite being one of just a handful of blacks at UW-SP and in the Stevens Point community, Porter has not found things difficult.

"I have not really had problems in Point. It certainly matters what part of town you go to. But I am comfortable most places and I feel there are a lot of nice people here."

While most people probably believe Porter was content to get as far as he did with his Olympic tryout experience last summer, such is not the case.

"I was very thankful for the opportunity and I thought I gave it my best shot. But I really thought I played well enough to make the final team. It was a disappointment not to make it."

But that rejection ranks only third on Porter's list of disappointments.

"Not going to Kansas City (NAIA National Tournament) my freshman year is my biggest disappointment. I was just learning the ropes that year, but the upperclassmen had worked hard and really deserved the chance.

"The only other disappointment I have is that we didn't win the national title last year when we were so close."

Porter's ultimate goal is to play professional basketball, but if that doesn't happen he envisions a TV or radio career.

"I'm not sure what capacity it would be," he adds.

If he should end up in front of the camera doing basketball play-by-play or color, Porter has some idols he studies.

"The people I like to listen to most are Billy Packer and Al McGuire. They know what they are talking about and can relate to fans. I feel I have that same feel for the game."

Everyone has dreams for the future, but Porter admits that his definitely did not include the publicity barrage that has accompanied his collegiate career.

"I never dreamed anything like this would ever happen. If anyone had told me that it would have happened, I would have flipped. The first three years were easy and standard, but things have sure taken off this year."

Page, Hill appointed

Veteran UW-SP coach Nancy Page has been named associate director of athletics and Len Hill is the new women's cross country coach, UW-SP's Director of Athletics Don Amiot announced.

Page, the school's women's field hockey coach for the past 12 years and the softball coach since its inception as a varsity sport in 1981, replaces Bonnie Gehling who held the post since 1977. Gehling continues to teach and coach the women's basketball team.

Success has been the name of the game in the sports Page coaches. The Pointer field hockey team has a record of 143-70-5 during the 11-year Page tenure, including a record of 84-19-2 with four Wisconsin Women's Intercollegiate Athletic Conference championships. That span has also produced three post-season playoff berths.

The women's softball team has been equally successful with a four-year record of 51-28-2 with three conference championships and two national playoff berths. She has been the team's only coach.

A native of Janesville, Page earned her bachelor of science degree from UW-Madison in 1965 where she played field hockey. She began her coaching and teaching career at the Germantown Friends School in Philadelphia in

1965 and held that position until 1968. Page came to UW-SP in 1973.

In addition to coaching women's cross country, Hill will assist both the men's and women's track and field teams and will teach in the UW-SP physical education department.

The 40-year-old Hill came to UW-SP from UW-La Crosse where he taught in the physical education department and assisted with the men's and women's track and field teams. He was at UW-L for three years and in that time coached five national champions in the field events. He also served as an administrative assistant at the school in 1983.

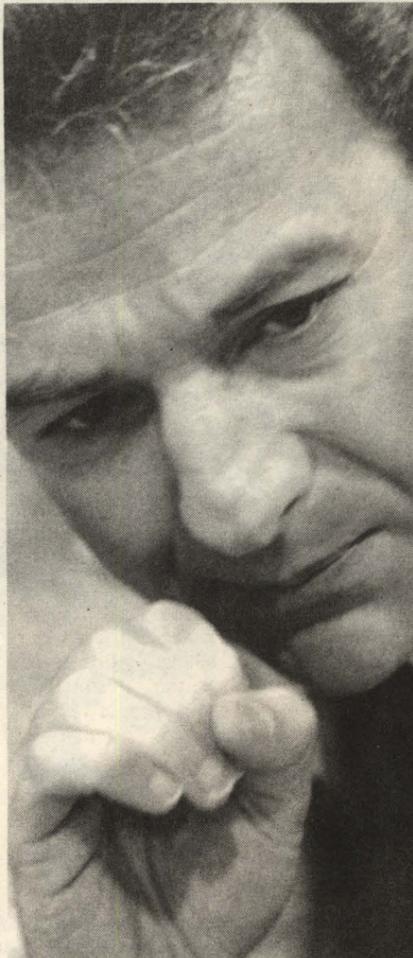

In addition to his coaching expertise, Hill is one of the premier Accu-track operators in the Midwest. He has worked three NCAA Division II national meets along with a number of Division I conference meets.

His teaching at UW-SP will involve early childhood and lower elementary physical education along with assisting in the adaptive physical education program.

A native of Palmyra, Hill earned his bachelor of science degree from UW-Whitewater in 1967. He received his master of science degree from Emporia State in 1968 and his doctorate in physical education from Louisiana State University in 1980.

Hill has also had coaching and teaching stints at Emporia State, Two Rivers High School, Watertown High School, Louisiana State and Western Illinois University.

Good luck, Dick---an editorial

Dick Bennett

For nine seasons, Dick Bennett guided UW-SP into one of the nation's small college basketball powers. Fans will long remember and appreciate his contributions. The Bennett teams reached higher levels of success and recognition than any others in UW-SP's long athletic history.

On March 30, Bennett announced he would accept the new challenge of NCAA Division I competition as coach of the UW-Green Bay Phoenix. He will be joined by his assistant at UW-SP, Rod Popp, and the school's sports information coordinator, Steve Swan. Both had outstanding records of achievement, particularly Swan who had served the university with distinction for nearly eight years.

Bennett's record at Stevens Point was 174 to 79. Last year he coached the Pointers to a second place finish at the NAIA tournament in Kansas City.

Bennett's contributions went far beyond winning. He was a role model as were his teams. Bennett and his boys not only played outstanding ball, but they did in the best traditions and in the spirit of wholesome collegiate athletics.

Successors to Bennett and his two aides were not named at press time of this publication, but the fine work done by the three men was the basis for attracting outstanding candidates for the positions. Because of them, continuation of a golden age of basketball is all but assured at UW-SP. Meanwhile, we wish Bennett, Swan and Popp all of the best.

Another big year for Pointer athletic achievement

In the past five years, UW-SP produced 10 individual national champions and three first team All-Americans.

Three of the national titles and one of the first team All-American designations were earned during the past season.

Jeff Stepanski, a junior from Menasha, garnered the first of the national titles when he captured the gold in the 50 yard freestyle in the NAIA National Swimming and Diving Championships in early March.

Track standouts Michelle Riedi and Mike Walden brought the number of titles to three one week later with championships in the NCAA Division III Indoor National Track and Field Championships.

Riedi, a junior from De Pere who won the NCAA III outdoor high jump last spring, repeated the laurel indoors with her top jump of 5' 10."

Walden, a senior from Wausau, capped a remarkable personal comeback from a broken back when he won the pole vault in the national meet. He cleared 15' 4½" to win the event.

Riedi and Walden led their respective teams to 12th place finishes in the national meets.

Terry Porter, a senior from Milwaukee, concluded one of the most brilliant athletic careers in UW-SP history by becoming virtually everyone's All-American in 1984-85. He earned the honor at the Division III level from the National Association of Basketball Coaches and for the second straight year from the NAIA. He was also named to the NAIA National All-Tournament squad (first team) for the second straight year.

Joining Stepanski in helping lead the Pointer swimmers to a sixth place finish in the NAIA National Meet were fellow All-Americans Steve Davis, Scot Moser, Ken Brumbaugh, Greg Schneider and Pete Samuelson.

Dave Geissler, a junior quarterback from Chippewa Falls, helped lead the Pointer football team to a 6-5 record last fall. In the process he entered the NCAA Division III National Record Book for most pass completions in a

career with 588. He still has one year to play.

Many other UW-SP athletes and teams had impressive seasons. Following is a breakdown of team and individual accomplishments through the end of March:

Basketball (Men's)

Team Accomplishments

25-5 Record
1st in WSUC
1st in District 14

Individual Honors

Terry Porter	All-American All-District All-WSUC WSUC MVP
Kirby Kulas	All-District All-WSUC
Tim Naegeli	All-WSUC
Dick Bennett	WSUC, District 14 Coach of the Year

Basketball (Women's)

Team Accomplishments

6-16 Record

Individual Honors

Sonja Sorenson	2nd leading scorer in WWIAC

6th in NAIA National Meet
2nd in WSUC
3-3 dual meet record

Individual Honors

NAIA inducts Blair

One of the highest honors ever bestowed upon a UW-SP athlete or coach occurred in Indianapolis Feb. 27 when Lynn "Red" Blair, men's swimming coach was inducted into the National Association and Intercollegiate Athletic Hall of Fame.

Red Blair

Blair, who will also be inducted into the NAIA District 14 Hall of Fame this spring, is the first UW-SP athlete or coach so honored.

Blair has established a reputation for swimming excellence throughout the state, Midwest and nationally through the successes of his teams and in his involvement in national swimming circles.

Blair, who has been the Pointer's head coach for the past 20 years, is only the third head swim coach the men's swimming program here has ever had.

At UW-SP, Blair has put together one of the most successful Division III programs in the country. His teams have compiled an impressive dual meet record of 169-86 (a winning percentage of .664 percent), won one Wisconsin State University Conference championship and been the runner-up nine times and finished in the top 10 in national meet competition six times.

Blair has produced 45 All-Americans at UW-SP, including 41 since 1977. In addition, 61 individual titles have been won in WSUC meets by his swimmers and three swimmers have won national championships. Dan Jesse and Jon Combs won national championships in the 100 yard breaststroke in 1978 and 1983 and Jeff Stepanski won the 50 freestyle this year.

The 46-year-old Blair is a three-time winner of the WSUC's swimming coach of the year award, an honor which came his way in 1966, 1975 and 1977. Nationally, he was president of the NAIA Coaches Association in 1981-1982 and was also president of the NAIA Swim Coaches Association. He also served as the vice-president, secretary-treasurer and district representative of the NAIA Coaches Association.

Blair currently is a member of the United States Olympic Swimming Committee and in 1979 was an assistant coach for the United States team which competed in the World University Student Games in Mexico City.

Foundation reports

\$85,000 for frosh

UW-SP will award about \$85,000 in scholarships to new freshmen entering the institution this fall.

About 100 students will share the funds.

Karen Engelhard, director of alumni services and coordinator of the scholarship program, said the money will be distributed to students who rank in the top 10 percent of their high school classes and have been active in organizations in their home communities and schools.

Students are given opportunities to compete for the scholarships after being accepted for attendance at the institution, she reported. Applications for the awards are sent to eligible students with letters which announce they are accepted for admission. Only those students applying before March 30 were invited to compete for the awards. However, the same competition will be held next year.

New this year will be an automatic award of \$100 to each high school valedictorian who applies.

Among the scholarships available will be 35 for \$500 apiece sponsored by the Alumni Association with money it collects in an annual fund drive. Twenty scholarships for \$200 apiece will be given from proceeds of an annual UW-SP Benefit Ball.

The Paper Science Foundation, with donations from related companies across the United States, will sponsor about 15 scholarships worth a total of \$2,000 during a four-year collegiate career.

Sixteen Elda Bark Walker Scholarships, in memory of a Wisconsin Rapids woman and patron of the arts at UW-SP, will be given in amounts of \$1,600 to cover more than a third of the total tuition and fees during four years of attendance on campus.

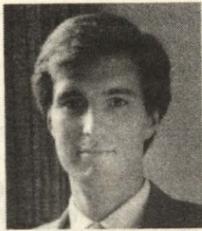

Other awards include two scholarships for \$500 apiece awarded by Marion Brazeau Fey of Wisconsin Rapids, an alumna; three for \$1,000 apiece provided by Melvin R. Laird, former U.S. Congressman from Marshfield and former U.S. Secretary of Defense and 15 for \$100 apiece from the Phillips Foundation of Minneapolis.

There are numerous scholarships given directly by academic departments, including some not requiring students to be in the top 10 percent of their classes. Among these are music scholarships based on performing auditions.

Inquiries about the scholarships may be forwarded by mail to Mrs. Karen Engelhard, Main Building, UW-Stevens Point, Stevens Point, WI 54481. Her phone number is (715) 346-3811.

University evolves as wellness mecca

"Our reputation may be greater elsewhere than it is right here," according to the executive director of the Institute for Lifestyle Improvement at UW-SP.

Joseph Opatz

Joseph Opatz says the institute, headquartered in Delzell Hall, operates the nation's oldest and largest summer wellness conference and has been successful in the past three years in becoming a major resource of wellness consultants for agencies and corporations across the country.

"We are the wellness leaders and model in the nation," Opatz claims, in announcing that his organization is planning to change its name this year to the National Wellness Institute.

Opatz, who holds a Ph.D., is the institute's first full-time administrator, working with a staff that fluctuates in size from five to 15, depending on activities being conducted.

The institute is self-sustaining. One of its major moneymakers is the sale of its Lifestyle Assessment Questionnaire, a comprehensive computerized health and wellness assessment. Total income from the sales topped \$80,000 last year, of which the UW-SP Foundation cleared about \$25,000.

The foundation provided the institute with its initial funding to publish the first questionnaire in the 1970s. Now, the assessment has undergone three revisions.

Opatz reports that computers will be helpful in expanding the services of the institute. "We have a growing catalog."

Some of the recent clients were Pentagon staffers for the U.S. Department of Defense. He also said that the makers of Campbell Soups recently announced it will be providing a \$10,000 grant for special work at the institute.

Promotion of wellness is multifaceted, Opatz says. "People who say, 'Yes, I like my job,' are less likely to become ill in the immediate future than those who give opposite responses," he warns.

Paper science supporters observe 10th anniversary

Members of a foundation that provides support for one of the nation's few undergraduate collegiate paper science programs marked the 10th anniversary of their organization at UW-SP last fall.

In commemoration, the North Central chapter of the Paper Industry Management Association (PIMA), which is comprised of supervisory and management representatives of industry in Wisconsin, Minnesota and Upper Michigan, gave the foundation \$10,000 for an endowment to provide ongoing general support. It was presented by a PIMA board member, Art Rankin of Appleton Papers, Combined Locks.

The outgoing president, James Crane of Crane Engineering Sales, Inc. of Appleton, announced that 20 firms were represented in the first year's membership roster with donations of

\$17,000. Today there are 70 member companies contributing almost \$100,000 annually.

Much of the money goes for student scholarships and special class-related activities as a means of attracting some of the state's top young scientists into the paper industry. Because paper science is an expensive program for the university to maintain, funds also are used to cover some of the instructional and administrative costs.

A plaque was presented to Crane for being one of the foundation's founders and "stalwart supporters." It was given by his successor, Joseph G. Bergomi, vice president of the Thilmany Pulp and Paper Co., of Kaukauna. Bergomi will head the foundation for the next two years.

New institute investigates transplanting human organs

Cost is a big problem in many human organ transplant cases, but finding a heart, kidney or liver to use in saving lives is an even greater dilemma.

At UW-SP and St. Michael's Hospital, a scholar is addressing those challenges.

David Peters believes his work is important because Wisconsin needs a

rationing of organ transplants.

Need for transplants is great and growing, he says. Across the country, about 14,000 could benefit from heart transplants, 4,000 to 5,000 from new livers and about 13,000 from different kidneys.

Only a small percentage in each category ever get to the operating room.

Funding stands in the way of many people. The costs are about \$200,000 for liver, \$100,000 for heart and \$25,000 for kidney transplants. That's providing the organs are available which they usually are not.

What would be a more efficient organ procurement method?

Taking better advantage of provisions made by people on the backs of their driver's licenses and on other special donor cards would significantly help the "harvest," he advised. Sometimes medical personnel are inhibited about discussing removal of organs with survivors who are experiencing shock and grief. In other cases, there is a fear of litigation by survivors if the "harvest" is based entirely on instruction on signed donor cards.

While 45 states have made it easy for people to be organ donors by providing forms in such places as backs of driver's licenses, less than 10 percent of the people carrying the cards have signed them, Peters lamented.

He says he is leaning toward the idea of a commercial market for organs in which donors would sell a kidney or a cornea and so forth. But in many places, that practice is illegal.

David Peters

policy on organ transplants. Three area organizations which collect and distribute money for the public good agree. They—the Walter Alexander Foundation of Wausau and the UW-SP and Sentry Foundations of Stevens Point—have funded Peters' endeavors.

He directs a new Institute for Health Policy and Law with offices in the medical library complex of the local hospital, and has had as his first major project a conference which was held in March at UW-SP on transplantation issues.

The conference was the prelude for the establishment of a policy formulating committee that will make recommendations for new state policies in the procurement, funding and

Gift from Sentry, First National Bank

While Pointer mascots watched from the side, Sentry Insurance Executive Vice President Vern Holmes addressed several hundred people last November who were invited by UW-SP to witness unveiling and dedication of a new scoreboard-message center in the Quandt Fieldhouse. Looking on, at right, are Dave Miller, board chairman of First National Bank of Stevens Point, which cosponsored the boards with Sentry. Also shown is George Moriano, regional representative of American Sign Indicator Co. manufacturer.

New scholarship funds

David Miller

Sentry executive elected president of foundation

Members of the UW-SP Foundation, Inc., toasted their successes in accumulating a treasury worth about \$2.4 million when they observed the organization's 20th anniversary in January.

They also elected David Miller, executive vice president/investments for the Sentry Insurance Group, as their new president. He succeeds John Seramur, president of First Financial Corp.

An anniversary dinner was held in conjunction with the annual meeting at the University Center.

The foundation seeks gifts from individual donors and businesses to provide support beyond what is provided to UW-SP by state funds.

Executive Director Leonard Gibb told the group that total assets of nearly \$2.4 million are about 75 times greater than the \$32,000 it started with in 1965.

Gibb also said income for the past year was at an all-time high at slightly over \$1.3 million.

Student scholarship awards were also at an all-time high at \$120,215.

A major activity for the foundation in 1984 was its role in securing state support for the further development of dorm and classroom facilities of Treehaven, a natural resources camp that will be opened next year near Tomahawk. The foundation owns about 1,000 acres of undeveloped land but has relinquished \$550,000 of its assets there including several new buildings and 6.9 acres of land in exchange for state appropriations to make the camp operational.

Gibb said that during 20 years, the foundation acquired and then later turned over to the UW System about 50 acres of property on the UW-SP's north campus for the establishment of the Schmeckle Reserve; converted former Camp Chickagami for Boy Scouts at Sunset Lake near Nelsonville into the Central Wisconsin Environmental Station; invested \$140,000 for construction of a dormitory named in honor of the late Elda Bark Walker of Wisconsin Rapids, who bequeathed about a third of a million dollars to the foundation in the late 1970s; sponsored a mosaic mural on the Natural Resources Building, one of the foundation's most widely publicized projects; and increased land holdings to about 1,300 acres.

Gibb reported that the foundation provides grants to faculty members and student organizations, is actively building endowments for scholarships, purchases equipment and supports student recruitment efforts.

The members chose six new directors for three-year terms: James Anderson, president of Ellis Stone; Mrs. Phillip (Mary) Brown of Wisconsin Rapids; Caroline Fribance, vice president and corporate secretary of Sentry Insurance; Dr. John Picconatto, of Plaza Gynecology and Obstetrics; Robert Worth, president of the Worth Co.; and Frederick Wenzel, executive director of the Marshfield Clinic. Worth and Wenzel have served previously on the board. Re-elected for three-year terms were Joe Okray and Mrs. Robert (Mary) Williams of Stevens Point, and Gerald Viste of Wausau.

The officers for 1985, in addition to Miller, will be Leonard De Baker, president of the First National Bank, as foundation vice president; Seramur, past president; Worth, treasurer; Karen Engelhard, executive secretary; Gibb, executive director; and John Buzza, corporate counsel.

Retiring board members are State Superintendent of Public Instruction Herbert Grover of Madison, Rick Frederick and Florence Litzow of Stevens Point, Terry Norris of Port Edwards, William Vickerstaff of Minocqua, and Dr. Russell Lewis of Marshfield.

Two of the original members of the foundation board—Sam Kingston, chairman of the board of Citizens National Bank, and attorney Hiram Anderson who were identified by Gibb as "visionaries" received awards in addition to the outgoing president and directors.

Chancellor Philip Marshall, in thanking the foundation members for helping the university develop quality programs said, "You are associated with an institution that has become known far and wide for excellence in its curriculum. And it has a pretty

Thirteen new student scholarships have been established at UW-SP that will generate \$3,600 in grants each year for high achieving students.

The money is from current and retired faculty members, area organizations, alumni, and contributors to memorial funds.

Leonard Gibb, executive director of development and of the UW-SP Foundation, Inc., said scholarships are important for the university as a means of attracting the kinds of students who bring special recognition to the institution.

"We have one of the highest student need ratios of all the universities in the state, based on family income, so anything that can be done to cut the tuition gap is very helpful," Gibb explained.

The scholarships are administered by the foundation office in Old Main Building. All told, UW-SP awards well over \$100,000 each year in these grants to incoming and continuing students.

Here are the new scholarships:

Dan Teplesky, a 1972 graduate now living in Belfast, N.Y., has pledged \$600 per year for music students. An entering freshman planning to major in music education will receive \$500 and a percussion student will receive \$100.

Robert Van Nuys of the music faculty is giving \$500 annually for a Joy Reynolds Trumpet Scholarship which is a memorial to his wife's sister, who was born in Kansas, grew up in the New England states and died about 13 years ago in Kansas. Recipients will be music majors with advanced skills in trumpet.

The Plover-Whiting Lioness Club will sponsor an annual award of \$500 for a graduate of either the Stevens Point Area Senior High or Pacelli High School who is pursuing the specialized area of learning disabilities in the School of Education.

Professor Emeritus Edgar F. Pierson has established a fund which will generate \$400 per year for a junior biology major with the highest grade-point. Pierson taught biology longer than anyone in the university's history—42 years, between 1938 and 1980.

The Junction State Bank/W. B. Greaton Scholarship for \$250 will be awarded annually to a student in the

Division of Business and Economics. Mr. Greaton, who died Jan. 5, 1983, had been associated with the bank in Junction City 44 years and was its longtime president. He previously was associated with a bank in New Richmond. His wife, Evelyn, of 2264 Stanley St., established the memorial fund.

A \$250 scholarship as a memorial to Harriet Krembs Pagel will be given annually from a fund established by her husband, Emil, of 51 Park Ridge Dr., and relatives and friends. It will be given to an upperclass student majoring in medical technology. It is the first permanent award established for that program. Mrs. Pagel attended UW-SP as a young woman.

The Mental Health Association of Portage County will give two \$250 scholarships in its name to students from Portage County planning to pursue careers in the field of mental health.

The UW-SP Department of Chemistry has established a \$200 annual award for a chemistry student in the name of Professor Emeritus Roland Trytten. He taught chemistry on a full-time basis from 1945 to 1982 and was chairman of his department for much of that period. He remained as a part-time professor until recently.

A nontraditional woman student will annually receive a \$200 scholarship in memory of Elizabeth Pffner DeBot, UW-SP's dean of women from 1940 to 1966 who also was an alumna of the school. She died Feb. 14, 1984 at Northbrook, Ill. A bequest from Mrs. DeBot, memorials from her daughter Mary Duffy, and friends, were used for establishing the fund.

A gift from Professor Emeritus Marge Spring, who taught physical education from 1965 to 1984, will support an annual award of \$150 in her name to a physical education major "with exceptional interest and skill working in elementary and/or adapted physical education."

Memorials for Mrs. Ethel Williams Shulfer, a graduate of 1942 who spent more than 40 years as a teacher—23 years in the Stevens Point School System, will be used to fund an annual prize of \$50 for an outstanding student. Her husband, Severin, of 473 W. Karner St., and relatives and friends provided the funds. Mrs. Shulfer died April 7, 1984.

Leonard Gibb, executive director of the UW-SP Foundation, holds a plaque with Roy Roberts which was given to Roberts at his recent retirement from American Potato Division of Basic American Foods. The firm established a scholarship at UW-SP in Roberts' name instead of giving a party. At right is James Harmon, manager of the Plover plant.

Instead of a party . . .

Save the money that would be spent on a going away party and use it for a worthy project at the local university, a retiring executive of a Plover potato processing plant said.

So, management of the American Potato Division of Basic American Foods donated \$5,000 to UW-SP in honor of Roy Roberts, vice president of its Plover operations.

Roberts had served his company a total of 31 years, the past nine years at Plover.

The donation will be invested by the UW-SP Foundation, Inc., and

used to sponsor an annual scholarship of \$500 in Robert's name for the son or daughter of an employe at the American Potato Division's plant in Plover.

Roberts and his wife, Peg, have moved from Stevens Point to Clearwater, Fla.

Annual report of donors

UW-SP says 'thank you'

UW-STEVENS POINT FOUNDATIONS' INCOME Sept. 1, 1983 to Aug. 31, 1984

UW-SP Foundation	
Alumni/ae Donations	\$121,182
Parents of Students	\$ 17,900
Other Individuals	\$722,695
Foundations	\$ 16,467
Corporations/Business	\$240,756
Miscellaneous	\$ 65,350
	\$1,184,350

Paper Science Foundation	
Alumni/ae	\$ 2,800

News of Alumni

Whatever happened to good ol' Joe?

The speech and language clinic on campus is staffed by upperclass students and faculty from UW-SP's School of Communicative Disorders and serves area residents of all ages with all kinds of hearing and speaking problems. Once a training ground primarily for future teachers, the facility now provides experience for an increasing number of young professionals preparing to work in private clinics.

Not pictured, but in attendance, were Ron Capacio, '74, Justin Cavey, '75 and family and Lauri Yantz.

The Sixth Annual Former Pointers' Campout will be held from Friday, Aug. 9 through Sunday, Aug. 11 at the Big Muskellunge Lake Group Campsite, north of Woodruff.

A group of UW-SP alumni, their families and friends, have staged an annual reunion for the past five years, including "camping, cooking out, swimming, volleyball and a little Point Beer consumption," according to the participants. "But the main purpose of the reunions is to stay in touch with college friends and get reacquainted," says ROBERT KOCEN, '75.

Kocen reports that last year's gathering was special because the group had blue and gold T-shirts made to mark the five-year mile-

stone. He counts the attendance between 20 and 40 people for each event.

"Since most of us were natural resources majors, we decided (to hold the reunions) in the northwoods of Wisconsin. We figured the common bond among all of us was our love for the out-of-doors and for Point," he says.

This group of former Pointers, for the most part, met while going to school at UW-SP during the 1970s and while living in Watson Hall, according to Kocen.

People interested in attending the sixth annual gathering, are asked to contact him at 2105 S. 67th Pl., West Allis, WI 53219. Phone (414) 541-9638.

MARTY SKOGLUND, '75, has been chosen as the outstanding young person of the year by the Menominee Jaycees. He is the community development director for the City of Menominee. He and his wife, Tammy, have three children.

CAROL (CORLISS) ANDERSON, '54, works for the U.S. Navy in a civilian capacity as head of contracts and purchases division, Naval Supply Center, Charleston, S.C. Carol says she "would love to hear from old friends." Her address is P.O. Box 1124, Summerville, S.C.

FLORENCE L. MEYER, '54, lives at Luther Manor Residence in Milwaukee, where she is active on the representative council.

VIOLET (BIGALKA) MAUER, '53, celebrated her 85th birthday in January. She lives in Mauston and enjoys reading, writing letters and working on several hand crafts.

H. KELLY DOUGLAS, '53, is a biology teacher and head of the science and mathematics departments for Wilson Middle School, Rockford, Ill. He also officiates for state championship games in football and basketball.

ED FLACKLAM, '53, retired in 1977 as principal of Manawa Junior High School. He lives in Manawa.

GRETCHEN (HOLSTEIN) SCHOFF, '52, is associate chairperson of Integrated Liberal Studies at UW-Madison, where she bridges "the gap between technology and the humanities" by teaching technical writing in the School of Engineering and environmental literature at the Institute of Environmental Studies. With co-author Patricia Robinson, she has published a new book called "Writing and Designing Operator Manuals," which is about creating instruction booklets that are understandable to the layman. After teaching for 20 years, she won a fellowship in 1973 to study theology in relationship to ecology at the University of Chicago. She has traveled to Saskatchewan, Canada, as a consultant for the

Prairie Agricultural Machine Institute; with the Sino-American Technology Council to China; and to England, Wales, and Hawaii to do research. She and her husband, Keith, have three sons: one in college, one in high school, and one in grade school.

GERALD CZARNEZKI, '49, is retired from the Milwaukee County Park Commission. He lives in Milwaukee.

FRED SCHWIERSKE, '47, is retired after 35 years of teaching social studies. He lives in Mt. Horeb.

HARV ERDMAN, '44, has retired after 40 years of teaching. He resides in Wautoma and works part-time at Speltz Music Co. He is president of the Wisconsin Bandmasters Association and secretary of the Wisconsin Chapter of the National Band Association.

JAMES KULIDAS, '43, lives in Crete, Ill. He was named AHEPAN of the year by the Olympia Fields, Ill. Chapter of the Order of the American Hellenic Educational Progressive Association.

NORMA (FERGUSON) PFEIFFER, '42, retired from the Crandon Elementary School after 37 years of teaching. She lives in Crandon.

DIANE KAMKE, '42, is retired from teaching at the Schofield Elementary School. She lives in Schofield.

BETTY (ELLMANN) WALCISAK, '42, is retiring after 23 years of teaching. She received her degree from UW-SP, then

Central State Teachers College, in 1942, and taught for several years before taking an extended break to raise a family. She then returned to teaching at the Phillips Middle School, continuing there for the next 14 years until she retired this year. She plans to spend her free time relaxing and traveling.

CECILIA (WIZA) SEARL, '42, (master's degree '77), has been named Mosinee School District teacher of the year for her innovative work in organizing a preschool program and a correlating parent-participation program. She has been a member of the Mosinee faculty for 26 years.

ELIZABETH FRANKLAND, '40, is retired from UW-Oshkosh. She lives in her hometown of Marshfield.

MARGE WARNER, '40, has been named Stevens Point's honorary city historian by Mayor Michael Haberman. Her title is in recognition of important contributions she has made to the city as it promotes revitalization of its downtown with a historical theme. She has been active in the former Downtown Action Committee and as a member of the Stevens Point Historic Preservation/Design Review Commission. In her work as a commissioner, she is an advocate for the restoration of commercial buildings that are historically and architecturally significant in the central business district. Miss Warner, a descendant of some of Portage County's early Yankee settlers, is a native of Stevens Point and a retired librarian. She is the retired director of the Charles M. White Memorial Public Library in Stevens Point. She also is a former president of the UW-SP Alumni Association in which role she worked for the preservation of Old Main Building on campus.

It all started in 1939 at a picnic held in honor of several women about to graduate from Central State Teachers College.

Seven coeds, all good friends, decided to start a round robin letter as a means of staying in touch once they went their own ways.

Forty-six years later, the letters are still making their rounds to these former classmates: RUTH BEHNKE BRILL, '39, of Bay City, Minn., and Boca Raton, Fla.; RUTH JOHNSON CADY, '41, of Shoreview, Minn.; FRANCES BOURCIER BENEDICT, '39, of Temple Hills, Md.; GLADYS GREVE BEHNKE, '39, of Brillion; LANORE OLESON LANG, '39, of Campbellsport; CELIA WOHLFERT BURNETT, '39, of Rialto, Calif.; and JOAN SCHRANK ZIMMERMAN, '39, of Tingley Park, Ill.

Here's how the system worked. The first letter writer sent a message to a second classmate who, in turn wrote her own letter and included the first letter in the envelope to the third friend, and so forth. When the pack of letters came back to the first writer, she would take out her letter, and add a new one and put the pack back in the mail.

According to Mrs. Zimmerman, "We have a set schedule on who sends to whom so there are always seven letters in the envelope. A couple of times someone 'misplaced' the letters but always started a new one."

Mrs. Zimmerman estimates that it takes about eight months to a year for a complete cycle of letters.

The women had a lot of things in common to write about. At one time or another, all of them worked in the field of home economics. All are mothers and now all are grandmothers.

In recent times, the women have held a reunion sometime in June every other year. Two in the group, Mrs. Burnett and Mrs. Benedict, are widows and haven't always been able to attend.

"We think we are rather unusual with our round robin lasting so long," Mrs. Zimmerman concludes.

James McGinley

JAMES K. MCGINLEY, '35, recently retired as vice president from the Eaton Corp. He maintains residences in Brookfield and Hot Springs Village, Ariz. His career in sales and marketing began in 1946 as a sales trainee with a subsidiary of the Eaton Group, Durant Digital Instruments. In 1964, he was promoted to the position of vice president of Durant, then in 1971, he took over as president and chief operating executive. He held that post until 1979, when he was appointed Eaton Group vice president and general manager of Specialty Products Operations. For many years he was active with Junior Achievement and has served as a past national president of Pi Sigma Epsilon, the professional marketing and sales management fraternity. He also was president of Sales and Marketing

Eleanor Withee Haight still riding and dancing

Executives International, which has more than 25,000 members in 49 countries, and made many related appearances in the United States, South America, Europe, and Japan. Although retired, he still remains active in the Business Council at UW-Whitewater and is a member of the board of directors at the Marine Bank in Watertown.

MILDRED (LUEDTKE) ANDERSON, '38, and her husband live in Boulder, Colo. He is retired from the University of Colorado and both are active in volunteer work. They are avid tent campers, gardeners, and outdoor enthusiasts.

CHARLES SCRIBNER, '36 and **MARY (TENLEY) SCRIBNER, '38**, are both retired. He was a biology teacher at Appleton West High School and she was a librarian at the Institute of Paper Chemistry. He still serves as a ranger and naturalist in Glacier National Park during the summers. They live in Appleton.

CLETUS COLLINS, '34, and his wife live in Glendale, Calif. He saw many of his old college friends in June when he and his wife attended his 50th class reunion.

ROY C. OLSON, '33, retired 10 years ago from a counseling career with the Education Office at Elmendorf Air Force Base, Anchorage, Alaska.

ADELINE (TAUSCH) TORK, '33, is a member of the Stevens Point Area Retired Teachers organization, Delta Kappa Gamma, AARP, Coalition of Commission on Aging, and Nutrition Advisory Council. She lives in Stevens Point.

FRANK L. GUTH, '32, is a retired account executive. He also retired in 1984 as Portage County Civil Defense Director. He has been an amateur radio operator for 37 years and will spend his extra time fishing for contacts with other "hams."

'Tiny' Bannach

HENRY BANNACH, '30, was recently honored as one of Wisconsin's 10 most admired senior citizens by the Wisconsin

State Fair Association. For many years an active civic leader in his hometown of Antigo, he was named the Antigo Area Chamber of Commerce man of the year in 1967. For his participation in Rotary Club projects, he was selected as Rotarian of the Year in 1969. A retired president of Hardwood Veneers, he served as president of the Langlade Memorial Hospital. In 1971 he was admitted to the UW-SP Athletic Hall of Fame and received the Distinguished Alumni Award in 1982. He remains active as a director of the Timber Producers Association of Michigan and Wisconsin and serves on the selection board for the Athletic Hall of Fame at UW-SP.

FRANK G. LASECKE, '29, has recently retired as president of Eastern Furniture Co. of California, which is now being managed by his son and two grandsons. He returns to Wisconsin yearly to visit his daughter, Pat, who operates a resort in Phillips. His address is 48 Timber Cove Dr., Campbell, Calif.

ELEANOR WITHEE HAIGHT, '26, remembers that her greatest interests while a student at Stevens Point Normal centered on sports, dances and horseback riding. They still do. She is now 83 and living on a ranch near Jordan, Mont., which has been her home for 58 years. She's still riding horses and attending dances. Her ranch is now run by a nephew. Prepared to be a home economics teacher, she was in charge of a classroom for six weeks when she decided "life is too short, why be miserable, so I pulled out." The Clark County native, who grew up in the Greenwood area, says she loves horses and has a "world of patience with animals but not people." She doesn't take credit for helping tame her corner of the West even though she lived there when it was done. She preferred the area the way it was when she arrived. "Rusty," which has been her longtime nickname, served as postmaster of Jordan for 18 years in addition to taking an active role in the operation of the family ranch. Several years ago, she donated clothing and accessories that had been worn by members of her family in the mid and late 1880s to the UW-SP School of Home Economics Historic Costume Collection. After all, what would a woman who prefers riding horses want with bustle dresses?

THELMA (LARKIN) HOMSTAD, '24, lives in Black River Falls. In 1984 Thelma spent three weeks in France with an Eau Claire High School French class, traveled to Great Britain with her granddaughter, and went to Florida for three weeks. She also attended a week of Elderhostel.

Eleanor Withee Haight

ROBERT ANDREWS, '22, retired 20 years ago as a social work supervisor for the State Department of Public Welfare. He lives in Stevens Point.

ELEANOR (NESPER) SCHMITZ, '21, began teaching in 1921 and continued attending Stevens Point Normal School in the summer until she received her degree in 1944. She has always taught within a 15 mile radius of Brillion, where she lives.

BELLE (SMITH) HURD, '10, was named the senior citizen of the month of June in Waupaca. She received her teacher's certificate from the Stevens Point Normal School in 1910. Her favorite hobbies are knitting, sewing and gardening and, in addition, she has been a member of the Order of the Eastern Star for 40 years and the Senior Center for 12 years. Belle recently celebrated her 92nd birthday and she advises us all to "keep active." Birthday greetings can be sent to her at 400 Western Ave., Waupaca.

Weddings of recent graduates

HEIDI BABETTE TELFER, '84, to **DARREL RAY KLESSIG, '83**. They are residing in Madison, where he is a researcher at the Wisconsin Clinical Cancer Center.

KIRK WILLIAM WILLE, '84, to **Jacqueline Wysocki**. He is working as a process engineer at Akrosil, Inc., Neenah, where they reside.

DARLENE RAE TANCK, '68, to Peter A. Philipp. She is employed in the audit review department of Wausau Insurance Companies. He works at the Schofield Post Office. They live at 6002 Eric St., Schofield.

In memoriam

James Levi

Wayne Devroy

Ted Menzel

Larry Bishop

WILLIAM NATZKE, '78, drowned Sept. 16 near Castres, France at the age of 28. His funeral was in his hometown of Hales Corners at Emanuel United Church of Christ. The body was cremated in France. A musician, Natzke played the saxophone, flute, guitar, and piano and had been traveling throughout the United States and Europe in recent years, performing on Streets and in clubs. In 1981, he was among a seven-member crew that spent 31 days at sea in a 51-foot boat. The group traveled between Seattle and Hawaii. Besides his parents, William and Louise Natzke of Hales Corners, his only other survivor is a sister.

HEIDI BERG, '76, was fatally shot Aug. 12 while jogging near her condominium in Merrifield, Fairfax County, Va. A passing motorist found her body. She was 30. The president of the National Treasury Employee Union said later he believed she was killed because of her field work for the Internal Revenue Service. He said she had been threatened earlier in the year and had requested a transfer. Several months later, she was transferred from a field office to the national IRS office in Washington, D.C., but she did not change residence. Police have been stymied and reportedly are not convinced of the labor leader's theory. Miss Berg, a Wisconsin Rapids native, taught junior high school at Stratford for one year before moving to Virginia to take a position with the FBI's public affairs office. In 1979 she started with the IRS as a revenue officer. In an extensive article about her killing, the "Fairfax Journal" in Virginia reported that Miss Berg was a bright, self-disciplined, well-liked career woman. Her pastor, the Rev. Ralph E. Wichmann of Prince of Peace Lutheran Church in Springfield, Va., said she used much of her spare money—up to thousands of dollars—for anonymous donations. Her mother, Mrs. Marguerite Berg of Wisconsin Rapids, and five sisters survive. Her funeral was at Immanuel Lutheran Church in Wisconsin Rapids.

LISA KAY NEWBY, associate degree in '80, died unexpectedly of natural causes Sept. 8 in Salt Lake City, Utah, where she had been living. She was 26. Services were at the Boston Funeral Home in her native Stevens Point and burial was in the Plover Cemetery. Miss Newby was an assistant underwriter for the INA Insurance Co. Her parents, Mr. and Mrs. Ray Newby of Stevens Point, three sisters and one brother survive.

WAYNE FRANCIS DEVROY, '83, died Oct. 1 when his bike struck rocks on the side of a mountain road near Salt Lake City, Utah. He was a Ph.D. candidate in chemistry and teaching in the chemistry lab at the University of Utah in Salt Lake City. The Marinette native grew up in Peshtigo and was married in 1983 to Darcy Weverman. She and his parents, Mr. and Mrs. Gerald Devroy of Peshtigo, are the closest relatives. Services were held at the Zion Lutheran Church followed by burial in Riverside Cemetery, both in Peshtigo.

JAMES R. TRUESDALE, '64, of Jasper, Ind., died there unexpectedly on Oct. 24 at the age of 43. His funeral was at the United Church of Christ in Jasper. He was manager of Gambles in Jasper and had been employed by the chain previously in Merrill, Oconto, Antigo, and Albion, Mich. His wife, the former Marlene Marko of Stevens Point, two sons, and his mother are among the survivors.

JAMES S. ANCHOR, '67, died Jan. 2 of cancer in Waukesha Memorial Hospital at the age of 44. He had been a teacher at Waukesha from 1967 to 1974 and since then was principal of the Rose Glen Elementary School there. Anchor was a native of Wisconsin Dells. He is survived by his wife, the former Kathleen Kelly, and three children. Funeral services were held at St. Mary's Catholic Church in Waukesha and burial was in St. Joseph's Cemetery in Wisconsin Dells.

KENNETH C. SAUTER, '51, of Marinette, died Dec. 27 in Marinette General Hospital at the age of 66. A retired elementary school supervisor in Marinette for 12 years, he retired in 1980. He previously had been a principal and administrator in schools at Johnson Creek, Nekoosa, Random Lake and Mayville. Mr. Sauter had a master's degree from Wisconsin State College. His wife, the former Shirley Mikesch, a son, three daughters and seven grandchildren are among the survivors. The funeral was held at Sacred Heart Church and entombment was in Forest Home Mausoleum, both in Marinette.

VIOLA REMUS SCHELLENBERG, '52, died Aug. 29 in Anchorage, Alaska, at the age of 72. Funeral services and burial were there. Mrs. Schellenberg had taught in public schools in her native Stratford and in surrounding communities for more than 20 years. Following her marriage to the late Fred Schellenberg in 1955, the couple moved to Anchorage where she earned a master's degree and served as a high school counselor until her retirement in 1980. She was on the Anchorage School Board from 1980 to 1984.

WILMA JENKINS PAUL, '68, a former resident of Wisconsin Rapids, died June 24 at a convalescent home in Bountiful, Utah following a brief illness. She was 70. Services were held at the Taylor Funeral Home in Wisconsin Rapids and burial was in the Bent Cemetery in Bryant, Langlade County. Mrs. Paul, the widow of Edward Paul, had been a teacher at Lowell School in Wisconsin Rapids until 1966. Among her survivors are three daughters, one son, nine grandchildren and one great-grandchild.

THOMAS F. BEHM, '70, died Aug. 20 at Memorial Hospital in Medford after an extended illness. The 37-year-old Medford resident had been employed at Weather Shield Mfg. Inc. A native of Milwaukee who grew up in Shorewood, he had lived in Medford since his graduation from UW-SP. His wife, the former Jan Schmidt, whom he married in 1981, and his parents, Ferdinand and Jane Behm of Perkinstown, are his closest relatives. His funeral was at Holy Rosary Catholic Church in Medford and burial was in the Perkinstown Community Cemetery.

RODNEY R. HELING, '71, of Shawano, died Jan. 12 in a Green Bay hospital following a lengthy illness. He was 35. The Sheboygan native had been employed the past three years as a commercial loan officer at Citizens State Bank in Shawano. His wife, the former Rosie Beeck whom he married in 1969 in Sheboygan, three sons and his parents are his closest relatives. Services were held at St. James Lutheran Church in Shawano and at the Ramm-Ziegler Funeral Home in Sheboygan. Burial was in Greenlawn Memorial Park in Sheboygan.

JOHN PAUL SCHMELLING, '74, died of cancer Oct. 1 in St. Michael's Hospital in Stevens Point at the age of 38. The Kenosha native was living in rural Amherst and was employed by the Wisconsin Motor Vehicle Department at the Waupaca office. He was a veteran of Army service in the Vietnam War. His wife, the former Christine Flood, one son, one daughter and his parents are among the survivors. Services were held at St. Patrick's Catholic Church in Lanark and burial was in the Parish Cemetery.

ANTHONY O'LEKSY, '75, died of a stroke after lifting weights on June 7 at his home in Stevens Point. He was 30. Born in Chicago, he grew up in Kenosha and since college graduation had been employed in the Stevens Point area as a foreman for Del Monte Food Co. and as a real estate broker. His parents, Mr. and Mrs. Anthony O'Leksy of Kenosha, two brothers and two sisters survive. Services were at St. Mark's Catholic Church and burial was in St. James Cemetery, both in Kenosha.

DOROTHY JANE SCHMIDT, '57, died Oct. 8 in Lockport, Ill., at the age of 68. A native of the Antigo area, she taught in one-room schoolhouses in Langlade County and operated the Schmidt Grocery in Polar. She moved to Lisle, Ill., in 1959 and resumed teaching at Carol Stream, Ill. After earning a master's degree from Northern Illinois University, she became head librarian for the Carol Stream Junior and Senior High Schools. She retired in 1983. Two sisters and one brother survive. Her funeral was held at St. John Lutheran Church in Polar and burial was in the Town of Polar Cemetery.

DORIS CROFOOT HOUGEN, '58, died Aug. 27 at her home in Rhinelander at the age of 82. The funeral was held at the First United Methodist Church and burial was in Forest Home Cemetery, both in Rhinelander. Her teaching career was spent at Rhinelander, Dorchester, Windsor and Fontana. Her husband, Dr. Harvey Hougen, one son, three grandchildren and three great-grandchildren are among the survivors.

HAZEL CHAPEL BRAUN, '60, died Dec. 8 at Neillville Memorial Hospital at the age of 75. Although she had lived recently in the Neillville Memorial Home, she spent most of her life in the Granton area where she had been a teacher for 33 years. Twice widowed, she is survived by two daughters, one stepson, seven grandchildren and 11 great-grandchildren. Her funeral was at the United Methodist Church in Granton and burial was in the Neillville Cemetery.

EVELYN MATZ FREDERICK, '64, died July 7 at her home at Rt. 1, Birnamwood at the age of 61. She had been an elementary school teacher for 27 years; serving in Aniwa, Ingersol, Norrie, Easton and Hatley. She retired in 1981 due to ill health. Her husband, Eldo, four children and 11 grandchildren are among her survivors. Her funeral was held at Trinity Lutheran Church in Birnamwood and burial was in Hillcrest Cemetery in the Town of Norrie, Marathon County.

AMY KAMPENGA PETERSON, '53, supervisor-librarian of the Federal Documents Depository and the Area Research Center at the University of Wisconsin-Whitewater, died Dec. 15 at a Fort Atkinson hospital. She was 53 and had been under treatment for cancer for several years. A memorial service was held at the university, where she was honored, shortly before her death, for 25 years of meritorious service as a librarian. Her body was cremated and her ashes were interred in Oakwood Cemetery in Muskegon, Mich.

The daughter of librarians, her mother and father, Nelis and the late Dorothy Kampenga served at UW-SP where, as a student, she was involved in organizing and cataloging the then newly established Federal Documents Depository and Area Research Center. Her father and one son are her only survivors.

CARL SWAZEE, '34, died May 25 at Flambeau Medical Center in Park Falls at the age of 68. A native of Sherry, he was married to Dorothy Richards, class of '38 of Stevens Point. He is survived by his wife, two daughters, one son and three grandchildren. Mr. Swazee was a state agent for Aetna Life Insurance and lived in Wausau many years before retiring in 1982 and moving to Fifield. His funeral was at the United Methodist Church of the Pines in Minocqua.

A. E. (TED) MENZEL, '37, mayor of Hayden Lake, Idaho, the past 20 years, died of cancer Oct. 20 in a Coeur d'Alene, Idaho, hospital at the age of 69. No public funeral was held. He was a native of Stevens Point, a veteran of World War II, and a former science teacher and coach at Marshfield High School and UW-SP. For many years he was a sales representative in the northwestern United States for Marathon Paper Corp. retiring in 1970. He and his brother, Frank, were honored together in 1979 as inductees into the UW-SP Athletic Hall of Fame in recognition of their successes as Pointer football players. Mr. Menzel's wife, the former Billie Weed, and three brothers survive.

NORA LEROUX HERTEL, '37, of Wisconsin Rapids, died Dec. 15 at St. Joseph's Hospital in Marshfield at the age of 85. A native of Nekoosa, she lived much of her life in Wisconsin Rapids and had been a primary school teacher and supervising teacher in several Wisconsin communities. In addition to her degree from UW-SP, she earned a master's degree from Northwestern University. The widow of Jacob Hertel, she is survived by several stepchildren and a sister. A memorial Mass in Wisconsin Rapids was held at St. Peter and Paul Catholic Church where she was a member. The body was cremated.

ROBERT G. SHOREY, '46, died unexpectedly Oct. 17 of a heart attack at his home in Fort Atkinson. He was 63. His funeral was held at St. Joseph's Catholic Church in Fort Atkinson followed by burial in the parish cemetery. The Argonne native who grew up in Stevens Point had his collegiate career interrupted by World War II. He spent 14 months in the China-Burma-India theatre and received the Distinguished Flying Cross. He taught at Milton Union High School three years and was principal of Lake Mills High School five years before becoming a sales representative for Northwestern Mutual Life Insurance Co. in 1954. He had spent 30 years with the firm and earned the status of life member of the Million Dollar Round Table. He received a master's degree from UW-Madison and was a chartered life underwriter. Active in civic affairs in his home community, he served on the school and library boards. His wife, the former Virginia Whalen, one daughter, one son, and two grandchildren are among the survivors. Other relatives include a sister, Mrs. Mary Samter, one of UW-SP's emeritus faculty members who taught many years in the School of Education.

RUTH STILLER NTEKAS, '31, Stevens Point, died of cancer Dec. 11 at the Portage County Home where she had been under care for several weeks. She was 75. A native of Omro, she was a home economics teacher in Sharon before living in Illinois and Indiana where she and her late husband, Athanasios Ntekas operated restaurants. From 1944 to 1965 she and her husband were in the restaurant business in Stevens Point, operating the Point Cafe and later the Campus Cafe. She retired in 1974 after serving several years as a library assistant at UW-SP. Her closest survivors are three sisters. Services were held at the Boston Funeral Home in Stevens Point and burial was in the Omro Cemetery.

LOLITA CHADEK, '52, was found murdered at her home in Rhinelander on Oct. 9. She was 80. A neighbor, who was a pallbearer at her funeral, was later charged with her death. Services were held at St. Mary's Catholic Church in Rhinelander and burial was in the parish cemetery. A native of Wyoming, she had been a teacher for 49 years in Rhinelander and Elcho. An aunt, and nieces and nephews are her closest relatives.

ESTELLE BUHL PATCHIN, '32, died in 1984 in Lakeland, Fla., where she had been living since 1951. She was 74. Funeral services were held in Lakeland and burial was in Oak Hill Cemetery there. A native of Chilton, she had been a home economics teacher in West Bend and Fox Point before moving to Lakeland. She retired in 1970. Her husband, Glenn, died in 1967. Her closest survivors are three children and two sisters.

LEROY (LARRY) BISHOP, '33, who was inducted into the UW-SP Athletic Hall of Fame in 1977, died Oct. 18 at a Denver, Colo., hospital. The 74-year-old Bishop had been living for several years in Littleton, Colo. His funeral was held there and cremation followed. A native of Pike Lake near Antigo, he taught in several Wisconsin communities, was superintendent of schools in Washburn and a longtime principal in Sheboygan prior to his retirement in 1974. He had done graduate work at state colleges in Iowa, Michigan and Wisconsin. When chosen for the Hall of Fame, he was cited for excellence in basketball and football at UW-SP where he was the outstanding athlete in 1933. His wife, the former Arletta Bibiel and one daughter survive.

Retired Circuit Judge **JAMES H. LEVI**, '33, died Nov. 29 at his home in Stevens Point at the age of 71. He had been in failing health for several years. He served a total of 28 years on the bench, first as a county and later as a circuit judge in Portage County. He also had been district attorney, from 1948 to 1951. He held the Stevens Point Distinguished Citizen Award and had been given several high honors by the Knights of Columbus. He was a native of Stevens Point, a World War II veteran and a law graduate of the University of Notre Dame.

In 1979, when former UW-SP Chancellor Lee Sherman Dreyfus was sworn into office as governor of Wisconsin, Judge Levi administered the oath on a chilly Jan. 1 morning on the snow covered lawn in front of Old Main. Funeral services for the judge were held at St. Stephen's Catholic Church and burial was in the parish cemetery. A memorial was established in his name for the Central Wisconsin Health Foundation. His survivors include his wife, Eugenia, and seven children.

MARY JOHNSON ALBRECHT, '14, of Rt. 1, Auburndale, died Christmas Day at Bethel Convalescent Center in Arpin where she had been a patient about two and one-half years. She was 86. Her funeral was at St. Mary's Catholic Church in Auburndale and burial was in the parish cemetery. Mrs. Albrecht had been a teacher in Portage, Wood and Brown counties from 1914 to 1922 and 1948 to 1969. Her husband, Michael, to whom she was married for nearly 62 years, one son, six grandchildren and three great-grandchildren survive.

MARGARET BIENDARRA DOROW, '19, died May 30 at the Vallhaven Care Center in Neenah at the age of 85. She had taught in several Wisconsin communities including Neenah and was also employed at the Neenah Public Library. She was married to Dr. Harry B. Dresser in Antigo, and later was married to Frank Raddu and Herbert Dorow. She had lived in Neenah the past 44 years. Two sons, three daughters and 17 grandchildren survive. Her funeral was at St. Mark's Lutheran Church and burial followed in Oak Hill Cemetery in Neenah.

IVA BARANGER, '21, who had lived in Viroqua since 1962, died Aug. 17. Her funeral was at Our Savior's Lutheran Church in Westby and burial was in Forest Cemetery in Stevens Point. Miss Baranger, a native of Stevens Point, taught in Green Bay schools until 1960. She lived in California two years before returning to Wisconsin. Her survivors are two sisters.

OLGA CARLSON BLAKESLEY, '22, died in December at the home of a daughter in San Antonio, Tex. at the age of 84. She had lived in the Ashland area and had been a teacher in Durand and Nelson. Her late husband, George, was from Fort Wayne, Ind. Survivors are one son, one daughter, three granddaughters and two great-grandsons.

MARGUERITE DAY BRAATZ, '23, died unexpectedly Oct. 1 at her home in Stevens Point at the age of 82. Services were held at the Boston Funeral Home followed by burial in Forest Cemetery. A memorial was established in her memory for the UW-SP student scholarship program. She was a retired primary school teacher and the widow of Glen Braatz. She had won numerous awards as a gardener. Her closest relatives are a daughter and three grandchildren.

EUNICE EVANS MESMER, '17, died May 29 at a nursing home in River Falls at the age of 90. She had been a teacher in Racine for many years and lived in several other cities across the United States. A native of Wales, Wis., she was the widow of Theodore Mesmer. One son, four grandchildren and two great-grandchildren survive.
