The darkened area shows a proposed addition to the College of Natural Resources Building.

\$10 million addition planned

UW-SP's "foot is squarely in the door" to receive full funding for a \$10.7 million addition to its Natural Resources Building.

Alan Haney, dean of the college, announced that UW-SP is the only institution in the country whose request for an appropriation was added to the 1993 fiscal year budget of the U.S. Department of Agriculture.

The initial amount of \$86,000 Uncle Sam is contributing toward the project in fiscal year 1993 is modest in comparison with the total price tag.

"But this means our foot is squarely in the door and we can anticipate the additional funds to see this project through to completion in subsequent funding cycles," Haney added.

The federal government is planning to spend \$4.8 million on the project over the next three years.

The federal grants are scheduled to nearly match a state appropriation for the addition.

Haney is hopeful construction will start sometime later this year.

The addition, designed by Flad and Associates of Madison, is scheduled to be built on the east end of the present structure.

The present building embodies 111,000 gross square feet of space. The addition would be for 55,000 gross square feet and include the home for a new program in wood utilization and marketing as well as a greenhouse, urban forestry/recreation laboratory, computer applications laboratory, headquarters for natural resources outreach programs, herbarium complex, ichthyology/aquatic biology complex, animal care facility, chemical and hazardous waste storage, environmental chambers, walk-in freezers, faculty offices and classrooms. ■

Keith Sanders

We're keeping busy serving local and national constituencies

by Chancellor Keith Sanders

When the Stevens Point Normal School was established in 1894, its primary mission was to train teachers. That early mission statement read: "The exclusive purposes and object of [the] normal school shall be the instruction and training of persons, both male and female, in the theory and art of teaching, and in all the various branches that pertain to a good common school education, and in all subjects needful to qualify for teaching in the public schools; also to give instruction in the fundamental laws of the United States and of this State, in what regards the rights and duties of citizens."

Over its 100-year history, the Normal School (eventually College and University) continued to emphasize its education mission and, in doing so, to increase collaboration with the public schools in activities and projects of mutual benefit. So, when President George Bush issued his "America 2000" education strategy, the UW-Stevens Point was well-positioned to respond. The six national education goals that the president and governors adopted in 1990 to "close our skills-and-knowledge gap" called for: (1) All children in America will start school ready to learn; (2) the high school graduation rate will increase to at least 90 percent; (3) American students will be competent in the core subjects; (4) U.S. students will be first in the world in science and mathematics achievement; (5) every adult American will be literate and possess the skills necessary to compete in a world economy, and (6) every school in America will be safe and free of drugs.

Our university had in place an impressive array of collaborative programs that clearly fostered these goals. They included:

1. A number of pre-collegiate offerings for diversity students, such as:
 - Upward Bound - in its 25th year at UW-SP, the program prepares low income/first generation college-bound students (grades 9-12) in science, writing, reading, mathematics, study skills.
 - English for College (grades 9-12), and English for School and Work (grades 7-12) - the former teaches English as a second language to diversity students; the latter does the same for students from migrant families.
 - Mathematics, Writing and Multicultural Literature (grades 9-12) - teaches mathematics and writing from a multicultural perspective.
 - Natural Resources Careers Camp (high school) - students learn about plants, soils, water and wildlife through field work and meeting natural resource professionals.
2. Two longstanding, successful programs in mathematics generate excitement for the subject in area high schools:
 - The Point Subset - this little publication containing challenging mathematics problems goes to every high school in Wisconsin, as well as to selected individuals, five or six times each year. All students who return the correct solution to a problem are acknowledged in the subsequent "Subset" issue, along with their respective high schools.
 - Math League - fifty-five Wisconsin high schools select students to compete in the categories of algebra,

geometry or advanced mathematics. These students take exams in their category three times over the academic year. All test-takers receive a recognition certificate, and top scorers in each category receive savings bonds at an annual Math League banquet. The competition is sponsored by Sentry and Wausau Insurance companies.

3. Writers' Workshop - this program honors talented high-school juniors and seniors for their writing ability. Approximately thirty-five schools submit 500-600 entries in the categories of: poetry, short story, writing for children, drama, personal and formal essay. From these entries, more than 100 writers are chosen to participate in the workshop. Six \$1,000 scholarships are offered to the best senior writer in each category.

4. UW-SP/SPASH Computer Link-up - Since January, 1992, the UW-Stevens Point and Stevens Point Area High School have been connected via computer. This linkage enables high school students and faculty to access library holdings at UW-SP and UW-Madison; to use electronic mail to communicate with university students and staff; and to read literature right off the screen rather than checking the material out. This technology sharing will be extended to junior high and elementary schools.

5. Chemistry Demonstrations - Professors Marvin Lang and Don Showalter (and colleagues at UW-Stevens Point) have conducted chemical demonstrations for a variety of audiences over the past thirteen years: elementary school, middle school, junior and senior high school. They have brought excitement to science fairs, science teachers conferences and in-service sessions, open houses, senior citizen groups, shopping malls and museums. During the 1990-91 academic year, Don and Marv and their colleagues presented 67 chemical demonstration programs in 47 different sites throughout the United States.

6. Special Education Project - the UW-Stevens Point is collaborating with sister campuses and the DPI to alleviate the problem of the large number of emergency licensed teachers in special education in the state. The aim of the project is to enhance the qualifications and effectiveness of teachers in special education, especially in the areas of emotional disturbance and learning disabilities.

7. Wisconsin Center for Environmental Education - the purpose of this statewide center at UW-SP is to provide leadership and to assist in coordinating the development, dissemination, implementation and evaluation of environmental education programs for Wisconsin's teachers and students. Center staff offer environmental education courses for Wisconsin in-service teachers; assess environmental literacy levels of Wisconsin teachers/students in cooperation with DPI; provide environmental education workshops and consulting services to teacher educators from Wisconsin's 30 teacher training institutions; provide an environmental education curriculum and materials center for teachers/faculty/administrators; provide opportunities for Wisconsin teachers to pursue an advanced degree in environmental education.

While this sampling of UW-SP's involvement in public education is impressive, it is also fitting that, at the advent of the university's centennial, our School of Education is placing renewed emphasis on its long and fruitful relationship with local schools. "Every Child, My Child" is a joint university/school district proposal that calls for cooperation between all segments of the community to work together to create a model of shared responsibility for educating area children, kindergarten through technical school/college. To advance this goal the campus is once again extending the boundaries of its cooperation with the public schools. These more recent efforts include:

- Co-Star (Collaboration for Starting Teachers Achieving Results) - a program for first year teachers in the Stevens Point and Wausau school districts that offers: 1) an "unprecedented" 3 credit course taught by master teachers from the districts over a two-semester period; 2) several meetings with a university faculty coordinator (meta-mentor) who assists in dealing with uncertainties the beginning teacher may have.

- Faculty Exchange Program (Fall, 1993) - a master teacher from the public schools will teach two to three courses; e.g., methods or reading, in UW-SP's education curriculum and provide consultation to students (prospective teachers). In turn, one or two university faculty will serve in the public schools: teach, develop curricula, etc., at the district's discretion.

- Speech and Hearing Clinic collaboration - UW-SP has contracted with the Stevens Point schools to: 1) send all students with hearing/speech problems to the university clinic for (free) treatment; 2) provide free birth to age five hearing/speech screening for the public schools. In turn, one public school speech and hearing clinician is housed on the campus to augment the clinic's staff. This unique arrangement is mutually beneficial in providing essential services to the public schools, at the same time it supplies a large number of hearing/speech challenges for students majoring in communicative disorders to deal with in their practica.

I had the privilege in March to be one of three panelists invited by U.S. Secretary of Education Richard Riley to speak to a nationwide town meeting audience on "Goals 2000/Educate America." Broadcast via satellite, this appearance provided an opportunity to tell community and school leaders across the country about the outstanding cooperative work that has been done by our School of Education faculty in cooperation with teachers and administrators of the Stevens Point school district.

The alumni who graduated from UW-SP's School of Education should be heartened by the current trend of bringing all of a community's resources to bear on ensuring the best education for resident youths. And, in the end, all of us will undoubtedly benefit from a "revolution" in education that prepares students to face the many challenges of a new century. At the UW-Stevens Point, we are reaffirming our primary mission of 1894 by tailoring our teacher education programs to the needs of the twenty-first century. ■

The two little "kings," Michael LeGault, at left, and Collin Olsen, at right, act out a song with their teacher, Mary Hofer of the University of Wisconsin-Stevens Point's Suzuki program. The boys and their families have been studying music with Mary since before they were born.

They've been buddies in song since before they were born

Collin Olsen and Michael LeGault are old friends who love music. They meet once a week to practice singing and to enjoy the camaraderie generated by shared interests.

Actually, "old" might not be an accurate description of the two buddies because Collin and his pal Michael entered the world about 18 months ago. Nevertheless, they have been pals and music buffs since before they were born.

The boys actually began meeting about two years ago, accompanied by their parents, Gary and Lee (Quinn) Olsen and Bob and Sue (Flihr) LeGault; at that time, the little music lovers were in utero. Once a week, the families have gone to the Suzuki House at the University of Wisconsin-Stevens Point to study with Mary Hofer, a teacher, singer and pianist, who is the leader of a program to introduce babies to music before they are born.

This is her first class of babies and parents, plus a grandmother, Charlotte Quinn, and a sister, eight-year-old Laura LeGault, who participate in the weekly gatherings.

They convene on Wednesday evenings at 7 p.m., beginning with a babble of conversation about how the toddlers are progressing as well as sharing general family information. At this period in the boys' lives, progress consists of new words and activities such as dancing and keeping time with the music. Both of them can tap out rhythms quite proficiently by now.

Collin was an early walker and Michael is beginning to speak in sentences. The parents believe the musical training and the sociability of the program have enhanced the boys' mental and physical progress and their pediatricians seem to agree. Following the greeting time, the families begin the warm-up, starting with buzzing lip noises, humming, scales and, finally, songs.

The tunes are a specific set of nursery rhymes and lullabies, including old standards such as "Twinkle, Twinkle, Little Star" and "Mary Had a Little Lamb," songs like "Grandpa's Farm" and "The Honey Bee," and several lullabies, one sung in both English and German. As the youngsters have matured, more physically active pieces such as "Ring Around the Rosie" have been added to the program.

The adults master the songs by attending classes and playing tapes at home. They continue to sing the set patterns of tunes to their babies, in utero and after delivery. Quinn, a Detroit native who moved to Wisconsin to be near her grandson, is Collin's caretaker so she uses the program during the day when Gary and Lee are at work. Gary is a technical theatre specialist at UW-SP and Lee is employed by Revelations Architects and Builders. Grandma Quinn says Collin "sings" with his head on her shoulder when she rocks him to sleep.

Often the songs are accompanied by hand props—lamb puppets, felt ice cream cones, chef's hats, finger puppets—made by Hofer and her mother. Little "aerobic" exercises also are included during the livelier numbers.

All of the adults comment on the soothing effect the music has on the wee ones. As soon as the warm-ups start in class, the fussing stops and the toddlers are enthralled. The parents sing to the boys in the car, when rocking them, and at many other times throughout the day and evening. A tape of baroque music is used to induce relaxation as well as the breathing exercises

which Hofer teaches her students. The couples used these techniques during labor and delivery and immediately started singing to their offspring following birth.

Sue says that Mozart has a particularly soothing effect on Michael, often helping to calm him when he is cranky. His sister, Laura, who takes piano lessons with Mom, also has learned the repertoire—she was the first one in the group to master the German rendition of one of the lullabies.

The founder of the program, Paivi Kukamaki, a Finnish Suzuki teacher, has achieved dramatic results with her groups, according to Hofer. She still has more than 60 families involved after several years, and she has received overwhelmingly positive feedback from the people enrolled in the classes since before their babies' births.

For one thing, the participants become a source of support for each other, developing strong friendships and continuing the relationships long after the babies are born. The infants also form lasting bonds, seeming to recognize and "talk" to one another at very early ages, according to the teacher. These benefits appear to have accrued with the UW-SP group. The families plan social outings as often as busy schedules will allow, including Hofer's husband Paul, a data processor for Cops Corp.

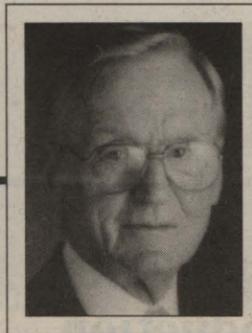

Because of their many involvements and activities, Sue comments how much they all enjoy this peaceful musical interlude in the midst of hectic lives. She is a social worker with developmentally disabled people, Bob is a self-employed handyman, and even little Laura has numerous activities outside of school. Both LeGaults are alumni of UW-SP; she has a degree in psychology and he in theatre arts.

These members of Hofer's first group are all musically talented, with backgrounds in theatre and performance, so the singing comes naturally. Hofer says she was lucky with the participants because it was so easy and comfortable for them. They can vocalize in harmony and whip off a six-part round without any trouble. But she also stresses that all young families are welcome at her sessions, not just the musically gifted. Recently she added two more families—they are encouraged to join after the fourth month of pregnancy.

"We begin about halfway through the nine months, or later, because research has shown that is the period when a fetus begins to hear," Hofer says. Dads, grandparents, and siblings are encouraged to become actively involved, as have all the Olsens and LeGaults. The new members include a couple, a mother and her 12-year-old daughter and, of course, the babies.

The participants agree it is also good for fathers to exhibit an interest in music and to be engaged with their children's activities. They say they don't want to be pushy parents trying to force their offspring into tasks beyond their abilities. But they do want to be good models and encourage their children to experience the pleasures of beautiful sound.

At the end of each weekly meeting, when the musical part of the program is over, Laura leads the tots in a little bow. Then it's time to bring out the dessert, have a cup of decaf, and socialize for a while. However, if a lullaby has been particularly effective, one or both of the "old friends" may miss the social hour because they are fast asleep. ■

Harold Dregne

Raymond M. Urbans

Dregne, Urbans named 'Distinguished' alums

An educator in the field of soil conservation and a longtime civic leader are the most recent recipients of the Distinguished Alumnus Award given by UW-SP.

They are Harold Dregne of Lubbock, Texas, from the class of 1938, and Raymond M. Urbans of Westchester, Ill., who graduated in 1937.

A total of 62 former students have received the award since it was established in 1969.

Because neither honoree has been available to attend special campus events where such awards are usually given, UW-SP has sent the citations to their homes after making public announcements at the recent university events.

Dregne, a native of Ladysmith who was reared in Marshfield, graduated from UW-SP in 1938 with degrees in chemistry and mathematics. He later earned a master's degree from UW-Madison and a Ph.D. from Oregon State University. He is currently serving as the Paul Whitfield Horn Professor and Special Consultant for the International Center for Arid and Semi-Arid Land Studies at Texas Tech University.

His experiences in the last 46 years, since his discharge from the U.S. Navy, include teaching agronomy at the University of Idaho, Washington State University and New Mexico State University. He has been at Texas Tech since 1946, serving as chairman of his agronomy department and director of the International Center for Arid and Semi-Arid Land Studies, and as coordinator for International Agricultural Programs. Additional responsibilities have included his service as senior land resource adviser for the U.S. Agency for International Development.

Dregne is either author or co-author of eight books.

Urbans, who was reared on Stevens Point's north side, spent 42 years as an employee of Western Electric (later AT&T) as a mechanical plant engineer and later an environmental control engineer.

A longtime civic leader, he served four years as mayor of Westchester, a Chicago suburb, and 20 years as a trustee on the village board. He continues as a member of the water commission there.

Urbans was one of the founders of the Westchester Park District, a longtime member of the Proviso Township Mental Health Commission and chairman of the Proviso Emergency Food Assistance Program. He served on the Illinois State Public Aid Board.

As an advocate for youth, he was one of the founders of the Westchester Little League program. He is a past commander of the American Legion Post, longtime officer of the Kiwanis Club, chairman of the Proviso Republican Party and treasurer of the Westchester Community Church. ■

General News

Local research planned on ethanol production

The Legislature's Joint Finance Committee voted in December to use specialists at UW-SP in researching possibilities of converting waste materials into valuable, clean-burning fuel.

Chancellor Keith Sanders said the \$150,000 grant to finance a study of ethanol production has important implications "to our economy and our environment."

"And if our people learn that ethanol can be efficiently produced, I hope it can be done at a plant in Central Wisconsin," Sanders added.

He commended Gov. Tommy Thompson and State Sen. David Helbach and State Rep. Stan Gruszynski for giving the proposal the support it needed for passage.

Robert Govett, distinguished professor of wood use and marketing in the College of Natural Resources, said he is hoping the project results in a "double whammy" in which a new income-bearing product can emerge from a costly old problem.

Among potential feed stocks of the fuel are waste products of such Wisconsin industries as paper mills, canneries, and cheese whey, potato and wood processing plants.

Disposing of the wastes is a current expense to the firms.

But investigations to determine which feed stock or stocks would be the most economical to pursue won't focus entirely on manufacturing processing residues. Agricultural crops long grown in the state, such as corn, also will be studied, Govett added.

Alan Haney, dean of the College of Natural Resources, said faculty in his unit are already heavily committed to a variety of special projects. But the one involving ethanol research was particularly timely and fit well with the college's mission.

He noted, however, that he would be delighted if, after the research phases are completed, that the project could be turned over to specialists in the private sector.

Haney also reported that in view of UW-SP's commitment to ethanol research, conversations will be conducted with federal government officials in the Environmental Protection Agency and Department of Energy to determine if the project here can tie into studies being overseen by those Washington-based offices.

The funding from Madison is expected to be received here in the spring for efforts to begin in about April. Govett and Aga Razvi, distinguished professor of waste management, and Karyn Biasca, assistant professor of paper science, have been designated as principal investigators.

The grant will pay for the purchase of about \$30,000 in equipment (much of it for computing and printing), about \$20,000 for travel, supplies and expenses, and about \$100,000 for salaries for UW-SP personnel and students.

The funds are from the Oil Overcharge Account, created by settlements levied against oil companies for overcharging customers between 1973 and 1981. ■

UW-SP garners \$1.2 million for environmental education

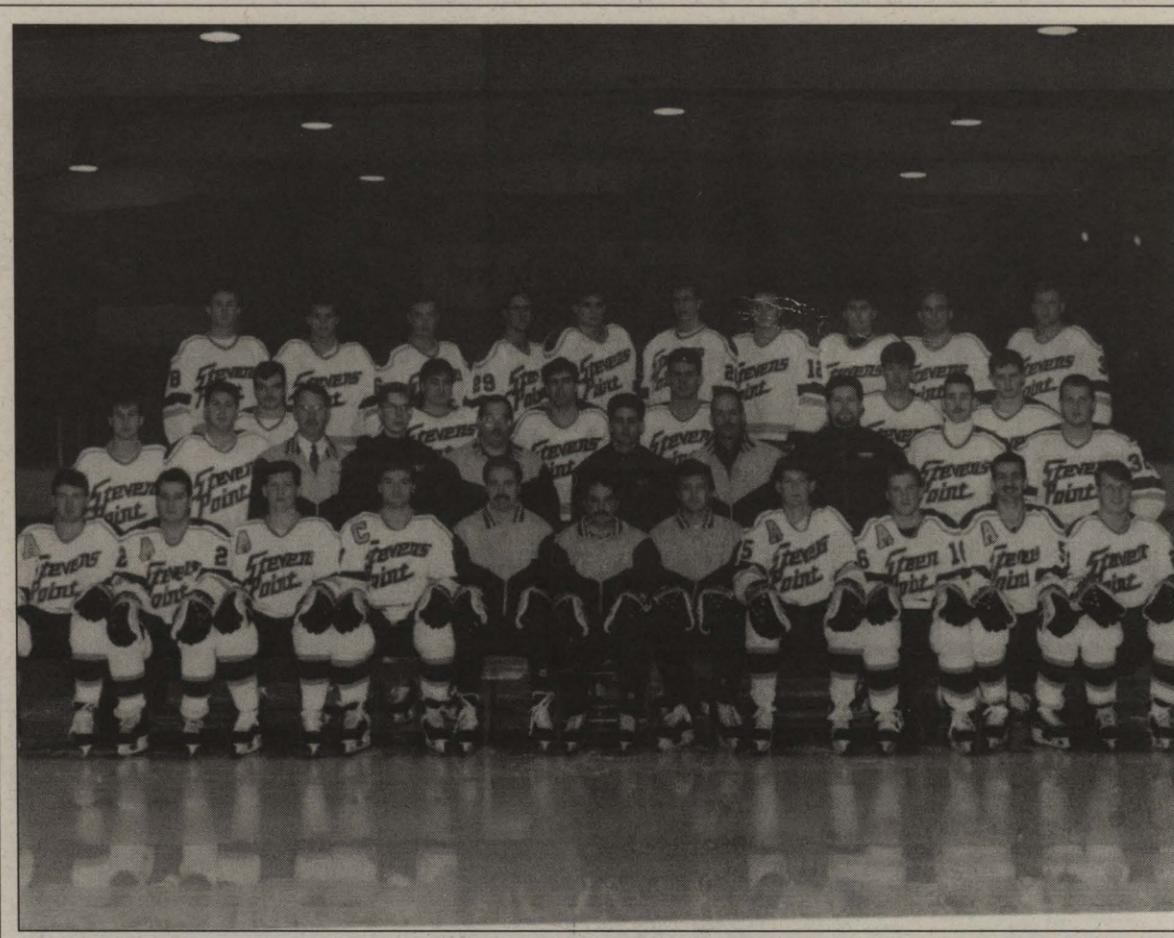

The National Science Foundation has pledged \$1.2 million to UW-SP for preparing 1,800 state educators to teach about the environment in all areas of the curriculum.

The grant, which was announced in November, is one of the largest ever awarded to UW-SP for instructional purposes and is to be used over a three-year period.

Rick Wilke, associate dean of the College of Natural Resources, is the project director; Randy Champeau, associate professor of environmental education, is developing a master's degree component; and Daniel Sivek, assistant professor of environmental education, is program coordinator. Anne Green serves as a staff assistant.

A main thrust will be the offering of 30 sections of each class each year for secondary and elementary teachers in all parts of Wisconsin. Four courses have been developed for the program: principles of environmental education, ecological basis for environmental education, environmental education teaching strategies and environmental problem solving in the classroom.

A secondary goal is to implement a campus-based extended master's degree program in environmental education. Intent is to train specialists who will be able to assume leadership roles in environmental education in their schools and districts. By 1995, about 50 people will have received master's degrees at UW-SP under this

Coach Joe Baldarotta and his championship team.

Hockey team wins national crown again

UW-SP athletic teams continue to draw big crowds and cheers of fan appreciation and several of its teams gained national acclaim during the fall/winter season.

The men's hockey team won its fourth national crown in five years in NCAA Division III competition at St. Paul, Minn. Going into the tournament with a 23-5-2 record, the Pointers defeated Elmira College of New York in the semi-finals, 7-2 and then went on to beat UW-River Falls, 4-3 in overtime.

The men's basketball team compiled a 23-5 record, ending its season in the opening game of the NAIA tournament in Kansas City, Kan. to Lenoir-Rhyne of Hickory, N. C.

The men's wrestling team won the conference championship with a 17-5 dual meet record. In baseball, the team finished with a disappointing 10-12-1 record after experiencing added problems because of the rainy spring. In women's sports, the new soccer team logged a 19-2 season record and a conference championship.

Pointer gridgers ended their football season with a 5-4 record, fourth place in the conference. The women's cross country team finished second in the conference while the men's cross country squad placed fourth in the conference. Both men's and women's swimming teams were second place finishers in the conference. The women's volleyball team had a 8-26 season record for sixth place in the conference. The men's golf team ended second in the conference, and the women's basketball team captured fifth place in its conference and had an overall record of 16-8.

Hockey coach Joe Baldarotta was chosen as Coach of the Year in the two conferences in which the team participates and Todd Tretter was the Northern

Collegiate Hockey Association Player of the Year. In wrestling, Marty Loy won conference Coach of the Year honors and in women's cross country, the same recognition went for a second year to Len Hill. ■

You are what you eat

Opinions women have of themselves influence the way they eat, according to a nutrition specialist at UW-SP.

Diane Witte recently published her study in the *Journal of the American Dietetic Association* under the title "Relationship of Self-Concept to Nutrient Intake and Eating Patterns in Young Women."

In essence, she found that women viewing themselves as "super persons" or aggressive, self-confident leaders are most at risk nutritionally.

Witte interviewed 153 single women living in one southern community as part of her requirements for a Ph.D. degree from the University of Tennessee.

Since being published in the professional journal, the study has attracted the attention of journalists across the country, and has made its way into such publications as the *Sunday Chicago Tribune*, *Woman's Day*, the *Personal Wellness Newsletter* and the *Washington Times*.

The "super persons" regarded most at risk in her study revealed a nothing-can-hurt-me attitude, evidenced by their erratic eating of whatever fit their fancy, usually foods low in many nutrients.

In contrast, those demonstrating the best eating habits classified themselves as careful, traditionalists, believers in hard work and helping others. Their diets were rich in nutrients and low in fat and sodium.

Women placing themselves in the category of being friendly, honest and cooperative tended to eat foods rich in nutrients but too high in fat content.

And those considering themselves nonconformists and creative were more likely to eat foods low in energy-producing carbohydrates as well as iron and thiamine, according to Witte.

The researcher has concluded that much needs to be done in this country to target information about nutrition. The advice from professionals must be tailored, she contends, so those of each different personality type can be made aware of their dietary downfalls. ■

Gotham wins dean position

Jerry Gotham, a longtime physical education teacher/administrator and coach at UW-SP, left the end of December to become a college dean in Palatine, Ill.

Gotham is dean of physical education, athletics and recreation for William Rainey Harper College in Palatine, a junior college with more than 28,000 students. The institution is located 10 miles northwest of O'Hare Airport.

He will administer a full-time staff of 15 plus a part-time staff of between 60 and 75 outreach employees. There are nine deans at the school.

Though he said he has enjoyed his 23 year-stint at UW-SP, Gotham explained that he was attracted to the new position because of the additional administrative opportunities it afforded. ■

Students head for classes in the newest addition to the Science Building. The section in the foreground houses the paper science program.

Bank robber graduates at head of class

Without his conviction for a string of bank robberies, Anthony Braxton doesn't believe he would have been valedictorian of the midyear graduating class in December at UW-SP.

It wasn't planned but, "I've gotten a lot of educational benefits here," he said.

Braxton, a native of Florida who committed his crimes in Texas, is an inmate at the Federal Correctional Institution in Oxford. For courses taught there by faculty from the UW Center in Baraboo and UW-Stevens Point, he amassed a perfect 4.0 grade point average for receiving A's in every class. His prize was a bachelor of science degree for an individually planned major in human resource management and a minor in business.

Though prison rules prohibited his release to participate in the commencement ceremony, Braxton was not without accolades. His fellow prisoners "were very supportive," he said.

But what if...? What if he could have stood before the assembled students, faculty and guests in Quandt Gymnasium in Stevens Point to deliver a valedictory, what would he have said?

Probably that any investment society can make in liberating the minds of people who are incarcerated is money well spent. Research bears out, he would have emphasized, that recidivism is extremely low for inmates who have been educated and received job training while behind bars.

And, he would have pointed out that graduates should be alert to opportunities available to them, willing to cross barriers and know that ostracism is something incredibly heavy to practice against another human being. Ostracism to Braxton is synonymous with incarceration. "People like myself make mistakes, we make bad choices once in a while, but most of us come back out and want to be part of society. It is very sobering and powerful to be told that you cannot live among us," he noted.

Since it began making the bachelor's degree available to inmates at Oxford, UW-SP has sent 45 diplomas to recipients living at the prison. Many have graduated with honors, including Boyce Rummel, who received the Wall Street Journal Award as the top business graduate in 1990. He is still at Oxford, serving a 40-year sentence for drug offenses.

Braxton's experience with what he calls ostracism began seven years ago after he robbed five banks or savings and loan offices in malls in and around Houston. He made off with a total of about \$40,000. Two months after his last heist, he was arrested.

Why did he do it? He believes his courses in psychology have given him a clue. "I have a subtle arrogance—a lot of pride," he said.

The owner/operator of a chain of transmission repair shops in the Houston area, he was doing well as long as the boom of the early 1980s continued. But when the Texas economy went sour, he couldn't face the prospect of losing some or all of his shops. "I believed success was linked to material things," he explained. Bankruptcy was out of his picture.

"God only knows where I came up with the idea of robbing banks," Braxton sighed.

Men's numbers continue falling

The percentage of men in the student body of UW-SP continues to fall.

Registrar David Eckholm says he doesn't know why, even though the phenomenon is being experienced across the UW System.

Between 1986 and 1992, the number of male students dropped by almost 700, while the number of females increased by 58.

Last fall, undergraduate women outnumbered undergraduate men by 4,250 to 3,904. The difference is even greater when graduate students are added to the total: 4,576 women and 4,042 men. ■

The opportunity to receive higher education was the silver lining of his indiscretion. He has served a total of seven years toward his 20-year sentence and is eligible for release in five more years. He began taking classes at Oxford within a few weeks after arriving there in 1987.

An A/B student through most of his high school career in Cottondale, Fla., he believes that had he pursued college courses immediately after his graduation, he would have benefitted far less from the experience than he has recently.

"Now, I'm able to take each class and apply it to my own life," he contended.

Impressed with the quality of instruction provided at the prison, Braxton said his favorite courses have been in public speaking, finance, marketing and entrepreneurship.

Though he is uncertain about what he will do with his degree when he is released, the inmate is realistic about problems he may encounter in the job market as an ex-convict. He also knows he has prepared himself for fields in which there is likely to be strong demand such as customer service and the food industry. Besides completing his B. S. degree, Braxton has earned two associate degrees from Fox Valley Technical College in Appleton in food service management and in culinary arts.

The way things stand now, Braxton could be released in a few years. Before his time is up, he'd like to be transferred to a prison camp in Alabama, where it would be possible for him to complete his master's degree in business administration.

Meanwhile, his nine-year-old son, Brian, who lives in Florida, has shown considerable interest in his father's recent academic achievements. "But I just tell him to do the best he can and never feel pressured," according to Braxton, who visits often by phone with Brian.

True, there has been more time for Braxton to study than nontraditional students in many other situations. But there also has been considerable support from his mother, Mary Robinson, a post office supervisor in Panama City, Fla., and his father, Byron, who now operates the businesses his son had before being sent to prison. "I've got my father's stamina and my mother's intelligence," said Braxton.

He'd like to visit his alma mater at a future date to meet fellow alumni and see firsthand the school that has made a big difference in his life.

"I've become quite satisfied with the person I am," he said. ■

Recycling videotape made

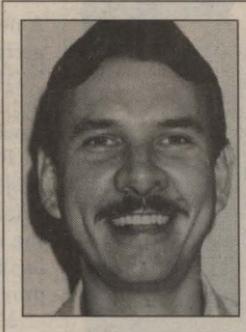

UW-SP has developed two new videotapes in response to a large number of requests for information about its award-winning recycling program.

The productions are being marketed nationally, acquainting the public with projects undertaken to sharply reduce the campus' reliance on landfill space for waste.

One video, "The 3 Rs—Reduce, Reuse and Recycle," is about 18 minutes in length, explaining the approaches and procedures that have been employed in the program since it was started about three years ago.

"The Recycle Rap," is geared to younger audiences, featuring rap music and Captain Ecology with his message promoting recycling awareness.

Sharon Simonis, who coordinates the UW-SP recycling operations, said both videos have been advertised in a widely circulated publication and sell for \$20 apiece. The staff of University Telecommunications developed both creations. Order copies of the video by writing to Simonis in the Maintenance and Materiel building. ■

Maurice Perret

Student work featured in geography books

A hardcover book of Portage County geography came off the presses in December as a special project of a publishing class at UW-SP.

The 190-page work was written by Professor Emeritus Maurice Perret, who developed the manuscript with papers prepared by his students between the late 1960s and early 1980s.

"We believe this is the first historical geography of a Wisconsin county," reports Professor Dan Dieterich, who teaches the English class that publishes one book manuscript by an area writer each fall semester.

Copies of "Portage County—Of Place and Time" are being sold at the University Bookstore in the University Center on campus, Little Professor Book Center in the CenterPoint Mall and Book World Inc. on Main Street in Stevens Point. To order by mail send \$21.94 to the University Bookstore, UW-SP, 54481. You can order by phone by calling 715-346-3431 and using Visa or Master Card.

The county's cultural geography is explored in chapters on history, place names, settlements, architecture and housing, and religion. Services are noted in chapters on health, postal services, newspapers, telephones, fire departments, financial institutions and insurance. The section on economic geography is about the exploitation of natural resources, and agriculture, industry, trade and transportation. Physical geography has chapters on generalities, geology, landforms, hydrography, climate, soils and natural vegetation. And, there is one chapter on recreation and sports.

Other features of the book are a glossary of geographic terms and a list of all the students who contributed papers to the project during a 15-year period, covering much of Perret's career on campus.

Examples of the pieces of information in the book: —Of the 11,000 series of soils in the United States, 35 are found in Portage County and are named for local places or landowners, such as Rosholt, Meehan, Kranski and Oesterle. There are eight varieties of Rosholt.

—The county was dotted with post offices in the 1800s, but when rural delivery began about 1900, the 35 offices in existence began to decrease rapidly. Some of the place names have vanished, including Lake Sarah and Iron Creek.

—The peak of retail food stores was reached in Stevens Point in 1937, when the city had 57 of them. In addition, there were seven meat markets, six bakeries, 12 dairies and one dealer in fruit.

—The growing season in the county varies greatly from year to year, not only because of the weather, but also because of local topography, type of soil, type of vegetative cover and the land's proximity to cities, lakes or rivers. The mean growing season is 145 days in Stevens Point, 139 days in Rosholt and 100 days in Coddington.

Perret has always believed the materials he collected from his students were special and worthy of publication. He introduced a field study course in geography, having been introduced to this field while at the University of California in Berkeley. Here, he used all of Portage County as a laboratory.

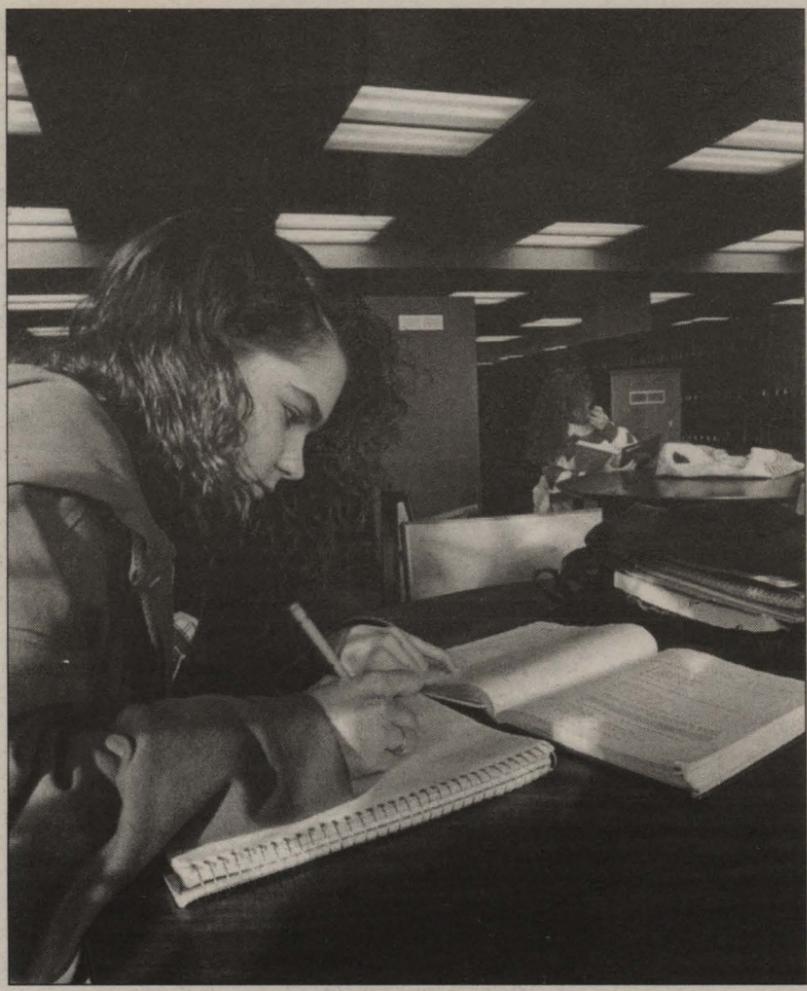

Perret said he never thought his manuscript would be published in his lifetime. After his retirement in 1981 from the UW-SP geography faculty, the Swiss-born professor began working on the project in earnest and had nearly all of it completed by the late 1980s. But the difficulty came in finding a publisher to print and market it, without Perret having to make a major investment from his personal finances.

The class project was an ideal fit to his situation, Perret explained.

For local authors interested in having their work appear in book form, the class and its organization, known as Cornerstone Press, accepts manuscripts each fall and then chooses the one it deems the most marketable to publish.

Supervised by Dieterich, the class, after selecting the manuscript, does the editing, designing of the cover, layout, and marketing of the final product.

The organization expects to be on better financial footing after selling this year's book because printing was donated by Worzalla Publishing of Stevens Point. Twice as many copies as usual—1,000—were printed because of anticipated public demand. And, for the first time, the annual class project appeared in hardcover. Lisa Lemke of the class publicity team said Worzalla was interested in trying out a new press on the project, "and things came out wonderfully." ■

Studying in the late hours at the university's library.

Actuarial science emphasis added

UW-SP has a new academic program in actuarial science.

The offering is an emphasis within the mathematics major.

The UW System Board of Regents approved the plan, which had been proposed by the Department of Mathematics and Computing and endorsed by the UW-SP Faculty Senate.

Actuaries are statisticians who compute insurance risks and premiums.

Because there are numerous insurance companies of varying size throughout the state, particularly in the immediate area surrounding UW-SP, local professors have considered developing an academic program in actuarial science for many years.

Michael Treuden, one of the architects of the new curriculum, said an incentive to develop an official actuarial training program stems from the success of past math graduates of UW-SP who have successfully entered this field.

Treuden also cited a survey conducted a number of years ago among professional people in various walks of life. The findings showed that people with actuarial responsibilities returned some of the highest marks for job satisfaction.

This study alone generated considerable interest in careers as actuaries among collegians locally and nationally, according to Treuden.

The job market generally runs from good to excellent, and current newcomers in the field can usually command starting salaries near \$30,000, the professor reported.

Mostly utilizing existing courses in the mathematics major, the emphasis will have a new statistical course plus two electives that are geared to preparing candidates for the actuarial examinations. A requirement will be for students to pass at least one of the national exams prior to graduation.

Recommended collateral areas of study are business and economics, communication, finance, insurance and writing.

William Wresch, chairman of the mathematics and computing department, said internships will be available to participants in the program in area insurance headquarters. Sentry Insurance of Stevens Point has provided such opportunities in the past and also made available executives to assist in the planning for the emphasis.

Wresch announced that two new members of his faculty hold membership in the Society of Actuaries, a national organization.

Besides the work of Treuden, the chairman cited Richard Schoenecker for his role as head of the committee which moved the actuarial proposal through the various approval processes.

The first faculty member here promoting study of actuarial science was Charles Johnson, now retired, who had been an actuary before moving into the role of professor. Johnson advised numerous students who sought assistance in preparing for careers as actuaries. After Johnson's retirement, a scholarship fund was established to assist mathematics majors interested in that specialized field. ■

Curriculum Development

New laser laboratory ready for students next year

A new laser laboratory that will, according to its chief planner, "make chemistry more interesting for our students" is being developed at UW-SP.

Professor James Brummer, project director, said the National Science Foundation has awarded the school nearly \$17,000 for the facility. A like amount is being provided by the university.

Most undergraduate chemistry students in the nation's colleges and universities do not have access to the kind of equipment that will be installed in the lab, according to Brummer.

The laser-based kinetics/spectroscopy equipment is intended to enhance offerings in physical chemistry, instrumental analysis and polymer chemistry and also be used for student research.

The equipment is the same as that used in medicine, academic research and industry. By learning its use, the students will be able to gain experience that will make them more broadly prepared than most of their peers across the country by graduation day, Brummer contends.

An existing room in the UW-SP Science Hall will be selected soon for conversion to the laboratory. The facility is expected to be completed by the start of the 1993-94 school year.

Brummer said, "We have opted not to acquire expensive Raman and emission spectrometers, but rather to construct them from individual components. This affords us flexibility to use each component for a number of different purposes. It also allows our students to learn how to operate the components independently and thereby gain a better appreciation of their uses and limitations."

Indian social workers trained

A new academic program in Native American and Rural Social Work began last fall at UW-SP

"This is very important for the university because it enables us to serve a minority group that is within our state," says Eugene Clark, chairman of the Department of Sociology.

In a proposal that was passed both by the Faculty Senate and the UW System Board of Regents staff, Clark and his departmental colleagues cited growing needs for social workers in general and particularly in Native American communities where tribal services have been expanded. Moreover, the professors report increased student interest in social work careers.

Alton (Sonny) Smart, an Ojibwa Bad River Indian who has served on the UW-SP faculty for two years, coordinates the new program.

Smart has a master's degree in social work from the University of Minnesota-Duluth and has done postgraduate work in family therapy at UW-Madison. Before coming to Stevens Point, he taught at Mt. Senario College in Ladysmith. He has had experience working on numerous state reservations in child welfare, counseling, and alcohol prevention programs.

Likewise, the focus of the new minor is on the areas of family, mental health, child welfare, and alcohol and other drug abuse.

Though students of diverse backgrounds are pursuing the new minor, it is believed to be the kind of offering that will enhance UW-SP's minority recruitment effort, especially for Native Americans.

Whether the minor will someday be expanded to serve other minorities has not been discussed, according to Clark, but the program already has attracted several Hmong students.

In conjunction with the new program, a Summer Institute on the Native American Family is being developed on campus. It would use course fees from students both on and off campus, drawing participants from tribal and public human services agencies. ■

Brummer has considerable experience in the area of emission spectroscopy, including both steady-state and pulsed methods.

Last summer, he attended an NSF-sponsored minicourse on chemical applications of lasers held at James Madison University.

A California native with a Ph.D. from Washington State University, he has been teaching at UW-SP since 1985. ■

Menominee language classes first in state

UW-SP has begun offering courses in the language of the Menominee Indians.

The new addition to the curriculum was taught by Marvin Askenette of the Menominee Reservation on Tuesday and Thursday evenings this past semester, making it more accessible to nontraditional students.

History Professor David Wrono, who was active in promoting broadening of language study on campus, said he believes focus on the spoken word of this tribe is a first in the UW System.

UW-SP's Faculty Senate voted approval of Menominee 101 and Menominee 102, both for four credits, to be offered by the foreign languages department. The university also has offerings in German, Spanish, French, Russian and Chinese.

Wrono said Askenette is uniquely trained to teach the two classes. A native of the Menominee Reservation who spoke the language of his people exclusively in his younger years, Askenette later studied in several California colleges. He has been teaching Menominee in recent years in reservation schools in the Keshena-Neopit area.

Besides bringing a firsthand understanding of Indian culture to his classes, Askenette also has developed expertise in computing and has developed special programs using that technology for his courses.

For UW-SP to offer Menominee is to acknowledge its own roots, according to Wrono. The campus is on land that, until a treaty in 1836, was considered part of the Menominee tribe's territory. ■

Arts World program comes to campus

UW-SP has become the home of Arts World, summer camps dedicated to encouraging self-expression and creativity among state high school students.

The collaboration between the university and the Department of Public Instruction was announced in March of 1992 by State Superintendent Herbert J. Grover and UW-SP Chancellor Keith Sanders. They stated that the move to UW-SP will give the program continuity and stability so it will be available to students through the coming years. Earlier, camp sessions had been postponed due to budget constraints. Now that the events will be located in Stevens Point, a full itinerary has been scheduled this summer. Professor Ann-Bridget Gary is the managing director. Grover said his department will provide \$30,000 in annual funding for the program.

Since it was founded by DPI in 1984, the summer program has been held at a number of sites including MacKenzie Environmental Center in Poyette, UW-Platteville and Lakeland College in Sheboygan.

Involving 300 students last year, the camps feature teachers and professionals leading classes in creative writing, dance, music, theater, theater design and visual arts. Students submit a sample of their art, an essay and teacher recommendations to a review board that determines which students will participate.

The events run between one and two weeks and participants qualify through their schools. Sessions end with student showcases in which the campers present their works. ■

New Assignments

Helen Godfrey

Helen Godfrey administers two divisions

A cost-saving realignment of the administrative structure at UW-SP has placed Helen Godfrey in charge of about two-thirds of what used to be the Student Life Division.

Her new title is assistant chancellor for the Division of Student Development and University Relations.

Chancellor Keith Sanders said she will oversee the Student Health Service, Counseling Center, University Housing, University Centers, Campus Activities and Student Conduct units. In addition, Godfrey will continue supervising all public/community/alumni relations activities, as she has for the past 12 years.

Meanwhile, the Offices of Registration/Records, Financial Aid, Admissions, High School Relations and Career Services have been shifted to the Division of Academic Affairs under Vice Chancellor and Provost Howard Thoyre.

Many of the budget matters of the former Student Life Division are now handled in the office of Greg Diemer, assistant chancellor for business affairs.

The changes will save between \$70,000 and \$100,000, Sanders estimates.

The chancellor said, "Our chief motivation is to save administrative costs and invest the dollars in the institution's main mission: teaching. We've done this despite the fact our administrative costs at UW-SP are among the lowest in the country at comparable universities."

Gillo is appointed

Diane Lloyd Gillo has assumed duties as assistant dean of the College of Letters and Science at UW-SP.

Gillo is a professor in the Division of Business and Economics who has served on the faculty for nine years. She is a native of Pennsylvania and the holder of a bachelor of science degree from Slippery Rock State in her home state and master of arts and doctor of education degrees from Western Michigan University.

As a marketing specialist, she spent part of the summer of 1990 in Japan as a participant in the National Institute on Incorporating Japanese into the Undergraduate Curriculum. ■

Gahnz directs center

Sharon Gahnz has been appointed acting director of the University of Wisconsin-Stevens Point Counseling Center, which she has served as a staff psychologist the past 12 years.

A search and screen committee is assisting in choosing a permanent director.

Gahnz is senior psychologist on the center staff and has, in recent years, also coordinated the Employee Assistance Program.

A native of Wausau, she has earned a B.S. degree in speech pathology and audiology from UW-Milwaukee, a master's in counseling and student personnel from UW-Oshkosh and a Ph.D. in counseling psychology from the University of North Texas in Denton. ■

Chris Mortensen

Mortensen appointed commander of ROTC and military science

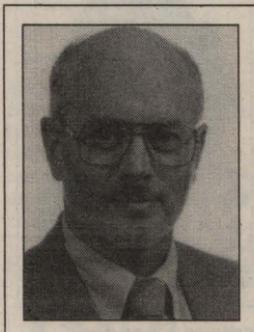

Lt. Col. Chris Mortensen, a state native who has spent the past three years on assignment in Thailand, is the new head of the Army ROTC unit and military science program at UW-SP.

Mortensen has been in the Army for 19 years. In his last post, he was controller for the U.S. Military Advisory Group at the American Embassy in Bangkok three years.

Sanders emphasized that Godfrey is "eminently qualified for her expanded role in the area of student development."

An Appleton native, she has been a teacher at Brookfield Central High School, on the residence hall staff at UW-Madison, head counselor in the Indiana University residence hall system, and assistant dean of women and psychology instructor at Ohio State University.

She came to UW-SP in 1965 as associate dean of students and then was executive director of cocurricular services until she was promoted in 1980 to the newly created position of assistant chancellor for university relations. A resident of Stevens Point, she has been active in the community throughout her 27 years at UW-SP. ■

Paul E. Mertz

Mertz elected history chair

Paul E. Mertz became chairman of the Department of History at the University of Wisconsin-Stevens Point last July 1.

Mertz, who has served UW-SP since 1969, succeeded

Robert Knowlton, who has retired.

After attending high school in Huntsville, Ala., and Prairie Village, Kan., Mertz earned a bachelor's degree in history from Phillips University in Enid, Okla., and a master's degree and doctorate from the University of Oklahoma in Norman.

The professor has done extensive research and writing about social issues, including civil rights, in the southern United States. ■

Conservatory names Kryshak

Jodi Engum Kryshak

UW-SP alumna Jodi Engum Kryshak of Amherst is the new director of the Conservatory for Creative Expression at the university.

Kryshak is a 1979 graduate of UW-SP, and manager of the Central Wisconsin Symphony Orchestra for the past six years. She will continue in her position with the symphony. In addition, she serves as editor of Progressions, a newsletter produced by the American

Symphony Orchestra League, and as president of the Tomorrow River Fine Arts Council.

At UW-SP, the center provides non-credit instruction and involvement in the arts for area residents of all ages. University faculty and others who are specialists lead the classes. ■

Ed Sontag

Sontag chosen head of education

Ed Sontag, former deputy assistant secretary of the U.S. Department of Interior, is the new head of the School of Education at UW-SP.

His expertise is in the field of special education.

Sontag had been in the Department of the Interior in Washington, D. C. since 1989 as its chief adviser on education matters. He concurrently was deputy assistant secretary of the Bureau of Indian Affairs, responsible for developing and improving education programs for Native American children served by the bureau.

He has spent the past 20 years in federal service, starting as coordinator of state plans and administration for the Bureau of Education for the Handicapped. He rose to the position of director of special education and later associate commissioner of rehabilitation service administration, both for the U. S. Department of Education.

His federal service was enhanced by temporary assignments as assistant state superintendent of the Illinois State Board of Education and professor of education at Indiana University.

A native of Los Angeles who grew up in western New York State, Sontag earned his bachelor of science degree in 1963 in special education and his master of science degree in 1967 in elementary school administration and supervision, both from the State University of New York in Buffalo. His doctorate in administration of specialization was granted in 1970 by Syracuse University.

His first teaching position was in 1964 in a special education program in the senior high school at Tonawanda, N.Y.

His writing has appeared in seven books and many professional journals.

Sontag is the 1990 recipient of the Distinguished Professional Service Award given by the National Down's Syndrome Congress. He holds the Distinguished Alumni Award from both the State University of New York at Buffalo and Syracuse University, the Distinguished Service Award from the Association for the Severely Handicapped, the Illinois Federation for Exceptional Children, the Council for Exceptional Children-Division of Mental Retardation and the New Mexico Council for Exceptional Children. ■

Psychology selects Wells

Coralie Wells

Professor Coralie Wells will become chair of the Department of Psychology at UW-SP this summer, on her 25th anniversary as a member of the faculty.

She was elected to the office by her 15 departmental colleagues and appointed by Justus Paul, dean of the College of Letters and Science. Replacing John Holmes, who will return to full-time teaching, she will be the only woman chair of a

department in her college. Her term is for three years.

Wells brings varied professional experience to her administrative duties. Early in her career, she was a learning disabilities teacher in Montgomery County, Maryland, and education director for the University of Minnesota Hospital children's psychiatric unit. She also has had experience working in residential treatment centers for the disabled.

The professor has been active in international education, accompanying student groups to several semester abroad sites in Europe. Last year, she expanded a research project begun here on elderly arthritis sufferers' abilities to deal with chronic pain to include their peers in China, Taiwan and Japan.

The professor, who is a native of Wilmington, Del., has a bachelor's degree from The Catholic University of America and a master's and doctorate from the University of Minnesota. ■

Faculty Accolades

William A. Sylvester

Sylvester in 'Forestry Hall of Fame'

A retired professor at UW-SP is the 23rd person to be inducted into the Wisconsin Forestry Hall of Fame.

William A. Sylvester, 211 Green Ave., Stevens Point, received the honor in a recent ceremony in Eagle River, sponsored by the Forest History Association of Wisconsin.

"It's a once-in-a-lifetime experience," he said, adding: "To even be nominated was a special honor." Sylvester expressed pride in being placed in the company of a select group of those regarded as the greatest foresters in the history of the state.

At 77, he is the only inductee still living. Most of the honors given in previous years have been bestowed posthumously. Such was the case with the only other inductee this year, Cornelius Harrington, who served 44 years in the State Conservation Department, part of that time as chief state forester.

Sylvester was recognized for his long service to his profession of forestry by helping rebuild the forests of Wisconsin. He was involved in forest fire protection and prevention, pioneering forest management practices on privately and publicly owned land, providing workshops for agriculture teachers and loggers, and teaching in the College of Natural Resources at UW-SP. He retired 11 years ago and was later given the honorary title of fellow of the Society of American Foresters.

Teaching colleagues at UW-SP nominated him for the Forestry Hall of Fame.

Kent Hall promoting women in science

Professor Kent Hall of UW-SP is a member of a new UW System board responsible for the promotion of women and minorities in science.

Hall, who serves on the biology faculty, has been active many years in recruitment of top science students from state high schools to UW-SP.

Professor JoAnn Eisberg, administrative director of the UW System Women and Science Advisory Board, said a National Science Foundation report indicates that 42 percent of the women and minorities who enter college professing an interest in science or engineering careers drop out of those disciplines after the freshman year, and 23 percent defect after graduation. ■

Ackley edits book on misogyny

A professor at UW-SP has edited a book about hatred of women in literature.

Katherine Anne Ackley, professor of English and assistant dean of graduate studies, is the editor of "Misogyny in Literature: An Essay Collection," recently released by Garland Publications of New York.

Ackley previously had two books published by Garland, and because the company was pleased with them, its editors asked her to compile the new collection of writings about misogyny. Characterized by fear, contempt or dislike of women, misogyny is a "deeply entrenched tradition in western culture," Ackley says. The essays in her collection examine the subject as it has been revealed in literature across time and across genres, beginning with an analysis of Ovid's "Art of Love," and concluding with an exploration of possible responses to misogyny in the works of contemporary

Katherine Ackley

A native of Milwaukee with academic degrees from the University of Michigan and Yale University, Sylvester served on the staff of Trees for Tomorrow, headquartered in Merrill, for 23 years. He was promoted to the post of chief forester and was involved in the planting of 25 million trees, management plan preparation for 300,000 acres and supervision of timber sale contracts for 2,000 landowners. He joined the UW-SP forestry faculty in 1969 and became an early expert on the use of computers in forest management.

Large wood plaques created by lasers, giving histories of Sylvester's and Harrington's careers and including their likenesses, will be put on permanent display in the Hall of Fame, which is located in the main lobby of the Natural Resources Building at UW-SP. The Hall of Fame has been in existence since 1984. ■

Chander saluted as advocate for minorities

Jyotsna Chander, a longtime lecturer in mathematics at UW-SP, is recipient of the state Outstanding Service to Women of Color Award.

She was honored in Kenosha by the Wisconsin Minority Women's Network.

Chander was cited for her teaching and public service, both of which have been uniquely geared to the benefit of minority women.

One of her classroom responsibilities has been the teaching of mathematics to Native American students—mostly women—in a Weekend College Program at UW-SP. She also serves as faculty adviser to the South Asia Society, a student organization.

As a native of India who, in 1966, became one of the first permanent residents of this part of the state from her homeland, Chander has been involved in special activities to acquaint area residents with Indian culture and food.

She and members of the South Asia Society founded the Festival of India, which has been held in Stevens Point each September since 1988. Profits from the event are used to support destitute women in attendance at the P.N. Doshi College in Bombay.

Chander has been teaching at UW-SP since 1968, and, besides being cited for her work there by the state women's organization, she is one of the 1992 winners of the University Leadership Mentor Award. ■

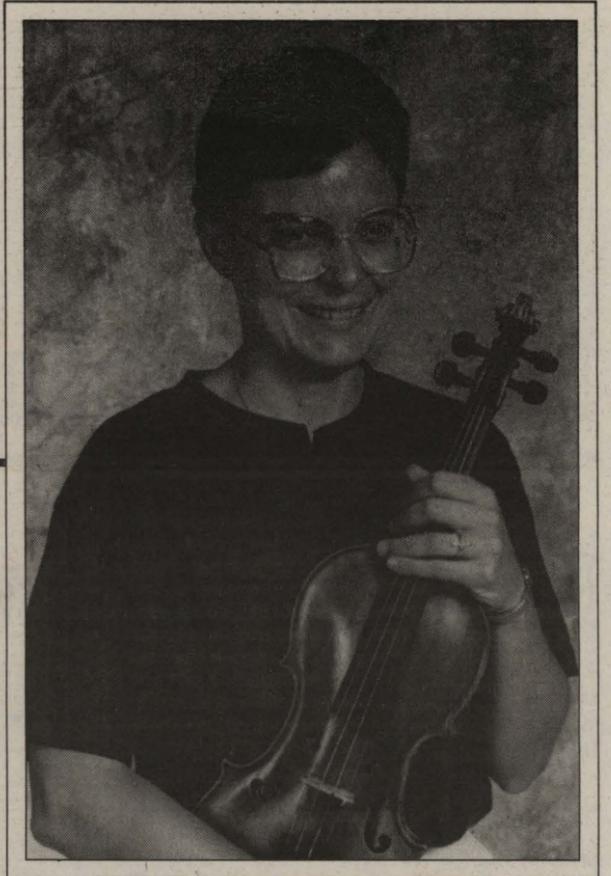

Jyotsna Chander

science fiction writers. The final essay, which discusses feminist science fiction, "provides a fitting conclusion to the collection," according to Ackley. It was written by one of her colleagues, Professor Barbara Dixon of the UW-SP English faculty.

Two of the essays focus on male critics who have reviewed works by women authors. Ackley says it is common for such critics to treat women's writing in one of two ways—describing it as not being "serious" literature or by being overly critical and negative. One essay examines how the work of Joyce Carol Oates was regarded by two male critics, who, according to the editor's introductory synopsis, "essentially see Oates as a threat and actually call for her silence."

The book is intended to be used as a resource by teachers, students and researchers in the field of literature and women's studies.

An Indiana native, Ackley came to UW-SP in 1979. She holds a Ph.D. from Ball State University. Two years ago, she was promoted to full professor and was recognized by the university for excellence in scholarship. In addition, for 10 years, she served as coordinator of UW-SP's Women's Studies Program. ■

Patricia D'Ercole

D'Ercole wins international post

Patricia D'Ercole of the UW-SP Suzuki staff is a new member of the board of directors of the Suzuki Association of the Americas. A violinist, she was chosen for the position as the result of an international election.

The 15-member board advances the Suzuki method of talent education in North and South America. It approves all of the teacher-training program and oversees its system of instruction at schools on the two continents. Annual business meetings are held either in Denver or Chicago.

D'Ercole will be the liaison between the board and its Violin and Viola Committees.

Since 1984, D'Ercole has been teaching violin and serving as a teacher trainer at UW-SP in both the Department of Music and the American Suzuki Talent Education Center.

Besides serving as a clinician and/or consultant at Suzuki festivals throughout the contiguous United States, she has been involved in programs in Estonia, Finland and Hawaii.

D'Ercole, who studied privately in Japan several years ago with Dr. Shinichi Suzuki, founder of the international talent education program, established and directed the Flambeauland Suzuki Program in Ladysmith. Her other music experience includes serving as a public school teacher and orchestra director in Maywood, Ill.

One other Stevens Point educator, Margery Aber, who established the Suzuki program at UW-SP, is a former member of the board of the Suzuki Association of the Americas. ■

Wresch software gets boost

A UW-SP professor is the creator of a program that is included in a new package marketed by a subsidiary of IBM to help students improve their writing and analytical skills.

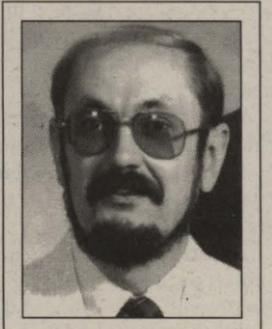

William Wresch's "Writer's Helper Stage II" is one of six programs in the package, geared for middle and high school students. The new product is named "Process Writing Package."

Each program therein has won at least one national prize. Wresch, who chairs the UW-SP Department of Mathematics and Computing, was honored for his program by "Technology and Learning" magazine with its award of excellence for 1990-91 and by an arm of the U.S. Department of Education with its Best Writing Software Award for 1988.

IBM announced recently that the package will be marketed by EduQuest, its educational systems company, and consist of programs developed by CONDUIT, Humanities Software and WordStar International.

Steps in the package integrate the process and mechanics of writing, from prewriting, crafting and reviewing to editing and publishing.

Wresch's program helps students write and revise essays. The prewriting or planning activities focus on finding, exploring and organizing information about a topic. Revising activities help students zero in on such aspects as sentence structure, paragraph formation, word usage and audience considerations. ■

Wilke cited for 'lifetime achievements'

Richard Wilke

Richard Wilke is the fifth person to receive the top award "for lifetime achievements" from the North American Association for Environmental Education.

The associate dean of the College of Natural Resources at UW-SP was honored in October at the World Congress on Education and the Environment in Toronto.

Though he has won several prestigious citations from a variety of organizations concerned with environmental protection, he says the Walter E. Jeske Award "tops them all."

The sponsoring group, with 1,500 members, is the world's largest association of environmental education professionals. Wilke is a past president.

Wilke's international involvement in his profession had a great deal to do with his selection for the award. He currently serves as a member of the North American Commission on Environmental Education Research and a consulting editor for the "Journal of Environmental Education." He has written several publications for the United Nations Educational, Scientific and Cultural Organization, led student groups on study tours in Central America, Europe, Australia and Asia.

Besides his teaching, Wilke has spoken at many state, national and international programs and conducted many pre-service training sessions for

teachers. He was appointed earlier this year by William Reilly, administrator of the Environmental Protection Agency to chair a newly created National Environmental Education Advisory Council. In February, he was asked by the Council of State Governments to chair a committee to develop model environmental education legislation for states across the country.

Wilke, a native of Manitowoc, is an alumnus with two degrees from UW-SP and a doctorate from Southern Illinois University. His first professional assignment at UW-SP came in the mid-1970s, when he became the first director of the Central Wisconsin Environmental Station near Nelsonville. ■

Robert Stowers Fulbright scholar

A computer design specialist at UW-SP has been designated a Fulbright exchange scholar to spend the first five months of this year in Budapest, Hungary.

Professor Robert Stowers left in January to teach computer design in the School of Architecture and Urban Planning at the Technical University of Budapest. He is training Hungarian architectural students in the uses of microcomputers.

Robert Stowers

Stowers says computer-aided design, with which he has gained considerable experience, is essential to the future of most design professions. While at the Hungarian university, he is discussing issues in the field and assisting with curriculum development.

"Since Eastern Europe has opened up to the west, its cultures are moving rapidly toward new technologies," Stowers says. "I became interested in Hungary because the university in Budapest has a particular need for my type of expertise." He says he also is looking forward to exposure to other ways of building and environmental planning, which he can bring back to augment the environmental design program at UW-SP.

A faculty member for seven years, his degrees are from Notre Dame and Michigan State. He formerly was an associate professor of architecture at Texas Tech and the University of Nebraska.

Since coming to UW-SP, he has been instrumental in the planning and development of the art and design computer lab and the implementation of Autocad training on campus. ■

Lang on board of chemical foundation

Professor C. Marvin Lang of UW-SP is a new director on the board of the Chemical Heritage Foundation, a national non-profit organization headquartered in Philadelphia.

Lang, a member of the chemistry faculty, is one of three appointees of the American Chemical Society to serve on the 20-member foundation governing body.

The foundation receives, holds and uses funds for the active support of preserving the history of the chemical sciences. It seeks to discover and disseminate information about historical resources and to encourage research, scholarship and popular writing in the history of the chemical sciences and the chemical process industry.

Lang has been active many years on the local, regional and national levels of the American Chemical Society. He currently is in his second term as a member of its national board. ■

C. Marvin Lang

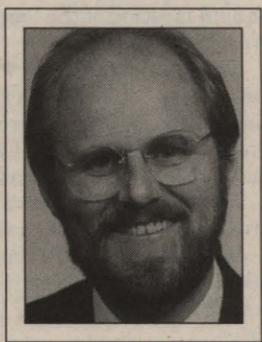

Environmental education group chooses Champeau

A natural resources professor at UW-SP is a new officer of an international organization.

Randy Champeau was elected in an election by mail to serve as a director of the North American Association for Environmental Education. He will be one of 23 members on the board when he assumes his duties this spring.

Besides serving UW-SP as an associate professor of environmental education and resource management, he also is director of the newly established Wisconsin Center for Environmental Education.

Champeau, a UW-SP alumnus with a Ph.D. from Michigan State University, has served on his alma mater's faculty since 1984. He also has been president of the Wisconsin Association for Environmental Education and has received its coveted Aldo Leopold Award. ■

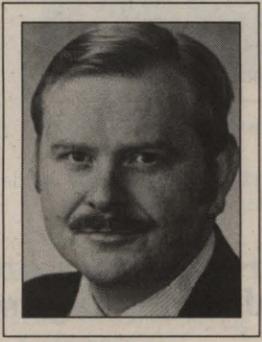

Randy Champeau

Lawlor writes book on Columbus

A UW-SP English professor has written a book of stories about Christopher Columbus and the short-term and long-term effects of the explorer's contact with the island of Hispaniola.

William Lawlor has written "Columbus and the Island of Golden Sorrow," a collection of short stories which he describes as an "imaginative history." The stories refer to the voyages of Columbus, the native cultures with which Columbus had contact, and the contemporary culture that exists in the wake of Columbus' arrival.

William Lawlor

Several of the stories have been previously published in literary magazines, but now Lawlor has added new stories to complete a collection of eight tales. Sometimes humorous and sometimes tragic, sometimes tender and sometimes harsh, the stories embody what Lawlor calls the "golden sorrow" of colonial and contemporary Hispaniola.

The author's interest in Columbus and Hispaniola has developed over a number of years. A UW-SP Personnel Development Committee grant enabled him to travel to historical and archeological sites in the Dominican Republic, where he met with local experts on the pre-Columbian and colonial periods. With his wife, Professor Valentina Peguero of the History Department, he received a grant from the Wisconsin Humanities Committee to bring the exhibit "Maps and the Columbian Encounter" to the UW-SP Learning Resources Center, and he and Peguero gave inaugural addresses for the exhibit in May 1991. Last November in Green Bay, Lawlor and Peguero gave addresses at the American Indian History and Culture Conference, presenting studies of the Tainos, the first natives to face the disastrous consequences of the arrival of Europeans. Lawlor taught for a year at the Catholic University in the Dominican Republic, and in January 1991, he led a tour of Hispaniola that focused on sites connected with Columbus and the conquest.

Copies of "Columbus and the Island of Golden Sorrow" are available at the University Store, Book World, and Little Professor Book Center, all in Stevens Point. ■

ACLU elects Webster

An administrator at UW-SP has been elected to the state board of the American Civil Liberties Union.

Loretta Webster, associate vice chancellor for advancement of cultural diversity, is one of 25 directors of the organization. She was chosen to serve a three-year term in an election conducted by mail. The board holds monthly meetings at different state cities. ■

Loretta Webster

Gifts

UW-SP receives pilot paper machine

UW-SP is the recipient of a pilot paper machine that is the most valuable piece of equipment ever given to the institution.

The donor, S.D. Warren Company, subsidiary of Scott Paper Co., has estimated value of the gift at \$2 million.

Larry Graham, chairman of the Department of Paper Science, says the device will provide his program with a "rite of passage," adding: "We have always taken great pride in giving our students hands-on experience, but having a machine to operate ourselves has moved the program from adolescence to maturity."

The classic Fourdrinier machine is 85 feet long and produces an 18-inch wide sheet of paper. It has one calendar stack and runs at speeds of 100 to 300 feet per minute.

Built about 1960 and first used for research in Philadelphia, the machine was moved to Westbrook, Maine, where staff at S.D. Warren "developed a lot of affection" working with it, according to Gerard Ring of the UW-SP paper science faculty.

In Stevens Point, the machine will be used extensively in at least three courses: sophomore laboratory, junior paper chemistry and physics, and senior process controls and paper machine operations. Also, representatives of area paper-producing firms may

Foundation gives land to Schmeckle Reserve

The UW-SP Foundation has donated seven acres of undeveloped land to the school's Schmeckle Reserve, thereby making it eligible to receive an \$84,000 grant to improve facilities.

Announcement of the transfer was made at the annual meeting of the foundation in October at Sentry World Headquarters.

The property, located within the boundaries of the nature reserve, had been retained by the foundation since it donated other parcels to the state at the time excavation was done for University Lake in the mid-1970s. The foundation still owns eight acres there.

Money matching the value of the seven acres is being provided by LAWCON, a federal conservation program.

Work the grant will finance includes storm sewer installation, surface asphalt, and creation of a safer entry/exit for the parking lot adjacent to North Point Drive.

Also, lighting at various parts of the reserve will allow safer night use, signage will heighten public awareness of the facility, trails will be asphalted, "curbing" will be provided near existing boardwalks, and benches will be placed for rest spots along the trails.

The completed project is estimated to make the reserve and visitor center accessible to an estimated 50,000 visitors per year.

Executive Director James Radford reported that assets of the foundation grew by approximately \$250,000 last year, largely through the establishment of endowments to support scholarships. Total assets are now \$3.1 million, more than half of which is invested with income distributed to students.

Radford reported that the value of endowments tripled in the last five years, but needs of students have increased at an even greater rate.

During the past year, a quarter of a million dollars worth of scholarships were distributed by the foundation.

Re-elected to one-year terms as officers of the foundation were Gerald Viste, Wausau, president; Don Kropidowski, Stevens Point, vice president; Robert Janes, Wausau, treasurer; Gene Katz, Plover, secretary; E. John Buzza, Stevens Point, corporate counsel; and Radford, executive director.

Four directors were re-elected to three-year terms: Viste; Karen Engelhard, Stevens Point; Sharon Nemirov, Wausau; and Dr. Tom Nikolai, Marshfield.

Radford announced that public involvement in the foundation has been expanded by the recent appointment of 30 area residents to four new committees: publications, campaign steering, "Traditions in Action" fund drive and planned giving. ■

call on UW-SP to use the device occasionally for special projects.

However, use won't be immediate.

Reinstallation of the equipment in a new addition to the UW-SP Science Hall will take between one and two years.

Meanwhile, presence of the machine is expected to spur more gifts to the paper science program from industry. IBM has already pledged \$110,000 worth of equipment to interface various devices in paper laboratories. Ultimately, the plan is to have computer equipment control the papermaking process, Ring said.

Costs to the Department of Paper Science of bringing the machine here from Maine exceeded \$60,000. And reassembly expenses will be even greater. But Graham and Ring are expecting industry, unions and individuals to defray the costs through donations of labor, money, expertise and equipment.

There are not many machines still in existence that are the size and age of the one given to UW-SP that would be useful for an educational program, said Ring.

Graham said experiences afforded by the device will give local students special confidence in their abilities "to go along with the excellent skills we provide them." ■

Racine donor provides new forestry laboratory

Natural resources students at UW-SP have a new outdoor laboratory in the Town of Almond.

E. S. McLoud of Racine, retired director of research for the SC Johnson & Son, Inc., has given UW-SP an 80-acre tract that is primarily a pine plantation.

Alan Haney, dean of UW-SP's College of Natural Resources, says the property fits ideally into the needs of the forestry and other programs in the college.

Proximity of the forest to campus, a 20-minute trip, makes it particularly valuable as a teaching facility, Haney added.

McLoud and his late wife, Catharine, purchased the property on Lalk Road, between Almond, Plainfield and Bancroft, in 1949. They made many weekend trips here to work on their project.

Retired UW-SP Professors William Sylvester and Robert Engelhard assisted the couple in the formative years of the forest project while serving as staff members of Trees for Tomorrow. The professors and the donor's sister, Nancy McLoud of Springfield, Ill., were present at a recent luncheon on campus at which the gift was announced.

Haney said the only forest land UW-SP has ever owned in the immediate area of the campus is a 40-acre tract in the town of Plover. But need for funds to complete construction projects for the Treehaven field station near Tomahawk several years ago necessitated sale of that pine grove.

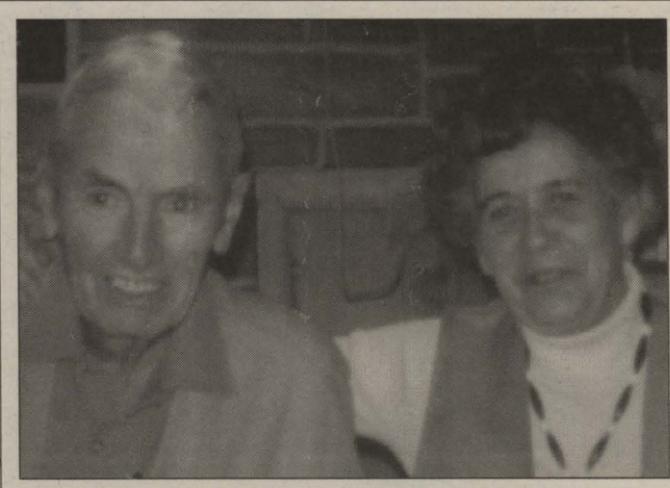

"That's why this donation is so needed and appreciated," according to the dean.

The land in the town of Almond will be deeded to the state specifically for UW-SP's use as a research as well as an education facility. It will be named the Elbert S. and Catherine McLoud Memorial Forest, according to Haney.

E. S. McLoud said at the luncheon that he found much enjoyment observing "healthy growth form" on his trees. The property was his first investment in forestry, he added, and was followed by other purchases in this area and in northern Wisconsin.

Though he placed no restrictions on how the land should be used, McLoud was reassured by Chancellor Keith Sanders that the donor's interests will always be considered. "When we go there, we will remember from whom it came and the love and sentiment behind it," Sanders added.

McLoud served SC Johnson & Son, Inc. more than 35 years as a scientist, retiring in the late 1960s. He had major roles in the development of many products, particularly waxes, and insect controls, notably RAID and OFF. ■

Crosby award supported by \$10,000 endowment

A \$10,000 fund has been endowed in the UW-SP Foundation to provide financial assistance to local students.

A Dr. Leland and Beatrice Crosby Scholarship will be given each year to a student from Portage County. Mrs. Crosby, who lives in Park Ridge, said she decided to limit the competition for the award to local applicants because "we made our living from serving the people of this area."

Students from any academic discipline are eligible to apply for the Crosby Scholarship, which may be renewed for an additional year. Financial need will be a consideration for determining the winners.

Dr. Crosby, a dentist about 40 years, received his first year of college training at UW-SP. He specialized in children's dentistry and served as president of a state organization of his peers. He died in 1985. His wife, the former Beatrice Roach, received a three-year teaching certificate from the school in 1927 and was awarded her bachelor's degree in 1935. She was a teacher several years and a staff member for the Wisconsin Public Service Corp. prior to operating a USO facility during World War II in Key West, Fla., for the National Catholic Community Service. As an alumna, she assisted in organizing UW-SP's Newman Club for Catholic students. ■

Gordon Geeseman starts ecology fund

Gordon Geeseman, who retired two years ago from the faculty of UW-SP, has established an \$11,000

endowment for student scholarships at the school.

His gift to the UW-SP Foundation will be used to finance an annual Gordon Geeseman Botany Award. The amount will depend on prevailing interest rates.

Geeseman taught in the Department of Biology for 28 years from 1962 to 1990. He now lives in Grants Pass, Ore.

Besides being one of his department's specialists in botany, he developed and taught courses in horticulture

Gordon Geeseman

and genetics. He now holds the honorary rank of professor emeritus. ■

Irene Anderson scholarship aids language students

A ceremony at UW-SP's homecoming last fall marked the establishment of a new fund to assist students traveling abroad.

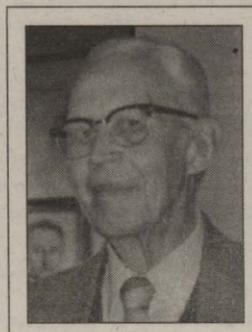

Named the Irene Anderson Scholarship, the award recipients will be foreign language students with high grade point averages and holding at least sophomore status. Preference will be given to students with demonstrated need and in teacher preparation programs. The university offers semester and other programs throughout the world.

Mrs. Anderson of Stevens Point died in 1990 and bequeathed a total of \$31,000 to the UW-SP Department of Foreign Languages in appreciation for the enjoyment she had while studying there years ago as a nontraditional student.

More than half of her gift will be placed in the Anderson endowment. The other half will be used to establish scholarship funds honoring outstanding students of Russian and French, and to increase existing endowments supporting scholarships for German and Spanish students. The new French award will be named in honor of the late Professor Mildred Davis, who taught here from 1928 to the early 1970s.

Chancellor Keith Sanders unveiled a plaque in the UW-SP Language Laboratory that will list all future winners of the Anderson Scholarship. He commended the donor's decision to remember her alma mater at a time when support from private sources is necessary to help programs maintain their margins of excellence.

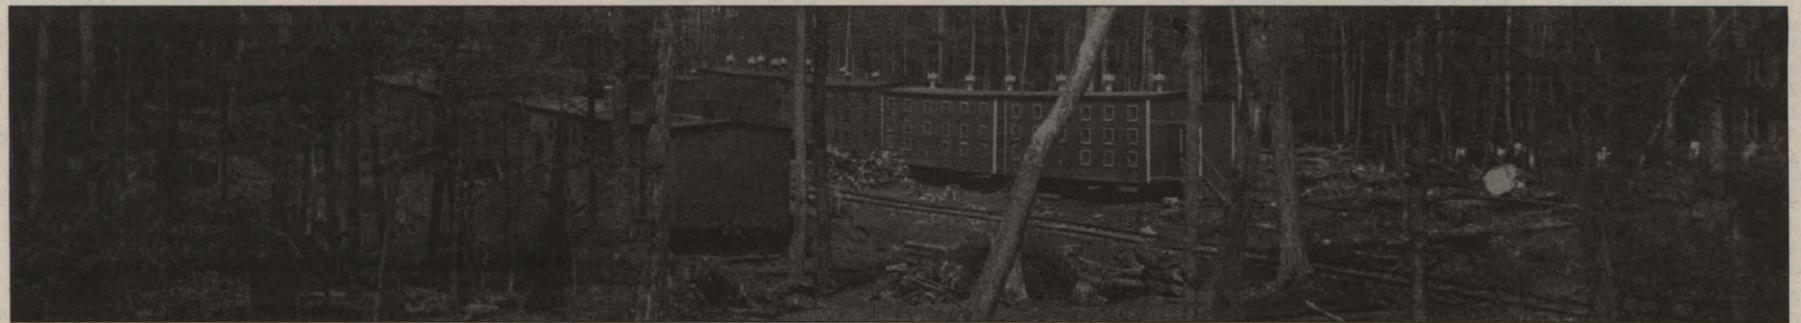

During the ceremony, Elizabeth Davidson, a longtime friend of Mrs. Anderson, said it was appropriate one of the scholarships the Anderson bequest is supporting honors retired Professor Melvin Bloom. Anderson "enjoyed his classes very much," Davidson reported. ■

E. S. McLoud

These photographs collected by Jaques Vallier, showing the way lumberjacks lived and worked in lumber camps at the turn of the last century, are believed to be from either Wisconsin or Upper Michigan.

Rare logging pictures donated to UW-SP

A pictorial history of logging enterprises in the Great Lakes States, containing several thousand images, has been given to UW-SP.

The donor is Jacques Vallier of Mequon and Tomahawk, a retired Milwaukee high school biology teacher and longtime collector of logging memorabilia as well as photographs.

Vallier's gift to the university has been appraised at \$15,000.

He previously donated the tools and related items used by early woodsmen of this region for the establishment of a logging camp museum on the Menominee Indian Reservation in Keshena.

The photographs, negatives and postcards fill about six boxes the size of portable air conditioning units.

The collection will be kept in the University Archives on the fifth floor of the Albertson Learning Resources Center. The public, as well as students and faculty, may use the items for research. With permission, copies of many of the photos may be made.

There are scenes of the interiors and exteriors of camp buildings, sawmills, locomotives, lumberjacks at work and showing off their intricately-piled loads of cut and uncut timber and animals such as horses and oxen used to haul the logs from forest to sawmill.

There also are some shots of incredibly large log jams in rivers of this region.

Nearly all of the images are of people and places in Wisconsin, Upper Michigan, and Minnesota. Most of them were taken prior to 1910.

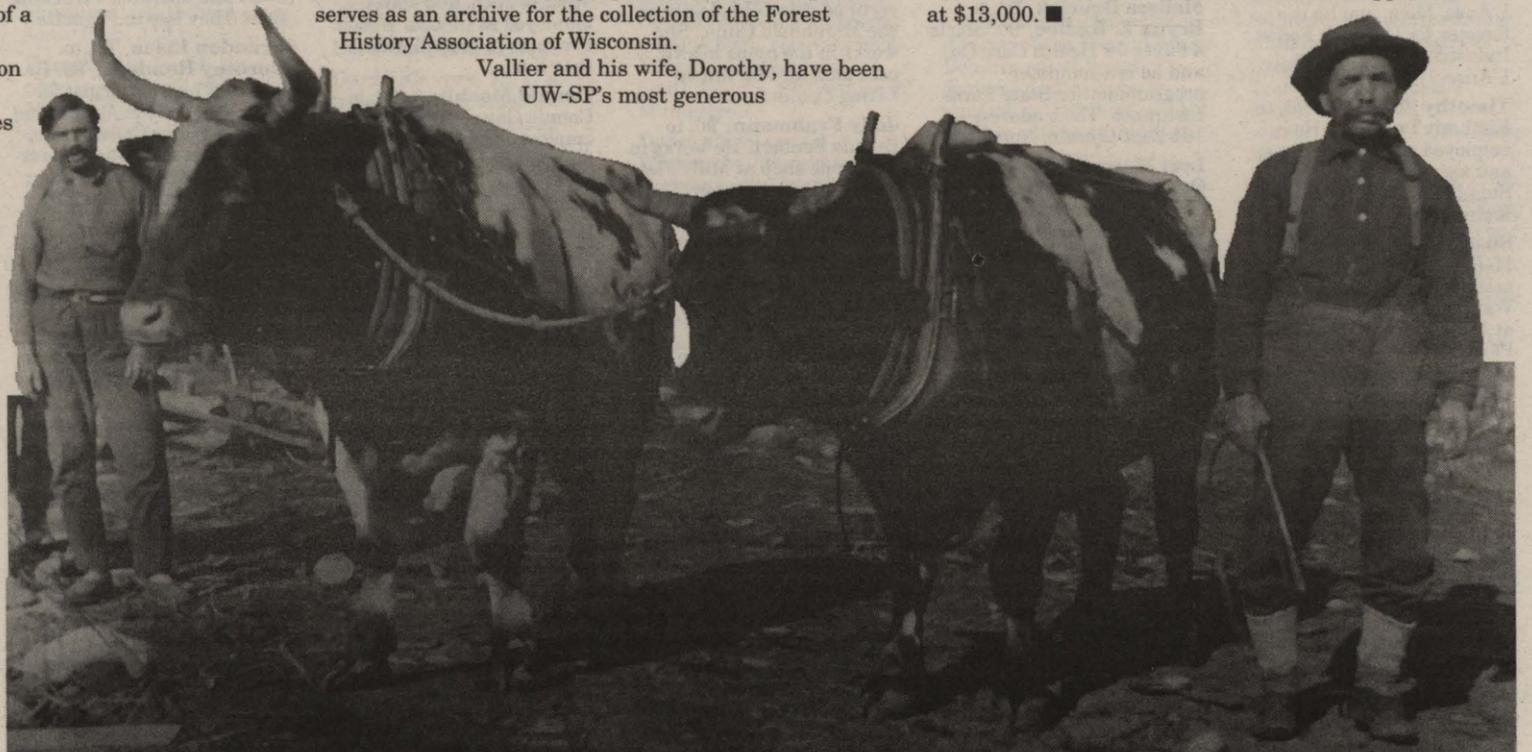

Vallier said he acquired the photographs from private collectors, antique shops, second hand stores and auctions.

He had particular interest in donating the collection to UW-SP because of its College of Natural Resources, which includes a forestry program. The university also serves as an archive for the collection of the Forest History Association of Wisconsin.

Vallier and his wife, Dorothy, have been UW-SP's most generous

benefactors, having previously given the school approximately 1,000 acres for its Treehaven Field Station between Tomahawk and Rhinelander, one of the most complete collections of American pattern glass goblets for display on campus, and funds for the development of the field station facility.

In the most recent gift, Vallier included a book collection on natural history subjects, which is being added to the university's main library collection in Stevens Point and a new library being developed at Treehaven. That collection alone has been appraised at \$13,000. ■

Marriages

Mark Kolinski, '90, to Renee Krzykowski. He is a paper process engineer for Consolidated Papers Inc., and she is manager of Claire's Boutique, Wisconsin Rapids. They live in Plover.

Margaret Kelly, '90, to Randall Hartwig. The couple lives in Stevens Point.

Lori Benes, '90, to **Jeffrey Weiss**, '90. She is a teacher at Sunshine Creative Preschool and he is a research assistant at Tennessee Cooperative Fisheries Research Unit, studying for a master's degree. The couple lives in Cookeville, Tenn.

Joe Grzywacz, '90, to Kim Taylor. He works at First Financial, Stevens Point, and she is with Wisconsin Retail Hardware Association.

Diane Kitzerow, '90, to **John Knecht**, '90. She works for Norell Temporary Services and he is with Northwestern Mutual Life Insurance Co., Milwaukee. The couple lives in Oak Creek.

Cynthia Ripple, '90, to James Neeb. They live in southwestern Wisconsin.

Carmen Gesicki, '90, to **Paul Schanke**, '90. He works for Kimberly Clark in Neenah. The couple makes their home in Menasha.

Beth Erickson, '90, to William Sommer. She is a teacher at Grace Christian Day School. He is a customer service representative for Banta. They live at 2137 Pheasant Run, Court K, Appleton.

Nina Thedens, '90, to Mark Mattmiller. She works at Del Monte Foods, Plover, and he manages the Blue Top EZ Mart in Stevens Point, where they live.

Jane Uhlig, '90, to Steven Gustafson. He is employed by the Glidden Public Schools. They reside in Park Falls.

Nancy Wenzel, '90, to Loren Hodgson. She is a teacher for the Wausau Public Schools and he is a radio announcer for WJMT, Merrill. They live in Wausau.

Kelly Berg, '90, to **Troy Nellis**, '90. She is a reporter with the Stevens Point Journal and he is employed by the National Wellness Institute. They live in Stevens Point.

Trenny Frahm, '90, to **Michael Pulkinen**, '91. She is a substitute teacher in L'Anse, Mich, and he is a forester for Connor's Forest Industries. They live in L'Anse.

Timothy Zajowski, '90, to Kimberly Pederson. He is employed at St. Croix Press and she works for Pioneer Supply Co. They live in New Richmond.

Susan Kasten, '90, to Paul Melnarik. She is an assistant manager at Shakey's Pizza in Wausau and he is a student at UW-SP. They reside in Plover.

Steven Wirkus, '90, to Jill Olson. He is pursuing teacher certification at UW-SP and works for United Parcel Service in Wausau, where they reside. She is employed at Marathon Mail Service.

Paul Hoffman, '90, to Lori Riehle. He is a police officer in the town of Rome, Wood County, and she is a computer operator at St. Michael's Hospital. They live in Stevens Point.

Cynthia Ripple, '90, to James Neeb. They live in southwestern Wisconsin.

Stephanie Meyer, '90, to Russell Ganser. She is an accountant for Ellis Stone Construction Co., Stevens Point, and he is employed by Wisconsin Public Service in Weston. They live in Mosinee.

Stephanie Found, '90, to Steven LaRosa. Both are employed at the Hotel Captain Cook in Anchorage, Alaska.

Roxanne Edel, '90, to **Normond Johnson**, '90. She is an elementary school teacher in Rothschild and he is business manager with ASHCO Inc., Wausau. They reside in Schofield.

Ronette Bollig, '90, to David Pronger Jr. They live in Texas, where he is a combat medical specialist with the U.S. Army at Fort Hood.

Rena Jensen, '90, to **Edward Sabey**, '91. She is a second-grade teacher for the Stevens Point School District and he is employed at Ocean Spray Cranberries Inc., Babcock. Their address is 1904 Johnson Ave., Apt. 2, Plover.

Philip Di Salvo, '90, to Lynn Rockman. He is a computer draftsman and she is a student at UW-SP, who also works in the customer service department at Copps Food Center. Their address is 1417 Rogers St., Stevens Point.

Peter Teska, '90, to Jennifer Steele. He is research and development manager at Stearns Packaging and she is attending school in Madison. They reside in Sun Prairie.

Nathan Thompson, '90, to Barbara Kilsdonk. He is with the Grand Chute Police Dept. and she works for American Medical Security, Green Bay. They live in Appleton.

Michele Skibba, '90, to Michael Haas. She is employed by Panel-It and he is with Nekoosa Corp. They live in Wisconsin Rapids.

Michael Andreas, '90, to Beverly Hoffman. He is a second-grade teacher at Owen-Withee Elementary School. She is a substitute teacher in Medford and Abbotsford. The couple resides in Abbotsford.

Melissa Mitsteadt, '90, to **Charles Hagi**, '90. She is pursuing her master's degree in speech/language pathology at UW-SP and he is employed by Haupt Investment Inc. They make their home in Reedsburg.

Melissa Dzurick, '90, to **Bryan E. Kadlec**, '90. She is a buyer for Health Care Co. and he is a computer programmer for State Farm Insurance. Their address is 101 East Lincoln, Normal Ill.

Lori Marcoux, '90, to Scott Omernik. She works at Community Industries and he works at Woodward Governor. They live in Stevens Point.

Lora Rogers, '90, to William Lutz. She is a sixth-grade teacher at Stangel Elementary School, Manitowoc, and he is a sales representative with WG&R Furniture. They live in Manitowoc.

Lisa Strack, '90, to Patrick Vogel Jr. Residing at 3100 Ellis St., Apt. 10, Stevens Point, the couple works for Sentry Insurance as claims representatives.

Lisa S. Thielen, '90, to Thomas M. Westphal. She is employed by Manpower and he works for Secura Insurance, Appleton. They live in Menasha.

LeeAnn Moesch, master's '90, to Daniel Cropsey. She is an audiologist at Family Hearing Center, Waukesha. A systems analyst at A.C. Neilsen Co., Northbrook, Ill., he is a student at Lakeland College, Sheboygan. They live in Kenosha.

Laurie Olsen, '90, to Glen Slowinski. She is a salesperson at Furniture and Appliance Mart and he is employed at Beatreme Foods, Vesper. They live at 735 Highway 10 W, Stevens Point.

Laurie Laubenstein, '90, to Dennis Herzfeldt. She is a substitute teacher in the New London area and he is the owner of Herzfeldt Builders. They reside in New London.

Laura Wiss, '90, to John Wolosek. She teaches at UW-SP and he is owner of L.L.I. Co., Wisconsin Rapids.

Kurt Kraimer, '90, to Michele Prinz. He is a claims representative with the Social Security Administration in Minneapolis and she works as a secretary for Prudential Bach. They reside in Edina, Minn.

Kristin Drexler, '90, to Scott Bornbach. She is a kindergarten teacher at Edgar Elementary School and he works at H&S Manufacturing, Marshfield. They live in Stratford.

Kris Bodden, '90, to Jeff Zdroik. The couple lives in Milwaukee.

Kelly Woodward, '90, to **John P. Clark**, '90. She is a teacher in Waukesha and he is a client administration representative at Deluxe Data Systems, Glendale. Their address is 4528 Deer Run Drive, Apt. 104, Brown Deer.

Kari Effertz, '90, to Olivier Ribaud. They live in Paris, France, where she is a free-lance artist and he works in international finance.

Julie Van Bostel, '90, to **John Robinson**, '90. She is a seventh-grade teacher at Hortonville Middle School and he is with The Guardian Insurance Co. in Appleton, where they live.

Julie Erbes, '90 to Shawn Becker. She graduated with a degree in elementary education and he is a senior at UW-SP and he is employed by Haupt Investment Inc.

Jon Wendorf, '90, to Holly Jagler. He is training to be a certified cytotechnologist at the Marshfield Clinic. She works in the home health care area for Marshfield Living Center.

Jody Frahm, '90, to Brenda Seubert. He works in the frame shop at Mills Fleet Farm in Spring Green. They reside in Marshfield.

Jody Bartol, '90, to **Rob Henseler**, '91. She teaches fifth grade at Owen-Withee Public School. They live in Thorp.

Jeffrey Borman, '90 to Kristi Eaton. He is a salesman with ICI Pharmaceutical, Wausau, and she is a student at UW-Milwaukee. They live in Schofield.

Jeffrey Barth, '90, to Laura Zimmermann. He is a food activity assistant manager for Army and Air Force Exchange Service and she is a teacher's aide. They live in Cheyenne, Wyo.

Jeffrey Funnell, '90, to Cami Sprague. He is a property manager for The Sprague Co. and she is a

A bike trip past the University Center.

substitute teacher in the Madison school system. They make their home in Madison.

Jeff Seidensticker, '90, to Laura Beisbier. He is employed at Naturescape in Little Chute and she is a speech-language clinician at Chilton Elementary School. They live in Appleton.

Janna Hamilton, '90, to Bradley Thew. She is a teacher for De Soto Area Schools and he is a teacher at Sparta. They reside in La Crosse.

Jane Moriearty, '90, to **Shawn Fredrick**, '91. She works for Hal's in Park Plaza and he is employed by Econo-Print. They live in Oshkosh.

James Helman, '90, to Linda Sladek. He is employed by Mitchell Metals and she works at Thelma's clothing store. They live in Merrill.

Greg McGuire, '90, to **Julie Crupi**, '91. He works at Birchfield Nurseries and she is employed by Petersen Health Care. The couple lives in Rhinelander.

Francie Payette, '90, to Tom Laeyendecker. She is attending Southern California College of Optometry. They live in Fullerton, Calif.

Elizabeth Lange, master's '90, to **Timothy Gehring**, '90. She is a speech and language pathologist in the Green Bay Public School District and he is an environmental engineer at Waupaca Foundry. They live in Seymour.

Elizabeth Laehn, '90, to **Thomas Moris**, '91. She is a teacher and he is a biological technician for the U.S. Forest Service, Harrisville, Mich. They live in Lincoln, Mich.

Douglas Iwen, '90, to Pam Herdt. He works for ITT Financial Services, Wausau West Branch, and she is employed at Lincoln Wood Products in Merrill, where they live.

Donald Moehling, '90, to Connie Gaugert. He is employed as a sales merchandiser with Wisconsin Wet Goods. They reside at 328 N. High Ave., Jefferson.

Denise Wanta, '90, to **John Fournier**, '90. They reside in Denver, Colo.

Deborah A. Showalter, '90, to **Gordon W. Runnoe**, '90. She is a claims trainer at Employers Health Insurance, De Pere, and he is a process engineer at Midtec Paper Corp. in Little Chute, where they live.

David W. Johnson, '90, to Linda Labs. He is employed with Rand McNally Map and Atlas Co., Rohnert Park, Calif. Their address is 8270 Lancaster Drive, Cotati, Calif.

Daniel Grosskopf, '90, to **Heidi Tennant**, '91.

Connie Walloch, '90, to Brad Beilke. She is an accountant for Hoffers Inc.,

Wausau, and he is a physical therapist for Wausau Hospital Center and co-owner of Bralan's Gym. They live in Wausau.

Cindy Ironside, '90, to Scott Luedtke. She is a public accountant working in Madison and he is a student at UW-Whitewater. They live in Madison.

Christopher Roth, '90, to Brenda Saari. He is a process engineer at Consolidated Papers and she works in the accounting department at Sentry Insurance.

Carrie Lalk, '90, to **David Sowiak**, '90. She is program director of the Continental Health Club and he is a computer programmer for Continental Health Services. They live in Franklin Park, Ill.

Bryant Esch, '90, to **Carrie Hitchcock**, '91. He has been an environmental coordinator with Racine Plating Co. and she is a fisheries specialist with the Minnesota DNR in Lake City, Minn. They live in Minnesota.

Anne Weller, '90, to **Sal Cuomo**, '91. She is employed with First Financial Bank and he is with Metropolitan Life Insurance Co., Wausau. They live in Mosinee.

Hollie Welsh, '90, to Thomas Marshall. She teaches in the Delavan-Darien School District and he is employed by Sentry Foods. Their address is 3107 Peach Tree, Janesville.

Bonnie Prain, '90, to Ronald Patten. She is owner and manager of Inspirations Christian Resource Center and he is a manager in training at Domino's Pizza. They reside in Plover.

Susan Allen, '89, to Stephen Lenius. She is personnel manager with Del Monte Foods in Markesan, and he owns and operates a trucking firm. They live in Poynette.

Brandon Eisen, '89, to **Dorothy Rondeau**, '89. He is a staff hydrogeologist for Watkins Johnson Association Ground Water Consultants, Santa Ana, Calif., and she is with T.R.W. Space and Defense Center, Redondo Beach, Calif.

Elizabeth Miller, '89, to Andrew Gallun. She is a waitress at the Heidel House, Green Lake, and he is co-owner of Video Makers Inc., Ripon. Their address is 603 1/2 Liberty St., Ripon.

Darryl Waack, '89, to Deborah Wimmer. He works at the Wausau Country Club, and she is employed in radiology at the Wausau Hospital Center. They live in Schofield.

Therese Buerger, '89, to Lance Wasniewski. She holds a master's degree in forestry from Purdue University and he is employed with Trus Joist MacMillan, Deerwood, Minn. They live in Brainerd, Minn.

Janet Gelwicks, '89 to **Michael Nelson**, '91. She is a boy's wear merchandiser for Oshkosh B'Gosh and he is employed by Wisconsin Cycle Supply, Sheboygan. They live in Fond du Lac.

Scott Wildberg, '89, to Amy Frankki. He is self-employed as a cleaning contractor and owner of Central Janitorial & Paper Supply and she is a teller at Fidelity National Bank. They live in Medford.

Ann Hill, '89, to **Joseph Hameister**, '89. She is a teacher at Seymour Middle School and he teaches at Maplewood Middle School in Menasha. They live in Appleton.

Kerry Kovach, '89, to James Krueger. They live in Plover.

Michael Frieder, '88, to Sheila Kornely. He is a school psychologist for the Sevastopol School District, Sturgeon Bay, and she is a pharmacist at St. Vincent Hospital, Green Bay.

Mary Kremer, '88, to Rodger Beyer. She is a customer service representative at First Financial Bank and he is a sales manager at Worzalla Publishing. They live at 2516 Prais St., Stevens Point.

Tammy Lothe, '88, to David Molski. She is a commercial lines rater at Sentry Insurance and he works at Consolidated Papers. Their address is 2116 Dixon St., Stevens Point.

Steven Stremer, '88, to **Amalia Guldan**, '91. He is the manager of U-Haul, Oshkosh, and she is employed by the Oshkosh School District. They live in Oshkosh.

Jamy Joswiak, '88, to Marty Yohn. She is a physical therapist at St. Joseph's Hospital and he is an art teacher at Granton. They live in Marshfield.

Paul Welch, '88, to **Linda Kragh**, '89. They are teachers for the Oconto Unified School District.

Kathy Jo Ebert, '88, to Andrew Ackerman. She is employed as an interior design/visual diplayer for Stuarts Clothing in Indianapolis, Ind. They live in Greenwood, Indiana.

Tina Bakran, '88, to **Jamie Downing**, '88. She is a kindergarten teacher in Port Washington and he is an area director for the American Cancer Society in Milwaukee. They live in New Berlin.

Beth Haines, '88 to James Molski. She is the high school librarian in Johnson Creek and he is employed by Valda Plastering Co., Madison. They live in Watertown.

Kurt Krueger, '88, to Kelly Werner. He is a teacher and coach at Rhinelander High School and she is a nurse at Rhinelander Hospital and Hospice. They live in Rhinelander.

Obituaries of Graduates

Christopher Hunt, '88, to Jennifer Trapp. He is pursuing a master's degree in educational psychology and works for St. Aemillian's Lakeside. She is employed by Dames and Moore in Milwaukee, where they live.

John Hass, '88, to Eileen Zemke. He is a technical supervisor at Ward Paper and she is an associate audit reviewer with Wausau Insurance Companies. They live in Merrill.

Randy Smith, '88, to Connie Hess. He is a bridge inspector with Osmose Wood Preserving and she is a data specialist. They live in Madison.

Thomas Doughman, '88, to Lori A. Springer. He is employed at the Eau Claire Academy and she works at Luther Hospital. They live in Eau Claire.

Jacquelyn Ann Redmond, '88, to **Rick Dorshorst**, '88. She is the speech and language pathologist for Waukesha Public Schools and he is an audiologist for Ear, Nose and Throat Treatment Center, Brookfield. They live in Milwaukee.

Karen Knopp, '88, to James Conn. She is an accountant and he is an air technician. They live in Warrens.

Deborah L. Birkholz, '88, to John L. Harder. She is a state patrol dispatcher for Fond du Lac and he works at Piggly Wiggly, Plymouth. They live in Glenbeulah.

Cynthia Talbot, '88, to David G. Westenberg. She is a dietitian at Community Memorial Hospital, Oconto Falls, and he owns and operates a dairy farm. They live in Oconto.

Ruth Ellen Freiwald, '87, to Randall Fett. She is the activity coordinator at Western Village Nursing Home and he is a salesperson at Total Rental. Their address is 1341 Sunray Lane, Green Bay.

Mark Seaman, '87, to Jill De France. Both of them teach in the Merrill area public school system.

Jeanne Zastrow, '87, to David Baxtor. She is a clinical dietitian and he is an assistant manager at Office Depot. They live in Milwaukee.

David Matre, '87, to Christine Glass. He is a master's candidate at DePaul University who works for CCC Information Services, Chicago, as a budget manager. She is a CPA. They live in Chicago.

Susan Spahr, '87, to Michael Sowinski. She is a space planner/CAD specialist at G.D. Searle, Skokie, Ill., and he is a chemist at Nalco Chemical Co., Naperville, Ill., and a graduate student at Keller Graduate School of Management. They live in Hoffman Estates, Ill.

Neil Milkowski, '87, to Heidi Feil. He is employed with General Motors Acceptance Corp., Brookfield, and she is with Land Title Services, Wauwatosa. Their address is 13371 W. Fountain Drive, New Berlin.

Carl Varney, '86, to Linda Zeleski. He is a route salesman for TradeWinds Pizza and she is a deli manager with Copps Co. They live in Plover.

James Brikowski, '85, to Kay Johnson. He is a purchasing agent for Steel King Industries, Stevens Point, and she is employed by Sentry Insurance and

Mickey's Restaurant. They live in Stevens Point.

Richard A. Strasser, '88, died in May of cancer at age 29. He was an electronics technician and president of Thinc Electronics. His wife, Cheryl (Josiger), lives at 1511 N. Third Ave., Wausau.

Holly J. Hill, '88, died in her Plover home in July at age 38. A native of Sandwich, Ill., she moved to Stevens Point at age 7. She had lived and worked in Madison and moved back to Stevens Point where she worked at Sentry Insurance. Hill had been writing a diabetic cookbook at the time of her death. She is survived by her parents, Robert and Lois Hill, and one sister.

James Tischer, '72, Wisconsin Rapids, died in July at St. Joseph's Hospital, Marshfield. He was 41. He worked as a clerk for Consolidated Papers and Pacific International, served as organist and choir master at his church, and was a Cub Scout den leader. A member of Mensa and the Central Wisconsin Chamber Chorale, he is survived by his mother, one son and one daughter.

John M. Cherry, '68, died in Green Bay in July at age 50. Born in Louisville, Ky., he served with the U.S. Air Force for four years. He was married to Kathryn Woizeski, who survives. He was employed by UW-Green Bay as the bursar. Other survivors include his mother, Alice Cherry, and two daughters.

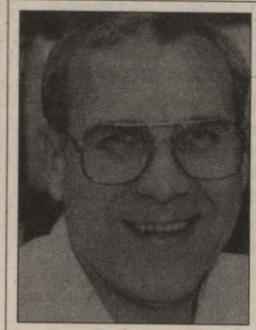

Joseph A. Obey, '59, died at the age of 62 at St. Joseph's Hospital in Marshfield. A Tomahawk native, Obey earned a master's degree and doctoral degree in education administration from UW-Madison. He married Nathalie Høglund in 1951 and served in the Navy during World War II. He is survived by his wife, who lives at 3790 Port Aurora Rd., Rhinelander, three sons and three daughters.

Alfred E. Wiegand, '58, of Appleton died in April at his home at age 60. A native of Port Edwards, he was married to **Janice Gruen**, '53, who survives. Other survivors are his mother, Ethel (Wellner) Wiegand, a son and a daughter. Most recently, he was employed as a mechanical engineer for Marathon Engineers/Architects/Planners, Menasha.

Jack H. Pickert, '57, died in May at his home in Washburn at the age of 61. A native of Berlin, he served in the Marine Corps during the Korean War and was awarded the Purple Heart. He worked for the Wisconsin Department of Natural Resources between 1960 and 1986, managing state lands in what is now Apostle Islands National Lakeshore and serving as superintendent of Big Bay State Park on Madeline Island. He is survived by his wife, Mary (Ortlieb), and two children.

Donald R. Page, '56, died in June at his residence in New Berlin at age 58. A native of Ashland, he was raised in Marengo. He began his education career as a biology teacher in Hartland and held administrative positions at several schools, including West Allis Central High and

Nathan Hale High in West Allis. He is survived by his wife, Roberta, two sons and one daughter.

Leroy A. Purchatzke, '55, died at St. Luke's Medical Center, Milwaukee, in July. He was 59. A native of Bloomfield, he lived in Manitowoc. After serving in the Army for two years, he earned a master's degree from UW-Madison and taught school in Marion and Wisconsin Rapids, where he served as chair of the science department for the public school system. He then taught at UW-Center Manitowoc County for many years. He also worked with the Environmental Protection Agency and the DNR, monitoring acid rain and hazardous waste for the Manitowoc area. He is survived by his wife, Marilyn (Ware), one son, four daughters, and one grandson.

Theodore "Ted" Salvin, '53, died in June at his home in Stevens Point at age 60. He was director of general ledger accounting for the Copps Corp. which he joined in 1955. He also served in the U.S. Army for two years. In 1960, he married Mary Anne Becker, who died in 1965. In 1970, he married Judith Howard. She survives. Other survivors include three sons, one daughter, and three grandchildren.

Arthur Engel, '52, died in March of 1992 at the Stoughton Hospital. He was 81. A Pulcifer native, he served in the Air Force during World War II. A school principal in Beloit for many years before his retirement, he held a master's degree from UW-Madison in education and administration. Engel is survived by his wife, Dorothy (Howell), two daughters and three grandchildren.

Edna K. (Knospe) Kraft, '52, died in May in Grand Island, Neb., at the age of 89. A native of Merrill, she was a rural school teacher in Lincoln County until 1944. While teaching she continued her education at UW-SP and the Library College of Madison. She married Harry Kraft in 1926. She began work at the T.B. Scott Library in Merrill in 1944 and retired as head librarian in 1970. Kraft helped organize Calf Clubs, which developed into today's 4-H Clubs. In 1986 she moved to Nebraska to live with her only daughter, Mary Luette Sundberg.

Dorothy (Floistad) Olson, '43, age 71, Iola, died unexpectedly in May. She taught in the Wausau School System in the elementary grades. She is survived by her husband, Olmer Olson, a daughter, two sons, and two grandchildren.

Marjorie (Loberg) Jose, '43, of Almond, died in July at age 69. The organist and choir director of St. John's Lutheran Church for 25

Fred Nimz, '39, of Fond du Lac, died in May at age 78. He excelled in basketball in his hometown of Wausau, at UW-SP and with a Navy team, as well as semi-professional teams plus the Baltimore Bullets. He also was involved in football, baseball and hockey. In 1970, Fred was one of the first

inductees into the UW-SP Athletic Hall of Fame. He and his wife, Hilda (Schael), were the owners and operators of Caramel Crisp Shop, Fond du Lac, for 40 years. Survivors include one stepson and three step grandchildren. His first wife, Ruth Youngwirth, preceded him in death.

years, she also was the keyboard player for the Central Wisconsin Symphony Orchestra. She played clarinet with the Grenadiers of Stevens Point and taught piano lessons for many years. Jose received the Chicago Tribune Award in Piano, had been a soloist with the University Symphony in Madison and was an accompanist for the Nina Girge Chorus in Minneapolis. During a Scandinavian tour, she played on many of the pipe organs in Norway. Survivors include her husband, the Rev. Roderick Jose, one son, three daughters, and three grandchildren.

Estella Bock Davis, '29, '41, died in May at a Crandon nursing home. She was 91. She was born in Three Lakes, raised and educated in Crandon. In 1946 she married Frank J. Davis who preceded her in death. She taught for 50 years in Wisconsin and Illinois schools, completing her career as a language arts instructor at Racine-Kenosha County Teachers College, Union Grove. When the campus closed in the early 1970s, she retired and moved to Crandon.

Magdalen A. "Babe" (Goggins) Vincent, '35, died in February in Oconto Falls at age 80. She and her husband, Irving Vincent, operated the Grand Theater in Oconto Falls. After his death in 1956, she continued to run the business alone until 1976. She served as deputy city clerk treasurer from 1958 to 1966, then Justice of the Peace until 1977. She is survived by three children, five grandchildren, and five great grandchildren.

Marguerite Groves, '35, of Tucson, Ariz., died in July at age 78. A native of South Dakota, she grew up in Price County. She began her teaching career in northern Wisconsin, then during World War II, she was an instructor of electronics for the U.S. Air Force. She served at Truax Field in Madison until joining the Red Cross. She was stationed with the Red Cross in India for 14 months and later in Berlin during the Soviet Blockade, until she was airlifted out. Upon her return to the U.S., she continued her tenure with the Campfire Girls and the Red Cross until 1958, at which time she returned to teaching. She earned a master's degree from UW-Madison in 1961, and continued to teach mathematics at Madison schools until her retirement in 1978. She moved to Tucson in 1985. She is survived by one brother, nieces and nephews.

Alice Weingartner, '34, died in February of 1992. She was a resident of Westlake Village, Calif.

Cletus Collins, '34, owner of an insurance agency, C.M. Collins & Associates, Glendale, Calif., died of cancer last spring.

Beatrice (Chvala) Mullin, '34, died in her Tomahawk home in July. She was 81. A

native of Medford, she taught elementary education in Tomahawk for 35 years, retiring in 1973. She married William Mullin in 1942, who preceded her in death. She is survived by one daughter and two grandchildren.

Marian Nolan, '28, died in May at her home in Manawa. She was 85. She was an elementary teacher, having taught at various schools in Waupaca County until moving to California in 1945. She continued teaching until her retirement in 1975 when she returned to Manawa. She is survived by three brothers and a sister.

Pearl Abraham, '26, died in July in Ironwood at age 89. She is a native of Rockland, Mich. and was raised in Ironwood, Mich. She taught in Ironwood, Eaton Rapids and Lansing between 1929 and 1963 when she retired. She is survived by two brothers and a sister.

Sadie Dahlstrand, '22, died in March of 1992 at age 94. She taught junior high school for 40 years in her hometown of Rhinelander. She retired in 1963, then moved to a retirement home in Whitewater in 1980. She is survived by nieces and nephews.

Eva (Sawyer) Detlor, '22, died in August at her home in Plainfield. She was 90 years old. Prior to her marriage to Glenn A. Detlor in 1926, she taught high school in Wautoma. He died in April of this year. A past president of the Waushara County Homemakers, Eva was a 4-H leader for many years. She and her husband were honored by the University of Wisconsin in 1962 for their work with 4-H and as leaders in agriculture. She is survived by one daughter, one son, 11 grandchildren and 11 great-grandchildren.

Sister Margaret Campbell, '21, died in March of 1992 at Victory Noll Health Care Center, Huntington, Ind., at age 89. Sister Margaret taught in rural schools of Central Wisconsin before joining the Congregation of Our Lady of Victory Missionary Sisters in 1926. She spent 38 years in religious education and social action in missions in New Mexico, Texas, California, Ohio, Colorado, Utah and Nevada. She also worked on the development of religion courses in the Confraternity of Christian Doctrine (CCD) national office in Washington, D.C. At the Amarillo Diocese Center in Lubbock, Texas, Sister Margaret served as associate director of religious education. Her last assignment was as archivist for her order at Victory Noll. She retired in 1986. Her survivors are three sisters.

Erma (Pratt) Smith, '18, died in April in Bethel, Maine, at age 93. She and her husband, Edward A. Smith, who died in 1965, lived in Oshkosh for 50 years. She worked in the office of a dry cleaning firm until her retirement at the age of 80. Survivors include one daughter, one son and four grandchildren.

News of Alumni

Whatever happened to good ol'...

1992

Mary Southworth, '92, of Stratford, has received the Skylight Opera Theatre Award for "unusual dramatic talent and vivid projection of text and music." She competed in the Metropolitan Opera district auditions in Milwaukee, at which she was cited and chosen to participate in a vocal master class led by renowned Metropolitan mezzo-soprano Mignon Dunn, who judged the auditions. At the competition, Southworth performed Adele's "Laughing Song" from Strauss's "Die Fledermaus" and Nanetta's aria from Verdi's "Falstaff." The soprano, who studies with William Lavonis of the UW-SP faculty, auditioned in January to attend the Cincinnati Conservatory.

He also is associated with Youth Enterprises, San Diego, and is an organist at Trinity Lutheran Church, San Diego. He lives at 791B Woodlawn Ave., Chula Vista, Calif.

Bette Ebel, '76, is an art teacher at Antigo Junior High School.

School named for Marion Bannach

Marion Bannach

Marion Bannach, superintendent of Portage County Schools from 1925 to 1941, once told a rural teacher who had been criticized for teaching sight reading rather than phonics, "Whatever works to help children learn, that's the right thing to do."

How fitting that Stevens Point's newest elementary school has been named after Bannach, an educator, who, during her 16-year tenure, supervised four rural high schools, seven "graded" schools, 118 one-room schools, three parochial schools and an orphanage.

A Custer area native who earned a teacher's diploma from UW-SP in 1913 and a bachelor's degree in education in 1934, she began her career as a supervising teacher in Portage County. She worked for her sister Frances Bannach (1906—teaching certificate, 1915—bachelor's degree), who served as superintendent from 1911-1917.

Marion's mission, when she became head of the rural district, was to provide "a warm and comfortable schoolroom for every boy and girl." Her 1925 school records show that she and her two supervising teachers made 559 visits that year to the schools, serving 154 teachers and 8,541 children.

Bannach joined forces with another Portage County pioneer, public health nurse Ruth Gilfrey, to introduce programs to improve health in the schools. During Bannach's administration, iodine pills were first distributed, and diphtheria immunizations were initiated.

One of her most popular innovations, for which she won statewide recognition, was the development of a music education curriculum. She organized a 300-voice countywide chorus, began programs to teach every child to read music and initiated harmonica or rhythm bands in every school.

Bannach's devotion to teaching young people appears to have been a family tradition—six of her siblings (Frances, Josephine, Otylia, Henry, Amel and Amelia) received teaching certificates and degrees from UW-SP between 1906 and 1934. The same dedication seems to have been perpetuated in succeeding generations of the Bannach family—four nieces have since graduated from UW-SP to become teachers and now a great-niece, Sarah Bannach, is an elementary education major at UW-SP. ■

Korene Olson, has been a first grade teacher at Argyle for 15 years. She lives in Monroe with her husband and two children.

William Manthey, '76, is a detective with Columbia County Sheriff's Dept. and his wife, **Linda (Lange) Manthey**, '74, is a substitute high school teacher for Portage Community Schools. They live with their two children at 526 W. Conant St., Portage.

Cleo Roberts, '55, retired last year in Lakeland after more than 30 years as a teacher of first-grade, kindergarten and Title I (now Chapter I) reading and mathematics. She and her husband spend time with their two sons now that they

Marion
Hougen
Brockman

Marion Hougen Brockman, '23, took time from her duties as publisher of the Valders Journal last Oct. 6 to celebrate

her 90th birthday. But she was at her desk for part of that day, checking over details and handling a bevy of jobs as the newspaper raced toward another weekly deadline. A native of Marathon City, she grew up there and in Wausau. She taught at Phelps before accepting a high school teaching post in Valders, which was the native community of her parents. She left teaching in 1929, when she and her husband, Fred, were married. In 1940, they founded the weekly newspaper. Some years earlier, Marion had founded the high school newspaper in Valders. A widow for the past 10 years, Marion has appointed her grandson, Brian Thompsen, as editor of the community weekly. But she still is involved in nearly every aspect of the operation, retaining the top position at the newspaper. She says she has been writing as a hobby for "many, many years."

At the request of the Pointer Alumnus editor, she recounted these memories of her student days in Stevens Point, beginning more than 70 years ago:

"When the time comes for seeking education beyond high school, it isn't always knowledge from books and college professors from which you gain much, but it is also the wide variety of friends you make when away at school. With that goes life in a dormitory. There it's variety plus!

"I roomed at Nelson Hall when I attended Stevens Point State Teachers College, and May Rowe was the manager of Nelson Hall at the time. Manage she did and her authority was truly law. (And her build quite matched her authority.) I shouldn't say that really, because it was only when she was exasperated with someone or something that you saw that side of her nature.

"It so happened one evening that the girls rooming across the hall in the dorm had gone shopping and came back with a huge watermelon. So a feast was in store for many of us on second floor.

"But there was nothing with which to cut this large watermelon!

"Then two brave souls volunteered to find a solution. They ventured down to the kitchen in the dark and soon came back with the necessary tool, a carving knife. Of course, this brought real exclamations of joy.

"This was 'after hours' and somehow Rowe's ears picked up the sound.

"The first cut of the huge melon had been made when there was a thunderous burst at the door and in stormed Miss Rowe. She grabbed the huge knife from the hands of the melon carver, and waving the knife at each one of us in the room, she gave her orders!

"Out she stomped with the long-bladed knife—and there was no juicy feast that night.

"I don't know what grading system is used now in practice teaching, but when I had my year of practice work, grades were given in a graph form. If a visit to your class from your supervisor came when grades were being given and she didn't approve of your teaching that day, your graph would really fall! And that then could be your final grade.

"That explains hard work at good lesson plans and attempts at good teaching.

"With all this, however, I loved teaching and every day was a pleasure. When I left teaching, there was a ruling by the school board, 'no married women.' How times have changed!

"In a math class I took from Professor James Delzell, his instruction for rapid addition of a column of figures has stayed with me for a lifetime. He said, 'Always think in terms of 10-3+7-2+8, etc.' And it truly works like a charm. You need no computer!

"Another fond memory is Professor Frank Spindler in a psychology class. He would step to the blackboard and write two sentences, one with each hand, at the same time and sentences of two different thoughts. Such a mind!"

"I still haven't achieved that goal."

are retired and she substitute teaches.

Gordon Dalton, '55, has been honored for 50 years of service as a Baptist minister. He retired from active ministry in 1976 but has continued preaching and traveling to destinations including China, Scandinavia and Russia. He and his wife live at 3141 N.E. 148th, Apt. 401, Portland, Ore.

Kenneth Kritz, '55, has retired as assistant superintendent of the Maryland School for the Deaf-Frederick campus after 31 years. He began teaching at the school in 1960 and has served as assistant superintendent since 1968. He has returned to his hometown of Mellen, and hopes to re-establish ties with his fellow Pointers, in addition to gardening and fishing. His address is Box 636, Mellen.

Mark Schommer, '54, a Reverend Monsignor, is the pastor of St. Rose Parish in Clintonville.

Willard M. Spaulding Jr., '53, is a retired U.S. Fish and Wildlife Service Great Lakes coordinator. His career in natural resource management spanned more than 35 years. His first job was with the Wisconsin Department of Natural Resources. He then worked for the Michigan Department of Natural Resources. His last 29 years was with the U.S. Fish and Wildlife Service. He made more than 23 major geographic moves across the country during his career, working as a special assistant to four secretaries of the interior. He had four formal details to the White House on priority national issues ranging from abatement of acid mine drainage to implementing the president's energy policy and national water policies, to the creation of the office of surface mining and reclamation. He received the Department of Interior Meritorious Service Award in 1981 and five other secretarial commendations. He received a master's degree from the University of Michigan in 1956. He and his wife live in Sacramento, Calif.

Dick Hall, '53, is retired from the Fox Valley Technical Institute, where he taught forestry and continues to teach a wildlife ecology course. He owns and manages the 160-acre Buckridge Tree Farms near Poynette and is a member and former president of the Wisconsin Woodland Owners Association. He also preserves and extends Aldo Leopold history through his writings and his building of the "Leopold Bench," a piece originally designed by Leopold and constructed with driftwood planks that floated down the Wisconsin River. Hall, who lives in Oshkosh, uses scrap oak from his one-man sawmill operation.

John Mallow, '53, is a retired supervisory cartographer. His wife, **Betty Mallow**, '55, is a teaching assistant for the St. Louis County Special School District. They reside at 1301 Laven Del Lane, Kirkwood, Mo.

Dennis Schrank, '54, and **Jean (Sarbacker) Schrank**, '53, live at W61 N383 Washington Ave., Cedarburg. He recently was invited to attend the 25th

year celebration of Mequon-Thiensville School District's Outdoor Education Camp for middle school students, a facility he developed and directed until he retired three years ago. She is a first-grade teacher in the Mequon-Thiensville School District.

George Nikolay, '52, was honored for his administrative work in the Cambridge School District by having a new middle school named after him. He was a teacher at Oxford and other districts before becoming administrator for the Spencer School District.

Colleen Schweitzer, '52, has retired after 22 years of teaching third grade in Valders. An Antigo native, she and her husband, Edwin, have lived in Valders since 1954. They have four children and four grandchildren.

Richard Lorenzen, '51, and his wife are both retired mathematics teachers. In January they traveled to the Holy Land and in March they went to Texas to play golf. They reside at 2827 Robin Circle, Hartford.

Harriet (Hennig) Korn, '50, is a retired primary teacher of 31 years for the Milwaukee Public Schools. She and her husband live at 618 Sydney Drive, Racine.

William Conway, '50, and **Gloria (Suckow) Conway**, '55, reside at 656 Greenview, Lake Forest, Ill. He is a substitute teacher for Lake Forest High School and she is a physics teacher at the same school. He received his masters and doctorate from Madison and is currently active with the Illinois Association of Physics Teachers and American Association of Physics Teachers. He also has worked with Fermi Laboratory's educational division for several years.

Janiece (Colvin) Hendrick, '50, retired in 1991 after 34 years of teaching in the Edgar-Tomahawk area. Her husband, **Donald Hendrick**, '51, is deceased. Her address is 228 E. Somo Ave., Tomahawk.

Lola (Van Ornum) Douglas, '50, and her husband, **Donald Douglas**, '52, live in Menominee, Mich. He retired from Marinette Public Schools as elementary supervisor and curriculum coordinator.

1940s

Leone (Hein) Weller, '49, is retired from 25 years of teaching in Stevens Point, Waukesha and San Diego, Calif. Her husband is a real estate appraiser and a retired naval officer. Three of their five children are graduates of UW-SP. The couple resides at 1516 Pine St., Stevens Point.

Warren Soeteber, '48, is a retired superintendent of schools from the Sheboygan Area School District. Military service kept him from graduating with his class in 1942. He and his wife are involved in volunteer work for church service clubs, environmental groups, mental health, and multicultural groups while also traveling and maintaining contacts with their family. They reside at

3110 Cherokee Drive, Sheboygan.

Mary (Hutchins) Lindow, '46, is a retired teacher from the Marshfield school district. She is active in several community organizations.

Elizabeth (Hannon) Malm, '41, and her husband live at 1227 E. Broadway, Waukesha. Both of their mothers as well as her brother and their two sons graduated from UW-SP.

Mary Anne Lochner, '41, retired 10 years ago from J.I. Case High School where she taught and chaired the social science department from 1966 to 1982. A Fulbright summer scholar in Italy, Japan, and Poland, she holds a master's degree in history from UW-Madison and frequently writes articles for professional journals and periodicals. She recently was inducted into the Southeastern Wisconsin Educators Hall of Fame.

George Dearborn Spindler, '40, is a professor of anthropology and education at Stanford University. In 1991 he published a book with his wife, Louise, a lecturer at Stanford, called "The American Cultural Dialogue (Falmer Press). He says, "I wish I were 20 again." They live in Calistoga, Calif.

1930s

Joyce (Sullivan) Benson, '39, and her husband, **Norman Benson**, '40, are retired and living in Ripon.

Lois (Peden) Soderberg, '39, has retired after more than 38 years of teaching. Her son as well as her granddaughter have graduated from UW-SP. She lives at 724 Roy Ave., Green Bay.

Jean (Redemann) Zimmer, '38, and her husband are both retired. They have two children and two grandchildren. They reside at 814 W. Fourth Street, Marshfield.

Joanna (Walker) Hotvedt, '38, retired from the retail lumber business in 1977. Her husband is president of the board and CEO of the Retail Lumbermans Insurance Company.

Gartrude Halford, '38, who resides at 6710 Elmwood Ave., Apt. 202, is retired.

Kathryn (Becker) Saucerman, '38, and her husband are both retired at 416 Riverside Ave., Newport Beach, Calif. She used to work as a librarian for Newport-Mesa Unified School District and now volunteers one day a week at Hoag Hospital Medical Library. She says, "Once a librarian, always a librarian."

Lawrence Zalewski, '35, is a retired elementary school teacher. He and his wife live at 151 E. Grand Ave., Rosholt. They have four children, three of whom graduated from UW-SP.

Arthur Kussman, '34, retired as a health educator from the Montana Health Department in 1975. He taught band and academics at Alma Center and Pulaski High School for eight years following his graduation. He recently attended the 50 year reunion of Pulaski High School's class of 1941. He

Kenneth B. Willett, '21, who continues to be active in business and community affairs in Stevens Point at age 91, was honored last year by the American Suzuki Talent Education Center at UW-SP for which he has served as a board member many years. The center's founder, Margery Aber, joined students in paying tribute to him.

Edith Sanson McCall, '30, a winner of the UW-SP Distinguished Alumnus Award, continues to live in Hollister, Mo. She is the author of more than 70 books, many on historical themes, and has informed the alumni editor that she "is still going along in good health with ongoing plans and projects." Among her works are approximately 20 books for the "Frontiers of the Americas Series." She received the 1984 Missouri Writers' Guild Book Award for "Conquering the Rivers: Henry Miller Shreve and the Navigation of America's Inland Waterways."

In her letter, she expressed support for plans to save and renovate Nelson Hall, adding: "To this day, whenever I hear the old hymn that begins, 'Praise God from whom all blessings flow, I'm back in the dining room downstairs in Nelson Hall, standing at my place at one of the square tables for eight students, singing the hymn before we sat down to the traditional stewed chicken dinner—with good gravy and mashed potatoes and hot biscuits, plus less-remembered items on the menu."

"I earned my board that year as a 'dining room girl,' setting tables and getting the dirty dishes to Dick Marshall (football player) who earned his way operating the big, old dishwashing machine in Nelson Hall kitchen. May Rowe, the matron, charged with keeping girls and the building in order, ran a tight ship." ■

served as a medic for the U.S. Army in World War II. He and his wife reside at 409 S. Montana, Helena, Mont.

Helene (Waterman) Okray, '34, retired in 1989 as a substitute teacher for the Monona Grove School System.

C. Joseph Nuesse, '34, is the author of a recently published book called, "The Catholic University of America, A Centennial History." Nuesse is professor emeritus of sociology and provost emeritus of the Catholic University of America and one of the first recipients of the UW-SP Distinguished Alumni Award. He resides in Annapolis, Md.

Henry George Klimowicz, '33, lives with his son at 4328 Raymir Place, Wauwatosa. He retired in 1976 from UW-Milwaukee where he worked as a purchasing agent. His wife, **Catherine (Hammill)**, '32, died in 1988.

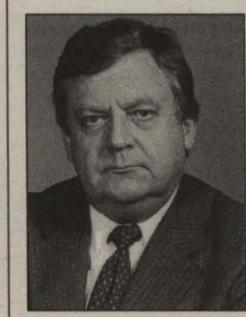

Alvin Buege, '32, spent 40 years in education as a teacher, principal and coach. He served for three and a half years as an officer in the Navy. He and his wife live at 860 Stollens, Algoma.

1920s

Lila Neuhaus, '27, is a retired home economics teacher. She and her husband reside at 1220 Rosewood Trail, Onalaska.

Marian Gerbenskey, '23, and her family celebrated her 90th birthday with an open house in Hartland, which is where she went to teach 65 years ago. She has resided in the Hartland area ever since. In 1927 she married George Gerbenskey, who died in 1976. She has six children, 17 grandchildren, 20 great-grandchildren and 1 great-great-grandchild.

Nation's top diplomat

Lawrence Eagleburger

Lawrence Eagleburger, a UW-SP alumnus who held one of the most influential and highest appointed positions in the federal government, has been taking life a little easier since the change of administrations in Washington, D. C. in January.

Throughout the fall and early winter, he served President Bush as

U.S. Secretary of State. For three and one-half years earlier, he had been the U.S. Deputy Secretary of State.

In late January, he joined the law firm of former U.S. Sen. Howard Baker in its Washington office as a consultant on international affairs. He will continue living on a farm near Charlottesville, Va.

Eagleburger, who holds a Distinguished Alumnus Award from UW-SP, attended the school in the late 1940s and early 1950s and completed his bachelor's and master's degrees at UW-Madison. He entered the Foreign Service in 1957 and retired from the Department of State in 1984. With several assignments through the years in Yugoslavia, including the U.S. Ambassador to that country, he became particularly expert on the political situation there. In the time between leaving government service and returning five years later, Eagleburger served on the boards of ITT Corporation, Josephson International and Mutual Life Insurance Company of New York. He also was president of Kissinger Associates, Inc., a firm founded by Dr. Henry Kissinger in April 1982 to offer strategic consulting services to international companies.

Eagleburger is married to the former Marlene Ann Heinemann. All of his three sons have the first name of Lawrence, but use their second names.

His late father was a physician in Stevens Point, when the future diplomat was growing up, and his mother, Helen, was an elementary school teacher. During his high school days, the family lived in a home on Clark Street in Stevens Point, across from Emerson School. ■

Calendar of Events '93

June 11/12, Reunion Day 1993

All alumni (through 1946) invited, including a salute to the C.S.T.C. class of 1943

Come on Home!

By Alumni Director Karen Engelhard

We're nearly 100 years old and ready to begin the celebration - with you.

Karen Engelhard

The 100th anniversary of the University of Wisconsin - Stevens Point is September 17, 1994. Many special events are being planned for the year-long Centennial celebration. But we have reason to celebrate **this year!** On July 21, 1893, a telegram arrived from Madison, sent by Stevens Point businessman and community booster, G.E. McDill. It read:

"To the boys at Stevens Point—we have won, the world is ours. Stevens Point wins on the 101st ballot."

The Board of Regents had awarded the sixth State Normal School to Stevens Point.

To commemorate the "birth" of our university, the city has begun planning for a special celebration to re-create the day Stevens Point received the news of the Board of Regents' decision.

Wednesday, July 21, 1993

- 6:00 PM** Wisconsin Central Limited Depot, 1625 Depot Street
A theatrical production of the telegraph office receiving word from Madison proclaiming "The World Is Ours."
- 6:15 PM** Procession from the WCL Depot to the Public Square
Bands, costumes, and horse-drawn carriages depicting the excitement generated by the announcement.
- 6:45 PM** Celebration on the Square
Re-create the celebration held for Judge Byron B. Park in the heart of the city, including a number of public addresses.
- 7:00 PM** City Band Performance, Public Square Main Stage
A concert entitled "Headlines in History."

Choral Group/Dance Performance, Third Court Stage
- 8:30 PM** Variety Band Concert, Public Square Main Stage
Music until 10:30 PM

Jazz (or specialty) Band Concert, Third Court Stage
Music until 10:00 PM

It will be an evening to remember...the beginning of our Centennial celebration. The UW-Stevens Point Alumni Association would like to welcome you home on July 21.

Speaking of coming home, another exciting event on the Alumni Association calendar is **Homecoming 1993 on Saturday, October 9.**

Plan to join us for the Homecoming parade, Homecoming football game against UW-Eau Claire, Fifth Quarter social, All Alumni Dinner/Athletic Hall of Fame Induction and many reunion activities throughout the day for alumni of Greek organizations, College of Natural Resources, residence hall groups, and international programs. Six outstanding former Pointer athletes will be inducted into the Athletic Hall of Fame:

- Stephen Brilowski, class of '83**
•track & cross country
- Dee Christofferson, class of '85**
•softball
- Robert Dehlinger, class of '53**
•football (posthumous induction)
- Kimberly Swanson Kaster, class of '84**
•swimming
- Bruce Lammers, class of '82**
•track
- John Mack, class of '83**
•basketball

Join us for Homecoming '93
Come on Home.
