

Anti-nuclear groups show signs of power

by Albert Stanek
Sign Down; Tempers Up in
Stevens Point

Anti-nuclear Sign Brings
Controversy

Those were the headlines early last week when a banner opposing nuclear power was taken down from a location near the fire station on Division Street.

The story received statewide coverage.

Here's what happened.

On Friday (April 5) city crews hung the banner from two poles owned by the Wisconsin Telephone Com-

pany. The sign is owned by the League Against Nuclear Dangers (LAND), the UWSP Environmental Council and Project Information. All three are local groups opposing the construction of a nuclear power plant in Rudolph 15 miles west of Stevens Point. The groups received permission earlier that week from city officials to display the sign for five days.

Saturday morning (April 6) city crews removed the sign from the Division Street location. It was the phone

company that asked that the banner be taken down according to Stevens Point Mayor Paul Borham.

Borham pointed out that he had received a call from Lloyd Berner, local manager of Wisconsin Public Service, minutes before the telephone company called to request that the sign be taken down.

Wisconsin Public Service is one of the utilities planning to build a nuclear power plant in Rudolph.

According to the mayor, Berner said that "he didn't like it" but didn't ask that it

be taken down.

It was not long after Berner's call to the mayor's office that the telephone company called to complain about the sign.

Mayor Borham said only that the "telephone company" called.

Telephone company manager Frank Birrenkott denied that he personally contacted the mayor. He didn't know who it was in his company that called the mayor's office.

We asked around and the only person that thought he

knew who did the calling for the telephone company was Lloyd Berner, public service manager. "I think that was Bill Schaefer, the plant supervisor," he said.

Schaefer is on vacation and is not available for comment.

On Monday (April 8) the story was given to the Associated Press. It was carried on radio and newspapers throughout the state.

On Tuesday (April 9) Jeff Littlejohn of the Environmental Council, John Stueck of Project Information and Gertrude Dixon of LAND met with Mayor Borham.

With the support of the city attorney they asserted that if this banner is not permitted then other banners shouldn't be allowed either.

On Wednesday morning (April 10) the mayor arranged a meeting with Berner and Birrenkott. Littlejohn, Dixon, a representative of the Chamber of Commerce and four members of the press were there.

Berner and Birrenkott maintained that the utilities have the right to decide what, if any, signs will be hung from their poles. Birrenkott stated that the telephone company didn't want to discriminate or act as a censor.

Apparently the company policy is to not allow signs on any of their poles. He pointed out that only two groups have asked permission to hang signs in the past and that he refused both times.

Evidently the city has never asked for permission. They have strung banners for various local groups from the Division Street poles in question.

The meeting ended with a request for definite utility guidelines for the future.

The city authorized the environmental groups to re-hang the banner from trees on city property. The location was to be mutually agreed upon by Littlejohn and Richard Morton, City Supervisor of building construction.

This time Mayor Borham asked the groups to have the sign re-hung at their own expense because "it's costly for us to put signs up."

On Wednesday afternoon (April 10) the banner was up again.

The new location is within two blocks of the Wisconsin Public Service business office.

by Albert Stanek

Nominations open

Student Government will hold elections for the offices of president and vice-president on April 29, registration day. Persons interested in running for office are urged to contact the Student Government Office, 2nd floor, U.C.

Candidates must be UWSP students with a minimum overall grade point average of 2.0. Candidates may be on probation of any kind.

Nominations for office shall be done through petitions of no fewer than 50 student signatures.

Petitions may be picked up anytime after Wednesday, April 18, 1974 at the Student Government Office, Student Activities Office, University Center Information Desk and Student Managers' Office in Allen and DeBot Center.

Write-in candidates must give written notice at the Student Government Office of their intention to conduct write-in campaign no later than the opening hour of the polls. Write-in candidates will be subject to all elections rules with the exception of the petition requirement.

Campaigning must follow the regulations and restrictions of the campus and its respective buildings.

It is the duty of the candidate to be aware of the regulations and restrictions.

No campaigning is allowed within 20 feet of the polls except for posters.

Candidates who wish to have a statement, ad or a picture run in the campus newspaper should contact the Pointer Office, 346-2249 for the necessary information.

Nelson talks on shortages

by Terry Witt
Senator Gaylord Nelson warned in a visit here last week that the U.S. is in poor position to cope with developing world food and material shortages.

"For years a handful of resource experts warned this was coming but the trouble is that only resource experts read what resource experts write," said the Wisconsin Democrat.

"Our fundamental problem is that the federal government does not have the ability to measure the depth of world resources and the demands on them or to forecast the short and long term consequences affecting those resources.

"We desperately need a mechanism that will permit us to do this and we need it quickly," he said in a talk at the dedication of the new Natural Resources Building.

"The most dramatic evidence of the critical need for a monitoring and forecasting system is the energy crisis," said Nelson.

"What we needed was a sophisticated and trusted system that would have recognized the danger signals—like the startling rise in gas consumption, the lack of refinery construction in the U.S., the political deterioration in the Middle East, and the failure to seek alternative sources of energy.

"We did not have such a system and drifted into the energy crisis," said the senator.

Nelson said that recently he had authored a bill to create such a monitoring mechanism. He proposed a Natural Resource Information System.

"It is an elementary step we must take to fill an astounding information void caused by our perpetually

optimistic belief that Mother Nature will never run out of resources that mankind needs. Now we know differently," he said.

Nelson lauded UWSP as an institution with a reputation in the environmental field for developing individuals concerned with the preservation of the earth's finite resources.

"It is up to students who study at this university to provide the type of leadership that will act in a rational way toward the environment, if we are to husband what is left of the earth's resources," Nelson said.

Chancellor Lee Dreyfus officially dedicated the new building later at ceremonies attended by Mayor Paul Borham, former UWSP Chancellor William Hanson and other dignitaries.

Computer computes campus commuters

Because of high prices and possible shortages of gasoline, UWSP will cater to its commuters who are enrolled in the 67th annual summer session from June 10 to Aug. 3.

A computerized carpooling service will be available free to students and university personnel beginning on the first day of classes. The business affairs division will have representatives in the lobby of the University Center to assist persons interested in becoming matched up with others who are driving in to campus from the same outlying area.

Moreover, Summer Session Director Winthrop Difford reports that arrangements have been made to have some classes concentrated into either the first four weeks or the last four weeks of the special study period.

However, accommodations will be available in residence halls for students interested in staying on campus. Cafeteria meals will be available, too.

Nearly every academic department will be offering courses, some of which are relatively new or rather unusual such as astronomy, religious studies, field work

in sociology investigating needs of Wisconsin's American Indians and an archeological dig.

Emphasis is also being placed on workshops lasting for varying time periods and focusing largely on academic needs of veteran teachers in Wisconsin's public schools.

New in 1974 is an advanced registration period for anyone interested in enrolling in the session. The sign-up will be from 8 a.m. to 4:30 p.m. on Friday, April 19, and 9 a.m. to 1 p.m. on Saturday, April 20, in the Banquet Room of the University Center.

"The Student Affairs Committee of the Faculty Senate endorsed the 'concept' of the student evaluations of instructors and recommended that instructors allow class time for the evaluations," Tice said.

The evaluation will be run in the Math Department one week before the university-wide evaluation as a "dry run of the whole operation," said Tice.

Bylaws changed

The Academic Affairs Committee has voted a change in the amendments to the bylaws regarding the Grade Review Sub-Committee.

Presently, a copy of the student's grievance has not been given to the instructor.

The change provides that a copy of the student's grievance will be sent to the

instructor involved which will in turn solicit a written statement from the instructor.

Students with grievances pending before the sub-committee will be informed of this change and given the option of withdrawing their grievance or having a copy forwarded to the instructor.

The Pointer is a second class publication, published weekly during the school year. It is published under the authority granted to the Board of Regents of State Universities by section 37.11, Wisconsin Statutes. Publication costs are paid by the State of Wisconsin under contracts awarded by the State Printing Section, state department of administration, as provided in State Operational Bulletin P-24 of Aug. 16, 1973. The Pointer offices are located on the second floor of the University Center, UW Stevens Point, Wis., 54481. Phone 346-2249. All material submitted for publication must be submitted to the Pointer office by the Friday noon prior to publication.

Government called "best"

Editor's note: The Pointer usually uses original material written by its staff members but since Madison's Daily Cardinal used one of our graphics several weeks ago, we decided to take some of their material. The following is part of a Cardinal story surveying student governments at the state universities.

UW-Stevens Point is a campus of 7,500 located in north-central Wisconsin that is known for its environmental studies, such as forestry. And along with River Falls, UW-Stevens Point may have the best student government in the UW system.

In the last major student senate elections, 12 per cent of the students voted, but in the last student government officer's election, 35 per cent voted, a percentage not equaled by any other campus in the UW System.

ACCORDING TO PRESIDENT JIM HAMILTON, the student government at Stevens Point has de facto control over all student allocations, a budget

amounting to about \$400,000. And once merger goes through, they will probably control the allocation of \$3 million in student fees.

The student government allocates the fees for almost everything, including, as at River Falls, the entire athletic program.

Nancy Moore named new chairperson

Nancy Moore has been appointed the new English Department chairperson. She will assume the post in August.

Ms. Moore will succeed Leon Lewis who declined another term after heading the department for about six years. The chairperson's term runs for three years.

The English Department, one of the largest on campus, consists of about 35 teaching faculty.

The student government has also set up many student services and they are trying to establish a University government, half student and half faculty.

Hamilton said their student government has a good relationship with UW-Stevens Point Chancellor Lee Dreyfus. "I have to give him credit for allowing students to handle the student life support areas, such as allocatable funds. He hasn't opposed any allocations so far," Hamilton stated.

"Our main problem is getting word out to the students on what we are doing and what we should be doing," he added.

From the turnout in the last officers election, the students at Stevens Point are beginning to get the message.

EDITOR'S NOTE: The next issue of the POINTER will be April 25. All material submitted for publication must be submitted to the POINTER office by Friday noon, April 19. Remaining issues of the POINTER will be printed April 25 and May 2.

Newman pastor leaving

Father William Jablonske, one of the Newman Center pastors, has announced that he will be leaving Newman at the end of April.

Jablonske will be joining the Center for Human Development at St. Mary's College in Winona, Minnesota. He will become the co-ordinator for Program Development which is aimed at spiritual renewal and continuing education of the clergy.

Jablonske has been associated with the initial concepts and structuring several aspects of the program since 1968. He has spent his summers working in this program while here in Stevens Point.

Jablonske had previously been approached several times to work full time on the program but had declined.

ESP pioneer to speak tonight

by Dave Gneiser

J.B. Rhine, long-time leader in the field of parapsychology, will speak on "ESP: Its Reality and Meaning." The lecture will start at 7:30 p.m. April 18 in the Program-Banquet Room, University Center.

Rhine began the studies that led to the development of parapsychology as an area of research. His first book in 1934 introduced the term "extrasensory perception," based on six years of research at Duke University.

Parapsychology involves the study of such areas as ESP (telepathy, clairvoyance, precognition and retrocognition) and psychokinesis (mind over matter).

In 1937 Rhine launched the *Journal of Parapsychology* the leading scientific periodical in that field today. He headed the Institute for Parapsychology at Duke until his retirement. At age 79,

Rhine still gives an occasional lecture and is actively engaged in writing.

Rhine is the author of a long list of books. A popular account of the ESP experiments, entitled *New Frontiers of the Mind*, was Book of the Month in 1937. *The Reach of the Mind*, a book for the general public, was published in 1947 and *New World of the Mind* appeared in 1953. Rhine co-authored a textbook in 1957 entitled

Parapsychology: Frontier Science of the Mind. He has also edited several books including one on psychokinesis authored by his wife, Louisa E. Rhine.

Rhine's lecture is being jointly sponsored by Chancellor Dreyfus, the Dean of Letters and Sciences and the Psychology Department. The speech is open to the public and no admission fee will be charged.

Student raped behind YMCA

A 20-year-old UWSP student was raped on the evening of April 10 in the field behind the YMCA.

Stevens Point police described the attacker as about five-feet-five inches tall and of slender build.

Police have asked anyone who saw a man matching that description in that neighborhood Wednesday evening to contact them.

Police said the woman was walking east in the 1800 block of Briggs Street about 11:05 p.m. when the man came up

behind her, grabbed her and demanded money.

Police reported the man then forced her to go with him to the field behind the YMCA where the attack took place. The student also told police the man tried to strangle her several times during the attack.

The man left the scene walking west toward Prentice Street and headed south.

The victim then ran to a neighbor's home where she called the police.

Students get the blahs

by Roberta Pearson

Sick of school? Feeling apathetic or depressed? You're not alone. You've got lots of company, including fellow students, teachers and administrators.

Reasons for the blahs vary, say experts, but whatever the reason, everybody experiences them from time-to-time.

Dennis Elsenrath, director of the counseling center, said apathy and depression most frequently hit freshmen and sophomores who have not yet established their direction in life. National instability at present is a contributing factor that adds to normal student pressures, making some students feel insecure about their future, he said.

Apathy, a less severe form of depression, is an experience almost everybody has had at one time or another. It is a way of coping with fear of deprivation, humiliation or failure," said Elsenrath.

According to Elsenrath, it's possible to become overly concerned with apathetic feelings. It can keep students from being too competitive or aggressive. Few people can go all the time. For most of us though, apathy indicates we need to be more active. Physical activity is important for mental health and winter is the time of year when most students have the least amount of physical activity. There appears to be a correlation between your body getting little exercise and your mind feeling dull and lifeless.

Elsenrath said that students should offer understanding to one another. We don't need sympathy as much as we just need to be understood. Students who are "down" are most often met with sarcasm or ridicule.

What we need, he said, is someone to say "I know what you mean."

Claudia Quick, dorm director of Thomson Hall, said feeling low or apathetic seems to correlate with a time of year when it's not as nice outside. She believes several types of students can become affected.

People who ask why they are here make up one such group, she said. Most frequently they're freshmen and sophomores who are lost without a specific goal. Others may be unhappy with themselves. Some students are overly critical of themselves and strive to be like somebody else instead of accepting themselves as they are. Then there are those who don't work well under pressure. They need to learn that about themselves and spread their work out over a whole semester.

"Each student has the opportunity to be almost anything he or she wants," said Ms. Quick. "Those that are depressed or apathetic can put into action the ideas to change their situation, or find someone who will help them jump out of it."

"Believe it or not, we get depressed this time of year, too," said Tom McCaig, dean of the school of education. "Don't be afraid to talk to a teacher about it. We know what it is."

McCaig listed involvement such as exercise, seeking friends and interesting activities as a cure for apathy. Depression can be helped by the same methods and by finding a friend, a teacher, or counselor to confide in. Students should think positively for a future they can change and have the potential to change, McCaig added.

Donald Johnson, director of the health center, said there is a need to "make it respectable to say I feel rotten. Everybody knows how to administer first aid when somebody gets a physical injury, but we don't know what to do for each other's mental aches and pains."

Johnson said he believes all illnesses are a combination of both mind and body. When we have somebody come in with a sore throat we should be looking at both sources. Stress, he said, causes people to get germs by lowering their resistance. According to Johnson, over half the clinic's patients are victims of stress.

Feeling low is sometimes necessary, he said. We all have periods of sorrow in our lives, sometimes after the separation or loss of a loved one. It's best to allow yourself to feel grief at such a time, so you can get it out of your system.

Johnson said he believes everybody should create a mental first aid kit and use it during those times when you feel rotten. Students should each be aware of what they would put into such a kit and not hesitate to use it when needed. Instructions for a kit should be, "Stop whatever you're doing and proceed with one of these; take a walk, watch a sunset or read a favorite poem or I'm O.K., You're O.K."

The students counseling center, Pacisci, University Christian Movement, residence hall staff, dorm directors and professors exist to serve student needs. They are just a few of the resources available to students who wish help to resolve problems.

It's impossible to keep "the blahs" if you do something about it.

Specialist holding music workshop

The Department of Music and the student chapter of Music Educators' National Conference (MENC) have arranged to have a series of lecture-demonstrations focusing on music for children with exceptional needs.

These sessions will take place at 4 and 7:30 p.m. on Monday, April 29, in room C-121 in the Fine Arts Center.

Directing the sessions will be Jean B. Johnson, music specialist and director of the music laboratory at the Weisberg Center-Peter Cooper School in Superior, Wisconsin. At the center, Mrs. Johnson works with children who have a wide range of disabilities and handicaps.

In her 4 p.m. session she would like to present and demonstrate certain ideas from her curriculum. She has expressed a willingness to work with students in actual laboratory situations.

The session will involve working with deaf children, those with learning disabilities, blind and educable mentally retarded students.

A lecture-demonstration geared primarily to music teachers and future music teachers will be presented at 7:30 p.m. The discussion will center around "Music for Exceptional Children" or "What are you going to do about Chapter 89?"

Both series are open to all interested university students and faculty free of charge.

UFO's are real: Friedman

by Terry Witt

Fifteen years of scientific research have convinced nuclear physicist Stanton T. Friedman that the earth has been visited by spacecrafts from other solar systems. "Unidentified flying objects (UFO's) or flying saucers are very real," said Friedman.

"The evidence gathered from competent, trustworthy eyewitnesses is overwhelming. Our problem now is to eliminate the 'laughing curtain' (the fear of ridicule) which prevents observers from reporting their experiences."

A show of hands during

Friedman's presentation revealed that at least 25 of the approximately 300 people gathered in Allen Center thought they had observed an unidentified flying object. Of those 25 persons, no one had reported their sighting to the authorities.

Earth Excursion Modules (EEM's)

Friedman prefers to call flying saucers Earth Excursion Modules (EEM's) after their counterpart, the Apollo Lunar Excursion Module (LEM), since he believes EEM's are also intelligently controlled.

"People constantly ask me why flying saucers act the way they do, landing in swamps or behind girls' dormitories like some sort of extraterrestrial peeping Tom, when they could be landing in downtown Paris," said Friedman.

"I tell them that our own Apollo moon flights bear remarkable similarities in most respects to UFO's."

"In both cases we have strange shaped craft (compared to airplanes, balloons or helicopters) able to land in unprepared, out-of-the-way places with no assistance from people at landing sites."

"In both cases the pilots looked wierd by normal standards, though they all appear to be humanoid."

"In each case, the pilots have been observed by reliable witnesses to seek out artifacts, and to apparently gambol about aimlessly in what appears to be childlike fashion."

"The duration of the stay in both cases is limited and the craft leaves marks in the soil. Finally the craft rendezvous with a mothership, apparently to speed off to another planetary body."

What these vehicles look like
"Usually they are metallic and disc shaped. They vary in size from a few feet in diameter to several hundred feet usually with protruding antennas. A few crafts are cigar shaped or v-shaped, apparently mother ships," Friedman explained.

Friedman categorized sightings as those objects observed by competent or incompetent persons who saw the objects either in the air or on the ground and can't be explained by experts, sightings for which there is not enough information for experts to draw any conclusions, and sightings by competent observers of objects in the sky or on the ground which cannot be explained by competent analysts after careful examination.

The third category, sometimes called "unknowns" or those with "insufficient information" by the Air Force, are the smallest group but the most important according to Friedman.

Friedman recalled the 13 Project Blue Book Studies on UFO's completed around 1955

and classified as "secret" by the Air Force.

"The Air Force concluded that flying saucers did not exist because the number of unexplained UFO's was only three per cent of the total sightings," said Friedman. "That is patently absurd!"

"The actual figure is 19.7 per cent according to the Air Force study, Project Blue Book 14."

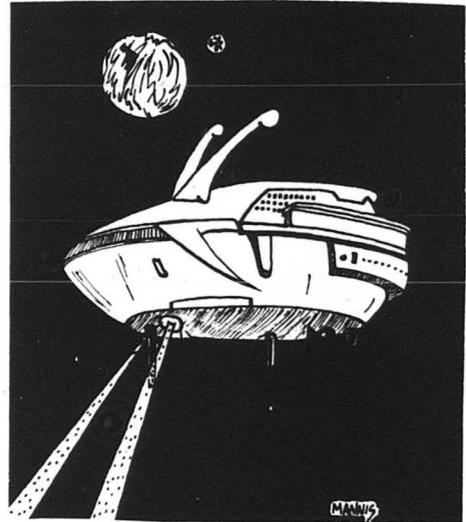

"In the report 'Unknowns' were defined as those reports of sightings where the description of the object and its maneuvers could not be fitted to the pattern of any known object or phenomenon."

"These are excellent sightings that had to be labeled 'unknown' and the

Fission Propulsion

"Published studies such as those by Spencer and Jaffe of the Jet Propulsion Laboratory at the California Institute of Technology, clearly show that staged fusion or fission propulsion systems would be capable of providing trips to nearby stars in round trips of less than 50 years. We forget there is very little resistance once free of the atmosphere."

"At even a nominal acceleration of only one-G, one can reach extremely high speeds: 100,000 MPH in one hour and 1.8 million MPH after a day. There is no friction in space and fuel for fusion systems is the most readily available in the

ones that I am concerned with," said Friedman. "The 19.7 per cent that was somehow overlooked."

"Why is there a mysterious reluctance on the part of the scientific community and public officials to admit the existence of UFO's?" asked Friedman.

"I find there are four basic reasons. One is the general ignorance of scientific data that is now available. Second is the 'laughter curtain' or fear of being labeled a nut. Third is the scientific ego which is unwilling to admit that perhaps a civilization exists with superior technology. Fourth, professionals are unwilling to utilize current technology to study UFO's."

How UFO's get here

One of the most common myths is that travel between earth and other solar systems is impossible. Thus, if we are being visited, they must be from either another planet in our solar system or from a fourth dimension 'parallel universe' or from a secret civilization in the center of the earth, under the ocean or buried under the poles. I don't deny the possibility of a 'parallel universe' or secret bases but I see no need to invoke them because travel to the stars is feasible with our present knowledge," said Friedman.

universe; namely hydrogen isotopes," explained Friedman.

Star exploration unlimited

"Everyone interprets Einstein's theory of relativity as a restriction on interstellar travel because nothing can travel faster than the speed of light. That is a false interpretation," said Friedman. "When mass, a space ship for example, approaches the speed of light, time, in effect slows down for the mass (the space ship) though not necessarily for the observer. The theory has been proven in accelerators used for physics research."

Friedman pointed out that our civilization has only recently developed the technology to travel 1,000 times faster than 100 years ago.

"There are five billion stars older than our sun, each with several planets," said Friedman. "If just one planet in those billions of stars began their technological revolution just 1,000 years before mankind, one can imagine how advanced they would be."

It shouldn't be difficult to believe that another race, perhaps much more advanced than ours, could have been making interstellar trips long before man learned to fly 74 years ago."

Faculty take paycuts to retain their peers

by John Larson

Some members of the History and English Departments will take voluntary pay cuts next year to allow lay-off designated faculty to return in the fall to their departments.

The action will give three tenured teachers in each of those two department a chance to stay at the university for one year on a part-time basis, according to Justus Paul, chairman of the history department and Leon Lewis, chairman of the English department.

Lay-off selected, tenured faculty members in English will be teaching three-quarter-time. Those in history will be instructing three-quarter-time one semester and half-time the other.

Faculty in English volunteering for pay cuts could lose one-eight of their pay. Those in history will lose one thirty-sixth because of summer school assignments.

"The six History Department volunteers," said Paul, "are really taking one quarter pay cuts, but since they will be paid for summer school, the dollar loss to them will be less than that.

"You could say they are teaching summer school in place of one quarter of their normal school year assignments. If they taught summer school plus their normal load during the year, they would receive more than the normal salary for a nine-month school year's work, but they will only teach three-quarter-time during the regular year for three-quarter pay.

"No one was forced to do this. A committee of the department voted to do it before they knew who was involved in the lay-offs."

"We're in effect buying the lay-off people time to find another job or to have the legal hearings completed which perhaps might reverse the situation for them. In the meantime they can have some income and stay put while this whole legal tangle is unraveled."

"It is on a one-year basis—whether it can be sustained beyond that if necessary is anybody's guess. Given the cost of living, I'm sure the same people aren't going to be willing to do it. On the other hand, there are a couple who've said they would the next time around, should it be necessary," said Paul.

Nine people in the English Department will take a three credit cut in their assignments each semester to give lay-off designates their same income next year.

The lay-off designates are some good people we don't want to lose," said Lewis.

"We feel the enrollment depression will bottom out over the next two years. If we can keep these people here part-time in the short run, we can possibly retain them on a full-time basis in the future."

"People talk about love and charity, but it sometimes is difficult to follow those words when one has to reach into his own pocket. I think this is quite a tribute to the people in the department."

"It's our 'Waltz Time Solution'."

"Recently there has been some complaint from the administration about the paucity of the United Fund contribution from the department," said Lewis. "I think we've come out quite well here in support of our fellow workers."

Lewis indicated that the English Department is not oversupplied with instructors at the present time.

"Oversupply should only be

defined in terms of what it takes to produce literate students—people who can read critically and write effectively," said Lewis.

"Our student credit hour target was recently raised to a level I think is ridiculous—

approximately equal to 105 students per instructor per semester.

"Since we teach mostly writing here, our student credit hour target should be the same as any fine art," said Lewis.

Credit possible for committee work

The Academic Affairs Committee discussed the possibility of giving academic credit to students serving on either faculty or student committees at UWSP at its meeting April 8.

Committee work takes a great deal of time and may put a strain on students carrying a full load. Faculty committee members do receive some load relief.

Credit for serving on committees could be incorporated into one or more departments at the university. For example, the Political Science Department could develop a course in student government, having participation on one of these committees as a course

requirement. This would also increase student credit hour production in some departments and give students some practical experience.

The committee decided to appoint a sub-committee to determine the impact of this suggestion. The sub-committee will also discuss which committees would be appropriate for participation, if any papers should be required, whether students would be graded using pass-fail or letter grading, and the limit to the number of credits that could be taken in this manner.

The sub-committee will report back to the Academic Affairs Committee at its April 29 meeting.

6,000 play Trivia

Trivia 1974 surpassed all expectations. The WWSP staff was caught unprepared by the 400 teams that participated in the Trivia Contest.

It is estimated that almost 6,000 persons were actively involved in playing Trivia. Through the course of the weekend WWSP received just under 200,000 phone calls.

The contest began at 5 p.m., Friday, April 5 and continued non-stop until midnight, Sunday, April 7.

The 55 hours of broadcasting consisted of solid gold music and questions concerning old movies, radio, television, records and other trivial bits of information. Teams phoned in the answers and the WWSP staff kept score for the 400 teams.

The 400 teams were announced in order. The top ten teams were:

1. Zoo
2. Bill's Pizza
3. 4 West Hyer
4. O'Brian's Burn Outs.
5. 1 East Hyer
6. Sub Station
7. Klap
8. C.C. Riders
9. Fanstill
10. Raft Apes

It was a come from behind victory for Zoo and it wasn't until the last couple hours that they pulled ahead of

Bill's Pizza who led most of the time followed closely by 4 West Hyer.

During the 55 hours, WWSP received a bomb scare but the contest went on while security people made a thorough search of the building.

The Trivia Contest is an annual event on WWSP. Plans are already underway for Trivia 1975.

Next year WWSP will be broadcasting with increased power. They expect an even greater turnout.

Most of the WWSP staff stayed up for the entire 55 hours as did most of the teams.

by Jeanie Swayne and Kathy O'Connell

UWSP campus cable T.V. has recently been expanded to include Wausau viewers.

"The potential viewing audience is now estimated at 6,000," said Harriet Pfersch, publicity chairman for campus T.V. Campus T.V. has increased its broadcasting time from 12 hours a week to 24, she said.

Campus T.V. has expanded from talk shows to include community interest programs. These programs offer the opportunity for local high school students to produce their own shows, said Ms. Pfersch.

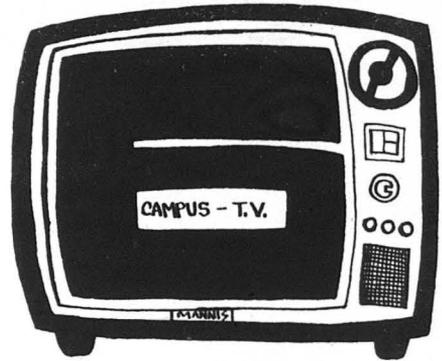

In the past shows have included interviews with Governor Lucey, the Stevens Point Police Department, Club Brewery and local Girl Scout troops. All UWSP home basketball and hockey games are televised.

Campus T.V. also offers free advertising to all campus organizations, said Ed Korlesky, assistant manager for campus T.V.

"Channel 6 on cable T.V. is the local newspaper for the television medium," said Ronald Weseloh of Instructional Media Services (IMS).

"Campus T.V. serves as a good bridge between the university and the community," he said.

Campus TV expands

Campus T.V. and the IMS share the T.V. studio which is located in the basement of the Learning Resources Center (LRC).

There are presently about 60 UWSP students involved in campus T.V. The organization is one and a half years old.

All students, no matter what their majors, are welcome to participate in campus T.V. activities, said Weseloh. "We need cameramen, artists, writers and publicity people," he added.

Campus T.V. provides an opportunity for students interested in the field of television to gain good, practical experience while still in school, said Roger Bullis, campus T.V. supervisor.

The experience students gain through working for any organization is valuable because they learn to coordinate many different areas, such as budget with publicity, said Bullis.

A few of the many individuals responsible for making campus T.V. a success include George Rios, manager; Rita Link, production manager; and Terry Wolfram, program director.

The following programs may be seen on Teltron Cable T.V. on channel 6 in Stevens Point and on channel 3 in Wausau.

"Family Risk Management" may be seen at 2 p.m. or 5:30 p.m. on Mondays, Wednesdays and Fridays. The program is concerned with household management problems such as insurance and liability.

Summer Rentals

Looking for location, comfort, and privacy. We have 'em all. Men or women. We also have just a few vacancies left for the fall semester.

Special Summer Rates

344-2899 after 4:30

"Cable Issues Seminar" may be seen at 3 p.m. or 8 p.m. on Mondays and Wednesdays. The program introduces different aspects of cable T.V. such as ownership rights and the law.

"Garden Almanac" may be viewed at 2 p.m. or 5:30 p.m. on Tuesdays. This program deals with the care for flowers and other plants.

"Movement-Dance" may be seen at 2:30 p.m. or 8 p.m. on Tuesdays and Thursdays. This program demonstrates various dance steps.

"You and Your Health" may be viewed at 3 p.m. or 8:30 p.m. on Tuesdays and Thursdays. This program is concerned with the physical and mental health of the family.

"Weather" may be seen at 2 p.m. or 5:30 p.m. on Thursdays and at 2:30 p.m. or 8 p.m. on Fridays. This program actually teaches meteorology.

"Cultural Special" may be viewed at 3 p.m. or 8:30 p.m. on Fridays. This program changes every week and is concerned with different life styles throughout the world.

Fellini flick flickers

The University Film Society will present LaStrada at 7 and 9:15 p.m. on April 23 in Old Main Auditorium.

Fellini's most widely admired film was also the first to win him international recognition, and was the fullest realization to that point of his tendency toward a symbolic, poetic neo-realism. Giulietta Masina, Fellini's wife, gives her greatest performance as the pathetic, simple-minded wail who travels with an abusive strong-man and a charming, philosophical acrobat.

The troupe's travels and the girl's thwarted love form a powerful parable of the struggle to find happiness.

Comic creator craves cartooning career

by Dave Gneiser

In the beginning there was Taurus, and Taurus created Norman in the image and likeness of the average student.

Everything you always wanted to know about Norman but were too apathetic to ask

Taurus S. is the pen name used by Dennis Jensen, author of the Pointer's weekly cartoon strip, "The Student Norm."

"Taurus is the bull. You can guess what the S. stands for," smiled Jensen. It is no b.s. that Norman is very popular among the Pointer readership but Jensen claims to have found a few fans who dislike certain episodes.

"You can't draw a cartoon of this nature without stepping on someone's toes," said Jensen. It's easier to draw political cartoons where you're dealing with a public figure who can't take personal offense.

Jensen claims Norman is a composite of UWSP students and each cartoon strip is a combination of actual events on campus. Norman is portrayed as a basically apathetic student interested only in girls and beer.

"Norman is basically afraid of girls," says Jensen, "by the time he can get enough courage to talk to a girl, it is bar time and he goes home alone."

Norman is often chided for his apathy and is often put down by the other prominent cartoon strip character who is simply identified as "Roomie," the roommate.

"Roomie is a relic from the past, the radical era," Jensen says. Just as Norman is being pimped in the comic strip, Roomie is also being pimped in a more subtle way. He can see only one side just as Norman does. "Sometimes they are both right," Jensen concluded, "In any case, readers who subscribe to either philosophy can get something out of the comic."

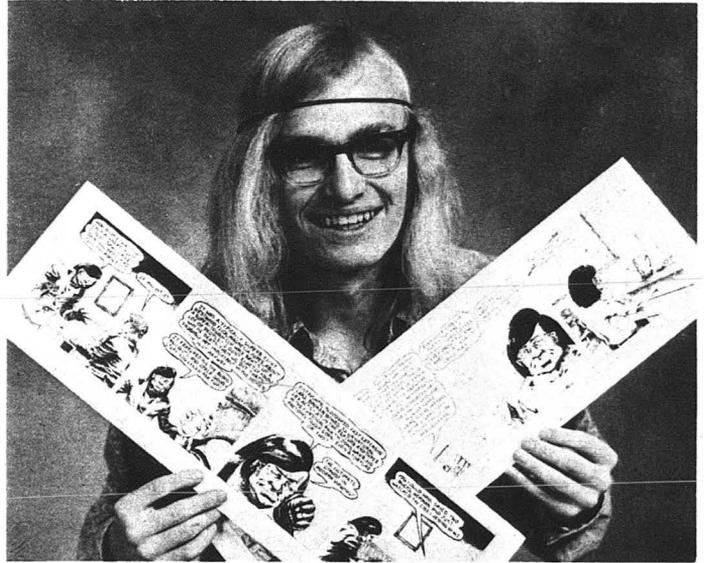

Jensen admits that at times he hates Norman. "It gets a

little boring being a preacher every week." To Jensen the tone of "The Student Norm" is ironic, not humorous. Norman is not a specific individual as many have suspected. "The students at UWSP created Norman's

personality," says Jensen. Cartooning is serious business for Jensen as evidenced by the intricate detail in the Norman strip. He finds the greatest satisfaction with the enthusiasm fellow students have generated for

Norman as presented in the Pointer.

Jensen is hoping for a career in cartooning pointing out that the popular "Doodlesbury" strip has made it big after an initial start in a campus newspaper.

...and Jensen created Norman in the image and likeness of the average student.

The Student Norm

by Taurus S.

Foundation offers \$30,000 scholarships

UWSP will administer more than \$30,000 in scholarships from private sources next year to members of its student body.

UWSP Foundation, Inc. is funding the effort. In recent years, this foundation has been aggressive in building sources of financial aid for students and fulfilling financial needs of worthy recipients.

The university also said that monies received from federal and state governmental agencies for either outright grants, loans or for work programs in addition to the total of all other scholarships made available to students will go well over the \$3 million mark.

There will be about \$1.6 million in federal aids and

more than \$1 million in state aids. Part of those funds will provide work for about 1,800 persons. They may work up to 15 hours per week during the regular school term for an average of \$1.75 per hour.

Included in the federal aid state monies will be about \$1 million given in outright grants based on need. Some students are eligible for outright grants if they are military veterans or American Indians.

In addition to the government supplemented jobs in university offices and building staffs, the privately operated university food service, Sage Foods, will employ approximately 350 students with a yearly payroll of about \$160,000. Jobs are also available at businesses in the community.

Stevens Point sweepstakes announced

UWSP announced it will award three tuition-free scholarships to winners of a unique contest among persons who will be new freshmen or transfer students this fall.

The three awards each will have monetary values of approximately \$600 covering two semesters of study.

Chancellor Lee Sherman Dreyfus said the alumni association is underwriting "this exciting and innovative project" to help administrators and faculty "get at the question of relevance concerning the needs, goals and desires of today's young people."

Instead of hiring personnel and expanding funds to conduct surveys related to

the recruitment of new students, Dreyfus noted that UWSP will be able to secure information about how the public perceives the campus at a "bargain price." "At the same time, we'll be able to lighten the financial load for three families with college-bound sons or daughters," said Dreyfus.

Contestants will prepare essays of 500 words or less on "Why I Would Like to Attend The University of Wisconsin-Stevens Point." But the format isn't to be confined only to the written word.

Dennis Tierney, director of placement, is administering the program and said entries will be received through July 1 and can be supplied in type-

written form or read on cassette or video tapes.

The materials submitted for competition will become the property of the university and there is a chance, Tierney said, that finalists

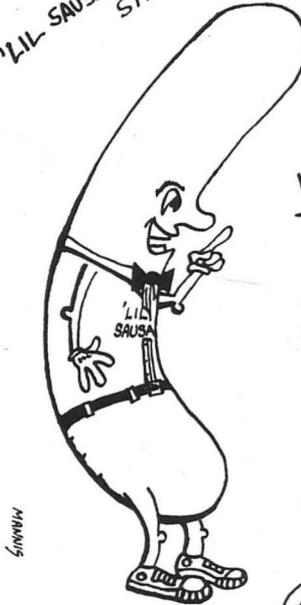

will be asked to be interviewed on campus before the three winners are selected.

Anyone who will be a new student at Stevens Point this fall is eligible, including

persons pursuing master's degrees. Persons from out-of-state are also eligible. If someone in that status should win, he would receive only the equivalent of money paid for fees and tuition by a Wisconsin resident.

"YOU MAY ALREADY BE A WEINER!"

'LIL SAUSAGE SAYS,

WIN A YEAR'S FREE TUITION TO BEAUTIFUL DOWNTOWN U.W.S.P. JUST WRITE IN 500 WORDS OR LESS WHAT YOU LIKE ABOUT PARKING LOTS. SEND YOUR ENTRY TO:
THE DISABLED AMERICAN POULTRY MEN'S ASSOC.

And be a Weiner!

Predicted enrollment up

UWSP appears to be on the threshold of accommodating a larger freshmen class than in a previous year.

Chancellor Dreyfus made the announcement Thursday night at a faculty senate meeting.

The turnaround in the number of new freshmen and transfer students admitted for the fall semester has been rather dramatic, he indicated. On March 1, applications were lagging by about 128 in comparison with the same time in 1973. As of April 11, the count was 11 ahead.

The new figure means there are possibilities the total head-count on campus this fall will stand above 7,400. 7,200 was anticipated earlier and used for budget planning purposes. This may avoid a dip below 7,000 in the fall of 1975.

Total enrollment has been declining in recent years because the university has been graduating large senior classes. That stemmed from the days when freshmen classes were quite a bit larger than in recent years.

The number of new students has been getting smaller at UWSP and numerous other campuses since hitting all-time highs about five years ago.

No official statistics have been released to the news media concerning admission counts, but there are unconfirmed reports some UW campuses still are experiencing declines from last year.

UWSP continues to be faced with needs to iron out some tough budget problems. The faculty senate has concurred with a recommendation made by Dreyfus several weeks ago calling for the declaration of a fiscal emergency for 1975-76. The vote was 39 to 2.

Dreyfus said the declaration will mean maintenance of an appropriate distribution of professors on campus, retention of quality instruction and current programs.

"This is responsible action by a responsible faculty," he said.

To be fully approved, the declaration will require Board of Regents action, and with the chancellor's and senate's endorsement, "that's assured," Dreyfus added.

The declaration will allow the university to cut personnel where there is over-staffing, add personnel where there are needs and thus save quality and programs, Dreyfus said.

To avoid cutting jobs in areas where there is over-staffing, even though the person may be a tenured professor, would require eliminating non-tenured professors in new or growing areas, thereby paving way for elimination of whole programs and the university, the chancellor said.

Several senators called attention to benefits from supporting an emergency declaration. With it UWSP can show cause for getting its level of funding more in line with other institutions and getting extra considerations for professors who are in over-staffed areas.

Hope was expressed that efforts would be made for tenured professors scheduled for layoffs to be re-located within the UW System or re-trained for a different discipline and retained here.

Robert Engelhard, chairman of the academic affairs committee, urged that the university project a "strong, positive counter information campaign regarding the implication of fiscal emergency and designed to promote a positive image of our university."

Question: "Would you approve of a general amnesty for Vietnam draft resisters?"

Dan Coenen

Dan Coenen, Senior
"I would. I'm one of those classic liberals that believes that these people have served their time and sacrificed enough."

Rick Bindley, Senior
"Total and complete amnesty. The war was wrong and they were the people that really knew and took the right course of action. They were the smart ones."

Rick Bindley

Jake Cobb, Sophomore
"I definitely would. I think they had a valid complaint against a ridiculous war and they should be able to come back here and maybe serve some time in civil service but I don't think it is that important."

Tod Anderson

Tod Anderson, Veteran
"I feel that a person should choose whether he wants to die or not. It is up to him and not some F....-up government."

Jake Cobb

Stephanie Maxson, Sophomore
"Yes. They felt justified in what they were doing and they should not be condemned for that."

Stephanie Maxson

Jerry Miller

Jerry Miller, Senior
"Definitely. I'm in favor of amnesty just because of the problems it has created in this country. First, I think the war was wrong, and secondly, I think it's hurting our country just to keep the issue going."

Gail Kinney

Gail Kinney, Sophomore
"Yes. I don't see any reason to hold it over their head after it is all over. It seems stupid to me."

Peter Leonard

Peter Leonard, Continuing
"Yes. I think that they should be able to come back in the country because I was never in the service and I never had to run away."

Tony Kryka

Tony Kryka, Senior
"Definitely. I think that after the Civil War, World War I and World War II draft resisters were given amnesty. I don't think this needs to be a special case."

Jim Kilkenny

Jim Kilkenny, Senior
"I don't think a general amnesty is relevant in this case. I think it would be more conditional as to what they wanted to do for the country. Providing, of course, that the country is worth it."

Julie Vogds, Senior
"Yes I would. I feel that people have their own beliefs and their right to stand up for their beliefs. If they feel that war and fighting is not for them or they are a very non-violent type person they should be able to come home."

Julie Vogds

Barb Slienau, Junior
"I do feel they should be allowed back in the country but I do feel that they owe some service."

Barb Slienau

Tim Vernier, Senior
"Yes I would. If there is a draft and the war is constitutional, I don't think we would have many draft resisters."

Tim Vernier

Mary Voght

Mary Voght, Junior
"Of course. In every war that the U.S. has been in the president has approved of general amnesty after the war is over and this is the first war they haven't done that. They're condemning the men for premature morality."

Bob O'Halloran

Bob O'Halloran, Senior
"I have pretty much an open mind about it. If they had a very conscientious reason for leaving the country, then I would say yes. But then it is very hard to say what is a good reason for leaving the country."

Keith Otis

Keith Otis, cub reporter
"I feel that amnesty should be granted for final exam resisters also. But then, I have my C.E.O. classification (Conscientious Exam Objectioner)."

How much protection

Continuing controversy concerns campus cops

by Mary Budde
A controversy on campus as to whether or not there is a state formula for determining the staffing of Protection and

Security has resulted in some questions about the amount of staff needed at UWSP.

"According to standard state measurements we are

below average," said Paul Kelch of budget planning and analysis.

"We have not been able to find any state formula," said Leonard Gibb of student affairs.

"Compared to other universities, we are over-staffed," said Len Sippel of budgeting. "The only way we can compare ourselves with other universities is to decide what level of service we want to operate at."

"There are no formulas and we are overstaffed," said Bob Badzinski, student controller.

"By taking the total square feet of campus building space and comparing it with the number of service positions, standard measurements are reached for all universities," said Kelch.

Protection and Security's main job is to watch the buildings at night and during the day to maintain order. During the evening they go through every building to check its conditions, fire alarms, fan rooms and mechanical functions, Kelch said.

The standard measurement is based on enrollment only as it determines building space, he said.

Badzinski said that the only significant standard of measurement would be to figure the average of security positions for each student.

The measure of building space may be the formula for night watchmen but not for the entire security staff, said Gibb.

Currently, the UWSP staff has 13 and one-half state supported positions, ranking second highest in the UW system, excluding Madison and Milwaukee, Oshkosh is high with 14 and one-half positions. According to the printed operating budget, none of the universities are hiding security staff in other departments, said Sippel. Whitewater has 12 positions, River Falls has seven and Platteville has six.

"Since the \$600,000 was returned to UWSP there won't be a cutback on security staff for next year but they were considered for cuts like anybody else," Sippel said.

In 1969, a consulting group of the Board of Regents suggested 11 security positions for UWSP, based on building square feet, said Kelch. Since then the Learning Resources, Fine Arts, College of Natural Resources and the new addition of the science building have been added.

"There was a 25 per cent increase on building square feet since 1969, and only two and one-half positions have been added since then," he said.

During the day, one person watches parking who is paid by parking fees and another handles campus emergencies, said Kelch. There are three persons on during weekday evenings and one during the day on weekends.

"We need Protection and Security so city police are not able to arrest people for violation of state law."

The argument for protecting students against arrest is useless," said Badzinski. "If you do something illegal you're going to get arrested."

"Also, if students don't pay their parking ticket, they can't get transcripts for job applications. Is that protecting students?"

There is not too much staff for a campus our size. There should be two persons on duty and at times there are three, averaging 2.25, said Kelch.

Protection and Security are probably operating efficiently but could cut down on overlapping during shifts, said Sippel. "Nothing is being looked at to change the current situation."

"They've done a good job, and are well equipped and trained, but do not need 13 and one-half positions," said Gibb. "If it comes to more cutbacks, money for financial aids and for retaining and attracting students, seems more important than security staff."

"Part of it is being able to see the importance of other peoples' programs."

"We're overstaffed when we have enough Protection and Security staff to go through the dorm basements to see that people aren't hugging and kissing," said Badzinski.

What is a Portage?

by Albert Stanek

It comes in a plain brown wrapper.

On the outside there's a word that cheap dictionaries define as the act of transporting goods.

On the inside are thoughts and feelings of people you might see drinking coffee in the union.

It's dedicated to road-killed dogs and it seems out of place in a city where ooba-chucka is number one on the super-hit survey.

Portage, the literary magazine put together by the University Writers, is a collection of good stuff. The pictures could have turned out better and the title leaves something to be desired but the guts of the thing deliver the goods.

Mike Balisle made me laugh two or three times with "Damn". "Blood Elk" has still got me thinking.

James Black's "March in Wyoming" and "The County Home for the Aged" comfortably reminded me of the past.

Dave Engel, surrogate advisor and self-imitator, contributes his list of spiritual needs as addressed to Rev. R.W. Stipco.

Ken Letko reminisces about eating worms.

Some character named Balthazor manipulates you, or is manipulated by Randall

Fenske. Fenske also talks about that place called Vietnam.

Emma Foxx reminds you of the necessary burden of being born of human parents in "Lost".

Carol Rucks does the same with "Ten Year Anniversary of the Death of My Mother's Mind".

Michael Houlihan talks about life. His sister Shannon, a ninth-grader, amazes you with "Lessons". Upon the completion of "Lesson (2) ... eyeball scratching" you become a "junior executive in the Nixon Never Quits Club".

The book starts out with a poem written collectively by the University Writers called "Feeling Good in Stevens Point, Wisconsin". It serves to remind us that although this isn't San Francisco we do have at least one statue to share a bottle of wine with. If you've ever met the startling stare of Casimir Pulaski you'll appreciate the realism between the pages of Portage.

Portage is 88 pages of shared thoughts. There are thoughts of love, sex, family, friends and all the other real things about life that people on this campus were bold enough to put into print. It's available at Common House Records, City Newstand and the University Bookstore.

Business students win state awards

Kaye Holschbach, a junior at UWSP, has been elected state president of Phi Beta Lambda Convention at UW-Whitewater.

Ms. Holschbach was elected to the position at the state Phi Beta Lambda Convention at UW-Whitewater. Students from member chapters in Eau Claire, Superior, Rice Lake, Madison, Stevens Point and Whitewater were present.

Ms. Holschbach will attend meetings of Phi Beta Lambda Chapters throughout the

state, install the chapters' officers, preside at three executive board meetings, host the 1975 state convention and travel to the national convention in San Francisco, Cal.

Audrey Lotter received first place in the competition for Miss Future Business Executive. Ms. Lotter will compete as Wisconsin's representative for Miss Future Business Executive at the national level.

Others competing from UWSP were Gail Hernet,

Joanne Ostby, Katie Johnson, Barb Sternke, Greg Van Grinsven, Diane Adams and Bob Shaver.

The chapter advisors are Ann D. Carlson and Rita Scheuerell, both from the Business Education Department.

Phi Beta Lambda elected their president and secretary

on Thursday, April 4. They will elect the remaining officers next fall.

Elected to the position of president was Kaye Holschbach. Roxie Voelz will serve as secretary.

The next meeting will be held at 1:30 p.m., Sunday, April 21 at Jordan Park. All members are welcome.

Meet King Kung

by Shirley Spittlemeister

It's not often that a person gets a chance to meet a five-foot-eight, 140-pound Chinese casanova. So we at UWSP should consider ourselves lucky because we have one right here on campus. Our answer to Don Juan isn't hard to find either. All you have to do is go to the UAB office and ask to see the president, and there he'll be, Bob Kung.

Females melt like butter under the influence of King Kung with his dark eyes that disappear every time he puts on his big, easy grin.

The king has a way with women that only he can claim. Once he spotted a girl wearing a dress with Chinese symbols on it. He didn't hesitate to go up to her and ask, "Hello, may I read your dress?" How many young men would have thought of a line like that?

He even admits that he has a special attraction toward the young ladies. "Yes, I do like girls," he said. "I prefer working with them, also. I find they are neater than boys and I like having them around."

Not only is Bob open when talking about girls, but he is when discussing UAB.

He said that UAB has a reputation of being considered above other student organizations. He added he hoped that that image can be changed within the next year.

"UAB should be on the same level as other organizations and the students," Bob said. "Instead of making the students

come to us, we should go to them.

"Next semester I want to have student surveys to see what kinds of entertainment they like and to see what kind of a job they think UAB is doing.

"One problem I see is that at the present time, UAB is a very closed organization and people have a hard time trying to get to us.

"I would like to see a lot of input and feedback from the student body to UAB. I want everything to be very open—even the members are in a closed group and that is not good either.

"I want to stress to the UAB members that they should not feel proud to be on UAB. We are here to serve and the only time we should be proud is when we have done a good job," he said.

In reviewing what's to come from UAB next semester, Bob said that there will be only big name entertainment first. Second semester they will experiment with a few smaller groups to see what kind of student response they get.

He said that he didn't feel that a smaller budget will lessen the quality or amount of entertainment offered by UAB.

"The amount of money won't really matter because if you have qualified people, as I believe we do, they will be able to work with a small amount of money and probably handle it better than less qualified people could

with a larger budget," he said.

After this interview, Bob was on his way to talk to someone else-- a girl no doubt.

The Games Room is offering specials in the spirit of our official Grand Opening Week!

- Pinball High Scorer of the Week (Winner gets one hour FREE pool)
- Special one day canoe rates, during the week days \$2.50. (Includes car top carrier)
- Bicycle Rentals: Two 5-speed Bikes 60¢/hr. Tandems 90¢/hr.
- Table Tennis 45¢ First Hour, 2nd Hour Free
- Pool Thursday All Day (couples 1/2 price)
- Golf Clubs 75¢/Day
- Tents-Brand new tents just in, check them out at same old prices!

Anyone interested in taking the American Nature Writers class next fall should contact W. Nelson at 302 Nelson Hall (3230; home phone: 341-5030) or call the English Department secretary (4757) and leave your name.
Enrollment permitting, the course will be offered by the English department as a 300-level course and may be used for humanities credit.

WRITING WORKSHOP: Lou Kelly, chairman, writing laboratory and open class project, University of Iowa, will be on campus Friday, April 19-9:30-11:30 a.m. Workshop for UWSP Writing Lab staff, room 306, Collins Classroom Center (if interested, please call Mary Craft, ext. 3568).
2:00-4:30 p.m., room 116, COPS. Lou Kelly will speak to all interested university and secondary teachers on competency and creativity in the open class-discussion to follow.
Saturday, April 20-9:30-10 a.m., refreshments, COPS cafeteria. 10 a.m.-noon, COPS cafeteria. Ms. Kelly will meet with student teachers for an informal discussion of the teaching of writing (open to all student and cooperating teachers). 1:30 - 3 p.m., Coffee Lounge, 4th floor, COPS. English student teaching seminar.

SCHOLARSHIPS AVAILABLE TO HOME STUDENTS: Four Wisconsin Rural Rehabilitation Scholarships of a full year's tuition are available to home Economics majors whose parents earn their living by farming. Applications are available in the School of Home Economics office, room 101D COPS, and due by April 30.

Classified Ads
FOR SALE: Brown, fringe leather coat. Size 40, good condition. \$20. Jerry. 2302-150 Knutzen.

FOR SALE: 1964 Ford Fairlane, standard shift, V-8, snow tires included. Good first car. Call 341-9492.

Wanted: A girl who is between the ages of 18 to 21, to be a companion of a young lad of 20. I have traveled to Europe, Jamaica, Bermuda, and numerous cities and states in the U.S. She must be cute and slender, along with a "good" personality. She must like to go camping and if not like hunting, at least put up with it. Also she must know how to cook wild game along with regular food. She also must be hardy enough to put with some rigorous canoe tripping. She must be liberal in ideas and thinking, and must have at least a 2.50 overall grade point average. For further information call 341-6539 after 4:00.

UWSP News

The North Central Council of Latin Americanists will hold their Spring meeting at UWSP on April 19. This meeting will include lectures, panel discussions and informal groups which will be open to all students and faculty.

The theme of the Spring meeting will be to commemorate the 50th anniversary of the birth of Bartolome de las Casas. He was an important historical figure because he fought for the rights of the indigenous peoples in the Americas for one half century.

Details about this meeting are available from Mr. Melvin Bloom, UWSP faculty member in the Spanish Department.

The Women's Center at UW - Green Bay has announced plans for a Women's Festival May 10 and 11.
The festival at the UW - Green Bay campus includes such activities as a juried show of arts and crafts by women.

The activities are open to all Wisconsin women and the sale of art and craft work will be on a "no commission" basis.
Individual women and groups interested in presenting music or dance programs, scenes or acts from plays, poetry readings or craft demonstrations are invited to participate. The public may attend free of charge.

For information on the festival or on fees and registration for the juried show write to Cathy Huntowski, c-o Information Center, University of Wisconsin - Green Bay, Green Bay, Wis. 54302.

SUMMER SCHOOL REGISTRATION: Friday, April 19: 8-10 a.m., L-R; 10-12 noon, G-K; 12:30 to 2:30 p.m., S-Z; and 2:30-4:30 p.m., A-F.
Saturday, April 20: 9-10 a.m., L-R; 10-11 a.m., G-K; 11-12 noon, S-Z; and 12 noon to 1 p.m., A-F.

POSSIBLE OUTDOOR "HONORS CONCERT"
Weather permitting, an open air replay of the UWSP Symphony Orchestra "Honors Concert" will be presented Wednesday, April 24 from 1 to 2 p.m. in the "Sundial" mall between the Learning Resources Center and the Fine Arts Center.

A Presentation of University Writers:
Poet David Steingass will read his poetry at 8 p.m. Thursday, April 25 in room 129 A & B University Union. You can see his books, American Handbook and Body of Compass in the University Bookstore.

ATTENTION POLITICAL SCIENCE MAJORS!
Pre-registration of majors for 1st Semester 1974-75 will be held on April 24 and 25 in Collins Classroom Center, room 473, from 8 a.m. to 11:45 a.m. and from 12:30 p.m. to 4:15 p.m. each day.

FIELDHOUSE POOL HOURS FOR APRIL: Tuesday-Friday, pool 5-9, fieldhouse 4-10; Saturday, pool 4-8, fieldhouse 10a.m. to 8 p.m.; Sunday, pool 4-8, fieldhouse 1-9 p.m. Please note special events take precedent over all schedules.

ATTENTION VETERANS
Veterans who plan to attend the summer school under the G.I. Bill should notify the Registration - Records office of their intention. Veterans who will be enrolled for one half time or more can receive ADVANCE PAYMENT for summer school, but they must apply for it through the Registration - Records office. You do not have to wait until you're registered in order to apply for ADVANCE PAYMENT.

Madrigal spring concert
Monday Square dance Saturday

The Madrigal Singers will present their spring concert Monday, April 22, 8 p.m. in Michelson Hall, Fine Arts Center.
The program will feature a wide range of music through the ages from the Renaissance to the 20th century. The group of 13 students will be accompanied by the University Brass Quintet and several other instrumentalists.
The program will be open to the public without charge.

Assemblyman to hold rap session

Doug LaFollette, state assemblyman from Kenosha, will speak and hold a rap session on environment in the Main Lounge of the University Center, addition from 11:30 a.m. to 12:30 p.m., April 22.
This is sponsored by Student Government.

Author to speak Thursday

Dave Howard, missions director of Inter-Varsity Christian Fellowship in the USA, will speak on the subject of "The Baptism and Fullness of the Holy Spirit" at 8 p.m., Thursday, April 18 in room 329 CCC.
He will address the current issues concerning the Holy Spirit and less controversial topics.

"PLEASE HELP MAKE NEXT WEEK THE BIGGEST OF MY CAREER."

The brewers of Budweiser, in cooperation with ABC Radio, asked me to remind you that April 22-27 is National College "Pitch In!" Week.
All week, all over America, students like you will be filling up litter cans like me.
If there's an official "Pitch In!" Week program in your campus community, join up. If there isn't, you can still support the national effort. Just pick up any litter in your path next week and bring it to me.
Thanks, see you then.

Review

Daddy Whiskers gives their last performance

by Terry Ryan

"Goodbye Joe, we gotta go, me-oh my-oh..." April 6th, 1974, UW-Green Bay, 1:07 a.m.

Silver moon on the frozen bay as Daddy Whiskers plays its final and most remarkable performance. Let me take you there.

"But I thought they broke up in January."

"They did. You got a match?"

"Sure. Why'd they split?"

"Nobody'd book them. You want some?"

They began softly and gently, always a measured offering. This was hard for D.W. The crowds wanted to be shocked not soothed.

"Is this all they do?"

"You mean, you've never seen them before?"

For some, this was their first look at D.W. Others had seen them maybe a dozen or so times, and for us all, this would be the last. About an hour in, they picked up momentum.

"Man, these guys are good."

"Yeah and they haven't played for two months either."

Before the end of the first set, they had caught the

crowd. But it was still a night of surprises. Members of Magnolia and Corn Squeezins, both recipients of D.W. members, were present to jam between sets, and even Mesa, the forerunner of D.W., was put together as a flash. The gig that some thought would be an impossible mission, was turning out to be a priceless and timeless expedition.

Into the final set with Frank's tune "Movin' on"; the crowd was theirs. It was one of those few times that I've seen a crowd completely with a band. At that point, D.W. could have done anything and the crowd would have bought it. But instead D.W. did only their best, "Playing in the band".

"Why are these guys breaking up? They're great."

And then it was all coming together. Joe playing one of the cleanest, quickest, surest leads I've ever heard; battling with Frank, holding a moment, splitting, lifting, taking me from pandemonium to show me brilliance. Gale with bass, accenting, dropping, a pulse, a beat, fleeting, vital to this group. Jeff on drums, the

mountain, the earth, solid secure, always on, there to carry their music. Randy's voice, brings it home, (I felt as if I'd never really heard that song before) lending rhythm and strength. Frank's leads, exact, precise, calculated, known movements, coming across the stage; lightning from the cloud, in a storm, returning to Joe as the cycle begins again. Excellent.

The crowd is wild; Twin encores; This night will be remembered; Into "Jam-balaya".... "Goodbye Joe, we gotta go..." "WAIT."

But it's over. What took five minutes to tell, and two and a half years to happen, is over. Daddy Whiskers, truly one of the Midwest's finest country-rock groups, is gone.

Drama moves to coffeehouse

by Luanne Richardt

The Drama Department is making a production move to the Coffeehouse with the presentation of *The Monkey's Paw*. It will be shown April 21-24.

The production marks the official dedication of the many uses of the coffeehouse. This is the first venture out of the Fine Arts Center, a different and interesting change for the Drama Department.

The Monkey's Paw, an original opera, is based and adapted from the short story by W. W. Jacobs. Anthony Schmitt of the Drama

Department wrote the script and is also the director of the production.

Ronald Combs is responsible for the music, a 16-piece orchestra which will accompany the cast.

Student Theatre students will be helping with the production, set and lighting. Rene Boer is the set and lighting designer.

The cast includes Daniel Kane, Kathy Geiger, Bob Heitzinger, Al Fuller and Joe Mikolic.

Anthony Schmitt suggested that original scripts of this type may be "the way of the

future." He suggests that original work of students and faculty is needed.

It may be possible that original plays from universities may be the source for new plays for large productions around the world and on Broadway in the near future.

Students and faculty should consider this opportunity for their own original productions.

The Monkey's Paw, based on the three wishes theme, should be a production with exceptional talent and many more professional qualities.

Capra says Hollywood "dropped the ball"

by Mary Anne Moore

It was a typical Tuesday morning in the Gridiron. People were talking, laughing, studying. Plates were rattling. The jukebox was faintly humming strains of "ooga chucka, ooga chucka."

And there we were, drinking our usual cups of strong, steaming coffee.

What made this seemingly typical day so different? Frank Capra!

Toby sat on his left, smiling.

Roger sat on his right, nervous and excited, trying to get everyone into a conversation.

The rest of us--well, we were sitting around smiling our heads off, trying to think of relatively intelligent things to say, practicing the sentences in our heads ten or 12 times to make sure they sounded right.

What was Capra doing all this time? He was sitting at the table, a tanned, balding, healthy-looking man, smiling back at us and patiently waiting for things to settle down.

Was there a film that he wanted to make badly enough that he might come out of his retirement to make?

"Well, there are a lot of films I'd like to make," he said. "But filmmaking is a strenuous thing. It's a physical, mental and emotional strain.

"You have to make 30 or 40 decisions in a day. You don't have time to think about it, you just make them. When you start worrying about your decisions, you're getting too old."

Capra is a man of conviction. He believes in man's ability to triumph over evil. He is overwhelmingly idealistic.

"People don't normally lie...An honest man, when he has to, can reach down into his inner depths and withstand anything bad."

How does a man of such character see his role in filmmaking? By expressing these beliefs in the films he makes.

"Film is people to people communication," he said. "When people in the audience get involved in the lives of the people on the screen, the best thing that could happen has happened."

It is the job of the director to see that the actors become people, involved in a situation which says something to the audience about life, he said.

"Faith in humanity is lacking in films today. Idealism is what is needed more than anything else.

"If I were to make films today, I would make the same kind I did before-- altered to fit today's medium--dealing with idealism, honesty, man's humanity to man," he said.

A film can be a reflection of a man's personality and character. This is especially true of Capra's films since, in almost every film he has directed, he has had complete control from start to finish. This allowed a unity of ex-

Photo by Greg Slowinski

Frank Capra, the Hollywood film producer who was here April 9 and 10 signing his autograph for UWSP student Sue Wahleithner.

pression in the film itself.

Smith in Mr Smith Goes to Washington and Deeds in Mr. Deeds Goes to Town embody the qualities Capra himself admires. They are honest, idealistic men who have faith in humanity.

Many of Capra's films are comedies. He insists that no one knows just what makes a film a successful comedy, but he does have some thoughts on the subject.

"Comedy binds humanity in a common fellowship only humans can enjoy...Before you can laugh, you must surrender yourself (let down your defenses)...Laughter is a mysterious component of a much greater mystery--the psyche."

Many times scenes which the actors and crew find hilarious do not elicit even a single laugh from an audience. At the same time,

Three win talent show

by Linda Handschke

Presidents' Hall Council (PHC) and Residence Hall Council (RHC) held their sixth annual Talent Show Friday, April 5, 1974 during RHA Week and a Half.

The eight contestants, who played guitar and sang, appeared in the Union Coffeehouse.

The judges for the event were Sherrie VanWyk, student music major; Mark Jurgella, housing office; Joan Taylor, student affairs office; Robert Taylor, housing office

and the man to whom RHC Week and a Half was dedicated, Gordon Haferbecker, vice chancellor of academic affairs.

RHC and PHC members congratulated and presented trophies to the top three contestants. They were: 3rd, Kathy Geuting, Thomson Hall; 2nd, Lin Kolar, Schmeekle Hall; and 1st, Michael Sullivan, Pray Hall.

At the conclusion of the Talent Show, Haferbecker was presented with a plaque of dedication.

Christofferson named outstanding teacher

Richard Christofferson, who introduced courses in environmental politics at UWSP, has been selected as the campus' outstanding teacher of the year.

The citation carries a \$500 award for his classroom "excellence".

Christofferson has been a member of the political science faculty since the fall of 1970. Besides teaching courses which focus on ecology and government, he also helped formulate and serves as advisor for the rather new environmental

studies minor.

Runner-up in competition for this coveted award was Donald Hay, assistant professor of biology, here since 1965. He will receive a \$300 prize.

Winning \$100 each for third, fourth and fifth places, respectively, were Oliver Andrews, associate professor of chemistry who has taught here since 1960; Mary Elizabeth Smith, professor of English, here since 1950; and Robert Lewis, associate professor of education, here since 1942.

the slightest noncommittal expression can send an audience into roars of laughter.

"You never know how a film will go over until you've shown it to a thousand people," he said. The audience is the final judge.

Capra was frequently asked how he felt about censorship. "Any form of censorship is lousy from any quarter," he said.

Film is an art form. It is a dichotomy of money and art. Both are necessary, but money alone doesn't make a good film.

Academy awards are given to films which are the most successful art works. Awards night for Capra is a time for rejoicing.

What did he think of John Huston's comments on awards night? "I think he indulged in pretentious snobbery. He had no right to say what he did. It is not a time for scolding."

Capra believes in the awards. "Marlon Brando and George C. Scott are horses asses for not accepting their Oscars. That rejection was an insult to their peers."

What makes a film good or bad?

Films should be seen as successful or unsuccessful, not good or bad, he said. "I have never really seen a film I didn't like. I know how much work, planning, decision-making goes into a film. I admire anyone who manages to finish one."

Capra's film, **It Happened One Night**, is the only film to date to win the top five Oscars. Of the approximately 40 films he has made, only two have been unsuccessful. Is there a Capra formula for success?

"I have no formula. The thing that I think have made my films so successful are:

1. I had complete control of the film which allowed for a unity of expression. With one man in charge, the film becomes an expression of some aspect of his' personality.
2. My films are full of idealism.
3. They dramatize the importance and worthiness of

the individual against the world. The women in my films are strong, self-contained, poised and able to survive under adverse circumstances.

A love story of some kind is probably the most successful type of film, according to Capra. This is because every person is affected by love. There is a love story of one kind or another at the core of every successful classic.

What direction do films seem to be moving in today?

"I can't predict what will be successful tomorrow or any time. No one can. I think that violent films are going out.

"People are getting sick of violence and explicit sex on the screen. They are demanding something more human.

"I do think that the greatest pictures are yet to come. Film is a young art form and we have only scratched the surface."

Capra made the **Why We Fight** film series for the army during World War II. The films were shown to soldiers in the U.S. and allied armies to explain why we were engaged in war. Could he have made a similar series during the Asian conflict in the 60's?

"I came out of World War II a confirmed pacifist," he said. "Probably the only kind of series I could have made is a why-we-shouldn't-fight series."

What advice does Capra have for young filmmakers of today?

"For one thing, you don't have to go to Hollywood. Today you can make films in your own back yard.

"You've got to scrounge. You've got to learn cameras, scripts, how to talk to actors. Then you've got to scrounge the money.

"If you follow a trend, you're bound to go broke. If you start a trend, you'll make money.

"Boredom is the cardinal sin. If you entertain and move your audience, that's theater.

"You have a right to look at me and say, 'If he can do it, I can do it.'"

Union open house next week

by Keith Otis

"Open house Week" for the new addition to the University Center is planned for the week of April 21-28.

Although there will be no formal dedication ceremony, there will be a number of activities and events geared toward the campus and local community.

Planned events include special sales in the games room, bookstore, and grid; student operas in the coffeehouse; performances by the International Folk Dancers; an art exhibition; kiddie films; UAB movies; and coffeehouse entertainment by Ron Crick and the Back to the Land Band.

Ray Nitschke plans to be in the bookstore on Wednesday, April 24, to autograph copies of his new book, "Mean on Sunday."

Thursday, April 25 through Saturday, April 27, Hans Bittner, an artist specializing in papercutting, will be on hand to demonstrate his intricate skills.

On Sunday there will be a closed luncheon for the UC staff, previous UAB presidents, some UC contractors, and some members of the University and Central Administration who were close to the project.

"We are pleased after five-and-a-half years of planning and construction that it (UC) is completed. I think it provides immediate and long range programs and services for the total university community," said Ron Hachet, director of the UC.

Roach dies

May M. Roach, 88, a longtime faculty member at UWSP died about 7 p.m. Wednesday in an Eau Claire hospital.

She had been retired since 1956, living in her native Eau Claire.

Ms. Roach received much of her teacher training at UWSP. She then served 42 years as a professor of several subjects and associate director of the now defunct rural education department.

After her retirement, she helped the university with fund raising efforts, participated in numerous public events calling attention to new programs and facilities or old friends being honored. A UWSP women's residence hall was dedicated in her name in 1965.

Photo by Roger Barr

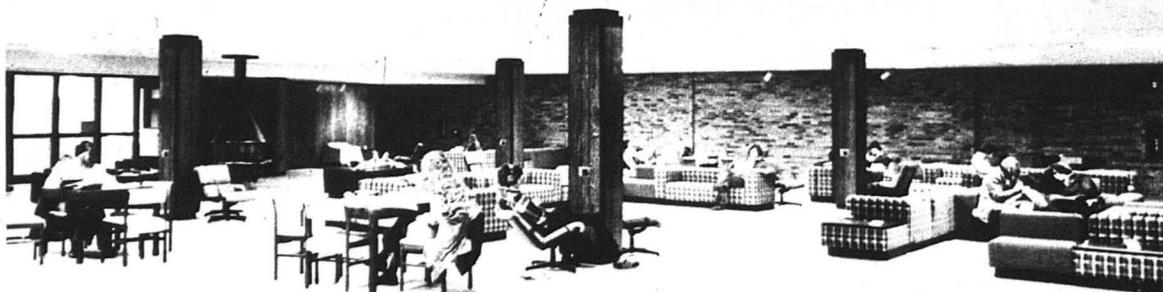

Photo by Roger Barr

by Lloyd Nelson

Usually by this time of the year many people are forced to sit and listen to tales of fantastic walleye fishing. And usually, the stories are true. So far, though, claiming to have had great success with catching spring run walleyes is about as believable as claiming the trout are hitting on Dreyfus lake.

The problem is that Mother Nature is having a hard time prying the jaws of winter off the month of April. It's been too damned cold. When the walleyes are preoccupied with cold water they're not really concerned with making baby walleyes. Without a strong libido, those fish are not going out of their way to make a spawning run.

It's this spawning run that so many fisherman depend on to put walleyes on the stringer. The fish, when they get the urge, start moving up rivers in search of a suitable sight to consummate their amorous activities.

In many instances they meet obstacles that block further upstream migration and are forced to congregate in one general vicinity. As more and more walleyes move into an area they become as thick as axle grease on a January morning.

For the fisherman, all hell breaks loose and over a period of a couple weeks anybody who can toss a line in the water can yank out walleyes.

So far, though, a lot of people have been tossing a lot of lines into the water and

yanking out nothing. The general consensus is that a few days of warm weather (in succession) are needed to warm the water enough to kick the walleyes into action.

If Ms. Nature smiles sunshine down on the water, excellent fishing can be ex-

pected at a few spots in the Stevens Point vicinity. The waters below DuBay Dam, the Eau Pleine Dam, and below the spillway located off River Road will all give up their share of spring walleyes.

If she doesn't, well, there is still trout season to look forward to.

Outdoors POINTER

Scholarship announced

The Worth Company of Stevens Point, manufacturer of fishing tackle, announced Thursday it is establishing a \$10,000 fund to generate scholarships for natural resources students at UWSP.

An annual award to a Wisconsin resident pursuing graduate studies in the specialized field of fishery management and research will memorialize Joseph B. Worth, vice-president of the Worth Company at the time of his death last August.

The fund is intended to generate enough income through interest to cover full tuition and fee expenses for one year while a person pursues a master of science degree in the College of Natural Resources. Currently the scholarship will amount to more than \$500 per year.

A special scholarship committee and the dean of

natural resources will select the winner each year. If the fund generates more interest than needed for one full tuition grant, monies will be given to more than one person some years.

Trainer noted that the scholarship fund encourages advanced study at a time when the master of science degree is rapidly replacing the bachelor's degree as the credential for persons working in fish management.

The annual winner will be chosen each spring on the basis of academic achievement, professional goals, involvement in environmental programs and financial need.

The first recipient was named at an awards banquet concluding dedication day activities for the five million dollar College of Natural Resources Building.

Wildlife Society starts land management project

by Steve Lybeck

Members of the Student Chapter of the Wildlife Society on campus have established a land management project to give students practical field experience in wildlife management on agricultural land.

The first phase of the project will concern a plot of state land along the Tomorrow River in eastern Portage County. Activities this spring involve plans to census the area for game and non-game animals, as well as the planting of shrubs.

The project was initiated several years ago by students of the Wildlife Society who wanted to obtain practical experience in wildlife land management. The State Department of Natural Resources (DNR) approved the project for 63 acres of land classified as public hunting grounds.

Some of this land is presently being sharecropped. The sharecropper is allowed use of the land providing he agrees to leave a certain portion of the crop for food for wildlife.

The objectives of the project are to provide students with an opportunity to plan, implement and follow

the response of management practices on agricultural lands. Another is to increase the carrying capacity of a small parcel of agricultural land for game and non-game species of wildlife. An additional objective is to provide a demonstration area for local citizens, to show what can be accomplished to promote wildlife with properly applied management techniques.

Manpower for the project is furnished by members of the Wildlife Society. Work will involve cutting back trees for a 50-foot strip along open fields to allow regeneration of native shrubs. Some shrubs and conifers (furnished by the state) will be planted to provide food and cover for wildlife.

Nesting sites for various

non-game species of birds are also being built. Present emphasis is on a 63 acre plot of land. If enough manpower is available, work will be conducted on another 80 acre plot.

Lyle Nauman and Ray Anderson of the College of Natural Resources are advisors for the project.

John Meyer, student chairman of the project, said there is a problem of organizing sufficient manpower to be available at the times field work is conducted. Meyer said the project does expose students to the problems of planning and carrying out this type of project.

Persons interested in helping with the project can contact the Student Chapter of the Wildlife Society.

Michigan Ave plan means federal funding

by Lloyd Nelson

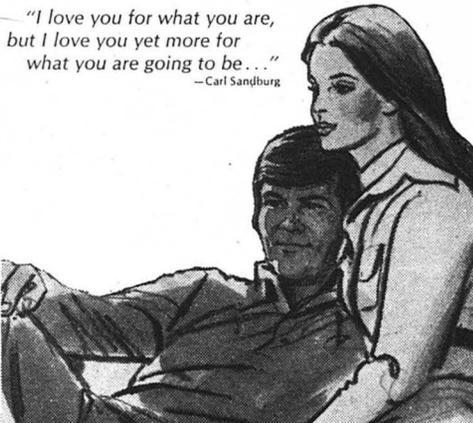

An instructor at UWSP, who has elected to remain anonymous, claims to have information that links the city of Stevens Point as being the biggest backer of the

Michigan Ave. extension plan.

He said the reason the city is pushing the plan is, that if more traffic is not funneled down Michigan Ave., Stevens Point will lose out on federal road funding.

"I love you for what you are,
but I love you yet more for
what you are going to be..."

—Carl Sandburg

Women runners win five team meet

by Diane Pleuss

The Stevens Point women's track and field team squeaked by Oshkosh and three other teams in an indoor meet at Oshkosh Wednesday, April 10.

Final team scores were Stevens Point 73, Oshkosh 66.5, Parkside 38.5, Milwaukee 24 and Ripon 20.

Mary Schultz grabbed the individual spotlight for Stevens Point by setting a new conference record in the javelin with a throw of 129'9".

Other Point firsts were captured by Debbie Vercauteren in the 400 in 62.3, Sheila Shoulders in the 220 with a time of 27.5 and Pam Herbst in the discus with a toss of 100'5".

The Pointers also swept the three relay events with Ms. Shoulders, Mary Vandertie, Lynn Hermann and Ms. Vercauteren taking the 440 yd. relay with a time of 53.5 seconds.

Sue Zuelsdorf, Ms. Shoulders, Ms. Hermann and Ms. Vercauteren took the 880 yd. medley in 1:59.8 while the mile relay team of Ms. Zuelsdorf, Marcia Engebretson, Bev Brienteefeldt and Barb Deichl took their event in a time of 4:33.2.

Coach Judy Tate of Stevens Point feels that the Pointers early schedule gave them an advantage in conditioning over the other teams, but fears the trend may reverse. "They're catching up with us," Ms. Tate said. "We're going to have to work awfully hard to keep ahead of the pack."

Karen Snyder and Ms. Shoulders combined to give Stevens Point their only second

place finishes in the 60 yd. dash and in the two mile run, respectively.

A host of Pointers finished in third place. They are Kris Gunderson in the high jump, Kathy Grotbeck in the shot put, Kim Fletcher in the 880, Ms. Zuelsdorf in the 220, Barb Deichl in the 50 yd. hurdles and Jackie Jadack, Carol Hill, Shelley Caruso and Ms. Zuelsdorf in the 440 yd. relay.

Stevens' Points next meet is a six team invitational at Eau Claire on April 20. Joining and River Falls as well as the University of Minnesota, Stout and RTiver Falls as well as the host team Eau Claire.

Answers to April 4 sport quiz

by Randy Wiesel and Tim Sullivan

- (1) -d- Goolagong; (2) -a- Russell, and -e- Aufdermauer; (3) -d- Henderson; (4) -e- San Diego State; (5) -d- Jochen Rindt; (6) no answer. Hoo, boy, did we fool you on this one. The real answer to question 6 was listed under question 7. Out of all the clods taking our previous quiz, only one person got this question right, that being Mrs. Nate "The Pate" Williams of Omaha. As a reward for her keen powers of observation, Mrs. Williams will receive absolutely free an autographed picture of Dave Gneiser clad in sneakers and raincoat standing next to the apple truck on the market square.
- (7) -c- Bunky Henry; (8) -d- Ma Pesch; (9) -c- Madison Square Garden.

Track team takes title

For the third consecutive year, the Pointer track team has hosted and won the Colman Relays.

Topping the point total of the other six competing teams proved no problem to the Pointers, who captured 116½ points to second place Whitewater's 53½.

Yet Coach Amiot was already looking to the upcoming outdoor conference meet. Team members must qualify for the meet prior to the conference meet by surpassing standard times, distances, and heights

previously set up.

"We have only two more meets for our team to qualify for the WSUC meet," Amiot said. "The more men we qualify, the greater opportunity we will have of bumping off other runners in preliminary races."

Two Pointers surpassed records held previous to this season. Gary Bork's 440 yard dash time was one second ahead of his previous school record, while Don Buntman's 4:17.6 clocking in the mile run surpassed the former mark set by Senior Don Trzebiatowski.

Stevens Point's other individual winners were Bill Wright in the shot put (53-8½), Ron LaFond in the high jump (6-4), Dennis Rue in the triple

jump (45-2½), Rick Zaborske in the three mile run (14:44), and Dennis Mengeling in the discus (145.1). The Pointer mile relay and 440 yard relay teams also captured first places.

Depth again proved invaluable to the Pointers, who ran away from the opposition with ten second places, four third places, four fourths, and four fifth place finishes.

Rue, La Fond, Steve Norlin, John Williams, Bork, Mengeling, and Tom Zarnis all placed in more than one event for the Pointers.

"The WSUC outdoor is again going to be close," stated the foresighted Amiot. "If we can overcome some injuries and develop consistency in our races, we should be very competitive."

Pointers take two from Warhawks

by Jim Habeck

John Pieper was the winning pitcher on both ends of a doubleheader, as the UWSP baseball team swept past Whitewater 4-3, and 13-10, to a 2-0 conference record.

The twinbill sweep enabled the Pointers to even their season record at 3-3. Earlier they had lost both ends of a double header at Winona, and had split a twinbill with St. Norberts.

The Pointer bats warmed slowly, with the offense scoring only one run in the initial two games. The St. Norberts pitchers, however, were unable to effectively halt the UWSP offense, as the Pointers took a 4-3 win, and scored six runs in 7-6 loss.

Whitewater's hurlers also had difficulty containing the Pointer power hitters. Lead-off hitter Pat Robbins began the first game with a double, and catcher Greg Hauser immediately followed with a two-run-homer. Nick Bandow sewed up the

contest with a fourth inning solo shot.

In the second game 13-10 slugfest, both Pointer and Warhawk pitchers were unable to control the opposition. Jim Quarna's three run blast in the seventh gave UWSP a 10-7 lead, but Whitewater tied the contest in the bottom half. Reid Nelson's three run homer clinched the win in the eighth inning. It was Nelson's second round tripper of the season.

"We came back at the end of the second St. Norberts game, stated Coach Clark, "but we couldn't quite catch up."

The seventh inning comeback enabled the Pointers to come within a run of the victors. Greg Hauser started the rally with a walk. Robbins flied out, but Nick Bandow and Quarna followed with consecutive doubles. Don Solin cracked a triple, but Nelson flied out after a walk to Tom Hignacki, the Pointer threat was quelled by a strikeout.

STUDENTS—YOU ARE INVITED

TO BECOME A MEMBER OF THE POINTER QUARTERBACK CLUB

The Quarterback Club is an association that is actively interested in building community interest in, being associated with and promoting the football program at the University of Wis.-Stevens Point.

Membership in the QBC is open to any individual or organization who wishes to back Pointer football and join in the QBC fellowship program.

ANNUAL STUDENT MEMBERSHIP—\$5.00 permits you attendance at all QBC activities, purchase of UW-SP individual season tickets at a discount, membership card, button, bumper sticker, & use of the QBC reserved seat section at all home games.

THE OBJECTIVES ARE:

- ☆ To promote the Pointer football team.
- ☆ To encourage young men with academic, athletic and leadership abilities to attend UW-SP.
- ☆ To assist in bringing these students to the campus.

To join, send name, address, city, state, zip code, & annual student membership dues of \$5.00 to: Don Amiot (Athletic Dept., UW-SP)

Make check payable to UW-SP Quarterback Club.

Pitching looks good

by Phil Esche

It's that time of the year once again when Pointer baseball coach Jim Clark dons his St. Louis Cardinal hat and begins preparation for another season.

"C'mon pardner, let's get 'um," yells the Chicago native entering his ninth season. Last year his team finished 13-13 with a third place finish in the Wisconsin State University (WSU) conference.

Nine returning lettermen boost this year's outlook and the work from the mound is tough. Five of those veterans are pitchers.

John Pieper and Denny Peters, both seniors give the team one of the best left-right combinations in the league. Pieper was 3-1 and posted a 2.25 E.R.A., fanning 18 in 28 innings. Peters lead the team in strike outs getting 32 in 29 innings posting a 1.44 E.R.A. and a 3-1 record.

One other senior and two sophomores round out the starting pitchers. Dave Calteux or "Delray" was only 1-1 but fanned 17 in 12 innings with a 2.33. Al Rutta won two games and lost one. Jim Goesch didn't see much action last year but has drawn words of praise from Coach Clark.

"Jimmy's the surprise of the spring. He's throwing the ball real well," said Clark.

Only two senior starters return elsewhere. Pat Robbins returns to left field with Gregg Hauser behind the plate.

Robby hit .333 last year but played in only 10 games, being hampered by a pulled hamstring muscle.

"We've gotta have Robby," said Clark. "He's the guy who picks us up when we need it. It's a new season, I have hope Pat stays healthy."

As a sophomore Robbins was second in hits and lead the team in runs scored, hitting for a .350 average.

Hauser was the most improved player on the team last season. Hitting only .197 as a sophomore, Gregg was second only to the graduated Dan Pregont last year posting a .378 average, tenth in the conference.

"We have the most natural ability of any group I've had in some time," said the coach. "We'll have more depth than ever before. This makes it nice because if someone gets hurt I have somebody I can rely on to take his place."

Clark will have to replace the entire infield, with the exception of Pacelli sophomore, Tom Hohnacki. Hohnacki, who worked at second last year, will be joined by either Reed Nelson or Curt Hinz at shortstop.

Hohnacki himself will have competition from Mark Cambray, a transfer from Oshkosh.

Two transfers will be battling it out for the hot spot. Don Solin from Northern Michigan and Jim Quaerna from Clemson, both steady players, add the depth Clark spoke of.

Sophomore, Rodd Smith and Keith Christianson, a junior, tangle at first base.

The Hauser behind the plate will have competition from another Hauser. Dan, a freshman, has joined the team and if he works out brother Gregg may also get to play right.

In the outfield with Robbins in left, Nick Bandow, a freshman from SPASH, will take over center. Right is up for grabs. Joe Netzler, Rutz and Hauser will probably see action there.

A brief summation of the team shows the pitching strong, the hitting good but the key this season will be the defense and bullpen.

"We've got the people," Clark said. "I'm just looking for the right combination. If I have to I'll platoon, but for right now I'm still looking."

Randy Newby from SPASH and Dick Upton will be relied upon in the bullpen for short relief knuckle balling. Duane Bronk, a transfer from Oshkosh, and Bruce English will also add depth in the bullpen.

Looking at the conference, two-time champ LaCrosse and Oshkosh, last year's third place finisher in the NAIA nationals, loom as favorites. Both have had the aid of a spring trip. Superior may also be very strong.

The Pointer's will have their backs to the wall as they have only three non-conference double-headers before opening up conference play Saturday, April 13, at Whitewater.

Super Sports Quiz

by Tim Sullivan, Joe the Burke, and Randy Wiewel

Question no. 1- NAME THE ONLY MAJOR LEAGUER WHO WAS BOTH A PINCH RUNNER AND A PINCH BATTER IN THE SAME GAME.

- a) Jerry Lynch
- b) Jarry Parc
- c) Alan Lewis
- d) Pat Collins
- e) Smokey Burgess

Question no. 2- IN ONE YEAR, THIS MAJOR LEAGUER PLAYED SHORT-STOP LEFT-HANDED IN 73 GAMES.

- a) Billy Houston
- b) Billy Welu
- c) Billy Hulen
- d) Bill Giese
- e) Bill Buckner

Question no. 3- THE FIRST AFL PLAYER TO GAIN 1000 YARDS PASS RECEIVING WAS?

- a) Lionel Taylor
- b) Charley Taylor
- d) Otis Taylor
- d) Charlie Tolar
- e) Herb Orvis

Question no. 4- NAME THE GOLFER WHO MADE A HOLE-IN-ONE IN TWO PGA TOURNEYS IN 1969?

- a) R.H. Sikes
- b) Dan Sikes
- c) Charley Spikes
- d) Arnold Palmer
- e) Boris Spassky

Question no. 5- THE NATIONAL LEAGUE'S LAST 400 HITTER WAS?

one," Clark stated, "but we gave it to them with those darn errors. Then Robby hits one out but nobody's on."

Robbins had two hits for the afternoon and so did SPASH stand out, freshman Nick Bandow.

"Bandow hit the ball real well," said Clark. The rookie took over the centerfield spot from Jerry Bird.

Shortstop Reed Nelson also drew praise from the coach for his performance.

Tuesday the Pointers hope to open their home season with a double-header against St. Norbert's. Friday they'll take on Ripon in another home contest.

- a) Ralph Terry
- b) Bill Terry
- c) Greg Clefisch
- d) Mel Ott
- e) Stan Hack

Question no. 6- THIS PITCHER ONCE GAVE UP 46 HOME RUNS IN ONE SEASON.

- a) Fergie Jenkins
- b) Dave Kluetz
- c) Robin Roberts
- d) Otto Stowe
- e) Dick Ellsworth

Question no. 7- WHEN CITATION WON THE HORSE RACING TRIPLE CROWN IN 1948, WHO WAS THE JOCKEY?

- a) Willie Shoemaker
- b) Bill Hardtack
- c) A.A. J. Foyt
- d) Eddie Arcaro
- e) Cap Parmenter

Question no. 8- THIS AMERICAN LEAGUER ONCE HAD 184 "RBUS" IN A SINGLE SEASON.

- a) Lou Gehrig
- b) Ted Williams
- c) Lou Grant
- d) Ted Baxter
- e) Roger Maris

Question no. 9- WHO LED THE ABA IN 3-POINT FIELD GOALS THIS YEAR?

- a) Wayne Hightower
- b) Dwight Lamar
- c) Willie Wise
- d) Julius Erving
- e) Don Cockroft

Question no. 10- WHO LED THE NBA IN STEALS THIS YEAR?

- a) Lou Brock
- b) Willy White
- c) Larry Steele
- d) Walt Frazier
- e) Larson E. Whipsnade

Question no. 11- HE HOLDS THE RECORD FOR MOST PENALTY MINUTES IN ONE SEASON OF PRO HOCKEY.

- a) Keith Magnuson
- b) Dave Schultz
- c) Marcel Dionne
- d) Jacques Lemaire
- e) Jean Pronovost

Question no. 12- WHICH OF THESE PLAYERS IS A PROFESSIONAL HOCKEY GOALIE?

- a) George Gardner
- b) Darryl Sittler
- c) Bob Berry
- d) Andre Boudrias
- e) Pierre Plante

University Store

Announces a Personal Appearance by

Ray Nitschke

In the Bookstore, lower level—University Center.

WEDNESDAY, APRIL 24
1:00 to 4:00 P.M.

Stop in to meet Ray Nitschke and have him autograph your copy of this book.

MEAN ON SUNDAY

Ray Nitschke as told to Robert W. Wells

The dramatic, first-person story of Ray Nitschke of the Green Bay Packers, chosen as the greatest middle linebacker in the history of professional football. Orphaned at 13, saved from possible juvenile delinquency by his interest in sports, Nitschke describes in this book the early tough years, his stardom at Illinois and ultimately his perennial All-Pro status with the Packers. He also tells what family life has meant to him with his wife and adopted children. A truly inspirational story of a giant on and off the field.

Sluggers lose double

by Phil Esche

With spring just around the corner and snow still along the baselines, Jim Clark's 1974 Pointer baseball squad opened their season Sunday, in Minnesota, losing to Winona 2-1 and 3-0.

In the first game, southpaw John Pieper gave no earned runs as three errors helped score two Winona runs in the bottom of the sixth. Senior Pat Robbins scored the only Pointer run as he slammed a home run in the seventh.

In game two, Winona tagged Denny Peters for three runs but his team could only muster two hits.

"We could have won that first

Letters

POINTER

Debatable cut

Dear editor:

I was concerned to read the FAC (Finance and Allocations Committee) recommendations for the student budget. In part this concern originates from the fact that I was active in the debate team and this has effectively been eliminated. However, as a graduating senior this will have little real effect upon me. More importantly my concern comes from the way in which fundamental value decisions were reached by the FAC without consultation of either the student body or the student senate-assembly.

Mr. Badzinski clearly indicated in last week's Pointer these decisions were reached by only the FAC. "The FAC had to begin placing priorities..." and later indicated "Many of these decisions were hard to make, but the FAC had to make them." Mr. Badzinski would seem to be indicating that neither the student body nor the majority of the student representatives were adequately provided with an opportunity to represent the student body.

Student government must necessarily work in committee, yet clearly the values with which one is to evaluate the entirety of the student budget should have been discussed at least by the senate and assembly, and some efforts should have been made to collect student opinion as to what values should be maximized in the student budget.

I have talked to several representatives and senators, none of which could remember any debate or discussion over what values should be maximized by the student budget recommendations. The student survey by the senate (in which I participated) asked no questions about the values which should be maximized in the budget.

The student government has failed to represent student opinion, or even the opinion of senators and representatives, except for the select few on the FAC in the fundamental decision of the values advanced by the budget selection criteria. Admittedly choices, hard choices, must be made, but these are choices in which students, not just the select few on the FAC should have voice in selecting the evaluation criteria. The FAC has chosen to count the number of bodies per dollar as the criteria for evaluation (what of other possible criteria such as educational benefit). Is this the only choice the students might have made? Should not student (and senate-representative) opinion been consulted in any case?

Dear Editor:

In March, 1972, a law was passed which gave 18-year-olds the legal right to buy and consume alcoholic beverages. It is now April 1974, we are legal adults, and this law is not being recognized in the University of Wisconsin Stevens Point dormitories. When we turned 18 and became legal adults, we realized we would be responsible for our actions. We believe it is time to demand the right to prove our capabilities in handling the responsibility of having all alcoholic beverages

in the dorm regardless of alcohol content by weight.

We would like to have the right to drink in a more quiet, relaxed atmosphere as opposed to a bar, if that is our choice. Most of us are allowed to drink in our homes with our parents' approval. After all, the dormitory is our home while we are living here. We don't feel it is fair that our parents and our peers are able to consume alcoholic beverages at their pleasure while we are restricted.

The POINTER reserves the right to edit, delete, or reject contributions. All letters should be limited to 300 words unless permission is given by the editor to go over the limit.

All letters must be typed, doublespaced, and have one inch margins. All letters must be submitted by the Monday noon before publication.

Prohibition protested

In his March 14th letter to the editor, Chancellor Dreyfus stated that he felt freshmen students might not be able to accept this responsibility. Chancellor Dreyfus felt that if alcoholic beverages over 5 per cent volume were to be allowed in the dorms then he would separate freshmen from upper classmen. Would postponing the responsibility for another year really help? If 18-year-olds aren't mature enough to handle such a responsibility then why was the Age of Majority Bill passed?

Recycle this letter

To the editor:

According to a survey taken this month, we, a group of concerned students, found that 99 per cent of the students polled on campus are aware of recycling. Only 40 per cent, however, of the people polled would help in volunteering their time to set up or operate a recycling program.

There is now a need for recycling, for the 'vast' quantities of raw materials no longer exist. If the present usage of these goods increases and no degree of recycling is employed, the generations to come will not have the benefit

from these goods which we are presently consuming. Not only is there a threat to future generations, but there is a present crisis of solid waste taxing our environment.

We feel that the solution to the problem lies with the involvement of the people in this worthwhile issue—for example, saving paper for the Eco-Tac and participating in community recycling programs.

Nevins thanks support

To the Residents of the Second Ward:

I would like to take a few words to say thank you to the people who voted for me on April 2 and a special thanks to those who campaigned for me. I will do my best to represent your interests on the City Council.

I will need your continuing support and input to do a good job, so feel free to contact me. Call me at home (341-3267) or talk to me at work. If I am not home when you call please leave a phone number and I will return your call.

Thank you once again.
John Nevins

Fiction course offered

The Department of Foreign Languages and Comparative Literature will be offering Comparative Literature 350, Directions in Modern Fiction, the first semester of 1974-75.

The course will be offered at 1 p.m., Monday, Wednesday and Friday.

The course will put into perspective trends in contemporary world literature.

Faculty involved include H. Adams and M. Fortune, French; P. Kroner and J. Seiler, German; R. Price, Russian and R. Assardo, Spanish, the assigned instructor.

The course and readings will be offered in English. However, there will be concurrent courses offered in the respective languages which will deal with these national literatures in greater detail.

Student Government Elections

April 29 (Registration Day)

From the president

by Jim Hamilton

About this time last year, when I was campaigning for the office of student government president, I promised, if elected to implement an evaluation of all courses and all faculty members. This is one promise I am proud to say has been fulfilled.

Beginning this week, students for the first time will be expressing their opinions on both the course and the instructor in an objective and meaningful manner. You will be able to do this because of the hard work and dedication of a handful of both students and faculty personnel.

To narrow it down even further, Bill Tice has been the individual most responsible for the concept of an evaluation becoming a reality. He and his committee have spent more hours in constructing this evaluation than many

students have spent in studying for their courses.

Why did I choose to praise the work Bill and his committee did? It is because these people, whether in Student Government or not, make your government work for you. They are the ones dedicated enough to put in the hundreds, yes hundreds of hours, at no pay, that are necessary, so that you, the student, can sit down and grade your instructor and your curriculum. Those that follow you then, will not have to discover all over again what are the quality courses and who are the quality instructors.

So next time you begin to analyze the type of activity you would like to become involved in, give Student Government, your fellow students, and yourself a top priority. Choose Student Government.

...on having the guts to try

Far better it is to dare mighty things to win glorious triumphs, even though checkered by failure.

Than to rank with the poor spirits who neither enjoy much nor suffer much.

Because they live in the gray twilight that knows not victory nor defeat.

(Theodore Roosevelt)

Nowadays, on rising costs bachelors spend as much on wine, women and song as on luxuries.

Impeaching Dick Nixon For Watergate Is Like... Busting Al Capone For Tax Evasion!!!!!! (Lyle Updike, EcoTac '72)

History relevant historically speaking

Dear editor:

Being a history major naturally concerned with what is happening on our campus, I was very interested in Jim Hamilton's "From the president" article in your March 14 issue.

I agree with the main point that, I think, Jim was trying to make: that is, that students should be involved in decisions made on this campus that affect their education. However, Jim's column was confusing. It was confusing solely because he did not, unfortunately, have a proper grasp of the issue before he expressed his opinion. I feel that if we, as students, are going to be effectively involved in decision-making on this campus we must demonstrate that we know the facts of a situation, and that our opinions are based on fact. Jim's March 14 column totally ignored the facts.

For example, Jim asserts that history courses are not "relevant" to CNR (College of Natural Resources) majors. What does he mean by the word "relevant?" The main purpose of history courses is to teach the student to critically analyze material presented to him in any form. Does Jim seriously mean that the ability to critically analyze material is not "relevant" to CNR majors?

Another purpose of history courses is to show the student how people have mistreated one another in the past so that the student can learn to deal with people in a meaningful way. Does Jim seriously mean to say that the ability to deal with people is not "relevant" to CNR majors? I think that the ability to critically analyze material and deal with people is "relevant" to history majors, CNR majors and any educated person.

According to the UWSP Catalog, CNR majors are required to take six credits of history courses. Jim implies that NO history course is "relevant" for CNR majors. I have already used two approaches to show that history courses are vital to any educated person.

Now let us consider the content of some history courses and see whether or not they can be of use to CNR majors. History 366, "Resource Development and Policy in the United States" is, according to Jim's article, not "relevant" for

CNR majors. Yet the class is offered every semester and consistently 80 per cent of the class is composed of CNR majors!

History 382, "The North American Indian" has an enrollment that is 30 per cent CNR majors. History 367, "The American Frontier" and History 368, "The American West" deal with the physical expansion of the United States.

History 108, "Modern European History" and History 320, "Economic History of Europe" both deal with the causes and consequences of the Industrial Revolution. Are none of these courses "relevant" to CNR majors?

Jim also states that CNR majors have demonstrated inadequacies in speech and composition, he implies that the solution to this problem is to eliminate the six credit history requirement and replace it with more speech and composition requirements. However, this position totally ignores the number of speech and English courses a CNR major can take in satisfying his requirements.

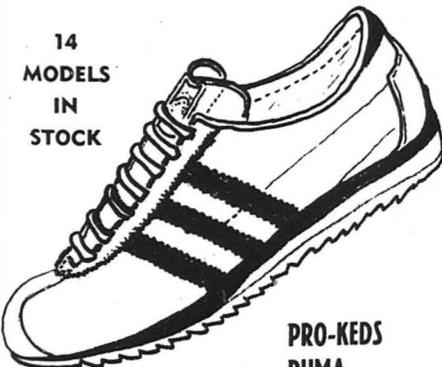

Again referring to the UWSP Catalog, a CNR major is required to take two credits of communications and six credits of Freshman English. The CNR major is also required to take 9-12 credits of humanities. Included in the heading "Humanities" are courses in communications, and literature courses taught by the English Department. So, there already exist provisions for the CNR major to take 20 credits of communications and English. Jim implies that this is not enough, that CNR majors need 26 credits of communications and English. One might as well propose that CNR majors be required to minor in English or communications. I am sure that after 26 credits they would deserve a minor.

At the risk of sounding repetitive, let me again assert that I believe students can, and should be, more involved in decisions that affect their education. But I also believe that students are not going to have an effective voice in the decision-making process until they demonstrate their ability to support their position with the facts.

Very truly yours:

Course and faculty evaluations

Professor Perret, Bill Tice, Don Smith, Professor McCaig, Frank Horn, and Professor Chitharanjan, all members of the Sub-Committee, are shown with the 35000 answer sheets.

STUDENT HELP IS NEEDED: The Course and Faculty Evaluations are coming up the week of April 22-April 26, and we need your help! Since every class of every instructor is to be evaluated, the distribution administration and collection work for this project is going to be massive.

Anyone can help. We need people in all departments. It doesn't matter if you help with one class or with many- so long as you do help. Your basic job would be to just pick up the materials for whichever class or classes with which you are going to help administer the evaluation and then return the

material to each evaluation center in the building that the class is in.

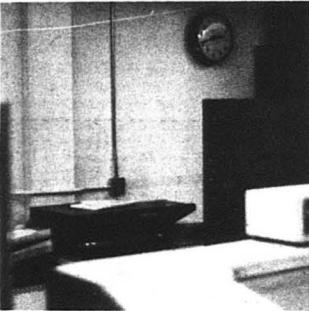

Are you interested? Well, even if you're not, call or come to the Student Government Office (second floor Union); 346-3628 for more information, or contact the Evaluation Office; 346-2439 (205 Classroom Center), and offer your assistance.

Remember, these evaluations can help in the improvement of the quality of your education. Wouldn't it be nice to know what the instructor is like before you register? Show that you care-help with evaluations. Thanks.

The questions on the Evaluation were formed by a Sub-Committee of (Student) Faculty Affairs. The Sub-Committee is composed of 10 students, 10 instructors, and 2 part-time instructors of the Housing staff. Around 900 hours went into the formulation of this Evaluation form, all during this semester.

The actual questions are as follows:

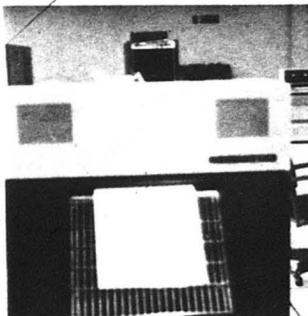

- 1.) Indicate your college class standing.
- 2.) Indicate your Cumulative Grade Point Average.
- 3.) Indicate your first or main reason for taking this course.
- 4.) Indicate your sex.
- 5.) Indicate what grade you expect from this instructor.
- 6.) Indicate what grade you deserve from this instructor.
- 7.) The subject matter of this course has been challenging.
- 8.) This course made a significant contribution to my education.
- 9.) I would enjoy taking another course related to this subject matter.
- 10.) Regular class attendance promotes understanding of the subject matter.
- 11.) The instructor's grading procedure correctly measures my knowledge of the subject matter.
- 12.) I would enjoy taking another course from this instructor.
- 13.) The instructor encourages discussion both in and out of class.
- 14.) The instructor gives clear instructions and explanations.
- 15.) The instructor seems well prepared for each class.
- 16.) The instructor's level of presentation was too sophisticated for student comprehension.
- 17.) The instructor seems knowledgeable in this subject matter.
- 18.) The instructor seems enthusiastic about and interested in this subject.
- 19.) The instructor gives constructive criticism.
- 20.) The instructor respects students as individuals.
- 21.) The instructor requires too much "busy work" in this course.
- 22.) The instructor discriminates against the students on the basis of sex.
- 23.) The instructor discriminates against the students on the basis of race.
- 24.) The instructor discriminates against the students on the basis of personality.
- 25.) Practical experiences (i.e. clinical, field, laboratory) helped clarify concepts taught in the course.
- 26.) Assignments contributed to my understanding of the subject matter.
- 27.) The exams adequately cover the subject matter of this course.
- 28.) What overall grade would you give this instructor?
- optional- 29.) What single phrase or sentence best expresses your opinion of this course or faculty instructor?

1. The small flat optical scanner which transfers responses to standard computer cards, runs relatively slowly.

2. The card reader is able to feed about 800 computer cards per minute into the input-output control unit.

3. Looking from right to left, are the I-O control unit, the memory bank, the central processing unit, the tape disk unit, and the line printer.

4. The line printer is capable of printing the expected 1,500 pages of "detail print-out" paper in several hours.

Lots of lots

by Bob Kerksieck

You are paying some of the highest parking fees in the state because of the huge, nearly-empty lots on the outskirts of the campus. And the administration goes on building more lots!

Through last summer and last semester, houses were being destroyed or moved from the east side of Reserve Street to make room for more parking lots. Recently a house was moved from the other side of Reserve Street (opposite the University Center) to make way for a metered parking lot.

Do we need all these new lots? They cost a good deal of money and only serve to attract cars from the already nearly-empty lots. I don't think, with a decreasing enrollment, they're going to attract many more cars even if the administration can convince the city to eliminate ALL street parking. This can only result in even higher parking fees next year to pay for more empty lots.

I can remember when Lot Q was built on what had been a wetland area, and when the trees behind Steiner Hall had

to go to make room for another lot (the chancellor told me the trees behind Steiner had to be destroyed anyway as they had Dutch elm disease--if so, it's the first I've heard of maples and oaks contracting the disease--hope it isn't the start of a new trend).

The administration said at the time that those lots were needed to compensate for the ever increasing number of cars. Dream on.

Now, the administration says that the new lots are necessary to provide better, more convenient parking nearer the academic buildings. In other words, they don't want to have to walk so far, regardless of the extra cost to students.

Instead of more parking lots, why don't they consider closing all the lots except for the large ones on the edge of the university. Trees and grass could be planted to make appealing mini-parks and green-space.

Convenience? It's only a short jog, and I know a few administrators who could use the exercise.

Amen for amnesty

by Terry Witt

To grant amnesty or not to grant amnesty is a dilemma yet to be resolved in this country.

Amnesty is a concept of public law derived from the Greek word Amnestia meaning to "intentionally overlook". Taken in that context, what must be overlooked, if anything and by whom?

Our self-righteous president, on the verge of dethronement, declared at his first press conference in 1973 and has since repeated that he opposes amnesty, because he could not "forgive" draft avoiders, resisters, AWOLs and expatriots who must pay the penalty for their errors and crimes."

How very noble of the man; to forgive those who dared oppose his bloody little Asiatic war!

His statement is completely at variance with purpose, theory and history of amnesty; particularly at two points. Congress, not the president, has the power of amnesty. It is not forgiveness of an error but forgetting a presumed offense, which in reality was designed to arouse this nation politically and morally.

Amnesties and general pardons are often issued at the conclusion of those wars conducted by governments which had a "good conscience" about what they had done. Political leaders wish to extend the atmosphere of relief and optimism to those, who in the eyes of their fellow countrymen, had misbehaved.

Tragically, the Vietnamese conflict was never resolved; hence the governments reluctance to grant amnesties. It would be an embarrassment to the "Warhawks" and "Red hunters" in Washington to admit that the war was wrong and that those idealists who refused to participate were

right. Thus we have the habitually reticent presidency because of the political ramifications of amnesty, followed blindly by those bogged down in party politics.

The basic theory of amnesty is the need, particularly in a democracy, to retain within the political system, all the leaders of political thought, if for no other reason than to stimulate political ideals. To exclude the critics and opponents is to strive for consensus and stagnate intellectually. In a political system which thrives on conflict; to stagnate is to die.

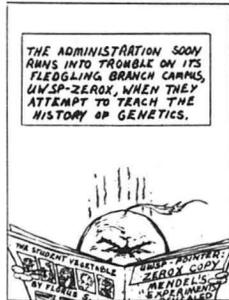

We need to recruit these critics of political thought into our changing society. If we force them into exile, it would not only be opposed to our basic constitutional freedoms, but would exclude a creative political force needed so badly.

We are not dealing with ordinary criminals or felons who refused the duties of society to save their own skins, but rather sons and daughters of middle class America.

They are in the minds of many Americans. Those people will quite possibly spare this country the agony of future Vietnams.

Protect yourself

by Chris Kroll

A UWSP student escaped a rapist last week. Had she not resisted, she could have been a homicide victim.

The rapist reportedly tried to strangle the victim several times.

Should you be attacked, and your attacker is unarmed, use your natural body weapons to defend yourself. Fingers, fists, elbows, knees and feet deliver the most effective blows.

Aim for the eyes, nose, temples, throat, abdomen, kidneys, groin, shins or instep.

If an assailant grabs you around the neck from behind, put your chin to your chest to keep the pressure off your neck and lower your body to get him off balance.

Kick back into his shins, scrape your heel down and

stomp on his instep. Bite his hands or bend his little finger back. Elbow him in the abdomen or punch him in the groin.

When you are free, RUN! Should you be facing your attacker, drag your fingernails down his face. Drive the heel of your hand into his nose or throat. Slap his ears with open hands. Punch him in the abdomen or kick or knee him in the groin and RUN!

If he gets you down on the ground, fend him off with your feet. If he is choking you, cause pain distraction with whatever free body part you have. Go at his face and throat.

A comb, car keys or nail file may be useful, but remember, they could be taken away and used on you. Keep the weapon concealed and your movements subtle

so you don't signal your intention.

A scream is a natural panic reaction and attention-getter but if you won't be heard, don't use it. You will panic your attacker and his first reaction will be to choke off the sound.

David Wright, instructor of personal defense at UWSP, said, "60 to 70 per cent of personal defense is common sense, using your head and planning what moves to use."

"It is important not to travel alone at night, but never hitchhike."

If you must walk to your car, dorm or apartment, carry your keys concealed in your hand. Use them in a grating fashion across the face and neck.

If a motorist pulls over and asks for information, answer from a distance.

Stay away from thick bushes. They are excellent hiding places for would-be attackers.

Do not leave lighted areas to go to someone even if they say they are dying. Go to a nearby house and call for help.

Wright mentioned three important points to remember in a rape or mugging situation.

1. Attacker doesn't expect organized resistance.
2. The woman who uses her body weapons will be effective.

She doesn't need strength, just the focus of power into a vital spot.

3. Commitment. If you begin to resist, you must continue the attack until you can get away.

In the event you are attacked, report it to the police immediately. Why let a rapist go free? He could strike again.

Justice American style

by Dave Gneiser

It was announced Tuesday that the sentence of Lt. William Calley would be reduced from 20 to 10 years.

Calley has been confined to his quarters for three-and-one-half years and is eligible for parole under the reduced sentence.

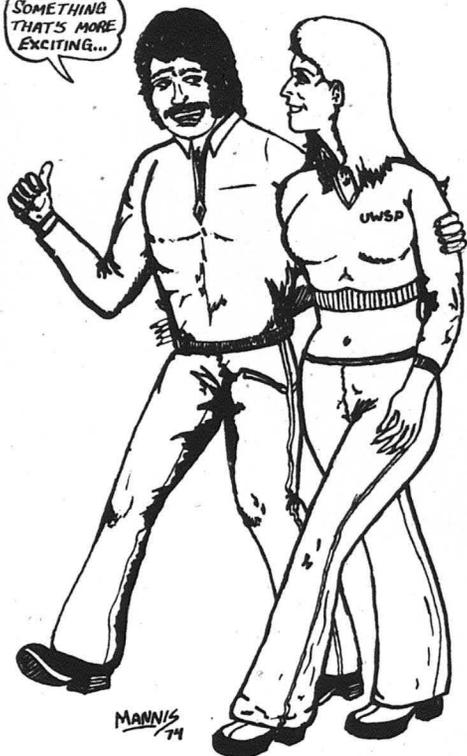

Karlton Armstrong had been sentenced to 23 years for blowing up the Army Math Research Center (AMRC) in Madison. He is serving that sentence in jail, not merely confined to his quarters.

Calley knowingly killed several dozen Vietnamese. One man was killed in the AMRC blast and it is unlikely Armstrong premeditated that death.

Is there no justice left in America?

Want to try something **EXCITING?**

I KNOW
SOMETHING
THAT'S MORE
EXCITING...

The **POINTER**
will need help next year

If you are interested in design (keypunch, layout, etc.), photography, reporting, cartooning, or writing; contact **BOB KERKSIECK** at the **POINTER** office, 346-2249.

Academic credit is available (1-4 credits) and paid positions are available for typists.

The **POINTER**, 2nd floor, University Center
346-2249

Come One, Come All FESTIVITIES INCLUDE:

1. Pepsi & keep the glass - 25¢ (last chance this year to complete your set)
2. ALL DAY HAPPY "HOUR"
10 a.m. - midnight, Thurs. 25th
3. Footlong Hot Dog - Chips and "The Works" - 60¢
4. Salted Peanuts in the Shell - Pack your own bag - 25¢
5. Popcorn - all day, all week - 10¢
6. Balloons - while they last!
7. Mammoth Bean in Jar Contest.

1ST PRIZE—Steak dinner for 2 at Holiday Inn (value \$15.00)
2ND PRIZE—4 passes to Campus Cinema (value \$8.00)
3RD PRIZE—Pass good for 1 Double Dip Ice Cream Cone each day in the Grid thru May 10th, 1974 (value \$4.50)

WINNERS POSTED FRIDAY BY NOON
