

# POINTER

SERIES VIII, VOL. UW-STEVENS POINT, THURSDAY, FEBRUARY 28, 1974 NO. 20

## Michigan Ave. debate continues

by Dave Gneiser

About 75 students turned out to voice their opinions and ask questions concerning the proposed Michigan Ave. extension during Tuesday's public hearing in the Debot main lounge.

"What makes this campus unique is that we have this woodland area nearby," said one student.

Bill Burke, area-wide planning, agreed, "From a natural resources point of view, the best use of this land is as it exists." But he pointed out that if development must occur and in this case it is occurring, we should seek the alternative least damaging to the environment.

No environmental impact study of the area has yet been

completed. The UWSP Environmental Council has begun studies of several alternatives concerning the issue. Lyle Updike, council president, discussed one such alternative. "We have concluded from one study that 20 fifty-passenger buses could transport the number of people Sentry would employ at the new complex. The buses would make two routes, twice each day."

This would eliminate the need to build a street with a 2,000 car capacity. The Environmental Council is continuing to study the possible alternatives. They have not settled on one solution as yet.

William Vickerstaff, university relations, ex-

pressed doubts that such a bus system would work and cited several examples of areas where it did not work.

"But don't you think people would prefer the bus to traffic snarls and high-priced gasoline?" asked one young lady. "You are going to enhance riding the bus simply by denying people the convenience of this direct route."

Burke was asked if there was any truth to the rumor that the Michigan extension would be a four-lane expressway. He replied that he had not heard of such plans and doubted they existed.

The proposed right of way is 80 feet wide. "Eighty feet could give you a four-lane road," said Burke.

No official timetable for the

project has been released yet. Vickerstaff speculated that since the Sentry complex would be completed by late 1975, the road would also be open by that time.

Vickerstaff also mentioned a proposal to dig a lake in the area. The lake could be used for academic studies and recreation. It would also solve some of the drainage problems in the area. The land displaced by the digging would be used as fill for landscaping the new Sentry complex. In this arrangement, Sentry would share some of the costs of digging the lake.

One of the College of Natural Resources faculty pointed out that the water in that area contains a high

amount of acid. "All you'll create is a bog lake. No fish will live in it and you wouldn't want to swim in it," he said.

Ray Specht, university relations, said that the lake would not be built if studies bore this fact out.

Presently, engineering firms are doing preliminary boring in the proposed lake area to determine the nature of the soil, according to Vickerstaff. The administration feels it needs to develop the area in order to justify the possession of the land to the legislature. This would involve development of an outdoor laboratory for natural resources studies.

"The legislature just doesn't buy leaving things as is," said Vickerstaff.

Specht said that he had "gotten a letter asking what lands we had to sell." With the tight budget situation, several other universities have been pressured to dispose of "excess" lands. Concern was raised that UWSP would have to sell to a developer, who would build extensively in the area.

James Newman, college of natural resources, said that while he did not like the idea of destroying the natural state, he felt that this was an opportunity for Sentry and the university to control the development in this area.

Very little of the woodlands are within the city limits. The majority of the area is in the Town of Hull and is zoned for commercial purposes. Mention was made of the poor record of the Hull zoning commission from a natural resources point of view. The city cannot annex the land unless there is a street running through the area.

"The best way to insure development of an area is to build a road through it," said Burke.

One sub-division in the Town of Hull presently has a drinking water problem. A student pointed out that if the road is built and the land annexed, city water lines could be extended into it. Development would follow.

It was pointed out that Sentry was invited to send a representative to the meeting and they declined.

"Why isn't Sentry here? We have many questions we would like to ask them," said one student.

"It's the Sentry development that's forcing it (the road) to be built," said another student.

## Campus area split into separate wards

by Marc Vollrath

Stevens Point is apportioned into 13 different voting wards. Somehow, the university campus manages to fit into four of them. Some city officials call this campus split-up, "integration into the community". Other observers, however, call it "gerrymandering".

University students represent about one-third of the Stevens Point population. To date, however, no students have served on the City Council to look after the interests of the university community. Students have been candidates for alderman positions in the past, however. All were defeated.

George Guyant, 11th ward county board supervisor and former Stevens Point student, thinks a conscious effort is being made by city officials to break up student voting strength through apportionment. Guyant said he thinks that university "integration into the community" is nothing more than an attempt to "dilute" the student vote.

Guyant said he made one proposal to reapportion the city's wards and create "student wards" to assure student representation on the City Council. "one alderman was actually OFFENDED by the proposal." Even with strictly student wards, university students would never become a "majority" in the council. "There are just not enough students here," Guyant said. The City

council is afraid to let students gain any power.

According to Phyllis Wisniewski, city clerk, wards are apportioned strictly on a population basis. 1,850 individuals, not necessarily registered voters, are needed for each ward. A five per cent deviation from that norm is allowed.

According to those requirements, the Debot complex, itself, would easily qualify as a ward. When asked why the university was broken into four separate wards, however, (it had been five wards when Steiner and Delzell Halls were still oc-

cupied), Ms. Wisniewski said that it was to keep the campus from being "separate from the community."

While the campus population is about one-third that of the resident population of 23,479, the voting proportion could be much, much higher. Nearly all the students are of voting age, while the community's population includes many below the legal voting age of 18. Many students, however, are not registered to vote here, despite only a 10 day residency requirement. Students may register to vote

at the City Clerk's office in the City-County Building. The procedure takes only a few moments.

Another problem student voters face is a long walk to their polling places. The City Clerk conceded that this was a problem, considering many students are without transportation. When asked if a building such as the University Center could be used as a polling place in the future, Ms. Wisniewski said that such a place "might frighten off older people." She noted that other possibilities might be considered in the future.

The latest reapportionment for Stevens Point was before the 1972 primary elections. Presently, Burroughs, Knutzen, Watson and Thomson Halls are in the 11th ward; Schmeekle and Baldwin Halls are in the 7th ward; and Neale and Hansen Halls are in the 3rd ward. The four dorms of the Allen Center complex are in the 2nd ward.

Ms. Wisniewski said that residence halls are counted as having 250 persons each. According to that figure, the majority of the 2nd and 11th wards are students, with 1,000 dorm residents alone included in the 1,850 figure of each.

The election of aldermen and county board supervisors will be held on April 2. Anyone wishing to vote, and who has not yet registered, must do so by March 20.

# Senate seeks control of the student union

by David Hoercher

The Financial Allocations Committee (FAC) submitted a resolution that Student Government determine the occupancy and the office space in the University Center. The Student Government is to appoint a student advisory committee to work with the university staff on matters concerning the students and the University Center. The FAC also made a proposal to investigate the use of the University Center's old Text Rental room for future use by the Student Government Day Care Program. "The Day Care Center has researched the old Text Rental site," said Bob Badzinski, student controller.

UAB was approved a \$2000 advance for booking a band next year, said Badzinski.

FAC is considering a proposal for a spouse activities fee. Badzinski said people are missing activities because they cannot afford to bring their spouse. "I would personally oppose a five dollar spouse fee. It is good to have a spouse fee but it should be equitable to what full-time students pay," said Jim Hamilton, student senate president. Hamilton also commented that the Student Government budget for next year would be around \$7000.

The academic calendar for next year will be discussed at the next Academic Affairs Committee meeting. School will not begin in the middle of the week, said Sen. Jan Tenhula.

## Student dies

Beverly J. Vaness, a 20-year-old sophomore from Green Bay, was found dead in her dorm room-Sunday night.

Death was apparently self-inflicted, according to police, and foul play was not suspected. They said she had taken poison and an autopsy is being performed.

Ms. Vaness was an honor student majoring in home economics. She had last been seen around supper time and was found dead at about 11 p.m. in room 409, Hansen Hall.

Funeral services for Ms. Vaness will be held Thursday at 2 p.m. at the Lyndahl Funeral Home, Green Bay.

A lot of students have told me they would like spring vacation at the same time as other schools in the UW system," said Hamilton.

It was proposed that Gary Sorensen look further into the matter of students riding in the bus co-op. Perhaps Student Government would have to take out a contract with the co-op so students could ride, Sorensen said. "We could possibly ask for funding from the Chamber of Commerce for routes," added Hamilton.

In a meeting last week, the Chancellor allocated \$400 to the sub-committee on faculty course evaluation. The student advisory committee has received complaints from faculty opposing this evaluation. Most complaints were on the length of the survey.

The Campus Planning and Development Committee (CPDC) held its first meeting last week. Regarding student priorities, CPDC pointed out that many sidewalks are under water during the spring. Hamilton recommended that senators from the affected dorms write letters to Haferbecker before spring time.

Approval of new FAC members was passed. The new members are Jim Burg, Tom Scheel, Sue Kuether, Randy Puchett, Greg Klefisch and Amy Steinhilber. Two positions are still open.

Two newsletters have been received and will be distributed. "I am mainly concerned with the information getting out to the constituents," said Hamilton.

There will be a voter registration drive from March 4-8.

The Excellence in Teaching Award will be run through the Faculty Affairs Committee. Nominations should be submitted to them before March 4. Student senators will receive their ballots through the mail.

Senator Paul Ustruck submitted a proposal for the formation of a publicity committee to bring the students closer to Student Government. Sen. Tenhula thought this was a good idea because many students do not even know what district they are in. Action on this proposal

will take place at next week's meeting.

Badzinski asked that the Senate look into off-campus parking. "The city is deliberately trying to eliminate the parking and harass the student," said Badzinski. New parking signs specifying no parking between 8 a.m. and 4 p.m. were removed during Christmas break and then reposted one day before classes were to begin. Hamilton referred this matter to the Community Relations Committee.

Senator Bob Kung, business affairs committee, said there was a need for a more effective role of faculty and students in the Program Planning and Business Affairs Committee (PPBAC). "The student and faculty observers on PPBAC do not have votes," said Kung.

## Students might get free rides

An open meeting will be held tonight to discuss the possibility of free rides for students on the local bus system.

Student government is considering a proposal whereby they would pay \$100 to the Point Area Bus Cooperative (PABCO) for a one month experiment. During that month, students would be allowed to ride free.

The mayor's advisory committee has expressed opposition to the proposal fearing that students would swamp the bus system.

The meeting will be held at 7:30 p.m. in the Van Hise Room, University Center.

The Pointer is a second class university publication, published weekly during the school year in Stevens Point, Wisconsin 54481. It is published under the authority granted to the Board of Regents of State Universities by Section 37.11, Wisconsin Statutes. Publication costs are paid by the State of Wisconsin under contracts awarded by the State Printing Section, State Department of Administration, as provided in State Printing Operational Bulletin 9-24 of August 16, 1973.

## Philosopher to examine scientific objectivity

John Vollrath, philosophy department, will explore the age-old problem of scientific objectivity in a public lecture in the Garland Room of the University Center on Wednesday, March 6, at 3 p.m.

Defenders of science, Vollrath suggests, often say it gives us objective knowledge because it is based on facts and proofs.

After examining arguments of both the defenders and the critics of science and trying to show that neither party has an adequate notion of objectivity, Vollrath will suggest a more adequate one.

Vollrath's lecture is part of a series of lectures on philosophy sponsored by the Philosophy Department.

According to Vollrath, some critics of the sciences say they are ultimately based on assumptions which are not justified by facts or proofs. There are critics who have compared alternative scientific theories to alternative religions. Each theory allegedly includes dogmas for which there is no objective

## Budget hearings to determine cuts

by John Larson

Ongoing Financial Allocation Committee (FAC) budget hearings will play a big part in determining which student organizations will be hit the hardest by next year's student activities budget cut.

An approximate overall 20 per cent cut based on this year's originally adopted budget is being considered, according to Bob Badzinski, student controller, and Jim Hamilton, student government president.

"Due to an anticipated enrollment decline to 7,000 next fall from this fall's anticipated one of 8,500 we are forced to think in terms of this cut," said Badzinski.

"Budget hearing participants and other students who make their wishes known by their attendance and opinions at the hearings will help make the decisions as to which organizations will be cut, which will be relieved of funding or which will receive additional monies," he said.

Organizations which have diversified activities for students such as Arts and Lectures will be where funds will be concentrated," said Hamilton.

Some tough decisions will have to be made.

"People are not going to give up funds without a fight, but everyone has to realize what constraints we're working under.

"Last year we pared down everything a little-just watered down programs. We think cutting out some and beefing up the ones students want and need is a better approach.

"No cuts will be made before we receive FAC recommendations and Student Senate approval, and the measures pass the Chancellor's desk," said Hamilton.

"Students will decide which programs go and which stay," said Badzinski, "And one of the ways they can do this is voice their support for an organization they feel is worthwhile at the hearings." "At this point we can't

guarantee the existence of any program," he said.

Hamilton and Badzinski both indicated some sports may have to be dropped next year as a result of the budget crisis.

The following is a schedule of the FAC budget hearings.

1. Due date for budgets will be Feb. 22, 1974. Hearings will begin March 2.

2. Committee decided to hear budget requests and make decisions as soon as possible upon request. Any disputes between activity request and committee recommendation will be taken up at Senate meeting at the time of budget approval.

3. Hearings are scheduled: February 26 4 p.m. - Film Society - will be self-sustaining next year. Will present only anticipated revenue amount and admission cost for students and non-students.

March 2--Debot Center Meeting Room 9:30 a.m. Cheerleaders 10 a.m. Environmental Council

10:30 a.m. Women's Intramurals 11 a.m. TV Production 1 p.m. Black Student Coalition 1:30 p.m. AIRO

2 p.m. University Writers March 3--Debot Meeting Room 12 noon Debate 1:30 p.m. Student Government (Hockey Presentation) 2:15 p.m. Radio Station

March 5--Van Hise-University Center 4 p.m. Activities and ID 4:30 p.m. Day Care Center 5 p.m. Women's Athletics

March 16-- Communications Room - University Center 9 a.m. Arts & Lectures 10 a.m. University Theatre 11 a.m. Music Activities 1 p.m. Pointer 2 p.m. UAB

March 17-- Communications Room - University Center 12 noon Men's Intramurals 1 p.m. New Requests

March 19--Van Hise-University Center 4 p.m. Intercollegiate Sports 5 p.m. Open Requests

## Sentry describes complex planning

by Keith Otis

Construction on the new Sentry complex north of campus is expected to begin this spring at an estimated cost of twenty-five to thirty million dollars. It will take less than three years to complete. The building site is an 80 acre parcel located between Division Street, Northpoint Drive, Reserve Street, and the highway 51 bypass.

The remaining Sentry buildings will be kept by the company to remain in use after the new building is completed.

Gerry Good, Edwin Sanborn and Tom Nisbet, Sentry personnel in charge of planning the project, explained that Stevens Point

was chosen as Sentry's international headquarters and that expansion was elected to be done here. Central location in the state and a locally high available work force were the predominant reasons for expansion in Stevens Point.

Before construction plans for the area north of campus were established, extensive site evaluations were made, said Sentry personnel. These included population studies which found employees scattered throughout a 25 mile radius, state and city traffic studies, DNR and highway commission soil studies, subsurface and drainage evaluations, a major vegetation analysis and studies into the availability of sewers, water and electricity.

One idea is the non-existence of parking lots around the new complex. Instead of a four-acre building and 16 acres of parking lots for the building's two thousand employees, there will be a four-acre building built on top of a multi-layer parking structure.

One of the more delicate environmental problems in the area is drainage, said Sentry personnel. Because of a high water table, Sentry is constructing a series of four holding ponds around the complex to control rapid runoff. Each pond will have water level controls, wading edges for animals and will be stocked with fish. To avoid runoff problems during construction, a moat will be

dug around the building site until the ponds are completed.

Another plan mentioned by Sentry personnel includes establishment of transitional zones in the natural vegetation both for wildlife and aesthetics. The complex will have double insulated glass to avoid heat loss, controlled lighting to conserve energy, heat reclamation, and an open building structure to cool more easily in the summer because air conditioning takes more energy than winter heating.

When the building is completed it will include a data processing center, underground parking, maintenance shops, a cafeteria and a 750-seat

auditorium for company and community use.

Sentry personnel expect that at the completion of construction in 1977, the land supporting the new Sentry complex will be more environmentally sound and aesthetically pleasing than it is at present.

A wildlife specialist and a botanist helped Sentry determine how the complex could be constructed with the least amount of environmental degradation, said Sentry personnel. It was decided to husband the area and to optimize what is naturally on the site. In other words, Sentry intends to manage and preserve the natural plant and animal populations which presently inhabit the area.

## U.A.B. IS PRESENTING GREAT STUFF THIS MARCH!

FEB. 28-MAR. 1 UAB Coffeehouse - Morgan And Barnes (a duo from Milwaukee) 9-11 p.m. 25c NEW Coffeehouse.

FEB. 28-MAR. 1 UAB Cinema-"Joe" 8 p.m. 95c Wisconsin Room U.C.

UAB Cinema "Candidate" 8 p.m. 95c Wisconsin Room Union

## Graduates open gallery show

A new gallery show featuring works of five recent graduates of UWSP will open Sunday, March 3, in the Edna Carlsten Gallery of the Fine Arts Center.

A reception to honor the artists will be held from 3 to 5 p.m., and will be open to the public.

The exhibition of these five artists will continue through March 16. Gallery hours are 10 a.m. - 4 p.m., Monday through Saturday; 7-9 p.m., Monday through Thursday; and 7-9 p.m. all evenings

when special events are scheduled in the Fine Arts Center.

The exhibition has been planned as one of a series which will focus on the continuing accomplishments of some of the art department's more distinguished former students, said Gary Hagen, UWSP art professor who directs the gallery.

Entitled "Five Recent Graduates: Cutler, Dablow, Kalke, Kosolcharoen, and Newhall," the show consists of approximately 50 works by the young artists, including

paintings, drawings, prints and photographs.

"The exhibition is actually a collection of five one-man shows," Hagen explained, "each providing a unique, personal direction and point of view. An exhibit like this will help present students consider the continuation of their own development and provoke a sense of wondering and curiosity about the direction of their own work—what it may be becoming or moving toward."

## Film Society presents comedy series

University Film Society is presenting Comedy Capers, a six-flick series beginning Feb. 27 and 28 with *The Big Store* (27) and *Adams Rib* (28).

On March 6 and 7 the Film Society is presenting *Arsenic and Old Lace* and *The Thin Man*, in that order.

*Arsenic and Old Lace* (with Josephine Hall, Jean Adair and Cary Grant) is about two Brooklyn spinsters who make a hobby of dosing old men with arsenic. By inverting the traditional concept of murder as a crime of passion and turning it into ingenious diversions for pixillated old ladies, wholesale slaughter is an innocently delightful subject.

There's a big bonus with this one. During the running of this film, its director, Frank Capra, will be on campus. Watch for that one.

*The Thin Man* is about Nick Charles, A retired detective vacationing in New York. He is drawn into solving a murder mystery because everyone took it for granted that he really had come to town for the case. This one received a triple A rating from *Literary Digest* in 1934.

*We're No Angels* on March 13 and *Stalag 17* on March 17 conclude the series.

*We're No Angels* stars Humphrey Bogart, Aldo Ray, Peter Ustinov, Joan Bennet and Basil Rathbone. Three convicts break out of Devils Island and decide to take over the store of a French shopkeeper. Just as they are about to do so, however, the auditors arrive and the three are forced to pretend to help check the store's accounts.

*Stalag 17* is the inspiration for such antics as *Hogan's Heroes*. The story takes place in a notorious German prison camp during World War II. Sefton, a cynical, sharp-tongued G.I., is suspected of being an informer. William Holden, who plays Sefton, then devises a scheme to trap

the true informer and clear his name. The cast includes William Holden, Don Taylor, Otto Preminger, Robert Strauss and Harvey Lembeck.

Each of the film presentations during the comedy series will be shown twice—nightly at 7 and 9. For those serious film buffs there is a special pass available for the six-film series. Since this is a special program, no Film Society or UAB passes will be accepted.

Passes are available at Emmons, City Newsstand and University Center Information Desk. Tickets are available at the door.

## Emperor Jones reading scheduled

by Luanne Richardt

The Studio Theatre will be giving a play reading with lights Feb. 27, 28 and April 1, 2 at 8 p.m. The one-act play, "The Emperor Jones" by Eugene O'Neill, is a grim tragedy of black weakness and white humor. This play may prove to be a letdown after *Black Culture Week*. Jones, who will be played by Jeff Young, is an ex-pullman porter. He is also an ex-convict. With expertise known to the criminal, he makes his escape from prison

and goes to the West Indies. There he sets himself up as royalty among the natives for profitable deceit. The natives decide to rebel. But Jones escapes and finds himself caught in the night in the denseness of the woods. He stands in the grip of his fears and superstitions, seemingly reverting to his African inheritance.

The play calls for three black roles and one white. As yet all the roles haven't been cast. Because of the major production, the Studio

Theatre is getting to a slow start with "The Emperor Jones" and the play will be done in playreading fashion. The play may work with actors reading scripts but the intensity of the drama may be lost as the actors fumble through the pages. There will

be some costumes, lighting and props if the Studio Theatre crew can make it by show time.

Jeff Young commented that "The play may be outdated in plot and character. But the play itself shows acting artistry."

## Protective services report

by Kathy O'Connell

The following incidents have been reported to UWSP Protective Services.

A cassette tape player, valued at about \$110, was stolen from a car parked in lot W on Feb. 11. The car was locked at the time and entry was made by breaking a window.

A candy machine was broken into in Baldwin Hall on Feb. 1. The loss and damage was at estimated at \$10.

Approximately \$22 was taken from a brown leather, shoulder bag left unattended at the Learning Resources Center on Feb. 3.

Approximately \$30 was taken from an unlocked dresser drawer in Smith Hall on Feb. 10.

A candy machine was broken into in Burroughs Hall on Feb. 12. The loss and damage was estimated at \$11.

A left rear wheel (tire and rim) was taken from a Volkswagon parked in lot J on Feb. 13. The tire was a Deluxe, black, four-ply nylon, mud and snow tire, valued at about \$35.

A left rear wheel (tire and rim) was taken from a Volkswagon parked in lot L on Feb. 13. The tire was a black Semperit, rayon, four-ply tubeless.

A car window, front passenger side, was broken while parked in lot P on Feb. 14.

Gallery director Gary Hagen prepares a new exhibition which opens Sunday and runs through March 16 at the University of Wisconsin-Stevens Point. Entitled "Five Recent Graduates: Cutler, Dablow, Kalke, Kosolcharoen and Newhall," the show consists of a wide variety of styles by the young artists, including Jerry Cutler's impressionistic Wisconsin landscape (on wall) and John Kosolcharoen's hard-edged silk screen print.

# Job Interviews Set

February 28, 1974

THE POINTER

Page 5

All seniors and graduates are urged to take advantage and sign up for the following interviews by contacting the Placement Center, 106 Main Building, at their earliest convenience. Literature concerning the companies listed below is available in our placement library and should be read in preparation for your interview. Attire for placement interviews should consist of a coat and tie or an appropriate dress.

March 4 and 5, Packaging Corporation of America, Evanston, Ill. All majors, especially paper science graduates, for positions in

sales, marketing, accounting, and production management.

March 5, Employers Insurance of Wausau, Wausau, Wis. All majors - especially in liberal arts or business, systems, mathematics or computer science background. Positions as underwriters in the area of group, property and casualty insurance and such positions do require individuals open on location. Systems jobs will be located in home office at Wausau.

March 5, Saga Food Service, Kalamazoo, Mich. All business related majors.

March 5, Racine Public Schools, Racine, Wis. will be

on campus interviewing from 9 a.m. - 4 p.m. Vacancies: K-6, Home Ec, Library, Science, Business Educ., Girls Phy. - must have health minor & WSI, Special Education, Math and General Science.

March 6, Manitowoc Public Schools, Manitowoc, Wis., will be on campus interviewing from 8 a.m. - 4 p.m. Vacancies: Jr. High Art, Business Education, French, German, English, librarian, Girl's Phy. Ed., general science, psychology, broadfield social studies.

March 11, Mead Corporation, Dayton, Ohio. All pulp and paper science graduates and

forestry majors for positions in engineering, paper salesmen and foresters.

March 11, 12, 13, and 14, U. S. Marine Corps. All majors.

March 11, Internal Revenue Service. All majors - especially in business and accounting. Position of internal revenue agent requires an accounting major, all other positions require only a college degree.

March 12, Gimbels, Appleton, Wis. All majors - especially home economics in fashion merchandising for positions in retail management training programs.

March 13, Social Security

Administration, Wisconsin Rapids, Wis. All majors interested in career opportunities with the federal government.

March 13, Speed Queen, Ripon, Wis. All business administration and speech majors for positions in service-sales management.

March 13, Dun and Bradstreet, Green Bay, Wis. All business related majors.

**SPECIAL NOTE:** Questions concerning Federal Civil Service Positions or Testing should be directed to the toll free Milwaukee information center (1-800-242-9191) and not the local post office.

This is when the long hours of practice pay off. When you know you're as good as you can be. When you can enjoy it, the way it was meant to be.

It's the same with Pabst Blue Ribbon—it takes a lot of time, patience and skill to create our good old-time flavor.

Pabst—it's the way beer was meant to be.

**PABST**  
Good old-time flavor.  
The way beer  
was meant to be.

# Great Circle project in beginning stages--

by Albert Stanek

Lyle Updike is a student here. He is chairman of the Environmental Council, a university organization designed to maintain a quality environment through education and action.

Six years ago Lyle Updike lived on campus.

Five years ago he coordinated Project Survival, the first environmental teach-in coordinated with the first Earth Day. He dropped out of school that semester to devote all of his time to Project Survival. Soon after that he was drafted.

Four years ago Lyle Updike lived in the jungles of South Vietnam.

Right now Lyle lives in a geodesic dome in the town of Dewey. The dome was built last fall by Lyle with the help of a few friends.

A geodesic dome is a building designed to retain heat and utilize the most possible living space. It combines the structurally desirable qualities of a tetrahedron (like a triangular pyramid) and a sphere. The word geodesic means like the shape of the Earth.

This uniquely beautiful structure is situated in a small stand of birch and maple trees. It's miles away

The world of books has much to offer the alternate lifestyle.

SIMULATED SITE FOR THE GREAT CIRCLE ENVIRONMENTAL RESEARCH CENTER, INC.

*Lifestyle continued*

from other buildings. The sound, or rather the lack of sound, is what impresses me the most about Lyle's home. There is no doorbell or ticking automatic timepiece. You don't hear the commercial harpings of a television set. You don't even hear what's number one on the super-hit survey. The only sounds are those made by man and nature with an occasional interruption by a "fun-loving" snowmobiler.

"People that are into alternate lifestyles aren't escapists. If you have to generalize I'd say for the most part they are people trying to get away from competition and into cooperation." That's what Lyle said when queried about those untenable words "alternate lifestyle." "I feel that a meaningful lifestyle should reflect the environmental ethic. Technology has moved so fast in the last generation that we've discarded a lot of useful physical and cultural concepts. Technology has allowed us to live at an artificial caring capacity."

**Caring capacity.** Those aren't just two words that sound good together. Caring capacity is the amount of life-supporting energy that any given piece of this earth can support.

Lyle, like most of us, has formulated his philosophy around ideas put forth in books he has read. Two of those books are *Walden Two* by B. F. Skinner and *Operation Manual for Spaceship Earth* by R. Buckminster Fuller.

B.F. Skinner is a behavioral psychologist and philosopher. He is the father of behavior modification. R. Buckminster Fuller is an engineer, inventor, philosopher, designer, and mathematician. He invented the geodesic dome. Both of these men are alive today.

Also alive today is an idea called *The Great Circle*. *The Great Circle* is a concept devised by Lyle and a few of his friends. It is a plan for an alternate lifestyle community in the Stevens Point area.

Lyle Updike's dome was built this fall as the first step toward making *The Great Circle* a physical reality.

"The great circle will be more than an alternate lifestyle community," said Updike. "It will serve not only as a reordering of the social structure but as an environmental research center. It is something that offers interested people an opportunity to do something right here, right now about achieving compatibility with the environment. It is designed to harness as much of the natural energy available and at the same time reduce consumption."

"The great circle is still only in the beginning stages," he added. "People are needed. If you're interested in changing your way of living the circle concept offers you an opportunity to act. A prospectus on the great circle is available to anyone interested."

Lyle Updike doesn't claim that the Great Circle is the answer for everyone. For him it is a vehicle. As he put it, "I'm on a voyage toward a lifestyle totally compatible with the environment. I'm closer to that lifestyle this year than I was last year and hopefully I'll be closer next year. Achieving the ultimate lifestyle isn't going to happen overnight."

◆◆◆◆◆

*I live on Earth at present and I don't know what I am. I know that I am not a category. I am not a thing - a noun. I seem to be a verb, an evolutionary process...*

*R. Buckminster Fuller*

◆◆◆◆◆

This is the third and final article in a series. The series originally was about alternate lifestyles. "Getting back to nature" in particular.

"Getting back to nature." Those words seem kind of ineffectual right now. To me they bring to mind a cop-out cereal commercial.

"Compatibility with the total environment." That's more like it.

In the first two articles we visited with the Hogan family who are "...drawing a balance with the goods of technology and the goods of country living," and with some people on a communally-run organic farm. They used the words "...giving and taking with nature..."

The rationale behind this series of articles was to give us a look at people living alternate lifestyles and perhaps open our minds to a few new ideas about lifestyle.

I asked Lyle Updike to provide us with a formula for achieving a lifestyle compatible with this fast-moving planet. This is what he said. "All that's necessary is for someone to take that first step. To inventory his lifestyle and ask himself what he really wants to do and what he's doing now that isn't really necessary to meet that end."

# UWSP POINTER Campus Calendar

Thursday,  
February 28

**CHRISTIAN SCIENCE COLLEGE ORGANIZATION:** 6:15 p.m., U.C.M. Building on College and Fremont. All welcomed to attend our weekly testimony meeting. "Let this mind be in you, which was also in Christ Jesus."

by Mary Anne Moore  
The tutoring program originated because many instructors and students found a need for more help with course work, Johnson said. The ratio of students to teacher in many classes makes individual help a near impossibility.

The tutoring program, however, provides students and teachers with an opportunity to work out individual problems on a one-to-one basis, Johnson said.

"One of the high points of the program is that everyone involved—teachers, students, departments and deans—is doing a great job," Messing said.

Those faculty members who are directly involved in tutoring receive no extra pay, he said. Some get a very minimum of load relief, while others are teaching a full load and tutoring at the same time.

"One of the problems I see is that we are not reaching the students who need help the most," Messing said.

"Many of the students who are presently taking advantage of the program are B and C students who want to get A's and B's," he said.

"This is good, but we also want to reach those students who have real learning problems."

Many students are behind when they first enter college, Johnson said. We hope that the tutoring program will help to eliminate the gap between where they are when they enter and where they

should be in order to work.

"We are currently evaluating the program success last semester," Messing said. "We are looking at the number of contacts made, the number of students served, object performance and feedback plans."

Central Administration called together a task force last fall, whose purpose was to set up a method of evaluating the program throughout the system, Johnson said. After three meetings, the task force was dissolved by the Administration due to the energy crisis.

"We had hoped to get future planning and present the Board of Regents and the state legislature information on exactly what we need," Johnson said. Unfortunately, the task force didn't get far.

The tutoring program includes the following: READING AND STUDY SKILLS LABORATORY (subjects) 06 Collins Classroom Center Review of system methods of student development and comprehension and retention Assessment of study environment personal setting and decision making Lecture notes Preparation for examination Development of rea

**HISTORY ASSISTANTSHIP OFFERED:** Professor Don Dietrich, chairman of the Graduate Committee of the History Department, has announced that History majors or minors who wish to be considered for a 1974-1975 graduate assistantship in History should submit their applications and credentials to the Department of History (424 COPS) by March 1, 1974.

**LAW SCHOOL ADMISSION TEST:** The Law School Admission Test will be given at UWSP on Saturday, April 20, if there are at least fifteen candidates interested in taking it here at that time. Individuals interested should contact the Counseling Center as soon as possible for application materials. Completed applications, accompanied by fees, must be turned in to the Counseling Center, 014 Nelson Hall on or before Thursday, March 7.

The Philosophy Club will hold its first meeting of the semester on March 6, at 8 p.m. at the home of Pat and Peter Wenz, 1715 Lincoln Ave. A talk entitled "Philosophy and Real Life" will be conducted by Bill Kluck, Nancy Parish and Chris Lewis. Everyone is welcome, you don't have to be a philosophy student to attend. Refreshments will be served.

**GRADUATE ASSISTANTSHIP IN BIOLOGY:** There will be an organizational cheerleading meeting for anyone wishing to tryout for next year's squad, March 6-7 p.m.; toward the MAT or MST degree, should send a letter of application and credentials (transcripts and letters of recommendation) to V. A. Thiesfeld, chairman, department of biology, by April 1, 1974.

**INFORMATION ON HEART ATTACKS:** For current medical advice regarding early warning signs of heart attack call 346-2000.

**ART EXHIBIT:** Edna Carlsten Gallery, now through March 16. Exhibits by some recent graduates of UWSP: Cutler, Dablow, Kalke, Kosolcharoen, and Newhall.

**Level comprehensive examinations in history and social science for Master of Science in teaching, will be given Friday, April 19, at 1 p.m. in room 472 of the College of Professional Studies (COPS) Building at the UWSP.** Candidates in history will report to Donald Dietrich in room 427 COPS. Candidates in social science will report to Guy Gibson in room 410 COPS by April 5, if they plan to take the exams.

## Marines recruiting

The Marine Corps Officer Selection Team will visit UWSP on March 11, 12, 13, and 14 to interview students interested in becoming commissioned officers.

The Officer Selection Team will be located in the front lobby of the Student Union (on Reserve Street) from 9 a.m. to 3 p.m. to provide information pertaining to Marine Corps Officer programs, according to Captain C.D. Cross, the marine corps officer selection officer.

The Marine Corps offers programs leading to a commission as a 2nd Lieutenant. These programs are open to undergraduates as well as graduating seniors. To be eligible, students must have a "C" or better average, pass a written examination, be physically qualified and have the leadership potential required of a Marine Officer.

**EDITORS NOTE:** The next issue of the POINTER will be March 7. All material submitted for publication in that issue (including ads and campus calendar material) must be submitted by Friday noon, March 1. Remaining issues of the POINTER will be printed on the following dates: March 7, March 14, April 4, April 25 and May 2.

# Students research animals

by Steve Lybeck

Do you know anything about the Hoy's pigmy shrew, the black-backed three-toed woodpecker, the red spotted newt or the starhead top minnow? A group of 12 wildlife and biology students plan to do research this summer to gather information on such certain Wisconsin animals.

The State Department of Natural Resources (DNR) published a list in 1972 of animals in the state that are categorized as "undetermined status." This list includes over 200 Wisconsin animals. Some are quite common while others may be endangered or extinct. One of the goals of the study is to help determine the status of these animals.

The objectives of the study are to 1) find an acceptable method for determining the status of a species, 2) determine the distribution and abundance of the species in question within the state, 3) establish a systematic, statewide method of continued census, 4) determine the need and make recommendations for future studies of rare and "endangered" species in Wisconsin, and 5) initiate a preliminary determination of what can be done to restore or improve habitat for these animals.

The 12 students involved in the study were chosen from a group of 50 applicants. Evaluations were based on qualifications for some phase of the study through related

courses and experience of each student.

Alice Wywialowski, a junior in wildlife-game management, and a member of the student chapter of wildlife society, was chosen as project director. Ray Anderson, College of Natural Resources (CNR), is the group advisor.

The study was divided into four major areas: birds, mammals, reptiles and amphibians, and fishes.

The bird phase will do fieldwork in the Stevens Point area, to gather more information on only one species, the Upland Plover. The main focus of activity will be an attempt to consolidate records of abundance, nesting and distribution of 167 species of Wisconsin birds. The Wisconsin Society for Ornithology has 16,000 cards recording sightings. The group will attempt to computerize this information, thus laying the foundation for an updated and continuing census. There is hope that many of the birds classified as "undetermined status" can be reclassified as "secure." The study will show where attention should be given to a particular species. The people involved in the bird phase are Mark Davis, biology major, Mark Nelson, biology and Robert Welch, wildlife-game management.

The fish phase is concerned with eight species of fish that are in the "undetermined status" category. Three river systems will be sampled, the Yahara, the Baraboo and the Black. Richard Berowski and Barry Johnson, both wildlife (fisheries) and biology majors, will be working with this part of the study.

The reptile phase will concentrate on gaining information on the wood turtle. The areas of study will be the Plover, Tomorrow, Wisconsin and Yellow Rivers.

The mammal phase will concern 28 species in six counties surrounding Portage County. Many of the animals to be studied are rodents in the vole, lemming and shrew families. Students working with the reptile and mammal studies are, Doyle Reynolds, wildlife-game management; Don Sasse, wildlife and biology; Don Zuehlke, wildlife-game management; Bill Fraundorf, wildlife-game management; Mike Wipfli, wildlife-game management and Ed Moberg, biology.

The group has compile a 100-page research proposal which consists of a detailed summary of the intended study along with recommendations from noted authorities throughout the state. The group hopes to receive a \$20,000 grant from National Science Foundation to finance their project. The proposal is presently being reviewed and the group hopes to have an answer by mid-March.

## Fishing picking up

by Mike Yauck

According to the Department of Natural Resources, fishing has been picking up around the state.

In Southern Wisconsin, northern pike have been hitting on Beaver Dam lake and Fox lake is producing excellent panfishing. Park and Swan Lakes in Columbia County are supplying good catches of panfish, while Governor Island in the Madison area remains a hot spot for walleyes between 6:30 and 8:30 p.m. The central region reports slow fishing. Further north in Vilas and Oneida Counties, fishing has been good on Big Arbor Vitae Lake and Lake Tomahawk. The entire northern area reports excellent conditions for outdoor activities.

## Environmental law enforcement offered as a new minor

by Lloyd Nelson

Environmental law enforcement will be a new minor open to students at the UWSP.

According to the Wisconsin Law Enforcement Standards Board, no similar training will be offered at any other Wisconsin school for at least five years. The program here is considered a pilot project subject of evaluation and revision.

The program was added to the UWSP curricula at a recent Faculty Senate

meeting. It will require completion of 22 credits ranging from courses in physical education to natural resources.

Daniel Trainer, dean of the college of natural resources, said he is optimistic that the minor will improve employment opportunities for the students who pursue the program.

Presently, personnel recruited into the field of environmental law enforcement in Wisconsin must complete 240 hours of training

before receiving official certification.

In the past, no natural resources program offered sufficient training to meet these requirements. The standards board has certified that the new minor will meet minimum environmental law enforcement training standards.

Paid Position-\$1.75/hr.-7 hrs. a week-Apply at POINTER OFFICE 2nd Floor U.C.

# Titans edge cagers

by Jim Habeck

For the UWSP cagers, away games were a nightmare this season. The Oshkosh Titans did nothing to dispel that nightmare Saturday, dumping the Pointers 73-69 while finalizing the UWSP road game record at a miserable 3-10.

Greg Holmon, the Titans' 6-6 center, played a key role in the Oshkosh victory. Ranked tenth nationally in rebounds, Holmon added 10 to his conference leading total, led the Oshkosh scoring with 18 points, and blocked six Pointer shots.

Matt Smith, Pointer center,

retaliated with 20 points, and 11 rebounds of his own. Bruce Weinkauf, Dave Welsh and Tom Enlund backed Smith up with 14, 13, and 12 points, respectively.

The titans jumped to an early 28-23 lead, with Smith accounting for 12 UWSP points, then increased their lead to nine. By half the Pointers reduced the margin to 42-37.

The Titans jumped to an early 28-23 lead, with Smith accounting for 12 UWSP points, then increased their lead to nine. By half the Pointers reduced the margin to 42-37.

Despite outrebounding the Titans 21-19 the second half, Pointer turnovers and fouls enabled Oshkosh to maintain their lead. The Pointers committed 16 second-half turnovers to the Titans' 11, and were guilty of 15 fouls to the Titans' nine.

A late spurt by the Pointers enabled them to outscore the Titans 8-1, and cut the Oshkosh lead to 70-69. Oshkosh's stalling offense, however, kept the Pointers fouling and the ball in Titan hands. Two Pointer turnovers within the final minute killed all hope for a come-from-behind Pointer win.

Question no. 5 - THIS PITCHER WON 148 GAMES IN FIVE SEASONS, YET HIS TEAM NEVER WON A PENNANT DURING THOSE YEARS.

- a. Denny McLain
- b. Walter Johnson
- c. Dick Nen
- d. Dizzy Trout
- e. Manny Sokol

Question no. 6 - WHICH BASEBALL PLAYER WAS KICKED OUT OF ONE MAJOR LEAGUE GAME BEFORE IT STARTED AND A DIFFERENT GAME AFTER IT HAD ALREADY ENDED?

- a. Leo Durocher
- b. Festus Hagen
- c. Billy Martin
- d. Roy Weatherly
- e. Phil Linz

Question no. 7 - WHO HIT 69 HOME RUNS ONE YEAR IN THE AMERICAN ASSOCIATION MINOR LEAGUE?

- a. Al Kaline
- b. Joe Hauber
- c. Nate Colbert
- d. Vern Fuller
- e. Sam Wyche

Question no. 8 - WHO HOLDS THE PRO FOOTBALL RECORD FOR THE LONGEST PUNT IN ONE GAME?

- a. Jerrel Wilson
- b. Steve O'Neil
- c. Don Chandler
- d. Otis Campbell
- e. Yale Lary

Question no. 9 - THERE ARE AT LEAST TWO PROFESSIONAL BALLPLAYERS WHO HAVE CUT SHORT THEIR PLAYING CAREERS BY RUNNING THEIR TOES OVER WITH LAWNMOWERS. THEY ARE:

- a. Hery Finkel and Luke Jackson
- b. Lou "the Toe" Groza and Roger Ansell
- c. Curt Simmons and Dick Cunningham
- d. Dizzy Dean and Joe Medwick
- e. Chris Schenkel and Bud Wilkinson

Question no. 10 - NAME THE AMERICAN BASKETBALL ASSOCIATION PLAYER WHO ONCE BROKE TWO BACKBOARDS AND RIMS WHILE DUNKING IN ONE GAME.

- a. Gus Johnson
- b. Charlie "Helicopter" Heintz
- c. Connie Hawkins
- d. Julius "Doctor J" Erving
- e. Sam "the Bamm" Cunningham

Question no. 11 - WHICH MANAGER TRIED TO SIGN HERMAN MUNSTER TO A PROFESSIONAL MAJOR LEAGUE BASEBALL CONTRACT?

- a. Herman Franks
- b. Walt Alston
- c. Alvin Dark
- d. Leo Durocher
- e. Earl Monroe

# Hockey season ends with tie

by Phil Esche

Dick Kottke's 1973-1974 Pointer Hockey team finished their mediocre season on a disappointing note by tying Marquette 2-2 at the Portage County Ice Arena.

A crowd of some 300 fans, turned out with hopes of seeing Point revenge an earlier 4-3 defeat at the hands of the Warriors.

From the outset, the Pointers showed the effects of two shutout defeats at the hands of St. Cloud the previous two nights. Marquette was yet to unwind from a long bus trip that forced them to show up 30 minutes late.

Two minor penalties gave Point a two-man advantage. At the 8:03 mark of the first period, Pat Beyglar fed Terry Flatley for the first score of the afternoon.

Marquette dominated the action in the second period for the first 14 minutes and tied the game at the 12:25 mark on a disputed goal. The Pointers looked in disbelief when the referee signaled a score after Tim Costello assisted Bill O'Connell on the goal.

"The puck hit off the iron and Paul (Kapla, the goalie) kicked it out," stated Kotke, still upset after the game. "There is no way that was a score."

The Pointers had one man advantages twice during the final 12 minutes but failed to capitalize. The period ended 1-1.

Tim Gafney, playing his last game for the Pointers, took a Mark Cummings pass in front of the net and scored to make it 2-2 at the 1:38 mark. A mere 1:32 later Gafney was the victim of Warrior frustration as the games sole fight broke out. As a result, Marquette lost the player involved and had to skate short handed the rest of the game. Despite the one man advantage, Point missed numerous scoring chances and time ran out.

Controlling the opening action of the third period, Marquette needed only :35 to score the go ahead goal. Costello rebounded a shot from the right wing to make it 2-1.

The Pointers finished their season with a 9-14-1 record.

# Bears, ROTC, intramural victims

by Mark Lubeck

The major intramural basketball contest saw the Athletes Feet overpower the Golden Bears 66-48. Steve Norlin netted 16 points for the Athletes Feet. In the Organization League BSC 1 outlasted ROTC 66-39 behind 20 points by Chuck Johnson.

In dormitory competition 4 W. Knutzen outplayed 2 E. 44-29, as Mike Kamrath scored 18 points for 4 W. In Baldwin competition 2 W. dumped 1 E. 54-21. Mike Swanson and Neil Kaufman shared scoring honors for 2 W. with 12 points each. Sims' 3 N. hammered 1 N. 79-23, with 22 points by Bill Becker. Also in Sims competition, 4 N. got past 3 S. 39-35. Wayne Moll led 4 N.

with 15 points. In a close contest 1 S. got past 2 N. 52-51, as Roger Messar netted 16 points for 1 S. In Pray competition, 3 W. upset 4 E. 47-42 with Leroy Duerst totalling 17 points for 3 W. Hyer's 1 W. defeated 1 E. 79-40.

SPE fraternity outscored SP 65-43 while TKE got past the Jets 42-40.

Jim Clark, director of intramurals said that the game which will decide the intramural basketball champion will be played Tuesday, March 12, at 8:15, and will be televised regionally. The preliminary game deciding the third and fourth place finishers will be played at 6:15 that evening.

# Stump the Sports Stars

by John Loomis, Randy Wievel and Tim Sullivan

Q. When Bill Veeck sent that midget up to bat, who did he pinch hit for? Bob Breitstein.

A. Eddie Gaedel, the midget, hit for Francis Saucier and walked on four pitches.

Q. All right, you guys. I sent in a question last week and it wasn't answered. I bet you don't know the answer. So here it is again. Our city league team was playing Mint Bar and one of our players was shooting a free throw when one of Mint's players belched, causing the shot to be an air ball. Should this have been a technical foul? Dennis Melvin.

A. According to NBA rules, if the referee felt that the belch was deliberately meant to disconcert the shooter a sub-

stitute shot should have been awarded. No technical should have been called.

Q. Can you tell me who wins the NHL Showdown contest which is on during every televised hockey game? Johr Johnson.

A. If Jim Pappin of the Chicago Blackhawks doesn't, we'll eat a Zamboni!

Q. What is the difference between men's and women's basketball? Art Fern

A. We wouldn't touch this one with a fork.

Q. What is the Arkansas Hog Call? Debbie Scheppler

A. It is the favorite cheer of the University of Arkansas Razorbacks and is probably the most famous of all college cheers. It goes:

Wooooo0000000, Pig, Sooeey. Wooooo0000000, Pig, Sooeey. Wooooo0000000, Pig, Sooeey, Razorbacks!

Q. How many times have the New York Rangers won the Stanley Cup? Dave Nachman.

A. The Rangers have taken the Cup three times, the last being the 1939-40 season. Since Rangers are by far the highest paid team in hockey there is a lot of grumbling over their current standing and their complete inability to regain the Cup.

Q. Is there any truth to the rumor that Gloria Steinem has demanded that Oregon State University change their nickname? Ray Oylar.

A. Not that we know of. If the Oregon State Beavers can beat the Walton Gang there is no reason to change.

# POINTER

## Cagers lose finale

by Jim Habeck

For the second consecutive season, UW-Whitewater's basketball team has earned a share of the conference title. They accomplished the feat Tuesday while defeating the Pointers soundly, 77-59.

Five UWSP seniors played in their last game, and one got the Pointers off to a good start. Bruce Weinkauff hit an outside shot to give the Pointers a 2-0 lead. For UWSP, it was the sole lead of the game.

Whitewater's Warhawks employed a full-court zone press most of the game, and forced the Pointers into 30 turnovers. Although the Pointers outscored the Warhawks 32-29, they also gave up 12 more shots and committed six extra fouls.

Seven Pointer turnovers in the initial seven minutes gave the Warhawks a slight 14-10 lead. Feeding the ball to center Bob Stone, the Warhawks increased their lead to 28-18, then settled for a 36-26 half-time margin.

The second half began evenly, the Pointers out-scoring Whitewater 8-6 prior to a Warhawk time-out. Two consecutive baskets by Warhawk Elmer Polk, however, sparked the Warhawks and put the game out of reach at 55-40.

The Warhawks surged to a 19 point lead, before a Point surge and Matt Smith basket cut the margin to 13. Senior Steve Wittman had a 3 point play with

1:25 left, but the Pointers remained out of contention and lost, 77-59.

Weinkauff and Dave Welsh led Pointer scoring with 12, while Bob Omelina chipped in 10 points. Warhawk center Stone had 21 points and nine rebounds.

For the second consecutive year, UWSP finished conference play with a 4-12 record. The Pointers were 9-17 overall, with a 3-10 away record, and a 6-7 mark at home.

by Tom Enlund

Gaining momentum for the conferege meet, the UWSP wrestling team easily won two matches last week. The Pointers won 34-13 at La Crosse Feb. 19 and defeated Eau Claire 40-3 Feb. 21.

The two wins gave the Pointers a 7-1 conference and 10-4 overall record. Their only conference loss was to Whitewater who will host the conference meet March 1 and 2 and are favored to win according to UWSP coach Reg Wicks. In the Pointers' eight conference meets, only Whitewater and LaCrosse have scored in double figures. UWSP has scored over 30 points in all but two.

Wicks found significance in the two most recent wins.

"These are big wins for us," said the coach. "It shows there has been no carryover from three losses (Whitewater, Mankato Sate and South Dakota) we had early in the month."

Against LaCrosse the Pointers were led by Rick Hughes (126), Pee Wee Mueller (158), Russ Kruger (190) and Joe Johnson (Hwt), who all won on pins. Other Point winners were Pete Doro (118) by a 8-0 score; Luby Sidoff (134), 6-1; and Wayne Hintz (167), 11-0. Pointer Cal Tackes (142) lost 11-1, as did teammates Warren Popp (150), 6-0, and Rick Neipert (177) by a pin.

"Tackes wrestled a real good boy but I was disappointed in Popp and Neipert," Wicks said. "Popp didn't look sharp and didn't really do anything. Neipert should have won but he kept getting caught. I don't know if it was something psychological or if they just had a bad day or what. Actually, three of their better wrestlers didn't compete because of injuries and illness so the meet could have been closer."

The Pointers came close to shutting out Eau Claire as UWSP wrestlers won nine of the 10 matches. The only Pointer to lose was Doro (118) but Wicks was not overly concerned.

"Eau Claire has real good wrestlers at 118 and 190 so I knew we would have trouble there," said Wicks. "I think Pete can beat him if he gets another chance. The Eau Claire boy was very aggressive and Pete looked a little tired out there."

After the loss at 118, UWSP wrestlers scored nine straight wins with Tom Dobbs (142), Mueller (158), Krueger (190) and Johnson (Hwt) pinning their opponents. Winning other matches for UWSP were Sidoff (134), 7-0; Hughes (126), 3-1; Popp (150), 10-3; Hintz (167), 8-4 and Neipert (177), 6-3.

Numerous Pointers will take impressive conference records into this weekend's conference meet: Doro 6 wins, 2 losses; Hughes 6-1, Sidoff 8-0, Mueller 8-0, Neipert 5-3, Krueger 6-1 and Johnson 7-1.

"I will be disappointed if we finish anywhere below third place," said Wicks. "I think we have a good chance to win but lack of tournament experience could hurt us. It will depend on the seedlings, luck and how much the guys want to wrestle."

## Blugolds sink UWSP swimmers

by Tom Enlund

For the UWSP swimming team, last Friday was one of those days where nothing goes right.

As if competing against a talented Eau Claire team wasn't enough, the Pointers had to contend with illness and a snow storm. Two Point swimmers, freshmen Dick Jesse and Scott Schrage, did not make the trip to Eau Claire because of sickness. The snow made road conditions so bad that the meet had to be delayed 15 minutes until the Pointers arrived. Whitewater, also scheduled to compete, found traveling impossible and had to cancel out.

Once the meet did get started the Pointers found the going tough against the Blugolds,

who, according to Coach Blair, are strong contenders for the conference championship. Eau Claire won the meet 63-40.

UWSP swimmers finished first in only three events. Freshman Mike Slagle won two of these firsts, in the 200 freestyle (1:59.9), and the 500 freestyle (4:59.6). His time in the latter set a UWSP record and an Eau Claire pool record. UWSP freshman Jeff Hill won the 1000 freestyle in 11:01.9.

The highlight of the trip for the Pointers took place before the meet even began. A special 400 Individual Medley Exhibition (IM) was held prior to the regular competition to give Hill an opportunity to qualify for the Nationals. It was an exhibition event because the 400 IM is not a dual meet event but is part of the

national meet. Hill qualified for the nationals and set a pool record with a time of 4:35.1.

"All things considered we did OK," said Blair. "It would have helped having Schrage and Jesse. Jesse is our second man in the 1000 freestyle and with him we probably would have taken first and second in that event. Schrage would have helped in the 200 freestyle and 500 freestyle. Being short handed, all we could do was swim the events that we will swim in the conference meet. Driving up on those road conditions didn't help of course. Eau Claire has an excellent team. They and Stout should fight it out for the conference championship."

The Pointers will compete in the conference meet, Thursday March 7.

## Women dominate triangular meet

by Diane Pleuss

The UWSP women's track team grabbed 8 out of 10 firsts as they won a triangular meet at Stevens Point, Feb. 23. The final scores were UWSP 67.5, Carroll College 30 and UW-Eau Claire 9.5.

First places for Point were taken by Carol Hill in the hurdles, Shiela Shoulders in the 50 yd. dash, Kay Zuelsdorf in the 220 yd. dash, Kim Fletcher in the 880 yd. run, Bev Brietenfeldt in the logg jump, Jane Adams in the high jump and the

4-lap relay team of Ms. Shoulders, Ms. Zuelsdorf, Mary Vandertie and Lynn Herrmann. Point also notched the first three places in the mile run with Debby Vercauteren, Sue Zuelsdorf and Ms. Brietenfeldt taking the honors.

The next meet for UWSP will be a quadrangular at Eau Claire, Friday, March 1. The other participating schools are Eau Claire, River Falls and Stout. The meet will start at 4 p.m.

## Women cagers head for state tournament

by Diane Pleuss

The UWSP Women's basketball team methodically rolled over UW-Eau Claire and UW-Madison this past week. The Pointer squad topped Eau Claire 55-44 and snubbed the women from Madison 40-23. This brings Stevens Point's record to 11-2 as they go into the state tournament at Madison this weekend.

On Feb. 20 Stevens Point did battle with an Eau Claire team which they had previously beaten. After a close battle in the first half which found Stevens Point leading 26-23, Point cracked it open in the third quarter. Outscoring the Bugolds 17-10, the Pointers took a 43-33 lead going into the fourth quarter. In the final stanza the teams played on fairly even terms as Point won 55-44. Much of the success is attributed to the fact that Point had 45 rebounds and 8 steals.

Wendy Kohrt and Vicky Hellem led the way for the

Pointers with 15 and 12 points respectively. Barb Deichl added 9.

The women from UW-Madison came in to town last Saturday as Stevens Point closed out its regular season with a 40-23 victory. This was Parents Day at Berg Gym, and all 11 of the cagers played, with 10 of them scoring points.

Point didn't score until late in the first quarter and only held a 8-6 first quarter advantage. In the second quarter Point started to roll as they built up a 23-10 halftime lead and were never seriously challenged after that.

Kohrt and Hellem again led the way with seven points each, though they played little more than a quarter. Deichl added five.

Next action for the Pointers will be at 6 p.m., March 2, when they take on UW-Oshkosh in the fieldhouse at Madison. UW-Oshkosh enters the tournament

with a 7-1 record; their only loss coming at the hands of Stevens Point. In the second game, Saturday at 8 p.m., UW-LaCrosse will take on UW-Whitewater, with the losers of Saturday's games playing at 1 p.m. on Sunday. Winners play at 3 p.m. for the state crown.

## Gymnasts split two

by Joe Duffy

The Pointer gymnasts split in two meets this weekend. On Friday, UW-Madison Badgers defeated the Pointers, 147-120. The Pointers rallied on Saturday to defeat the Eau Claire Bugolds, 107-94.

The loss to the Badgers was one of the finer performances by the gymnasts this season. The 120 points scored was the team's highest total in the 73-74 schedule.

Greg Hanson had a superlative showing on the still rings with a score of 8.55. Craig Hagen finished third in the parallel bars with a score of 8.25. Freshman Dan Courtney had an excellent meet with a 8.0 in the horse event and a third place in the high bar event.

Saturday the Pointers recovered in a conference meet

against Eau Claire.

"We were not as sharp as we were on Friday," commented Coach Bob Bowen. "The judges were very good but were tough and critical in the scoring. We lost 13 points off our score of Friday."

The Pointers took every event in the meet except the side horse. Norm Olsen in the free exercises and Greg Hanson in the rings were the top scorers. Each had a 7.9.

Hagen led the way in the parallel bars. Courtney also had a strong overall meet with a first and a pair of seconds.

"No one was as sharp as they were on Friday but the placing was higher," said Bowen.

The Pointers will take on UW-Parkside on March 9. This will be the last meet before the conference meet on March 15.

## Abolish finals

To the Editor:

I completely agree with the position expressed by Mr. Dave Gneiser in his editorial printed in the Feb. 21, 1971 issue of the Pointer. But where was Mr. Gneiser one year ago when a proposal to abolish final exam week was before the Academic Affairs Committee of the Faculty Senate? This proposal was submitted by me and supported by a number of faculty members including the university registrar.

Student support, however, was absent at that time and the proposal was not adopted at the Academic Affairs Committee largely as a result of the position taken against it by Mr. Joe LaFleur of Student Government. He argued,

among other things, that he was afraid of what might happen during the last week of classes e.g., a student might have five final exams in two days. I too believe that such fears are unfounded in light of present student and faculty feelings concerning final exams.

Now that the proposal to abolish the final exam period has both student and faculty support, I hope that it finally will be adopted. As Mr. Gneiser so aptly put it, "Abolishing of finals week at UWSP can't come too soon for any of us." This holds true for both students and faculty.

Sincerely,  
Douglas D. Radtke  
Assoc. Prof. of Chemistry

by Jim Hamilton  
Many students have been following Student Government's case against administrative overspending and have asked me and other members of Student Government what they as individuals can do about the situation. There are several things which can be done to help us, which is really helping yourself. First of all, you must evaluate your individual situation. You must ask yourself several questions regarding the effect the administrations' actions are having upon you, your education, your future, your department, your institution and your fellow students.

If the administrations actions are, in your mind, detrimental to any or all of these categories, then the following action is suggestible.

One, you can write letters to the chancellor specifically

stating your grievances and indicating a further course of action if your grievances are not corrected. Such action could contain transfer consideration, dropping out of the educational process until it becomes clearer what will evolve, or other possible alternatives you may encounter. Letters are very effective, write a few and see.

Two, you can refuse to take courses you do not want and urge the restoration of the courses, or expansion of sections within the courses which you feel are most important to you. This can be handled on either the department or college level, and in an effective way, to let

the administration know what direction the curriculum should be heading.

This may result in reduced credit loads, but it will save you money you would otherwise waste on useless courses, because the courses

you wanted were either closed or not offered.

In considering any of these options you should keep in mind that this institution is here to serve you and society, and that if you feel it is not meeting it's commitments, then you as a member of society have a right and duty to challenge the way things are.

## To be, or not to be?

To the students of UWSP:

In the past semester or so, I've attempted to develop a different type of column from the usual newspaper—entitled "WORDS". Being a collector of thoughts, I was extremely happy to share those I had found and were sent to me.

However, I have been informed by a reliable source that the reason the column has been not included recently is that it has been criticized by some students, either by word or letter to the staff of the Pointer, stating "that it takes up

valuable space which could be better used."

I know the current staff of the Pointer. They do seek to print what the students enjoy seeing (which is only reasonable if you want a popular paper). It does seem senseless; when there is such a vast amount of material which could be included, that space should be taken by a column which is "irrelevant", "unimportant" or "unwanted."

But, when I began the "WORDS" column, I believed the column was relevant, important, desired, and that maybe people would get some

enjoyment and-or insight from it. Possibly, I have only fooled myself, and no one really feels the same.

I would therefore like to ask those who have positive or negative feelings toward the "WORDS" column to jot down a short note and send it to: Editor of the Pointer, University Center.

The continuance of the "WORDS" column will now depend upon YOUR thoughts.

Peace within you,  
Doremus

Letters to the editor should be submitted by Friday. They must be typed, double-spaced and no more than 300 words long.

All letters to the editor must be signed by the writers. However, the name may be withheld from publication for what the editor deems good and sufficient reason.

## Society seeks members

Sir:

The UWSP Iota-Delta Chapter of Phi Alpha Theta would like to announce that it is currently seeking new members this semester.

Phi Alpha Theta is a national honorary society in the discipline of history which is made up of student and faculty on campuses throughout the United States, membership totaling over 80,000 persons.

The advantages of membership in Phi Alpha Theta are numerous. First, Phi Alpha Theta is a recognized honors society, and membership in such an organization is often times helpful when a student leaves the university environment for employment or for further work in graduate studies. A case in point: college students who apply for jobs in the civil service are entitled to a GS-5 rating, which pays \$7,319 per year. However, as a member of Phi Alpha Theta, the applicant is automatically entitled to a GS-7 rating, which carries a stipend of \$9,053 per year. Members of Phi Alpha Theta may also make use of a national placement bureau which the organization maintains to aid members in securing employment.

The UWSP Iota-Delta Chapter of Phi Alpha Theta has provided many services to the UWSP students. For example, Phi Alpha Theta has conducted tutoring services for those students who found some difficulties in history courses. Last semester, Phi Alpha Theta compiled history course surveys for students who planned on taking such courses this

semester. The surveys listed the number of exams, collateral readings, the types of grading systems and course formats. These provided useful information by which the student might make his or her selection of history courses.

It was also during the last semester that members of Phi Alpha Theta organized the UWSP Historical Discourse Society, which has sponsored programs and lectures concerning historical topics of interest to the students, faculty and the general public of Stevens Point. Many of Phi Alpha Theta's members are also members in the Historical Discourse Society.

The requirements for membership in Phi Alpha Theta are as follows: The student should have at least 12 credits earned in history courses, with a minimum gradepoint of 3.01 in those courses, and at least a 3.01 gradepoint in two-thirds of his or her other courses. The cost for membership is \$16 which includes the price for lifetime membership in Phi Alpha Theta, membership certificate and card, and one year's subscription to The Historian, Phi Alpha Theta's quarterly publication which includes articles on history, book reviews and news of Phi Alpha Theta.

Persons interested in applying for membership in the UWSP Iota-Delta Chapter should contact Russell Nelson of the History Dept., room 406 COPS. Applicants will be notified later of membership and the time set for initiation. Thank you,  
Bruce R. Beaman

## Fields flick flickers Tuesday

The University Film Society will present My Little Chickadee on March 5 at 7 and 9 p.m. in Old Main Auditorium.

The film is an inspired coupling of the suggestive art at America's leading strip-

teaser, Mae West, with the comic talent of W. C. Fields. It's a grand show as each one tries to put down the other. Together with this pair you have a grab bag of laughs and a plot about a fancy lady who tries to roll a penniless hair-oil salesman.

# Change the priorities

by Bob Kérksieck  
Pointer Editor

UWSP received about \$650,000 last week, according to Bob Badzinski, student controller. The money, which was reallocated to us by Central Administration, will go into next year's budget.

First of all, central is all but admitting an error by reallocating such a huge sum to us. In effect they're saying, "We underfunded you before, but here's some money for next year if you'll just stop making waves."

However, at best, that \$650,000 will make UWSP the fourth lowest instead of the lowest funded (according to a Central Administration Faculty Memo dated Feb. 1, 1974) in overall state support per student. Should some of the other institutions receive comparable monies, we may

still be the lowest! That kind of treatment for an institution of this caliber must not be tolerated.

There is also a major problem in the way in which the money is being returned. Under the present priority listing, the first faculty member we get back is number 20. (97 items which originally would not have received funds for next year rated according to importance. This was done by the administration here at UWSP.) The secretary to Elwin Sigmund, assistant to the vice-chancellor for academic affairs, is number three. This institution is here to give us an education. With that in mind, those sound like pretty unusual priorities.

Two Protective Services officers are number six on the

by Dave Gneiser

The open meeting on the proposed Michigan Ave. extension was just a beginning. Many questions were answered and some misin-

formation was cleared up. Most important is the fact that students are beginning to question the way things are being run around here.

If more of us would have spoken up long ago, we wouldn't have some of our present problems. All too often the environment seems to have been disregarded or planning has ignored common sense rules. Trees were destroyed in the building of the Steiner parking lot. (One reason given for their destruction was Dutch elm disease. One wonders how a maple would contract this disease.) This large expanse of blacktop is barely used now.

The position of sidewalks is another sore point. We have let architects in Madison design sidewalks and buildings they never see or use. The list of blunders is seemingly endless. It would be a major mistake to let planners and engineers have the final say in any campus project of the future.

The administration has taken a position in favor of running the road through the woodlands. They also favor digging a lake in the area for academic and recreational purposes.

The Pointer has taken a stand against this mini-expressway because of the

threat posed to both wildlife and the delicate hydrological situation. The idea of a lake is ridiculous, as a faculty member pointed out that water in that area has a high acid content. What benefit would the campus reap from a cranberry bog?

Sentry has taken the position of anonymity despite the fact that it is their new complex that is forcing the new road to be built. Sentry declined to send a representative to Tuesday's meeting and to an open forum on Channel 6.

There are many questions only they can answer. The longer they wait, the less receptive the students will be. Student Government has not yet taken a position either against the proposed plan or in favor of any alternative. Neither has the environmental council. Both are still studying the alternatives.

Roughly 1,000 students have signed the petition opposing the proposed route of the Michigan Ave. extension. Out of all the groups previously mentioned, this last group is the most important. It is also up to you, the student, to tell Student Government, Environmental Council, Sentry, the Pointer, the administration and the city, what you want.

The following list of priorities was given to the POINTER by Bob Badzinski. According to Badzinski the first 69 items on this list will be funded from the reallocated \$650,000.

1. Budget Planning & Analysis, \$8,000
2. LRC Acquisitions & Media Materials, \$23,000
3. Secretary, Academic Affairs (Asst. to Vice Chanc.), \$6,900
4. Accounting, vendor invoices, \$4,500
5. Accounting, account examiner, \$18,300
6. Physical Plant, two Security Officers, \$10,000
7. Instructional Media, one classified position in TV production, \$10,000
8. Physical Plant, Student Assistants, \$4,000
9. LRC Public and Technical Services, \$15,300
10. LRC Acquisitions, \$5,000
11. Data Processing, programmer-analyst position, \$14,000
12. Data Processing, programmer-analyst position, \$10,000
13. Personnel Office, \$2,000
14. Data Processing, student help, \$1,000
15. Data Processing, student help, \$1,000
16. Stores-Mail, \$2,000
17. Duplicating, \$4,500
18. Personnel Office, \$1,000
19. Early Childhood Development, a half position, \$5,000
20. Communicative Disorders, one teaching faculty member, \$12,600
21. COPS, telephones, supplies, etc., \$31,300
22. Natural Resources, supplies and one half-time teaching faculty, \$10,700
23. L & S, travel, \$4,500
24. L & S, telephone service, \$6,200
25. L & S, non-teaching personnel, \$11,500
26. L & S, instructional improvement (non-personnel), \$10,000
28. L & S, increase the number of telephones, \$2,700
28. L & S, supplies, \$28,100
29. L & S, non-personnel funds, \$5,000
30. Sociology, part-time teaching faculty, \$2,100
31. English, part-time teaching faculty, \$15,000
32. Dean of Fine Arts, music lab listening lab supervision, \$11,300
33. Dean of Fine Arts, Dean's assistant, \$5,500
34. Dean of Natural Resources, to teach one course per semester, \$5,000
35. Data Processing, two positions, \$13,000
36. Dean of Letters & Science, non-personnel instructional improvement, \$15,000
37. Speakers and Consultants, academic speakers, \$300
38. Commencement & Convocation, increase possibility of commencement speakers, \$500
39. Physical Plant, one security officer, \$5,500
40. Physical Plant, supplies and services, \$3,500
41. Custodial, custodial service for Student Health Service, \$31,050
42. Physical Plant, capital purchases, \$20,000
43. Physical Plant, increased snow removal and maintenance of landscaping, \$4,500
44. Stores-Mail, transportation, \$600
45. Stores-Mail, supplies and service, \$60
46. Central Stores, one-half stock clerk, \$3,782
47. Data Processing, card punch feature for computer system, \$4,600
48. Data Processing, increase service, \$10,000
49. Data Processing, personnel, \$1,250
50. Physical Plant, painting, \$10,700
51. Home Ec in Business, one faculty, \$9,800
52. Dance, two faculty, \$18,000
53. Water Resources, one faculty, \$11,500
54. Geography, one faculty, \$13,770
55. Russian, one faculty, \$12,200
56. Pol. Sci.-Pub. Admin., one faculty, \$12,425
57. Phy. Ed., one faculty, \$10,900
58. Phy. Ed., one faculty, 9,600
59. Com. Dis., one faculty, \$14,500
60. Spanish, one faculty, \$14,500
61. Geology, one faculty, \$12,900
62. Phy. Ed., one faculty, \$11,610
63. Mathematics, one faculty, \$12,670
64. Mathematics, one faculty, \$11,650
65. Phy. Ed., one faculty, \$10,000
66. Geology, one faculty, \$12,200
67. Math-Comp. Sci., one faculty, \$12,650
68. Phy. Ed., one faculty, \$9,250
69. Phy. Ed., one faculty, \$10,420
70. Registrar, one classified position, \$8,500
71. Health Education, one part time teaching faculty, \$4,300
72. Financial Aids, student financial aids counselors, \$10,360
73. Counseling, one counselor, \$10,520
74. Instructional Media Services, non-personnel funds, \$2,100
75. LRC - Technical Services, classified and faculty positions, and book acquisition, \$68,400
76. LRC - Public Services, one classified position, \$7,100
77. LRC, book acquisition, \$9,800
78. Academic Affairs, one secretarial position, \$3,500
79. Academic Affairs, one part-time faculty, \$2,200
80. Accounting, one account examiner, \$9,300
81. Administrative Data Processing, one programmer, \$12,145
82. Purchasing and Central Stores, classified clerk-typist, \$5,800
83. Duplicating, one half position, \$4,500

This priorities listing does not include the five faculty positions (\$52,870) which will be returned to Phy. Ed. if the User fee reduction is not required.

## The Student Norm
