5% cut could erase 28,000 UW students

by Debbie Kellom
Editor

If UW-System state financing is cut 5%, as suggested by Governor-Elect Tommy Thompson, the system would have to cut its enrollment by 28,000 students, or about 17% and would lose millions of federal dollars for research.

These cuts, said Katharine Lyall, executive vice president of the system, are even more

severe than the 22,000 enrollment cut and other problems UW officials had initially predicted.

Lyall has turned in a report to the State Department of Administration which will be considered by the UW System Board of Regents at its meeting in Madison today and Friday.

Lyall said UW officials were making the report even though Thompson had said he thought

that the UW System would make a good case for spending at current levels and probably even more than those levels. Like other state agencies, the UW System was asked by Thompson to present a budget for 1987-89 that was 5% less than the current budget.

The 5% cut would mean a reduction of \$28 million in state support for the system.

Chancellor addresses UW-budget cuts

by Karen Rivedal
News Editor

On Wednesday, Dec. 10, Chancellor Philip Marshall will meet with all interested students, faculty, and staff members to discuss the UW System's plans to cope with eroding state support. The informational session is scheduled for 3 p.m. in the Program-Banquet Room of the UC.

During the session, Marshall plans to present the results of a year-long study conducted by the Board of Regents. The report documents a steady decline in state funding for higher education and outlines various proposals to maintain quality in the face of impending budget cuts.

According to the Regents' report, state support per university student is currently \$600 be-

low the national average. The consequences of tightened funds are evident throughout the system schools in the form of fewer class offerings, overcrowding, outmoded and obsolete lab equipment, and an overall one to two-year increase in the time required to obtain a degree.

The Board of Regents has suggested an additional \$88 million in funding to increase state spending per student and maintain quality education. This is, however, an amount that the state is not wholly willing to provide.

Says Marshall:

"The recommendation of the Study Committee is going to be that the System act to raise the money. The System could: 1)

Student dies in car crash

Lisa Wallis died Sunday, November 30, from injuries sustained when the car she was a passenger in ran off the road and struck a utility pole.

The accident occurred in Wallis' hometown of Tomahawk, Wisconsin.

Lisa was the youngest of two children and is survived by her brother and parents, Robert and Gail Wallis. A freshman, Lisa was 18 at the time of her death.

Also killed in the accident were Laura Arnott, 18, and Mike Hein, both of Tomahawk. Arnott was a freshman at UW-La Crosse. Hein, a 1982 honors graduate of UWSP, was editor of the *Pointer* in 1981, and was currently co-owner of Inshalla Country Club in Tomahawk.

Funeral services for all were held at Krueger and Sons Funeral Home in Tomahawk.

EDITOR'S DESK

The paradox of less for more

The University of Wisconsin System Board of Regents has decided to solve their financial problems by sacrificing students as sheep. It's a scene we've seen before.

The budget has an imbalance. A deficit has to be filled. And there's all those students with all that money. It's an annual process, and it's almost futile to protest. If the regents need money, they know where they can get it. It's as simple as that.

For six years, the UW System and the UW System Board of Regents have continually asked for a higher burden on the students they are supposedly serving. Resident students have seen their tuition bills increase from the long-standing Wisconsin tradition of 25 percent of the total cost of education to just under 35 percent of the total cost. And it appears that the figure will continue climbing.

The regents and System officials cite maintaining "quality" as their reason for this year's hikes, but fail to realize that they are not only shutting the doors on low-income and traditional minority students—who have usually been shut out because of tuition increases—but are now keeping out a portion of the middle class students as well.

Arguments have been made that students can always take out loans to pay their way. Even the federal government recently granted students the "right" to borrow up to \$54,000 to pay for college. The previous limit was \$20,000.

By approving this increased debt, Congress has allowed the university system to create a second class of students who are carrying record indebtedness with them when they graduate.

(These concerns are not, by the way, being addressed by the regents with the same eagerness they have shown in encouraging campuses to purchase more computers.)

To their credit, the regents have occasionally advocated increased financial aid awards, which is no solution for the middle class, but helps the low income students. Still, financial aid continues to fall far behind the pace of increasing tuition.

The regents and the state Legislature must be continually reminded to be advocates of education, not System administration. A university system should be proud of a tradition of open access to all, not continually locking out segments of society.

Perhaps the university system deserves more funding in the future, but students should not be the first target area for generating revenue. The System should first look to see if it is doing an exceptional job educating students with the funds currently available.

The quality of an institution cannot be measured on the price it charges students for their diplomas.

Child care center going strong

by Amy Chier
Staff Writer

For the past 14 years UWSP has offered a Child Learning and Care Center for its students and faculty with young children. With newly remodeled facilities, including a new playground and equipment, the program is going strong.

The Learning and Care Center, located in Nelson Hall, offers a learning environment for children between the ages of 2½ to 6 years old, according to program director Susie Sprouse.

"The purpose of the program is to give non-traditional students the opportunity to provide their children with a low-cost, high-quality educational experience," said Sprouse. "Because of the high costs of a community day care center, without this program, college, for some, wouldn't be possible."

The center, which follows the university schedule and is open from 7:30 a.m. to 5:10 p.m., costs \$1.10 an hour for students and \$1.55 for faculty.

Children in the program are instructed by four early childhood education graduates and 22 education majors working through the work/study program. The children are taught a variety of different things.

"Our daily curriculum is designed to meet the needs of the children so they can grow both mentally and physically," said Sprouse.

Each day the children are offered learning choice centers where they are allowed to participate in a variety of different activities such as arts, dramatics, language arts and music.

"We design our program to meet the needs of children in every age group," said Sprouse. "In the past, children who attended this center have gone on to do very well in kindergarten."

The center first opened in January of 1972 through the help of the University Board of Directors and through funding by the Student Government. The program has grown considerably during the past few

News Service Photo

Remodeled facilities at the Child Care Center in Nelson Hall keep the program going strong.

years and has received very positive feedback, according to Sprouse.

"In a recent survey, many

students indicated that they don't know what they would do

without the center," said Sprouse.

The program is currently accepting enrollments for the second semester. Anyone interested can contact Susie at extension 4370.

Faculty learns healthy boundaries

by Lisa Strack
Staff Writer

Learning how to establish health boundaries between students and faculty was the subject of discussion at the Employee Assistance Program, held November 24 from 3:30-5:00 p.m. at the UWSP Counseling Center.

Sharon Gahnz, counseling psychologist and coordinator of the EAP, Stuart Whipple, alcohol education coordinator, and Christy Carter, counseling psychologist, led the discussion. Ten other faculty/staff members, including one resident assistant also participated.

The problem addressed at Monday's EAP: many faculty and staff members are feeling

frustrated, overwhelmed and even angry because their willingness to help a student with a problem has resulted in excessive dependence.

"Why does this dependency occur? National statistics provide some answers:

1) On the average, 14% of college age students are experiencing academic, career choice or psychological distress significant enough to handicap them in their academic pursuits.

2) In any class of 30 students, approximately 1-3 of the women and 1% of the men have eating disorders, 3 frequently abuse alcohol, 7 come from homes where alcohol is abused and 4-5 have mental health problems.

3) Over 50% of today's marriages end in divorce.

Gahnz pointed out that UWSP fits in with this national average; therefore, many faculty/staff members find that the relationship they hold with their students is an unhealthy one.

Faculty members in this unhealthy situation are described as "chief enablers." The "chief enabler" allows the psychologically disturbed person to remain unhealthy; in effect hiding the person's problems by not allowing a student to feel the consequences of personal decisions.

Even though the "chief enabler" does more and more for the person, nothing seems to be enough. This overextension in turn fosters feelings of inadequacy and anger. The hurt, anxiety and guilt are disguised,

however, with various defenses.

For example, the "chief enabler" may blame himself for everything that goes wrong in the student's life. He may become manipulative, forcing the psychologically disturbed student to do what he wants him to do, rather than allowing the student to make his own decisions. Or the "chief enabler" may become super-responsible; that is, to feel completely responsible for the student's behavior. By feeling completely responsible, the "chief enabler" continues to worsen the situation by giving into what the unhealthy person wants.

If this is the case, how can the "chief enabler" correct the situation? Stuart Whipple maintains that the faculty member

must help himself first, so that the student will also see the opportunity to develop a healthy relationship. Gahnz continued, saying that instead of giving into the unhealthy person's every want, the healthy person needs to set up limits and rules.

In addition, faculty members should: 1) express concern for the person; 2) relate the details of the person's behavior; 3) tell the person how they themselves felt during the episode(s) of inappropriate behavior and 4) make a referral if appropriate. The faculty member should allow the person to feel the consequences of his behavior, for it is the only way to encourage him to want to change.

Fund-raising Keller brings skills to UWSP

by Karen Rivedal
News Editor

Gary F. Keller is the new executive director of the UWSP Foundation and head of university advancement and development. The Foundation was established in 1965 as the fund-raising arm of the university.

Keller assumed the position on Nov. 17, and describes the Foundation that he now directs in these terms:

"The Foundation is a corporation, separate from the university, whose main goal is to support the variety of programs that the university has through fund-raising acquisition efforts. To promote scholarships for students is one of our main activities."

"The private sector is the main source of funding for these activities. Keller remarks: "We are getting alumni, private indi-

viduals, corporations, and other foundations involved in our program. They're providing us with additional resources that the state isn't providing—or can't provide—simply because there isn't enough money to go around."

Keller says there are a variety of reasons a donor may contribute: "Individuals may want to perpetuate the memory of themselves, or something that they have done, for a long time, so they may make a gift to an endowment or a scholarship fund."

Corporate givers can also benefit from donations. Keller says:

"The university is a major factor in the economic life of the community. When the university succeeds, it provides an environment that is positive for business. In addition, the corporate recognition for a do-

mination is desirable because it's another form of marketing and advertising."

Since Keller's arrival from Milwaukee, he maintains there is a special feeling about Stevens Point:

"This is a great community to live and work in. There is a very refreshing, very friendly, pleasantly subdued atmosphere on campus, in the student union, and in the city as well."

Keller comes to UWSP with an impressive background in financial management. He is a graduate of UWM with a B.A. and M.A. in history, and has an additional M.S. in management from Cardinal Stritch College. Keller has served as director of development for Dominican High School and later as director for Sacred Heart Rehabilitation Hospital, both in Milwaukee.

His achievements in these po-

sitions bespeak extensive fund-raising skills: Dominican High received its largest planned gift during Keller's stay and at Sacred Heart, Keller was able to exceed the hospital's funding goal by 60%.

Keller is impressed with the past track record of UWSP Foundation. He says the amount of money generated through private funding is comparable to that of much larger universities throughout the country.

"The amount of gifts," says Keller, "ranges from \$2 \$200,000. We have received some six-figure gifts from donors. That's a tremendous accomplishment. We want to continue that tradition. We simply want to be the best. I think we owe it to students, faculty alumni, and the community pursue that."

"We simply want to be the best," says Keller, new Foundation Director.

Loan info. for grads

The staff of the National Direct Student Loan Office at UW-Stevens Point would like to take this opportunity to extend their congratulations to the fall graduates. At the same time, we would like to advise all students who have received National Direct Student Loans (NDSLs), of their responsibilities to UWSP.

Before leaving UWSP all borrowers must make arrangements for an exit interview, with the NDSL Office. For graduating seniors, we conduct group exit interviews. In November, letters were mailed to those students who applied for graduation, informing them of the dates and locations of these sessions. Any student who is graduating and has not received a letter must notify the NDSL Office, Room 004, Student Service Center, 346-3473.

NDSL borrowers who are not planning to return to UWSP next semester must inform the NDSL Office of their separation, even if they are planning on continuing their education elsewhere. Failure to do so can result in serious consequences. If you do not know for sure if you obtained an NDSL, it is to your benefit to check with the NDSL Office.

Group exit interviews will be conducted in the Muir-Schurz Room 241, University Center, on December 9, 10 and 11 at 3:00 p.m. and 3:45 p.m. The entire process takes about 20 minutes.

New nursing satellite launched

A new satellite nursing program has been established at UWSP. The nursing programs at UW-Eau Claire and St. Joseph's Hospital of Marshfield were merged to create the UWSP satellite. Professor David Chitharanjan is the coordinator of the new program, scheduled to begin next semester.

Chitharanjan has described the progress of the new program as "very successful." Fifteen to 20 students have expressed interest thus far. As described by Chitharanjan, students will complete the first two years of the program on the Stevens Point campus, followed by an eight-week summer session at UW-Eau Claire. The final two years will consist of an internship at St. Joseph's Hospital.

Pointers blamed for vandalism

UW-Stevens Point students are being blamed by downtown merchants for the current vandalism problem.

Scott Schultz, chairman of the Public Protection Committee, discussed this issue with the Student Government Association on November 20. Schultz stressed to the senators that "this is not strictly a student problem, but it is an issue that comes up every few years."

The business owners in the downtown feel that it is the taverns located in the vicinity that are the center of the problem.

The city does have a few options to control the problem. One suggestion is to disperse liquor licenses held by the tavern owners downtown. If the owners moved to a different location they would be allowed to

regain their liquor licenses. Another suggestion made by John Shippy of Shippy Shoes, is to increase police patrol in the downtown area and maybe obtain some help from UWSP.

Schultz said that "this is the most significant attack on what's been a good relationship." It is hoped that the snow will control the problem at least temporarily.

UWSP receives \$10,000 gift

UWSP has received a \$10,000 gift to use in supporting scholarships for minority students. The donor is Hazel Bleck Gotham of Park Ridge, who is an alumna of UWSP and has established the scholarship in memory of her late husband, Raymond Gotham.

Raymond Gotham came to UWSP in 1946, where he had broad administrative duties as well as the rank of professor. His concern for the rights and advancement of minority students continued throughout his career with some of the university's first minority students enrolled at his invitation.

After Gotham died in 1974, Mrs. Gotham established a scholarship fund in his name for college students from this area. Her decision to donate additional money for a minority student scholarship was influenced by the recent state-wide recognition given to the UWSP Equal Opportunity Program.

UW students enter political arena to air concerns

Students from UW-Stout and UW-Eau Claire are taking steps to speak the student voice in local politics. Three students from Stout have decided to run for aldermanic positions next year in wards 3, 5 and 7 in Menomonie.

Don Gerhard, president of the Eau Claire Student Senate, has promised similar action in the Eau Claire elections.

At UW-Stout, Jim Falkofski, 19; Paul Kniesz, 25; and Franz Kniesz, 22, have announced their intentions in the January elections. Because of their student status, the candidates feel uniquely qualified to represent university concerns.

Paul Kniesz remarks, "I hear from many students who say they don't vote in Menomonie because student concerns are

not an issue with the council. I'm trying to be that foot in the door for students to express their concerns."

UWSP students, whose interests mirror those of Stout's and other UW System universities, comprise 9,554 of Stevens Point's estimated 33,035. UW-Stout may have something here. Are there any Pointer political hopefuls?

Faculty boundaries,

from p. 3

The faculty member also needs to know the facts such as: what was the behavior, write it down; was alcohol or other drugs involved; write down specifics of time, place, actions; do not make judgments and do not make a diagnosis. Finally, the faculty members must know who to contact for help. As one participant in the EAP stated, "probably the most appropriate thing to do is to suggest that someone else will be more helpful; this disengages your responsibility and gives them the opportunity to deal with their problems."

THE BEST VALUE ON CAMPUS IS CAMPUS LIVING

RESIDENCE HALL LIVING

Look at the advantages:

1. Have greater opportunities for spontaneous social activity.
2. Have student and professional staff who know the campus and want to assist you.
3. Have a quick walk to classes and campus offices.
4. Don't have the hassles of winter driving... scraping windshields, digging out of snow drifts or sliding on icy roads on your way to school.
5. Have access to ping pong, pool, weight equipment, saunas and quiet rooms.
6. Can learn about investments, study skills, assertiveness by attending hall and wing programs.
7. Don't have to find someone to sublease your apartment for the summer.

RESIDENCE HALL LIVING CAN SAVE YOU A LOT OF MONEY, TIME AND TROUBLE.
STOP BY THE HOUSING OFFICE OR CALL 346-3511.

Schultz enters race for mayor

University News Service

A race for mayor of Stevens Point developed this morning when Eighth Ward Alderman W. Scott Schultz announced his candidacy.

Two weeks ago, William Horvath said he would vie for the position to be vacated by Michael Haberman. The election will be held in April.

Schultz, 37, has been a public official representing his ward since 1982. He served two terms as a county board supervisor and in 1985 was appointed to fill out Roger Bullis' term on the Common Council. He was elected to the post last April.

For the past eight years, he has been employed as the assistant director of alumni relations at the University of Wisconsin Stevens Point. He earned a degree in political science from the school in 1972 after holding the position of Student Government Association president.

He said strong leadership will be necessary in the mayor's office in order for Stevens Point to maintain "economic stability" during the next four years.

He called for continued expansion of the tax base through aggressive promotion of development opportunities in

and around the Industrial Park. He also said members of the Common Council should be open minded about proposals to annex outlying areas to the city because, in the long run, there would be financial advantages.

"We've seen a lot of changes in the last few years- we've had new additions to the community but not always finished products including our downtown mall," Schultz continued.

"We have opportunities ahead to fill our mall and to keep moving ahead with downtown redevelopment. One of my priorities in this area will be to help find some creative ways of

making it financially feasible for business people to complete the rehabilitation of Main Street and the Public Square and to solve the parking problems."

His pet projects as mayor would include work to complete the proposed riverfront park plans and establishment of a system that could be used for determining how the city can best utilize revenues from the room tax.

"One thing is certain, though. We can't afford to make a lot of big changes here in the immediate future," he contended.

Lyall disagrees with calls for improved planning

by Debbie Kellom
Editor

A UW System administrator said System officials disagreed with portions of a report released by the Legislative Audit Bureau, which said the System should have enforced stricter enrollment limits as early as 1971, the year the System was formed.

Katharine Lyall, vice president of the UW System, said in an interview Monday that the report maintains the System

should have "cut its enrollments, starting right after the merger," but that this policy was never recommended by the state Legislature.

"There is no evidence to suggest there was any legislative or public demand to limit enrollments," Lyall said.

The audit on the UW System, the first since the merger began in March, calls for improved planning of the System's budget, course offerings and recruitment.

Lyall said many of the recommendations in the report were

in agreement with proposals made in the Board of Regents' report on the future of the UW System.

She also said the Future Study Committee, the body that drafted the System's report, had begun its research in January, and that the Audit Bureau had monitored the committee's progress, which may have resulted in some of the items

being similar. Lyall said, however, that there was no formal collaboration between the two bodies.

The Audit Bureau's report suggested that the quality of UW education is declining, because System campuses are enrolling more students than they can handle, and that many campuses were disregarding their own admission require-

ments when enrolling new students.

The report showed that at five campuses, approximately 20 percent of freshmen admitted did not meet high school graduation-rank admission requirements, but did not name the campuses.

Posting policy revised

by Karen Rivedal
News Editor

Robert Baruch of Student Life has provided additional information concerning the UWSP posting policy.

According to Baruch, "The posting policy, although loosely based up on the former policy of the University Center, was revised and approved by the Faculty Senate in the fall of 1982.

The current policy has absolutely no restrictions on content—which would, in most cases, be a violation of free

speech rights, and contrary not only to the policies of this campus and the Constitution, but certainly not in keeping with the use of any public university as a forum for the free exchange of ideas."

The restrictions that do exist are "to prevent unauthorized solicitation" and "to monitor the number of posters on campus."

In addition, Baruch remarks, "The stamp used by the University Center, which reads 'Approved,' is not an approval of content. It is merely to show

that policy requirements have been met, and that the numbers of posters conform to the policy."

However, the revised posting policy lists under II, Posting, Posting Location, and Policies, Part A.1: "All material to be posted must conform to statutory and institutional requirements pertaining to community standards and commercial solicitation."

No further reference to the exact content of "community standards" is made throughout the policy statement.

More bees for food service

To the Editor:

In your last issue Jerry Wilson, the UC Food Service director, made some very imaginative comments regarding the pricing practices of his organization. I have worked for food service for several years, and can assure you that he distorted the truth.

First of all, Jerry said that we "seldom" receive complaints about prices. Actually we receive complaints about prices constantly. I have never cashiered a shift and not had someone complain about our \$2.20 croissants or \$3.15 six-packs. If they have points they buy them grudgingly. If they're paying with cash they'll often put it back and walk out, mumble a few anonomically explicitives in the process.

Secondly, he said the food service committee never complained about prices "to my knowledge." In truth, almost every complaint they make is either directly about prices or else a complaint that the quality of the food is too low "for the prices you charge." I wonder why they even bother having the food service committee if the UC food service director doesn't even know what they complain about.

Also, blaming these prices on union workers is a real trip into La-La Land. In reality union workers comprise but a portion of the entire workforce and handle only cooking, some cashiering and a couple of miscellane-

ous jobs. Minimum wage earning students do all the cleanup, the majority of the cashiering and a sizable chunk of the rest of the work. The only way students can get a raise is to get promoted to student manager, and even then they only start out at \$3.85 per hour. Most of the workers in similar positions at competing restaurants earn far more.

I'm also not quite sure how Jerry figured that we pay unionized workers "over twice as much" as our competitors. Our union workers average a little over \$5.00 per hour, but they're permanent workers, most of whom worked with food service for many years. This saves us money through reduced start-up and training costs.

Even mentioning the 15.5% university charge was fairly ridiculous (which was partially pointed out in the article). We are not responsible for anything but day-to-day cleaning of the equipment, which the university originally purchased. If anything breaks down, the university fixes it. When we need new equipment the university buys it. At the end of the day the university cleans all the floors and vacuums all the carpets in the dining areas. For all of this we only have to pay them 15.5% of our income. Our competitors spend a much larger chunk of their gross profits on their facilities.

Why does Food Service really have such high prices? Because we can get away with it. The State of Wisconsin has been kind enough to grant us a total monopoly over food sales at this university. Nobody can even give food away unless we OK it. Of course, we never let them do it if there is even the slightest chance that it will cut into our sales. Sure it's bad for the students, but why should we care? People that have points have to spend them on us, and people that pay cash aren't going to walk half a mile to save a buck or two. It all amounts to one inevitable conclusion: SGA isn't the only one screwing the students over.

Name withheld

The death of another ideal

To the Editor:

Our University's governing system prides itself on being based on the ideal of shared governance (i.e. students and faculty will share decision making). In fact, this ideal is mandated in Wisconsin Statute 36.09(5) which reads: "...the students...shall be active participants in the immediate governance of and policy developments for such institutions...As such, students shall have primary responsibility for the formulation and review of policies concerning student life, services, and interests." This law does not just call for student input during decision making - it calls for student sentiment dominating policies concerning students.

Although inscribed in law, our own Faculty Senate scoffed at the ideal of shared governance at its November 19 meeting when it voted to make a one-hour Health Issues class remain mandatory for all students seek-

ing a preventative physical or pap/pelvic examination. In approving this mandatory class, the Faculty Senate ignored a 13-3 University Affairs Committee recommendation for a non-mandatory class for certain health services - a recommendation given UNANIMOUS approval by the Student Government. (We must also remember here that students pay \$71 a year in segregated fees to the Health Center, or close to \$300 over a four-to-five-year education.)

The Student Government has held this issue a top priority for over two years and has continually opposed mandatory classes as an infringement on students' rights to choose (between alternative modes of health education rather than one required class).

The peculiar point here is that our campus faculty boast of shared governance, yet when the time comes to demonstrate it often turn their backs on the students. To make matters worse, the faculty who ignore the student opinion in decisions are often our campus "big dogs." Let me offer the example of Mr. Fred Leafgren, the assistant chancellor of Student Life, who during the floor debate at the November 19 meeting (which had many important "undecided" faculty senator votes) single-handedly swayed the votes in favor of Dr. Hettler and his mandatory class. As

soon as he stood and spoke in favor of the class, our "undecided" votes became "Leafgren/Hettler" votes, and the students once again went unheard. Along with the concept of shared governance, two years of Student Government work and lobbying was also flushed at the November 19 meeting.

The Health Issues class is more than an issue pertaining to health awareness. It is a question of individual rights. This is a question of our faculty mandating a frequently unnecessary hurdle in obtaining a service which we previously, involuntarily, annually, and substantially pay for. Although the Faculty Senate did not violate 36.09(5) prima facie, its actions can be interpreted as a circumvention of the intent of that statute. (Students!! Look forward to a required purchase of computer software - costing over \$100 per student - should the Faculty Senate continue with its recently set precedence concerning 36.09(5).)

Student opinion on student issues MUST be held in the highest possible regard. The State Legislature recognizes this, our Governor recognizes this, our Chancellor recognizes this, and our Student Government recognizes this. On behalf of the UWSP Student Government Association, I urge the Faculty Senate to reassess their

Here's a secret about acid rain

Secret: Environmental release of sulfur dioxide -- an air pollutant -- has fallen 25% in the U.S. since 1970. Yet we're burning more coal today than in 1970. And that's important if you care about acid rain.

Because sulfur dioxide is a gas which promotes acid rain. In the eastern U.S., most sulfur dioxide comes from coal burning.

Locally, Wisconsin Public Service has done even better. Since 1970, we've cut sulfur dioxide releases by 40 percent at the coal-burning plants we operate.

For more information about coal energy and the environment, write:

Record labeling

An interview with Bob Guccione, Jr.

by Jon R. Pike
Staff Writer

In the 1960s rock 'n' roll gave America permissiveness. Oh, first it shocked our country, but soon its references to drug use, sex, violence and general licentiousness became institutionalized. In the 1970s these references became more graphic, but nothing really changed. It was still allowed.

But in the 1980s, that may change. Some people have decided that enough is enough. Maybe, these people say, we should protect society from these graphic portrayals of violence, drugs and sex. Maybe, it's having a detrimental effect on our young people.

Just this last year, in fact, the Parents Music Resource Center (PMRC) brought the whole issue to the halls of Congress. They proposed that rock 'n' roll records carry a rating system similar to movies, based on the sexual, violent and/or anti-social content. Parents would then be able to tell at a glance what their children were listening to.

Television evangelists, like Reverend Jimmy Lee Swaggart, have been ascribing all of society's shortcomings to listening to rock 'n' roll. It is the opinion of such evangelists that pressure should be brought to bare on people who put out such products, to stop doing so.

Such efforts have received considerable media attention, even from their opponents. The December issue of *SPIN*, a monthly rock 'n' roll magazine, printed an expose on Swaggart Ministries. Plans are also underway to publish an interview with Tipper Gore, the wife of Congressman Albert Gore Jr., and leader of the PMRC.

Two weeks ago I interviewed Bob Guccione, Jr., editor and publisher of *SPIN* to find out how he feels about this issue and what he thinks should be done about it.

POINTER: Why do pro-rock censorship groups (e.g. evangel-

ists and the PMRC) get more media attention than opponents of rock censorship?

GUCCIONE: Because of the nature of this issue. People don't feel a need to protest against rock censorship advocates. What Swaggart and others have done is spiced up good content with business. The people that they're reaching are, for the most part, over 50 and female and just don't like rock 'n' roll to begin with.

POINTER: Isn't that one of the problems then, that with even more media attention they're going to be able to reach an even wider audience?

GUCCIONE: But we need to give them media attention, to draw them into the spotlight. Swaggart and his ilk are like cockroaches, they live in the dark.

POINTER: In the November, 1986 issue of your magazine, there was an ad for an organization called Music In Action. Presumably, from the ad, it's a group that is opposed to banning or rating rock 'n' roll records. Who is Music In Action?

GUCCIONE: Well, there's myself, Howard Bloom, who's a leading rock publicist, and David Krebs, who managed Aerosmith and currently manages The Scorpions and some other Heavy Metal bands. Anyway, we formed this group over dinner one night. We are these three guys on top of this hill shouting down to a valley.

POINTER: I'd like to read an excerpt from your editorial in the December 1986 issue of *SPIN*:

"...if we say that our music dissolves our society and corrupts our children, that is a condemnation of our society, and ourselves as children..."

Would you care to elaborate on this?

GUCCIONE: Not really, I think it really says it all, I don't really care to repeat myself.

What I will say though is that we must get indignant. Now you're what, in your early 20s?

"We're being told that we're not old enough or mature enough to choose what we can listen to. And, ... that's pure crap." — Bob Guccione, Jr., editor and publisher of *SPIN* magazine.

I'm 30. We're part of young society. We must do something. We're being told that we're not bright enough or mature enough to choose what we can listen to. And, what's being said is a trough of pure crap. We must resist not only intellectually but physically.

POINTER: I understand what you mean by resisting intellectually, but what do you mean by resisting physically?

GUCCIONE: I don't think that we should patronize stores that cave in to the demands of the PMRC or Swaggart. To me, that's an insult. And, I will not take an insult lightly.

I do want to say, that we're the only rock magazine that has taken this issue on. *Rolling Stone* hasn't.

For me, this issue is a matter of principle, and a very serious subject.

POINTER: I'd like to read another quote to you, this is from an ad that appeared in the November issue of *SPIN* maga-

zine. It's an ad for Music In Action. The quote reads:

"...rock music is neither inspired by the Devil nor condemned by God..."

Could you elaborate on this?

GUCCIONE: Yes, I wrote that. There's this cheap transparent con that the devil is the ultimate record executive. Music reflects life. Rap music for example is hostile, because it comes out of a hostile environment. And personally I think that kind of hostility is less harmful than all the war-mongering you hear from our governments.

POINTER: One final question: some people would say that since you're involved with the rock business, you have a vested interest in defending rock 'n' roll.

GUCCIONE: Of course I have a vested interest. But there's nothing wrong with that. Nothing is done out of altruism. What you have to understand is that we in the music industry are the ones who are the most sensitive to this issue. But, since we have a vested interest that doesn't mean that what we say against our foes is necessarily inaccurate. I'd like to say that Swaggart was interviewed by the *New York Post* about our charges we made against him, and he wasn't able to deny any of it.

\$1,000 poetry prize deadline Dec. 31

News Release

A \$1,000 Grand Prize will be awarded to the poet who sends the best entry to the American Poetry Association's poetry contest. The deadline for entry is December 31, 1986. The contest judges will select a total of 141 winners and award them over \$5,000 in cash and prizes. Entry is free.

All poets are welcome to enter. The Association aims to spotlight new, aspiring and little-known poets. Poems are judged on originality and interest, not just on technical skills.

"December vacation should make it convenient for college students to send poems before this deadline," said John Frost,

chief editor for the Association. "We especially enjoy seeing their work," he added.

Poems entered will also be considered for publication in the *American Poetry Anthology*, a leading collection of contemporary verse.

Interested poets should send one poem of no more than twenty lines. Any theme and any style are eligible to win. Poems should be typed if possible, and the poet's name and address should be on the top of the page. The poem should be mailed by December 31st to the American Poetry Association, Department CN-18, 250A Potrero Street, P.O. Box 8403, Santa Cruz, CA 95061-8403.

The "Poet's Guide to Getting Published," a useful 4 page brochure, will be sent to every poet who enters this contest.

Winners will be notified on or before February 28th, 1987. All winning poems will be published in the *American Poetry Anthology* with special mention of their winning place in the contest.

During 5 years of sponsorship, the American Poetry Association has run 15 contests and awarded over \$45,000 in prizes to hundreds of winning poets. The most recent Grand Prize winner was Linda Nemecek Foster, of Big Rapids, Michigan, for her poem "The Third Secret of Fatima." Other recent \$1,000 winners include Gayle Elen Harvey, Virginia M. Lines, John Montgomery, and Cindy Tingley.

EDITOR OPENING

Deadline is Dec. 10.

Why was it Miller Time anyway?

by Kurt Helker
Staff Writer

I woke up this morning suffering acutely from the effects of last night's revelry and asked the question all hangover-afflicted people ask as they reach for the aspirin or thrash about in the black hell known as the bedspins: "Just why the hell do I put myself through this torment?" As the "veteran of dozens of nights spent camped out over garbage cans putting out what I earlier was so eager to put down, I feel I'm at least qualified to account for why I drink.

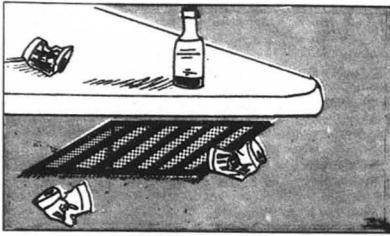

I guess the first and most important reason I pour vile liquids down my throat is to have fun, although if you would have asked me if I was having fun last night, as I worshipped the Great Porcelain God, I would have shot your dog.

The truth is that drinking usually is fun. There is something so much more enjoyable about a gathering of friends when there are a few beers to be had, and congenial atmosphere of certain bars is something to be experienced as often as possible.

Speaking for myself, I think that one of my favorite places to be on a Friday night is in a certain backwoods honkytonk, beer in hand, with redneck tunes plunking from a battered jukebox and comely lasses fluttering coyly about the dance floor.

Certainly part of the allure of my favorite watering hole lies in the fact that no one there knows that I am Kurt J. Helker, 20, birthdate 9-29-66, and that I am about as bland as McLean Stevenson. Hence, I can be anyone I want to be.

I can play O.K. Corral, wearing my cowboy hat and boots, pounding on the bar for another shot of "red eye," and I can

even do what I think is a fairly good impression of a ladies' man if I want to, stalking among the pool tables and empty pitchers in search of fresh prey, as though I were a displaced pimp. And no one need even know that I will probably spend my life selling insurance to balding, middle-aged, pot-bellied working chaps like myself so I can make the payments on the wife's dishwasher and keep the kid in braces.

But while I usually drink to have fun, I also drink because, like James Dean, I'm a rebel. I often drink just because I know others don't want me to. This trait was exhibited two summers ago, when it was standard practice for me to go out and get jacked up simply because I knew mom and dad wouldn't approve. And just in case a miracle would happen the next morning and my head would be clear, I made damn sure mom and dad knew what I had been up to by making as much noise as possible on the early morning trip to my bedroom. (You'd be surprised how much noise a dog makes when it's jumped on from the stairs.)

But while I drink to rebel, I also do exactly the opposite sometimes, and drink to conform.

I had always considered myself above giving in to peer

pressure, but as I think about it, it got the best of me Saturday night. I returned from work at what UWSP likes to call its "Food Service" (I prefer to call it something else) and began to study when two friends called and invited me to a party.

Although I had work to do and had sworn myself to drinking only on such special occa-

sions as Mondays, Wednesdays and Fridays, I went to the party, conscious of what my friends would think if I stayed home studying on a Saturday night. Once at the party, I once again gave in to that evil monster peer pressure. I lived up to my friends' idea of me as a rabid partier by drinking until I got sick. And sick. Yes, and sick a grand total of five more times! I'd fill you in on all the juiciest details, but chances are that you too have been ill due to overconsumption once in your life and know just how much fun being sick is when you're sweating from every pore, with the hours until you fall asleep crawling by like dying snails.

Yet another reason I drink is for the changes alcohol brings about in me. One of the most widely known effects of Demon Rum is its lessening (or complete destruction) of social inhibitions. I myself am a noted expert on social inhibitions, possessing all of them. For example, the mere presence of someone female or even remotely female sets my blood to racing and my tongue to tying itself in the most interesting configurations. Happily, I've found that my rather extreme shyness can be lifted if I only do what the Schlitz commercials ask and "go for the gusto."

When I follow this advice, I don't wear lampshades on my head or make offensive remarks of any sort, but simply do what comes naturally to more gregarious types: I dance (sometimes with girls!), make conversation, and just generally do things I would not ordinarily do.

Cont. p. 10

Studying till the wee hours so I can say 'wee' and mom can say 'good'

by Dan Dietrich
Features Editor

Why do I study romantic bowlers of the 18th century who ate popcorn? And why do I spend \$20,000 and five years remembering what I will forget?

During the 13th week of every semester this usually happens: I don't understand why I'm in college. This is the 13th week. It's happening again.

Last Thursday, between shovels of turkey and dressing, my Uncle Duane asked, "So what have you learned at Stevens Point?"

I didn't say much. Four years so far, 102 credits and a GPR. That's what I can show people. I remember few, if any, of

those "important" dates and figures.

I study here. Write papers here. I stay up till the wee hours so that I can say "wee" at my grades, so my professor can write "nice" and mom can say "good."

Sometimes, college feels like an exercise in disowning my emotions, in ignoring my desires. The last thing I feel like doing is to study for a final in "The History of the English Language." But one of the first things I will do next week is to study for that final.

Also, I don't feel like finishing this article. Instead, I feel like turning off this typewriter and walking out of this office and into the snow. I want to go over to that graveyard on Highway 10 and think about those dead people. I want to think about how they have no more choices.

Then I want to walk home and put all my books and notes in plastic bags, and put them under the stairway in the basement. Because, for the past four years there has been a constant inward flow of information, of philosophies, and little room available for examinations and reflections.

But I won't. This typewriter is still on. And, tonight, I won't walk on dead people and think that someday I will be one of those dead people.

Why? Because I'm in college. Because for some stupid reason

I believe that by succeeding in college, employers in the "real world" will think I am dedicated and can concentrate. But "concentration" and "dedication" are cotton candy words. They're euphemisms for ignoring oneself. Authenticity is something nobody seems interested in.

Someone perceptive once said that the cost of something is how much of life you're willing to give up to have it. I am giving up part of my life to get a degree. No, not a "college education," not anymore.

It's with that degree that employers will (hopefully) perceive me as being qualified, capable. But it's as if I will monetarily be worth three times more after walking off that graduation platform than when I walked up to it. It's as if I will be three times more capable, more professional; but I won't be.

I will simply hold some sheet of paper. That doesn't make sense.

But I didn't make the rules on cents and work and prerequisites. I merely question them. Maybe that's why I'm still in college.

But I didn't make the rules of work and prerequisites, someone or something else did. I merely think about them and operate with or without them.

Perhaps I'm still in college to wonder why I'm still in college.

Breakfast anyone?

by Frank Bosler
Staff Writer

It's 6:00 a.m. The alarm clock etches its way into our student's dreams. He reaches out, toward the alarm clock, to strangle the intruder. Instead, he touches the snooze button.

Seven minutes later: the intruder wins. On his feet, he walks to the bathroom, into the shower, then out.

He walks to the kitchen. Blindly he fills the coffee-pot and remotely fires up the stove. Then, walking to the stereo, he pushes the large button. Without looking, without seeing, just by touch, he fills that tiny apartment with more music than the walls can hold.

The music reaches into his soul and he steps lively into the bedroom, scanning the day's events in his head.

Walking back for the coffee, he cuts it in half with cold water, scans the counter for bits and pieces of last night's feed. Finding nothing, he calls the coffee breakfast and drinks it.

Out the door, and onto the snowy sidewalk, he realizes he forgot the report he worked all night on. He dashes back inside and helps himself to another cup of coffee.

Inside Collins Classroom Center, he buys a can of Mountain Dew, wishes it were a can of Jolt.

Sound familiar? All too many of us are fueling up in the morning on caffeine and valueless foods that wreak havoc on us by mid-morning.

Let's check in with our friend. It's 11:00 a.m.

He's wondering why his stomach is so upset with him and screaming for company. Sure, his thoughts are quick, but they seldom last long enough to manifest as a concept. He's wired.

After class he figures he ought to put on the feed bag, so he heads to the Corner Market. He fills up with whatever he can afford and whatever looks good.

After lunch he goes back to class accompanied by his afternoon pop, but can't stay awake in class.

Now I know you won't believe me if I tried to pull all this together and blame a simple thing like missing breakfast or drinking too much caffeine but hang on, here it goes.

A new 10-year, follow-up study of nearly 7,000 men and women in California showed that skipping breakfast is among seven health risks that increase your chances of an early death. What?!

That's right. The study, conducted by the University of California at the Los Angeles Center for Health Sciences, found that death rates were 60 percent higher for men and 28 percent higher for women who "rarely or sometimes" ate breakfast, compared to those who ate breakfast "almost every day."

Other studies have shown that people who eat breakfast are more productive during the late morning. They also had faster reaction time and less muscular fatigue than those who skipped breakfast. A study of college women showed that those who skipped breakfast consumed more snacks—mostly snacks high in calories and deficient in nutrients—than those who ate breakfast.

Enough studies and depressing news.

What's a student to do for breakfast, especially during finals and last-minute deadlines that come at the end of the semester? One way to get around the dilemma is to get breakfast prepared or organized the night before. Many nutritious breakfasts are instantaneous: plain yogurt topped with sliced bananas or fruit or applesauce, peanut butter on whole wheat toast, an unsweetened ready-to-eat cereal with milk and sliced fruit or raisins, or a blender shake of milk or yogurt, fruit, an egg and whatever else you can think of.

Say what? Your roommates drank the rest of the milk last night with their Captain Crunch? And you haven't seen fresh fruit since you were at home with mom? O.K.

The main idea here is to eat something in the morning. Be creative and give yourself a break. Sure it takes a little time and planning, but we're talking about survival here. Not only for the rest of your life but what's the use of cramming all night and wiring yourself out if you're going to space out and blow the test anyway. Will breakfast help? You be the judge.

Speaking about cramming and finals, next week's article will focus on finals anxiety. Until then, be well.

Dream comes true for UWSP student

by Keith Uhlig
Staff Writer

For Regina Part, sophomore, dreams can come true. The fashion merchandising major was crowned Miss Wisconsin-USA 1987 and will be competing in the Miss USA pageant in Dallas in February.

The road for Miss Wisconsin started for Part when she was 17. Her uncle encouraged her to compete in the Miss Stevens Point contest. She didn't win but got second runner-up. The next year she competed in the Miss Wisconsin pageant, again not winning but getting third runner-up. The reason she kept at it she said, "You're just never satisfied until you win."

One of the reasons for her success this time was her coach, Beth Hanson, who is Mrs. Wisconsin. "She was helpful," said Part. Another reason that Part won this year was her experience. "I knew exactly what to expect, so I could stay more relaxed and confident." Part said she had other contestants ask her for advice because she had been through it before.

"It takes more than just a pretty face to win the contest," said Part. "It's not always the beautiful one that wins, but the one that plays the smartest game." She said there were a lot of really beautiful women in the contest, and that not being intimidated is important.

According to Part her life has not changed too much since winning the contest. "I don't feel any different. I love the attention." And attention she gets. She has been interviewed by television stations, channels 9 and 7, as well as various newspapers.

"For the first couple of days, I did feel special, but it's gradually wearing off," said Part. A lot of people have been calling to congratulate her. "I've gotten a lot of support from local people."

One way her life has been affected is academically. "I'm not concentrating as much as I

UWSP sophomore Regina Part was crowned Miss Wisconsin. Part, a fashion merchandising major, will compete in the Miss USA pageant in February.

should. Sometimes I place the contest ahead of school."

The contest will also help her career. Her goal is to open her own fashion shop. "It's definitely going to open doors for me in my field."

She is looking forward to the Miss USA pageant, but "I'm nervous about it. My goal is to make the top 10. I'd love to do it." She is taking next semester off from her studies because the

contest takes three weeks.

In addition to going to the Miss USA contest, Part has other responsibilities, such as being at the Special Olympics, and having to make appearances at openings of malls, banquets, award dinners and the like.

However, she added, "I don't want people to think I'm anything special. I'm just like any other college student."

Miller time, from p. 9

Just this last weekend I traveled to Madison to go out with Dawn, my "pen pal" of sorts, whom I had never seen before. Although I was (and am) severely enamored of Dawn, our date inched along painfully at first because I was scared proverbially shitless and could not get my mouth to form even rudimentary words. Eventually,

though, I managed to loosen my tongue with a few beers and things got better and better as the night went on. I don't want to say that alcohol salvaged the evening, but it sure didn't hurt.

It is my opinion that those who are proponents of going "cold turkey" while on dates surely must be fans of awkward silences.

"Barney Street" accepting submissions

University News Service

The University Writers organization at UWSP is now accepting submissions for the 10th annual issue of "Barney Street."

"Barney Street" is a literary magazine which provides an opportunity for students and members of the community to have their poems, essays, photography and short stories pub-

lished. Writings should be limited to 2,500 words or less. Artwork suitable for a small publication will be considered.

The magazine is named for the street which once connected Fourth Ave. and Franklin St. in Stevens Point. This is the present site of the Gilbert W. Faust Lecture Hall in the Science Building on the UWSP campus.

Typed submissions are due on Dec. 20 for the first semester

and by Feb. 4 during the spring semester. Submissions may be sent to "Barney Street," Academic Achievement Center, 018 Learning Resources Center, UWSP, Stevens Point, WI 54481. The magazine will be sold next spring for \$2.50 at the Writing Lab, at the University Bookstore and at Bookworld.

Further information is available through Bernie Beske at the Academic Achievement Center.

"Video Personals"

News Release

Student Experimental Television (SETV) will unveil a new weekly show Thursday, December 4, in the U.C. Concourse ... "Video Personals."

Video personals are a five to 30-second "personal message" from one student to another that will be videotaped throughout the day and then re-aired during SETV's regular programming that night.

SETV's General Manager Kirk Strong said, "We want to offer students a way of getting whatever's on their mind on tape so they can enjoy it later with their friends."

Social reformers, student organizations, aspiring actors, lovers and comedians can all "say it with a video" every Thursday in the Concourse.

Wisc. poet to read and conduct workshop

Wisconsin poet Roberta Hill Whiteman will read her poetry at the University of Wisconsin-Stevens Point on December 10. The reading, which is free and open to the public, is scheduled for 7:00 p.m. in the Garland Room of the University Center.

Whiteman will also conduct a writing workshop from 4:00 to 5:30 p.m. in the Mary K. Croft Academic Achievement Center in Room 018 of the Learning Resource Center.

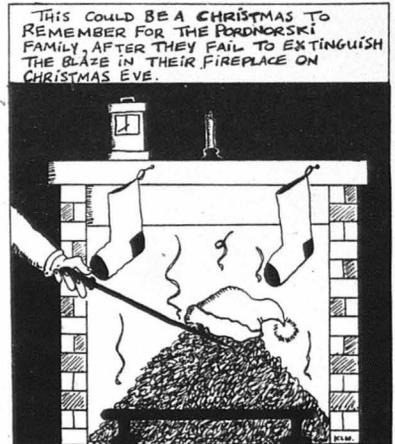

Star Quilt, Whiteman's first book of poems, was published in 1984. Her poetry also appears in such anthologies and magazines as *The Nation*, *North American Review*, *American Poetry Re-*

view, and *The Third Woman: Third World Women Writers in America*.

Whiteman participated in several Poets-in-the-Schools Programs in such states as Minnesota, Arizona and Montana. Recent readings in Minnesota included, The Marshall Festival in Marshall and at Mankato State University in Mankato.

A member of the Oneida Tribe, Whiteman grew up around Oneida and Green Bay. She earned a B.A. from the University of Wisconsin and an M.F.A. from the University of Montana. She taught at Oneida, Rosebud (South Dakota) and most recently the University of Wisconsin-Eau Claire.

The reading is sponsored by University Writers.

PORDNORSKI AT LARGE

by Kyle White

Then get in on the ground floor in our Platoon Leaders Class program for college freshmen, sophomores and juniors. You could start planning on a career like the men in this ad here. And also have some great advantages like:

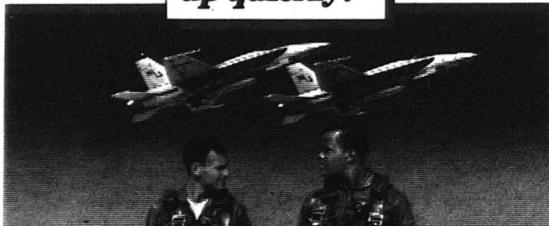

- Earning \$100 a month during the school year
- As a freshman or sophomore, you could complete your basic training during two six-week summer sessions and earn more than \$1200 during each session
- Juniors earn more than \$2100 during one ten-week summer session

- Seniors and graduates can be commissioned through the Officer Candidate Class Program
- You can take free civilian flying lessons

"After Image '86"

University News Service

After Image '86, an annual dance performance by students and faculty from the University of Wisconsin Stevens Point, will be held at 8 p.m. Friday and Saturday, Dec. 5 and 6, at the Sentry Theater.

Tickets are on sale at the College of Fine Arts box office and at the door on the evening of the performance. Cost of admission is \$3 for the public and \$2 for UWSP students.

The event will open with a lecture/demonstration by James Moore, head of UWSP's dance program and concert coordinator. He will discuss the development of a full-length "jazz-a-ballet" he is choreographing. The new piece, a combination of jazz and classical ballet, will be premiered at UWSP in the spring.

Also, the winner of this year's \$750 Bukolt Family Scholarship will be announced at the performance. The award rotates on an annual basis between the theatre, art and dance programs.

In addition, there will be a talkback session involving audience interaction after each dance number.

Two works choreographed by students competing for entrance into the American College Dance Festival (ACDF) will be

Announcing Three Pluses For Students

A special program
to introduce the new AT&T Plus Card
to the University of Wisconsin System

1. The easy way to own an AT&T PC.

With your Plus Card, you can purchase an AT&T high-speed, high capacity personal computer and needed printers, modems and software. The Plus Card lets you pay through convenient monthly payments.

AT&T PC's were designed with expansion in mind and are uniquely qualified for university work, with growth potential to meet the demands of school and a future career.

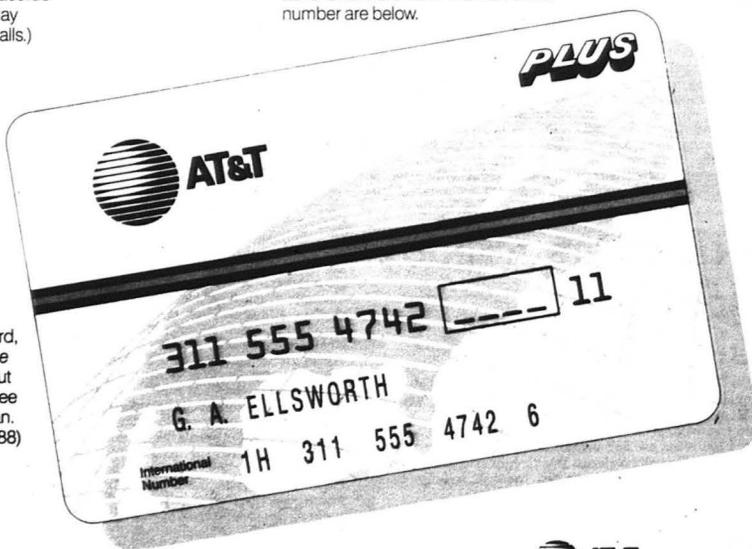

2. No payments for 6 months.

If you purchase your PC between now and March 1, 1987 using the AT&T Plus Card you will not have to make any payments before June 30, 1987. (Finance charges accrue from purchase date. Payment delay cannot be applied to telephone calls.)

3. A chance to win a free AT&T PC.

No purchase is necessary. And it's easy to enter your name. Just visit the AT&T display table in your student union tomorrow, or call your campus representative for all the details. The name and number are below.

For all the facts about the Plus Card, dial either number below. *Only the campus rep* can also tell you about the special UWS program—the free PC and the deferred payment plan.

- 1-800 CALL ATT (1-800-225-5288) Ext. 512

The right choice.

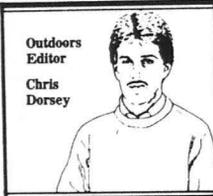

OUTDOORS

Iowa pheasant hunt worth the trip

I had heard the rumors about covies of a dozen pheasants flushing at once. The only trouble a hunter had was identifying the cocks from the hens.

I listened to the tales of dogless hunters shooting their limit of three Iowa pheasants before 10 in the morning. For someone like myself who has been weaned on Wisconsin's lean pheasant populations, the temptation of a hunt like that was just too much.

After several phone calls to Iowa DNR personnel, the state's tourism office and a local chamber of commerce, my

Outdoors Editor
Chris Dorsey

brother Bob and friend Bryan Hillmer of Morrisonville and myself made the journey to the Hawkeye State.

We targeted Clarke County in southwest Iowa because of its plentiful pheasant and quail populations. Iowa's prime quail range, said Iowa DNR wildlife manager Craig Roberg, extends across the southern two tiers of counties. Our aim was to find where that prime pheasant and quail range overlapped.

Our first day's hunt was south of thick pheasant country, but as a consolation we wound up in the heart of the quail range. The hilly terrain was veined with a network of brushy gullies. Coupled with cornfields and pasture, the area was heaven for covies of quail. Blown-down trees that were interwoven with wild grape and blackberry seemed to be popular spots for the birds to hold tight while my nine year old setter feathered into the wind before stiffening into a point.

Unlike the Hungarian partridge I've grown accustomed to chasing in Wisconsin, bobwhites

seem far more agreeable to a pointing dog. Besides woodcock, I doubt there's a bird that behaves much better for a pointing dog. In fact, I don't think it would be too much to say that quail are a pointing dog's best friends.

We drove west out of the best quail range and into northern Clarke County where the pheasant hunting improved dramatically in the matter of only 20 miles. The best pheasant range had a greater proportion of cornfield which replaced the pasture land common in the best quail habitat. Since much of the corn and soybeans were harvested by Thanksgiving, we concentrated our pheasant hunt-

ing efforts along the edges of picked cornfields, brushy ravines and grassy waterways.

Though there were plenty of colorful roosters, they weren't as gentlemanly as the bobwhites. No sir, pheasant hunting is a scrappy business where

only shrewd hunters will earn crowing rights. Iowa birds seem to be inherently skittish and flush long before most hunters can approach within shooting range.

When working a long ravine or waterway, pheasants will

often run to the opposite end of the cover the hunter is working. By positioning a hunter at the end of a strip of cover, another hunter can walk that strip of cover toward the hunter waiting

Bob Dorsey flushes two Iowa pheasants as he walks a grassy ravine in Clarke County, Iowa. Iowa sports excellent late-season hunting opportunities for out-of-state hunters.

Alaska's splendor to be savored by old ... and young

by Jim Janssen
Staff Reporter

Henry Gannett, a geographer who went on an expedition to Alaska in 1899, gave this advice to anyone wishing to visit this vast wilderness: "If you are old, go by all means, but if you are young, stay away until you grow older. The scenery of Alaska is so much grander than anything else of the kind in the world, that, once beheld, all other scenery becomes flat and insipid. It is not well to dull one's capacity for such enjoyment by seeing the finest first."

I doubt all else becomes flat and insipid, but I do not doubt the grandeur of Alaska's land. Especially after reading Donald Dale Jackson's "The Floor of Creation" in *Wilderness* magazine. It described the 19 million-acre Arctic National Wildlife Refuge (ANWR), officially protected in 1980 in Alaska's northeast corner. Canada lies to the east, the Canning River to the west, the Beaufort Sea to the north, and Yukon Flats National Wildlife Refuge is south. The

towering peaks of the eastern Brooks Range bisect the refuge and separate the subarctic boreal forest on the south slopes of the mountains from the rolling, treeless tundra on the coastal plain to the north.

John Milton, who hiked the range in 1967, described this dramatic transformation of landscape: "As we crossed over the saddle, a new world unfolded. Two snow decked mountains guarded the entrance to the flat tundra. Mile after mile of undulating brown and green plains bordered by snowy peaks lay in the soft afternoon sun. And behind us all was wintery chaos, far, far away beyond the foothills, we could see the level vastness of the purple tundra stretching away northwards."

Grizzlies, wolverines, foxes, dall sheep, moose, musk ox, and caribou or wapiti are just some of the animals at home in the midst of mountains, foothills, valleys and tundra.

However, conservationists are now and have been in a continuous battle to preserve this land

and its creatures from development due to industrialization in the form of gas and oil exploration. This area has seen the white-man visit since 1826, with British naval explorer Sir John Franklin, who unknowingly was in the lands where the Inupiat Eskimos roamed.

The visits after this were for whaling and mining in the era of the Klondike gold rush around the turn of the century. Geologists and conservationists followed. People like Robert Marshel, Olaus and Margaret Murie and John Muir topped the list.

In 1960 a public land order declared an 8.9 million-acre range to preserve unique wildlife. But the discovery of the Prudhoe Bay oil field in 1968 led to political battles involving the range and other federal land in Alaska until the passage of the Alaska National Interest Lands Conservation Act (ANILCA) in 1980.

Throughout the 1970s, conservationists, powered by the Alaska Coalition, were winning

DNR offers holiday discount on guidebook

MADISON, WI - The Department of Natural Resources is offering a special holiday sale of the popular guidebook, *Wisconsin State Parks - Explore and Enjoy*.

From now through the end of the year, the guidebook will be sold for \$2.50, about one-half the regular price of \$4.95.

The parks guidebook provides a wealth of information on state parks, forests, recreational areas and trails. It includes color photographs, charts, maps and a pull-out poster.

It will make an ideal holiday gift and is available at all Wisconsin State Parks and Forests or at any other Department of Natural Resources office.

For each mail order, include an additional \$1.50 for handling, postage and tax. A mail order for one copy of the guidebook will be \$4.00. Make checks payable to the Department of Natural Resources, and mail to Bureau of Parks and Recreation, Department of Natural Resources, P.O. Box 7921, WI 53707.

Eleven-year wait worth trophy buck

by Tim Albers
Staff Reporter

I did not get a chance to help set up the deer hunting shack this year but I knew it would be there. I left Point at about 4 p.m. on Friday. The three-hour drive seemed endless, but then anticipation can do that. It didn't help any when I could not make it into the gravel pit where the shack was located. I decided to park my truck outside the pit and carry my gear in, and I lit the lantern and then felt better. An hour and a half later the rest of the crew showed up, the food was unloaded and everyone was telling how they were going to shoot a big buck with the accent on big. By the time everyone settled down and hit the sack it was midnight.

Though, three in the morning comes early, everyone seemed ready. After breakfast we all went our own way. Dad and I went behind the shack. About 9 a.m. Dad got cold and walked a little loop to my stand. We then joined to make a little drive to some of our other hunters. We had traveled about 100 yards when shots rang close in front of us. We then heard a hunter from one of the other camps calling for help. She had filled her tag with an eight-point buck. We later found out that one of the hunters in our group pushed it to her instead of trying one of us.

By the time opening day was

completed, the number of deer we had on our hanging pole was only two, a six-point buck and a doe. By the time I returned to Point on Sunday night, we added yet another six-point buck to the hanging pole. By Monday and Tuesday the remaining hunters had shot one more—a fork horn. I returned on Wednesday to help other hunters in our group fill their hunter's choice tags. Thursday was Turkey Day and we concentrated our efforts on eating instead of hunting. On Friday, we filled the last of our doe tags and became a "bucks only" crew. Saturday saw shots fired at a buck with a rack, I quote, "As wide as the butt of my gun."

Now for the last day of the season. We got up and into the field fairly early, 8:30 a.m. Our first drive was along the river. I was the second man from the river. We saw five deer, one of which may have been a buck.

The next drive was Panic Drive. This drive got its name the day after the big blow-down when we tried to do it at 3:30 and ended in a panic to get out before dark. This year we did it twice. The first time was on the first Sunday of season. One deer was seen and one shot was fired. I missed. The second time was on the last Sunday. Just about everyone wanted to drive so I stood. I had never before been on stand during this

Photo by Tim Albers

Deer camp was bountiful for hunters who traveled to northern Wisconsin. DNR officials predict a harvest of 230,000 animals this year.

drive. Chuck then left me and went to his stand. The wind was blowing and it was cold. I saw the drivers about halfway through the drive and thought, "Good, it's almost over." Then some shots came from down by the river. More shots came from one of the standers and a driver. The deer was headed for my stand. The first thing I saw

of him was his rack, big and beautiful. I shot and he kept coming. I shot again and again. He was still coming toward me. When I fired the last round in my rifle he dove into a downfall and just layed there. He was dead. I felt a twang of remorse and then was overcome with excitement.

I had just taken my first buck after 11 years of hunting. The

drivers continued and when the nearest got to my buck, he told me the antlers had oddly fallen off during the crash of his fall. After we got him to camp, we guessed that the spread was about 20 inches. It had a heavy rack with eight points. It was a nice buck but hopefully it won't be another 11 years before the next.

Deer harvest has ups and downs

Deer hunters had varying success around the state opening weekend of the gun season with the two-day harvest reported up in the southern, west central and northwestern counties of the state, down in the northeastern and north central counties, and about the same in the southeast.

In the northwest, some trophy bucks were taken near Radisson in the Park Falls area where hunting conditions opening weekend were ideal. The buck harvest was up 23 percent in Douglas County and 32 percent in Bayfield County. And, the harvest was up about 20 percent in the Park Falls area consisting of Burnett, Washburn, Ashland and Iron counties. Ice anglers had fair results in the Park Falls area.

Farther south in the west central counties, 41,077 deer were registered opening weekend, and increase of about 3.4 percent over last year. Hunting conditions were excellent in the Eau Claire area for the opener with sunny skies and the temperature in the 40s. Bluegills are hitting on Marshmiller Lake in Chippewa County, but anglers are alerted that ice conditions are marginal, at best.

In north central Wisconsin, the buck harvest was about the same as it was opening weekend in 1985. Registrations of antlerless deer were about one-half of what they were last year, as fewer hunter's choice permits were issued in the north central counties and the reduced harvest was intended. Hunting conditions throughout the north central counties were excellent opening weekend with snow cover for tracking and the beaver ponds and marshes frozen, providing good access.

In the northeast, the registrations during opening weekend of the gun deer season were down about 13 percent compared with a year ago. Weather conditions were good. On the fishing scene, some perch are being taken on the west end of Lake Poygan. Be careful on the ice.

In the southeast, excellent conditions also greeted hunters opening weekend with the overall harvest during the first two days of the season just about the same as it was a year ago. The warmer weather has reopened some previously frozen swamps, making tracking and access difficult.

In the south and southwest, deer registrations the first two days were about three percent above last year. Some nice bucks were taken in Grant and Sauk counties. Hunters had good success in Fond du Lac County registering about 11 percent more animals than opening weekend a year ago, but the registrations were down about 11 percent in Green Lake County. The goose census on Horicon Marsh on October 19th showed about 137,000 Canadas still on the marsh at that time.

NORTH CENTRAL DISTRICT

The buck harvest across the 10-county North Central District was virtually the same for opening weekend this year as it was for the same two days in 1985. There were 11,180 bucks registered by deer hunters for those two days this year, compared with 11,079 bucks for the same days last year. Deer reg-

istered on hunter choice permits, however, were down by slightly more than half when comparing deer registrations for 1986 against hunter choice deer registrations for 1985. Fewer hunter choice permits were issued this year throughout the district and the reduced antlerless deer kill has been intended. Taking a closer look at the deer harvest by groups of counties, the Woodruff Area, which is comprised of Forest, Oneida and Vilas Counties, posted a buck kill of 1,856 animals which is a 19 percent decrease from 1985.

The Antigo Area counties of Langlade, Lincoln and Marathon has a reduced buck kill of about 5 1/2 percent from last year. There were 2,826 regular license bucks registered in those three counties during the past weekend.

The central counties of Adams, Juneau, Portage and Wood, which make up the Wis-

consin Rapids Area, had a 12 percent increase in the buck kill this year. The total number of adult buck deer registered in those counties were 6,498, compared with 5,797 last year. When comparing both bucks and hunter choice deer registrations for the entire North Central District with similar registrations for the first two days of 1985, the effect of the reduced number of hunter choice permits available becomes immediately apparent. There were 17,281 total deer registered this year, compared with 23,341 total deer registered last year.

Deer hunting conditions throughout the North Central District were excellent. Snow cover on the forest floor allowed hunters to detect deer movement even when the skies were heavily overcast with cloud cover. Woods roads were frozen, permitting vehicle access everywhere. Marshes and beaver ponds were frozen

in the more northern reaches of the district, permitting foot access in remote areas.

A fresh snowfall across the north on Sunday restricted visibility until late afternoon when moderate winds shook the wet snow from the hardwood tree branches. A warming trend in

weather patterns now is moving into the area. The old snow has been crossed by a maze of deer tracks, making imprints of new tracks difficult to single out. Because hunters tend to move about less during warm weather, deer are less likely to be pressed out of their hiding spots.

Trapping has successful side and... the untold story

by Jim Burns
Special to the Pointer

I would have to admit that I feel a bit of envy, even jealousy, when I see "Klondike Kornelius" step out of the woods with his catch draped over his shoulder—ending a successful morning on the trap line. Clad in a buckskin jacket with his Bunyan beard dripping icicles, he presents quite a nostalgic sight—as if Jim Bridger himself had appeared from the pages of history. And then there is the CNR major who enters the Monday wildlife class with his eyes lit up like a beacon ... "Yeah man, I caught 40 'rats and 15 'coon this weekend!"

Let's face it, "Joe Trapper," as I shall call him, makes trapping look easy, at least talk easy. Somewhere along the line he picked up the skills to become successful at coaxing 'coon, instead of stumbling around like a lost loon. So, where does the novice trapper fit into all of this? The boy who grew up without a father or an ol' timer to teach him the skills of the trade? The boy who had to learn what there was to know on his own? Seldom noticed in his world of seclusion, he makes trapping look difficult if not impossible. Too embarrassed to talk about his weekend in the woods, he chooses to

remain silent—his trapping experiences never exposed. But now there is hope as the author, an infamous novice trapper himself, brings the "Untold Story of Trapping" out of the closet ...

It all started back in the fall of '83 when college dorm life beckoned the inexperienced freshman to try anything and everything including, heaven forbid—trapping. Again, "Joe Trapper" was responsible for the crime of enticing two unsuspecting novices into the art. My wingmate Todd and I happened to be the victims of the trapping bug as we pooled our money and bought over \$40 worth of trapping gear.

Christmas break gave us our first chance to put our limited knowledge to work as we headed north in hopes of paying off our expenses in a single week. (Little did I know that it would take two years before I even caught anything.) Dressed in blaze orange with his backpack stuffed with supplies, Todd made for a "gung-ho" companion. We settled with a tamarack swamp which, according to Todd, would be "breeming with coyotes and fox."

Learning to set a leghold trap in knee-deep snow with subzero temperatures was the first obstacle for us novices to over-

come. "Don't take those mits off!" barked Todd as he attempted to clear a level surface to set the coilsprings. "They'll be able to smell your scent!" But after a few cumbersome attempts with pinched fingers, we ended up taking our gloves off anyway. After a couple of hours of meticulously putting all of Todd's "secrets" to work, we returned to the warm comfort of the cabin in hopes of returning to a trapping line laced with vermin.

Rising at six a.m. the following morning, we fell victim to yet another common woe of trapping—bad weather. Overnight the outside temperature had dropped to -30 degrees which wouldn't have affected us had we remembered to stoke the cabin fire during the night. It was no wonder then when we arose to find our breaths condense above our heads in a forbidding cloud of vapor. After drawing straws to see who would have to leave the warm confines of his sleeping bag, I reluctantly crawled out to begin the arduous task of restarting the fire and thawing out our clothes.

The morning in the woods didn't go much better as every critter was either hibernating or ignoring our 12 traps. On the way back I even managed to bust through the swamp ice finding myself waist-deep in frigid water! To make a long story short, the entire week went much the same as day-after-day we trudged through deep snow only to arrive and stare at empty traps. I suppose the only thing that kept my hopes up was Todd's happy-go-lucky attitude and his promises that the January landscape was bound to yield a crafty gray fox.

When the 1984-85 season rolled around, I promptly sent in for two otter tags and a bobcat tag in hopes of increasing my

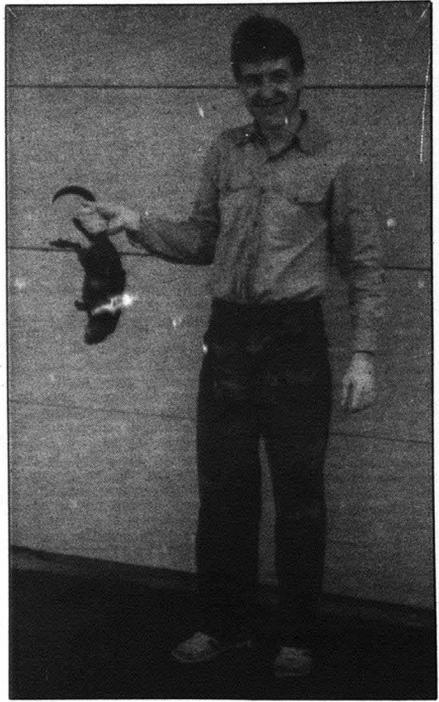

Photo by Paul Becker

The author with his catch ... all of it.

chances of landing game. Having discovered an otter hang-out on a creek near our cabin, I was determined to nab a couple when spring break arrived.

This time I had a new partner as Todd must have realized the futility and gave up. The only problem was that this was no average dude—this was Tom Poehls. Having Tom along on the trap line is somewhat analogous to having Bozo the Clown with you. If there was ever a time for something unusual to happen it would be when this character was on the scene.

One of Tom's worst habits was his belief that a trap should be set at every trail of tracks to

be found in the forest. It was, therefore, not uncommon for me to check traps the next morning and find them lying on everything from squirrel trails to yes—deer trails! Maybe this was due in part to Tom's city mentality as his entire life had been centered around catching fox—the two-legged variety. Another habit he had was his use of peanut butter and jelly sandwiches and candy bars to entice raccoons out of hibernation.

I was beginning to have doubts about the chap's sanity when on the last morning of break Tom called me over to

A GREAT OPENING !!

SGA Announces an opening on its Executive Board:

Academic Affairs Director Spring 1987

Job Description and Applications are available in the SGA Office, U.C. The deadline for applications is December 12, 1986.

Untold story of trapping, from page 17 ...

inspect one of his otter sets. Expecting to find a gray squirrel, I was amazed to discover that there was no trap at all but rather one heck of a grisly mess of torn-up sod. Knowing immediately that we had a wounded animal on our hands, I told Tom to fetch the 22 while I took to the spoor. Twenty yards downstream I identified the track as one belonging to a huge 'coon. Mistake number 45: Never expect to hold a raccoon or other with only one strand of thin wire. Remembering that 'coon season was closed anyway, I became more intent on retrieving my one-and-three-quarter Victor trap.

After tracking the bandit for nearly half a mile, I was upset to see the tracks disappear near the stream's edge. Where the critter went was beyond Tom and me, but coming back empty-handed was something that I didn't stomach well.

It wasn't until spring break of the following year that I managed to put in another full week of laying steel. This brings us to yet another enigma of the time-consuming art—lack of time. Finding time to consistently trap is out of the picture for the college student. No sooner do the furbearers become accustomed to your sets, when it comes time for pulling them up and constructing algebra sets instead. However, this time I was prepared to get an early start and face up to the novice's most deadly stumbling block of all ... the anti-trapper. (In this case, my mother). "Now Jim, I don't want you wasting your precious time torturing those poor little creatures. You should be taking Sue out." I was able to weasel my way out of that incidence only by reminding my mom of the beautiful mink stole I was going to make her for Christmas. (That's if I could break the "Jim Burns Jinx").

It looked as if the ball was finally rolling in my favor as Yellow River bottom was infested with beaver and muskrat sign. I was beginning to get my

hopes up at a heavily-visited beaver set when mid-week I came upon the sprung but empty trap. I reset the leghold in hopes that the beaver would return to finish off the freshly cut aspen, but no such luck was in store—the beaver definitely spooked.

I was preparing to chalk off another season as failure when

I returned to pull up the traps the last day of break. Rounding a bend in the stream to check my last bank set, I was shocked when I detected a ripple in the water. Bursting forward, knee-deep in slush, I nearly erupted in ecstasy when I saw the head of what looked to be a small beaver protruding from behind the guide poles of the corral. I

was a little disappointed but still elated when my illusions of a beaver evaporated into a muskrat. After dispatching the 'rat, I pulled up the trap that had made the magical catch and headed for home with my first catch proudly draped over my shoulder.

I'll never forget that day—the day I managed to out-fox my

first furbearer—the day I beat all odds in breaking the "Novice Jinx"—the day I went up to Joe Trapper and said: "I too caught a 'rat this weekend!" So, there you have it—the plight of the novice in a nutshell. This fall I and another greenhorn will be out stomping the trapline pursuing the outdoor sport that truly is a challenge ... breaking in the novice trapper!

Groundwater Center starts testing

A computerized water testing project, which will gather data on groundwater quality in five Central Wisconsin counties, has been initiated by the Central Wisconsin Groundwater Center at the University of Wisconsin-Stevens Point.

Data collected from Adams, Juneau, Waushara, Waupaca and Wood counties will be collated to allow tracking of changes in water quality over time or to delineate areas that may have special problems.

An annual summary of the computerized data will be provided by the center to each county beginning in January of 1988. This data will be useful to county decision-making bodies in evaluation of existing problems and groundwater planning.

Residents of the five counties can obtain sample bottles and instructions from the University of Wisconsin Extension Office in their county. After the samples are collected, they may be mailed or taken to the Environmental Task Force Lab in the College of Natural Resources building at UWSP. Results will be returned with an explanation of the possible significance of any problems.

The program is intended to facilitate the annual testing of private wells recommended by water quality specialists. A \$7 fee will be charged for bacteria and nitrates testing. The Environmental Task Force Lab also will offer a "homeowner's package" for \$10 which included seven commonly run analyses and

provides a more complete picture of well water quality. In addition, specialized pesticide or volatile organic analyses will be available by arrangement.

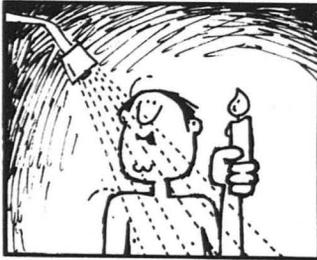

Portage and Marathon counties have previously established water testing laboratories to serve their own county residents. The Central Wisconsin Groundwater Center aims at including the findings of these counties in future annual summaries.

All counties also have access

to the water testing services of the State Lab of Hygiene in Madison. However, that lab provides only bacteria and nitrate testing for private homeowners, and their data is not included in the computerized data base being established at the Groundwater Center.

For further information contact Chris Mechenich, groundwater education specialist, 010 Student Services Building, UWSP, 346-4276.

Penny-Wise? Pound-Foolish?

Lights are cheaper than hot water.

Lighting costs \$3 to \$6 a month for the average apartment. So if you cut lighting by, say 15%, you could save 50¢ to \$1 a month. Now that's nothing to scoff at; it'll buy you a couple rounds of Pac-Man, if nothing else.

But you'll save substantially more by cutting back on hot water use.

That's because heating water takes a lot of energy and that means it costs you money. For perspective, a shower is 500 to 1,000 times more expensive than lighting a 60-watt bulb for the same time period.

So the next time you're standing in the shower in the dark, think about it.

WISCONSIN PUBLIC SERVICE CORPORATION

Area outdoor opportunities abound

Fishermen are catching walleyes on Pelican Lake in Oneida County and Pickerel Lake in Langlade County. The ice has not frozen completely across larger lakes and it still is not safe for ice shelters and heavy loads. About one to two inches of snow covers the ground. Visibility in the woods is excellent and marshes and beaver ponds are frozen hard, giving gun deer hunters excellent foot access into remote areas this weekend. If the light snow cover remains, hunters will have very good deer tracking conditions.

Woodruff Area

Ice anglers are enjoying good fishing on thin ice. The extremely cold temperatures which the northwoods has been experiencing has caused some of the waterways to freeze. Caution is advised on the ice. The range of freezing is open water to approximately three inches of ice. Nice catches of walleyes are being reported by anglers.

SIGN UP WITH US, AND WE'LL SIGN OFF ON YOUR LOAN.

Just because you graduated from college doesn't mean you have to graduate into debt. Erase your college debt with the Army's Loan Repayment Program.

Each year you serve as a soldier, the Army will reduce your college debt by 1/3 or \$1,500, whichever amount is greater. So after serving just 3 years, your college loan will be completely paid off.

You're eligible for this program with a National Direct Student Loan, or a Guaranteed Student Loan, or a Federally Insured Student Loan made after October 1, 1975. And the loan can't be in default.

And just because you've left college, don't think you'll stop learning in the Army. Our skill training offers a wealth of valuable high-tech, career-oriented skills. So sign up. And watch us sign off. Find out more by calling your local Army Recruiter.

Preserving Alaska, from page 14 ...

small battles with oil companies wishing to explore and exploit the wilderness lands in Alaska. Interior Secretary Rogers C.B. Morton, continued ex-secretary Stewart Udall's policy of denying applications by oil companies for leases on the range, as well as adding 3.7 million acres to it.

Canada also helped the conservationists' cause by adding the 3 million acre Northern Yukon National Park east of the Alaska Range, benefiting the porcupine caribou herd, (numbering over 150,000) which migrate back and forth across the border.

In 1977 a bill introduced by representative Morris Udall would add 115 million acres to be set aside as parks and refuges, much of it wilderness under the provisions of the Wilderness Act of 1964. It would also add 9.9 million acres to the range, most of it under wilderness status. It passed in the House of Representatives but

the Senate began to cut the acreage drastically. Then, President Jimmy Carter utilized the Antiquities Act of 1906 to create 56 million acres of national monuments, ending public entry of 11 million acres on two national forests and designated 40 million acres as wildlife refuges under the Federal Land Policy and Management Act of 1976.

In 1979 and 1980, a compromise was made between industrialists and conservationists. Protected were 103 million acres of federal lands in Alaska, with a nine million acre addition to the range, and eight million acres, the bulk of the original range, came under wilderness protection and was changed to the Arctic National Wildlife Refuge.

But the price of compromise was high. Oil and gas exploration was mandated on the coastal plain, disturbing caribou, porcupine and musk ox.

In 1980, with the election of the development and industry

minded Ronald Reagan, his Interior Secretary, James Watt, began to threaten ANWR by suspending talks with Canada on protecting the caribou herds as well as unsuccessfully attempting to shift the job of drafting guidelines for oil and gas exploration from the Fish and Wildlife Service to the more industrial minded U.S. Geological Survey.

As the exploration crews began to appear, destruction immediately followed. The guidelines were not met by the

oil and gas industries for safe exploration, and as a result, damage was done to the tundra and its wildlife. The Wildlife Society's director of Alaska programs says; "The fact is no matter what the real potential for gas and oil may be, the Reagan administration is going to make it sound as if billions and billions of barrels are at stake. They want oil and gas exploration in there and they are willing to use any means to get it-including blatant exaggeration."

"The pro-development, anti-wilderness cast of the interior department hierarchy has shifted the burden of proof on the conservationists, who have to prove why they shouldn't drill. It amounts to proving a negative."

And the battle continues. The Coastal plain is in need of protection as are millions upon millions of acres of land everywhere. We may never see these protected areas, but we cherish the knowledge it is there, in all its beauty.

Taxidermy collection donated

About 100 birds, fish and mammals that were collected and mounted since the 1920s by the late Marion Skibicki have been donated for display and instructional purposes at the University of Wisconsin Stevens Point.

Some of the mammals are invaluable to UWSP because the likes of them previously were not included in the collection maintained by the College of Natural Resources, according to wildlife professor Kirk Beattie.

Most of the specimens will be displayed at Treerhaven, UWSP's natural resources summer camp and field station near Tomahawk. They will be used there for decorative and teaching purposes.

However, part of the collection will be placed in one of the lodges at the Boston School Forest in Plover.

Ronald Skibicki, Stevens Point, and his brother, Norbert, Milwaukee, donated the collection to the university after their

father died in September at age 86.

Marion Skibicki, who lived at 232 Union St., Stevens Point, had been planning for some time to give his collection to UWSP.

Beattie said about 30 pelts of fur bearing animals were included in the gift, and are prized by wildlife professors because they are rare and useful for teaching purposes.

UNDERGRADUATE RESEARCH OPPORTUNITY FUND

The Undergraduate Research Opportunity Fund (UROF) is now available on campus to provide undergraduate students with funds to support expenses incurred during the performance of, or in reporting the results of, their independent research. To be eligible for support from the UROF, a student must be enrolled in a special topics/independent study research class under the direction of a faculty mentor. Grant application deadlines for 1986-87 are as follows: December 23, 1986; February 16, 1987; and April 20, 1987. Proposals that do not meet one deadline will automatically be reviewed during the following round of competition. For more information and application guidelines, contact the Graduate Office, Room 118 Main Building, ext. 2631.

Iowa pheasants, from p. 14

at the end. It's a good bet someone will get shooting.

When hunting with a well trained dog in Iowa's best pheasant cover, it's not uncommon to flush 50 or more pheasants in a day's hunt. It's usually best to avoid hunting standing cornfields unless they're small. The birds will make use of the clean corn rows and scurry long before a hunter or dog can approach.

Iowa's pheasant season opened November first and extends through January fourth.

Though most of the birds shot in Iowa are harvested early in November, excellent opportunities remain for hunters traveling to Iowa in December. Virtually all the crops are off the land by mid-December and hunting pressure is very low.

Most landowners will grant hunters permission to hunt on their land after the opening weekend. Iowans are some of the friendliest folks I've ever met and appreciate a hunter asking permission before hunting on their land.

Many Iowans recognize out-of-state hunters as a valuable source of revenue and readily court their patronage. The pheasant season is to many small Iowa communities what the deer season is to towns in northern Wisconsin. The tourism dollars that pheasant hunters

bring to Iowa help boost sagging economies of many farming villages.

Should you decide to try an Iowa pheasant hunt, a non-resident hunting license costs \$47.50 plus \$3.00 for a habitat stamp all hunters are required to purchase. In an effort to attract more out-of-state hunters, Iowa recently okayed a new rule whereby a non-resident hunter who purchases a small game license after December 15 will be allowed to hunt the following year using the same license.

Many Wisconsin hunters would be surprised at just how inexpensively a hunter can get by in Iowa. In addition to low cost, leaving from Madison, it's only a six to seven hour drive to the best pheasant hunting in the country. That's something more Wisconsin hunters are taking advantage of.

part of the program. Each year, UWSP enters one faculty work and a student work for regional competition and possible national recognition. Last year, a dance by faculty member Linda Caldwell was selected from the regional contest to be performed at the national gala concert in Washington, D.C.

One of the student works, choreographed by Rosalie Moritz of Norway, Mich., will be "Aequare," which means equal in Latin. The dance, a commentary on the relationships between men and women, will be performed by Bryan Bender of Oshkosh and Nicole Kirchner of Marshfield to music by Jean Luc Ponty.

The other student work is by Karen Zemek of Minneapolis. Entitled "On a Cool Day in May, I Spied Three Girls in a Field," it is a playful piece danced to an Irish folk song by Sara Ebben of Wausau, Rose Hammes of Onalaska and Gerri Kopydlowski of Milwaukee.

How to eat pizza without compromising your position in life.

There will be times this semester when nothing in life could be more pleasant than to have people bring you things. Hey, we're here to help. Just call us up, and we'll bring you some of the best pizza on the planet. For free. (The delivery, not the pizza.) Now if you could just get someone to bring you the phone...

Hard lessons learned as icers split series

by Karen Kulinski
Sports Information Assistant

Mental readiness played a major role in the weekend series between UW-Stevens Point and the College of St. Scholastica (Minn.) hockey teams.

On Saturday night, the Saints took it to the Pointers, winning 6-3, but UWSP managed a split by walloping CSS on Sunday, 13-3.

The Pointers are now 5-1 overall, 3-1 in the Northern Collegiate Hockey Conference.

"This was a big series for us with a Minnesota team that's in the NCHA," said Pointer coach Mark Mazzoleni. "When we are ready to play, we can play with anybody. With a young team like ours, you learn things and get good lessons for the future. You learn from your wins and losses and we had two good lessons this weekend."

The Saints' first goal in Saturday's game came on a power play at 16:54 of the first period by Jeff Raske. Another power play goal early in the second period by Brad Johnson gave the Saints a 2-0 lead. Shawn Wheeler put the Pointers on the board when he scored at 1:24. CSS upped its lead to 3-1 on a short-handed goal at 10:36 when Johnson found the net off an assist by Steve Sayovitz.

UWSP tightened the gap once again when Joe Butcher scored an unassisted goal at 10:36. The Saints answered with a goal of their own at 11:17 when Mark Davidson and Sayovitz assisted a Johnson goal. Pat McPartlin pulled the Pointers within one,

4-3, when he scored at 13:25 off assists by Wheeler and Rick Fleming.

The Saints regained their early two-goal lead when Jim Kero assisted a Johnson goal at 14:21. The only goal of the third period by CSS's Johnson put the game on ice for the Saints at 6:14.

"They had read a lot of things about us and were mentally ready to play," said Mazzoleni. "They outplayed us. We outshot them, but they had better quality shots."

"We had major breakdowns in all areas. I'm not taking anything away from Scholastica because they forced us to play bad. They deserved to win because they wanted it more and executed better."

Mazzoleni was pleased with his team's performance on Sunday night. "We showed a lot of character by rising to the occasion," he said. "In the long run you never want to lose, but Saturday's loss humbled us and we realized that we're not going to beat teams unless we are at the top of our game mentally."

"Saturday night they beat us so easily that I think they took it easy Sunday. I thought we played excellent all over the rink. We came out and set the tempo, totally took them off of their game plan and got our flow going, a total reverse form Saturday."

The Pointer's man of the evening, Rick Dodd, scored the first two of his five goals in the first period off assists by Pat McPartlin and Doug Dietz and Butcher and Barahona. A power

play goal by Tim Comeau, assisted by McPartlin and Tim Coghlin, gave UWSP a 3-0 lead at 7:14.

CSS scored its first goal at 13:57 when LeBlanc found the net off assists by Sisto and Johnson. Dodd scored the Pointers' last goal of the first period,

assisted by McPartlin and John Engstrom.

UWSP scored all five second period goals - by Engstrom (Dodd), Dodd (Fleming), Engstrom (Dodd, Coghlin), Fleming (Dodd) and McPartlin (Porazinski).

Leading 9-1, the Pointers kept

their scoring streak going into the third period when Fleming scored at 1:20 off assists by Comeau and Coghlin. Johnson scored the Saints second goal of the game on an assist from Sayovitz.

Point angelfish victorious in weekend dual

by Karen Kulinski
Sports Info. Assistant

The UW-Stevens Point women's swimming and diving team captured two dual meet victories last weekend in Chicago and in the process qualified several swimmers for the national meet.

The Angelfish defeated North Central College on November 21, 57-29 and then ousted the University of Illinois at Chicago Circle on November 22, 115-87.

"I was pleased with our performance against North Central because of the length of travel time to Naperville," said Pointer coach Carol Huettig. "It's hard to get the kinks out after you've had a trip that long."

"The NCC team had several talented swimmers but lacked depth. In fact, many of our swimmers were in off-events."

Reaching national qualifying times against NCC were Roxie Fink in the 100 breaststroke (1:13.5), Lynn Palmquist in the 100 freestyle (.58.3) and Darcey Hesselthaler in the 100 backstroke (1:08.8).

"Those three girls turned in particularly notable performances," said Huettig. "This was exciting for Roxie because we changed her stroke during the past several weeks."

Other top times against NCC were recorded by the 200 medley relay team of Dorothy Murray, Elaine Cole, Jeannine Sloan and Teri Calchera in 2:01.29, Sarah Celichowski in the 200 freestyle in 2:08.14, Ann Benson in the 50 freestyle (5:51.40), Fink in the 100 breaststroke (1:13.50), and the 400 free relay of Kris Muelemans, Sloan, Benson and Hesselthaler (4:06.46).

Huettig was extremely happy with the win over U of I-C.

"This was a great meet for us because we upset an NCAA Division I school," she said. "It was particularly impressive given the fact that we didn't have any divers and in turn gave them 16 points."

First places for UWSP were recorded by the 200 medley relay team of Murray, Gelwicks, Cole and Calchera in 2:06.71, Cole in the 200 free in 2:05.32, Gelwicks in the 200 individual

medley in 2:18.24 and 100 breaststroke in 1:11.26, Fink in the 100 free in :57.81, and Hesselthaler in the 100 backstroke in 1:07.80.

Grabbing second places were the 200 medley relay team of Hesselthaler, Fink, Kathie Holtz and Tammy Fieck (2:16.75), Cole in the 100 butter-

fly (1:03.2), Calchera in the 100 free (:57.98), Murray in the 100 backstroke (1:08.44), Celichowski in the 500 free (5:41.54) and Fink in the 100 breaststroke (1:13.54).

"Notable performances were by Fink, who repeated her national qualifying time in the

breaststroke, and Cole and Hesselthaler," said Huettig. "We captured seven of 11 first places in events that we were entered."

The Pointer Angelfish, 4-1 in dual meets, returned to action on Tuesday, Dec. 5 for a meet at UW-Green Bay.

Lady Pointers beat St. Mary's in opener

by Karen Kulinski
Sports Info. Assistant

Team unity prevailed as the UW-Stevens Point women's basketball team opened its regular season with an 85-70 win over St. Mary's College of Winona, Minn. last Tuesday night at Berg Gym.

The Lady Pointers led 41-32 at the half and then put the game away in the second period, outscoring St. Mary's 44-38.

"St. Mary's is a team with a winning tradition," said Pointer Coach Linda Wunder. "They are a good ball club that went to the NCAA playoffs last year. I'm happy with the way we executed our offense. We were smoother and looked much more confident."

The Pointers held a 54-46 advantage with 14 minutes left. Karla Miller gave the Pointers a 10-point lead, 69-59, with 5:54 remaining and was then backed up by a three-point play from

Debbi Shane which put the Pointers ahead, 73-59. Sonja Sorenson hit a jumper and Shane sank two more charity tosses to put the wraps on St. Mary's down the stretch.

Although not happy about giving up 70 points, Wunder was pleased with the Pointer defense.

"Our defense is coming along," said Wunder. "There is still a ways to go, but it's improving. I believe you're playing real good defense when you can hold a team under 50 percent shooting. They shot 46 percent."

"We still need to work on being intense for 40 minutes. We had a few lapses that didn't hurt us, but..."

Patti Trochinski sparked the UWSP offense, sinking 12 of 16 floor shots, to gain game-high honors with 24 points. Miller added 20 points, Sorenson 17 and Shane 10. Leading the way for St. Mary's were Lisa Janikowski with 20 points, Kelly

Shutrop with 14 and Beth Kunitz with 10.

Taking control of the boards was Sorenson who hauled in nine of UWSP's 33 rebounds.

"We made a lot of progress in

the last week," said Wunder. "Things are starting to fit into place and we're also starting to mature more as a team. Our upperclassmen took a positive role in this game. They went

out and really wanted to make something happen."

The Lady Pointers return to action by hosting UW-Oshkosh on Friday, Dec. 5 at 7 p.m. in Berg Gym.

Tankers spilled at Chicago

by Karen Kulinski
Sports Info. Assistant

Junior Ken Brumbaugh was the highlight of the UW Stevens Point's men's swim team when the Pointers travelled to Chicago for a pair of dual meets.

UWSP lost to North Central College on November 21, 56-39, and to the University of Chicago College on November 22, 71-41.

"We came back 0-2 in dual meets, but I was extremely pleased with our swims and times over the weekend," said Pointer coach Lynn "Red" Blair. "We should have come back split, but I set up the wrong line against North Central College."

Top times from UWSP were swam by the 400 medley relay team of Mike McLellan, Dan Miller, John Baltzell and Georgenson (3:51.98), Brumbaugh in the 1,000 freestyle (10:26.64) and 500 freestyle (4:55.66), Pisciotta in the 200 freestyle (1:52.13) and 200 butterfly (2:03.92), Kevin Farham in the 50 freestyle (:22.23) and 100 freestyle (:50.33), and Martorano in the 200 individual medley (2:05.50). Other quality performances were turned in by John Baltzell and McLellan in the 200 backstroke, both with times of 2:19.84, Woyte in the 200 breast-

stroke (2:19.08) and the 400 free relay team of Jeff Shaw, Brian Georgenson, Peter Zenobi and Brumbaugh (3:29.72).

Against U of Chicago Circle, two relays and one individual qualified for nationals.

The 400 medley relay team of Pisciotta, Woyte, Martorano and Parham finished in 3:43.69 to qualify as did the 400 free relay of Brumbaugh, Shaw, Georgenson and Pisciotta in 3:18.19. The lone individual to qualify was Brumbaugh in the 200 freestyle in 1:46.19.

Other top times from Pointer swimmers came from Tim Tho-

ma who finished in first place in the three-meter diving with a score of 195.55. He was closely followed by teammate Mike Kerig who finished second in 152.65.

Second place finishes were recorded by Parham in the 50 free (:22.60) and 100 free (:49.37), Pisciotta in the 400 individual medley (2:01.79), Thoma in the one-meter diving (209.2), Zenobi in the 200 butterfly (2:04.5), Brumbaugh in the 500 freestyle (4:52.85) and Woyte in the 200 breaststroke

Cont. p. 23

Icers, cont. from p. 21

Butcher added another UWSP goal followed by a Saints' goal from Johnson. The Pointers scored the last two goals of the game, the first by Comeau and the second by Dodd at 17:28.

"Rick played a heck of a game," said Mazzoleni. "Five

goals (and four assists) is a great effort at any level. He is a quality hockey player who is very intelligent on the ice."

The Pointers return to action for a weekend series at UW-River Falls on Dec. 5-6.

Intramural Corner

Upcoming Events:

Men and women interested in intramural basketball second semester:

You can begin to turn in entry forms now! However, play will not begin until second semester.

Basketball refs are needed for second semester. An informa-

tional meeting will be held December 9 in Room 101 of the P.E. Building. Pay is \$4.00 per game.

Congratulations to Patti Trochinski who is the first female to receive a Bench Press Club T-shirt for bench pressing 100 pounds!

ARMY RESERVE. BE ALL YOU CAN BE.

Pointers taking season one game at a time

by Scott Huelskamp
Staff Writer

The UW-Stevens Point men's basketball team turned a close game into a rout to win their own Tip-Off tournament two weeks ago.

At halftime the Pointers clung to a 32-20 lead but exploded for 51 second half points to defeat St. Thomas 83-68. St. Thomas had defeated the Pointers in overtime of last year's tournament championship.

The Pointers earned a trip to the final game by defeating Concordia College, 77-50.

"We did the things we had to do to win," said assistant coach Randy Handel. "We forced St. Thomas to shoot from the perimeter, and they didn't hurt us from there, while on the other side of the coin, we played a good offensive game."

"We executed well and made St. Thomas play a half-court offense instead of their typical fast break style. They are the kind of team that can run off six quick points at any time because they have such good athletes."

"Overall, we were pleased with the way our squad played in the tournament. St. Thomas was a good challenge at this time of the year."

Pointer forward Tim Naegeli led all scorers in the final game with 28 points and Todd Christianson added a career-high 25.

Junior College transfer Jeff Richardson led the Pointers with seven rebounds.

Naegeli, Christianson, and Craig Hawley were selected to the all-tournament team. Naegeli was also voted the tournament most valuable player.

The Pointers followed up their tournament victory by handing

Coach Jay Eck

Roosevelt College a decisive 82-50 loss last Tuesday at Quandt Fieldhouse.

"The Roosevelt game gave everyone a chance to get a little experience," Handel added.

The Pointers traveled to Division I Southern Illinois University last Friday only to come up one point short of victory.

The Salukis fought back from a five point deficit with 1:44 to

play to hand the Pointers their first loss of the season.

"It was a tough game for us to lose," said Handel. "We started off cold and had to fight back for the lead, but then we made some key turnovers late in the game and when you're playing on the road you have to be that much sharper and not make those mistakes."

"The two things you can't do is foul and stop the clock and you have to use the clock and make sure you get a good shot," added head coach Jay Eck. "We didn't do those two things real well, but it's something we will get better at."

The Pointers were behind 10-0 early in the game, but Craig Hawley tied the game at 12-12 with two three-pointers. Tim Blair made one of two free throws to give the Pointers a 27-26 halftime advantage.

During the last 1:44 SIU hit four freethrows and a jumpshot by Steve Middleton to take a one point lead with 14 seconds remaining.

The Pointers inbounded the ball but did not attempt a shot due to a turnover with five seconds left.

"There were no fouls in the last two minutes for us," said Eck. "We never got to the free-throw line. Had there been one foul for us, we could've been in the bonus. That was the key to the game."

UWSP was 1 of 4 from the

foul line, while SIU made 16 of 18 charity shots.

Hawley was 5 of 6 from the three-point line, dished out six assists, and led all scorers with a season high 27 points. Richardson pulled down six rebounds and added 10 points.

Pointer leading scorer Tim Naegeli (20 ppg) was held in check by the SIU defense for only eight points.

"The SIU defense played off Tim a little," said Handel. "They didn't give him room for his patented driving moves to the basket. Tim's an unselfish ballplayer and he was able to get the ball to Hawley so he could pick up the scoring lead."

"The guys played so hard. They showed a lot of persistence in coming back. In the second half we played better and also played better defense," said Eck.

"With our two-center system of Troy Engstrom and Jeff Richardson we can substitute

one for the other," said Handel. "They do a good job on defense and the boards. They have not done a nice job the last few games."

The Pointers open their defense of the WSUC title Saturday when they host the Oshkosh Titans at 7:30 p.m. in Quandt Fieldhouse.

Tankers, cont.

(2:17.85).

Capturing third places were the 400 medley relay team of McLellan, Nold, John Baltzell and Georgenson in 3:56.70, Zenobi in the 1,000 freestyle 10:44.94 and Baltzell in the 200 backstroke in 2:18.53.

The Pointers will compete in the Madison Invitational on December 5-6. The meet begins a 6 p.m. on Friday and at 10 a.m. on Saturday.

POINTER PROGRAM

LIVE

Wisconsin Poet Roberta Hill Whiteman will give a reading Wednesday, Dec. 10, in the Garland Room of the UC. She will also present a poetry workshop from 4 to 5:30 p.m. in the Academic Achievement Center, Room 018 in the L.R.C. Admission is free. Sponsored by University Writers.

Campus Activities presents Pat McCurdy, the "comeback band of Wisconsin," this Saturday night at 9 p.m. in the UC Encore. Pat McCurdy's modern rock and roll is bound to loosen up those registration blues, so stop on by. Admission is only \$2.00.

The Wind Ensemble and the Symphonic Band, conducted by Dennis R. Glocke will perform at 8 p.m. this Friday in Michel-sen Hall. Admission is free. Sponsored by the Music Department.

The University Band, under direction of Andrea Splittberg-er-Rosen, will perform at 8 p.m. Sunday, Dec. 7, in the Michel-sen Hall. Open to the public without charge.

After Images '86, the annual student/faculty dance performance, will be held at 8 p.m. Friday and Saturday in the Sentry Theatre. Performances include dance compilations by students and faculty and a lecture/demonstration on jazz dance. Cost is \$2.00 for UWSP students and \$3 for the general public.

Theater MISC.

Francois Truffaut's Jules and Jim, a memorable tale of three people in love, will be showing Dec. 4 in the UC PBR. Sponsored by UFS, showing at 7 p.m. and 9:15 p.m. for only \$1.50 with ID.

NCTV presents The Chevrolet Heartbeat of America Satellite Concert tonight in the Wisconsin Room of the UC at 9 p.m. The Smithereens, "Til Tuesday, and Steve Earl will be featured live on big screen TV for only \$1.00.

WUWSP, 90FM, will broadcast the Stevens Point/River Falls hockey games this Friday and Saturday at 7:30 and 7 p.m. Live from River Falls.

And just in case this slipped your mind—registration is Saturday in Quandt Gym. Go to Records and Registration for your registration packets (which must be signed by your advisor to get in). WUWSP, 90FM, will be giving half-hour reports on the status of classes all day, so listen in.

TGIF this week features Greg and Laura in The Encore from 3 to 5 p.m. Sponsored by UAB Alternative Sounds.

This week's RHA video, which always shows Monday in Amigo's, Tuesday in the Depot Room and Thursday in Jeremiah's, is The Survivors. Free.

Tonight, it's another Campus Activities DJ dance in The Encore. Once again Campus Activities brings you all the fun on a Thursday night. From 9 to 11:30 p.m.

CLASSIFIEDS

ANNOUNCEMENTS

Attention ladies!! The first ever UWSP Male Review calendar will be on sale in the Concord Dec. 8-11. They make great X-mas gifts! Sponsored by American Society of Interior Designers.

Hey all you wild-n-crazy ACT coordinators and volunteers!! The day you have all been waiting for has finally arrived!! Our end-of-the-semester meeting will be tonight at 6:00 p.m. in Room 125-125A of the UC. Lots of fun things to discuss. Attendance is mandatory to fill out evaluations.

Catch "Eco-waves"—environmental topics and issues on radio station WUWSP (90FM) at 4:30 Monday through Friday! A three-minute presentation by CNR students and professors sponsored by EENA (Environmental Educators and Naturalists Association). Stay tuned!!

Ever try "Fold-Mold"? Grow some now and insulate yourself against the winter's cold.

Need a ride to Milwaukee on December 9. Will pay for gas. Call 344-6954. Ask for Sue.

To my curly computer girlie: I love you! Hope we have a good time in S.F. P.S. Don't try to start my car.

4 South Steiner—just love you Golden Bozos! Am I gonna miss you or what! Your airless and clueless RA, Perky.

Staying in Sat. night? Catch the Pointer basketball game at 11:00 p.m. on SETV (cable channel 3).

Don't read your personal ... watch it on "video personals" on cable channel 3 (SETV). Stop by at the booth in the concourse.

Hey Tom, let's go see Pat McCurdy & The Confidentials Saturday night in the Encore. Pick you up around 8:30. Missy. Bubba—What are you up to? Call me and we can get together and have pizza! Di.

Anyone knowing Wayne Kubalet tell him Gumby & Pokey are going to die if he doesn't pay the ransom soon and very soon! The Black Dame of Cancer.

To that dumb blonde jock who graduated from Pacelli in '84 named Dan Johnson: Get a life and please do me a favor. Don't give advice you know absolutely nothing about! It's people like you with tinsel on your teeth that have too many complexes!! Guess who?

Hey UWSP students, give that "video personal" to someone you love, like or hate. They're fast, free and fun. Stop by SETV booth in the Concourse.

Dear ... We will be performing Sat., Dec. 6, in the Encore at 9:00 p.m. It's only \$2.00 w/D. So come on down for a rockin' time and good times. Pat McCurdy & The Confidentials.

Tom: Beware of the public monsters! Give back our cans man. Creepy crawly things are in the bathrooms! We pay enough money, how about the scum in the shower! 1st floor Neale.

Hey Toon, Mexico is only 21 days away! Merry Christmas Sniff! Sniff! Love, Pepe Lopez (Kool Ghoul).

Dear Skids A lot: Wish you best of luck and much happiness in life. Thanks for being a friend. Love rapping with ya.

Bourbon St. is gonna be bad to the bone. Jammin and the Jamma's.

To Da: Maggie Thatcher can't wait to jam to some animal house RAP, but this Crazy Mama's gonna miss. We grow the seeds! Party one more for the Kipper.

Ron, it has been a fun semester. I hope we can be in some classes again. You have made studying a lot easier. Hey, when do I get to take your picture? Tracy.

Desperately seeking 9: Best of luck this weekend in River Falls. Make the trip worthwhile, aye! Love you, B.

Hey everyone—Human Resource Management Club is having its last meeting of the semester. It's today, December 4, at 4:30 in the Green Room of the UC. It's important that all members attend.

John G.—Bewildered huh? HA HA. Is this your first secret admirer letter?? I hope so! So let's start with basics, are you single? Hetero? (Budha please let it be so) Are you annoyed with secret masked Budhas?? I would like to hear from you in the personal next week. Let me show you the way to true Budha salvation. Signed, All in fun S/M Budha. P.S. Are you wondering yet?

PUFFIN ALERT!! Would the female student who volunteered this past summer in Maine for the Puffin Project get in contact with me? I'm Joan and can be reached at 344-4473 evenings or through the EENA desk in CNR 105. Thanks.

Deno & Ketchup: You guys are terrific! What can we say but thanks for being as cool as you are! Watch out for RAD. (te-he) Just Us.

To the men of the Purple Haze—Thanks for letting me stay at your house and for taking care of me. I may have epilepsy and arthritis, but I can still outrun Kahooka! Love, Steed. P.S. Nevs, I left you a present in your bed because you never took me for a walk.

Joe, your love and support has carried me through some tough times here, and now we're almost done. I'm ready to love you through whatever comes next! Diane Marie.

Howdy Jo - Heard ya'll did

ton good on yer interview and got yerself a new job. That's almost as good as mac-n-cheese. Mucho Bustitos to ya!! Can't wait to see ya'll when you come to Padre. Miss ya a ton, you three favorite Texans.

Hey Jo Bitch!! We're a ton proud of you, even though it means you have to leave us. No one will be able to take your place as an RA or a friend. You're the greatest! Luv—Kathy, Racey, Sheri, Amelia, K-Bitch.

Budget cut, cont. from p. 1

To meet that limit, UW officials proposed cutting instruction by \$11 million, economic development programs by 10 million, research by \$2 million, public service by \$1.7 million and special purpose spending by \$3.5 million. The special purpose spending is comprised of student aid, laboratory modernization, medical operations and utility savings.

Such cuts would mean about 28,000 fewer students in the UW System, which enrolled about 164,000 students this year, Lyall said. In addition, 800 to 700 faculty members could not be hired or would have to be let go.

The \$2 million cut in state-supported research would mean a net loss to the UW of \$10 million to \$12 million, Lyall said. A cut of \$300,000 in the state's student aid would mean \$1.2 million less in aid to UW students.

The enrollment reduction of 28,000 is more than the 22,000 previously predicted, Lyall said, in part because of the 5% cut. Also, she said, with the 5% cut, it is assumed that the state will stop trying to narrow the gap

between system spending per student and the national average, and that the gap will get even larger.

Last month, the Board of Regents proposed a total budget of about 3.6 billion for the 1987-89 biennium, an overall increase of 12.4%. The regents' budget included an increase of 6.8% in state financing over the biennium.

According to Lyall, the 5% cut suggested by Thompson as a starting point for the budget deliberations affects only that part of the system budget coming directly from state taxes. The state provides about 40% of the system's support. About 60% comes from such sources as student tuition and fees, hospital fees, UW Extension fees,

federal grants and contracts, and auxiliary operations such as dormitories and cafeterias.

Lyall said the cut of 5% in state financing had an impact of 17% or more on enrollment largely because three-fourths or more of the system's instructional budget came from state tax money.

Letters, from p. 6

current interpretation of 36.09(5) and respect the legally mandated doctrine of shared governance.

Student Government Association

Not so smart

To the Editor:

The *Pointer*, in recent issues, has carried the ongoing discussions about a comprehensive software environment on campus and about SMART, the proposed implementation package.

In the November 20, 1986, issue, the article "Outside interests examine SMART's upgrade capability" asks the question: "How are they going to upgrade at the university?", and then goes on to suggest that upgrades will not be possible and that students would be getting an inferior product. A simple telephone call would have provided the answer to these questions. I would like to put the record straight on these issues:

1. All SMART copies will be serial numbered by Innovative Software. The owner of that serial numbered set of disks will be recorded in Academic Computing.

2. Upgrades will be handled on a serial numbered basis through Academic Computing. In fact, we are right now in the process of distributing an upgrade for currently held copies.

3. The disks produced in Academic Computing will be from masters supplied by Innovative Software and will be approved by Innovative Software for distribution.

4. The manuals to be provided will be produced locally from masters supplied by Innovative Software and will be approved by Innovative Software for distribution.

5. The report evaluating SMART against other integrated packages was done by Software Digest, Vol 2, No. 10, December 1985. The report compared SMART, Jazz, Enable, Symphony, Ability, Framework, Top View/Assistant Series, and Electric Desk. SMART was evaluated as the best integrated package. Additional reviews/evaluations have appeared in PC Magazine, September 16, 1986, and PC World, September, 1986. All of these reviews/evaluations are available for examination in Academic Computing.

It would be helpful if you would call Academic Computing for factual information about SMART. We would like to see that students receive full and correct information about this issue.

Daniel V. Goulet
Acting Director
Academic Computing

Chancellor, cont. from p. 1

Get the \$88 million from the state, 2) get it from students by a \$640 tuition increase or 3) cut enrollment by 22,000 students."

The Board of Regents Study Group has proposed that some combination of these avenues be developed. One example lists \$58 million in state support, a

reduction of 3,500 students, and a 6.6 percent average increase in tuition. Other combinations are possible and the study group does not attempt to endorse any single one. Explains Marshall:

"There is no specific proposal that says we will get it a cer-

tain way. There are options which are being presented."

In addition to this university presentation, the chancellor will take the Regents' findings and future plans to various area organizations during the month of December. "It's to make people aware," says Marshall.

THIS TUESDAY IS TWOSDAY

In Addition To Our Daily "Two Great Pizzas! One Low Price" Every Tuesday We'll Give You A Different Item At A Special Two-For-One Price. December "Slices / January "Sandwiches". (No Coupon Needed For This Tuesday Offer)
