## Regent plan would change future of UW System

by Debbie Kellom  
Editor

For almost a year, the UW System Board of Regents has been considering and preparing a plan for the future of the UW System. The report, "Planning the Future," which is expected to be approved in December, could have far-reaching effects on student and faculty life in the System into the next century.

The Regents Study Group on the Future of the UW System began considering a plan "to ensure the continued quality of education in the UW System" in January of this year and has met each month since.

The group, which is composed of all 17 regents, Katherine Lyall, the UW System executive vice-president, former UW-Chancellor Irving Shain and UW-Stout Chancellor Robert Swanson, has been considering plans ranging from tuition increases, enrollment caps and higher admission standards to redefining campus missions. A goal for higher minority recruitment of both students and faculty is included, as well as plans for better system internal management.

The study was originally proposed by then-UW System Acting President Lyall and is con-

sidered in part to be a response to a 1979 regent report which planned for lower enrollments and declining state support for the System. The 1979 report projected System enrollment for this year to be 137,289, but in 1985 the System had an enrollment of 164,546 and state support had declined roughly

according to the report's estimates. The Future Study Committee claims that the UW System now faces a funding gap of \$600 per student for instructional support when compared to other university systems.

"We were responding to a number of factors," regent Ruth Clusen said in an interview last week. "The major

ones we found ourselves responding to crisis after crisis. We found that we had no long-range plan."

Clusen said another reason which spurred the formation of the Future Study Group was a recommendation from a state legislative committee whose members comprised the top leaders of the assembly and the senate. That committee, which was headed by assembly speaker Thomas Loftus (D-Sun Prairie), analyzed the UW System and recommended that the regents form a long-range plan.

Clusen said the regents hadn't looked at System policies for "some time" and said she felt "that studying these issues is essential to ensure that we have a quality educational system through the rest of the century. A major question was how do we maintain quality while we are falling behind financially?"

The regents' "Planning the Future" report predicts that "with the implementation of the recommendations of this study, the University of Wisconsin System will be a revitalized and re-shaped system."

The thrust of the proposal asserts that maintaining "the quality for which the University has gained its national reputation" is an important priority for the future of the System.

## Paper science addition raises high hopes

by Karen Rivedal  
News Editor

Plans to construct a new paper science facility at UWSP continues, with construction scheduled to begin next April or May. The \$2 million addition will stand two stories tall, be attached to the back of the Science Building and run approximately from the loading dock area to the end of the building towards the College of Professional Studies Building.

Mary Williams, coordinator of facilities planning at UWSP, says that the project is moving along well at this point, as architects and engineers draw up final plans. Due to the inhospitable climactic conditions of Stevens Point in the winter, however, construction must be delayed until the spring.

Funding has been provided in large part by money set aside for UWSP in the state's 1985-87 biennial capital budget. This will cover much of the construction costs, along with building maintenance and remodeling to older sections of the Science Building.

In addition, private companies involved in the Paper Science Foundation have given grants totaling \$50,000. Williams explains that the paper companies "want quality, well-trained

people." Providing financial support for institutions like UWSP is one way to assure a steady supply of talented graduates.

Ten thousand dollars of the \$60,000 grant was from a single source, North Central Piema, the Paper Industry Management Association. The remaining \$50,000 was raised through a fund drive for the future paper science computer lab. In this case, many small gifts were received from a large number of paper companies.

Speaking of the time period for construction, paper science department chairman Larry Graham remarks: "It will be a long process. We're looking at 5-10 years to fully equip the facility."

This substantial time investment is balanced by the long-term benefits that the addition should provide. According to Professor Graham, UWSP already holds a national reputation in paper science. New facilities would address the area in which Point is still lagging behind.

"We have a very strong faculty and student community," Graham comments, "but facilities have been less adequate than those of other universities. The new facilities will bring us closer in line to the other paper programs in the country."

## Student Senate votes for additional fee

by Karen Rivedal  
News Editor

A 27-1 Student Senate vote on October 23 in favor of charging all UWSP students an extra fee could help pave the way for long overdue construction of a new swimming pool on campus. The proposed plan, if approved by the UW Board of Regents at the December meeting, would charge each student an extra \$10 per semester and be in effect for 10 years.

The 25 yard, 8-lane Olympic-

sized swimming pool with an adjacent warm water instructional pool, is just one part of the plan to remodel the Health, Physical Education, Recreation and Athletic Building. Total cost of all the work would be about \$6 million.

The fee was assessed at \$10 after UWSP officials conducted a study of gym use by the students. They estimated that 70% of the new facilities would be used for instructional purposes and 30% would be used for athletic, intramural and recreational activities.

Thirty percent of the \$6 million budget for new construction of the gym, amounts to \$1.8 million, the amount that should be raised by the \$10 fee in the time specified.

Also included in future plans is a new multi-activities section to be attached to the west side of Quandt Gymnasium. It will include a 200-meter track and six tennis courts. With an overall area of 55,000 square feet, the area will seat about 5,000 people. Construction for the new facilities are scheduled to begin about the summer of

1988, depending on final authorizations and grants from the Board of Regents.

Funding for this phase of the construction is expected to come from funding in the Board of Regents 1987-89 biennial budget. Only money for the pool construction is to come from student fees.

Student fees have not typically funded construction in state-supported schools. In these times of tightened purse strings and extensive budget cuts, how-

ever, the Student Government has begun to circulate a petition among students in support of the fee assessment which will be presented along with the plan at the Regents meeting in December. The success or failure of the petition on campus should be an accurate indicator of the students' willingness to pay the additional fee.

John Munson, who heads the School of HPERA, calls the student senators' decision to endorse a plan of student-backed funding as "one of the biggest decisions their group has made in years."

## The best laid plans...

The war in Nicaragua took on a local accent recently with the capture of Eugene Hasenfus of Marinette, Wisconsin, who was abducted by Nicaraguan government troops while flying arms to the U.S.-backed Contra rebels.

Ironically, while Hasenfus was smuggling arms, by his own admission, only for the money, he became involved in the Nicaraguan conflict to a degree that he neither expected nor wanted. Through his own actions, Hasenfus placed himself in a vulnerable position, which left him susceptible to being drawn into a situation that he obviously wanted no real part of.

Hasenfus now faces almost certain conviction in a Nicaraguan people's tribunal and the possibility of a 30-year prison sentence as a consequence of his actions.

A frightening analogy can be drawn between Hasenfus' present situation and the current actions of the United States in Central America. Like Hasenfus, the United States currently has no intention of taking a direct role in the Nicaraguan war, going only so far as to arm and supply the contra rebels. However, like Hasenfus, unforeseen circumstances could conceivably draw the United States deeper into the Nicaraguan war than has been anticipated. And as in Hasenfus' case, the consequences of our getting involved over our heads in Nicaragua could be disastrous.

It is difficult to imagine that a scant 30 years after placing ourselves on the path toward an eventual all-out commitment to a war in Southeast Asia, our present actions in Central America seem to be validating the cliché that history repeats itself.

When the original commitment was made to become involved in Southeast Asia in the mid-1950's, our leaders never anticipated that our involvement would eventually lead to a full pledge to a losing cause that would cost over 50,000 American lives and hundreds of billions of dollars.

Likewise, policymakers who currently conduct foreign policy toward Nicaragua have no immediate plans of going beyond funding and supplying the contra rebels. However, the potential for unforeseen circumstances necessitating that the U.S. take a more direct role in Nicaragua are still possible. Increasing evidence pointing to continuing covert CIA involvement in the war make that possibility all the more likely.

By winning Congressional approval of \$100 million in aid for the contras, President Reagan will step up military pressure on Nicaragua's Sandanista government. But new aid won't be enough to make the Sandanistas cry uncle—it's only the beginning—who knows what Ron will ask for next?

When a nation places itself in a position as precarious as our current situation concerning Nicaragua, it risks the possibility of being drawn in even further. The United States has made a commitment to the Nicaraguan contras in providing \$100 million of support this year in their fight to seize power. What if our current efforts are not enough? What if future conditions or events necessitate the involvement of U.S. troops? \$100 million won't begin to buy a contra victory.

These are questions that Congress should not have to consider in the future. The United States should abandon its current futile course of action in Nicaragua and consider diplomacy—not the risk of another Vietnam.

# AS I SEE IT...

## And now, a word from right field

by Gene Cisewski  
Staff Reporter

Last week, President Reagan signed an order which began the release of \$11 million in aid and assistance to the freedom fighters who are struggling to free their fellow citizens from the repressions of the Sandanista junta in Nicaragua. While most experts concede that this package is not enough to expect a victory for the Contras, the measure passed both houses of congress twice. If a victory for the Nicaraguan freedom fighters is not the real goal, what prompted House Democrats and Senate and administration Republicans to authorize the funding?

We must remember that the U.S. did not oppose the Sandanista rise to power nor their efforts to consolidate their government. The U.S. negotiated the resignations of Somoza and Urcuyo during the Nicaraguan civil war. With our help, the Sandanistas received more loans from the International Development Bank in two years than the Somoza government had in any decade. The U.S. provided \$75 million in supplemental aid to assist the Sandanistas in rebuilding their nation. And through the first 18 months

in which Daniel Ortega and company were in power, the U.S. provided more economic aid to them than any other government.

But alas, the leaders of the revolution were not interested in the human rights of their people. Nor were they content in developing and fostering growth within their borders. They set forth on a path of expansionism in neighboring lands.

When discussing human rights within Nicaragua, it is important not to confuse rights with wishes. To quote former U.N. Ambassador Jean Kirkpatrick, "...the list of human rights cannot be indefinitely lengthened like a shopping list in a global supermarket." Human rights are the prerequisites to other social and economic goods. Relying on restraint in the use of power, these rights include free speech, press, religion, freedom of assembly and from arbitrary arrest and the right to due process. On the other hand, the level of industrialization, the rate of economic growth and the literacy level of a nation's people are wishes and goals that follow the prerequisites.

In the years since the Sandanistas rise to power, the junta led by Ortega has extended and consolidated power following a pattern of "coup d'etat by installments" not unlike Konrad Heiden's description of the Nazi seizure of total power in German Society. They make "preventative arrests" of people suspected not to sympathize with them. The media, not directly controlled by the Sandanistas, must submit all stories for prior censorship. Opposition leaders are not allowed to leave

Nicaragua. The Ortega government has engaged in the systematic destruction of the homes, villages and economies of the Miskito Indians... all in the name of freedom.

The evidence that Nicaragua is not content within its own borders is also clear. Acting as a funnel for the Soviets and Cuba, the Sandanistas have been shipping lethal military supplies to terrorists and guerrillas in Guatemala, Honduras, Costa Rica and El Salvador.

With the repressions within Nicaragua, it is small wonder

that the "whole story" seldom reaches a mass audience in the United States. In addition, the clandestine moves of the Sandanistas to destabilize neighboring nations would seem to give us a clue as to why, despite a lack of popular approval, the U.S. government has chosen to resume economic and military aid to the freedom fighters.

Could our sole goal at this point be to keep the Sandanistas too busy in their own country in order to prevent the exportation of their Marxist styled revolution and repression? Could not,

then, this aid have a positive benefit in protecting the human rights and the very lives of the people living in the nations that border Nicaragua?

The issue is indeed complex, and we cannot turn our backs on it without oversimplifications like the one that goes, "the literacy rate down there has grown at an amazing pace since the ascension of the Ortegas, so they're better off now." After all, what good is the ability to read when a small handful of people will decide what you may or may not read?

## Why wage war on drugs alone?

by J.M. Janssen

If we as a nation should stop drug abuse, why go half way? If it is bad to pump chemicals into your veins, isn't it at least as bad to pump chemicals into our rivers?

Drug abuse is abusing a chemical which is often poisonous. Toxic pollution is abusing a chemical which is always poisonous. The greatest difference, however, is that the drug addict inflicts damage only to himself. Toxic pollution, on the other hand, inflicts direct physical damage to all life.

A private corporation concentrates its chemical output in large amounts to be shot into the rivers, poisoning the water for all things. Drug abuse is willfully abusing your body with a chemical. Earth abuse is acquiesced abuse upon the planet with poisons.

Just as I am for a cure for cancer, that is the real cancer, which is our rapid and intense alteration of the physical and chemical balance of our Earth, I am for ending chemical abuse of all types; drugs, toxic and nuclear.

Ron and Nancy have missed the mark in generating public action for only one type of anti-poison campaign. The contradictions must stop. If one poison is bad, all are bad. While we have laws against chemicals called 'drugs', we allow PCB pushers to go free. When Earth abuse ends, major battles will be won in the war on chemical abuse of all types.

## United Council and Regents meet on campus

by Lisa Strack  
Staff Reporter

The Student Government Association sponsored a round-table discussion on current student issues October 30, from 4:30 p.m. in the UC Mitchell Room. John Schinian, the first student member of the UW-System Board of Regents, and Bryce Tolefree, United Council President, led the discussion.

Schinian opened the discussion by speaking of the 1987-89 biennial budget. The budget, which is comprised of approximately three billion dollars, will cover all 26 campuses for the next two years. Schinian explained that once the Regents approve the budget, it will be submitted to the governor's office and the state legislature where they will take it up in early spring.

The Regents feel that their request for \$80 million in excess general purpose revenue from the state is the minimal increase necessary in order to try and compensate for the gap that has become apparent between state funding to universities and our needs to maintain a quality education.

This gap has occurred, Schinian explained, because although Wisconsin pumps a relatively large amount of tax money into higher education, we have so many students, that we are spending far less per student than our peer institutions. Funding per student is currently \$600 below the national average in Wisconsin.

For this reason, a number of adverse effects are occurring: more students are crowded into the same number of classes, faculty and staff are underpaid, needed library materials aren't purchased, computer time is not sufficient, lab equipment is obsolete, etc. Therefore, the Regents feel the need to change the spending level for students by either increasing state aid, increasing tuition, cutting students out of the system or by using a combination of the three.

For example, one possibility would be to reduce enrollments by 3,500 students, institute an average increase of about 6.6% in fees and request additional tax support of \$58 million. Other possibilities exist, but the Regents are obviously more in favor of an increase in state aid. "If the state legislature comes up with all the money we requested, there would not need to be any cuts in enrollment or increases in tuition," stated Schinian.

Both Schinian and Tolefree felt that the underfunding of the University System has not occurred overnight. Rather, it began about 10 years ago when the state didn't keep pace with the amount of money needed for incoming students.

For example, over the last five years, the number of students has increased by 17 per cent; the budget, however, has decreased by nine per cent. Schinian said that this accumulated loss is already having serious effects, and in the long run, the University System won't be able to recover no matter how much money is pumped into it. "We can't put off trying to solve it any longer," stated Schinian.

Strategies are very important right now and each chancellor has been asked to come up with the specific needs assessment on how their share of the \$88 million will be spent. If the state provides only a portion of the \$88 million, a recently passed resolution would not allow tuition to be raised any higher than to the midpoint of the big ten.

For UWSP students, this means an increase of approximately \$140 in tuition divided over a four year period. If the state doesn't come up with any of the \$88 million, however, students will have to bear a much greater cost. That cost will come in the form of enrollment cuts.

Schinian stressed the importance of students meeting with their chancellors and budget personnel in order to know exactly what is being done for their particular campus budget. He pointed out that Student Government will have a better grasp of exactly what's occurring on the campus level. By the time the budget reaches Schinian and the other Regent members, however, it will be so complex that it will be impossible for them to address any particular issues.

"If all student governments work together, first dealing with their own campus budget to find out what's wrong and what should be corrected," Schinian explained, "that would make my job and everyone's job a lot easier."

Like Schinian, Tolefree felt that students need to be aware of the issues that will affect their education, but he also felt that more than tuition increases are being placed on students that make it increasingly more difficult for them to pay for the cost of an education. The possible shift of money from state sources to segregated fees, for instance, is an issue that students should be aware of. The state argues that students should assume the cost for many of the counseling and business services that the state now pays. If this happens, Tolefree explained, student fees would increase dramatically.

Tolefree said that the United Council presents things such as this to the Board of Regents and the state legislature, to let

An important tool in cellular research is the electron microscope.

Photo by Paul Becker

## Electron microscope magnifies opportunities

by Keith Uhlig  
Staff Reporter

Have you ever wondered how scientists find out how drugs affect the body at the cellular level? Or how they do cancer research, watching what makes cells divide and form tumors? An important tool in conducting this type of research is the electron microscope. UWSP has an electron microscope and it's located on the third floor of the College of Natural Resources.

The \$40,000 device was part of the original equipment of the building when it was constructed in 1973-74. Now it is considered a "dinosaur" by the service people, according to Dr. Joseph Harris. Harris is the president of the Midwest Society of Electron Microscopists and a member of the Executive Council of Electron Microscope Society of America.

There are two basic types of electron microscopes, scanning and transmission. A scanning electron microscope coats the specimen with a heavy metal such as platinum or gold and then basically bounces electrons off of it, getting the image. It is used to look at the surface of things such as fly's eyes. It is also more structure orientated than cellular orientated.

UWSP has a transmission scope type. The first step in looking at a specimen with a transmission microscope is to preserve the cells in as fresh a state as possible. This is done with fixatives, usually formaldehyde or a derivative. Once the specimen is fixed, it is embedded in a plastic mold and cut as thinly as possible on a machine called the ultra microtome.

Once this is done, the specimen is coated with a metal, usually uranium and lead. The specimen is then put into the electron microscope itself.

The electrons are emitted from a filament and channeled through three electro-magnets, which aim and concentrate the electrons. The electrons pass through the specimen, rather than bounce off, as with a scanning microscope. The metal clings to certain parts of the specimen, not letting electrons pass through these parts. For example, uranium attaches to the nucleus of cell and lead attaches to cell membranes.

The electrons that do pass through the specimen strike both a fluorescent screen, to create a visible image and film, to create a picture. The film then is developed just like any other film is developed and there is a picture of the specimen. The microscope can magnify a specimen up to 122,000 times actual size, and even that can be blown up using photographic developing methods.

The electron microscope is used extensively in a class; electron microscope techniques, offered at UWSP. The four-credit class has one hour of lecture and eight hours of lab per week. No other school in the state offers anything like it to undergrad students. "We have had undergrad students come from Madison to take the course," said Harris.

The course is set up to teach students the technical aspects of electron microscopy, and that is the reason for the heavy lab hours. There are good reasons

for taking the course, says Harris. "It increases saleability in two ways: 1) there is high demand for students with electron microscopic training, and 2) having this on their record indicates a high level of technical skill... it's a kind of indicator of general technical ability."

Lee Goss, an ex-student from the class and now a lab technician added, "It's a good technical training skill, but people who rise to the surface in the class have to be interested in it." He also said "I'd like to see more modern equipment, more modern equipment, more modern equipment, which deals with what you're looking at."

Ben August, an '85 graduate, also took the class. He is currently working for the University of Wisconsin Madison Department of Neurology in the tissue culture lab. "By learning electron microscopy, I could learn a trade, something that could put me in a career," August said. "I came out of college with a trade as well as a degree. It gave me an advantage over a lot of people." He also commented, "It's not for everybody. It's very time consuming - and it's hard."

The class, which is offered every spring, is limited to 18 students.

However, the class is not the only thing that the electron microscope is used for. A few professors have been using it to do research.

Harris has been using the equipment to study the aging process of plants. He has been making considerable progress in his studies. "In plant aging, it's changes in hormone levels which affect the activity of the cell nucleus and its composition.

Cont. p. 18

**Future,  
cont. from p. 1**

According to the report, "The University of Wisconsin's plan for maintaining quality education includes savings through effective management of resources and enrollment, a redirection of resources and energies through the regular review of institutional missions and programs, and an acknowledgement that tuition increases, improved state GPR funding, and enrollment reductions will be necessary in order to reach the goals of educational quality and reasonable access."

The proposal contains 21 different recommendations including a new freshman admissions policy, an easing of undergraduate credit transfers from UW Center campuses to four-year campuses as well as credit transfers from System vocational and technical campuses, the redefinitions of Center campus admissions; enrollment management and tuition increases.

The recommendations also include proposals for recruitment and retention of women, minorities and disabled students and faculty; the function of the UW Extension; improvement of campus child care facilities; improvement of the state's economic climate through cooperation with the System and internal System management improvements.

"It includes a broad range of subjects covering almost everything we felt we had to look at ahead in the years to come," Clusen said.

Clusen said the major intention of the plan was to give the regents more flexibility to make

system decisions without legislative interference, but that some of the recommendations in the proposal will need legislative approval.

"Some of the recommendations are beyond our control, but we wanted more flexibility in how the budget for the System is handled. Right now, all we are allowed to do is move money around internally," she said.

But student leaders around the state are more concerned about how the recommendations will affect their constituents than how the regents are allowed to move the System's money around.

One major concern among student leaders is a proposal

**"The Regents  
have to remember  
they are not  
just managers,  
they are dealing  
with real people."  
—Tolefree**

that calls for 18 percent tuition increases over the next four years and the possibilities of stricter enrollment standards.

Bryce Tolefree, president of the UW System student lobby, the United Council, said the plan had more positive aspects than negative ones.

Tolefree said some of the proposals could increase access to the UW System.

Tolefree added that the day care proposal "enhances the educational experience for the University System students who have special needs."

Tolefree termed the minority recruitment proposals "excellent, as long as they are held accountable. We hope it won't be the lip service the regents have given this issue in the past."

Tolefree said concerns over the tuition plan create a "contrasting position" for the regents.

Tolefree said that on one hand, the regents say they are for access ability for minorities, but on the other, they propose to raise tuition and increase admission standards.

Tolefree conceded "a lot of the proposals are very good. At United Council, all we are for is accountability in the positions the regents take. These decisions will affect the future of higher education in this state for the next 20 years, and there are some very gray regent positions that need to be addressed.

"The regents have to remember they are not just managers, they are dealing with real people."

Tolefree said he hopes the regents vote on each proposal separately "so we see how each regent feels on each issue."

Clusen said that the package has to be taken as a whole. "Each recommendation is interrelated," she said.

She added that she hoped the "Planning the Future" proposal would be passed as it stands now, "but a great deal will depend on how it's received at the open hearing and by the governor and the legislature."

**Protective Services  
patrols campus**

by Karen Rivedal  
News Editor

Protective Services has been an active support group on the UWSP campus since 1967. It has undergone some changes since those early days when the department consisted of one director, a group of security officers, and another group of night watchmen.

Don Burling has been the supervisor of Protective Services for 15 years. In 1972, soon after Burling's promotion, the night watchmen position was eliminated when overlap in the job duties of security officers and night watchmen became obvious. Presently, the department consists of supervisor Burling, one program assistant, eight security officers, and 10 student dispatchers.

Student dispatchers work the night shift, from 4 in the afternoon to 7 a.m. During this time, they answer phone complaints and dispatch officers to the scene using the Department's two-way radio system, which is also tied in to the Stevens Point Police Department.

Security officers undergo a careful selection process, although by law the requirements are rather minimal. Burling explains:

"The basic requirements for a security officer is that they have a high school education. In addition, the state requires a written exam and all officers are picked from a series of people on an eligibility list for that position."

According to Burling, for any one vacancy, the department will interview 5-15 applicants to find the most qualified person. After an officer is hired, UWSP sends the person to the Basic Police Recruit School at Fort

McCoy, the state patrol headquarters. The cost of the additional training and all departmental costs are paid through departmental funds. "We are tax supported," says Burling. "We don't get any money from student tuition."

The program at Fort McCoy qualifies a participant to be a police officer anywhere in the state. However, Burling stresses:

"When they come back to the Stevens Point campus, they are not police officers. They are security officers. They are not authorized to make any arrests.

But we feel the training they receive there is very important, because we respond to and do the same type of work that a city police officer would do."

Neither are security officers authorized to carry weapons. Legally, only recognized police officers have that option. Burling considers common sense and the Stevens Point Police Dept. back-up option the "weapons" of UWSP's security officers. He describes a hypothetical situation:

"If I get a call that there's a student running around one of the residence halls with a weapon, common sense dictates that we call the Stevens Point Police Department and wait until they get there to respond."

In reality, back up is called in only rarely. So far this year, no serious assaults, sexual or otherwise, have been reported to the office. More typical crimes include physical confrontations, loud parties, vandalism, and petty theft. For this type of crime, security officers prefer to handle the problem on campus. Burling explains:

"Once the outside police are called in and an arrest is made, the student has a record. Our officer may feel a certain situation does not warrant an arrest. If they can calm the situation and deal with it within the university structure, the individual will probably only be referred to Student Conduct."

On a typical eight-hour shift, two officers are scheduled. "We operate on both a mobile and foot-type patrol, says Burling. "One officer will routinely patrol the campus grounds on foot. Residence halls are walked through—basement and main lobby only."

Burling stresses that this routine will change with the night's activity on campus:

"There are times, in all honesty, when the entire Debot Complex may not be gone through for 12 hours—because they've been tied up with other calls.

I see the need for more officers, but because of recent budget problems, we've taken our share of cuts. We have only one car available. If that officer is busy with it, a lot of the parking areas and places where students frequent at night are not being patrolled. The mobile patrol acts as a deterrent, for any would-be vandal or whatever."

Vandalism and petty theft are  
cont. to p. 12

that calls for 18 percent tuition increases over the next four years and the possibilities of stricter enrollment standards.

Bryce Tolefree, president of the UW System student lobby, the United Council, said the plan had more positive aspects than negative ones.

Tolefree said some of the proposals could increase access to the UW System.

Tolefree added that the day care proposal "enhances the educational experience for the University System students who have special needs."

Tolefree termed the minority recruitment proposals "excellent, as long as they are held accountable. We hope it won't be the lip service the regents have given this issue in the past."

Tolefree said concerns over the tuition plan create a "contrasting position" for the regents.

Tolefree said that on one hand, the regents say they are for access ability for minorities, but on the other, they propose to raise tuition and increase admission standards.

Tolefree conceded "a lot of the proposals are very good. At United Council, all we are for is accountability in the positions the regents take. These decisions will affect the future of higher education in this state for the next 20 years, and there are some very gray regent positions that need to be addressed.

"The regents have to remember they are not just managers, they are dealing with real people."

Tolefree said he hopes the regents vote on each proposal separately "so we see how each regent feels on each issue."

Clusen said that the package has to be taken as a whole. "Each recommendation is interrelated," she said.

She added that she hoped the "Planning the Future" proposal would be passed as it stands now, "but a great deal will depend on how it's received at the open hearing and by the governor and the legislature."

**Protective Services  
patrols campus**

by Karen Rivedal  
News Editor

Protective Services has been an active support group on the UWSP campus since 1967. It has undergone some changes since those early days when the department consisted of one director, a group of security officers, and another group of night watchmen.

Don Burling has been the supervisor of Protective Services for 15 years. In 1972, soon after Burling's promotion, the night watchmen position was eliminated when overlap in the job duties of security officers and night watchmen became obvious. Presently, the department consists of supervisor Burling, one program assistant, eight security officers, and 10 student dispatchers.

Student dispatchers work the night shift, from 4 in the afternoon to 7 a.m. During this time, they answer phone complaints and dispatch officers to the scene using the Department's two-way radio system, which is also tied in to the Stevens Point Police Department.

Security officers undergo a careful selection process, although by law the requirements are rather minimal. Burling explains:

"The basic requirements for a security officer is that they have a high school education. In addition, the state requires a written exam and all officers are picked from a series of people on an eligibility list for that position."

According to Burling, for any one vacancy, the department will interview 5-15 applicants to find the most qualified person. After an officer is hired, UWSP sends the person to the Basic Police Recruit School at Fort

McCoy, the state patrol headquarters. The cost of the additional training and all departmental costs are paid through departmental funds. "We are tax supported," says Burling. "We don't get any money from student tuition."

The program at Fort McCoy qualifies a participant to be a police officer anywhere in the state. However, Burling stresses:

"When they come back to the Stevens Point campus, they are not police officers. They are security officers. They are not authorized to make any arrests.

But we feel the training they receive there is very important, because we respond to and do the same type of work that a city police officer would do."

Neither are security officers authorized to carry weapons. Legally, only recognized police officers have that option. Burling considers common sense and the Stevens Point Police Dept. back-up option the "weapons" of UWSP's security officers. He describes a hypothetical situation:

"If I get a call that there's a student running around one of the residence halls with a weapon, common sense dictates that we call the Stevens Point Police Department and wait until they get there to respond."

In reality, back up is called in only rarely. So far this year, no serious assaults, sexual or otherwise, have been reported to the office. More typical crimes include physical confrontations, loud parties, vandalism, and petty theft. For this type of crime, security officers prefer to handle the problem on campus. Burling explains:

"Once the outside police are called in and an arrest is made, the student has a record. Our officer may feel a certain situation does not warrant an arrest. If they can calm the situation and deal with it within the university structure, the individual will probably only be referred to Student Conduct."

On a typical eight-hour shift, two officers are scheduled. "We operate on both a mobile and foot-type patrol, says Burling. "One officer will routinely patrol the campus grounds on foot. Residence halls are walked through—basement and main lobby only."

Burling stresses that this routine will change with the night's activity on campus:

"There are times, in all honesty, when the entire Debot Complex may not be gone through for 12 hours—because they've been tied up with other calls.

I see the need for more officers, but because of recent budget problems, we've taken our share of cuts. We have only one car available. If that officer is busy with it, a lot of the parking areas and places where students frequent at night are not being patrolled. The mobile patrol acts as a deterrent, for any would-be vandal or whatever."

Vandalism and petty theft are

## Just one gripe...

**To the Editor:**  
During my years at this university I have not complained about too many things, but I have one gripe which I wish to express. At a university that I attended previous to this one I recall having to fill out evaluation forms for every class I attended, usually two of them, one on the instructors and one on the course itself.

I believe it was university policy there for evaluations to be done by the students and they were considered in future course planning. At UWSP I very seldom have a class in which I am required, or allowed to fill out an evaluation form. There have been a few, but they were usually given by teachers who seemed to want some more

feedback from their students. These were usually from the teachers who were doing a good job already, probably because they had used some of the suggestions made by the students in the evaluations.

I was told by a colleague of mine that it is the official university policy here for evaluation forms to be filled out by the students. If this is true, it obviously isn't being enforced. Also, many times when they are filled out they have no effect on the future classes or the instructors anyway.

I have encountered quite a few poor professors on this campus who may have been

very knowledgeable in their content areas but did not know how to teach. This is probably due to the fact that professors are not required to have any educational training courses at all. I have also had professors who were consistently late for class, or had some other quality or characteristic which disturbed me mostly because they were being paid to teach me (partly from my tuition dollars) and were not doing a very good job of it.

My point is that since I am paying for my education here I should be able to fill out an evaluation form and express my opinion about the quality of the courses and instructors I encounter, and these evaluations

should be looked at and taken into account. I believe there is a lot of value in filling out evaluation forms and it is a good policy which should be enforced. Unfortunately this is not the case here at UWSP, and I wish some changes would be made.

Ken Gilmeister

## Thanks Jack!

**To the Editor:**  
Since I make part of my living as a humor writer, I appreciate well written humor.

Your two articles "Test Your Poverty Level" and "How to Mismanage Your Time Effectively" in the October 23, *Pointer* issue were witty, sharp, original, insightful, and funny.

Bravo, Deb!  
Jack Cody

## Notes from Senator Sneed

### TOUR REOPENS

Because the Plover Whiting Fall Color-Rama Tour was canceled (due to lack of interest) on Sept. 10th, the UC Travel Service will be opening the tour again next week. The tour includes a meal at the South Point Dinner and is guided by Bob Peterson. Sign up at the UC Travel office. While you are there reserve your seats for the Zimbabwe and Afghanistan tours departing soon. If you like Borsch, you'll especially like these two cultural tours.

### THE VOTES ARE IN

How many of you people who are paying non-resident tuition elected a Governor in Wisconsin?

### SMART FRESHMEN

Freshmen of the future will be so much smarter than I was at that stage of the game because (some of) the Faculty has decided that the SMART software package is what I did not have and is the reason I got the way I am now.

### SMART FACULTY

(Some of) the Faculty will be richer in the future because their stocks in SMART will have risen tremendously and unexpectedly.

### ENCORE! ENCORE!

I wonder where those tables in the Encore came from? The Point Beer one is my favorite.

There are a few that make me want to lose my Park Place Plumper.

### THAT'S DETERRENCE

You know those things in the Library that are supposed to stop books from growing legs and walking out? - They are decoys - they don't actually work.

### INSIDE INFO

How about those people at the UC Info Desk? I think that a prerequisite for working there is not being able to spell our names and carrying an apathetic voice 5 pitches higher than everyone else. Call x4242 and ask for the number for Sen. Sneed. Try me.

### "NANCY & CO."

"Mrs. Reagan and Company" sees the death penalty in the drug scene. I see the death penalty in the AIDS scene. It seems to me that anyone with AIDS is carrying a lethal weapon and if they use it, they are committing murder. See California Referendum Number 64.

### RIGHT!

## Out from odd places

"True, duty in the Guard won't be the easiest way to spend a Saturday afternoon. But it will make your momma proud she raised a man." From an Army National Guard advertisement in *Rolling Stone*, issue 485

Features Editor

Dan Dietrich

I'm not unconditionally against killing people. But I'm not for killing people. I enjoy reality here. I enjoy the freedom to leave when I want, walk the sidewalks when I want, and read and write about those subjects I find interesting. But, to a degree, these freedoms are possible because we killed people. We killed more of them than they killed of us.

Perceptions of reality are based on what we see, read and hear. We are well-separated from any major U.S. military confrontation. Fifteen to 30 years ago the Korean and Vietnam Wars lived through the media and veterans. A portrayal of war, of its stench, of soldiers, and people killing people because their ideologies differed was available.

Currently, that portrayal is predominated by one side. In this era of being all you can be, reality is pushed aside by mega-financed advertisements. The image of protecting this country, and thus (at times) killing people, is replaced by smiling, high-fiving soldiers who do more before breakfast than I do all day.

But this isn't the reality of war, at least not what is portrayed in some movies and books.

For Halloween, I watched "The Deer Hunter." Sorry, I didn't throw sheet over head, visit the Square, and stumble home to order pizza. (Halloween memories for the past four years are stored in the "intoxicated" cabinet of my mind. And I'm yet to discover how to open that cabinet, much less find a specific file.)

"The Deer Hunter" felt closer to the reality of war. It portrayed the frustration, hatred, broken legs with extruding bones, Russian roulette, and death. Accurately. That image felt more authentic.

I don't think the images presented by military advertisements are accurate.

But is this a bad thing? I want to live in a "free" country, and yet I don't fully understand killing that other guy simply because he is the other guy.

I know, I'm a Democrat, maybe a socialist, possibly a wimp; definitely not a man.

But I doubt that Mom would think that I was finally a man because I could kill someone else's son.

I don't know.  
Veterans Day is Tuesday.

by Brenda Bergelin  
Staff Reporter

My 13 year old brother is a perjurer. When he was in second grade, he took the Boy Scout oath and swore to be "trustworthy, loyal, helpful, friendly, courteous, kind, obedient, cheerful, thrifty, brave, clean and reverent."

My brother? Helpful? Courteous? Obedient? Clean? HA! He maintains these qualities about as well as wayside bathrooms are maintained. Now I don't mean to crack down on my brother. (Mom, Dad, you did a fine job rearing the kid, just convince him to change his underwear more than twice a week!)

What I do mean to crack down on are those people who take oaths. Do people like Boy Scouts, mail carriers, monks, doctors, and public officials know the commitment and ramifications of an oath? And do they continually live up to their ritualistic declarations which they made based on an appeal to God that they will speak the truth, keep a promise, or remain faithful? I have a hard time believing they do.

## Under Oath A commitment or a haphazard agreement?

Oaths can be traced back in their purest form to the Sumerian Civilization (4th - 3rd millennia BC) of the Ancient Near East and ancient Egypt, where one often swore by his life, or ankh ("oath") which literally means "an utterance of life." In Islam, a Muslim may take a qasam ("oath") in which he swears upon his life, soul, honor, or faith. Because the qasam is primarily a pledge to God, a false oath is considered a danger to one's soul.

Among the Western religions (Judaism, Christianity) oaths have been widely used. The Hebrew term shevu'ah ("oath") comes from the same root as the number seven, which refers back to a vow, in which seven ewe lambs were used as witnesses, that the patriarch Abraham made with the Philistine king Abimelech in Genesis Chapter 21. Because oaths are undertaken to strengthen one's spiritual and moral character and resolve and are not to be taken lightly, Judaism generally discourages the taking of oaths.

At the present time, the most frequent use of the oath occurs when a person states his intentions to continually live up to a truth, a promise, or an intention. Take, for example, mail carriers, those dedicated souls who deliver our mail and mace our dogs. They take an oath never to read or interfere with someone's mail. But do you mean to tell me they never peek at the backs of postcards to see that Aunt Martha's having a wonderful time in Wyoming, that it's 76 degrees and sunny and that my Uncle Ralph got car sick at a Minnesota wayside (probably because of the bathrooms).

I also have my doubts about those monks who take an oath of silence. Somehow, I can't be-

lieve that those brown robed brothers never utter another word after taking their vow of silence. What if there was a fire? Who could call the fire department? I don't see how monks could avoid conversing at the monastery dinner table. Who says grace before they eat? How would a monk sitting at the far end of the table get the catsup passed to him without saying: "Catsup, please?"

I imagine doctors have a hard time keeping their Hippocratic Oath all the time, too. C'mon. What do doctors talk to each

other about while sitting around the hospital cafeteria table? Tongue depressors? Not a chance, especially when a doctor can chat about his latest case, Mrs. Smith, who has some juicy disease.

From there, I could go on to public officials. It is - need any voter be reminded? - among the most common circumstances for public officials to break their oaths of office. Need we be reminded of Richard Nixon?

Oaths aren't an exclusive thorn in the sides of Boy Scouts, mail carriers, monks, doctors or public officials. No. Chances are YOU will be required to place yourself into the hands of an oath should you, like 99.9 percent of today's society, decide to get married. Marriage requires a pledge before God to love, honor and cherish an espoused "until death do you part" Not "divorce till you part"...we're talking death! Yet, 50 per cent of today's married couples fail to honor that pledge. As soon as love fails to bring eternal bliss, they bail out and break their promise to God.

These cases raise the obvious question: What happened to the good old days, the 4th - 3rd millennia BC, when people made a pledge to God, an "utterance of life" and swore upon his soul, life, honor or faith that he would continually live up to a promise, truth, or an intention?

Yes, it's true. To everything I have said there is an exception: the Boy Scout who holds true to his oath and changes his underwear regularly; the mail carrier whose eyes read the address and only the address on a postcard; the monk who is silent even when he stubs his big toe on an oak pew; the doctor who actually talks about tongue depressors over coffee; the public official who actually fulfills his

## Reflections from State Street One long, drunken television commercial

by William Paul  
Staff Reporter

William Paul spent Halloween on State Street in Madison. Following are his reflections.

One Halloween, 1986. William is smashing against the multitudes of human titanic, shouting: "Show us your tits, show us your tits." The audience along this alley of State Street in Madison is largely men. Men in Rambo, the boys in Regan; men ankle deep in beer cans and the discarded waste of the pumpkin festival facade.

A woman in "where" is spread eagled, upside down, her buttocks against her motel room window pane. Her legs arch towards the heavens. My friends shout with the others, laughing at how the crowd mentality is "changing" our soft and sensitive feminism to a fold-out, grunting lust. Someone behind her flicks the lights but the act remains dressed.

We row on, through the beer

rain and presidential clones, knowing that we will sleep alone again later that morning.

Two  
Our costumes played to the reality of other humans earlier that day. With camouflage clothing and backpacks carrying sixpicks, our hunting clothes are the same coverings as those for the bow and arrow deer season. Halloween and hunting: State Street, U.S.A. The irony is so American!

Three  
Yikes! One participant climbs a bus stop waiting station and exposes a mammoth dummy penis - engineered to rise and fall with the pull of a string. Folks take pictures for their scrapbooks and the State Street crowd cheers, until a polite cop says, "stay down buddy."

Four  
In Ewen's book *Chanelles of Desire*, they speak of how our society has been produced through the mass consumption of fashion. Our dress is another form of mass behavior.

On State Street I noticed the evening's costumes. I suspect that, after one lumps the pa-

rade-goers into "designer" categories, there were 20 to 30 different codes of dress. From scary, to professional, to simply out of context, we were who we are!

Halloween is like shovelling the Hollywood characters out for one night: the soaps, the bowl games and the politics on TV - those things we watch and idealize.

We are in love with its mass victimage and its simple commercializations. Those of us in the Madison version witnessed one long television commercial for sex, booze, and the motel room dance.

## Correction

In the October 30th article "My sex drive? Well, ah..." Old Faithful was said to be in Yosemite National Park. It is not. It is in Yellowstone National Park.

Those who imagined Old Faithful, don't worry. The image is still one with extremely turbulent water.

Dan Dietrich

lieve that those brown robed brothers never utter another word after taking their vow of silence. What if there was a fire? Who could call the fire department? I don't see how monks could avoid conversing at the monastery dinner table. Who says grace before they eat? How would a monk sitting at the far end of the table get the catsup passed to him without saying: "Catsup, please?"

I imagine doctors have a hard time keeping their Hippocratic Oath all the time, too. C'mon. What do doctors talk to each

political campaign promises and office duties; the married couple who stays wedded "until death do they part."

And surely, that's how it should be. An oath is self-inflicted. It's one's promise and commitment to keep a promise, to speak the truth, or remain faithful. Oaths are not intended for the unreliable, the inconsistent, or the compulsively weak, but only for the inspired, the truly inspired. To paraphrase Harry Truman, if you can't stand the heat of an oath - don't go in the kitchen.

# Eau Claire's music scene Active at the grassroots level

by Jon Pike  
Staff Reporter

Regional music scenes are the hippest thing happening in today's world of rock'n'roll. And since rock journalists want to be hip too, they have been falling over themselves writing about "the next big thing" to come out of places like Austin, Texas and Athens, Georgia.

Well, since I too want to be hip, I'm going to scoop them all. We may not have "the next big thing" here in Wisconsin, but us "cheese-heads" have something to be proud of.

Oh, music scenes in Wisconsin? You must be talking about Madison and Milwaukee, right?

Wrong. People are creating and defining their own worlds of rock'n'roll in northwest, central and northeast Wisconsin. And, the good editors willing, I'll examine what's happening in these places.

The Eau Claire music scene has the essential elements needed for a local music scene: bands, promotion companies, media, and places to play.

The Eau Claire band Tatters has been around for five years, and continues to be one of the mainstays of this scene. The band is composed of Jeff Johnson and Shane McMahon on guitars, Dale Gleboff on bass, and Pat Farnand on drums.

Tatters' first vinyl appear-

ance was three years ago with the single "Gone to Stay." That song was the result of winning the Miller High Life "Rock to Riches" contest. "Gone to Stay" received airplay in Europe and the U.S. and since then they have appeared on a compilation album, and have released a cassette.

Tatters plays stripped-down rock'n'roll that is influenced by Tom Petty and Lou Reed. This band is spontaneous live. It's not unusual for Jeff Johnson to

tunes to change when they head to the West Coast this spring.

Not only is it necessary for a scene to have bands, but somebody needs to record and promote them.

One of the organizations responsible for promoting music in this area is Horse Latitudes Records. Actually, the name is a little misleading. Recording bands is only one thing that these guys do. Owners Phil Harder and Rick Fuller put together and promote live con-

duit for people, both inside and outside the scene, to become familiar with what's going on. The newsletter publishes reviews, concert information and interviews with local bands. Greyy wants this information to produce, "a productive atmosphere and awareness" within the region. He hopes that this newsletter will serve to unite different groups.

*Purple Testament* is currently available for free at record stores in Milwaukee, Madison, Green Bay, Stevens Point, Wausau, and Minneapolis. It will soon be available in new locations in Wisconsin (Oshkosh and La Crosse) and Minnesota (Rochester and Winona).

The last element needed for a local music scene is a place to play. Enter Water Street's Brat Kabin.

Horse Latitudes sponsors shows at Brat Kabin, featuring two or three bands on a monthly basis. Owner Marcy Meyes admits that she really isn't up on the music, but says that, "It's being run smoothly, and the kids really enjoy it."

The hallmark of Eau Claire's music scene is its diversity. If you want surf-guitar music, check out Barbara and the Titlweaves. Thrashing heavy metal more your style? How about General Strike? Maybe avant-garde, industrial noise is your style. Then try Watson, Come Here I Need You. Or maybe you just want to hear some back-to-the-basics guitar rock. If so, you'd probably dig one of Eau Claire's first bands of this era, Bring Home the Lobsters.

So, is this it? Is this "the next big thing?" Can correspondents and promoters flock to Eau Claire to cash in on this? Well, maybe.

But maybe we're getting concerned with the wrong question. Maybe what we should be concerned about is the concerns of these people in Eau Claire.

Rock 'n' roll should be a populist art form. It should belong to people, not large corporations. It should belong to people who like it and want to do the best job they can with it. It doesn't have to be perfect, as long as it reflects what people want to think about. That is what they're doing with rock 'n' roll in northwestern Wisconsin. And that's all that matters.

**"Rock 'n' roll should be a populist art form. It should belong to people, not large corporations ... It doesn't have to be perfect, as long as it reflects what people want to think about."**

decimate his guitar on stage, or for Pat Farnand to pass around the Floor Tom from his drum set for the audience to beat on.

No member of Tatters is filthy rich from performing. They tour the Midwest extensively, and, according to guitarist Jeff Johnson, "All of our earnings go directly to the band; we all hold down day jobs." They are, however, expecting their con-

certs, and have a series of videos called "Anarchy in Eau Claire."

These videos, which have been shown on various public-access channels, feature bands and original film shorts. In contrast to bigger labels, who according to Harder, "make people wait around and really dick them around," Horse Latitudes main concern is to get the product out.

Latitudes' other goal is to achieve professionalism without forgetting their roots.

One problem experienced in meeting these goals however was that people selling their products wanted to charge more than Horse Latitudes wanted it to be sold for. But despite obstacles, Harder is optimistic. "I guarantee you, this is going to open up very wide."

A scene usually isn't a scene until somebody writes about it. That's where Wind Chill Factory Press, publishers of *Purple Testament*, enters the picture. *Purple Testament* isn't a magazine or even a fanzine. It's a newsletter. Co-founder Peter Greyy says that the purpose of the newsletter is to "promote on a grassroots level" the music scene of Wisconsin and Minnesota.

*Purple Testament* serves as a

# Bleske at Large

by Bernie Bleske  
Senior Editor

This sucks.

Outside it's just about cold enough to freeze a large rat and is it snowing? No, it's raining for Christ's sake. No normal pitter-patter, no cute rain either, but a Hell's Angels, born to freeze the dead drizzle. Umbrellas, of course, don't work. This rain doesn't fall. It just lays in the air and waits.

Inside, the rug has just died and is making the room smell like rotten Carpet Fresh (a mixture of pine and moldy Budweiser). My roommate blows his nose every three seconds—no normal "honk" either but a bona fide two-thousand decibel gurgle. He doesn't sleep, he wheezes into a microphone.

There are three thousand pages of reading screaming at me from my knapsack. All due Monday. Physics 583, advanced trigonometric isotopes, ancient Hindu existentialist ideology, and independent jogging all have tests Tuesday. And 500 single-spaced, typed pages of English 101 are due Wednesday.

Everything sucks. I've got somewhere between one and 80 years of college left to pay for, a guaranteed career in fast food, and a love life that isn't love, isn't life, but is damn close to moldy cabbage.

On the lighter side of things, we've got a country two years shy of electing a new evangelical faith healer for president who insists God told him to run, a military budget big enough to supply each citizen of China with a million pairs of pantyhose, and just as many nuclear bombs waiting to come singing cheerfully out their silos.

And I don't even care about that.

It all simply sucks. I've got a pair of maniacal totalitarian parents who insist a 4.0 is the only way to heaven, IBM, and \$200,000 a year—which is about what heaven goes for these days.

I don't own a car and I'm stuck in a measly, whiny little town with the only thing going for it a diarrhea-producing beer. It's still three weeks until Thanksgiving and I'm ready to skin a cat just for the fun of it.

At least there's still the weekend.

## Write Your Mother

**Ask her for an electric blanket so you can cut your heating bill.**

No kidding. You can cut your heating bill substantially by climbing into a nice, warm bed after you turn down your apartment thermostat by ten degrees. It's a simple thing to turn it back up in the morning. A night under the electric blanket will cost you about a nickel. (And where else can you go for a nickel nowadays?)

"The Color of Money" is a fascinating film. Director Martin Scorsese has created a complex and thought-provoking movie. And Paul Newman, playing retired pool hustler "Fast Eddie" Felson, turns in one of the best performances of his career.

"The Color of Money" is like two different movies. The first hour focuses on Eddie Felson's dark, cynical philosophy of life in general and pool in particular. The second half of this film finds Fast Eddie on the comeback trail.

"The Color of Money" begins when Eddie Felson, who is now a successful liquor salesman, stumbles upon Vincent (Tom Cruise), a cocky, arrogant, no-class kid who happens to be brilliant with a pool cue. Eddie explains to Vincent that winning has nothing to do with shooting your best game every time. If you don't lose once in a while, the other guy won't keep coming back. And it doesn't matter how many games you win, the only thing that matters is how much money you win.

Eddie cons Vincent into going on the road in order to prepare for a national pool tournament. When Eddie's girlfriend (played by Helen Shaver) finds out that he's getting back into pool, they have a fight and break up. It seems that Eddie is willing to sacrifice anything to get back into the game.

Carmen (Mary Elizabeth Mastrantonio), Vincent's girlfriend, joins Eddie and Vincent

**Star System**  
**0—bomb**  
**\*—poor**  
**\*\*—average**  
**\*\*\*—above average**  
**\*\*\*\*—really awesome**

as they go from one cheap pool hall to the next. Carmen turns out to be just as cold-blooded and manipulative as Eddie.

While on the road, Eddie, Vincent, and Carmen enter Director Scorsese's traditional territory. The pool halls and hotels are dirty, run-down, tarnished pieces of Americana. The first half of "The Color of Money" is classic film noir, with forbidden sensations set in an American seaze-scape. It is reminiscent of earlier Scorsese films like "Taxi Driver" and "Raging Bull."

The second half of "The Color of Money" finds Fast Eddie making a comeback effort when he decides to leave Vincent and Carmen behind to enter a pool tournament himself. While at the tournament, Eddie patches things up with his girlfriend.

During the tournament, Eddie has to play Vincent, and it looks like we're going to get a typical comeback story with a nice, neat, happy ending. But this film doesn't end the way typical Hollywood movies are supposed to end.

Rating: ★★★★★

## Album Spot-Lite

by Jon R. Pike  
Staff Reporter

Joe Louis Walker  
"Cold is the Night"

on High Tone Records

It's true that Fast Eddie is back, but he's lost more than he's won. To explain anymore would give away the ending.

The direction and cinematography of "The Color of Money" is brilliant, which has become a standard for most Scorsese films. One of the most powerful scenes involves Paul Newman having to face himself when he sees his reflection in the eight ball.

Martin Scorsese is one of America's greatest filmmakers. "The Color of Money" is the best film he's done since "Raging Bull" in 1980. "Raging Bull" won Scorsese an Oscar for best director and there's a good chance that this film will do the same.

Paul Newman gives his best performance since "The Verdict," and deserves an Oscar nomination. But the entire cast is quite good. "The Color of Money" should do very well when Oscar time comes around next year.

It recently dawned on me, that my column has been one-sided this semester. I've completely ignored the existence of one of the two most significant influences on our popular culture: black music (the other influence being classic Don Knotts films).

White people have been ripping off black music from the very beginning, at least since white folks knew what was cool. So, in an attempt to correct a past wrong and ease my liberal guilt, I will feature groundbreaking new releases by black artists for the month of November.

Critics are always saying that the blues is either dying or being revived. Thankfully, blues' artists have ignored the critics and just kept on playin'.

One guy who has continued to play for the past 20 years is Joe Louis Walker. Even though "Cold is the Night" Walker's first solo LP, he has been steadily developing his skills by singing and playing in blues and gospel bands.

Although this is pure, unadulterated blues, Walker cites as influences such classic soul artists of the '60s as Wilson Pickett and Otis Redding. Brother, it shows! Joe's melding of soulful vocals and blues guitar licks,

show a man proud of his rich musical heritage.

Not only is Walker excellent, but his back-up band, The Boss-Talkers, are one of the tightest rhythm machines this side of Chicago. Harry Oden (bass) and Steve Griffith (drums) lay down heavy rhythm tracks, while Kevin Zuffi's keyboards provide earthy and wicked fills. Almost all of the songs on this LP were written for this album.

As long as Joe Louis Walker and The Boss-Talkers keep playing, blues will never be confined to libraries as ancient oddities, and will never need to be revived.

## 'The Psaltry' to perform in Point

A French-Canadian group, "The Psaltry," will perform at UWSP November 8.

Lilianne Labbe and Don Hinkley make up "The Psaltry," which plays French-Canadian folksongs, original music and jazz material. Their songs range from French to "Français" to English. Both members play the guitar and Labbe uses spoons and clogging for percussion.

"The Psaltry" have been touring together since 1974 and have played at campuses and coffeehouses around the U.S. They have been a featured guest on National Public Radio's "A Prairie Home Companion," and have played on Wisconsin Public Radio, France Radio Network, and Canada's CBC television and radio networks. In addition to the U.S., they have performed in Canada, France and Italy.

"The Psaltry" will perform in the Program Banquet Room of the U.C. at 8 p.m. The show is sponsored by the UWSP French Club.

## Musical comedy "Annie" to play here

The musical comedy "Annie," with a 27-member cast of young actors, 14 scenes, 12 sets and a 16-piece orchestra, opens Friday, Nov. 14, at the University of Wisconsin Stevens Point.

Ed Hamilton of the UWSP theatre arts faculty will direct the performances in the Jenkins Theatre of the Fine Arts Center. Curtain time is 8 p.m. on Nov. 14, 15, 18-22 and 2 p.m. on Nov. 16. Tickets are on sale in the College of Fine Arts box office.

Hamilton describes the play as "a special pre-holiday treat." He says the production

showcases the collaborative efforts of the theatre, music and dance departments.

The leading role will be played by 20-year old Holly Hartz, a junior communication major from Waukesha. Six area children ranging in age from 8 to 14 were chosen from auditions to portray the orphans.

Based on the comic strip "Little Orphan Annie," the story contrasts the lives of the rich Daddy Warbucks and the poor orphans and residents of Hooverville. Set during the Depression, the play is about the

triumph of perseverance and fortitude; the victory of good over evil, according to Hamilton.

Bryan Bender of Oshkosh will portray Daddy Warbucks and Melodie Hendricks of Beloit will play his secretary Grace. Miss Hanigan, the wicked orphanage director, will be played by Stephanie Pierce of Lake Geneva. Rooster, her evil brother; will be enacted by Tom Polum of Shawano and Lilly St. Regis, his slimy accomplice, will be portrayed by Karla Sherman of Plainfield.

## SETV airs news program

In an attempt to examine issues and events unique to Stevens Point, Student Experimental Television (SETV) is producing "News Scoop," "the only visual outlet for news in Stevens Point," according to SETV News Director Bob Taugner.

The 30-minute program examines such issues as the drug problem in Stevens Point, the play "Guys and Dolls," and student senator's opinions.

"The show represents a new direction for SETV," said Taugner. "Last year, the focus was on entertainment, and this year it's geared more towards news."

Jerry Reece and Julie Hughes are the hosts for the show, which airs on Thursdays at 7:00 p.m., and replays on Tuesdays at the same time.

Annette Zapchenk is executive producer for "News Scoop."

**Protective Services,**  
from p. 5

the two most common crimes on the UWSP campus. Officers follow a set procedure to deal with vandalism. Every person determined responsible for the action is referred to Student Conduct.

About petty theft procedure, Burling remarks, "If we have a series of thefts, that depends on the victim. The victim always has the right to file charges with the local authorities if they so choose."

However, civil charges of this sort are filed very rarely, partly because petty theft offenders are so hard to catch. In many cases, the incidents happen after dark with no witnesses. Or people will leave their rooms open and their belongings vulnerable.

"The residence halls are so open," Burling says, "that you always have people walking around. They don't look out of place."

"We've got to educate the students to keep their areas secure when they're not around, even for a few minutes. It only takes a couple of seconds for a person to walk into a room and walk off with a radio or cash."

Even with these problems, Burling still considers UWSP a relatively safe campus. But he stresses preventative action. Burling warns students to walk in groups, avoid the dark areas on campus, and avoid Schmeckle Reserve at night.

"There's always a possibility for an assault to occur," Burling maintains. "Today I could say it's safe and tomorrow there could be a serious assault."

Recently, Protective Services has been involved in a series of meetings with other campus representatives to develop a set procedure to deal with sexual assaults on campus. Burling reports some progress in the area:

"We're trying to identify one central location where people can go and get an accurate figure on how many assaults have occurred within the community and campus."

We've set that to be the Stevens Point Police Department, because they are the law enforcement agency for the university. We will remain a reporting agency."

There has been some disagreement during the committee proceedings over the possibilities of a mandatory call-in of the Stevens Point Police Force for an incident of rape.

Burling believes the victim should decide if outside police forces are used:

"I don't want to infringe on any victim's rights. If the victim wants to see them involved, then by all means I'd like to see the local authorities more involved."

But if the victim is quite adamant in not wanting to report it to the police, then I think we have to respect that decision."

# BUSINESS

part 1

## Off-campus housing: Landlords and leases

by Bernie Bleske  
Senior Editor

If the cards are played right, off-campus housing can be considerably cheaper than the Residence Halls. Apartments run between \$600 and \$750 a semester, usually including heat and hot water, and houses rent anywhere from \$400 to \$800 a semester, with or without utilities. While room costs in the dorms are usually cheaper than a house or apartment, food is usually less expensive, and can save students two or three hundred dollars a semester.

Still, most students move off campus for the obvious comforts—larger rooms, living space, home food, and most of all, freedom. Either way, off-campus housing has considerable benefits over the halls. Most students also find few problems with their houses, despite the common stereotypes of fanged landlords sucking tenants dry and tenants taking sledgehammers to their homes.

Which isn't to say problems don't occur. They do. That's what this is about.

The easiest and most effective solution to most problems is the lease—provided you've got one and it's thorough enough. Leases are not required by the city or state and an oral lease (sounds kinky but isn't) is valid provided it can be substantiated. Obviously enough, oral leases aren't recommended—

even if it is your girlfriends grandmother you're renting from. Problems have been known to occur between grandmothers and grandchildren. Most landlords require written leases anyway.

Since it is the landlord who writes the lease, it generally favors the landlord. This isn't saying that in fine print the lease will say "the tenants soul, body, and collection of Mel Tourme records are mine hereforever," but it is an extremely good idea to read your lease thoroughly—especially since a lease cannot be broken unless there are extremely extenuating circumstances (and even then, maybe not).

If you're suspicious of your landlord it is best to carefully look at the property and find out past rental history. This includes questioning former tenants and asking the landlord for past rental records. Actually, you should carefully look at the property anyway and, this is the second most important part of renting and not getting screwed while you do it, fill out a detailed inspection checklist (i.e. beds—missing a leg, bath-tub—odd color of green, living room—smells like geritol, etc...)

Logically enough, this prevents the landlord from accusing you of putting that watermelon sized hole in the refrigerator.

Many landlords require an additional security deposit in

case of damages, in which case the checklist may save your 100 buck deposit at the end of the year. (Also, landlords are not allowed to subtract rent payments from the deposit, provided they have made reasonable efforts to get the rent. The landlord has 21 days after your lease expires to return the deposit. The tenant has 7 days after renting to inspect and report any damages.)

The checklist should be attached to the lease and signed by both the tenant and landlord.

The lease itself should contain a number of things, conveniently listed here:

**Rent-amount, due dates, refund provisions, conditions for refusal** (like if the place burns down)

**Utilities—what is provided.** The landlord is required by law to tell you what utilities aren't provided.

**Occupancy—dates, number of occupants, subletting** (usually having to sublet isn't a great idea, since finding someone to rent the place isn't always that easy. Thus, full year contracts aren't wise if you're only staying an academic year).

**Damages—who's responsible for what.**

**Restrictions—i.e. pets, noise, smoking, grandmothers.**

**Furniture—items and conditions**

**Landlord rights—yes, they have a few, like when they can inspect.** They do, however, have to give prior notice (it's a law, which gives you enough time to hide Fido, provided the landlord doesn't smell the do-do Fido just laid on your bed).

**Special work—improvements** (i.e., if you have to pull the toilet handle 50 million times for a good flush), dates of completion, who pays.

**Cleaning—who does it, when, what happens if they don't.**

**Laundry—if any.**

**Parking.** The law requires that the landlord provide you a "safe home," which includes hot and cold running water, plumbing and sewage disposal; heating that can keep the house at 67 degrees year-round, and electricity in operating condition. The law also requires the house be free of anything that can cause injuries without the tenant doing anything stupid to get them.

Garbage isn't a problem since the city hauls it away once a week, provided you don't leave it in the garage.

The landlord can evict tenants for non-payment, disturbing other tenants, breaking the lease, or damaging property. However, the tenant must be given notice and a chance to repent (i.e., one week to clean up or get out). In the case of rent non-payment the landlord, after "reasonable" efforts to get the tenant to pay, can bring it to small claims court or give the tenant a 5 day pay or go away notice (the tenant still has to pay the owed rent, though).

The landlord can also refuse to rent to people with pets, kids, or grandmothers (just kidding about the grandmothers), but that's it. Any other refusal is discrimination.

Of course, there are several very helpful organizations on campus that can help if tenants have problems. These include the Student Housing Office in Dezell (which gives out a very helpful free booklet that most of this information was stolen from) and the Student Legal Service in Room 131 in the UC.

## INTERVIEWS

November 6 - 20, 1986  
Sponsored by Career Services  
Interviews require sign up for appointment time and registration with Career Services unless otherwise noted.

Stop by 134 Old Main Bldg., or call 346-3136 for further information.

### U.S. MARINES

Date: November 4-6

Recruiter will be in the University Center Concourse from 9:00 a.m. - 3:00 p.m. each day. All majors. No sign up necessary.

### KIMBERLY-CLARK CORPORATION

Date: November 6

Two schedules. Paper Science & Engineering seniors for positions as Process Engineers. Sign up in Paper Science Department for interviews in Career Services.

### U.S. SPORTS ACADEMY

Date: November 10

Recruiter is tentatively scheduled to be in the University Center Concourse from 9:00 a.m. - Noon. All majors for information on graduate degree program in Sports Science. Watch for further confirmation of arrangements in future issues of the Pointer or the Non-Teaching Vacancy List.

### MCDONALD'S CORPORATION

Date: November 11

Two schedules. All majors for Management Trainee positions (locations in Rockford, IL; Madison, WI; Milwaukee, WI).

### APPLETON PAPERS, INC.

Date: November 12

One schedule. Paper Science & Engineering seniors for positions as Process Engineers. Sign up in Paper Science Department for interviews in Career Services.

### FLAMBEAU PAPER COMPANY

Date: November 12

One schedule. Paper Science & Engineering juniors for summers position. Sign up in Paper Science Department for interviews in Career Services.

### PEACE CORPS

Date: November 13-14

Recruiter will be in the University Center Concourse from 8:30 a.m. - 4:00 p.m. on both dates. All majors for information on international volunteer positions. A film describing the Peace Corps experience will be shown both days at noon in the Green Room of the University Center. No sign up necessary.

### NATIONAL STARCH & CHEMICAL CORPORATION

Date: November 14

One schedule. Paper Science & Engineering seniors. Sign up in Paper Science Department for interviews in Career Services.

### E & J GALLO WINERY

Date: November 18

One schedule. All majors, especially Business/Marketing with strong interest in sales. Sales positions available in the Oshkosh/Fox Valley area.

### ETHAN ALLEN CARRIAGE HOUSE

Date: November 19

One schedule. Interior Design majors for commission positions as Interior Design Salesperson.

# OUTDOORS

## Rutting bucks lure Wisconsin archers

Photo by C. Dorsey

Erica Powinski of Oxford takes aim during a fall bow shooting tournament. These tournaments serve as a prelude to the open bow deer season. Area hunters report success as bucks enter the rut.

## Successful deer hunters begin scouting early for opening weekend bucks

by Tim Albers  
Staff Reporter

This past weekend I scouted for the gun deer season scheduled for November 22-30. Things look good but could be better.

On Saturday I drove to the old stomping grounds. I wanted to drive those roads that wind through the section of land we hunt, but couldn't. The DNR converted the majority of those roads to Hunter Walking Trails.

The gun deer season this year will be different. We will have to walk in where we used to drive. This isn't too much trouble for those of us who are young and in good shape but there are a few hunters in our crew who are neither young nor in good shape anymore. Our first night in the shack will also be different. Usually we sit around shooting the bull until midnight. This year, I think we

will have to sit down and replan the majority of our old drives. Who knows, this might work better for us.

When I finally got out of the truck on Saturday, I went to where the shack will be. I stomped through the area for a few hours, never more than a half mile from the truck. I saw a few deer and some sign but not as much sign as in previous years.

I chose four possible places to stand on opening morning. All four have trail crossings, a stand of pines, and a little swamp near them. Two of these, however, are situated so that I will probably have to shoot off-handed. I'll have to go to the range and get reacquainted with that process.

When I was satisfied with my walk, I got back into my truck and started home. But instead of going directly home, I took a few back roads with the hope

that I could get a shot with my bow.

While driving, a doe crossed the road in front of me. She didn't seem nervous so I stopped and started stalking her. But about 50 yards from her, I noticed that something else was stalking her. A six-point buck. Now I really settled down and tried my stalking techniques.

I got about 15 yards away from him. But because I was below him on the hill, I thought he was 25 yards away. I was going to try getting closer, but he looked nervous. I decided to try a shot.

My arrow went over his back directly over the kill area. That six-point buck took off like he was on fire. For the next half hour to 45 minutes I tried to find my arrow, but never did. Good luck to all and don't forget to be careful.

by Bud Gourlie  
DNR Public Information

In the Coulee county near La Crosse, bow deer hunting is improving as the rut progresses with high deer populations reported in management units 59C, 59D and 72. Nice bag limits of fox and gray squirrels are reported and hunters are enjoying increased ruffed grouse populations from the 1985 numbers. Duck hunting is slow.

Walleye fishing is good in Eau Claire area lakes while musky action seems to be slowing.

Reports of excellent small game hunting including squirrels and ruffed grouse, fine fall walleye fishing and bow deer action picking up with the rut highlight the outdoor activity for Wisconsin this weekend.

Pheasant hunting in southeastern counties is improving as the corn is being harvested. Deer, woodcock and grouse hunting are also improving with the leaf drop. Northern pike fishing is good.

Shore fishing in Milwaukee County was slow although snaggers netted chinook and rainbows from the Milwaukee River and some coho and browns at the Oak Creek Dam. Kenosha County shore anglers experienced some good rainbow trout action off the piers and at Eichleman Park.

Rainbows also provided the action in Racine County at Myers Park although recent inclement weather kept most anglers away.

To the north along Lake Michigan, trollers were finding salmon in 80 to 120 feet of water in the Sturgeon Bay area. Door County shorelines were rated as slow with a few rainbows hitting spawn sacks at Portage Park.

In the Marinette area northern pike fishing at Stiles Flowage on the Oconto River was good. Brown trout action was fair on the Little River.

Inland, bucks are beginning to move in the Winneconne area. Duck hunting was rated as slow. A few white bass are being taken from the Lower Wolf River.

In southern Wisconsin there are plenty of Canada geese pre-

sent. Pheasant and bow hunters are also finding good success.

Fishing along the Wisconsin and Mississippi Rivers is good with walleyes hitting in the wing dam areas on the Mississippi. Duck hunters are getting mallards and wood ducks and there are a few divers on Pools 10 and 11.

Trappers are reporting excellent raccoon harvests and the outlook for muskrat season is good. Around Madison, pheasant hunters are having action on both stocked and some native birds. Mink and muskrat season opened in the northwest part of Dane County.

In north central Wisconsin, a good number of walleyes are being taken on the Wisconsin River below all dams and from most northern county lakes. Grouse numbers in the north are good and some woodcock are still around. Beaver trappers are having great success in the Woodruff area.

Bow hunters as well are also seeing more deer as the rut is on.

### Wisconsin Rapids Area

A number of good sized walleyes are being taken on the Wisconsin River below all dams in the Wisconsin Rapids area. Duck hunting is generally slow. The opening day of goose hunting was generally good, but it has tapered off considerably. Bow deer hunters are having good success.

### Antigo Area

Deer activity has increased with the start of the rut. Woodcock numbers are still good. Woodcock were still in the area through the weekend, but they soon will be pushed out by the cold weather. A few geese are still flying through, but the season here is closed. Duck hunting has been slow. Walleyes are biting in the Antigo area.

### Woodruff Area

All of the leaves are down in the woods, and ruffed grouse hunting remains excellent. Beaver trappers in the Woodruff area are having great success this season. The fine weather provides a great opportunity for fishing. Nice catches of walleyes have been reported on all walleye lakes.

## Rad waste board seeks nominations

MADISON - The Wisconsin Radioactive Waste Review Board is seeking nominations of individuals to serve on its Policy Advisory Council.

Persons interested in serving on the Policy Advisory Council (PAC) are encouraged to send a letter of interest, plus background materials, to the Advisory Councils Search Committee, Radioactive Waste Review Board, 626 Tenney Bldg., 3 S. Pinckney St., Madison, WI 53702, prior to Nov. 14, 1986.

Mary Louise Symon, chairperson of the Advisory Councils Search Committee, said that terms of four members of the PAC recently expired, and at least two vacancies exist. The Review Board will select members on Dec. 16, 1986.

State law requires that the PAC include public members, representatives of local units of government, and representatives of Indian tribes. The PAC

Cont. p. 17

## Species Spotlight

## Reputation precedes sly fox

by Robert Bluett  
DNR Wildlife Bureau

**Description**  
Red foxes are 3-3.5 feet in length, trim, long-legged, and built for speed. Adults usually weigh 9-12 pounds, but appear much larger due to their thick, full coat of fur. The 15 inch tail is bushy, almost cylindrical in shape, and characteristically is tipped with white. A long snout, large, erect ears, and yellow eyes with narrow pupils give the fox an appearance which has undoubtedly contributed to its reputation for cunning and craftiness.

Red foxes vary in color from deep, russet red to sandy blonde. The legs, feet, and back of the ears are usually black. Underparts such as the chin, throat, and belly are white.

Black, silver, cross, and other color phases occasionally appear in Wisconsin red foxes. Silver foxes have black hair tipped with white. Cross foxes bear a dark brown strip that extends from the head down the center of the back, and is transected by another strip which reaches from shoulder to shoulder. One or more pups in a litter may exhibit a particular phase, or several color phases may appear in the same litter.

**Food**

Red foxes eat a variety of foods, but show a preference for small and mid-sized mammals such as mice and cottontails. Plants and insects are often eaten during spring and summer. Depending upon the time of year, up to 72% of the total volume of a fox's diet is composed of cottontail rabbits, making them the single most important food item of Wisconsin foxes. Red foxes also consume shrews, squirrels, songbirds, pheasants, ducks, grasshoppers, garbage, carrion, fruit, grass, grain, and other items.

Well developed senses of sight, smell, and hearing make the red fox an efficient predator. Scientific evidence indicates that a red fox can locate a rustling sound within 1 degree of its true location, and can hear a mouse squeal at 150 feet. A variety of hunting styles are used to capture different types of prey. When hunting mice, foxes stalk within pouncing distance, lunge 2-6 feet, and try to pin their quarry with their front feet. If its prey escapes, the fox rears up on its hind legs, turns in all directions searching for the mouse, and makes another pounce if the mouse is spotted. Ground nesting birds such as pheasants are occasionally killed by hunting foxes. Rabbits are generally stalked, then run down in a high speed chase.

Foxes may kill more than they can eat at the moment. Less preferred foods are then cached under loose dirt, leaves, or snow for future use. Foxes often mark their cache sites by urinating on a nearby object. By interpreting various combinations of food and urine scents of cache sites, foxes can avoid investigating unproductive spots, thereby increasing their foraging efficiency.

**Current Status in Wisconsin**

Red foxes are most abundant in southern, central, and western Wisconsin. The statewide

Photo by Brian Hillner

Despite common perception, the red fox is abundant in Wisconsin. The DNR estimates that the Wisconsin population exceeds 60,000. Hunters and trappers prize the quality fur of the fox.

population is currently stable at approximately 61,000 red foxes. Throughout southern Wisconsin, however, competition from expanding coyote populations may be causing a slight decline in fox numbers.

**Management**

Biological models are used to simulate the effects of different birth, death, and dispersal rates in red fox populations. Data collected from southern Wisconsin foxes indicated that fox numbers in this state reach stability when harvests approach 55% of the fall population. Wisconsin's current management goal is to harvest approximately 27,000 red foxes per year (44% of the statewide population) through 1993.

Fox harvests in Wisconsin are controlled by setting the season length and opening date to balance recreational demands with the resources' capabilities. The fox season north of State Highway 64 opens two weeks earlier than in the southern zone, because furs become prime at an earlier date, and less harvest pressure is exerted on fox populations in northern Wisconsin. Average pelt values can affect statewide fox harvests, and are taken into consideration when seasons are set. Information from winter track counts, annual mammal observations, hunter/trapper surveys, and fur buyer questionnaires are used to monitor changes in red fox abundance as well as harvest effort.

Recreational opportunities other than hunting and trapping are often a neglected subject when "game" animals such as the fox are considered. Wisconsin's many wildlife areas offer a chance for photographers and nature lovers to observe red foxes in the wild. Once a den is located (use binoculars to

search hillsides for a mound of fresh dirt at the den entrance), pups can often be seen during the evening hours of spring or early summer. Care should be

taken to avoid disturbing fox families during the latter rearing period. Young animals should never be handled or taken from the wild.

Foxes can often be brought into camera range with a commercial predator call (and a bit of practice). Tracking red foxes after a light snowfall provides a better knowledge of fox habits, as well as a chance for exercise when most people are warming themselves near the fireside. Look for fox trails near gravel roads, paths, fencerows, or tree-

lines. Fox trails usually consist of a nearly straight alignment of evenly spaced tracks 6-8 inches apart.

A fox track is the size of a small dog's (about 1 1/2 inches long), but narrower. The 4 toe pads of a fox are smaller than that of a dog, and thick hair between the toes and foot pad may be apparent.

## Making daydream believers

by Tim Albers  
Staff Reporter

I understand how some of you hunters and fishermen feel about having to go to classes and having to study. I have that same conflict of interest. I think about hunting and fishing all the time but can't get out nearly as much as I'd like. Instead, I've developed a sort of therapy. It's called daydreaming.

My thoughts turn to long walks through the woods in September, October, November, (hell, let's face it, all year long.) Just about any time I can escape to the outdoors is memorable.

We have all had days when our game bags or stringers haven't been as full as we hoped. One thing I have no-

ticed, however, is that if you let your mind wander you can imagine similarities between those gameless days and days on campus. If you make some comparisons, you might notice wildlife of the two-legged kind. The best way to observe it is to just sit, relax, and watch.

All people have differences

## JOB OPENING

Recreational Services is now accepting applications for the **Outdoor Rentals and Equipment Coordinator** for the spring semester. Individual must have knowledge of outdoor recreational activities and recreational equipment, its maintenance and repair. Must have good verbal and nonverbal communication as well as supervisory skills. Must have at least a 2.0 G.P.A. and carry 6 credits per semester.

Pick up applications at Recreational Services front desk located in the lower U.C. **Applications are due Friday, Nov. 14!**

# PORDNORSKI AT LARGE

REX AND EVELYN SPEND ANOTHER SATURDAY AFTER-NOON AT THE LOCAL PARK.

## Sandhill hunt

MADISON, WI - Successful applicants for the "trophy buck" hunt at Sandhill Wildlife Area on November 15 have been notified by mail, according to Department of Natural Resources' wildlife officials.

## Turkey applications due

MADISON, WI - Applications for permits for the 1987 wild turkey season in Wisconsin must be postmarked no later than November 7. They may also be delivered in person to the Department of Natural Resources office, GEF 2, 101 South Webster Street, Madison through that date.

There are 6,040 permits available for next year's hunt in seven zones in southwestern Wisconsin. The season will consist of four hunting periods; April 22-26, April 29-May 3, May 6-10 and May 13-17.

This year (1986) turkey hunters took 793 birds on a total of 3,495 permits issued for a success rate of almost 23 percent.

## Nominations, from p. 5

Members of the PAC are appointed by the Review Board to three-year terms. At least six of the 11 members must reside north of the southern limits of

Stevens Point. PAC members do not receive a salary, but are reimbursed for reasonable expenses to attend meetings, which are expected to be held about four times a year in various Wisconsin locations.

For more information, contact Ms. Symon at 608/256-8760 or RWRB Executive Director Jim Kleinhans at 608/266-0597.

## Daydream, from p. 16

and this is what makes people-watching interesting. You can also (with a little imagination) compare your surroundings to what might be found in the outdoors. Buildings compare to either hills or trees depending on your vantage point. So don't be afraid of a little daydreaming.

There are also times when you manage to get out there for a few hours like the following:

On Wednesday, I got a chance to sneak away for a while. I got up at 5 a.m. and went below the DuBay dam. There was quite a bit of fog and it was still rather dark but I managed. The fish were biting, but without any consistency. Before I had to leave at 9:30 I had managed to put five walleyes into my creel which were about two pounds each (nice eating fish). I had also put at least that many fish back.

still enjoyed my effort and the scenery around me.

My outdoor entertainment Sunday was of the "other" sport. I finally made it out with my bow again. Some of you might remember that I am just starting out in this sport. When I got out of my truck, I started something I hadn't really done before but have read a lot about. I tried stillhunting. One of the things I have read in every article about stillhunting is that SLOW is the key. In the first two hours I covered about a half mile. I didn't see any deer but I did see a couple of scrapes and lots of sign. In the next two hours I covered more area and this time I saw a tail flashing about 70 yards ahead. Maybe if I had been going slower, I would have been able to get close enough for a shot.

On Saturday, I attempted to recreate my earlier success but didn't do quite so early. I also did not do as well. The fishing had slowed down and I took only two fish home. The slowdown might have been due to the cooler weather, the time of day, or maybe just a shift in my luck. Whatever it was, I

On the way home I saw several deer in the fields and I got some pictures but it was too late to take any shots with my bow.

For those of you who have read this far, I hope you found something useful in this and good luck with your daydreaming.

United Council, from p. 4

them know how students feel about a particular issue. Because the United Council is charged with the duty to represent the students, they feel it is important that they voice their opinions to the Regents on how much money the University System needs, how they will use that money, and whether that money will come from the state or the students' pockets.

They also feel that the Regents should be made aware of the other costs that students are going to encounter, for without improving the quality of the system at all, tuition will still increase approximately \$180 next year due to costs such as faculty catch-up, inflation and the elimination of reserve offset.

"It's important to understand that when you're talking about such a substantial change in the structure of the university, in the way that it's funded, a change from the traditional ways that Wisconsin students have been able to finance their education, then you're talking about something that I think students should be involved with," stated Tolefree.

Microscope, from p. 4

I have done hormone treatments which delay and reverse aging in leaves for a limited time. We can literally double the life of a leaf," reported Harris.

An example that Harris gave for a use of this is that hormones could be spread on a crop of peanuts, thus extending the life of the crop for six days. While this would not give a greater yield, it would give greater quality to the peanuts, making them worth more.

The electron microscope can run from \$100,000 to \$160,000. It has many uses in the school, and the quality of education is greatly enhanced by its presence.

## WSUC Football Roundup

# Defense lifts Pointers to 15-10 win

A dominating UW-Stevens Point defense rose to the occasion and in the process kept alive its bid for the WSUC title here at Goerke Field Saturday.

The Pointers (5-1, 6-3) defeated UW-Platteville, 15-10, to remain tied with UW-La Crosse and a game behind defending conference champion UW-River

Mentzel, causing a fumble that teammate Steve Day recovered at Platteville's 34. Drake kept came on to make a 32-yard field goal with 9:18 to play, giving the Pointers a 15-10 lead.

The Pioneers had one more chance to steal the victory. A 39-yard pass from Mentzel to Scherkenbach brought the ball to the Pointer 29 with 7:30 remaining. But Finco sacked Mentzel for a nine-yard loss, and Brent Harder intercepted on the following play to kill the drive.

Although the Pointers out-gained Platteville 280 yards to

179, they managed just 70 yards on the ground in 38 carries. Mike Christman rushed for only 42 yards in 17 carries while Steavpack and fullback Kevin Knuese each grabbed five passes. Baumgartner finished with 15 completions in 30 throws for 189 yards but threw three interceptions.

The Pointers travel to Eau Claire this Saturday for another important conference test.

In other games, UW-River Falls (6-0, 7-1) maintained their one-game lead with an impressive 45-0 slaughtering of UW-Superior; UW-La Crosse remained

alive with a convincing 31-6 victory over UW-Oshkosh; and UW-Whitewater (3-2-1, 5-3-1) eclipsed UW-Eau Claire 29-15.

At River Falls, Mark Cota threw a pair of touchdown passes and ran for another to carry the Falcons to an easy win over outmanned Superior (0-7, 0-9).

Greg Corning picked up 96 yards on 12 carries, including a 53-yard touchdown run as the Falcon wishbone offense gained 399 yards.

At Oshkosh (1-5, 3-5), Indian running back Ted Pretasky

snapped the La Crosse single-season rushing record with a 127-yard effort to lift the Indians 31-6 over the Titans. Pretasky, who carried 22 times in the game, now totals 1,147 yards this season.

Mark Matzke's 11-yard run accounted for Oshkosh's only score of the game.

At Eau Claire (3-3, 4-4), quarterback Lance Liepold tossed three touchdown passes in the Warhawks' 29-15 victory. Whitewater led by just one point, 13-12, entering the fourth quarter,

cont. p. 21

Kent Walstrom  
Sports Editor

Falls. The Pointers face the Falcons in their final regular season game Nov. 15 at River Falls.

Although the Pointer offense was largely responsible for keeping UWSP within striking distance after a slow early-season start, the Pointer defense has since established itself as a reliable force while helping to extend its current win streak to six games.

"Our defense rose to the next level of play," said Pointer Coach D. J. LeRoy. "We turned the ball over six times, but our defense came out ready to play each time."

The Pointer defense, which limited Platteville (2-5, 4-5) to just five yards rushing, used sterling performances from defensive end Craig Ewald, whose tackle in the end zone for a safety gave UWSP a 12-10 edge in the third quarter, and defensive back Tom Finco, who registered five of the Pointers' six sacks.

In addition, UWSP's defense held the Pioneers to 179 yards of total offense, including just 49 in the second half, and only 10 first downs.

The Pointers scored first on their opening drive by moving 52 yards in 10 plays. Quarterback Kirk Baumgartner found split end Dave Steavpack with a 14-yard scoring pass at the 3:50 mark. Kim Drake added the extra point to make it 7-0.

The Pioneers got on the board with a 27-yard field goal with 9:00 left in the second quarter, then took the lead on a 36-yard scoring toss from quarterback Jerry Mentzel to end Jamie Scherkenbach with 1:30 remaining in the half to gain a 10-7 lead.

But the Pointers, starting from their own 21, saw Baumgartner complete five passes to get within range for Drake's successful 30-yard field goal try as the first half expired.

A defense-minded third quarter was capped by Ewald's safety for UWSP's go-ahead points after a Pioneer interception at their own four-yard line.

Then, with a slim 12-10 lead, the Pointers got another big play from its defense when strong safety Tom Finco sacked

Photo by Paul Becker

UW-Stevens Point's running attack was stifled but the Pointer defense came away with some big plays and the win at home Saturday.

# Wheeler leads Gold to victory

by UWSP Sports  
Information Office

**STEVENS POINT**—Freshman wing Shawn Wheeler rifled in four goals to lead the Gold squad to a 6-4 win in the annual Purple-Gold game Saturday at Willett Arena.

Wheeler got things going quickly by firing home his first goal at the game's 1:06 mark. Sophomore defenseman Tim Coghlin scored on a feed from Mike O'Sheridan only 18 seconds later and the pace of the game rarely slowed down from that point on.

"I was very pleased with the intensity of the game," said Pointer coach Mark Mazzolei.

"It's tough to go out and hit your own teammates but they never let up."

Wheeler added another goal

before the period was out and Craig Hedstrom connected for the first of his two goals for the Purple team with 1:15 left in the period to make it 3-1.

Wheeler completed his hat trick at 6:31 of the second period on assists from Rick Dodd and Tim Coghlin, but Joe Butcher closed the gap to two goals less than two minutes after linemate Ralph Barahona had gotten him the puck off of a faceoff.

The game winning goal came at 9:14 of the final period when Wheeler drilled home a loose puck in front of the net.

Hedstrom scored his second goal with just over six minutes remaining in the game and Pete Supple made it 5-4 with a goal at 17:13 of the final period before Rick Dodd finished the scoring with an empty net goal while the Purple team was kill-

ing a penalty.

"We did a lot of things very well offensively," said Mazzolei. "We need to concentrate on our defensive game, however.

Our defensive system broke down. With the teams in our conference we won't be in a lot

cont. p. 21

## Intramural Corner

Reminder to anyone interested in the three-person basketball tournament - Entry deadlines are due TODAY. Play begins Nov. 10.

### RESULTS

Congratulations to Sheila Ricklefs and Joann Kulhanek, winners of the women's doubles racquetball tournament. Winners of the men's doubles racquetball tourney were Jeff Tunnil and Kevin Kuhn. Nice job!

The championship for Co-Ed Beach Volleyball was decided Thursday afternoon. The Sky

Jammers defeated the Beach Bummers, 6-15, 15-1, 16-14. The Intramural staff would like to thank all teams who participated in Beach Volleyball. It was a great success!

Also, congratulations to 2-West Smith, who won the On-Campus Football Championship, 12-6, over 2-South Thomson. Schmegma P1 won the Off-Campus Championship by defeating The Point After, 22-6. In the battle between the two champs, Schmegma P1 beat 2-West Smith, 27-0. Nice job to all the teams who participated!

# Face Superior Saturday at Willett Arena

## Mazzoleni bidding for successful season

by UWSP Sports  
Information Office

**STEVENS POINT** - Although he considers this a rebuilding year, many people believe that UW-Stevens Point hockey coach Mark Mazzoleni has overhauled the team and is ready to make a move in the NCAA III ranks.

In one season Mazzoleni turned a 4-20 hockey team into a 12-12 team while adding a Wisconsin State University Conference crown and the NAIA District 14 title.

The Pointers return 14 lettermen from last year's squad and will see a solid group of 15 freshmen join the program. This, Mazzoleni feels, will give his squad some of the depth that was lacking last season.

"Some of our players struggled at times last season," Mazzoleni said. "They would need a night off but I couldn't give it to them. This season I will be able to do that. In this sport you will always get your share of injuries, but with as many kids as we have, we'll be able to give people a night off without any letdown."

Mazzoleni sees the depth of his squad as his biggest asset, yet he realizes that it will take some time to blend the team together as 25 of his 29 players are either freshmen or sophomores.

"I'm going to go with six forward lines, eight defensemen and three goalies. I'm not afraid to use any of them because they're so even, talented."

"Our weakness may be our inexperience," he added. "We have a very young team but they are very enthusiastic and hungry and I think that will make up for some of our inexperience."

The recruiting season this past summer was successful for the Pointers. The 15 freshmen coming in are as good as any at the Division III level, according to Mazzoleni.

"I am very pleased with the players we got," he said. "The key to our recruiting, I feel, was that they knew they would get to play right away. If we are to have a successful season these men will have to make an immediate contribution."

The returning class for this

year's squad is also a very solid one. Goalie John Basill and defenseman Tim Coghlin were both named to the WSUC first-team a year ago. Basill recorded 12 wins and a 3.44 goals against average. Coghlin registered 19 points on six goals and

Mark Mazzoleni

13 assists to lead the Pointers' defensive corps. Winger Tim Comeau returns off of a 30 point season which saw him named to the WSUC team as an honorable mention selection. Sophomore centerman Rick Fleming also returns from a solid year which saw him rack up 26 points in 22 games and, according to Mazzoleni, was one of the main reasons for the success of last year's team.

Along with Basill, Comeau, Coghlin, Fleming and McPartlin, Mazzoleni sees several of his freshmen recruits playing big roles in the upcoming season.

## Spikers nailed at Macalester

by Scott Huelskamp  
Staff Reporter

Minnesota is one state the Stevens Point women's volleyball team would like to stay away from for awhile.

Point's spikers were winless in last weekend's Macalester College Invitational in Minnesota.

Stevens Point, the only out-of-state team at the tournament, was defeated by St. Benedict,

Center Ralph Barahona, a California native who played his junior hockey for the Rochester Mustangs, is one of Mazzoleni's top recruits.

Another centerman recruited by Mazzoleni is Rick Dodd, who spent time in the junior league at Sioux City, Iowa.

Mazzoleni has a trio of fine wingers in Joe Butcher, John Engstrom and Shawn Wheeler.

On defense, Mazzoleni sees Mike Hess as one of his top newcomers on the blue line.

"Mike Hess has the potential to become a top collegiate defenseman. He does everything well and he's very strong."

The Pointers will need solid efforts from every player this season if they expect to compete in the Northern Collegiate Hockey Association. Mazzoleni feels the conference is the premier one at the Division III level.

The Pointers second-year mentor feels his team will respond well to the challenge they face in their new conference, as well as their non-conference schedule which includes Division I school Notre Dame.

"The schedule was another good selling point for recruiting," Mazzoleni said. "The men don't want to play teams that they know they can beat badly. One of our goals this season is to make it into the NCHA playoffs. If we can make it that far I think we will have had a successful season."

13-15, 16-18; Gustavus Adolphus, 4-15, 8-15; Macalester, 15-4, 14-16, 13-15; and Bethel College, 17-15, 6-15, 7-15.

Renee Bourget led the Pointer spikers with 31 kills for the weekend. Sheri Scheu added 25 kills. Anne Court completed 97 percent of her serves and had seven aces.

The Pointers, whose record dropped to 23-23, will enter this weekend's conference tournament at Platteville as heavy underdogs.

As far as rebuilding the team, Mazzoleni feels he is on the schedule which he set upon after taking the job in May of 1985.

"I really didn't know what to expect when I first came here, but now I do. I felt that we would need two solid recruiting classes, which we have, and now we have to develop these players while continuing to recruit hard."

Mazzoleni said that he feels another key to the team's success this season will be the addition of coach Joe Baldarotta who led the Madison West Regents to a state title in 1983

and the runner-up spot last season.

When asked if he had any predictions for this year's team, Mazzoleni said, "No team will outwork us. Anyone who plays us will know they've been in a hockey game."

His biggest joy, he said, will be watching his players go through training camp.

"I have no idea of what my lines will be this year," said Mazzoleni. "The players look to be very interchangeable. It'll be fun to watch them and match them on lines. The kids are very enthusiastic about the upcoming season. It's going to be a very competitive camp."

## Harriers tamed at conference meet

by Kent Walstrom  
Sports Editor

Coach Len Hill's women's cross country team finished fourth at the WWIAC conference meet held in Eau Claire last weekend.

UW-Oshkosh, which fell to the Pointers in a dual meet last week in Stevens Point, won the team title by edging runner-up UW-La Crosse.

Host Eau Claire wound up third, followed by UWSP, UW-Whitewater, UW-River Falls, UW-Stout, and UW-Superior.

La Crosse's Sheri Winter finished atop the field of runners while registering a time of 18:04. Brenda Bergum took second in 18:34, and Oshkosh's Tiffany Fox claimed third (18:36).

Stevens Point's top entry came from 16th place finisher Jenny Schoch (19:19). Teammates Amy Cyr (19:25), Kris

Helein (19:26), Maureen Seidl (20:10) and Cheryl Cynor (20:24) also made significant contributions for UWSP.

"I was real pleased with the performance of this young team," said Hill, whose team travels to Rock Island, Illinois, for the NCAA Midwest Regional Meet Nov. 17. "They went out hard and were able to hold on for a strong finish."

"Jenny (Schoch) moved up to be our number one runner in this meet," Hill added. "She has been a consistent runner all season and is getting faster and stronger each week. She did a super job as a freshman in her first collegiate conference meet."

Saturday's meet at Eau Claire also served as the NAIA District 14 Meet. Pointers Jenny Schoch, Amy Cyr, and Kris Helein, in virtue of their performances, earned NAIA District 14 Honorable Mention status.

## FOOTBALL

Make the Sport Plate part of your weekend game plan.

Have we got a great season in store for you! Catch all the sports action this fall on our giant screen TV. Sunday afternoon and Monday night football: We're ready for some serious spectator sports at the Sport Plate, with plenty of popcorn, pretzels and Coney Island hot dogs. # Point ruggers end season with losing skid

by Scott Huelskamp  
Staff Reporter

What began as a bright season for the Stevens Point Rugby Club ended in disaster.

Two weekends ago the Point ruggers had to beat UW-La Crosse to earn a berth in the state championship match against UW-Madison. Instead, Point lost Saturday's game to conference foe UW-Stout, 11-10, in addition to losing on Sunday to UW-La Crosse, 16-8.

Playing for third place in the conference, Point dropped their fourth game in a row last weekend to UW-Platteville, 24-0. The Point ruggers finished their fall season with a 4-5 record after winning four of their first five games.

Platteville held a slim 4-0 halftime lead. Point kicked to Platteville to open the second period and one minute later Platteville scored their second try. Platteville then tallied 16 additional points as the Point offense was riddled with mistakes and could not get the ball in the try zone.

"Platteville got the quick score in the second half and after that the domino effect took over on our team. We just fell apart," said Coach Dave Plaisance. "The game was frustrating. Every time our backs had a scoring opportunity set up, we would drop a pass or make some other mistake.

"Some of the guys had exams during the week and did not attend practice. We did not have the unity we had earlier in the year because our guys were practicing with a different group of guys that played in the game."

The Point ruggers were without starting backs Joe (Papa) Papp, due to a motorcycle accident, and Dean Rummel.

Rummel scored three tries in one game last weekend for the select side team playing in a tournament in Louisiana. Point did not play last weekend. The select side team is an all-star team comprised of the best rugby players in Wisconsin.

"Earlier in the season, partic-

ularly against Eau Claire (a 47-0 win), we were playing great and everything was working well for us. I think we peaked too early," said Plaisance.

"People just were not giving their all the last couple of weeks. We are going to try and strengthen our weak spots before Arctic Fest," Plaisance

added. Arctic Fest, a winter rugby tournament, will be held the weekend of February 6, 7 and 8 at Stevens Point.

## Cross-country team second

by Wade Turner  
UWSP Sports Office

The UWSP men's cross-country team ran to a solid runner-up showing at the WSUC conference meet this past Saturday at Eau Claire with 71 points.

UW-La Crosse continued their regional dominance as they took the team title with 36 points.

Following Stevens Point were Eau Claire (81); Oshkosh (98); Stout (130); Whitewater (144); River Falls (209); Platteville (223) and Superior (294).

Running in 30-degree weather on a primarily frozen five-mile course, senior standout Arnie Schraeder outdistanced the field while setting a course and district conference record clocking of 24:29. Teammate Tom Moris ran to a strong third place showing with a time of 25:13.

"I'm very happy with the way we ran," said head coach Rick Witt. "Going into the meet our goal was simply to run to our abilities and then see what would happen. We beat two teams (Oshkosh and Eau Claire) who were ranked in the top 10 in the country, so I can't be disappointed.

"We had two men (Schraeder and Moris) up front just as we needed," Witt continued. "Arnie left little doubt that he wanted to prove who was the individual champ as he went through the first mile in 4:35 and then just pulled away. He dominated the race from that point on.

"Tom's third place showing was excellent," Witt added.

The next five Point finishers, bunched within 35 seconds of each other, included Andy Sackmann, 17th (26:15); Mike Butscher, 24th (26:30); Mike Nelson, 26th (26:42); Tim Olson, 27th (26:43) and Jon Elmore, 30th (26:50).

"Andy also had a good race to crack the top 20 and make all-conference," said Witt. "Mike (Nelson) was a little disappointed in his race, but he did not lose his composure and helped us get our pack together. The other three guys (Butscher, Olson and Elmore), all ran their best races of the year and gave us a great pack."

Witt now has the responsibility to get his squad ready for the NCAA Division III Regionals at Rock Island, IL, on November 15. "I am very proud of this team and now we will concentrate on trying to run well at regionals to qualify for the NCAA Nationals in New York," said Witt.

### Football, cont.

but exploded for two touchdowns and a field goal to win easily.

Liebold, who entered the game as the WSUC's leading passer, completed 14 of 23 passes for 233 yards. He had 9-7 games this season. They'll be more like 3-2."

The Pointers start regular season play Friday when they host the UW-Superior Yellowjackets in a weekend series.

### Hockey, cont.

# POINTER PROGRAM

UAB, the masters of entertainment, bring this Friday and Saturday, a Woody Allen Film Festival. First, on Fri., it's Banana's, and then, on Sat., it's Everything You Wanted To Know About Sex But Were Afraid To Ask. Showtimes are 7 and 9:15 p.m. Only 1.75 with ID.

This weeks RHA video is MASK, starring Cher in a poignant movie about a mother and her son. Showing in Amigo's Tues. The Depot Rm. Wed., and Jeremiah's Thurs., at 7 p.m. Free

The University Film Society presents Igmarr Bergman's Oscar winning Virgin Spring, a "quietly chilling morality play, set in the Swedish countryside of the 14th century," about a young girl cursed by her sister. In the UC-PBR at 7 & 9:15 p.m. Nov. 11 & 13.

**Basketball-** The Pointers play Yugoslavia's Bosnia team at 7 p.m. in Quandt this Sat. Nov. 8.

**Ice Hockey-** The Pointers take on Superior at 7:30 p.m. Friday, Nov. 7, in the Willet Arena. Admission only \$1.

The Mid-Americans, vocal jazz ensemble, will perform at 8 p.m. Thursday, Nov. 6, in Michelson Hall. Free. The Mid-Americans will sing several Manhattan Transfer numbers along with songs by Rogers and Hart, Mel Torme and Joni Mitchell.

The French Club presents The Psaltry, this Sat., Nov. 8 at 8 p.m. in the PBR-UC. The Psaltry, a jazz, classical, folk duet, have performed in the US, Canada, France, and Italy.

This weeks TGIF presents PARIS from 3-5 p.m. in the UC Encore and Free. Brought to you by UAB.

Thursday night (that's tonight) Campus Activities brings here to Point a "Leave It To Beaver" 50's dance in the UC-Encore. The whacky fun begins at 9 p.m. and runs until the wee hour of 11:30. Be there or be an Eddie Haskell.

UAB Leisure Time brings a Ballroom Dancing Mini-Course for all of you who want to dance like your grandparents but can't. Instruction begins at 7 p.m. Tues., the 11th in the Wisconsin Room of the UC.

## And now, a word from the management

The Pointer offers free advertising for campus sponsored events. However, to best advertise we must know more than just the name, date, and location of the event (which is all we get in the campus Activities calendar).

To spice things up, additional details are helpful— such as what the event is, who's in it, how much it costs, and anything else interesting.

Please send event information to the Pointer office, Rm. 118, or call Bernie at x2249.
