## Vandalism Hits Home in Ward One

by Karen Rivedal  
News Editor

So what's all the fuss about? Is Stevens Point being vandalized and if so, just what are the vandals doing? Community members of the newly created Neighborhood Watch Program in Ward One think they know.

For them, particularly those residents whose homes border the busy pathway between the Square and student housing, vandalism is a familiar irritation. It is a personal matter, a matter of broken fences, snapped trees and spilled garbage. And it doesn't seem like a very big deal—until you talk to the residents.

"Take the tree that the city planted and three days later got snapped off," says one resident spokesman listing examples of destruction to their homes. "And the fence that a neighbor hasn't even bothered putting back up because it got ripped down last fall.

"Manhole covers that are borrowed and gone. Not just taken off—disappeared."

Another homeowner continues, "How about loosening a child's swing set so that it's unsafe? It happens a lot. There's lights broken in front of the Hi-Rise (Manor). Prior to that, two flags stolen, right off the flagpole."

One resident's report of damage done to his fence shows how serious the crimes can become: "About three years ago, I woke up one morning and found a nice, neat pile of boards right next to the fence by the driveway. Usually, they're in the middle of the street or in my or my neighbor's yard.

"I read the paper that night. Three houses down, somebody threw one through a window at 2 a.m."

Incidents like these, which have increased in recent years and continued longer than usual this year, are creating a tense atmosphere in the residential area. Some residents blame students for all of the delinquent behavior and generalize all university students into the same lawless category.

And it's not clear where the residents will stop to curb this problem. In the words of one Watch spokesman, "I try to keep a cool head, but there's a few people who've had their cars walked over and their tires slashed, who'd just as soon come out with baseball bats."

This same resident tells of personally chasing and tackling trespassers in his yard on at least two occasions when police had not yet responded to a call.

Residents have clear ideas about the cause of their problems and how it should be solved. "The problem is the immature behavior of college

students. They can't handle their liquor and they have no respect, not for themselves or for other people.

"The responsibility for control belongs back on the campus. The university has to stop being so interested in just making money."

Residents believe closer monitoring of dorm room drinking and stricter admission standards are two possible university actions, along with quicker expulsion of disorderly students.

Eighth Ward Alderman and Chairman of the Public Protection Committee Scott Schulz is not happy with the area prob-

lems—not surprised, but not happy.

"Three-quarters of the arrests are college students, but that's only to be expected when three-quarters of the people in this town between 18-22 are college students," Schulz said. "I don't like the phone calls from businessmen whose store windows get knocked out, and I don't like phone calls from people in the neighborhood who tell me their fence just got torn down. It shouldn't have to be. About the only way we can handle it is the way we're doing

## SGA loans \$1500 for new student newspaper

by Dan Dietrich  
Editor

SGA senators voted unanimously last Thursday to loan UWSP Today, the new campus newspaper, \$1,500 in start-up money. The loan, at zero percent interest with no repayment schedule, is uncommon, an SGA senator requesting anonymity said. "A loan like this is highly discouraged; in fact, it's almost a rule, but it is legal," the source said.

From available information, this is the first time that the Student Government Association has loaned money to a second newspaper.

The loan was approved because of the strength of the new organization's constitution, and because of the market research presented by UWSP Today Editor Gene Cisewski, the source said. Concern was voiced by the senator about the research presented, because "usually, people use the Marketing Club on campus, or someone else's study to justify an organization's economic feasibility. In this case, (Cisewski) did his

own research."

SGA President Lisa Thiel said that the loan request from the Lampoon Lunch Bunch, the organization that publishes UWSP Today, put Student Government in an awkward position. "If we didn't recognize the organization, we would have been skating on thin ice" because of the organization's strong constitution, she said.

New organizations cannot be an exact duplicate of another organization, Thiel said. "We were under the understanding that UWSP Today will focus on campus news, and be more feature orientated (than the Pointer)."

The new paper plans to focus on services that are not offered in the Pointer, including a personal ad section for people to meet people, an advice column by a student writer who will not be identified and an "SGA Corner."

Thiel said that UWSP Today approached SGA about writing a column for their paper. (The Pointer does not run an "SGA Corner.")

According to a University News Service release, the estab-

lishment of the new paper "comes in the wake of a rift that surfaced during the fall semester between members of the Student Government Association and the school's 92-year-old official student paper, the Pointer."

Cisewski, who worked for the Pointer for approximately four weeks last semester as a photographer's assistant and reporter, said that UWSP Today was not born "because someone had an ax to grind." However, he acknowledged there have been "problems in the past" between the Pointer staff and members of SGA.

Thiel said that SGA has given the new paper a loan is not in response to disenchantment with the Pointer, but added that she is not pleased with the cov-

Photo by Paul Becker

"It was an error."

That's how Records and Registration staffers explained numerous student grade reports that littered the Student Services Building parking lot Monday morning. A box containing the old reports ripped open when tossed out.

## Intruder fires weapon in Neale Hall

by Karen Rivedal  
News Editor

An ex-resident of Neale Hall stopped back for a visit early this past Sunday morning and he brought a 12-gauge shotgun with him. Stevens Point police were called to the scene and apprehended the 21-year-old Stevens Point man at 2:40 a.m.

Sgt. Dennis L. Koehler was struck but not injured by flying floor-tile debris when the man allegedly fired one shot towards the police officers who followed him into a third floor stairwell. Police then talked the man into surrendering.

He was charged with reckless

use of a firearm in a public building. Michael J. Beres of 1932 College Ave. later reported that the shotgun used by the suspect was removed from his residence without permission on Saturday.

According to Neale residents who know the suspect, the man's actions may have been jealousy related. The suspect's ex-girlfriend resides in Neale Hall and it was to her room on the third floor that he went first. The girl was not home, but he waited there and damaged some personal property before making his way to the stairwell where police apprehended him.

# EDITOR'S DESK

## Graveyards 101

A fly walks into the mouth of the African boy on t.v. His mother holds him, and waves the walking fly out. Another walks in. But the stomachached boy doesn't seem to mind. He looks at the sky.

His father, in the background, doesn't seem to mind the fly, doesn't look at the sky. He looks at me.

"This mother has had three stillborn babies, and four children die before the age of two," an attractive American woman says, kneeling next to the boy and placing her hand baptismally on his head. "Won't you help?"

I sit comfortably on the couch, almost unemotional, and do not help. I look back at the father, and watch flies walk around the boy's eyes. It's a sorry testimony of myself, and a sorry testimony of our society. We elate ourselves with the \$25 million *Stars and Stripes*, with good-tasting cheese, and a computer in every office. And yet people die from starvation. And yet we watch.

Watching starving people and dead people on television has become common, to the point where death no longer has impact. It seems that we've built up so much acceptance to the fact that people will always die. We further lighten the impact by explaining it away as "God's Will," or pushing it aside so we can hurry on, always going somewhere but never quite there. It's an easy out to say, "Grandpa's not dead Jimmy, he's in heaven, with God. Just like when a tree loses its leaves in the winter, there's always spring." Right. Watch a tree once it dies Jimmy. How many leaves do you see?

Meanwhile, at college, we invest money and time developing (marketable) skills and memorizing facts. We take the classes that people who "know" require us to take. We have choices inside those requirements, but the intention is that we will be "better."

The argument, I believe, for these requirements is based on the assumption, or the hope, that we will put the information or skills to work - someday. That we will either use the information to understand "why," or use the skills to balance our checkbooks, talk about the War of 1812 with our spouse, or play badminton at a family reunion - important stuff like that.

These requirements are based on chance, on the

possibility that it might happen.

But there is only one thing that absolutely will happen: you will die. I will die. And yet, there seems to be little invested in understanding that.

So a proposal: a class where people walk on dead people, lay on dead people's graves, and watch flies walk in boy's eyes. I'm not talking about the stuff that makes people say "Ohh, yesss," like *How to cope with the death of a loved one*, or *What to do if your parents just died*. That's important, but not very significant to the majority of people, now.

Instead, the class could be called "Graveyards 101," offered as pass/fail only, with no tests. Just a relaxed attempt to examine death. At least we might better understand that dead people have no more choices. Because surely more can be learned from dead people than "smoking causes cancer," "eat bran fiber" and "eggs are high in cholesterol."

## Graduation horror stories: be prepared

by **Bernie Bleske**  
Senior Editor

Close to graduation there are always several horror stories floating around, stories of lost minors, GPA's suddenly too low, disastrous form letters arriving - stories about the ultimate terror: finding suddenly, after four or five or six years of school, that graduation is not possible.

And the stories usually end up blaming the adviser. The adviser said the credits would transfer from Parkside and they didn't. The adviser said the GPA was high enough and it wasn't. The adviser suggested classes that were unnecessary,

or even wrong.

There is, of course, more to the stories. More often than not, at least part of the blame belongs to the unhappy students themselves (which is not what most of us want to hear, but realistic). Most advisers have over fifty advisees (though not all), and some profs, like those in education, may have over a hundred. That's an impressive number when they are expected to give each student a chance at twenty minutes of help before registration. And of course a majority of the students wait until the last possible moment to have their schedules worked out, as well as coming unprepared.

Unprepared. That is a word which lurks on both sides. Students come for help, unsure of what they need, what they have or what they want. At the same time, advisers may be unsure of what students need - particularly concerning general degree requirements.

GDR's, however, are run, about a year before graduation, through Records and Registration, which makes a cursory check of what GDR's are still needed and sends a brief note to the student. It is necessary as well to make an appointment at least a year before graduation to check GDR status. (If you're scheduled to graduate in '88, go now.)

Gradepoints, however, are often not confirmed until several weeks before graduation, and then it is the individual department (i.e., biology, history, etc.) which sends a note to Records. Records then sends a form letter to the student informing him or her of the unfor-

fortunate situation. In this case both the adviser and the student are at fault. The adviser should know the student's GPA as well as what is required in the department, as should the student. (Overall GPA's are, of course, listed on the standard computer letter sent out at the end of each semester, along with probation status, etc., so any fault there is either a computer glitch, easily corrected by going straight to Records (do not pass go), or student ignorance.) A potential problem is the fact that each department handles its own advising, often differently. The College of Natural Resources, for example, has peer advising for Freshmen and first semester Sophomores. This system makes sense since all Freshmen and Sophomores must take the same classes. But in English peer advising would not be as good an idea since classes that are required can vary or be moved around.

But peer advising can take

the load off many professors, which advisers in other departments may find unjust, especially since no professor is compensated, either with money or a reduced workload, for advising. Smaller departments can also have very light adviser workloads.

The departmental break is somewhat alleviated in regard to GDR's and other across-the-board requirements. Liasons have been set up between the main office and departments to work out changes and potential problems.

One very serious problem concerns credits taken and financial aid. For some federal grants a fluctuating minimum credit load/GPA is required. Dropping classes may cut off financial aid without the student or adviser being aware. Thus, advisers must also be concerned with financial aid and

cont. page 5

## UWSP charged with lax admission standards

by **Karen Kneissler**  
Staff Writer

With overcrowding, tuition raises, and financial aid to students decreasing, it would seem ridiculous to admit students into universities without meeting the admittance enrollment policies.

Auditor Dale Cattanach, however, claims that five UW schools are doing just that. In a recent report, he determined that 20 percent of incoming freshmen at these schools did not meet the proper high school graduation rank standards.

acceptable grades and strong ACT results.

Ninety-one point four of new freshmen ranked at or above the 30 percentile, successfully meeting current admission requirements.

Six point four percent of the incoming class ranked in the 20-29th percentile. These students were admitted because of acceptable ACT scores. Minority students make up half of this grouping.

A final 2.18 percent rank below the 20th percentile and were admitted only after earning an ACT composite score of 17 and

**"20 percent of incoming freshman did not meet the proper standards..."**

UW-Stevens Point was one of them. The remaining four universities were Eau Claire, Green Bay, River Falls and Stout.

Chancellor Marshall has disputed this charge in Stevens Point's defense. He maintains there is more than one requirement considered when admitting students into college. The report considered the high school class rank only.

To prove that Stevens Point does not admit ineligible students, Jack Larson, Director of Admissions, did an analysis of the new freshman students admitted to UW-Stevens Point for the 1986 fall semester.

There were 2,794 freshmen admitted. Of those 2,794, 94 did not have any high school class ranks reported. Many of these students did not report high school ranks because they were admitted as Adult Specials, having delayed college several years for personal or military purposes. Others had G.E.D.'s or were students who had

enrolling in a summer session.

Finally, the analysis reported that only 30 students were admitted without meeting any of the requirements. In these cases, the 30 were admitted to a Student Life experiment entitled the Skill Development Program.

However, the admission requirements have changed for next fall's incoming freshmen. Changes include:

A) Students must be in the top half of their high school graduating class, instead of being in the top 75 percent.

B) If not in the top half, the students must have an ACT score of 21 or above.

C) If the above two requirements aren't met the person can be admitted provided the sum of his/her high school rank and his ACT score is at least 55. This figure of 55 can change yearly.

According to Chancellor Marshall, the information in the report was very incorrect. He describes the report as "unfortunate and highly negative to the whole UW System."

## Chemists take show on the road

by **Pat Meshak**  
Staff Writer

Three members of the UWSP staff have devised a program to spark serious interest in chemistry in the nation's schools.

Professors C. Marvin Lang and Donald L. Showalter and staff specialist Gary Shulfer have been giving demonstrations around the country in order to take away the fear and mystery of chemistry.

These three men have shown their program "Yes, Virginia, Chemistry Can Be Fun" using attention-grabbing demonstrations like crushing a can with atmospheric pressure and driving a nail with a banana.

Showalter and Lang began by going to grade schools and high schools on outreach programs. By 1981 they were doing a significant amount of these programs and in 1985 were invited to Chicago for the "Sunday with Science" program sponsored by the American Chemistry Society.

In November of 1986 they went to Cincinnati to participate in a program that would help develop various informative and interesting programs for the U.S.

The professors were joined by Gary Shulfer in 1985. They have also been supported by the chemistry department member who fills in for them when they are away.

The goal of the demonstrations is to show members of their audience that chemistry can be a pathway to challenging and influential careers in science.

Photo by Chem. Dept.

Professor Lang passes egg through neck of bottle in a demonstration from "Yes Virginia chemistry can be fun."

Lang feels a shortage of chemistry teachers is on the horizon. In 1985 only three chemistry majors from the entire UW-System planned to enter the field of secondary education.

One reason for this is that industry offers much more opportunity than education. Showalter and Lang's solution to this is a proposal for education and industry leaders to establish a

program for bonafide chemistry teachers to have access to the lucrative jobs of the private sectors when they're not in the classroom.

The professors believe that this solution will benefit both sides. Although the schools are experiencing shortages now, the professors believe the private sector will feel a similar chemistry crunch in the future.

# Theft Prevention Tips for campus residents

by Debbie Meyer  
Protective Services

The number of thefts of personal and state property has been increasing on the UWSP campus over the past few years. Between September 1, 1986, and December 31, 1986, Protective Services has had 148 reported thefts. The loss of private and state property has been estimated at over \$18,000. Unfortunately, it does not appear that the frequency of theft will decrease this semester or in the next few years.

The sad fact is that in less than 30 seconds, you can become the victim of a theft. In too many situations people make no attempt to protect their property from theft. Most victims are shocked and outraged when their property has been stolen. Most people want to know what steps they can take to attempt to protect their property from theft in the future.

Here are some of the tips that are passed on to them. Please take the time to read them; it could save you from becoming the next UWSP theft victim.

1. Whenever you leave your room, house, apartment or office, lock the door! Victims often state, "But I was only gone for a minute!" That "minute" is the only opportunity needed to commit a crime. It takes less time to lock and unlock a door than it does to file a report and replace property.

2. Keep your personal property with you—never leave it unattended in plain view, or in an area of easy access. Keep

your valuable items in a locked place. Thieves know most possible hiding places.

3. Don't lend room/building keys, or hide a spare house or car key in a convenient spot. That spot is convenient for everyone. Don't leave keys lying in a place where they may be taken and duplicated.

4. Lock your car whenever you're not in it. Keep valuables out of plain view in your car; preferably, lock them in your trunk. Park in a well-lit area. Don't tempt a thief to break into your car; the damage from an attempted theft can be expensive to repair.

5. When using a locker in an athletic facility—lock it!

6. Equipment such as typewriters, personal computers, sound equipment, etc. should be anchored down with appropriate locking devices. Monitor access to your equipment. Make backup copies of all computer software and store in a safe location away from your computer so if your computer is taken, you will not lose all your programs and data.

7. Mark all your books with your name, Social Security number and date of birth in a specific place. Books are easily resold and difficult to identify.

8. If you possess a large amount of money, keep that information to yourself. Don't

carry excessive amounts of cash with you—use the services of a bank.

9. Make a list of the serial and model numbers of your property and record identifying features. Keep this list in a secure place. Engrave items whenever possible with your Social Security number and record the location it is engraved on.

10. Check your own or your family's insurance policy. Be sure your valuables are covered while you are at school. If not, you may wish to obtain coverage.

11. Report all thefts, large or small, to the appropriate agency. (UWSP Protective Services, 346-3456; Stevens Point Police Department, 346-1400.) Before they will honor a claim for the theft of property, most insurance companies require that a theft report be made by the victim. You may also help to stop another theft from occurring by taking the time to file a report.

A local father and son toboggan down an ice run at Iverson Park.

## Crime Watch

Courtesy of Protective Services

At approximately 1 p.m., January 22, 1987, the University's AT&T Telephone System lost its dial tone. At that time, the University campus was without telephone communication. At approximately 4:30 p.m., AT&T personnel located the exact problem within the system equipment. A component within the unit that ties all areas of the campus together had malfunctioned. The parts needed to complete the repairs were transported to Stevens Point from Appleton and installed. The university telephone system became operational again at approximately 6:30 p.m.

At 2:35 a.m., January 24, officers observed a vehicle with right read damage in Lot J. The vehicle, which is owned by a Burroughs resident, stalled and had been parked partially blocking the entrance to Lot J when it was struck by an unknown vehicle. Damage was estimated at over \$500 to the vehicle struck. Evidence at the scene and investigation determined the striking vehicle. SPPD is currently handling the case.

At 10:16 p.m., January 24, Protective Services received a complaint of underage drinkers at Baldwin Hall. Officers responding to the area confronted five underage persons present in a room where alcohol was present and three of the underage persons had consumed an alcoholic beverage. SPPD was notified and cited the three underage drinkers. A referral to the Office of Student Conduct was made. The resident of the room where the incident occurred was warned by SPPD

but not cited as persons involved had provided their own alcoholic beverages.

A white VW Rabbit parked in the area of the Thomson Service Drive was picked up by several students and placed on the lawn area by Thomson Hall at 12:47 a.m., January 25. The subjects then fled the area. No damage was done to the vehicle.

At 2:01 a.m., January 25, a Knutzen resident reported that two drunk and loud males were running around on the second floor of the hall. The individuals had reportedly been in the hall earlier and were engaged in a fight with a resident of the hall. Officers located, identified, and escorted the subjects out of the area. Both subjects were non-students.

At 3:51 p.m., January 25, a CNR student reported the theft of a telephone and an answering machine from 105 CNR. The items were taken between 3:30 p.m., January 23 and 4 p.m., January 25. The area is normally kept locked but has been found unsecured on occasion. The loss is estimated at approximately \$155. At this time there are no investigative leads.

At 4:34 p.m., January 26, a Thomson resident reported that a female non-student had been chased up to a room by three non-student males. The male subjects fled the area prior to an officer's arrival. The officer accompanied the woman to her vehicle, where it was discovered that the right rear tire on the woman's vehicle had been slashed twice. SPPD was notified as the vehicle was parked off-campus and has assumed jurisdiction.

# University Notes

A \$150 prize will be awarded for the winning entry in the 11th annual competition for the Win Rothman Local History Award.

A project on some aspect of Portage County history may be entered by the April 1 deadline.

It is the intent of the competition to encourage interest and research in the history of this area. Anyone is eligible to enter.

Examples of projects being sought are research papers, the ordering and editing of manuscripts or documentary materials with commentary on their historical usefulness, collection and identification of historical artifacts for preservation and display.

The winner will be announced at the annual meeting of the Portage County Historical Society on April 15.

Written materials in the entries should be typed if possible, and cases where projects are being entered, papers of explanation should be provided if the work or collection cannot be sent. The society prefers to keep the manuscripts of winners.

University of Wisconsin - Stevens Point faculty member Susan Casper has been chosen as corresponding secretary of the recently established Midwest College Learning Centers Association.

Casper, currently coordinator of the UWSP Writing Lab activities, will assume many responsibilities as corresponding secretary.

"As secretary I will serve on a conference committee, keep archives, serve on the executive board, keep mailing lists of professional journals and conduct official correspondence," Casper said. Along with these duties, Casper will also organize an annual conference for the exchange of ideas, methods, and expertise in learning assistance programs.

Another UWSP faculty member, Franz Schmitz, was recently elected to a position in a regional professional organization. Schmitz, chairman of the Department of Physics and Astronomy, was chosen as the vice president of the Wisconsin section of the American Association of the Physics Teachers.

### Professor discovers perfect love potion

After 23 years of research, Dr. Rufus T. Valentine, noted romanceologist, has discovered the perfect love potion.

Said Dr. Valentine, "The FTD® Sweet-heart™ Bouquet is a perfect combination of flowers and a heart-shaped potpourri in a ceramic powder jar. Lab studies have shown it to have a powerful, romantic effect on both sender and recipient.

"However," Dr. Valentine warns, "the effect seems to peak around February 14. And you must make sure to go to an FTD Florist. Otherwise," he added, "you may find yourself spending Valentine's Day alone in a most unromantic place—the library."

®Registered trademark FTD.

erage it gives to student organizations.

Cisewski is a 29-year-old freshman communication major from Hurly, who has experience in advertising sales, radio broadcasting and media advertising buying.

He and John Gunderson, Antigo, director of layout, and Pete Duebler, Manitowoc, director of advertising, comprise the executive board.

The three men organized the publication and have recruited students to serve as writers and advertising sales representatives. All of the officers and staff members are serving in

volunteer capacities, without salaries.

Second newspapers are not new to the this campus. From 1968 to 1972, there were three, each short-lived.

Counter Point was published from 1968 to 1970 with a strong

Advising from p.3

credit load as well as grades and requirements.

But probably the biggest problem is time. In too many cases neither the student or the

adviser spend enough time working out what is necessary. Students, if they want to insure that no mistakes are made, must be prepared - at least to the extent of knowing what they want.

about a year as an alternative publication, putting emphasis on local news. From 1971 to 1972, the *Campus Rag* was put out with a similar tone.

A UWSP News Service Release was used in this article.

Advisers must remain involved and informed. If the adviser cannot help the student, either one should go to Academic Advising, Records and Registration, or the Dean of their Department.

## UMDuluth TRAVEL

**FOR A WEEKEND WITH A DIFFERENCE ... DULUTH WITH CLASS April/May 1987**

Discriminating travelers will have the unique opportunity to enjoy specially planned events, mini-lectures and field trips which the casual tourist could not arrange.

**CHINESE PAINTING & WATERCOLOR PAINTING STUDY TOUR June 1 - July 15, 1987**

**NORDIC ECOLOGY June 14-28, 1987**

It is no wonder that the people of Norway, Sweden and Finland are so dedicated to outdoor life all year long. Come and explore fjords, mountain tops, glaciers and archipelagos and visit prominent University Field Stations and museums of natural history.

**SUMMER STUDY IN ENGLAND July 13-August 10, 1987**

Study this summer at the University of Birmingham. Select one of four course offerings, all uniquely appropriate to the English setting. University credit (or noncredit) courses include: Contemporary British Theatre, English Medieval Society: History and Art, Looking at English Architecture, and Love, Manners, and Morals in Victorian England.

**THE ART OF SCANDINAVIA June 16-July 1, 1987**

Tour the museums and studios of the great artists of Sweden, Norway and Denmark. Exquisite art, sophisticated cities, delicious food, beautiful countryside & wonderful shopping will make this the trip of a lifetime!

**ARTHURIAN & LEGENDARY BRITAIN June 13-June 26, 1987**

Ten days of travel & two days at the 2nd Annual Merlin Conference, examining the sites & legend of Britain. Hosted by Geoffrey Ashe, England's Preeminent Arthurian Scholar.

\* The University of Minnesota is an equal opportunity educator and employer. \*

Vandalism  
From p. 1

it." Schulz minimalizes the role that the university can take, by law, to control student actions off-campus. He explained that the university at one time acted as the parent of minors on-campus. They no longer feel they can do that.

"As a result," Schulz added, "there is currently no way for a city official to ask a university official to take action against students who are arrested for property crimes or disorderly conduct."

Nevertheless, the university has responded to community cries for action. Schulz, who is also associate director of Alumni for UWSP, has used his position on the Common Council to help step up police patrol in Ward One. In addition, stiffer penalties may be imposed on convicted student vandals. Community spokesmen have pressed for routine charges of indecent exposure in place of disorderly conduct for public urinations and pushed for criminal rather than civil trespassing charges. These crimes carry heavier fines as well as social stigma.

Schulz continues, "We're trying to work with student organizations to make them aware that there is a problem, that it has the potential of creating a damaging relationship between the community and the campus."

But Schulz warns against an exaggeration of the current problem. He claims that the bad press of a few incidents picked up by national news syndicates could project a false image of UWSP and the community.

Schulz says he is "fairly comfortable that we can control it" with the combined effects of extra policing, vigorous D.A. prosecution, neighborhood pressure and student involvement.

On-campus, student organizations have voiced their opposition to unlawful activity to ensure that the citizens of Stevens Point understand the difference between the average law-abiding student and the vandalizing minority.

SGA President Lisa Thiel reminds Stevens Point citizens that students have no small stake in this town—with revenues of \$20 million funneled directly into the city by student expenditures. In addition, she mentions another possible cause of the downtown problems: "With over 17 taverns in a two-block radius, it's an invitation to trouble."

This issue has been similarly addressed by Scott Schulz. He has expressed concern over the large number of closely spaced bars in the downtown area and has met with tavern owners to enlist their financial support for extra officers in the area. He has been unsuccessful.

"They had the option of participating in paying for the police overtime, and they refused. I was a little disappointed at that, because it could come back to haunt them (referring to future liquor license renewals) if the problem continues."

Next week, this series will conclude with the downtown shop and tavern owners' stake in this problem.

## New Courses Offered

The University of Wisconsin-Stevens Point will offer four non-credit courses during the spring semester on career planning and self-hypnosis.

Each course will meet during evening hours either four, five or six times.

John Zach, a counselor in the Office of Career Services, will lead the career life/work planning workshop: perspectives for a more successful future from 7:15 p.m. to 8:45 p.m. on Feb. 25 and March 4, 11, and 25, Wednesdays, in the Turner Room of the University Center. The lectures will focus on concepts of Richard Bolles, author of "What Color Is Your Para-

chute?" for people considering re-entering the work world, making mid-life career changes and planning for retirement activities. The fee is \$20.

The self-hypnosis course will involve instruction on how to relax, give one's self suggestions, use imagery and self-induce trance. Participants will learn to tailor their trance to specific behavior change. Zach will also teach this course with Jane Jones, assistant director of the National Wellness Institute. Fee: \$45.

Registration is being handled by the Office of Continuing Education and Outreach in Old Main.

## STUDENT INCOME.

A good part-time job that doesn't interfere with class schedules, study time and after-school activities isn't easy to find for most high school students. That's why the nearby Army Reserve makes so much sense.

After completing Basic Training and Advanced Individual Training, you'll serve one weekend a month (usually two 8-hour days, so even Saturday night is free) and earn over \$75 per weekend. You will go on two weeks annual training at full Army pay.

To find out how you can qualify for Army Reserve student income, call:

344-2356

**ARMY RESERVE. BE ALL YOU CAN BE.**

## LETTERS

Letters to the editor must be less than 250 words, typed and signed.

## A concept called freedom of speech

To the Editor:

This is in response to Carl E. Anderson's disturbing letter in last weeks *Pointer*. Mr. Anderson, you state that you "surmise" from the editorials in the *Pointer* that the views expressed must also represent the views of UWSP as a whole. Well Mr. Anderson, since I am part of that whole, I feel that you need to know that you have "surmise(d)" wrongly. Dead wrong, as a matter of fact.

To judge an institution of higher learning by its news publication (and a student-run one at that) is idiocy. It's like judging the city of Milwaukee by the opinions of the editor of the *Journal* or the *Sentinel*.

Bernie Bleske does not instruct class here, he does not run the administrative part of UWSP (although sometimes I think we could use a man like Bernie in these areas), and he is not responsible for anything but contributing to the publication of a damn good campus newspaper and obtaining his undergraduate degree. Why are you judging this institution on his editorial, Mr. Anderson?

What you fail to see, Mr. Anderson, are the things you should be looking for in a col-

lege to send junior to. What about things like student to teacher ratios, admission standards, job placement percentages after graduation, residence life standards? Or have you failed to notice that UWSP is outstanding in these areas? More important that junior doesn't have the influence of people like Bernie Bleske to blemish his Judeo-Christian ideas than to go to a good school, I surmise.

Our university newspaper is ours; it is the students' newspaper. Anyone can write to the *Pointer* and have their opinions published. It is a concept called freedom of speech, Mr. Anderson.

It's really too bad that your son will not have the chance to go to this university, because if he were, he, like everyone else, would have the right and the privilege of speaking his mind in the newspaper. But if you think that is wrong, Mr. Anderson, perhaps we'll all be better off if he goes somewhere else where they can control the students from writing what they feel.

Kimberley Anderson

## Vandalism mars "the prestige and image" of university

To the Editor:

It was good to see the January 29 issue of the *Pointer* address the serious problem of vandalism in the Stevens Point community. I would like to clarify a few things.

Many incidents have occurred lately and they are often related to alcohol consumption. Quite a few of these acts of vandalism occur in the heavily traveled traffic areas running from "the Square" to the UWSP campus and are committed by students. I would like to emphasize the fact brought up by Bob Nicholson, director of Student Conduct, however, that "the majority of UWSP students are not involved in this behavior."

In other words, the prestige and image of our university is marred by the childish acts of an obnoxious few. Unfortunately

negative actions such as these become more apparent to the public than many of the positive achievements that are happening here at UWSP.

Another misconception held by the public is the belief that all the vandalism is being committed by UWSP students. Simply because young people are in the streets late at night in a college town does not automatically qualify them as students. This is simply unfair. There are also townspeople committing acts of vandalism.

The university is taking action on this problem. Campus Security officers are patrolling Ward One (the area between the university and the Square) which is a high-frequency vandalism area. The police patrol this area only when time per-

mits them. Student Government Association has circulated a "peer prevention" sign-up—STUDENTS AGAINST VANDALISM—among campus leaders which has subsequently been presented to the mayor and the City Council. SGA has also met with Scott Schulz, Associate Director of Alumni for UWSP, to discuss further measures that can be taken to combat these problems.

Let it be known that the vast majority of students are angered by senseless acts of vandalism that make life worse for all of us.

Sincerely,  
Jason Tishler  
Speaker of the Senate,  
UWSP Student Government Association

## AS I SEE IT ...

## Out of bounds

## Reagan's incoherent, omni-directional policies

by Robert Gasperic  
Special to the *Pointer*

I had originally envisaged an article concerning the lack of conscience and depth in our modern American culture. This train of thought brought me to the realization that our culture falls, regrettably, between apathy and self-indulgence.

Yes, apathy and self-indulgence, the two blacksmith's sent by American mandate to forge President Reagan's teflon armour. It is painfully clear that the right-wing, regressive Reagan persona could not exist without it.

However, the history books will not be so kind to this cold-war cowboy and his incoherent, omni-directional and all too often contradictory policies. Only within the long range continuity of history will the regressive impact of the Reagan regime on American society be undeniably indefensible.

Our generation's ambiguous acceptance of this socially regressive, conservative era places the blame for their "passing the buck" squarely upon our shoulders. Not only the monetary fiasco of our national debt, which Reagan still

refuses to deal with on an intelligent policy level, but also the results of the gross exploitation of our limited resources, brought about by the corporate coddling by the Reagan administration's economic policies.

The mere existence of the Reagan administration stands as a monument to the ambiguous, self-righteous individualism that has swarmed over this society, creating a jealous fervor for the all-mighty dollar. The apathy and political ignorance of the majority of American citizens has, in Reagan's mind, legitimized his mandate for a conservative realignment in this country. He is, obviously, unaware of the prevailing opinion that he was elected because of his strong television persona along with the help of a colorless opponent in Walter Mondale.

What President Reagan, unfortunately, views as a mandate, I look upon as an excuse for social deprivation in the face of senseless, ever-increasing military expenditures. And, I hasten to mention, the already obvious, inevitable capitalistic exploitation of any resource that can turn that all-encompassing "instant profit."

On Tuesday, January 27th, President Reagan delivered his

**The apathy and political ignorance of the majority of American citizens has, in Reagan's mind, legitimized his mandate for a conservative realignment in this country.**

"State of the Union" address, more aptly titled his "State of Confusion" address. He stood there and expounded the virtues of education, pleading to the American public to realize the decline of our educational system and reaffirming the need to catch up to other countries in the area of higher education. Yet, he has cut almost 30 percent of his already paltry education spendings, in favor of increased military spendings and the support of illegal aggression into Libya, Nicaragua, and (coming soon), Iran.

He has also changed the requirements of financial independence, making one-third of the students on this campus dependent on their parents, even though some have been independent for up to four years.

At the same time, however, that we are watching our grants and loans being cut, we see incredible amounts of money being set aside for college educations if you are willing to serve time in the military. President Reagan, apparently, would like the in-coming college freshmen to have their wills broken and be brainwashed into accepting obedience—an effective way to squelch an institution that should be scrutinizing and, if necessary, criticizing government's role in our society.

As students in a government funded school system, we balance in a precarious position. We are here not only to be taught to know, but also to think. Those of us with an affini-

ty to other individuals, other societies and future generations, feel compelled to express ideas that are, in our beliefs, mandatory to save the world and the human species from itself.

The university is our forum for letting the uninformed, apathetic public know where our generation stands on the problems we are about to inherit. And we must! We will be the ones to make the next round of decisions for this society. We do not have to stand idly by and wait to pick up the pieces the cold-war cowboys leave us. It is our initiative and our future. Apathy is a perfect tool for the status quo to subjugate and stagnate our free will, while the rich get richer and the poor die of exposure lying over steam vents in the streets of our major cities.

There are a lot of people who claim to be sensitive to the issues at hand in our society and vehement in their opposition to the regressive Reagan era. Please speak out and let the universities be heard, they stand as a last bastion of social and government critique. If we keep allowing conservatives to cut our funding, our right to an education may become a privilege to an education.

## Censorship: A Growing Concern

by **Trudy Stewart**  
Features Editor

- The Bible
- The Scarlet Letter
- To Kill a Mockingbird
- Black Like Me
- The Adventures of Huckleberry Finn 1984
- The Grapes of Wrath
- Canterbury Tales
- Love Story
- Lord of the Flies
- Brave New World
- I Know Why the Caged Bird Sings

Do the books on this list sound familiar? Of course they do; they are all well-known and widely-read examples of literature of their time and genre. But these titles also appear on a list of approximately 800 books that have been or are now being challenged by various censorship groups in the United States.

An ardent anti-censorist, Lee Burress, an English professor

at UWSP, thinks that the increasing number of attempts to ban certain books from the reading public — and especially school children — is a product of our ever-expanding society.

"The frequency of censorship is related to the size of the library," said Burress, "the smaller the library, the fewer books to object to. Since about 1950, incidents have been increasing. Books have become

cheaper, so there are more of them in the libraries. More people read, so the libraries are used more often."

Burress, whose book, "The Battle of the Books: Literary Censorship in the Public Schools 1950-1985," will be published in the spring, said that in many cases, censors objected to certain works without differentiating between pornography and obscenity.

"Obscenity," he explained, "is indefinable. It's something that somebody doesn't like. 'Sexually explicit material' would probably be a more correct term. People who focus their attention on obscenity are not well-informed, not familiar with literature. They are capricious in their attacks."

As an example, Burress spoke of a postcard purchased in Italy of Michelangelo's David. Chiseled from marble, the statue is explicit in every detail. A Playboy centerfold is also explicit. What parameters, he implied, determine, in a person's mind, which is art and which is obscenity? If either?

Burress has been an active opponent of censorship from 1955, when he "became angry" about a bill brought before Congress to create a federal censor board. Since then, he has spoken often about censorship in Wisconsin and other states. He has also participated in debates with proponents of censorship such as Alfred P. Szewes, associate professor of engineering and computer science at Marquette University and member of the West Allis-West Milwaukee School Board.

Although Burress accepts that some forms of censorship may

be necessary under some circumstances, such as libel or telling the sailing times of battleships during wartime, he contends that there is no good kind of censorship.

He went on to say that censorship will continue and the only effective way to combat it is to vote.

"It's important to have a voting minority that is active. Eternal vigilance is the price of freedom and democracy. The right to read is not inheritable. How will it be passed on to further generations? Freedom will last only as long as people pay the price for free society."

Presented the Wisconsin Library Association award last fall for his work against censorship, the professor maintains that books have become the scapegoat for factors, like the drug epidemic, the sexual revolution and the questioning of religions, that they have not caused. "Books are not responsible," he said. "Society is."

When asked if there was any solution to the problem of censorship, Burress said, with a deadpan expression, "Sure, if books generate censorship, then get rid of all the books. No books—no censorship."

## Opinion Origins of the Moral Majority of Words

by **Kathleen Golke**  
Staff Writer

What is a fundamentalist along moral majority lines? What is God's name is a secular humanist? A spokesman for Norman Lear's People for the American Way says: "Trying to define secular humanism is like trying to nail Jell-O to a tree." Let's turn that Jell-O into the hard facts.

The origins of words used by the moral majority can be found by studying the history of the Pilgrims. They were the first in America to call themselves the moral majority and the first to use the catch-all phrase of secular humanism. If only Plymouth Rock could talk!

First, however, we must take ourselves even further back in time to Elizabethan England where the Pilgrims (first called Separatists) decided to elevate themselves above the morally inferior others.

Queen Elizabeth loathed the solemn moralists and drenched herself in wit, gaiety and the high animal spirit of the lusty age to which she lent her name. William Brewster, a separatist leader, was the first to use the term "secular humanist" and he undoubtedly used it to refer to the Lusty Liz.

The Pilgrims had concluded that since the originally simple

Christian faith had been corrupted by time and "human intervention", there should be nothing in the church or law except what was expressly and precisely warranted by the texts of the Bible.

Disillusioned, the Pilgrims fled to Holland and eventually settled in the city of Leyden. The New Right, as they began calling themselves, didn't like Holland either. They watched their children dissent from the culture of their parents. According to the book, *Things That Go Bump In the Night*, it was those subtle, undermining, child-molesting secular humanists who were again wooing their children "into extravagante and dangerous courses getting ye raines off their necks, and departing (them) from their parents."

Because of desegregation and liberal education in Leyden, the Pilgrim children of the New Right were coming home with poetry and low SAT scores. (Teenage pregnancy wasn't a problem then because Pilgrim girls were most often married by the time they were thirteen). The Pilgrims accused the Dutch of brainwashing their children.

Dutch gaiety on the Sabbath was the last straw. William Brewster packed up his 41 followers (the moral majority)

cont. page 23

## Student lands "Miami Vice" Role

by **Keith Uhlig**  
Staff Writer

If some Friday night you happen to be watching "Miami Vice" and you see a familiar face, it could be Dean Kovalski, a former student at UWSP.

Kovalski was down in Florida on Christmas break when he met Wendy Wolff, an actress who has been on "Miami Vice" four times, in the movie "Running Scared" and on Don Johnson's video "Heartbeat."

He went with her to casting parties, and it was at one of these that he was able to get a bit part on "Miami Vice."

He may get a line or he may not, but he will definitely be in a few shots. "The only thing in question is if I get on the air or not," he said. "Sometimes bit parts get edited out."

The show, however, is just the beginning of what Kovalski hopes will be a long and successful career in television and movies. "I feel that it is within my grasp," said Kovalski.

Kovalski withdrew from school and moved to Miami to get a shot at fame all of his effort.

He is going to support himself by being a personal fitness instructor and a model. He has already appeared in a print ad for a sailboat company. Kovalski has also enrolled in acting school in Miami.

Body builder Dean Kovalski was recently cast for a role in "Miami Vice."

He knows his chances of making it aren't great. Leaving school, friends and family is scary, especially for something as insurmountable as fame and success in business. He said, "I'm jumping off the boat of security. I don't know whether I'll get eaten by sharks or not."

His mother was wary of the idea of him leaving at first, but now is very supportive. His father is still hesitant. Friends of his have also backed him up on

his endeavor. "I'll miss all my friends, and I appreciate the support they have given me."

The not knowing is exciting for Kovalski, but more than that drives him to give up everything in search of a dream. "If I don't try it I'll regret it for the rest of my life. Life is too short to live with 'what ifs'. I've been told by people in the business that I have the chance. It's up to me to make the most of it."

# ARTS AND ENTERTAINMENT

## Music made the American way

by Jon Pike  
Staff Writer

The hippest thing in American music today is to crawl into a pair of denims and a workshirt, grab yourself a guitar and sing about how wonderful rural America is from the safety of your home 24-track recording studio in your condo. In other words, "American Music," is the latest commodity to be hyped by our recording industry.

Last Sunday, the Quandt Fieldhouse was treated to a show by a couple of bands for whom "American Music" is much more than hype.

Jason And The Scorchers and The Fabulous Thunderbirds are two hard-driving rock'n'roll bands whose devotion to America's musical roots, country music and the blues, is unashamed and genuine.

The show was led off by Perry Baggs, Warner Hodges, Jeff Johnson and Jason Ringenberg, otherwise known as Jason And The Scorchers.

Five years ago, these boys got together in Nashville and decided to combine the best of both worlds: the raw energy of punk rock and the soul of country music. But don't saddle this band with one of those ridiculous hybrid labels record companies and rock critics just love to come up with, like "Country-Punk."

"Labels like that are harmful, inaccurate and any other negative word you can come up with," according to soft-spoken singer, guitar-twanger and harmonica-slinger Jason Ringenberg. "Those labels have never really applied to us. There's always been much more to us

Photo by Tom Charlesworth

Jimmy Vaughan on lead guitar for The Fabulous Thunderbirds at Sunday's concert.

than that. Anybody who listened to music in the mid-70s was influenced by The Ramones and all that. We were born and raised to like the down-home feeling of country music, like Merle Haggard. But we all have a deep distaste for country pop."

If it sounds like this band strikes an uneasy compromise between country music and rock and roll, it sure doesn't come off that way on stage.

The Scorchers took the stage and, powered by Jason's yelping vocals and Perry's soaring

guitar, they pummeled the audience with a rockin' cover of the ol' country-western standard, "Lost Highway." The Scorchers' originals for the evening paired a rousing rock beat against lyrics concerning country-western themes: Drinkin' and dyin' ("Broken Whiskey Glass") and lynin' and cheatin' ("White Lies").

The Fabulous Thunderbirds approach to rock'n'roll comes from the blues. They started out approximately 14 years ago, in Austin, Texas, playing behind such blues greats as Muddy

Waters and Jimmy Reed.

Since then, they've had, "A great time," according to harmonica player and lead singer Kim Wilson. "Our approach has been really simple, to have fun with it."

While they've been having fun with it, the T-Birds have also had a role in making it possible for other musicians to play rock'n'roll that brings back the roots: blues, rockabilly, R'n'B, soul and even Cajun music.

Always eager to categorize, rock critics have labeled such attempts to bring rock'n'roll back home, "Roots Rock," "Neo-Rockabilly" and other such epithets.

"But we don't care about that stuff," says Wilson. "When we started playing this type of music around 1974, we thought there was room for everybody in it. A lot of people said it wouldn't go, but we said bullshit to that."

The Thunderbirds intention to preserve has certainly paid off for them. In the past year, they've been nominated for two Grammy Awards, released an album that's about to go platinum ("Tuff Enuff") and have received considerable college and commercial airplay.

On stage, The T-Birds played all their recent chart hits ("Tuff Enuff," "Wrap It Up," and "Why Get Up"). But, the obvious highlight of their show was the extended jams featuring the blistering blues of Jimmie Vaughan's guitar and Kim Wilson's demonic harmonica work.

An added treat that evening was when Kim Wilson, drummer Fran Christina and recent addition, Milwaukee resident Junior Brantley jammed with local college musicians at an area bar after the show. It was also great to see Preston Hubbard (lest I be remiss in not mentioning him) use an actual stand-up bass during the concert.

With bands like Jason And The Scorchers and The Fabulous Thunderbirds, the fate of American music is in darn good hands.

## Album Spot-Lite

by Jon Pike  
Staff Writer

Jazz Butcher Conspiracy  
Distressed Gentlefolk  
Big Time Records

Jazz Butcher Conspiracy? O.K., Pike, what is this? Are you trying to tell us that a bunch of meat-cutters who secretly listen to Dizzy Gillespie have got their own album out?

Not quite. It's more like, well

... What would you get, if you took a 28-year-old guitar-wielding genius, added a rotating group of veteran English rockers, mixed well with country and folk guitar riffs and added just enough jazz and Latin influences for flavor?

Why don't I just start over?

Jazz Butcher (that's the name he uses folks, honest) is a 28-year-old mad scientist/guitarist from England. Instead of working with a regular band, he has opted to inflict the duty of performing his off-beat compositions on various members of London's rock 'n' roll community.

The Conspiracy has settled into a more or less steady lineup for touring and recording purposes.

What all of this has resulted in is a chap who can take you through an album of acoustically-tinged folk and country-rock, with the odd jazz or Latin flavored piece to throw you off.

It's these deviations that provide the most enjoyable moments of the LP.

The song "Who Loves You Now?" employs vibes, light jazz percussion; gently strummed jazz guitar and doo-wop harmonies to create a light, bouncy love song that could be enjoyed by patrons of Holiday Inns everywhere.

The wackiest (and best) cut on this disk is the mariachi showcase "Hungarian Love Song." The lyrics of this pop piece somehow equate love with food.

Check out these lines:

I'll be your breakfast  
I'll be your dinner  
You won't go hungry  
You won't get thinner  
I've seen you starving  
It's no damn good  
So darling darling  
I'll be your food.

How could anyone be twisted enough to come up with something like that?

It's good to know, that someone has found the formula for being twisted with a light touch. The soft pop of this album, successfully underscores the bizarre lyrics and transforms the whole mess into one enjoyable record.

# Nutrition Points

by Toni L. Wood, R.D.  
Staff Writer

What do humans, monkeys, guinea pigs, Indian fruit bats and the red vented bulbul have in common? They're all animals whose bodies can't make vitamin C (ascorbic acid) and, therefore, require a daily food source in their diets.

But before you pop in a few chewable vitamin C tablets, think again. Vitamin C has taken on an almost magical quality in the view of some individuals. It has been touted as a treatment for cancer, the common cold, mental illness and stress.

Don't be "myth-led." Vitamins aren't mythical or magical. They are essential chemical substances your body obtains from food, but they don't provide calories, create energy or build body tissues by themselves. Only when working with other nutrients can they regulate body metabolism and promote the building of body structures.

Vitamin C, working with other nutrients, strengthens blood vessels, promotes the healing of wounds, fights infection and prevents scurvy (the classic deficiency disease of vitamin C). The Recommended Dietary Allowances (RDA) of vitamin C for the average healthy American adult is 60 milligrams/day; the amount in 1/2-cup of orange juice.

Vitamin C is water soluble and not stored in the body for

long periods of time. When your body tissues become saturated with vitamin C (at approximately 100-150 milligrams/day) the excess is excreted via the urine.

Vitamin C, at levels slightly above the RDA, does play a role in wound healing and the fight against bacterial infection. When amounts ingested reach megadose levels (10 times the RDA), the benefits stop, and interference with the ability of the white blood cells to kill bacteria can result.

At this time, there is no scientific evidence that megadoses of vitamin C is valid for the treatment of cancer, mental illness, stress or the common cold. It is possible (although hotly debated) that vitamin C may decrease the duration and severity of a cold. The average person has a cold eight days per year; the mean decrease in a cold's duration with vitamin C supplementation is estimated at one-tenth of one day or 2.4 hours out of the entire year.

There may be a price to pay for the supposed benefits though. Generally, vitamin C is considered non-toxic, however, hazards and potential toxicities do exist ranging from mild side effects to life-threatening situations. Moreover, many people may be predisposed to these risks and be unaware of it.

Your best bet is to skip the supplements and obtain your vitamin C from your daily diet. The top sources are citrus fruits, peppers, dark green veg-

## "Crimes of the Heart"

by Betsy J. Jacobson  
Staff Writer

What happens to three adolescent sisters when their mother hangs herself and the family cat besides? The answer is in Beth Henley's Pulitzer Prize-winning play, "Crimes of the Heart," which opens in the Jenkins Theatre at 8 p.m. tomorrow, Feb. 6.

"Crimes of the Heart" is a story of the McGrath sisters: Lenny, the eldest, played by Laurie Davidson; Meg, the middle sister, portrayed by Jamie Rolfsmeier; and Babe, the youngest played by Janice Judd. Also in the cast are Karla Sherman as their cousin Chick, John Voight as Doc, Meg's old flame, and Greg Ellery as Barnett Lloyd, the young lawyer who defends Babe after she shoots her husband.

Arthur Hopper, chair of UWSP's Theatre Arts department, directs the play. Hopper says he is excited about this show because it is the first

small cast he has directed on-campus. "I have done several large-cast epics, but this was a chance to work with a few actors in a more intimate, humorous vehicle."

"Intimate" is a perfect word to describe this production. Davidson, Rolfsmeier and Judd do a beautiful job of getting across all the love, jealousy, (and sometimes hate) felt between real sisters. You can see this especially well in the scene in which the three look through Babe's photo album. Another particularly intimate moment occurs when Meg and Doc see each other again for the first time in years and demonstrate that there are still a few embers glowing from their old fire.

All of the actors in the show give very strong performances. Judd and Davidson evoke from their audience a great deal of genuine concern for their characters. Jamie Rolfsmeier (who wears some wonderfully flashy costumes designed by Linda Moore) is especially excellent in her portrayal of the seemingly self-assured Meg. Meg has

just returned from the West Coast after a failed attempt at a singing career. Another performer to watch is Karla Sherman, who is extremely hilarious as the bird-like Chick.

If none of this makes you want to see the show then go to it just to see the set. The play takes place in the kitchen of the McGrath family home, and Steve Sherwin's set design is amazingly realistic, right down to the grease splatters around the stove. Also worth a mention are Gary Olson who designed the lighting and serves as technical director, and Sue Peikoff, stage manager, who keeps the whole show running smoothly.

Performances will be in the Jenkins Theatre of the Fine Arts Building at 8 p.m. Feb. 6, 7, 12, 13 and 14. There is a 2 p.m. matinee scheduled for Sunday, Feb. 8. If you've never seen a University Theatre production before, this is a perfect one to start with, and if you have seen one, you certainly won't be disappointed with "Crimes of the Heart."

From left to right: Laurie Davidson, Janice Judd and Jamie Rolfsmeier.

# OUTDOORS

## Mammoth musky stuns DNR biologists

by Jim Addis  
Dif. DNR Bureau of Fisheries

I've decided to liven up your winter by whetting your appetite for fishing in Wisconsin this summer. Some of you are going to have elevated blood pressure and be hyperventilating about the observation I am about to relay to you.

Well, every year we hear reports of "world record" muskies being caught in DNR nets. These are usually just rumors, but not this time.

Last spring, a DNR fisheries work crew was collecting fish on Lake Wissota in Chippewa County so the fish could be analyzed for mercury contamination. While going about its task, the crew stunned a b-i-l-i-g musky with its electroshocking equipment. The musky rolled to the surface and laid there for 15 to 20 seconds. The astounded crew estimated the fish weighed between 70 and 80 pounds.

Oh sure, you say. But Mel Kohls, the DNR fisheries technician assigned to fish manager Joe Kurz at Chippewa Falls, and John Sours, a seasonal employee, had seen their share of big fish before this. Just earlier that week they had netted a 53-inch fish on the Cornell Flowage.

Both men reported they were awe-struck by the size of the musky they shocked. It proved too big to safely land in the nets they had on board, so rather than risk injuring it, the men just watched the musky recover and move away.

Since Mel and John were unable to land the musky, we will never know its precise size. I usually shy away from reporting this sort of near miss because of the doubt that must linger. Also, it's not my goal to send hordes of hungry trophy hunters to Lake Wissota.

It's always reassuring to know, though, that Wisconsin still has a lot of water that can produce trophy fish, even though world and state record fish are unusual. They represent a combination of growth potential contributed by their genes, wily behavior derived from heredity and experience, productive waters offering the right food and shelter, and a large dose of luck.

Record fish also usually come from big, deep waters that are hard to fish. Flowages, especially, seem to produce more than their share of big fish, partly because they're so fertile and partly because they contain so much underwater structure that changes over time.

There is no way to know just how many record-size musky, walleye and bass we may have out in our lakes and streams. But I'm convinced that they are still there to be taken by those anglers who take the time to search for them.

Without doubt, they're hard to catch. You don't live to be a record-size musky by striking every lure or bait that slides past your nose.

That's why most trophy hunters develop special methods to hunt for trophy fish. They gen-

erally use bigger lures and baits, and often fish at times when the rest of us find the weather too harsh. Since their

methods are selective, trophy hunters may have to catch fewer fish than the rest of us so they get a chance at a big one. Most of those I know are really

a special breed.

Even though few of us can expect to catch a record fish, the possibility that we may

keeps our enthusiasm up. I for one will be thinking of the big fish that Mel and John spotted in Wissota during the whole winter. Maybe I can somehow

get Joe Kurz to take me out there some evening this summer.

Until then, I will be sitting here in Madison contenting myself with ice fishing on frozen Lake Mendota, contemplating a whole year ahead of Wisconsin fishing challenges that may include a chance for a big musky.

## Outdoor writers can carry jinx too

by Chris Dorsey  
Outdoors Editor

One of the hazards of writing about the outdoors is that people begin to assume things about you. For instance, people suffer from the impression that I can catch fish.

Now I suppose, given the appropriate charge of dynamite and a small pond, I could be expected to fly out a couple of swims. Or, in that rare moment where a mentally deficient carp, or fish of equal trophy caliber, happens to sample my hooked offering, I am able to land a lunger.

Aside from these few exceptions though, I am, to be sure, an inept angler. Why just a few weeks ago, I ventured to a small lake near Portage with friends Mike Peterson and Jeff Felt of DeForest to try some ice fishing. They obviously hadn't heard of my reputation as a fisherman, and asked me to go along.

As we traversed the lake setting tip-ups, each of us would periodically glance back to see if any had been sprung. We waited a few minutes. We then waited some more. Nothing.

Mike couldn't explain the sudden lack of fish. "I've always caught fish here, I don't know what the problem is this time," he said.

We waited some more. Still no hits.

I thought I'd try a little experiment. I decided to go back to the truck and grab my 12-gauge and tramp through a nearby aspen thicket to see if I could rouse a well seasoned grouse or two.

Sure enough, during the half hour that I was gone on my hunting adventure, Mike and Jeff had been doing sprints from one orange tip-up flag to the next trying to keep pace with all the strikes.

"Man you wouldn't believe all the strikes we got," said Jeff while short of breath from his ice sprints.

As I returned to the ice, both Mike and Jeff were dumbfounded to explain the sudden feeding frenzy the fish went on as I left for the grouse thicket — almost as dumbfounded as they were when the fish quit biting shortly after I returned.

We began waiting for more bites. Nothing happened.

I'm not one to hold much faith in things like jinxes, but I had to admit the evidence was beginning to mount against my luck as an angler.

My partners were too polite to suggest that I could possibly be the cause of the sudden run in bad luck.

"Must be the light conditions," said Mike.

"Yeah, or maybe the fish just moved on," offered Jeff.

Not wanting to spoil the outing for the two of them, I de-

ecided to stroll to a nearby cabin where I knew there was a fireplace and plenty of dry kindling. One match and four slivers of kindling later, a fire began to warm my cool spirits. Not long after the fire had gripped every log, Jeff and Mike scampered in, holding a whopping six-pound largemouth bass.

The fish, of course, nabbed the minnow only a few moments after I left to build the fire.

That was the clincher, I was certain I was a fishing jinx. In fact, my fish-scaring powers aren't limited to merely ice fishing.

Last August while fishing with friend and fellow outdoor writer Pat Babbitt of Lone Rock, I experienced nearly the same phenomenon.

"A friend of mine and I could have filled the boat with bluegills last week if we'd a mind to," said Pat over the phone as we discussed the possibility of trying some fishing.

"Good!" I answered, "Let's go."

When I arrived at Pat's house, his confidence was still high.

"Good," I thought to myself, "word of my lack of fishing prowess hadn't reached this far west."

We loaded Pat's depth finder and boat into the back of his

# An area guide to X-country skiing

by Bob Crane  
Staff Writer

It's great to have all this precious white stuff on the ground again. Now we can resume that most enjoyable winter sport of cross country skiing.

Central Wisconsin is a mecca for the cross country skier. This area has dozens of excellent cross country trails. These trails range from well groomed to more remote wilderness trails. Beginners and experts alike find satisfaction in a great variety of trails with level terrain or treacherous slopes. The one common denominator on all these trails is the refreshingly scenic wooded landscapes that surround you as you glide down the trail.

Many local ski areas combine cross country trails with other winter recreational activities such as winter camping, ice fishing, tobogganing and touring of nature trails. A few of these recreational areas go so far as to provide ski rentals, ski lessons, refreshments and shelters.

Some of the more popular ski areas in Portage County include Iverson Park, Jordan Park, Schmeckle Reserve, the Plover River Trail, the Wisconsin River Country Club, Standing Rocks County Park, the Wolf Lake Trail and the Tomorrow River Trail.

Iverson Park is located on the eastern edge of the city of Stevens Point at the end of Jefferson Street. This park features a 2 km nature trail which winds

through the gently sloping Plover River valley.

Jordan Park is located along Highway 66, four miles northeast of Stevens Point. This park contains 3.6 km of well groomed, gently sloping trails. Additional features of this park include, winter camping, ice fishing and a nature trail.

The location of Schmeckle Reserve, on the northern border of the UWSP campus, is optimum for busy students. Schmeckle contains several very gentle trails which wind through 196 acres of marshes and woodlands. This is an excellent area for beginners to master the basics before moving on to more challenging courses.

One of my favorites, the Plover River Trail, begins just southeast of the Stevens Point airport on Barbara Lane. This gently sloping trail meanders along the Plover River through some very scenic woodlands and will eventually take you up past the Izaak Walton property before returning to its origin.

For a nominal fee, the Wisconsin River Country Club offers several miles of well groomed trails including warm-up shelters, ski rentals and refreshments.

The Tomorrow River Trail may prove to be difficult to locate but it is well worth the drive. It has beautiful scenery, daring hills, a winding creek and is generally a great place for solitude. The best way to locate this land may be to look for the DNR land in Section 24 of Stockton Township which

may be located in a county plat book, (in the library).

Another prime location for the lover of solitude is Wolf Lake. This trail is located just south of County GG near Blaine in southeastern Portage County. Here you will find 6 km of rolling wooded trails bordering a

secluded lake.

An excellent trail for the intermediate to advanced skier is Standing Rocks County Park. Standing Rocks is located just off of Custer Road six miles east of Plover. This park offers groomed trails, a warming facility, refreshments and ski ren-

tals.

These are only a small fraction of the many excellent cross country skiing opportunities in Central Wisconsin. Two other trails which may be worth driving out of Portage County for

cont. page 16

## Davy receives CNR award

children of Arthur and Ethel Davy.

She will receive a plaque and a cash prize donated by her professors during the annual College of Natural Resources annual awards dinner at the Holiday Inn. The event is open

Ann Davy

to the public and tickets are available from the office of Daniel O. Trainer, dean of the college.

Ann was chosen for the award from among 1,800 students in

the college.

She completed three semesters of the pre-medicine program at UW-Madison, following a dream she had since grade school days of becoming a physician, before transferring to UWSP. "I'm glad I made the switch—I've always been interested in natural resources, and I can really say I've enjoyed being part of this program."

Throughout her undergraduate study, she earned a 3.55 grade point while being an active participant in the student chapter of the Society of American Foresters and committees of the College of Natural Resources.

Ann said forestry has been a popular field of study for women in her college in recent years. And though it involved rigorous activities some of the time, she said she had no problem "keeping up."

However, there has been a sharp decline in the number of women entering the forestry major at UWSP recently, and she says she doesn't understand why. She recommends the program to female students.

## Snowmobiling conditions improve with snowfall

### Wis. Conservation News

The best conditions for snowmobiling and cross country skiing in the state at midweek appear to be in Iron County around Hurley. Even with the recent colder temperatures, ice conditions are marginal in some areas. Please use caution.

In the northwest, snow depths of 20 to 24 inches around Hurley in Iron County provide excellent conditions for snowmobiling and cross country skiing. Conditions for those activities are fair in the Park Falls area, but poor in the Cumberland area. There is good snowshoe hare hunting around Park Falls. Northerns are hitting on Lake St. Croix and the Gordon Flowage.

Farther south in the west central counties, snowmobile trails are not in very good condition around La Crosse. Some panfish action is reported in the Black River Falls and Eau Claire areas. A reminder to anglers that the Holcombe Flowage in Chippewa and Rusk counties is closed to game fish fishing after March 1st. The 1987 Wisconsin Fishing Regulations, which listed the flowage among lakes open to game fish fishing all year, are in error.

In north central Wisconsin, additional snow received last week has helped improve snowmobiling and cross country skiing conditions in the Woodruff area. There is a lack of ade-

quate snow for snowmobilers and cross country skiers in the Wisconsin Rapids area and skiing conditions are fair at best around Antigo. Open water below the Petenwell dam is drawing bald eagles to that area to fish.

In the northeast, snowmobile and cross country ski trails are closed in Door County's Peninsula Park because of a lack of snow. Cross country skiing and snowmobiling are poor in the Marinette area and also in Wausau County in the Oshkosh area. Anglers have had some panfish action in Oconto County's White Potato Lake, and Wheeler Lake is producing some nice size bluegills.

In the southeast, though ice conditions have improved, caution is still advised. Northerns have been hitting on inland waters and bluegills and crappies are biting on most lakes. Snowmobile trails are in poor condition.

In the south and southwest, Columbia County lakes are producing northerns, and cisco and lake trout are being taken from Big Green Lake. Anglers are catching walleyes and perch on Lake Puckaway. Northern fishing is fair in Grant County waters and some small northerns are being taken on the backwaters of the Wisconsin River in Iowa County.

## "This Is A Definite PLUS For Your Resume!"

Renee Babiak is a senior marketing major at UWSP. She's also a telemarketer for Sentry's new Payback car insurance policy that rewards people who don't drink and drive.

"This is a chance to work for a really good company—a definite plus for your resume. And no matter what field you're in, I think it trains you to think faster and get better at communicating."

You'll probably make more money at this than at a lot of other jobs students have. You get a nice hourly wage plus bonuses, \$1 per appointment. So you can make 5 to 6 dollars an hour.

"I also like what the Payback policy is about. Something that helps prevent drunk driving is important—a good idea. And here you're not doing the selling, but just trying to tell people about the idea—trying to set appointments for sales agents."

To find out more about getting a great job like Renee's, you can meet with Sentry recruiters Feb. 9 and 12, noon to 3:30 p.m. Stop in to Career Services, Room 134 Old Main to fill out an application and set up an appointment.

# Public opinion sought in river controls

RHINELANDER, WI - Members of the Wisconsin River System Review Team will move the series of open houses for the public comment on the operation of the Wisconsin River to Central Wisconsin. The review team will be in Wisconsin Rapids the evening of February 3, 1987, from 6-9 p.m. in the DNR Area Office, Room 102.

Department spokesman, David Daniels, in the DNR's North Central District Office in Rhineland, says, "The open house is the public's first best opportunity to meet members of the Department's review team and to discuss the issues and concerns many have about the operation of the Wisconsin River and its associated flowages." Daniels adds that the setting for the open house has been intentionally planned to be informal.

This will, hopefully, allow the one-on-one contacts between the public and the review team. This is particularly important since the open house scheduled in Wisconsin Rapids and the six others scheduled for cities along the entire length of the Wisconsin River, will in large measure, set the early agenda for the Department's review of how the Wisconsin River and its flowages are run. Public participation in these meetings is the key to helping us better understand what the public believes are the primary issues and concerns along the river and on its flowages."

The review of the operations of the Wisconsin River began during the summer of 1986 as a multi-disciplinary team representing DNR staff from around the state and those from key federal agencies were gathered. The project is needed as federal energy regulatory commission (FERC) licenses governing the operations of the Wisconsin Valley Improvement Company and its member companies along much of the length of the river are due to expire in 1993. Between now and 1991, the DNR review team must complete its studies of the river and forward its analysis to FERC in advance of the license expiration date in 1993. The licenses issued by FERC are typically long-term, sometimes 50 years long.

That fact, says Daniels, "makes citizen input into the decision making process all the more important which is why I urge all who are interested to attend the meetings planned for their community."

Remaining meetings have been scheduled as follows:

Wisconsin Dells - February 7, 1987 - 11 a.m.-2 p.m. - City Police Dept., Second Floor Meeting Room

Spring Green - February 10, 1987 - 6-9 p.m. - American Legion Hall

Prairie du Chien - February 11, 1987 - 6-9 p.m. - City Hall Council Chambers

Those who cannot attend a meeting may offer their concerns regarding the Wisconsin River and its flowages in writing

by addressing a letter to: DNR, North Central District Headquarters, Box 818, Rhineland, WI 54501 - Attn. WVIC.

The written comments should be received at the DNR Rhineland Office no later than February 18, 1987.

Playing Opossum

# Timber Wolf recovery plan outlined

MADISON, WI - The Wisconsin Timber Wolf Recovery Team has identified 15 issues for consideration in its next step toward development of a timber wolf recovery plan. These issues, outlined in a nine page report, are based on biological fact and the concerns voiced by citizens interested in the wolf recovery project.

public's concerns and have made an effort to address those concerns in this report." The potential for livestock depredation was an issue voiced at the forums.

"We don't deny the legitimate concerns of some people worried about livestock depredation. The potential for such problems could exist if success-

"It would not be in the public's best interest to proceed with recovery if the program carries no guarantees that problems could not be dealt with in a responsible manner," he said.

Timber wolves are listed as a federally endangered species in Wisconsin which means that they can not be killed for any reason. If Experimental Population status were granted, Wisconsin's timber wolf population would become listed as "threatened" and control measures could be invoked should serious livestock depredation problems develop.

"We also need to establish a compensation program for farmers who might experience the livestock loss," said Thiel. Funding such a program is a major concern. Currently, 3 percent of the Endangered Resources Fund is set aside annually to cover losses caused by endangered and threatened species in Wisconsin.

Thiel estimates the cost of wolf recovery to be anywhere from \$50,000 to \$60,000 annually to maintain the current level of field work and monitoring, to as much as \$120,000 annually to restock between 10 to 15 wolves. A limited phased translocation project of one to two wolves plus the regular field work was estimated by him to cost approximately \$80,000 annually.

"We don't have the funds to implement wolf recovery at this time," said Thiel. "Increased contributions to the Endangered Resources Fund could support some of the initial phases of wolf recovery."

One of the team's goals is to identify Deer Management Units within suitable wolf habitat areas where the deer density goal can supply a harvestable surplus for hunting and an adequate prey base for wolves. Where deer density goals are not sufficient for both hunters and wolves, habitat may be im-

proved through timber management programs.

"We recognize the value of forestry programs, including logging, as a means of maintaining deer habitat which is essential to wolves. We know that to accomplish those activities, access will be required. We encourage the use of temporary roads, which can be obliterated or controlled through gating etc. once the forestry objectives

have been attained.

"We hope no new roads will be built that will substantially increase human access to areas deemed suitable wolf habitat. If new roads are built in areas designated as suitable habitat, we recommend that public vehicle access be controlled during critical time periods such as fall. However, access to those

cont. page 17

Endangered species recovery and protection is mandated by state statute. The goal of the Timber Wolf Recovery Team is to establish a self-sustaining population of timber wolves in northern Wisconsin.

Based on the information and suitable habitat available, 60 to 100 timber wolves could eventually exist in Wisconsin's northern forests, says Richard Thiel, chairman of the recovery team.

The team has identified four possible options to achieve that goal:

- 1) foster through stiffer penalties, habitat management and education, the existing population of approximately 13 wolves and allow it to naturally expand into other areas of suitable habitat;
- 2) foster the existing population and augment restoration in other areas of suitable habitat in the state by translocating single wolves or pairs into areas where lone wolves are known to exist;
- 3) restock wolf packs into areas of suitable habitat;
- 4) develop a "phased" translocation program based on a combination of the first and second options.

"Wolf recovery can occur in Wisconsin," said Thiel. "Through last fall's public forums, we learned more about the

# Forestry program gets boost from SAF

Accreditation of the forestry major at the University of Wisconsin-Stevens Point has been continued for five years by the Society of American Foresters.

The university has had the endorsement of the national organization for approximately 10 years.

Daniel Trainer, dean of the College of Natural Resources, said a team of evaluators expressed concern in 1981 that the student-faculty ratio in the program was too high. Consequently, several new faculty members who have expertise in diverse aspects of forestry were added.

With the new staff, the College of Natural Resources has been able to establish its Fire Science Center, one of few facilities of its kind in the United States plus specialized offerings in forest recreation and urban

forestry.

"We were told that we have a relevant program for the 1990s," Trainer reported.

Though student enrollment in the undergraduate forestry program has declined here in recent years, it still ranks number one in size nationally. About 400 students have declared themselves as forestry majors, down from an all-time high of more than 500 in the early 1980s.

The drop here, though significant, was not as sharp as at other universities, Trainer said. Across the country, enrollments in all natural resources offerings have declined about 40 percent in recent years. At Stevens Point, student population in the total natural resources program, which also is larger than all others, has been remaining constant.

Mike Pagel of the career ser-

vices staff and a specialist in locating jobs for natural resources graduates, says there were no real reasons for the decline in the enrollments except for what may be a broad decline in interest in environmental protection among youth.

He believes there is an incorrect perception among many young people about the future of and pay scale in the forestry profession. As a result, there appears to have been a shift toward majors that are believed to lead to higher paying jobs.

Pagel said, however, that 'the pickin' is pretty good' for foresters in the job market right now because of many retirements of federal foresters. Moreover, by 1989, a shortage of foresters is predicted, he added.

## Outdoor jinx from page 13

pickup and headed for the same Wisconsin River slough that had yielded scores of feisty bluegills only a week earlier.

Armed with irresistible (or what we thought to be irresistible) nightcrawlers, we began casting along a bank of cattails. After a few casts without any bites, Pat adjusted the depth of his crawler by sliding his bobber away from the bait. More casts. No hits.

"I can't believe this," said Pat, "I guess that's why they call this 'fishing' instead of 'catching.'"

We trolled around the entire pond, casting about every 100 feet. Still no luck. We tried using the depth finder, different lures, and even changing the size hook we were using — still no bites.

Now Pat isn't one to fidget around, wondering what the

problem is. In fact, he likes to get right to the heart of the matter.

"That's it, you must be a jinx," he said to me in a tone of disbelief.

Well the next time someone asks me what kind of fishing I like best, I'm going to answer, "The kind where anyone can catch a fish — you know, the kind outdoor writers always write about."

Terry Porter, former all-American and UW-Stevens Point basketball standout, will be the center of attention on Saturday when his No. 30 is retired. The ceremony will take place during halftime of the men's basketball clash with UW-Superior beginning at 7:30 p.m. in Quandt Fieldhouse

## UW-M no contest for Pointer '5'

by Scott Huelskamp  
Staff Writer

No contest. Saturday night's game for the UW-Stevens Point men's basketball team was no contest as the Pointers trounced UW-Milwaukee 68-36 in Quandt Fieldhouse.

The Pointers, who have lost their last two conference games to Superior and Eau Claire, are in third place in the Wisconsin State University Conference with a 6-3 record, a full game behind front-runner Eau Claire.

Pointer Todd Christianson scored the first five points in the game. Christianson tallied his seventh point of the half after a Tim Naegeli steal for a 13-0 lead before UW-M forward Erik Schten finally got the Panthers on the scoreboard with 11:44 to go in the half.

Eric Gardow's tip-in with 30 seconds remaining gave Point a 30-16 halftime lead. UW-M's 16 points in the first half is the second best defensive job on an opponent for the Pointers during a half this season.

Naegeli only had two points in the first half but came out hot in the second and scored 20 of the Pointers' 38 second half points. Naegeli finished with 22 points on a 7 for 11 shooting performance from the field, including two three-pointers. Scott

Johnson led UW-M in scoring with 10.

"We started to play defense in this game more like we are capable of," said assistant coach Randy Handel. "Our defense had been playing hard but we had a couple of key breakdowns (against Superior and Eau Claire). We eliminated those breakdowns against UW-M."

"The offense had been struggling, but being at home helped a lot and we shot better with better patience and shot selection."

Point shot 63 percent in the second half and finished 26-47 for 55 percent.

"We got on the boards and had some strong rebounding performances from Gardow with seven and Darian Brown with five," said Handel. "We are not very big so we really have to improve on our rebounding, especially the rebounding from our guards."

Jeff Richardson, one of the team's leading rebounders, did not play because of strep throat.

"Milwaukee was a good test for us," said Handel. They are struggling a little right now because of injuries and they only brought eight players. It was important for us to get back on a positive, winning note heading into this weekend's game with

Superior. "Right now we just have to gather ourselves and make a Point will play five of its last seven games at home against Whitewater, Superior, La Crosse, Eau Claire, and on other teams. We have to approach each game as a title game."

## Hoopsters pound Wheaton

by Karen Kulinski  
Sports Editor

The UW-Stevens Point women's basketball team used a pressure defense to pound Wheaton College on Saturday afternoon, 63-40.

The non-conference win boosted the nationally-ranked Lady Pointers to a 14-1 record while Wheaton dropped to 12-5.

The Pointers, who lead the WWIAC with a perfect 9-0 record, put their unblemished league mark on the line when UW-Whitewater invaded Berg Gymnasium on Wednesday night.

"We played extremely well," said UWSP coach Linda Wunder. "Wheaton is a very good team but we were able to stay together and play 40 minutes of solid basketball."

The Lady Pointers jumped out to a 35-22 halftime lead and then outscored Wheaton in the second half, 28-18.

"Our pressure defense took Wheaton out of any kind of offense they were trying to run," said Wunder. "I know they've been scoring a lot more points than they managed against us."

Sonja Sorenson led UWSP's scoring attack with 23 points.

# Skaters beat Irish, break losing streak

by Craig Roberts

Staff Writer

With a rousing 6-3 win, the UW-Stevens Point hockey team ended a six game losing streak which saw them lose five games by one goal, one game by two goals and three games in overtime.

Earlier in the week, the Pointers traveled to Eau Claire to face the Blugolds in a Northern Collegiate Hockey Association contest.

Joe Butcher's two goals were not enough, however, to overcome Eau Claire's quick start as the Pointers lost the game, 6-4, which dropped their overall record to 11-9.

On Friday night, Stevens Point entered the Athletic and Convocation Center looking for their elusive 12th win, but Notre Dame junior goaltender Jeff Hendersen would be beaten only once as the Fighting Irish pulled out a 2-1 win.

Saturday night's contest, however, saw the Pointers break out of their slump by scoring five times in the opening period to help make things easy.

"I'm happy with the victory," said Pointer coach Mark Maz-

zoleni. "We needed it after losing six games in a row. It was a big win from the standpoint we were playing a Division I school in their own building.

"It was also a big victory for us from the confidence standpoint. Despite our losing streak, I thought we were playing well, but just not winning. The win was a big boost and a confidence builder for the rest of the season."

Butcher and Rick Dodd combined to set a school record in that period by scoring only 11 seconds apart. Pat McPartlin added two goals in the period and Jim Klenk finished the first period assault at the game's 18:53 mark. Pete Supple iced the win with a third period goal.

The Pointers got a solid effort from junior netminder Dave Kepler who stopped 22 of 25 shots in the 6-3 win, his third win of the season.

Stevens Point is in action this weekend when they travel to Northfield, Minn. to take on St. Olaf College in a Friday night-Saturday afternoon series. UW-SP 90FM will broadcast both games live.

# Men tankers win Coe Invite

by Karen Kulinski

Sports Editor

Great swimming and team chemistry allowed the UW-Stevens Point men's swimming team to capture the championship at the Coe Invitational in Cedar Rapids, Iowa over the weekend.

"We swam extremely well again this weekend," said Pointer coach Lynn 'Red' Blair. "In fact, we've not had many bad swims this semester.

"The reason being the freshmen's energy and exuberance with some older leadership that has combined for great team chemistry."

UWSP, after winning 15 of 19 events, grabbed the title with 997 points. Taking second was Grinnell with 790.5 followed by UW-Whitewater with 487.5, Coe College 394, Creighton University 175, Buena Vista 60 and North East Missouri State 30.

Freshman Nino Pisciotta paced the Pointers with four pool records. He won the 200 individual medley in 1:59.8, the 100 butterfly in :53.32, the 200 butterfly in 1:56.9 and the 400 IM in 4:18.

Double winners for the Pointers were Ken Brumbaugh in the 200 freestyle (1:47.37) and 500 free (4:48.6), Kevin Parham in the 50 free (:22.16) and 100 free

(:48.8) and Andy Woyte in the 200 breaststroke (2:16.6) and 100 breast (1:02.60).

Also placing first were Tim Thoma in the one-meter diving (401.85); the 800 free relay (Parham, Jeff Shaw, Pisciotta, Brumbaugh) in 7:08.03; the 200 medley relay (Pisciotta, Woyte, John Rudeen, Parham) in 1:40.8; and the 400 free relay (Parham, Pisciotta, Shaw, Brumbaugh) in 3:16.4.

"Brumbaugh, Woyte, Parham and Pisciotta were outstanding," said Blair. "This is not taking away from the rest of the team. It takes all of them to win or lose."

The Dogfish travel to UW-Stout on Saturday at 1 p.m.

# Petrick-new spark for Angelfish

by Sam Siegel

Staff Writer

Fueled by double winner Karen Petrick, the UW-Stevens Point women's swimming team displayed their talent and ability last weekend at the Coe College Invitational in Cedar Rapids, Iowa.

With the help of this meet, UWSP has already qualified 11 swimmers in 31 events for the upcoming national meet to be held in March.

It's customary that at this time of the season, the performances of the swimmers are not as good because they are training so hard. However, it

appears that the many hours of intense training failed to slow the women's team.

Senior Laura Adee met the national qualifying standard in four events. She swam the 200 individual medley in 2:22.2, the 100 backstroke in 1:06.5, the 400 individual medley in 5:07.4 and the 200 back in 2:23.8. Adee's performance in the 400 IM was a personal best.

Roxie Fink turned in two national qualifying times in the 100 breaststroke (1:12.76) and the 200 free (2:05.2). Her effort in the 100 breast was a personal best. Full of energy, Sarah Celichowski swam the 1,650 free in 18:35.8, the 200 free in 2:05 and the 500 free in 5:36.1. All three performances were national qualifying.

Sophomore Darcey Hessen-

thaler qualified for nationals in the 200 back (2:26.39) and the 100 back (1:07). In the 200 back, Dorothy Murray swam a 2:22.3. Not only was this a national qualifying time, but a school record as well. Dark horse Lynn Palmquist swam the 500 free in 5:35.16 - national qualifying and a personal best by ten seconds.

Co-captain Jan Gelwicks achieved two first places by winning the 200 IM in 2:17.7 and the 400 IM in 4:53.8. Both times qualified her for nationals.

Petricks set two school records en route to two first place finishes and four national qualifying times. She swam the 1,650 free in 18:10.2, the 500 free in 5:17.4, the 200 free in 2:01.5 and the 200 butterfly in 2:19.5. Special mention should be made of Tammy Fieck who took nine

cont. page 23

# Wrestlers split duals

by Karen Kulinski

Sports Editor

A short warm-up period gave the UW-Stevens Point wrestling team mixed results over the weekend in Dubuque, Iowa.

The Pointers won six of the first seven matches which led to a 26-12 victory over Augustana before dropping a 30-18 decision only 15 minutes later to Loras College.

"We wrestled very well considering we wrestled back to back matches with only 15 minutes to prepare since we arrived late," said UWSP coach Duane Groshek.

Winning matches for the Pointers in the match against Augustana were Kory Ehlert at 126 (14-9), Jeff Mayhew at 134 (6-3), Bob Calnin at 142 (18-5), Jay Labecki at 150 (6-5), John Noble at 158 (7-2), Gregg Kurzynski at 167 (7-1) and Bill Kolodziej at heavyweight by forfeit.

Notching victories against Loras were Ryan Burns at 118 by forfeit, Mayhew 3-2, Labecki 6-5, Noble 6-2 and Kolodziej 9-7.

"In our first match, I thought we were extremely tough," said Groshek. "I think not having a break between hurt us a little, but that's the host school's (Loras) advantage. I'm sure if we would have wrestled them fresh, we could have beat them.

"Our team looks very strong and will be ready for the conference meet in two weeks."

The Pointers traveled to Oshkosh on Tuesday before returning home to face Stout tonight at 7 p.m. in the Berg Gymnasium.

# Tracksters to 'wait-and-see'

**Sports Information Department**

A wait-and-see attitude is the approach head women's track and field coach Len Hill is taking when assessing his very young 1987 squad.

Hill will definitely need the hands of a sculptor to mold his squad into a competitive force in the WWIAC. "We have many new faces this year," said Hill. "Our team is very young, but I think we can surprise some people. If nothing else, just with our numbers."

This year's Pointer squad totals nearly 40 participants, virtually doubling last year's squad. It is this fact alone which leads Hill to look brightly towards the future of Pointer track and field.

The Pointers only lose three seniors from a squad a year ago which finished second and fourth at the indoor and outdoor conference meets, respectively. But these three comprised nearly one-quarter of their conference squad which numbered only 13 members.

Gone are national champion Michelle Reidl in the high jump (who set a national record of 5'10") and fellow all-Americans Cathy Ausloos (300M) and Jane Brilowski (4x400 relay).

Even though Hill admits these

three will be sorely missed, the Pointers return two-time all-American Carlene Willkom. The senior from Stanley-Boyd will be counted on heavily to bolster a squad which includes only one other senior (Kathy Seidl), a few juniors and the remainder freshmen and sophomores.

Other veterans Hill will rely on to perform consistently are all-Americans Carrie Enger (middle distance) and Barb Knuese (sprints) from a year ago.

Also looked to help considerably is Kris Hoel, an all-American in cross country two years ago. Also middle distance runners Cheryl Cynor, Seidl, Kay Wallander and sprinter Mary Ann Lemanski are key personnel back from last year's squad.

Field event performers Stacey Freiman (javelin) and Tammy Stowers (shot and discus) round out the Pointer veterans who Hill will depend on to form the nucleus of his squad.

Hill is also confident that a number of first-year performers have the potential to step into his program and contribute during their first campaign.

The list includes distance runner Amy Cyr, a national qualifier in cross country this past fall, who sat out last year's track season with a foot injury. Other distance running hopefuls are Kris Helein (Appleton West), a two-mile state qualifi-

er; Jenny Schoch (Glidden), Class C state champ in cross country as a junior and Beth Weiland, a versatile performer who will also be competing in the heptathlon.

Middle distance runners expected to contribute in their inaugural year are Sheri Hall, a transfer from UW-Madison who prepped at Stevens Point Area Senior High; Maureen Seidl (Kathy's sister) from Kewaunee who placed third in the State Class B 800 meters; Karla Warne from Clinton; Amy Kedrowski, a Stevens Point Pacelli graduate and Antigo graduate Nancy Woods who may also move up in distance, according to Hill.

Transfer Cheri Schopper from UW-Milwaukee via Clinton High School and Peshtigo graduate Rebecca Sherwood will also be looked at for support. High jumper Liz Sindlinger (Appleton West) closes out the list of recruits Hill will be counting on to help build his program.

Hill's goals for the upcoming season is to place in the top three at both the indoor and outdoor conference meets, respectively. Barring injuries, Hill feels this is a realistic goal for his team.

"Since we're so young, I won't put too much pressure on them to perform," said Hill. "All I can ask them to do is go out there and see what happens and have some fun. I hope we can learn and grow as the season progresses."

Photo by Paul Becker

The Pointers' Eric Gardow is boxed in between UW-Milwaukee players on Saturday night. IUW-SP returns to action this Saturday at 7:30 p.m. hosting UW-Superior.

## Hoopsters from page 19

Karla Miller and Patti Trochinski added 12 each. Jennifer Madsen led Wheaton with 13 points.

Another key for the Pointers was a 52-43 rebounding advantage, led by Sorenson who pulled down 11 and Miller who grabbed nine.

The Pointers connected on 28 of 60 field goal tries for 47 percent but had a horrible day at

the free throw line, converting only seven of 23 attempts. Wheaton shot only 25 percent from the floor (16 of 63) and also had problems at the stripe, sinking just eight of 20.

"This was a good tune-up for our game against Whitewater," said Wunder. "We'll need to get a total team effort and play well for the entire 40 minutes in order to beat them."

# Lady tracksters open at UW-L

by Karen Kulinski  
Sports Editor

Unable to lock down any first place finishes, the UW-Stevens Point women's track team placed second in the UW-La Crosse Open Track Meet on Saturday.

"I thought the team performed very well for this early in the season," said UW-SP coach Len Hill. "Outstanding performances came from Amy Cyr (1,500), Nancy Peasley (400), Kathi Seidl (600), Maureen Seidl (800), Kay Wallander (1,000), Becky Sherwood (300), Cheri Schopper (300), Kris He-

lein (3,000) and Jenni Bugni (3,000).

Hill was pleased with the performance of the relays. Members of the four by 220 relay include Sherwood, Liz Sindlinger, Amy Weyenberg and Schopper while running on the four by 440 relay were Peasley, Schopper, Wallander and Maureen Seidl. "Both relays did an excellent job with very little practice on exchanges," said Hill. "These people have not worked together before this year. I look for their times to come down as they improve their exchanges."

Hill named Cyr Runner of the Week. She placed third in the 1,500 meters in 5:07.9. Field

Performer of the Week was Kris Zander who finished sixth in the triple jump with a leap of 9.59.

"Amy ran a very smart race and pushed the pace in the middle when everyone else wanted to sit back and relax," said Hill. "She made it an exciting race. Kris made it to the finals and then improved her performance to score for us in her first collegiate meet."

Many Pointers were missing from action due to injury or illness. Hill is hoping the team will be healthy when Point travels to Oshkosh for a triangular on Saturday with UW-O and Whitewater.

# Five first places led SP runners

by Karen Kulinski  
Sports Editor

Despite first-meet kinks, the UW-Stevens Point men's track team still had an array of bright spots at the UW-La Crosse Open Track Meet on Saturday.

"This was a typical first meet for us," said Pointer coach Rick Witt. "We made a lot of mistakes, but at the same time, I saw some things that I liked very much. Our distance runners worked very hard over the winter and are in good shape. We won all of the events from the 800 through the two mile. As a matter of fact, we got two places in each of them and four in the two mile."

The Pointers captured five first place finishes to lead the

way. No team scores were kept in the meet. UW-SP also brought home three seconds and three thirds along with three fourths, four fifths and three sixths.

Arnie Schraeder paced the Pointers with a top spot in the 1,500 run in 3:52.4. Other firsts were turned in by Steve Allison in the 1,000 run in 2:19.5, Steve Wollmer in the 800 run in 2:02.2 and Tom Moris in the two mile run in 9:30.3.

"Arnie dominated the 1,500 with a national qualifying time," said Witt. "Allison and Al Gebert looked good in the 1,000 as did Wollmer and Curt Lepak in the 800. All of the guys in the two mile looked good."

The lone relay to capture first place was the four by 220 relay of Hap Wolfgram, Derrick Bass, Tim Jahnke and Peter Larsen in 1:39.2.

"The sprint relay looked much improved from past performances which is a credit to the work of coach Sheila Miech," said Witt.

Taking seconds were Keith Stoll in the high jump (6-6) and the four by 440 relay of Ted Blanco, Bass, Randy Gleason and Larsen in 3:37.9 while grabbing thirds were Blanco in the 600 dash (1:20.0) and Jim Sekel in the 220 intermediate hurdles (1:26.9).

"I thought Stoll did a nice job in the hurdles," said Witt. "For the first time, the weight throwers did a nice job. We have a lot of work to do if we want to be a good team, as we are competing in the premier Division III conference, and if we are not ready, we will find ourselves in the bottom of the pack."

**"The Best Thing About This Job is Either The Money Or The Flexibility."**

Connie Ducaine is a recent UWSP graduate and a telemarketer for Sentry Insurance. Her job is to set appointments over the phone for Sentry sales agents, who sell the new Payback policy.

"You get an hourly wage plus a bonus for each appointment you set. If you make four appointments a night, it comes out to \$5 an hour. If you make 8, it's \$6 an hour. And it's not just the money — you can also get 'telebucks' to win prizes.

The hours — 4:30-8:30, 3 nights a week — are great for a student. You can still study or go out after work. Or they'll let you adjust your work schedule around school.

"I wish Sentry would have had telemarketing jobs the whole time I was in school. I'm going to keep doing this."

To find out more about getting a great job like Connie's, you can meet with the Sentry recruiters Feb. 9 and 12, from noon to 3:30 p.m. Stop in to Career Services, Room 134 Old Main to fill out an application and set up an appointment.

Sentry Insurance

# Arctic fest slated for weekend

by Scott Huelskamp  
Staff Writer

The Stevens Point rugby club will host this weekend's Arctic Fest for the 10th consecutive year.

Arctic Fest is an annual weekend rugby tournament held during the winter in Stevens Point at the Intermural fields adjacent to Quandt Fieldhouse. Officials from each team will meet Saturday morning to randomly pick the matchups. Each team will play at least two games.

Stevens Point will field three teams — an "A", "B", and "Old Boys" squad made-up of Point rugby alumni. The Point "A" team captured third place in last years' consolation game.

The St. Paul Jazz Pigs, Marquette Rugby Club, UW-Stout and teams from Minnesota and Iowa have committed to play. At least 14 teams are expected to make-up the final field.

Point will be without the services of high-scoring back and kicker Mike Rapp due to a sore shoulder, and back Joe Wirth with a bad ankle.

"We started our winter practice two weeks ago and the new players are starting to play well," said back Dan Vaughn. "We have a chance to do pretty well in this years' tournament."

Games begin Saturday morning at 9 a.m. while the championship game is slated for Sunday afternoon.

## Moral Majority cont.

and about 80 others and sailed for the New World.

During their difficult passage to America, Brewster explicitly proclaimed his belief in the free exercise of faith but made no secret of his firm resolve to impose the Holy Discipline on everyone. This moral majority was the first to compel the understanding that separation of church and state did not mean separation of church FROM state. No doubt, Plymouth Rock saw many born-again Christians-- those who decide as adults to believe in Christ as their Saviour.

Just as in Holland, the moral majority became afraid when they were forced to live in harmony with people of other cultures and beliefs. Consequently, the Pilgrims had no other place to go to reinterpret that elusive if idyllic world that once supposedly existed.

Today, the moral majority and conservative alliance, say, as they did 200 years ago, that the values of the Puritan Establishment are being threatened. And while many are busy trying to nail Jell-O to that tree, our attention is being conveniently and deliberately distracted from far more critical issues.

When the Pilgrims met their first savages, words like "collectivism" began to creep into the American vocabulary. These savages, "a cruel and barbarous people" whose practices were such that a mere recitation of them caused "ye bowels of men to grate within them," left the Pilgrims with much moral dismay. The Indians, hunter-gatherers, believed that the land belonged to all people as a group. The moral majority didn't like this anti-Christian collectivist plan for one-world government.

Thus, the Indians became the first members of the left wing. The conservative Pilgrim absolutists referred to the Indians as "reds" and "fellow travellers"-- the worst kind of secular humanists. The Pilgrims knew they were the moral "right" in the eyes of God. When the Pilgrims met Squanto, a red collectivist, he told the Pilgrims that he was the last living member of the Samoset tribe which had been completely wiped out by smallpox. Certainly God was clearing the way for the "right" in this new land.

However, economics often made the religion and politics of the moral majority take back seats, even at the expense of their grating bowels. Trading for king beaver and sacred cod kept the Pilgrims at peace with the Indians for nearly 50 years. There was a growing disposition to consider not only what was religiously lawful, but what was practically expedient and profitable. The consequences of these changes have never been fully appreciated.

## Nutrition con't

etables, cauliflower, melons, potatoes and strawberries. These will give you the bonus of fiber and other nutrients as well as vitamin C.

Bear in mind that cooking, storing and processing may alter the vitamin C content in foods as the vitamin can be destroyed by heat, air and water.

As most vitamins are stored close to the skin in fruits and vegetables, don't peel--if you must, remove only a very thin outer layer. Cook vegetables by steaming, or in the minimum of water, until crisp. Store juices, fruits and vegetables in air-tight containers or wrap produce tightly in foil or plastic.

If you still feel that you require some sort of vitamin C supplement, take a multivitamin that meets and does not exceed the RDA of 60 milligrams a day.

## Angelfish

from page 20

seconds off her 500 free time.

Pointer coach Carol Huettig was optimistic about the performances at the Coe Invite.

"We swam remarkable considering we're in the middle of intense training," she said. "If everyone can get healthy and stay healthy, we'll be a threat to take the conference title."

Huettig was so pleased with the performance of Petrick that she has been nominated for WWIAC Swimmer of the Week.

# SPRING BREAK DAYTONA

*Style*

*\*We know our hotels ahead  
of time - unlike some of  
our competitors.*

## Spend Yours in Style with the DESIGNER'S DIFFERENCE

- Round trip transportation to beautiful Daytona Beach via modern highway motorcoaches.
- Seven nights accommodations at the Castaways Hotel, located directly on the beach and has the best possible accommodations to make a luxurious vacation.
- Optional one-day excursions to Disney World, Epcot Center, Deep Sea Fishing, Sea World, Wet-N-Wild, Party Ship, Hawaiian Luau, and many more attractions.
- Free pool deck parties with music and refreshments. At the hotels that we use, our pool decks are much larger and more popular. Consumer companies like this and have agreed to run contests and giveaway promotional items on all of our pool decks.
- A professional staff is always present to make your travels worry free.
- Special discounts have been arranged with Daytona Beach merchants, including nightclubs, restaurants, gift shops and much more.
- Special car rental prices for all students 18 years and older. At most of our hotels, the cars will be delivered.
- All taxes and tips are included.
- Our company, along with the hotels, local businesses and the Chamber of Commerce have arranged special events and activities for under-aged students.
- Beverages allowed on bus.
- D.J. poolside, daily.

## ANNOUNCEMENTS

The Association for Fitness in Business, a professional organization, will hold an organizational meeting Wed., Feb. 18 in the Wright Lounge of the UC from 7 until 9 p.m. The keynote address will be given by Dr. Bill Hettler of the University Health Center. All students interested in the field of Wellness and Health Promotion are invited to attend. Other interested students are also welcome.

Announcement: A group will be held on campus for people who want help in dealing with the death of someone close. Six Thursday afternoon sessions will be held from 4 to 5:30 p.m. in the Dodge Room of the UC, beginning Feb. 5. Sponsoring Organizations are the Newman Student Community, United Ministries in Higher Education, and the Lutheran Student Community.

Mock Interview Sign-up for Juniors and Seniors is going on now thru February 13 in CCC 108 and 304B. Limited space is available so sign up today! Sponsored by Human Resource Management Club.

90FM will hold a general staff meeting on Thursday, February 5 at 6 p.m. in room 125 of the U.C. If you are a staff member, your attendance is expected. If you aren't a staff member and want to be loved and needed like our staff members, there is a meeting for new people on Monday, February 9 at 6 p.m. in room 125 of the U.C. This is for all areas of 90FM, including public relations, business, advertising, announcing, radio production, radio plays, and documentaries.

UWSP Army R.O.T.C. department will sponsor its annual winter lab to be held Feb. 6, 7 and 8. Participants will cross country ski, fire shotguns, enjoy the winter weather, and earn a phy.ed. credit.

Cross Country Ski Club meets Tues., Feb. 10, 5:30 P.M., Room 101E (off Main Lounge in UC). Elections will be held.

Student Government President and Vice President applications are now available at the SGA office, lower level UC. Candidates must run as a team, have at least one year remaining at UWSP, a 2.5 GPA, a six credit load, and remain in Point for the summer. Prior leadership experience is required.

Student Senate applications are now available at the Student Government Association office, lower level UC. Interested people may stop at the SGA office before Feb. 18.

Hey all you students! It's not too late to start building your resume. A.C.T. is still looking for volunteers in many of their programs for this semester. Stop by at our booth in the UC Concourse and sign up today.

Hey all you students!! Looking for a social place to hang out with your friends while eating good food? Well, look no more! Come down to Jeremiah's located in the U.C. for a change. We feature daily specials which will send your taste buds wild! See you there!

Speech and Hearing Tests (part of the admittance process to the Professional Education

Program) will be held on Tues., Feb. 10, 1987 in the School of Communicative Disorders (lower level COPS) from 4:00-5:30 p.m. Professional Education applications and/or Speech and Hearing information may be obtained from the Education Advising Center (446 COPS).

Now showing in the Edna Carlsen Gallery through March 1 is Mark Brueggeman's *Sabbatical Exhibition "The Dancer, not the Dance."*

Personals cont.

OK, so we got the shaft for Homecoming; we don't give up easily...Watson Hall is gonna raise a little hell for Snolympics. Burroughs is no obstacle.

Dear Sweetums, We've been seeing each other for six years now, and I think it's about time that I give you a KISS. A giant Hershey's Kiss. Love, Stevie.

White sand, blue water, sun shining and tan bodies all over. Sounds good, doesn't it? Well, what are you waiting for? Sign up for SPRING BREAK. Where? In the University Activities Complex. But hurry, the seats are going fast. Sponsored by UAB.

Burroughs Hall--let's twist and shout! Snolympics '87 is a sure win.

Scot, Bernie, Eric, you guys get your butts over to the UC and sell some kisses. The girls want 'em and you guys got 'em. The little Weber kid.

Artists: Want to earn some money and gain local recognition at the same time? Sell your work on a consignment basis for the student run store The Attic, opening Feb. 23. Please call Chris at 345-0147 or Anne at 341-3701 for more information.

Deb and Judy: KABOKIE! Thanks for a fun trip down memory lane last Wednesday. You guys are the best and I miss ya! See ya every other week. Sherry.

I pity 'da fool that messes with Burroughs Hall: Snolympics '87.

T--I love you very much. Thank you for being so considerate. Everything is going well. Schnookie.

Make sure that you clip the National College Television programming times out of the Pointer this week. Put it by your T.V.

Sigma Tau Gamma hopes everyone had fun at our party Friday night. Now come back and find out about our fraternity and little sisters. Look for upcoming rushes.

Surrender Burroughs! Snolympics '87: Time for someone else to take the trophy.

Hey Burroughs Hall! Get out those kamikaze headbands--the Snolympics trophy is ours for keeps this year!

Dear Sweetheart, Since I'll be gone for Valentine's Day, I'm sending you a kiss you'll never forget. A big sweet Hershey's Kiss! They're almost as sweet as my own. Love, Skeeter

Classic rock concerts, adult cartoons, Pointer games and "Trivia Quest"...They're all part of NCTV/SETV programming on cable channel 3 this semester.

The divine win: Burroughs Hall--Snolympics '87.

Miss Magee, you're my favorite sick person. Don't get to stressed with your 2 jobs or I'll squish. Mr. Magee.

SETV is looking for trivia teams for the new trivia TV game show "Trivia Quest." Stop by in CAC 331 or call us at 346-3068.

Snolympics '87: The year Knutzen Hall stole the trophy. (Stand back, Burroughs Hall.)

Get involved. 90FM is holding a general staff meeting tonight at 6 in room 125 of the UC. If you wish to join the 90FM staff, be there Monday, same room, same time to add a few more lines to your resume.

Thomson Hall is psyched for Snolympics. Hey Burroughs Hall: heads are gonna roll.

## Concert in Quandt

Photos by Paul Becker and Tom Charlesworth.

The world of major concerts visited Stevens Point Sunday night when The Fabulous Thunderbirds and Jason and The Scorchers performed. The band's equipment trucks arrived from St. Paul and unloading began early Sunday morning, with road crew members and students with Technical Services and UAB working nearly to noon. The rest of the afternoon was spent setting up and testing alsl equipment. The bands played to a small crowd of 900 for over 3 hours.

The sound technician setting up the audio mixing boards.

Warner Hodges, the Scorchers drummer.

Kim Wilson, lead singer for the T-Birds, on harmonica.

Ringenberg, the "Jason" in the Scorchers.
