Carbon monoxide injures 72 motel occupants

by Chris Stebnitz
News Editor

Rescue squads were called to Comfort Suites Motel here in Stevens Point last Friday evening when 72 people reported they were feeling nauseous and dizzy after spending time in the motel's pool area.

Officials have determined that the illnesses were caused by carbon monoxide poisoning which had been released by the pool's heating device.

Nancy Dulak, Comfort Suites' general manager stated that the problem was confined to just the pool room. She said, "The leak was confined to the swimming area. The gasses did not go through any ventilation ducts to occupants' rooms. Those people were in no danger."

Official reports say that the rescue squads were called after 5:30 p.m. and sick occupants were taken to St. Michael's hospital in Stevens Point. All 72 people were treated and released that night.

Dulak says that there is an investigation as to why this happened. She said, "The situation is being handled through the installers of the heater and the company that makes the heater is also helping out with the investigation."

"It smelled like incompletely combusted gas."

*-Dale Hanson
Wisconsin Public
Service*

Dale Hanson, gas supervisor for Wisconsin Public Service, was called in that night to check out the situation and to make sure that everything was safe for occupants to move back in.

Hanson said that when he entered the building the smell of carbon monoxide was evident. He said, "Sometimes you can smell the gas and sometimes

you can't. That night when I got there, I could smell it. It smelled like incompletely combusted gas."

Hanson says that the biggest reason for carbon monoxide poisoning is the fact that there is no oxygen to bond with the carbon. He also said that most of the time the reason carbon monoxide gets circulated is because of plugged chimneys or old poorly ventilated heating systems.

Some of the symptoms that people get from prolonged exposure to the gas are dry throat, tiredness, dizziness and nausea. Hanson warns people to get their furnaces and gas water heaters checked every year. If you do begin to feel any of these symptoms see a doctor and get your furnace checked immediately.

Wisconsin Public Service offers a home inspection service for off-campus tenants and they can determine if work needs to be done in order to make the heater safe.

Cold weather brings new problems

by Dennis Trecek
Contributor

The recent spell of unseasonably cold weather has forced furnaces to go into overdrive to provide adequate warmth for our homes. For this reason it is important to realize that a defective furnace can cost you a lot more than money. It may cost you your life.

Carbon monoxide poisoning is a silent killer, the symptoms may appear similar to the "flu" but it may actually turn out to be your "flue". Your house could be so air tight that your furnace isn't receiving enough air. Dale Tetzloff, and employee of Wisconsin Public Service says that "carbon monoxide is produced by the incomplete combustion of fossil fuels," like wood in a fireplace, the engine in a car or the burning of coal.

The reason carbon monoxide is particularly dangerous is that it gives practically no warning when it occurs. It's a colorless, odorless and tasteless gas that is extremely toxic because it prevents the blood from absorbing vital oxygen. "The symptoms of exposure to carbon monoxide include dizziness,

sleepiness, and headache which can very easily be mistaken for the flu," Tetzloff said.

Eventually, as carbon monoxide is absorbed into the blood the affected person will develop nausea and vomiting followed by an irregular heart beat. In the most acute stage the victim may become pale with bright red lips and loose consciousness. Further exposure could result in brain damage or death. Although carbon monoxide is extremely toxic, natural gas is not. Natural gas produces carbon monoxide only when it is improperly burned and has an inadequate air supply.

To prevent carbon monoxide poisoning, Wisconsin Public Service suggests the following safety tips: Do not run a gasoline engine in a confined or enclosed space. Provide enough ventilation in your home when burning combustible materials in stoves, fireplaces or heating equipment. Make sure all fuel burning appliances are properly installed and adjusted, a yellow or orange flame in the furnace should be checked by an expert.

If you think someone is suffering from carbon monoxide poisoning: Get the person into fresh air and call for emergency help. Open all doors and windows for ventilation and call your gas company.

Health Center R.N. claims damages

by Chris Stebnitz
News Editor

Cathryn Eckberg, registered nurse employed with the UWSP Health Services filed a notice of claim with the State Attorney General's office on Tuesday, November 5.

The claim states that Eckberg provided information to Dr. Hettler alleging mismanagement, waste of public funds and dangers to public health and safety. Specifically, Eckberg provided information concerning overpayment of physician's assistants, improper recruiting and training practices, and poor patient care.

According to the claim, on or about July 9, 1991, Eckberg was advised that her hours of work would be unilaterally modified, resulting in reduction of hours and/or major changes in her work schedule with resulting losses in wages and benefits.

Eckberg is demanding a return to her prior work schedule, compensatory damages for lost wages and benefits, which continue to accumulate, damages for emotional distress, and punitive damages.

When asked about the claim brought against Hettler, Eckberg stated that, "I have no comment at this time and will not until after I speak with some people first."

Unlike the previous claims brought against the university, Eckberg's claim is being handled by a firm in Madison and not by Jared Redfield.

This claim will also be investigated by the committee set up by Chancellor Sanders and headed by Vice Chancellor Thoyre. New allegations like this one will probably push the findings back later than expected.

William Hettler and Bill Moyer Director of Student Life were not available for questions.

IN THE REAL WORLD

The real world was shocked last Thursday with the announcement made by L.A. Lakers star, Magic Johnson that he had contracted the HIV virus and that because of his illness, he would be stepping out of basketball forever.

Magic, who did not play in any of the games so far this season because of symptoms that were credited to the flu, announced that he had been tested for the HIV virus and that the tests were positive.

Doctors say that Magic does not have full-blown AIDS as of yet, but he does have the HIV virus which will eventually result in the development of AIDS.

Magic says that instead of playing basketball, he will be trying to educate people on AIDS and how to protect themselves from the virus.

Firefighters in Chicago Friday discovered 10 bodies in a house, who were apparently victims of carbon monoxide poisoning.

The family, a couple and their eight children ages 11 to 25, apparently died when a furnace circulated the deadly gas through their house during a record cold wave, said John Bartgen, a Chicago fire battalion chief.

Carbon monoxide readings in the house were 100 parts per million, well above normal, said Mike Cosgrove, the fire department spokesperson.

Peter Munoz, a spokesman for Peoples Gas, Light & Coke Co., which supplied natural gas to the house said, "Apparently, a spot weld in a flue pipe gave way, leaving a 3-inch gap (that) caused by-products of combustion, including carbon monoxide, to recirculate throughout the house."

Peoples Gas warned residents this week that carbon monoxide fumes can accumulate in buildings as a result of faulty heating equipment or blocked chimneys. They also warn that carbon monoxide is a potentially deadly gas that is usually colorless, tasteless, and odorless.

Nationalists in the secessionist enclave Sunday forced the retreat of nearly 1,000 troops that had been sent to enforce emergency rule imposed by Russian Federation President Boris N. Yeltsin.

The peaceful departure of the soldiers a day after they arrived - was a slap in the face to Yeltsin, who is cracking down hard on his first challenge from separatists.

In Gronzy, thousands of people rallied on Freedom Square for a second day to protest Yeltsin's decree.

David Duke made his presence known to the real world yet again. Campaign officials reported that on Monday, Louisiana gubernatorial candidate David Duke, was chased into a television studio by an angry dirt-throwing mob.

A bodyguard said that he was struck in the head trying to shepherd Duke into the studio. "I don't know if it was a rock or what. It hurts," Dan Bennett said, touching a bump on his forehead.

Apparently the crowd was screaming, "Nazi," and whirling clumps of dirt at Duke. "I wish they would take me for my word that I repudiate my past," Duke sighed as he entered the studio. The former Klu Klux Klan leader spoke at American Nazi rallies during the 1980's.

Duke also founded the NAAWP (National Association for the Advancement of White People) after leaving the Klan in 1980.

After Duke was escorted inside the studio the crowd dispersed surrendering their clumps and returning home. David Duke has been through a lot lately with the rest of the candidates and their mud-slinging of his earlier political viewpoints; now he has the public on his back flooding him with a barrage of "dirt-slinging."

In other important political news, some newspapers around the country who run Gary Trudeau's comic strip "Dooonesbury" are now refusing to run his current strips that parodies Vice President Quayle's past alleged drug use.

According to Trudeau's informant, a convict still serving time in prison, Drug Enforcement Agency, DEA, officials covered up the fact that Quayle used, and advertised the use of, illegal drugs while in the Senate.

The informant believes that officials covered the information up when President Bush was about to name his Vice Presidential choice, Dan Quayle.

Newspapers are starting to pull their Dooonesbury strips because of various political decisions regarding their newsroom ethics. Newspapers that are continuing to run the strips believe that it is only a comic strip and that they are written merely as a fictional medium that comments on reality.

Californian professor speaks on Columbus myths

by Bobbie Kolehouse
Coordinator

Far from being a hero, Native Americans view the arrival of Columbus as a disaster from the beginning. Dr. Donald Grinde, Yamasee, and professor of history at the University of California, Riverside, discussed the myth of Columbus and its impact on American lives, in his lecture, "Breaking Down and Rebuilding the Myth of Columbus" held in the University Center, Wednesday, November 6.

The program was co-sponsored by the Native American Center, AIRO, and SGA-Cultural Diversity Affairs and explained Native American concern over the upcoming quincentennial celebration of Columbus' "discovery" of America.

"American history will have to be changed and rewritten," said Grinde, "and take into account the Native American perspective as it has taken [into account] black and women's perspectives."

Dr. Grinde is author of several books including *The Iroquois and the Founding of the American Nation*. In addition he has written many articles on Native American political history and has been a consultant for the Smithsonian Institute.

As to the future relations between the cultures, Dr. Grinde said, "[It's] possible for Indians and non-Indians to work together on scholarly projects." That there is a "face to face dialogue" established acknowledges the Native American voice, Grinde said. A voice not heard in 1892, but present in 1992.

In 1892 Native Americans were unable to resist the myth of Columbus, a myth steeped in the glory of American Imperialism, Dr. Grinde said, but 1992 is different.

An article written by members of the American Indian Movement, that appeared in the October 12, 1991 *Denver Post*, said to celebrate Columbus Day, is to celebrate "our own genocide," and in the "quincentenary year, [we will] confront the continuing racism against Indian people."

American Indian activists, scholars, teachers and leaders are now able to direct public attention to the realities of Columbus' behavior.

History professor Dr. Donald Grinde spoke to his audience as a guest of the Native American Center, AIRO, and SGA-Cultural Diversity Affairs (photo by Dennis Chapman)

SGA Focusing On Students

Campus Greens were recognized by Senate. This organization will be focusing on environmental, political and other issues.

Art 491 was accepted as an honorary organization.

American Water and Resources Association (AWRA) was allocated \$308. This money was used for students to participate in a conference.

SGA Cultural Diversity received \$250 to go toward campus programming.

The Neutrality on Reproduction Stance of United Council was discussed at Senate. This topic

was postponed to a later date. If you would like more information or would like to voice your opinion please call the office at 346-4037.

One plan was brought before Senate called the Cultural Enrichment Action Plan. This plan is to change the room names in the U.C. These names would be changed to Women and Cultural Diversity People from Wisconsin. This plan also includes changing the time tunnel into a Cultural Diversity mural.

Senators positions are open. Applications are available at the office in the basement of the U.C. 346-4037

AIDS era calls for responsible sex Wisconsin HIV cases on the rise

by Sarah L. Newton
Editor-in-Chief

Aquired Immune Deficiency Syndrome (AIDS). Except for the one thing we all feel—fear, it means something different to all of us.

To the average college student it's something that "I'll never have to worry about," to the average parent it's a tragedy that "will never happen to my child," and to Magic Johnson it's the beginning of a slow, miserable end to the wonderful life.

When I was younger and my father worried extensively about me every time I set foot outside the front door, I would always tell him, "Dad, what's the matter, don't you trust me?" "Yes, Sarah," he would say, "of course I trust you, it's everyone else that I don't."

Point taken. Who ever would've thought that something your parents taught you would actually come in handy?

With most of us being in the "best years of our lives" time span, it would only follow that we aren't exactly expecting to contract AIDS or the HIV virus which causes AIDS.

True, it may never happen to you, but instead to someone you

choose (or don't choose) to sleep with.

As of October 25, 1991, there were 1,030 reported cases of AIDS in Wisconsin, compared to 807 one year ago. As of September 30, 1991, there were 191,601 reported cases in the United States compared to 152,126 one year ago.

Statistically, for every one case of AIDS, there are 25-100 infections of HIV which are unreported. This amounts to 10-12,000 infections of HIV in Wisconsin alone.

According to Dr. James Zach, there have been no positive HIV tests at UWSP since the Health

days we won't have any."

One point that Zach emphasizes is that people who are interested in being tested for HIV, and have therefore been in a position to contract the virus must realize the importance of being tested for other STD's also. Zach says that HIV is on its way into the mainstream of STD's (like Gonorrhea and Chlamydia which can cause sterility), and that it needs to be treated as any other disease.

In other words, the stereotypical high risk groups for HIV; like homosexual men, IV drug users and hemophiliacs, are becoming less and less defined.

records of the test ever being taken.

Because of this, there will be no way for the Health Center to contact those who test positive for HIV, ultimately people who could have AIDS, and could be spreading it to others.

Believe it or not, UWSP has an AIDS policy and AIDS guidelines. Imagine that. Basically, these guidelines follow the procedure that would occur if/when someone tested positive for AIDS on our campus, student or faculty.

There are a lot of statistics here, and perhaps they sound slightly preachy. In my opinion, it boils down to responsibility, peace of mind, and another thing my father told me when I left for college. "You can have fun, just don't hurt anyone."

Sex these days is a matter of considering not only other people's feelings, but their health, your health, and the overall future of everyone involved.

Perhaps Magic Johnson's new wife and his unborn child still have a chance. Perhaps one doesn't, and one never did. Regardless, if baby Johnson is ever given the opportunity, I'm sure she/he'll practice safe, responsible sex.

"One day, heterosexual men and women will be as much at risk . . . as anyone else."

Service started testing in the mid 80's, "We do quite a few [HIV tests], probably 300 or 400 since we began."

Carol Hebert, Head Lab Technician at the Health Center, said the number of tests has increased considerably since last year (72 tests), but there's no way to accurately count this semester's tests, "Some day's we'll get three or four, some

One day, heterosexual men and women will be as much at risk for HIV and AIDS as anyone else.

Presently, HIV tests at the UWSP Health Service are handled on an anonymous basis. This means that when someone gets the results back from an HIV test, they walk with them. Even if the results are positive, the person leaves with all

Magic Johnson's AIDS instigates hope for cure

by Lara K. Burke
Contributor

Well how do you like that? Magic Johnson, that one person we were all so sure was going to go straight to Heaven because of what he's brought to Basketball, has finally gotten around to showing us he's only human. How?

By proving, with one quick shot, that it is possible for ANYONE to contract the HIV virus.

No, I won't go into all the details about how you get it, how to prevent it, and all of that.

What I will tell you is this: if we lose hope on Magic now, that will really be the end. You see, there is the possibility of living with this disease, even though 90% of the great U. S. hasn't come to realize this yet.

Reprinted with permission from Joseph Heller and the Green Bay Press Gazette

We can conquer HIV and the AIDS disease the way we get closer to conquering all forms of cancer every day.

Suzi Landolphi, who presented the show "Hot, Sexy, and Safer" to a packed PBR room last spring, gave us this same message.

We have to learn to think like conquerors, instead of admitting defeat the minute we find out Magic Johnson has the HIV virus, or our father has cancer, or our best friend just donated blood, and the Red Cross, after testing her bold, sent a letter informing her she is HIV positive. It is possible to get past this, just

as it is possible to get past any mountain put before us.

It doesn't matter what your religion says, or what your friends profess to believe; what matters is that you listen to the facts, keep them in your head, and never, ever give up hope for a cure.

Why AIM opposes Columbus and Columbus Day parades

When the Taino Indians saved Christopher Columbus from certain death on the fateful morning of October 12, 1492, a glorious opportunity presented itself. The cultures of Europe and the Americas could have merged, and the beauty of both races could have flourished.

Unfortunately, what occurred was neither beautiful nor heroic. Just as Columbus could not, and did not, "discover" a hemisphere that was already inhabited by nearly 100 million people, his arrival cannot, and will not, be recognized as a heroic and celebratory event by indigenous peoples.

Unlike the Western tradition, which presumes some absolute concept of objective truth, and consequently, one "factual" depiction of history, the indigenous view recognizes that there exist many truths in the world and many legitimate recollections of any given historical event, depending on one's perspective and experiences.

From an indigenous vantage point, Columbus' arrival was a disaster from the beginning. Although his own diaries indicated that he was greeted by the Taino Indians with the most generous hospitality he had ever known, he immediately began the enslavement and slaughter of the Indian peoples of the Caribbean islands. As the eminent Columbus biographer Samuel Elliot Morison admits in his book, *Admiral of the Ocean Sea*, Columbus was personally responsible for the enslavement and murder of indigenous peoples. He was personally responsible for the design and operation of the encomienda system that tied Indians as slaves to the lands stolen from them by the European invaders.

As detailed in the *American Heritage Magazine* (October, 1975), Columbus personally oversaw the genocide of the Taino Indian nation of what is now Haiti and the Dominican Republic. Consequently, this murderer, despite his historical notoriety, deserves no recognition or accolades as a hero; he deserves no respect as a visionary; and he is not worthy of a state or national holiday in his honor.

Defenders of Columbus and his holiday argue that indigenous peoples unfairly judge Columbus, a 15th century actor, by the moral and legal standards of the late 20th century. Such a defense implies that no moral or legal constraints applied to individuals such as Columbus, or countries, in 1492. As Robert Williams details in his book, *The American Indian in Western Legal Thought*, not only were there European moral and legal principles in 1492, but they largely favored the rights of indigenous peoples to be free from

unjustified invasion and pillage by Europeans.

Unfortunately, the issue of Columbus and Columbus Day is not easily resolvable with a disposition of Columbus, the man. Columbus Day as a national, and international, phenomenon reflects a much larger dynamic that promotes myriad myths and historical lies that have been used through the ages to dehumanize Indians, justifying the theft of our lands, the attempted destruction of our nations, and the genocide against our people. Since the 15th Century, the myth of Columbus' discovery has been used in the development of laws and policies that reek of Orwell's doublespeak: theft equals the righteous spread of civilization, genocide is God's deliverance of the wilderness from the savages, and the destruction of Indian societies implies the superiority of European values and institutions over indigenous ones.

Columbus Day is a perpetuation of racist assumptions that the Western Hemisphere was a wasteland cluttered with savages awaiting the blessings of Western "civilization." Throughout this hemisphere, educational systems perpetuate these myths--suggesting that indigenous peoples have contributed nothing to the world, and, consequently, should be grateful for their colonization and their microwave ovens.

As Alfred Crosby, Kirkpatrick Sale, and Jack Weatherford

have illustrated in their books, not only was the Western Hemisphere a virtual ecological and health paradise prior to 1492, but the Indians of the Americas have been responsible for such revolutionary global contributions as the model for U.S. constitutional government, agricultural advances that currently provide 60 percent of the world's daily diet, and hundreds of medical and medical techniques still in use today.

If you find it difficult to believe that Indians had developed highly complex and sophisticated societies, then you have been victimized by an educational and social system that has given you a retarded, distorted view of history. The operation of this view has also enabled every country in this hemisphere, including the U.S., to continue its destruction of Indian peoples. From the jungles of Brazil to the highlands of Guatemala, from the Chaco of Paraguay to the Supreme Court of the United States, Indian people remain in a perpetual state of danger from the systems that Christopher Columbus began in 1492.

Throughout the Americas, Indian people remain at the bottom of every socio-economic indicator, we are under continuing physical attack, and are af-

forded the least access to economic, political, or legal redress. Despite these constant and unbridled assaults, we have resisted, we have survived, and we refuse to surrender any more of our homeland or to disappear into the romantic sunset.

To dignify Columbus and his legacy with parades, holidays and other celebrations is intolerable to us. As the original peoples of this land, we cannot, and will not, countenance social and political festivities that celebrate our genocide. We are embarking on a two-pronged campaign in the quincentenary year to confront the continuing racism against Indian people.

First, we are advocating that the divisive Columbus Day holiday should be replaced by a celebration that is much more inclusive and more accurately reflective of the cultural and racial richness of the Americas. Such a holiday will provide respect and acknowledgment to every group and individual of the importance and value of their heritage, and will allow a more honest and accurate portrayal of the evolution of the hemisphere. It will also provide an opportunity for greater understanding and respect as our societies move ahead into the next 500 years. Opponents of this suggestion react as though this proposal is an attack on an ancient, time-honored holiday, but Columbus Day has been a national holiday only since 1971--and in 1991, hopefully, we can correct errors of the past, moving forward in an atmosphere of mutual respect and inclusiveness.

Second, and related to the first, is the advancement of an active, militant campaign to demand that federal, state and local

authorities begin the removal of anti-Indian icons throughout the country. Beginning with Columbus, we are insisting on the removal of statues, street names, public parks, and any other public object that seeks to celebrate or honor devastators of Indian peoples. We will take an active role in the removal of anti-Indian monuments and icons, and we will take an active role of opposition to public dis-

plays, parades and celebrations that champion Indian haters. We encourage others, in every community in the land, to educate themselves and to take responsibility for the removal of the anti-Indian vestiges among them.

For people of goodwill, there is no better time for a re-examination of the past, and a rectification of the historical record

Early Ice Northern Pike

by Buck Jennings
Outdoors Editor

Well, it's no secret that I've been mighty pent-up over not having been ice-fishing for so long. This past Friday I finally had a chance to relieve myself on the ice.

I decided to try for Northerns on a local backwater. The mid-day sun caused the ice to crack and bellow as I gingerly tested its strength.

Being the first angler on new ice, the sounds of cracking are a bit disconcerting. I found the ice to be nearly four inches thick, clear and solid.

I typically look for Northerns in shallow water, especially on early ice. As snow piles up and weeks begin to decay, oxygen will become scarce in the shallows and pike will head for deeper water. When fishing unfamiliar waters, run your line of tip-ups from about four feet of water to about twelve feet of water, don't automatically rule out this deep water. As just your set according to the depth receiving the most strikes. Nine times out of ten it will be shallow.

I set out three tip-ups in four feet of water baited with large golden roaches and began the wait. While waiting for a flag, I walked the ice over shallow water. The ice had frozen so clearly that I could see weeds, and the sandy bottom below.

Within five minutes I had my first flag. Within five minutes and one second I had fallen on the ice and smashed my knee.

"Snake" (photo by Buck)

Northern was going gonzo on the ice.

The action continued. Over the next three hours I got about nine flags and caught only four Northerns. The fish were hitting the baits and making their first, short runs. Usually, after the initial run, a fish will turn the bait and begin to swallow it before making a second run.

Today things were different. When I tried to set the hook on the second run I would feel it take out of the bait. The fish still hadn't begun to swallow it.

I adjusted to the situation and began setting the hooks during a third run.

Be aware of this possibility if you are losing a lot of fish. Be careful not to let the fish take the bait for too long, as a deeply hooked fish stands little chance of survival upon release.

When fishing for Northern pike, release as many fish as possible. Northerns are not blue gills, and certain populations can sustain little fishing pressure.

In the Pointer issues one and two I discussed water quality in the Wisconsin River. The bottom line is that I would advise that no-one eat fish from the waters of the Wisconsin River. Release them.

Writing Contest Update

Whoa, what an overwhelming response I've received for my writing contest. I've got an army of manuscript readers pouring through the entrees and trying help me decide the winner.

I'd like to make an announcement to the author of "I Was Big-Foots sex slave." While it is a captivating, romantic, exciting and twisted tale, were it the winner I could not print it due to graphic descriptions and explicit language. And also, to the author of "I Fished With Elvis and Caught a 15 Pound Carp." Come on. Do you really expect me to believe that you caught a 15 pound carp?

For those of you who might have missed last week's Pointer, I will recap. I am sponsoring a writing contest wherein, the writer of the craziest, based on truth outdoors story will win a guided luxury ice-fishing expedition.

Well, keep those entrees pouring in. I will do my best to select a winner. And remember, void where prohibited by law.

The fish was running hard as I neared the tip-up. After a short struggle, an 18 to 20 inch snake

DNR Sells Bonus Tags

A record number of available Hunters Choice Permits this year guarantees that many deer management units in the northern part of the state will have plenty of leftover permits. These "Bonus Permits" will be sold on a first come, first serve basis at many DNR locations around the state. In the DNR's North Central District, available bonus permits will be sold the weekend of November 16 and 17 from 8 a.m. to 4:30 p.m. and during normal business hours the week of November 18. The Bonus permits will cost \$12 each and \$20 each for nonresidents. No hunter is allowed more than two antlerless Bonus Permits for the 1991 deer gun hunting season. If a hunter has already received two Bonus Permits in the initial drawing through the mail, that hunter is not eligible to purchase anymore through this special issuance. If the hunter has received one Bonus Antlerless Permit through the mail, the hunter may purchase one more Bonus Antlerless Permit.

Bonus Permits will be available at the following locations:
-Woodruff Area Office, County Highway "J", Woodruff, (715)356-5211

-DNR District Office, 107 Sulliff Ave., Rhinelander, (715)362-7616

-Antigo Area Office, 1635 Neva Road, Antigo, (715)627-4317

-Wausau Office, 5301 Rib Mountain Drive, (715)359-4522

-Wisconsin Rapids Area Office, 1681 Second Ave. So., (715)421-7800

Bonus Antlerless Permits may be purchased for a deer management unit other than the unit indicated on the Hunters Choice Permit or Bonus Antlerless Permit already in the hunter's possession.

To purchase a Bonus Antlerless Permit, hunters must bring with them their valid 1991 hunting license. Bonus Permits must be purchased in person. No purchases for others will be permitted.

Safety First On Early Ice

by Buck Jennings
Outdoors Editor

When fishing early ice remember to put safety first here are a few tips to help you prevent getting a soaker or drowning.

Fishing in pairs. This way you will have some help should you fall through.

Tell another party where you plan to fish and what time you expect to come back. This way they will know where and when to come looking.

Carry a long pike-type stick and two ice picks and rope when first venturing out on new ice. A long stick will help prevent your total submergence should

the ice break. Ice picks will help you claw out on slick ice. Have your partner walking behind you carrying the rope. Place a couple loops in the end of the rope. Rope can be hard to grip with wet, frozen hands.

Wear light clothes and expect to swim. One thing about falling through the ice is that you never expect it. Expect it.

Have a good knowledge of the water you fishing and try to stay over shallow water where possible, a hard bottom. Soft muck can further hamper your attempts to get out of icy water.

When leaving questionable ice back-track, and follow your

own footprints back to shore. I've fallen through the ice less than five feet away from where I'd set a tip-up because I walked a different route.

Check the ice thickness with your ice auger often. While this is not fool-proof it can give you an idea of what to expect.

If you plan to drive on the ice, in my opinion you are A; on drugs or B; Lazy, independently wealthy (so you can afford the thousands of dollars in recovery fees and DNR fines it will inevitably face upon dunking your vehicle), and have no conscience (thusly are not bothered by the environmental impact

and its associated chemicals have on an aquatic environment, or don't care that you might be irritating the hell out of your fellow anglers). If you fall into one of these categories, tie a length of rope and a buoy to your vehicle. This will facilitate its recovery should it fall through. Just for fun, give your insurance company a call and see what they think about the idea.

Finally, use your head. Don't take unnecessary risks and do not mix booze with fishing. If you must drink, do it off the ice. You'll probably enjoy both experiences better.

CNR Sponsors Speaker

As winter nears, back yard bird feeders play an increasingly important role as a food source for urban birds. Song-birds provide colorful variety and diversity to back yard wildlife. Fill feeders on a regular basis, as local birds will come to rely on them as a dietary supplement during the lean winter months. (File Photo By Al Crouch)

Ever notice how men and women perceive conversations differently? Few people fully understand the implications of those differences or how to consciously select appropriate language strategies in order to express their empathy, assert their authority, build consensus, and demonstrate their self-confidence.

Dr. Dan Dieterich will explore the topic of Men, Women and Language on Monday, November 18 at 4 p.m. in Room 112 of the College of Natural Resources Building.

Dr. Dieterich is a professor of English at UWSP and has worked in the Academic Achievement Center on Campus for the past fifteen years. He also serves as a writing consultant for several companies, including First Financial Bank and the Wausau Insurance Company.

His interest in gender differences in language sprang from his work on the committee on Public Double Speak, a group that studies public language and its misuse for the National Council of Teachers in English.

After studying sexist language, Dieterich became interested in how sex differences affect language. He uses a

variety of sources to gain information on this subject, including the popular book by Deborah Tannen entitled *You Just Don't Understand*.

This colloquium is the second in a series of four, sponsored by

the College of Natural Resources, UWSP. For further information on this, or any other colloquium presentation, contact Dr. Richard Wilke at the College of Natural Resources, 346-2853.

Raptor Presentation At Schmeckle

by Wendy Wagner Kraft
Staff Writer

Which bird uses spider's silk to weave their tiny nests? And, which builds their wall to wall dwellings out of mud? Find out the secrets behind the diverse nest structures created by birds this Sunday, November 17 at Schmeckle Reserve's program entitled "Bird's Handiwork: Nests." This program, for adults, will begin at 2:00 P.M. in the reserve's visitor center and last until 2:30 P.M.

November 18 for "Roadside Raptors." A falconer and live bird will be on hand for this program on Wisconsin raptors. The presentation will begin at 7:00 p.m. and last until 7:30 p.m. in the Schmeckle Reserve Visitor Center. All age groups are welcome and the best part of all is that you needn't spend a dime for either event! You can call Schmeckle Reserve for more information at 346-4992.

Once you've discovered the secrets behind bird nests don't quit there. Stop back out at Schmeckle on Monday,

Word Search

A few years ago I made this word search for the waste time page of a publication called "Carp Angler Journal." I write this publication with my colleague, "Catfish" Kevin Folta. We are due for a new issue in April of '92. Anybody interested in our mag. can contact me for info. True to its form, this word search is filled with a now unknown number of words pertaining to rough fishing and its associated nonsense. I don't recall exactly what words are in here. Knock yourself out, and remember "PP" is not a word.

Canine Distemper Common In Raccoons

If you notice raccoons exhibiting some strange behaviors, it may be that they are suffering from canine distemper disease, according to Kerry Bauer, wildlife health assistant for the Department of Natural Resources.

The strange behaviors may include coming close to homes, people or domestic animals during the daytime, curling up and appearing to be asleep near homes or garages, ignoring human attempts to chase them away, or acting overly aggressive.

The canine distemper virus affects dogs, foxes, mink, skunk and raccoons. Common clinical signs of the disease are pneumonia-like symptoms of respiratory distress; the disease may also cause neurological problems such as muscle twitching, hind limb paralysis, seizures and uncontrollable jaw movement.

The virus is transmitted when healthy animals come in contact with secretions or excretions of

infected animals. Bauer said that the disease is transmissible to dogs, but not to cats or people.

The infective virus does not live long outside the host and is destroyed by most soaps. The best protection for your dog, according to Bauer, is to have an up-to-date vaccination for canine distemper. She said puppies should also be vaccinated according to a veterinarian's recommended schedule.

Confirmed cases of canine distemper virus in raccoons have come from the Appleton area. Reports of strange-acting raccoons should be made to the local DNR Wildlife Manager or municipal Nuisance Animal Control Officer. A definitive diagnosis cannot be made without microscopically looking at infected tissue.

For your protection, do not attempt to pick up a sick or aggressive raccoon—call the local animal health officials. Do not let the animal in the house, and avoid contact between your pets or children and any sick animals.

Perestroika sets tone for Soviet films

A guest lecture about the status of Soviet filmmaking in the age of perestroika is part of a Soviet film festival which will be held Thursday, Nov. 14 through Saturday, Nov. 16 at UWSP.

Sponsored by the University film Society, the event will be held in Room 333 of the Communication Arts Center and is open to the public without charge.

Vance Keyley, a professor at the University of Wisconsin-Madison, will discuss "Soviet Film Age of Perestroika" at 8 p.m. Saturday, November 16.

"Nostalgia," a film directed by Andrei Tarkovsky, will be shown after the evening's presentation. It depicts the travels of a young Soviet writer visiting Italy and the resulting feelings of "nostalgia"—melancholy homesickness—which he must come to terms with in his new environment.

The festival also features the works of Soviet directors and actors, and the films span a variety of themes centering around life in the Soviet Union. The following films will be shown Thursday, Nov. 14.

"Girl with a Hatbox," a satirical comedy set in the 1920s about young Russian woman's madcap pursuit of a winning lottery ticket. The film will be shown at 6 p.m.

"Ballad of a Soldier," will be shown at 7:30 p.m. Directed by Grigori Chukrai, the movie is one of the most highly acclaimed Soviet films on World War II. The story follows the life of a young soldier after he returns home from combat.

"Is it Easy to be Young," a documentary of punk rock subculture in the Soviet Union, focuses on the experiences, hopes and dreams of punks in 1987 communism. The movie will be run at 9:30 p.m.

Friday, November 15 will be the date for the following films:

"Marshall Blucher: A Portrait Against the Background of an Epoch" portrays the fate of the Soviet Union in the 1930s through the biography of one Red Army hero. The film will be shown at 2 p.m.

"And the Past Seems But a Dream," records the fifty-year reunion of a group of children who wrote an idealistic book called "We are from Igarka" in 1937. Rather than addressing their childhood happinesses, director Sergi Miroschnichenko unearths the underlying collapse of faith by the Russian people. It will be run at 2 p.m.

At 4 p.m., the movie "Alexander Nevsky" will be shown. The historical epic portrays the life of Prince Alexander Nevsky.

"My Name is Ivan," depicts the story of a young Russian boy's coming-of-age during World War II. The film, which won the Grand Prize at the 1962 Venice Film Festival, will be shown at 7:30 p.m.

Choosing the day's film offerings will be "Forgotten Tune for the Flute," at 9:30 p.m. A comedy which satirizes the Russian upper class of government officials, the movie follows a privileged official who falls in love with a working-class woman, who shows him his true personality.

Saturday, November 16 includes:

"Rasputin," which will be run at 2 p.m. One of the famous banned Soviet films, the movie brings life to self-proclaimed Soviet prophet whose madness and greed led to the Russian Revolution.

"Incident at Map Grid 36-80," a drama about a Soviet squadron's attempts to aid an American nuclear submarine in distress, will be shown at 4 p.m. The movie provides a rare look at Soviet military life and the "close calls" that occur in the nuclear age.

Professional actress graces UWSP's "Gypsy" Musical promises audiences a thrilling emotional experience

The role of Mama Rose in the musical "Gypsy," will be played by a professional actress who recently joined the faculty at UWSP.

Laura Birmingham, who has studied at UW-Milwaukee's professional actors training program and performed in Shakespearian productions in Alabama and Utah, plus dramas, musicals and comedies throughout the Midwest, will play the domineering stage mother of Gypsy Rose Lee. The show is directed by Arthur Hopper of the UWSP faculty.

The musical will be performed at 8 p.m. on Nov. 16 and 19-23, and at 7 p.m. on Nov. 17 in the Jenkins Theatre of the Fine Arts Center. Tickets are on sale at the College of Fine Arts and Communications box office.

Birmingham came to UWSP this fall from Atlanta, where she was appearing at the Roxy Theatre in a production of "A...My Name Is Alice." Hopper says Birmingham's part in "Gypsy" is "demanding and strenuous." She must act, sing, dance and appear on stage throughout, in a role assessed as, "perhaps the greatest test of a musical comedy star," according to Ken Mandelbaum of Theatre Week magazine.

Discussing the aggressive,

selfish stage mother's motivation, Mandelbaum goes on to say, "On a more serious level, Rose deprives her daughters of a childhood and an education, forcing them to carry on with a third-rate vaudeville act in order to fulfill her failed dreams of show-biz stardom.

She insists that her children pretend to be babies even when they are teenagers. . . Rose ultimately thrusts Louise into stripping in a last-ditch attempt to make her into a star."

Hopper calls the play one of the finest musicals ever produced, possessing great songs, a powerful story and theatrical spectacle. The show includes more than 130 costumes and sets which evoke 15 different localities.

"Set in the world of vaudeville during the 1920's, "Gypsy" has a strong story line with musical numbers that are an integral part of the drama," Hopper says.

When the original production starring Ethel Merman opened on Broadway in 1959, Kenneth Tynan of the New Yorker said about the play, "So smooth is the blending of skills, so precise the interlocking of song, speech, and dance, that the sheer contemplation of technique becomes a thrilling emotional experience. . . the result is art."

Professional actress Laurie Birmingham playing Mama Rose joins Eric Brehm as Herbie and Ann Zawadzki as Gypsy Rose Lee in the UWSP production of "Gypsy."

Pointski!

Ever wonder what it would be like to start second semester on a downhill coast? You have? Then PointSki XII is the perfect chance for you to try!

HPERA and the Campus Activities Office have joined forces again to bring students the 12th consecutive PointSki, January 12-15 at Indian Head Mountain and Bear Creek.

PointSki XII offers students the chance to learn both downhill and cross-country skiing for \$139.00. The whole package includes transportation from Stevens Point or Minocqua, lodging in fully equipped chalets, lift tickets/trail passes, rentals, professional lessons and other activities. In addition, after signing up for PointSki XII you can register for either Cross Country or Downhill Skiing physical education credit.

PointSki is definitely not for the squeamish. Whether you're warming up in the hot tub, shaping up in the fitness center, cooling down in the indoor pool or getting down at Dudley's after dark you'll find it's much more than a ski weekend.

Sign-up for PointSki XII at the Campus Activities Office in the lower level of the University Center. A \$50.00 non-refundable deposit will be required at that time.

The Pointer Poll: "How did NBA star Magic Johnson's announcement of being tested HIV positive affect you?" (Compiled by Julie Apker & Al Crouch)

"I was shocked and saddened to hear his announcement. I feel even worse for his wife and unborn child. However, I commend Magic on being honest and taking immediate action. I feel that people will finally sit up and take notice. College students especially should realize the chances they take with unprotected sex."

Name: Thea Marschke
Year: 5th year senior

Sanders' spend night in Hyer quarters

by Sarah L. Newton
Editor-in-Chief

Residents of Hyer Hall received a surprise visitor Tuesday evening.

Chancellor Keith Sanders and his wife, Carol arrived at Hyer about 5:00 p.m. and then had dinner at the Allen Center around 5:30.

After dinner, the Chancellor and his wife met with students to discuss issues like Campus Security, computer accessibility, and enrollment cap.

choice, asking the students what's been going well, and not so well, and getting feedback from them.

"I thought it went well," said Anne Hoffmann, Hyer Hall Director, "He (Sanders) took a fair amount of time to discuss issues with the students in a formal setting, then walked around and did rounds with them. We were pleased to have Chancellor and Mrs. Sanders stay for the evening, and I think it helped the students to realize the Univer-

"Sanders' talk put priority attention on student choice"

"I thought it rather unique that the Chancellor would come spend time with us. I was impressed with the fact that he listened to what we had to say, and that he expressed concern for us and the issues we're facing," said Hyer non-traditional student Jim Greene.

Chancellor Sanders' talk put priority attention on student

sity has a genuine interest in them."

Carol Sanders was also pleased with the evening's activities. "We really had a lot of fun," she said, "It brought back a lot of memories, and the residents, the Hall Director and everyone else couldn't have treated us nicer."

Pointer Hockey rolls in NCHA-WSUC opener vs. UW-Superior

by Tom Weaver
Contributor

Everyone knows that the Northern Collegiate Hockey Association (NCHA) is a tough conference. Throw in a season opening contest against the Superior Yellowjackets and it adds the flavor of the Wisconsin State University Conference (WSUC) as well.

The Pointers, who entered the series with Superior on the heels of a 21-1 thrashing of St. Norberts, would face their first test of the season. The Yellowjackets have escaped from the bottom of the NCHA to emerge as one of the up and coming teams in the league.

Friday nights contest gave Pointer hockey fans a taste of the character of the three time defending national champs.

Superior scored four quick goals in the first period to take the surprisingly early lead. The Pointers however held tough and scored five unanswered goals and held on for the 6-5 victory.

"Our guys really worked hard and showed what they are made of by giving a total effort to come back and win Friday night's game," said Pointer Coach Joe Baldarotta.

The Yellowjackets four goal outburst in the first period was started by Mike Sather at the 5:12 mark.

Fifty one seconds later the lead was two as Jamie Bailey beat Pointer goaltender Todd Chin high to the left side and the Pointers, as well as a standing room only crowd at the KB Willett Arena seemed to be stunned.

"They showed that they have what it takes to come from behind and then return and dominate from the start the next night."
- Coach Baldarotta

It took the Yellowjackets only a minute and a half to produce their third goal, and when Dan Laughlin scored at the 10:31 mark, the Superior lead was four and something had to be done.

Coach Baldarotta called for a time out and brought his troops over to regroup.

"The time-out was actually Pointer Assistant coach Tim Cogli's idea, and it was a great one that couldn't have come at a

better time. We brought our guys over and changed a few things in our fore check and pulled our defense a bit farther back so they couldn't beat us with their quickness," said Coach Baldarotta.

The Pointer comeback began as junior Jeff Marshall picked up a power play goal at the 13:19 mark of the first period. The Pointers trailed 4-1 after the first period.

The Pointers came out quickly in the second period and picked up a goal from Frank Cirone and Marc Strapon to close the lead to one. The real difference came from the Pointer penalty killers.

Two times in the second period the Yellowjackets had two man advantages, but the penalty killers held their own and enabled the Pointers to stay one goal behind.

The third period saw the Pointer momentum swing into full force as Scott Krueger picked up his second goal of the year, and the score was tied at four at the 3:09 mark of the final frame.

It took the Pointers only one minute to take their first lead of the game as Cirone picked up a Al Bouschor rebound for his second goal of the game and the Pointers never looked back.

Todd Chin bears down in blocking a shot from Superior's Doug Smith. UWSP won Friday 6-5 and Saturday 10-3. (photo by Al Crouch)

Mick Kempfer added a goal at the 14:47 mark to increase the lead to 6-4.

The Yellowjackets, however, kept after the Pointers as Scott Campbell scored with 47 seconds to play to get the Yellowjackets within one.

Marshall was whistled for a penalty just before the goal and the Yellowjackets had the powerplay for the remainder of regulation.

The Pointer penalty killers

came through again and the Pointers held on to win 6-5. Chin, who struggled early, and then picked his game up with the rest of the squad, finished with 19 saves for his second win of the season.

"It's not that Todd played bad in the first period, we just were not helping him out," said Baldarotta.

"When it came down to the second and third periods, Chin continued on page 17

Pointers overcome River Falls 34-18 in last game

by Mark Gillette
Sports Editor

UWSP won it's final football game of the season 34-18 over River Falls on Saturday, but not before an inspiring talk by coach John Miech at halftime.

UWSP went into halftime losing 12-6 to a Falcon team that wasn't as nearly talented as they were.

Miech told his team at halftime that they were not playing like a team who's 5-2 in conference and in second place. "I told them to play like they should. There were two more quarters left in the season and I told them to play with enthusiasm."

UWSP did not waste much time after halftime in fulfilling Miech's wishes when Bob Hare recovered a fumble and returned it 43 yards for a touchdown with 13:27 still remaining in the third quarter. Dave Schneider's kick afterwards was good and Stevens Point led for good 13-12.

"Hare's fumble return for a touchdown put us up to a higher emotional level," stated Miech.

Adjustments on both offense and defense at halftime helped the Pointers overcome River Falls in the second half.

The key offensively was getting everybody involved. Barry Rose had double coverage on him much of the first half. "Changing the offensive plan along with everybody coming through help us put the game

away," commented Coach Miech.

Rip Flippo did an excellent job in place of Roger Hauri, passing for 200 yards and committing no interceptions. Miech felt Flippo had the best game of his career. "He stayed away from turnovers and made crucial third and fourth down plays."

The Pointers kept the ball for 4:41 beginning the fourth quarter on a 12 play 79 yard scoring drive that ended on a Jimmy Henderson one yard touchdown run with 9:42 remaining in the game. The score was then 27-12.

Before UWSP led for the last time this season, River Falls added a score of their own on a 58 yard touchdown pass from Tom Hepburn to Scott McGlothlin to make the score 27-18.

Besides the two scores in the first half and the 58 yard touchdown reception by McGlothlin, the Pointer "Angry Dog" defense did a spectacular job in keeping the Falcons away from their running game. Miech was very happy with the play of the defense. "We forced them to do things they did not want to do."

The Pointers last score fittingly came on a 12 yard touchdown run by Rose, his 11th touchdown of the season.

The game was Rose's last as a Pointer. Coach Miech and the team will greatly miss his services next year. "He's been a

Men and women swimmers defeat Whitewater

by Deby Fullmer
Contributor

The UWSP Men's and Women's swim team sank UW Whitewater on Saturday November 9. The UWSP men's score was 131 to 74 and the UWSP women's score was 128.5 to 77.5.

"Out times were a little better than what I thought they'd be as we had a great week of work and I mixed up the events a little," said Head Coach Red Blair.

The Dogfish of the week for the women were Julie Pausch, Nan Werdin, Mary Meyer, Vicki Dana, Amy Hahn, Tiffany Hubbard, and Deby Fullmer.

The WIACC Swimmer of the Week nominations were Mary Meyer for her victories in the continued on page 13

Correction

In last week's issue, the article about Todd Hasting's death entitled "Hockey team mourns death," contained an error. Hasting's last name was misspelled. His last name is spelled Hasting, not Hastings.

Point Wrestlers compete well at Tombstone Open

by Mike McGill
Staff Writer

Coach Marty Loy called the UWSP Wrestling team's performance at last weekend's Tombstone Open a "base to build from." No team scores were kept due to the large size of the meet. 314 wrestlers from 32 different schools participated, wrestling on seven mats.

In the Gold Division, first place finishes were captured by Dennis Schmitt in the 142 lb. class and Travis Ebner in the 190 lb. class.

Four UWSP wrestlers wound up in second place in their

respective classes. They were Joe Ramsey (118 lbs.), Chris Persike (134 lb.), Dave Carlson (177 lbs.), and Dennis Aupperle (Heavyweight).

Brian Suchocki, also wrestling in the heavyweight category took third place.

Wrestling to fourth place finishes in the gold division were Jeff Bartkowiak (134 lbs.) and Dave Carlson (177 lbs.).

The Silver Division saw three first place finishers in Jere Hamel (134 lbs.), Ken Anderson (142 lbs.), and Brent Roeder (177 lbs.).

Dave Van Beek placed fourth in the 126 lb. class, and John Fink fourth in the 190 lb. class.

Coach Loy was pleased with 5 champions out of 20 classes. "Considering the number of teams and the caliber of many of those team, I'd have to say that we fared well," he said.

Loy also pointed out his surprises and disappointments, stating, "many of our younger wrestlers did better than expected, while some upperclassmen didn't do as well as expected."

The Pointer men will have until next Saturday, November 23, to straighten things out when they travel to the UW-Madison Fieldhouse for the Badger duals, beginning at 9:00 a.m.

Mark Poyier (142) controls his opponent and goes on to win 14-4 in last Saturday's Tombstone Open.

(photo by Al Crouch)

Four Pointers named to All-WSUC

by Mark Gillette
Sports Editor

The All Wisconsin State University Conference (WSUC) football team was announced this week with four players from UWSP making the first team.

Wide receiver Barry Rose and placekicker Dave Schneider made the offensive first team. Rose, a senior from Baldwin, Wisconsin, led the league in scoring, receptions, and receiving yardage with 11 touchdowns (66 points), 47 catches, and 939 yards.

Schneider, a senior from Green Bay, broke the school record for field goals in a career with 22. He broke the old school record of 21 field goals.

Making the defensive first team from UWSP was defensive lineman John Schmitt, a junior from Stratford, Wisconsin, and Andy Chilcote, a junior linebacker from New Franken, Wisconsin.

Chilcote led the conference with 62 solo tackles. He had 30 assisted tackles for a total of 92 tackles.

Schmitt had 5 1/2 sacks and 55 total tackles for the Pointers "Angry Doy" defense.

La Crosse had the most players on the first team with seven—five on the defensive team, and two on the offensive.

Stevens Point and Oshkosh each had four players on the team while Whitewater, Superior, and Stout put three players on the team. Platteville and Eau Claire each had two players represented on the team with River Falls placing one.

Two players from UWSP were named to the All-WSUC second team. Sophomore running back Jimmy Henderson from Milwaukee ran for 578 yards on 161 carries for four touchdowns.

Senior defensive back Pete McAdams from Ladd, Illinois, was the other Pointer on the second team. He recorded four interceptions this year as well as 74 total tackles.

Five Pointers received honorable mention for their play this season. On offense, senior lineman Kurt Krueger from Fond Du Lac, freshman center Ben Hoffman from Edgar, Wisconsin, and sophomore quarter-

back Roger Hauri from Richmond, Illinois, all were noted for their performances this year.

Hauri missed the last 2 1/2 games with a broken right thumb he incurred in the Platteville game. Before he was injured he was leading the conference with 14 touchdown passes and 1,201 yards passing in 6 games. Overall, he averaged 216 yards a game, 201 yards passing and 15 yards rushing a game.

Dan Mlachnik, a junior from Muskego, Wisconsin, received honorable mention on both offense and defense. Mlachnik, who was also injured in the Platteville game, led the league in punting with a 36 yard average on 31 kicks. As a defensive back he had three interceptions.

Also receiving honorable mention on defense was freshman defensive lineman Jerry Versteegen from Kaukauna, Wisconsin. Versteegen recorded 4 1/2 sacks and 35 total sacks.

Congratulations to all Pointers who made the All-WSUC football team.

Coghlin makes smooth transition to ass't coach

by Tom Weaver
Contributor

When a team goes through a change in a head coach, many people don't realize that there are other changes that happen as well. When Joe Baldarotta was named as the new head hockey coach at UWSP, the immediate question was: Who would he name as his assistant?

When you ask the athletic department why Joe Baldarotta was hired they will tell you that he knows the program and he has been here for five years. Well, you can say the same thing about assistant hockey coach Tim Coghlin.

Coghlin, a Pointer defenseman from 1985 to 1988, says he is glad to be back as a coach here at Stevens Point and would not want to be anywhere else. "I really don't think that I could have taken a job anywhere else

in the college ranks because of the feelings I have for Stevens Point," says Coghlin.

Coghlin comes to the Pointers from the professional hockey ranks, playing with the Milwaukee Admirals and their parent Vancouver Canucks and playing last season with the Fife Flyers in Scotland.

A shoulder injury suffered during the Canucks pre-season camp forced him out of action for a season before he returned with the Fife Flyers last season.

"The NHL is what every player in America dreams about playing in and I was lucky to be given the opportunity to have a chance to play there," said Coghlin. "But playing in Scotland last season was like night and day compared to the NHL."

Coghlin says that the people overseas are just looking for an

continued on page 15

from page 12

1650 freestyle (19:06.40) and in the 200 butterfly (2:27.34), and Nan Werdin for her victories in the 400 IM (5:01.38) and in the 500 freestyle (5:37.84).

The Dogfish of the week for the men were Troy Sibbers, Todd Neuenfeldt, Bob Weigel, Don Guay, Geoff Morris, Bill Jetzer, Jay Buckmaster, Kevin Felwicks, and Christian Boyce.

The WSUC nomination for swimmer of the week was Geoff Morris who won the 400 IM (4:31.82) and the 200 backstroke (2:07.29).

Blair concluded by saying "It's always nice to have a mark on the winner's side—even nicer when the men and women both bring in a victory."

The Pointer swimmers will be hosting the conference relay meet this Saturday, November 16. The meet will begin at 12:30.

Football

from page 12

big play man in the WSUC. I'm happy he's had a big year."

The only score UWSP had in the first half came on a one yard touchdown run by Jerry Versteegen.

River Falls' 12 points in the first half came on a one yard touchdown run from quarterback Hepburn and 67 yard pass from Hepburn to Ron Hanestad.

Point finished the season 6-2 in conference and 6-3-1 overall, good for a tie for second place in the WSUC. The team had it's ups and downs but Coach Miech was very content overall with the performance of the team this season.

"Our kids played some good football, our seniors had a great year. It's always nice to finish the season with a win."

Magic Johnson touches many lives in announcing he has HIV virus

by Mark Gillette
Sports Editor

Surprise, sadness, shock, and fear, among many other feelings were set into the minds and hearts of people around the world when Magic Johnson announced his retirement from the NBA last Thursday. Magic revealed that he tested positive for the HIV virus, the virus that could eventually lead to AIDS.

Magic stood on the podium at the Inglewood Forum in Los Angeles with the same smile everybody came to love him for. His revelation took a lot of courage and strength.

Magic has dazzled us on the basketball court for the last 12 years, nine of those years taking the Lakers to the NBA championship.

Along with Larry Bird, he revived the NBA and put excitement back into the game for fans and players alike.

Now, he is retired and one of a growing number of people who have tested HIV positive.

Magic stressed that he has the HIV virus, not AIDS. Most importantly, he emphasized that anybody can test positive for the HIV virus, even a famous, well-liked, heterosexual, worldly su-

perstar. Magic will speak on behalf of the AIDS disease to help people become more aware of the disease.

Although Magic didn't come out and directly say how he contracted the HIV virus, he spoke many times during his press conference of the need to practice safe sex.

Hearing rumors about the sex life of some athletes, the high possibility that Magic had a woman waiting at his motel door after many road games, would come as no surprise.

Magic has been a bachelor for all but two months of the 32 years he has lived. He was married September 14 to his high school sweetheart. She, and the unborn baby she is currently carrying, have tested negative for the virus.

A scary example of the sex life of some athletes is Will Chamberlain, who flauntingly spoke of having approximately 20,000 women in his life as an NBA star.

Wonder what would've happened had Magic not been required to take out a new insurance policy. The new policy required him to take

some medical tests which eventually led doctors to find the HIV virus. Would he still be playing today?

What about the hundreds of other athletes who have led the same lifestyle that Johnson did? With all of the sexually transmitted diseases going around, it's hard to believe that more athletes haven't tested positive for the HIV virus, or worse yet—AIDS.

The reason that others have not tested positive is that most athletes have not had the test for the HIV virus. Of the four well-known leagues in the U.S.—NBA, NFL, NHL, and major league baseball—not one has a policy for taking the HIV test.

It's great that Magic is going to be a spokesman for the virus, but I question the initial approach he's taking.

He told the national television audience during his press conference and on the Arsenio Hall Show (on Friday, November 8) to practice safe sex.

When dealing with the millions of people Magic was dealing with on these two national television appearances, and being the tremendous role model he is, isn't it best to ad-

vised abstinence first?

This may seem unrealistic, but the best way for a person to avoid contracting AIDS is to not have not sex. Wouldn't it be better to advise longer healthier relationships with only one sexual partner?

It's tantamount that Magic not only admit that he has done wrong, but also provide the most constructive advice so nobody else makes the same mistake. To advise safe sex isn't enough.

The influences of Magic, and Michael Jordan, who said he will also be a spokesman for the HIV virus, are strong -- especially for children who look up

to pro athletes such as these two.

If Magic and Michael, along with everybody else who is speaking on behalf of AIDS, stress the importance of abstinence, and safe sex in healthy relationships, then all of the effort that will be put forth will be well worth it.

So now the next chapter in Magic's life begins, he will no longer be a leader and role model on the court, but off it.

Let's hope that the courage and strength that he showed on the court and last Thursday at the press conference, continues to follow him as he tries to defy the odds and win the battle against AIDS.

Purple defeats Gold in Men's BB

by Mike McGill
Staff Writer

UWSP Men's Basketball Coach Bob Parker as well as the 400 in attendance got a chance to see how the team was measuring up as they played each other in the Purple/Gold game at Quandt Fieldhouse last Sunday.

The team was split in two squads, the purple team consisting of Mike Ojala, Tom Parker, Gabe Miller, Buck Gehm, Scott Frye and Jon Julius.

Andy Boario, Brad Murawski, Mike Dahlquist, Luke Reigel, Justin Freier, Brent Nerat, Kent Nelson and Jack Lothian made up the gold team.

Purple controlled the tip and controlled the scoreboard, giving up the lead only once during the game when Gold went ahead 39-38 in the third quarter on a Freier slam dunk.

Purple didn't totally dominate the game, however, their biggest lead of the game was eight points late in the first quarter following a Gehm free throw that put the score at 25-16.

The score at the half was 36-33 in favor of Purple, and although Gold pulled within a point to make it 59-58 with 1:21 left in the contest, by the final buzzer Purple had emerged victorious 63-60.

Both teams were about even in mistakes. Purple and Gold each with 15 turnovers and Purple's 16 fouls to Gold's 15. Purple's Jon Julius and Gold's Jack Lothian both fouled out.

Purple and Gold's shooting offset each other as Purple's field goal percentage registered at 53.5%, but their free throw percentage was a meager 70.6%. Gold's 38.9% field goal percentage was overshadowed by their impressive 93.8% free

Strong outings from Gehm (10 pts.), Miller (15 pts.) and Julius (18 pts.) helped Purple to victory while Boario (12 pts.), Freier (16 pts, 7 rebs), and Lothian (16 pts., 12 reb., 2

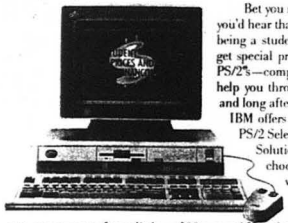

blocked shots) aided the Gold's cause. Purple's Ojala led all players with five assists.

The Pointer men will play in an exhibition game this Sunday at Quandt Gym at 7:30 p.m.

Packers surprise on offense, disappoint on defense

by Brady Kiel
Contributor

Were those really the Green Bay Packers playing a fairly decent game against Buffalo last week? They actually showed some life offensively that is rarely seen in Green Bay.

Carefully extracting positive achievements out of Packer losses week after week can breed cynicism, but the practice is a final option for Packer followers trying to retain their sanity. So let's embrace it fully!

This was not an offensive performance typical of the 1991 Packers. In other words, it was great! For most of the game, Green Bay seemed to function well in the air but most astonishingly, on the ground!

They controlled the ball on the ground with impressive drives, most over nine minutes each. It wasn't until Buffalo awoke from its slumber in the second half that Green Bay lost its clock control.

Coghlin

from page 13

offensive explosion and don't really look for the role that a defense plays in the game and being a defenseman he really didn't see fitting in all that well there.

"If we would go out and win a game 14-12 everybody would be going crazy but if we won 3-2 or 2-1 they would be all upset because they didn't get to see the kind of game they were looking for. Being a defenseman I would be happier with a 3-2 win, but that just isn't their kind of game," said Coghlin.

As a two time All-American and captain of the Pointers first NCAA Division III Hockey Champion in 1989, Coghlin still holds many Pointer Career and season records as a defenseman.

Included in his records are

Green Bay quarterback Mike Tomczak engineered the offense with prolonged efficiency that no other Packer quarterback has displayed in '91.

He connected on 23 of 38 passes (60.5%) for 317 yards and two touchdowns. He did throw two costly interceptions, but his field presence kept Green Bay close for most of the afternoon.

Tomczak exercised command of the offense that will hopefully be carried over this weekend against Minnesota. This performance was too strong to be ignored in favor of reinserting Don Majkowski this week if he's healthy. Let's hope that does not come about.

The most exciting event of last Sunday was the emergence of the Packer running game. The offensive line surged at Buffalo right up the middle and showed that they can, in fact, block occasionally.

It was exciting to see Darrell Thomson bolt through the line

for ten yards and then come again for more.

Keith Woodside also had some darting runs of his own. It's just unfortunate that it took ten weeks for this to occur.

Maybe Packer running backs can top 90 yards again this week. Are they ready for that much success?

The true disappointment was Green Bay's second half defense. It's an irony that Green Bay's defense let it down and not the offense.

After a pretty strong first half of squelching Bills offense, the Packer defense began to unravel.

It was uncharacteristic because despite Green Bay's poor record, its defense has ranked as high as third in the NFL this year and kept the Pack close in many games. But everyone has a bad

day. The failure was mostly accounted for by the notorious Packer pass defense. When Buffalo started to hit on all cylinders, normal negative Packer buzzwords reared their ugly heads. "Defensive holding", "late hit", "Jerry Holmes", etc. came up.

People held, Chuck Cecil made a careless hit or two, Jerry Holmes was himself, Vinnie Clark made rookie mistakes and all of them slipped on the Milwaukee turf here and there. The dam broke when the rest of the defense could not contain Thurman Thomas on the ground.

To be fair, Buffalo does have the best NFL offense and Green Bay was outmatched. But the Pack make too many errors that set them back.

The Packers have a way to go to match up consistently to teams like the Bills. But they displayed some promise in their ability to pack some punch in their offensive gameplan.

In knipicking this Packer loss, there were many positive signs that point to a victory down the road. I even venture to say it could happen in 1991.

It might be confusing to write a story after a Packer victory, but the challenge is welcomed.

season records for most goals, assists, and points by a defenseman, and single game records for goals and assists by a defenseman. His single season assists mark was broken last season by Jared Redders.

For his career, Coghlin had 108 points on 21 goals and 87 assists and currently stands seventh on the Pointer all-time scoring chart.

He was first team all Northern Collegiate Hockey Association from 1986-89 and first team all Wisconsin State University Conference from 1985-89 and served as Pointer team captain for three seasons.

When I heard that Coach Mazzoleini was going to leave for the University of Minnesota and that Hoe (Balzarotta), was going to get the job, I knew that this was the job that I wanted," said Coghlin.

Pointer Profile: Martens takes on challenges with spirit

by Julie Apker
Features Editor

"There are lot of skeptics of so-called 'Jesus Freaks,' but the way I view it, people have always been persecuted for what they believe in. I can take being called a few names," said Stephanie Martens.

A member of the UWSP InterVarsity Christian Fellowship, Martens advocates "living a lifestyle of the scripture." A Green Bay native and junior music major, she serves an active role with one of the non-denominational christian organizations on campus.

"I started with InterVarsity as a freshman, and I discovered religion was more than going to church," explained Martens. "What we try to do is help have Christ matter on our campus and assist students interested in a relationship with Him."

Martens thinks that there is a

Steph Martens
(photo by Al Crouch)

lot of misunderstanding about the group which leads to criticism and labels such as "Bible Bangers," "Holy Rollers," or "The God Squad." In her opinion however, the benefits of her values and beliefs with InterVarsity far outweigh any negative reactions she may encounter from critics.

"InterVarsity isn't based on a numbers game, it's a group which really cares about students," she said. "We encourage students to come to our open meetings and bring questions from their past church experience as well as an open mind."

In the past, Martens found herself in a situation many of her peers face, that of balancing involvement, academics, and personal life. For about three

auditions. After years of this schedule, which almost ended her singing career, Martens realized that it was time to prioritize her involvement.

"It was a tough decision, because I loved my involvement activities. It was the best experience here!" Martens said. "But I decided to spend some time on Stephanie for once, and my because of my commitment to Christ, I wanted to stay with InterVarsity."

in the statewide competition for the National Association of Teachers of Singing.

She will also perform in the UWSP Christmas Madrigal and other university functions. In addition to her singing talents, Martens plays 15 instruments and has appeared in the UWSP productions of "Do Patent Leather Shoes Really Reflect Up?" and "Three Penny Opera."

"I used to be challenged by my high school band teacher to learn a new musical instrument every weekend," she said. "But I consider my abilities to be 100% God given gifts, which should be used to glorify Him. I hope to work with an inner city music program this summer."

In the future, Martens plans to continue being involved in christian outreach and perhaps combining her singing talents with her religious interests as a christian recording artist.

"After graduation, I'll go where God opens the door," she said. "All I want to do is sing."

"There are a lot of skeptics of so-called Jesus freaks, but I can take being called a few names."

years, she was active in InterVarsity, the Residence Hall Association, Neale Hall Council, Students Against Driving Drunk. In addition, she participated in vocal performances and appeared in campus musical productions and competed in

Her choice to cut down on her numerous activities paid off, and Martens regained her voice and is back performing. Less than a year after being told she would never sign again, Martens was awarded second place

Now that the weather is getting cold, many people are looking for an indoor exercise to keep in shape. Why not give aerobics a shot? Women and men alike can gain benefits of good health from doing aerobics.

Aerobics is an exercise that helps us use oxygen more efficiently. There are 5 stages to an aerobic workout. The first one, the warm up, starts the workout by getting the blood flowing. During the next stage, the actual "aerobic" part, the goal is to reach and maintain (for 20-30 minutes) your Target Heart

Range (THR). To find your THR, subtract your age from 220 and multiply your answer by 60% and 80%--this is your range. Then comes the cool down. Here the heart rate is slowly brought down. Toning follows where the muscles are worked for strengthening.

"Women and men can gain benefits"

And lastly--stretching--this stage is a must! During aerobics muscles are constantly being contracted. In order to remain flexible the muscles must be stretched out. The workout is

then complete.

The heart benefits in many ways from aerobics. First of all, it increases lung capacity and strengthens the heart muscle allowing more oxygen to be pumped. Aerobics also increases the level of HDL, a substance that carries heart-damaging cholesterol out of the blood stream. And, it aids in lowering blood pressure.

Weight control is also enhanced by aerobics. The main reason people gain weight is because more calories are taken in than are burned off. Aerobics will help use up these extra consumed calories.

Aerobics can help reduce stress, too. It does this by in-

creasing the body's production of endorphins (a natural sedative) and catecholamines (chemical substances that help stabilize moods). Tense muscles are relaxed, relieving stress also.

"The heart benefits in many ways"

One's coordination and balance are improved by aerobics.

There are two types of aerobics: low and Moderate Impact. Both are high intensity and are equal in terms of benefits, but low are easier on the joints.

Aerobics have come a long way. For better results from your workouts, keep these tips in mind.

1. Keep your abdominal and glutes (butt) muscles tight throughout the workout.
2. Keep your pelvis tilted forward to ensure a straight back.
3. Concentrate on contracting the muscles you're using and on your breathing.
4. Never lock your knees.
5. The bigger you make the move, the higher your heart rate will be.
6. When doing abdominal work (sit-ups) keep your stomach tight. For two reasons: to work

Hockey

from page 12

was able to respond like any good goaltender does and slam the door on Superior. We would not have won the game if he didn't respond like he did in the second half of the game."

Saturdays contest was a bit different as the Pointers scored four goals in the first and second periods, and two in the final frame to sweep the Yellowjackets 10-3:

Bouschor started the Pointer attack with his third goal of the season at the 7:24 mark. A minute later, Kempffer added his second goal of the season and the Pointers lead 2-0.

The Yellowjackets took their share of costly penalties and the Pointers took advantage of the situation when Marshall and Kempffer added late power play goals to give the Pointers the 4-0 lead.

Glen Lang got the Yellowjackets on the board 50 seconds into the second period but the dogs added goals by Monte Conrad and Tim Hale 19 seconds apart to give the Pointers the 6-1 lead.

Todd Trettor added another power play goal at the 13:13 mark and the Pointers held the 7-1 lead after two periods of play.

The third period saw Chris Campbell of the Yellowjackets pick up a pair of goals, but the Pointers responded with goals by Marshall, and Sean Marsan to produce the final score of 10-3.

Saturdays contest saw the emergence of freshman goaltender Dave Ketola. Ketola was impressive, stopping 28 shots in his first win as a Pointer.

The weekend also saw several players give some outstanding individual efforts. Kempffer ended with three goals and four assists to nab him the "NCHA-Riedell, Player of the Week," honor, while Marshall added three goals and two assists.

The Pointer special teams also excelled as the dogs were 9 of 15 on the powerplay while Superior was just 2 of 17.

"I'm really happy with the way the team played this weekend. They showed that they have what it takes to come from behind and then return and dominate from the start the next night," said Baldarotta.

"It's always nice to get a sweep under your belt right away. We really need to crank things up a notch because River Falls comes at us next weekend and they are always a tough test for us," added Baldarotta.

The Pointers might have a bit of an advantage over the Falcons because they have two NCHA games in already. However, in a league like the NCHA "any team can beat anyone on any given night," said Baldarotta.

Faceoff both nights is 7:30 from the KB Willett arena. Full coverage can be heard on Campus Radio Station WWSF 89.9 FM beginning at 7:00 p.m. on Friday and 7:15 on Saturday.

AT&T's long distance savings plan can take you to this location.

AT&T has always helped college students call the places they want to call. In fact, one of our

savings plans for off-campus students, the *SelectSaverSM Plan*, lets you direct-dial the one out-of-state area code

you call most often. For just \$1.90 a month, and 12 cents a minute, evenings, nights and weekends. 20 cents

a minute, weekdays.* And now AT&T can take you to another place you've always wanted to go. Just

enter the AT&T "It Can Happen to Me" Sweepstakes. You could win a trip for you and a guest to any U.S. and any

European rock concert. All you have to do is fill out the coupon below. So let us help you choose the

savings plan that's right for you. And then try your luck at our Sweepstakes. Both will be music to your ears.

To sign up for an AT&T savings plan for off-campus students, call 1 800 654-0471, Ext. 7437. To enter the AT&T "It Can Happen to Me" Sweepstakes, fill out the coupon below.

*Includes continental U.S., Alaska, Hawaii, Puerto Rico and the U.S. Virgin Islands. Savings based on calls over 56 miles. Actual savings potential depends on subscriber calling patterns. Processing fee of \$2.00 applies. Day rates apply from 8 am to 5 pm. © 1991 AT&T

OFFICIAL RULES—NO PURCHASE NECESSARY

1. To enter, handprint your name, address, phone number and zip code on an official entry form or a plain piece of paper. Official entry forms can be found in the October 29th, 1991 issue of Rolling Stone, the October 18th, 1991 issue of Entertainment Weekly, the November 1991 issue of US magazine, the November/December 1991 issue of U.S. The National College Newspaper and the Fall issue of Directory of Classes. You may enter in other ways you wish, but each entry must be mailed separately to: AT&T "IT CAN HAPPEN TO ME" SWEEPSTAKES, P.O. Box 4870, Grand Central Station, New York, NY 10163. All entries must be received by December 31, 1991.

2. Winners will be selected in a random drawing from among all entries received. Drawing will be conducted on or about January 16, 1992 by MediaAmerica, Inc., an independent organization whose decisions are final on all matters relating to this sweepstakes. (1) Grand Prize: A 4-day/3-night trip for two to see the concert/winner's choice anywhere in the continental U.S., including roundtrip coach air transportation to and from the nearest major city, first class hotel accommodations, hotel and airport transfers, tickets to the concert, backstage/VIP passes, limousine service to and from the concert, meal allowance and nightwear plus a 8-day/4-night trip for two to see the concert of winner's choice anywhere in Europe, including roundtrip coach air transportation to and from the nearest major city, first class hotel accommodations, hotel and airport transfers, tickets to the concert, backstage/VIP passes, limousine service to and from the concert, meal allowance and nightwear, plus one year's worth of AT&T Long Distance Service (valued at \$200) in AT&T Long Distance GIN Certificate and an AT&T Certificate Phone. (2) First Prize: An AT&T Long Distance GIN Certificate and the concert ticket of winner's choice. (Total retail value = \$200). All prizes will be awarded and winners notified by mail. Prizes subject to availability and confirmation of reservations must be taken by December 31st. Choice of concert locations is subject to artist's performance schedule, availability of tickets and backstage/VIP passes, and their approval by MediaAmerica, Inc. Limit of one prize per person. Prizes are non-transferable and no substitutions or cash equivalents are allowed. Taxes, if any, are the responsibility of the individual winners. Grand Prize Winner and travel companions may be asked to provide an affidavit of eligibility and release. Grand Prize Winner and travel companions consent to the use of their names and likeness for publicity or trade purposes without further compensation. No responsibility is assumed for loss, misplacement or late arrival of mail.

3. Sweepstakes open to residents of the U.S., 18 years of age or older, except employees and their families of AT&T or its affiliates, subsidiaries, advertising agencies, MEDIAAMERICA, INC. and their program suppliers. This offer is void wherever prohibited, and subject to all federal, state and local laws.

For a list of winners, send a stamped, self-addressed envelope to: AT&T "IT CAN HAPPEN TO ME" SWEEPSTAKES LIST, P.O. Box 5078, Grand Central Station, New York, NY 10163 by January 20th, 1992.

Enter the AT&T "It Can Happen To Me" Sweepstakes. To enter, complete this form and mail to: AT&T "It Can Happen To Me" Sweepstakes, Box 2501, Cedar Grove, New Jersey 07009-2501

Aerobics

from page 16

your transverse muscle and to prevent the formation of a protruding muscle. When breathing, exhale on the way up and inhale on the way down. And lastly, keep your shoulder blades slightly off the ground and chin up while lower back remains on the ground.

7. When in class, yell a lot and have fun. Remember, the more you put into it, the more you'll get out of it.

The best way to find out if you like aerobics is to give them a try. Don't be shy, I wasn't too graceful the first time I tried aerobics. The only thing you can lose from trying is calories. Any questions? Feel free to talk with me or any of the other instructors before or after class!

Schedule for classes
Monday-12 pm, 6 pm, 9pm
water-6:15 pm
Tuesday-6 pm, 9 pm
Wednesday-12 pm, 6 pm, 9 pm
water-6:15 pm
Thursday-6 pm, 9 pm
Friday-12 pm, 6 pm, 9 pm
Saturday-9 am
Sunday-6 pm

There is a schedule in the hall close to the intramural office. Check there for locations and any cancellations. Check future issues for information on water aerobics.

Dance Orchestra taps into Point National troupe led by grandmother

The American Tap Dance Orchestra will perform at 8 p.m., Tuesday, Nov. 19 at the Sentry Theater.

Sponsored by the Performing Arts Series at UWSP, the show is partially funded through a grant from the Wisconsin Arts Board. Tickets are on sale at the College of Fine Arts and Communication box office.

The American Tap Dance Orchestra, the first national dance company devoted exclusively to this purely American form of dance, was founded five years ago by Brenda Bufalino. A 53-year-old grandmother, Gregory Hines has called her "one of the greatest female dancers that ever lived."

A tap master and critically acclaimed performer, Bufalino has appeared as a guest soloist at Carnegie Hall, Avery Fisher Hall, the Newport Jazz Festival, the Women's Jazz Festival-Lincoln Center, the Smithsonian in Washington D.C. and the Bridges Festival, St. Chinian, France.

"the company is devoted to purely American dance"

Her one-person shows, "Cantata & the Blues" and "Woodpecker, the Journal of a Tap Dancer," have been highly praised. A performer at dance festivals throughout the country, she has appeared off-

Broadway, on PBS and in a new film, "Milt and Honi."

The Tap Dance Orchestra has appeared at the Fourth of July tribute to the Statue of Liberty, Lincoln Center Out-of-Doors,

the 42nd St. River-to-River Festival, the New York Cotton Club, the Obie Awards and the Central Park Band Shell in New York City. At the Hudson Guild Theatre, Bufalino has presented the orchestra in a co-creation of a jazz version of Vivaldi's "Four Seasons" with jazz composer Benny Golson. The ensemble's latest work-in-progress is a celebration of the American landscape and the American voice performed to the music of Hoagy Carmichael.

UWSP concert highlights musical tour

The Wisconsin Alliance for Composers will present a concert of contemporary music at 3 p.m., Saturday, Nov. 16 at UWSP.

The event in Michelsen Hall, Fine Arts Center, is a highlight of the group's statewide conference, scheduled on campus throughout the day. It is open to the public without charge.

The guest composer will be

Scott Wyatt, a professor of composition at the University of Illinois School of Music and director of the Experimental Music Studios. His compositions have been written for a variety of media and recorded on several labels.

In 1990 he was the recipient of a \$32,000 Arnold Beckman Research Award and a \$12,000 equipment grant from Apple,

Inc. He currently serves as president of the Society for Electro-Acoustic Music in the United States.

The concert program will be performed by faculty and student soloists, ensembles, and conductors. It will include pieces by Wyatt, Michael Cunningham, and Michael Barden.

A reception will follow outside the concert hall.

Thanksgiving,
Thursday, Nov. 28.
A time to give
thanks and
remember friends.

We have a large selection of Thanksgiving cards. Please come in soon.
