## Hard times ahead for summer school programs

by Robin VonHaden  
Contributor

The University's hard times are causing departments to cut some of their summer school classes. Each department's budget has been decreased, forcing them to prioritize their programs. Although class offerings this summer won't be much different than last summer, the cuts in 1993 will be severe.

Every university in the UW system is reviewing their expenses due to shrinking funding. This decrease in resources has been caused by enrollment caps and less federal government funding. UWSP has also been hit by the budget cuts, and must determine how to allocate its money. As Becky Olson, SGA's Academic Issues Director explained, "Everything at the university is being reevaluated and prioritized."

Each college at the university has to do an internal evaluation and decide what will be cut. Two high-priority items that they are trying to preserve are

faculty positions and classes during the regular school year.

"Since students are already having a problem getting into classes they need during the spring and fall, the colleges don't want to decrease these areas any more," said Dr. William Wresch, the Math and Computing Chairperson. Therefore, in order to maintain a normal offering during the two main semesters, summer school will need to be cut back.

Originally, the summer school budgets allocated to each department were going to be decreased across the board, but some areas need to have certain summer classes. Since these areas will get the money they need, other areas will be cut more to compensate for their retainment.

Summer school has been a relatively popular program, with many UWSP students taking advantage of it. In 1989, 2413 students were enrolled in summer school classes; in 1990, 2353 students took classes; and in 1991, 2363 students were enrolled. Last year, approximat-

ly 21% of all the undergraduates, and about 62% of the graduate students who were enrolled in school in the spring took summer classes.

The main problem with the downsizing plan is that some students who were planning on graduating in August won't be able to, explained Soon Koh, a student senator who is serving on the University Planning Committee as well as the Academic Affairs Committee.

Therefore, he feels that lower level classes (freshman and sophomore level) should be cut before the 300 and 400 level classes. He explained that "These are the most important classes to keep because they are what most upperclassmen need to take to graduate."

Twenty-two percent of the 1991 undergraduate summer school students were freshmen and sophomores, and 78% were juniors and seniors. However, some people still maintain that the lower level GDR classes should be kept because these classes traditionally draw the greatest number of students,

## Students try to solve community problems

A new organization has been formed at UWSP to "build a more positive community and take an active approach to improve present conditions."

That's a description provided by one of the organizers, John Zach of the career services staff.

Named University Forum, the group brings together interested people, particularly faculty and staff members, in weekly dialogue on campus issues.

Tentative plans for second semester include holding discussions from noon to 1 p.m. on Tuesdays in the Heritage Room of the University Center.

Zach said the meetings are designed to "direct our energy and discussion towards positive solutions, not as gripe sessions."

To date, attendance has ranged from about 20 to 45 people. State Rep. Stan Gruszynski answered questions at the most recent meeting.

A major project being assumed

by the Forum will be calling attention to exemplary projects, activities or offices on campus.

The first winner of the "Organization of Merit" was Campus Greens, which is a student group promoting more responsible use of natural resources.

At the most recent meeting, Pray-Sims Hall was singled out "because of how well they have implemented a philosophy of consensus and shared power to improve their life in the hall," according to forum member Robert Mosier.

This year the residence halls on campus are encouraged to develop community agreements. Students are asked to practice a shared-power philosophy, which means that residents discuss and agree on goals and expectations, and then work toward the development of respect for each other as well as the building in which they live.

## UWSP to buy more parking

UWSP has received final approval to buy two houses on Stanley Street for the addition of 72 new parking spaces in an adjacent lot.

The total purchase price of nearly \$103,000 will be paid by users of campus parking facilities. No longer is the state financing parking lot projects.

For UWSP permit holders, the purchase will increase current charges by \$4 per year, and the clearing and pavement of the land will amount to an additional \$3.60, according to estimates by UW System Central Administration in Madison.

The State Building Commission authorized the payment of \$48,000 to the estate of Clara Lodzinski for a two-story house at 2126 Stanley St., and \$54,750 to the estate of Martha Yulga for another two-story house at 2148 Stanley St.

It is new policy in the state—encouraged by Governor

Thompson—to finance additional parking spaces at university campuses with user fees instead of revenues from taxation.

Carl Rasmussen, director of space management and facilities planning, said the downside of this issue is that parking fees are more directly affected. But an important positive element, he added, is the fact that purchases will probably be able to be made with less hassle in the future.

This is important, he explained, when land or houses are put on the market and sellers want to avoid delays in sales.

About nine parcels with houses that have been identified as possible parking expansion sites remain within boundaries of the university's master plan. Eight of them are in a string along Portage Court, adjacent to an existing lot between Phillips and Reserve Streets. Another one is behind Nelson Hall on Main Street.

## IN THE REAL WORLD

by Chris Stebnitz  
News Editor

Governor Tommy Thompson said Monday that he would like to see the Legislature pass legislation that would allow the state to confiscate the cars of repeat drunken drivers.

"The problem with repeat drunken drivers has continued to plague us... We have to increase the severity of the punishment," Thompson said at a meeting of the Wisconsin Sheriffs and Deputy Sheriffs Association.

Another proposal, which he said he would present to the Legislature next week would require absolute sobriety of drivers with two or more drunken driving convictions.

These proposals come shortly after the recent highly publicized Milwaukee County case in which a 4-year old Wauwatosa boy was killed by a van driven by a man later charged with drunken driving.

The man was allegedly driving without a license and had five past drunken driving convictions, records showed.

Accused serial killer Jeffrey Dahmer was out of court Monday and told a psychiatrist that he tried to lobotomize some of his drugged victims, then strangled and dismembered them when the experiments failed to make them "zombie-like", a published report said.

Dahmer was convicted January 13 after pleading guilty to the mutilationslayings of 15 of the 17 young males he has told police he killed since 1978.

He also pleaded innocent by reason of mentaldisease or defect and is scheduled for trial Jan. 27 to determine his mental state at the time of the slayings.

According to the report, Dahmer told one of the prosecution psychiatrists that he had drilled holes in the heads of some victims and poured fluids in the skulls in order to deaden part of the brain.

"He had hoped to control and keep them around longer by making them zombie-like," Dr. Frederick Fosdal, one of the prosecution's psychiatrists, said in the report.

## SGA STUDENT GOVERNMENT ASSOCIATION

\* The Harper's Society was accepted as a student organization. Congratulations!

\* The Institute of Management Accountants was accepted by Senate as a student organization. Congratulations!

\* The sanctions the Senate placed on last year's ski team were appealed and lifted.

\* The Cross Country Ski team received funding of a \$117.

\* The three cost centers: Athletics, Intramurals, and Child Care came before Senate for

budget approval. Budgets for 1993-95 were approved.

\* United Council passed a resolution that states they weren't pleased with our student regent for talking against a tuition freeze.

\* The Women's Issues Director position is open. Applications are available in the Student Government Office. Due Feb. 5.

\* Voice your opinion on where student money is spent! Become a senator. Applications are available in SGA office.

## Students

from page 1

Hall Director Ann Klamer, who accepted the citation, explained that vandalism, discipline and alcohol problems are low in Pray-Sims. She believes the reasons for the quality of life in the facility is the result of student being empowered to take positive action, to respect others and their dif-

ferences, and to hold one another accountable for choices and behavior.

"It's OK to have problems and conflict," Klamer said, "as long as students discuss and deal with the problems rather than denying or avoiding them. Students learn that problems and solving problems are a natural process in life."

## Smoking bans raise questions about freedom

by John Reynolds

Contributor

The issue of smokers and non-smokers rights has been an active one over the last ten years, ever since C. Everette Koop, the former surgeon general, declared that second hand smoke from cigarettes is definitely a danger to non-smokers and the fetuses of pregnant women.

Our campus is no stranger to the increasingly strict state health codes that have taken effect over the past ten years. Only a few short years ago, students were allowed to smoke right in the classrooms. This was a privilege that was slowly honed down to limiting smoking to just the hallways and study lounges.

Later, more rigorous policies banned smoking in any academic building including instructor's offices. The most recent policies were adopted by the University Center's Policy Board in the spring of 1990, and approved by Chancellor Sanders. This policy states:

1. The smoking policy for the building (UC) shall comply with the Wisconsin State Law for Smoking in Public Buildings (1983:SB80, Act 211).

2. Signs shall be posted at entrances to the building indicating that no smoking is permitted in the building except where signs are posted to permit smoking in that area only.

3. All public restrooms are no smoking areas.

4. Smoking may be allowed in meeting rooms and other areas reserved for a specific group. The decision of whether the area is a smoking area or non-smoking area.

Continued to page 14

## Hard times

from page 1

from all grade levels.

Olson explained that no programs the university has are bad, and it is unfortunate that we have to choose. Many areas are already strapped by low budgets, and this is only increasing the burden.

But she also stated that "In some aspects prioritizing is very good because there may be ways that areas could be run more efficiently, and now they are forced to do that."

Students can voice their class preferences and find out which classes will be offered during the summer by contacting the specific departments. Hopefully, this way they can arrange their schedules so that they graduate according to plan. Also, SGA will notify students of summer school classes during Check Point.

Premedical Internship Program students this year are (from left) Wendy West, Debra A. Olsen, Noah Saecker, Paul Numsen, Randy Goethke, Mike Feldt, John E. Lopez, Michelle L. Banczak and Kim M. Wnuk. Missing from the photo is Michael R. Line. (photo submitted)

## UWSP Pre-med students play doctor

Ten University of Wisconsin-Stevens Point students spent the past three weeks learning about life as a doctor. Their teachers were Marshfield Clinic physicians, who shared information about their practice, education and family life. Now it's up to the students to decide if medicine is the career for them.

These UW-SP students participated in the Premedical Internship Program. The program, in its third year, is sponsored by Marshfield Clinic's Medical Education Department. It is designed to encourage qualified students to

apply to medical school or to pursue medical careers, according to Jim Gangelhoff, manager of the Clinic's Cardiology Department. Gangelhoff, along with Doug Reding, M.D., Sol Sepsenwol, Ph.D., pre-med advisor at UW-SP, and Kent Hall, Ph.D., UW-SP, are program coordinators.

Students shadow physicians, have contact with support services and resident staff, and attend teaching conferences. All of this helps them evaluate personal goals and reasons for wanting a medical career.

## New Year's resolutions dissolved Efforts for positive change die quickly

by Sarah L. Newton  
Editor-in-Chief

I refuse to say "back to the old grind, eh?" because I hate it when my mother says that.

So instead, I'll ask how many of you skipped the first day of your classes to go fishing because "you never do anything the first day, anyway," and then had to get four pages of notes from someone else in the class? Happens every semester.

Not to me, though. I don't fish in the winter.

Anyway, in reference to the incredible, recurring opportunity for academic, cultural, and most importantly, social advancement we have all been given once again (carrying the alias semester II '91-92), I say, Why so soon? I'm still trying to figure out which New Year's resolution to break first and worst.

Speaking of New Year's resolutions, as soon as someone finds out, will you please explain to me what their purpose is?

Although it has become very unoriginal, one that's usually chosen by everyone is weight loss. Every year I resolve to lose at least 10 pounds, and each year when my annual check-up rolls around, I come closer and closer to just rolling to the doctor's office. At this point

I'm hoping my resolve hasn't dissolved.

Another resolution that seems to find many foolish and/or idealistic minds is to save money. NOT. I won't go on and ramble about the current gray state of the economy, because that's not the point of my point.

*"... New Year's resolutions -- as soon as someone finds out, will you please tell me what their purpose is?"*

The point is that the breaking of this particular resolution has more to do with being a student than being a U.S. citizen. Buffy's and Bruisers don't have to care what kind of shambles the economy is in, they can pretty safely assume that students of all shapes and colors will still come pouring in by the hundreds to accidentally spill their overpriced beer and spread the word to their friends that it's the cool place to be.

And they don't have to worry about their rent, utility, or phone bills, either. We're paying those, too (silly you, why would we pay theirs when we're struggling to pay our own? Go figure.) But we need this disgustingly cheap entertainment (that's unvaluable, not inexpensive) to survive the never ending

stresses of further education. What a trap.

So you see, it's impossible to keep the resolution of saving money. How can you save something that's endangered in the first place, and desperately needed in order to maintain sanity?

Of course when visiting the land of forgotten resolutions we must not forget the one our parents will not let us forget -- to better our academic standing. Well, Mom, I love you and everything, but let's get real.

Sometimes parents amaze me - give them an inch, and they want a mile. Of course this theory spurns the advice, don't work too hard for B's, the rents will just pound you to get B+'s and A-'s, and then the next thing you know, they'll want your GPA over a 3-point.

The best we can really do, I suppose, is leave any particular class with a little inspiration. Either to continue with that subject matter, copy and follow that particularly attractive student's schedule, or to never take that

certain prof again would probably be enough. We don't want to over-do it.

Besides all that, peer pressure, loud upstairs neighbors, construction in the library (which is another wicked story completely) and \$2.00 pitcher nights make it nearly impossible to get better grades. Will we ever find anyone who's on our side?

There is a need, also to say something for those who employ the "baby step" method, and try itty bitty resolutions--flossing every day, no chocolate, write to Grandma and Grandpa every month, separate your laundry--before tackling the biggies.

To these people, I say way to go. You've taken a big step in a logical direction to making positive changes in your life.

And to anyone I've depressed who wants to know what I've been rambling about, lighten up. Happy New Year.

## Students ski Indianhead

by Sarah L. Newton  
Editor-in-Chief

One hundred and ninety three UWSP students took part in a University ski trip over Christmas break. Point-ski, a Campus Activities sponsored event, took place over three chilly days and nights in the lodges of Indianhead Mountain in Michigan.

There were free lessons available for first time and advanced skiers, and lift tickets and rental skis were included in the price of the trip.

The first ever Point-ski trivia contest also took place, with the winner taking home a sweatshirt from the UWSP bookstore, after answering correctly such questions as how many students have attended Point-ski in it's history, and how many miles is it from Indianhead Mountain to the location of the 1992 Olympics?

"The first couple days were cold, but awesome," said sophomore Bob Belmont. "it snowed so there was a lot of fresh powder." The last day of the trip proved to be the ultimate challenge for dedicated skiers. Windchills dropped as low as

sixty below, but the slopes were still open and full of people.

"It was one of those days when you could hear the snow squeaking under your feet, it was so cold," said graduate student, Julie Apker.

Whether beginners or experts, many people took up the opportunity of taking Point-ski as a phy-ed credit, but many were just there for the good times, and the great skiing.

## Tip-up tips and tactics for big Northern pike

by Buck Jennings  
Outdoors Editor

I spent my winter break reaping the benefits of semi-employment. Having spent the vast majority of my time on the ice, my auger muscles are toned, my hands are pike-lacerated and my mind has been repaired by the hallucinations and psychotic musings only achieved through extended isolation on a frozen lake. Thus we arrive at this week's topic-- ice fishing for northern pike.

Northern pike are found throughout Wisconsin, and for that matter, throughout the northern latitudes of the entire northern hemisphere. Surely a slavic angler today hunts pike to find solace from his country's current political turmoil. The pike can be an aggressive predator and because it spawns very early it will frequently out-compete its larger cousin the muskie. While most often thought of as a predator, the northern pike is not above scavenging.

If you want to catch a lot of pike you must find a specific set of conditions. Look for weedy bays with three to ten feet of water. Boat channels are also good choices. When a boat channel enters a main body of water, a point is created. Points are often overlooked by other anglers who tend to favor the channels themselves. On Dec. 23 I took a 9 lb. northern from McDill Pond by fishing a point which had yet to see a hole cut on it.

These situations will provide a lot of fish and occasionally large ones. But to fish specifically for large pike you must change locations.

Big pike frequent deep water. Look for depth adjacent to the weedy shallows I've just described. When I say "deep" water I mean 15 to 60 feet.

Jane Graham pulls a decent pike from the weedy shallows of Lake Namakagen in Bayfield Co. (photo by Buck)

Yesterday I had hits in 20 and 30 feet of water. A very difficult to locate yet productive area is a mid-water hump, or sunken island.

Finding these areas will require a topographical map, lots of auguring or a depth sounder. A hump can be very subtle and difficult to discern. Therefore these areas are often overlooked by other anglers and are often underfished.

Northern pike can be caught on a variety of baits. Large golden roaches and suckers are productive, bass and walleyes will also take these, and I like to use them where these species also occur.

Use top quality treble-hooks and sharpen them. Northern pike have bony mouths.

On my treble-hooks, I bend two of the hooks so that they are perpendicular to the third. This modified hook, when viewed from the bottom resembles the letter "T". I use the base of this

"T" as my bait hook. The minnows are hooked dorsally, and the exposed hooks lay flat against the minnow. Modifying my hooks in this manner has improved my success ratio by making the hooks harder to feel.

A quick-strike rig will also make the hooks harder for a fish to detect. I have only recently begun using quick-strike rigs and therefore I can offer little information as to their effectiveness. I suspect however that the heavy black leader will deter pike in very clear water.

Many will argue over the necessity of steel leaders versus heavy mono. While mono will probably get more strikes, I use steel, not because of its tested strength, but because of its ability to withstand abrasion. I use only the finest diameter I can find. My favorites

## DNR's statewide outdoors report

The first cold weather in a long time has arrived in Wisconsin, and ice anglers are looking forward to better ice conditions. Caution is still advised when traveling on the ice.

An ice boat went through Madison's Lake Monona this week, and the ice blew out of Lake Superior's Chequamegon Bay north of Houghton Point.

If you're going to be outdoors, be aware of the dangers associated with frigid temperatures and sub-zero wind chill factors, and protect yourself with appropriate clothing.

Snowmobilers and cross-country skiers will find plenty of snow on the ground in the Brule area, and throughout much of the northland. Trails in Langlade County are open and in reasonable shape. Cross-country trails in the Northern Highland-American Legion State Forest have new snow that is being tracked for skiers. Snowmobilers should remember to slow down within 100 feet of an ice fishing shanty or a person on the ice.

Panfish are biting throughout much of the state, including bluegills, perch and crappies. Anglers are reminded that the panfish bag limit has not changed and is still 50 fish; the 1992 fishing regulations pamphlet incorrectly states that the bag limit is 25 panfish.

Northern have been biting well on Spooner Lake in Washburn County, with a few fish weighing as much as eight

pounds being caught. Perch fishing has been slow in the Green Bay area. At mid-week, ice conditions were still poor. There was open water on the Fox River and no ice at De Pere. Ice conditions were also poor at several Door County fishing spots.

Fishing in southern Oconto County has produced nice catches of northerns and assorted panfish. Some nice northerns have been caught on the Wolf River along the Navarino Wildlife Area, and some nice-sized ones are coming from the Peshtigo area. Anglers are catching some white bass and perch on Lake Winnebago.

In southern Wisconsin, trout fishing continues to be good on Sauk County's Bear Creek. Trout anglers are also having good success in Grant County. Walleyes are being caught below the Dells dam on the Wisconsin River, but most of the fish are undersized.

Some nice bass are being caught on Lake Columbia, where the minimum size limit is 18 inches. There is a daily bag limit of one smallmouth and one largemouth bass on this particular lake; three hybrid striped bass can be taken.

In the Madison area, Lake Kegonsa is being fished heavily for perch and bluegills, and a few panfish are being caught on Lake Mendota. Mud Lake fishing activity has slowed down.

## EPA sponsors contest to award protectors of the environment

If you're doing something worthwhile for the environment, you may be eligible to win an award.

The U.S. Environmental Protection Agency (EPA) is announcing its second annual Administrator's Awards Program to recognize excellence in environmental protection. This year the program will focus on achievements in pollution prevention.

Five categories are eligible for the awards: citizens, nonprofit organizations and community groups, businesses and trade organizations, educational institutions, and governmental agencies. Contestants must apply by February 13.

"Anyone involved in pollution prevention is encouraged to apply," said Ken Wiesner, chief of the Office of Pollution Prevention for the Department of Natural Resources.

Final winners will receive their awards from EPA Administrator William K. Reilly in Washington, DC.

Several Wisconsin organizations won regional or final awards in last year's contest emphasizing recycling successes. Wiesner noted.

Program applications for this year's awards focusing on pollution prevention should be sent to EPA's Region 5 office in Chicago. Each EPA regional office in the U.S. will submit six finalists in each category to EPA

headquarters for national competition. Five final awards will be announced during Earth Day celebrations in April.

Contestants must submit a cover sheet identifying their project along with a short summary (up to four pages) describing the project and program. Applications and supporting materials must be postmarked by February 13, 1992 and sent to Corinne Kruse, U.S. EPA Region 5 (PI-19J), 77 West Jackson Blvd., Chicago, IL 60604.

For more information or for an application brochure, prospective Wisconsin contestants may call EPA Region 5 at 1-800-621-8431 between 9 a.m. and 4 p.m.

## Bureau of forestry offers seedlings

Tree seedlings and wildlife shrubs are still available for landowners from Department of Natural Resources nurseries, reports Trenten Marty, nursery specialist with the department's Bureau of Forestry.

Tree species available include two-year-old red pine, white pine and sugar maple, and one-year-old jack pine. Wildlife shrubs available include ninebark, silky dogwood, red osier dogwood and mountain ash. Marty said the nurseries also have a "wildlife packet" available that contains an assortment of trees and shrubs.

Wisconsin landowners may purchase seedlings from DNR nurseries for forestry, wildlife habitat, watershed protection or erosion control purposes. The minimum quantity that may be ordered is 500 forest trees of one species and age; or 500 wildlife shrubs in multiples of 100 of each species; or a wildlife packet, which contains 100 two-year-old white pine, 100 ninebark and 100 silky dogwood seedlings.

"Landowners who want to plant trees and shrubs this coming spring should place their order as soon as possible," recommended Marty. "The

demand for tree seedlings and wildlife shrubs is large, and our nurseries anticipate selling out of their nursery stock before springtime."

DNR foresters are available to advise landowners about species selection, planting methods, department cost-sharing programs, tree planter rental and other forestry considerations.

The trees and shrubs will be delivered in April and early May. Landowners may pick up their orders at the state nurseries in Boscobel, Hayward or Wisconsin Rapids. In most other counties, local DNR foresters will designate a centralized distribution locations for the county.

Marty noted that forest trees and shrubs from department nurseries may not be used for commercial Christmas tree production, landscaping or ornamental plantings.

Applications for nursery stock are available at local DNR offices statewide or by mail from: Wisconsin DNR, Bureau of Forestry, P.O. Box 7921, Madison, WI 53707. FOR MORE INFORMATION CONTACT: Trenten Marty--608-266-7891.

## Panfish Bag Limit Corrections For '92

Ice anglers around the state are reminded that the panfish bag limit remains unchanged from 1991 at 50 fish in total, said Lee Kernen, director of Fisheries Management for the Wisconsin Department of Natural Resources.

Panfish include bluegill, pumpkinseed (sunfish), crappie and yellow perch.

The 1992 Wisconsin hook and line fishing regulations pamphlet incorrectly lists the panfish bag limit as 25. At the time the regulation pamphlet was printed, the Natural Resources Board had approved reducing the bag limit from 50 fish to 25 fish, pending a legislative review.

Following legislative review, the Natural Resources Board subsequently withdrew the 25 fish bag limit, keeping the statewide bag limit at 50 panfish.

The 50-fish bag limit applies to all of Wisconsin's inland

Continued on page 9

## Pike

From page 6

are 6 strand 18 lb and bronze in color. The leader is attached directly to a quality treble-hook without the added bulk of a snap swivel. When using a conventional steel leader, remove the snap swivel and loop or tie the hook directly to the leader. The lighter the leader, the fewer "hits and spits".

Now that you are rigged and baited, pick a location and set your tip-ups so that the baits are a foot to 18 inches above the bottom or emergent weeds.

Northern pike can be finicky, hitting a bait and spitting it just as quickly. If these "hits and spits" become to frequent, try switching to a "wind-jigger" tip-up. With this rig, a pike takes the bait and the tip-up's arm bobs downward. The pike will feel little or no resistance before running and tripping the flag.

Set these tip-ups so that when the arm is all the way down, the minnow is still 6 inches above the bottom. Also, bend the wind vains downward, verses upward. This way a gust of wind will force the arm up and pull the minnow off of the bottom or out of the weeds.

At times wind-jiggers seem to get fewer hits, possibly due to too much action. They also re-

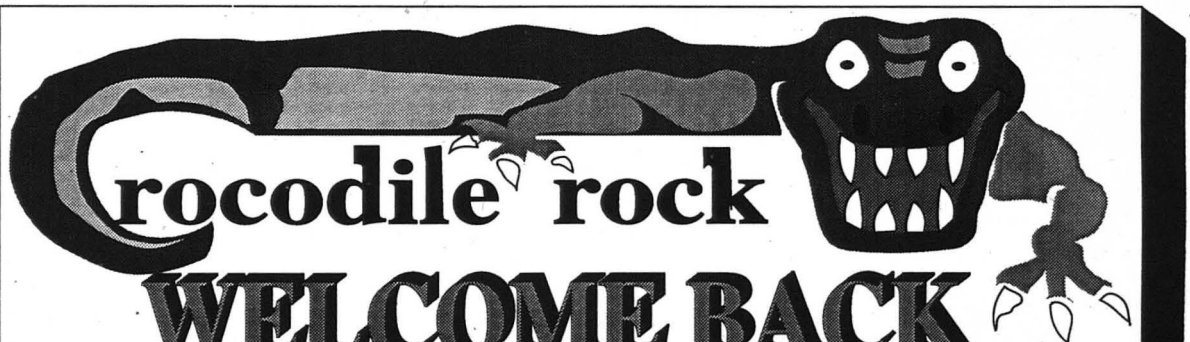

quire a constant vigil of de-icing to keep the line moving freely. While they are a bit of a hassle, their strike to catch ratio nears 1:1. Wind jiggling tip-ups deserve a place in your pike fishing arsenal.

Now you can catch pike, but what about huge, hawg, trophy pike like the one that killed my dog and gave me a permanent limp? Well, call me Ishmael, but lunker pike will require some different tactics.

True enough trophy pike can be taken using the methods I've just described, but more often they are taken in deep water on dead baits. The most common baits are smelt, (pronounced SS-melt, not SH-melt, you cheese-heads) or other oily fish such as mackerel.

These baits are often rigged and suspended so as to look like a live fish. Recently however, the trend seems to be allowing the bait to settle directly on the bottom. It seems that big pike are not above scavenging. Some anglers even "ripen" their bait on a radiator or register.

I realise that hearing the pike called a scavenger sounds blasphemous ("Not, my northern pike, that's impossible?!") These methods sound ugly, but big pike are pigs and these methods work. Try them out and next week we will discuss some specific waters in our area which produce big northers.

# AIDS awareness still pressing issue

## Many questions . . . little agreement on answers

by Michelle Neinast  
Contributor

One of the most distressing issues you may read about today

is the AIDS epidemic. There are so many questions without answers and so little agreement on the answers we have been given. This, compounded by a lack of widespread education

about the disease, has left many people very unsure about how the disease might affect them.

Although the government under former President Ronald Reagan seemed reluctant to educate the public about this disease, in 1986, then Surgeon General C. Everett Koop and the U.S. Public Health Service wrote an informative brochure on AIDS. It was published by Abbott Laboratories, a worldwide health care company headquartered in Illinois, and distributed to every household in the United States.

It should first be understood that AIDS is caused by Human T-Lymphotropic Virus, Type III (or HIV virus), which was discovered in 1984. The virus is transmitted mainly through blood and semen, but there are questions about saliva also.

However, contrary to some people's beliefs, the virus cannot be passed through casual contact of any kind. For that matter, it cannot be contracted by donating blood or by sitting on the same toilet seat that an infected person has used.

According to John Tierney in his article entitled "Straight Talk," the odds of getting AIDS from toilet seats or any other casual contact are "... roughly the same as the odds of Chicago being leveled by a giant asteroid: no one can rule out the possibility, but no one has seen it happen, either."

Ninety percent of those who are at high risk of getting the HIV virus fall into three

categories -- male homosexuals or bi-sexuals, intravenous drug users, and hemophiliacs. The other 10% come from blood transfusion recipients and sexual partners of anyone in a high-risk group. Haitians and Africans were once thought to be extremely susceptible, but this has since been disproven.

The disease itself, Acquired Immune Deficiency Syndrome (AIDS), was recognized in 1981. It targets white blood cells which are the one indispensable part of our immune system, which impairs the body's normal ability to fight off serious illnesses and infections. For this reason, if an HIV carrier does develop AIDS, this person has a 70% chance of dying within two years of the diagnosis.

For those who do not fit into one of the high-risk categories, the chances of contracting the HIV virus, and ultimately AIDS, are much more minimal than many people would have you believe. Tierney says in "Straight Talk," that, "If your partner isn't in a risk group and you use a condom, the odds of getting infected (in one sexual encounter) are one in 50 million. You have about the same chance of dying within the next three months being hit by an airplane falling out of the sky."

Although there is much that needs to be discovered about the HIV virus and AIDS, the amount of information readily available and the outlook for the general public seems to be improving.

### THE FAR SIDE

By GARY LARSON

Unbeknownst to most ornithologists, the dodo was actually a very advanced species, living along quite peacefully until, in the 17th century, it was annihilated by men, rats and dogs. As usual.

## Pointer Profile Peterson 'toons' into comic books

by Julie Apker  
Features Editor

There's a student on this campus who leads a double life in his "spare" time.

Most students know Brandon Peterson as another UWSP "Pointer," or as a fellow graphic design major and Stevens Point native. BUT do they know that he also takes the form of "Valor," "The Persuader" and other popular comic book characters. This student is employed by D.C. Comics, the second largest comic book company in the world.

Peterson is the artist of these superheroes, the person who captures the imaginations of his readings and brings to life the colorful characters. His one-time cartooning hobby has flourished into a profitable career, including work on popular D.C. Comics' series the "Legion of Super Heros" and "Star Trek."

"In high school, I was involved in creating murals and stage sets, but at the time I wanted to be an engineer rather than an illustrator," said Peterson. "But Dennis Jensen, a former UWSP student and now a professional artist, inspired me and some friends to work with him and learn the comic book business."

When the group disbanded, Peterson continued with his

Brandon Peterson doubles as the caped crusader

own cartooning efforts. A few years ago, he attended an annual comic book conference in Chicago and got his "big break" being hired as a part-time penciler.

"As a penciler, I'm the book's lead artist. I'm given a brief script as a guide to draw the actual comic book characters and the settings for each panel," Peterson explained. "My drawings are later accentuated by the colorist, inker and writer and which altogether add up to make a comic book."

About the time he began UWSP, he started getting minor illustration work at smaller comic agencies. Peterson's success soon caught the attention of editors at D.C. Comics. His temporary job filling in for

the regular cartoonist of the "Legion of Super Heros" series quickly led to more and more assignments for the company.

"I just finished the 'Legion' annual which runs about 56 pages and I'm now drawing the 'Star Trek: Next Generation' annual," said Peterson. "In the future, I'll be drawing a mini-series about one of the legion characters and possibly an assignment with Marvel Comics, the #1 comic company worldwide."

According to Peterson, the comic industry is split into categories of "Big Foot," the mostly humorous daily newspaper comic strips such as "Calvin and Hobbes," and "Little Foot," which includes the comic books he draws.

## Cabin Fever? Break out to sunny Florida

by Kristin Wanless  
Contributor

Does winter have you wondering why you go to school in Wisconsin? Well, UAB is giving you the chance to move south for its annual college Spring Break trips to Florida.

University Activities Board, in conjunction with Intercampus Programs, will be sponsoring trips to Daytona and Panama City Beach, Florida for spring break '92.

Both trips leave for Florida on Friday, March 13 and return to Stevens Point on Sunday, March 22.

If your destination is Daytona you'll be visiting the classic spring break hot spot. With 23 miles of beach, live telecasts by MTV and free concerts with top recording artists you won't be short of things to do.

Daytona breakers will be staying at the Howard Johnson's (formerly the Clarendon Plaza) on the beach. The trip, including transportation by bus from Stevens Point, will cost \$264.00 or \$174 without transportation.

Those who choose Panama City Beach are in for a treat at the trendiest place to break. Panama City Beach, in northern Florida, offers 27 miles of beach along the gulf waters for tanning, scuba diving, windsurfing or water skiing.

Fun can be found on the beach

or at the Miracle Strip Amusement Park, Shipwreck Island Water Park, or Gulf World's Marine Showcase.

This Caribbean resort has some of the largest beachfront nightclubs to be found anywhere in the country. Many have huge wooden decks overlooking the gulf waters. Unlike Daytona, Panama City Beach allows alcohol on its public beaches, provided you're 21. It's easy to see why Panama City Beach has exploded in popularity among college students.

The Panama City Beach trip costs only \$229.00 with bus transportation from Stevens Point or \$139.00 without transportation.

Intercampus Programs will have representatives in both Daytona and Panama City Beach to insure all breakers have a safe, fun vacation. Students will be supplied with a schedule of events, programs and college expositions.

Intercampus Programs sponsors pool deck parties with free refreshments and music. Side excursions to popular tourist areas also arranged.

You can register for both trips in the Campus Activities Office in the Lower Level of the University Center. A \$75 deposit is required at the time of registration. Call UAB at 346-2412 for additional information about either trip.

## The Pointer Poll: What is your most useful news source on campus?

(Compiled by Julie Apker and Al Crouch)

"As an R.A. I receive most of my information from staff meetings and organizational newsletters. I also read The Pointer and circulate it around my wing and listen to 90 FM. I try to take advantage of every possible source available to me."

Name: Deb Gardner  
Year: Junior  
Major: Wildlife/Biology  
Hometown: Coon Rapids, MN.

"The most useful source to me is CNN News and the Chicago Tribune to keep me on top of current issues, a necessity in my major. To keep up with campus events, I read The Pointer."

Name: Kevin Hintz  
Year: Freshman  
Major: Political Science  
Hometown: Plover

"I read The Pointer before SGA senate every week, I watch Channel 7 News every night for a break from studying, and I have my radio tuned in to 90 FM."

Name: James Fischer  
Year: Junior  
Major: Forestry Management  
Hometown: House Springs, MO.

"The most useful news source for me on campus is the posters I see in the U.C. Also, The Daily lets me know what activities are happening on campus. As far as local news goes, The Pointer is the best information source for campus news."

Name: Sara Wandke  
Year: Senior  
Major: Computer Graphics  
Hometown: New London

"The source that's the most useful for news is word of mouth. I feel this way because it may not be true...but you never know if it may be true either."

Name: Jed Swicichowski  
Year: Senior  
Major: Art  
Hometown: Green Bay

# Renters rights!

by Sean Zielinski  
Contributor

Once a UWSP student completes four semesters in the residence halls, the student may exercise his or her right to move off campus.

The benefits of off-campus living can be numerous if you know the guidelines to renting an apartment or house. On the other hand, problems weigh in along with the benefits.

Jason Leis, a junior and off campus house renter, explained that in his house a heater in one of the rooms only works occasionally. In another case, Alex Christensen, an occupant of a rental house off-campus, reported a microwave stolen.

"They promised new carpeting in every room when we signed the up for the apartment," reported Paul Rink an apartment tenant and junior at UWSP. "Now they have no plans to replace ours," he added.

Without a knowledge of their rights students are an easy target. In the city of Stevens Point, few written guidelines have been established on where to turn or what to do when problems arise regarding off campus housing. The next best thing is to know your rights as a tenant or occupant.

Under the Building and Premises Maintenance and Occupancy Code of the City of Stevens Point, your owner or landlord must provide: "a kitchen sink in good working condition, cabinets and/or shelves for the storage of food, structurally sound handrails, and one window or skylight in every habitable room facing directly outdoors." Being aware of these and other provisions that apply to tenant occupancy can help you to assert your rights as a renter.

**"The next best thing is know your rights as a tenant or occupant."**

In Stevens Point the provision remains clear in section 21.05 number eight which says, "no person shall let to another for occupancy any dwelling... unless all exterior doors are equipped with safe, functioning locking devices."

Landlords are often viewed as the bad guys, but in most instances it is past tenants that have caused the problems. According to Marin Meyer a landlord, "appliances installed by

## Pointers down Eau Claire 52-43, share tie of first

Justin Freier lays in an easy two in last Saturday's 82-67 win over River Falls. (photo by Jeff Klemen)

by Mark Gillette  
Sports Editor

The UWSP's men's basketball team sent UW-Eau Claire home last Friday night with their first conference loss of the season and reason to believe that the Pointers are strong contenders for the WSUC title.

On Saturday night the Falcons of River Falls came to Quandt Gym and received an old-fashioned whipping from the Pointers, going down 82-67.

In the Eau Claire game, Mike "Boomer" Harrison led the way for the Pointers with 14 points in the 52-43 victory in front of 2521 fans at Quandt Fieldhouse.

Eau Claire, 11-3 overall, 6-1 in conference, came in allowing less than 60 points a game while Point held their opponents to 65 a game. The Pointer defense rose to the occasion against the Bugolds which saw Eau Claire shoot only 31% from the floor.

"We played a better defense than they did. They had a hard time taking the ball inside against our big people. We had nine blocked shots," commented Pointer coach Bob Parker. "They turned to their outside game and shot a miserable percentage."

The Pointers jumped out to a 27-20 half time lead while responding notably against the ball control offense of the Bugolds.

The height advantage UWSP had over Eau Claire proved to be too much for the Bugolds to handle. "Justin Freier played an excellent game inside along with Jack Lothian and Scott Frye. When you get your shot

Stevens Point 82  
River Falls 67

Harrison led the way for the Pointers again on Saturday night against the Falcons with 26 points on six of eight shooting from three-point range.

The Pointers went up 39-29 at half and never looked back on the way to a 82-67 victory over the Falcons.

*"They had a hard time taking the ball inside against our big people. . . they turned to their outside game and shot a miserable percentage." - Coach Bob Parker*

blocked a couple times you tend to alter your shoot and that's what Eau Claire had to do to adjust to our big men inside," added Parker.

The Pointers outscored Eau Claire 25-23 in the second half to come up with the final score of 52-43.

Willie Green and former Pointer Mike Hatch each had 11 points to lead the Bugolds. Andy Boario chipped in nine points for UWSP and Lothian had eight.

Jon Julius had six rebounds to lead the Pointers while Lothian grabbed five boards.

Coach Parker was happy to see the Pointers win their ninth straight game and he was particularly impressed with the offensive performance. "We were a bit fatigued and didn't play quite as well defensively. Offensively I thought it was one of our better games," said Parker. Mike Saffold had 15 points and Craig Mell added 14 to lead the Falcons.

Other players in double figures for the Pointers were Boario and Julius with 15 and 10 points respectively.

## Pointers sweep Falcons to end Break Caufield new all time scoring leader

by Tom Weaver  
Contributor

The UW Stevens Point Hockey team traveled to UW River Falls last weekend, needing a sweep to come out of the holiday break with an above 500 record for the break and more importantly to hold down second place in the rugged Northern Collegiate Hockey Association.

The early part of Christmas break had been a rough one for the three time defending national champs as they started things off on a bit of a sour note by dropping a pair of games at UW Superior.

Those two losses gave the Yellow Jackets of Superior sole possession of first place and moved them ahead of the Pointers in the national rankings.

"Those were a tough couple of losses because we are chasing them in the standings and we don't get a chance to play them again. That means we have to get some help from some other teams, but we have to take care of ourselves first and win our league games to keep pace," said Pointer head coach Joe Baldarotta.

The Pointers returned home on January 3-4 to defend their 1988-89 NCAA Division III National Championship against the Tigers of the Rochester Institute of Technology. The

Pointers once again held the Tigers number, just as they did in 1989 as they swept a pair of games from R.I.T. 6-2, and 7-1 in the Hardee's Hockey Challenge.

*"I'm really happy for Paul because he's done a lot for our program and really deserves this honor." - Coach Joe Baldarotta*

January 10-11 saw the Pointers defend their most recent NCAA title as they headed to Mankato, Minnesota to face the Mavericks of Mankato State in a two game series.

Game one saw the Mavericks pick up two power play goals in the first five minutes. The Mavericks held off a furious Pointer barrage to hold on to a 4-3 win. UWSP fell behind 1-0 in the first period of game two, but the Pointers responded with three unanswered goals in the third period for the 3-1 win.

Stevens Point 6  
River Falls 5

Last weekend the dogs traveled to River Falls for a two game set with the Falcons of UW River Falls. In game one the Pointers were paced by Scott Krueger's pair of goals while Todd Tretter added a goal and three assists.

The host Falcons jumped out to the early 1-0 lead at the 8:23 mark on a goal by Greg Christanson.

The Pointers Paul Caufield moved ever so close to the all time Pointer scoring mark at the 11:05 mark, leaving the Pointers tied at one after one period and Caufield just two points shy of

Ralph Barahona's all time scoring mark of 216 points.

The Pointers scored three goals in the second period to take the 4-2 lead after two periods. The pesky Falcons scored three goals within three minutes in the third period before Krueger got the game winner at the 11:54 mark giving the Pointers the 6-5 win.

"River Falls has a good young team and they have been involved in a lot of one goal games. They just don't have the experience to pull out those one goal games," said Baldarotta.

"We were fortunate enough to capitalize on a few of their mistakes and come away with the win, that's what made the difference and every game is very important to us."

Stevens Point 8  
River Falls 1

In game two, the Pointers jumped out to a 4-0 first period lead, and the most significant of

## Pointers swim by La Crosse

by Deby Fullmer  
Contributor

On Saturday, January 18th, the Pointer Swimmers hosted La-Crosse for dual meet competition. The Pointers were victorious as both the men and the women's teams brought in a win with scores of 118.5 to 100.5 and 133 to 98 respectively.

"This is our first meet since our long bus ride home from our Florida training trip. The trip back, and this week was tiresome, but we swam and dove fairly well," stated head coach Red Blair.

The WSUC nominations for Conference Swimmer/Diver of the Week were Bill Jetzer with a season best 1000 freestyle (10:50.14), and the 200 breaststroke (2:22.60); Jay Buckmaster with a season best time in the 1000 freestyle (10:57.18), as well as a season best time in the 200 butterfly (2:10.29); and Jay Stevens for his diving scores of 275.95 on the 1 meter and 272.7 on the 3 meter.

The WWIAC nominations for Swimmer/Diver of the week were Mary Meyer for her season best time in the 1000 freestyle (11:16.32), her lifetime best 200 butterfly (2:25.37), and for her 500 freestyle (5:32.63); Deby Fullmer for her 100 leg of the 400 freestyle relay, and for her lifetime best time in the 200 individual medley (2:27.93); and

Sharon Drescher for her diving scores of 202.30 on 3 meter and 234.45 on the 1 meter.

"Most of our strong swimmers are performing well and some of our depth people are coming around and contributing more. The depth people are going to be the deciding factor in the conference meet," said head coach Red Blair.

Scott Thoma, the head diving coach, stated that "the divers performed very well at last Saturday's meet. All of the hard work down in Florida over break came out in this meet."

Sharon Drescher had two career high dives including a 3 meter score that was 35 points higher than her previous high. Cari Nilles dove very well, especially on the 3 meter, after coming off of some injuries.

Brandon Koll dove very well on both boards and did a nice job with some new dives. Jay Stevens consistently dove well on both boards. This was Jay's best meet as a whole.

"I left the pool with the biggest smile a coach could have. The divers performed so well I can't say enough. I'll be looking for these types of performances as our Invitational as well as throughout the rest of the season," concluded Thoma.

The Pointers compete again this weekend at home in the "Get to the Point" Invitational. This Invitational will take place all day this Friday and Saturday.

# The 1991 sports year in review

by Brady Kiel  
Contributor

1991 is over and with it the sports world has offered its share of many memories. Now we look back at 1991 and its distinguishing features. Championships, individual achievement and real-life problems made their way into sports headlines last year.

The year began in a bland way by the crowning of co-champions Colorado and Georgia Tech in college football.

Shortly thereafter NFL fans witnessed one of the most exciting Super Bowls in history. The New York Giants, led by then-backup quarterback Jeff Hostetler edged the Buffalo Bills 20-19 when Scott Norwood's last second field goal attempt missed wide right.

The excitement lasted long enough to see Giants' coach Bill Parcells resign to pursue an NFL analyst job at NBC.

NCAA basketball took the stage in March when the Blue Devils of Duke University finally won the title. The '91 tourney also saw the University of Wisconsin-Green Bay make its first appearance, narrowly bowing to heavily-favored Michigan State in round one.

We also witnessed the demise of the UNLV Runnin' Rebs under questionable legal circumstances forcing coach Jerry

Tarkanian to set a date for resignation.

The top players in college basketball, which included UW-GB's Tony Bennett, competed in the Pan-American games, eventually losing to Puerto Rico.

The Twins and Braves climbed from last to first and had an appearance in the World Series. The Twins won the Fall Classic in one of the better series in years.

Many events highlighted the '91 season, one being Nolan Ryan's seventh no-hitter. Ryan's feat overshadowed Rickey Henderson's all-time stolen base record he captured the same day.

The NBA season culminated in June (finally) with "da Bulls" winning the title convincingly over the Lakers. Michael Jordan created waves with his book about strife on the Bulls team.

The NBA got its 1991-92 season started then was shocked, along with society, when Magic Johnson announced he had the HIV virus. Despite his admitted, boundless promiscuity, he was made a hero by millions and has gone on to preach "safe" sex.

Wilt Chamberlain claimed in his own book that he'd slept with 20,000 women (a 1.4 per

continued on page 18

## Hockey

from page 12

the goals was the first one as Caulfield was awarded an assist on the goal by Krueger. That assist gave Caulfield 217 career points in a Pointer uniform and pushed him past former Pointer Barahona as the all-time leading scorer in Pointer hockey history.

I'm really happy for Paul because he had done a lot for our program and really deserves this honor. Many people had really been getting on him because he has not been the 'Instant scoring machine' that everyone wanted him to be this season. When you look at it, he's the leading scorer on the team and has more importantly become a more complete player," said Baldarotta.

The Pointers scored once more in the second period and three times in the third. The Falcons mustered only a power play goal in the second and the Pointers took the 8-1 win and sweep of the Falcons for the second time this season.

Tretter had a big weekend for the Pointers, the junior forward from St. Paul, Minnesota netted two goals and added four assists and took home the NCHA and WSUC Player of the Week honor.

This weekend the Pointers will have a busy schedule as they host the Beavers of Bemidji State University in a two game series on Friday and Saturday, and will host Metelurg, a second division team from Russia on

Pointer Todd Tretter pushes the puck by River Falls goalie Adam Flint in Friday's 6-5 victory over the Falcons. (photo by Jeff Klemen)

Sunday night at the Willett arena.

I can't say enough how important all of our NCHA games from here on out are, with Bemidji State four points behind us, and Superior five points ahead of us, we can't afford any losses in the NCHA," said Baldarotta.

The Russian game will give the Pointer fans an opportunity to see some of the finest hockey at the international level. "This is a great opportunity to give our

team a chance to see what hockey is like at the international level," said Baldarotta.

Tickets for the Russian contest are on sale now at the athletic department ticket office. Since this game was not part of the original schedule, season tickets holders will have first priority for tickets and all sport passes will not be honored. All three contests face off at 7:30 at the Willett arena and can be heard on campus radio station WWSP 90FM

# Women Pointers 10-4 Overall Travel to Whitewater this weekend

by Mike McGill  
Sports Writer

After closing out the first semester on a low note with a 64-54 loss to UW-Platteville on December 11th, Coach Shirley Egner's UWSP Women's Basketball team looked to turn things up a notch in '92 by warming up this past weekend to break in the second half of the school year.

**Eau Claire 74  
Stevens Point 59**

Still a bit rusty from the holidays, the Pointers lost to tough division rival UW-Eau Claire last Friday by a score of 74-59. Stevens Point shot 40%

from the field compared to Eau Claire's 55%.

Lisa Grudyinski led the Pointers with 15 points, 13 rebounds and 6 steals, followed by Tricia Fekete's 14 points and 5 rebounds.

Deana Sexson and Gretchen Haggerty both contributed 8 points (along with 5 assists and 3 steals from Haggerty) and Amy Felauer and Julie Schindler added 6 points apiece.

Eau Claire's Dawn Rattray led all players with 24 points.

**Stevens Point 96  
River Falls 65**

On Saturday the team began to click back in sync as they

defeated UW-River Falls 96-65. Balanced scoring was the name of the game as five Pointers finished the game in double figures: Grudyinski -17 points, Sexson -16 points, Fekete -12 points, Kristen Stephen -12 points, and Felauer -12 points.

Grudyinski and Fekete added 12 and 10 rebounds, respectively, while Haggerty and Schindler each dished out 5 assists as Stevens Point outshot River Falls 47% to 34%.

The Pointers now stand at 8-3 overall and 3-3 in the conference. Their next game will be on Saturday, January 25 at Whitewater. The game starts at 3:00.

UWSP cracked the NAIA Division I poll this week at number 20 and seem well prepared

take on one of their top opponents in the Whitewater Warhawks. "I really, really, hope that our students come out and support our team this weekend. They can be our sixth man and make a big difference in the outcome of the game," stressed Parker.

Parker forses a Whitewater team that will be ready for the Pointers. "I expect a team that is going to run up and down the court like crazy. They are big, quick, and strong."

The victory improved the Pointers record to 13-1 and a share of the conference lead with Eau Claire.

## Mens basketball continue winning ways

by Mark Gillette  
Sports Editor

The Pointers had a lot of success over the winter break. Their success included winning the Sentry Classic and taking the Goombay Shootout in the Bahamas while improving their record to 13-1.

After a two week layoff following their 91-74 victory over Superior on Dec. 14, the Pointers hosted the Sentry Classic.

The Pointers took on a very tough Viterbo team and came out a winner 83-76 to win the classic.

The Pointers then went to the beaches of Nassau, Bahamas, January 1-7 to partake in the Goombay Shootout where they defeated Washington of Maryland 78-51 and Grace of Indiana 92-79 to win the tournament.

The Pointers also beat La-Crosse 79-61 and Oshkosh 85-78 over the winter break.

Andy Boario was named tournament MVP after defeating a very good team in Grace. Coach Bob Parker of the Pointers was very pleased with Boario's performance as well as the rest of the team's.

"People only seem to notice Andy's offensive performance, but he's also a very tenacious defensive player. He runs our team from the point guard position and does a great job of dishing off, and most importantly is a dynamite defensive player," commented Parker.

The Pointers did lose Mike Dahlquist to injury for a short time while at the Bahamas. Dahlquist hurt his knee and underwent minor arthroscopic surgery. He's expected back in a week or so.

Parker feels the team goes nine

deep with Dahlquist on the bench so he's looking forward to his return.

Parker is delighted with the play of the Pointer bench and feels it is one of the keys to the Pointers success.

"The bench not only contributes on the court but off it too. They really get the team into the game emotionally and genuinely want the team to win. Any win we have can be attributed to the bench as much as it is to the starting five."

The Pointers will have an opportunity following the Whitewater game on Saturday to avenge their only loss of the season against Platteville. The Pointers take on the Pioneers on Wednesday night at Quandt Gym.

The Pointers hope that there will be big turnouts at Quandt for these two big games. "I hope the students come out and scream and holler like crazy," Parker said.

## Smoking

from page 2

ing area shall be made by the person(s) who have reserved the area in consultation with the audience or users.

5. Specific areas that shall be posted as Smoking Permitted are:

The north-south portion of the concourse.

The south side (only) of the main lounge (LaFollette).

The south side (only) of the Park Place seating area.

The Encore.

The east side of the seating area of the deli.

The section under the north overhang of the Wooden Spoon seating area and the raised portion of the seating area.

According to Robyn Dunahee, a member of the University Center Policy Board and Student Manager for the UC Bookstore, she feels that the policies are definitely warranted, but the need for smoking areas is important and it should not be completely cut off.

"I have seen, as a member of the UC-PB, many of the changes that have taken place concerning smoking all over campus. I feel that the changes are acceptable as long as smoking is not completely prohibited in the UC. The UC exists to service all students, and this service includes providing designated smoking areas if the demand for them exists, which it does," Dunahee said.

Jerry Lineberger, Associate Director of the University Centers and a member of the UC-PB, believes that the students have a lot of input on how policies are decided if they choose to voice their opinions on the issues.

"The UC is a student building. What the student population wants, that's what we'll try to get done. I alone have very little say in these matters," Lineberger admitted.

He also stated that the UC-PB has to follow guidelines set up by the state and go from there. "Within state guidelines, the Policy Board has the power to make up and carry out the policy on smoking in the UC building," Lineberger said.

Lineberger pointed out that a lot of issues besides just the smoking areas have to be taken into consideration when making up such a policy i.e., environmental health, building ventilation, added costs of providing ash trays, and there was even discussion of purchasing a \$12,000 electronic air cleaner, but this fell outside of the UC budget.

Bob Busch, Advisor to the UC-PB, credits Koop with the recognition of the dangers of smoking and for the nationwide changes that have come about in the last 8-10 years.

"The attitude used to be if you're going to smoke, go ahead you're only hurting yourself. Now that Koop has proved that second hand smoke can be damaging to non-smokers' health, people's attitudes have changed, and so have smoking regulations," Busch said.

Concerning the smoking policy in the dorms, Busch said, "Residence Life tries to match up smokers and non-smokers before each semester to avoid conflict, however, if there is a mismatch the non-smoker will usually prevail."

Other campuses in the UW system fall under the same state codes that UWSP does. Each campus must make up their own policies, concerning smoking. Out of seven campuses in the system, three sell tobacco products on campus and have designated smoking areas: UW-Oshkosh, UW-Milwaukee, and UW-Platteville. Three other campuses: UW-Stevens Point, UW-EauClaire, and UW-Green Bay don't sell tobacco products, but do have designated smoking areas.

## Doctor

from page 2

"The older I get the more I realize that you learn from what you see and what you grow up in," said Paul Numsen of Stevens Point, whose father is a Stevens Point physician. "Much of what I've seen I've learned about in the classroom, and it's exciting to know this knowledge is applied daily....I had my first exposure to Geriatrics, too. I found the patients to be fun to work with, responsive and interesting. I learned from a farmer, 'Don't ever call it dirt. It's soil.'"

John Lopez of Stevens Point found that "the most interesting thing of all, despite all of the incredible technology, is the big emphasis on the people. I've also learned about the importance of referrals."

Randy Goethke of Tigerton has a keen interest in biology and pursuing medicine or research are options. "I've gotten the chance to spend time in the Lab, and to interact with patients. This experience has not made the decision any easier, but it's given me more to think about."

have a clean air environment. These two arguments seem to make it a freedom verses freedom issue, and whose freedom is more important?

It would seem that the rising consciousness of health and wellness is more important these days so that side would take precedence. Smokers seem to have a hard time battling that argument, so they are left out in the cold,

INTER-CAMPUS PROGRAMS

## Peterson

from page 10

"The style I work with deals with very adventurous characters and situations, but with an emphasis on realism and detail in the drawings," he said. "The 'Legion' series I draw has around since the 1960's. Now, the trend in comics books has gone from the 'Golly gee, Batman' era to 'Terminator II'-type violence. The comic books audience includes many readers who have been fans for decades."

Although he doesn't count himself a dedicated follower, Peterson admits to reading a few comic books weekly to keep up with current storylines and changes in artistic efforts. He counts his academic background at UWSP to have been very beneficial in developing his personal comic book drawing style.

"My skills have increased from my classes, because comic books are essentially storyboards which we use here. As a penciler, my job is to tell a 24-page action story entirely

through pictures and make it interesting and high paced as well."

Peterson likes working with science fiction storylines, because it offers him new and challenging work with each project.

Through the use of creative renderings and viewing angles, his cartoons draw readers right into the adventures of their favorite superhero. Peterson promises fans pages full of detail, action and excitement and apparently his readers are willing to pay for it.

"Cartooning can be a demanding, but lucrative profession," explained Peterson. "Beginning pencilers are paid about \$80 per page just starting out and each book averages 24 pages."

After he graduates in May, Peterson hopes to continue cartooning comic books and work with cover art and posters.

Commented Peterson, "I enjoy what I do and I'm living out a family dream because my dad always wanted to be a cartoonist. Some people say my interest is a genetic trait from him."

## Renters

from page 1

landlords in rental houses are much less well kept than those the homeowner buys himself. Cockroaches spread through the entire kitchen from the messiness of one (bad tenant)."

However problems are inevitable and when they do arise there are places for students to turn. The Student Legal Society and Services handles landlord/tenant cases and is staffed by a part-time attorney and student volunteers.

Also available, through appointment, is the Stevens Point Building Inspector on the first floor of City Hall. If you choose to move out, be sure to check your responsibilities on the lease. If you are still bound by the terms, break the lease and your legal responsibilities carefully.

The wrong way is to just skip out and lose your security deposit. Not only will you eventually be caught by a col-

lection agency hired by your landlord, but you may also have to pay all the rent left on your lease and any expenses you caused the landlord such as legal fees, advertising costs, or extra clean up.

One way to break your lease is called "constructive eviction." This is a tricky legal matter so before you actually move out talk to a lawyer. It describes the extreme case of a landlord's refusal to make essential repairs. When a house or apartment becomes uninhabitable you are no longer bound by the terms of the lease.

Another way is to try to buy

your way out. You have nothing to lose by asking the landlord to exchange the lease for your deposit. If this is your plan get the terms in writing.

Yet another way is to sublet. Though many leases explicitly prohibit it, if yours makes no reference to the subject you can set up a subletter as long as the tenant meets the landlord's approval.

The benefits of off-campus living can outweigh the problems if you know your rights, know who to contact, and what can or should be done to resolve landlord-tenant differences.

day over 40 years ratio).

Locally, the Bucks' Del Harris resigned as head coach to concentrate on his front office duties. '91 has been wild in the NBA!

Of course, the Pointers took their third straight NCAA Hockey title in '91. With the three-peat realized, UWSP goes for four.

On the NHL level, the Pittsburgh Penguins, guided by coach Badger Bob Johnson, won their first title over the surprising Minnesota North Stars.

The hockey world was saddened, however, by Johnson's death last month from brain cancer.

The revelation by a Montreal hockey groupie claiming she slept with 50 NHL players shook the league in early December. The NHL commissioner urged all the teams to provide free AIDS tests for players.

The NHL commissioner urged all the teams to provide free AIDS tests for players. This incident, like the Magic event, illustrated a large problem of being on the road in sports.

Hockey presses on with Gretzky and Lemieux still collecting goals and Brett Hu'l tearing up opponents' nets.

The NFL is being lit on fire presently by the Washington Redskins who finished with a

14-2 season record. The Redskins and the Bills will go to the Super Bowl with the two best records in the league.

The Green Bay Packers just finished their second season of post-1989 decline, throwing games away left and right. Ron Wolf has been called in to clean up the mess. Wolf hired former 49er assistant Mike Holmgren to bring the Packers back to being a respectful team.

All this NFL excitement was put in perspective though when Detroit's Mike Utley was paralyzed earlier this season. It's something to consider next time we rejoice or complain excessively about something like sports scores.

Jimmy Connors, at age 39, defied Father Time by coming close to taking the U.S. Open. Jim Courier helped show strength in the younger U.S. tennis players.

Everything wasn't cited in 1991 sports, but this was a brief overview. Looking back, the usual on-field accomplishments and championships were impressive. But 1991 was different in that it contained an acute societal problem in promiscuity and HIV.

People should learn from what Magic and those NHL players did to themselves. An entertaining and sobering year all around in sports is what we call 1991.
