1986

Pointer Alumnus

The University of Wisconsin-Stevens Point has developed numerous programs and services for the state's Indian population. It all started in the 1940s when the school graduated its first Indian student. For more information, see the photographs and stories on the back page of this edition. You'll learn why the picture of the handsome Oneida ceremonial costume made its way to the cover of "Pointer Alumnus."

Teacher education program lauded

Chancellor Philip Marshall has armed UW-SP's faculty with powerful rhetoric to use in promoting the University of Wisconsin-Stevens Point's teacher education program.

He said the Wisconsin Department of Public Instruction rated "80 percent of our teacher education programs as commendable, exemplary or even the best in the state." All the others were called above average and exceeded standards, he added.

Marshall said the information was given in oral reports to Joan North, dean of the College of Professional Studies, after about 30 specialists from DPI conducted an evaluation on campus from Nov. 11 to 14.

The review is conducted every five years, and the chancellor said faculty have told him the last one was the best one ever for the institution.

UW-SP prepares early childhood, elementary and secondary teachers in more than 36 majors, minors and certification programs.

Ms. North said the evaluators surveyed the entire university curriculum to determine how well courses in individual departments are supporting students preparing to be teachers.

The "heavy emphasis" in content areas and the fact students get a lot of experience in area schools before they begin their formal cadet teaching were rated highly, she reported. "We've done a lot of curriculum development, and it showed."

There was strong encouragement and support for the pioneering work being accomplished in the area of gifted and talented children, the dean added.

The commendations from DPI personnel will be useful, various faculty members observed after the meeting. A growing number of young people are expected to be seeking to enter highly rated teacher preparation programs across the country because of teacher shortages.

New scholarships established

A \$150 scholarship will be given each year at UW-SP to the top upper-class English major who intends to be a teacher.

The award will be a memorial to

Martha Marchel

the late Martha Marchel Stelmahoske of 433 Fifth Ave., Stevens Point, who died March 3 at age 88. It is named the Martha Marchel Teaching Award and is to be given to the outstanding student teacher in the English Department who has completed 90 credits and has at least one semester of work to complete prior to graduation.

Contributions from friends and

relatives of Mrs. Stelmahoske, including her only daughter, Isabelle Stelmahoske, of the UW-SP English faculty, were used to establish the endowment for the award.

Mrs. Stelmahoske

Mrs. Stelmahoske, who was born at Jordan in the Town of Hull, was an alumna of UW-SP who began her studies at the then Stevens Point State Normal School at the age of 15 in 1911. As Miss Marchel, she taught in Portage County schools for 12 years and also served as a demonstration teacher for the county superintendent of schools.

Events calendar released for '86

Events planned in 1986 for UW-SP alumni and friends:

At Oshkosh—Tuesday, Feb. 4, dinner at Robbins Supper Club in Oshkosh for Fox River Valley Pointers followed by a UW-SP and UW-Oshkosh basketball game.

At Wausau—Friday, March 14, reception for members of the Central Wisconsin Educators during their annual gathering at the North Central Technical Institute in Wausau.

At Minneapolis—Thursday, April 10, reunion for Twin Cities area alumni at Embassy Suites Hotel, 425 S. 7th St., from 5 to 7 p.m.

At Stevens Point—Saturday, April 26, UW-SP Benefit Ball at the University

Center to raise funds for the student scholarship program.

At Stevens Point—Saturday, June 7, 50-year reunion for members of the class of 1936 at the University Center.

At Stevens Point—Saturday, Oct. 11, UW-SP Homecoming including parade, reunion of organizations, luncheons, football game, cocktail party, evening banquets including one for inductees to the Pointer Athletic Hall of Fame.

At Milwaukee, Thursday, Oct. 23, reunion at the downtown Hyatt Regency for Milwaukee area alumni and for educators from throughout the state attending the Wisconsin Education Association convention.

Food service major approved

UW-SP has a new major in food service management.

The UW System Board of Regents approved the program which has been developed from an option of specialization in the former food and nutrition major.

UW-SP's School of Home Economics, which offers it, also has revised its existing dietetics major to now include options in general dietetics and community nutrition.

Development of the new major followed consultation by a local faculty member with food service directors in various restaurants, hospitals and corporate businesses across Wisconsin. Professor Grace Hendel says she used the information to "identify desirable skills for food service graduates."

Curriculum of the former and more limited food service option was revised and expanded. A new beverage management course and expansion of pre-professional field experience placements will give graduates "very marketable skills," Professor Hendel reports.

A cafeteria laboratory will provide a learning experience for students who work on one-month management teams for menu selection, food production, sales and record keeping.

Located in the Professional Studies Building, the cafeteria is managed by Bryn Wehrwein, who recently conferred with professional food service operators at a conference of the Wisconsin Restaurant Association in Milwaukee. "Employers are looking for graduates who possess the kind of on-the-job training our School of Home Economics provides, she says.

The cafeteria lab experience, combined with its own vending machine operations, is one of few of its kind in the United States. Students stock and maintain a vending machine to which they are assigned.

Paul Busch helps uncover sunken ship's treasure

One year ago, Paul Busch left Stevens Point with prospects for a weekly salary, room and board, plus the chance to do some scuba diving off the coast of Florida. Little did he know he was headed for the biggest underwater find in history.

Busch, 25, a May 1984 graduate of UW-SP joined Mel Fisher's Treasure Salvors, Inc., a crew searching for sunken treasure off the Florida Keys. On July 20 he was on board a salvage ship when fellow divers found the legendary Spanish Galleon Nuestra Senora de Atocha which sank during a hurricane in 1622. The ship contained a fortune in gold, silver and jewels worth perhaps \$400 million.

Paul Busch

Busch, who started diving when he was about 16, was looking for a relaxing and enjoyable way to spend a few months before he embarked on a serious job hunt. He had passed his tests for various categories of scuba training, including Lake Superior certification, so he opted to try his luck in Florida. A lead through a Milwaukee dive shop led him to Fisher.

A 1977 graduate of Stevens Point Area Senior High School, Busch had done a lot of diving locally such as body searches and under-the-ice salvage. His father, Robert Busch, director of the University Centers at UW-SP, says Paul's most humorous job was trying to retrieve valuables from the bottom of the Wisconsin River.

"A couple had a domestic dispute and the woman threw all of the gifts her

husband had given her into the river. Following a reconciliation, they called Paul in to search for the articles. This river is pretty murky, so he only was able to recover one or two items," his father recalls.

"Paul loves to dive. He is not the type of person to seek fame and fortune, he just wants to do something he truly enjoys, his father says. He is a casual person who prefers a simple life. He also is someone who diligently pursues his interests and always does a good job. This just puts the frosting on the cake for him."

When Paul told his mother, Helen, that he was going to dive for sunken treasure, she remembers saying, "You don't want to do that." His father says she worries about all three of their sons and has said to them on numerous occasions, "Tell me afterward—I don't want to know ahead of time." According to their father, they are adventurous young men who have traveled extensively and taken up other colorful hobbies like sky diving.

The senior Busches now keep a "Paul box" with clippings from newspapers and magazines published throughout the world. They say, "We are pleased—this is a wonderful and worthwhile experience for him."

One facet of Paul's character which helps his parents rest easier is his safety consciousness and attention to detail. "He has completed extensive training, keeps his equipment in top shape and follows the proper procedures," his father says.

Fisher, described by the senior Busch as "laid-back, patient and persistent," also appears to be a stickler for rules. His divers are allowed to go down only a certain number of minutes per day and all safety precautions are observed by his crew. Busch calls him "a square guy who is well-respected."

"Everyone asks me what Paul's share

of the pie is going to be," he continues. "The answer is 'we don't know.' The government will take 50 percent of the treasure's worth right off the top and Fisher's creditors will claim a hefty amount. We have heard Fisher will get five percent and the crew will get a fraction of one percent, based on tenure."

"The money doesn't mean much to Paul, anyway," he says. This is an experience he will never forget—that's the most important thing."

It's also been an adventure that involves some risk, despite the precautions taken by captain and crew. During Fisher's 16-year hunt for the sunken vessel, there have been accidents, including the death of his oldest son, his son's wife and another diver who drowned when their boat capsized at night during a storm.

Modern-day pirates have circled the treasure site trying to get a piece of the action, according to Paul's father. He says federal marshals have been assigned to guard the area which is under video surveillance and National Geographic has cordoned off the site for archeological and historical research.

In a letter to his family, Paul wrote, "The pile (of silver bars) is a sight indeed. Silver bars and ballasts are strewn around the bottom. Didn't even have to dig." Other members of the crew have described the find as "a reef of silver with lobsters living in it," and "silver stacked up like cordwood as far as the eye could see."

In a recent "Stevens Point Journal" interview, Paul described the mood of the crew on the night of the find: "That night everybody was pretty sullen. You would think there would have been a lot of celebrating. But the search was over. There's not a hunt anymore. Now we knew where it was, we just had to bring it up."

"That's not to say there wasn't a lot of quiet enthusiasm. It's hard not to be excited when you're hauling up gold,

silver and emeralds with price tags nearly as high as one's imagination can go.

"The press, especially like 'Time' magazine or the TV, made it look a lot more fun than it actually is. It's work. That's all it is is work."

"The only thing that really shines is the gold. The silver is all tarnished and looks like bricks. But the gold and emeralds make it worth it, and the really neat artifacts, the intricate designs."

According to the "Journal," Fisher's crews will continue to haul up the treasure, probably for a couple more years. In fact, Paul reported, they probably won't ever get it all up.

The discovery of the Atocha and its booty has brought about one change for Fisher and his divers. They no longer put into port as often—all the supplies and gasoline are ferried out to them. Running low on food and fuel used to mean a return to land for a few days.

Hurricanes, however, still force them back to Key West. Then Paul can get to a telephone to call his parents.

Bob Busch describes conditions aboard Fisher's vessels as "spartan." "The captain has not always been able to pay his crew, a lot of their time is spent making repairs to the boats and the food could be called 'simple,'" he continues.

The history of Fisher's enterprise includes a decade-long fight with the State of Florida over the ownership of the Atocha's treasure and ongoing financial problems.

But it's all been worth it, according to Fisher's daughter who was quoted in a "People Magazine" article as saying, "Life's been real exciting. We've always been broke, always struggling, and, of course, everyone thought we were rich. We were raised by my father never to lose faith, to have confidence. 'Today's the day,' he always said. Then, at sunset, he'd tell us, 'Tomorrow's the day.' He doesn't have to say that anymore."

Mrs. Curry heads Alumni

Pat Reading Curry of Wisconsin Rapids is the new president of the UW-SP Alumni Association.

She was chosen by the association's board to serve a one-year term succeeding William Horvath of Stevens Point.

Pat Curry

Mrs. Curry, a Stevens Point native, was graduated from UW-SP in 1958 and has been a teacher in the Wisconsin Rapids School System more than 20 years.

Ray Hutchinson, class of 1971, of Weyauwega, was elected to a one-year term as vice president.

The board also elected three new directors to three-year terms: Jean Gerhard, class of 1984, of Rosholt; Earl Knitt, class of 1979, of Reedsville; and Sheila Shoulders Miech, class of 1978, of Stevens Point.

Re-elected were Reuben Belongia of Eau Claire; Horvath; Mrs. Curry; Hutchinson; Janet Jensen, Stevens Point; Greg Larson of Newport, Minn.; Clarence Novitzke of Park Falls; Jim Neale, Patricia Okray and Don Walker of Stevens Point.

Mrs. Curry teaches eighth grade English at East Junior High in Wisconsin Rapids and has a part-time position as clinician for the district's new Professional Effectiveness Program supporting professional development among the faculty.

As a volunteer, she serves on the La Crosse Diocese Education Commission, with the Wisconsin Rapids Community Concert series, and as president of St. Vincent de Paul School. She is a member of Delta Kappa Gamma honorary society for educators.

Adopt a log?

Would you like to adopt a log?

In doing so, you would help defray costs of constructing several new cabins that are proposed for the Central Wisconsin Environmental Station in eastern Portage County. The university operates the station.

About 10 cabins, nearly 50 years old, need replacement by a smaller number of larger facilities. A Wisconsin Conservation Corps crew is available to provide labor. Donors are needed to provide funds for the materials.

Plaques naming the donors will be put on permanent display in the cabins.

To adopt one log costs \$20; log twins cost \$40; log family, \$80; cabin wall, \$250; four walls, \$1,000; to defray costs of an entire cabin, \$5,000.

Contributions can be sent to the Central Wisconsin Environmental Station, 7290 County MM, Amherst Junction, 54407.

Participants in tour

Four representatives of UW-SP participated in the cruise off the western coast of Mexico that was sponsored this spring by the alumni organizations of institutions in the UW System.

They were Evarae Mellentine of Stevens Point, Ambrose and Evelyn Budzynski of Hatley, and Doris Hacker of Minocqua.

They departed April 13 and were gone a week. Mrs. Mellentine penned a poem about the experience for her friends after her return.

Fund memorializes Louise McDonald

A fund has been established at UW-SP to support an annual student scholarship in memory of Mrs. Louise McDonald who lived at 2025 W. River Drive.

Mrs. McDonald died in 1983.

Chapter I of PEO, of which she was a longtime member and past president, sponsored the fund with its own contribution plus gifts from the Robert McDonald Sr. family and friends.

The amounts of the annual scholarships will be about \$200. Recipients will be women in the UW-SP School of Health, Physical Education, Recreation and Athletics.

Mrs. McDonald was active in women's sports, including curling, golfing and skiing.

Gladys Putney bequeaths \$10,000 to environmental station

The late Mrs. Gladys Putney of 1500 Pine St., Stevens Point, bequeathed \$10,000 to the Central Wisconsin Environmental Station at Sunset Lake near Nelsonville.

The facility, operated by the university, serves thousands of visitors each year, most of them area school children.

Mrs. Putney, who died March 16 at the age of 84, stated in her will that her gift should be used to "improve or expand the permanent facilities" of the station.

Rick Wilke, director of the station, said the money would be used to finance the construction of two new

all-season cabins. One of the cabins will be named for her. Each cabin would sleep eight people and cost \$5,000. A total of six to eight cabins are scheduled for construction to replace 10 summer cabins that have been in use since the 1930s. Those original structures were in use when the station was known as Camp Chickagami and used primarily by Boy Scouts.

Mrs. Putney, who had no close relatives, was a teacher when she was a young woman. She was a native of Chilton and a 1925 graduate of UW-SP. Her husband, Charles, operated an electric business in Stevens Point's downtown.

Nearly 9,500 students - a record

Enrollment reached an all-time high this fall at UW-SP.

Registrar David Eckholm reported the official count is 9,497, an increase of 490 over a year ago.

In addition to the fact there were 234 more continuing students this year, the university also logged 93 more new freshmen, 61 more re-entering students, 27 more transfers and 154 more graduate students.

Throughout the UW System, most campuses experienced increases, but none had higher percentage gains than Stevens Point.

Transcontinental bike ride for scholarships

Would you like to help UW-SP increase its scholarship fund?

Longtime UW-SP administrative staff member Bud Steiner and student leader Bob Booth are planning a transcontinental bike trip next summer as a means of giving you a unique way of supporting your alma mater.

"The North American Scholarship Tour" will be during June and July as Steiner and Booth peddle their way from Vancouver Island across Canada and the United States to Nova Scotia.

Their goal is to raise \$10 per mile for the 5,000-mile trip which would amount to \$50,000. Pledges will be sought from individuals and businesses.

He's also an avid bicyclist. As a faculty adviser of Sigma Tau Gamma fraternity, Steiner learned several years ago that Booth shared an interest in biking. The two have since taken a 1,100-mile trip around Lake Superior and a 1,200-mile ride through the Blue Ridge Mountains in Virginia, West Virginia, Tennessee and North Carolina.

If you'd like to make a pledge, contact Steiner. There'll be another invitation for you to support the fund-raising effort in next spring's edition of "Pointer Alumnus."

Alumni director explains fund drive

Dear Alumni/Friends:

The next 10 years may be the most challenging decade our university has faced.

Each year there will be fewer 18-year-olds who enter college. As the cost of college education increases, government is less able to fund financial aid programs needed by parents and students.

But—in a difficult decade, we are blessed with a loyal constituency and well over 30,000 faithful alumni and friends around the world. In the past you have responded to these challenges by contri-

buting generously to the Alumni Association's Fund Drive for scholarship dollars. We hope you will contribute again this year, for it is your contribution that enables your Alumni Association to work toward its goal, the purpose of its existence—the support of quality education through service to the university and its alumni.

Your gift to UW-SP will: provide scholarships and send top quality students to UW-SP; keep track of more than 30,000 alumni and friends; aid in publishing newsletters such as the "Pointer Alumnus"; honor alumni who have

distinguished themselves; recruit students for your alma mater; host special events such as homecoming, class reunions, and get-togethers all over the midwest; help keep UW-SP in the front rank.

Just as your gift is meaningful to our work, so, too, is information about you. Please stay in touch and help us keep your records current.

Thank you!

Sincerely,

Karen Engelhard
Director of Alumni Relations

UW-SP seeks letters from its graduates

We'd like to hear from you.

If you have some news in your life, clip the enclosed form, fill it out and return it so the information can be included in a forthcoming "Pointer Alumnus."

If you have questions, need for assistance or an offer of assistance for your alma mater, please contact us at the Alumni and Development Office, Old Main, 715-346-3811.

One special request—if you are moving, please contact us so we can stay in touch with you and avoid the expense of tracking you down.

The enclosed form can be mailed to the Alumni Office, Main Building, UW-Stevens Point, Stevens Point, WI 54481

NEWS FOR "POINTER ALUMNUS": _____

Conservationists start 'hall of fame' here

Fifteen diverse professional resource management and conservation organizations have established a foundation to sponsor the Wisconsin Conservation Hall of Fame which is headquartered at UW-SP.

The first inductees were two of the state's early environmentalists, Aldo Leopold and John Muir.

Inductions are expected to be on an annual basis. The first ceremony was last April.

Parking lot for guests

A new parking lot for visitors that is regulated by coin-operated toll gates has been opened at UW-SP.

About 200 cars can be accommodated in the lot bounded by Reserve, Stanley and Fremont Streets and Fourth Avenue.

A daily fee of 75 cents is charged motorists when they enter the gates. And the fee is standard whether the drivers plan to keep cars there for one hour or 12 hours.

The gates, on Stanley and Fremont Streets, are in operation from 6 a.m. to 6 p.m. on weekdays. The lot is open for parking without charge on evenings and weekends.

Recognition

English teachers honor Croft

The Wisconsin Council of Teachers of English has presented its highest recognition for meritorious service to Mary K. Croft of UW-SP.

Mary Croft

Announcement of the Frank Chisholm Award, given in the form of a plaque, was made at the council's annual meeting in Oconomowoc in March.

Mrs. Croft has been on the English faculty for 18 years, was the founder and

longtime director of the UW-SP Writing Lab, was dean of the UW-SP Division of Academic Support Programs and the Albertson Learning Resources Center and recently has been on the staff of the university's new student retention program.

A tribute to Mrs. Croft from the council stated that, "If we were to choose one prominent feature of Mary's service to the profession it would be in the field of writing, a field in which she has gained local and national prominence. The writing lab is a starting point. Hers is recognized nationally as a model both in operational procedures and principles and its total university concept. She has been a consultant for writing programs and leader of writing workshops . . . a frequent speaker at state and national conferences . . . she has led in-service sessions for Wisconsin and Illinois teachers and college instructors on the teaching of writing."

Artists' work commended

The creations of two UW-SP art professors have been given recognition by the Wisconsin Academy of Sciences, Arts and Letters. Also, the organization's quarterly journal featured the projects in its spring edition.

Norman Keats and Gary Hagen are among several Wisconsin artists represented in the "Wisconsin Academy Review." The artists' works were chosen for honors on the basis of work in a sculptural form, a strong contribution to art in the state and the attainment of a national or regional reputation.

"Blue Star Compass," UW-SP's large outdoor sculpture, designed and erected by Keats, is pictured and described in the publication. The project was supported by a faculty research grant funded through the University Personnel Development Committee at UW-SP.

One of Hagen's constructions of plexiglas, rhoplex and dry pigment also is pictured. His interest in Eskimo art and artifacts and ancient civilizations is included in his statement. He has traveled to sub-arctic northern Canada and to Peru to study the environment and native art of those areas.

Papermaker invited to exhibit

A UW-SP professor who has become an advocate of papermaking as an art form exhibited his works this fall in a one-man show at the Papyrus Institute in Cairo, Egypt.

Herbert Sandmann says he was pleased to be invited to show off his creations in Egypt because people there were among the world's first makers of paper in the third millennium.

Several years ago, after reading an article in the "National Geographic"

about the Papyrus Institute, Sandmann contacted its director, Hasaan Ragab, for information. The correspondence continued and led to the invitation for the show.

Sandmann has done 24 pieces—most of them about 16 by 20 inches which is somewhat smaller than the usual size of his handmade, cotton-fibre based works. The alteration was done so his Cairo-bound packages would not be too bulky to transport.

Number one in the country

A team from UW-SP received a \$1,000 prize as one of the three top winners in annual competition of the Student Economic Leadership Forum at Ada, Mich. in May.

The students are from UW-SP's Division of Business and Economics, and their faculty adviser is Jay Poutinen.

Teams representing public and private institutions in Ohio, Michigan and Wisconsin compete each spring at the Center

of Free Enterprise in Ada, a suburb of Grand Rapids. Sponsors are Amway Corp., Dow Chemical, Whirlpool Corp. and Federal Mogul Corp.

In individual competition, senior Tami Haas, Milladore, won \$150 as the first prize designee in the "best resume and cover letter" category.

This year, UW-SP's "best entrant" team recognition was based on its reports of service activities of the members in Central Wisconsin.

Business team wins contest

The American Water Resources Association has given its outstanding student chapter award for 1985 to a group at UW-SP.

A plaque citing "excellence in promoting water resources knowledge and the objectives" of the association was presented to Carlton Peterson, Stevens Point, one of five representatives of the UW-SP chapter attending the organization's convention in Tucson, Ariz. Among the others there was Professor Earl Spangenberg, chapter adviser.

UW-SP was the first winner when the award was established in 1983. Spangenberg said the chapter did not intend to vie for it again this year. But association officers were impressed with activities undertaken on campus by the student members as described in a routine annual report the association requests from all of

its chapters, Spangenberg explained.

The Stevens Point students sponsored field trips to water resources installations including the Fresh Water Institute in Minneapolis, speakers, film showings, recycling and socials. As a fund-raiser, they duplicated, assembled and sold a set of scholarly papers that form the basis for a textbook in one of their classes.

In addition, many of the members were involved in the Environmental Task Force which monitors the quality of groundwater in Central Wisconsin, particularly in rural Stevens Point where there has been a growing problem stemming from use of pesticides in agriculture.

This academic year, the 40-member chapter will concentrate its involvement on projects in area elementary schools to acquaint youngsters with the groundwater controversy.

Eight professors get top awards

Eight professors at UW-SP are winners of the top awards given by the institution each year for outstanding achievements as faculty members.

They are Robert Beeken, Mary Ann Baird, Sandra Holmes, Carol Huettig, Janet Malone, Robert Simpson, Wacław Soroka and Stephen Taft.

They were introduced at the spring commencement ceremony in May and at the all-academic convocation held in September to mark the opening of a new academic year.

Their colleagues recommended them for the awards and a committee made the final selections. Evaluations by students were used, too.

Mrs. Baird, of the home economics faculty for 23 years, was given the University Service Award in recognition of her work with campus organizations, faculty governance and student advising in addition to her classroom responsibilities.

Wacław Soroka, a 22-year member of the history faculty, and Stephen Taft, a biology professor for 16 years, were given the University Scholars Award. Soroka was cited for his research and writing in Polish history, and Taft for his successes in research in parasitology and in publishing information about his work in leading biological journals.

The Excellence in Teaching Award winners are Beeken who has taught physics and astronomy for five years; Ms. Holmes, a member of the psychology faculty for 11 years; Ms. Huettig, a specialist in physical education for the handicapped who is completing her fourth year in the School of Health, Physical Education, Recreation and Athletics; Ms. Malone, an early childhood education specialist in the School of Home Economics for four years; and Simpson, a biology professor for 29 years.

Dieterich heads writer's group

The National Association of Professional Writing Consultants has elected UW-SP's Daniel Dieterich as its new president.

Dieterich, a member of the UW-SP English faculty and a staffer in the UW-SP Writing Lab, served the national association last year as a board member and was instrumental in its development of a code of ethics for members.

The organization is growing rapidly, the professor explains, as businesses and public agencies increasingly seek assistance in writing projects from people in higher education.

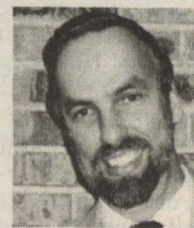

Dancers applauded at regional festival

A duet choreographed by a faculty member at UW-SP was chosen as one of the top entries in the American College Dance Festival this spring at Western Michigan University at Kalamazoo.

Linda Caldwell's duet, "Facetious Fictions," which has since been retitled, "One More Kiss," was selected to be performed at the gala concert which culminated the competition. It was danced by students Mario Fraboni of Beloit and Lisa Meyers of Potter.

Showalter receives chemistry plaque

Donald Showalter of the UW-SP faculty is winner of the "Outstanding Contribution to Chemistry" Award given annually by a regional organization.

Don Showalter

He was cited at a recognition dinner held by the Central Wisconsin Section of the American Chemical Society this spring on the UW-SP campus. The group has members in 14 counties who are professional chemists in the field of education, business/industry, and medicine.

Showalter received a plaque for having been involved in numerous leadership and service roles for the section since he became a member nine years ago, and for achievements in teaching and in being the radiochemical adviser to the State Testing Laboratory in Madison.

A former chair of the section, Showalter has headed its program and education committees. He has been on the UW-SP faculty since 1971.

'Pointer' garners accolades

The American Scholastic Press Association gave its highest recognition—a first place with special merit award—to "The Pointer," student news magazine at UW-SP.

Twenty institutions in the United States with enrollments above 2,500 were given the recognition. The only other state winner in that category was UW-Milwaukee.

In addition, the Pointer was cited in two specific categories of editorial writing and sports coverage.

Melissa Gross, Wisconsin Rapids, was editor of the paper during the period of competition and Dan Houlihan was adviser.

The editorial, which was cited as one of 37 award winners from schools of all sizes in the country, was written by Rick Kaufman of Wisconsin Dells. It discussed the problems of the defoliant Agent Orange which was used in the Vietnam Conflict, and was cited by Kaufman as the cause of his father's death in 1983. Rick is now employed by the "Shawano Evening Leader."

Nineteen papers were cited for top sports coverage, and the recognition of the "Pointer's" achievements in this area stemmed from the leadership of Phil Janus, Brookfield, who was sports editor during the fall semester.

High in the U.S.

A 1984 graduate of UW-SP's managerial accounting program ranked in the top 100 among thousands of people in the United States who wrote exams last fall to be certified public accountants.

He is John McCormick of Stevens Point, a 1980 graduate of Stevens Point Area Senior High School, who now is employed by the firm of Arthur Andersen & Co., Minneapolis, Minn.

In addition, UW-SP is again a state leader in the success rate of its bachelor's degree recipients in passing all four parts of the C.P.A. exam in the first writing.

Soil judging champs

UW-SP's student soil judging team is a national champion.

Six representatives of the UW-SP College of Natural Resources won individual and team trophies at the spring National Agricultural College and Technical School Association's judging competition in Bowling Green, Ky.

In addition, Kevin Fermanich of New London, won first place in the individual soil judging; Carol Beckman of Oshkosh, ranked third; and Kevin Reilly, Yardley, Pa., eighth.

It was the fourth time in the past five years that a UW-SP team won the national contest which was hosted in April by Western Kentucky University.

Awards

Award named in honor of Carolyn Rolfson Sargis

A new award was established at UW-SP this summer that will be given to classified state employees on campus for "special contributions and outstanding service."

The Carolyn Rolfson Sargis Award is named in honor of a local woman who served this university nearly 44 years—longer than any other classified state employee who has ever been on the UW-SP staff.

Chancellor Philip Marshall announced at a reception in June that the first two recipients of the citation are Mrs. Sargis,

Carolyn Sargis

who retired in 1962, and Miss Sidone Andersen who stepped down from full-time employment recently as the senior member of the campus classified staff.

Mrs. Sargis was the school's business manager throughout nearly her entire career, and Miss Andersen spent her entire 38 years at UW-SP in the Office of Registration and Records.

The award, established by the Division of University Relations, will be given whenever a coordinating committee deems such a presentation appropriate, according to Helen Godfrey, assistant chancellor for university relations.

In her acceptance, Mrs. Sargis said she is proud her name will accompany the recognition of notable accomplishments and service by members of the university's nonteaching employees who include professionals, craftsmen, clerical and blue collar workers. She described them as the "behind the scenes people" who keep the university running.

Miss Andersen, received several citations for her contributions, including one from her supervisors, another from the UW System and a special citation recognizing long and dedicated service from Gov. Anthony Earl.

She has evaluated student credits for graduation for many years, and will continue doing that on a part-time basis for an indefinite period.

Miss Andersen is a native of Wausaukee whose only job outside of her father's business has been at the university. She occasionally assisted in her father's cigar factory, making a product that was sold under the Lavengro label primarily in the Green Bay and Marinette areas.

A native of Wittenberg and graduate of the Wausau Business Institute, Mrs. Sargis was hired 66 years ago at what then was the Stevens Point State Normal School. The entire faculty and staff numbered about 50 and the enrollment was about

Sidone Andersen

475, including children in the training school program. Her first position was secretary to Frank Hyer, training school principal. After 1924 she was financial secretary for campus operations and still later, the campus business manager. With only a few assistants, she was responsible for such diverse functions as budget management and planning, student registration, purchasing (everything from frogs for biology labs to coal for the heating plant), cashier, payroll, student scholarships, printing, personnel and a broad miscellaneous category.

Mrs. Sargis worked for seven president and has been acquainted with nine of the 10 who have ever headed UW-SP.

Mrs. Sargis was Miss Carolyn Rolfson throughout her career on campus. She and George Sargis, with whom she had attended high school in Wittenberg, were married after her retirement. He has been a patient recently at the Homme Home in Wittenberg.

The last surviving charter member of the Stevens Point Business and Professional Women's Club, she is a former president and regional and state officer. The club named her its "Woman of the Year" in 1981. She also has done volunteer work for the American Red Cross about 40 years and has been long active in Trinity Lutheran Church.

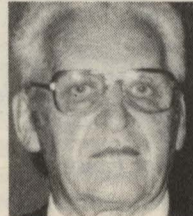

1935 graduates receive 'distinguished alumnus' citation

Two 1935 graduates of UW-SP who have led international organizations for historians and sales/marketing personnel, were honored June 9 by their alma mater.

Frank Klement, Milwaukee, and James McGinley, Hot Springs Village, Ark., joined other members of the class as special guests at the annual Alumni Day on the 50th anniversary of their graduation.

Special recognition also was given to members of the 1960 class on their 25th anniversary.

Klement, retired professor and history

Frank Klement

department chairman at Marquette University and author of books and articles on the U.S. Civil War, and McGinley, retired vice president of the Eaton Corp., received the UW-SP Distinguished Alumnus Award.

They were the 35th and 36th recipients since 1969.

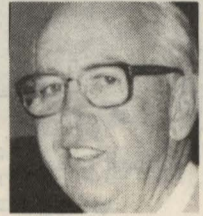

Alumni Day began with a reception in the University Center and entertainment in the Program-Banquet Room. Tours of the campus were conducted followed by a social hour and a banquet, also in the University Center.

Klement's award came on the heels of a program this spring at which Marquette University's chapter of Phi Beta Kappa made him an honorary member "in recognition of an illustrious career as a pre-

eminent scholar of history and as an inspired and dedicated teacher."

Klement is a past international president of Phi Alpha Theta honorary history society with more than 600 chapters and 40,000 members. He is the author of four books on the Civil War, sections or chapters in six other books, and of 60 articles in scholarly journals.

A native of Leopolis in Shawano County, he was on championship football, basketball and track teams while a UW-SP student and editor of "The Pointer." He

James McGinley

served on Marquette's faculty from 1948 until his retirement in 1975, and has done some part-time teaching since.

McGinley, who grew up in southern Portage County, is a past president of the Sales and Marketing Executives Association International which has 25,000 members in the world. He also is a former national president of Pi Sigma Epsilon, professional marketing and sales management fraternity.

He began his career in 1946 as a sales trainee with a subsidiary of the Eaton Group, Durant Digital Instruments. By 1971, he was its president and chief operating executive. The Eaton Group appointed him its vice president and general manager of specialty products operations in 1979 and he served in that capacity prior to his recent retirement.

A winning school

To UW-SP Alumni and Friends

The faculty and staff of UW-SP are well aware that they are associated with an outstanding institution. We are constantly reminding ourselves and others of that fact. Whether we are talking about the largest College of Natural Resources in the United States (because it's one of the best), or our award winning jazz program, our theatre program which has repeatedly been recognized in national competition, our accounting graduates who consistently have one of the highest pass rates in the nation on the CPA examination or our championship athletic teams; we have much to be proud of.

Some of us have become very adept at blowing our own horn. Nevertheless, it is much better to hear someone else do it. Recently we have had a number of visitors to our campus who have done just that.

Several weeks ago we were visited by a delegation from the American Association of State Colleges and Universities (AASCU). The group was led by Dr. Hoke Smith, president of Towson State University (where our new UW System president, Kenneth Shaw, was academic vice-president from 1971 to 1977). The other members were Dr. John Van de Wetering, president of The State University of New York at Brockport and Dr. Evelyn Hively, a staff member at AASCU.

This group was on our campus for four days. While their ostensible function was to advise us on our organization, they reported on several other aspects of the university. They noted, in particular, the quality of the institution. This came out in many of their statements. We heard such words as "solid," "great," "impressive" and many others. They claimed to be impressed with everyone they met, but they singled out the deans (both presidents indicated that if they were looking for a dean they would start here). They described staffers of Student Life as "fireballs."

They did find some problems. They thought we should have a greater sense of identity and there should be a greater awareness among each of our units of the contributions of the others; that we are, in fact, one university. Yet, they were confident that we would be able to accomplish these things because of our outstanding personnel.

These visitors left UW-SP with the conviction that we "are sitting on a gold mine" and "with tremendous respect for Stevens Point."

The other two visitors were university development officers. One came from UW-Madison and the other from Ball State University. They were here to consult with our development office on our annual fund drive and a projected capital fund drive.

These visitors were also very much impressed with the university and with the community as well. They met many strong, energetic and effective employees. They also talked to a number of dedicated university supporters in the Stevens Point area. Their reports to me and to Assistant Chancellor Helen Godfrey were as positive as had been those of their predecessors. They reported to us that a more aggressive and extensive annual fund drive should be increasingly successful. They also supported a capital fund drive for UW-SP in the fairly near future.

Such reports make working at Point a joyful experience. It is good to know that we have programs of high quality. It is even more heartwarming to realize that we will improve still more and that the strong support of our alumni and friends will make our already significant "margin of excellence" even broader.

Chancellor Philip Marshall

Editor's Note: After Chancellor Marshall wrote this report to alumni, he was given information about the high quality of the teacher education program here. A news account of that evaluation is reported elsewhere in this publication.

University of Wisconsin-Stevens Point Alumni Association presents a Dream Vacation to the EXOTIC HAWAIIAN ISLANDS

From

\$699

Los Angeles

From

\$879

Chicago

From

\$899

Milwaukee/St. Paul,
Green Bay

PLUS an optional extension to the OUTER ISLANDS OF KAUAI AND KONA
Add 5 nights: 3 nights in Kauai and 2 nights in Kona
only **\$449** additional

DEPARTING ON APRIL 7, 1986

*All-inclusive pricing per person,
based on double occupancy includes tax and services.*

YOUR EXOTIC HAWAIIAN VACATION INCLUDES:

- Round trip scheduled jet transportation.
- First-Class (or better) hotel accommodations.
- Round trip transfers and baggage handling.
- Panoramic city sightseeing tour of Honolulu.
- Floral lei greeting upon arrival in Honolulu
- A variety of optional tours available for purchase.
- Inter-island transfers via air.
- Special vacation features.
- AND MUCH MORE!

For Information and Reservations Call Karen Engelhard at (715) 346-3811 or call toll-free 1-800-262-0123

Retirements of faculty members

Gilbert and Alice Faust

With almost three-quarters of a century of combined service on UW-SP's faculty, Gilbert and Alice Faust began full-time retirement this summer.

He was on a part-time assignment the past five years, as was she the past year.

Faust logged exactly 50 years on the faculty, including time out taken for military duty during World War II and a stint in graduate school. His longevity is

Gilbert Faust

a record at the university where he has been a chemistry professor, registrar and catalog editor.

Mrs. Faust had "the nice way of earning a living by being paid for having fun as a teacher" for 24 years as a specialist in speech and theatre arts. She served in 1965 and 1973 and again from 1978 to 1984 as chair of the theatre arts department. She also was director of the Arts and Lectures Series several years.

Mrs. Faust is widely known for the 440 pairs of dangling earrings which she has collected from all parts of the world throughout her adult lifetime. Many of the sets can be characterized as being bizarre. She has a pair made from hand-cuffs used in a play she directed, and several for Christmastime that have battery-powered blinking lights.

Her husband, who has served under seven of the 10 presidents and chancellors who have ever headed UW-SP, arrived in Stevens Point in 1935 and was paid \$100 a month in his job on campus in the chemistry department. The institution had 716 students and 48 faculty members then.

Faust had broad campus and community recognition as the registrar during a 30-year span of overseeing student registration, scheduling of classrooms and maintenance of student academic records. He called it "fussy work" but said it was like one of his favorite pastimes of working jigsaw puzzles. Since stepping down from that position in 1979, he has been editing the university catalog, recently completing his 27th edition. Unlike all others, his latest book will include a portrait of him at the request of his colleagues.

Long active in curriculum planning, Faust served as a chairman of the faculty and in earlier years was active with student organizations. He once played the clarinet in the school band, provided

piano accompaniment for the Men's Glee Club, and was a director-actor-producer for broadcasts over WLBL radio station programs when its studios were on the university campus. He was a longtime officer, including president, of a national honorary science and mathematics organization which based its membership on small campuses.

In recent years, he had received

Alice Faust

numerous honors for his contributions to UW-SP. In 1975, on his 40th anniversary as a faculty member, a lecture hall in the Science Building was named for him. Recently, he received a special citation from the Alumni Association.

Though his wife does not share his interest in chemistry, he has appreciated her involvement in the arts and even volunteered for a walk-on part for one of the plays she directed. "I was proud to get through three degrees without taking any chemistry," she teases.

She is a native of Richwood, Ohio, and moved to Madison as a child. Her three degrees, including a Ph.D., and his two degrees are all from the University of Wisconsin-Madison. He is a native of Madison and taught a semester at the high school in Baraboo before taking a position at what then was known as Central State Teachers College here.

Both of the Fausts served in stateside duty in the Navy during World War II.

Her career in teaching includes from 1948 to 1950 as a Methodist missionary at a school in Santiago, Chile. She later taught at Madison West High, Temple University in Philadelphia, the University of Maryland in College Park and Mount Union College in Alliance, Ohio.

One of the high points in her theatre career was her success in 1970 in directing "Rosencrantz and Guildenstern Are Dead" which advanced in competition to the regional American Theatre Association's College Festival and was ranked first runner-up. She was then Miss Alice Peet.

A year later came another special event. She and Faust, then a widower, were married. With a ready-made family of two daughters, she now is a grandmother 14 years later and has plans for spending more time with the youngsters in her retirement. She and her husband also intend to continue an active traveling schedule.

William and Ann Stielstra

William and Ann Stielstra have ended careers as educators that have been highlighted by serving young people with special problems.

Giving comfort to college students frustrated by the Vietnam War was "the most significant part of my career," says William, who has spent the past 20 years as an administrator/professor at UW-SP.

William Stielstra

The spice in his wife's career was being part of a pioneering effort to establish new programs for area children with learning disabilities.

The Stielstras are officially, but not entirely retired. In August, they departed as leaders for a 15-member student group from UW-SP which is spending the fall semester in Taiwan, Hong Kong and mainland China.

Both members of Dutch-American families, William is from Holland, Mich., and holds a bachelor's degree from Calvin College, a master's from the University of Michigan and a doctorate from Michigan State. Ann, from Grand Rapids, Mich., has her bachelor's degree from Calvin College and her master's from Purdue University.

After nearly four years of military duty during World War II (much of the time spent in the Pacific region), William began what was to become a 38-year stint in higher education.

From 1947 to 1956, he served Alma College in Michigan as a history professor, and part of the period as dean of men. The next nine years were at Purdue University in Indiana where he was assistant dean of men. He came to UW-SP in 1965 as vice president for student affairs and dean of students, and held those posts until joining the history department in 1971.

While teaching was William's joy, his greatest satisfaction came as a student personnel administrator, especially when he could deal directly with young people.

During the Vietnam War era, "I tried to build bridges between the establishment and those who were disaffected, the idealistic, and those who were fearful," he recalls. "I felt that the kids must have something to what they were saying and doing that others weren't seeing."

As a historian, William remembered that big movements for change in Europe and Asia were usually started by students and professors. That had not been the case in the United States until the Vietnam debacle. Regretably, he believes people in academia in this country are "reverting back to their old roles as followers instead of leaders."

Ann taught kindergarten in Grand

Ann Stielstra

Rapids about a year prior to her marriage in 1943. The couple had two sons and two daughters.

She returned to teaching in 1955 in Alma and later served in the public school system in West Lafayette, Ind. She has been a learning disabilities specialist either in the public schools, the UW-SP Gesell Institute or the Cooperative Educational Service agency in Stevens Point the past 19 years.

In addition, she has done considerable graduate study in education for the learning disabled and has participated in numerous workshops and conferences across the country. Foremost of that involvement was to study with and assist the late Newell Kephart, a one-time national leader in this specialized field.

In a swan song for a reporter, Ann said special education requires a special measure of encouragement by teachers and praise so children approach their learning with a good self-concept, she adds.

Her greatest satisfaction in her profession, Ann says, has been to observe successes that have been made in the last two decades to provide more services and opportunities to children with various kinds of handicapping conditions. Ann emphasizes that while additional services are expensive, they are also cost effective because students are helped to become more productive members of society. "Instead of being liabilities, they're becoming assets."

But she has warnings. To save money, many school districts are attempting to "lump together" all children with some sort of learning problems. The arrangement will be detrimental, she fears.

Each child requiring special assistance has a different combination of problems and needs a personalized guide to learning, Ann concludes.

Arthur Fritschel - dean of professional studies

Arthur Fritschel, who headed the College of Professional Studies since its establishment at UW-SP, retired in May after 15 years on campus. In addition, his longtime secretary, Jane Tielens, retired one month later after serving at UW-SP for 25 years.

Arthur Fritschel

Fritschel was hired in 1970 to be dean of the former College of Education, but it was reorganized shortly thereafter, and the programs in communicative disorders, health-physical education-recreation-ath-

letics, home economics, medical technology and military science also were placed under his administrative wing.

Fritschel and his wife, Betty, will continue living at 3233 Dan's Drive. He will maintain partial involvement in education administration with other retired professors from UW-SP and elsewhere as a consultant to schools. He also will be serving beginning next year, as district governor of the 36 Rotary Clubs in Northern Wisconsin and Upper Michigan.

Fritschel did not seek re-election this spring after serving three years on the board of education in the Stevens Point district. On the state level he has been active in groups organized by the State Department of Public Instruction that have pushed for changes in the public schools and in preparation of teachers. He recently was involved in development of a plan to require future teachers to pass a special examination before being certified to take charge of their own classrooms.

A native of Minneapolis, where his

father was a Lutheran minister, he received bachelor's and doctorate degrees from the University of Northern Colorado in Greeley and a master's degree from Northwestern University in Evanston, Ill.

A musician and coach turned administrator, Fritschel began his career in 1940 as principal, teacher, football and basketball coach and band director in the high school at Bennett, Colo., which had 65 students and five faculty.

He later served as vocal and instrumental director, football coach and acting principal and superintendent at Kimball County High in Nebraska, his wife's home; and band director at Estherville, Iowa and at Kewaunee, Ill.

His longest stint was at Western Illinois University in Macomb—from 1946 to 1967 where he started as band director and rose to the chairmanship of the 52-member education department faculty. One of his band members there was David Coker, now an assistant to the chancellor at UW-SP.

Fritschel was vice president for aca-

demic affairs at Northeast Missouri State University in Kirksville for three years before coming to UW-SP, a considerably larger institution.

At UW-SP, he sees a good future for his college because its programs are oriented to specific careers in which there are promises for broad opportunities.

Under Fritschel's leadership, the university has modified its curriculum to keep pace with changes in society. This has included the addition of wellness programs, training of professionals to work in private speech and hearing clinics as well as in school settings, and the development of interior design and food service management majors in home economics and the recruitment of more men to these areas. Education offerings have been greatly expanded in the fields of early childhood, learning disabilities and mental retardation.

The dean warns that as the university continues to gain prestige and log successes in athletics, "we should always remember that we have students first and athletics second."

Frederich Krempel

Frederich A. Krempel, who taught in classrooms around the world during a 49-year career in education, retired from UW-SP in August.

In much of his globetrotting, Krempel took local students with him. He conducted six overseas programs, each a semester in length, either in Spain, Germany or Malaysia. Last summer he led a study tour of the Scandinavian countries.

Krempel spent a total of 33 years at UW-SP as a member of the history department and, between the mid 1960s and early 1970s, as dean of learning resources. The original section of the James H. Albertson Learning Resources Center was planned and constructed

Frederich Krempel

during the time he was the facility's administrator.

No one has led more semester abroad groups for UW-SP's Office of International Programs than Krempel, with assistance from his wife, Pat. Expert in the field of medieval and renaissance history, the professor tied his trips to his considerable knowledge of those periods and brought his lectures to life by taking his students to places that were important then, according to Helen Corneli, program director. "He has done extremely devoted service," she added.

Krempel, who at 71 was UW-SP's oldest and most senior full-time employee, also ranked among the last local faculty members who had begun a teaching career in a rural school. A native of Duluth, he attended UW-Superior and took his first job in a one-room elementary school near Superior in 1936. His salary was \$95 per month which he believes was better than the earnings of more than half the work force in Douglas County at that time. In 1940 he became principal of a nearby school that went through grade 10 and he stayed three years prior to entering military duty in World War II. Though he saw front line duty in the European Theatre, he also had opportunities to pursue his teaching in Heidenheim, Germany as an Army ordnance instructor. And, while on duty in England, he began his advanced study of the Middle Ages at the university in Shrivensham. After his discharge, Krempel pursued a master's degree at the University of Minnesota, and in 1948 began collegiate teaching at UW-SP. He was away from 1951 to 1955 studying for his Ph.D. at the University of Minnesota and teaching one year at Ely Junior College.

Krempel has had a long interest in Russian art, and went behind the Iron Curtain in 1974 with a group of scholars from the University of California-Berkeley to study it. He also built a comprehensive collection of slides and books about it.

Fred Dowling

Fred Dowling is stepping out of the classroom, after 40 years in education, to spend more time on the nation's tennis courts and golf courses.

He has been on the UW-SP faculty exactly a quarter of a century as a specialist in rhetoric and public address. Prior to his official retirement in October, he had been teaching on a part-time basis the past two years.

In the days when debate was more popular, he also directed that extra-curricular activity for UW-SP students.

Dowling, who was born in New Jersey and grew up in Shawano, has played tennis since his youth and has been a star at it throughout his life. He was on a

Fred Dowling

state high school championship team at Shawano and later competed for UW-Oshkosh as an undergraduate and for UW-Madison as a graduate student. (Dowling has a Ph.D. in speech.) He has won numerous tournaments since, often beating opponents many years younger. While vacationing in Arizona, he won the 1984 Arizona Senior Olympics trophy in tennis.

Tennis is a sport with relevance for Dowling because it keeps him in top physical form. It's another story for his scholarly interest in debate.

He says popularity of debate has waned nationally because it has a "certain amount of artificiality about it." Students, he adds, have begun to object to the formality of the debate process. "It presupposes black and white and doesn't reflect the real world," he says. While he enjoyed the activity, he agrees with its critics.

Of the rhetorical ability of college students, he says it has been on a progressive upswing for many years "reflecting greater sophistication and maturity" of high school graduates.

Dowling began his career in teaching in 1945 as a military instructor in the Naval Academy Preparatory School, Bainbridge, Md. After his discharge, he served on the faculties of Ohio Wesleyan in Delaware, UW-Madison, the University of Virginia in Charlottesville, Michigan State in East Lansing and Arizona State in Tempe. He came to UW-SP in 1960. He served as an interim speech department chairman for a semester in the late 1960s.

Dowling and his wife, June, have moved to a home on Shawano Lake where they intend to spend summers. They will travel in the South during winters to try out different tennis courts and golf courses.

They're also interested in helping offer educational programs in support of American Indian youth. This summer, he introduced many high school students at the Menominee Reservation high school in Keshena to tennis. He was a volunteer instructor for nearly 40 youths and plans a similar service next year.

Robert Wilde

After four decades of teaching college level biology, Professor Robert F. Wilde retired in May with praise for the abilities of his students.

For much of his career, Wilde taught freshmen at UW-SP. He believes that on the whole, they are arriving in his classroom today with more skills than their predecessors.

"Yes, the high schools are improving—some don't think so, but I do," he muses.

Wilde has spent the last 28 years at UW-SP where the five-member department he joined in 1957 has grown five-fold. His areas of specialization are physiology and genetics.

He is proud of the success rate local

Robert Wilde

biology students have had in pursuing advanced study. The UW-SP ranks high among Wisconsin's regional universities in the number of graduates who are accepted at medical, dental and veterinary schools. In earlier years, Wilde was the adviser for preprofessional students in his department.

A native of Milwaukee, Wilde received degrees from UW-Madison and Marquette University, and in the early 1950s, he spent two years studying at the University of Edinburgh in Scotland. He taught at Marquette while a graduate student and later served 10 years at Knox College in Galesburg, Ill., and two years at Bradley University in Peoria before coming to Stevens Point.

During and immediately after World War II, he spent four years in the Medical Service Corps, most of the time in England, France and Germany.

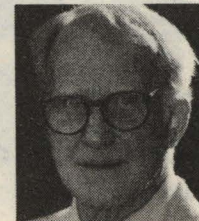

In retirement, Wilde plans to teach a section of freshman biology at least a semester or two. He also will be giving more attention to his genealogy. Both of his parents descended from some of Wisconsin's earliest German settlers. His paternal great-grandfather, Gottlieb Wilde was the founder of the small community of Freistadt, near Milwaukee, in 1839—nine years before Wisconsin became a state.

Robert Anderson

Robert Anderson, UW-SP's weatherman retired in May. After a 32-year career on campus, he stepped down as a professor in the geography/geology department.

Climate and landforms have been the main subjects of his scholarly pursuits, and through the years he has taken particular interest in advancements made for the more precise forecasting of weather.

"It's turning into a very accurate science" because of new instruments. Tornado watches and warnings can be announced without sightings of twisters, thanks to devices that can peek inside of clouds, he explains.

Robert Anderson

Research in the oceans, especially of temperatures in various pools, is making it possible to get a much truer picture than ever before of weather that will develop six to twelve months in the future, he adds.

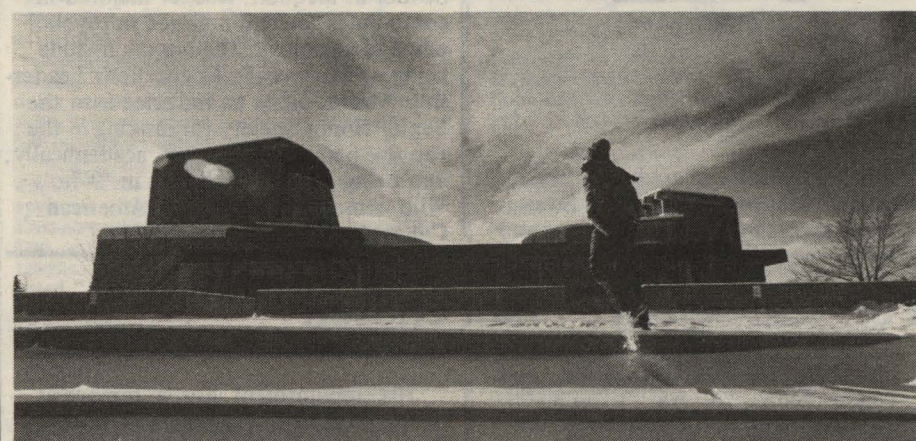

Anderson, a native of Eau Claire, entered World War II duty in 1942 after graduating from the then state teachers college in his hometown. He was commissioned an officer in the Army Air Force after study and special training at Yale University and spent four years as a communication inspector in this country.

His first teaching job, following his discharge, was at Black River Falls High School where he also was athletic director. After a year, he entered UW-Madison for four years of graduate study in geography.

Anderson spent a year on the faculty at Carroll College in Waukesha prior to his arrival at UW-SP in 1953. He served from 1955 to 1972 as department chairman.

He also was involved in planning the Science Hall and a large addition, in the establishment of Gamma Theta Upsilon honorary geography fraternity of which he was an adviser, and as chairman of the academic affairs and salary committees of The Association of University of Wisconsin Faculties.

The professor led a group of students for a semester of study in England and another group for a semester in Malaysia.

A visitor approaches the Fine Arts Center

'Olenka' Soroka - bibliography librarian

For the first time since arriving in this country 31 years ago as a displaced person from Poland, Zofia "Olenka" Soroka is settling into the lifestyle of a full-time housewife.

Mrs. Soroka has retired from the faculty of UW-SP where she served since 1963, most of the time as head of the bibliography section in the Learning Resources Center (library).

Besides domestic projects she is pursuing at home, Mrs. Soroka is planning to do church and community volunteer work, travel, ski, job, read and confront "an ambitious hope of leaving our children and grandchildren with information concerning my life before and after marriage."

That life has been anything but ordinary.

Born on a landed estate in Lithuania where her family had lived for several generations, Mrs. Soroka left there as a

girl to attend a private high school/lyceum and later a university in Jaroslaw, Poland. She was a private teacher in a family home for three years before joining a Polish relief organization, Rada

Olenka Soroka

Glowna Opiekienca, in Lublin during World War II. The organization fed people at the Nazi concentration camp, Majdanek.

During those turbulent times in Poland, she led a triple life. She was a courier for the Underground Home Army, a student at the Catholic University, and a relief worker. More than a quarter of a century later, she was honored for her service to the Underground and given the Cross of the Polish Home Army.

One of her compatriots in the underground was Wacław Soroka, now a UW-SP professor, whom she married in January of 1946. The couple escaped Poland six months later via Czechoslovakia to North Germany.

They stayed in a military camp with Polish military personnel and prisoners of war for nearly a year before going to Belgium where her husband worked on

the staff of the exiled Polish Peasant Party and was a graduate student. They later moved to Paris, living there more than five years. They came to New York with their three small children in the spring of 1954 on a plane provided by a U.S. relief organization. Her husband was secretary of the International Peasant Union. The following winter, the Sorokas began their careers in higher education, both as teachers of the Polish language to U.S. military men at Indiana University in Bloomington. She also pursued a master's degree in library science there and eventually was on the library staff two years as a Slavic bibliographer and cataloger.

The couple moved to the University of Illinois in 1960 where they both did library work, and together they joined the faculty at UW-SP in 1963. He will continue through next year at UW-SP.

New administrative officers

Library automation expert appointed to dean's post

James L. Schurter, a one-time physics professor who is a specialist in library automation and computer systems, is UW-SP's new dean of Academic Support Programs.

He assumed his duties Aug. 1, succeeding Mary Croft who had been acting dean since Burdette Eagon's retirement about a year and one-half ago.

James Schurter

Schurter has been an administrator at North Hennepin Community College in Minneapolis since 1980, first as associate dean of instructional support services and for the past two years as associate dean of instruction.

At UW-SP he will oversee operations of the Albertson Learning Resources Center, academic computing, the Academic Achievement Center which includes the writing and reading and study skills labs, student orientation and academic advising.

He will be lending some of his own expertise to the automation that is underway in the Learning Resources Center as

part of a UW System library project. The conversion, which will replace the card catalog with computer terminals, is expected to be completed during the 1986-87 school year.

Schurter, 43, is a native of Elgin, Ill., with three degrees in physics. He has a B.A. from MacMurray College in Jacksonville, Ill.; an M.S. from Purdue University in West Lafayette, Ind.; and a Ph.D. from Iowa State in Ames.

He began his career in college-level teaching at Vincennes University in Indiana in 1966 and later served two years at his alma mater, MacMurray. He returned there after graduate study in 1972 and became a tenured professor, chairman of the physics department as well as director of the computer center, director of financial aid and acting dean of students.

At North Hennepin, Schurter's numerous roles included establishing and directing the computer science program, microcomputer laboratories and administrative computer system. He reorganized and directed the learning resource center and the competency based education program.

For Minnesota's Community College System, Schurter was one of the leaders in the development of library automation, computer systems, management information and long range planning for instructional services.

Schurter's community service has been largely related to cable television matters which he would like to continue here.

Joan DeGuire North heads professional studies college

Joan DeGuire North, who says her major accomplishments as an educator have been in program development and services to adult learners, is the new dean of the College of Professional Studies at UW-SP.

She succeeds Arthur Fritschel who retired in May.

For the past year, Ms. North, 43, has been vice president in charge of marketing and new product development for the Links Group in Davenport, Iowa, a software company serving colleges and universities.

Joan North

Throughout its history, several women have held the title of dean at UW-SP, but none of them ever headed an academic college. Programs in home economics, education, communicative disorders, health-physical education-recreation-athletics, medical technology and military science embody the College of Professional Studies.

Ms. North, a native of St. Louis, moved to Alabama as a child. She received her B.A. and secondary education certification from Spring Hill College in Mobile, Ala., and her master's in English and Ph.D. in educational administration from the University of Alabama-Tuscaloosa.

In her first position, which began in 1964 as an education staff member for the Catholic Archdiocese of Mobile-Birmingham, she successfully made application for and directed the first Head Start Center in Alabama.

From 1967 to 1977, she served the University of Alabama-Tuscaloosa as an assistant to the president in speech writing and publications.

She was one of the founders of the Professional and Organizational Development Network in Higher Education and served as its first executive director in 1976-77. During this period, she also was a senior consultant to the secretary of the U.S. Department of Health, Education and Welfare in Washington, D.C.

Ms. North has been a frequent conductor of conference workshops and consultant in the areas of analyzing management styles, improving group decisions/managing time, planning and implementing faculty development, retention-academic advising-student life planning. Her papers at professional meetings have been on topics ranging from faculty collective bargaining to personalities of successful executives.

New sports publicist named

Scott F. Roeker, a student assistant developing promotional materials for UW-SP's athletic programs this past year, is the school's new sports information coordinator.

Scott Roeker

Roeker, who was graduated with honors in May, replaced Steve Swan, now the sports information director and

an assistant to basketball coach Dick Bennett at the University of Wisconsin-Green Bay. Swan held his UW-SP position nearly eight years.

Besides preparing news releases for newspapers, radio and TV stations about the 18 men's and women's sports teams at UW-SP, Roeker also is responsible for development of printed game programs, promotional booklets and brochures; maintenance of team statistics; and the handling of special projects in cooperation with the athletic director.

A 1981 graduate of Homestead High School in Mequon, Roeker majored in communication and minored in psychology and sociology. His honors include being a recipient of a Chancellor's Leadership Award; being an inductee into the Senior Honor Society for ranking in the top five percent of his class, academically; and being chosen for listing in "Who's Who Among Students in American Colleges and Universities."

McReynolds first director of Treehaven field station

Charles McReynolds, who in 1983 was named Environmental Educator of the Year in Michigan, has been appointed director of UW-SP's new 1,000-acre natural resources field station near Tomahawk.

He assumed his duties Sept. 1.

The station, named Treehaven, opened in May with 100 students enrolled in the first of two six-week summer field programs that will be held there annually.

Charles McReynolds

Major aspects of McReynolds' job include recruitment of groups to use the facilities at times throughout the year when the summer camps are not in operation.

For many of the users, McReynolds is

expected to develop, and in some cases, conduct programs.

UW-SP's College of Natural Resources will have ongoing activities at the station, and students/faculty in all disciplines on campus and throughout the UW System will be invited to book the facilities. Public agencies, such as the Wisconsin Department of Natural Resources and organizations devoted to environmental matters, will be invited to hold events there, too.

McReynolds has spent the past 10 years as director of the Howard Christensen Nature Center serving the public school district in Grand Rapids, Mich.

He is a native of Alton, Ill., and holds a B.S. degree in environmental studies from Grand Valley State College in Allendale, Mich., and an M.S. in environmental education from Michigan State University in East Lansing.

For the past three years, he has been serving as an adjunct faculty member for Michigan State as well as fulfilling his nature center responsibilities. He has been active in numerous professional organizations including the Michigan Environmental Education Association of which he has been president the past two years. He received his award as state environmental educator of the year from that association.

Political science chair chosen

Dennis Riley, who was instrumental in the development of a public administration and policy analysis major at UW-SP is the new chairman of the Department of Political Science.

Dennis Riley

His appointment, for a three-year term, effective in August, was made by Howard Thoyre, dean of the College of Letters and Science. The department has nine faculty members.

Riley will succeed Richard Christoffer who has decided to return to full-time teaching after serving nine years in the chairmanship.

Riley, 41, was born and reared in Lodi, Calif., and received a B.A. degree from Willamette University in Salem, Ore., a master's of public administration from Syracuse University, and a Ph.D. from the University of Michigan. While in Michigan, he served on the staff of Gov. George Romney's Commission on Urban Problems.

He taught from 1969 to 1973 at Gonzaga University in Spokane, Wash. and from 1973 to 1978 at the University of Minnesota-Duluth.

After coming to UW-SP seven years ago, he was assigned the responsibilities of doing much of the paperwork for the establishment of a public administration major. He has coordinated the program since the UW Board of Regents approved it. He now holds the rank of associate professor with tenure.

Johnson new ROTC leader

Lt. Col. Dennis Johnson is the new chairman of the military science department and head of the Army's Reserve Officer Training Corps (ROTC) at UW-SP.

Dennis Johnson

He succeeds Lt. Col. Lonnie Hartley who has been assigned to the Aberdeen Proving Grounds in Maryland.

Johnson, who expects to have a three-year stay here, spent the past three years as an assistant command director for the North American Aerospace Defense Command (NORAD) in Colorado Springs, Colo.

During a 20-year Army career, he has had overseas assignments in Germany as an executive officer and in South Vietnam as unit commander of an M-42 battery.

A native of New Mexico, he holds a B.B.A. degree from the University of Texas-El Paso and an M.A. in public administration from Webster University in St. Louis. He was graduated from the Armed Forces Staff College in Norfolk, Va., in 1981.

New publications

Point native's book focuses on retirement planning

For 32 years, Ray Vickers has lived life in the fast lane.

As a journalist with "The Wall Street Journal," he has traveled to nearly 120 countries, where he has interviewed kings, presidents, revolutionaries, and a dozen prime ministers from Israel's Golda Meir to England's Harold Wilson.

Three times nominated for a Pulitzer Prize for his reporting, Vickers has covered 15 wars and revolutions, been hijacked once, and bombed out of his Beirut apartment while on assignment.

A Stevens Point native, Vickers attended UW-SP in 1933 and 1934 when it was known as Central State Teachers College.

Although he retired as senior national correspondent from "The Wall Street Journal" in April 1983, Vickers hasn't really quit working—he's merely shifted gears. He's doing freelance writing on subjects of interest to him, and some special assignments for his former employer.

And now, he's written a book—his sixth. Not about his experiences, but about retirement, and how to plan for it, financially.

Titled "Retirement Planning," the book is published by Dow-Jones Irwin, the parent company of "The Wall Street Journal," and is available in hardcover (\$19.95) at bookstores, and by mail order from "The Wall Street Journal."

The book provides specific concrete how-to advice on financial options facing individuals about to retire, including how to utilize IRAs (Individual Retirement Accounts), SEPs (Simplified Employee Pension) plans, and TSAs (Tax Sheltered Annuities). Most importantly, the author stresses the importance of planning early for retirement.

What prompted Vickers to write such a book? The research into his own financial situation as he approached retirement.

"Before you depart from any company, you give it a lot of thought. As I began readying myself for retirement, I checked everything Dow Jones had concerning retirement benefits," Vickers said in a phone interview from his home in Walnut Creek, Calif. He was just back from a 9,300 mile six-week "survival" train trip that took him and his wife,

Margaret, by rail from London to Hong Kong, and happy to talk about his latest literary effort.

"Dow Jones is a great company, and I knew I had good benefits. But the question was—how should I handle these benefits, such as profit sharing?"

As he began researching his options, Vickers said, he discovered that "there's just not a lot of information available on what the prospective retiree should do with his benefits, once accumulated . . . how to funnel them into growth or income-producing assets."

"There are a lot of books that deal with the negative psychological aspects of retirement," he noted, but Vickers believes that "these negative aspects disappear if an individual has two things: physical health and financial health. My book deals with how to establish financial health for a quality retirement."

Initially, the author recalled, he had planned to gear his book to individuals in the 50 to 60 age-group, who were facing retirement in the near future. As he gathered data, Vickers said, he became impressed with the fact that the sooner one began planning for retirement, the better. His editors agreed, and suggested he target his book to a younger 25 to 40 year age bracket.

"Retirement Planning" stresses the importance of planning early—the earlier the better. The author warns that Social Security is an increasingly inadequate source of retirement funds, and supplemental income is necessary to accommodate an individual's standard of living.

He discusses in detail viable alternatives for retirement programs, including money market accounts, real-estate partnerships, certificates of deposits and "zero-coupon" bonds. These options are especially important to the individual just beginning to plan for retirement, he believes.

For persons near or at retirement age, Vickers discusses the pros and cons of retirement fund "rollovers" from one type of account to another, withdrawing funds from an IRA or Keogh, and how the retiree can benefit from 10-year tax averaging.

"Retirement Planning" is liberally laced with real-life examples, and provides an appendix with a valuable list of addresses of groups and agencies with the interests of retired individuals at heart. A second appendix deals with such matters as estimating the amount of retirement income needed to maintain pre-retirement standards of living.

According to a review by the "Wall Street Journal" editor Alfred L. Malabre Jr., "Retirement Planning" is "a remarkably comprehensive report of what people should know and think about and do to prepare wisely for the retirement years."

Vickers, whose own retirement plans include more travel and more writing "whenever I feel like it," is glad the book is finally finished and in print.

"Last year I found myself working sometimes 20 hours a day," he recalled.

Ray Vickers

"I interviewed individuals and agencies, and spent two weeks just going over my notes to make sure I had my facts straight."

He labored away at the book last spring, then took a month off for a trip to Alaska. When he returned, "I was back at it, 20 hours a day." In November, he sent the manuscript off to his publisher, and in January began the tedious task of reading page proofs.

And, in between, the Vickers took off—again—first, on a cruise to South America, then to London.

"In January I started working on promoting the book, in advance of its publication. In May, I appeared at the American Booksellers Convention in San Francisco."

Promoting a book is not his cup of tea, Vickers conceded. To quote the author—"It's a pain in the tail!"

Vickers has some considerable experience with book promotions. He is the author of five other books, including "How an Election Was Won," "Those Swiss Money Men," "Kingdom of Oil," "Realms of Gold," and "This Hungry World."

Vickers, who began his writing career in college, selling detective, adventure and wild West stories to pulp magazines, said he is satisfied with his latest literary effort.

"I can't think of anything I'd change in 'Retirement Planning.' My advice is good, and the basic concept will not need much changing, Vickers said, noting that only considerable changes in tax laws would necessitate any major changes. "Dow Jones has already asked for an update in the future, and this would include any changes tax reform might effect on retirement planning," he added. His basic premise of the importance of early planning for retirement remains, whatever else might change, Vickers feels.

Vickers has brought a solid background of business writing to bear on his latest book. Claiming he "didn't know the difference between a stock and a bond" when hired as a reporter by the "Chicago Journal of Commerce" in 1946, he enrolled in night school at Northwestern University to educate himself for the job.

"The more I studied business, the more I liked business writing," Vickers said, recalling his early years in the field. When "The Wall Street Journal" acquired the "Chicago Journal of Commerce" in 1950, Vickers was part of the package. In his 32 years with the newspaper, he wrote 475 Page One stories, and to this day is considered one of "The Wall Street Journal's" most prolific writers.

Writing is still Ray Vickers' first love. For the past several years UW-SP officials have been trying to woo him back to his hometown for a speaking engagement on campus, to no avail.

"I'm not the kind of person a program chairman finds reliable. Every time I have accepted a speech assignment, it has been with the proviso: 'I'll be glad to help out, if nothing interferes. But every (news) assignment I take, I mean to keep, and I know that my basic life commitment isn't to speech-making—it is to writing. That will always come number one.'"

What's his next assignment?

"I'm not sure," he replied with a laugh. But for this man who has discussed Common Market policies with Lyndon Johnson, argued with the Shah of Iran, and "gotten plastered" with West Germany's Willy Brandt, one thing is sure—Ray Vickers is a lot more comfortable writing about these experiences than talking about them.

And he does it, obviously, a darn sight better than most.

A book recalls Vietnam anti-war movement at UW-SP

Every college campus has its gadflies—men and women of conscience, who take positions on touchy social issues in controversial ways.

James Missey is a gadfly who opposed the Vietnam War.

As a young faculty member in UW-SP's English department during the late '60s and early '70s, Missey spoke passionately against U.S. involvement in

James Missey

Vietnam. He fasted in protest. He printed and distributed leaflets urging passive resistance to the war. For seven years, he took part in weekly peace vigils in front of the Stevens Point Post Office.

Missey, who today is professor of English at UW-SP, has chronicled the activities of the Vietnam anti-war movement in Stevens Point, especially on the

UW-SP campus, in a booklet titled: "the eve of revolution: an anti-war memoir." The booklet covers the period of the 1969-70 academic year, and the events that transpired locally during a time when America was facing increasing opposition to her military involvement in northeast Asia.

Ironically, Missey was helped with the editing of his memoirs by Phil Kallas, a Vietnam veteran who lost his right arm in battle in April 1970. Kallas is a 1969 UW-SP graduate who received a master's degree in 1974 and is active in several Stevens Point area organizations.

In "the eve of revolution: an anti-war memoir," Missey highlights the tense, lengthy student sit-in at Nelson Hall, which at the time housed the campus ROTC unit, as well as English department faculty offices.

He tells of local and campus demonstrations, rallies and peace vigils, and the impact on the anti-war movement of the killing of four people at Kent State. He mentions classroom discussions where students and teachers alike attempted to come to grips with the issues involved.

Missey also tells of disappointments, such as the lack of response locally when a rally was called to protest the deaths of blacks during demonstrations in Georgia and Mississippi.

Interwoven with the activities of the anti-war movement in Missey's memoirs are also the personal events surrounding the anticipated birth of his daughter, and tenure struggles within the university English department (including his own bid for an indefinite appointment).

The booklet, which was funded equally by the Portage County Historical Society, the UW-SP Foundation, and the UW-SP English department, is available at the University Book Store, the Stevens Point Area Co-Op, and Book World, all in Stevens Point.

"When Missey submitted his manuscript, I felt it was an important enough event in Stevens Point history, for or against it, to publish. There are people coming into school who have no knowledge of it," said Tim Siebert, president of the Portage County Historical Society, in a "Stevens Point Journal" article about Missey's work.

Siebert, a high school social studies teacher in Stevens Point, has been teaching a course on Vietnam for years at Stevens Point Area Senior High School. He sees the memoirs as one more important voice that should be heard, and he plans to make it available to his students.

"It's my impression that not a lot of work has been done on reactions to the Vietnam War at home."

Other agree.

UW-SP history professor William

Skelton, who teaches a course entitled "U.S. and the Vietnam War," says people are turned away each fall when he offers his course. The 75 seats in his classroom are filled before the close of the registration period.

Both Skelton and Hugh Walker, also a UW-SP history professor, who teaches a course on Vietnamese civilization, say a "mistaken belief" is emerging that the United States was correct in getting involved in the Vietnam War.

The two professors believe U.S. officials didn't learn a lesson in Vietnam and are repeating this error in Central America.

"We were in Vietnam for self-interest—not out of idealism to protect the oppressed or to protect a democracy," Skelton added. "We caused enormous destruction—a lot of unhappiness and tragedy."

"Make love, not war" was the catch phrase of the '70s. For today's youth, it is merely a quaint phrase.

But for many who were students on the UW-SP campus during those turbulent times in the late '60s and early '70s, "the eve of revolution: an anti-war memoir" brings back memories of their own involvement with the Vietnam anti-war movement.

Pointer athletics

Five sports stars from past inducted into 'Hall of Fame'

Five collegiate sports stars from the past were inducted into UW-SP's Athletic Hall of Fame during the annual homecoming on Oct. 7. They were Reed Giordana of Kaukauna; Don Johnston of Phoenix; Forrest "Scotty" McDonald of Plover; Harold Paukert of Kohler; and Claremont "Sonny" Redders of Summer-ville, S.C.

In addition, Leonard Gibb, director of development and executive director of the UW-SP Foundation, was cited for many years of service providing special support that has contributed to the school's successes in sports. Athletic director Don Amiot presented a plaque to Gibb citing Gibb's contributions of effort, service, time and leadership.

Amiot also gave the "UW-SP Excellence in Coaching Award" to two graduates who have made major contributions to the advancement of athletics on the local level. Recipients were Marcia Engebretson, class of 1975, who now is on the faculty at Peshtigo High, and Don Heimerl, class of 1969, who serves at Iola-Scandinavia High. They also received plaques.

While playing Pointer football from 1974 to 1977, Giordana completed 849 of 1500 passes for 10,107 yards and 74 touchdowns. He ended his career with 10,808 yards in total offense.

In 1975, the Associated Press named Giordana an honorable mention All-American team member, and in 1975 and 1976 he was selected second team All-American by the National Association of Intercollegiate Athletics. In 1977, the NAIA and the Associated Press chose him as a first team All-American, and the Wisconsin State University Conference named him as its player of the year. He was the NAIA's national leader in total offense in 1974, and took top honors in both total offense and passing yards in 1975. The Pointers won the WSUC championship in 1977 and were in the school's first post-season football berth.

For the past four years, Giordana has been an assistant coach for the Kaukauna youth football program.

Johnston, a graduate of Appleton High School, lettered in basketball three times, football and track twice, and golf once. A first-team all-conference selection in 1935, '36, and '37, he led his team to

II as a company commander in the Gene Tunney program, then was a salesman for the paper division of the American Can Co. Johnston is now retired and living west of Phoenix.

"Hall of Fame" inductees, from left: Reed Giordana; Sandra McKibben of Racine, representing her father, Don Johnston; Sonny Redders; Scotty McDonald; Harold Paukert.

three successive conference championships. During those three years the Pointers were 27-6.

He coached football and basketball for three years at Berlin, spent more than three years in the Navy during World War

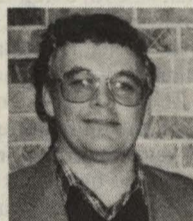

McDonald played guard on the basketball team from 1926-28, and fullback on the football team from 1926-29. Though no honors can be traced back to his participation in either sport, few, if any, were accorded at that time.

Len Gibb

Marcia Engebretson

Don Heimerl

He was the captain of the 1928-29 basketball team, and earned three letters each in basketball and football. McDonald was a member of Stevens Point High's 1926 state championship team, and his career was reported in the "Stevens Point Journal" as "one of the most spectacular in local annals."

McDonald had a longtime career in teaching high school mathematics in Stevens Point and Janesville before retiring to Plover.

Paukert played football at Stevens Point from 1924-27, basketball from 1925-28, and participated in track and field in 1927-28. He was a fullback and in 1927 was named to the second All-Normal Conference football team, despite playing a large portion of the season with an injury. He played center and guard on the basketball team, and was a sprinter on the track team.

Following graduation, Paukert taught and coached at Pittsville for one year and then moved to Osceola where he remained until 1939, teaching and coaching and serving as the school's principal the last two years.

In 1939 he became the district administrator in Poynette and in 1946 moved to Kohler in the same capacity. Paukert, retired since 1972, is a resident of Kohler.

Redders was a running back for Stevens Point in 1961-63, and in 1965. Upon graduation, he was the fifth leading rusher in the school's history with 1,387 yards, and an average of 5.1 yards per carry. Redders holds school records for the two longest runs from scrimmage (90 and 86 yards), most points scored in a game (32), most touchdowns in a game (5), and has the three longest punt returns in school annals (90, 65, 64). He is the second leading scorer of all-time with 192 points. Redders was a first team all-conference selection in 1963.

Today, Redders is the co-owner and president of Coastal Sprinkler Company, Inc. in Somerville, S.C.

The induction of the five members brings the membership in the UW-SP Hall of Fame to 52.

Three new head coaches appointed

Three new head coaches were named this spring to lead varsity athletic teams at UW-SP.

Jay Eck, assistant coach at the University of Pittsburgh, was chosen to succeed Dick Bennett in men's basketball; Linda Wunder, an assistant coach at the University of Illinois at Chicago, succeeded Bonnie Gehling at the helm of women's basketball; and Mark Mazzoleni, also an assistant coach at the University of Illinois at Chicago, took over reins of the hockey program from Linden Carlson.

Eck, 34, is a native of Madison who was graduated from Xavier University in Cincinnati. He was head basketball coach at La Crosse Aquinas, assistant coach at Bradley, and for the past two seasons he has been chief recruiting assistant for Pittsburgh. During the past season, the team finished fifth in the Big East.

Ms. Wunder, 26, grew up in Brookfield, where she was a high school All-American in basketball, was graduated from the University of Illinois and taught at her alma mater, Brookfield East. She finished her master's degree this spring from U of I-Chicago where she was also responsible for recruiting, scouting and the conditioning program for the women's basketball team.

Mazzoleni, 29, who grew up in Green Bay, played hockey for Michigan State University and after graduation served two seasons with the Midwest Junior Hockey League as a member of the St. Paul Vulcans. He was assistant coach and recruiting coordinator at Chicago for four years and last season the team finished fifth in the tough Central Collegiate Hockey Association.

Jay Eck

Linda Wunder

Mark Mazzoleni

Student teams doing well

Here's a summary of the sports teams in action this fall at UW-SP:

The women's cross country team placed third in the Conference and sixth at the NCAA III Meet in Atlanta, Ga. The Lady Pointers were led by senior Sheila Ricklefs and sophomore Kris Hoel who both earned All-American honors for their performances. In addition, Ricklefs, Hoel, and Amy Cyr were named to the All-WWIAC first team.

The Pointer football team finished the season 8-2-1 overall and 5-2-1 in the Conference. It was the best showing in eight years. The highlight of the Pointers' season was a 23-19 victory of conference champ River Falls. Coach D. J. LeRoy's troops climbed as high as 15th in the NCAA III national polls behind senior signal-caller Dave Geissler. The All-American candidate riddled opposing defenses for 9,518 yards and 65 touchdowns during his career at Stevens Point. Geissler now holds the NCAA III mark for passes completed and ranks second in total passing yardage and total offense. Five Pointers were named to the All-WSUC first team. The list includes Geissler, Guy Otte, Mike Christman, Jim Lindholm, and Mark Reitveld.

The women's volleyball team again

qualified for the national meet, its fifth in the last seven years. Calvin College, the nation's 11th ranked team, eliminated the Pointers from the national tournament in a tough five-game match. UW-SP finished the season with an impressive 44-15 record. Coach Nancy Schoen's team earned four spots on the All-WWIAC team. The squad included Karla Miller, Ruth Donner, Carol Larson, and Sheri Scheu.

The men's cross country squad, which finished fourth in the Conference, was led by Arnie Shraeder who was the runner-up at the NCAA III National Meet, and Don Reiter who finished 32nd there.

UW-SP's women's field hockey team finished with an 18-2 record, won the Midwest Regional Tournament, and qualified for the national tournament in Waltham, Mass. The Pointers were eliminated, however, by the tournament's number two seed, Bentley College.

Kristen Kemerling led the Pointer stickers with 21 goals and three assists. Five Pointers were named to the All-WIM squad. The team included Sheila Downing, Julie Hallenbeck, Tina Roeschen, Colleen Kelly, and Kemerling. Field hockey will be eliminated next year because a growing number of schools have dropped the sport.

About this publication

The "Pointer Alumnus" is published twice each year by the University of Wisconsin-Stevens Point for graduates and friends of the institution.

Nearly 35,000 copies are printed for worldwide distribution.

The editor is John Anderson, director of news and publications, who is assisted by Marilyn Thompson, Sarah Clanton,

Virginia Crandell, Mary Sipiorski and a corps of talented students. Design and layout is by Mark Pohlkamp and Jean Pleshek of the Educational Media Services. The photography is by staffers in the Office of News and Publications, Educational Media Service and others.

Several of the feature articles were done by Sue Stanke Kramer, an alumna.

May Roach - a favorite teacher of many

When people who were graduated from UW-SP before 1956 are asked to cite their favorite professors, the list almost always includes the name May Roach.

From 1914 until her retirement 42 years later, she was on the faculty of the rural education department, preparing young men and women to teach in the

May Roach

country schools that once dotted Wisconsin's landscape. She also had a hand with Fred Schmeeckle in the formation of the conservation education major which was the basis for today's UW-SP College of Natural Resources.

Miss Roach wore other hats for her school. She was widely known as the ambassador of good will. She did that job in her spare time, during evenings and on weekends in countless speaking engagements in all parts of the state.

Her work didn't go unappreciated. In 1954, the local Jaycees named her the first female recipient of the Stevens Point Distinguished Citizen Award.

In 1951 Pope Pius XII gave her the Pro Ecclesia et Pontifica medal, one of the highest honors given by the Roman Catholic Church to its lay people.

In 1956, the Wisconsin Catholic War Veterans named her its woman of the year.

The subject of this Pointer Alumnus edition's personality sketch of a popular faculty member of bygone days, Miss Roach also had numerous recognitions from UW-SP. A residence hall was named for her and a winter carnival was dedicated to her. She was among the first recipients of the Distinguished Alumna Award. But one of her all-time favorite designations from the school was that of honorary homecoming queen.

Miss Roach had associations with the school nearly all her adult life. She studied here in 1905 and 1906 and returned again three years later. (She also attended the University of Minnesota, the University of Chicago and Columbia University.) After she retired and moved back to her native Eau Claire, she made frequent visits to Stevens Point and to her school to give after-dinner and luncheon speeches. She also chaired several fund-raising events.

The timeliness in featuring her in this nostalgia section of the news magazine is that Nov. 1 (All Saints Day) was the 100th anniversary of her birth.

Miss Roach died in April of 1974 at age 88.

The homily delivered at her funeral at St. Patrick's Catholic Church in Eau Claire, captures much of her spirit.

Here are excerpts of that address by the Rev. Bernard McGarty from "The Times Review," April 25, 1974:

Let us suppose that May has gone home to God and the Communion of Saints. By my calculations she has been in that heady atmosphere 69 hours. I suspect no one has had sleep, if they sleep, and the excitement must be at a fever pitch. Just think of the crowd of former students. I have made some educated guesses. I estimate she might have taught a thousand students on the primary and secondary level. As a college professor, if she met four classes a day, faced 120 students a semester, and taught summer school every other year for 42 years, she could have had classroom impact on 12,600 minds.

Add to that list the thousands who heard her at high school and college graduation and those who listened at banquets and seminars and in-service training sessions.

There would be so many little people saying, I remember that quote from your "shoebox." "Blessed are the mapmakers, they are the only people who can draw nations close together." And another would say I heard you in Kansas and you said, "You cannot have fellowship with your fellowman without faith in God, anymore than a wheel can have spokes without a hub."

Well, perhaps by the end of the second day, the celebrities and position holders have made their way through the crowd. There are all those men who want to take credit for her. Mr. Sims who hired her as a college professor, Pope Pius XII who made her a Papal Lady, and Franklin Roosevelt, who received that stern letter from her in 1940 when she espoused pacifism before it was popular.

Maybe the Wisconsin conservationist, John Muir would say, "You're the one I want to give credit to. That program you started at Stevens Point has helped save our beautiful Wisconsin." Perhaps even Nicholas Copernicus could say, "You know May, I have been up here for 500 years and you're the only Hibernian I've seen we might consider for the Polish hall of fame." Well, Bishop Tracey is there with lavish praise, and perhaps she sees in the crowd John Kennedy.

Might she say something like this, "I liked your inaugural speech, and I am so glad you invited Robert Frost; our young people need to listen to good poets and know about their ancestors. I met you once in Eau Claire." When May did meet Kennedy she said, "I am praying that I am shaking the hand of the next President of the United States." He replied, "My dear, I am saying the same prayer."

May Roach lighted a torch to signal the beginning of a winter carnival at UW-SP about 20 years ago.

We know there would be bankers and politicians, a Blaine or a LaFollette who could have shared a platform in the 1920s or '30s and clergymen of all denominations, and to those clergy she would say, "I'm so proud of you, the way you're getting along."

While everyone was looking to meet her, there would be an Irish ancestor she would have to meet. The one who sold the sheep belonging to the English landlord so he could afford passage to America. One day driving near Durane, she saw sheep on the hillside. She parked her car and said, looking at the sheep, "If it weren't for your ancestors, my ancestors would never have gotten here."

Her career spanned the careers of 16 presidents, 24 governors, seven popes, and most of the college presidents at Stevens Point. Though her body lies in

Eau Claire, there will always be a shrine to her in that great university in central Wisconsin. Her campus will always be the whole state.

I would like to close with a prayer on a wall in Chester cathedral in England. It was in her "shoebox."

"Give me good digestion, Lord, and also something to digest. Give me a healthy body, Lord, and sense to keep it at its best. Give me a healthy mind, O Lord, to keep the good and pure in sight, which seeing sin, is not appalled but finds a way to set it right. Give me a mind that is not bored, That does not whimper, whine or sigh; Don't let me worry over much About that fussy thing called 'I.' Give me a sense of humor, Lord Give me the grace to see a joke, To get some happiness in life and pass it on to other folk."

Esther Hansen, widow of college president, dies at 90

A memorial service for Mrs. Esther Hansen was held June 2 at UW-SP where she served 22 years as its "first lady."

Esther Hansen

Mrs. Hansen, 90, died May 24 at her home in Whiting after an illness of about five months. Her body was cremated.

A memorial fund was established with the UW-SP Foundation.

From 1940 to 1962, while her husband, William C., served as the seventh

president of UW-SP, she was responsible for planning and being hostess for many of the school's major social events, including annual breakfasts to which every spring graduate was invited.

After her husband retired and entered politics, she campaigned with him as he successfully sought election as a Democratic state senator.

Her own public service was diverse. She helped organize a local group for the United Nations and was an early volunteer coordinator of testing done for groundwater pollution in area wells.

She supported campaigns for civil rights and was long active in the American Civil Liberties Union and in Common Cause. She and her husband belonged to several environmental groups including the Sierra Club and were part of Audubon bird counts for many years.

In several communities, where her husband was a school administrator, she sponsored garden club projects and

worked in behalf of community music organizations, Girl Scouting, and screening of babies for disease and birth defects.

Mrs. Hansen was one of the founders of Stevens Point's League of Women Voters and was a member of the Portage County Humane Society, University Women of UW-SP, Portage County Democratic Party, and Eastern Star organizations.

The former Esther Rintelman, she was born in Port Washington on Feb. 8, 1895, the daughter of Mr. and Mrs. William Henry Rintelman. Her father was a weekly newspaper editor who supported progressive social change. In turn, the daughter was a suffragette who took part in marches in Milwaukee urging Congress to give women the right to vote. In recent years, she made public endorsements of the Equal Rights Amendment.

Reared in Menomonee Falls, she met her future husband when he was her teacher and coach of her women's basketball team. They were married on Aug. 11,

1917, and were wed almost 66 years at the time of his death on Aug. 2, 1983.

Mrs. Hansen was a graduate of Milwaukee State Normal School and was a rural school teacher near Menomonee Falls for two years prior to her marriage.

She and her husband lived from 1917 to 1922 at Milltown where he was the high school principal, and from 1922 to 1929 at Neillsville, 1929 to 1932 at Oconto, and 1932 to 1940 at Stoughton where, in each community, he was the school district superintendent.

Her survivors are four daughters, Helen I. Hansen with whom she lived at 508 McDill Ave., (Whiting) Stevens Point; E. Ann Buck, 5178 Highway 54, Plover; Ruth Charlotte Sanderson, East Jordan, Mich.; and Kay Dean, Wausau. There are eight grandchildren and two great-grandchildren.

Besides her husband, two brothers preceded her in death.

UW-SP serves as a gateway to world for hundreds

During the past 16 years, several thousand UW-SP students have participated in unforgettable study programs in foreign countries where, in most cases, everything basic in their lives was different—food, lifestyle and even language.

The university's collection of overseas programs is now considered in educational circles among the finest in the country. There is considerable diversity. Some groups go regularly to all parts of the globe for a full semester. Other groups

go for a shorter period to pursue specific interests. Accommodations are good, and the costs associated with participation are held to a minimum to make possible the involvement of people from all economic levels.

The following are observations by students who have gone abroad with university groups. The stories tell how venturing beyond the national borders changed their thinking and their attitudes and gave their lives much broader dimensions.

He converted to catholicism

Rick Tank, personnel manager of the Del Monte plant in Plover, terms his 1978 trip to Great Britain and the Continent, "the event that had the greatest impact on my life."

He says his travels helped him "grow up," taught him how to handle money and gave him a better perspective of the world. He also learned to take greater pride in being an American.

One of the experiences which changed Tank's life was his conversion to Catholicism during the trip. He started attending Catholic services while abroad and became aware of what he calls "the universality of the church." He still keeps in touch with the priest who inducted him into the faith.

All the former participants agree the

tours instilled in them a desire to do more traveling. Tank plans to return to England and France this fall.

He says he learned how to be a better tourist through observing others who were loud and obnoxious. He learned how to respect other peoples' customs and got a better perspective on how visitors should behave.

A political science major who graduated in 1979, Tank says his travels made him more aware of world events and history. He regrets he didn't start going abroad when he was a sophomore and take advantage of the program every year.

Though he just paid off his college expenses, partially accrued through traveling, he regards the financial commitment as "money well-spent."

She now thinks globally

Linda Christensen of Verona is a veteran of four tours abroad—she went to London in 1976, to Malaysia in 1977, and to India and Taiwan in 1978. She traveled while taking additional courses after her graduation from UW-SP.

An English major at UW-SP, Linda is now director of instruction for the Verona School System. She earned her master's degree in curriculum and instruction from UW-Madison and is currently pursuing a Ph.D. in the same field.

Linda says the trips introduced her to a "broader world where many other things are going on. Travel increases a person's global perspective and makes the nightly news come alive," she maintains.

People who go abroad tend to recognize

their responsibility to the world—it teaches individuals to think globally and act locally, according to Linda. "Travel also encourages you to respect individual differences and to become more flexible and less complacent," she says.

Her trip to India, in particular, was "difficult." She wanted to write about the experience upon her return, but was unable to relive it until two years later when she composed a short story.

Linda says if she had never gone, she wouldn't know "what's out there." She describes herself as "never content" because she wants to travel again, but she has been too involved with her career to leave town.

Studying abroad led to job

Barbara Osen of Green Bay, who went to England and to Malaysia in the mid-1970s, developed a love for foreign travel which encouraged her to seek a career in West Germany. She is now in her sixth year as a second grade teacher for dependents of military personnel in Baumholder, which is about one and one-half hours southwest of Frankfurt.

"I have the best of both worlds," Barb says. She travels throughout Europe on school holidays and spends her summers in Green Bay with her parents.

She says she feels at home abroad. She has an apartment in a small village outside the base. "Initially I got a two-year contract . . . but I got hooked on it,"

she continues. "There are so many nice people (in Germany)." She has never studied the German language, but she says she has few problems communicating with the people there.

Barb estimates her academic schedule and salary as quite comparable to those in the U.S. A free trip home every two years is an added benefit. She obtained her job through the Department of Defense Dependents' School in Alexandria, Va. She taught in Bruce for four years before taking the overseas post.

Applicants are asked where they don't want to go, according to Barb, but aren't given a choice among teaching assignments.

Poland

China

Mrs. Corneli continues work

Professor Emeritus Pauline Isaacson, the person who founded the semester abroad programs in the late 1960s, says her main objective was to take people to "it." She believed if students and faculty wanted to study the culture of a foreign country, they should be given an opportunity to actually go there. She thought travel would add extra dimensions to the education of students and faculty.

Miss Isaacson had already led an East Coast theater tour in 1961 and a European trip in 1962 which were well-received, so she submitted a formal travel-study plan to the university's administration.

She recalls taking her ideas to Lee Dreyfus, UW-SP's chancellor at the time, and his response was, "When can we start?" More than a year later, the plan was approved by the Board of Regents. The first group of 42 students and three faculty members departed for Great Britain in August 1969.

She contends that not all students get the same thing out of travel experiences—the results depend upon each individual's response. She believes most of the participants become more mature and find their lives are enriched by visiting other countries.

Helen Corneli, who succeeded Miss Isaacson as director of International

Programs in 1982, also emphasizes the effect of travel upon each individual. She says she has observed remarkable growth in self-confidence and self-awareness for many of the program's participants.

Because of their exposure to other cultures, students often learn to be more sensible in their criticisms and less parochial in their outlooks, according to Professor Corneli.

"When they return from abroad," she continues, "travelers often regret the lack of better public transportation in America and are made more aware of the mindless waste in our country."

"And, of course," she diagnoses, "many of them catch the 'travel disease'—a chronic condition."

Some changes have been made in UW-SP's international agenda under Mrs. Corneli's leadership. New spring semester-long trips to Australia and Greece have been added and more interim tours are now being offered.

The Australian trip is proving to be extremely popular, according to the director. One year, it has a natural resources emphasis and the next year, humanities are the focus. She says the opportunity to visit Australia draws students from throughout the U.S.

of traveling students

k begun by Miss Isaacson

Mrs. Corneli is enthusiastic about the interim trips because they can offer so much variety. A three-week tropical ecology tour to Costa Rica and a two-week cross-country/downhill skiing trip to Austria and Germany will be offered in January of 1986. A four-week architecture and design program in England, Scotland and Wales will be held next July.

A three-week bicycling tour of Central Europe was initiated last summer and will be scheduled again this year. The active trips, such as skiing and cycling, are part of a new "wellness" emphasis which allows students to earn physical education credits for their participation.

Travel to Great Britain, Germany, Spain, Poland and Taiwan are offered on a regular basis as are summer tours with special emphases such as natural resources, fashion and design, or gifted and talented.

Mark Koepke, assistant director of International Programs is living proof of the long-term effects of foreign travel on students. He met his wife, Kim, on the trip to Great Britain. "That has certainly influenced the rest of my life," Koepke comments, with a grin.

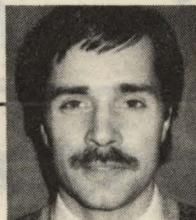

"Apply for all the trips well ahead of time," is a rule of thumb for people interested in UW-SP's overseas programs.

A prospective student may obtain an

application form from the Office of International Programs. The completed application must be accompanied by a picture—a snapshot will do. The applicant should arrange to have three recommendations mailed to UW-SP. An out-of-state resident is required to have four references. Individuals currently on campus need to attend three interviews or two interviews plus an orientation meeting. People coming from out-of-town should make an appointment a week in advance so the process may be completed in one day.

After finishing the interviews, the student may pick up a self-assessment form and fill it out. This form should be returned with a statement of commitment letter, detailing goals for overseas study. When all these steps are completed, a final interview with the program director is required. Participants attend classes while overseas for credit or audit—the cost is the same. At least a month of travel time is included in the semester-long programs.

Informational materials may be obtained through the mail or by stopping at the office on campus. The address is Office of International Programs, Room 208 Main Building, UW-Stevens Point, 54481. The phone number is 715-346-2717.

Rick Tank

Linda Christensen

Judy Haase

Dean Kirst

She'll never forget the zomos

Judy Haase of Minocqua, a senior history major at UW-SP, went to Poland in the fall of 1982 when the country was still under martial law. Some of the public restrictions had been lifted by that time, such as the curfew, but the military was "ever present."

"The zomos (riot police) were housed by the government and transported in buses throughout the city of Krakow. Then there were the regular police and the military. The zomos carried tear gas, riot guns and water cannons which were used to break up demonstrations.

"One night a huge crowd gathered on the square and hundreds of people moved through town and down the street by the piast (dormitory) where we were staying. The students supported the demonstrators by throwing bottles and other objects out the windows, so the police tear-gassed the dormitory. Tear gas is terrible. It makes you cry, it burns your skin and you can't wash it off—it feels like acid," Haase recalls.

"There were lines of people waiting for everything, especially toilet paper and shoes. Specialty shops which sold goods such as meat were hard to find, and when you did enter a store, there was nothing on the shelves," she continues.

Haase regarded her stay in Poland as "a challenge." She thought it was the best trip offered at the time because students could experience the cultural diversities of an Eastern bloc country. She says it encouraged her to study Eastern European history, Russian and Polish and helped her to better understand the intense nationalism of the Polish people.

She says, "The Poles are wonderful—they are the friendliest people in the world. We were invited to spend a weekend with a Polish family and we were entertained for dinner at several different homes. They were so anxious to show their visitors the 'real Poland.' We knew they were feeding us their whole month's supply of food."

A more open-minded man

Kim Bartel, a firefighter for the Bureau of Land Management in Utah, went on the semester abroad in Malaysia in 1979.

He says one of the most startling contrasts between life in the U.S. and in Southeast Asia is "affluence versus survival." While an American may be contemplating the purchase of a new automobile or a VCR, people in Asia are concerned with survival—a shack to live in and something to eat.

His most memorable experiences occurred when he left the group and traveled on his own, he recalls. He visited with people who lived in newspaper-lined huts ("if they were lucky enough to find some papers") built on stilts. At night the houses would shake because of the water buffalo seeking shelter underneath. Meals were cooked over open pits in the middle

of the dwellings.

Bartel says his travels taught him to be more open-minded, including his opinions about religion. Living and working in Utah where the Mormon religion is prevalent, and having been to Asia where many faiths are practiced, he says he has found all religious persuasions to be basically the same. He has difficulty understanding why people fight about religion because they all teach love and belief in a higher being.

Bartel, who is headquartered in the town of Vernal in northeastern Utah, has been called to fight fires in Idaho, California and Alaska. When not battling blazes, he serves as a range technician on improvement projects such as building fences, controlled burns and grass and water development to sustain wildlife and livestock.

Low costs made trip possible

Dean Kirst, a social worker for Lincoln County, also stresses the cost-effectiveness of UW-SP's international programs.

"Several years before I traveled with the university group in 1978, I was involved in a four-week European concert tour which cost \$2,000. A four-month stay in Europe through the UW-SP program, cost me \$1,400."

Two highlights of the trip for Kirst were a visit to Dachau and the viewing of the Shroud of Turin. He says the trip to Dachau "really opened my eyes." He has since read "every book ever written about concentration camps."

His group got to attend a rare showing of the shroud which is believed to have covered Christ's body, and Kirst says he has heard it will never be displayed to the public again.

He describes international travel as socially and culturally broadening. He

says it made him more conscious of history and piqued his interest in subjects such as the Roman Empire and England's Royal Family.

Kirst says his visit to Great Britain also helped him professionally. He took a juvenile delinquency class while there, which gave him the opportunity to work with a British judge and observe the juvenile justice system in action. He says the judicial system in England is stricter and more punitive than it is in this country.

Kirst has since gone on to obtain a master's degree in social work from UW-Milwaukee and is employed as a child protective service worker in Merrill.

Kirst and his wife, who did her student teaching in Wales, says they would love to return to Europe. "But with one child at home and another on the way, we may have to wait a few years to do it," he predicts.

Germany

Whatever happened to good ol' Joe?

A cross-country skier visited the front lawn of UW-SP's Old Main.

'85

RENE DANIELS, '85, is the new director of the Family Crisis Center in Stevens Point.

JOANN GERKE, '85, has been hired by the Cassville District School Board to teach elementary school physical education, driver's education and assist in coaching the girl's track and volleyball teams.

CAROL LYNN (KRONSCHNABEL) KAMHOLZ, '85, is a substitute teacher with the Rosholt School District and North Day Care Center. She resides with her husband at 3077 Hwy 66, Rosholt.

KATHRYN ANN (HAUGSBY) TEASDALE, '85, is an assistant teacher for Sauk Head Start. She lives at 1029 5th St., Baraboo.

CATHLEEN CUSTER, '85, is doing clerical and office work at the Plitt Co. and Colombia Pictures. Her address is 3120 Hennepin Ave. So., Minneapolis, Minn.

CHERYL KAY (BAEHLER) FLANDERS, '85, is a self-employed domestic engineer at 34 Cecile Ave., Box 289, Augusta, Maine.

MICHAEL JOHN HESS, '85, is a development engineer in research with the Beloit Corp. He lives at 1404 Hackett St., Beloit.

KATHLEEN MARIE MCGINLEY, '85, is a dietetic intern at a New York Hospital. Her address is 435 E. 70th St., New York, N.Y.

JOHN CHRISTOPHER SPICUZZA, '85, lives at 1200 Simpson, Evanston, Ill., and is a research assistant with Travenol.

DANIEL MARTIN REILLY, '85, 1635 Chippendale, Hoffman Estates, Ill. is in sales with the Phoenix Tube Co.

JERRY G. CAHAK, '85, 430 Carriage Dr. No. 1A, West Chicago, Ill., is a sales agent and landscape designer with McKay Nursery Co., Waterloo.

KERRY BETH NIKUTTA, '85, of 2732A So. 10th St., Manitowoc, is a field director with the Manitowoc Girl Scout Council.

DAWN RENEE BLUM, '85, is a forestry technician with the USDA Forest Service at White Mountain National Forest. Her address is Rt. 175, Campton, N.H.

CURTIS F. MILLER, '85, is a biological scientist at the University of Florida. He lives at 220 E. Ventura, Apt. 6, Clewiston, Fla.

LYNN E. BURGESS, '85, of 4979 Linden Rd. No. 1222, Rockford, Ill., is a manager trainee at Prange Way.

BRADLEY PAUL ONKEN, '85, is a forest technician in pest management with the USDA Forest Service. He resides at 180 Canfield St., Morgantown, W.Va.

KIMBERLY ANN D'ADDARIO, '85, is working in the Shawano/Gresham School District as a speech and language clinician. She is living at 1300 E. Lieg, Apt. 6, Shawano.

KATHRYN H. JERSEY, '85, of 3233 Channel Dr., Stevens Point, is employed as a splicer at Color Craft.

JANE MARIE GERMANSON, '85, is the store manager at Quality Fitness, Madison. She lives at 2412 Waunona Way, Madison.

LINDA JEAN BUCKMAN, '85, is a kindergarten teacher in the Green Lake School District. She is living at 641 18th St. S., Wisconsin Rapids.

ALISON MARIE FOOTE, '85, is a graduate student at UW-Eau Claire. She resides at 606 4th Ave., in that city.

CYNTHIA MARIE SANFORD, '85, is employed by the UW-Extension as a 4-H agent in Lincoln County. She lives at 3031 2nd St. S., Wisconsin Rapids.

DIANE MARIE (LOHMANN) BANITT, '85, works for the Republican Eagle as a lifestyle newswriter. She is residing at 1852 Woodland Dr., Red Wing, Minn.

BRENDA MARIE ECKENDORF, '85, of 1528 Franklin St., Apt. 3, Stevens Point, is a podiatric assistant for Dr. James Sowka.

JUDITH A. CERNOIA, '85, is a sales correspondent with the Houghton Mifflin Co. She is residing at 405 Rancho Arroyo Pkway., Apt. 282, Fremont, Calif.

DEBRA LYNNE LONSWAY, '85, is a case-worker for Big Brothers/Big Sisters of Manitowoc County. She is living at 1718 Cedar Grove Dr., Apt. 3C, Manitowoc.

STEVEN GERARD JANISZEWSKI, '85, is a firefighter for the Florida Division of Forestry. His address is 4120 Heron Way, Apt. B110, Bradenton, Fla.

JOHN MICHAEL RIVETT, '85, is the night auditor for Embassy Suites in the Regency Centre. He lives at 1230 Crooks, Green Bay.

KEVIN JOHN FERMANICH, '85, is a research assistant and graduate student in UW-Madison's Soil Science Dept. He is living at 2030 Fish Hatchery Rd., Apt. 10, Madison.

SCOTT GILBERT GUNEM, '85, is attending graduate school at UW-Madison for a master's degree in business administration. His mailing address is 511 Main St., Osseo.

RITA ANN SCHUSTER, '85, of Rt. 1 Box 73, Greenleaf, is a teacher at All Saints School in Denmark.

SUSAN A. LARSON, '85, of 1309 Spring St., Apt. 203, Madison, is a student at UW-Madison.

BRADLEY WILLIAM SODERBERG, '85, is a graduate student at Colorado State University. His address is 1500 W. Plum, Apt. 8G, Fort Collins, Colo.

RUSSELL PETER WANKE, '85, of 1609 Fremont Ave., is a process engineer at Consolidated Papers, Inc., Stevens Point.

MILLIE RAE (ZELLER) BAIERL, '85, is employed by the Rice Lake School District. She is residing at 324 Hilltop Dr., Rice Lake.

LOU (WADSWORTH) HOCHMUTH, '85, of 1443 29th Ave. S., Wisconsin Rapids, is attending graduate school at UW-SP.

DONALD GALE DOUGLAS, '85, is district executive with the Boy Scouts of America. He resides at Camp Phillips in Hagen.

KARI LEE DESTICHE, '85, is an intern at the University of Iowa. Her mailing address is 2455 San Lorenz Dr., Green Bay.

PAULA JO SMITH, '85, of 601 Lee Court, Waukesha, works in graphic arts with the Pohlman Studios.

MONICA LYNN GETTY, '85, of 101 Russell St., Apt. 23, West Lafayette, Ind., is attending Purdue University.

DAWN MARIE RABLIN, '85, is a social worker with the Juneau County Dept. of Social Services. She lives at 537 Tremont, Apt. 2, Mauston.

MARY SUE FRANECKI, '85, is a junior auditor with Blue Cross Blue Shield United. She lives at 5752 S. 23rd St., Milwaukee.

CRAIG STEVEN PROPSON, '85, of 2424 Gillen St., Racine, is a graduate student at UW-La Crosse.

DAWN MARIE LOEW, '85, of N81 W28742 Park Dr., Hartland, is working as a substitute teacher.

KATHY ALICIA KLIMOWICZ, '85, is a youth counselor at Nova House. She resides at 1706 Rosalie Prky., Apt. 10, Plover.

RALPH D. ERICKSON, '85, is a chemist for the Madison Metropolitan Sewerage District. He is living at 2644 High Ridge Tr., Madison.

Recent graduates begin their careers

RICHARD DAVID NEUMANN, '85, is working for American Food Management as a food service supervisor while pursuing a master's degree at UW-SP. He is living at 1530 Franklin St., Apt. 4, Stevens Point.

MICHAEL JOHN GRORICH, '85, of 1708 Strongs Ave., Stevens Point, is a self-employed computer consultant.

SCOTT WILLIAM HULL, '85, is working as a consultant with Phi Sigma Kappa. He resides at 3901 W. 86th St., Indianapolis, Ind.

JOAN M. STELCHEK, '85, is an Allnet Marketing representative. Her address is 4930 Argo Rd., Smyrna, Ga.

CHERYL A. DZURICK, '85, of P.O. Box 96, Porterfield, is employed by the Peshtigo Public Schools.

PAM LYNN (BROWN) ANDERSON, '85, is working as a decorator for the Unique Drapery shop at Sears. She is residing at 4813 Indian Hill Dr., Apt. 103, Racine.

TOM EGAN DOYLE, '85, is a sales representative with General Beverage. He lives at 743 Nakoma Ave., Fond du Lac.

SUSAN MARIE LEWANDOWSKI, '85, of 515 Fifth Ave., Stevens Point, is employed by Shopko.

JULIANNE THERESE SCHIEFFER, '85, works for the Dept. of Agriculture. She resides at 4261 N. 42nd St., Milwaukee.

CRAIG J. BAYE, '85, is working for Brickman Industries in Long Grove, Ill. His mailing address is 2236 Manitowoc Rd., Green Bay.

CYNTHIA ANN ERDMAN, '85, of 4940 Timbercrest Dr., Cedarburg, is employed at the Mount Sinai Medical Center in the dietetics section.

RONALD RAY WHITMORE, '85, is a team leader in District 65. He is living at 1516 Crain, Evanston, Ill.

LEE ANN FRELICH, '85, is a second grade teacher in the Neillsville Public Schools. She resides at 101 Clay St., Neillsville.

LISA MARIE INMAN, '85, is a resident hall director and graduate student at UW-Platteville. She lives in Dobson Hall.

DAVID M. LUECK, '85, is a sales representative with Metropolitan Insurances. He is residing at 3221 9th Ave., Wisconsin Dells.

ANN MARIE BREKKE, '85, of 1734B Boyington St., is a design consultant at Designers II in Stevens Point.

LAURIE JEAN MOESCH, '85, is an intern at the University of Minnesota Hospitals and Clinics. She lives at 910 Delaware St. S.E., Minneapolis, Minn.

SUSAN E. SANTY, '85, works for Kinder Care. Her address is 1102 Thorndale, Green Bay.

GARY JON HOLT, '85, is a sales representative for National Energy Systems, Inc. of Green Bay. His mailing address is 1650 Clark St., Apt. 10, Stevens Point.

TERESE S. HILGERS, '85, is a housekeeper at St. Michael's Hospital. Her mailing address is 5439 N. Shoreland, Whitefish Bay.

JEFF A. CRAWFORD, '85, is attending Michigan Law School. His mailing address is 1910½ 6th St., Wausau.

LEA ANN ROBSON, '85, worked last summer as a SCA volunteer in Glacier National Park, then began a job as an environmental education instructor at Storm Mountain Center. Her mailing address is 7331 W. Fullerton, Elmwood Park, Ill.

GAIL MARIE NEUSSMEIER, '85, is employed by the Milwaukee Area Technical College as a marketing systems assistant. She lives at 2224 W. Wisconsin Ave., Apt. 410, Milwaukee.

PENELOPE L. GREENWAY, '85, is a speech pathologist with CESA No. 8. She resides at 7737 Botting Rd., Racine.

KIM LOUISE CRAFT, '85, is an intern at Brigham and Women's Hospital in Boston, Mass. Her mailing address is 8824 Hwy 10 East, Marshfield.

MARK THOMAS LUETKEHOELTER, '85, of 406 Burbank, Apt. 63, Toledo, Ohio is a theater manager with American Multi-Cinema, Inc.

DAVID PAUL VYTLACIL, '85, is a graduate assistant at State University College. His address is Office of Residence Life, SUCB-Porter Hall, 1300 Elmwood Ave., Buffalo, New York.

KATHLEEN (KOBISHOP) WILLKOM, '85, of 3732 Robert St., is employed by the Stevens Point Board of Education as IMC director at Roosevelt School.

PAMELA MARIE OLSON, '85, is a child counselor at the Camelot Child Care Center. She is living at 1233 Franklin, Buffalo Grove, Ill.

JULIE M. (FOX) LUTZ, '85, is a manager trainee at Prange Way. She is residing at 1801 W. Pershing St., Apt. 519, Appleton.

DAVID RAYMOND WOODRUFF, '85, is president of Woodruff Lumber Inc. Co. He lives at 217 Anderton, Vesper.

BRIAN E. HAGBERG, '85, works for American Tree Care in Southampton, New York. He resides at 10A Norwood Rd., Hampton Bays, N.Y.

CHRISTINE M. BURCH, '85, of 1201 Gunn St., Apt. 8, Appleton, is an interior designer for Emmons Inc.

JEFFREY DENNIS BARKLEY, '85, is employed by the Wisconsin Dept. of Natural Resources. He is living at 115½ Cottage St., Merrill.

COLLEEN KAY BORKE, '85, is a billing correspondent at John Alden Life Insurance Co. She resides at 749 11th Ave. S., Apt. 8, Hopkins, Minn.

DARCEY ANN WESTCOTT, '85, of 1203 Holub St., Wausau, is a business consultant at The Westcott Corp.

ROBERTA ANN WOOD, '85, is attending Law School at Wake Forest University in Winston-Salem, N.C. Her mailing address is 1902 Douglas Dr., Schofield.

STEVEN PATRICK LEAHY, '85, of 415 W. Johnson St., Apt. 219, Madison, is a graduate law student at UW-Madison.

AMY BETH ZIMMERMAN, '85, of 5178 Hwy 54, Plover, is employed by Muckamoore Kennels.

KENNETH M. BAUR, '85, is a manager with S & B Management Corp. He is living at 735 Western Ave., Mosinee.

Members of the 1960 class attending a 25th reunion last summer included Gilbert Kaczmarek, Darlene Simonson, Gloria Cavil, Annette Gosh, Vera Tveten, Stanley Wozniak, and Rita Martin.

PAMELA (RICKMAN) OSWALD, '85, of 1703 N. Chestnut, Apt. 201, Marshfield, is employed at Comfort Inn.

MARK A. WITCZAK, '85, is an instructor at a health club. He is living at 1411 S. 19th St., Manitowoc.

REBECCA JO OTTO, '85, of 1601 Kenneth Ave., Kaukauna, works at Northwest Fabrics.

MARY JO MORITZ, '85, is a waitress at the Essen Haus Restaurant. She resides at 2722 Granada Way No. 6, Madison.

CATHERINE (HOPKINS) GRUTZIK, '85, is a housewife and student taking courses at UW-SP. She lives at 343 N. Ridgewood Dr., Stevens Point.

LYNN MARIE GOLDBERG, '85, is currently a reporter for Channel 7 in Wausau. She is living at 1712 Meadow Brook, Apt. 202, Manitowoc.

PATRICIA (BOUCHER) PULVINO, '85, is employed as a speech therapist with the Blue Valley School District. Her husband, **DANA CHARLES PULVINO**, '83, is district sales manager with Research Products Corp. They live at 8438 Grant, Overland Park, Kan.

'84

DAVID ALEXANDER MARTIN, '84, works for Procter and Gamble as a sales representative. He is living at 1300 N. Grand W., Apt. 5, Springfield, Ill.

MARY M. MOELLER, '84, is a third grade teacher at Rib Mountain Elementary School. She lives at 500 E. Thomas, Apt. 202, Wausau.

JEFFREY J. GRABOSKI, '84, is a sales representative with Kimberly Clark. He lives at 3101 Jordan Ln., Stevens Point.

LISE DAWN LANNING, '84, is a crisis counselor at the Kenosha Youth Development Services. She resides at 2514 Rosalind Ave., Racine.

JOE MARTENS, '84, is teaching high school mathematics in the Shullsburg School District.

Members of Alpha Sigma Alpha had a large turnout for a reunion during homecoming.

MATTHEW LEWIS, '80 and M.A. '82, has been named associate editor of "Adweek," an advertising trade magazine in Chicago.

Until taking his new post this summer, he lived in Minneapolis where he was to Twin Cities advertising what E. F. Hutton has been to investors. When Matt wrote, ad agencies definitely listened.

Lewis, hired after graduation from UW-SP by Minneapolis "CityBusiness" magazine to cover advertising, real estate and high technology, was considered the "dean" of Minneapolis advertising reporters, at the ripe old age of 25, according to "Format" magazine.

Matthew Lewis

Lewis and his work were included in a profile of four Twin Cities advertising reporters in the March 1985 issue of "Format."

"I didn't even like advertising," Lewis admitted in the interview, recalling that "panicky" was how he felt when first confronted with the foreign world of advertising. At "CityBusiness," his beat included reporting every other week on the comings and goings of ad agency personnel, doing investigative pieces on agency power shifts, and describing innovative strategies behind new ad campaigns.

That Lewis is carving a definite niche for himself in the advertising reporting field is apparent. "CityBusiness" editor John Kostourous, who hired Matthew and trained him, wrote a tribute to Matthew and his talents in a recent "CityBusiness" editorial titled "A Coach's Lament: When a Player Moves On."

Kostourous wrote it three weeks after Matthew informed him he was leaving for the Chicago job.

"Nobody tells you . . . how much it's going to hurt the first time one of your favorite employees walks into your office and announces that he's taken another job . . . The thing I will miss most about Matthew is not his pun-filled writing, which I always enjoyed, but his genuine concern for the people he wrote about. I wish more people had Matthew's perspective on the way their writing affects the people they write about."

(Note: Matthew Lewis honed his journalistic skills as a student in the UW-SP News and Publications office, where he was employed as a student writer/photographer.)

DAVID YERKE, '80, is a member of the piano faculty at the Wausau Conservatory of Music.

RANDAL V. FALSTAD, '80, has been appointed conservation warden with the Department of Natural Resources for Green Lake County.

JEFF JENKINS, '78, is the owner of Horizon Coal Company, Inc. He and his wife, Elizabeth live in Jasper, Ala. Their address is P.O. Box 474, Jasper.

RONALD RAY DUDLEY, '78, is in quality control with the Martin Marietta Denver Aerospace. He lives at 2903 W. Bryant Ct., Littleton, Colo.

DEBRA (MALLOW) MORRIS, '78, and her husband, Richard, live at 146 Maple Ave., Hartland. She is a U.S. Postal Service carrier, and he is a plastic injection molder for Dickton and Mausch.

JAYNE (BAUMGARDNER) WILLIAMS, '78, received a master's degree in vocational rehabilitation from UW-Stout, but has returned to her undergraduate specialty as a home economist with the Tacony Corp. She and her husband, Gary, reside in Saratoga, Calif. Their address is P.O. Box 2293.

SHAWN MCCARTHY, '78, and his wife, Virginia, live at 1270 Boynton St., Apt. 1, Glendale, Calif. He is employed as a cameraman for KABC-TV in Los Angeles. She is park manager for the Glendale Park District.

'77

RANDAL G. ROSSING, '77, has been appointed state conservation warden with the Department of Natural Resources in Iowa County. He had served for seven years as warden in Watertown.

MICHAEL J. ROWE, '77 (master's degree '85), is serving as a marine fisheries technician in Gambia with the Peace Corps. While his permanent mailing address is 3931 E. Lakeshore Dr., Bremen, for the next two years he may be written to at P.O. Box 582, Banjul, Gambia.

BRUCE R. BACON, '77, is employed as a research technician in wetland waterfowl with the Wisconsin Department of Natural Resources. He is working on a 10-year waterfowl/pheasant study in the prairie pothole region of Northwestern Wisconsin. His address is Rt. 2, Box 13, Clear Lake.

ROGER G. HOLMAN, '77, has been named solid waste and parks manager for Waupaca County. His wife formerly was solid waste manager in Manitowoc County for seven years.

STEPHEN YANTZ, '77, is employed by the Fond du Lac County surveyor and also works as a part-time pilot and flight instructor for Basler Flight Service, Oshkosh. He resides with his wife, Lorie, at 25½ 8th St., Fond du Lac.

MARY M. TREBATUSKI, '77, is a NASD correspondent in the Contract and License Division of Northwestern Mutual Life Insurance Co. Her address is 2411 S. Wentworth, Milwaukee.

DOUGLAS W. KINGSLEY, '77, and JULIE A. (MACEMON) KINGSLEY, '76, reside at Rt. 3, Box 46, Morgantown, Ind. He is a district fisheries biologist with the Indiana Department of Natural Resources. She is busy with their two daughters.

SHELLEY PETERSON, '77, is working for Sunrise Lodge as guest services supervisor. She had formerly been teaching recreational classes at Nicolet College.

BRUCE KREUGER, '77, has been named the D.C. Everest Junior High School teacher of the year. The recipient of a fellowship grant to attend a training program on the dynamics of contemporary drug abuse, he teaches ninth grade physical science. For the second year, he has been selected to teach at Science World, an Ashland summer camp, and has applied to the National Aeronautics and Space Administration to be a teacher in space.

SUSAN MARTIN, '77, is an ordained United Methodist minister. She is completing graduate work at Garrett-Evangelical Theological Seminary in Evanston. She lives at 2116 Sherman Ave., Apt. 1E, Evanston, Ill.

Dave Geissler of Chippewa Falls, the Pointer quarterback, achieved numerous honors for his record-breaking performance during the fall season. He was chosen as most valuable player in the state conference. He is a senior.

KIM KAFURA, '77, is a machinist with Custom Machinery Design in Little Chute. He and his wife, Connie, reside at 1065 Gillingham Rd., Apt. 1, Neenah.

STEVEN SHIMEK, '77, has joined Baudhuin, Inc., as a soil scientist. He and his wife, Debi, reside in Sturgeon Bay with their daughter.

KATHLEEN M. NIMTZ, '77, received her master's degree from William Paterson College and has been appointed director of advertising for an optical company in the Manhattan area. Her address is 0-83 Whitehall St., Fair Lawn, N.J.

'76

DONNA MOLL, '76, was the recipient of the John A. Stanavage Memorial Scholarship designed to assist educators undertaking an advanced degree. She is employed at Waterloo Junior-Senior High School as the director of the media center.

JEFF WEDEWARD, '76, has been named manager of the advertising account service group in the industrial division of Bader Rutter & Associates, Inc. He joined the company in 1980 as an account executive.

MARY JIRKU-WEBER, '76, has accepted a position as account executive with the Milwaukee public relations firm of Barkin, Herman, Solockek & Paulsen.

STEVE CHEUNG, '76, is a research scientist and technical manager for a large space program at Stanford University. He lives with his wife at 1037 Campbell Ave., Los Altos, Calif.

MARK A. CICHOCK, '76, has been appointed assistant professor of comparative politics at the University of Texas at Arlington. His address is 2300 Henderson, Apt. 628, Arlington, Texas.

CRAIG M. SMITH, '76, has been promoted to the board of directors and appointed vice president of operations at Universal Brokerage Services, Inc., Theinsville.

DAVID J. HOPPE, '76, is a soil scientist for the U.S. Forest Service. His wife, Lois Reinhold, attended UW-SP and graduated from Iowa State University. They live with their son at Rt. 1, Box 417, Cook, Minn.

BECKY JESKE, '76, and her husband, DAVID JESKE, '75, reside at 922 N. Richmond St., Appleton. He is employed by the City of Appleton in their Parks and Recreation Department and she is a pharmacy technician.

SANDRA (HOLLANDER) ANDERSEN, '76, is an art teacher for the Onalaska Public Schools. She will represent the Onalaska School District in the teacher of the year Special Services Category. Her husband, Gary, is a technical engineer for The Trane Company. The couple resides at N3864 Longview Ct., La Crosse.

'75

ROGER KUCHENBECKER, '76, is working as a surveyor. He and his wife, Brenda, live in Wasilla, Ala. Their address is Box 871036, Wasilla.

PATRICK A. ROBBINS, '75, is an agent with American Family Insurance in Peshtigo, where he lives with his wife, Debbie, and their three children.

JOHN WENZEL, '75, has been named manager of Information Services at Zimpro Inc., Rothschild. He has been employed with the company for seven years and is a member of the Data Processing Management Association and the Digital Equipment Computer Users' Society.

STEPHAN J. ALBERS, '75, has joined the First National Bank & Trust of Menominee as vice president and trust officer.

LARRY DOLPHIN, '75, has been appointed park manager of Blackhawk Lake Recreation Area. His wife, Nancy, is a music teacher and they have two children.

ANN E. (DALUM) WACHTER, '75, is employed by the Madison Post Office. Her husband, Donald, is an art teacher at Oregon Consolidated Schools. The couple resides at 809 Redland Dr., Madison.

PAUL A. SPAUDE, '75, has been appointed to the position of executive vice president and chief of operations of Wausau Hospital Center. He and his wife, Karen, have relocated in the Wausau area with their two children.

SARAH (JOHNSON) FRANKOWSKI, '75 and her husband, GARY FRANKOWSKI, '73, reside at 149 N. Clinton Ave., Clintonville. He is employed by Miller-Johnson Insurance Agency in Marion. They have two children and are expecting a third child this fall.

ALICE WYWIALOWSKI, '75, recently received a Ph.D. in wildlife biology at Utah State University in Logan. She received her master's degree in animal ecology at Iowa State University in 1977. While in college, she was awarded an honor scholarship at Utah State for 1977-78 and was a member of Sigma Xi Research Society. She also was departmental representative to the Utah State University Graduate Student Association.

PEGGY RAJSKI, '75, is a partner in a production company which releases theatrical films and has produced several rock videos by Bruce Springsteen, including his most recent, "Born in the U.S.A.," which contains footage from one of her childhood birthday parties in Stevens Point. After earning her master's degree at UW-Madison in 1977, she moved to New York where she started making industrial/corporate films, then became involved in documentary filmmaking and, eventually, went on to feature films.

Friends Esther Kushman Bessert, '38 of Appleton, and Mary Gruber Nendza, '34 of Wisconsin Rapids.

Maggi Cage wins state NOW award

'74

MAGGI CAGE, '74, won the Feminist of the Year Award sponsored by the state chapter of the National Organization for Women. Ms. Cage of Appleton, received the recognition during the annual NOW state convention in Stevens Point in May.

Maggi Cage

Among those extending plaudits was Judy Goldsmith, NOW's former national president who is a longtime friend of Ms. Cage and also a UW-SP alumna. Ms. Goldsmith gave the convention's keynote address.

Ms. Cage, director of the Fox Valley Reproductive Health Care Center, chairs a state NOW task force on violence against women, and is a consultant to businesses on sex discrimination in employment. She said NOW chose her for the award because of her achievements while working under adverse conditions. Her health care center has been surrounded with controversy since she founded it in 1977. Services include abortions through 15 weeks, vasectomy, sexually transmitted disease screening and treatment, gynecological care, plus counseling in the areas of full-term pregnancy, family planning, abortion and premenstrual syndrome. The clinic was firebombed in 1978 and has been picketed regularly since. Protests there became more intense in 1983 and have involved vandalism.

Ms. Cage also has been an activist in protest against the Vietnam war, ecological politics, population control and concerns of older adults. She became an advocate for reproductive freedom in 1971. While completing her undergraduate work in Stevens Point, she organized a student volunteer group that counseled women with unintended pregnancies and then made referrals to maternity homes or legal abortion clinics in New York. Following the legalization of abortion in 1973, Ms. Cage began to work directly with providing medical care for women seeking abortions.

She and several other local residents in the early 1970s, challenged a state law that regarded birth control devices as indecent articles and stipulated that the items could not be on public display. They opened a store in the basement of a building on the corner of Second Street and Clark Street, just off Stevens Point's Public Square, in which they sold, gave away and displayed the materials, mainly items for men. She recalls that no law enforcement person challenged the activity. "I'd like to think we saved a lot of unplanned pregnancies in Stevens Point by what we did." The law the group challenged has since been lifted.

Ms. Cage's other work in Stevens Point involved helping organize and serving as director of the Women Helping Women Center whose functions have since been taken over by several public agencies plus the Women's Resource Center at UW-SP. She was one of the original conveners of the Stevens Point chapter of NOW.

Elsewhere, she has served as executive director of the Mahoning Women's Center in Youngstown, Ohio, been a consultant at a women's health care center in Madison, directed an information and referral service for Waukesha and Jefferson counties, and done graduate study at UW-Oshkosh and Laurence University of Santa Barbara, Calif., where she is working toward a Ph.D. in counseling.

In addition to NOW, several other state and local groups have honored Ms. Cage for her work as an activist. In January, the Wisconsin Civil Liberties Union gave her a special citation. In March, the Wisconsin Community Fund honored her for efforts on behalf of "progressive social change in the state." The sponsoring organization provides assistance to a variety of service organizations in Wisconsin. The Wisconsin Women's Caucus gave her its 1978 Purple Heart Award for efforts in behalf of women's equality. In 1975, the Stevens Point Chapter of the Business and Professional Women named her the city's Young Career Woman of the Year.

JUDITH KURKA NAGEL, '74 (master's '76), is a creativity specialist, consultant and visiting artist. Her workshops and seminars are designed for the development of human potential through talent education. She may be contacted at Creativity House, P.O. Box 125, Fennimore.

ROD HOLT, '74, has been named high school teacher of the year in the Mayville District. A 16-year veteran with the district, he instructs biology, advanced biology and freshman science. In addition to his teaching assignments, he is assistant coach to the boy's track team and the boy's and girl's cross country teams, and co-coach of boy's and girl's intramurals. He was also a nominee for the 1985 Mayville Chamber of Commerce "Citizen of the Year Award."

WAYNE HOFFMAN, '74, is the data processing manager of Badger Northland, Inc. He and his wife, Ellen, live at 1905 Miller Lane, Kaukauna, with their three children.

DEE DYER, '74, has resigned his post as Winnebago County District Attorney to become a partner in the Appleton law firm of Herrling, Myse, Swain and Dyer.

MIKE SCHLEIPP, '74, teaches fifth grade at Dafeo School. He and his wife, Judy, live in Coloma with their son and daughter.

THOMAS PETRI, '74, and DEBRA PETRI, '79, are residing at 2414 E. Bottsford, St. Francis. He is the manager of systems monitoring at Milwaukee Sewerage District and she is a medical technician at St. Luke's Hospital. While on vacation, he landed a 9½ lb. walleye on a Lindy rig using a leech on four-pound test line and took first place in the weekly fishing contest.

ELIZABETH A. (GRAF) HASLER, '74, resigned her position as a German teacher at Neenah High School to move to Green Bay with her husband, David, who works for Proctor and Gamble. They plan another move this fall to the company's headquarters in Cincinnati, Ohio.

MARSHA LINDSAY, '74, is president of Lindsay and Stone Advertising in Madison. She was recently recognized by the Wisconsin Women Entrepreneurs organization as Woman of the Year and was awarded a local and national "Addy" for an advertising campaign for the Wisconsin Dept. of Transportation. In addition, she is the current president of the Madison Advertising Federation and is a member of the Advisory Council for the Wisconsin Strategic Development Commission. She is a candidate for a Ph.D. in communication arts at UW-Madison.

'73

RONALD C. DOERING, '73, has made a major career change by leaving the USDA Forest Service to become a businessman. He and his wife, Ramona, are operating a Baskin Robbins Ice Cream store. Their address is 914 Pawnee Dr., Elizabethtown, Ky.

TOM RIESE, '73, the Waukesha County 4-H and Youth Agent, recently received the 1985 Distinguished Service Award from the Wisconsin Association of Extension 4-H and Youth Agents. He was cited for his special efforts to involve urban and rural clientele, minorities and the mentally and physically handicapped in creative programs. He is married and has two children.

From left, Bonnie Newby Stien, of Stevens Point, Evelyn Dumbleton Fritsch, of Withee; Dorothy Richards Swazee, of Minocqua; and Dorothy's sister, Margaret Richards Crosby, Stevens Point, were enjoying a homecoming party.

KATHLEEN M. (PERKINS), '73 and DAVID E. BURTON, '72, are residing at 9333 Bernie Lou Dr., Hazelhurst, with their two daughters. He works for the State of Wisconsin Department of Social Services camp systems and she is a homemaker.

'72

THOMAS HEITING, '72, has taught English at Three Lakes High School for 12 years. His wife, Ann, is an art teacher for that district. They have a one-year-old son, Jarrett.

DOUGLAS MARTIN, '72, is a biologist for EnviroSphere Co., a division of Ebasco Services, Inc. He recently completed his Ph.D. in fisheries biology at the University of Washington. He and his wife, Judy, live with their five sons at 6038 Sycamore Ave., N.W., Seattle, Wash.

Tim Sullivan

TIM SULLIVAN, '72, works out of his home at 1555 Water St., Stevens Point, as a free-lance sportswriter. In a "pen in cheek" article published this summer in the "Wausau Sunday Herald," he described how he'd like to see major league baseball undergo a complete overhaul. Under his plan, the present major league system would be scrapped and 16 new expansion teams would be created. Current players in the major leagues would be forced to remain with their new teams for the remainder of their careers, or retire.

An example of one of the new squads: The Utica Used Cars. The team's players would include: Dan Ford, Curt Ford, Charles Hudson, Richard Dotson, Oil Can Boyd, Sam Horn, Danny Heep, Rusty Staub, Razor Shines, Jimmy Key, Steve Shields, and James Steels. The manager would be Doug Rader, and the coaching staff would include Whitey Ford, Jim Nash, Charlie Maxwell, Virgil Trucks, Otto Velez, Bucky Dent, and Don Lock. The Used Cars would work out in the Pontiac Silverdome, and their favorite play would be the hit-and-run.

Sullivan also had a feature story published in the Green Sheet of the "Milwaukee Journal" in April about Hartland major league baseball statues which stopped being produced in 1964.

Another 1972 UW-SP graduate, RANDY WIEVEL, and Stevens Point Mayor Mike Haberman also team with Sullivan to write weekly pro football columns for Ray Nitschke's Packer Report, Tommy Kramer's Viking Report, Colt Report, and Redskins Report. The four papers carry the local writers' "Superpicker" and "SuperQuiz" columns.

Sullivan is presently working on a story in which he and a Stevens Point policeman, Ron Carlson, are trying to track down the man who caught Henry Aaron's last (755th) major league home run. They have been in contact with Aaron and are trying to arrange how the ball could be presented to the all-time home run king at Milwaukee County Stadium.

NADINE DAYE, '72, teaches fourth grade at Dafeo Elementary School in Wautoma. She is working on her master's degree through UW-Oshkosh.

Judi Burkhart

JUDI (STROIK) BURKHART, '72, of 5715 Jurgella Ln., Stevens Point, is the new director of the Retired Seniors Volunteers Program (RSVP) for Portage County. Previously, she had been on the business operations staff of the Portage County Dept. of Human Services. She is working toward a master's degree in guidance and counseling from UW-Oshkosh.

CONNIE (FISCHER), '72, and DONALD SCHELLHAASS, '72, are living at 8206 Nolan Rd., Harvard, Ill. He has completed his master's degree in public administration at Northern Illinois University and is now executive director of the McHenry County Conservation District. They have three children.

DAVE CZYSZ, '72, has been promoted to operations forester in the woodlands office with Nekoosa Papers, Inc. He had been assistant forest manager of the company's northern Wisconsin-Michigan district.

MIKE O'CONNOR, '72, is a librarian at the Marathon County Library. He recently published his first book, "Ace of Aces," a biography of Major Dick Bong, a World War II fighter ace and Wisconsin native. He lives at 1201 N. 3rd Ave., Apt. 1, Wausau.

LINDA J. (KEHOE) HUEBNER, '72, is beginning her 14th year of teaching at Fall River Schools. She and her husband, Ron, reside at Rt. 1, Box 271-B, Columbus, with their two children.

'71

MELVIN PATTERSON, '71, has been promoted to purchasing agent at Consolidated Papers, Inc. He resides at 3721 Ridgeway Trail, Wisconsin Rapids.

Dick Hose

RICHARD A. HOSE, '71, has been named account executive with Behrends and Company in High Point, N.C. He formerly served as an account executive with an advertising agency and as advertising manager of Harnischfeger Corp. in Milwaukee.

BEVERLY (BROWN) ROESKE, '71, has retired after teaching third and fourth grades at the Schofield Elementary School for 23 years. She and her husband, Marvin, plan to move to their cottage near Hancock.

ROBERT R. VARAK, '71, is a buyer for 3M Company. He lives at 2432 7th Ave., Riverside, Ill.

Alumni of Sigma Tau Gamma social fraternity posed for this picture during a reunion during homecoming.

Ann Graver Edwards cited for service to the disabled

In 1928, members of the championship football team posed for this picture. They include Greg Charlesworth, Jack Rezatto, Bill Albrecht, Tiny Bannach, Ben Weronke, Scotty McDonald and George "Nip" Chesrown.

'70

JUDY JASHINSKY, '70, is an art instructor at Prince George's Community College in Largo, Md. Many of her works appear in collections nationwide and some were part of an invitational exhibition of Con-

Judy Jashinsky

temporary American Indian Art at the Smithsonian Institution. Recently she was the recipient of a fellowship to the Virginia Center for the Creative Arts at Sweet Briar, Va.

DOUGLAS D. HOSKINS, '70, and DIANE M. HOSKINS, '71, are living at S. 70 W. 17860 Muskego Dr., Muskego. He is employed by the Wisconsin Department of Natural Resources as a conservation warden supervisor. She is a music teacher with Muskego-Norway Schools.

JOHN YAUCH, '70, has been appointed assistant engineer for the City of Stevens Point. With the department since 1975, he has held the position of designer, inspector, surveyor and draftsman. He resides at 1601 Hickory Dr., Plover, with his wife, Judy, and their three children.

JAMES FOLZ, '70, is the first pastor of Menomonie's Oak Ridge Lutheran Brethren Church. He and his wife, Cheryl, reside at 505 Sunset Dr., Menomonie, with their three children.

MICHAEL E. OLESON, '70, has accepted the position of account executive with Alexander and Alexander, Inc. He resides in Green Bay with his wife, Margaret, and their three children.

DENNIS D. JOHNSON, '70, has completed a minor in chemistry at UW-Eau Claire and is working on a minor in physics. He is employed at New Auburn High School as a biology/chemistry teacher. His address is Box 19, New Auburn.

Ann Waisbrot

ANN WAISBROT, '70, is executive director of New Visions Gallery, Inc. New Visions is an independent nonprofit educational arts organization located in the Marshfield Clinic. Her duties include curating and presenting exhibits, planning educational programs, public relations and management of the gallery. She has previously worked as an art educator and artist. Ms. Waisbrot resides at 1441 W. Briarwood, Marshfield.

RON SWANSON, '70, is a history and social studies teacher at Wabeno High School. He also serves as head coach for football, basketball and baseball and is the "W" Club and junior class adviser. He was selected as the 1985 Teacher of the Year in the Wabeno School District.

AL SZEPI, '70, has been the superintendent of Brookwood High School since 1977. His hobbies include traveling the U.S. with his wife and six children.

AUDREY OWENS, '70, and her husband, RANDALL OWENS, '69, reside in Spring Lake Park, Minn. She is tax manager for Opus Corp., a Minneapolis-based design, construction and development company. She joined Opus in 1984 as a senior tax accountant. She is a member of the American Institute of Certified Public Accountants and the Minnesota Society of Certified Public Accountants.

'60s

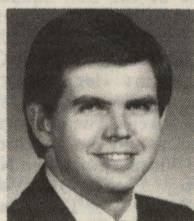

RONALD C. RETTERATH, '69, has been elected senior vice president and actuary by the board of directors of Wausau Insurance Companies.

ROSS C. BEIER, '69, is a research chemist with the U.S. Department of Agriculture. His address is V.T.E.R.L., ARS, U.S. Dept. of Agriculture, P.O. Drawer GE, College Station, Texas.

SANDRA DAEHLER, '69, received the teacher of the year award in the Greenfield School District where she is a reading specialist.

J. PAT HIGGINS, '69, is a master's candidate in theology at the University of Portland. He lives at P.O. Box 816, Hillsboro, Ore., where he is a youth minister with St. Matthew Parish.

PATRICIA E. ZAGER, '69, of 1469 Division Ave., Barron, is a community development specialist affiliated with Cooper Engineering of Rice Lake. Previously, she had administered a Community Development Block Grant for the city of Rice Lake and prepared grant applications for Turtle Lake that provided manpower programs grants. She was also active in gaining monies for highway safety and hazard elimination in the community of Minong.

Nicholas Pearson

NICHOLAS PEARSON, '68, is district conservation manager at the Hillsboro, Ore. field office of the Soil Conservation Service. He was one of eight persons named this year as Federal Employee of the Year for the Portland-Vancouver metropolitan area. Pearson also has been recommended for the 1985 U.S. Department of Agriculture Distinguished Service Award, the highest USDA nonmonetary recognition an employee can receive. He was formerly assistant staff leader of the employee development staff at the Soil Conservation Service's West National Technical Center in Portland. He and his wife, Marilyn, and their two children reside in Portland.

JERRY ZWICKY, '67, has taught fifth and sixth grade science at Marquette Middle School for the past 16 years and earned his master's degree from UW-SP in 1972. He and his wife, Joan, live near Kewaunee with their son, Joel.

RAYMOND RUCINSKI, '66, teaches mathematics and computer programming at Seymour High School. He and his wife, Pamela, have four children.

RICHARD ANDERSON, '66, has been appointed district director of the Job Service's Northwest Region and will be working out of the Eau Claire office.

DAVID L. BECKER, '66, is part owner of the Arneson/Becker Agency, Inc. He is living at 304 N. 8th St., Mt. Horeb, with his wife, Elizabeth.

ANNE GRAVER EDWARDS, '66, the geography, history and philosophy librarian at the University of Missouri-Columbia, was recently honored "for exemplary service in enhancing the status of persons with disabilities at UM-C." Her career at the university's library has spanned 15 years.

LAWRENCE J. SCHWEDA, '66, has been an art teacher in Oshkosh for 20 years. He lives with his wife, Isabelle, and four sons at 5681 Melody Ln., Rt. 3, Oshkosh.

FRANZ J. CAMENZIND, '66, is working as a cameraman on the production of "California Condor," a one-hour television program produced by the Audubon Society. He has worked as a cinematographer for several Wild Kingdom shows, two filmed in Namibia, Southwest Africa. He also has filmed and appeared in several Genesee Beer commercials, filmed howler monkeys and other wildlife in Panama for Smithsonian World, filmed coyotes, black-footed ferrets and the giant panda for ABC's American Sportsman.

He claims his greatest accomplishment to date is to be the first person to film pandas in the wild. Camenzind did this in 1982 in the Sichuan Province of southwest China. He has had photographs appear in "National Geographic," "National Wildlife," and "Science '85," among others.

He is active in local conservation groups and is on the board of the Jackson Hole Alliance for Responsible Planning and the Teton Science School.

Camenzind received his M.S. in zoology from Brigham Young University in Utah, his Ph.D. in zoology at the University of Wyoming and has done post-doctoral work in zoology at Colorado State University.

He has served as an endangered species biologist, wildlife consultant and raptor research biologist for Bio-West, Inc., in Utah, as a senior wildlife biologist for Land Management Services, Inc., in Wyoming and as an instructor at a summer seminar in conjunction with the Teton Science School and the Grant Teton Environmental Education Center. He has published papers and short articles in several periodicals. His address is Box 1330, Jackson, Wyo.

BARBARA (ZURAWSKI) KLOPPENBURG, '65, is the manuals information coordinator for Wausau Insurance Companies. She resides with her husband, Richard, at 1016 Grand Ave., Wausau.

RICHARD C. MARKWORTH, '64, serves as pastor of Shepherd of Peace Lutheran Church, Sergeant Bluff, Iowa. He is married and has three children.

GARY E. PARKINSON, '64, is employed with the DuPage Area Council, Boy Scouts of America. He has been affiliated with the BSA since 1963. His wife, Karen, and he reside at 271 S. Milton Ave., Glen Ellyn, Ill., with their three children. He would like to hear from members of Sigma Phi Epsilon from the mid-60s.

ROBERT A. SCHACHT, '63, is an aquatic biologist with the Division of Water Pollution Control of the Illinois Environmental Protection Agency. His address is 710 Hillside, Elmhurst, Ill.

KATHLEEN (COLCORD) TRESKOTT, '63, has returned from a year abroad in China. Her husband, Paul, an economics professor at Southern Illinois University, was the recipient of a Fulbright Fellowship to teach at Peking University, and she was employed as an English instructor at the same institution. The couple lives at 502 N. Almond, Carbondale, Ill.

MARGARET (APPS) GUTCHE, '63, is retiring from 41 years of teaching. After receiving her two-year certificate from Wausau County Teacher's College, she taught many years while attending summer sessions and night classes to earn her bachelor's degree from UW-SP. Since then she has been with the Wautoma School District.

CHARLYNE (MITTELSTEADT) LA BRANT, '63, has received her law degree. She resides at 12411 Pine Ridge Dr., Perry, Mich., with her husband, Robert, who is vice president of the State of Michigan Chamber of Commerce.

CLARK AMUNDSON, '62, has accepted the position of water management specialist with the Department of Natural Resources for the four-county Madison area. He will coordinate all DNR shoreland and floodplain zoning activities.

RON KLESTINSKI, '61, is the dean of students at Roncalli High School, where he has taught biology since 1966. He also serves as head football coach, and earned Coach of the Year awards for 1969 and 1980. He lives at 1423 N. 4th St., Manitowoc, with his wife, Darlene, and their four children.

JANE (JOHNSON) HANOUSEK, '61, is the education reporter for the "Wausau Daily and Sunday Herald." She has been on the newspaper's staff for 19 years, having served 10 years as family living editor and eight years as farm editor before going on the education beat. She covers education trends and school news throughout Central Wisconsin. A former editor of "The Pointer" and president of the Union Board when the University Center was built at UW-SP, she is married and has a son who is in college.

BERNARD VANDREEL, '60, is a member of the Brown County Board of Supervisors and has been a teacher in the Ashwaubenon Public Schools for 25 years, heading the social studies department since 1965. He and his wife, Mary Lou, have three children and four grandchildren. They reside at 2825 Otto Ct., Green Bay.

JACKIE (REDLIN) WESTERFELD, '60, is in her twentieth year of teaching in the Bondel Community Schools. She and her husband, Leon, live at Wadhams Dr., Box 393, Zachow.

'50s

EDWARD P. DUNIGAN, '58, is the head of the Department of Agronomy at The Louisiana Agricultural Experiment Station. He also serves as chairman of the agronomy department for Louisiana State University's Baton Rouge campus. He received his master's in 1961 from Michigan State University and a Ph.D. in 1967 from the University of Arizona. Dunigan was pre-

Edward Dunigan

viously a research chemist for U.S. Rubber Co. and a research associate at the University of Arizona. He joined the agronomy faculty at LSU in 1967 as an assistant professor of soil microbiology, was made associate professor in 1973 and a full professor in 1978.

JAMES HOPKINS JR., '57, is a metal finisher with the Marion Body Works, Inc. His address is P.O. Box 262, Marion.

ROBERT GILBERT, '52, has been nominated for Wisconsin Teacher of the Year from the Wild Rose School District. He has taught science and biology there for 29 years and his environmental classes have been instrumental in cleaning up the Wild Rose Millpond. He was voted teacher of the year in 1980 and 1983 and also was honored as "Wausau County Environmental Science Teacher of the Year."

'40s

ALTHEA (BOORMAN) OCKERMAN, '49, has had two poems published in "Scintillations II," a book of selected poems from a contest sponsored by the Bucks County Writers' Association. The selections published are from a group of poems called "American Iliad," written for and about native Americans. She also has received two first place awards in statewide short story competitions. She resides at 24 Half Turn Rd., Levittown, Pa.

JAMES C. STOLTENBERG, '48, has retired from UW-Platteville where he served as dean of the College of Education. He has been active in the UW-System since 1961, when he became director of internships and clinical training at UW-Madison. The Wisconsin Association of Middle Level Education established the James Stoltenberg Award in recognition of his leadership in education. He and his wife, Dorothy, are living at their farm in Central Wisconsin.

JACK V. PERRY, '47, who has taught for 34 years at Winneconne High School, will retire next year from his position as chairman of the social studies department. He and his wife, Joanne, a nurse at the Winnebago Mental Health Institute, reside at 550 Meadow Ln., Winneconne.

JIM "DOC" KULIDAS, '43, was on the planning committee for Greek Heritage '85 in Chicago which this year celebrated the 100th anniversary of the first Greek family's arrival in the city. He was responsible for booking the top high school bands in the area to participate in a 19th annual Greek-American parade on May 18. "Doc" has been teaching on the high school level in suburban Chicago for many years.

DORIS HOESLY, '41, is retiring from 30 years of teaching. She began her career in a one-room country school near Whitewater teaching first through eighth grades, then took time off to raise four children. When her youngest child was in school, she earned a degree from Platteville and joined the Monticello School District where she has taught kindergarten for the past 22 years.

Sister Ellen Grace Rice celebrates 50th anniversary

GEORGE D. SPINDLER, '40, professor emeritus of Stanford University in California, was honored last year by the Association for Anthropological Diplomacy and Third World Anthropologists "for significant contributions to anthropology as a professor, researcher, author, editor and administrator." George, son of the late Frank N. Spindler who taught many years at UW-SP until his death in 1935, joined Stanford's faculty in 1950. Since 1979, he and his wife, Dr. Louise Spindler have taught each fall semester in UW-Madison's department of educational policy studies. Together, they have been authors or editors of more than 200 books on cultures of the world and on cultural factors influencing success of American minorities in schools. UW-SP named George Spindler a "distinguished alumnus" in 1973.

'30s

DONALD UNFERTH, '36, has retired with his wife, Vera, to 308 Cambay St., North Port, Fla. He was the captain of the undefeated champion basketball team of the 1935-36 season and was the first Central State Teacher's College athlete inducted into the Pointer Hall of Fame in 1969.

JOSEPH W. SZYMANSKI, '36, has been named one of "Wisconsin's Ten Most Admired Senior Citizens" for 1985. He is a former postmaster and village clerk of Marathon. He has served as chairman of the "Marathon Fun Days" for 25 years, works regularly for the elderly nutrition site and organizes Veterans Day programs and the Memorial Day parade.

'20s

Sister ELLEN GRACE RICE, O.P., '29, observed her 50th anniversary in religious life on Aug. 4. She is a member of the Sisters of Saint Dominic of Racine. She currently serves St. Mary's Church and School in Tomah as a librarian, C.C.D. teacher and sacristan. Tomah is her hometown. One of her special interests is reading stories to small children. Remembering her student days in Stevens Point, she said she enjoyed staying in Nelson Hall and in having "such excellent teachers like May Roach, Mr. Steiner, Mr. Watson, Eva Seen, Bertha Hussey, Mr. Delzell, Leaha Diehl—to mention a few."

THERESABELL (WELCH) LEARY, '24, is retired, living with her husband, John (Mose) at 1933 Elk St., Stevens Point. She was employed from 1933 to 1971 (the last four years on a part-time basis) by the "Stevens Point Journal." She held the title of society editor for many years.

'10s

ELSIE (KRUEGER) GOMPPER, '14, celebrated her 92nd birthday last November. She has retired from teaching and holds membership in the South Milwaukee Women's Club, the P.E.O. Sisterhood and the Eastern Star. Her address is 905 Michigan Ave., South Milwaukee.

Members of the 1935 graduating class at the 50th reunion last summer were Asher Shorey, James McGinley, Guy Krumm, Nolan Gregory, Bonita Stien, Frank Klement, Orville Halverson, Edna Richards, Eino Tutt, Arvie Gordon, Lyman Scriber, W. G. Marsh and Robert McDonald.

Weddings of Alumni announced

JULIE ANN TRITZ, '85, to Todd Donald Fox. He is employed by Consolidated Papers. They are living at 511 21st Ave. S., Wisconsin Rapids.

BETH ANN LUND, '85, to DONALD BRUCE CISEWSKI, '84. He works at Equitable Financial Services in Wausau. The couple lives at 833 Second St., Stevens Point.

Deaths of 39 alumni reported

DAVID BRANDT, '83, a star football player for the Pointers, died March 11 of injuries received when he was hit by a car while walking in Fort Lauderdale, Fla., where he was vacationing. He was 23. The funeral was held at St. John Catholic Church in his native Antigo. Burial was in Queen of Peace Cemetery there. After playing on the state championship high school football team at Antigo in 1977, he

David Brandt

joined the Pointers and earned all-conference designation in the Wisconsin State University league. He was employed at Sentry Insurance in Stevens Point after graduation. His parents, Mr. and Mrs. John Brandt of Antigo, a sister and five brothers survive.

MICHAEL J. SCHMIDT, '75, died April 17 at his home in Madison of a brain tumor at age 31. He was originally from Watertown and had made a career in service to handicapped adults. In Minneapolis, he did job counseling for them and in Madison, since 1983, he was involved in planning living arrangements for them. Besides his parents, Mr. and Mrs. Gerhard Schmidt of Watertown, he is survived by his wife, Janet Halvorsen, and a son. Services were held at the Schroeder Funeral Home in Madison. The body was cremated.

RICHARD OSTBY, '72, account executive in mass merchandising and vice president of Sentry Insurance's Parker Stevens Agency, died of cancer May 28 in the Stevens Point hospital. He was 41. His funeral was held at St. Stanislaus Catholic Church in Stevens Point and burial was in Mt. Olivet Cemetery in Janesville. Mr. Ostby's wife, the former Carol Lappen, whom he married in 1966, a son and a daughter are the closest survivors. A memorial in Mr. Ostby's name was established for the Stevens Point Youth Baseball Association for which he was a coach and board member.

CAROL DIX KAETTERHENRY, '71, who had been an elementary school teacher in the Pittsville School System for 25 years, died July 9 in a traffic accident. She was 45. Her funeral was held in the Evangelical Free Church in Pittsville where she served as a deaconess. Burial was in Restlawn Memorial Park, Wisconsin Rapids. Her husband, two sons and her parents, Mr. and Mrs. Kenneth Dix of Marshfield, are her closest survivors.

KEITH GARDNER, '67, died April 28 in a San Francisco hospital at the age of 39. He had been ill a year. Affiliated with the University of San Francisco since 1976, he was a director of a training program for executive boards, directors and others involved in rehabilitation centers. He also held the academic rank of associate professor of rehabilitation administration and was previously on the faculty of the University of Hawaii's department of educational psychology. Gardner was a native of Neillsville and was married to Suzanne Munro, who with his parents and two brothers are the closest survivors. A memorial service was held at the First Unitarian Church Chapel in San Francisco. The body was cremated and a memorial fund was established for the American Cancer Society.

DENNIS JAECKS, '65, died Jan. 20 of a heart attack in Janesville, where he had been living. He was 45. Services were held at Schneider Funeral Home and burial was in Oak Hill Cemetery, Janesville. Mr. Jaecks was a native of Wausau, a veteran of the U.S. Air Force and employed as an electrical engineer by the Accudyme Corp. of Janesville. He had hobbies related to use of computers and experimental aircraft. His mother, Loretta Slattery of Wisconsin Rapids, a son and a daughter are his closest survivors.

EVA ADAMS ATKINS, '61, died March 29 in the Stevens Point hospital at the age of 79. She had lived in Almond much of her life. Her funeral was held at St. John's Lutheran Church in Almond and burial was in the Almond Village Cemetery. Mrs. Atkins was a longtime teacher who had assignments in Waupaca County and later in Waupaca and Marshfield. A native of Portage County, she was the widow of John Atkins who died in 1975. Her closest survivors are two daughters and two sons, 20 grandchildren and 14 great-grandchildren.

DONALD ZELHUBER, '60, died May 9 while fishing off a beach in Sitka, Alaska, at the age of 53. He had been living in Sitka since 1983 when he retired after being a teacher in Kodiak 14 years. Funeral services were at St. Gregory Catholic Church in Sitka.

RUBY ARNDT JONES, '60, Appleton, a retired teacher, died May 20 at age 64. Her funeral was held at Mt. Olive Lutheran Church and burial was in Highland Memorial

Park. Mrs. Jones, a native of Bradley in Lincoln County, taught in Tripoli, Merrill and Rhinelander and moved to Appleton after her retirement. Her husband, to whom she had been married 41 years, a daughter and two grandchildren are her closest survivors.

SYLVIA WESTFAHL TIMM, '59, Rt. 1, Bowler, died Feb. 21 in an Appleton hospital at age 64. The funeral was held at the Lutheran Church of the Wilderness in Bowler and burial was in the Almond Cemetery. She retired in 1984 after 44 years as an elementary teacher, nearly all of that time in Bowler. Her mother, Mrs. Estella Westfahl, her husband, Norman Timm to whom she was married in 1947 in Tigerton, and a son are her closest survivors.

HAZEL MEANS, '56, of Schofield, died Dec. 5 in a nursing home at age 82. Her funeral was at St. Peter's Lutheran Church in Schofield and burial was in Pine Grove Cemetery in Wausau. She was a Schofield native who taught second grade in her hometown for 46½ years. Miss Means' only survivor is a brother.

BEVERLY RUEGG WAGNER, '55, who operated the Bread Box Bakery in Ephraim with her husband the past 16 years, died Jan. 26 in a Green Bay hospital. She was 52. A memorial service was conducted at Calvary United Methodist Church in Egg Harbor. Mrs. Wagner was born in Hartford, grew up in West Bend, and was formerly employed as a home economist for Wisconsin Electric Power Co. in Whitewater for 11 years. Her husband, Russell, and two daughters are her closest survivors.

GLENN CHAFFEE, '54, retired Polk County conservation warden, died March 11 at his home on Antler Lake, near Luck, at age 53. The funeral was at Luck Lutheran Church and burial was in the Luck Village Cemetery. Mr. Chaffee, who was born in Adams County, was a conservation aide and a forester for a short time before becoming a conservation warden for the Wisconsin Department of Natural Resources in 1956. He retired in 1984. His wife, Joan, two daughters and parents, Hallie and Laura Chaffee of Arkdale, are his closest survivors.

BENJAMIN M. JENSEN, '53, died March 22 in an Oconto Falls hospital at age 80. He had been an elementary teacher in several Wisconsin communities for 25 years and also had been a farmer before retiring and moving to Oconto Falls. He was born near Gillett and was married in 1924 to Marie Belott in Antigo. His wife, two sons, three daughters, 16 grandchildren and 22 great-grandchildren are among the survivors. His funeral was held at Grace Lutheran Church and burial was in Woodlawn Cemetery, both in Oconto Falls.

JOHN FOCHS, '52, retired superintendent of the Wauwatosa Public School System, died of cancer April 27 at his home in Wauwatosa at age 68. He had taught in Mosinee and Sheboygan before joining the Wauwatosa faculty. He served four years as assistant superintendent for instruction before being named to the top job in 1964. He retired in 1980. Mr. Fochs, who received a master's degree from UW-Milwaukee, was a veteran of the U.S. Army with the rank of captain and a former lieutenant governor of the Kiwanis International-Wisconsin/Upper Michigan District. His wife, Virginia, and two daughters are his closest survivors. His funeral was at St. Paul's Catholic Church in Mosinee and burial was in the parish cemetery.

PHILIP D. ENGLISH, '49, of Merrill, died July 5.

WALTER FRANKE, '48, a retired Wausau teacher and school administrator, died of a heart attack March 14 in Hilo, Hawaii, where he and his wife were vacationing. He was 69. The funeral was held at St. Michael's Catholic Church and entombment was in Memorial Chapel Mausoleum, both in Wausau. Mr. Franke, who was born in Marathon, held a master's degree from UW-Madison, and was with the Wausau School System for 35 years as vice principal of Franklin Elementary School and principal of Rib Mountain and Grant Elementary schools. His wife, the former Gertrude Crowell, a daughter and two grandchildren are his closest survivors.

ELDOR MOEDE, '38, retired superintendent of the Oconto Falls School System, died March 4 in a Green Bay hospital at age 81. His funeral was held at the Oconto Falls United Methodist Church and burial was at Woodlawn Cemetery in Shawano. Mr. Moede was a native of Shawano County and earned a master's degree from UW-Madison. He began his career as principal of the Eland State Graded School and later taught at Cecil and Wittenberg High and was principal of Bowler and Sevastopol Highs. His wife, the former Myrtle James whom he married in 1928, a son, two daughters, and nine grandchildren survive.

THOMAS STERLING LINDOW, '37, retired superintendent of the Gillett School System, died April 7 at his home in Gillett at age 71. His funeral was at the Tabor United Methodist Church in Gillett and burial was in Little Wolf Cemetery in Manawa. Mr. Lindow, a native of Marion, held a master's degree from UW-Madison and served his entire career in education at Gillett, 38 years, until retiring in 1975. His wife, the former Jane Lindsay, died five weeks before her husband. Three daughters and eight grandchildren are the closest survivors.

JEFFREY PAUL DALLMANN, '80, to Sharon Mary Hallet. He is employed in oilfield construction near Kenai, Alaska.

TRUDI ANN FRAUTSCHI, '80, to Gary Richard Harter. He is a captain in the U.S. Army stationed at Fort McClellan, Ala.

JAMES SCHMID, '79, to Jodeen Robson. She is employed by Quality Control, VPI, Sheboygan. He earned his master's degree in 1981 from the University of Minnesota. He is employed as the fertilization manager for Sheboygan Falls Co-op. The couple resides at 423 Prospect Ave., Sheboygan Falls.

ERNEST FLATOFF, '79, to Janice Hagan. She is a graduate of the University of Minnesota and is employed as a customer service representative for Joerns Healthcare. He is a television broadcast technician for the state. Their address is 1372 N. Second Dr., Stevens Point.

GREG AIKEN, '79, to Kay Swenson. She graduated from the University of Texas at Galveston and is a physical therapist at Mercy Medical Center in Oshkosh. He received his master's degree from the Institute of Paper Chemistry in Appleton and is now pursuing his Ph.D. there. The couple lives in Oshkosh.

KAREN ANN STEVENS, '79, to Richard Ripple. She is a home economics teacher at Pius XI High School in Milwaukee. He is a graduate of UW-Milwaukee and a programmer analyst at Wisconsin Bell. The couple resides in Milwaukee.

MARY L. GATSKE, '79, to Merlin A. Skinner, Jr. They make their home in Wausau.

JAMES ALFRED SCHMID, '79, to Jodeen Rene Robson. He is fertilizer plant manager at Sheboygan Falls Co-op. She is a quality control technician at Vinyl Plastics, Inc. They are residing at 423 Prospect Ave., Sheboygan Falls.

PAUL WAWAK, '78, and **SUSAN LUEDERS**, '78, were married Aug. 10 in Barrington, Ill., at the home of the groom's parents. Paul, who uses the name of Paul Gilbert as news director of radio stations WKRS and WXLC in Waukegan, Ill., commutes from Mequon where the couple now resides. Susan is a regional training manager for Popeyes Famous Fried Chick and Biscuits in Rosemont, Ill.

DANIEL PATRICK LYNCH, '78, to Lori Ann Paul. He is employed as a manager with Ron & Lloyd's Red Owl of Neenah. She works at Appleton Papers, Inc.

MARY MARGARET KELLY, '78, to Robert Thomas Paul. She is employed as costumer service supervisor for Norstan Communications. He is a lieutenant with the Milwaukee Fire Department.

TODD DRYER, '78, to Ann L. Balch. He is employed with the U.S. Postal Service. She works at New Horizons of Ashland.

DANIEL PATRICK LYNCH, '78, to Lori Ann Paul. He is employed as a manager with Ron & Lloyd's Red Owl of Neenah. She works at Appleton Papers, Inc.

MILDRED PRIEBE, '77, to Terry Janisch. She is a speech/language clinician with CESA 2 in Janesville and he is a sheetmetal worker with Wisconsin Ovens in East Troy. The couple lives at 1611 Morningside, Janesville.

PAMELA SUE BALLEW, '77, to Dale Benz. She is employed in the recreation and health department at the Wisconsin School for the Visually Handicapped in

Janesville. He is employed by Wisconsin Power and Light Co., Beloit. The couple resides in Janesville.

TOM BREWER, '77, to **NANCY (WOOD) BREWER**, '78. She is a first grade teacher for Clintonville Public Schools and he is a project engineer for the Chicago Northwestern Railroad. Their address is Rt. 4, Box 1066, Clintonville.

DENNIS D. SCHMITT, '77, to Brenda D. Phipps. He is a research biologist with the Georgia Department of Natural Resources. She is a first grade teacher in Savannah. They reside at 1201 King George Blvd. Apt. 30, Savannah, Ga.

MATTHEW KRAMAR, '76, to **NANCY OLSEN**, '74. She is a program instructor for Portland Residence, Inc., Minneapolis. He is employed by the Wilder Foundation in St. Paul. The couple lives in Minneapolis.

ELLEN GRAF, '76, to Charles Reiter. She is employed as a claims supervisor at Milwaukee Insurance Co. He is a graduate of Marquette University and is employed at the Jack Nelsen Insurance Agency.

MARGARET HASTREITER, '76, to Steven Diesso. She is employed in retail management. He is a computer program consultant. Their address is P.O. Box 356 Woodland Rd., Mahopac, N.Y.

REBECCA ANNE SLEGER, '76, to **MARTIN MAX PAPKE**, '76. She is a biologist for the DNR. He is a licensed Wisconsin fishing guide. They live in Woodruff.

JEFFREY GELLERMAN, '75, to Margaret Botwinski. She is employed by Nekoosa Papers, Inc. and he is employed by Wood County Bank and Trust. The couple lives in Wisconsin Rapids.

PATRICIA WROBLEWSKI, '75, to Paul Otto. She received a master's degree from UW-Stout in Menomonie and is director/psychotherapist at Riverdale Marriage and Family Clinic in Wisconsin Rapids. He is assistant golf professional at the Stevens

Point Country Club and attends UW-SP. The couple resides in Port Edwards.

MARY LANDGREN, '75, to Dennis Knudson. She is employed as a teacher by the Beloit Public Schools. He is employed by the Beloit Corporation in Beloit. The couple resides in Evansville.

RUTH ANN PETHAN, '75, to Donald Stieh. She is a dietitian for Rutgers University Division of Dining Services of New Brunswick, N.J. He is an attorney in private practice. They live in Lebanon, N.J.

RICHARD ALLEN WANTA, '75, to Mary Jane Van Sistine. They reside in Pardeeville.

GREGORY JAMES HESS, '74, to Alice Yvonne Romans. They are both employed at Kimberly-Clark Corp. of Neenah. He works in analytical chemistry, and she in product development.

PATRICK WALTER HERZOG, '73, to Gertrude LaCombe. The couple lives at 1005 Reed St., Green Bay.

GERALD C. KRUEGER, '73, to Barbara L. Barth. He is park and program director for the Stevens Point Recreation Department. She is a teacher in the Stevens Point School District.

MARY SCHULTZ, '73, to Sander Minkow. She is a graduate of the San Diego College of Business and he is a graduate of the Detroit Institute of Technology and Wayne State Law School of Michigan. The couple resides in North Palm Beach, Fla.

MICHAEL ESCHENBAUCH, '72, to Joan Spoerl. She is a graduate of UW-Oshkosh and is a teacher for the Wausau Public Schools. He is financial manager at Marian Plywood Corp. The couple resides in Wausau.

GARY LASCH, '67, to Ellen Krueger. He teaches at Pulaski High School where she is a secretary.

DUANE KREIE, '60, to Nancy Hayes. She was a secretary for Cap Services, Inc., Stevens Point and he is a salesman for Coffaro and Matakis Co., Inc., a food brokerage firm in Brookfield.

In memoriam

STRAUTHER SPENCER, '35, died June 20 in a Madison hospital at age 89. He had been living in Madison since retiring after a 20-year career as an agent for the Mutual Trust Insurance Company. Services were held at the Duvahl-Jacob Funeral Home in Iron River, Mich., and burial was in the public cemetery in Alvin, Wis. Mr. Spencer, a native of Kentucky who grew up in Nelma, Wis., taught there and in Crandon after college graduation. He and his wife, the former Ethel Knott of Elmwood, had been wed for nearly 68 years. She survives along with three children, 12 grandchildren and five great-grandchildren.

CHESTER J. NETZEL, '33, died May 18 in the Stevens Point hospital at age 72. He had been retired since 1975 after serving 28 years as maintenance foreman for Gross Common Carrier in Stevens Point. A native of Chicago, he taught in Portage County Schools and later worked from 1943 to 1945 with crews that built the Alcan Highway through Canada and Alaska. His wife, the former Lucille Kirschling whom he married in 1934, one daughter, one son and six grandchildren are the closest survivors. The funeral was held at St. Stanislaus Church and burial was in the Guardian Angel Cemetery, both in Stevens Point.

FLORENCE BEAUDIN CARTMILL, '33, died Jan. 25 at the Portage County Home in Stevens Point where she had lived for nearly seven years. Services were held at the Boston Funeral Home and burial was in Forest Cemetery, both in Stevens Point. Her only survivor is a brother. Mrs. Cartmill was born in Chippewa County and grew up there and in Waupun. She had been a teacher in several different communities from 1922 to 1961, including the Stevens Point area. After the death of her husband, Forrest, in 1967, she moved from Stevens Point to Racine and returned here in 1975.

EDNA HOTVEDT SKOWEN, '31, of Stevens Point, died June 13 in a Winston-Salem, N.C. hospital at the age of 76. Her funeral was at Trinity Lutheran Church in Stevens Point and burial was in Restlawn Memorial Park near Wisconsin Rapids. She was a native of the Town of New Hope and the widow of Harmon Skowen who died in 1981. She had been an elementary teacher many years in rural schools of Portage County and of city schools in Stevens Point. Two daughters, eight grandchildren and six great-grandchildren are her closest survivors.

DAVIS C. SMITH, '25, a retired West Chicago businessman, died May 13 in the Marshfield hospital after suffering a heart attack. He was 81. Services were held at the Rembs/Kundinger Funeral Chapel in Marshfield and burial was in Forest Hill Cemetery, Glen Ellyn, Ill. Mr. Smith, a native of Granton, operated his own insurance agency in West Chicago many years and was a former president of the Kiwanis Club of Glen Ellyn. After his retirement in 1966, he spent winters in Clearwater, Fla. and summers in Eagle River. His first wife, the former Vivian MacDonald, died in 1976. He married Norma Stoiber in 1981 and had lived in Marshfield since that time. Mrs. Norma Smith and two daughters are his closest survivors.

LEONARD SHANKLIN, '23, retired executive secretary of the Janesville Board of Realtors, died May 11 at age 85 in his home in Janesville. Services were held at the Overton Funeral Home in Janesville and burial was in Greenwood Cemetery in Amherst. During a varied career, he taught in Escanaba, Mich., supervised instrumental music for schools in Ocean County, N.J., managed a business, was a furrier and, from 1946 to 1976, was in real estate. His only survivor is a sister.

WALTER SMITH SR., '23, Rt. 1, Birnamwood, died May 13 at the Antigo Hospital at age 84. His funeral was at Holy Family Catholic Church in Mattoon and burial was in the church cemetery. Mr. Smith, who was born in Shawano County, had a teaching career from 1923 to 1966 in the Antigo, Mattoon and Bowler school districts. He also operated a dairy farm for many years. His wife, the former Mary Ann Forester, whom he married in 1928, a son and three grandchildren are his closest survivors.

JEANETTE GUSMAN BROWN, '23, of Stratford, died Dec. 6 in a Marshfield hospital at age 84. The funeral was held at Ebenezer United Church of Christ near Stratford and burial was in Hillside Cemetery in Marshfield. Mrs. Brown was born in the Town of Ringle and had lived in the Schofield and Wausau area as a young woman. She and Ezra Brown, a railroad station agent, were married in Antigo and had lived in Stratford since 1937. She was an artist who was active in exhibiting her painting in art and gallery shows. Her husband, three daughters, seven grandchildren and eight great-grandchildren are her closest survivors.

HAZEL WIRTH HOCKING, '23, died May 23 in an Oshkosh nursing home at the age of 86. During a 40-year teaching career, she was on high school faculties in Spooner, Iron Belt, Shullsburg, Palmyra, Mountain, Amberg, LaFarge, Peshtigo, Wausaukee, Crivitz and Oconto. English and history were her specialties. A native of Prairie Farm, she was the widow of Thomas Hocking

who died in 1983. A graveside service for Mrs. Hocking was held at the Eastside Cemetery in Dodgeville. A son and four grandchildren are her closest survivors.

GRACE HUNTZICKER, '22, of Denver, Colo., died Feb. 21 at the age of 88. A graveside service for her was held at Greenwood City Cemetery. Miss Huntziker, who was reared in Clark County, also was a graduate of the University of Colorado and was employed in San Francisco many years by the California State Medical Society. She moved to Denver after her retirement and traveled extensively in the Orient. A sister, a sister-in-law and five nieces and nephews are her closest survivors.

HATTIE ANDERSON, '22, died Feb. 25 in a Sister Bay nursing home at the age of 91. She had been a teacher and school administrator 48 years, most of the time at the Milwaukee Vocational School where she was a counselor and was responsible for developing the curriculum and hospital affiliations for an assistant nursing program. Early in her career, she taught in grade schools in Marinette and Door counties. She held a master's degree from Columbia University in New York City. Miss Anderson, a native of Juddville in Door County, had a sister and six nieces and eight nephews. Her funeral was at the St. Paul Lutheran Church in Fish Creek followed by burial in the church cemetery.

ELIZABETH KELLOGG BEALL, '22, of Mountain Rest, S. C., died March 20 at age 85.

FRANCIS HIGGINS, '20, of Sun City, Ariz., died in 1985.

GLADYS OLSEN HOOPER, '20, died Feb. 13 in a Waukesha nursing home at age 88. Services were held at the Doerschling Funeral Home and burial was in Zion Cemetery, both in Palmyra. Mrs. Hooper was born in Palmyra and taught kindergarten there before serving on the home economics faculty at UW-Milwaukee. Her husband, George Hooper, died in 1956. Her closest survivors are a son, two grandchildren and one great-grandchild.

ADELAIDE YOUNG REINERT, '16, died Jan. 11 in a Janesville nursing home at the age of 88. Her funeral was held at the Antigo Methodist Church where she was a longtime member and Sunday school teacher. Burial was in Elwood Cemetery in Antigo. Mrs. Reinert, who was born in Barron, taught high school many years in Mattoon, Eagle River and Rhinelander. Her husband, Arch, died in 1978. Three daughters, five grandchildren and one great-grandchild are among the survivors.

FRANCES vonNEUPERT BAEENROTH, '16, died Feb. 11 at a Waupaca nursing home at age 89. Her funeral was held at St. Stephen's Catholic Church in Stevens Point and burial was in the parish cemetery.

Mrs. Baeenroth, a native of Stevens Point, was the widow of Harold Baeenroth who died in 1952. The couple owned and operated a drug store in the Whiting Motor Hotel building until 1937. From 1956 to 1981, she lived in Independence, Iowa, and after that had been a resident of Waupaca. One son, three grandchildren and nine great-grandchildren are her survivors.

ANNE M. MAZANEC, '14, a teacher in the Two Rivers Public School System for 32 years, died June 12 in the Two Rivers hospital. She was 92. She had been living in a nearby nursing home. The funeral was at the St. Mary Home Chapel and burial was in Sacred Heart Cemetery in Shawano. Miss Mazanec was a native of Bessemer, Mich. She is survived by a brother and a sister.

Myrle Steiner

MYRLE YOUNG STEINER, '11, a booster of UW-SP for more than 75 years as either a student, alumna or member of Faculty Wives, died July 16 at a nursing home in Waupaca where she had lived several months. She was 94. Services were held at the Boston Funeral Home and burial was in Forest Cemetery, both in Stevens Point. A native of Stevens Point, she taught in schools at Appleton, Plainfield, Cashton, Bancroft and Junction City. The "Stevens Point Journal," in her obituary, described Mrs. Steiner as one of Stevens Point's most active club women. She had participated in numerous organizations on campus as a student and later was involved in the Order of the Eastern Star, Shrine Auxiliary, Junior and Senior Women's Clubs, Parent Teacher Association, Daughters of the American Revolution, Methodist Women, county and state historical and music organizations and UW-SP Faculty Wives. She also sang in choirs and quartets in the Baptist, Presbyterian, Episcopal and Methodist churches. She was the widow of Herbert Steiner, longtime UW-SP history professor and dean of men for whom a dormitory on campus is named.

MYRTLE ROWLAND JACKSON, '07, a longtime Neenah resident, died in a hospital there June 8, two weeks prior to her 98th birthday. She was born in Kellner and was married to Henry P. Jackson in 1914 after she had taught three years at Washington School in Neenah. Her husband died in 1967. Two daughters, one stepdaughter, eight grandchildren and nine great-grandchildren survive. Services were held at Westgor Funeral Home and burial was in Oak Hill Cemetery, both in Neenah.

Campus offices lend assistance to state tribes

UW-SP is one of Wisconsin's most important centers in service to American Indians.

The university has about 100 Indian students, one of the largest populations of its kind on a state college or university campus. Also, several offices are staffed with education specialists who provide a variety of assistance to tribal organizations.

The accompanying story about Dorothy Davids, UW-SP's first Indian graduate 40 years ago, gives a historical perspective to the programs now operated here for Indians.

The cover of this publication illustrates another dimension of UW-SP's Indian

involvement. The Oneida ceremonial costume made by Sheila Smith of Oneida, won first prize in the university's second annual invitational show of traditional Indian art in October.

The show, arranged by Professor David Wrona, a historian, is a visual reminder to people of the mission of service UW-SP has assumed in support of the state's tribes.

A permanent exhibit is in the process of being established with a variety of items UW-SP has begun to purchase from tribal artisans. The collection is being incorporated into the decor of the Albertson Learning Resources Center.

Today, UW-SP has a Native American Center which coordinates an associate degree program and weekend college primarily for tribal members but open to all nontraditional students. The center staff also recruits consultants and others to provide broad professional services to tribes.

The campus has another office dedicated to equal educational opportunity with which most Indian students are involved. Educators in this operation also conduct an Upward Bound program for teenage Indian youths who are high school students. There are activities on campus during the summer and in their

home communities during the school year. The Wisconsin Indian Resource Council has an office here, and its staff members often seek assistance from university personnel in arranging special programs they sponsor.

And, the College of Professional Studies operates a resident training and counseling program project for the U.S. Bureau of Indian Affairs. Employees of the Indian Housing Authority, who are concerned with helping tribes across the country improve the general quality of life among their people, attend training sessions put on by UW-SP in all sections of the nation.

She was a trailblazer for Indians at campus

When people scold Dorothy Davids that as an American Indian she must learn to live in a white man's world, she smiles and responds gingerly: "Even white women don't want to do that anymore."

Her comment helps her capture the attention of an audience. Then she offers encouragement for those who cannot view the world through eyes other than their own.

Unless people can see value in man-kinds' rich cultural mosaic, they cannot be liberated, she says.

Dorothy Davids

Miss Davids, a native of the Stockbridge Munsee Indian Reservation near Bowler, became the first member of her race to be graduated from UW-SP in 1945. This spring, she returned to her alma mater to be a speaker in the campus series of programs for Indian Awareness Week.

In an interview, she recalled her long career in education which ended in May when she retired from the faculty of UW Extension in Madison. Her responsibilities were centered largely on service projects for Wisconsin Indians.

Proud of her heritage and convinced the future never appeared brighter for Indians, she recalled that her attitude wasn't always so upbeat.

With a desire to be a teacher, she

enrolled at UW-SP in 1941 when the institution was known as Central State Teachers College. She had been the only one of her contemporaries from the reservation who finished a high school course the previous spring at Bowler High School.

At college, she would be alone again. "It wasn't an in-thing in those days to be an Indian." For the time, her 'Indian-ness' was "buried in my gut."

It was a time when the body politic thought everyone should be assimilated into the mainstream of society—when, if "we (Indians) were offended by what white people did or said, we were told, that's the way the world is so get used to it." By and large, her collegiate experience was positive, she recalls.

The dean of women, Elizabeth Pfiffner, whose surname became DeBot years later, was a stalwart friend and advocate. "She was so good to me, helpful and saw me as a real person."

At graduation time, exactly 40 years ago, the nation was nearing the end of World War II. The military effort had drained schools of personnel, and a serious teacher shortage was being experienced. Despite good credentials, Miss Davids was alone in her class receiving one rejection after another as she applied for classroom jobs.

Fourteen consecutive times, school districts turned back her applications until she struck success at St. Croix Falls. Her salary was several hundred dollars less than the amount given to other starting teachers (a differential of more than 12 percent in an annual wage of \$1,500). And a condition of employment was that people in the district "had to accept me." They did, she recalls, and when she left the superintendent gave her a favorable recommendation. "But I had to work for

it . . . I organized field trips and sports teams . . ." She served 41 fifth and sixth graders in one room.

The subtle and sometimes overt forms of discrimination she has experienced through her life all take a back seat to that period when she was continually rebuffed in attempts to join in the work force. The experience may have limited her career potential. Never again did she have the confidence to put in an application for a position. She was recruited to fill all of her jobs that were to follow.

Those invitations came from the Ashland School District where she "had two good years" and West Allis where she spent a dozen years and found satisfaction in what she labeled "self starting—self operating classes." Students joined her in some of the teaching and discipline responsibilities.

Though born in 1923, she says she didn't "really become an Indian" until 1961 when she and several members of her family attended a conference on the status of American Indians at the University of Chicago. Awakened to her heritage, she developed an enthusiasm that sparked more opportunities for her.

She spent a summer on the staff of the National Congress of American Indians in Washington, D.C.; began pursuing graduate study at different institutions across the country including the University of Chicago where she was awarded a John Hay Fellowship; and began being an active participant at workshops dealing with Indian affairs, human rights/development.

Meeting other Indians with similar concerns and interests spurred her on. "After all the years of alienation . . . of burying who I really was—all of this new activity put me back together."

Staff involvement at the American

Indian Center and with an anti-poverty Upward Bound program at Mundelein College, both in Chicago, preceded an invitation to join University of Wisconsin Extension in 1966. She has since worked in leadership development and human relations projects directly with American Indians in their own communities, with non-Indians who were trying to serve Indians, with Indians preparing to serve other Indians, and with non-Indians on non-Indian matters.

She has taken leaves of absence to assist at the Center for Justice, a YWCA-sponsored operation in New York City, and to make videotapes of American Indians and Eskimos. On the nation's 200th anniversary, she was north of the arctic circle recording the flag raising at an Alaskan Eskimo village.

Through it all, Miss Davids has learned that Indians are survivors. "Just look at history," she reminds people who wonder how well her people are faring in contemporary society. They have survived disease, relocations, attempts in religions and educational programs to bring them into the mainstream—"we've overcome the whole melting pot thing."

"We're stronger than ever, we're getting more skilled—we're here forever," she declares proudly.

Miss Davids is intending to move from Madison to her native Bowler area to pursue a retirement regimen of playing for bingo jackpots, attending powwows, participating in area peace movement activities, and doing historical research about her tribe.

And she will be giving a message, whenever possible to younger Indians. Says Miss Davids: "When you go into the world, take your whole self with you—take your roots and plant them in your new world."

Mani Boyd of Keshena was commissioned to make this traditional Menominee ceremonial drum for the permanent Indian art collection at UW-SP.

James Frechette of Rhinelander did this wood carving and painting to illustrate a legend of how the Menominee tribe began. This work won a top prize one year ago in the first traditional Indian art show on campus and has since been purchased for the school's permanent collection.
