**Point Defeated In Overtime Game**

In spite of the contrary hopes of C. S. T. C. "Grandpa Jinx," who came for an indefinite visit during the football season, decided to stay longer. Though he fussed over packing his suitcase, he was on the floor when the whistle blew for the River Falls game.

**Chemistry Lab Best In State**

What is without doubt one of the most modern, fully equipped chemistry departments anywhere in the state will be found at the Central State Teachers College, where four laboratories have just been completed in the basement section formerly occupied by the old heating plant. The rooms have been transformed with clean white walls, a gray cement floor and splendid lighting facilities and now comprise a department of eight completely modern laboratories and store rooms. An expenditure of $2,000 has been made in the construction, with the equipment and installation of furniture amounting to $5,500 additional.

Included in the department are a general inorganic laboratory, organic laboratory, analytical laboratory, balance room, general storage and stock room, an acid room for acids and organic chemicals and a small storage room for reagents.

The general stock room is a neat, well arranged place that would bring joy to the lover of law and order with its systematic shelving and storage facilities. Tall, all-steel cabinets have shelf upon shelf, with bins underneath for large and heavy articles. Test tubes in graduated sizes are near the door, and flasks and retorts are separated according to types and sizes. All compartments will be plainly labeled when the work of settling is fully completed. Other cabinets hold chemicals on the upper shelves, arranged alphabetically, with storage bins.

**Sigma Tau Delta Holds Meeting**

Sigma Tau Delta held its regular meeting on Wednesday, January seventh. Theodore Rozelle presented an interesting discussion on our relations with Asia; the discussion was based on a recent book by Upton Close. Dolores Childen read an original short story entitled "Awakening."
THE NEW OFFICES

With the tearing down of the POINTER and IRIS offices a certain chapter in the history of each organization comes to a close. Within these cardinals walls much time was spent, fruitful and otherwise, and many conferences held. The names and witticisms of many students and former students decorated the walls on the inside, giving each office an atmosphere of its own.

The new offices, however, are a decided advantage over the old. Instead of being fire hazards and superfluous, they are assets to the organizations. There is plenty of room, regulated heat, better lighting, ventilation, and other good points. It stands to reason that better work will be done.

TIME TO TAKE INVENTORY

The month of January is named after an old Roman god, Janus, who being possessed of two heads, could look ahead and backward at the same time. What an appropriate name for the first month of the year! The fellow who christened this month certainly had a keen sense of the fitness of that name.

It is at this time of the year that we look back over events of the past and look forward to the coming year with a hope that we may better our conditions and enjoy life, as we understand it, to a fuller extent.

In college, the student sees the end of the first semester rapidly approaching. If he is wise, he takes a survey of what he has, or has not, done to this time and makes preparations for successfully weathering the finals. The student who pays no heed to the passing time is generally the one who loses out at the end of the semester.

The new year is an excellent season for making resolutions. The only kind that is worthwhile, however, is that which is adhered to without exceptions. If you have not been accomplishing satisfactory results in your work, there is no better time of the year to buckle down to the job.

The rating and reputation of a college is determined to a certain extent by the standards maintained by the student body. Every student who does his part in holding the standards high is a credit to the institution.

Balance your accounts before it is too late. Survey the past. If the results show a credit, strive to better it for your own good and the advancement of Alma Mater. If you find yourself “in the red,” determine to wipe out the unfavorable showing before the forward view merges into the past.

SUPPORT THE TEAM

The basketball conference games opened last Friday with a narrow defeat, but that has not dimmed the hopes of Central State in the slightest. With the constant enthusiasm of the students, such as was in evidence at the last game, much will be done toward helping the team reach a place in the sun. The Pointers showed up very well against the championship team of River Falls. They are doing their part to win. The student body should be eager to show the team that its support is solid and active.

EDUCATION to accomplish the good ends of government should be universally diffused. Open the doors of the schoolhouse to all the children in the land. Let no man have the excuse of poverty for not educating his own offspring. Place the means of education within his reach and if he remains in ignorance, be it his own reproof.—Daniel Webster.

THE NEW YEARS’ RESOLUTIONS

Helen Berfield — No more breakfasts for me.
Ruby Curtis — I swear off nice men for ‘91.
Thyra Eyerson — I won’t “make eyes” any more when I’m dancing.
Art Schroeder — I’m not going to be so bashful in 1931. (Watch out, Coeds!!)
Al Ackeret — I’m going to make my hair behave from now on.
Pat Cowan — I’m going to learn to dance.
Kermit Prater — No more dances for me!
Lawrence Beaudin — I’m not going to rattle my keys in the library to attract attention.
Now, do you want to add Your Resolutions? If so, hand them in.

Dear Pat,
When hit by a mosquito, have not been accomplishing satisfactory results in your work, there is no better time of the year to buckle down to the job.

The rating and reputation of a college is determined to a certain extent by the standards maintained by the student body. Every student who does his part in holding the standards high is a credit to the institution.

Balance your accounts before it is too late. Survey the past. If the results show a credit, strive to better it for your own good and the advancement of Alma Mater. If you find yourself “in the red,” determine to wipe out the unfavorable showing before the forward view merges into the past.

SUPPORT THE TEAM

The basketball conference games opened last Friday with a narrow defeat, but that has not dimmed the hopes of Central State in the slightest. With the constant enthusiasm support of the students, such as was in evidence at the last game, much will be done toward helping the team reach a place in the sun. The Pointers showed up very well against the championship team of River Falls. They are doing their part to win. The student body should be eager to show the team that its support is solid and active.

EDUCATION to accomplish the good ends of government should be universally diffused. Open the doors of the schoolhouse to all the children in the land. Let no man have the excuse of poverty for not educating his own offspring. Place the means of education within his reach and if he remains in ignorance, be it his own reproof.—Daniel Webster.
Kennedy-Terrill Wedding Announced

Mrs. Blanche Terrill announces the marriage of her daughter, Josephine, to Robert Kennedy. The ceremony took place in Chicago, August 18. Both are popular students at C. S. T. C.

Margaret Ashmun

The Margaret Ashmun Club held its regular meeting last evening under the sponsorship of Miss Hanna. The features of the program were as follows:

Discussion of Contemporary Short Story—Miss Aileen MaGeorge, Burton Hotvedt, Upa Stillert, Irene Twetan, Ann Baird, Murilla Roberts, Harry Klapp, Alex Peterson, Clifford Alberts, Fred Hebal, Victor Vrobel, and Esther Hawkes must have their pictures taken for the Iris on or before January 15th.

Home Eco Contribute To Fund For Poor

The Home Economics Club contributed $10.00 to the Odd Fellows Association of Stevens Point to be given to the fund for the poor, for Christmas. The members of the Club agreed to do this instead of exchanging Christmas gifts as has always been the custom. The money was one of the largest amounts handed in to the Odd Fellows Association.

Lo Everybody:

It seems that most of us have acquired an extra supply of energy over the holidays, and nature seems to find some use for it. Ice skating again holds sway over the outdoor sports and has claimed our fair coeds. The girls are so enthused that any morning some of them can be seen leaving the dorm in the wee hours of 5 or 6; neither stiffness nor aches and pains seem to stop any of the skaters from trying it a second time.

Although the weather is not especially fitted to hiking, some of the girls braved the cold last Saturday morning at 5:00 o'clock. Margaret Allman and Inez Brown hiked toward Red Bridge and returned in time for breakfast with healthy appetites.

Vivian Enge, who did not return to Stevens Point after the holidays, underwent an operation last Tuesday morning. We hope that she will be with us soon again.

Marjorie Moberg suffered a slight illness at her home last Friday.

Several members of our family are leaving us at the end of the semester. Helen Jordan and Vera Sargent are graduating, and Miss Martha Lockhardt is leaving to take a position at Norway, Mich. She will return for the summer session with a friend of hers who is now teaching at Norway.

Miss Elfia Miller of Westfield is planning a trip to Florida with her brother. They will travel by airplane.

During the holidays, Miss Husey conversed with some of the Miller sisters, who once attended the Teachers' College, and consequently learned about their whereabouts. Miss Florence Miller is a teacher of Mathematics in a Junior

Coach Kotal Guest At Fraternity Dinner

Wednesday evening, Dec. 16, 1930 Coach Kotal was the guest of honor at a banquet at the Hotel Whiting sponsored by the Phi Lambda Phi Fraternity. Other guests at the banquet were Professors Schmeeke, E. J. Watson and Rightsell, who constitute the athletic committee of Central State Teachers' College. Enjoyable talks by the guests of honor added to the success of the banquet.

Miss Hanson Returns To Duties In J. H. F.

Miss Hanson, Junior High School critic, who had been ill for some weeks before Christmas Vacation, returned to her duties here when school opened after the holidays.

Notice!

All class officers: Dell Kjer, Bob Breitenstein, Peter Petersen, Burton Hotvedt, Orva Stillert, Irene Twetan, Ann Baird, Murilla Roberts, Harry Klapp, Alex Peterson, Clifford Alberts, Fred Hebal, Victor Vrobel, and Esther Hawkes must have their pictures taken for the Iris on or before January 15th.

Welcome Students!

The one thing that is talked about more than anything else just now is skating; and well it may be, with a dandy skating rink just a few blocks distant, and weather that Saturday practiced and ordered as skiing. Many girls have taken advantage of the opportunity, and laugh over bumps and bruises. Several have been on skates for the first time, and give free vaudeville acts. The skating rink is a real attraction, even at 5:30 A.M., and here hope it may prove so to even more than it already has.

Have you been in the new game room? You have probably wondered what has been going on in that used to be the farther locker room. Now it is open to all the girls, and we urge you to spend a few odd minutes every now and then over Ping-Pong, or throwing darts. Read the rules of the games on the bulletin board, and in dart-throwing take a record sheet and keep track of your score. You may improve next time. This room is for every one of you to use, but not abuse, so let's take advantage of it.

Last Friday the W. A. A. girls went in a body to the game. We want to make this a custom, each time going in a group, and help the team work for victory by a good display of our spirit.

Our next meeting is the fourth Wednesday in January, the 28th. Wonder what Jennie Newcom is planning for us.

Basket ball practice is going on full force now on every Tuesday and Thursday after school, and Saturday morning at 9 o'clock. Remember the rule that you must be out to two practices a week to take part in the tournament games. Hand in excuses for absences to the head of basketball or W. A. A. president. Just as a gentle reminder — don't forget to try the ice.

Bob — “What lovely flowers! Do you know that they remind me of you?”

Helen — “But they are artificial.”

Bob — “Yes, I know, but it requires close examination to detect it.”

**WHOSE ZOO?**

Dick Rothman is one of those beards who chase ducks into the water, and then won't let them swim. He is going to marry soon. The first honeymoon will be spent on the seashore; the second on the rocks.

Dick is a very intelligent boy in spite of the fact that he goes to college. He knows that snow shoes are not used for bedroom slippers in Alaska.

Some one asked Dick's girl if she had a hobby. No she answered, “I am single.”

Dick changed his mind about going to the dental school, said he didn't have enough pull.

**CHEMISTRY LAB BEST IN STATE**

(Continued from page 1, col. 2.) below. All porcelain ware is in one section, including casseroles, evaporating dishes, mortars and pestles, etc. Just outside this room are a continuation of chemicals, with bins for the storage of copper and iron ware. A work table and a sink completes the equipment of the room.

A light, airy workroom is found in the general inorganic labora- torium. Many of the long desks supply accommodations for 34 at a time, with total room for 68 students. Each student is served with water, suction, gas, electric ity, and an iron sulphide and a ventilating hood connected with a fan. Large fans force fresh air into the room, and the individual exhaust hood, on each desk moves the impure air, making the “lab” a less odorous place to work. Other modern details are stone ware waste receivers with rubber stoppers to drain out liquids for each desk and a sink with hot and cold wa ter and a drainboard at the end of each long table. Steel shelv ing for reagents is found in each laboratory, with rubber matting to protect the shelves and lessen noise. A large hood served with gas, water, and electricity, has remote controls for water and gas that can be regulated from outside, and is well lighted so the embryonic chemist can see every detail of his experiment. A large table is equipped for work with glass, and is served with air and gas.

A small store room to serve this general laboratory opens from the large room, equipped with steel tank for hydrogen sulphide which is passed through a gasometer into service pipes for use in the “lab.”

Another pleasant workroom is the organic laboratory. Two long tables accommodating 12 at a time, or 24 in all. The tables are served with water, gas, air, steam and electricity, and have waste receptacles and sinks with hot and cold water. The “lab” has a large double hood served with gas, water, steam and electricity, with remote control and lights. The desks have drawers extending the entire width of the table for keeping long tubing, condensers and burettes. Special interest are the two tables top, which are made of al berine stone treated with a mixture of paraffin, gasoline, with a rubber coating the stone and giving a pleasing appearance to the surface.

From this room, steps lead to a small room, formerly the old ash room. No suggestion of ashes can be found now in the clean, well kept storage room used for acids and volatile chemicals. It is served with air for siphoning off acids and even has a sink with hot and cold water.

The third large laboratory is for analytical or quantitative chemistry. It is served the same as the organic “lab,” with the exception of the steam for the individual work desks. An open hood has a steam bath, electricity, gas, water and hydrogen sulphide. It has a metal top with porcelain rings with four coils, as many of which can be used as desired.

The floors of all the laboratories have been raised to a wooden flooring, with a space between for piping. If anything goes wrong, the repairing will be a simple matter as the pipes will be easily accessible. The tables, the “labs” are raised two and one-half inches from the floor level, and have been built especially for the college. Another example of careful construction is the fact that all the “labs” are fireproof and are separated from the hall by steel doors.

The balustrade in the room where exactness and accuracy must be obtained is equipped with adjustable side lights over balance tables that extend the full length of two sides. Nine sets of balances, inextinct and delicate are owned by the department.

The dark room lives up to its name, for no darker place can be imagined. Of course, it can be well lighted, also, when the occasion demands. It is served with hot and cold water, electricity and gas, and has a steel cabinet with a Yale lock and a master key. This room is used for the developing and experimental work in chemistry and physics requiring a dark room.

The lecture rooms and offices of the department are on the first floor, with two lecture rooms separated by a preparation room between. A lecture table and sliding blackboard are convenient for the teaching of the new way to save paper. The chemistry instructors are Thomas A. Rogers, who has the students in the Home Economics courses, and Dr. Dell S. Garby, who teaches the organic and inorganic courses. The students enrolled in the high school department. They are justly proud of their domain, and take pleasure in showing their rooms to visitors. If under their supervision are more than 60 students, and an even larger enrollment is expected next semester, for here one can take four straight years of chemistry, with all the advantages of the best equipment and best instruction.

**MISS DIEHL III UNABLE TO RETURN**

Miss Diehl III has not been able to return to return to school after the holidays because of illness. Miss Diehl is a critic in the Intermediate Department of the Training School.

**THE MORNING AFTER**

Jack — “How did you find yourself this morning?”

Oscar — “Oh, I just looked under the table and there I was.”

**TALK ABOUT SCOTCH!**

Jack Frost has been making use of a new way to save paper. First he uses pencil and then turns the paper sideways and writes with pen.
sang a bellhop, sticking his head in the partially opened door.

Mr. Hyer returned in a few minutes. He seemed very excited. (Does Mr. Hyer ever seem excited?)

"In my car! Quick! We have to leave $5,000 in locker 225 immediately, or we shall never see Honey Suckle again. She was out walking with Ted Halthusen. THE WOLF kidnapped her because Ted could get his hands on her pockets. They knocked him out. Then THE WOLF was brazen enough to send that call to me!"

"leave $5,000 in the locker.

"Did you trace the call?"

"Yes. The central said it came from my office at school. Hurry!"

Ten minutes, and the three men were standing in front of locker 225 in the college proper. Mr. Hyer was opening the new lock. Watson stood on one side smiling up his sleeve which had a hole in the elbow) at his own ingenuity, (acquired at the Plover detective school.) In his hand he held a bundle of paper money. Upon closer scrutiny, one could see that the bills were marked with indelible ink.

"That!" This wouldn't strike you as such a dull sound if you knew what it was all about. This was the noise made by the body of Votka, formerly known as Grischa, as it struck the floor. It fell out of the locker as President Hyer opened the door.

"It is Grischa! Votka!" explained Mr. Rightsell.

"Yes. It WAS Votka," said Watkins. (Aside.) "$4,000; now I can buy those new shoes for Watson.

"We shall have John clean up this mess in the morning," said Mr. Hyer, like the gentleman in the customary "Murad" advertisements, "Let's put that money in here and leave. Watson. My wife will be angry if I don't call to take her home from that bridge party."

"Gee, I left Sweetums (the infernal pup) in Boris' room. What will MY wife say?"

(What would you say if you heard that the money-marking trick was discovered by THE WOLF? It's true. Will you read next week about how Honey's body went "thud" as it hit the floor?)

HURRAY FOR THE OLD TIMES!

In Ye Good Old Days, every petting party turned out to be a tale of whom.

Little boy, who is lost (to policeman) — "Have you seen a lady with a little boy any place? I am the little boy." — Life.
Nelson Hall Notes

(Continued from page 3, col. 3.)

high school in Akron, Ohio. Her sister, Myrna, teaching biology at Stout. Another sister, Alice Miller, is teaching for the sixth grade at Madison. She is married to a dentist of that city.

Miss Hussey also received news of the Morgan sisters from Miss Florence Morgan. Mable is staying at Amherst; Una, a graduate of the High School Dept., is married three years and has a little girl who is one year old. Hatie teaches at Racine; Gertrude teaches at a settlement at Mountain Hill, Kentucky; Grace teaches at Michigan City, Indiana. This is quite a record for "sisters" don't you think? Do you know of any who could beat the above group?

The change of environment evidently didn't agree with some of the Nelson Hall Family. Mildred Lonsdorf is now recovering from an infection. Irene Miller has just recovered from an attack of bronchitis, and Beatie Dewar has been having trouble with her eyes. Miss Hussey is recovering from illness also. The Family hopes that they will be well soon.

Some of the girls who have left the "flock" at Nelson Hall sometimes return again to its corridors. Miss Hazel Schroeder, "Jo sister", visited here this week-end. Everyone saw to it that she received a royal welcome.

Miss Emma Larson was a guest of her sister, Helen, this week-end. Emma is a teacher of the primary grades at Berlin.

Miss Esther Helsten and Miss Lucile Scott were supper guests here Sunday evening.

---

Point Defeated

In Overtime Game

(Continued from page 1, col. 1.)

but Captain Schlicht managed a basket on a breakaway. With the Point in the lead 17 to 16 and FOUR SECONDS to play, Berven made a basket which placed the game in an over-time period.

Capt. Neuberger put his team ahead with a free throw, but a foul by Johnson of the Point brought the score to a tie, 18 all. With a few minutes to play, Berven tapped the ball into the basket for the winning points.

Stevens Point will play at Stout and Eau Claire this week. With the remarkable showing made against the Falls team last Friday, victory seems assured in these next two games.

The lineup is as follows:

Stevens Point
Hanson, rf ..... 0 0 0
Schroeder, If ..... 1 3 1
Neuberger, If ..... 0 1 0
Thompson, e ..... 0 1 1
Alberts, rg ..... 0 0 0
Baker, ig ..... 1 0 2
Totals ..... 5 8 8

River Falls
Sutherland, rf ..... 0 0 2
Warwick, rf ..... 0 0 0
La Dusire, If ..... 2 0 4
Kuss, If ..... 0 0 0
Miller, e ..... 1 0 1
Berven, e ..... 2 0 0
Hexion, rg ..... 0 1 2
Schlicht, ig ..... 1 3 1
Alphose, ig ..... 1 0 0
Totals ..... 8 4 10

Stevens Point ..... 10 17 18
Rivers Falls ..... 8 17 20

Free throws missed, Schroeder, 2; Alberts, Sutherland, Warwick, Berven 2, Schlicht.

Referee, Ritchay, Wisconsin Rapids; umpire, McCaw, Clintonville.

The first game of the year was played Wednesday night, January 7, with the alumni. This result was a sixteen to five victory for the college team. This gave Coach Kotah a chance to use fourteen players. The graduate squad consisted of Frank Wierensinski, Dick Marshall, captain of last year's squad but ineligible because of having played three years of college basketball, Ben Weronke, Henry Bannach, Gregory Charlesworth, and Ferdinand Hrizy.
