Schedule Election

This year the Student Council is adopting a new procedure by which class and divisional representatives on the Council will be chosen for the 1946-47 term. Instead of holding the election next fall, the election will be held on Friday, May 24, of this term. This will enable members of the Council to aid the faculty during registration in September.

Nomination papers for students who wish to serve on the Council must be filed with the class advisor or divisional director not later than Friday, May 17. A student may sign four petitions for representatives from his class and one petition for a divisional representative. Graduating seniors will not choose representatives, as they will not be present at CSTC next year. New freshman representatives will be chosen in the fall at the time class elections are held. Students may obtain nomination papers at the main office. According to Article 2, Section 2 of the Council Constitution each petition must have no more than 40 and no less than 25 signers.

The Student Council, the student body's voice and the active factor in promoting progressive interests at Central State. It is important that all students give their support to this election.
Here's Your Chance to Improve Your Mind

Can mathematical theory improve your game of poker, pinacle, or bridge? What are the odds in heads or tails? Do you know the real chance you have of winning in craps? What is the most honest chance game played by Americans? Are you playing "sucker" by playing the "horses"? These and other similar questions will be answered at the Forum assembly Thursday morning at 10 o'clock in the college auditorium.

Norton E. Masterson, Jr., of the Hardware Mutual Insurance Company, will explain the relationship of mathematical theories to games of chance. In dealing with the theory of probabilities, Mr. Masterson will cover the subjects of automobile accidents, horse racing, slot machines, roulette, craps, heads or tails, and the card games, poker, pinochle, and bridge.

If you play any type of chance game at all, you will want to know the facts that Mr. Masterson will disclose. You will find out how the odds in those front rows will be especially benefited (or amused) by the props he may use. Please sit in the audience of students; we guarantee you twice the enjoyment.
