That Wonderful Malady, Spring Fever, Sweeps Through Ole CSC

"They say it's spring! Spring... with the glorious walking-on-air-feeling caused by the rainy weather. Fragrant May breezes, spring... with the first bloom of the green leaves. Your thoughts become modified and foolish as the process of thinking is as difficult as trying to drop a penny through a head of grass, that is in the ground."

"The major catastrophe is this: There's no cure for this malady caused by the stimuli it produces. Once you get it, you're sunk. The faculties think you're stupid because you're not immune to it. But don't let them fool you. The cure for this is: ""Did You Know?"" by Homer Plumb."

This time we reverse the situation. The first person to answer six of the following questions correctly will enjoy a double chocolate milk on the extra-curricular activities of the week. (see note from previous week.)

1. How high was Popeck, the President of the Junior Class?
2. How many years has the Popeck been President of the Junior Class?
3. What is the life span of a parakeet?
4. What Indian chief was responsible for Custer's massacre?
5. What is the renowned female student of the week?
6. What state In the union is called the Sucker State?
