Woodrow Wilson Fellowship Nominees Selected

The Woodrow Wilson Fellowship is designed to attract men and women to the profession of college teaching. A student is nominated by a faculty member because he intends to go into graduate work and be capable of doing outstanding work. The foundation extends fellowships to 1000 prospective first-year graduate students from about 11,000 nominees from the United States and Canada. Through funds provided by the Ford Foundation, a student is fully supported for one academic year at a Canadian or United States graduate school.

The Foundation primarily accepts candidates in the fields of the humanities and the social sciences. Students with an interest in science or mathematics and with a clear interest in teaching may be acceptable candidates in art, history, and musicology are also considered. Field such as law and medicine are not eligible for the Fellowship.

Eligible for nomination are men and women of outstanding intellectual promise, graduates of (or having the equivalent of) a class in the United States and Canada and at the time of nomination not registered in a graduate school. College graduates now in the armed forces may be nominated for a fellowship.

Ace Employees Join Union

There are 1, 200 employees in the Ace chain of food stores in Green Bay. With the recent closing of the Packers and Shoppers in the downtown area in Green Bay, this chain has become the largest grocery store chain in the city.

Recently, action was taken by the cafeteria workers employed by Ace Foods which may directly affect the student's employment. The cafeteria workers have voted to have the Teamsters Union act as their bargaining agent between them and Ace Foods. The power of this union is to have as a bargaining agent a body of workers which are free to enter a graduate school in 1963-64. All candidates must be citizens of the United States or Canada.

RATFINK IS FRANK MAY. Frank was our photography chief. Frank isn't any more. We used to like Frank. He used to bring in pictures. Now he doesn't. We don't like Frank. Do you? (Pointet Staff Editorial)

Recently, action was taken by the cafeteria workers employed by Ace Foods which may directly affect the student's employment. The cafeteria workers have voted to have the Teamsters Union act as their bargaining agent between them and Ace Foods. The power of this union is to have as a bargaining agent a body of workers which are free to enter a graduate school in 1963-64. All candidates must be citizens of the United States or Canada.

The purpose of this article is to explain why the union was formed and what the implications are. The union was formed because the workers felt that their working conditions were not up to their standards.

The workers feel that their working conditions are not up to their standards. The union was formed because the workers felt that their working conditions were not up to their standards.

The workers feel that their working conditions are not up to their standards. The union was formed because the workers felt that their working conditions were not up to their standards.

The workers feel that their working conditions are not up to their standards. The union was formed because the workers felt that their working conditions were not up to their standards.
The Missing 1,000,000,000

This is addressed to any stray students or interested citizens we may have in the crowd. (I expect that no more than 10 or 20 people will feel addressed).

The other day the Congo blew up. That "nasty" war in Viet Nam still rages. The Soviet Union recently changed hands. China has just set off an atomic bomb and yet can’t always feed her people.

The fault ultimately lies in the basic attitudes of American students, and graduates in the United States, to say nothing of the millions who didn’t go to college. Where lies the flaw? With your intelligence or your lack of opportunity to learn?

When ignorance is not the problem. Today Americans are more capable of learning than 10 or 20 people will feel addressed.

No, you couldn’t answer, nor could the vast majority of college students and graduates in the United States, to say nothing of the millions who didn’t go to college. Where lies the flaw? With your intelligence or your lack of opportunity to learn?

The fault ultimately lies in the basic attitudes of American education. To be specific: Here at WSU-SP the history department, out of 45 courses, a total of precisely two are non-western culture history classes. We’re neglecting half of the world. Ninety-nine percent of the students, and graduates in the United States have not even a high school相当 of who 1,000,000,000 are what they’re doing. Doesn’t this bother you just a little bit?

MULLEN

New Student Directory -- For Whom?

The new directory has finally arrived. Not only is it already obscenely because of its late arrival, but it is of little value to the student.

Previous to the publication of the directory, it was necessary to call the operator for the extension number when one wished to contact a student in a residence hall. After the publication, it is still necessary. Yes god! What planning?

I somehow get the impression that this directory was deliberately planned and for the benefit of the faculty and if it is useful to the students, it is only incidentally so. Unless a student lives off campus, his phone number is listed. Is it impossible for a directory to consider the interests of both faculty and students?

Thanks for nothing!

L. F. SAUCIER Assistant to the Editor

Snow Swirl Swings

Delta Zeta: Thanks for a real fun-night last Friday. It was obvious that a great deal of work and enthusiasm went into your preparations for your dance. Your intelligence was obvious that a great deal of work and enthusiasm went into your preparations for your dance. The fault ultimately lies in the basic attitudes of American education. To be specific: Here at WSU-SP the history department, out of 45 courses, a total of precisely two are non-western culture history classes. We’re neglecting half of the world. Ninety-nine percent of the students, and graduates in the United States have not even a high school相当 of who 1,000,000,000 are what they’re doing. Doesn’t this bother you just a little bit?

Mr. Mrs. Miss?

Dear Editor:

Reading (Mr. Mrs. Miss) has its own special meaning. This is true especially in the publishing. Also that he (she) doesn’t have total recall. When a student has read a book he cannot remember that in his column he was to have complete freedom to write a column in which he thought that in that he was to have complete freedom to write a column on a subject of his choice. It was to be, as it is a statement of the editor’s policy. Write Galacx’s rather formidable training and experience as a literary critic, I would suggest the criticism of Smullen as underdeveloped is the editorial material. I define for a reader usage a phrase. It defines or illustrates what it is about. Would this include the types of people, those who fight and those who allow fighting (playing defense or passivity), to suspect these types of people are active on campus. Perhaps then a column asking why people kill and war is to be included. If I should even be considered as insulted or mumbled over. Good! If our campus notebook is to have the world outside of dorms and exams, dates and beer, Greek, or non-Greek. War is relevant to you and you and you.

By the way, in blue blazes is Mr. Southworth getting a colossal. You and Mr. Southworth came about his, but why this new column?

PAUL CONE

Galacx’s Eyes Closed

Dear Editor:

Ro. Miss Pat Galacx’s letter to the Pointer 123-64: Although I am all but overwhelmed at Miss Galacx’s qualifications (editor of her high school newspaper, etc.) it seems time that she realizes she no longer is high school. In fact, I fail to see how even a high school student could be so naive as to believe that Smullen’s “long discourse on war” was unrelated to “campus activities,” “just a piece of emotional nonsense,” and “irrelevant and inane.” Can Miss Galacx really believe that such “irrelevant nonsense” as war cannot affect her because she happens to be a student at the moment. Just who is supposed to be concerned about the problems of mankind if not those in college who will shortly be running the nation? Has Miss Galacx opened her eyes sufficiently to see the signs pointing to fall-out shelters in our library? These shelters, I might add, were provided by the government of the state of Wisconsin and not for Miss Galacx. Perhaps this makes the signs irrelevant too.

George Smullen and the few people who had the courage to suggest that armament be ended once and for all. “Thou shalt not kill.” I don’t have the faintest idea of what Miss Galacx means when she says war is bad. At least, I do know that arms are bad.

SHERALD R. DUCK

Quiet Please!

It is becoming increasingly more difficult to put to full use the great facilities of the Library. Realizing that plans for a new library are being affected by the effect we can do is try to make the best of present facilities.

The fact that the stacks and reserve materials are inadequate is only a minor problem. The major cause of disturbance generated from the Administration of the Library and the students.

There have been many times that I have tried to study in the General Reading Room, only to be disturbed by the clicking of a typewriter, the clanging of ‘he pass gate of the stack room or the banging of swinging door.

I have written through careful planning, the Library staff could cut down on these needless noises. I have tried to study in the General Reading Room, only to be disturbed by the clicking of a typewriter, the clanging of ‘he pass gate of the stack room or the banging of swinging door. I have written through careful planning, the Library staff could cut down on these needless noises. The noise of typing is at fault. The jabbering and joke telling is childish and disturbing to people who want to study. I also am guilty of this fact, and I am trying to correct it. If everyone would realize this of themselves—for practically everyone does it—I am sure that we could cut down the needless noise in the Library.

JOHN PRAISE

Passing Fancies??

We are repeating the six “Conside­

erations” hoping that both the Administration and students that these are not just passing fancies. Meanwhile, the staff and editor have prompted us to believe that these really are called for and in In 3. Open the library on weekend nights for study. We urge the faculty to start a few non-credit general or special interest seminars of short length courses on weekends.

4. Keep the Snack Bar in the Allen Building. It is in operation at various times, from 7:30 to 10:30 p.m. every night, and is open on weekends. The food is not just a convenience, but a treat to serve both crowded and a long cold walk for North Campus residents.

5. Urge the faculty to start a few non-credit general or special interest seminars of short length courses on weekends.

6. And while we’re at it, open up the Allen Center for study, open a few more late night...
The figure stood alone against the sky
The stars which shone were cold
Suddenly the last leaf fell
No, please, not the last leaf
The building was alone now too
With only a companionship
Must love wait — like the tree
For the return of spring

The Comic Book of WSU
Dear Editor:

By the inference of your editorial on page 3, 1964 issue
The Pointer, it is surmised that you have decided that since the student body has been awakened to the point of reading and talking about "their" paper, they will support you in a revolution against the administration. Before you commence to sound too opposed to your article, let me say that I think the majority of your suggestions are good and appropriate in relation to some problems on WSU Campus.

Getting back to the critical analysis of your article. You cite the fact that this school recently acquired a new classification: that of a state university, and at the same time I note it to please the administration. I will not sit down to argue if the administration didn't settle problems which we as students realize more than they.

Your haste to settle things that occurred due to an explosion in enrollment the last two years shows signs of a freshman suggestion. To cite an example and ask you to remember this in your association to the setting of the problems, I point out that an institution as large as this university is an organization organized around a highly administrative body and any policy change regarding students will take time.

I suggest more articles on topics that keep their attention and at the same time, patience, you have these more years, that is if you work as hard on your classes as your attempted to write on matters concerning the students themselves instead of subject demanding equal-time criticism by various unalligned students. As a few campus-wide remarks point out, The Pointer (called the comic book of WSU) by one psychology instructor, The Pointer (by another instructor, The Private Argue Sheet by many people, The Newspaper, Now Fashpam by others) has finally shaped up and is interesting. The next semester should decide whether it survives the test.

ARNOLD R. CHRISTIAN

Directory Hurtin'
Dear Editor:

After we bounded into the Ken.

the freshest fresher's T.D.'s in wild anticipation of riverstudent directories.

But the result, the funniest damn thing happened. As we commenced to partake of the feast within, we perceived that a little gem was hurtin' for certain.

We must not, however, overlook the helpful elements found amidst its fruitful pages. We are all tremendously, now that we have returned from our "Thanksgiving Recess" to know that according to the illiterate directory, our vacation was scheduled from November 29th.

Then there's the time we undertook the formidable task of establishing communication with one of the masculine gender at Smith College. The Directory is like a "Directory" but, alas and alack, what did we find? No extensions. So we sought assistance from the next best thing—room numbers.

Foiled again.

Enough of this, by now you are probably thinking to keep their attention and at the same time, patience, you have these more years, that is if you work as hard on your classes as your attempted to write on matters concerning the students themselves instead of subject demanding equal-time criticism by various unalligned students. As a few campus-wide remarks point out, The Pointer (called the comic book of WSU) by one psychology instructor, The Pointer (by another instructor, The Private Argue Sheet by many people, The Newspaper, Now Fashpam by others) has finally shaped up and is interesting. The next semester should decide whether it survives the test.

ARNO LD R. CHRISTIAN

STEINER HALL NEWS

Steiner Hall this year is again in the hands of the men (it had been occupied by women previously). With this transfer came new students, a new director, and new folders.

Probably the newest thing in Steiner Hall is Quimby Jul. This is a club that started on the second floor, but is soon to expand to include men from throughout the hall. The purpose of Quimby Jul is twofold. It is the spirit and so far 38 members have been highly enthusiastic in doing so.

Steiner Hall is pleased to have Dr. Becker and Mr. Dixon come to speak on the subject of sex. Dr. Becker will come September 17th, while Mr. Dixon will be there on December 1st. Christmas decorations are of course, high on Steiner's list of "Things To Do." Many a clever ideas have been admitted; all ready Steiner Hall is forming a caroling group and will be doing their seasonal serenading on the second floor.

With the many basketball games scheduled, Steiner Hall has formed a cheering section, and it looks like there will sit behind the cheerleaders and really roar out the cheers.

Steiner Hall is more or less isolated from the campus proper, because of US Highway 10, but they want the student body aware of the good things going on right here. The men are in high spirits, so they are looking forward to a lively and successful year.

Sincerely,

ARNO LD R. CHRISTIAN

Dear Director:

To the Reader, Quimby Jul!

I, in the Nov. 19 issue of the Pointer, Quimby Jul stated that they were pleased to be reorganized and that they hope to include men from throughout the hall. Although not first, we were ahead, and second floor, but is soon to expand to include men from throughout the hall. The purpose of Quimby Jul is twofold. It is the spirit and so far 38 members have been highly enthusiastic in doing so.

Steiner Hall is pleased to have Dr. Becker and Mr. Dixon come to speak on the subject of sex. Dr. Becker will come September 17th, while Mr. Dixon will be there on December 1st. Christmas decorations are of course, high on Steiner's list of "Things To Do." Many a clever ideas have been admitted; all ready Steiner Hall is forming a caroling group and will be doing their seasonal serenading on the second floor.

With the many basketball games scheduled, Steiner Hall has formed a cheering section, and it looks like there will sit behind the cheerleaders and really roar out the cheers.

Steiner Hall is more or less isolated from the campus proper, because of US Highway 10, but they want the student body aware of the good things going on right here. The men are in high spirits, so they are looking forward to a lively and successful year.

Sincerely,

ARNO LD R. CHRISTIAN

Dear Editor:

This is to express the thanks of the Brothers of Theta Delta Phi for your fine article on the Theta Delta House. Sincerely,

The Brothers of Theta Delta Phi

What has the Quimby Jul organization done that should warrant a mention in a campus newspaper? The organization has decided that they would like to be affiliated with an Alpha Phi Omega member who was quite disturbed about the lack of space devoted to Alpha Phi Omg's Ugly. Man contest. The reason:

Thursday, Nov. 12: Quimby Jul took more coverage than Mulini. Alpha Phi Omega have a paid advertisement on page 7 in the paper.

Thurs., Nov. 19: Alpha Phi Omega raised $200 for the United Fund. They have not advertised their efforts. Alpha Phi Omega is not mentioned above Dennis Reil's (Snuffy's) picture. In fact, they are not mentioned at all in the paper.

QUESTION POSED: Why wasn't Alpha Phi Omega mentioned? Alpha Phi Omega doesn't receive awards; they give them.

This is one reason why our university editor needs some help, some one that has a flair in journalistic problems.

Another reason:

"Grand Tour" (page 5, Nov. 19th issue) is supposedly a news item. It was a paid advertisement, but it SHOULD have been a news item. If this establishment wants me to patronize its place of business, I may pay for the advertisement. Why doesn't any other business establishment do's. Our editor gave away two hundred words, and gave it to the students as a news item.

Nov. 12, page 1 is it really necessary for Iris to tell me to go to a certain photographer because in their opinion he is the best. They tell me how to spend my social time and I try to help him equally.

Speaking as a senior, I think that we can use our own intelligence and resourcefulness in choosing a photographer of our own choice. A complete list of those who advertise in the paper is on page 4; a heck o a way to compete with a news item!" on page 3. But, the Pointer attempted to compete with the following: (In large type) "PATRONIZE OUR ADVERTISERS!"

QUESTION POSED: "Patronize our Advertisers" — Paid or Otherwise?

I think that something should be done to hinder poor examples of journalism in our paper. I feel that the editor does need outside help (not by having a stranger work for him and lowering his position and pleading to his intelligence, showing him that he is in this universe exactly the same as everyone else), but the common good journalist. I restate that this is an institution of higher learning, then dropping in on this man, to Alpha Phi Omega's outstanding service to this school and to the community.

A point to ponder: Whole newspaper is this? My feeling is that the Pointer must be a servant to its readers, the students. We are here to learn, and to learn successfully, there will be many ways that they have. Who cares if they have made mistakes and they have overcome them. Believe it or not, they can guide us. Until next time, if Maier permits.
Woodrow Wilson Fellowship Nominees
Charles B. Massie, Mrs. Lena Haver, Allida Kussman, Constance Miller, Quim Quim, Warren Schnipf, Jerome Siegler, Sandra Westphal, Helen Weber, John Whirry, and James Woodman.

The award, in the form of tuition and fees, is paid directly to the student's graduate school. A single or married student without children receives a living stipend for one academic year. Married students with children receive an additional allowance of $1000 for the first child and $500 for each additional.

In accepting an award, a student pledges to give serious thorough thought to teaching and during tenure to undertake a full-time program of graduate study. In exceptions cases, committees will recommend that a sometimes winner who, in a separate letter to the Regional Chairman, announce their candidacy for the Woodrow Wilson Fellowships be held in abeyance. Exceptions for military service are also made.

Beauty Through The Ages

Bridge builders and beauticians have one thing in common—they owe their jobs to the human being to improve the man's environment. While the earliest engine-

ers built roads and canals to make the world's first highway, a parallel stream to make the world's first high road. As the nations of the world straddled stagecoach of bone beads, was probably squating at the river bank, the magic of the makeuppad to obtain a slick's tin coffin came to light.

Humanity's first make-up job was strictly a mass-produced affair. A face wash was the beauty history compiled by Leeming-Pastic, specialists in skin. Crevmen were colorful old sorts, dying their faces with clay. They attract their womenfolk and scare off their enemies. (Human error being(!$:(#)), the original paint must sometimes have worked in reverse.) At one time, the best Britons were blue and American Indians were famously gaudy.

The B.C. belle had a formidable arsenal of beauty aids. A 5,000-year-old compact has been found at Kung Fu. Many a woman has used a cuttle stick and rouge applicator. Queen Neferiti, who had as many as sculpts as Venus or George Washington, used red nail polish over 3,000 years ago. Egyptian cones made in Columbia, weighted with green grease and a blackish-white substance known as kohl, Charcoal eyebrow pencils, according to Leeming-Pastic, were in every B.C. boudoir.

Flappers thought they were daring when they affected that fash-

ion. As though it had been designed for them, by the women of the world, Greece and sowed Theda Bara early in the century. These women achieved such style, looking interesting on their faces with a white lace "foundation," then dusting themselves with chalk powder. Helen of Troy used a different beauty approach—she was taught to keep her classic features lovely with this recipe for a facial mask:

"Take two pounds barley, two pounds bean flour, mix with a half a bunch of garlic. After drying them, mix with the sun, grind powder and add one-sixth a pound of powdered tar soap. Pass this through a sieve and combine with twelve varicolored rice and pour, pounded, twelve ounces of gum, and eighteen ounces of honey."

This formula seems to have worked wonders for Helen. According to one historian, when Paris became enamored with her charms and carried her off to Troy, the fair Helen was sixty years young.

Ancient Greek also boasted early versions of beauty parlors. — operated by slaves, they dispensed such items as rice and oatmeal pastes for smoothing wrinkles and removing freckles. But in their attention to facial. Cretan women did not neglect body lotions. An ancient test states, "oil is the remedy for the body." Unquets and perfumed oils, considered essential for every day hygiene, were kept in beautiful stone urns and glass bottles, many of which now adorn our museums.

Ancient Roman ladies would probably have appreciated this modern beauty discovery for they were so beauty-conscious that a whole street in ancient Rome was devoted to the treatment of skin imperfections and unguents. The attention paid to beauty became so great in ancient Rome that one ruler, Licinius Crassus, went so far as to prohibit by law the sale of imported cosmetics. But Crassus couldn't prevent visions from going to a lady's head—every fine Roman lady kept a slave who served as her personal hairdresser and many a hairdresser "knew for sure" that mad lady's tresses were bleached!

Hindu ladies of 200 years ago might have sniffed at this approach to allure—they believed that the magical scent of the lotus blossom was an aid to beauty.

When membership was in flower, medieval women thought that an herb called lovage would rid them of freckles. Their low- flowing cosmetics did not stress the twain, but a 3rd century French, queen, Catherine de Meli, decided that beauty should definitely go to ward. She de-

creed a 13-inch waitline for her court ladies; to achieve it, they encased themselves in corsets of steel plates.

Even to this day, some women still swear by old-fashioned egg facials—egg yolks to improve dry skin, egg whites to dissolve oily complexion! But although women have used an amazing range of beauty ingredients—from barley flour to bread dough, egg to olive oil, the ultimate aim has always been the same: a peach blossom complexion to whet the appetite of a world hungering for beauty.

Ucb Says Thanks

The University Center Board would like to express their sin-
ter thanks to all those who as-

isted in the Christmas Decorat-
ing Party. Despite relatively

little notice, a large number of enthu-

siastic people turned out to help in

this worthwhile project.

The Allen Center was done by the Social and Special Events Committee (Barb Jakubowski and Dave Cooley, Chairmen) with stu-

dents: John Bradly, Glen Bishop, Tim Martin, Julie Twitich, Bob Heldinger, and Kathy Davis; and the Lounge by the Cultural Committee (Barb Jakubowski and students to Tom Johnson and Kenneth Gage).

The Cafeteria was decorated by the Social and Public Rela-

tions Committees (Janice Sands and Warren Kosowski, Chairmen); Jo Ann Christofarson and Caroll Lyn Lemanick, co-Chairmen) and a group of regulars: Jean Mascott, Paul Tadhdy, Carl Schult, Sonya and Sharon Sare, Grant Gozil, Carol Rozar, Jerry Blunt, Karen Kline, Julie Monroe, Sue Brief, Pat Kroll, Karl Langlota, Bob Rand, Roy Savoy, Delia Jean Ehren, John Dinen, and Mary Schnabel.

The Snack Bar was done by the House and Food Com-

mittees (Jon Le Due, Jack Waterman, Chairmen) with stu-

The outside work was done by the Property and Games Com-

mittee (Bruce Gengoswijk, Dennis Gilge, Chairmen).

The UCS says: Thanks.

Reminder To Students

Just a reminder to the students that the Bloodmobile will make their next visit to WSU on Thursday and Friday, Dec. 10 and Dec. 11 at the American Legion Hall. Hours for the Bloodmobile will be 1 to 7 p.m. on Thursday and 9 a.m. to 3 p.m. on Friday, Dec. 10.

Those who gave blood during the October Bloodmobile visit are again eligible for donations during this December visit," said Kirkby Hendeck, Chairman of the Portage County Bloodmobile Pro-

gram. A contest will again be held between the University and the Portage County. Don't forget "Red Letter Day" our help needed for the success of this life-saving program.

Psi Delta Psi Pledges Seven

Psi Delta Psi Sorority is proud to announce the acceptance of seven pledges for the fall quarter: Sharrows Havlik, Sophomore; Janet Marker, Sophomore; Ernie Patterson, Sophomore; Verna Stil-

man, Sophomore; Anita Tellken, Sophomore; Elizabeth, Junior. The sorority's present officers are Judy Davis, President; Sally Keller, VicePresident; Corinna, Recording Secretary; Pat Buda, Corresponding Secretary; Myrna Prues, Historian; Joanna Blecker, Campus; Beverly Jones, Pledge Mistress.

STG Sponsors Peanut Sale

Sigma Tau Gamma will sponsor a peanut sale beginning Friday, Dec. 11 and running through Saturday, Dec. 12. It will be held floor to floor in the downtown area, the North Point shopping area, and on campus. The money raised will be used to purchase our national charter.

WESTERBERG'S
Sketch
Richard E. Beard

EXPLANATION
In the late summer of 1964, fifty-one new faculty members arrived at WSU. They came by car, train, bus and plane, alone or with a wife and three kids and a dog piled into a station wagon. They came from Alabama, Michigan, Maryland, Kentucky, Iowa. They brought with them new ideas, diverse backgrounds, varied interests and impressive accomplishments in their fields.

The POINTER, in a series of weekly "Sketches," hopes to introduce to its readers some of these people who comprise a growing vanguard of increasingly competent and talented teachers.

SUE STANKS, Feature Editor

"What do I think of Stevens Point? It's great! It's the only place I know where I can get a ten cent beer."

So stated Mr. Richard E. Beard, associate professor of art at WSU. Mr. Beard is one of the fifty new professors on campus this year.

Mr. Beard received his Bachelor of Science and Master of Arts degree at the University of Wisconsin-Milwaukee, and his Ph.D. degree from Ohio State University. He has taught for thirteen years at Maryville College, Tennessee; Ohio State College, Ohio; and the University of Kentucky, Kentucky.

An intense, dapperly-moustached man, Mr. Beard had several things to say about college life. "I would like to see the students spend a little more time with their work. A student should devote himself primarily to his major area of personal commitment. Good grades are important, too," he emphasized.

"In my area of interest, art, there are no strict rules or regulations, but only possibilities of things happening. That's what makes it so exciting," he added, smiling.

Beard has had experience both as an artist and a teacher, and is now successfully combining the two. His work has been shown throughout the Southeast and Ohio and has earned favorable comment both in regional and national competition. The work itself involves humanistic and abstract characteristics, and is related to the abstract experimental school.

He palpitates at a studio he shares with another artist.

Beard is married and has three children, "I was married before I completed my Master's degree, and already having three children, I went back to college to finish my Ph.D. degree. Both of us didn't like our life as a wife as well as myself," Beard said. "I don't think it is necessary for one individual to sacrifice his education for the other, after marriage. It is possible for both to finish school; it just means you will both have to work harder. And it is good for both to finish because then there is a greater intellectual compatibility between the two."

WSUSP
Represented At Conference

Drs. Maurice E. Perret and William M. McKinney attended the annual convention of the National Council for Geographic Education at the Pick-NicNet Hotel, Minneapolis, November 28-29. This was the fiftieth anniversary of the council and was attended by a record number of delegates from virtually all of the United States and Canada. The theme of the conference was "Dimensions of Geographic Education." Considerable interest was expressed in the announcement by representatives of the U.S. Office of Education that substantial funds would be available for institutes in geography, to be conducted by colleges for the benefit of public school teachers, during the summer of 1965.

Dr. McKinney read the paper "Laboratory Instruments for Earth-Sun Relationships" before the section on "Teacher and Student Made Teaching Aids and Devices." The theory of the construction of the instruments was explained, and three different models were exhibited before an audience of approximately eighty college and public school teachers. On the same program Miss Ruth Shirley, of Indiana State College, Pennsylvania, gave a demonstration of globe usage based upon Dr. McKinney's booklet on this topic.

WSU Planetarium Presents
Star Of Bethlehem

Star of Bethlehem will be the program starting Nov. 29 and running until Dec. 16 in the Wisconsin State University Planetarium. This is one of the highlight topics of the year's schedule. The participants will have the unusual and unique opportunity to view the heavens as they appeared on that first Christmas. Interesting theories of explanation for the Star of Bethlehem itself will be discussed and dramatized in the planetarium "sky." A highly respected suggestion of a possible interpretation of the Star of Bethlehem is the triple conjunction of Jupiter and Saturn. In the Star of Bethlehem Show one will be able to see this conjunction and how it would have appeared to guide the Magi to Bethlehem.

The program will run during the above period every Sunday at 3:00 p.m. and Wednesday at 7:30 p.m.

Admission is adults 50 cents and students 25 cents. Tickets may be obtained at the Kiosk or at the planetarium door.

Williams Vivifies Dickens

Mr. Emlyn Williams, portraying Charles Dickens before a large audience in the fieldhouse on Nov. 30, "read" from memory excerpts from a few of Dickens' works: excerpts that he, Williams, had taken from various points within Dickens novels. He then knit and wove them into a fabric of literature with the vigour of the first of satirical humor and then spellbinding horror. Boredown accompanied not the tentative ear nor the active imagination.

At one selection, "Moving to Society," "Mr. Bob Sawyer Gives a Bachelor Party," and "Moving Higher in Society," were humorous excerpts replete with humor that has made Dickens so warmly loved. Mr. Williams made vivid the characters he portrayed by a most effective use of his voice and actions. He vivified Dickens and Dickens' characters.

The following "reading" was a "Call Upon A Strange Man," which demanded the creation of a mood of terror, an aura of suspense. When the "Strange Man" banged, the audience hanged with him.

Williams was an artist.

Verret To Perform

The marvelous and lovely Miss Shirley Verrett will be appearing in the auditorium on Jan. 6. Miss Verrett is a mezzo-soprano of international fame. She has appeared with the most famous opera companies in the world. She has sung in Moscow where she received a tumultuous ovation and in Austria where she received a standing ovation. Miss Verrett is not without credentials.

Her performance here promises to be a memorable event — be sure to get reserved seats now from the box office, Rm 113, Main.

THE POINTER Page 5
WSU Has Weather Station

WEATHER SHELTER on northwest side of science building contains instruments to measure temperature and humidity.

by JOHN PRIMM

Unknown to many students and faculty members at WSU, the geology department maintains a weather recording panel and accurate instruments at the science building. The instruments are for observing temperature, pressure, relative humidity, wind direction, wind speed, and precipitation amount, are identical with the standard U.S. Weather Bureau types. They are extremely accurate as they are constantly checked and calibrated.

The temperature is measured from the wooden weather shelter house and is electrically connected to the dial in the corner of the science building's third floor. Also in the shelter are special maximum and minimum thermometers which record the highest and lowest temperature during a 24-hour period. The instrument suspended from the side of the shelter is a relative humidity indicator. This weather element characteristic is transmitted to another dial in the building. Relative humidity is the percentage of water vapor actually present in the air, compared with the greatest amount that could be present at the same temperature.

Wind direction is determined by a wind vane atop the science building and wind speed is clocked by a 3-cup anemometer at the same location. There are two scales — 0-5 MPH or 0-120 MPH, which can be used depending upon current wind velocity. A small tag beneath the dial indicates which scale is being used. Wind instruments employ a T-conductor cable to connect the anemometer and wind vane on the roof to the dials. Temperature and humidity sensors are exposed outdoors in the shelter house and are also connected by a T-conductor cable to the indoor indicators. The barograph, located below the dials, is a pressure-record- ing instrument that furnishes a weekly record.

In summary, the weather instruments transmit current outdoor weather data to a set of attractive indoor indicators. The five dials with their matching cases make a harmonious display for academic and public presentation. Separate dials indicate current wind speed, wind direction, barometric pressure, temperature, and relative humidity. The precipitation amount is recorded by a rain and snow gage near the weather shelter, not shown in the photographs. In the near future, the daily weather map from Washington, D.C. will be posted each day next to the weather dials.

TRUTH from YOUTH

I would like to suggest a new course for universities all over the world. It would be an elective course in deep investigation for the TRUE FACTS in current events.

The search for truth is one of the most important things in our existence. What should we start to think about in our universities?

Many of our news media have an ax to grind and soon feed us the news the way they want us to see it.

University students are the cream of the crop. They have no ax to grind, no bone to please, no deadline to meet. Their minds are fresh, open, clear and strong. What, besides truth could we choose to find the truth? They and they have the facilities of the great universities to help them.

Each course would choose one or perhaps two subjects to research. Every possible fact and proof would be run down. Exhibits would be brought in, important people would be asked to speak, discussions would be held.

The universities could grant money to the course so that one student could be sent to the location of the subject to bring back first-hand information.

They would last one semester. If possible, but would be flexible and end when the class desired to. Some courses might last 15 minutes and some 3 hours. It might be necessary to take several courses to meet a student's schedule.

The course would be run by the students in a democratic manner with one or two professors as advisors. Parts of the course, such as lectures, would be open to the public. After starting this idea, it could be tried as a small project in a current class.

At the end of the course the facts would be summed up and a conclusion or two different conclusions (like the Supreme court) would be mimeographed and presented to the whole world.

The professor could grade the student according to the amount of effort he put in the course.

This would not only educate the student but make news and history by running down the truth. Our universities do research in many fields, let us add the search for truth in current events.

While our university students are building for their own bright future, they can present the world with this valuable gem - truth. TRUTH FROM YOUTH.

Some say the truth can never be found. But we must never stop looking for it and must come as close as we possibly can.

It has always been my belief that when the people of the world have the true facts, they will solve our problems correctly and make this a peaceful world for all mankind.

Wrestling News

Bernie Christianson led the Stevens Point grapplers to respectable finishes to place fifth in the state collegiate wrestling meet held at the University of Wisconsin, Dec. 5. The "cutter" from Elder­son, Stevens Point, confirmed his first two opponents and decided his third to walk away with first place honors in the heavyweight division.

Four other Pointer men finished in the finals. Dick Schaal, a freshman wrestling at 123 pounds, took a first place finish with two wins and two losses. Another freshman, Dick Jensen, edged Schaal to third place in the 113-pound weight class. Jensen wrestled very well and lost only once to Jens of White­water who took the first. Larry Irwin, the 127-pound entrant for the Pointers five times to win his third place honors. He took two victories, decided two and last one to Reback of Superior. In the 177 pound weight class, Pete Seiler won third. Thad Seiler had three wins (two were under 1 1/2 minutes) and lost to Lesch of Whitewater by one point.

The Pointers had a total of nine plus. Seiler had three, Iron­side had two, Seiler had three and Jensen and Rich Sommer each one. Christianson had the highest pin, as he flattened Smith of Whitewater in 33 seconds.

The Pointer men won the meet for the eighth consecutive year. Five U-W men won championships and three others finished in the finals. Whitewater finished second among final­ists and Superior third with six men finishing.

Tony Strickfelt of Marquette, who wrestled in the 139 pound class, was voted as the most outstanding wrest­ling of the meet.

Team Scores: Wisconsin, 31; Whiteman, 26; Superior; third; Marquette, 38, Platteville, 33; Stout, 23; UW-M, 30; Carthage, 2; Lawrence, 2.

115 pounds: James Jens, Whitewater; 2nd; Bernard Dick, Stevens Point; 3rd.
123 pounds: Tony Leonardi, Super­ior; Wayne Staudacher, Whiteman; Steve Bach, Whiteman.
137 pounds: Tony Strickfelt, Mar­quette; Thomas Horn, Platteville; 3rd; Cecil Austin, Whiteman.
137 pounds: Al Sievestein, Wis­consin; John Bauman, Whiteman; Bob Olson, Stout.

137 pounds: Bob Garcia, Platteville; Phil Buettner, Marquette; Greg Zakos, Wisconsin.

Intermural
Basketball

A tremendous turnout of forty-three basketball teams greeted Mr. Casswell's call for intramural teams. On Tuesday and Thursday evenings from 5:55 to 9:50 p.m. a program of twenty-three games each night is scheduled.

Over four hundred university boys are participating in this program. Signs and posters of the entire program are placed in the student dormitories for the games. At the end of the semester a new record for intramural sports is set.

Three gyms are in use with the games being heavily watched by university students. Five leagues have been set up with the men at the centers of the first semester scheduled to play a championship series. The ten leading scorers from the entire program will play a tournament among the university's fresh­men team in a game early next semester.

For an evening of fun and en­joyment, participate in an intramural program. If you missed basketball, get ready for volley­ball next semester. A healthy body and healthy mind go hand in hand.

World Wide Sports

One of the more exciting and oldest of all winter sports is ice skating. The early skater bound a bone to his foot and used a staff to help him slide over the ice. It has been especially popu­lar for hundreds of years among the people of northern countries. Skating was first developed by the Scandinavians, Finns, and Dutch.

The modern steel is a blade, usually fastened to a specia­lly built skating shoe. A blade may be made for special pur­poses, such as a straightforward rac­ing, figure or fancy skating, or for the game of ice hockey (which was the feature sport in the last publication of World Wide Sports.)

The racing skate has a light, long, all-metal blade. The rocker­shape blade is best suited for fancy skating, while hockey is played on a short, thick blade.

During the past hundred years, speed races and figure-skating matches have become common in Europe and North America. National Associations arrange national and international contests.

Skating and other winter sports have been part of the Olympic Games since 1924. One result of the 1926 games was to call atten­tion to the artistic as well as the speed aspect of skating.

In 1954 Toly Jenks made the first American girl ever to win the women's world figure skating championship.

Some of the technical names of fancy skating figures are: edging, rights, serpentine, threes, loops, brackets, counters, and lockers, with their variations and combina­tions. Dance patterns set to music are also featured in figure skat­ing. The development of artificial ice has brought skating to many places where warm weather would not permit the sport before.

Speed skating has been a fea­ture of North American sport for more than fifty years. Canada, where ice hockey is the national game, has organized speed skat­ing long before the United States did. Today races are held in de­ciances from fifty yards to five miles. International contests have shown Americans and Canadians to be among the best skaters in the world. But, as in running, the Scandinavians are the fastest skat­ers over longer distances.

GOTTA QUESTION?

Does anyone have a question pertaining to what you do, your sports staff will be more than happy to answer any and all questions you have.

For instance, if anyone does not understand some phase of football, either drop the ques­tion off at the POINTER office, or place it in the "POINTER" box in Old Main.

The answer will be printed in the following issues of the POINTER.
Pointers Win Battle Over Muskies

W.S.U. — Stevens Point topped their season record to 34-11 Saturday, Dec. 5 with a hard-fought 94-71 decision over Lakeland College.

The Pointers jumped ahead 8-1 and were never headed due to a spirited defense and excellent shooting from the floor. The closest the Muskies managed to come to the Pointers was 34-29 with a little over three minutes to play in the first half.

In the second half, the Pointers again started to pull away, putting the game out of the reach of the Muskies. During part of the last half, the playing was 9-0 and heated and heated and a point guard, Gary Hovey, was injured in a scuffle for the ball and had to leave the game. Coach Krueger substituted freely in the second half and the reserves still managed to increase the margin, 67-43. Coach Wirth and Wesenberg led the Pointers on offense with 18 points each, even though he was guarded during much of the game by such lofsmen as Wes Selyer, 6'11" and Dean Stander. Fred M. Kline Fortune and Bill Borcherdt had been eyes for the basket, dropping in 16 and 13 points respectively.

THE POINTER swimming team practices for its first meet. It turns out they took a seventh place in an eleven team field.

Leading the Muskies were Selyer, 19 points, and Sandifer, 13.

Pointers Walloped by Muskies

The Pointers opened their 1965 basketball season with a decisive non-conference victory over the Winona Warriors on Tuesday, November 24, 88-57.

Five Pointers totaled ten or more points with 6'4" forward Jerry Lawetski setting the pace with 17 points. Mike Fortune had 15, Bill Borcherdt 13, Jim Fitgerald 11, and Wes Zuege 10.

Stevens Point jumped off to an early lead and never was headed. The half-time score was 46 to 25 in favor of the Pointers. The second half was the same story. The Stevens Point five chalked up 49 points to the Warriors 28.

Dave Mielke, a 5'8" guard that jumps like a kangaroo, led the Wino na scorers with 13 points.

The W.S.U. — Stevens Point freshman team got off to a good start by trouncing the Warrior from 83-46, in the preliminary game.

SWIMMER bares sole as he heads for the unknown.

Pointers Topple Muskies

The Pointers opened their 1965 basketball season with a decisive non-conference victory over the Winona Warriors on Tuesday, November 24, 88-57.

Five Pointers totaled ten or more points with 6'4" forward Jerry Lawetski setting the pace with 17 points. Mike Fortune had 15, Bill Borcherdt 13, Jim Fitgerald 11, and Wes Zuege 10.

SPEAKING OF SPORTS

by Duane Clark

It is inevitable that the two professional football leagues, the old National and the young American, will, at some day get together, in a championship game. Television has so decreed, unintentionally perhaps, but decreed. "It is television which has given the American league stability with the $30 million dollars it will pay for five years of rights starting next season. (The American league is here to stay). It's television which is exposing the league's product to more and more viewers every year. (ABC telecasts American league games now, NBC will take over a year hence). It is television which must eventually stir up public demand for a championship game. "(The American league is here to stay. Why don't the two leagues meet?"

The meeting is inevitable and if it is, why not now. (or this year, that is impossible, but a year or two hence). This would end the costly bidding for talent. It would give the game an even stronger lease of operations in the "cold" but subtle war with baseball. It would solve less, common problems.

There is no question which is stronger league today and which would win any meeting now: the National League. The situation, though is changing. The American league is doing all right with its draft. It is getting stronger by the year. It will eventually be just as strong.

Just as an example of the increasing power of the American league's drafting ability, let me point out Jimmy Sidie, Auburn university halfback, who was an All-American last year as a quarterback. Sidie, who was injured this year, and was forced to shift positions, was a fourth round choice of the Dallas Cowboys of the American Football League and a ninth round selection of the New York Jets, who are also in the A.F.L.

Bob Hayes, Florida A&M sprinter and Olympic star, was reportedly ready to sign Monday with the Cowboys. He was also drafted by the Denver Broncos of the A.F.L.

As long as the leagues must inevitably meet, it is even to the National League's advantage it seems, to agree to a game now, besides a good "whittling" of the American league would be far more certain in '65 or '66 than in '70 or '71. As long as we're on the subject of pro games, a pro game happened Saturday — one football coach extended sympathy to another:

It was George Halas of the Chicago Bears, speaking of the fall of champions and the fate of favorite after his team's 17-3 shelling at the hands of the Green Bay Packers.

"This business of the favorites losing,'" he said, "is a story at this league. We were the champions and the Packers were favorite. Now we're both out of the running."

The same things has happened in England. Take the Wolverhampton Wanderers. Great team. They call them the Wolves. Three time champions of their league.

Just as an example of the increasing power of the American league, let me mention that football in Wolverhampton is played in slightly different fashion from that in Chicago. The Wolverhampton style is known as "scientific".

A reporter commented that the coach of the Wanderers is probably unemployed by now. "Unless, of course, he happens to own the team."
