College Theatre Offers Famous Musical Play

The Music Theatre of WISCONSIN presents its first musical play of THE POST's 57th season, "Carmen," a revised version of the French opera by GIACOMO PONCHERI. The musical play is scheduled for March 15, 16, 17, and 18 in the Auditorium at 8:00 p.m. at the University Center campus. Tickets for all performances are available by calling the box office at 836-6286.

The musical play is directed by Professor Joseph D. Dillinger, head of the Theatre Department. The musical play tells the story of Carmen, a Spanish girl, and Don José, a soldier. The play opens with a dance of the Harem Girls, which includes Carmen, who is played by MARY REINHOLT. The scene then moves to the Seville market, where Carmen dances with the crowd and the crowd is led by the accompaniment of the orchestra. The scene then moves to theZuni gate, where Carmen and Don José dance together.

The musical play is performed by a cast of approximately 50 students, including William J. REID, who plays Don José, and GAIL MCKINLEY, who plays Carmen. The musical play is produced by Professor J. D. Dillinger, and the musical direction is by Professor J. D. Dillinger.

The musical play is presented by the University of Wisconsin at the University Center campus. Tickets are available by calling the box office at 836-6286.

Student Government: Our Responsibility

In our little "university world," the governing body comes under fire in many of the same ways that the government of the big bad outside world is attacked. However, in student government, little debate, discussion or criticism is heard prior to elections. This is all saved until after the candidates are already entrenched in the positions they are to fill. When the issue, the failure for errors and ineffectiveness of the part of the student government members is not only with them, but with the rest of the student body who elected them, or did nothing to prevent their election. If we, the student body, would demand a platform from each candidate, each have a chance to state his program of action, we could have something more than the popularity contest on which to base an election.

Student government is influential in such things as allocation of student funds and change in policy. These are areas which should be of prime concern to every student here, as we are all affected in some way by them. If we want changes, this is the place to begin. But we cannot have a representative government, if the people we want to be elected are not real representatives of the student body. It therefore appears to be not only our right, but our duty to concern ourselves with who will be elected to these positions, when student government elections are held March 29 and 31.

Blowing In The Wind

by Bob Pepper

Here you read about this. I don't know about this.

Snow is falling, snow has covered the ground. I don't know, the snow has covered the ground. We need snow on our heads. We need snow on our heads. We need snow on our heads. We are skiing, we are skiing. We are having fun. In the open air, we are enjoying the beauty of nature. We are having fun, we are enjoying the beauty of nature. We are having fun, we are having fun.

Apathy Toward Student Government

Editorial:

Here is one fact which stands out in my mind as an "area of apathy." That is, the apathy and indifference among students toward student government. It seems to me that students don't know what is going on. And they don't care. And they don't care.

Another serious problem can be identified, unfortunately, that the apathy of students is widespread. Only rarely are they informed, and then only in a general way. Most of the time they are not informed. And then they are not informed. And then they are not informed. And then they are not informed.

I'm not surprised, I'm not surprised, I'm not surprised. And then they are not surprised, they are not surprised. And they are not surprised, they are not surprised.

EIE Offers European Scholarships

The Inter-University European Education Commission (IUE) will offer 115 European scholarships for graduate study in English-speaking countries for the 1966-67 academic year. The deadline for applications is March 15.

In addition, New York University in New York City, under the auspices of the IUE, will offer 17 scholarships in the humanities for study in the United States. The deadline for applications is April 15.

See the full text of the IUE offers on page 3.

What Will You Do In June?

As Wisconsin's lazy weeks stretch out before your eyes, you probably won't exactly come up with any tangible plans of action for June. Rare seems incredible for you to be doing anything in particular. Whether you'll be out hunting for a job, or thinking about life, or your future, or anything else, the fact is that only you can make the decision for yourself.

See the full text of the What Will You Do In June? article on page 4.

Emerald tries to explain protestations

(ACP) - The war in Viet Nam is the subject of a new book, "Why Protestations?", by Dr. John F. Egan, professor of political science at Northwestern University. The book examines the philosophy of protestations and the role they play in modern society.

Dr. Egan has also written several articles on protestations in political science journals and has been a speaker at numerous conferences on the subject.

Suggested 'Cure' for crowded campuses

President of the National Association of Small College Presidents, Dr. John D. Lattanzo, has recommended a "suggested cure" for crowded campuses. The cure involves the creation of a "suggested cure" for crowded campuses.

The cure is as follows: 

1. Increase the size of the campus.
2. Expand the number of facilities.
3. Increase the number of faculty members.
4. Increase the number of students.

The cure was recommended to the National Association of Small College Presidents at their annual meeting in New York City last week.

Tutoring Clearinghouse Organized In California

A tutoring clearinghouse has been organized in California to help students find tutors for individual tutoring.

The clearinghouse is called the California Tutoring Clearinghouse and is located in the city of Los Angeles. It is open to all students in the state and is supported by the state government.

Misdirected Idealism Threatens Campuses

KANSAS CITY, Mo. - Misdirected campus idealism threatens "a real divorce to the national interest," according to Dr. John D. Lattanzo, President of the National Association of Small College Presidents, who spoke here last week.

Dr. Lattanzo said that the problem is not just one of the few campuses, but of all campuses.

"We have a problem," Dr. Lattanzo said, "but we are not the only ones with a problem. We are all in this together."

American Students Astound English Professor

CSC Defense...A professor at the State College of Morris, New Jersey, was so amazed by the defense of some American students on an English examination that he immediately called all his male students to the campus library so that he could discuss the matter with them. The professor said he had never before seen such well-prepared students, and that he was unable to find fault with any of their answers.

The following Monday, another professor, who teaches literature at the same college, expressed similar surprise at the quality of the students’ work. He said the students had demonstrated an extraordinary level of understanding and creativity in their responses.

On his way to the library, the professor noticed that the students were talking to each other in a language he did not recognize. He asked one of them what language they were speaking, and was told it was German. The professor was shocked and asked how it was possible for American students to be so knowledgeable in a language they had not been taught in school.

The students explained that they had learned German from the students from Germany who had been studying at the college. The professor was astounded and asked if there was anything he could do to help.

The students said that they had been studying German as part of their chemistry course. They had found that the students from Germany were very knowledgeable in the subject and had learned a lot from them.

The professor was impressed and asked if he could learn German from the students. The students agreed and began teaching him the language.

CSC Students Evaluate Profs

Los Angeles, Calif. — (UPI) — State College of Morris's president, Dr. A. J. Thompson, has announced that the campus bookstore for the college will be closed for the next two weeks in order to evaluate the performance of the professors.

"We have had complaints from our students about the teaching and grading practices of some of our professors," Thompson said. "We want to make sure that our students are receiving the best possible education, and we believe that the best way to achieve this is to evaluate the professors on a regular basis."

Thompson said that the evaluation process will involve students providing feedback on their professors' teaching methods, grading practices, and overall performance. The evaluation will be conducted anonymously, and students will be able to provide feedback through an online survey.

Thompson added that the evaluation results will be used to make improvements in the teaching practices of the professors. He said that the college is committed to providing the best possible education for its students, and that the evaluation process is a key part of this commitment.

Boys Better Than Ranking: Girls Overrated

Most boys graduating from high school are better than their classmates, according to a new study. The study found that boys tend to rate themselves higher than their peers, even when they are not the best in their class.

The study, conducted by the American Educational Research Association, found that boys are more likely to rate themselves in the top half of their high school class, even if they are not. The study also found that boys are more likely to rate themselves in the top 25% of their class, even if they are not in the top 10%. In contrast, girls are more likely to rate themselves in the bottom half of their class, even if they are.
