Dean Eagon relates Vietnam study

Dr. Dordon Eagon, Dean of the School of Education, returned from Vietnam last week with the results of a one-month study of the educational situation in that area. The programs include engineering and industrial training. The Institute of Technology in Hanoi, where the study was conducted, is considered the fifth best in all of Southeast Asia.

The team was conducting a study of the educational, economic, social, technical, cultural and ethnic aspects of advanced education in Vietnam. The study was conducted by the people in charge of each program. The project was directed by Dr. Dordon Eagon and was sponsored by the Agency for International Development (AID) through a grant awarded to the University of Wisconsin.

The study, which involved frequent visits to schools and homes, was considered a success by both the Vietnamese officials and the team, in general. The team was well received and was able to offer a good deal of constructive criticism.

Dr. Eagon stated that he was not sure if it would be possible for the granting agency to support the project in the future, but he was optimistic about the possibility of a new demonstration and a study program within a continuing program.

He added that it was necessary for the project to have a new demonstration and a study program within a continuing program. The project was considered successful by both the Vietnamese officials and the team, in general. The team was well received and was able to offer a good deal of constructive criticism.

Ecumenical movement debuts on campus

The ecumenical movement, gaining a strong foothold in Pentecostal Pointe through the efforts of Wisconsin State University, will involve all those interested in interdenominational cooperation.

This interfaith venture, traceable to the United Churches of America (UCA), will involve those interested in a broad program of ecumenical collaboration and thought.

For the first time, students from all faiths will be able to join in ecumenical services, provide material for worship, and work in the worship of churches. Discussions and planning groups will form in order to achieve a logical plan and to present a unified front.

A UCA Council composed of representatives from all the churches has been formed. Each church will select its representatives. The council will meet the first Thursday of each month.

A coffee house sponsored by students will gather all interested in discussion.

The statement of the UCA for the campus begins the campus last spring when students decided to form a group of some of the great faiths in order to work together for the furtherance of the ecumenical movement at the university.

The University, Similarly, a group of students formed a UCA Council composed of representatives of several denominations to work on the campus. A compendium of these representatives and some of the religious groups' names and addresses have been chosen to circulate in order to encourage and help the ecumenical movement.

And, in the old democratic tradition of religious freedom and cooperation, a member of the UCA Council will serve as the ecumenical council's representative on the Wisconsin Student Government and the Methodist Student Union. The ecumenical council will be held weekly in the student union.

The goal of the ecumenical group is to work on the campus and to promote the ecumenical movement at the University of Wisconsin.

The Episcopal diocesan representative will serve as the ecumenical council's representative on the Wisconsin Student Government and the Methodist Student Union.

A coffee house, which is open to all students, will be open from 4 to 6 pm on Tuesday of each week. The house will be located in the student union.

The coffee house will feature discussion and book club activities.

All students are welcome to participate and are encouraged to join in the efforts of the ecumenical movement.

Alphalambdas join in a warm welcome to Delta Sigma Phi

By MAUREEN O'CONNOR

In the spring of 1966, the Delta Sigma Phi house became a fraternity on the Institute of Technology campus. At the time, the Delta Sigma Phi brothers, who were the first to charter on campus, were looking for a way to expand their brotherhood and to attract more students.

A few months later, the Delta Sigma Phi brothers met with the Alpha Phi Omega brothers to discuss the possibility of expanding their brotherhood. The Alpha Phi Omegans agreed to the proposal and the two fraternities began working together on a way to recruit more members.

Today, the Delta Sigma Phi brothers are continuing to work with the Alpha Phi Omega brothers to attract more students and to expand their brotherhood. The two fraternities are working together to offer more opportunities for leadership and to create a more inclusive environment for all members.

Delta Sigs lease fraternity house

By MURRAY O'MALLEY

In the spring of 1966, the Delta Sigma Phi, a fraternity organization affiliated with Delta Sigma Phi, decided to lease a house on campus.

At the same time, their housing committee was formed to oversee the operations of the new group. The new group was to be called the Delta Sigma Phi fraternity, and a house was to be leased in the fall.

The Delta Sigma Phi fraternity was founded in 1966, and it now has a house located at 2911 Main St. The fraternity is currently active on campus.

Point passing and defense stop Whitewater Warhawks

The Pointers opened their football season Saturday night, Sept. 29, with a 55-12 victory over the Frankfort Warhawks

The Warhawks had a strong defense line for the first three quarters of the game, but the Pointers overwhelmed them in the final quarter. After falling behind 12-7 at halftime, the Pointers scored three touchdowns in the fourth quarter, leading to their victory. The Pointers' defense was particularly strong, holding the Warhawks to just 12 points.

Athletes of the Week

The Pointers' success can be attributed to their hard work and dedication. This week's Athletes of the Week are Bob Severt (football) and Retro (swimming). Bob Severt stands out for his exceptional performance on the field, while Retro has been a consistent force in the pool. Both athletes have demonstrated their commitment to their sports and have been valuable contributors to their teams.

Press Box

The Pointers' win over the Warhawks was a testament to their determination and teamwork. The Pointers' defense was particularly strong, holding the Warhawks to just 12 points. The Pointers' success can be attributed to their hard work and dedication.

The UW-O Kenosha feature game that faced off Saturday night was against the UW-O Green Bay Warhawks. The Pointers were victorious, winning 42-14.

The Pointers' defense was particularly strong, holding the Warhawks to just 12 points. The Pointers' success can be attributed to their hard work and dedication.

Placement Center moves to new area

The Placement Center, previously located in the basement of the Recreation Building, has moved to a new location in the Student Union Building. The new location provides a more spacious and well-lit environment for students to visit and receive assistance with their job search.

International students meet on Sunday

The International Students Association hosted a meeting on Sunday, Oct. 1, for its members. The meeting was held in the Student Union Building and was attended by over 50 students. The purpose of the meeting was to discuss upcoming events and plan for future activities.

The University of Wisconsin-Oshkosh is committed to providing a welcoming environment for students from all over the world. The International Students Association plays a crucial role in supporting these students and fostering a sense of community within the university.
