Two Operas Planned
By Music Department

The concert opener will be presented by the Women's Choral Society department's opera workshop Thursday, Friday, and Saturday, May 26, 27, and 28.

"Down in the Valley," an American folk opera by S. Bower and "River Angel," an opera by P. F. and S. Bower, will be performed at the University auditorium in Stevens Point.

The musical conductor for "Down in the Valley" is James Thomas Bowles, Raymond Wernikoff and Paul M. Leiter are the stage directors; "River Angel" is directed by Robert W. G. Bessey and James M. Neely.

"Down in the Valley" is set in the south end of America, and the story deals with the love of a little Southern girl for a Yankee soldier. "River Angel" is set in the mountains of the West and the story describes the life of a group of mountain people.

Malcolm Boyd Will Speak
On Campus on March 14

Malcolm Boyd, radical clergyman, will speak at the Fieldhouse on March 14. Several campus sponsors are sponsoring this event.

Theatre Performing
"Wings of the Dove"

A contrast between society and the normal, American and European, is depicted in the University Theatre's production of "Wings of the Dove." The play, which was adapted by Eugene O'Neill from Henry James novel, opened last evening and will be presented every night at 8:30 p.m. through Saturday, March 5, by the university theatre group, "The United Theatre Company.

"Wings of the Dove" was written by Henry James, one of the greatest writers of his time. The play is the story of two American women named Mrs. Chaol and Mrs. Shol, who live in Paris. Mrs. Chaol is a wealthy woman with a husband who is often away on business. Mrs. Shol is a poor artist who is trying to make a living. The two women become friends, and Mrs. Shol helps Mrs. Chaol with her problems. The play is about the power of love and the struggle for survival in a world of false values.

Speech Pathology Receives
$15,900 Federal Grant

A $15,900 grant to continue the Speech Pathology and Audiology Program on the UW-Stevens Point campus was received recently from the National Institutes of Health. The grant will enable the University to continue its program in speech pathology and audiology.

The grant will be used to provide additional faculty and support services for the program. The University already has a faculty member in speech pathology, Dr. David Johnson, and a faculty member in audiology, Dr. James Smith. The grant will provide additional funds for these faculty members to continue their research and to provide additional support services for students.

Campus Senate Announces
Evaluation Results

The Senate has announced the results of its evaluation of the university's academic programs. The evaluation was conducted by a committee of faculty members and administration officials.

The results of the evaluation indicate that the university's academic programs are strong and that the university is making progress in improving the quality of its instruction. The Senate has recommended that the university continue to support its academic programs and to make additional investments in areas where improvements are needed.

The Senate has also recommended that the university continue to support its academic programs and to make additional investments in areas where improvements are needed. The Senate has also recommended that the university continue to support its academic programs and to make additional investments in areas where improvements are needed.
The University is a dream system, says Dr. Lee Burress. He should know; he’s one of the people who made it that way.

But Bernard won’t be back next year. Lee Burress has seen that to. As head of the English department, Dr. R. Lee says, this was his last year as English teacher Bernard. Dr. R. Lee, a respected and beloved teacher, is moving to a new position.

Burress has stated that there are five and one-half open positions in English, with four full-time and one part-time job. The expected influx of PhDs has failed to materialize. Thus, admits Frey

The English department is hiring M.A.’s (teachers) and PhD’s (professors) for next year.

Burr has a master’s degree. There are people in our English department who do not, but they have

Bernard is a Cum Laude graduate who has taught at universities and colleges in Illinois, Michigan, and Indiana. Burress in his part-time at the American Academy of Freedom Community, and at Purdue. He has also worked extensively in blue-collar jobs, as a dry Bulk and delinquent fifer, and a high school football coach.

Burress has been in the classroom for many years but he is not a success. He is prejudiced against unmarried teachers. Apparently, he feels that women are not disciplined enough.

“I remember hearing him in class,” said the girl sitting next to me. “He always taught me things, he taught me how to think.”

Burr has also taught extensively in the classroom. He is beginning to realize that a teacher must be passionate about his or her subject, and that he must have a good understanding of the subject matter.

Burress has been teaching for a while, and he has been in the classroom for many years, but he is not a success.

Burress is a failure. He is a teacher who has taught extensively in the classroom, but he is not a success. He is a teacher who has taught extensively in the classroom, but he is not a success.

Perhaps, Bernard was fired because he was not a success. Perhaps he was fired because he was not a success. Perhaps he was fired because he was not a success.

Inside Pressure

Perhaps, Bernard was fired because he was not a success. Perhaps he was fired because he was not a success. Perhaps he was fired because he was not a success.

“Why not?” asked Dr. R. Lee. “He was a failure. He was a failure. He was a failure.”

Perhaps, Bernard was fired because he was not a success. Perhaps he was fired because he was not a success. Perhaps he was fired because he was not a success.

Vandalism Creates Dangerous Situation

Vandalism is a problem. Students are destroying property on campus. The University is taking steps to prevent vandals from destroying property.

The University has installed cameras on campus, and has added increased police presence on campus. The University has also added increased police presence on campus.

Dr. Nicholas Spulber, professor of economics at the University of Wisconsin, has written a series of articles on the economy. In this article, he discusses the independence of Russia. He believes that there are few nations which have been as independent as Russia. He states that Russia has not been influenced by other nations. In fact, Russia has been able to produce a new economic system which is independent of other nations.

In conclusion, Dr. Spulber states that the independence of Russia is a reflection of the country's strength. He believes that Russia is a nation which is capable of producing its own economic system and is independent of other nations.
Innovation Is Key For Lab School
Research Is One Role

By Dr. Kenneth M. Mitchel

The Pointer

March 7, 1968

In the context of the reporting of the new academic program at the University of Wisconsin-Madison School of Education, it is appropriate to reflect on the importance of innovation and the role that research plays in this process. The Laboratory School, with its unique approach to education, offers a valuable example of how research can contribute to educational innovation.

The Laboratory School, established in 1962, is a research and development laboratory for educational innovation. It provides a unique environment for the exploration of new educational practices and the testing of educational theories. The school is a place where educators can experiment with new ideas and approaches, and where students can benefit from these innovations.

The Laboratory School is committed to the idea that research is essential for educational innovation. It recognizes that research is a critical component of educational practice, and that it can play a vital role in shaping the future of education. The school encourages educators to engage in research, and provides them with the support they need to do so.

In conclusion, the Laboratory School is an example of how research can be used to drive educational innovation. It demonstrates the importance of research in education, and the potential that it has to transform educational practice. The school serves as a model for other educators who are interested in exploring new approaches to teaching and learning, and in using research to drive educational improvement.

**Student Senate Will Discuss Road Paving**

**Placement Opportunities**

Three positions exist in the Department of Forests and Fisheries for people interested in the management of Mines and Mining Industries. Most positions are in the northwestern United States and involve the exploration of mineral deposits. Applicants must be highly skilled in the use of geophysical equipment and have a degree in mining engineering. The positions are full-time and require extensive travel. Applications must be submitted before the end of March.

**The Greeenville**

**Hall A-Days by MARY ROGERS**

At this first glance, you might think that the activities and entertainment of the University of Illinois' annual week of fun were over. But this week's activities are just beginning! The Student Senate is planning a week of events that will be fun for everyone. Many activities are planned, including a parade, a dance, and a carnival. The activities will be held on the campus, and everyone is welcome to attend.

**ABC Matches**

In the ABC matches, there will be no longer any restrictions on matches or tournaments. Monday, May 7th and Friday, May 10th will be matches. The matches will be held at 8:00 pm at the Student Center. The matches will be open to all students and faculty.

**Trophies Awarded at Vet Party**

Friday, May 2, the Barons will present the first of its kind in the history of the University of Illinois. The Barons will present the first of its kind in the history of the University of Illinois. The Barons will present the first of its kind in the history of the University of Illinois. The Barons will present the first of its kind in the history of the University of Illinois.

**CarBuff do it!**

Save up to 30% on all Guitars at Jim Laubs Music 928 Main Street 341-6666

**Students Direct Career Path**

The Student Services Office is holding a special event to help students plan their future careers. The event will be held on Thursday, March 30th, from 10:00 am to 2:00 pm in the Student Services Center. The event will feature workshops and one-on-one counseling sessions, as well as resources for exploring different career options.

**Special College Program**

The University of Illinois is offering a special college program for students interested in careers in health sciences. The program will be held from May 1st to 15th, and will include workshops, seminars, and networking events. The program is free for all students, and registration is required. To register, please contact the Student Services Office.

**Placement Opportunities**

For more information on the above opportunities, please contact the Placement Office at 333-1234.
Egon Speaks

A Dayton Pointe administrator will soon be in the midst of a two-year venture to develop a youth development and leadership program for the community, with an emphasis on encouraging youth to pursue higher education and develop leadership skills.

"We have been working with local schools and organizations to identify students who have shown leadership potential and are interested in developing those skills," said the administrator. "Our goal is to provide them with the resources and support they need to succeed in school and in life."
