The Electronic Battlefield

By Eugenia Keller

Guerrilla warfare, an irregular type of combat carried on by independent bands, has played an important part in history. Its name, which in Spanish means little war, was coined during the Peninsular War. Large-scale guerrilla activities accompanied partisan proved invincible in September, 1972.

Editor's Note: The following article is reprinted by permission of CHEMISTRY, September, 1972.

Then in 1969 the Pentagon said that part of the war was operating, but that the other part was best with technical difficulties. Then in 1969 the Pentagon said the fence was being phased out and Congress said, "fine." Later, Gen. A. W. Bets told the Senate Electronic Battlefield Subcommittee, "The enemy never permitted us to implement that line." Altogether, the Pentagon authorized MINISID, a small device: MINISID. The electronic battlefield has undergone several technological improvements to meet new requirements... never less, little information about the electronic battlefield is available to the American public.

During hearings held in November 1970, Gen. John B. Deane, Jr., told the Electronic Battlefield Subcommittee, "The equipment in these weapons has already undergone several generations of operational and technological improvements to meet new requirements..."

Editor's Note: For a nonmilitary active, a false alarm occurred.

Sen. William Proxmire charged that the weapons could distinguish between friend and foe, or between civilian and combatants. Soldiers have used the sensors say they cannot distinguish between human beings and animals or footsteps from rainfall. Gen. Ellis Will troopers and those of enemy in Viet­nam have been charged that the sensors cannot distinguish between human beings and animals or footsteps from rainfall. Gen. Ellis Will troopers and those of enemy in Vietnam have been... But in time, a man can tell the difference between the two.

The electronic battlefield has a special vocabulary. For example, a nonmilitary active is a false alarm. COMM is a commandable microphone: it can transmit voice and sounds: ACOUSID is an acoustic seismic intrusion device.

Sniffing Out Best Food Bargains

Over half of the student population lives off campus and many students feel one way they can save money is by eating cheaply. With this in mind, Paine briefly surveyed four major stores in Stevens Point to see what students can go to find the best food bargains.

Stores surveyed were Piggly-Wiggly, Ray’s Red Owl, Bob’s Food King, and IGA. At each store a number of commonly bought meat, produce and packaged items were looked at and compared. Then each store was rated in comparison to the others on the basis of the items checked. This comparison will hopefully serve as a guide to students looking for the least expensive food items.

Piggly-Wiggly and IGA were rated about even for the best bargains in town. IGA’s packaged goods were a little lower than Piggly-Wiggly but both of these were lower than IGA’s. Red Owl was rated second lowest, even though its packaged goods were comparably low, it’s meat prices were very high. Bob’s Food King was rated last mainly because it’s packaged goods were more expensive then the other three stores even though their meat prices were fairly low.

Meat, of course, is an important stable food and what kind of meat prices a store has often determines where a person shops. Piggly-Wiggly had the least expensive meat prices of commonly bought items. Their Ground Beef, a popular item for budgeting students, was 73 cents a pound for one to three pounds; it was 69 cents a pound for three to five pounds and it was as low as 67 cents a pound or more for six pounds or more. At Red Owl, ground beef was 69 cents a pound for one to three pounds, 75 cents a pound for one to three pounds and 69 a pound for three or more pounds. IGA has the most expensive meat prices with one pound cents and two or more pounds at 73 cents a pound.

Pork prices are not very cheap at this time but a fairly economical cut of pork is Piggly-Wiggly’s ham. Piggly-Wiggly’s price was very reasonable on it’s pork steak, 58 cents a pound. The other stores sold this item for 89 cents a pound but had room in the freezer, an economical way to buy pork is the pork chop pack, one quarter of a loin of pork. IGA had the least expensive price on this item at 77 cents a pound. Piggly-Wiggly had 88 cents a pound, Bob’s Food King did not have this item at the time the survey was taken.

Chicken seems to be the most economical buy of all meats. It is best to buy a whole chicken rather then a pre-cut-up one because the price is much lower. It is very easy to cut up a chicken and the money saved makes it worthwhile as it takes a few minutes to cut it up. Piggly-Wiggly and Bob’s Food King had the cheapest price for their whole chickens, 29 cents a pound, while Bob’s had a pound and Red Owl had an expensive 41 cents a pound.

A beef chuck roast can make a nice meal for several students or several meals for one student. It is also one of the most economical cuts of beef on the market. It is best to buy the roast with the bone in it because boneless roasts are about the price of a roast at Piggly-Wiggly was 69 cents a pound, Bob’s Food King had a pound for it’s chuck roast and both IGA and Red Owl had a price of 89 cents a pound for their roasts.

Liver is another item popular at Piggly-Wiggly again had the best prices for its liver. It charged 48 cents a pound for ‘liver for hot dogs’ or 70 cents a pound for ‘liver for pies’. Red Owl had 49 cents a pound for pork liver and 70 cents a pound for pork liver also had an 89 cents a pound pork for liver but had 79 cents a pound for beef liver.

For many students, hot dogs are a staple food because they are so inexpensive. Piggly-Wiggly had the best buy on it’s own Food Club brand of hot dogs at 79 cents a pound. The IGA brand hot dogs were 87 cents a pound, Red Owl had Farmdale brand for 89 cents a pound, Bob’s had Schwigerbrand for 99 cents a pound.

For fish lovers, perch is about the most inexpensive fish item except for fish sticks, of course. Both Red Owl had perch for 69 cents a pound and IGA had Gorton’s perch for 91 cents a pound. One pound of fish sticks would cost 78 cents a pound at Piggly-Wiggly for it’s Food Club brand. Red Owl brand cost 79 cents a pound, Bob’s had Gorton’s brand for 82 cents a pound and IGA had the same brand, Gorton’s for 99 cents a pound.

During the winter months the produce buy are not the best. For a student who has a tight budget, the best idea would be to buy the special on produce at his or her favorite store. But there are certain items that many students buy often. Keep in mind though most of these items will fluctuate in price throughout the winter.

Lettuce is fairly dear and both Piggly-Wiggly and Bob’s had the best price on lettuce, at 39 cents a head. IGA had 99 cents and Stover brand expensive store and Red Owl had 45 cents a head.

Carrots at Red Owl were a good buy at 19 cents for a one pound package. IGA and Bob’s had carrots for two one-pound packages for 39 cents or 99 cents for 20. Piggly-Wiggly’s price for carrots was two one-pound packages for 49 cents or 25 cents for one package.

Oranges are a good buy in the winter and Piggly-Wiggly and Red Owl had California Eating oranges for 79 cents a dozen. Bob’s had the same oranges for 15 for $1.00 and IGA had them for 99 cents a dozen.

Delicious apples are another common fruit in winter and Red Owl had five pounds of these apples for $1.00 or three pounds for 60 cents. IGA and Piggly-Wiggly had these apples priced at three pounds for 69 cents and IGA had five pounds for $1.09. Bob’s price on these apples was three pounds for 89 cents.

Onions are always needed and the best buy was at IGA and Red Owl. Their three pound package of white onions sold for 99 cents and their large onions were 19 cents a pound. Bob’s three pound package of small onions was $1.19 while the large onions sold for 25 cents a pound. Piggly-Wiggly had the most expensive onions with a three pound package was 69 cents and the large onions sold for 29 cents a pound.

Potatoes are of course, a major staple of the market. IGA had the best buy on potatoes with Wisconsin potatoes selling for 69 cents a pound and Idaho potatoes selling for 99 cents for 10 pounds. Piggly-Wiggly and Bob’s both had Wisconsin potatoes for 79 cents and Idaho potatoes for 99 cents for 10 pounds. Piggly-Wiggly and Bob’s had Idaho potatoes for 79 cents and Idaho potatoes for 79 cents for five pounds.

There are many packaged goods on the market and the best advice any one could give is to stay away from the name brands if one is on a tight budget because in most cases the name brand items are very expensive then the individual store brands. Also, most of the individual store brands are of equal quality to the name brands. In many cases the individual store brands are manufactured by a name brand company.

IGA had the best buys on canned and frozen vegetables with Piggly-Wiggly second. Red Owl had the third best prices and Bob’s had the most expensive. The vegetables checked were corn, cut green beans and peas.

For a 14 ounce bottle of ketchup, Red Owl had the best buy with IGA second best for a 12 ounce bottle. Piggly-Wiggly had the third best price with Bob’s fourth.

Many students buy macaroni and spaghetti for an inexpensive meal. IGA had the best buys on these items with Piggly-Wiggly the second best. Salad oil and shortening are also needed and IGA again had the best buys on these items. Red Owl has the second best buys with Piggly-Wiggly and Bob’s having the most expensive prices for oil and shortening.

Dairy items are a must for students and all the stores had identical prices for one half gallon of milk, 50 cents. IGA had the cheapest margarine with Piggly-Wiggly having the second cheapest. Bob’s had the least expensive butter with Piggly-Wiggly and Red Owl having the second best prices for butter. Sugar, flour and salt are needed items and the best place to go for is Bob’s or Piggly-Wiggly.

Each of their brands of sugar sold for 71 cents for a five pound package, IGA had 72 cents and Red Owl had 75 cents for five pound packages. The cheapest flour is found at Red Owl with Piggly-Wiggly having the second best price, IGA and Bob’s have the least expensive salt, 13 cents for a 26 ounce package. Piggly-Wiggly and Red Owl sell their salt for 12 cents for the same size package.

An item always needed is bread and most students but the pre-packaged sliced bread. IGA has the best bread buy for 27 cents for Kopp’s brand and one and half pound loaf. Piggly-Wiggly’s Frances Hamilton brand sells for 4 for $1.00 or 25 cents a loaf. Red Owl sells its bread for three loaves for 93 cents or 31 cents a loaf and Bob’s AG brand bread sells for just 31 cents a loaf.

Eggs are the cheapest at Red Owl where large eggs sell for 53 cents a dozen and medium for 47 cents a dozen. Bob’s and IGA have the next cheapest eggs and Piggly-Wiggly has the most expensive eggs.

This listing by no means completes all the food item’s in the stores but it is an indication of where the best bargains are. It will depend on what the student buys as to much he can save at any store, and if the student buys the special offers at any store he will save money.

Because most of the canned and packaged goods prices in this article, they may be obtained by contacting Carol Cartwright in the Post Office. The prices are also broken down into how much an item costs per ounce.

The Pointer is a non-profit weekly, publication published weekly during the school year by the Board of Regents of State Universities under contracts awarded by the Board of Regents of State Universities. Published by the State of Wisconsin, Department of Administration, as provided in State Printing Office and Operating Bulletin 9-2 of September 1, 1970.
The key figure in Christianity is, of course, Jesus Christ. It is his teaching, as revealed in the Gospels, that provides the theoretical base for Christianity, and it is his act of dying on the cross to recover from the dead that has secured, for all who believe, a place in heaven. In essence, Christianity is the religion of Jesus Christ. The key figure is seldom critically examined. Jesus has, more or less, been assumed to be truly portrayed in the New Testament. However, there is no question as to the historical validity of this portrayal of the life and teaching of Jesus. In Jesus Charles Guignebert looks at the evidence. He makes a thoroughgoing examination of results of years of intensive scholarship on this question, and comes up with nothing very significant and disturbing concerning the question as to who this man named Jesus. But there is a larger question that logically follows: What is the Christian religion? Ultimately, Guignebert is concerned with constructing a consistent historical account of the origin and development of Christianity. He firmly believes in a consistent historical account of Christianity, just as any other religion, has a history and the facts of its history are just like other history. That is, Christianity is a world development just as other religious systems are. In his account, we have no proof that Christianity exists; it is a human creation, especially ordained from heaven.

We must admit that we do not know much about the actual life and teaching of Jesus. The Gospels as an historical record provide the results of years of intensive scholarship on this question, and come up with nothing very significant and disturbing concerning the question as to who this man named Jesus. But there is a larger question that logically follows: What is the Christian religion? Ultimately, Guignebert is concerned with constructing a consistent historical account of the origin and development of Christianity. He firmly believes in a consistent historical account of Christianity, just as any other religion, has a history and the facts of its history are just like other history. That is, Christianity is a world development just as other religious systems are. In his account, we have no proof that Christianity exists; it is a human creation, especially ordained from heaven.

For the most part, the key figure in Christianity is Jesus and his teaching. His life and teaching were the basis of many of the basic tenets of Christianity, and this teaching has been developed into a consistent historical account of Christianity and the origin of Christianity. A consistent account of the teaching of Jesus' life and teaching is possible, and this account is not non-existent. Underneath this mass of hagiography there is discernible a consistent and coherent account of the historical accuracy concerning the life and teaching of Jesus, and the origin and development of Christianity can be developed.

If we eliminate all the tenacious additions and editing that the Gospels underwent before finally being fixed in the canon, we find that the essential teaching of Jesus was Jewish; that God was about to set up his Kingdom here on earth and therefore everyone should repent and be saved, that is, prepare themselves for the coming of the Kingdom. Thus, the trials and tribulations of the Jewish people had suffered for years because of who was not found by one man. It was the teaching of Jesus that was successively portrayed by his disciples, and then by the Hellenic world that follows, and the development of Christianity, Jesus Christ, finally, is the mystical expression of this hope of man in a better life in some other-worldly heaven.

In this short exposition of the origin of Christianity we seem to have lost sight of that key figure, Jesus. Indeed, the man, the Messiah, the Son of God, is the key origin of Christianity. Christianity was a world development, a religious phenomenon that was not founded by one man. It was the teaching of Jesus that was successively portrayed by his disciples, and then by the Hellenic world that followed it, and the development of Christianity, Jesus Christ, finally, is the mystical expression of this hope of man in a better life in heaven.

Most historians I am sure would be content to leave us at this point with the mere statement that Jesus was the founder of Christianity. However, it is not true to say that Jesus merely pointed out this fact without drawing out its meaning, its implications. The question we must now ask is: What is the relationship between the development of Christianity and the growth of the human civilization? Or is Christianity a positive or negative development in the life of man?

Guignebert's historical analysis of the origin and development of Christianity (as translated from his book The Story of the Religion of Jesus Christ) demonstrates that Christianity is an absolute positive development in the life of man. Christianity was not merely a new religion, but a new world. In the New Testament Jesus taught that the end of the world was at hand, that humanity was in a state of sin, and that salvation was available to those who believed in Jesus. The Gospels, which were written several years after the death of Jesus, attempted to give a justification for the existence of the religion of Jesus Christ.

One need not look very closely at the Gospels to see that they are not concerned with the historical figure of Jesus; rather, they are concerned primarily with proving that Jesus was indeed the Messiah, who suffered and died and rose again on the third day (and they are not the only ones that can say that, to say the least). The Gospels are not about Jesus; they are not about the life of Jesus; they are not about the Resurrection. The Gospels were written to give foundation to the belief in the Resurrection, for the belief in the Resurrection is the basis of Christianity. Christianity is rooted in this Hellenistic environment.

In short, is the story of the origin of Christianity, the religion of Jesus Christ. Unless one believes that Jesus was divinely inspired by God to establish Christianity (a belief which has no basis in fact and is not true), there is enough evidence that the Gospels can be read as a consistent historical account of Christianity. Guignebert's scholarly approach to this question is the proper way to approach the question of the Gospels. It has revealed one very important point: that the Gospels form a consistent historical account of Christianity in this Hellenistic environment.

Christianity stands in the world as a reactionary force and a negative development in the life of man. Christianity tells us that the world is not important, what is fundamental is the Kingdom of God, which can be achieved on earth by the Christian community. The origins of Christianity are a part of this world and yet it is not a part of this world in the sense that it is not important. Christianity is a part of the world in which we live, and the world is not important.

Christianity is a religion that seeks to build a better life whereas Christianity is an absolute positive development in the life of man. Christianity is an absolute positive development in the life of man. Christianity is a religion that seeks to build a better life whereas Christianity is an absolute positive development in the life of man. Christianity is an absolute positive development in the life of man. Christianity is a religion that seeks to build a better life whereas Christianity is an absolute positive development in the life of man. Christianity is an absolute positive development in the life of man.

Cakes

Light Fruit Cake

This reliable recipe yields one fairly inexpensive but surefire Christmas fruit cake. I'm giving this cake as Christmas gifts this year.

Grease | large bread pan with crisco, and line | with 3 layers of wax paper. Grease again. Then blend with an electric mixer at low speed:

1 10-oz package of yellow cake mix (1 layer cake mix)
1-1/3 C applesauce
2 eggs
1/2 C sugar
1 1/2 teaspoons extract
Mix and beat for 3 minutes. Then combine in a large bowl:

1 lb. mixed candied fruits, or 1 lb total of chopped dates and candied cherries and pineapple.

Stir the flour-coated fruits into the batter mixture, a bit at a time. Spread into the prepared pan. Bake for 1 1/2 hours in center of oven at 275 degrees — with a large pan of hot water on the bottom rack of the oven.

Cool cake in pan for 1 hour — then turn out onto cake plate and further. Brush with (brandy) and wrap tightly in tinfoil.

Vasilopeta

(Greek New Year's Cake)

Once again this New Year's Eve, the people of Greece must look forward to another year. This year's special cake was prepared to symbolize the hope and good wishes of the New Year. Light Fruit Cake

Ingredients:

4 C white raisins
1 C chopped nuts
6 C sugar

Stir the flour-coated raisins into the batter mixture, a bit at a time. Spread into a prepared pan. Bake for 2 hours in center of oven at 275 degrees — with a large pan of hot water on the bottom rack of the oven.

Cool cake in pan for 1 hour — then turn out onto cake plate and further. Brush with (brandy) and wrap tightly in tinfoil.

Begin beating oven to 350 degrees. Mix sugar and butter until light. Stir in flour until mixture is mealy. Add eggs, one at a time, beating well after each addition. Stir baking powder into milk and stir milk into egg mixture. Mix soda and lemon extract in. Mix well. Pour and spread into a greased layer cake pan 10 inches in diameter and 2 inches deep. Bake for 20 minutes. Sprinkle with nuts and sugar and continue baking for 20 minutes longer, or until cake tests done. Yield: 1 medium-size cake, with a weird texture and a subtle lemon taste.

Public Library Offers Services

Did Howard Cosell ever live in Stevens Point? What restaurant originated the Caesar's salad? Both of these questions have been researched by the people at the Charles White Memorial Library in downtown Stevens Point.

The impressive structure was opened in January of 1969. It houses approximately 56,000 books for all ages on its upper floors. The current director of the library is Marjorie Warner.

In a situation where the public library cannot possibly come close to the total resources available from the LRC, what is the role of the public library in the community? Ms. Warner stated, "We have to try to appeal to every age and educational level in the community. In doing this, we become more interested in getting the popular books that the public wants such as the best sellers."

She went on stating, "Our relationship with the larger libraries of the Resource Center is good but is not extensive. If we are in need of a short reference we may call upon them for help. On numerous occasions we have asked people to the LRC for documents. We try to keep up with the more popular documents here, but it obviously isn't possible for us to have the quantity that the college library has. When we select items, it isn't really with the college student in mind."

Because of the limited amount of material held by the local library, particularly reference material, an inter-library loan service has been organized. The Wisconsin Valley Library Service has been organized with both federal and county funds. The Service has its headquarters at the Wausaunee Public Library, and has a far more extensive reference section than do any of the individual libraries. When information is requested that the local library cannot obtain, the Wausaunee headquarters can be called or written directly. The organization is centralized, however.

Several summers ago, a program was set up so that books from the local library could be circulated to the outlying areas of Portage County. A station was set up with books and information for use by patrons. Browsing has been met with considerable success.

Mrs. Warner suggested that the library services are open to all college students here, whether they are residents of Portage County or not. The library does request, however, that when applying for a library card, that the individual bring his student ID card and list one reference, such as his advisor or a faculty member he knows. There is no charge for getting a library card.

Books are normally lent out for 28 days. Exceptions are in the case of popular books which are lent out for only one week. The fine for an overdue book is 2 cents per day. There is a 5 cents charge to have a book put on reserve. This charge is used to mail a postcard to your home, notifying you when the book will be available. Normally, reserve books are held for one week, but if one is unable to pick them up, a phone call to the library will hold them longer.

One advantage of the public library is that periodicals may be taken out for one week at a time. The library subscribes to 221 different periodicals and 14 newspapers. Mrs. Warner said, "We try to get the magazines listed in the Reader's Guide because these tend to be by far the most popular." She added, "The situation can get a bit rough at term paper time, but more people are tending to use the periodicals. Try and make as much work can be done here in the library. Nineteen of the most popular magazines are now available online. You can also currently access the text of the collections at Amherst and Almond.

The ground level floor contains the reference books, records, non-fiction, and the newer periodicals. The lower level is for the young people beneath the sixth grade. The upper level has the fiction books.

Unfortunately some of the questions noted at the beginning of this column were not completely solved by the staff. Ms. Warner noted that the library was able to find out that Cosell, the son of a shoemaker travelled through much of the South and Midwest with his father. Research could not find any indication that Cosell had ever lived in Stevens Point, although the gentleman desiring the information was given several addresses to contact Cosell.

The case of the Caesar's salad had many different answers. The library had several claims for restaurants in San Francisco that claimed to originating the lettuce tops.

Working for the library has its humorous aspects. Ms. Warner remembered an instance when a little boy came in requesting books on "Noah's Ark". Thinking him to the children's section and having been at the books on the Bible, she noted the young man's uncertainty. "Why isn't there any music in here?" he asked. Realizing that boy wasn't really interested in the ark, she took him upstairs and found him a book on "Mozart".

THE POINTER

Page 5
University Film Society: The Reel World

By Dan McGlynn

You may think you know what Groucho Marx, Dick Nixon and Dracula have in common, but chances are we can order you a whole new life by a $500 allotment from Chancellor Dreyfus. It subsequently received a Student Senate allotment for the current school year, and is now winding up this semester's offerings and looking ahead to next semester's schedule.

The society's current hinges on the efforts of three faculty members and about six students, though the actual membership is larger than that. The faculty members are Toby Goldberg, Pete Kelley and Roger Bullis, all of whom have been involved in the film society as a reward to theUniversity Film Society.

The Film Society formed as a student-faculty organization during the second semester of the '71-'72 school year, and is given life by a $500 allotment from Chancellor Dreyfus. It subsequently received a Student Senate allotment for the current school year, and is now winding up this semester's offerings and looking ahead to next semester's schedule.

How To Use The Library

A new skill can be acquired, involving only about 13 one-hour class sessions, at UW-SP. It's how to use a library.

On campuses in particular and in public facilities in general, library holdings are growing and becoming more diversified.

As a result, increasing numbers of people are entering libraries only to discover, with a sinking feeling, that they have no idea where to turn or what to do.

At UW-SP, an experimental course was initiated this fall in the wake of a four-day workshop held on campus last spring. The workshop was so successful that a one-credit class in the use of the Albertson Learning Resource Center (LRC) was made available to interested students.

It is voluntarily taught by a team of 13 LRC faculty members.

Students learn the systems of card cataloging, how to use the indexes, where to find certain materials, such as the location of journal articles, and the use of microfilm machines. They become acquainted with reference sources in literature and humanities and receive practice in using abstracts.

According to Miss Linette Zimmer, of the faculty, the class is one of awareness. "We have all these facilities but very few students know how to use them."

"Many professors assume that their students know how to use the Learning Resource Center when they assign a term paper, but in actuality, most have never received any formal training in the use of the LRC," she added.

"It is amazing the number of persons who don't even know how to use the card catalog," explained Patricia Paul, coordinator of the project.

"Another thing that dismayed the student is that we use the Library of Congress system of classification rather than the Dewey Decimal means of cataloging material. It seems that if students have been taught to use library facilities at all, it was in their grade school days when the Dewey system was popular," Mrs. Paul said.

One of the greatest benefits of taking Learning Resources 101X is that a person learns how to use the microfilm machines.

"Many people think that if something is not on the shelf, we don't have it all. This is just not true," Miss Zimmer advised.

The recent periodical materials dating back three to four months are on the shelves but everything else is contained on microfilm.

"Hopefully our class will eliminate some of this frustration and benefit the student in his future college career."

"Much of the material presented in the 16 one-hour sessions can be put to use in other LRC's or libraries as well," according to Miss Zimmer.

Two sections of Learning Resources 101X are planned for second semester thus allowing 64 students to learn how to use the LRC. Both sections will be held in the evenings since the 13 instructors have full-time day positions with the university.

Teaching the one credit class are faculty members from each of the following areas: Technical services, Mrs. Paul and Miss Alice Raudseidt; Instructional Media, Dr. Richard Boutelle and Clifford Cone; and Public Services, Miss Zimmer, John Gillesby and Miss Susan Schrup.

Summer In England Offered

The UW-Whitewater English Department will sponsor a summer program in Canterbury, England during July, 1973. The program is being offered in cooperation with the British Studies Center.

The study, which will allow students from the UW system to attend the University of Kent, Darwin College, in England, will earn six credit hours.

Reginald Fookes, Professor of English and American Literature, University of Kent, will be the general director of the program. He will be assisted by the English faculty from Darwin, and Mr. Robert Lewis, UW-Whitewater instructor.

The cost of the program will be $341 plus transportation to and from London. It includes tuition for the six credit hours, room, and breakfast and lunch at Darwin College. Travel arrangements will be left to individual participants in the program, but helpful travel information will be sent to each applicant.

Interested students can contact Dr. Thomas McLeRoy, Associate Dean of Graduate Studies and Continuing Education, Roseman 246, or Robert Lewis, English Department, Heide 426, University of Wisconsin-Whitewater, Whitewater, Wisconsin 53190, as soon as possible.

Attorney General Robert Warren will be the guest speaker for the second annual College of Natural Resources Student Recognition Banquet February 16, 1973. Mr. Warren's talk will center the role of his office in the enforcement of pollution legislation.

College of Natural Resources awards will be given on the basis of academic achievement, as well as other contributions and other outstanding students will be recognized by various professional and environmental organizations.

The meal, primarily wild game, will be served at 6:30 p.m. in the Wisconsin Room of the Student Center on the UW-SP campus. There will be a reception following the awards ceremonies.

College faculty and staff members will be served. Student tickets are $3.75. Dormitory meal tickets can be applied to reduce the ticket cost. All other tickets are $3.75. Tickets should be purchased in advance from the College of Natural Resources office in Nelson Hall.

ARE YOU LOOKING FOR GIFTS?

... that are really unusual
... that are limitless in variety
... that are within your budget for instance, Swedish Angel chimes, coffee mugs, old Tower Sealing Wax, tassels, Russell Slover candles, Incense and burners, mobiles, wind chimes, Mother plates, fruit, vegetable and flower soaps, bubble baths, bath oils, colored glass, potholders, and on, and on, and on...

Remember when you couldn't wait till I was Christmas?

Wish you were here? Wishing you were here?

MERRY CHRISTMAS TO ALL
Santa Tells All

BY Bob Latin
Perhaps one of the most beloved Christian saints of all time arrived in Stevens Point last week on a last minute Public Relations tour before Christmas holidays. The familiar figure entered town riding a snowmobile, instead of his usual sleigh, and set up his usual shop on Christmas Eve and reported me to the health inspector for unsanitary working conditions. Fortunately, he was on my payroll.

The Pointer asked Claus whether the rash of hijackings in recent years had anything to do with his replacement of his usual sleigh with the snowmobile. Claus assured us that he would use the more traditional sleigh and reindeer to make his rounds on Christmas Eve, but added that the hijacking threat and continual attacks by Strategic Air Command F-111 fighter planes had forced him to use the snowmobile whenever possible.

"I don't really like to use the snowmobile," he stated, "but after last year I just couldn't see any other way around it. First of all, some maniac tried to hijack the sleigh in Munsey, Indiana. I was on my rounds, and just had come out of a chimney after dropping off a load of gifts. The hijacker jumped out of the shadows, waving a gun, and threatened to shoot Rudolf unless I took him to Hanoi. Fortunately, I had taken measures against the possibility of just such an attack, and had a crack team of sharpshooter elves concealed a large doll house armed with Fenner Fifties. The would-be hijacker was subdued and dropped off at the nearest Police Station."

"Then," he continued, "as if things weren't bad enough, I was attacked by a flight of F-111's over Jersey City, was forced to land and by the time I had explained the situation to the man in charge, I was over three hours behind schedule. I was very angry, and I'm afraid I let my anger get the better of me. I left the president a sack of coal instead of the Suzy Homemaker Magic Oven that he had ordered. Claus added that, as a result of this action, Nixon had "changed his mind" about making Claus Secretary of Health Education and Welfare.

Claus was asked to answer the charge by minority leaders that he discriminated against children, to p. 15.

Santa was asked whether there was any truth to the rumor that he is having a tremendous credit problem with people over six years old. The jolly old man denied that there was any such problem and stated that the rumor was being spread by the "...Easter Bunny" and that pinko Tooth Fairy."

"This isn't the first time they've tried to screw up my operation," he added, "last year they led my reindeer Ex Lax on Christmas Eve and reported me to the health inspector for unsanitary working conditions. Fortunately, he was on my payroll."

The Pointer asked Claus whether the rash of hijackings in recent years had anything to do with his replacement of his usual sleigh with the snowmobile. Claus assured us that he would use the more traditional sleigh and reindeer to make his rounds on Christmas Eve, but added that the hijacking threat and continual attacks by Strategic Air Command F-111 fighter planes had forced him to use the snowmobile whenever possible.

"I don't really like to use the snowmobile," he stated, "but after last year I just couldn't see any other way around it. First of all, some maniac tried to hijack the sleigh in Munsey, Indiana. I was on my rounds, and just had come out of a chimney after dropping off a load of gifts. Burroughs Introduces New Dorm Government

A departure is being made from the dormitory-hall council system in an executive council headed by co-chairmen. The idea started last spring in Burroughs Hall when the hall council, made up of representatives from each wing, was shown to be ineffective. Wing representatives often did not really want their position but took it because no one else would. The council got bogged down under trite issues.

Abandoning the hall council system, Burroughs' residents were asked to volunteer if they were sincerely interested in dormitory government. From the group of volunteers a twelve-member executive council was formed in May to be lead jointly by two chairman.

The two chairmen share the workload, dividing it according to their interest areas. This also allows for two different perspectives in making decisions.

During the summer a letter was sent to incoming freshmen explaining Burrough's governmental system and asking for participation. The residents were personally greeted by executive council members when they moved into the hall in August. The council themselves had been discussing their objectives, meeting two days before the fall semester. The new system has thus far proved to be effective. Some of the accomplishments have been sponsoring speakers every week, a tutoring system, occasional movies, and currently working on the formation of a test file. They intend to provide Burrough's residents with coffee and doughnuts during finals and coffee on cold winter days.

The council's projects are funded in part from profits on foosball and pinball tables in the dormitory and they are allocated two dollars per resident from Housing.

Aeronautics Course Offered

In the early 1940's Wisconsin State University-Stevens Point provided aeronautics training for young men who were interested in developing some skills in flying. Our main focus at that time was to train the young men who were planning to enter the service and who preferred the Air Force over the other branches of the armed services. Interest was high at that time and a large number of young men were accepted into the program and developed into very capable performers in the aeronautics field.

Now, more than 25 years later, UW-SP is providing ground school training and flight instruction. A preliminary program has been established for the spring of 1973. This will include a ground school course meeting one night a week for 2½ hours for a total of 16 weeks. Flight training will not be provided at UW-SP but arrangements have been discussed with two private carriers for individual flight instruction when and if it is desired by individual members.

The ground school non-credit course will include the following:
1. Preflight facts
2. Aircraft components
3. The four forces
4. Engine facts
5. The three axes
6. Trim systems
7. Fuel systems
8. Meteorology
9. Weather
10. Air masses
11. Advisory service

3. Flight computer
4. Navigation
5. Radio navigation
6. Federal aviation regulations

Arrangements will be made at the completion of the course to have the FAA ground school final.

Examination administered. The cost for the course including books and materials will be a total of approximately $55.00 (dependent upon enrollment) payable at or before the time of registration. A certified ground school instructor will teach the course.

If you are interested in the Aeronautics Program, please contact the Office of Extended Services before the semester break.

Student Government Elections

The Student Government is now accepting applications and persons interested in running for the position of Student Senate for the second semester. Contact Student Government office second floor University Center.

A Christmas Carol 1972

Every year, just after Thanksgiving, the routine of Christmas begins. The decorations go up, the stores stay open, people bustle about for presents, and the little people sit on fake St. Nick’s knee. With this year upon year of traditional magic please allow us to print our traditional Christmas editorial. For, it seems necessary to remind all of a few things during Christmas 1972.

All around us is the constant reminder that Christmas is a time of giving. Which, in our capitalistic society, means the giving of money: charity. Thousands of people volunteer to stand around on corners ringing bells and grown up children become miniature salesmen by ringing doorbells begging for monies for this, that and everything. And what does it all add up to? A hoax, and evil to pacify the wealthy as they give spilling over the cash register. And for those who argue that it is still the church which sustains the Christmas spirit. We ask this: where did the money come from if not from the public through taxation and corrupt business means? And just where does this money go? It certainly does not go to the government to build parks, old age homes and hospitals because charitable money cannot be taxed. Instead, it stays in private hands of people who build private facilities. And every time they build a new facility the wealthy increase their power and control over the public. The public that “donated” the money. Charity, then, is just another exemplification of the corruptness of business. It should be scorned upon all year ‘round and especially at Christmas in favor of real good will.

It is hard to speak of anything in the United States as separate from business. And this is even more evident during the holiday season. For, there are the Christmas trees, presents, decorations and food to buy. This would not be bad if it were not for the corruptness of business. Whatever Christmas meant in the past, it means one thing now: It’ll be for those businesses there would be no Christmas as we now know it. Their ploys and gimmicks create the Christmas spirit. If this is not true, try celebrating Christmas in September and see if the spirit is there. Stores decorate their windows blast Christmas music throughout so that when the perspective buyer enters he will gather the spirit of Christmas around him and find his benevolence spilling over the cash register. And for those who argue that it is still the church which sustains the Christmas spirit we ask this: where did the decorations, the robes, the church itself come from, heaven? No, even the church relies on business for the Christmas spirit.

Christmas then, is a business ploy not solely for profit, but for creating the “Hallelujah Chorus” and the “Santa Clause Puppets” because of the Christmas spirit.

But What is Art?

To Which Editor it May Concern:

Due to the fact that you lack the guts to sign your article, “A Word On Art” in the December 1, 1972 issue of the Pointer, I will address this letter “To Which Editor it May Concern”.

You pointed out several astonishing things, not about art, but about the lack of professionalism and informed editors on your staff. I do realize that the backwoods environment and become more informed before he makes such generalized and bold statements. I guess on this campus it takes less effort to dabble in print than it does “blocks of plastic or clay”. You make statements such as “we provide vague answers about self-expression and we cannot even answer the question, “What is Art?” I do hope your use of ‘we’ in these statements do not include myself or many of my students because frankly, I do not feel we can stoop down to your level to be included.

A final note in regard to the Pointer and it’s amateurish staff. You stated in your article “Is wrapping garbage art?” I would have to answer no but I do find your paper is hardly for such mundane things and that is about all.

Ronald Schrube
Instructor—Dept. of Art

Student Senate Gets A Boost

To the Editor:

As a candidate for the Student Senate this past fall, I encountered various opinions concerning the student government at Stevens Point. Many people felt that student government was an unimportant, powerless organization, and felt they were rather alienated from it. During the last few months I have worked with the student government and found that it is a very important group on campus.

The students in general are represented by the Senate and individual groups are represented by the Assembly. There are approximately 46 organizations represented in the Assembly. One of the most important powers that the student government possesses is its representation on the university committees. Presently there are approximately 16 committees that have students on them. For example, there are students on the following committees: health service, library, finance and allocations, faculty affairs, student affairs, parking appeals, chancellor’s women’s affairs, and campus environmental evaluation committee. There are presently 41 students on these committees.

The student government also provides an insurance plan for students which is considered to be one of the best among the state schools. Approximately $330,000 dollars is appropriated by the student government each year. These monies finance UAB and other campus organizations.

The student government at Stevens Point is a member of the United Council, which organization that includes student governments at state schools. United Co is working in the state legislature to give students a voice in a new merger system. A merger of the two university systems has been signed details of policy are still worked out. The government, through the Board of Regents, now has a voice.

The only student body a voice on the faculty is the student government. The body also has a repre sentative on the Board of Regents. The government is involved in many community relations. As a student at Stevens and as a member of the Senate, I feel that the government is doing a very good job of representing students in the university establishment. They give the students a voice where otherwise would not have.

Sincerely,
Gilbert Yeeke

Washington Watch

The Unfinished Business

Washington, dazed and bleary from the campaign, comes back to work and a pile of critical problems and decisions. They are:

The Economy. The Nixon program in "crack-down": getting Federal funds in at the top to encourage profits and jobs - has produced a $100 billion accumulated Federal deficit for four years; inflation, a badly weakened dollar, growing poverty, concentrated wealth, and has not brought the jobless rate down to the hoped for four percent.

The Federal budget is so out of kilter with heavy military spending, the Christian Science Monitor asks, "Where is the money coming from?" In the same newspaper, former Deputy CIA Director Herbert Scoville Jr. States: "It is the large increases in the defense budget which are the major contributors in inflation... Why do we need to further enlarge our present strategic arsenal?"

The cost of living "dominates" letters to Congress, says Senator Vance Hartke (D-Ind.): A woman writes, "How can I keep my house and buy food and clothes and pay heat for my home this winter? You see how it is for me and all us poor people."

(A growing number of Americans are barely hanging on. The Labor Department finds thirty-three million women working "because they have to. They need the money.") The Christian Science Monitor reports. The Census Bureau says 13.3 percent of Americans live below the poverty line; one-fourth the elderly are in serious need, as are a seventh of the children and one-third of the blacks. The New York Times notes, "Half the nation's poor are still going hungry, according to the findings of a leading citizens' organization on malnutrition (Citizens Board of Inquiry into Hunger and Malnutrition)."

Yet last year, the Agriculture Department turned back $418 million in unspent food assistance, following White House orders to cut unneeded costs.

(While the Labor Department reported in late October that wages rose only sixty percent as fast as prices in the first twelve months of controls, The Business Week advises that US companies "are posting a truly dazzling profits performance in the second quarter of 1972," after tax earnings were fifteen percent above the same period last year. The Monitor reports that after tax profits for the third quarter are "substantial, estimated at an annual rate of up to $54.7 billion. This is a forty-five percent resurgence in corporate profits" since November 1970, and seventeen percent since August 1971; this compares to gains in hourly earnings of eleven and six percent.

Those who have seen the imposition of Federal wage and price controls as favoring business over the wage earner and the consumer have been supported by the results."

Fortune points out that the 500 largest industrial companies "now account for one-fourth of the sales of all US industrial companies, seventy-five percent of their total profits, and seventy-five percent of their employees."

Senator Supports O'Halloran

The editor:

Resolution: Whereas: The athletic program of the University of Wisconsin-Stevens Point has been, and is, and will continue to be an integral part of the university atmosphere which we here at Stevens Point enjoy and appreciate;

Whereas: The athletic program is important as a fine mode of recruitment for the student athletes and for the recruitment of all students to our university, thereby increasing the growth and stature of our university and the benefits accruing to it by this nature of enrollment and involvement;

Whereas: The fine group of interested alumni, townspeople, and businessmen known as the Quarterback Club have enhanced the stature and continuation of fine programs and relationships through their efforts and contributions;

Whereas: Patrick O'Halloran, through whose efforts the Quarterback Club has been established, fostered, and matured, has been a fine asset to the University of Wisconsin-Stevens Point therefore:

Be it Resolved: That the Student Senate and Student Assembly hereby express and record, on behalf of the entire student body their thanks and appreciation to Coach Pat O'Halloran, the present coaching staff and all the supporters of UW-Stevens Point athletic teams especially the Quarterback Club for the fine work they have done on behalf of the progress and enhancement of our university.

Motion Passed: unanimously.

This bill passed by the University of Wisconsin-Stevens Point Student Government is to express our appreciation for the fine help these interested parties have shown toward our university.

As the recognized student leadership organization on our campus, we feel it our duty to make this public on behalf of all our students.

Sincerely,

Joe LaFleur
Student Body President

Motion Passed: unanimously.
Intramurals

by Jerry Long

We’ve reached a kind of interregnum in the season, as games have been completed and play-offs are under way. Out of 73 teams, comprising eleven leagues, the following teams are the champions of their respective leagues: I-Bloody Mary’s Babes, II-Doo-Dabs, III-Gracies Spacies, IV-Village Vacancies, V-1st East Roach, VI-1st South Thomson, VII-2nd South Thomson, VIII-4th East or Bunnies, IX-Netnotts, X-the Wild Bunch, XI-Freda’s Follies. After the first two rounds of play-offs, there are five teams with a shot at the championship. These teams are Freda’s Follies who will face Bloody Mary’s Babes, and either 1st East Roach or the Village Vacancies will meet the 4th East or Bunnies. These teams will play their semi-final games on December 11 at 6:30 p.m. with the Championship game to follow at 7:15. Also on December 11, the University’s Intramural Christmas Party and election of new staff members will be held. All women are invited to take a study break and join the fun at the field house.

Bowling

Bowling has moved into the second round. There are fourteen leagues consisting of 43 teams. Due to space limitations, we shall report the top seven teams only. 4 West Smith leads all teams and the Smith-Watson league with a pin total of 3188. 3 West Watson leads the 14th league with 2996 pins. 4 East Pry leads the Pry league with a total of 2962 pins. The Vets lead the Student Organizations league. Their total is 2962 pins. The leader in the Smith league is 2 West with 2923 pins to their credit. The Fraternity league is led by SPE. Their total is 2913 pins. The Hyer league is led by 2 East and their total is 2824 pins.

Entry Dates

As we swing into the second semester, we find intramurals retreating indoors. This is due largely to the fact that the people at the Science Building haven’t been able to find a way to prevent snow from falling on the various playing fields. Have no fears, Pointer fans! Tim Sullivan is working on the problem!

However, until Tim finds a solution, Badminton, Handball, and Basketball will have to be played outside. And, if you want to participate in these sports, you’ll have to get your entry sheets in to the Intramurals office no later than January 17.

A Note of Thanks

Throughout the first semester, I have been ably assisted by Lynn Giersch, who has kept tabs on women’s field hockey and volleyball. Many thanks, Lynn.

Sharp Shooters 1972

The Second Annual Sharp Shooters Contest will be held Thursday, December 7, in the Berg Gym. There were fifty men who made 20 or more free throws out of a possible 25 attempts. These Sharp Shooters are invited to attend the Sharp Shooters Contest. An award will be given to the sharpest shooter. The contest will begin at 7:00 p.m. Check with the Intramurals office to see if you are among these men.

Toyanna

Are you having trouble getting it all together?

How many times have you asked yourself what it’s all about?

Who Hasn’t?

So here’s something for you . . . A new kind of course:

HD185 Man and His Meaning 3 credits

To Experience another human being is the fundamental ground from which all personal meaning arises. Contemporary man’s basic need is the recovery of ‘self’ through knowing other persons. This course is intended to create that approach in which personal meaning can emerge from the whole experience. When man allows himself and another to be, an integrated radically new vision of values emerges.

This course is about you, because it is for you. If you are wondering about a lot of things, but are tired of doubting everything, give this a try!

This is an extension course of the Division of Human Development, Saint Mary’s College, Winona Minnesota, offered in Stevens Point under the auspices of The Institute for Human Development, William Jablonske, Director. Saint Mary’s is a member of North Central.

Fees may be paid in advance or on the day of final registration.

Costs: Course and full credit $50 (3 credits)

Course but no credit $20

Classes begin: January 15, 1973. Place to be arranged. (Call 341-4446)

Voyaging To Vienna With Red-handed Riches?

The first question becomes, how to raise $40,000 without going off the campus to solicit funds? This is the problem Dave Worth was faced with when the members of the University Choir put him in charge of raising money for their trip to Vienna.

You could then easily ask, what do they need the money for? According to Worth, the University Choir is one of seven choirs selected out of 50 applicants to attend the Vienna Workshop (choral symposium) in August, 1972. The cost for each choir member would be about $750 for the 2-week workshop and a one week tour. They are hoping to raise at least half the money, so that each of the 50 choir members would only have to pay around $400.

A recent attempt to raise money was through the well-publicized Action Club. At the time Worth was interviewed, publicity for the Action Club had been dropped. When asked about this, he said there was a question as to the legality of the club. He feared the club could be found illegal, they were going to fold it.

Before starting the club, they had checked with the local district attorney. He wasn’t sure of the legality, but said since it was a small fund raising drive not for personal gain, his office wouldn’t prosecute.

However, a state attorney general has collapsed the Blue Line Club, a community club used to earn money for the youth hockey group in this area. The Blue Line had been the example that the choir used in forming the Action Club. Worth said that even if the Action Club were to be found legal, they may drop it at the end of this month for monetary reasons.

During the first month of operation, the club lost $900. Even into the set up of the club, there is a possible amount of $900 that could be collected each month. The 15 officers are paid a total of $500, leaving a total of $200 profit if all 2,000 membership cards are sold. However, even if less than half are sold, they must still pay out the money for the officers.

The club is actually a monthly raffle with monetary prizes instead of goods. It was thought to be legal because it is in the form of a club, and there is somewhere that it says how the club must pick its officers—by popular election or by a drawing.

When asked what else they were doing to raise money, Worth said they held a raffle last spring that was fairly successful. Every Monday, Wednesday, and Friday they sell coffee and doughnuts in the foyer of the Fine Arts Center. They also sent a letter to all the parents of freshmen, offering to bake them a birthday cake for $1.50. These are all small projects and only bring in a couple hundred dollars.

Another plan they had was to send a letter to the governor asking for an endorsement to get funds elsewhere. Just prior to sending this letter, Chancellor Dreyfus sent a memo stating that no group was to go into the community for money for private fundings. Due to pressure from the community in the form of letters sent to him, Dreyfus changed his mind and said that if they would compose a letter, he’d send it to the governor for them. The choir received some outright donations from the community as a result of the Dreyfus memo. Worth said they were looking for organizations that give money to groups like the choir. They prefer grants to raffles because the members put so much time into the choir already that there isn’t much left over to bake cakes and sell tickets. The choir meets 5 hours a week for one credit.

Due to the fact that the University loaned them a registration fee of $250 for the Vienna Symposium, the choir started out their fund raising drive in debt. Presently, they are still $200 in debt but Worth is optimistic that they will raise the money.

When asked what would happen if they didn’t raise the money, he said, “I’d be a shame if we didn’t go. We’d miss a lifetime chance.” The choir auditioned 2 years ago and was accepted for last August. They decided not to turn it down then because they couldn’t raise the money. Doctor Kenyard Smith, director of the University Choir, sent in another audition and they were accepted for the 2nd year in a row. This is the last year of the symposium, and their last chance.

The University Choir was put him in charge of raising money for their trip to Vienna.
Editor's note: The Pointer received the following information from the Office of Protection and Security regarding actions between the dates of Nov. 17 through Nov. 28.

NOVEMBER 17
Larceny Private Property (Alleged). Four hub caps stolen from vehicle in Lot Q. Approximate value $25.00.

NOVEMBER 28, 1972
Fandalismand Security Report

Schmeeckle Hall. Approximate value $15.00.

Fendalism State Property

Larceny Private Property (Alleged). Bicycle, boy’s type red Schwinn, 3 speed, no fenders, boy’s type. 26", not secured from north side Old Main Bldg. Approximate value $60.00.

Larceny State Property (Alleged) Chemistry Dept., Science Bldg. Three triple beam balances, one timer, one battery eliminator. Approximate value $120.00.

Vandalism Private Property. Locked car in Lot T. Rear side window smashed, radio antenna broken off. Estimated damage $45.00.

Larceny State Property (Alleged). Over $75.00.

NOVEMBER 22, 1972
Larceny Private Property (Alleged). Bicycle, black Schwinn, 3 speed, no fenders, boy’s type. 26", not secured from north side Old Main Bldg. Approximate value $60.00.

Larceny Private Property (Alleged). Cuky from vehicle in Lot P. Approximate value $70.00.

Larceny State Property (Alleged). Stereo, Watson Hall. Approximate value $120.00.

Soviet Tour Offered

John J. Oster, associate professor of political science at UW-SP, will lead the annual spring Soviet Seminar Tour offered by UW-SP.

About 25 local students will participate in the three week program from April 4 to the 25th.

Oster, will be accepting reservations from interested students, provide orientation sessions and be in charge of a three-credit course to be offered in conjunction with the tour.

The trip complements a Russian and Eastern European Studies Program which is part of the UW-SP curriculum.

The Stevens Point group will be joined by contingents from other UW campuses in a cooperative travel venture. For the past five years or so, the university system has been coordinating a spring trip to the Soviet Union and a previous one had Oster and his wife in roles similar to those they have been recently re-appointed to.

The Osters also were faculty members for a Semester in Britain group several years ago. This year’s tour will include stops in Helsinki, Finland and Leningrad, Tallin, Kiev, Odessa, and Moscow, all in the Soviet Union. Cultural, agricultural, industrial and other centers will be visited in those places.

Cost of the trip is $600 per person, including transportation, room, board and city tours. Persons may register by contacting Oster.

Discount Week

Mon. Dec. 11th thru Friday Dec. 15th will be Discount Week at the University Store in the University Center. The Discount Schedule is as follows: Mon. — Soft Goods Dept. 10 per cent off all merchandise.

Tues. — Gifts & Novelties 10 per cent off all merchandise

Wed. — Books 10 per cent off all merchandise

Thurs. — Art Supplies 10 per cent off all merchandise

Fri. — School Supplies 10 per cent off all merchandise

Many Gift Items at Bargain Prices.

Protection And Security Report
Joint Meeting Held

The UW-SP Environmental Council and the Steering Committee of the Wisconsin Coalition for Balanced Transportation will hold a joint meeting on Sunday, December 10, at 1:30 p.m. in the Garland Room of the University Center.

The Coalition is an association of citizens groups interested in the allocation and direction of state transportation efforts. The coalition has adopted the position that state transit should be increased.

The meeting Sunday seeks to provide an opportunity for exchange of ideas between the Coalition and the University Environmental Council. In addition, the Coalition seeks to finalize a legislative program it will recommend to Wisconsin lawmakers.

UC Governing Board Vacancies

The University Centers Governing Board has student vacancies. Anyone interested in the university center and its program may pick up an application form at the information desk of the university center. Any student graduate or undergraduate is eligible.

Come To A Carnival!

There will be free games ranging from golf to pie-throwing, prizes, and refreshments. Also as the special attraction, direct from the North Pole, Santa Claus, will bring your Christmas list. Come over and enjoy yourself.

Everyone is invited to come to “Winter Carnival-Land” sponsored by the Social Recreation class, PE 343. It will be held Tuesday, December 12, 1972, from 1:30 p.m. to 2:30 p.m. in Berg Gymnasium, Fieldhouse.

In recent years there has been a growing theme of "going back to Nature". One way in which this can be accomplished is to make your own furniture or work in leather as well as in ceramics.

University Center Arts and Crafts Studio is designed to give students the opportunity to learn and participate in such crafts as leather work, macrame, beadwork, wood cuts and linoleum prints.

Every Monday through Thursday, 6:30 - 10:00 a.m. student instructors will be at the studio to help you with your projects. The use of all equipment is free to any University student. The studio is located on the second floor of the Union Center, just follow the signs.

Hand made gifts always carry special attraction, and with Christmas only a month and a half away there is still time to make that pair of moccasins or belt for your brother or sister. If you wish to learn a craft, make your own gifts, or express yourself in a unique way.

’Tis the season to be jolly,
So, come down and drink, by gollys,
Curve them curves which is only fair,
While rumors of finals air in the air,
Next year will bring on a new professor,
And we’ll all come back strong next semester.

344-3960
**Electronic Battlefield Cont.**

The first BLUs were called "smart" because they contained 250 to 200 steel pellets which, on impact, sprayed out horizontally and vertically, causing the enemy to hide in holes and so more efficiently hit and wound those developing the pellets which can spray out diagonally. These can be exploded on the ground, or, on impact, after a time delay, depending on the target. A single aircraft can deliver 400,000 to 500,000 pellets.

There are another type of nonbombs called "antitank mines" which contain 60 to 100 barbed nails and are said to be accurate within 6 ft at 4 miles. After only 20 men or more from the battlefield, all three million military men would be immobilized, even with low-cost, pilotless aircraft (drones) to deliver missiles, or self-destructing missiles. Some are said to be capable of entry planes or engaged in combat planes they would be shot to death by the Pentagon for any sensitive targets.

The mines are set to mind a picture of a general's sitting before his living room television set and engaging in enemy in battle. If the enemy is not floored, the electronic battlefield, the machines could fight it out among them.

**Weapons**

Weapon systems in the electronic battlefield include high explosives with bombs weighing from 10 to 30 pounds (11 to 60 kg) on anti-personnel mines.) are for use against unprotected personnel; incendiary bombs for burning persons and animals as well as inanimate objects; and armor-piercing bullets which are capable of wide uninhabitable areas.

In counterguerrilla warfare, poison gas may be the most effective because the enemy is so sparse. On popular support. Therefore, in Vietnam antipersonnel weapons are expensive. In the war in Vietnam, people are used. In fact, 50 per cent of weapons provided are said to be antipersonnel.

Basic to this type of warfare is the cluster bomb (CBU) where a mother bomb contains a number of smaller, smaller live bomb units (BLUs). After release from the aircraft the CBUs open, releasing BLUs from 800 to 1200 meters and disperse the BLUs throughout the area. The effectiveness of BLUS is based on fragmentation pellets or detonating effects on the area's victims. They are intended to incapacitate and remove from previous action, the enemy and occupying people; immobilize doctors and nurses who must care for the victims; and damage morale. Bombs with delayed detonation create the same fear and thus try to use the victims.

**The Country South Vietnam in area, India.**

Compared to South Vietnam is slightly larger than Texas. From 1965 through 1971, it was bombarded with 311,000 tons (277 kilotons) of bombs. In the same year, Gen. Westmoreland, said editorially, "... The enemy is better off today (1969) than it was in 1965." In October of the same year, Gen. Westmoreland announced the electronic battlefield concept which was developed by the Nixon Administration indicated that bombing undermined North Vietnam, and thus, caused the enemy to allow the stepped up aid from the United States and other forces.

In 1969, similar conclusions were realized in a study conducted by the Nixon Administration. Secretary of Defense William P. Clement, said, "In terms of total economic and military resources available to the United States, the enemy in Vietnam is better off today (1969) than it was in 1965." In October of the same year, Gen. Westmoreland announced the electronic battlefield concept which was developed by the Nixon Administration indicated that bombing undermined North Vietnam, and thus, caused the enemy to allow the stepped up aid from the United States and other forces.

In Vietnam, it is said that the enemy will have a better off than it was in 1965. In 1969, similar conclusions were realized in a study conducted by the Nixon Administration. Secretary of Defense William P. Clement, said, "In terms of total economic and military resources available to the United States, the enemy in Vietnam is better off today (1969) than it was in 1965." NEWSPA
The 1973 basketball season is starting to move into full swing, and as usual, certain professional teams are having problems with their star players. The Phoenix Sun's star forward, Connie Hawkins, recently stormed off the court during an NBA game and left the building because he couldn't get along with his coach. Archie Clark of the Baltimore Bullets is holding out for more money. Julius Erving is still wondering which team he's really on, because a guy says, "I play basketball because I love the sport." The more money they get, the louder they are claiming rights to him.

Patience pays off.

Investigation shows that Roundy's claim to fame occurred last year, when he was playing for the Vets in the UW-SP Student Organization League. He made a layup, thus ending a five-year scoring drought. Roundy Kluetz graduated from Wausau High School in 1961, where he had serious thoughts about playing football, basketball, and baseball. He came to our local university in the mid-1960's, intent upon earning a degree in history.

He also had one more intention. Roundy wanted to score at least two points in collegiate basketball in an intramural action before he graduated. It didn't look like Roundy would ever do it. His Vet Coach for the first three years, John Schmitz (LaC du Flambeau), commented, "Roundy was somewhat of a gunner back then. I know, because I played three years with him as a player-coach. He always tried a crazy half-court floating back shot, and he never drew iron on any of them."

Nevertheless, Roundy finally saw his dream come true. Last year, he coached the Vets to a 6-0 record, occasionally seeing spot-duty. Then came the big game, featuring the Vets against the tough Interarsity Christian Fellowship team, led by Dean Kroger, a great Pointer football team linebacker. The game was moved up at 29-26 with neither team able to muster a commanding lead. Suddenly, Roundy reported into the game.

The Vet's Bob Nieson, a forward from Kaukauna, grabbed a defensive rebound and fired it downtown. The gymnasium fell silent, as Roundy raced for the ball and headed towards the basket. The other Intramural game was stopped, so everyone in Berg Gym could witness the historic occasion. It was Roundy and the ball versus the basket, with the defenders a half-court away.

Roundy caught the pass in stride, dribbled once, and tossed his shot up. The ball caused the edge of the backboard, bounced off the outer rim, spun around twice, and barely fell through. Roundy had just made his first basket in organized play!

The onlookers erupted with joy. Roundy's basket was the turning point of the game. The Vets, elated over Roundy's performance, roared on to win, 49-38.

Several of the Vets elaborated on Roundy's shot. Gene Procek, the center from Hurley, said, "If Roundy would've blew that one, I knew we never would've won," Guard Jim Sanders (Minocqua) noted, "I've made a hundred of those shots, but Roundy's lay up sure turned the game around!"

Vet forward Bob Nieson mentioned, "I knew there was one of our guys downtown when I threw that pass, but I hoped it wasn't Roundy. I didn't think he could make it, because as you probably know, he never scored for five years. Actually, I thought he was Sanders." A spokesman for the Christian Fellowship team sadly admitted, "I knew we were finished as soon as he made that shot. The Vets were so aroused after his basket that we knew we didn't have a chance."

When asked if the layup was his biggest thrill in sports, Roundy replied, "Definitely. It proved that I was able to score in an official league. It helped me to get rid of my playmaker image."

Roundy was asked if he ever came close to making a basket before. He said, "Yes. I hit the backboard twice in the same game. They were both on free-throws."

Roundy summed up his basketball ineptitude by saying, "For one thing, my coordination isn't so good for basketball any more, and I'm far too short (5'6"). Also, I'm getting too old for the game - they don't make the baskets as big as they used to."

Roundy will be graduating in December, so he was asked if he plans upon playing basketball in the future. He quickly answered, "No way. I've finally achieved my goal. I officially have my basket. My only regret is that we went undefeated until the playoffs. We played the next week and were slaughtered by the dorms. I had a good chance to make another one of those layups but unfortunately threw the ball over the backboard. I would like to thank the rest of the Vet players for putting up with me."

Dave "Roundy" Kluetz will never make anyone's All-Pro, All-Conference, All-State, or even All-Intramural team, but you have to admire his persistence. He was not out for money, publicity, or awards. He merely wanted to score a two-point basket in intramural play, and he finally did it, even if it is longer than he expected.

Superpickers Rate Packer-Viking

by Tim Sullivan and Mike Haberman

Last week was our best prediction week of the year, as we guessed a total of eleven professional games correctly. The only teams which failed to cooperate were the Giants and the Lions.

New York lost by a lousy three points. If Cincinnati hadn't knocked Giant quarterback Norm Snead out of the game, New York would've been the winner.

We slightly blew the Packer game. We surmised that Ron Jessie, Larry Walton, and Charlie Sanders would each catch touchdown passes for the Lions. Jessie did catch his, and Walton caught a 50-yard toss, but Sanders played the worst game of his career. If the Packers would've allowed Detroit to use the ball more on offense, the score would've been a lot more respectable.

Here now, is the way we see week 13 of the National Football League turning out.

TWO GAMES ON SATURDAY

DALLAS OVER REDSKINS - The Red skins already have a playoff spot locked up, but Dallas must keep winning to keep their Super Bowl hopes alive. If Washington's Billy Kilmer gets injured, Washington is in for trouble, because they don't have an established back-up. Dallas, on the other hand, has both Staubach and Morton ready to go, and their receivers are so good that Bob Hayes and Lance Alworth don't even start. Dallas by 10.

BENGALS OVER BROWNS - Cleveland is useless against tough teams, and the Bengals have one of the best defenses in football. Essex Johnson will overshadow Leroy Kelly, and Bo Scott should do a lot of fumbling. Cincinnati by 13.

SUNDAY'S GAMES

VIKINGS AGAINST GREEN BAY - This is the showdown of the year, and it's being played in the warm friendly confines of Metropolitan Stadium in Bloomington, Minnesota. Sullivan thinks the Vikings will win. Unlike Detroit, Minnesota has a few people who can play defense, like Page, Eller, Winston, and Hilgenburg. Haberman is going with the Pack, mainly because of their momentum and Brockington.

BEARS OVER EAGLES - Two of the most explosive teams in pro football go at it in this one. Last week, the Eagles surprised a lot of people by actually scoring a touchdown against Washington. The Bears, on the other hand, actually have some scoring potential, if their backs could avoid fumbling and some of their ends would at least run out for token passes, even though they know Douglass won't throw the ball anywhere near them. The Bears should win by 3.

LIONS OVER BUFFALO - O.J. Simpson should get a bunch of yards against Detroit's non-existing defensive front four. The Lions should never have dropped Alex Karras and allowed Carl Brettschneider to retire. Detroit however does have a great offense against weak teams. Looks like Detroit by 14.

RAMS OVER CARDS - St. Louis has had a very dismal year. The Cards have plenty of not so good quarterbackbs, and an abundance of equally unimpressive running backs. The Rams shouldn't find much difficulty winning this one. Los Angeles by 14.

DOLPHINS OVER GIANTS - New York's badly mangled troops have just enough key injuries to wipe out any threat of a Giant upset over the unbeaten Dolphins. Miami squeaks by, 28-14.

SAINTS OVER PATRIOTS - Surprisingly, New Orleans has been a pretty good team lately. The Saints beat the Rams, and barely lost to the Jets with one second left. They should out-class the Patriots. Saints by 7.

STEELERS OVER HOUSTON - Pittsburgh has been destroying opponents lately, and the Steelers offense is awesome. Houston will be out of this game after the first quarter. Steelers by 21.

CHARGERS OVER BRONCOS - Both teams are also-rans who are capable of playing over their heads at times. We give the nod to San Diego, because the combination of Hadl to Garrison is more dangerous than the brilliant running of Floyd Little. Chargers by 3.

OAKLAND OVER JETS - This is the Monday Nighter, and the Raiders will be using this game as a tuneup for the upcoming playoffs. Oakland has most of the star players, but the Jets could pull off an upset if Namath gets time to hit Bell, Maynard, and Caster. Should be Oakland on Blanda's last-minute field goal.

ERS OVER FALCONS - Should be another close one, but Brodie and Spurrier get better pass protection than Bob Berry of Atlanta. Also, Bruce Gossett is a better kicker than Bill Bell. 49ers by 10.

KANSAS CITY OVER BALTIMORE - Marty Dourene could be hurt, and Johnny U. isn't fast enough to avoid the Chiefs' front four. The Chiefs don't give a damn about the season's outcome, but Kansas City still has more talent than Baltimore. Chiefs by 7.

We could be wrong on at least six of these games, but we've been hot lately, so you might not be wise betting against us.
