"Cure" May Be In Sight For Health Service

(Part One)

By Dan McGlynn

It long lines and waiting at the Student Health Service have added to your ills, the 'cure' may be in sight.

The Pointer visited the Health Service recently, and its Director, Dr. Donald Johnson, acknowledged the difficulty: "The biggest problem here is trying to get rid of inferior waiting problem. The causes were not enough people, first of all; we were seeing over 15,000 patients a year. We just haven't had enough people, either doctors or nurses, so now we've been adding staff, and hopefully that should improve things.

As of September 25th, Dr. Gerhard W. Hettler became the third full-time physician at the Health Service. (There is an attempt being made to find a fourth). Johnson also cited the addition of an automated record retrieval system as a second response in the war on waiting. (Many students will also be happy to learn that the revered student health number is now but a fond memory. The use of the new system is expected to help speed things up a bit.)

The Health Service expects to operate on a budget of about $30,000 this year, the funds coming entirely from student fees. The Health Service does receive free use of the building and free utilities from the State. A portion of the Student Activity Fee is allocated to the student health services out of a total anticipated range of about 17-20 dollars a year. In return for this, the student is entitled to an unlimited number of visits to the Health Service.

Health Services Outlined

According to Johnson, the student receives "90 per cent" of all laboratory tests and "95 per cent" of all medications free of charge. He noted that only "rare and unusual" lab tests and medications cannot be provided at the campus hospital. In addition to the treatment of minor injuries and all illnesses, allergy injections are among the services offered. Johnson added that prescriptions and lab test requests from a student's hometown doctor can be handled at the Health Service. Long-term medicines can be ordered on a "cost" basis, resulting in considerable savings for the student. Testing for venereal diseases and pregnancy is handled on a strictly confidential basis, with information released only to the patient.

The only things not included in the out-patient services provided to students are hospital beds and X-ray facilities. Johnson has felt that "the opportunity and proximity of the local hospital, "it would be a waste of money to duplicate another little hospital or infirmary here."

The high cost of X-ray equipment, along with what Johnson described as "fantastic good will" from the hospital, influence his opinion that such facilities on campus would be a duplication of effort. Johnson noted that infirmaries at some institutions "across the system" seem to be about "90 per cent empty most of the time."

The cost of a hospital bed or use of X-ray facilities at the hospital must be borne by the student if it is not covered by health insurance. Johnson explained that the Student Senate was informed of the Health Service of all coverage provided by the latter, and advised to adopt a policy that would cover everything else without duplication. Johnson recommends the current WPS policy, adding that "it doesn't duplicate anything so the premium should be less than anything else.

Night Service a Problem

While the three full-time physicians have "no other formal training" they are on the hospital staff so that they may admit and treat students there. Noting the difficulty of providing emergency coverage at night, Johnson said that the acquisition of a fourth doctor would be a solution. He stated that some other physicians were "less than enthusiastic about seeing university students," and the feeling at the Health Service has been that it would like to provide all coverage for students. Pointing out the difficulties in being "on call" even at night, Johnson stated that if "we can get up to four physicians we will provide 24 hour coverage for the entire university." (The cost of night and week-end visits to the hospital by Health Service physicians must equal academic year. Johnson said that if he-she does not have health insurance. Johnson cited the fact that university salaries paid to Health Service physicians are below what could be made in private practice, and that these salaries are considered to be for the normal working day, in essence Monday through Friday.)

Nurse Practitioner Program

Don Johnson, Director of Student Health Service, praised the Nurse Practitioner Program employed here as a unique and positive step. (There are three staff nurses and a nurse's aide: "The nurses here are much more highly trained than the average nurse. They are trained to see and evaluate, to order laboratory tests, and to do a certain amount of treatment. We feel that the nurse, with her training, should be able to do more than purely secretarial work."

The training consists of daily-in-service experience with Health Service physicians, as well as lectures by outside specialists on specific medical topics. In addition to sessions with the University Health Educator, the nurses attend meetings of the Wisconsin College Health Association and other groups. There is a frequent use of reference materials, as well as continually augmented standing orders.

Dreyfus Celebrates Fifth Year

Lee Sherman Dreyfus celebrated his fifth anniversary as Chancellor of UW-SP Friday night. The Chancellor and his wife attended a pep rally held in their honor, a "college house party," and an informal gettogether with students in the LaFayette Lounge.

Dreyfus, the ninth man to hold the office of Chancellor, began his term as UW-SP's campus head on Oct. 2, 1967, in what was then the University of Wisconsin-Stevens Point. During his reign as Chancellor, Dreyfus's major goal was to "put the institution on the map," by establishing himself as a spokesmen throughout the state, and promoting UW-SP as a "state-wide institution which desires to put its resources to work in a variety of services."

Dreyfus did not confine himself to the campus, or the country, in his attempt to put Stevens Point on the map. Through numerous "outside activities", the Chancellor has represented this university as the chairman of the U.S. Army Reserve Officer Training Corps Advisory Panel, the chairman of a mission for higher education in South Vietnam, chairman of the Council of Wisconsin State University Presidents, chairman of the Governor's Blue Ribbon Cable Television Commission, consultant in education to the Secretary of the Army, and the commissioner of the North Central Association of Colleges and Secondary Schools, to list some of the more outstanding activities.

Dreyfus believes that one of his most important roles was that of an "unofficial champion" for the merger of the old State University System with the University of Wisconsin.

In the years that Lee Sherman Dreyfus has been Chancellor of this university, the institution has grown tremendously in physical size, enrollment, faculty size, and curriculum. As a result, Dreyfus's years have been, perhaps, the most demanding of any of the previous Chancellors.

About two years ago, Dreyfus hinted that his heavy schedule was "Taking the fun out of his work", and that he might resign after five years. Since then, however, Dreyfus has publicly stated that he has no intention of leaving Stevens Point, and has talked of a wish to become a full-time professor here.

This fall, a rumor was circulated that Dreyfus was next in line for the position of Secretary of the Army, but the Chancellor brushed off the rumor as a joke. Dreyfus has also been reported as being "seriously considered" for the presidency of the overall UW system and also of Kent State University in Ohio. However, for the moment, it looks like the Chancellor will be around to celebrate his tenth anniversary here at UW-SP.
Interview Of The Week

George Guyant, Portage County Board Member

George Guyant is Portage County Board member for the 11th Ward, which includes the city area. A former UWSP student who plans to graduate with a political science major, he is presently employed by Sentry Insurance.

He encourages any person with a question or problem concerning county government to contact him at 341-2133, or at 349 Second Street North.

Pointer: Sentry evicted you from your Reserve Street home. What happened?

Guyant: I was renting a house owned by Sentry Insurance who I've also worked for about five years. One day they came and told me I had to move. I protested and asked why. They said they didn't know why but that I had to move. I then found out that the Red Lion, for security reasons, wanted someone living next door who managed the place. My argument was that the thing sat there for how many years and the managers never lived next door. Why suddenly now? There's never been a security problem there. There are being a lot of changes in their systems, a lot of dogs, myself. I'd watch the place. Anything, but let me stay.

My problem was that I must live in the Ward that I represent and in an area where two-thirds of the population lives. Out of 1800 people, only 600 lived outside of dorms. There are two large apartment complexes I could have lived in but I've got a dog, rabbits and kids. So it left maybe 100 homes in the ward I could live in. I wasn't about to give my seat up. I had it. I put it on the line and said if it means my job, fine, take my job but give me my house. They insisted on taking my house and not my job. I finally found a place to buy since there was nothing to rent. I was paying $85 a month for rent; now I'm paying $137 a month for house payments. They claimed there were no political motivations behind it but it took me 45 days just to find out who made the decision. I think this individual made the decision; I was just a number so I could be moved out. There are still some questions in my mind. If it was politically motivated, I don't think it came from the Sentry hierarchy. I think it came from a few individuals farther down the ladder.

Pointe r: Why do you think there might have been political motivations?

Guyant: Because I'm not the normal Sentry employee and I think, in a way, I'm a thorn in their side. When it came down to the house or the job, they didn't want any political embarrassments as far as firing me. They really had nothing to fire me on except that I hassle about a house. Also, although there's not really a Sentry clique on the Board, there are quite a few Sentry employees. I don't give the accepted Sentry image with long hair, a beard, etc.

Pointer: How extensive is Sentry's influence on the Board?

Guyant: Right now, six out of the 27 members work for Sentry. Their influence is not too great in county government because there is a district attorney, a lot of the people toward the Sentry employees. I think you'll find more powerful influence in city government as far as Sentry is concerned.

Pointer: Why would you rather give up your job than your County Board seat?

Guyant: Because I have. Had it been toward the end of the term, it would have been fine because I don't know if I'm going to run again.

I ran for two reasons. The guy that was the supervisor was going to run for the city and sat on the Board for two years. If you go over the minutes of the meetings for those two years, you find his participation was nothing. He sat there and he voted. I would like to see more participation than that if someone's elected. Also, he wasn't connected with the university in any way; he was completely alienated to students. Two-thirds of the ward is dorm residents and a large proportion of the other people are students. I ran to see if I could provide a little interest and shake up the people a little bit.

George Guyant is Portage County Board member, George Guyant, county employees. The Highway Department is also under its jurisdiction. Conservation has been a small aspect in this county thus far.

The fox bounty issue is a battle I'll be fighting in coming months. Portage County is one of the few counties left in the state that still has a fox bounty. They're proposing $1500 in state money every year to see as we see fit on conservation projects. Years ago, the Board decided to open it all up on fox bounties and half on other projects so consequently we're only moving a few now. This year, they went so far, but we don't pay a $5 bounty for deer. In fact, we charge an extra $6.25 they do to hunt them. There are a lot of guys on the County Board that enjoy hunting and they like to get paid for hunting. Hell, I'd like to get paid for a lot of things but I don't.

So conservation has been dormant. The only thing they have done is purchased 219 acres in the Town of Dewey as part of the Dewey Marsh project. Now the DNR is proposing buying 3800 acres for a multi-purpose wildlife area. The county started this project ten years ago by purchasing the 219 acres piecemeal. Since then, $1200 has been accumulated and the Board is planning on buying more land in the same area. Now it looks like the state will take over.

Sentry is another big responsibility for the County Board. This is to aid dependent children and surplus commodities. I've heard both complaints and compliments from people on Social Services. I know they've got one hell of a job, too. I have to look at the complaints from the County Board members that it's costing too much money.

Pointer: Are you satisfied with the way Social Services is handled?

Guyant: We just voted on a resolution here which I supported. The resolution would support the present system in opposition to legislation proposed in Madison to change the system of general relief, and take away the option of going to a unit system or a county system. In the unit system, when you want to go on general relief, you must go to your town board chairman or the appropriate city official and ask for relief. He passes judgment as to whether or not you should be on relief. If he says okay, then you go to the Department of Social Services to get help. Now, some of these town chairmen who are also members of the County Board, I just would not want to approve anything as to where you're spending your money. They're not qualified as Social Service people. I don't want the privilege of being the only people they don't protect or aren't stingy with on the County Board is their own per diem payments. I think the county is underpaid and tighter. So to me this is a bad option to give the counties. The state wanted to take that away and now the Board has passed a resolution supporting the present system. I would just as soon see that option taken away and go to the county system where professionals handle people's problems.

Pointer: Which areas in county government must need action?

Guyant: The first thing that I'm trying to do is cut some of the County Board. I think that's what is needed most. For instance, the resolution I presented this week to make sure the people on the press are aware of any and all meetings so the press can report what's going on. Sometimes it's very convenient to leave the press out of things. If they just don't happen to show up because they just don't know about the meeting, people are a little more free with what they say and do.

Two months ago I presented another resolution which also lost. It also would have threatened the pay of County Board members. What was happening was that one meeting would be stretched to cover two days the members would receive $22. If we have two meetings in one day we only get $16 but if we have one meeting that lasts two days we get $32.

Pointe r: What work does the County Board do?

Guyant: County Board runs the Sheriff's Department with control over the budget, pay, and hiring and firing of deputies and
Campus Construction: Part One
Two Departments To Share Natural Resources Building

Work began earlier this spring on the College of Natural Resources building. By the time this issue went to press, the framework was in place for the second floor. Completion is expected in September of 1973 and the structure will house the departments of Natural Resources and Biology.

The $3,896,000 structure, with the exception of office, lecture hall and a classroom, will contain laboratories. The reasoning here, according to Dr. Donald, associate campus planner, is that one efficient classroom space is lacking in the area of professional development. The new facilities will include a forestry program to become a part of the Society of American Foresters.

Biological department chair-man, Dr. Ronald Hay, also cited the "greatly expanded research facilities, but we will retain the present lecture facilities". In comparing his department's current facilities to those of the new building, he contrasted the seven research laboratories in the new building to the one they have at present. Thiefsfeld feels that new equipment in particular is "holding great potential.

The budget for equipment was originally $250,000 but it was more than doubled, arriving at the total of $510,000. In addition to the new equipment, the present movable equipment will be transferred to the new facility.

The new building will contain equipment and facilities neither department has presently, such as "an electron microscope, which is necessary to study the ultra structure or cellular detail."

The new Environmental Science Building is nearing completion on the UW-SP's "Super-Block.

How To: The Book Bind

Health Program Available

At some point in the careers of most UW-SP students, they have to buy a book. Sometimes the decision is a difficult one. This article will try and explore the various methods used to find that book.

One thing that all the local book stores agreed on was that the student should order the book directly from the publisher. And that it was a special order for a single book, the fastest means was for the individual to place the order himself. A minimum of windows provides a large amount of wall space and is more economical to build, heat and air-condition.

Attention Seniors

In checking the seniors' information cards we find that many have graduated or are considering to graduate, but have not made formal application. None will be considered as a candidate unless we have this on file. Cards are available in the registrar's office, Student Services Building.

Parapsychology Lecture Offered

Are you interested in ESP, telepathy, clairvoyance and related phenomena? If so, the newly formed UW-SP parapsychology club will sponsor a meeting on Tuesday October 17 at 7:00 p.m. in the Turner Room, University Center. Clifford Peterson, psychology professor, will be the speaker. Anyone interested in this fascinating subject is welcome to attend.

Notice of Phi Beta Lambda Meeting

Place: Room 336 Classroom Center

Time: 7:00 p.m.

When: Wednesday, October 11th
Health Service Continued...

In May a special meeting was called for the same night that the Common Council met. As we use the same chambers, we met early so we could finish prior to the Council meeting. We met, conducted our business and had about two items of business left which would have taken about 15 minutes. We had 45 minutes before the Common Council was due to meet. The Board adjourned and said come back the next night so they could collect the extra $16. I argued and voted against it but we came back the next night. The second meeting was stretched out to an hour but at least 45 minutes of that was spent telling jokes and stories.

At the following meeting, I introduced a resolution to cut out the extra $16 for these two day meetings so that if one meetings lasted two days, we would still only get $16. It was obvious that at the prior meeting, they had met just to get the $16. The resolution lost because their money was threatened.

Pointer: How would you like to see it done?
Guyant: I'm not on County Board for the money but I think some guys possibly are. I would like to see it paid on a flat fee the same night that the Common Council met. As the Common Council is for the city. They would not vote for the extra $16 for these committees.

Greek News

Tau Kappa Epsilon

Girls you blew it. While you were gone over the summer? Tekes were married. They were Tom Dagget, Dan Ruder, John MacGregor, Greg Dunn, Dick O'Konek, Jim Peterson, Bob Janecz and Karl Rusch. Disheartening ain't it? Where will it all end?

Also Mark and Fran Staples had a little baby girl over the summer. The other newly wed Tekes are just practicing. by Larry DePons

Sigma Pi

The Brothers of Sigma Pi will be congratulating Polly Theis of Neider, Judi Seccombe, Chris Strouk, Nancy Herrmann, Cathy Hite, Kathy Zaugra, and Linda Lange, who have completed their pledge ship and are now full-fledged Little Sisters of Sigma Pi.

The Brothers are also proud to announce that our Homecoming float took third place in last Saturday's judging.

This semester's pledge activities started this past week. Good luck to our future brothers!

Sigma Phi Epsilon

The Brothers of Sigma Phi Epsilon invite anyone interested in fraternity life to an informal load at Little Joe's Saturday, October 7. Anyone needing more information or a ride call 341-1550.

Editor's Note:
Any articles other than announcements of coming events for the Greek News column must be signed and in News Story form.

Staples, Kathy Zaugra and Linda Lange, who have completed their pledge ship and are now full-fledged Little Sisters of Sigma Pi.

The Brothers are also proud to announce that our Homecoming float took third place in last Saturday's judging.

This semester's pledge activities started this past week. Good luck to our future brothers!
Open Letter

City Police Lay Down the Law

With the start of another semester, many young people on campus, this communication is for general information of the city's parking regulations and other matters.

We have been working with the University on the parking problem and at the request of University officials, we wrote to the Board of Regents about this problem in the University area, seeking their cooperation and support, financial must of all, to solve the problem through off street parking facilities.

Parking in the University area is a constant source of irritation with no immediate solution in sight. On street parking space is very limited and some of it is restricted to specific time limits and parking meters.

The City's parking violation classifications and costs of fines and delinquent fine costs, as follows:

- Expired parking meter violation, fine $1.00, paid within seven days, thereafter, fine $2.00.

REstricted PARKING CLASSIFICATION:

1. Too close to driveway.
2. Too close to crosswalk.
3. Too close to fire hydrants.
4. Angle parked.
5. Overtime parking in loading zone.
6. Overtime parking at parking meters.
7. Overtime parking one hour.
8. Overtime parking two hour.
9. Overtime parking night.

Restricted parking violation, fine $3.00 if paid within seven days, thereafter, the fine is doubled to $6.00.

PROHIBITED PARKING CLASSIFICATION:

1. Against traffic.
2. Blocking alley or driveway.
3. Parked by fire hydrant.
4. Double parked.
5. Parked on sidewalk.
6. Parked on street.
7. Parked on no zone.
8. No parking zone.

Prohibited parking violation, fine $7.00 if paid within seven days, thereafter, the fine is doubled to $14.00.

In the University dormitory area we make temporary exception for short duration parking, i.e., “time zones” for the purpose of and while actually engaged in loading or unloading or in receiving or discharging passengers and while the vehicle is attended by a licensed operator so that it may promptly be moved if there is an emergency or to avoid obstructions of traffic.

On Sundays not regularly, we do grant temporary overnight parking for valid reasons. The request must be made to the Police Department. Permission is not granted during anticipated and- or special occasions, such as, homecoming, beginning and ending of the semester, commencement, etc., depending upon the weather conditions especially during the snow season.

The purpose of the overnight parking ordinance is for exception, or removal of snow from the streets. This ordinance has been in effect for a number of years.

Our delinquent ticket procedure is as follows:

We run a check on the license number on the ticket and send the delinquent notice to the listed owner; therefore, the notice is sent to your home address rather than your local address, although if we have no success in this approach we check for a local address.

We suggest that you license your bicycle in the city, the make, serial number, color and other data are recorded so that if it is stolen or misplaced and recovered, we can trace the owner of the bicycle. The license plate is reconstituted which is a safety factor. Bicycle licenses may be purchased at the headquarters Fire Department 1701 Franklin Street which is located at the northeast corner of the Division and Franklin Street intersection. NOTE: We ran out of 1972 bicycle licenses, the 1973 licenses are on order and when we receive the 1973's we will make an announcement through the news media.

Recycling: Bicyclists must obey traffic regulations. Bicycle violations of adults are processed the same as vehicle traffic violations. It is legal to ride on the sidewalk, the exception being, the downtown business area.

Hitchhiking: a current fast, is hazardous and dangerous and it is illegal when a person is on the roadway. We have had a tragic incident where two students were struck and killed while walking in the roadway. We don’t ever want that to happen again.

We have had incidents of female students hitchhiking and-or accepted a ride, that were assaulted and/or raped. We believe there have been more incidents of this nature than have been reported. The news media doesn’t reveal names of female victims of rape or sex offenses, only the age and general location of the incident is released. The unreported incidents are known to the perpetrator’s and victim’s. Please report crimes against the person and property. On campus notify campus security and-or us, we will notify you or we will notify them, we work closely with each other. Please report crime incidents, without delay, and don’t keep it a secret.

 Someone else may become braver and more defiant because of the silence of his deeds and the lesser chance of his being apprehended.

We have an ordinance in reference to: Possession or drinking alcoholic beverages or intoxication liquor on public ways prohibited. It shall be unlawful for any person to have in his possession any open can, bottle or other container containing malt beverages or intoxicating liquor, or to drink from the same on any public way, public street, sidewalk, highway, public or private parking lot, or on and-or in any motor vehicle parked on a public way, public street, alley or public parking lot. This is a violation being, that at such times and such places as may be operating and exposed temporarily from the provisions hereof, from time to time by the Common Council.

Penalties: Any person violating the provisions of this ordinance, upon conviction shall be punished by a forfeiture not exceeding $100.00 together with cost of prosecution, and in addition a fine as may be approved by the Common Council.

The Police Department of the City of Milwaukee is, always busy and shall always be to perform our functions within the “Spirit of Law”, the true intent or meaning, as opposed to the “outward, formal observance,” letter of the law which is in accordance with the exact words or literal meaning, fully and precisely.

How is “justice” best served and to function within the “Spirit of the Law” and not to shirk our responsibilities is a very difficult task. I’m sure we do not satisfy all those that we have contact with for infinite variety of reasons.

The public expects law enforcement officers to perform their duties in a professional manner, as reasonable men, using good sound judgment and practical wisdom and above all, we use good judgment common sense, being honest and fair. I feel we do so try to achieve this objective.

We are concerned about the welfare and safety of those that reside and of those that visit our city, and society in general, regardless where they may reside. If we can be of assistance, please feel free to talk to us. There are many ways that we can be of assistance, which are too numerous to mention. When you don’t know where to go for help, try us, we may be able to assist you. We want you to feel at home, away from home.

I feel attending an education institution serves a dual purpose, one is to prepare for one’s livelihood and two, learning to live with people from all walks of life. These are the facts of life.

Everytine we receive a number of requests for data from students on many matters, we are willing to assist but many times we don’t have the data readily available and require more lead time then we are given. We make ourselves available for panel discussions, presentations or just rap sessions, etc. In order to give you sufficient lead time and subject matter so that we are able to present a meaningful discussion.

We urge and encourage your assistance in helping us to make this community a safe place to live in. Thank you.

Sincerely,
Raymond C. Kulas

New Pointer Coach Named

by John Anderson

Monte B. Charles assumed head football coaching responsibilities Monday at UWSP with a hint that he'd like to have the job on a permanent basis.

The former UW-Platteville and UW-Superior grid mentor was hired to fill out the season after Pat O'Halloran resigned. "I just assume we'll be cooperating completely," he said of his involvement with the assistants and emphasized his confidence in the talents of the current team members. "I like a good, sound coach-player relationship with a dog concern for winning."

Charles indicates the recruiting is one of his keys and that he will not be putting the local ball club through a mediocre program on his own ideas of playing. But there undoubtedly will be some changes in style. "I can only coach based on things I know.

Aiding offensive units in football is known to be one of his best strengths in coaching. It is also known to currently be the weak area of Pointer football.

Poetry Reading

James Keller, poet, novelist, and editor will read selections of his poetry on Monday evening, Oct. 9 at 8 p.m. in the Mitchell Room of the University Center.

Sponsored by University Writing, Keller's appearance marks the first in a distinguished season of offerings that will include both student and professional poets in evening reading as well as student workshop sessions.

Lerner has published four collections of poems, the last of which appeared in 1970: California Poems. He edits the influential little magazine Coyote's Journal, published on the west coast. Currently living in Maine, he is at work on his second novel. Copies of his poems and Coyote's Journal are for sale in the University Book Store.

Burger Chef introduces the problem-solver: Big Shef.
Construction Versus Wilderness Again

It is parking lot construction versus a natural wilderness area once again on the Stevens Point campus. This time, it's the eastern tip of parking lot Q, in back of Allen Center and between Illinois and Michigan Avenues. The entire Q lot once was this type of natural preserve but now only a small wooded section remains - a low-land marsh area, this section has been a haven for deer, rabbits, ducks and birds. Duane Greuel, one of four Pray-Sims Hall Chairmen, said he spoke on behalf of his dormitory mates when he protested this action to the Pointer.

Ray Specht, Campus Planner, explains this is part of a program begun three years ago. The Q lot was not squared off and this is now being done as the surfacing has been approved. "To change the designs in mid-stream would be most difficult," according to Specht. He emphasized that not only the Business Affairs Office is concerned with the project. State engineers and planners are involved.

In replying to Greuel's charges that Q is sardon enough half-full and that the expansion does not appear to be necessary, Specht stated that the number of cars fluctuates seriously. Although enrollment has decreased, he theorizes that more cars will be used during winter.

Specht emphasizes that there is no reason to save "one little spot" when the "whole campus is expanding in that area." The area north of the "Q-tip" will soon be eight athletic fields, intended for intramural sports. This construction is planned for the 1973-75 biennium. Specht cited special problems arising from a creek that flows underground toward the campus from Michigan Avenue. The Campus Planner states that he is always willing to give demonstrated programs for students to explain. 9:00 p.m.

Last year, much controversy centered around the creation of a parking lot east of Steiner Hall at the cost of a tree-filled playground.

Protection And Security Report

The following alleged lar-enies and thefts of state and private property were handled by Protection and Security between Sept. 22 and Sept. 28. The Pointer received this report from Alan Kurseski the Director of Protection and Security.

SEPTEMBER 22, 1972
Theft (alleged) of knapsack and books from Hyer Hall. Value: $26.00 (approximate).

Jobs

Wouldn't you rather . . .

REALLY?
Not many people realize that O’Halloran is in the top 10 percent correct. In 1969, the football budget was at $13,000, and they had 10 percent of the wins. This was practically the same.

What little news there is about O’Halloran is that he is thinking about leaving the assistant athletic director position except for the new Quand health gymnastics. Seemingly, in comparison to other athletic departments, the football program is $32,000 a year. O’Halloran, Eau Claire and Platteville have a high school program. The facilities are not as good as the high schools, and the playing field is not the same. Thirdly, when you are trying to recruit a player against another schools, what do the players have to offer? To Whiteman, Oshkosh and Platteville have new plush stadiums. Point has a good field (the worst in the conference) which it shares with two local high schools. In looking at the facilities, Point’s are close to the west in the conference and it has been stated over and over by some of the football players that they had better equipment in high school.

When potential prospects are given a tour of rival campuses they are usually treated to a steak dinner, but at Point they are treated a day meal in the eating a few of the players might want. Shouldn’t make any difference but you’d be surprised.

While Weiserescan the clutches of the dweller because their Conservation program was well established. But now the job market in that field is relatively poor and the last I heard, football was a bigger headache.

(1) At the beginning of the season 27 players got cut. From Steverson’s roster he informed the football program until he found himself in the coach’s room when we tried to recruit. O’Halloran, said, "As you can see, we have cut some players. Indeed they are: "I think the whole structure or approach may have to be reexamined. You know that other schools eau Claire and those being chosen might be getting rid (athletic scholarships) at ride schools. (The Wisconsin State University Conference does not have a football program.)" So they hope to get them going some way. If you’re not telling me that you can come and go, or that there is a place to walk down on a full athletic scholarship at one school, and go to one that doesn’t offer the scholarship program unless something else is there.

Another problem has been the administration. The administration and the athletic department have failed to realize their potential. This is the result of the poor quality of the athletic director and the athletic department.

The athletic department has failed to realize its potential. This is the result of the poor quality of the athletic director and the athletic department. LETTERS

Endorse Babitch

To the Editor:

Bill Babitch’s statement on the use of billboards, roadsigns, and posters on trees, is, I feel, very responsible. I wish that all candidates would follow his example. I agree with him that a potential legislator should be a leader in saving the natural beauty of our environment.

It is sad that Mr. Riser has decided not to join him in this type of campaign. He continues to deface the countryside with little regard for the public’s feelings. It’s an insult to my intelligence that a candidate should think that I can be conditioned to pull a lever below the name I have been injected with the most. It contributes nothing to my knowledge of the issues. If a candidate’s campaign can’t set an example of how to solve the problems of our environment, then neither will his promises.

In this and many other issues, Babitch has shown his past record and example that the public interest is more important than private interest.

Don Wachowiak

Thanks Given

To Manager

To the Editor:

To be a Food Service Manager, a person must be an effective administrator and be able to take decisions made from above and implement them with a minimum of “black” from the students. He must in turn relate well enough with the students to understand their problems, and have the ability to integrate their suggestions into future menus or explain to them diplomatically why it would be impossible to do so. In short, to be a good Food Service Manager for a center, this person must be part businessman in handling the food operation and part public relations man in satisfying the needs, questions and requests of his students.

But to be an excellent manager, he must be one who will take a personalized approach toward the people of his center. Also, he should be associated with and many times involved in center organizations, functions and even hall activities. Lastly, he is one who will even put himself out on a limb on numerous occasions to aid students or their functions.

This letter was written with pride to say that we have had this type of an excellent Food Service Manager at Allen Center. And are very sorry to see him leave.

Brian Tuggle, thank you for the help, favors and service you have given us in the past and our sincere best wishes go with you in the future.

Appreciative Students of Allen Center

Siasefis Found

“Intolerable”

To the Editor:

On human dignity (especially in public) in the age of Aquarius: “Tolerance” does not imply submission to any amount of inconsideration which fellow citizens wish to subject you to. Much less does it imply the gross amounts of obscenity thrust upon the student body each semester by the Siasefis.

Tolerance does imply cooperation and the apparent purpose of providing a student center is to facilitate the university in cooperating with the student in satisfying his social needs. Specialized facilities for the various types of social activity have been provided. Obviously, the intended function of the “Gridiron” is that of a snack-bar and friendly resting-place for students between classes. Obviously, it is not to function as a stage for the unappetizing minority known as Siasefis. Their dehumanizing and vulgar antics are offensive and repulsive to other patrons of the Gridiron who wish to rightfully use the area for civil, if not adult, modes of social interaction.

It is sad that Mr. Riser has decided not to join him in this type of campaign. It is sad that Mr. Riser has decided not to join him in this type of campaign. It is sad that Mr. Riser has decided not to join him in this type of campaign. It is sad that Mr. Riser has decided not to join him in this type of campaign. New Selective Service Rules

Although President Nixon has set July 1973 as the end of the draft, it is noteworthy that several new interpretations concerning the 1-H classification are now being used. Under the new directive the "holding classification" class 1-H, and to place them into the Second Priority Selection Group. The lottery number that will be used as the ceiling number this year is 19. The result of this action is that no Wisconsin registrant born in 1952 or before, who has a lottery number of 96 or above will have to drop his deferment at the end of 1972 in order to be placed into the Second Priority. Under the new directive the process will be automatic, and foreclose the need for the registrant to request any action by his local board.

Registrants affected by this are those in classes 1-A, 1-O, 1-D, 2-C, 2-D, 2-A, 4-H, 4-C and 4-D with lottery numbers from the final lottery ceiling for all registrants who were born in 1952 or before. This will not affect men with exemption, men currently in alternate service, those who have completed service, nor will it affect men born in 1953.

Men in the Second Priority Selection Group are drafted behind the Extended Priority Selection Group those whose number is below the year's ceiling for 1972 but who have not been drafted by January 31, 1972—they may be drafted during the first three months of 1972 and the First Priority Selection Group (men born in 1963 with lottery numbers below 100 who do not have deferments, or men who lose their deferments in 1972). It was noted, however, that present needs indicated that the Second Priority Selection Group will not be considered for induction.

Registrants, however, with lottery numbers through 95 should not drop their deferments because it does not appear that the status of extended priority will be the same as it was early in 1972. The reason for the recent move in automatically processing those above number 95 into 1-H was that the local draft boards were unable to function practically because of the deluge of requests annually for dropping of deferments.

Because this announcement was made only several weeks ago, not all draft boards have been directed to send notice to those concerned of their change to 1-H status. Another factor that one should be aware of is that an alternate service job is not found for a conscientious objector within one year, he too is transferred into the second priority and it is unlikely that he will be assigned.

The Selective Service has estimated that the ceiling number for the lottery held for those born in 1951 will be 75. Men with numbers 1-40 can be expected to be drafted to report for physicals by October, 41-70 during November and 71-75 during December.

Although the draft will terminate in July unless authorized to continue by Congress, plans call for the continuation of the Selective Service. Because it seems essential that the draft could be implemented with two weeks notice in emergency, the boards will probably still require men to register and be kept on file. Rev. Jim Schneider and Rev. Dick Steffen are available to anyone desiring draft counseling. The telephone number of the Draft Information Service is 341-4044.

Steffen noted several instances where the draft board was proved to have made a mistake because close records were kept by the individual. He added that in most of these cases the individual was exempt.

JAN SEKAS
Jan is a senior majoring in Communicative Disorders. After her graduation in May Jane plans to attend graduate school here at UW-SP. Jan is a member of the Alpha Sigma Alpha Sorority, the Speech and Hearing Association and while living in Roach Hall, was chairman of Winter Carnival activities.
Superpickers See Better Things To Come

By Tim Sullivan and Mike Haberman

Last week, we were trying for a perfect score. We almost had it. The only teams that beat us were New England, Houston, Green Bay, Cleveland, and Atlanta.

We can concede the Falcons. The Rams were only picked on a last bunch, but we agree that the bunch was stupid. Cleveland was another of those tough ones, but if we had to do it again, the Bengals would still be our selection.

The other three losses are unaccountable. Dallas might have been led astray by their films. As you remember, a squirrel ran for over 900 yards in the Packer-Raiders game. After Dallas saw the game film, the Cowboys probably decided to key on the squirrel. We had hoped that Dallas would give some attention to Brockington, but the Cowboys obviously forgot.

We did not appreciate the Oilers beating the Jets, and we weren't all that happy finding ourselves at the bottom of the pack. Houston, Atlanta, and we were n't all that happy finding ourselves at the bottom of the pack. Houston, Atlanta, and we were n't all that happy finding ourselves at the bottom of the pack.

BENGALS OVER DENVER - The Bengals usually come through for us, and occasionally roll up a lot of points against weak teams. The Broncos should be out of the game by the first half. Cincinatli by 13.

DETOIT OVER ATLANTA - The Falcons have crossed us up many times, but the Lions should win, even though the game is in the South. If Landry gets injured early, we're in for a lot of trouble. You might want to root for us in this one.

KANSAS CITY OVER CLEVELAND - The Chiefs have been fumbling around too long. They should run the Browns right out of Cleveland's stadium.

MIAMI OVER JETS - The Dolphins were superb in their come from behind win over Minnesota. Howard Twilley will always keep them in the game. The Jets should be favored from football after losing to Houston. Miami by 13.

PATRIOTS OVER BUFFALO - We bet against New England twice, and they crossed us up both times by winning. We take the Patriots over Buffalo, and if they lose, we'll never bet on them again. In fact, we probably won't anyway.

GIANTS OVER SAINTS - New York has Ron Johnson, who scored four touchdowns against the useless Eagles. The Saints have people with names like Julian Fagen and Margene Akins. The Saints rarely intimidate anyone. Giants by 10.

DALLAS OVER PITTSBURGH - 'The Cowboys' loss to Green Bay was a fluke. Dallas will never again be caught that flat, especially in this one, where they'll be playing in front of loud Tardis fans. Dallas by 12.

VIKINGS OVER CARDS - Both teams are coming off losses. St. Louis will be visiting Bloomington, Minnesota. That's not a good place to be meeting the Vikings, especially since Minnesota's had a full week to remember its loss to Miami. The Vikings will host in name only. Vikings by 17.

CHARGERS AGAINST COLTS - Houston thinks the Chargers are great, even though they haven't shown it yet. Sullivan likes Baltimore's defense and Johnny Unitas's fieldflickers.

SAN FRANCISCO OVER RAMS - Brodie is back, and Gabriel is too. Gabriel never was all that good, but Brodie is tremendous. The Rams are annihilated by Atlanta last week, and we didn't really care, even if we did choose Los Angeles.

OAKLAND OVER HOUSTON - The Raiders have been trying their best to look lousy, but they don't fool us. We still think they have a chance at the Super Bowl, so the Oilers will more than likely lose. Oakland by 14.

REDSKINS OVER PHILLY - There is absolutely no way the Eagles can win this game, and we don't let it go at all. Washington by 17.

If Pete Rozelle cracks down on the upsets, we should be in excellent shape for this week. Quite frankly, we don't see how we can help getting at least ten right. By Sunday night, we should have a good idea.

Last Chance

for the 700 students who have not picked up their free U. W. STUDENT DIVIDEND BOOK!

Monday through Thursday October 9-12

Stop in and pick up during these hours: All you need is your UW-SP Student ID!

Monday thru Thursday between 2:00 & 4:00

312 Division
Explosives equal to 420 Hiroshima A-bombs have already been dropped on Vietnam.

 Millions of men, women and children have been killed, maimed or left homeless as a result of the bombing.

—and this is what President Nixon calls a policy of "great restraint"!

He tells us he is winding down the war — and then says that unless North Vietnam accepts his terms, there will be no reduction of the bombing. (As a matter of fact, there will probably be a further escalation.)

"Those who have had a chance for four years and could not produce peace, should not be given another chance," Nixon, October 9, 1968.

On this October 9th, it will be four years. Can our conscience stand the guilt of another four years of this kind of immorality under Richard Nixon?

What are the justifications we are given for this wasting of Vietnam and its people? To protect the people of South Vietnam from communism? To maintain democracy?

The regime we are defending suspends elections, muzzles the press, jails and tortures its political opponents. The people we are supposed to be saving are being systematically killed.

To the survivors, our fight to contain communism in Southeast Asia (at the same time that we are making business deals with communist countries) can only be viewed as hypocritical fanaticism, indistinguishable from that which we have sworn to oppose.

Even as the bombing and killing have been escalated, most Americans appear to have tuned out on what’s happening in Indochina. The Nixon Administration is counting on the American conscience to care only about U.S. casualties, not about the lives of Vietnamese.

Do we really not care about the people we kill?

Americans will not always be able to ignore the consequences of our actions. We will be asked: How could it happen? Where were you? What did you do?

☐ Just protesting is not enough.
☐ Voting your conscience is not enough.

Your dollars are crucial. Your dollars can stop the killing. Make it possible for George McGovern to awaken the people before November 7.

President McGovern would end the war.

People of conscience must make this final sacrifice: contribute your utmost!

This is our last chance to make a difference.

Dear Senator McGovern:

I too feel compelled to do my utmost to end the war in Vietnam — and I know that requires the sacrificial giving of dollars to help you awaken every American. Enclosed is my contribution of $25 (or the closest to that figure I can manage).

Peace.

LaCrosse Makes Shambles Of Homecoming

By Dave Wozarza and Tim Sullivan

Last Saturday had the makings of a very fine afternoon at LaCrosse. The hot-dog stand was opened an hour earlier than usual. Eddie Kotal was in the air.

The Pointers scored touchdowns on two quick first downs and rested off the field. Quarterback Joe Wagner threw for the rest of the game or of your team.

They tried a short pass on the coin flip, and it looked like a dumb thing to do, because LaCrosse picked up two quick first downs and rested at Point s 45 yard line.

The Pointers kicked off, and it looked like a dumb thing to do, because LaCrosse picked up two quick first downs and rested at Point s 45 yard line.

The Pointers kicked off, and it looked like a dumb thing to do, because LaCrosse picked up two quick first downs and rested at Point s 45 yard line.

Then LaCrosse did something foolish. They tried a short pass on the coin flip, and it looked like a dumb thing to do, because LaCrosse picked up two quick first downs and rested at Point s 45 yard line.
