40 give opinion at grad meeting

by Tony Charles and Shirley Spittlemeister

About 40 people expressed their opinions on UWSP graduate and undergraduate programs at a Board of Regents hearing held here Tuesday, Nov. 13.

This was the first of several hearings by the Regents Education Committee on graduate and undergraduate program cuts in the UW system. The purpose of the hearings is to decide what the effects of the UW higher education institutions are, according to Regent John Lavine.

Lavine and Regents Mary Williams and Mrs. Howard V. Sandin presided over the three hour hearing held in the Michelsen Concert Hall of the Fine Arts Building. The mood of the hearing seemed basically reserved and formal.

Speakers included faculty, alumni, students, administrators and citizens, representing themselves as well as various departments at UWSP. Programs that received representation were natural resources, communicative disorders, communication, home economics, music and social studies.

Chancellor Dreyfus was the first speaker at the hearing. He said that he represented not only himself but also UWSP faculty. Dreyfus highlighted UWSP's academic programs and achievements stressing a liberal arts education. He said that UWSP has carefully selected its graduate programs and that all should be retained because of their high ratings. He said that the mission statement should be changed to state this.

Other speakers were in general agreement with Dreyfus that if graduate programs were cut, the quality of undergraduate programs would be detrimentally affected. Also, a master's degree is required in many areas in order to get a job. Speakers said that students may not come to UWSP if they would not be able to continue their graduate studies here.

Some mentioned the asset of a closer relationship that can exist between students and teachers in a school the size of UWSP. Others pointed out that Stevens Point's central location is ideal for people in the surrounding area who may otherwise not be able to travel great distances to go to school.

Speakers representing the natural resources department also noted that Point's location in good because of the wide variety of wildlife and forestry areas near here.

James Beatty, chairman of Lake State TAPPi pointed out that Wisconsin is no. 1 in the nation in paper production and that it is appropriate that Wisconsin have a paper science major here.

The department was also commended for its broad curriculum and extensive graduate program.

Seven speakers supported specifically the communicative disorders department at UWSP.

Speakers said that the comm. dis. grad program should be continued here because there are only 20 schools in the nation that have comm. dis. programs similar to the one here. If the program was cut, they said, it would be difficult or impossible for many students to continue their education.

Also, UWSP would lose its certification in this area.

Dr. Russell Lewis, past president of the Marshfield Clinic, and Dr. James Lombardo, Wausau Medical Center, mentioned the practical experience that students get here by directly working with patients. They said that this is an asset for the students.

Elizabeth Oman, undergraduate student in the comm. dis. program, said that if the program was dropped, it would be discriminatory toward women since mainly women enter the comm. dis. field. Also, Miss Oman said, the new and complete facilities would be wasted.

Speakers representing the communication department said that UWSP's unique program of having all facets of communication under one umbrella makes it a program that should be continued.

Jack Crowley of WSAU-TV said that people graduating in one area of communication must also be familiar with the other facets of it. He said that at UWSP the "Graduates are not ill-prepared specialists, but competent workers."

Robert Larkin, of the Waupun school system which has a communication department similar to that at UWSP, said that UWSP is the only place in Wisconsin where qualified teachers can be found to teach communicative arts at Waupun.

Teaching representatives also urged that graduate programs be continued at UWSP so that teachers can pursue their graduate degrees.

Tim Foley, graduate assistant representing the English department, said that if graduate programs were cut it would show that Stevens Point's programs had been inferior. This might make it more difficult for those who had earned a master's degree from this institution to find a job, he said.

Representatives for the fine arts department said that their department should be expanded because of the wide range of activities it participates in.

A student representing the history department also felt that department should be enlarged.

Bill Curry, representing John Joans, chairman of Sentry Insurance and the Chamber of Commerce, supported the university in Stevens Point because employers can hire students. He said that the university was also culturally invaluable to the community.

State Senator William Bablitch and James P. Scammon, superintendent of Stevens Point area schools, mentioned the legislator's memo of August 10, 1973, in which the grad cut possibility was discussed.

Scammon said the approach in which this was released was wrong. Regent William pointed out, however, that the memo was only meant to be informational and nothing else.

Bablitch said that the legislators acted in a way they thought would be best for the taxpayers and didn't mean to work against the university.

All speakers excluding Dreyfus, Bablitch and Representative Anthony Earl were given a three-minute time limit to give a summary of their written statements.

Lavine said that copies of the statements would be given to members of the Board of Regents for review along with written statements submitted by those who didn't speak at the hearing.
Controller urges students to promote campus

by Lydia Abell

A challenge has been offered to the UWSP student body by Student Controller Robert Badzinski. "We have to encourage the promotion of this campus," Badzinski said. "We need total student involvement and participation in campus life."

Lower enrollment results in financial cutbacks for campus activities, he said. "Because of the projected enrollment of 4345 next year, our budget will drop by $31,380. We can't raise the student activity fees, so we can't fund at the same levels."

Badzinski said that two funds have recently been eliminated: the Student Senate Reserve ($4850) and the Student Group Monies ($2000). This was due to the enrollment last year's deficit, which is a policy of Central Administration, he said.

Some campus activities don't make as much money as they could, Badzinski said. "Let students make the decisions if they want their support," he said. Arts and Lectures and University Theatre are two activities that could profit from more student control, said Badzinski.

Also, the University Activities Board (UAB) has been under attack recently, he said. "UAB has lost credibility with the student body. It needs to review its policies, or maybe it would be best if it folded and started again."

The administration responds favorably to strong demonstration from students, Badzinski said. "There is a tremendous movement right now to help universities over their decrease in enrollment. Point two that a one million dollar fund program be supported by regents and the governor to form a Teacher Incentive Plan; Point three that an incentive plan for early retirement on a voluntary basis be established."

Blocher also informed the senate of a legislative social hour to be held on November 29 at 4:30 in the Holiday Inn. He urged the senators to go and meet with the legislators from central Wisconsin.

The Community Relations Committee recommended that the senate reaffirm the proposed establishment of a Human Relations Committee to be sent to the Chancellor for written approval or disapproval. The senate reaffirmed its proposal of April 21, 1973.

The senate also passed a change in the parking regulations. According to the change, complaints must be brought to the Chancellor's office within 10 days of the decision made by the Parking Appeals Board.

Cartoon Time For Film Society

On Tuesday, November 20th, the University Film Society will present a special program of Warner Brothers cartoons. A perfect opportunity to laugh along with Bugs, Daffy, the Roadrunner and Coyote, Elmer.Porky and Tweety will be afforded to all. Two hours' worth of animation will be highlighted by "My Little Duckaroo," a spoof of westerns, and "Rabbit Fire," a film where language is subverted in the best tradition of the Marx Brothers. If you like your violence spiced with laughter, "Sheep Ahoy," with the indubitable Wile E. Coyote, provides enough masochism for everybody.

The films will be shown in Main auditorium at 7:00 and 9:15 p.m.

Siberian Dancers to Perform Here Monday

The Krasmanskay Dancer Company, a group of 80 young folk dancers and a 14-piece orchestra, will represent the USSR, Nov. 19, as part of its first United States tour.

The Search & Screen Committee has requested the vice chancellor position be composed of six faculty members and three student members. The senate passed the proposal. The proposal included two members from the College of Letters and Science, one each from the Colleges of Professional Studies, Fine Arts and Natural Resources. A list of faculty member nominees has been sent to the Chancellor for his selection.

Two undergraduate students and one graduate student are to be chosen for the position. It was included in the proposal that an additional student could be chosen, if the Chancellor saw the need for it.

The proposal must also go before the Student Senate. "Passage appears likely," said President Hamilton.

President Hamilton reported that the mission hearings are scheduled for November 13. Students and taxpayers would be allowed to speak. Chancellor Dreyfus met with the Board of Regents last week to point out the necessity of maintaining some basic programs, reported Haferbecker. The Chancellor feels some duplication is necessary for balanced universities, he said. The Chancellor also pointed out that the MST programs in social science and general science are scheduled to be phased out here and at Oskosh, said Haferbecker. This necessitates the development of regional MST programs between universities so that students in the areas can still get their master's degrees, he said.

Student Government President Jim Hamilton reported that he met with Regent Williams and asked that an audit be run on undergraduate programs. The audit would be similar to the one run on graduate programs, said Hamilton. It would also be necessary because some of the undergraduate programs need to be cut, he said.

Regents will recommend to the legislators that they restore most of the million dollars in the user fee controversy, said Hamilton. They will start funding support through segregated fee support. Central Administration will be requested to make a study on segregated fee support, Hamilton said.

Representative Allen Blocher reported that it is action month for UWSP. They will propose a three point program to the governor, he said. The following points will be proposed: Point one that transitional funds be allocated to help universities over their decrease in enrollment. Point two that a one million dollar fund program be supported by regents and the governor to form a Teacher Incentive Plan; Point three that an incentive plan for early retirement on a voluntary basis be established. Blocher also informed the senate of a legislative social
College Spirit Lives

by Tony Charles

Thompson Hall recently hosted two Halloween parties for the handicapped children of Chileda, an institution for children with emotional and physical problems, and is located in Steiner Hall, once a UWSP dormitory. There are 24 children living at Chileda. Nine were present at the party.

"It was surprised by the decorations the children were really not able to develop a compromise on a student and faculty member ratio.\n
"The residents would be housed in the halfway house and Douglas Broyles, alternate director,\n
"A recommendation for the Committee for Vice Chancellor was approved at approval and to the Faculty Senate and the Student Senate. The there is a deadlock between Student Senate and Faculty Senate. Six of the twelve nominees faculty member ratio.\n
"Nominations sent to him by the Senate.\n
"and Parole," said Houlihan.\n
"The residents are able to use most of the half way house, and Douglas Broyles, alternate director,\n
"Students have the opportunity to pursue schooling or attending a therapy school or attending a therapy major and the value of the GPR, a list of courses taken and grades earned in history,\n
"No hunting signs are being posted in the area,\n
"The evaluations are designed to help the transfer program.\n
"The evaluations are not to determine if a student is interested in taking.\n
"The evaluations will also assist the chairmen of departments when it is necessary to decrease the student and present students\n

Empty Dorms Cost Students

by Mark Vollrath

Stevens Point students pay almost $100,000 a year for empty dorms, on at least one campus. UW campuses, said Bob Taylor of the Housing Office in a recent interview.

Whitewater has five dorms idle this year. In Oshkosh, a high-rise residence center also stands vacant. These are not the only dorms in the UW system that are empty, though. According to Delzell, the cost of each empty bed on any campus is absorbed equally by the entire system. This is to insure that no campus will "fold."

UW-Stevens Point, which closed two dorms this year, spared the UW system even more financial headaches when it found "tenants" for both. Steiner Hall is being leased this year by the Child Development program and a portion of Delzell is being rented for use as a halfway house.

According to Taylor, the Chilleda Institute pays $43,700 a year for the Steiner facility. That figure represents the normal yearly cost of the building to the university. At Delzell, halfway house pays $8,000 yearly for its portion of the building.

Taylor said that $31,900 is the "break even point" for Delzell. The university also gets around $2,300 from other sources for Delzell, Taylor claimed. He said that the remaining $31,900 deficit will, hopefully, be made up through revenues obtained from conference rentals.

Taylor admitted, "We may lose a few thousand dollars this year." He quickly added, however, that hopefully both costs will provide a profit in the future.

Taylor pointed out that UWSP could have turned its vacant dorms over to the state, as several of her sister schools have done. He added, "That would be a major point of a big mistake." The combined debt of those two buildings would have meant an additional $65,000 yearly burden on the UW system. Taylor said that the major reasons for not surrendering Delzell and Steiner Halls to the state were:

1. According to Taylor, if the state had taken over the buildings, UWSP would have lost complete control over them. He pointed out that there's no way of telling what the state might do. "They might even lock them up and just let them sit," Taylor noted.

2. Stevens Point is the only school in the UW system that has been able to utilize buildings that would otherwise go unused. This benefits the entire UW system. While Stevens Point is saving other UW campuses money, however, the other campuses are still costing Stevens Point. They probably will for a long time, too.

Taylor stated that dorm mortgages on some other UW campuses won't be paid off until "around the year 2015." To maintain control over the facilities, and that they provide a future profit potential. Any profit that might be realized would be used to defray student housing costs.

Semester Break Trip Offered

Several UWSP students plan to spend Christmas in France. The group is scheduled to fly to Paris Dec. 16 and return Jan. 7. There are still openings for interested travellers. The tour is being offered through the Foreign Language department.

During their stay in Paris, the group plans to tour historical and other points of interest. The itinerary includes four days in which individuals will be able to take side trips.

Trip Offered

Dr. Richard Christofferson, the adviser, and Dr. Baird Callicott, said that the minor will not necessarily qualify a student for a specific vocation, such as a job with the Environmental Protection Agency. However, this minor possibly will improve employment chances of a student who has also completed a major in a traditional area such as political science or philosophy.

The Environmental Studies Program was designed by Callicott of the Philosophy Department, Christofferson of the Political Science Department and Dr. James Newman of the College of Liberal Arts.

Thus far, Christofferson said, information and enrollment forms for the minor have been provided to students enrolled in those courses included in the minor. But he emphasized that both he and Callicott are available to advise any interested students.

International Folk Fair

Set For Nov. 16-18

The International Institute will sponsor an annual Holiday Folk Fair at the Milwaukee Arena November 16 to 18. The displays and exhibits, said Director Paul Delzell, will "present foods and customs, folk songs, dances and crafts from almost every country of the world."

The folk fair, Delzell noted, is "in keeping with the theme of the United Nations, which has helped the world to realize the cultural and economic benefits of peace." The two-day fair will include exhibits from almost a hundred countries.

The International Folk Fair will be open to the public from 10 a.m. to 8 p.m. Friday and Saturday, and from 10 a.m. to 5 p.m. Sunday.

The Wisconsin State Fair Board is cooperating with the International Institute and the Milwaukee Arena in sponsoring the Folk Fair, said Delzell.

Dr. John Bohl of the financial aid office said any profit from the Folk Fair will be used for student scholarships.

A Christmas trip to France has been scheduled for UWSP students by Christofferson and Callicott.

Students interested in going can sign up in the Language Lab (CCC) for discounted advance tickets.

The trip, it is hoped, will provide a "true Christmas experience," said Delzell. The cost is $21,000, which includes airfare and a 10-day stay in France.

Christofferson said that perhaps 150 or more students might sign up for the trip, which leaves Dec. 15 and returns Jan. 5.

The group will tour the attractions of Paris, including the Eiffel Tower, the Louvre Museum and the Arc De Triomphe, Christofferson said.

The group will be housed at a hotel near the Eiffel Tower and at the Hotel d'Italie near Rome. Three nights are reserved in Rome for the group to tour the city.

Christofferson said the group will also be able to take "side trips," in which individuals can tour the various historic sites of Italy or France.

Sue Anderson

On a cold and rainy day in October, the women of Delta Zeta and Alpha Phi Sororities and the University of Wisconsin Band of America were divided up throughout the city to trick or treat for UNICEF.

The three organizations raised approximately $200, which is now being spent on smallpox vaccines, school supplies, seeds for vegetables and the Political Science Club, which distributes toys to children in underprivileged countries of the world.

Natural Resources Foundation Children's Fund works in over 100 countries in the world.

Greeks Work For UNICEF

Greeks will continue to support the UNICEF Fundamentals program in the United States by collecting funds in the campus diversity centers.

The Greek Movement for UNICEF has collected over $700,000 in donations since 1971 in the United States.

According to Bill O'Connell, the program is "a way to make a difference through your membership in a Greek organization to help UNICEF and the children of the world."

The three organizations will continue to support the UNICEF Fundamentals program in the United States by collecting funds in the campus diversity centers.

Tanya/F 11 enrolled in new environmental minor

Eleven students have enrolled in the newly-appointed Environmental Studies Minor at UWSP. The interdisciplinary program, emphasizing humanities and social science approaches, includes courses in the natural sciences and natural resources areas.

Although a major component of UWSP is its College of Natural Resources, the designers of the minor agree there was a need to serve students who are interested in this field but not oriented toward a scientific, managerial or technical program.

The offerings include two core courses, one in ecology and one in natural resources. Many of the remaining elective hours toward the 24-credit minor can be concentrated in the social sciences and humanities. Most of the courses in the minor can also be applied toward the General Degree Requirements.
Concentrated studies program to be initiated

by Shirley Spittlemeister

Next semester about 120 students will be able to ignore the bells that send other students from class to class. They will be volunteers for the experimental Concentrated Studies Program to be tried out. Robert Artigiani, a UWSP history teacher involved in the program, said that the Concentrated Studies Program will "make a simple change in the present system, but will have very significant consequences."

Students in the program will take a 15-credit load, but instead of taking five courses simultaneously for the entire semester, they will take their courses one at a time for periods of about four weeks. During the semester they will be able to switch to a new course at the end of each period until all courses have been completed individually. When the semster ends, they will have accumulated the same number of credits as the course will have been completed. When the semester ends, they will have completed separately.

He also said that retention levels are expected to improve because the material will be studied in a matter of a few weeks. Artigiani said the advantages of the Concentrated Studies Program over the present method of study are, first, students will never have to deal with different teachers and students, and second, the students and teachers should both get more involved with the material.

He pointed out, though, that at first there may be difficulty in adjusting to the new program. Artigiani said.

Gordon Haefner, vice chancellor for academic affairs, said he thinks that the Concentrated Studies Program is a good one. He said that students and instructors in the program get an opportunity to be better and it will hold more of a "small school flavor" to the program.

If the experiment is considered a success, Haefner said, there is the possibility that it could be used for other courses of study.

Registration for the Concentrated Studies Program will begin March 17. Artigiani said.

There were some flaws, however. Operation of the program would be impossible without the cooperation of the teachers, particularly the follow spot, which was sloppy, and the large amount of money that was spent and sung away, were awkwardly staged. A firmer contact with the placement office could have prevented the placement office from being flooded with applications.

There were numerous quibbles one could raise on this production, but the main point is that it was more successfully worked. By treating the opera with respect, a lot of love and a lot of care, Artigiani said. "The Freischutz" had many fine moments. It's the best work I've seen this fall and I have so far, and certainly the best opera we have done in years.

The other play is cast

After a sell-out week at UWSP and another "on-the-spot" production of "Dames at Sea," Studio Theatre is coming across the stage in a much more successful "Barefoot in the Park." The cast has been finalized for Paul Zindel's "The Effect of Gamma Rays on Man-in-the-Moon Marigolds," directed by UWSP senior Lynda Andert, the cast includes Nancy Hosman, senior; Dena Green, freshman; and seniors Julie Barrass, Jack Abell, and Cindy Scruggs. "Barefoot in the Park" has been a hit with audiences and has won the Pulitzer Prize, the Obie Award, and the Drama Critics Award as Best American Play of 1970. The Studio Theatre Production dates are December 3, 4, 5.
RHC, an attempt to serve

by Lorraine Houlihan

The UWSP Residence Hall Council (RHC) is a student organization which is made up of students from all dorms to attempt to serve everyone in a social, educational, and materialistic way throughout programming. RHC originated in 1964 and has been active for almost ten years now. At one time the university centered around south campus, which was comprised of Delzell, Reiner and Nelson halls. Attention was brought to the northside of campus as new dorms were constructed. Students, seeing a need of unification between the north and south campus, started RHC.

The functions of this programming group is to plan activities, and by doing this, unify students in all dorms. RHC puts on activities, whether they be social, educational, or materialistic, as long as they contain some educational aim. This is to attempt to stimulate them. By creating activities, students have a chance to come together and participate with people that they are far removed from by being in different living centers located across campus from each other. RHC has also put on cooperative type programs with AIRO, the American Native Group, UAB, Black Coalition and DeBot and Allen Center Programming Boards.

RHC presently has 22 members. Gwen Nelson and Mark Jurgella are the two advisors on the board, and the 20 others are students from dorms on campus. Certain students are asked by their particular hall council to join RHC and some follow along on a voluntary basis which RHC would like to see more of. One dorm can have up to three members in RHC.

RHC receives $650 annually when students pay an additional $8 on their room rent fee at the beginning of the school term. This $8 is divided and distributed out to four different places. Hall Council receives $12, DeBot and Allen Programming, and $2.50 is given to RHC activities. The remaining dollar is given to GLACURA, Great Lakes Association of Colleges and Universities Residence Halls, NACURH, National Association of College and University Residence Halls, and ACURO, Association and Honorary Organizations in the Midwest Region.

RHC presents many educational activities, some lack of interest and involvement by many individuals. This lack of interest causes a great amount of hard planned activities to go unused. RHC participation and wants individuals to voice their opinions on new ideas for different activities on campus can begin.

Sue Bowman, one of the RHC co-presidents stated, "We're trying to get different
campus activities, students, RHC is trying to get away from programs that DeBot and Allen Hall Councils push on. It is making an effort to find new interests to bring students in all dorms together for a unified campus.

Mike Bielewicz, 30, a UWSP student was found…

MADISON—Under provisions of a new law, Wisconsin cities will receive about $3 million in state funds in January for services to University of Wisconsin campuses and other official campuses were told here Wednesday.

President John C. Weaver of UW-Madison reported the forthcoming payments at a meeting of the League of Madison Official campuses last evening at the Park Motor Inn. He said that approximately three-fourths of the $3.25 million earmarked to pay municipalities for services to state institutions would go to communities providing services to the UW System's 27 campuses.

"This is the first program of such breadth in the nation, and we shall make for improved relationships between the campuses and communities in the years ahead," Weaver said.

The new law authorizes annual payments for police and fire protection and for trash collection from state institutions. Payments will be computed and paid by the State Department of Administration.

The major financial benefits to campus cities and surrounding areas, however, comes from university purchases and from spending by thousands of students and visitors, Weaver said. He cited a study by Prof. William Strong of UW-Madison showing that about $1.5 million flowed into the Madison area economy from university sources in 1969. As the money was respect, a careful allocated economic activity amounting to $451 million.

Weaver said that he was "encouraged" by progress made since the university merger law was passed in October 1971, combining the two former university systems in the state. "We have a very robust two-year-old on our hands," he said. The system now serves about 125,000 students based on the campuses of 13 universities and 14 two-year colleges.

A bill to complete the merger by revising state laws is now sidetracked in the Legislature, Weaver reported, because the Assembly Education Committee has defeated the legislation. However, there was no assurance that the Board of Regents, final authority to discontinue graduate programs on any campus.

"It is hard to cope with the confusion this action creates," Weaver told the city officials. "The Legislature clearly anticipated the Baker Bill to move swiftly to eliminate unnecessary duplication of local governments. Yet we still hear an 'or else' tone to the order. The recent merger bill was the first to be referred to us since we left the Legislature, new authority to discontinue graduate programs on any campus.

From that point on, his life was one steady period of rehabilitation. After a period of rehabilitation, he could feed himself and type with finger splints.

He admitted being in a deep depression over the situation. Getting back in touch with the university helped matters. Until his death, he was clinging to the hope that perhaps there would be something he could do on a professional basis if he could just complete his college work.
If it was up to you to find a room on campus for your group, would you know how to reserve one? If not, then you are lucky to be learning about the office of Conference and Reservations.

At the office of Conference and Reservations, located on the second floor of the University Center, conference directors Dennis Nuckols and Mary Moiser, along with their secretary, Suzanne Grabau, work together to meet the needs of any group or individual looking for accommodations. They will work with conference groups, such as workshops and institutes, not only reserving meeting space but also lining up the housing accommodations, meal services and parking permits that the conference group may need.

After your group puts in its request and is paid for the ability to Conference and Reservations, Mr. Nuckols and Mrs. Moiser will work with their books to be sure that the facility wanted is open for reservation. They will then work around a list of the building's basic university priorities and can consider the facility for outside use only when these have been fulfilled.

Mr. Nuckols and Mrs. Moiser must get official clearance for use of that facility and then notify your group, confirming the reservation.

"If the room or building your group wanted to use isn't available," said Mrs. Moiser, "we will go to great lengths to find other accommodations that would be suitable for your group."

What kind of charges are there for this service? There is no charge for the coordination services of Mr. Nuckols and Mrs. Moiser who are paid by the university. A fee is charged, though, for the use of the facility and any maintenance that is needed for the meeting. Conference group fees also may include housing, meals and equipment rental.

The facility usage fee is derived from how much it costs to maintain the buildings being used. The fee for the use of one of the centers goes back to the center. The academic building's fee is returned to the university. Part of the money is for basic expense, and the building is not at the cost of the taxpayer or student. Any money leftover is put in the special conference account. Money from this account is used to buy special items that are added to the buildings on a year-to-year basis.

You may be wondering what the chances are for your group to find a facility. It all depends on the facility they desire. If you belong to a student or faculty organization, then you are top priority of the Conference and Reservations staff. Groups hosted by a student or departmental organizations are next on the list and finally private groups are coordinated. Mr. Nuckols pointed out that no more than five percent of the available space in a building will be reserved to a private group at one time.

Not all private groups can make reservations for the use of campus facilities. Academic activities, state-owned buildings such as the ones on UWSP can be used neither for religious worship or instruction, nor profit-making organizations unrelated to the university. Also, conventions that don't imply an educational nature are not worked with.

State-affiliated, educational, youth and non-profit civic groups are among those who can reserve university facilities through Conference and Reservations.

The next time you need a meeting place for your group, remember the people who work for Conference and Reservations; they arrange the accommodations for you.

\[\text{November 15, 1973} \]

\[\text{THE POINTER} \]

\[\text{DeBot Board trying to change image} \]

The board is hoping to break out of its stereotyped image this year, said board chairman Joe Weigand and Dean Wrobleski.

Weigand said that the board is hoping to break out of its stereotyped image this year, said board chairman Joe Weigand and Dean Wrobleski.

Wrobleski said that the board is hoping to keep the events free, but for the more expensive forms of entertainment they have to make a minimal charge, usually no more than a quarter. "Our purpose is to put on as many free events as we can," he said. "We get about $5,000 per year to work with, which comes from student housing money. If we turn around and charge, $1 for a movie or $3 for a group, then we're not being fair to the student notify your group, confirming the reservation.

"If the room or building your group wanted to use isn't available," said Mrs. Moiser, "we will go to great lengths to find other accommodations that would be suitable for your group."

What kind of charges are there for this service? There is no charge for the coordination services of Mr. Nuckols and Mrs. Moiser who are paid by the university. A fee is charged, though, for the use of the facility and any maintenance that is needed for the meeting. Conference group fees also may include housing, meals and equipment rental.

The facility usage fee is derived from how much it costs to maintain the buildings being used. The fee for the use of one of the centers goes back to the center. The academic building's fee is returned to the university. Part of the money is for basic expense, and the building is not at the cost of the taxpayer or student. Any money leftover is put in the special conference account. Money from this account is used to buy special items that are added to the buildings on a year-to-year basis.

You may be wondering what the chances are for your group to find a facility. It all depends on the facility they desire. If you belong to a student or faculty organization, then you are top priority of the Conference and Reservations staff. Groups hosted by a student or departmental organizations are next on the list and finally private groups are coordinated. Mr. Nuckols pointed out that no more than five percent of the available space in a building will be reserved to a private group at one time.

Not all private groups can make reservations for the use of campus facilities. Academic activities, state-owned buildings such as the ones on UWSP can be used neither for religious worship or instruction, nor profit-making organizations unrelated to the university. Also, conventions that don't imply an educational nature are not worked with.

Community industries specialize in vocational rehabilitation

by Lydia Abell

A remarkable phenomenon exists in Stevens Point: Community Industries, Inc., formerly known as the Portage County Sheltered Workshop.

This non-profit, vocational rehabilitation facility is staffed by dedicated men who discuss their work with fervor of a religious mission.

"This is a dead serious business," said training supervisor Walter Kallaiainen.

We are preparing these people for their future. They have just as much right to a happy, productive life as the next fellow.

Community Industries, located at 3116 Algoma St., is presently serving physically and mentally handicapped people ranging in age from 16 to 65. "Our goal is competitive employment for these people," said Martin "Bud" Werner, director of Community Industries. "We evaluate a person's capacity to be gainfully employed and then train him to develop that potential."

Job training includes "vocables of different things," Werner said. Activities are assigned according to ability, and range from simple boxing of card sets to the operation of power saws and a multihill of press.

Most jobs are handled on a contract basis from local industries. Werner said. For example, pallets for industrial use by the Steel King Corp. are made in the lumber shop. Also, bakery labels for most of the IGA stores in Wisconsin are printed in the workshop.

Arts and crafts activities are done by those who are unable to do much else, said Kallaiainen. Candles, blankets, centerpiecees, Christmas decorations, yarn dogs, planters and book cases are sold in the Craft Center, which is open Monday through Friday from 9 a.m. to 3 p.m.

Community Industries was founded in 1965 by the Portage County Association for Retarded Children. The old facilities were outgrown and the new building on Algoma Street was completed in March, 1972.

Substantial support is provided by the United Way and the Portage County Board of Supervisors, Werner said. In addition to the job contracts with local industries, Community Industries earns money by selling its services as a vocational rehabilitation agency. The state Division of Vocational Rehabilitation and the Division of Mental Hygiene regularly refer people to Community Industries for evaluation, counselling, training or placement, Werner said.

Finding jobs for skilled graduates is often difficult, Werner said, "It's a matter of public education. Industry seems to be fearing the unknown." Werner cited Steel King Corp., Herrschmers and Joerns Furniture as local industries that have been helpful in hiring graduates.

"Many of our people go out and get jobs on their own," said procurement agent Pete Reser. "We use work as a medium to help regain self-confidence." Many handicapped people have been overprotected at home and need a "boost," Reser said.

Supervisor Kallaiainen also stressed the importance of developing interpersonal relationships. "No matter how well we train a man on a machine, if he can't get along with his fellow workers, it's all to no avail," he said.

Many UWSP students have participated in the activities of Community Industries. Dr. Robert Rossmilller of the Education Dept., reports that he takes his "Exceptional Child" class for a tour each semester. Several psychology students have been working on a project at the center, Kallaiainen said he is very pleased with their work. Also, some work-study students are employed at Community Industries.

In addition to the educational opportunities offered by Community Industries, UWSP students may be interested in some of the center's products. Inexpensive buttons with a special design or message are available, either singly or in any amount. Printing jobs on the offset press may also be commissioned. A variety of attractive, well-made gift items are available in the Craft Center Store.

UWSP To Provide Intern For Oxford Correctional Institution

by Terry Witt

The job market may be a little brighter next semester for the UWSP student selected as an administrative intern to Oxford Federal Correctional Institution. Oxford has agreed to an experimental one-semester administrative internship with the Stevens Point campus next semester. While the concept of an internship is not unique to the academic community, the use of a correctional facility is sure to hold a certain mystique for the UWSP student who will be selected.

Professor Dale Holt of the Political Science Department has been coordinating the internship with Associate Warden Victor Urban. Holt said that even though the internship is still in the concept stages, some preliminary plans have been made.

The intern will probably be expected to spend at least one full day a week at Oxford for the full 16 weeks of the semester. During his internship the student will complete a research paper dealing with both the theoretical and practical aspects of public administration.

"The student intern will be confronted with the problems of a young institution like Oxford with all of its growing pains," said Urban. "He will study the problems of staff and personnel on a very practical level and hopefully it won't be just an academic exercise."

"We're trying to bring Oxford in contact with the outside of a outside community, and at the same time give the student a broader experience," said Urban. "The public has generally held public administrators in disrepute over the years. This is why the contemporary public administrator must be well versed along a broader spectrum of disciplines in order to be flexible and responsive to a skeptical public," he added. "That aspect must be considered when the intern is selected, along with such qualifications as gradepoint and the year in school."

Professor Holt noted that public administration is only one of many fields that have potential for internship programs at Oxford. "The Sociology, Psychology and Communications Department for example could conceivably utilize the internship concept at Oxford," said Holt. "That is why the success of this initial internship program is so important. It could lead to a much more comprehensive program in the future."

Holt indicated that he would be happy to discuss the internship with anyone who is interested. Applications are available.

We use work as a medium to help regain self-confidence."
Complications Have Stalled Science Addition Opening

by Mari Kurszewski

"Complications with the ventilation system has held up the proposed November 1 opening date for the Science Building Addition," said campus planner Ray Specht.

What appears to be holding up installation is the ventilation system. "The opening is the arrival of the University's first effective complement one of the most prominent industries in the state," said Dr. Koester, director of the Paper Science Department. The additional room will serve as a research laboratory to the Chemistry Department.

The addition will also be an outstanding feature of the second floor. "The Animal Surgery room will be used to study brain functions," said Dr. Koester. The addition will be the largest on campus, the Psychology Department.

Although the Psychology Department is working on the second floor, the Psychology department will occupy the first floor. Up until one year ago the two departments were combined.

The basement will have lapidary rooms for three departments. The Geology-Geography Department will have a stone-cutting room, the Astronomy department will have an electrical shop, and the Chemistry Department will have a plastics shop. There will be also be additional separate mechanical and electrical rooms and rooms with future hook-ups for data processing.

There is no designated use for the unfinished space; however, it will be developed for use in the future. For the present time, it will probably be used for storage space," said Specht.

NR Building Offers Better Facilities

NR Building - Offers Better Facilities

by Mary Budde

The Department of Biology and the College of Natural Resources has to hand over its new Natural Resources Building. The building offers a great increase in new and better facilities to the program. James Newman, assistant dean of the College of Natural Resources, said. The opening of the Science Building Addition was held at the Marc Plaza Hotel, November 14, 15 and 16.

Senior Edward M. Kenney (D-Mass.) will be the keynote speaker at the 79th Annual National Indian Education Association (NIEA) Conference in Milwaukee on Friday, November 16, 17, according to James Lawson, public relations co-chairman for the conference.

The three-day convention will be held at the Marc Plaza Hotel, November 14, 15 and 16.

Kenney is chairman of the subcommittee on Ad- ducative Practice and Procedure of the powerful Senate Judiciary Committee, and a member of the House of the Senate Labor and Public Welfare Committee, the Technology Assessment Board. He is also a member of the Senate Committee on Nutrition and Human Needs, Special Committee on Aging, and the Board of Trustees of the John F. Kennedy Center for the Performing Arts.
campus calendar

Thursday, November 15

SKI CLUB MEETING: 6 p.m., Nicolet-Marquette Room, U.C. Agenda: Payment of dues and discussion of upcoming trips.

CHEMISTRY COLLOQUIUM: 7:30 p.m., Room A-121 Science Building. Dr. David E. Green, co-director of the Enzyme Institute, University of Wisconsin-Madison, will deliver a lecture on "Energy Transduction in Biological Systems: RESEARCH IN PROGRESS".

FILM FORUM: 6 p.m., Channel 6. Watch Film Forum for reviews and notices of films in the area, on campus and TV.

CHRISTIAN SCIENCE COLLEGE ORGANIZATION: 6:15 p.m., Room 301, bottom level of Churchill. "Do it with LOVE." All visitors are invited to attend our weekly testimony meeting.

CAMPUS PLANNING AND DEVELOPMENT SUB-COMMITTEE MEETING: 7 p.m., Burroughs Hall Study, basement. Anyone with ideas about how the campus should look is welcome.

OPERA: 8 p.m., Jenkins Theatre, Fine Arts Building. "Der Freischütz."

INTERVARSITY CHRISTIAN FELLOWSHIP: 8 p.m., Muir-Schurz Room, U.C. Inter-Varsity Christian Fellowship will have an informal singing and sharing time Thursday, Nov. 15, beginning around 8 p.m. It will happen in the Muir-Schurz Room in the U.C. Everyone is invited to join in.

Friday, November 16

UAB CINEMA: 8 p.m., A.C. upper. "Marooned."

Saturday, November 17

UAB CINEMA: 8 p.m., Wisconsin Room, U.C. "Marooned."

PAPER DRIVE: Sponsored by the Environmental Council. If you have newspaper or any other recyclable paper material, or would like to help with pick-up, call the Environmental Council office at 346-2605 or stop in at 222 Main. Papers must be bound. Volunteer help is greatly needed. The drive will start at 8:00 a.m.

Sunday, November 18

STUDENT RECITAL: 8 p.m., Michelsen Hall, Fine Arts Building. Lynne Emond, clarinet.

SUZUKI SOLO RECITAL: 3 p.m., Michelsen Hall, Fine Arts Building. Lynn Emond, clarinet.

UWSP MODERN JAZZ BAND: 9:11 p.m., Gridiron, U.C. Free.

WOMEN'S INTRAMURALS: 6:10 p.m., Fieldhouse. Open facilities for all women in gymnastics and swimming. Open courts for volleyball turnaments and basketball free play and racquetball courts may be reserved from 5:45 to 6:15 p.m. on Monday. Bring your own swimsuits and caps.

ARTS AND LECTURES SERIES: 8 p.m., Quandt Gym, Fieldhouse. Krasnayarsk Dancers from Siberia.

Monday, November 19

CAMPUS CRUSADE FOR CHRIST INTERNATIONAL: Encounter meeting, 7:30 p.m. If interested call Jesse James 341-3860.

UAB CINEMA: 8 p.m., U.C. "Home Cookin'."

UWSP MODERN JAZZ BAND: 9:11 p.m., Gridiron, U.C. Free.

WOMEN'S INTRAMURALS: 6:10 p.m., Fieldhouse. Open facilities for all women in gymnastics and swimming. Open courts for volleyball turnaments and basketball free play and racquetball courts may be reserved from 5:45 to 6:15 p.m. on Monday. Bring your own swimsuits and caps.

Tuesday, November 20

UNIVERSITY CHOIR CONCERT: 8 p.m., Michelhen Hall, Fine Arts Building. DISCUSSION GROUP: 7 p.m., Steffen residence, 2009 Main.

UNIVERSITY FILM SOCIETY: 7 and 9:15 p.m., Auditorium, Main Building. Warner Brothers Classics.

Sunday, November 25

Women's Gymnastics: Open facilities for all women in gymnastics, swimming, volleyball play-offs and racquetball courts. Bring your own swimsuits and caps. Racquetball courts may be reserved from 5:45 to 6:15 in person. After that time they will be posted.

Monday, November 26

Women's Gymnastics: Open facilities for all women in gymnastics, swimming, volleyball play-offs and racquetball courts. Bring your own swimsuits and caps. Racquetball courts may be reserved from 5:45 to 6:15 in person. After that time they will be posted.

Tuesday, November 27

UAB COFFEE HOUSE: 8:30-11:30 p.m., Wright Lounge. U.C. "Home Cookin'." DISCUSSION GROUP: 7 p.m., Steffen residence, 2009 Main.

Wednesday, November 28

UAB CINEMA: 8 p.m., Allen Center. "Harold and Maude." PSY CLUB SPONSORS ACADEMIC BOWL: 8 p.m., Wright Lounge, U.C. Two teams will be playing against each other. The two teams consist of six psychology faculty and a team of six students.

RIFLE AND PISTOL CLUB MEETING: 6:30 p.m., Downstairs lobby of the George Stein Building (Campus Security). Training will take place at the Stevens Point Rifle and Pistol Club in Whiting.

STUDENT RECITAL: 3-4:30 p.m., Michelhen Hall, Fine Arts Building. CLARINET CHOIR - BRASS CHOIR CONCERT: 8 p.m., Michelhen Hall, Fine Arts Building.

Thursday, November 29

CAMPUS PLANNING AND DEVELOPMENT SUB-COMMITTEE MEETING: 7 p.m., Burroughs Hall Study, basement. Anyone with ideas about how the campus should look is welcome.

UNIVERSITY CONCERT BANDS CONCERT: 8 p.m., Michelhen Hall, Fine Arts Building. UAB CINEMA: 8 p.m., Wisconsin Room, U.C. "Harold and Maude."
The 23rd Psalm--1973

by Keith Otis

"The Lord is my Genetics Counselor, I shall not want for:

"He maketh me to lie down in genealogies; he nondirects me beside karyotypes.

"He restoreth my inborn errors; he leads me in the paths of reproduction for my name's sake.

"Yea, though I walk through the valley of amniocentesis or under the shadow of feletscopy, I will fear no evil: for thou, the Greatest Good of the Greatest Number, art with me; thy chromosome counts and thy enzyme assays therapies comfort me.

"The prepared multiphasic screening before me in the presence of my illnesses: thou annointest my head with check-ups; my profile runneth over.

"Surely mutations and heterozygosity shall follow me all the days of my life; and I shall dwell in the house of computerized biomedical information forever."

This updated rendition of an old psalm was read by Dr. Paul Ramsey at the Genetic Manipulation of Man Symposium held November 8 in Quandt gymnasium.

Dr. Ramsey felt that this issue of genetic manipulation should be pursued with caution (in hopes that it would not create a monster. He made light of a "1984" world of the future where everyone had or her genetic background on a dogtag which was consulted before dating or mating.

Ramsey also spoke out for the procedural risks and immorality involved with in vitro experiments such as test tube babies. He also pointed out that no one really knows if any chromosome degradation is frozen semen, used in artificial insemination.

Feminist Wilma Scott Heide, president of NOW (National Organization for Women), said she in no way favored the concept of test tube babies. Concerning abortions, she felt that the mother should have the decision over the future of the fetus.

Another speaker, Dr. Sheldon Reed, defined genetic counseling as "the ethics of deciding." He said that geneticists more and more are getting out and screening populations for genetic defects. He did feel, however, that this screening should be voluntary and not legislative. A voluntary program is better accepted but is less efficient in dealing with large populations, said Reed.

Dr. Edwin Larkin proposed an early and periodic screening, detection and treatment (EPISDT) program for genetic manipulation. Larkin said, "You can't deal with genetic manipulation as a short term crisis."

Dr. James F. Crow from Madison pointed out that genetics were actually began until the early twentieth century. He noted that we must discuss what we can do with genetics now instead of hypothesizing about the future. With this idea in mind Crow said, "The chief beneficiary of genetics is presently agriculture."

Crow later said, "The practice of genetic counseling will increase and increase rapidly." In Wisconsin, the majority of genetics counselors are in Madison, and anyone wishing information should contact his office.

In closing, Dr. Crow called attention to the moral uprise in this country. He attributed it to the fact that in America the intelligent and unscrupulous people get rich and practice birth control, while the poor moral people propagate and have children.

---

**UWSP News**

**REGISTRATION FOR THE SECOND SEMESTER, 1973-74:** Seniors and juniors may pick up their registration materials in the Registration Office on Monday, Nov. 19, between 9:00 a.m. and 4:00 p.m. They must discuss what we can do with genetics now instead of hypothesizing about the future.

---

**ATTENTION: DECEMBER GRADUATES:** Seniors who expect to graduate in December will find commencement data available at: Information Desk, U.C.; Records Office, S.S.C.; Student Teaching Office, O.C.E. Candidates in History should report to Professor Reed.

---

**ATTENTION POLITICAL SCIENCE MAJORS:** All required courses for graduation must be completed before the commencement ceremony on December 12. The political science curriculum will be $2.50 this year.

---

**MAT-MST EXAMS IN HISTORY AND SOCIAL SCIENCES:** MAT-MST Comprehensive Exams in History and Social Sciences will be given on Friday, Nov. 30, at 1 p.m. in Room 472 COPS. Candidates in History should report to Professor Donald Dietrich in Room 427 COPS and candidates in Social Sciences should report to Professor Guy Gibson in Room 410 COPS no later than Nov. 19.

---

**LRC MATERIALS RETURN:** All LRC materials charged to students and faculty must be returned by Friday, Dec. 7. We would like to close our books by Wednesday, Dec. 12. After Wednesday, Dec. 12, any accounts which are not settled will be turned over to the Cashier's Office for collection.

---

**REGISTRATION FOR THE SECOND SEMESTER, 1973-74:** Seniors and juniors may pick up their registration materials in the Registration Office on Monday, Nov. 19, between 9:00 a.m. and 4:00 p.m. They must discuss what we can do with genetics now instead of hypothesizing about the future.

---

**GAY PEOPLE'S UNION:** A group of concerned Stevens Point gays invite other gays, concerned straights, and interested undecideds to join them at their weekly rap sessions held at Pacisci, 2215 Prair St., 9:30 p.m. Tuesday nights.

---

Deer Hunting Prospects Look Good

by Jim Hasbeck

If revenge is sweet, 2 North Burroughs was worth a pound of sugar. After losing their initial confrontation with 4 West 17-15, the Northers countered with crushing 15-4 and 15-1 wins. 3 North also suffered an initial defeat, then overcame the setback with consecutive victories. 4 North completed the sweep with a 15-12, 15-7 conquest of 2 East.

3 South found themselves outsized 25-34, yet won by scores of 14-9, 15-4, 15-11. 3 North Sims competed in near-

"Sim"-lar fashion, outsizing 1 South by a mere 2 points in their 15-8, 15-7, 15-7 victories. In the hardest fought contest, 2 North captured a 15-11, 15-17, 15-12 series win.

Neighboring 3 West proved they were not the only team with a winning streak. This time they outscored 35-34, yet won by scores of 16-15, 15-12, 15-7 victories. 3 South exploded, destroying 4 South 15-9, 15-6, then won 15-5, 15-4, 15-1 contests before securing a 15-6 victory.

Knutzen's 3 West exploded, destroying 4 South 15-9, 15-6, then won 15-5, 15-4, 15-1 contests before securing the series with a 15-6 victory.

Victory came easily for Smith's 3 South. They crushed rival 4 North 15-4, 15-17, 15-12. Neighboring 3 West proved they were not the only team with a winning streak. This time they outscored 35-34, yet won by scores of 16-15, 15-12, 15-7 victories. In the hardest fought contest, 2 North captured a 15-11, 15-17, 15-12 series win.

Three Pointer cross country runners won births in the NAIA national cross country meet by placing "in the money" at Eau Claire last week.

"I couldn't be more pleased with our team. Centrally to what has previously been stated, our attitude for these last two races--all season for that matter--has been tremendous. I would have to say that our entire squad, especially the upperclassmen (Behnke, Duvall, Elger and Trzebiatowski) have really set an example for our freshmen. They have pointed mainly to two big races, the Conference and District, and have come away with their best efforts," said a pleased cross country coach Don Amiot.

Don Trzebiatowski ran his best race of his cross country career at the meet on a very difficult course. Trzebiatowski finished with a personal best of 25:09 for the five mile course, some 28 seconds better than he has ever run. He was All-American Lucian Rosa from UW-Parkside in a record time of 24:29. Trzebiatowski's fine performance qualified him for the NAIA National Cross Country Meet.

Deer and bear registration stations, announced by Game Management Staff Specialist Arlyn Loomans, are at locations familiar to most hunters from previous years. A deer or bear must be registered before it is removed from the season zone in which it was killed. The deadline is 5:00 p.m., Monday, November 26. A deer killed under a quota permit must be registered before it is removed from the quota area in which it was shot. There is no quota hunting this year in north central counties north of Highway 46.

Bags are one deer or at most not less than the three deers under a permit. Holders of variable quota permits are allowed one deer of either sex on their party permit license.

The black bear bag limit is one adult bear per license holder per year, during all seasons. Cub bears are protected and it is unlawful to shoot any bear in a den.

"I couldn't be more pleased with our team. Centrally to what has previously been stated, our attitude for these last two races--all season for that matter--has been tremendous. I would have to say that our entire squad, especially the upperclassmen (Behnke, Duvall, Elger and Trzebiatowski) have really set an example for our freshmen. They have pointed mainly to two big races, the Conference and District, and have come away with their best efforts," said a pleased cross country coach Don Amiot.

Don Trzebiatowski ran his best race of his cross country career at the meet on a very difficult course. Trzebiatowski finished with a personal best of 25:09 for the five mile course, some 28 seconds better than he has ever run. He was All-American Lucian Rosa from UW-Parkside in a record time of 24:29. Trzebiatowski's fine performance qualified him for the NAIA National Cross Country Meet.

Three Pointer cross country runners won births in the NAIA national cross country meet by placing "in the money" at Eau Claire last week.

Basketball Shaping Up
As Season Start Near

by Jim Habeck

"Our conference opener last week off Whitehall and Eau Claire," said Coach Bob Krueger, "we'll play each game as it comes." The basketball games will not count for conference play this year. After staging the first three contests on home courts, the conference began November 28, the next appearance before a full student crowd. The conference season favorable is January 18, more than a month later. This un-

deniably forms an ad-
vantage for Pointe opponents. Opponents this year include UW-Green Bay, Nebraska Omaha and Winona. All represented their districts in the state playoffs last year. As for conference opponents, Coach Krueger noted, "Whitewater has their entire starting team back, plus their sixth man who could start on almost any conference team." Eau Claire got Coach Krueger, "has lost a lot of people, but they have a good pickup back. The Falcons will return five returning seniors, while River Falls has a big center, "Superior," said Krueger. "They have a very good basketball team." The Raiders, 6-6 this year, will be the only team other than the Packers to have a chance to win the conference. The Packers, 6-6, have a strong team, while River Falls has a champion, should remain in Eau Claire, according to Coach

Coach Krueger believes several factors point to the games going in our way this year. "Cal Kuphall should be one of our top players," asserts Krueger. "He was conference last year, our leading scorer and of course he's a senior now." Helping Cal out at guard will be returning letterman Bruce Weinskauf, Tom Endahl and Phil Jerg, who can play guard or forward. Manning the center spot will be returning letterman Matt Smith and 6-10 Eldrid Carr, a transfer from Bethany Junior College. Several lettermen and newcomers will battle for the forward positions.

Another factor deemed by Coach Krueger as essential to a successful season is the home court advantage. "The fans continued support is very important," said Coach Krueger. "The players do their best, and when they do a tremendous job it helps to know the fans are behind them."

What is now behind the Packers may well be the most important. "Our freshman team looks to be one of the best in years," stated Coach Krueger. "We should be as good as anyone in the conference." If all goes well, the Packers will be on top before the end of the season. When the Packers are back in action for the game, we'll take Washington. Skins by 31.

DALLAS OVER PHILLY - Tom Landry starts thinking about playoff berth by this time of year. Right about now Tom also has a problem. The Cowboys have just about had it. Can't understand their problems, the Cowboys will continue to add them. Tams by 14.

VIKINGS AGAINST FALCONS - The Monday Nighter and also tossup. Haberman thinks a few that the Vikings will lose one game this season, and this is it. Sullivan and Burke think Haberman is, of course, "very optimistic."

JOE Ryder, once a d,""A backer"" seem to have seen the light and is now displaying the colors of the ""purple gang.""
Two state groups have recently gone on record in support of a moratorium on atomic plants. The news was announced at the Thursday, Nov. 9 meeting of the League Against Nuclear Dangers (LAND).

The Wisconsin State AFL-CIO subcommittee on water pollution passed a resolution favoring a moratorium until the major health and safety issues have been fully resolved. The group expressed concern over the use of Plutonium 238 which it warned "represents a major carcinogenic hazard for more than the next thousand generation." The Wisconsin Sociological Association, meeting in Stevens Point on Oct. 27, also went on record in support of a national and state moratorium on atomic plants in view of all the hazards inherent to their operation.

Delegates from LAND to the meeting of Wisconsin Citizens for Energy Alternatives in Madison, Nov. 3, reported that eight state senators and assemblymen have expressed support of a 3-year moratorium on atomic plants in Wisconsin.

In response to invitations to member organizations of Lake Michigan Federation for comments on federal energy policy, LAND has submitted a statement to Herbert Brown, Director of Federal Energy Regulation Study, emphasizing its concern that government of all levels remain responsive to citizen concerns and respectful of citizen rights in electric energy policy determination.

The statement pointed out an Environmental Protection Agency report which warns that radioactive effluents will cause increases in cancer, heart, mortality and leukemia and that emissions will cause permanent damage.

LAND also drew attention to the statement issued by the 23rd Pugwash Conference on Science and World Affairs, an international body of scientists, issued this fall: "The as yet unsolved problem of waste management and the possibly unsolvable (in an absolute sense) problems of catastrophic releases of radioactivity and diversion of bomb-grade materials, combine to create grave and justified misgivings about the vast increase in the use of nuclear power."

LAND urged efforts by the government to fully inform citizens of risks they may undergo, to concentrate funds on research programs for alternatives to fission, to thoroughly study the health effects of present nuclear facilities and to consider a long-range program of energy conservation rather than unlimited energy growth in future plans.

Local farmers at the LAND meeting reported problems relating to transmission lines. Shocks and injuries were related. Recently utility representatives have been calling on farmers evidently in response to complaints registered as much as seven years ago. The need for residents to know the extent, location and sequence of lines from the proposed Rudolph complex was discussed. From the preliminary report by the utilities, it appears that the new line will have more miles of the proposed mile-wide corridors than any other county.

LAND will meet next Nov. 29 in Stevens Point.

Sand Land Seminar on Nov. 15

The third in a series of five sessions in a "Central Wisconsin Sand County Land Use Seminar" will be held at UWSP Thursday, Nov. 15.

"The 7:30 p.m. session, entitled "Available Facts and Information: How Science Helps with Our Environmental Problems," will be held in the auditorium of the new College of Natural Resources Building and is open to the public without charge.

The seminar, which is funded by the U.S. Office of Environmental Education, is headed by Dr. Raymond Anderson and Dr. Byron Shaw of the UWSP natural resources department.

It is designed to help minimize controversies between agricultural, recreational and public interest groups by bringing land use specialists to the community.

Among the four persons participating in Thursday's program is Hubert Halliday of the Wisconsin State Department of Agriculture in hopes of discussing the use of pesticides. A representative of the U.S. Geological Survey in Madison will talk on water levels, irrigation and drainage.

The program will be recorded by Robert Barrowes, an agricultural engineer of the UWSP Extension, speaking on rural economics. Dr. Byron Shaw, of the UWSP Department of Agriculture, will discuss research needs.

The next session will be held at UWSP Nov. 29.

Wrestling Season Starts Dec. 1

by John Fritzsch

The UWSP wrestling team opens its season on Dec. 1 by traveling to Minnesota to compete in the Parkside Tournament. Coach Reginald Wicks feels that this year's team has the most talent and depth that he has seen in his three years as UWSP wrestling coach.

Wicks said, "This year we have a very experienced team. I think that its goal is to go to the NCAA meet."

Wrestlers returning to the Pointer squad are: Pete Doro at 198 weight class, Bob Bruski at 136 lbs., Steve LaCount and Lani Siddow both at 134 lbs., Warren Petersen at 140 lbs., Don Schatzka at 145 lbs., and Rick Neale at 158 lbs. Dan Kolcher at 150 lbs., Dan Kohler at 154 lbs. and Jerry Crisp at 176 lbs.

Coach Wicks feels that the freshmen are going to be a big help in the team's win and lose combinations. The team's starting lineup is that of Ken Casper at 118 lbs., Mark Casper at 126 lbs., Guy Susiec at 140 lbs. and John Johnson at 150 lbs. as the Pointer heaviest.

These men are the Pointers' experienced and promising freshmen. Doro, LaCount and Teather placed third in the conference meet last year. Philip Mueller and Randy Ueki at 126 lbs. placed fourth in the nation at NAIA meet.

Coaches Wicks feels that the freshmen are going to be a big help in the team's win and lose combinations. The team's starting lineup is that of Ken Casper at 118 lbs., Mark Casper at 126 lbs., Guy Susiec at 140 lbs. and John Johnson at 150 lbs. as the Pointer heaviest.

These men are the Pointers' experienced and promising freshmen. Doro, LaCount and Teather placed third in the conference meet last year. Philip Mueller and Randy Ueki at 126 lbs. placed fourth in the nation at NAIA meet.

The team feels that its goal this year is to place high in the conference meets. "Each year I have set a goal for one more place in the Nationals," said Coach Wicks. "I would like to have at least one, if not more place this year."

The meet will be held at 7:30 p.m. on Dec. 5th at the UWSP.
Pointers End Season On Sour Note

by Jerry Long

The UWSP Pointers finished a long, dreary and rather disappointing football season on a sour note last week by losing to the UW-River Falls Falcons, 14-0. The loss gives the Pointers a 5-5 conference record for this season.

In almost every department the Pointers outshone the Falcons. The Point totalled 234 offensive yards to the Falcons' 143 yards. The Pointers ran off 23 first downs while their defense stymied their opponents, limiting them to just 9 first downs. Stevens Point punt only three times to River Falls' nine punts. Both teams lost an equal amount of fumbles—two. But the statistics tell the story are the number of pass interceptions and yards penalized. The Falcons picked off seven Stevens Point passes to the Point's two. The Point was penalized 41 yards, while River Falls lost 32 yards on penalties.

To the Pointers and the Pointer fans, many of the penalties and other rulings called against the Pointers were a stroke too far. Head coach Monte Charles, usually cool and collected on the Pointers' side lines, at one point called a time-out to express his ire at some of the officials' rulings.

"I don't mind getting beat," said Charles after the game, "but I don't like having the officials blow the game away. It was kind of a frustrating game. We played the whole first half almost in their end zone, and then to have the game blown away..." Charles' voice trailed away on a note of complete frustration.

Charles was referring to several instances when the Pointers were on the verge of scoring only to have the ball turn over to the Falcons or be penalized out of a scoring opportunity.

In one case, the Pointers were at the Falcon 24 yard line and were faced with fourth down. Pat Robbins was called in to attempt a field goal. Though the officials ruled it dead, thus nullifying the Pointers' drive. Shortly after, an interception by Pat Robbins brought the ball back into the Pointers hands, a pass to Larry Sowka by Joe Pilecky, which many thought was an incomplete pass, was ruled a completion and a fumble with the Falcons recovering at their own four yard line. The Falcons weren't able to score on the Pointers' bad luck, but they did manage to upset their momentum.

On the Pointers' 18 yard line the Falcons fumbled an interception early in the third period. Although the ball was still bouncing around, the officials ruled it dead, thus nullifying the Pointers' recovery. The Falcons fumbled their offense, the Pointers recovered again. But the officials again ruled the bouncing ball dead, giving the ball back to River Falls. Two plays later, Jasper Freeman ran the ball into the end zone for the first of River Falls' touchdowns.

The Falcons', second score came at the end of the third quarter on a 1 yard run by Robert Bogers. Jeff Voss kicked both of River Falls' extra points.

Though other officials had made questionable calls in other games, Charles felt that the judgement shown by Saturday's officials was much worse. "I think that this time it (bad judgment), really hurt us," said Charles.

Joe Pilecky and Ben Breese led the Pointers' running attack with 46 and 41 yards respectively. Don Sager added 11 yards and Larry Sowka gained seven yards. In the early moments of the game Pointers' quarterback Mark Olejniczak surprised the River Falls' defense very one day and the his own. Until this, the last game in Olejniczak's college career, Charles had refused to allow him to run the ball. With regular back up quarterback Monte Mattie out for the season with an injury, Charles felt he couldn't afford to risk an injury to Olejniczak.

"I wouldn't let Mark run before—he was our only quar­ terback." Charles took note of marked improvement in the Pointer defense, "Pat Sexton played a helluva game. Mike Diercks played a just as good game. Diercks played that quarterback option just like he had been playing it all his life. If the defense had played half as good against Eau Claire they (Eau Claire) wouldn't have been in the game." Sexton was named defensive player of the week.

Joe Pilecky led all receivers with seven catches for 60 yards. Jeff Gosa and Ben Breese each caught four passes for 45 yards. While Don Sager snared three passes for 47 yards. Bruce Weinkauf made two catches as Doug Krueger brought in two passes for 26 yards. Larry Sowka caught two passes, while Dennis Priczit, Drew Denison and Jerry Raedel each caught a pass. Pilecky took offensive honors for the game.

Mark Olejniczak threw 45 times, completed 24 passes for 270 yards. Mark's day was closed by six interceptions of his passes. Olejniczak's 26 completions gave him the WSC record for most career completions with 314, seven more than the old record set in 1970 by Chris Charnish of Platteville. Mark's 45 at­ tempts gives him the career record in that department with 621, compared to 1970 also by Chris Charnish. Those 45 attempts gives Olejniczak the record for the most attempts in a single season at 250 attempts. That eclipses the old mark of 238 set by Al Charnish (brother of Chris) of Platteville in 1966. Al Charnish's head coach was none other than one Monte Charles, when Al topped Olejniczak's record completion.

Olejniczak tops the record of 148 set by Al Charnish, again in 1966. Gaining 270 yards through the air last week the 6'4" Pointers' quarterback was the single season record for most passing yards for one game, destroying the old record of 106 yards set in 1969 by Chris Charnish. Olejniczak holds all twelve Pointer all-time passing records.

Records don't mean all that much," said a characteristically modest Olejniczak. "when you spend the entire game between the five yard lines, then those records aren't so important. The important thing is when you either win or lose as a team.

Olejniczak also had praise for the offensive line. "They played just great all year. My receivers were great today. Ben Breese had a great game. It is a uniquely ironic end to an ironic season to note that the number of interceptions thrown in the Pointers' last game of the season is also record breaking. Intercept­ ing seven opposite passes, the River Falls Falcons set a new single game record for pass interceptions.

University Health Service

Halloween night was almost the last night for a 14 year old student from our community. The purpose of this article is to point out some real problems and risks involved in purchasing and using unknown drugs in our society.

The following account has been written by a 16 year old student who was a companion to the young man who almost died. The account is in his own words, written immediately after the incident took place, while he was still somewhat under the effect of the drug he took. His account of the episode is as follows, the name used in the article is fictitious:

"On Halloween night I was hiking with my friend, Ted, to Point. Our first ride took us to Amberst Junction. Then we were offered a ride to Stevens Point by a young man in his twenties. After we were on our way he asked how much money we had, how old we were if we wanted any so-called acid that would make us happy and feeling good. He also said it lets you see things as they really are. Just have lots of fun and get into it he told us. We sort of hesitated and decided we would. We thought it would improve our Halloween in terms of fun. It didn't.

"We each took one of his acid tablets and sold us, as we got closer and closer to Point I noticed that I kept forgetting where I was. Then it got worse. I started seeing things move in ways they usually don't. It got more tension and more intense. After a while things weren't just moving but were becoming patterns. Obviously the same things were happening to my friend. For awhile I thought what was happening was pleasant. Then it got worse. I didn't know what I was doing at times. Thankfully after a while I could sense the intensity was gradually decreasing. Then some I would come out of it. I thought Ted was the same place I was. I thought he saw that he would come down. He started getting jumpy and becoming paranoid. I tried to let him know it was O.K. and that he would come down.

Eventually, he started getting worse. He was pushing me sort of, as if he were trying to say something to me. He started getting more and more afraid. Then authentic threatening phrases. Don't lose it. Don't lose it. For awhile I thought he was playing some sort of game. It seemed like he was doing it just to freak me out. I thought NO, I WON'T FREAK OUT. I repeated to myself over and over again to assure myself that I was sane. Then Ted started getting into convulsions and I knew he wasn't trying to trick me. He couldn't breathe very well so I put my finger in his mouth to get his tongue out of his throat. He bit my finger and at the same time he had a look of terror in his eyes.

"When the driver saw what was happening he got paranoid and told me to take him to some O.D. center or something. When we were in town he ordered me to get him out of the car. I didn't know what was what and he became angry and parked the car. He came around and opened my door and said the hospital was right over there someplace, get him out of my car. He became desperate and said get out. I was completely out on impulse I think and then he pulled Ted out and laid him beside the ground. He took off without shutting his passenger side door, he was so scared of the drug sample purchased in an illegal manner.

"I stood there trying to get it together and I thought about what he said about an O.D. clinic. I started running towards some place that I hoped would be somewhere safe but the first thing that came to mind was the hospital. I went over and got him and carried him inside. Then they started asking me questions which at this state of mind confused me more. I couldn't tell them what was in the substance. I started praying. In my prayers I repeated over and over OH MY GOD! OH MY GOD! for hours until I got it together enough to say maybe in my prayers. I hope I never take any more of that, voluntary or involuntary. I never want to see anymore and I'm sure if Ted pulls through he'll say the same.

"Please except wrong spellings etc. because while I'm writing this it seems from my I.Q. I dreamt from this bad experience.

The above account is not as accurate as it could be because of the effects of the drug on the person writing. It can fill in the facts from the point of the 14 year old's admission to the hospital. On admission to the hospital, the 14 year old boy was unconscious. I thought it would be painful to stimulate, was breathing irregularly and had an irregular heart rate with premature beats. A tube was placed down his throat to help maintain a breathing passage. The eyes were widely dilated and were rolling back and forth without focusing. He was admitted to the Intensive Care Unit and shortly after arriving there, the patient had a respiratory arrest. This means he stopped breathing on his own. The personnel of the Intensive Care Unit had to artificially breathe the patient for a while and then they began breathing on his own again. During the evening they called Ted convicted many times. Over the course of the night the boy finally started coming out of his acute toxic reaction to the drug. When I talked to him the next morning he was still somewhat shaky and slightly confused and was not sure about what had happened. He was very tearful and extremely concerned about the well being of his friend.

It is not the purpose of this article to discuss the reasons for student use of drugs, however this topic will be covered in a future article that I am preparing. The purpose of this article is to point out distinct risks that are associated with buying drugs from unknown individuals or sometimes known individuals for the purpose of making your life more interesting or more enjoyable or more comfortable. Studies have been done in which students were encouraged to bring in drug samples that they purchased from various sources around a community. The sample was labeled as to what it was supposed to be by the dealer and then was sent to a lab to be analyzed to see exactly what it was in the substance. One third of the time there was none of whatever the substance, was supposed to be in the samples and frequently there were harmful substances present such as strychnine, photographic chemicals, battery acid, powder and so on.

The episode described above was a result of a 14 year old boy taking a sample which was supposed to have been LSD. A student would never lay his life on the line by taking a substance sold to him for profits from an unknown dealer. In my estimation an individual must be extremely desperate for some greater pleasure to ever take a chance on ingesting, smoking, snorting or breathing in substances which can lead to his sudden death.

If a student is in need of some substance or drug to make his life more tolerable, I would suggest that he talk to known individuals who he is 100 percent sure are non-harmful agents. This is extremely difficult to do. Unless you make the drug a part of your life, you are not going to be able to see the benefits of it.

"I am writing this from my I.Q. I dreamt from this bad experience."
Letters Continued

"Sensible" look at energy crisis

To the editor:

It is time for someone to speak out sensibly in the so-called "energy crisis." While indeed agreeing that this "crisis" is a very dangerous trend, my reasons are vastly different.

First of all, it should be clarified who the real culprit is—namely the government, with its stupid price controls and restrictions schemes. In fact, just recently Congress made the situation even worse by tightening natural gas price controls. All this merely serves to discourage exploration and private industrial research, while encouraging waste and frivolous usage of scarce resources as well as exports away from the low-price domestic market.

Also, if indeed there is a lack of competition in the oil industry, this is due in large part to the dreary alphabet of federal regulatory commissions, as for example the FCC restricts radio and TV competition. What is really needed is a move on the part of the government to get out of the way and let the market solve its "crises" on its own. There should be massive protests to get the government out of where it does not belong and clearly does more harm than good: the economy.

Instead, our politicians are jumping on the "energy bandwagon" set in motion by the President's speech. If presidential leadership is so necessary that people can't do anything on their own initiative, then why not crown Nixon king instead of impeaching him! And of course the Congress, while muttering empty phrases about excessive presidential power, delegates some more emergency powers to the President, as it has been very fond of doing ever since FDR. More recent examples being the Economic "Stabilization" Act and the Gulf of Tonkin resolution.

As in witchcraft and price controls, this is another case where the people are starving in real freedom for some imaginary security. Mandatory fuel allocation, aside from not being the real solution, would be another great leap toward 1984. After creating a problem, the government, to form, invents some more dictatorship to try to solve it. Meanwhile of course the Democrats, with statements such as "too little—too late." (His Senator Gaylord Nelson, who incidentally is up for re-election in 1974), are doing their best to make the Nixon administration's totalitarian policies look relatively mild.

Many people applauded the President's speech as a step away from Watergate toward "more important" national problems. This is the barest nonsense. Personally, I wish for more Watergate paralyzation because the government, by stepping in to solve other pressing problems, tends to just make the mess much worse than before anyway. Besides, mandatory allocation directly encourages the Watergate-type illnesses: bribery, favoritism, and corruption, as business visas for allocation licenses.

Competition will be stifled and restricted to those businesses that have a say in the powerful bureaucracy. Granted the monstrous inefficiency of the automobile, voluntary market allocation through price rises would not only solve the immediate shortage, but also encourage long-term research for better efficient substitutes.

But instead, we will get continuing special favors such as the oil depletion allowance, while the real crisis—the environment—gets second place. I submit that the above way of looking at the energy "crisis" is not merely cynical, but also much more realistic.

Frank H. Barr

**Letters Continued Again**

**Mandatory Student Activity Fees Justified**

To the Pointer editor: I would like to protest two articles in the Oct. 4 Pointer: one, purporting to justify mandatory student activity fees, the other a letter finding the proposed user fee unfair.

Of course, these two closely related subjects cannot be discussed in vague generalities without perpetuating the persistent fallacies concerning them. According to Mr. Sippel, "If the activity fee were not mandatory, many students would not pay it"; perhaps true, indeed — but what a justification!! This is equivalent to saying we must establish Christianity as the state religion, because otherwise some people would not join a church.

Thought control and economic control both spell tyranny and oppression. Sure enough, some "services" provided through our compulsory fee system are really reflecting a fundamental lack of faith in freedom itself, though they are hard put to admit it. They all hide behind the false willage of "education" and "services." Some may reply now that the students DO have control through their elected student representatives — but I find this indirect control a tyranny of the majority as opposed to truly free direct choice. However abused that phrase, "what I really want is "power to the people!!" I resent the fact that a majority can tell me that since I'm too stupid to spend my own money they have to spend it for me to give me the best education."

The most shocking fact about the current fee system, however, is that some money goes toward at least partially political organizations such as the Vets for Peace, United States of America. Indeed, the Wisconsin Public Interest Research Group, A.I.R.O., and the Black Student Coalition. However noble the aims of some of these organizations may be, they would serve us all much better if they were voluntarily financed. For example, the $100 per year to United Council is used to lobby for universal voter registration and against user fees; partisan political purposes representing views not shared by every student. The user fee, if implemented on a voluntary basis, would be a step in the right direction. Accepting this concept would quite naturally raise ticket costs — but I see no reason why spectators at athletic events should not bear their full cost. And by claiming that the user fee may be a deterrent to recreation, the Athletic Ad

**Dorm Students Ask For Hard Liquor**

A letter to Chancellor Dreyfus in care of the POINTER: Dear Chancellor Dreyfus, We are six students who are interested about the present policy of not allowing any beverage more than 5 percent alcohol by weight in our dormitories. As the policy has been explained to us by the Housing Office, the board of regents presently allows each chancellor of the UW System to decide to what extent alcoholic liquids up to 5 percent may be allowed in the dorms. However, after the 5 percent limit the UW System regents will consider giving their approval to allow liquor in the state dorms only if it is requested by a number of UW chancellors, and then it would only be allowed on campuses where it had been requested.

We have recently surveyed students in UWSP dorms and have discovered that of this survey 50 percent were in favor of seeing hard liquor allowed in the dorms. They also felt that there had been no hindrance in the studying conditions (88 percent), or living atmosphere (92.4 percent) in the dorms because of the present beer policy.

We would be very interested in any comments you would have about our survey, and if possible could you tell us if we are correct in the fact that the UW regents are responsible for setting any further alcohol limits. Also, we would like to ask you to explain your feelings on the present policy of allowing beer in the dorms and how you would feel about allowing hard liquor in the dorms.

We hope that you will excuse us for using such an indirect manner to present our views, but we feel that by using the Pointer as a forum we are dismissed as those of a small mind from the general taxpayer. But the real issue is fairness, and here Governor Lucey has taken the correct stand, and I applaud him for it. If the viewpoints above are dismissed as those of a small mind, I refer to the Libertarian fringe of the student body, so be it. As Senator Goldwater put it so well in his 1964 acceptance speech: "Extremism in the defense of liberty is no vice." Frank H. Horn

**Mandatory Student Activity Fees Justified**

To the Pointer editor: I would like to protest two articles in the Oct. 4 Pointer: one, purporting to justify mandatory student activity fees, the other a letter finding the proposed user fee unfair.

Of course, these two closely related subjects cannot be discussed in vague generalities without perpetuating the persistent fallacies concerning them. According to Mr. Sippel, "If the activity fee were not mandatory, many students would not pay it"; perhaps true, indeed — but what a justification!! This is equivalent to saying we must establish Christianity as the state religion, because otherwise some people would not join a church.

Thought control and economic control both spell tyranny and oppression. Sure enough, some "services" provided through our compulsory fee system are really reflecting a fundamental lack of faith in freedom itself, though they are hard put to admit it. They all hide behind the false willage of "education" and "services." Some may reply now that the students DO have control through their elected student representatives — but I find this indirect control a tyranny of the majority as opposed to truly free direct choice. However abused that phrase, "what I really want is "power to the people!!" I resent the fact that a majority can tell me that since I'm too stupid to spend my own money they have to spend it for me to give me the best education."

The most shocking fact about the current fee system, however, is that some money goes toward at least partially political organizations such as the Vets for Peace, United States of America. Indeed, the Wisconsin Public Interest Research Group, A.I.R.O., and the Black Student Coalition. However noble the aims of some of these organizations may be, they would serve us all much better if they were voluntarily financed. For example, the $100 per year to United Council is used to lobby for universal voter registration and against user fees; partisan political purposes representing views not shared by every student. The user fee, if implemented on a voluntary basis, would be a step in the right direction. Accepting this concept would quite naturally raise ticket costs — but I see no reason why spectators at athletic events should not bear their full cost. And by claiming that the user fee may be a deterrent to recreation, the Athletic Ad

Q. What are your views concerning Nixon?

Ken Gray, Senior
"I don't think that he should be President. He hasn't shown me anything that deserves respect. I think he should be impeached or forced to resign."

Sandy Nelson, Senior
"I don't think that he should be impeached. If more evidence comes up and things come more out in the open, then they might have reason to impeach him."

Sandy Nelson

Ken Gray

Phil Stedman, Senior
"Dealing with the idea of conservation of energy, at least, I don't agree with his idea of lowering the national speed limit to fifty. It would be wiser if he put a heavier tax on manufacturers of large engines."

Phil Stedman

Jeff Heinz, Senior
"He's in big trouble. I'm giving him two weeks to resign. He's got to show some pretty hard core evidence to me that he can still uphold the fundamental forms of democracy with which he was installed into the office."

Jeff Heinz

Karen Milheiser, Senior
"I can't really say that I would like to have him impeached because I think that the country needs unity. I can't say that I agree with some of his moves either."

Karen Milheiser

Sunny Narag, Freshman
"As an onlooker to the whole American political perspective, and after having experience with politics of other countries, I would just say that a country has good seasons and bad in politics, and this is a bad season. I optimistically hope that we will have the good one pretty soon."

Sunny Narag

Denise Dvorscak, Freshman
"I think that he should be impeached. I don't think that he is effective as a president anymore. He is under too much pressure in office and I think that he should be removed."

Denise Dvorscak

Greg Haasl, Sophomore
"I don't know that he should be impeached right away. He should either resign or they should get right down to the bottom of the whole nitty gritty thing. They should get the tapes out in the open and, if he is guilty, then take care of him."

Greg Haasl

Sandy Nelson

Lyn Jakusz, Junior
"I feel Nixon has over-stepped his bounds. If the people don't get on to him and start cracking down on what he is doing, he is going to run us into a lot of hassles."

Lyn Jakusz

Joe Edmiston, Junior
"I haven't got much use for him; I never had. He is a real sharp politician but a rotten leader."

Joe Edmiston

Phil Stedman
Point Blank

by Bob Ham Jr.

Nice weather we've been having. Balmly breezes wisping along at 175 miles per hour, all the way from Antarctica, scraping leaves along frosted sidewalks, freezing hands halfway into pockets, petrifying trees before they're fully grown­- pockets, petrifying trees.

Once again, people have discovered just how entertaining it is to stare at the ground and watch their feet as they walk to class.

Everything is turning gray, withering away, decaying, rotted and deteriorating, decaying and eventually being passed off as meat, by DeBot.

The whole thing is, of course, a commit plot. We all know that somewhere in the sky, outside that cold steely winter shell, the sun, the warm air and the stuff that makes the leaves green is still there. We all know that we are presently existing in the deep freeze bottom of God's summer right!

Around this time of year we begin to experience queer feelings of sympathy (empathy) for those poor turkey dinners in the frozen foods section of our favorite supermarket. As soon as some hot dog can scrape up enough slackers for a snowball, things will really get rolling.

Of course, now is the time for all good men to turn their thermostats down to an in­­vigorating sixty-five degrees to conform with the temperature in Mr. Nixon's bedroom. Fear not­-there are alternative sources of heat which we are all aware of. As long as we have taxation, things will stay warm to party cloudy. If things get too cold, and your lips fuse together, you can always try rubbing noses.

The major flaw in Nixon's energy saving proposal is that, while it places emphasis on the individual, it ignores the major energy wasters. Americans driving over 50 miles per hour will save a substantial amount of gasoline. How much more gas could be saved if industry was required to produce cars that did a minimum of 20 miles to the gallon? The national average is now about 12 miles to the gallon.

The inefficient use of energy by industry continues to waste an in calculable amount of our limited fuel resources. Also in question are the inefficient methods used by industry to manufacture these products.

Industry wastes energy in the manufacture of the products that waste energy.

While making our complaints known on industry­ caused energy wastes, we must begin to correct the abuses around us. The best place to start is right here at the university.

Report over­heated areas of the university to the maintenance department. Thermostats should be set at 68 degrees.

Hall councils should discuss ways of conserving energy in the dorms at their next meeting. They should then take action on their ideas.

Unnecessary lights should be removed from brightly lit hallways.

energy conservation is everyone's problem

by Jerry Long

Until last Saturday, the UWSP Pointers had had their share of the breaks. Until last Saturday, the Pointers had received their fair share of the questionable calls from the officials—they had won a few, and they had lost a few. The Pointer opponents won their share of the close calls and had lost their share. Until last Saturday, no one had reason to carp about the officiating at the WSUC football games.

But the incompetence, inconsistency and general bush­ league performance of the officials at the Pointers' last game of the 1972 season went unnoticed. It was, frankly, a scene reminiscent of the 1972 Olympic Games. It wasn't so much that the Pointers lost as that the officials took the game away.

Fumbles that should have been ruled incomplete passes were called even though the receivers simply didn't have possession of the ball. At least twice the ball was ruled dead even though it was bouncing through the air after an actual, real, live, honest to goodness fumble. On the poorest call of the game a River Falls receiver, seeing that he had no chance to catch the ball, smacked into the Pointer defender, deliberately, not accidentally. Obviously, he wasn't even looking at the receiver—but the official, who was NOT on the spot, ruled it a case of defensive pass­ interference. Isn't that supposed to be offensive pass­ interference? One, the Falcon defensive line came charging off sides, but the officials just pretended they didn't watch­ ing. Plays were called backing by officials who weren't where they were supposed to be. They made calls on plays by players who were a hell of a football field away from. Well, just what the hell is their function if they aren't going to pay attention to the game?

Now of course, some clown somewhere is going to think that the only reason I'm irked about this situation is because my team lost. Crap. The reason I'm irked about this is because the problem exists and none of the headfaces at the WSUC headquarters will do anything about it. The fact of the matter is that some, if not all, of the "officials" in the WSUC are no more qualified (if actual performance is the criterion) to be officials than I am. I can make bad calls as well as they can. No doubt that the coaches in the WSUC are aware of the problem: no doubt that some of them have made their feelings known to the WSUC, but why in the name of the seven mad gods who rule the sea doesn't anyone do something about it?

Part of the reason for having penalties is to help prevent injuries. In a game that saw many personal fouls go unnoticed, one wonders why we even bother with rules and officials. We could resort to the murderous kind of play seen at a soccer or hockey game. The game might be more interesting, but then it wouldn't be football.

As for Saturday's referees at the Stevens Point­River Falls game, perhaps they'd better clean up their act or seek a job at the IOC. The International Olympic Committee has a knack for finding jobs for incompetent referees.

The Student Norm

The Student Norm by Taurus

Fresh air fiends could learn to sleep with the heat turned off and the windows shut. Long, hot showers could become short warm showers.

Lights should be turned off when they will not be used for long periods of time. The same goes for the TV, stereo and radio.

The use of flood lights on Old Main should be discontinued. Christmas decorations should be unlit. We can enjoy them in the daylight.

The use of elevators, except by the handicapped, should be discontinued by faculty and students.

Use of university vehicles should be curtailed.

Gas mileage should be the determining factor in the future purchase of university vehicles and any other state­ owned vehicles.

We should make known, by example and suggestion, ways in which the city of Stevens Point can also conserve energy.

Are there any but a few suggestions? Let us make more suggestions, but most of all, let us carry them out. It is no longer a question of whether Americans can give up the gas. Of course, now is the time to think about this.
