FIVE RETAINED, FOUR ON PROBATION

UWSP Loses Two Grad Programs

UWSP's audit was released this week, recommending master's, nine programs to be retained, placed on probation or eliminated in the UW System.

"Unlike some other campuses which developed a large number of graduate programs and had to go through probation or elimination, Stevens Point had started only a few, and now ours are showing up well in their strengths and need for continuation," said Dr. Elwin W. Sigmund, the academic affairs staff.

"Some campuses obviously spread their resources too thin," he added.

The audit was conducted by the UW Central Administration in Madison with input from academic administrators at the various institutions.

UWSP currently has a total of 19 programs in teaching programs, and in the recently completed audit, five will be retained, four will be placed on probation for two years and two will be eliminated.

Scheduled for continuation are the master of science degrees in communicative disorders, home economics education and natural resources; and the master of science in teaching degrees in history and elementary education.

On probation are the master of science in teaching programs in biology, English and communication arts plus the master of music education degree offerings.

The master of science in teaching degrees in social science and reading will be phased out.

There were some ironies in the report of the audit, which was issued by UW System Senior Vice President Donald Smith of Madison.

Campuses at Oshkosh and Eau Claire, which should become regional graduates in English, are the only ones where the person will be headquartered who will coordinate scheduling of graduate courses to be taught by professors from several state institutions, the biggest loss of programs.

Eau Claire currently has 10 programs and is scheduled to retain only five with five more on probation while the five, which has 21, is scheduled to keep only six with eight on probation.

La Crosse will retain 8 out of 18 with 2 on probation; River Falls will retain 15 with 7 on probation; Stout will retain 9 of 10 with 1 on probation; Superior will retain 8 of 20 with 6 on probation; Plateville will retain 4 of 16 with 5 on probation; and Whitehall will retain 12 of 16 with 3 on probation.

Sigmund paid a compliment to "wise action" of Chancellor Lee S. Dreyfus who "concentrated on developing programs here only in those areas where we had extra special strengths."

As a result, most of those programs, during the audit process, fit easily within the limits of economy in the ball game."

Moreover, Sigmund expressed optimism for the future of those programs placed on probation and continuation of some of the courses within programs to be held for.

His reasoning was that the probationary biology program can easily be combined as a concentration area within the master of science in natural resources.

The communication arts offering is rather new but showing very rapidly and is unique in the state because it combines such traditional courses as speech, journalism, film radio, TV and so forth under one umbrella.

The probationary English and music programs are on a little more shaky ground the possibility of either both could either be retained or eliminated or incorporated into new programs offered jointly by Stevens Point and Oshkosh.

There were some ironies in the social science program could be incorporated into the history program, and reading courses in the elementary education and English programs, with few detrimental effects.

Faculties at the UW center were not encouraged to react to the audit recommendations and the public will get their chance to express opinions on the matter at a series of hearings to be held around the state in November by UW Central Administration and the UW Board of Regents. The hearing at Stevens Point is scheduled for Nov. 13.

"But all in all, we're not surprised by what has been recommended and frankly, we're quite pleased that we fared as well as we did," Sigmund said.

cancer, folk fair, dominate fall fest

by Jim Habeck

The schedule for Fall Fest has been released by the University Activities Board (UAB). UAB will feature the Hound Dog Band tonight from 8 to 11 p.m. at DeBot Center with beer and free popcorn.

Friday night, October 12, the Siegal Schwab Band will play and perform at Quandt gymnasium. Tickets may be purchased at the University City Information Desk or from student managers at DeBot and Allen Centers.

Saturday morning will be highlighted by the traditional Homecoming parade. Floats, distinctive personalities, the university and high school bands from the area all plan to be involved.

That afternoon the Pointer football squad will duel a rival Stout team. The game has been designated to start at 1:30.

Sunday afternoon's schedule includes an art fair and folk fair, both set for Quandt Gym. The festivities will take place from 12-4 p.m. with a beer and brat garden in back of Quandt.

The International Folk Dancers will be featured and will include Dick Rodger's and his orchestra. The Rodger's group is now performing on Midwestern television stations and has performed throughout Wisconsin and the surrounding area.

The art fair, also in Quandt, promises a variety designed to please many tastes. Student and faculty art, alumni art and civic displays will all be shown.

tickets may be purchased at quandt gym

Tickets may be purchased at DeBot Center for $1 admission or $1 without admission. The proceeds will go to the Student Union.

A nuclear reactor contains material that is mildly radioactive. During a nuclear reaction this level of radioactive material goes up extremely high. The most combustible materials contained within metal pipes and encased inside steel walls up to one foot thick, have hot pressurized water pumped over them to keep the temperature down. If the pipes were to rupture, the nuclear fuel core would heat up at a rate of 125 degrees per second. Within 25 seconds the fuel core is molten, and within minutes the whole system is lost.

Essentially the problem is how to contain a nuclear power plant at full power, between 1000 and 1100 megawatts, is that there is no automatic safety level percentage that the margin of safety will be reduced to.

"So some campuses obviously have a nuclear power plant at full power, and some campuses have a major rupture in the pipe system surrounding the nuclear core, that would have been," said David D. Corney, director of Environmental Research at BP (Business and Public Interest). Corney, with a bit of wry humor, said the safety of the Collins Classroom Center, as part of the Sengstock Lecture Series on the energy crisis.

The Safety Hazards of Nuclear Power, would be the subject of Corney's public talk. He reviewed the safety problems of present light water nuclear reactors, such as the one being proposed for the Rudolph, Wisconsin site.

Nuclear power is controlled by the AEC, (atomic energy commission). It regulates the safety level of nuclear power, but also promotes and sells nuclear power as a public power system for industry in the United States.

Comedy, with a bit of wry humor, said: "Until the AEC is separated into two separate units, the public shouldn't have any confidence in the AEC."

"After the humor Corney turned serious. He described the components of a nuclear reactor. He said that even if there was no reaction, the area of the reactor would be reduced to a 100 mile area. However, if there was a reactor, it would be a 200 mile area."

Corney's lecture warned that if even five percent of the nuclear core were to escape into the atmosphere, a radioactive cloud as large as 10 miles wide and 45 miles long would form. The lethal cloud could spread over a 100 mile area causing cancer, leukemia and radiation diseases.

Comedy, with a bit of wry humor, said: "Until the AEC is separated into two separate units, the public shouldn't have any confidence in the AEC."

"After the humor Corney turned serious. He described the components of a nuclear reactor. He said that even if there was no reaction, the area of the reactor would be reduced to a 100 mile area. However, if there was a reactor, it would be a 200 mile area."

Corney's lecture warned that if even five percent of the nuclear core were to escape into the atmosphere, a radioactive cloud as large as 10 miles wide and 45 miles long would form. The lethal cloud could spread over a 100 mile area causing cancer, leukemia and radiation diseases.

Death counts would range from 100 to 10 million people, depending on the population density of the area.

According to Corney, if a nuclear power plant would run at less than 100 percent capacity the margin of safety lengthens. "At 50 percent power everything in the ECCS would work just the way the AEC says it will work at 100 percent capacity."

Agnew Resigns

WASHINGTON - Vice President Spiro T. Agnew resigned yesterday.

Agnew then pleaded no contest in federal court in Baltimore to a single count of federal income tax evasion, before U.S. District Court Judge Walter E. Hoffman.

Hoffman said he considered the no contest plea the equivalent of an admission of guilt.

Agnew was sentenced to the maximum $10,000 fine and placed on probation without supervision for three years.

President Nixon will have to submit to Congress a nominee to succeed the vice president. The Nixon nominee will take over the vice presidency upon approval of both branches of Congress.
The honeycomb is over. The marriage of the UW and the WSU systems is on the rocks. Central Administration is making sure that Madison and Milwaukee are getting the biggest piece of everything. The old WSU system, the unwitting bride, is getting shafted.

All the old WSU campuses are losing from one to fifteen graduate programs while Madison and Milwaukee don’t lose a thing. They only gain more of our former graduate students to justify an even bigger piece of the budget. Is it any wonder why Central Administration composed mainly of UW people, that the old WSU schools take a beating?

First it was the graduate program cuts. Now they tell us that we might get to keep five programs, have four on probation and lose only two. We’re willing to bet it won’t happen that way.

Now Central Administration has come up with another brilliant scheme. They want to take all the confidential parents’ statements from Financial Aids down to Madison. We’re willing to bet that the leak would be relatively simple.

“Long is Beautiful” in this relationship. Perhaps it is time to consider divorce on the marital grounds of cruel and inhuman treatment?

Within the first six months, Mr. Jenkins, your condemnation of our coverage of Student Government was unfair and inaccurate. First, we didn’t have the time—no time at all—and second, we didn’t want to get involved with the policy in previous years of severely editing or not printing letters which we felt were libelous or not in keeping with the paper or its policies.

In your criticism of the paper as a whole, Mr. Jenkins, you said you were basing your statements on the first six issues. Yet, all your examples were taken from the sixth issue.

Finally, Mr. Jenkins, your condemnation of our coverage of Student Government was unfair and inaccurate. First, we didn’t have the time—no time at all—and second, we didn’t want to get involved with the policy in previous years of severely editing or not printing letters which we felt were libelous or not in keeping with the paper or its policies.

In your criticism of the paper as a whole, Mr. Jenkins, you said you were basing your statements on the first six issues. Yet, all your examples were taken from the sixth issue.

Mr. Jenkins, I resent your statement to the effect that we are censoring. I feel, that if this is censorship at all, it is much too good for you. I feel the policy in previous years of severely editing or not printing letters which we felt were libelous or not in keeping with the paper or its policies.

Students Start Evaluation

To the Editor:

The hate factory theory is nonsense! Mr. Carle started this theory by using the intolerable! Our students don't know what sociology is. Ms. Carle was asked to name a third point. Unfortunately, she didn't. I'm a Lutheran. I think of it, I never have asked anyone to write "The Hate Factory" came to Stevens Point on September 24, spent two hours, never and swerved a single question, and to define sociology. She hesitated from 1928. After reading Lt. John Gneiser, you will feel proud of the world... Ms. Carle refused to tell the editor.... Dr. Stafford, head of the Department of Philosophy, sees Quaker. Sister Marge Elsen a and decided she was Lutheran Church in Tilleda. I have a degree in Theology. I recognize nonsense when I see it. Ms. Carle said that she didn't go to church because she looked at all the church members and saw that they were as good as they and therefore didn't have to go to Church. I pointed out that there certainly was an advantage in not going to church and not paying the pew collection plate. Ms. Carle said that she only attended one Sunday at a Lutheran Sunday School, but she said that she saw nothing so terrible with her daughter that she couldn't go to church. Your guess is as good as mine. Ms. Carle refused to tell us what it was. When anyone writes nasty, mean-spirited articles about others, their personalities, who and why they are doing so. It takes some kind of person to write "The Hate Factory..." signed: Arnold M. Maahs, Ph. D.

The Great Hate Debate

Students Speak Out

To the Editor:

Carls and sociological studies teachers who were doing the students concerned sub­versive material. Ms. Carle could not name one professor or one student. Ms. Carle says Sociology in a religion. Dr. Fischoff of the philosophy department at Stevens Point is a Rabbi in Sociology. Yet, it was something in his world which made me kind of proud sociology. Ms. Carle suggests..." "I'm a Lutheran. I think of it, I never have asked anyone to write "The Hate Factory..." signed: Arnold M. Maahs, Ph. D.

The Carnegie Commission on Higher Education has been recommended for several months on proposed reforms in higher education. One of the proposed reforms was to eliminate duplication and poorly structured graduate programs so that they will be more efficient and economical. It should also be noted that the Carnegie Commission has recommended that the student should pay more of his tuition, an increase of 30 per cent. Not only did the commission state why it believed in the increase, but it was also suggested, and here's where it gets interesting, tactics to be used in the implementation of such reform. I say this is where it gets interesting because strangely enough, the tactics used in Wisconsin are very much related to those recommended.

The commission recommended that all graduate programs be justified at zero budget. This would place the burden of proof on the school, who wished their programs to be kept, to show the usefulness and credibility of those programs.

The commission then noted that there would be widespread criticism of such a proposal because of the many factors involved (mostly economic). It therefore suggested that an examination of the programs should be done and that a much softer recommendation be presented to the schools. This recommendation, however, did not say what the objective was to which the graduate programs more economical and efficient. Perhaps this objective will be better defined and hopefully without jeopardizing quality education.

What should really be noted is that Central Ad­ministration is not really trying to make the students more aware of the complexities of the Carnegie Commission to achieve what that commission felt were desirable goals and not necessarily goals which the people want. Of course, if the central administrators wish to do this, they can. I believe this was quite evident in the fact that much more of an uproar was created than was an­other choice. That the Carnegie Commission is not necessarily limited to the technical presentation of that word example was buried on page three of this newspaper. It seems fair to say that the complexity of Central Administration's recommendations passed over in roughy eight columns of copy is an indication that the university officials are frightened of the students, who have a "need to know about that powerful bureauremote."
Job Interview Dates Given

All graduates are urged to take advantage of the following interviews by contacting the Placement Center, 106 Main Building, at their earliest convenience. An interview should consist of a coat and tie or an appropriate dress. Literature concerning interviews should be available in our placement library and should be read in preparation for your interview.

**October 23 Through October 24, U.S. Air Force. All Majors.**

**October 22, UW-Whitewater, Wisconsin. All majors especially by human administration and economics interested in the MBA program at Whitewater.**

**October 24, Social Security Administration, Wisconsin Rapids, Wisconsin. All majors interested in career opportunities with the Federal Government. All students who have successfully completed the Civil Service Entrance Exam are especially urged to interview.**

**October 25, R.J. Reynolds Tobacco, Green Bay, Wisconsin. All majors for tobacco sales positions.**

**NOTE:** The Federal Civil Service Exam will be given on campus, October 27th from 8:30 a.m. to 12:00 noon in the Science Building, Room A 121. All interested students please sign up for the test in the Placement Office and pick up the necessary application form. (Further dates for the exams are as follows: November 24, 1973 and January 36, 1974).

---

**Letters, Continued**

**Letters, Continued**

[Text continues with various letters and articles related to campus life, student activities, and career opportunities.]
Dr. Johnson Outlines University Health Service

The following quotation by Dr. Johnson, University Health Service, emphasizes the health service's concern and the importance of student health problems.

"Last year (July 1, 1972 to June 30, 1973) cases of unplanned pregnancy confirmed compared to 78 the previous year. There were 23 cases of gonorrhea diagnosed, compared to 10 the previous year."

The University Health Service is located in the basement of Nelson Hall. It is staffed by three full-time physicians; Dr. Johnson, Dr. Numan, and Dr. Hettler. Others on the staff include three and a half full-time registered nurses, one and a half medical technicians, and one doctor's assistant, a part-time health educator, and two secretaries. This year they are also fortunate to have a former air force paramedic, Kim Floyser, working mornings at the center.

The health center is open five days a week, closing only on weekends and during student breaks. Every third week, on a rotational basis, the three physicians are on twenty-four hour call with Saint Michael's Hospital in the event of a student emergency. They average approximately three calls per night while on standby.

Last year, despite a decline in enrollment, utilization of health service increased substantially. The total number of student visits was 18,177 compared to 15,500 the previous year. This year over 20,000 student visits to the center are anticipated. Last year's budget totaled $198,429 and logged the above 18,177 student visits to the facility. These visits produced 10,262 lab procedure tests. This gives an average cost of $10.94 per student visit.

Using local clinical and hospital costs for the same services a rough comparable cost figure was obtained. These tests gave a per visit average cost of $14.53. This average visit cost is 33 percent higher than our health service.

Dr. Johnson went on to describe five objectives of the center. The first was prevention of illness and injury if possible. This is accomplished primarily through health education which may include talks on an individual basis, dorm talks, published information, films, brochures, or classes such as the community health class taught by Dr. Hettler, or Dr. Johnson's safety and health information to a scuba diving class.

A second objective is the earliest possible detection of illness and injury. Common lab tests include cancer tests, especially in the female breasts and pelvis, and tests for venereal disease, which, due to easier detection, occur most frequently in males. Everything said or done at the health center is held strictly confidential.

A third objective is prompt, high quality treatment. Last year a waiting survey was taken and the results showed that it took an average waiting time of six minutes to see a "health professional". Often there is no need to see a doctor and matters are handled by paraprofessionals.

A fourth health service objective is rehabilitation for or adapt a person to his problem or disability, in the event of a prior illness or injury. At the center, people are more prone to follow regular check-ups and are better informed of their own health. The center is open five days a week, closing only on weekends and during student breaks. Every third week, on a rotational basis, the three physicians are on twenty-four hour call with Saint Michael's Hospital in the event of a student emergency. They average approximately three calls per night while on standby.

Every third week, on a rotational basis, the three physicians are on twenty-four hour call with Saint Michael's Hospital in the event of a student emergency. They average approximately three calls per night while on standby.

Concerning the future of the health center, no plans are evident for a significant change or relocation of the facility. Dr. Johnson felt that the current site and place he could foresee a site adjacent to the hospital to maximize efficiency.

In conclusion, this reporter would like to honor the request of Dr. Johnson to stress the need for every student to possess some form of health insurance. The center is there and paid for by twenty-two dollars of student tuition. In the event major medical attention is required, insurance would be a basic need.

Archives open to students and faculty

by Mary Budd

Archives, under the direction of Nels Kampenga, collects and files all records of the university to make them easily accessible to students, faculty, or community members.

Archives was officially established in 1967 to gather records that were previously scattered in different help, especially in the absence of any official files of all student publications preserved in the library and the attics of Old Main, said Kampenga.

Records of past UWSP presidents' papers and speeches are available from the beginning year of 1894. The F.D.A. was evaluating cigaretes and alcohol as 'new drugs' to be released, they would be ruled out in an instant.'

SAYS PLACEMENT HEAD

Job Situation Improving

by Dave Geneiser

"I’ve noticed a much improved situation in many business employment areas," said Dennis Tierney, director of the Career Counseling and Placement Center. "However there is still instability due to inflation, Watergate and some uncertainty regarding equal opportunity legislation.

Tierney described the recent lawsuit against the Bell Telephone System for its failure to provide existing employees an equal opportunity for promotion. Similar suits are now pending against Ford, General Motors, General Electric and Sears.

As a result, some companies may tend to favor promotion from within rather than hire a new individual, said Tierney.

"There are still opportunities for high achievers and productive individuals with a background in extracurricular activities," Tierney said. "Companies look for an individual who isn’t afraid to get involved."

Recruitment Down

Tierney noted there isn’t a whole lot of campus recruitment right now. There is usually more recruitment second semester. The cost of recruitment runs very high and the abundance of prospective employees makes for what Tierney calls a "buyers market".

Companies are sending job descriptions to the placement centers instead of sending a recruiter. Many job interviews take place at the company rather than on campus.

Teaching Jobs

"No teaching recruiters are scheduled to come here during first semester," Tierney said. "But second semester is always more active in that area."

According to the indicators he has, Tierney speculated that teachers in these areas will be in demand: general science, home economics, men in elementary education, business education, mathematics and coaching in all areas. Also, sciences such as chemistry and physics look to be in strong demand.

"Students with a double major in related areas have a better chance at getting a job," said Tierney. Being able to work in coaching, reading, drivers education, drama, journalism or forensics also strengthen a candidate’s chances.

"Any area changes fast," said Tierney. On the national average, 50 percent of those graduating in teaching are expected to be placed. "We’ve traditionally done much better," Tierney said. "We have received many favorable reports on UWSP graduates hired by schools. This school and its faculty are highly rated."

Tierney said that 82 percent of last year’s graduates in teaching were placed. About 11 percent get actual teaching positions.

Teacher Unemployment

Tierney cited several reasons for teacher unemployment. "The number one problem is geographical immobility," said Tierney. "One must be willing to go where the jobs are."

A poor student teaching record and low grades are also factors," said Tierney. A prospective teacher is hired on the basis of his past performance.

Tierney said that an oversupply of certain majors, poor interview skills and bad career planning are other reasons.

"Students prepared through our placement program have traditionally done better," said Tierney. "Students prepared in extracurricular activities."

Placement Services

Like many other areas, Career Counseling and Placement has felt the consequences of the budget cuts. A service that was formerly free, now has a price tag. The first 50 copies of resumes and transcripts are available to the student at a cost of $2.50 for the first 50 copies. Subsequent copies are cheaper.

Formerly the alumni could use the services of the center for free. A $10 fee is now charged for a year’s service.

"The college program is still important for the individual seeking a job," Tierney said. "The ability to synthesize knowledge is as important as vocational training."

"We wouldn’t advise anyone to change his major just because there are few jobs in that field," said Tierney. "The individual should be able to find a job where he is happy."

Student affairs committe meeting tonight

The Student Affairs Committee of the Student Senate will meet Thursday, Oct. 11, at 5:30 p.m. in the Gov. Dodge Room, University Center.
Two Committees Issue User Fee Reports

by Terry Witt

A users fee study report issued jointly by two committees at UWSP has recommended that a proposed expansion of the user fee program at this campus next year not be implemented.

The user fee program is a part of the state plan to reduce spending on the UW System. Under the plan-proposed budget cuts would theoretically be replaced with revenue produced through users fees. The users is an admission fee for athletic events, arts and lectures, drama and most non-curricular activities, currently 30 cents. At this campus the users would have to raise $64,000 in lost state revenue producing abilities at UWSP according to the report.

As a result "the recommendation of this campus is that this inadvisable backdoor approach to further budget reductions be combated at the highest level of government," said the report.

The study was prepared by the planning and budgetary and advisory committee (PPBAC) in cooperation with the users fee task force. Both committees stressed concern over budget cuts because of what they termed "the detrimental effect on established and approved educational programs."

They were referring to the potential loss of programs and personnel in the school of health, physical education, recreation and athletics (HPERA) and the arts and lectures and drama programs that currently enjoy the support of state generated revenue.

The question was posed to Dr. Bowen, Dean of HPERA. His answer was similar to the user fee task force's recommendations to the user fee committee. "We feel that all the programs should be retained," said Bowen.

Whether Dr. Bowen or Central Administration sets precedent for this campus may be somewhat academic in the face of real program cuts. The fact still remains that from 5-11 faculty positions in HPERA will be eliminated along with their programs, if the budget cuts become a reality.

It's well known in administrative circles that the deletion of both basketball and football in addition to the salaries of these coaches would cover the $64,000 loss. The other alternative would be to eliminate all lesser sports, such as track, hockey and soccer. Combined with the accompanying loss in coaching personnel, would be devastating to the sports program at UWSP.

Student body president Jim Hamilton explained the limited options that will be available if the budget cuts are instituted. "We really have only three options open to us if the state money is lost," said Hamilton. "One, we could lose the entire athletic program or two we could drastically reduce the athletic program to a few sports or club sports. Third, funds could be shifted from academic areas to save inter-collegiate athletics."

The user fee study report pointed out that sports are essential to the instructional programs of the School of HPERA. Many of the professional studies programs such as the new coaching minor, require practical experience in sports. All of these programs would be curtailed without a good, supportive sports program. Originally it was believed that expansion of the "Users fee" to include more categories would raise the money to avoid undesired consequences. That idea faded with the users fee report.

"Broadening the fee program to include "users" of the gymnasium for intramural purposes, would be too costly to administer and regulate. Both gymnasiums have several entrances which would require an inordinate number of people to supervise and collect activity tickets."

Several other possibilities were considered including a larger user fee assessment to faculty and staff who now have a reduced rate. Unfortunately the amount of revenue raised would not justify the inconvenience of the inflated fee.

In view of these results, PPBAC and the task force have recommended that state support for these programs continue.

The next step will be to convince state legislators that the user fee concept is a bad one for state universities.

The “Prevent Rip-Off” program has been successful so far, according to the Director of Campus Security Alan Kursevski. This program is designed to prevent thefts from occurring and easy identification if valuables are stolen. Detective Claude Ausdermayer is in the process of visiting all dorms to engrave bicycles and other valuable items.

Director of Campus Security Alan Kursevski. This cooperative effort, he explained, has been very successful in preventing bike theft. Serial numbers are engraved in the dorms by a machine that was purchased several weeks ago. The dorms are planning to buy this engraving equipment as soon as it is available.

The Stevens Point Fire Department has engraved over 1000 bicycles since the program started. In the recent past, 300 bikes were reported stolen between July 1, 1972 and July 1, 1973, as stated by Kursevski.

Option 1:
- Always secure your bicycle with a heavy-duty lock and chain.
- Record make, model, and serial numbers.
- Register your bike with Stevens Point Police Department.
- Engrave your Social Security number and Stevens Point, Wis. on bike.

4. Engrave Social Security number and Stevens Point, Wis. on bike.

5. Contact UW Security immediately if you notice suspicious persons or activities in or around bicycle racks.

A total of 213 traffic violations involving bicycles occurred last year, according to Sgt. Donald Sankey of the Stevens Point Police Department.

Mary Ann Krueger, a member of the Stevens Point Safety Council, said all students should follow these rules to help prevent accidents from occurring:

1. Bike riders are subject to the same laws as automobile drivers. Do not go the wrong way on one-way streets.
2. Obey all traffic signals and stop at stop signs.
3. Avoid weaving in and out of traffic.
4. Ride on the right side and close to the curb.
5. Look out for cars pulling in and out of parking places.
6. Never ride at night unless the bike is equipped with head lights and rear reflectors which are visible 200 feet away.
7. Keep bike adjusted and in good condition.

WASHINGT0N - Farm and food product wholesale prices fell a record 6 per cent last month. The drop is expected to show up on supermarket shelves in the near future.

MADISON - Gov. Patrick J. Lucey a week ago Wednesday told a joint session of the Wisconsin Legislature that he would press for action in the areas of energy, environment, highway safety, health care, consumer protection, judicial and penal reform, and government ethics.

BOSTON - Evelyn Wagler, 24, was set on fire by six black youths Tuesday evening. Mrs. Wagler was pronounced dead four hours after a police ambulance took her to Boston City Hospital.

MIDDLE-EAST - Fighting between Israel, Egypt and Syria continues. War continued Monday in the Suez Canal area between Egypt and the Israeli-occupied Sinai Peninsula, and the Golan Heights near Israel's north-east border with Syria.

WASHINGTON - President Nixon reportedly exchanged “messages” about the Middle East war with Soviet leader Leonid I. Brezhnev on Sunday. The “holiine” was not used.

MOSCOW - Soviet writer Vladimir Bukovsky, 31, recently rejected an official offer of freedom in exchange for his pledge that he never again distribute or write criticism of the Soviet system.

WASHINGTON - Food prices will increase by 10 percent over the next six months, said Dr. Herbert Stein, chairman of the President’s Council of Economic Advisors, on Friday.

WASHINGTON - Lawyers for Spiro T. Agnew served subpoenas Friday on newspapers representing six publications and two broadcast networks. Several subpoenaed sources are quoted as saying they will fight this attempt to force disclosure of confidential sources as a violation of the First Amendment.

BALTIMORE - Vice President Spiro T. Agnew has no constitutional immunity from criminal prosecution, the Justice Department argued October 5. Agnew’s lawyers contend he must be impeached before he can be prosecuted.

MADISON - An equal rights bill to eliminate distinctions by sex in Wisconsin statutes passed the Assembly 89-28 on October 4.

Deb Hill, female disk jockey at WWSP.

WWSP Features Extended Broadcasting Time

by Lorraine Houihan
In cooperation with Deb Hill

Formerly signing in on late afternoons, WWSP-FM now conducts programming from 6:54 a.m. to 12:45 a.m. on week-ends. Tim Donovan, student manager, said that few other stations that are licensed educationally have such an extensive broadcasting period.

Only minor revisions were made in the programming schedule. Besides regular music, news, sports and public service programs, WWSP also has three special programs that are unique in the Central Wisconsin area. These programs are Two Way Radio, Ear Play and On The Rocks.

Two Way Radio is a telephone talk show that is aired Wednesday nights 10:00 to 12:45 a.m. Host Donovan is on the WWSP end of the telephone and all listeners are invited to call in and rap, beep or comment on any subject of interest. No waiting is necessary because taped programs Ms. Eckart are available by dialing 346-2096.

Ear Play is a series of one-act radio dramas produced by radio station WHA in Madison. The one-act plays range from light comedy to serious drama. The show is run on WWSP at 10:30 p.m., seven days a week, during Nightwatch (the campus station's progressive rock show)

Tom Collins: On the Rocks, Saturday mornings 8:00-1:00, is another program that can't be found elsewhere in the radio dial in this area. Collins and Bob O'Halloran team up in one of the wackiest shows on radio.

Betty Eckart, communication major and telephone coordinator, also hosts weekday shows: jazz, classical, easy listening and taped programs. Ms. Eckart has worked in previous years with WWSP and has the responsibility of directing the annual WWSP telethon. The telethon will be held December 1 and 2 with the goal of $7000 to donate to St. Stevens Point area charities. Deb Hill, primary education-history major extends her interests to commercial radio on weekends (WCOO, Oconto, Wisconsin) and reporting for the Pointer, which is really time consuming but I love it," said Ms. Hill.

WWSP news director Nancy Haka is responsible for all major news casts. With the staff of 15, Ms. Haka reports, edits and writes all the latest news of campus interest. "‘Insight’, a half hour weekly program on current campus issues, and 'Sports Highlights' are two programs in connection with the WWSP news department. WWSP emphasizes student interest with live coverage of all Pointer home (football) and basketball games, local elections and common council meetings," said Ms. Haka.

WWSP's entire programming offers many things that can't be gotten elsewhere in the area, said Donovan. Donovan best explains it by saying: "...the purpose we perform is to offer different programming to our audiences...we like being different."

The Sorrow And The Pity

by Toby Goldberg

It was originally made for French television but it was never shown on French television.

'Certain myths must not be destroyed,' the French government declared.

However, that is exactly what Marcel Ophuls four and a half hour documentary The Sorrow and the Pity does. More than any other work of art, this film poses a mighty and devastating challenge to the office of the state in its version that nation's experience in World War II: the myth that the French were massively and hystically in, or at least standing behind, the Resistance, with the exception of a handful of collaborators, that there was a small clique of reactionaries centered in an illegal and illegitimate regime.

This myth has been solidified with the passage of three decades, and its strength and resilience certainly invites rebuttal.

The director's intention has been to show the discrepancy between present testimonies and past reality, the distortions of memory and the soothing role of oblivion for many souls who need to find peace.

He does this brilliantly. There is the shopkeeper, Maurice Klein, who recalls his advertisement denying that he is Jewish; there are the two ancient high school teachers who do not seem capable of bringing their past back to life: there is d'Asnier, former Resistance leader, former fellow-traveler of the Communists, and finally Gaulist—who, on the eve of his death, repudiates his 1944 demand for drastic changes; there is Marcel Ophuls, growing older, must have felt the need to come to grips with the Germans who uprooted him a second time, and his grievances against the French who shattered his love affair, fill the screen.

The Sorrow and the Pity will be shown by the Film Society in Old Main Auditorium on Tuesday, October 16, at 7:00 p.m.

Next time you see someone polluting, point it out.

It's a spewing smokestack. It's litter in the streets. It's a river where fish can't live. You know what pollution is. But not everyone does. So the next time you see pollution, don't close your eyes to it. Write a letter. Make a call. Point it out to someone who can do something about it. People start pollution. People can stop it.

The UWSP Planetarium Series began its programs on Sunday, Sept. 30 at 3 p.m. in the planetarium, located on the second floor of the science building.

Six different programs, each running at least four consecutive Sunday afternoons, will continue into May. Each lecture will be narrated by a university faculty member.

All of the lectures are open to the public without charge, and seating is on a first come basis. Blocher said the programs are designed for general audiences.

All of the subjects for the year are new except for the traditional "Christmas Star" which will be conducted in November and December, which explains some of the astronomical events surrounding the appearance of the Star of Bethlehem.

Mike Trueden will open the series with "The Jupiter Pioneers," which probes man's travels into the solar system. The program will also be featured on Oct. 14 and 21.

"That Lucky Ol' Sun," an investigation of solar energy, will be presented on Oct. 28 and Nov. 4, 11 and 18 by Mark Trueden. The lecture will also include a slide presentation of solar flares and sunspots and eclipses.

Speculations about the possible astronomical explanation of the Star of Bethlehem will be featured on Nov. 25 and Dec. 2 and 9. Robert Valiga, a junior physics major, will be in charge of the program.

"Comets, Meteors and Asteroids," a lecture designed to prove the origin, size, orbit patterns and mythology of comets will be given by Robert Valiga on Jan. 20 and 27 and Feb. 3 and 10. The program will also include a discussion on the Kol-ou-tek Comet which will be visible in the western sky at the time.

"The Best Way to Travel" and see the many stars and galaxies hidden in the black sky will be conducted by Dennis Kolinski on Feb. 17 and 24 and Mar. 3, 10 and 17. Kolinski is a senior German major.

Mark Trueden will present the final programs in the series with "The Wandering Planets" on Apr. 7, 21 and 28 and May 5. He will offer an explanation of the ancient puzzle of retrograde, or backward, motion as well as investigate the environments of each of the planets.

A change in Housing policy may alter dormitory décor. Housing plans to permit the students to have control over dormitory hallways. The change in policy is "pretty definite," according to Robert W. Taylor, assistant to the director of Housing.

Taylor said he was very impressed with the creativity of sample murals he saw at UW LaCrosse. He is currently looking into colors and hopes to arrive at a variety of about 30. This would give a broad spectrum. The paint would be of a different base than that used to paint the rooms and have "wilder" colors. All that is needed is a creative and labor force and the murals will be totally up to the students.

Contents of the murals is totally up to the students. It must, however, exclude subjects of a "pornographic" nature. Some possible items under consideration are to get the ball rolling.

"Housing will slowly but surely be liberalizing all of their policy," said Taylor. "This is possible due to a new generation of students who care."

Soccer Club Edges Ripon

by Sam Eyo

UWSP Soccer Club Team defeated Ripon Varsity Soccer Team (4-3) last Saturday.

The Pointers started out with a conspicuous lack of coordination allowing Ripon to dominate the field. After ten minutes of the play, Brad Seaman, Ripon's right-in, registered their lead. Ten minutes after, and in another move, Ripon's Paul Russe, much in control of the ball, lobbed by their center forward, dribbled out the Pointer's backs, opened a shot for their second goal.

Despair caught the Pointer's soccer fans, Garry Beisser, Pointers' captain, started readjustment of his team. The Pointer forwards combined in a move culminating in Rich Langley's score of the Pointer's first goal.

The first half closed with 3-1 against the Pointers.

The two teams were well-balanced during the second half. Both teams changed their tactics. But while Ripon exhibited more seasoned coordination, the Pointers proved much stronger. The Pointers exerted great pressure on Ripon and the scene was half field.

The Pointer's half-backs constantly fed their forwards with balls. The forwards combined and broke through in a series of onslaughts. Dave Marie whipped in the third goal. Ripon goalies in a leap frog approach to encounter the ball, was tricked by Dave Marie, who then sent the fourth goal rolling into the net.

UAB Offers Award To Talent

The Coffeehouse Committee of University Activities Board (UAB) is interested in promoting several student coffeehouses this year.

The Student Coffeehouse will be held Thursday, Oct. 18th at 8:00 p.m. in the Grid. Any interested groups or individuals can apply at the UAB office-2nd floor of U.C.-by noon, Tuesday, Oct. 16th. $5 will be awarded to the most talented group.

Besides the exposure of his talents at Stevens Point Campus, the winner will have the opportunity of performing at the regional meeting of the National Entertainment Conference to be held Nov. 9-11 at UW-Milwaukee. Representatives from schools all over Wisconsin and Illinois will be there and many will be looking for good student talent.

All interested groups or individuals can apply by noon, Tuesday, Oct. 16th. UAB office-2nd floor of U.C.

The Coffeehouse Committee is looking for good student talent.

was our first runner and ran in 16th place for the meet. Donn Behnke, our second runner, was 28th, Dave Elgar was third for us and 4th overall, Rock Zaborski was our 4th runner, 35th overall and Al Gammoh was our 5th runner and was 38th overall," said Coach Don Amiot. John Duwell was the 6th runner and Don Huntman was 7th runner for Stevens Point.

The time between the first and fifth place finishers was only 77 seconds. "I still feel our squad is a long way from getting into top form," commented Amiot. The team left Don Worsham and Joe Yandt behind with injuries. Amiot feels these runners have the ability to be in the top 5 of the squad.

In the number one singles match, Natalie Andrews was defeated by Debby Schachter of LaCross 6-1, 6-0. The Pointers third seed Sue Anderson lost to Lanny Yandt, 6-2, 6-2.

In doubles competition, Stevens Point's Sue Saito and Barb Kobisai dropped their match 6-0, 6-2, while the number two seeds, Ruth Lutter and Cindy Mixdorf, lost 6-4, 6-0.

Women’s swim team places second

Women's Drop
Five
by Diane Pleuss

USWP's women's tennis team suffered its initial defeat by dropping all five matches to LaCrosse here Saturday.

We were outclassed by a real strong tennis team," said Coach Judy Tate. Kim Fletcher, Stevens Point's number one singles player, lost 6-0 and 6-1 to LaCrosse's Ginger Lough.

Coach Tate said this wasn't as overpowering as it looked with many of Kim's games going to deuce. Kim played well, according to Coach Tate, against a girl who was seeded higher than her last week.

In the number one singles match, Natalie Andrews was defeated by Debby Schachter of LaCross 6-1, 6-0. The Pointers third seed Sue Anderson lost to Lanny Yandt, 6-2, 6-2.

In doubles competition, Stevens Point’s Sue Saito and Barb Kobisai dropped their match 6-0, 6-2, while the number two seeds, Ruth Lutter and Cindy Mixdorf, lost 6-4, 6-0.

sports shops

British champions Glyn Watts and Hillary Green won the first World Invitational Dancing competition last week at London, England.

Albert E. (Reb) Russell, a former pitcher who once pitched a no-hitter and won the 1924 and 1928 Olympics. Nurmi was 76 years old.

Leo Durocher has resigned as manager of the Houston Astros after the Astros had finished a disappointing season with an 82-80 record. Astros' coach Preston Gomez was named to manage the Houston team next year.

Pavo Nurmi, the Flying Finn, whose long distance running exploits made him a legend, died last week in Helsinki, Finland. Nurmi won nine gold medals in the 1920, 1924 and 1928 Olympics. Nurmi was 76 years old.

Muhammed Ali and Joe Frazier will meet in a return 12 round bout on February 4th.

The International Olympic Committee has dropped ten events from the Olympic program in order to prevent a move toward “giantism” in the Games. Among the events dropped was the 50 kilometer walk, a feature of the Games for over 40 years.

The UWSP Women's Swim Team placed second in a triangular meet with Madison and Parkside at Parkside on Friday night. The Stevens Point 200 yard freestyle relay team made up of Barb Smith, Laura Stefied, Margie Neubauer and Kathy Smith upset their own first place with a time of 2:09.7, while Beth DeWitt was touched out at the 100 yard mark in backstroke and 50 yard backstroke for 2nd place in both of those events.

Other meet winners and winners of place were: Nicky Basinger, 500 yard freestyle, 1:58.2, Nicky Smith, the 100 meter breaststroke, 1:07.7, Steve Bremer, the 50 meter backstroke, 27.7 and Katalin Varga, the 100 backstroke, 1:07.9, while Beth DeWitt, the 100 yard freestyle, 58.6, and Barbara Smith, the 200 yard backstroke, 2:09.7.

Intramurals

Smith dairy farmers "cream" opponents

West team proved even more stingy, as they shut out East 2 while accumulating 20 points of offense in the process.

A surprising 1 West Burroughs squad easily handled division winner 4 West, 40-0, in the other division title were 2 North and 3 West. Winning 2 North by a 20-14 margin.

Knutez's 2 South offense was enough to slip by 4 West, 22-12. Scoring nearly the Knutez's total points was nearby Watson's 2 West. The highly touted offense burned 3 West, 32-0.

Sims' action saw two shutouts by scores of 22-0 and 8-0. Winners were 4 South and 2 North, respectively. An offense-oriented match saw 1 South outscoring 3 South east, 38-20, 3 South downs 2 South, 28-6.

Making the grade in the Pray competition was 4 East, who jettisoned to a 40-10 triumph. Pray's version of "How the West Was Won" found 4 East hiring 3 West in a 30-18, 3 West downs 2 South, 28-6.

Knutez found the Independents and Nord victors over the Happy Notes and the Vets, 20-12, while 2 West derailed 1 West, 20-14.

The Vets showed why Uncle Sam had wanted them with a 36-0 demolishing of ROC. The Black Student Coalition also ran up an impressive record through a 12-0 win over Siasie.

Identical scores of 22-0 found the Independents and Nord victors over the Happy Notes and the Vets, 20-12, while 2 West derailed 1 West, 20-14.

The second cross-country run at Madison 7 mile run was over with a time under 6 minutes, 20 seconds. Running away with first place was old favorite, Chip Rebers of ROC, with a time of 5:49. Finishing behind him were the third place Jeff Ketier and Jim Koton of Smith. Second, fourth and fifth places went to Mike Rose and Mr. Lucky and Don Baur of Burroughs. Coming in seventh was Tome Zunais of Knutez.

An organizational meeting of all men interested in a volleyball club will be held October 15 at 7 p.m., Berg Gym. All faculty and students are invited.
The Stevens Point Aerial Circus went down to its fourth defeat in five starts last Saturday at Titan Stadium at Oshkosh. The Pointers lost, 35-19. Pointer quarterback Mark Olejniczak had his most dismal day this season as the Titan defense held him to 201 aerial yards. Additionally, Olejniczak completed only 3 percent of his attempts with 19 completions out of 48 attempts. Olejniczak had to throw four interceptions. The Titans ran 60 times for 219 yards and passed for 298 yards.

The first half saw the Pointers keep pace with the Titans, gaining seven first downs to Oshkosh's ten. In the first quarter ended. An Olejniczak pass to the 16 yard line was nulled by an interference penalty against Feldt to fumble, and an alert Starzinski intercepted a Koupal pass to set up the Pointers' 85. They did gain, ending the half one point down, 14-13.

The second half started with the Titans marching 73 yards in nine plays for their first down. Dan Feldt ran the ball to the endzone for the TD. Dan Wadie's extra point attempt was good and the Titans led, 14-7.

Roger Voloscheck intercepted a Koupal pass to set up the Pointer's second scoring play. Voloscheck caught the pass at the Pointer's 25 yard line and raced it back to the Titan 34 yard line for a return of 41 yards. Doug Krueger took an Olejniczak pass to the Titan 13 yard line. Two plays later Krueger caught another pass at the one yard line but fumbled. Poulson fell on the ball, the Titans bringing the ball to the 20 yard line. With Thompson alertly fell on the ball in the endzone giving the Pointer the TD. Hoffman kicked the extra point, 21-14.

Another interception of a Koupal pass was good and the Titans lengthened their lead, 27-14. The Pointers were forced to punt, Koupal led his team to their own 44 yard line. The Pointer's Gary Starzinski intercepted a Koupal pass at the Stevens Point 40 yard line and raced 60 yards for the Pointer's third and last touchdown. The two point conversion attempt failed, and the Pointers were down, 21-19.

Another interception of a Koupal pass by Starzinski gave the Pointers possession at the Oshkosh 37 yard line. Olejniczak brought the Pointers to the 16 yard line when defensive holding was called against the Titans. This moved the ball half the distance to the goal, to the eight yard line. The Pointer's lack of an effective running game was all too apparent in the next series of plays. With goal and eight at the eight, Olejniczak threw three incomplete passes. The Pointer's efforts were saved only when the Titans were called for pass interference. Again Olejniczak threw three incomplete passes left time from the three yard line. No attempt was made to run the ball into the endzone from that short distance. On fourth and goal Bob Hoffman was called in to try for the field goal. As if to add insult to injury, the Titan's Dallas Lewellen managed to get a hand on the ball and deflect it enough to make the attempt wide and no good.

On the next Oshkosh possession, Koupal guided the Titans from their 15 yard line and in eleven plays added another six points to their total. This time Vender Velden took the ball for a seven yard scoring jaunt. Wadie added the extra point, and, with 2:20 to go in the third quarter, Olejniczak led, 28-19. Three more Stevens Points drive were stopped short by interceptions. One of those resulted in still another Titan scoring pass. In the third period, Oshkosh's Larry Daub picked off an Olejniczak pass on the Titan 10 yard line. Two plays later came the final quarter, Koupal unleashed an 82 yard touch-down pass to Hanker Gary Wild. Again Wadie added the extra point and the Titans posted what was to be the final score, 30-19.

Stevens Point never again threatened, and Olejniczak didn't have to.

Dan Feldt led all rushers with 124 yards on 25 carries. Tim Vender Velden, also of the Titans; carried 29 times for 112 yards. Doug Krueger led the Pointer's ground game with six carries for 31 yards. The Titans finished the game with a total of 219 yards on the ground. The Pointers had a net yardage of only four yards.

Oshkosh's Gary Wild led all receivers with six receptions for 124 yards. Steve Brinja caught four Koupal passes for 62 yards. Doug Krueger led Pointer receivers with six receptions for 96 yards. Don Sager caught seven passes from Olejniczak for 43 yards. The Titans had a total of 298 yards through the air giving them a total offensive yardage of 317 yards. With the addition of an option pass by Joe Pilecky that was good for 12 yards, the Pointers had an aerial yardage of 213 yards for a grand total of 217 net offensive yards.

The Pointers face Stout this Saturday at Goecke Field at 1:30 p.m.
superpickers have field day

by Joe Burke, Tim Sullivan and Mike Haberman

The world is definitely flat. If man was meant to fly, he'd have wings. The Superpickers are washed up.

It's funny how truisms come and go. Ages ago, the world was filled with skeptics. Countless experts insisted the world was flat, while many others scoffed at the idea that man might some day master the flying craft. As recently as a week ago, the critics were claiming that the Superpickers had lost their touch forever.

Well, we'd like to clear up some things right now. We're not about to argue for or against the first two truisms.

For all we know, the world indeed might be flat. How the hell can we tell? The only long-range pictures of the earth that we ever see come from the Goodyear blimp. As far as the man having wings theory, we're not exactly sure there isn't some truth to it. Didn't linebacker Tim Rossovich, who always was confident Washington would win, utter that there isn't some truth to it. Did you ever watch the Monday-Nighters, or the Goodyear blimp. As far as the man having wings theory, we're not exactly sure there isn't some truth to it.

For one thing, the critics were claiming that the Superpickers had lost their touch forever.

We're here to say, quite simply, the Superpickers really did have a fantastic comeback. There was only one way for the Superpickers to silence the critics, and that was to have a fantastic comeback. So, that's what we did. No problem at all.

The Superpickers really did a job on the National Football League last week. Ten of the games were called correctly, and make it eleven if the Redskins beat Dallas on the Monday Night game. Due to our Monday morning deadline, it's impossible for us to record the outcome of the Monday-Nighters, although we were quite confident Washington would win.

To show that our tremendous record for last week was no fluke, here now is the way we see things happening in Week 6.

EAGLES AGAINST CARDS—This is the weekly toss-up, with Haberman taking the Cardinals and Sullivan and Burke picking Philadelphia. Haberman goes with St. Louis because he thinks Jim Hart and Donny Anderson provide a good offense. Sullivan and Burke tend to agree with an old Don Meredith quote Dandy once uttered concerning Anderson from Texas, Tech. Said Meredith: "In Green Bay, the folks used to call Donny the Golden Palamino. In Texas, we call him Billy-Bob's roommate."

BUFFALO OVER BALTIMORE—Classic example of what happens when a once great team gets old together or is traded away. While Baltimore was winning all those games some years ago, Buffalo was going through hell hopefully looking to the future. 1973 came, and while the Bills still aren't a major powerhouse, the Colts are really hurting. Buffalo should win by at least 10.

ATLANTA OVER CHICAGO—If the Bears couldn't beat New Orleans, they sure won't stop the Falcons. Dick Shiner is hurt for the Falcons, so maybe Atlanta will get its potentially offensive power rolling. Should be Atlanta by 3.

RAMS OVER DALLAS—The Rams have made believers out of us. They've been scoring a lot of points each week, so John Hadl obviously must know what he's doing. Dallas is definitely no slouch, but we figure the Rams will take this by 3 points.

DENVER OVER HOUSTON—This one's simple mathematics. The Broncos win once in a while, and the Oiler's always alone. This game will be one of Denver's "once in a whiles". Broncos by 14.

DETROIT OVER NEW ORLEANS—There's no way the Saints can beat two teams from the "Black and Blue" Division twice on consecutive Sundays. If the Lions even bring one busload of their fans to the Louisiana game, Archie Manning will never be able to call out any audibles over the noise of the crowd. Detroit by 10.

PACKERS OVER CHIEFS—The battle of the field-goals, matching Marcol against Stenerud. In a head to head dual, with everything else being equal, we wouldn't pick either one of these outstanding kickers over the other. However, Laze and Brockington should be able to give Chester more shots at the uprights. Pack by 3.

VIKINGS OVER SAN FRANCISCO—The 49ers have beaten Minnesota the last two times, but that was before the Vikings had an offense. Minnesota is a definite power, while the Frisco squad has been struggling. Looks like Vikings by 10.

Patriots over Jets—This is Weeb Ewbanks last game, and New York's not. This will be the Giants’ second straight game in the "Yale Bowl", and it'll also be the Giants second straight loss. Redskins by 14.

MIAMI OVER CLEVELAND—The Monday Nighter. We told you Cleveland's been messing around with us too much. Sure they can beat up on the lesser teams. Let's see what the Browns do against the Dolphins. Miami by 14. Take that, Cleveland.

Everyone saw how we did last week. The Superpickers are rolling now. Only a dingbat would bet against us this time. Watch and see.
