

D.A. says outcome should stand

Primary results in doubt

from Stevens Point Daily Journal stories

District Attorney Daniel Golden said Monday that he tentatively decided that the outcome of the Democratic county clerk race in the Sept. 10 primary should stand, despite voting machine

irregularities in Stevens Point and Whiting.

Regina Hilger, the incumbent clerk, said she will not contest the legal opinion.

Hilger, who trailed Ray Disher by 41 votes in the Democratic primary, filed papers Tuesday morning to run in the November election as an independent. There are no Republican or American candidates.

The voting machine irregularities occurred when machines in Stevens Point and Whiting were set up to

allow an elector to vote in the Democratic, Republican and American Party primaries.

Legally, a voter can participate in only one primary. When a lever for member of one party is turned down, it should lock the levers for the other parties so they cannot be used.

Disher compiled his 41 vote victory margin in Stevens Point and Whiting. He carried Stevens Point by 144 votes and Whiting by 21 votes.

Hilger said that she thought that either the Stevens Point and Whiting votes should

be thrown out (which would make her the winner) or a special election should be held.

Golden, who decided that the primary should stand, said he believes the crossovers were few and didn't influence the results.

Because voting machines tally only total votes, it isn't possible to pinpoint exactly how many people may have voted for more than one party. However, a comparison of the voting patterns

for different offices would indicate it was "insignificant," said Golden.

The intent of the law, said the district attorney, is to "give effect to the will of the electors" despite any irregularities or informalities.

Golden said any candidate who feels aggrieved could go to Circuit Court. But to have a chance of winning, he said, the candidate would probably have to produce numerous affidavits from voters willing to swear they crossed over.

NO. 4

Students turn in petitions

by Bob Kerksieck

Members of the Student Government executive board said, at noon on Tuesday, that Doug Bingenheimer, district two; Robert A. Heil, district two; and Mike Neville, district four, had turned in completed Student Senate petitions at that time.

The names of the three will appear on the ballot for the Student Senate elections to be held Tuesday, Sept. 24. All four senate seats are open in each of the five districts.

In addition, members of the Student Government executive board said that the following people will also be candidates: Kurt Anderson

and Tom (Wojo) Wojciechowski in district two; and Rick Cigel and Wayne Wanta in district five. Wojo is the only incumbent senator who has announced that he intends to run again.

Completed Student Senate petitions must be turned into the student Government Office by 5 p.m. tomorrow to have the name appear on the ballot. Petitions may be picked up in the Student Government Office.

Write-in candidates must announce their intentions to Student Government before the polls open at 8 a.m. Tuesday, if they want their names posted at the polls.

Merger strengthens United Council

by Mike Varney

The apex of student governments in Wisconsin met in Stevens Point last weekend.

The United Council of UW student governments is the name, and Jim Hamilton former UWSP Student Senate head, is the president.

The student organization is the lobbying voice for all UW students before legislators and the UW Board of Regents. Currently it represents 110,000 students.

Formed in 1960 as an information gathering and disseminating organization, United Council (UC) did not have enough power and student strength to do battle with the legislators and the UW Board of Regents.

It was a blessing for UC when the UW System and the former WSU aggregate merged in 1969.

Some major accomplishments to date of UC include authorization of the student section of Governor Lucey's UW System Merger Bill, the saving of \$600,000 per year for UW System Merger residents by eliminating (through state law) the sales tax on dorm food and being instrumental in the Regents decision to allow students to possess alcohol in UW dormitories.

United Council has also come up with some interesting facts concerning student financial aid.

The average increase in cost for UW students from 1973-74 to 1974-75 was \$211 per student. At the same time the average increase in state grant scholarship monies for that same period (1973-75) was only 32 cents per student.

Last Friday night at the Presidents' Committee meeting Hamilton warned the four-year UW campus presidents of a possible split in student governing activities between residence hall councils and student governments.

Hamilton said, "This is a move to dilute the student government's authority." He added that the question wasn't researched at all and no one knew if the residence hall people wanted this authority.

The President's Committee agreed that they should send a representative to Madison to appear before the state residence hall headquarters and inform them that they believe this to be a device to divide student government and the residence halls.

"We think the chancellors are going to use us, to pit one against the other in this," said Hamilton. He favors looser guidelines for

governing activities so the residence halls and student governments will be able to work out their own problems at each campus.

It was also learned that some of the Regents of the UW are leaning towards a return to the bi-level system of tuition (Undergraduate, graduate). This issue will come up at the Board of Regents general meeting in January.

Plans were laid for a statewide student voter-registration drive at the general assembly meeting on Saturday, Sept. 14. "If we can have a very large voter turnout, as we anticipate, this will enhance our credibility and stature before the legislature a great deal," Hamilton said.

Voter registration Drive Chairman T.J. Hankerson explained just how UC proposed to get out the student vote. "We'll make available to them all the tools of registration- information on procedures, absentee ballots, etc. We have the materials and manpower to make this a very successful campaign," Hankerson said.

Summing up the aims of the drive, Hamilton stated, "Our target is November 5, our goal- 110,000 students registered and voting."

Implementation of the

student responsibilities

section of the merger statute is just beginning at all UW school. The law reads: The students of each institution or campus subject to the responsibilities and powers of the board, the president, the chancellor and the faculty shall be active participants in the immediate governance of and policy development for such institutions. As such, students shall have primary responsibility for the formulation and review of policies concerning student life, services and interests. Students in consultation with the chancellor and subject to the final confirmation of the board shall have the responsibility for the disposition of those student fees which constitute substantial support for campus student activities. The students of each institution or campus shall have the right to organize themselves in a manner they determine and to select their representatives to participate in institutional governance.

"I feel that the Stevens Point campus has been in the past and probably will continue to be the leaders in student involvement as far as governance is concerned and as far as many other areas are concerned," Hamilton

reported.

Another major job that UC deals in is that of looking into UW related budgets a great deal to see that the dollars and the cents add up.

All UW budgets are open to public scrutiny. Hamilton explained, "They (UW bureaucrats) can't say no, we're not going to meet with you to discuss this."

United Council is already working on the biennial budget that will be proposed at the January meeting of the UW Board of Regents.

Till then, you can watch for UC to react to bills in the legislature and register you to vote.

Hamilton sounded convincing when he said, "United Council is going to take an offensive stance now for the first time. A really offensive stance in the way that if we don't agree 100 percent with a proposal that Central (Administration) and the Regents come out with, we will try to change the percentage we don't agree with. We're not going to say, well, that's the most percentage we don't agree with. We're not going to say, well, that's the most we could get. We're going to say if we don't agree with that 100 percent then let's go and try to get it changed."

HEAB budget endorsed by United Council

United Council (U.C) President Jim Hamilton today expressed his satisfaction with the financial aid package passed by the Higher Educational Aids Board (HEAB) at their August 23 meeting.

The 16 members of HEAB voted to approve the total package, although not without first considerably amending the work-study proposal.

The three-point financial aid package includes an establishment of a state work-study program, an income contingent loan repayment option and a student targeted comprehensive grant program.

Hamilton praised highly the income-contingent loan option. "This new loan program offers the student a much more equitable means of loan repayment than does the rigidly structured program now in operation." He noted that United Council, a statewide student advocacy group has always supported the idea of income-contingent loans repayments for Wisconsin students.

He also praised the expanded WHEG-Two (Wisconsin Higher Education Grant) program and the inflation escalator which is written into the total financial aid package.

Hamilton's praise was faint for the heavily amended work-study program. "Two things bother me about the work-study program as the Board passed it," Hamilton commented. "First, the \$1 million figure is much too low for the program to have any great effect. In fact, the \$1 million acts only as a replacement for work-study funds cut back by the federal government this year in Wisconsin."

"Second, I'm dismayed the program, a state program, was tacked on to the existing federal work-study program."

"As proposed by Janet (Janet Maciejewski, Student Advisory Council coordinator to HEAB), state work-study was not meant to be an add-on to the existing federal program. Although I'm glad to see work-study

expanded in Wisconsin, I'd rather see that expansion at the state, and not federal level."

In other action, Steven Kimbrough, board member and former UC officer was elected chairman of the board for the 74-75 session.

Kimbrough, a graduate student at UW Madison, is the first student ever to be elected chairman of the HEAB.

Commenting on the election, Hamilton said, "I'm happy we are finally seeing student participation at the chairmanship level of a state agency."

Steve is a very capable and qualified person. I congratulate the board of its choice."

UWSP student found dead in room

by Jim Habeck

Kenton W. Fosse, 20 year old UWSP junior, was found dead in his room early Tuesday afternoon.

Fosse, a resident assistant (RA), and sole occupant of 132 Smith Hall, reportedly had been dead several days, probably since Sunday.

"Sunday morning some neighbors looked in and saw him sleeping," said Fred Leafgren, director of Housing.

Leafgren said that two days later some of Fosse's floor members discovered the deceased. Both Campus Security and the Stevens Point Police Department said they were notified at 1:38 p.m., Tuesday by telephone.

The Stevens Point Police records division reported, as of 3 p.m. Tuesday, that cause of death had not yet been determined. An autopsy was scheduled. However, according to Police Lieutenant Len Perlak, there was "nothing to indicate either foul play or self affliction." Corporal Koehler of the same division had nothing further to report at 8 p.m. that evening.

Fosse, a two year UWSP letterman in golf, had been competing again this season. Last Friday, September 13, he participated in the Stevens Point Invitational, but failed to make the cut for Saturday's trip to Madison.

The Pointer is a second class publication, published under the authority granted to the Board of Regents by section 36.09, Wisconsin Statutes. Costs are paid by the students of UWSP as avowed by the state of Wisconsin under contracts awarded by the State Printing Section, State Department of Administration, as provided in State Operational Bulletin 9.24 of Aug. 1974. The Pointer offices are located on the second floor of the University Center, Stevens Point, WI., 54481. Phone 346-2249.

1974-75 Editorial Guidelines:
1.) The Pointer will be published weekly during the school year except for exam and vacation periods.
2.) Publication dates for the 1974-75 school year are: Aug. 29; Sept. 5, 12, 19, 26; Oct. 3, 10, 17, 24, 31; Nov. 7, 14, 21; Dec. 5, Jan. 12, 19, 26; Feb. 2, 9, 16, 23; March 6, 13, 20; April 3, 10, 17, 24, and May 1.
3.) All material submitted to the Pointer must be typed, double-spaced with one inch margins, and submitted to the Pointer Office by noon on the Friday before the issue in which you wish the material to appear.
4.) All material submitted to the Pointer must have the name, address and phone number of someone to contact for verification, questions, etc.
5.) The editor reserves the right to edit all material submitted to the Pointer.
6.) Letters to the editor must be no longer than 250 words and must be signed with the name of the writer of the letter. The 250 word limit may be waived by the editor for good and sufficient reason. Names may be withheld from the paper by the editor for good and sufficient reason.
7.) The Pointer will publish the Campus Calendar. This service has been arranged with the University News Service and the Student Activities Office. Material submitted for the Campus Calendar must be submitted separately from other material.
8.) The Pointer will deal with anything the editor feels has relevance to the university.
9.) Any UWSP student is welcome to work on the Pointer. The editor reserves the right to make assignments in keeping with the needs of the paper and with individual capabilities.
10.) Classified ads will be \$2 for the first column inch and \$1 for each column inch thereafter. Two dollars is the minimum charge. The fee for classified ads will be waived for carpool ads, and for lost and found ads.
11.) Rates for display ads may be obtained by calling the Pointer ad manager at 346-2249.

UWSP enrollment remains stable

Administrators at UWSP who have been bracing for a serious enrollment decline, were astounded by a report released Friday indicating there are about the same number of students signed up for classes as last year.

A tentative count made public by Registrar Gilbert Faust shows a tally of 8,030 or only 24 less than at the same time in 1973.

Last spring, budget planners were anticipating a headcount of approximately 7,200 which would have been a decline of 800 plus. Consequently, lay-off notices were issued to numerous faculty, including some with tenure.

The unexpected surge in students probably means that, at least in the ranks of the tenured professors, many of the jobs can be saved.

Chancellor Lee S. Dreyfus said, after learning of Faust's report, it will be difficult to determine which jobs can be saved until a study can be made concerning credit hours in the various departments.

Currently, about 15 tenured professors are scheduled to have their positions terminated next spring—most of them are in the College of Letters and Science where the History Department is hardest hit with eight members scheduled to go.

The situation is somewhat complicated because if, for example, one department is growing rapidly and requires more teaching staff, its faculty roster may be increased with a newly-appointed professor at the same time another department with declining class sizes is forced to trim its staff.

Dreyfus lauded an "all out effort on the part of our faculty, staff, students, alumni and townspeople" in staving off a size reduction. "I can only say how much we here at the university appreciate what has been done—but we've got to keep the heat on because there's one more year left before we can really consider that our size has stabilized."

Unconfirmed reports from several campuses in the UW System indicate there may be a trend in Wisconsin for higher than expected enrollments, but Dreyfus believes an effective recruiting campaign helped Stevens Point during a period when all schools were aggressive in attracting students for this fall.

The number of new freshmen at UWSP is approximately 1,640 or about 25 above last year. The number of transfer and graduate students also is up.

Faust and his assistant David Eckholm believe a significant boost is a result of the university's stronger than usual holding power of continuing students. There also may have been fewer "non-shows" among the group of prospective freshmen who sought admission.

Faust held off making his latest report (which still is a tentative figure) until the count came in from professors who are teaching courses at night in area towns.

The number of persons taking classes from these teachers stands at about 350 or somewhat higher than a year ago.

Rape prevention to be discussed

A program exploring the understanding and prevention of rape and assault will be presented at 8 p.m. Oct. 1 at UWSP.

The lecture by an expert on the subject, Frederic Storaska, will be sponsored by the Residence Hall Council and will be held in the Allen Center Upper Level.

Storaska's lecture will deal with information and demonstrations on rape prevention, centering on providing both men and women with a realistic understanding of the elements that constitute an assault. It will teach women the psychological preparedness and physical techniques necessary to stop an attack.

The program will also include a discussion of male-female relationships and role expectations. An informal coffee will follow at Neale.

For the past eight years since he witnessed a brutal gang rape, Storaska has presented his program at more than 400 colleges and

universities throughout the country. According to official reports, his lectures have prevented serious assault and saved lives in more than 250 documented cases.

In 1972 Storaska opened the National Organization for the Prevention of Rape and Assault in New York. Presently, he is writing a book, to be published soon, dealing with his extensive research on the subject of rape prevention. The book is tentatively titled, **RAPE: How to Say NO to a RAPIST...And Survive?**

Storaska holds a black belt in Karate, an interest he took up while attending college. During that time he instructed local, state, and national law enforcement personnel in self-defense karate.

His widely acclaimed program is supported by Associated Women Students and other women's groups, primarily because Storaska attempts to undermine certain stereotyped images of women and rape.

ASK ABOUT OUR WINTER STORAGE

Exchange student likes UWSP

by Chet Trader

Phil Silverstein, a graduate assistant from the University of South Carolina at Columbia described UWSP as being really great to him.

Silverstein is on an exchange program from South Carolina. Silverstein works under Bob Busch, director of Student Activities, to gain experience in student activities which he hopes will be his life's work. He will be here for one year and then go on to South Carolina to complete his work for his Master of Science degree.

One thing he said he really

likes about Stevens Point is how the student organizations work so well without extra help. He said it seems as though they really know what they are doing.

Born in Boston, he has been in just about every area in the nation. He picked to visit Wisconsin because he has never really visited the north central United States.

Being in Arizona (undergraduate Arizona State at Tempe) for the last four years he has not experienced any cold weather. He said he will try to manage during our cold weather.

New director appointed to child learning center

Linda Jagielo, who completed requirements this summer for an early childhood education major, has been appointed director of the UWSP Child Learning and Care Center.

The program, headquartered in the Lutheran Student Peace Center just off Maria Drive, provides professionally-trained staff and learning opportunities at minimum cost for children of men or women enrolled as students at UWSP.

The student government allocates a subsidy for the operation.

Jagiello is a 1972 graduate of UW Oshkosh where she majored in upper elementary education.

After returning home from UW Oshkosh, she enrolled at UWSP to complete requirements for her early childhood education major. Her practice teaching experience was done this summer in a pre-school program operated at the Gesell Institute for the Study of Early Childhood.

Jagiello said the child learning and care center, which has been in operation the past year and one-half, is open from 7:45 a.m. to 5 p.m. on weekdays at a minimal charge for each child.

Children of university faculty and staff members may also use the service if there are openings.

Jagiello said there currently are openings for children in the afternoons. Children must be between the ages of two and five years.

Persons may enroll their children at the center.

Phil Silverstein, Student Activities Office graduate assistant.

Price returns from Moscow

by Al Pavlik

A UWSP Russian Professor returned from Moscow Wednesday, where, for the last 25 days, he was a translator between worldwide church leaders attending a conference of churches.

Robert Price yesterday conducted his first classes of the fall semester at UWSP after spending the last three weeks at the National Council of Churches-Soviet Churches Conference in the Soviet Union.

Up until now his classes followed a detailed syllabus, used video taped lectures and grammar explanations, and completed quizzes which Price prepared before his departure.

The students and Price were to have communicated once while he was in Moscow, but the teletexture, or conversation, did not materialize because the time of the communication and the phone number to be called at UWSP were confused.

The translating experience was tremendous tax on Price's linguistic ability," said Chancellor Lee S. Dreyfus, who approved Price's absence for the trip.

"It has long range and total value to our program and students. It gives Price authenticity as an instructor of the Russian language. It gives students a sense of realism," Dreyfus said.

"The students gain a sense of the smallness of the world and its interrelationships,

and therefore, the value in studying Russian," he added.

Price's students welcomed his return.

"It wasn't too different without him at first because we were doing grammar review work. But now we need him back because we've got questions," said Sophomore, Karen Beck of Milwaukee, a member of Price's intermediate class.

The intermediate and advanced sections conducted classes themselves until Price's return. Price's two introductory sections were taught by two students minoring in Russian (UWSP does not offer a major.)

"The video tapes weren't that helpful and it would have probably been better if the student teacher conducted the classes," felt Beth Sarkkine, a sophomore from Brantwood in the introductory course.

"Loni Dettinger, a freshman from Wausau also in the introductory section, related the same conclusion, and added, "One of the biggest problems of using the tapes was that it wasn't immediate. You couldn't replay it or stop it and ask questions."

Price's absence while classes are in session is not a first. Instructors miss portions of the middle of the semester when participating in the Russian and East Central European Studies (RECES) Program, pointed out Foreign Language Department chairman Mark Seiler.

Financial Aids offers student job lists

by Jayne Hubacher
The Financial Aids Office (FAO), under the direction of Philip George, has completed a list of job openings for UWSP students who applied for work study on a first come-first serve basis.

No additional work study jobs are being offered because of the \$200,000 cut in funding, but these jobs and others yet to come in, will be awarded to students in a priority order.

The date at which students turned in their work study skills cards is the first priority. Students with special skills or who have had some training in a certain field in accordance with the needs of different departments is the second priority. Those students who do not meet these two requirements are prompted to arrange for

some type of loan with their bank.

There is a list of work study job openings now available posted in the FAO.

The FAO served as many students as they could who applied for work study jobs by July 3. Students who had sent their applications in early were given work study jobs on a first priority basis. By July 3, the FAO could not give out any more jobs, as a result of the cut.

George is still appealing to the business people in the Stevens Point district.

When asked in an interview if Stevens Point could expect another funding cut next year, George said, "No, I don't expect so. The future looks bright."

Old book stolen, new one returned

Sometimes the most unsuspecting results stem from religious conversions. In this case, the library collection at UWSP has become a little bit better.

The collection has a large "Guide to Teaching Woodwinds" which was presumed stolen about three years ago.

The book isn't the same, it's a new copy of the older one that had been missing, and it was left a few days ago in a late-hour depository drop outside the Albertson Learning Resources Center (LRC).

Inside was this note:

"I was a book stolen three years ago. The person who stole me cut pictures out of me, so he ordered a new one just like the other one and now I am complete again, just like Jesus made the guy complete who stole me. So, I'm glad to be back in the library again with my friends."

Allen Barrows, an official at the LRC, said "you just don't see things like this very often."

On the bottom of the note was a religious symbol.

Steve Edington

New minister on campus

Stephen Edington, an American Baptist, is a new UWSP campus minister for the United Ministry in Higher Education (UMHE), a cooperative effort of several protestant churches.

The UMHE cooperates with similar Roman Catholic and Lutheran ministries on the UWSP campus under the title of the United Christian Movement (UCM).

Edington will have an office in the UCM building 1125 Fremont.

A native of St. Albans, W.V., he served three years as a campus minister at DePauw University in Greencastle, Ind., before coming here.

He is a 1971 graduate of Colgate-Rochester Divinity School in Rochester, N.Y., and did his undergraduate work at Marshall University in Huntington, W.V.

While at the seminary, he served a one-year internship at Pennsylvania State University in State College, Pa.

Hear top ten on Dial-a-Job

by Kay Kurz

Students in search of a job can call 346-2001 any time of the day or night and get a recording of the top ten job leads.

The idea was first proposed by Dennis Tierney, director of the Placement Office, in 1973. A total of \$500 was granted to that office to be used for the Dial-a-Job project. The system has been operating since May, 1974.

"The object of the call number 2001 is to conjure up thoughts of the future," explained Eric Kurz, placement counselor here at UWSP. He was referring to a 24-hour answering service called Dial-a-Job, set up by the Career Counseling and Placement Office.

"Dial-a-Job was primarily set up to advertise full time career openings that come in to the Placement Office," said Kurz. He added that occasionally the office is notified of part time jobs in the community and these are also included on the recording.

Another function of Dial-a-Job allows for a student to call, free of charge, employers about prospective job leads or graduate schools concerning further education.

When asked whether he thought there was a severe job shortage for students, Kurz said that finding a job has become much more difficult.

"The easy-to-find work study job is becoming a thing of the past," he said. "Students will have to aggressively pursue employment and market specific skills." Some of the skills he mentioned were typing, shorthand, accounting and sales.

"The old I'm looking for a job. Have you got an opening?" approach will no longer produce favorable results for students looking for jobs," concluded Kurz.

Your four years of college should be worth more than a degree.

You can make it worth more. A lot more. By adding Army ROTC to your college curriculum.

It's the kind of training that develops your leadership abilities. Teaches you how to manage and motivate others.

The kind of instruction that earns you a commission as an officer in the Army. Where you'll get experience in leading men in handling big, important jobs.

And you'll still be young enough to take full advantage of this experience. In the Army. Or in civilian life.

ROTC can make your four years in college a lot smoother, too. It can give you walking around money for at least the last two years. And a chance to earn a full-tuition scholarship.

Get the details.

ARMY ROTC. A great way to make it.

An organizational meeting of the University Amateur Radio Club will be held at 7:30 p.m., Thursday, Sept. 26 in room nine of the Learning Resources Center (LRC). Use east entrance and go downstairs. Licensed amateurs and anyone interested in amateur radio are invited to attend.

The following will be discussed: what amateur radio is all about, code and theory classes for beginners and the University Amateur Radio Station.

For additional information contact one of the following: Leo Liebel, 029 LRC; Ray Sommers, D-141 Science; Gary Stout, 004 Science; Roy Van Dresser, COPS.

The MST exam for the fall semester will be given from 9 a.m. to 1 p.m., Saturday, November 9, 1974.

If you have completed 24 semester hours of graduate study, you are eligible to take the exam. You may sign up for the exam in room 468 of the COPS Building, or by phoning 346-4400.

For further information concerning any aspect of the exam or of the MST-Elementary Education program, contact the Advising Center at the room and number listed above.

FIRST BAPTIST CHURCH, 1948 Church Street - Sunday services at 10:45 a.m. & 7:00 p.m.
PEACE UNITED CHURCH OF CHRIST - 1748 Dixon St. - Sunday service at 10:00 a.m.

FRAME PRESBYTERIAN CHURCH, 1300 Main Street - Sunday services at 9:15 & 11:00 a.m.

ST. PAUL'S UNITED METHODIST CHURCH, 600 Wilshire Blvd. - Sunday service, 10:00 a.m.

Orgy to be held

by Doug Edwards

Beginning at noon Oct. 11 and running until 7 a.m., Oct. 12 Organizational Orgy will be held in the University Center (U.C.).

"The Orgy will be a series of events giving students the opportunity to become familiar with all campus organizations while having a good time," explained University Activities Board Vice-President Kit Harrison. Live entertainment will include folksingers Mike Sullivan from noon until 2 p.m., and Wayne Faust from 5 p.m. until 7:30 p.m.

Residence Hall Council Chairman Mark Hubacher said the Las Vegas-style casino would have blackjack, roulette, seven-up and craps, and will be professionally run.

Student Organizations are encouraged to use the Student Faculty Organization structure for their convenience in not having to maintain checking accounts, buy checks and pay service charges. Why not investigate the benefits of letting Accounting Services maintain the accounts for you at no charge and get dividends in addition.

Beginning with the 1974 calendar year, dividends of 3 per cent will be paid quarterly based on the account balances at the end of March, June, September and December.

For additional details, see Mrs. Witkowski in Accounting Services, room 003, Park Student Services Center.

A film and panel on amnesty will be presented at 7:30 p.m., Monday, Sept. 30 in the Wisconsin Room, University Center.

"Witchcraft and the Naked Ape" will be the topic of a lecture to be given by Robert Copping of the Sociology-Anthropology Department. The lecture will be held at 7:30 p.m., Thursday, Sept. 26, in the Garland Room of the University Center. Discussion will follow Copping's lecture.

University writers are sponsoring a student poetry reading. Anyone interested is encouraged to come and read their own poetry or just listen.

The reading will be held at 8 p.m. on Thursday, Sept. 26 in rooms 129A and 129B of the University Center.

Portage, put out by University Writers, is on sale at the University Book Store at the City News Stand.

WWSP sets hours

WWSP-FM, the student operated radio station at UWSP has begun its seventh year of broadcasting with a schedule involving 113 hours of air time each week.

The station will be operating from newly expanded facilities improvements occurring largely in the news department in the Gesell Building which now is home of the Communications Dept.

The station signs on at 10 a.m. on Mondays through Friday and at 8 a.m. on Saturdays and Sundays. It closes its broadcast days at 1 a.m. except on weekends when programming continues until 3 a.m.

Bus co-op discussed

by Carol Martin

Plans for a university bus co-op were discussed at the Common Council meeting Monday, Sept. 16.

Lyle Updike said the bus co-op would give university students the opportunity to ride the city bus free of charge by showing their university identification card (ID).

The Student Government will pay the city bus line \$100 per month for the student use of the busses, said Updike.

The agreement has to be approved by the Wisconsin Department of Transportation and the Public Service Commission before it can go into effect, said Secretary of the bus co-op Roland Thurmaier.

Also discussed at the meeting was the re-zoning of the northwest corner of Main and Division streets from a single family zone to a multiple family zone.

Ronald Kuehl said he bought the house with intent to build a new office on the lot, but a representative from the Historical Society said the house was a historical marker in the town and shouldn't be destroyed.

The house is presently occupied by university students who, Kuehl said, are making a mess of the area.

The motion was passed to re-zone the area.

The next meeting of the Common Council will be held at 7:30 p.m. Oct. 21, in the Council Chamber.

Big Brothers try to fill gap

by Betty Clendenning

When a boy doesn't have a father, it can leave quite a gap in his life. Such father and son activities as hunting, fishing, playing a game of touch football or learning how to take apart an engine may seem lost forever.

One organization that tries to fill that gap is the Big Brothers of America. Big Brothers of America is a national organization with local agencies throughout the United States.

The Stevens Point branch of Big Brothers was formed in 1971 with a small steering committee of concerned citizens. Rudy Voica was the first executive director of the organization, currently filling the position of executive director is Al Steffes, treatment foster care coordinator for the Wisconsin Division of Family Services.

"Our aim is a one-man-to-one-boy relationship. The basic approach of the program is to be as humanistic and individualistic as possible," remarked Clarice Adams, president of the Executive Board of the Stevens Point branch of Big Brothers.

To carry out this goal there is a combined effort of the Executive Director and the Executive Committee of the Board when working with the prospective Big and Little Brothers. Usually, Steffes receives the request for a Big Brother from either a social agency or some concerned individual who knows the prospective recipient, the Little Brother.

"Although my son has boyfriends, I felt he needed a mature person to show some interest in him. That is one of the reasons that I applied for a Big Brother for my son," explained one mother.

"We interview the boy and his mother to determine the boy's need for a Big Brother. If we feel our program can help him, the next step is looking for a suitable Big Brother," commented Steffes.

Before a prospective Big Brother is accepted he must complete an application which includes questions such as: how do you spend your free time?, what experience have you had working with boys?, and why do you want to become a Big Brother? This, added to three letters of reference, helps to give some background on the volunteer.

Being a Big Brother is a non-paid job, and strictly on a volunteer basis. As one Big Brother commented, "you gain a lot of personal satisfaction from working with a younger boy."

"In the future maybe some kind of program can be worked out with the Psychology or Sociology Departments on campus, to give credit to men who are willing to become a Big Brother for a period of time, such as nine months. It may be something on the order of field work. However, these possibilities haven't been explored yet," remarked Steffes.

After receiving some background information on the possible Big Brother, the next step is a personal interview with the Executive Director. The Big Brother may also be interviewed by a screening committee.

"When I interview a prospective Big Brother, I like to explore his reasons for wanting to become one. How much effort he is willing to put into the relationship is of equal importance. Being interested in providing companionship for some Little Brother and being over 18 years old are two important qualifications that I look for," said Steffes.

A professional staff screens through the waiting volunteers to determine what man is best equipped to meet the needs of which boys. The idea of 'compatibility' is stressed in the program. Once a possible match is decided upon, a preparatory conference is held for both participants. In the conference with the Big Brother, the worker discusses all the pertinent data on the boy to help the 'Big Brother' in interpreting areas of need, to develop insights and also to talk about future plans. The Little Brother and the mother have a conference in which they are told about the selected Big Brother.

Next in the process is an introductory meeting between the two parties.

"At our first meeting I felt a little nervous. After we got to know each other this feeling disappeared completely. Now I think of Ty as my real little brother and treat him as one," remarked Calvin Kuphall, a UWSP student who has been a Big Brother for almost one year.

"Both Cal and I are interested in sports. Either Cal will call me or I will call him to decide when we can get together. This occurs when we both have the same free time, which is usually Saturday or Sunday," said Ty.

What the Big and Little Brothers do together depends upon the various interests involved. It isn't a structured program such as student to teacher, but rather on a

Big brother Cal Kuphall with his little brother.

Photo by Roger Barr

friend to friend basis. This element of mutual consent is also evident in the agreement itself—the relationship lasts only as long as both parties agree to continue it.

"We usually try to have a one year contract as a standard. However, because of the UWSP students, we understand that nine months may be more feasible," said Steffes.

The separation during the summer didn't discontinue Cal's and Ty's friendship.

"During the summer, I visited Cal's home in Milwaukee. Also with Cal's help I received a scholarship so that I could attend the Milwaukee Bucks Basketball Camp that was held on campus," said Ty.

Since both boys are interested in sports, their training sessions and games may make their meeting together a little more difficult to arrange.

"I'm confident that we will find time to see each other, because being a Big Brother is something I want to do. For

instance, when I have to work the concessions stand at a football game, Ty will be able to help me sell refreshments. It will also give him a chance to see a college football game," said Cal.

There is one separation that both Cal and Ty know will eventually come, when Cal graduates and begins looking for a job. The search for a job may force Cal to move and the contract will have to be discontinued.

"When Ty and I were matched we were told about the eventual break that we will have to make. We both know that it will have to end sometime. It is something that you have in the back of your mind but don't think about," said Cal.

The loss of Big Brothers due to graduation or moving is one of the problems that the program faces. Another problem is the current lack of Big Brothers.

"Presently, there are 30 matches which consist of 15 Big and 15 Little Brothers. However, we still have 15 Little Brothers waiting to be

matched. Very seldom do we have a Little Brother drop out of the program because they are eager to do anything with a Big Brother. Thus we have a surplus of Little Brothers and a deficiency of Big Brothers," said Steffes.

Enthusiasm for the program spreads once a Big Brother is assigned to a family.

"All my children look forward to seeing Cal come over. In fact Ty's younger brother can hardly wait to get a Big Brother for himself. Cal has made a big difference in Ty's attitude. I feel he's helping Ty to realize his potential. People should realize what a real need there is for Big Brothers," remarked Ty's mother.

Echoing these sentiments was Adams, "Unfortunately fatherless boys can end up being part of some negative statistics if something isn't done for them. One out of four fatherless boys may drop out of school and one out of six may end up in correctional institutions. Our purpose is to help change these statistics by helping these boys."

OUTDOORS POINTER

Little change in hunting prospects

by Joel Guenther

The cooler evenings and the changing leaves mark the coming of fall and the hunting seasons. Experts look for little change from last year in most hunting prospects.

Due to many upland areas being used for cropland, many pheasants were forced to nest in lowlands thus allowing for more susceptibility to flooding. This flooding, offset the wintering carry-over. As a result, the pheasant harvest is expected to be around 550,000 birds, about the same as last year.

The number of local ducks is slightly down from a year ago due to heavy rains during the nesting season. On the other hand, northern flocks have done well and are expected to offer good gunning opportunities later in the season.

Grouse populations appear to have fallen to the bottom of their cycle throughout most of the state. The best gunning is expected to be in the central and southwestern parts of the state.

Hungarian partridge numbers look best around Lake Michigan and southwestern counties. Their populations have expanded

and offer good gunning possibilities in the above two areas.

Cottontail, snowshoe hare and squirrel numbers are all up and should provide great, if not record, gunning.

Deer hunting may prove the best in years. Two suc-

cessive mild winters have produced good fawn crops sending kill predictions up to 100,000 whitetails. The season begins later this year, past the peak of the rutting season, which may have an effect on the numbers taken.

Bear season has been the most affected. No bear hunting is allowed during the deer gun season this year and hunters are operating under much tighter controls. Estimated kill is predicted at 200 bears (606 were taken last year).

Deer quota permits have also increased which may have an effect on the kill figure.

Task force offers water aid

If your water contains coliform bacteria, it is unsafe for human consumption.

The coliform bacteria itself is not harmful when swallowed but it comes from sources that often contain harmful organisms.

These sources are human sewage, animal waste and surface runoff. They are easily infected with pathogenic organisms that cause diarrhea, darrhea and fever, typhoid, hepatitis, cholera and other dangerous diseases.

You should boil this water ten - fifteen minutes before drinking it. This water may be stored in the refrigerator in bottles which have also been boiled at least ten minutes.

Ice cubes must also be made from boiled water. Freezing does not kill all the bacteria.

It is safe to take a bath or wash clothing in this water.

To solve your problem, though, your water well needs attention. Sometimes driving the well ten - twenty feet deeper helps. New castings may also help. Often, only a new well will solve the problem.

High nitrate content in water is considered unsafe for expectant mothers and for babies six months old or younger. Nitrates reduce the blood's ability to carry oxygen and may cause "Blue babies" in susceptible infants. These babies suffer from lack of oxygen.

State and federal levels have set ten parts per million as the maximum level for nitrates.

High nitrates may also cause abortion in cattle.

Boiling the water will not solve this problem. Driving the well ten - twenty feet deeper may help. Getting the water from a good source until the child is old enough to drink the water is one way to get around the problem.

If you are not drinking Stevens Point water and wish a well-check for safety, contact Mike Meyer is room 220 in the College of Natural Resources (CNR) building.

Powderburns and backlashes

by Joel Guenther

Last Saturday, the College of Natural Resources hosted a conference, entitled "Hunting, Sport or Sin." To comment on the text of the entire conference would require more space than is allowed, so instead I wish merely to add one thought not discussed.

Throughout the length of the conference there were several references to man and his evolutionary need to hunt. Unfortunately, though, the subject was not pursued to cover the last century of evolution of man's ethics as a sport hunter.

Most people know that man had approximately two million years to develop his hunting skills and weaponry but what they don't realize is that all through this time, any manner used to kill an animal was considered ethical.

Only recently, from the last days of market hunting less than a century ago, has modern sport hunting developed and along with this, the concept of ethics. So, you see, hunting ethics are still in the stage of development.

Legally, hunting ethics have evolved considerably but they need more time to develop morally, certainly more time than a half century or one generation.

We, as hunters, can speed up this evolution of moral standards. One way is for hunters to police their own ranks, oust the bad influences on young gunners and practice law abiding tactics and safe firearm handling techniques themselves.

This leading by example may not calm the anti-hunters down, but it will give them one less log for the fire, and it may just give hunters the respect due to them.

DNR shows - waterfowl slides

Duck hunters have an excellent opportunity to brush up on their waterfowl identification abilities by seeing the Department of Natural Resources (DNR) waterfowl identification slide presentation.

The collection of 117 slides has been revised from last year's presentation, including many new and improved color slides of birds as Wisconsin hunters see them.

Viewers will not only see color slides of waterfowl species common to Wisconsin, but also protected species (such as swans, grebes, herons, etc.) which are frequently encountered while in the marsh. Pamphlets on duck identification are available to all who attend the presentation.

For further information on when the slide presentation will be shown, contact the DNR Office, Whiting.

Hunting conference held

by Kathrine Kowalski

"How can you kill?"

The question was directed to a big game hunter by Mary Ann Krueger at a conference "Hunting: Sport or Sin?" Saturday, Sept. 14, in the College of Natural Resources (CNR).

Krueger, a representative of the Humane Movement, participated with other panelists to express views which were either pro-hunting, anti-hunting or a middle-of-the-road view.

"One has only to see a little rabbit with its entrails blasted out of its body by a shotgun but still crawling desperately over icy ground for cover. Multiply this agony of the one rabbit by millions and that is what hunters are doing every year," said Krueger over the sound of stifled snickering coming from the audience of more

than one half pro-hunters.

"They call themselves sportsmen," said Krueger. Then she claimed that hunters were heartless men who were trying to assert their masculinity.

Raymond Anderson, professor of wildlife ecology at UWSP defined hunting for the panelists as "to seek or pursue game until caught or killed."

George Knudsen, both hunter and naturalist, spoke about the importance of hunting. He said that hunting is important for game populations, nongame species, the environment and people. Knudsen also said that nationally hunters contribute \$2.8 billion annually for wildlife habitat improvement and acquisition, through the purchase of hunting stickers. "Can game survive without the hunter's

dollars?" asked Knudsen.

Mel Ellis, outdoor writer and columnist, took neither the side of the hunter nor the nonhunter. Instead, he expressed a personal view in which he considers himself fortunate enough to have experienced the best part of the hunter's life and the naturalist's life.

Panelists discussed the various reasons for hunting.

Lowell Klessig, a professor of sociology at UW Madison said that hunting is mainly related to the cultural-sociological background of the hunter. He said that hunters usually come from a rural background where the attitudes about hunting differ than those of most hunters from urban backgrounds.

Other panelists included James Hale, professional game biologist with the DNR; Baird Callicott, professor of philosophy, UWSP; and James Weston, a board member of National Funds for Animals from Michigan.

DNR offers iron shot to public

Iron shot will again be available at Department of Natural Resources (DNR) field offices Friday, Sept. 6.

Some Wisconsin duck hunters participated in the iron shot evaluation last year and the DNR hopes that many more will try it this year. About 200 cases of iron shot will be distributed to all district, area and some other field offices for sale to the public.

The reason for using iron shot (also known as steel shot) in place of lead shot is to eliminate lead poisoning among waterfowl. While feeding, they sometimes pick up spent lead pellets on the bottom of heavily hunted marshes and can succumb to lead poisoning.

The U.S. Fish and Wildlife Service has recommended that the Department of the Interior adopt regulations banning the use of lead shot for hunting waterfowl in the Mississippi Flyway for 1977. Wisconsin hunters can take advantage of this opportunity to try iron shot and then comment on the Fish and Wildlife Service ban at public hearings to be held in the

future.

According to the National Shooting Sports Foundation, tests by manufacturers indicate that steel pellets will not significantly affect the performance life of modern American-made, single barrel shotguns of good quality. However, shotguns with thinner barrels, particularly lightweight doubles and over-and-unders should probably not use the steel shot.

The Waterfowl Committee of the Wisconsin Conservation Congress has endorsed the use of iron shot, and along with the DNR urges hunters to try a box or two.

Iron shot will be available by next Friday at DNR field stations, including those at Brule, Park Falls, Hayward, Spooner, Woodruff, Antigo, Wisconsin Rapids, Rhinelander, Menomonie, Black River Falls, Eau Claire, LaCrosse, Green Bay, Oshkosh, Marinette, Wautoma, Dodgeville, Madison (Nevin Fish Hatchery and Pyare Square locations), Horicon, Milwaukee plus other locations.

Mathematician lectures at UWSP

How to win at Monopoly

A mathematician will use the ever popular parlor game of "Monopoly" as an example of explaining concepts to his

audience at 7:30 p.m., Sept. 19, at the first program in this year's Carl N. Jacobs Lecture Series at UWSP.

The program will be in Parkhurst Hall of the College of Professional Studies (COPS) building featuring Irvin R. Hentzel, associate professor, at Iowa State University in Ames, Ia. The event will be open to the public without charge.

Throughout the academic year, top mathematicians from all parts of the country will be brought to campus under a program funded by Sentry Insurance of Stevens Point.

In his presentation on "How to Win at Monopoly-Ask a Computer," Hentzel will explain how he has calculated the long-term value of properties in the game, which enables players to make intelligent decisions on building, trading and mortgaging. He said with these statistics odds can work consistently in a player's favor. The pertinent mathematical concepts, especially probability, and use of the computer will be discussed.

Greeks help with Labor Day telethon

The annual Jerry Lewis Labor Day Muscular Dystrophy Association Telethon was held the weekend of Sept. 1 and 2. The Telethon is a twenty hour show hosted by Jerry Lewis, live from Las Vegas.

This year's event collected over \$16 million for research in Muscular Dystrophy. The Stevens Point area collected almost \$4,000 for the Muscular Dystrophy Association.

In the Stevens Point area the telethon was sponsored by the Tau Kappa Epsilon Fraternity; Mike Van Rysin, chairman of the event, with assistance from Alpha Sigma Alpha and Delta Zeta sororities.

The telephones were operated by the Greeks throughout the 20 hour telethon in the Paper Room of the Holiday Inn. Also, a collection box was in the room for cash donations.

Juneau County land to be state park

Officials of the Department of Natural Resources (DNR) and the Wisconsin River Power Company (WRPC) officially closed the conveyance of land in Juneau County for the new Buckhorn Peninsula state park.

The site is located on the 16,640 acre Castle Rock flowage which was created in 1949-50 by the construction of hydroelectric plants.

L. P. Voigt, DNR secretary, presented a check for \$450,000 to Mr. Max Andrae, President of the WRPC, Thursday, Sept. 12, in exchange for the deed to 3,400 acres of land plus 800 acres of easement for the new Buckhorn Peninsula state park. The land is located at the confluence of the Yellow and Wisconsin rivers.

"I'm very pleased that this beautiful area can now be made available to the public in the form of a state park," said Voigt. Negotiations for the land were started in 1961 and according to Voigt were successfully culminated because of the fine cooperation of the WRPC, local units of government and the federal government.

"This park site has essentially remained in its natural state since the creation of the flowage and should be a tremendous asset to the state park system," said Andrae.

David Weizenicker, assistant director of DNR's Bureau of Parks and Recreation, said that an environmental impact statement is now being prepared on the proposed

park and will be followed by a public hearing which will allow local residents to have input into the development of the park. It is expected that the park will be a family type park, with camping, hiking, and boat launching facilities. It is expected to be open for operation by 1976.

WRPC officials participating in the transaction, beside Andrae, were Onni Harju, treasurer and John B. Raprager, secretary.

Hunting, Fishing Day endorsed

The Forestry, Wildlife and Recreation Committee of the Natural Resources Board endorsed National Hunting and Fishing (NHF) Day in Wisconsin at its August meeting.

The committee commended sportsmen for their many accomplishments and urged all DNR employees to assist sportsmen planning NHF day activities. In addition, all Wisconsinites are urged to attend observances on September 28 and work with sportsmen toward improving the environment.

September 28 has been proclaimed NHF day in Wisconsin by Governor Lucey and many city mayors in honor of the many accomplishments of state sportsmen.

Forestry major offered

Ask people what tool comes to mind when they hear the word forestry, and the answer is usually "axe".

Pose the same problem a generation hence and the response is likely to be "electronic computer."

Efficient management of woodlots in this technological era involve machine minds—a new trend being advance at UWSP which has a forestry major within its College of Natural Resources (CNR).

Professor William Sylvester is getting his students deep into computer use by directing study projects involving frequent visits to a relatively new instructional computer-data processing center that has been installed on campus. He's also been involved with industries in the state interested in having their employees acquainted with the new device in their business.

Thomas Hanson completed a research study as part of his Master of Science (MS) degree requirement that shows value in using computers in forest management.

Hanson, who has been a student of Sylvester, devised a computer system for projecting yields of even-aged red pine in the Lakes States.

The study points out that if the age of the timber stand is known and the number of trees per acre is determined, it is rather simple in projecting yields. The computer must also be fed information on average diameter and average height of the trees.

In fact, the forest's future can actually be simulated by a programmer who experiments with data in the computer on various kinds of thinning operations. A person can project quite exactly how the trees will grow based on intended use of the timber after being cut.

Thinning makes a significant difference in the size trees get in woodlots, and a combination worked out by the computer shows red pine (sometimes called Norway Pine) provide the highest volume of cords by thinning at age 30 and age 40 and then harvesting at age 50.

Student Government faces major project

Election needs student voters

by Doug Wojcik

Referring to the third, seventh and eleventh wards

he hinted at possible student nominations for the positions.

Residents in the area around campus have complained about not being able to get in or out of their driveway but most of the

realizing the impact that the city has on their day-to-day lives, he said.

They are now seeing this impact on their lives and are starting to use their political forces, Updike said.

Students are viewed as a transient population and aren't viewed as citizens of Stevens Point, Badzinski said.

Even though the students are here for two years that does not mean that you give up all your rights, he said.

Getting students to vote in the November election is a major project facing the Student Government, according to Barb Stiefvater, Student Government vice president.

"We got beat bad yesterday," said Controller Bob Badzinski, on Wednesday, Sept. 11, referring to the low student turn out in the Sept. 10 primary.

Realizing that the students may not have been acquainted with the local candidates was no excuse for them not to get out and vote for those candidates running for state offices, Badzinski said.

"If they can't vote for state candidates then they're (students) in sad shape," he said. "They don't belong in college," he added.

The important thing is that the students "register and vote in Stevens Point where their votes are recognized," Student Government President Lyle Updike said.

The city government, next to the university, effects the lives of the students, Updike said.

In looking ahead to the city elections in the spring Updike noted that there will be three wards with student population where the aldermen will be up for re-election.

Bob Badzinski - Student Controller.

There are some aldermen who are reflective of the students needs who we won't oppose, Updike said.

We will "make sure that people elected are aware of students needs," he said.

Along these lines he brought up the problem of off campus parking, where students are forced to park away from campus or buy a campus parking permit.

tenants in that area are students, he said.

The parking situation is more of a problem downtown (Main St.) than what is said to be around campus, but the city won't do anything because store owners want their customers to be able to park in front of their store, Updike said.

Students in the past have been sitting back and not

Lyle Updike - president of Student Government.

by Sally Dastir and Harriet Piersch

Proposed improved faculty programs and legislative action sparked the Faculty Senate meeting held Wednesday, Sept. 11.

Carol Marion, professor History Dept., reported for the Association of the University of Wisconsin Faculties (TAUWF) as to the faculty biennial budget for 1975-77.

The new faculty salary package will not be presented as part of the total UW System budget as in previous years, but will be introduced before the legislature for approval as a separate package. Renovating the former procedure of submitting the UW System budget into separate operational and faculty allowance packages will alleviate adverse publicity as experienced in the past.

Included in the faculty budget proposal are priorities such as salary improvements, added fringe benefits and a proposed Professional Developmental Leave Program.

The UW System has never had a professional leave program of this sort. If approved, it would affect those faculty members wishing to take a semester or year leave to do further study of have personal time with full or partial salary depending on the number of years with the university.

Marion also reported that the Inter-campus Faculty Consultative Committee (IFCCC) will be reconstituted this year. The group consists of representative faculty members from each campus who serve as advisors to John Weaver, president of the University of Wisconsin Central Administration.

As old business, a motion passed at the May 9, 1974 meeting was carried over and defeated. The motion, proposed by Richard Conlon, professor of mathematics, concerned taking a referendum of the faculty to consider a possible constitutional change to enlarge the Faculty Senate to include all members of the faculty. A vote, calling for a division of the house, defeated the proposal 23-16.

Elwin Sigmund, assistant to the Chancellor for Planning and Analysis, proposed that the Promotion - Salary Revision Committee be abolished. The provisions of this committee are re-printed annually in the Faculty Handbook although the committee has not actually been active since 1970. A vote of the senate abolished the committee with little discussion.

Committee reports covered areas of interest to faculty and students. Gordon Haferbecker, chairman of Academic Affairs, announced the appointment of a new sub-committee. The Student Evaluations Sub-Committee will utilize student evaluations in recommendations for faculty merit promotions.

At the May 9, 1974 meeting Orland Radke, director of Extended Services, was concerned with the issues of senatorial absences and a lack of Faculty Senate treasury funds. As a result, the incoming Executive Committee appointed a Committee of Senate Policies and Procedures to investigate these issues.

Also announced by J. P. Zawadsky, chairman of Faculty Senate, was the search for a new Faculty Senate building. The office's new location is unknown,

however it will not be located in the College of Professional Studies (COPS) building. The next meeting though will be held at 7:30 p.m., Thursday, Sept. 26, in room 116 COPS. The future meetings will be scheduled for the second and fourth Thursdays of the month.

The other ten senators would be elected to their one-year fall-to-spring positions in registration in May.

There is no senate at all right now. If any major questions should come up we wouldn't be able to get any feelings on how to answer them, Student Government Vice President Barb Stiefvater said.

A strong interest in Academic Affairs would be gained because each college would be represented according to the student population in the college. The College of Letters and Science would probably have the most, he said.

"We're looking for a well balanced Senate. An expanding role of Student Senate," Stiefvater said.

Senate, Assembly changes to be proposed

by Doug Wojcik

By having staggered terms there would be more continuity in Senate, she said. Each senate district has four representatives elected in the fall and in order to incorporate the new method of

election the two lowest vote getters in each district would be given the option to either run again or not, said Stiefvater.

The other proposal would have an Assembly which now has members appointed by the various organizations on campus to an all-student elected Assembly, Stiefvater said.

Members elected to the Assembly would be determined by the various Academic Colleges, Lyle Updike, Student Government President said.

A new crop of people are expected because last year's senate had many seniors on it, Badzinski said. Applications for nomination were picked up by five people who are freshmen, he added.

"We're looking for a well balanced Senate. An expanding role of Student Senate," Stiefvater said.

A staggered senate term and a student elected assembly will be two proposed constitutional revisions facing the Student Senate when they convene this semester. At the beginning of each fall semester 20 students are elected to fill senatorial positions for the school term with their positions being vacated at the end of the spring semester.

With a staggered senate term half of the senators would be elected on registration day in December for a one-year term starting with the spring semester and running through the fall semester.

The other ten senators would be elected to their one-year fall-to-spring positions in registration in May.

There is no senate at all right now. If any major questions should come up we wouldn't be able to get any feelings on how to answer them, Student Government Vice President Barb Stiefvater said.

A strong interest in Academic Affairs would be gained because each college would be represented according to the student population in the college. The College of Letters and Science would probably have the most, he said.

"We're looking for a well balanced Senate. An expanding role of Student Senate," Stiefvater said.

Former Student Government members comment

Constitution revision considered

by Shelley Hosen

Changes in the UWSP Student Government constitution are presently being considered.

During the last couple of Student Senate meetings of last year, an ad hoc committee was suggested to meet during the summer headed by Student Government Vice-President, Barb Stiefvater, according to Paul Ustruck, former senator.

Ustruck attended these meetings and remarked that he didn't feel as if the senators present were invited. "We were shut off by Lyle (Updike), Bob (Badzinski), Student Controller and Barb (Stiefvater). So, it seemed that the triumvirate were doing the revisions not the senate and assembly," said Ustruck.

Steve Stearns, senator from last year, also attended these meetings and said that ideas from the senators were accepted well.

Stearns said that last year the student government didn't run by their con-

stitution. Not even the committees set up in it were the ones that existed.

Gary Winters, last year's Student Government Vice-President, explained that under last year's system the assembly was composed by any recognized student organization having a seat in the assembly. He combined that under the proposed system the assembly would be elected from different colleges within the University.

"The proposed system would be more democratic because the number of seats that an area would get would be proportional to the population in the academic area," said Winters.

Winters also remarked that he had reservations about this plan. He said that under the present plan the special interest groups have a voice and that small groups on campus would lose the lines of communication that presently exist.

Kit Harrison, a former senator and presently University Activities Board (UAB) vice president, opposed electing the assembly.

"The organizations want someone who can appreciate the problems of their organization," said Harrison.

Stearns commented that he believed that if the assembly was elected, then the students on the assembly would be more likely to work.

Another area of change under consideration is that of senate elections. Presently, all senate terms end at the end of the school year. Thus, there are no senators during the summer or the first part of school the following year. The proposed system would stagger senate terms with some ending in January and some in September, explained Winters.

"Nice if you can do it, but plans change over the summer," said Stearns in regard to the senate proposal. Jerrie Moe, another former senator, believes that the senators should have two semesters to serve. Moe was elected in January and her term ended in May. Ustruck commented that last year many of the old senators returned to run for another term and this year

very few are returning.

Moe said that she would not be running again. She needs time to concentrate on her studies. She believes that she gained experience and learned much. Moe recommended that perhaps a credit system could be worked out for Student Government work.

Stearns is now a United Council Director. As a result, he will not be running either. Harrison is now UAB Vice-President. He won't be running; he also commented that a credit system should be worked out.

Ustruck has graduated. Winters is busy studying for law school admissions test and in involved with the Youngs Democrats and the Political Science Association. In closing Winters commented, "It might seem that I painted Student Government as an extensive involvement that one might be frightened of. But in terms of personal growth, communicative skills and knowledge of the university and how to operate in it, it must be the greatest thing to be involved in."

Commuter gets involved

by John R. Perdue

final approval is given by the 12 UAB committee chairmen.

Kit Harrison, new University Activities Board (UAB) vice-president, thinks commuting students should be more involved in campus activities.

Harrison, who commutes from Waupaca himself, was appointed to his new office on Sept. 3, 1974 by the UAB Executive Board. The appointment is temporary until

among the committee chairmen.

Harrison is also concerned about the problems new UWSP students face in finding activities that suit their needs. "I worked in freshman orientation," he said, "and that experience convinced me that we have to get out more information about the array of organizational opportunities available to UWSP students."

On the topic of student input concerning UAB decisions, Harrison said he would favor some kind of survey that would measure student opinion.

Harrison has previously served on the Faculty Affairs Committee and is currently working on the Student Government Constitutional Revision Committee. Harrison is a pre-dental student.

ARTS & ENTERTAINMENT POINTER

The J. Geils Band will play in the Quandt Gym at 8 p.m., Sunday, Sept. 22.

J. Geils comes to UWSP

by Mike Varney

The first big rock concert of the year comes to the campus this Sunday night in the guise of the nationally famous J. Geils Band.

The 4,200 seat Quandt Fieldhouse will be the setting. The "boogie" starts at 8 p.m. with a back up band warming up the audience for bigger and better things.

The J. Geils Band, known for their live performances, will have a 65 foot wide stage to live on Sunday night.

The Special Events Committee of the University Activities Board (UAB) is sponsoring the event. Daydream Productions from Milwaukee is handling all promotion. It is worth \$18,000 in gross potential.

Tom (Wojo) Wojciechowski, UAB Special Events Committee chairman, is hoping for the best. UAB booked the J. Geils gig Aug. 29.

Wojo said, "I'd really love a sell-out." He would be pleased with anything reasonably over 3,000.

His foundation is based on, "If everybody gets the word, I think we'll pack it, but it's getting the word out in this much time."

"If we do well on that concert (J. Geils) and determine that the market area is in the mood for a lot of concerts, we're going to book another one for late November or early December," Wojo said. He hinted at a big name boogie band.

"We're not in it to make money. We want to come out just a little ahead so we can do better next time," he said.

Tickets can be purchased at the DeBot, Allen and University Centers on campus and Westernberger's, Common House and Kellerman Drugs off campus.

The UAB Special Events Committee has scheduled flutist Tim Weisberg to appear on campus one week later, September 29.

Weisberg has three albums to his credit and a fourth to be released about a week after his UWSP performance.

Wojo termed Weisberg as "a rock flutist."

It will happen in Berg Gym (2,000 seats) the following Sunday night at eight o'clock.

Rock band Skogie, from Minneapolis, will back up Weisberg.

Maybe happiness is Homecoming, as two concerts will wind out Homecoming week.

Friday, Oct. 18, the Uncle Vinty Show will come to Berg Gym at 9 p.m.

Veteran local concert-goers will remember them as the band that played behind Sha Na Na last year.

Sunday night, Oct. 20, Fleetwood Mac will bring Homecoming week to an end.

The UAB Special Events Committee fulfills the need for big-name bands to appear in Central Wisconsin. Many a trip has been made from this area to Madison and Milwaukee for concerts.

Concerts at UWSP have been on an upward swing since last Spring when Wishbone Ash, The Lettermen and Sha Na Na appeared.

Auditions soon for comedy show

Youngsters will play prominent roles in "Gypsy" a musical comedy that will be staged Nov. 15 through 22 at UWSP.

The show is the story of Gypsy Rose Lee's life and its script calls for eight children in singing and dancing parts.

Sheldon Faulkner, chairman of the Theatre Arts Department and director of the show, said he will hold auditions from 10 a.m. to noon Saturday, Sept. 21 for persons between the ages of nine and 14 interested in trying out for roles. The auditions are scheduled in Jenkins Theatre of the Fine Arts Center.

One of the roles, for a girl, is a lead in the show.

All of the youngsters will play vaudeville performers, hence the requirement for having talents in dancing and singing.

Piano accompaniment will be provided by the university for students participating in the auditions, and any choice of song is acceptable. However, a person may bring his own accompanist.

Faulkner said the youngsters who currently are not dancers should learn a simple step or two to give as an illustration.

Rehearsals for the show will be on Saturdays until two weeks before the opening night, then evening practice sessions will be scheduled, with the youngsters finished by 9 p.m.

"Essentially, we're looking for kids with both verve and nerve," Faulkner said smiling.

Woodcarvings displayed

A display of woodcarvings by Les Koch, an art major, will be shown through September in the Albertson Learning Resources Center (LRC) at UWSP.

The carvings represent over 20 years of interest and work for the 36 year old Koch, a freshman who began his university career after 15 years in the grocery business in Waupun. The oldest carving on display is of an Indian on a log which he did when he first became interested in woodcarving in grade school.

Most of his carvings are done in hardwoods such as mahogany and walnut. The displays include statues of bird wildlife as well as a series of trays fashioned into leaves and lined with copper.

Folk dance festival next week

From 1 p.m. - 12 midnight on Sept. 28, 1974, the Community Folk Dancers of UWSP will sponsor the "Stevens Point First Annual Harvest Moon Folk Dance Festival".

It will be held in the new Banquet Room in the UWSP University Center (UC). No admission will be charged.

The purpose of this festival is to bring folk dance groups of this area together to provide an exchange among them.

Open dancing will be held from 1-4 p.m. and 7-12 p.m. From 4-6 p.m. there will be dance instruction. This is not a "Folk Fair" and will not have ethnic foods and displays.

Schweik to be shown

Tuesday, Sept. 24, the University Film Society will present the Good Soldier Schweik directed by Axel Von Ambesser. The great comic actor, Heinz Rühmann, stars as the bumbling, totally absurd Josef Schweik in this adaptation of Jaroslav Hasek's novel. Schweik is a dealer in stray dogs who caters to the public's taste for pedigreed pets by applying a bit of make up and phony pedigree to the mutts he deals. A remark to a friend, inadvertently overheard gets him drafted. His insistence that he doesn't want to be a soldier finds him in an Army psycho ward being subjected to a bizarre and hilarious series of tests.

Any and all people who like to folk dance are welcome to participate. Spectators also welcome.

Wisconsin '74 scheduled

Artists who wish to submit work for the juried "Wisconsin '74" exhibition in Stevens Point, Wis., may obtain a prospectus with entry forms from Mrs. James Delzell, 1124 Ridge Road, Stevens Point, Wis. 54481.

In its two short years of existence, the "Wisconsin" show has established itself as one of the major yearly exhibits in the state, attracting the best art talent available in Wisconsin. Kenneth Shuck, this year's juror, is director of the museum which hosts the prestigious national "Watercolor USA" show. Glenn R. Bradshaw, who juried the original "Wisconsin '72" also served as juror for the "Watercolor USA" show earlier that year.

"Wisconsin '74" is sponsored by the Art League of Stevens Point in cooperation with the UWSP College of Fine Arts.

The public is invited to attend the opening reception at the Carlsen Gallery, UWSP, from 2 to 4 p.m. on Sunday, Oct. 13, or to view the show during gallery hours through Nov. 1.

UAB Cin Theatre plans big season

by Todd Smith

The UAB Cin Theatre has begun a new series of bringing the best in recent popular movies to UWSP.

Unlike the Film Society, where the emphasis is on film "classics", the emphasis of the UAB films is on popularity, bringing those films which have appealed and will continue to appeal to a mass university audience.

Like Film Society, this appeal is varied and films range from uproarious comedy, such as Woody Allen's *Take the Money and Run* or *The Heartbreak Kid*, to serious, provocative films like *Soldier Blue* and *Sunder*.

There are a few melodramas as well, such as the recent mystery, *The Last of Sheila*, and the horror classic, *Night of the Living Dead*. Finally there are some documentaries, as exemplified by *Woodstock* and the hilarious Allen Funt film, *What Do You Say to a Naked Lady?*

UAB will also feature three double-feature nights this

semester, each emphasizing a different area.

The first will feature two classic science fiction flicks, the second will have two rockers from the fifties and the third will feature Marlon Brando in two classic films.

There will also be a free showing of the film, *Of Mice And Men*, the afternoon of September 20.

Tony Charles, head of the Cin Theatre, thinks this may be the greatest season for UAB ever. He is especially excited about obtaining Stanley Kubrick's film, *A Clockwork Orange*, which he feels will be the hit of the season.

Charles' only real fear about this season is that some of these films have already been purchased by television and may beat UAB in showing them.

All UAB Cin Theatre films are shown in the University Banquet Room in the Union. They are shown at 7:30 p.m. on Thursday and Friday nights, unless otherwise indicated.

Photo by Bill Paulson

Soon classes will be obsolete in Old Main.

UAB presents comedy film

by Gary Swick

Take the *Money and Run*, directed by, written by and starring Woody Allen, will be shown at 7:30 p.m., Thursday, Sept. 19 and Friday, Sept. 20, in the University

Banquet Room.

The film is a comedy of short takes, fake cinema verite interviews, old newsreel footage, and numerous parodies of other movies including *Cool Hand*

Luke.

Woody Allen plays Virgil Starkwell, an aggressive bad boy with poor vision and a bad karma. Virgil's ill-fated adventures begin when he attempts to rob a gumball machine and gets his hand stuck in the slot. He is arrested by juvenile authorities and charged with assault, battery and illegal possession of a wart.

He attempts the straight-life as a shoeshine boy, but his spit shinee lands on a trouser leg. His cello teacher recalls, "He really had no conception of how to play. He blew into it."

The supporting actress, Janet Margolin, plays Louise, a joyfully optimistic laundress who mesmerizes Virgil to the point that he admits, "After 15 minutes, I wanted to marry her. After 30 minutes, I'd completely given up the idea of snatching her purse."

Ingmar Bergman, and Vittorio DeSica's *Bicycle Thief*.

There are also great American films, both in the area of comedy, as exemplified by *Night At the Opera* and *Never Give A Sucker An Even Break*, as well as drama, with such films as *They Shoot Horses Don't They?* and *The Great White Hope*.

It is expected that there may also be a couple of film festivals as well, sponsored by the group, such as last year's festival of comedy-classics.

Film Society begins new season

by Todd Smith

The UWSP Film Society is back for another season of "classic" films to be shown at 7 and 9 p.m. on Tuesday nights throughout the first semester.

Three films have already been shown as of this printing. Ten more films are scheduled to be shown this semester.

The emphasis is on "classics," films which are, in their respective areas, memorable. This includes a number of foreign films, such as *Virgin Spring*, directed by

Homecoming coming soon

by Mike Loch

The coolness of days, along with cool pleasant nights and the piles of fallen leaves arranged by the wind means Autumn is near and along with Autumn comes Homecoming.

This year Wanda Underwood is the UAB Homecoming chairperson and she feels that Homecoming '74 looks good.

With Homecoming only three weeks away plans are being made and remade with probably the biggest event being a concert given by Fleet Wood Mac, held Sunday, Oct. 20. Underwood feels that more alumni will be back this year and stated that this year's Homecoming will have "something for everyone."

As usual, a king and queen will be chosen along with a greater emphasis being placed on game activities. This year's games will include a coed football tournament, a foosball tournament, a molasses drop, tricycle race and a sleeping bag race to name a few. There will be a parade on

Saturday, Oct. 19, with trophies available.

This year's Homecoming game will be played against Superior with half-time activities by fraternities and sororities. Members of Tau Gamma Beta sorority will meet to salute 65 years of existence on this campus. Alpha Phi Omega, the men's service fraternity will celebrate its 20 years of service.

The "S" Club whose membership is made up of sports letter winners will celebrate 42 years of existence on the UWSP campus. The "S" Club will also induct two of its members, Bill Kuse and Bernard Laabs into the Alumni Hall of Fame.

Susan Kramer, Alumni Program coordinator said that approximately 1,200 names and addresses of "S" Club members have been found. Kramer estimates that there are approximately 2,000 members of the "S" Club at UWSP.

Homecoming buttons will be made available Oct. 1. For further information contact the UAB Office, phone 346-2412.

Homecoming schedule

Monday, Oct. 14 - Jazz Band Coffee House, 9-11 p.m. no admission.

Queen will be announced

Tuesday, Oct. 15 - Games and Foosball tournament

Wednesday, Oct. 16 - Coffee House (student talent) 2-4 p.m. more games

Football Follies (night)

Thursday, Oct. 17 - More games.

Friday, Oct. 18 - Last day of games - Bon fire - Uncle Vinty Concert

Saturday, Oct. 19 - Parade (morning) - Superior game

Sunday, Oct. 20 - Beer Garden and Soft Ball Game 12-5 p.m., eight teams trophies plus beer

Fleet Wood Mac Concert 8 p.m.

Pointers finish third at Parkside meet

by Steve Schultz

There was little to cheer about after the race was over at Parkside last Saturday, Sept. 14, in Cross Country competition.

were a few bright spots. Most notable among them was Don Buntman, who finished a respectable fifth, and had a time of 26:53.

Next best for the Pointers was Patrick Timm, tenth; Dave Elger, 13th; Ron Leuth, 15th; and Mike Simons, 16th.

This Saturday, Sept. 21, the Pointer harriers travel to Oshkosh for the Titan Invitational.

Starting time is slated for 11 a.m.

The Pointers finished a dismal third out of four, in the Quadrangler. The other schools were Parkside, Whitewater, and Carthage. Parkside, the host team, finished first.

However, individually there

Pointers split in weekend hockey

by Joe Burke

Although the weatherman may have provided an excellent autumn weekend for football fans, not all eyes were focused on the Packers, the Aerial Circus or the LaCrosse pom-pom girls.

A substantial number of fans were on hand to share the warmth of the sun with an enthusiastic Pointer field hockey team. The Pointers played host to the UW LaCrosse and Milwaukee Club teams on Sunday, Sept. 15.

In the opener it was LaCrosse 1, Stevens Point 0. Glenda Pommerich of LaCrosse scored the lone goal 12 minutes into the second half. The Pointers were never out of the hard fought defensive game, as they kept the pressure on the LaCrosse girls with repeated short corner shots.

In the second game Point's defense was out shined only by the bright afternoon sun and the brilliance of their offense.

In the second game Milwaukee jumped off to an early lead as Marilyn Harris bounced one in five minutes into the first half. Point came right back as they controlled the face-off and scored on a

shot by Barb Dieckl, Chris Lobutzke assisted.

Twenty minutes into the second half Point's Dee Simon guided a perfect pass to Barb Dieckl who slammed home what proved to be the winning goal.

The score jumped to 3-1 as Marcy Mirman broke the crease with a strong shot. Playmaker Dee Simon got the assist.

The Pointers' final tally came on an unassisted breakthrough goal by Jeannie Lodzinski. The final score was Point 4, Milwaukee Club 1.

Pointer Coach, Nancy Page reflected the team's disappointment at losing to LaCrosse. She noted that it was the first game of the season for the Point girls and that there were a few wrinkles to iron out of the offense. Coach Page obviously did some quick laundering as Point's second game offense displayed skillful passing and hard shooting.

The Pointers will play UWM at 11 a.m. on Saturday, Sept. 21 and the Fox River Valley Club at 11 a.m. on Sunday Sept. 22. Games are played on the grass of the track field on Reserve Street.

Story of the game: LaCrosse in position for Pointer passes.

Chiefs subdue Pointers 23-0

by Jim Habeck

Ron Myhra is 5'9" tall, weighs 175 pounds, and excels at beating the Pointers.

The elusive LaCrosse halfback rushed for 101 yards Saturday on 14 carries, caught two passes for 22 yards, and scored two touchdowns to lead LaCrosse past the stunned Pointers, 23-0.

Pointer end Mike Thompson fell on an early Chief fumble, giving the Pointers possession on their own 35. But two runs and an incomplete pass left the Pointers one yard short. Tony Delfatti's punt carried to the Chief 13, where five Pointers drove the Chief's returner to the 11.

LaCrosse marched 89 yards on 13 plays for the eventual winning touchdown. The drive consumed six minutes, Myhra scoring from the 19 on a short swing pass.

"We were just outit," commented coach Monte Charles. "They kept hitting throughout the game, and we didn't."

With fullback Mike Hammes hitting up the middle, halfback Myhra slanting outside, and quarterback Guy Arkin hitting Dave Saeger for 14 yards to maintain the drive, LaCrosse pushed ahead 14-0. Myhra's 32 yard scamper, with 5:22 remaining in the second quarter, came on a pitchout to the left.

"We didn't have any end play to speak of," said Ron Steiner, defensive line coach. "We just weren't consistent." LaCrosse's Paul Bertolini picked off a Mattei pass moments later giving LaCrosse possession at the Pointer 31 with 2:21 remaining.

A running attempt lost one yard, and a pass fell incomplete before defensive

end Thompson burst through to drop Arkin for a seven yard loss.

With fourth and 18, however, Arkin completed a 20 yard aerial to Dave Saeger on the 15.

"Saeger made a great diving catch," stated Pointer linebacker Don Solin. "They made the big plays and we didn't."

Arkin connected with Saeger for 11 yards the next play, setting up a Hammes touchdown run from four yards out. With 59 seconds in the half, LaCrosse led 21-0.

Reed Giordana replaced Mattei the second half, and earned offensive player of the week honors, after an early disaster.

With second and ten at his own five, Giordana was snowed under by right end Kevin Potter for a safety.

"They brought their ends down, shutting off the outside," explained Giordana. "The only place to go was up the middle."

Their defensive line did a great job," added offensive tackle Paul Nistler. "They kept changing formations, so we never knew what to expect."

LaCrosse consumed five more minutes in a drive spanning 78 yards. On fourth and goal at the three, Point's defense stiffened, holding Arkin to one yard.

Following Delfatti's tenth punt, special team man John Schoenenberger recovered a Chief fumble on the LaCrosse 39.

Passes to Doug Krueger, Jeff Gosa, and a pass interference penalty allowed the Pointers a first down at the LaCrosse seven. Following three incomplete aerals, safety man Paul Bertolini picked off Giordana's final attempt.

The Pointers regained possession once more, with 43 seconds left. Marching from their 49, the offense came within five yards of scoring.

Gary Starzinski, who tipped a pass, and made several defensive and special team tackles, was named defensive player of the week.

d. Joe Kapp
e. Durwood Kirby

9. The record for most touchdowns in one season on interceptions is held by?
a. Herb Adderly
b. Ken Houston
c. Dick Anderson
d. Night Train Lane
e. Bob Bryant

10. Which pro player caught the most lifetime touchdown passes?
a. Don Hutson
b. Kyle Rote
c. Warren Wells
d. Raymond Berry
e. Tom Fears

Answers

7. Who tied Gil LeFebvre for the longest punt return in an NFL game?
a. Willie Wood
b. Sherman Plunkett
c. Charlie West
d. Emlen Tunnell
e. George Atkinson

8. Which one of these players threw seven touchdown passes in one game?
a. Bob Berry
b. Joe Namath
c. Norm Snead

1: b-Joe Foss. 2: d-Bob Matheson (fourth linebacker) 3: c-Ron Widby, Green Bay Packers. 4: c-Tim Rossovich. 5: a-Lamonica. 6: c-Tommy Mason. 7: c-Charlie West; Vikings versus Redskins, 1968. 8: d-Joe Kapp; Vikings versus Colts, 1969. 9: b-Ken Houston; four touchdowns, playing for the Oilers in 1971. 10: a-Don Hutson; Green Bay Packers, 99 touchdowns, from 1935 to 1945.

And if you're wondering why poor Iowa never wins, take a look at a couple of Hawkeys enjoying their pre-game meal.

Vets down BSC 18-0

by Rob Schallock

The intramural 'aerial circus' continued last week. In the top game of the week, the Vets were impressive as they crushed the Black Student Coalition (BSC) 18-0 as Patterson and Christianson scored for the Vets.

In other independent action; BSC beat ROTC 14-2, Ted Clarke and Jerry Stewart scored for BSC. The Siasefis suffered two losses, to ROTC 14-6, and to the Vets 14-2. In the ROTC game, Ed Rogers and Dewayne Byrens scored for the winners while Joe McDuffy scored the loser's only points. The English Fog shutout Magnus Rux 28-0. Joe Netzler, Jim Kohl, Vince Little and Rick Baumgart hit pay dirt for the Fog. The Trojans, led by Paul Samz's two touchdowns, lubricated the Nasty Bulldogs 22-2.

In Sims' games: 1 North stayed on top of the division with a 10-6 win over 3 South; Jeff Hill scored a TD and extra point to lead IN. Steve Snow tallied 35' only score. In another game, Dave Clarke scored 2 TD's to lead 4 North

past 4 South 12-0.

From Watson Hall: Jeff Patt did the scoring for 2 East as it ripped 1 West 12-6, Pete Gardner scored for the losers. Gary Fish tied an intramural record with four touchdowns to lead 4E past 4N, 28-0.

In Pray Hall: Tom Siebert had three TD's and the undefeated 2W team beat 2E 28-14 for 2E Ken Sina and Dave Thalicker did the scoring. Last year's champion 4 East kept its winning tradition alive as it knocked off 3 West 32-0.

Hyer-Delzell League: Tom Kenote had the only score of the day as 2N Delzell beat 2S 8-0. In another Hyer game it was 1W over 1E 14-6.

Hansen's only action had 2N tipping 2W 12-8, Steve Fiall and Mike Varney scored for 2N while Rick Koplitz made West's touchdown.

In fraternity competition: Sigma Tau Gamma shutout the TKE's 22-0. Jake Hafner had two touchdowns for STG. Sigma Phi Epsilon slipped by Phi Sigma Epsilon 8-6. Daley scored for the winners and Graig Gavren for the losers.

Superpickers bomb out

by Tim Sullivan and Mike Haberman

The first week of pro football is over, and the Superpickers are off to a roaring shaky start. Frankly, we could go on and on writing a bunch of paragraphs explaining how certain NFL teams messed up our usually sparkling prediction percentage record, but we figured what the hell, it's still early in the season so why waste time dwelling on a lost cause.

For the record, we picked six games correctly, narrowly missed a seventh, and completely blew three others. All three of the games that we really were off on resulted in upsets, as the Patriots shocked Miami, 34-24, the Bears beat Detroit, 17-9, and the St. Louis Cardinals, playing without injured ace running back Ronald Brown, defeated the Rams, 27-10. Our fourth loss was a heartbreaker, as Dallas just barely managed to squeak past the Falcons, 24-20.

We suppose we'll take a fifth loss on the Oiler's win over San Diego, although we didn't want to have anything to do with that game in the first place.

Our record then for the initial NFL week is six wins and five losses with the tossup game going to Sullivan for taking the Rams over Denver. The Monday nighter between Oakland and Buffalo hadn't been played at the time of this writing, although we did look forward to seeing the Raiders win, and while we were waiting for Oakland to do its number on O.J., we were also happy that Fred "Hammer" Williamson would not be up in the booth with Cosell and Gifford when there was talk that Alex Karras would show up in-stead.

The NFL's second week is no sweat, so here are our picks:

Rams over Saints: New Orleans couldn't beat the 49ers, even though Frisco was without a starting quarterback. John Hadl should have an easy game. Rams by 20.

Atlanta over San Francisco: With Steve Spurrier out of action, the 49ers still only barely managed to beat New Orleans. The Falcons should have an easy game. Atlanta by 20.

Michigan 24 Iowa 7
Ohio State 34 Minnesota 19
Illinois 16 Indiana 0
Michigan State 41 Northwestern 7

OTHER

Arkansas 22 USC 7
Nebraska 61 Oregon 7
Penn State 24 Stanford 20
Oklahoma 28 Baylor 11
Alabama 21 Maryland 16
Texas 42 Boston 19
Houston 21 Rice 0
Air Force 37 Idaho 0
LSU 42 Colorado 14
Georgia 48 Oregon State 35
Mississippi 10 Missouri 0
Oklahoma State 59 Wichita State 0
Pitt 9 FSU 6
KSU 31 Tulsa 14
North Carolina 42 Ohio 7
Kansas 14 Washington State 7

Vikings over Lions: We can't remember when Detroit ever beat the Vikings, and the Lions probably can't either. Minnesota by 10.

Browns over Oilers: Cleveland is nothing great at all, but the Browns annually end up in the playoffs. The Houston Oilers are one of several teams who helped put them there. Cleveland by 13.

Packers over Colts: About the only thing the Colts do consistently is run back kickoffs. The Packers might be heard from yet if they can polish up some rough spots. Green Bay evens its record with the league as it beats the Colts by 13.

Steelers over Denver: The Broncos have been steadily climbing to reach the ranks of the great NFL powerhouses. Pittsburgh is already there. Steelers by 10.

Jets over Bears: Namath looked impressive in the Jet loss last week, even though he hit Kansas City's Upshaw and Thomas with touchdown passes. New York should take a close one from Chicago if Caster can hang on to a few passes. Jets by 7.

Dallas over Eagles: Both are unpredictable. The Cowboys whaled on Atlanta when they weren't supposed to, while Philadelphia was pathetic in the Cardinal game, at least on offense. Logic takes Dallas by 3.

Patriots over Giants: Uncomplicated theory here. If New England can beat the Dolphins, then New England can also beat the Giants. Interesting development,

since Giant Coach Bill Arnst coached Miami's defense last year, the same defense that gave New England 34 points last week. Patriots by 7.

Raiders over Chiefs: The AFL's family war is on again, as Curt Gowdy suddenly wakes up and Al DeRogatis tells us what plays not to look for. Oakland by 1.

Redskins against St. Louis: The perfect weekly tossup, since each one beats each other once each year. Sullivan takes the Redskins for no apparent reason, and Haberman goes with St. Louis on a typical hunch.

Dolphins over Bills: Should be a close one, but we can't see Miami losing two games in a row. Miami by 10, and now we'll find out if the Dolphins really miss ex-defensive coach Bill Arnst-barger or not.

The FOUR WINDS

BAUBLES, BANGLES
and BEADS, from

OPINION POINTER

UWSP not being left out

Hunting is necessary

To the editor:
In referring to the article "Is Hunting Necessary?", Sept. 12, 1974, it is obvious that this person knows little about wildlife or she would not have made such an irrational statement against hunting.

Let me ask, if you've ever seen a starving wild animal. If you haven't, there is nothing more ghastly. If you have, then you must be informed about some of the facts.

I myself do not hunt but being a wildlife major have learned that it is a necessary means of population control in Wisconsin. In this case I am referring mainly to the whitetailed deer. If deer are not controlled by hunting they will produce so rapidly that they would literally eat themselves out of house and home. The starving deer

would die a long and merciless death. Therefore hunting is not only necessary but a humane death.

Unfortunately, the days are gone when natural predators could keep populations in check, but now man is the only main predator left. The hunter not only keeps populations in check but provides, through the high hunting fees he pays, for wildlife refuges and parks so that we, the non-hunters, can enjoy what is left of our wildlife heritage.

If you are really interested in protecting our wildlife, turn your attention towards removing bounties on wildlife or contributing to National Wildlife for endangered species. Don't let the hunter have the responsibility for the whole cost. Then there can be enough wildlife for aesthetic, as well as hunting, purposes. Barb Kennedy

Dear Mr. Long:
This is a response to your letter relative to television facility expansion at Stout and TV program development at Oshkosh. You pointed out the \$485,000 Educational Communications Board grant to Stout for studio color equipment and studio-transmitter link equipment. This is in accordance with the statewide plan to ETV which was developed in 1962 by a statewide committee, CCHE paper No. 70 of that year will provide all details as well as the rationale. I was chairman of that committee and authored the initial plan.

I proposed then that the three ETV stations covering the north-center of the state (Green Bay, Wausau and Colfax) be administered by the three separate higher education units which existed, with a full local studio capability to be provided to each designated institution. The Green Bay station (Channel 38) was to be the responsibility of the University of Wisconsin, Green Bay. Center (now UWGB).

The Rib Mountain station was to be under the Wausau vocational school and the Colfax station assigned to Stout State University at Menominee. The dollar award you now see is the result of those decisions twelve years ago. The rationale essentially was to provide a fair division between the UW, the vocational system and the State University system.

No plan was developed to provide potential "feeder" institutions such as Stevens Point with dollars or equipment for television in the many remaining vocational and university institutions around the state. I do not believe the ECB is now considering such a request. I do not feel the budgetary constraints here at UWSP allow us to give this priority to a half million dollars for broadcast quality equipment.

You should be aware that I did get \$1.3 million from the Building Commission to renovate the Gesell Building for use as a communication arts center. Included in that is the building of two TV studios with color equipment for one. These facilities are intended and designed to meet campus instructional needs primarily and not to feed or operate the channel 20 transmitter when it is built on Rib Mountain.

Your third point about Channel 20 which has recently developed in unknown to me so I cannot respond. If you can provide me with more specific information, I believe I know where to get some very specific responses.

I can see why the statewide plan might lead you as a communication major to feel

that we are being "left out in the cold." However, there are two key factors involved for you to consider. The first I've already elaborated above as to why I proposed the vocational school in central Wisconsin should operate Channel 20. The second factor is related to my own educational experience and philosophy in this area.

As you probably know, I have personally managed the television stations while also chairing the mass communications units, both in Detroit and Madison. As a result, I am personally and professionally convinced that the demands related to such operations would overwhelm our academic program and the resources available.

In short, I came to the opposite conclusion from yours, namely, that our growing academic program in this area would be materially damaged if we were to enter into the responsibility for providing the program and operational base for Channel 20. This function would rapidly take precedence over all else in this area. Human, dollar and time resources would be "stolen" from academics to meet the priority of broadcasting.

Next to the Oshkosh seminar on WSAU-TV. This was the result of a U.S. Office of Education grant developed by Harold Crouse of UWO to provide discussions with educational leadership on TV tape. It was aired on stations all over the state. What you saw then was a tape replay sent to Channel 7 rather than a program developed for WSAU by Oshkosh.

That's why we would not have "gotten first crack at...a station so close." If you followed the series, you know that Buckminster Fuller and I together did two of the programs. In that sense, UWSP did have some participation.

More importantly, the faculty or LRC administrators here cannot yet make such a grant request of the USOE because we do not yet have a color equipped studio. UWSP resources were and are greater than ours. I also decided against such fund allocations here because of the very limited facilities found here in 1967 related to class, laboratory, library, office, recreational facilities, etc. Too many basic needs had to be met here for me to agree to build video facilities equivalent to Oshkosh, Stout, Green Bay, etc. You may not agree with my priorities, but in retrospect I would still build approximately as we did if it were to be decided today.

Your last point relates to your necessity to "make up" undergraduate prerequisites in graduate programs at other institutions. I can't respond to that directly without knowing precisely to which institutions and programs you refer. However, as a former head of

two major media programs, I am aware that what you say has been generally true because of some very radical differences in our field relative to course offerings and educational philosophy.

If you shift from one approach to another, then there will be prerequisites to "make up." As a matter of fact, I have always encouraged students to shift institutions for a broader perspective. However, at Madison and at Wayne State, I did generally accommodate such students by having them enroll in graduate level directed study courses while participating in the necessary undergraduate course as part of the requirement for the independent study course.

This needs much deeper and further discussion between us, and I would encourage you to set up an appointment with me to do so. You may want to set up a group meeting of communication majors and faculty relative to all of this. As a professor in the department as well as being the chancellor, I would hope such a meeting could be set up around my schedule.

In the meantime, I hope this lengthy, but necessary response meets your immediate needs. Because of length, this probably will not be printed in the Pointer. Your short letter simply was not capable of short response.

Sincerely yours,
Lee Sherman Dreyfus
Chancellor

Writers announce meetings

Students of Stevens Point.
The University Writers, in its latest incarnation, invites all persons interested in the production of fine writing to attend its meetings and prepare contributions for the '75 literary magazine.

There will be two meetings a month during the first semester, used to plan several free public readings. Meetings and readings will be announced by posters.

Everyone is welcome to read and listen at a student reading Sept. 26, in room 129, University Center.

The Organization publishes a literary magazine each spring, giving student writers an audience for their short stories and poetry. Manuscripts should be delivered to David Engel, faculty advisor, room 214, Nelson Hall. They should be typed and include a stamped, self-addressed envelope to insure their return.

Copies of the '74 magazine, *Portage*, are available in the University Bookstore and at the City Newstand.

Sincerely,
James Wojcik
Pres. University Writers

Many people are saying that a DIAMOND is a fine investment. We think so— Especially if you're investing in LOVE.

Where are we going?

To the editor,

Few will deny that this has been a marvelous century of accomplishment; perhaps the most productive since the coalescence of the nebulae. However, we have been in such a hurry that we have neglected to ask where we are going.

The world has bit off too big a piece of industrialism and is having trouble digesting it. No known remedy seems to be effective. Something or someone must be censored. The buzzard of blame has a hard time finding a roosting place and occasionally hovers over the college. Most of the criticism is part of the delirium of a confused world, but the suggestion that the university is not in step is too high a compliment to ignore.

If this were only so! The tendency to become practical is growing even here. Well-meaning legislators, regents and administrators reflect the public's growing tendency to evaluate a college education in terms of monetary return. There was a time when there was gold in a college education, but as the rewards became less visible many were disenchanted. The problem lies in the sense of values. The things that made America great are confused with the things that made her rich.

Man enters this world with no knowledge of the past, present or future, although he is a product of the past and the hope of the future. Education is his best hope for realizing his potential as a human being. Important as is progress in the economic world, more important is progress in developing noble-minded men and women; people who meet life with a perspective and philosophy.

All men are created equal

Dear editor,

President Ford granted "...a full, free, and absolute pardon onto Richard M. Nixon for all the offenses against the U.S. which he, Richard M. Nixon has committed or may have committed or taken part in during the period from Jan. 20, 1969 through Aug. 9, 1974."

I would like you to remember that the Watergate break-in was in the summer of 1972. Why then does Richard M. Nixon need a pardon for the first three years? Perhaps it's because he ordered the invasion and bombing of Cambodia and Laos without congressional approval. Or maybe it's because under his direction, dikes in North Viet Nam were bombed which is a violation of the Geneva Convention.

Maybe the crimes of the Nixon Administration go deeper than just Watergate.

"We are all equal; it's just that some of us are more equal than others." George Orwell, *Animal Farm*.
Gilbert M. Halverson
2117 Elk
Stevens Point, Wis.

based on their knowledge of the best and the worst in man's progress toward an unknown destiny.

Like the seas there will be calms and storms in life. The life of man is but a brief spark in the eternal maelstrom of cosmic evolution. The swirling winds of chance beat at each flickering flame, wherein resides a dream; a troubled dream in endless time that mingles with the stars that gave it birth.

College is not a magic fountain. It opens limitless horizons for those who will drink, but none can avoid a little of the spray. Age will mellow youth's idealism but contacts with associates in an inspirational atmosphere can ignite a flame that never will be entirely extinguished.

A monetary value can not be placed on a liberal arts college education. It goes far beyond economic gain. What is a college education worth? It depends on your sense of values.

OPINION CONT. POINTER

Parking laws questioned

To the editor:

As a concerned student, and one of the many students who utilizes the UWSP campus parking areas, I felt I must bring this point to your attention. I was amazed to find that the repair of a vehicle on a UWSP parking lot constitutes a violation and that the owner is subject to a \$2.50 fine if caught. (See Article 12, Section A, Number 5, and Article 13, Section A, Number 2, Parking and Vehicle Regulations 1974-75.)

Most student vehicles

parked in UWSP lots are used primarily for medium and long trips to the student's home towns. Many times, the stress placed on the vehicle from these migrations, combined with the quality of an older Detroit product results in a never ending sequence of adjustments and replacements.

Towing is much too expensive for the limited budget of a student, as is minor repair of parts at an automotive garage. The safety of the Stevens Point student is directly affected

when the replacement of a damaged part is prolonged, or the student is forced to service his vehicle on the highway shoulder.

Once again, the UWSP Campus Security seems to uphold a foolhardy and backward viewpoint compared to other motor vehicle law enforcing agencies, who would promote the continuous maintenance of a safe vehicle to reduce the accident possibilities for young students.

Sincerely,
Dana A. Belton
221 Watson Hall

FUN'S OVER!

Time to burn the midnight oil! If you're going to get ahead in this world you have to put a little work into it. It's easy to fall behind if you don't put something into it each day. I'd better make a note to myself to stop in at Parkinson's and pick up a leisure suit for the dance next week. They're really sharp and in many cases cheaper than a sweater and slax. I go for those matching plaid combos. I want to look neat so no one will accuse me of being a "Dog". It doesn't cost a lot to dress well if you just use your head a little and Parkinson's have some of the best doggone buys in town. You know, this education bit can become an interesting habit if you just set your mind to it. Let's see now . . . evidently Homer wasn't the only Odyssey.

Ten million people camping out in Jordan Park? Rats for roommates, (the furry kind.)

Contrary to appearances, there is not a critical shortage of off campus housing. Mel Karg, assistant director of Housing asserted that there are a lot of listings, but they include places without kitchens or an only bedroom. This reflects a shift which has occurred over the past five years.

Where once a room was satisfactory off campus living, it is no longer sufficient. There is a shortage of the type of housing students desire.

When asked if this shortage has caused students to return to dormitory living, Karg stated that this may be the case, since on campus living now offers more than it had previously. With the advent of single rooms, the painting option, semester contracts, upper classman dorms and other changes, it has enhanced the dormitories appeal. Furthermore, with the rising food costs, it may be cheaper to live on campus rather than off, depending on the number of people living together and their eating habits.

But if you were one of the lucky few able to secure off campus housing, you may still be faced with landlord problems, cramped quarters or numerous other difficulties.

There are protective state statutes of which all students may not be aware, said Karg in reference to tenants rights.

For instance, a landlord may come to examine his property, but he may not pop over indiscriminately. Tenants have a right to be informed of his coming. A municipal housing code was established to protect both the landlord and tenant. Hopefully most problems can be arbitrated between the parties involved. If not, there are other alternatives.

Karg can be reached for consultation and can also refer people to necessary channels.

statues in the fields

and I would like to see
statues in the fields,
the earth foundation
firm in its grasp.

through droughts and har-
vests
poised lines lie unmoving
sleepless in endurance--
lions in the corn
stretched in soil of the years.

MONTEZUMA'S OFFICIAL GUIDE TO THE ANCIENT TEQUILA ARTS.

The Aztec Empire. It's long gone. However, modern man is rediscovering its secrets.

A key to the rediscovery is the Sun Stone, a sort of time-capsule that outlines the history of the Aztecs and, according to Montezuma® Tequila, what the Aztecs liked to drink and when they liked to drink it.

Within the inner ring of the Sun Stone are twenty symbols; one for each day of the Aztec week. Each symbol also suggests what kind of drink might be appropriate to serve on that day.

XOCHITL

Montezuma:

Margarita

The flower symbolizes the last day of the Aztec week, representing the ultimate in true beauty and pleasure. The drink: 2 oz. Montezuma Tequila; ½ oz. Triple Sec; juice ½ lime; pinch of salt; stir in shaker over ice; rub rim of cocktail glass with lime peel and spin in salt; strain shaker into cocktail glass.

Tequila-Pineapple Liqueur. The 3rd day of the Aztec week is symbolized by a house, representing hospitality and at-home entertaining. The drink: fill a jar half way with chunks of ripe pineapple; pour Montezuma Tequila to the brim; add 1 teaspoon sugar (optional); cap jar and place in refrigerator for 24 hours; drain off liquid and serve as an after-dinner liqueur.

*Tonatiuh: Aztec god of the sun.

©1974. 80 Proof. Tequila, Barton Distillers Import Co., New York, New York.

Horny Bull™ Cocktail. A horned animal symbolizes the 7th day of the Aztec week, representing high-spirited and casual fun. The drink: 1 oz. Montezuma Tequila over ice in unusual glassware, mason jar, jelly jar, beer mug etc.; fill with fresh orange juice or orange breakfast drink.

MAZATL

The drink: 1 oz. Montezuma Tequila over ice in unusual glassware, mason jar, jelly jar, beer mug etc.; fill with fresh orange juice or orange breakfast drink.

Tequila Fizz. The rain symbolizes the 19th day of the Aztec week, representing cool refreshment. The drink: 2 oz. Montezuma Tequila; juice ½ lime; ½ teaspoon sugar; two dashes orange biters; stir in a tall glass over ice; fill with club soda; garnish with lime shell.

QUIAHUITL

Tequila Straight. Water symbolizes the 9th day of the Aztec week, representing simple and uncomplicated pleasure. The drink: Pour 1½ oz. of Montezuma Gold Tequila in a shot glass. Put salt on back of thumb; hold a wedge of lime between thumb and 1st finger; lick salt, drink Tequila, bite into lime in one flowing motion.

ATL

Tequila in a shot glass. Put salt on back of thumb; hold a wedge of lime between thumb and 1st finger; lick salt, drink Tequila, bite into lime in one flowing motion.

Montezuma Tequila. In White. In Gold. Made in the tradition of the finest ancient tequilas.

For additional Tequila Arts recipes, write: Montezuma Tequila Arts, Barton Brands, 200 South Michigan Ave., Chicago, Illinois 60604. And may Tonatiuh* smile upon you.
