Twenty students slated for Senate

by Bob Kerkelsiek

Twenty students were elected to the Student Senate Tuesday by 549 of the over 8,000 students on campus.

In district one, the winners were: Tom (Wojto) Wojciechowski with 76 votes, Mark Herte-59, Jack Elsinger-52 and Paul Roberts-51. There were 11 write-in votes. In district one, 93 students voted.

After a triple recount in district two, the winners were: Kurt Anderson-90, Nancy McPhail-70, Robert Heil-48 and James Ludwig-48. Doug Bingenheimer and Jerry Bourbonnais, both of whom were on the ballot, lost with 43 and 47 votes respectively. There were 14 write-in votes. 128 students voted in district two.

The district three winners were: Ruth Pethan-85, Hershaw Webb-67, Michael Barry-46 and Jim Sarkis-20. Sarkis was a write-in candidate. There were 40 write-in votes including those cast for Sarkis, no more than three having been cast for any candidate other than Sarkis. 135 students voted in district three.

The winners in district four were: Jeff Thiel-83, Mike Neville-80, Kathy Johnson-77 and Paul Hoffman-66. There were eight write-in votes. 131 students voted in district four.

Opened meeting laws apply

by Sally Dusitr
Meetings on student, faculty or employee levels are subject to the open meeting laws.

The Wisconsin state requirements for open meetings fall under Section 66.010, Wisconsin Statutes, Chapter 227, Laws of 1973.

This section is primarily concerned with defining terms such as meeting, open session, closed session, governing board, board member, and public notice as well as making provisions for closed sessions.

A memorandum received from Charles Stathas, UW System Senior Legal counsel, clarifies these terms for university purposes.

"The term 'meeting' means the actual convening of a governmental body in a session such that the business of the body is vested with authority, power, duty or responsibility not vested in the individual members." Stathas points out, however, that no formal actions or votes are discussed during the meeting, which is convened in order to establish how the university is to be governed.

Legally excluded however, are "staff meetings and those departments which fall under the administration of the appropriate department head where the chairman of the department is merely reporting to the department head on actions he has taken." Stathas said that these meetings are not open to the public and are not subject to the open meeting laws.

A closed meeting is defined as "an open meeting is requested to be closed by the employee or person charged, investigated or otherwise under discussion."

Closed sessions are permitted by law for reasons "that deal with the same as the law provides for competing or bargaining reasons, require closed session." Also permitted are closed sessions dealing with "matters concerning legal advice or to matters with the body's jurisdiction and 'consideration or discussion of personnel problems.""

The only group to participate in closed sessions are "the president of the board or the chair of the committee or of the board of trustees and the secretary or the secretary of the board of trustees." Any other member interested may also call the Student Government Office for meetings and agenda, Updike said.

"Before going into a closed session, the person convening the meeting shall announce to those present the general nature of the business to be transacted at and agenda for the meeting. Under these legal provisions both faculty and students must observe the terms of open meeting laws with regard to notice of time, place, date and agenda," said Edwina Sigmund, assistant to the Chancellor for Planning and Analysis.

The official vehicle for public notice of a faculty meeting is the Faculty Newsletter. Locations of easy access for students in classroom buildings, the University Center (UC), DeBot and Allen Centers and other buildings are currently trying to be determined. The purpose is to post bulletin boards in these areas and call the Faculty Newsletter and notices of meetings called within too short of notice for publication will be posted across from the Gridiron, UC. One any interested may also call the Student Government Office for meetings and agenda," Updike said.

Residence Hall Council (RHC) and President's Hall Council (PHC) will be open, said Gwen Nelson, Residence Hall Program Director. Those meetings have always been open and no closed sessions are foreseen, she added.

Other student meetings like Ski Club, Trippers, University Activities Board (UAB) and related student activities meetings are open. Notices of these meetings are published in the Faculty Newsletter, however they are printed in the Student Activities Calendar and in the Pointer, said Bob Busch, University Center program director.

Conflicts in February and March of this year concerning closed meetings which were closed, resulted in specific interpretation of the law by the UW System Legal Counsel. The results opened PPBAC meetings and meetings of this type, said Sigmund.

"The legal problems relate to departmental meetings which may be closed when the activities, meetings, proms, merit salary increases and other things of this type, said Sigmund. Many faculty are unhappy about open voting, especially in cases of expression of opinion about colleagues, he added.

Faculty Senate, as a whole, will continue to meet in open sessions. However, the Mediation Committee is currently considering hearing of tenured faculty appealing lay off notices and agenda, Updike said.

Other meetings such as Administrative Council, Faculty Planning, Programming and Budgeting Advisory Committee (PPBAC) are open.

In addition, no secret ballots may be taken at any open or at the meeting and public notices of meetings must be made of meeting time, place and agenda. Under these legal provisions both faculty and students must observe the terms of open meeting laws with regard to notice of time, place, date and agenda, said Edwina Sigmund, assistant to the Chancellor for Planning and Analysis.

About 15 percent of the UWSP students are married. Instead of spending more to see movies, the new program encourages the group to participate in such activities as arts, lectures and theatre productions.

"Some of them, attracted by the campus atmosphere, may start night classes and later enroll as part time or full time students," said Badzinski Badzinski said that a thorough investigation had shown that the new program was progressive as it has helped generate additional income for the university.

Of all the universities within the UW System, UWSP is the only campus operating this program. This, Badzinski said, is attributable to the philosophy of Chancellor Lee S. Dreyfus who believes in "progressive, as it has started to generate additional income for the university.

Student Spouse ID Program

by Bassey Umene
A new Student Spouse Identification program, first of its kind, is now operative at the UW System Legal Services.

In this program, the husband or wife of a student can present a special ID card by paying only one-half of the initial student activity fee. This permits the bearer to participate in campus activities, with the exception of Health Services and Textbook Rental.

Explaining the program, Student Controller Bob Badzinski said that through three years since the program had been initiated without being implemented. "I have said that there were growing demands from different quarters, especially those from the Student Wife's Club, who approached Student Government officials about implementing the program."

Commenting on the advantages of the new program, Badzinski said that the program has the potential of increasing student population at the UWSP.

"The University of Wisconsin at Superior is growing, with an increased student body and a more active student life," Updike said. "The open meetings were created to provide a public forum for citizens to participate, to express their opinions, to express questions or concerns about the government, and to hold officials accountable to the public."

"The purpose is to improve the quality of government and to make it more responsive to the people," said Updike. "This is achieved through open meetings, which allow for public participation and public discussion."
WWSP—FM provides full range programming

by Rick Cigel

'Total Campus Radio,' a phrase used by WWSP, the university radio station, provides a very appropriate reference to this student-run effort.

As the term would suggest, the station, which broadcasts from the north end of the Gesell building, provides a full range of programming. Not only do they play the current hit songs, carry news, weather and sports, but the 'Superheroes' of FM-90 play progressive, classical and jazz music as well. In fact, as Tom Bedore, station manager of WWSP points out, 'We are the only place that plays classical music, and a lot of people like that.'

As an 'alternative broadcast source,' as Bedore terms it, WWSP offers the college student an opportunity to be closer in touch with the campus scene. Since all of the staff, including the announcers, are students, the programming can be geared toward the campus listener with a first-hand point of view. 'We want to be associated with this campus. We have a sizeable community audience, but we always like to remind them that this is a campus radio station...if people want to know what's happening on campus, this is one of the places they can turn.'

Indeed, the station is a place to which students can turn. Many students who are interested in pursuing a career in broadcasting look toward the station as a source of practical experience. However, about half of the staff is comprised of people who just want to learn a little, and have a little fun. When asked how someone can join the staff, Bedore replied, 'Just stop down, and if you want to be on the staff, you are.'

Before did point out, though, that the station has a 'great track record' for placing people in jobs. Currently on the staff, there are six members that have worked or are presently working in commercial radio. 'Last year, everybody that graduated here and had worked at this station is now working at a radio or television station someplace, and that's a lot better than any other university around.'

One of this high points from an expansion basis is the station's application for an increase in power. As the station is legally capable of broadcasting only ten watts, the effective range of the station is approximately ten miles.

On campus, this range is cut down quite significantly, because of the obstacles present. In order for a signal to be transmitted to the north side of the university, it must go through the Learning Resources Center, the Natural Resources building, a few dormitories, 'yards and yards of concrete,' and finally, to its destination. However, with the expected increase to 300 watts which the station now awaits final approval, there should be no problem reaching points as distant as other cities in Central Wisconsin. This increase will then allow WWSP to serve the campus audience better, 'and that's what we're interested in.'

Each year the station provides several 'special events.' The nationally-known Trivia content leads the list, along with the annual Christmas Telethon, and this year's addition—a Scavenger Hunt.

The Scavenger Hunt is tentatively scheduled for Homecoming weekend. Although it has never been tried before, Bedore is hoping it will be a success.

The Telethon, which is produced by the radio station staff with Maggie Victor as Telethon chairman, is expected to draw $8,000 this year for near-by charities. Through the joint effort of the radio and the television people on campus, over $7,700 was raised last year.

'Trivia is a huge event on campus that we have every spring.' Before finds that 'last year we had people from Canada, Chicago, Texas, all over the place,' come here to play Trivia...eight to nine thousand people playing. It's the largest Trivia contest, as far as I can tell, in the whole United States.'

POINTER rated first class

The Pointer was awarded a high First Class rating in the Critical Service of Associated Collegiate Press (ACP) for last semester.

Competing against hundreds of publications from schools throughout the United States, the Pointer was cited for Marks of Distinction in Editorial Leadership, Physical Appearance, Writing and Editing.

Robert Kerksieck, this year's Pointer editor, was also the editor last year. William Witt, a Communication Department professor and the Pointer advisor, was also the advisor last semester.

Comments in the ACP Guidebook included the following: The Pointer is well organized (coverage and content). Balance (among sources) is well maintained. Facts are derived from reporting, not writer opinion. The tenure feature (see the Feb. 21, 1974 Pointer) is well researched and well handled. Well developed, objective copy. Sports copy has real pizzazz. A variety of good editorial page features. A bright, newsy front page. Page makeup is innovative and imaginative. Photos have excellent content and quality.

The first class rating is awarded to publications which ACP deems to be excellent in quality.

Now having approximately 1,000 college publications as members, ACP has served college publications since 1933.
by Katherine Kowalski

Don Kemp, a Wisconsin Vietnam veteran, slept with his gun to protect himself from the enemy he sees in his dreams. Kemp is now imprisoned for the rest of his natural life for shooting his wife.

For ten months in Vietnam, Kemp was ordered to kill civilians and go on suicide missions. When Kemp returned to the U.S., he developed paranoid symptoms such as carrying guns in his car and in his home, knives in his boots, GI first-aid pouches, and a gun under his pillow where he slept.

Kemp received Psychiatric Compensation and medical help through the Veterans Administration (VA). With noticeable improvement, Kemp was discharged from all VA treatment.

One night, while his wife tried to wake him from one of his nightmares, Kemp shot her to death.

Kemp's case and other less extreme accounts are included in the PVS Library, available at the Learning Resources Center (LRC). The “PVS Library” is a 417 page, one volume collection of reports, essays, case studies and letters which explore the commonly reported symptoms of what has been termed the “Post Vietnam Syndrome.”

*Symptoms* have been described by the Webster dictionary as a “group of signs or symptoms that occur together and characterize a particular abnormality.”

Most common signs and symptoms associated with PVS are guilt, self-punishment, flashbacks, ability to trust, love and sustain lasting relationships.

The PVS Library does more than describe PVS symptoms. “What it basically does is describe what this society forced its young men to do in the name of this country’s honor and patriotism,” said Mike Aird, a Vietnam vet and a student at UWSP.

Everything a young man learned for his first 18 years of life is destroyed.” Instead of turning the other cheek, they (the military) teach you to pull the trigger. Instead of teaching you to live with fellow human beings, they teach you to mercilessly kill them,” said Aird.

Aird said, “the prime time to adjust to society is at age 18 or 19, it is a time when one goes off on his own for their first time; it is the time we learn to live with others. For the person in Vietnam; his function in society is to destroy, not to create. In Vietnam, to destroy is right. Eighteen hours later, back in the States, it is wrong.”

It is hoped by those veterans and their associates that the “PVS Library” will be “Used in and beyond the academic context to bring about an understanding of the social psychological phenomenon known as Post Vietnam Syndrome.” The dimensions of PVS require not only a clear elaboration of the problem in all its complexity, but a conscious commitment by the people of the U.S. to alter those conditions which have led to the development of PVS. The availability of this volume to students of social psychology, peace studies and the social sciences in general should provide an essential cornerstone in laying the foundation for such a movement,” stated in the Preface to the “PVS Library.”

There are soon to be 25 volumes of this single volume book in the LRC.

New position added to Health Center

by Shelley Hosen

This year Physician’s Assistant Richard Dabner has been added to the staff at the UWSP Health Center. Physician’s Assistants are relatively new. There are three university health centers in the United States that have them and UWSP is the first university in Wisconsin to have one, said Dabner.

The job of the Physician’s Assistant is basically screening patients and letting only more serious things go on to the doctor. The Physician’s Assistant can prescribe drugs under the doctor. Physician’s Assistants can also give physicals, explained Dabner.

“I’d like to spend more time with the students,” said Dabner. “So for this year it’s been very busy.”

The Health Center is a simple, inexpensive and functional medical unit with emphasis on preventative medicine, said Dabner.

Services at the Health Center include eye examinations, pregnancy tests, diabetes tests, various cultures, microscopic stains and smears, tetanus shots and vaporizers to loan.

Many students want to come in and talk. This is where having counseling helps, comes in handy, said Dabner.

“I would advise the students, within good judgment, to come to the Health Center. If we don’t have the answer we’ll find the answer,” said Dabner.

“Often the wait is long, but student patience is really appreciated by me and by everyone else on the staff,” said Dabner.
TAUWF revises code of ethics

by Jayne Hubacher

The Association of University of Wisconsin Faculty (TAUWF) met in the Green Room of the University Center, Thursday, Sept. 20.

The organization is headed by Leon Lewis for the Stevens Point chapter. Its chief function is working for the benefits of faculty members and academic staff.

Other members of TAUWF include Alice Randlett, secretary; Ruth Steffen, treasurer, and committee chairmen Allen Blocher, Academic Freedom and Tenure; and also State Standing Committee chairman, Guy Gibson, Educational Policies, Dick Christofferson, Legislative, Salary and Fringe Benefits chairman-to-be chosen, Carol Marion Executive Committee chairperson, and UWSP faculty and staff.

There was one representative of each UW System branch campus that spoke for that school on the Executive Committee in Madison and was chosen by the other members of TAUWF.

Blocher opened the committee reports by making a motion that TAUWF accept the revisioning of parts of the Code of Ethics, rewritten by Marion that would then be added in the Personal Guide Lines.

The suggestion was made so that eventually the Code of Ethics would erode away and the Personal Guide Lines would be the only document used, constructed by the faculty and staff. The vote was unanimous.

Marion reported for the Executive Committee that met at Eau Claire Friday, Sept. 13. There are four state wide committees and TAUWF has decided to elect another committee to work with the local campuses about collective bargaining. The chairperson would be the member of the state. Presently, TAUWF is working for sixty-five faculty and staff members who had been fired, deferred, etc.

There were no other committee reports but the committee chairmen were open for suggestions by members.

Lewis urged committee members to encourage other faculty to join TAUWF as it is an organization working for them.

TAUWF's next meeting will be in the Green Room of the University Center at 7:30 p.m., Thursday, Oct. 17, 1974.

Free bus service for students

by Katherine Kowalski

Soon UWSP students may be able to ride the city buses free by presenting their UWSP student identification card (ID) to a city bus driver. If the Public Service Commission approves a contract, it states, "the Point Area Bus Co-op (PABCO) agrees to transport any student enrolled at the UWSP during the period Aug. 19, 1974 through May 17, 1975," students will be able to ride on the bus within two or three weeks.

The contract is open-ended stating that "such considerations as lack of ridership or high levels of ridership would be cause for re-negotiation."

In the case of re-negotiation, Student Government or PABCO could, every 30 days, either decide to raise or lower the $100 per month fee or terminate the contract, states the contract.

"We can show a decided savings in energy," said Student Government President Lyle Updike. The savings would include fossil resources, students' time and students' energy, said Updike.

"It is much less for students to pay for the bus full fare than to have an automobile," Updike said.

Using the bus will eliminate the parking problem and the need for more parking lots for which the students pay, Updike said.

At no increase in PABCO costs, the empty seats can be filled by students.

Very few students will use this service the first three months the contract is effective because of bicycles and walkers, said Updike.

When the weather gets colder, more people will use this service, said Updike. Mass transit has a place in the life style of the people here, and it is much easier for people to exercise that." Last year's student Senate initiated the student ridership on PABCO buses last year.

Poor candidate-student communication

Primary voter turnout dim

by Mike Loch

If you voted in the last primary-cum-graduation, you were one out of four persons that did.

The primaries elections, held Sept. 10, showed 14,544 people were registered to vote. The number that did vote was 3,546.

Roughly ten percent of the student population decided not to vote in the last election, according to Barb Stiefvater, vice president of Student Government. Approximately 21 percent of the city population voted.

The fact that 660 new student voter registrations in the spring semester came from the 600 new student voter registrations were signed didn't seem to increase the student participation.

There was a lack of student involvement because the semester began so close to election time that students didn't have enough time to familiarize themselves with the candidates, although a lack of candidate-student communication was also a factor in poor election turnout, Stiefvater said.

A number of students expect a greater student turnout during the November election. Most students expressed opinions similar to Stiefvater, that there just wasn't enough time for the student to get to know the candidates and vice versa.
HEW secretary to speak at UWSP

The workshop was established in 1965 by Melvin R. Laird, who then represented the 7th District of Wisconsin in the U.S. Department of Defense. He now is retired from public life and is associated with Reader's Digest. Laird will participate in the event.

John M. Potter, Wisconsin Rapids, president of the foundation announced that in addition to Weinberger, six persons prominent on either the state or federal levels of government currently are being scheduled to be resource leaders in discussions on, "The Bi-Centennial and American Political System: A Point for Re-Evaluation; America's Military Role in World Affairs: Responsibility and Limitations; America's Economic Role in World Affairs: Where Have All the Dollars Gone?; America's Environment, Development, and Energy Needs; Can They Find Happiness Together?: Government, Business and You-The Consumer; Can They Find Happiness Together in the Market Place?: About Life Styles, Education and Jobs: Is 1984 Already Here?"

The participating students will select two subjects with which to familiarize themselves in advance. The Library of Congress is presently developing background material for them to use as they prepare themselves.

Potter said the workshops are intended to bring together student representatives with contemporary leaders to create dialogue and an exchange of ideas.

Casper Weinberger secretary of the U.S. Department of Health, Education and Welfare (HEW) will deliver a keynote address Oct. 7 at the fifth biennial Laird Youth Leadership Conference at UWSP.

Four outstanding students from 64 high schools in the central and northern part of the state are being invited to represent their classmates for a full day of sessions on "New Opportunities in the '70's: Ethics and Ability."

Enrollment this year is 8,035 as compared to 8,066 at this time last year. And it looks like the drop of 31 all took place in this class. Photo by Greg Sprenger.

UWSP enrollment increases

by Harriet Pfersch
Various factors influenced the recent increased enrollments at UWSP.
Ongoing trends, increased graduate enrollment, transferring students, and fewer dropouts attributed to the increased figures.

Latest projected figures stand at 8,035 students, including those students enrolled in off campus extension courses according to Assistant Registrar David Eckholm.

Last year's figures show an almost 50 percent decrease in the dropout rate, said Helen Godfrey, associate dean of Student Services.

Those students continuing on the graduate level surprisingly pushed the total of graduate enrollment, to 722, approximately 230 more compared to last year's figures at this time.

Last spring, budget planners estimated 7,200 students to be returning this fall. Later figures rose to a 7,000 estimation as school approached.

Final figures were turned into Central Administration in Madison this week, to evaluate the number of course credits instructors are teaching.

Central Administration constitutes budgeting allotment per full time student or full time equivalency (FTE) said Elwin Sigmund, budget analyst. This means for every 15 credits taken whether it be one student or two part time students adding up to 15 credits Central Administration appropriates monies for one FTE student.

The number of off campus students are numbered at approximately 350. These students are usually part time students.

Prospects for refunding the university equitably for the increased enrollment are in question. The $600,000 received last year as fiscal relief for tenured faculty is being considered in the current budget. The recalculations will be determined by Central Administration on November 15, added Sigmund.

Committees discuss planning principle

by John R. Perdue

A revised draft of the University of Wisconsin-UW Academic Mission Statement (ACMS-I) was the topic of discussion in several UWSP committees last week.

The document, also entitled "UW System Planning Principles," was in at least one opinion, in tone quite anti-teaching faculty in nature. "It implies that the teaching faculty are inefficient in that future planning must be undertaken to eliminate low priority programs and unnecessary duplications," according to a September 18 memo from Douglas D. Radtke, faculty observer Planning Programming Budgeting Advisory Committee (PPBAC) to Elwin W. Sigmund, chairman, PPBAC.

Radtke further stated, "Low priority programs and unnecessary duplications imply, if not faculty inefficiency, at least that some faculty presently employed are not needed."

A revised draft of the University of Wisconsin-UW System Planning Principles was the topic of discussion in several UWSP committees last week. The document, also entitled "UW System Planning Principles," was in at least one opinion, in tone quite anti-teaching faculty in nature. "It implies that the teaching faculty are inefficient in that future planning must be undertaken to eliminate low priority programs and unnecessary duplications," according to a September 18 memo from Douglas D. Radtke, faculty observer Planning Programming Budgeting Advisory Committee (PPBAC) to Elwin W. Sigmund, chairman, PPBAC.

Radtke further stated, "Low priority programs and unnecessary duplications imply, if not faculty inefficiency, at least that some faculty presently employed are not needed."

The Academic Mission Statement was also reviewed by the Faculty Senate Academic Affairs Committee and the Graduate Council. Their recommendations were directed to the chancellor along with the Radtke memo.

In a September 19 memo to the assistant vice president for Academic Affairs, UW Madison, Chancellor Dreyfus said, "The draft revision of ACMS-I is an improvement over the original document... However, the revision still seems to lack adequate expression of the proper role in the merged system of the faculties and institutions of the University Cluster. This is clearly the consensus of the major groups which have been reviewing the document on campus."

The chancellor also sent forward the reports of the above mentioned committees along with the Radtke statement.

ACMS-I is a statement of general principles and procedures meant to be applied over the long range according to Sigmund. The document is most properly titled "UW System Planning Principles," said Sigmund.

Sigmund also discussed an issue raised at the Academic Affairs Committee meeting. He discussed possible loss of local autonomy in academic program planning. "The thing about academic programs is you have to go on planning them all the time," he said.

Long standing internal principles and procedures for this purpose at UWSP were easily integrated into ACMS-I according to Sigmund.

Sigmund also added that faculty and students should understand that Central Administration had to prepare a document that would make sense to the Regents and cover a wide variety of situations in the UW System. Because "in the last analysis," he said, "the Board of Regents must exercise final review like the Supreme Court."

Sigmund also added that the academic program planning problem must be undertaken to eliminate low priority programs and unnecessary duplications, according to a September 18 memo from Douglas D. Radtke, faculty observer Planning Programming Budgeting Advisory Committee (PPBAC) to Elwin W. Sigmund, chairman, PPBAC.

Radtke further stated, "Low priority programs and unnecessary duplications imply, if not faculty inefficiency, at least that some faculty presently employed are not needed."

by Mike Varney

It was only seven o'clock and already there were more than a dozen wine bottles in front of Quandt Fieldhouse emblazoned by J. Geils diehards.

This was the first indication I received that this was a Central Wisconsin concert unlike any other. I don't know many students on campus that would stand in line for two hours when the comforts of their homes were only a UWSP one. I was attending the Central Wisconsin concert is the ages of 3,850.

I'm not going to be the one to selfishly get inside first. You have to be cool for the simple reason that you get in here yet. One guy, with a standing room only, in the neighborhood of 3,850.

The doors were opened at 7:15. The worst aspect of the whole concert occurred moments thereafter.

A mass stampede of human protoplasm unleashed itself to selfishly get inside first. People were literally moving. It was bad and considering the ages of those involved I would have to say it was the most stupid thing I've seen here yet. One guy, with a broken leg, had his crutches snapped in half. He was in the front of the mass stampede, putting the pushers near the middle.

Next time everybody will have to be cool for the simple reason that you get in quicker.

Once inside it was frisbee city. Ballons were being bopped around, too.

Quandt was really filling up fast. By 8 p.m., there was standing room only, in the neighborhood of 3,850. The UAB Events Committee will have to thank all the freaks from Central Wisconsin for supporting this concert.

Tom (Wojo) Wojciechowski had a few preliminary remarks. Of course there would be no smoking. It was also advised that the audience hang their cans and bottles rather than throwing them about.

Of course when the Stan Peters Band from Canada hit the stage the numerous numbers could be smelled filling the air ways of Quandt. The illegal odor never did leave the J. Geils left.

The Stan Peters Band played for 50 minutes, were loud, had an excellent drum solo and played "Go, Johnny Go!" for their encore. It was a good set, too. However, they were nowhere near as dynamic as the J. Geils Band.

The 40 minute impasse seemed too long. By this time Quandt was becoming quite stuffy and hot with people. Another warning from Wojo, "What would the fire marshall say?"

And then the J. Geils Band in all their splendor. Wow, what a sight. Seth Justman on keyboards was just glittering. The lighting for the concert was fantastic, the crew, mixed red, blue, green, orange, purplish pink and yellow lights, spot and flood lights. Both types of lights could also produce the strobing effect.

Back to the band. What an all-encompassing full sound was produced. Peter Wolf, on vocals, surely was the ring-leader I had heard him to be. He is the one that really moves this group as well as the audience with his lyrical antics. On the song "Banter Got Lost" I could feel that his range on the musical scale was a bit dubious, his heavy voice filled the air.

Wolf showed his stamina with a long one breath lead-in to the next song, "Get It Out."

The sixth song really got everyone up and moving. Starting out at a slow deceptive pace, it turned out to be "Looking for a Love."

The next selection, a new one called "Shinin'," was a tippy little piece. It was a bit slower than the rest and went, I'm looking, looking, looking through the window...nothing, nothing ever going to be the be the same, and, "Go out and pick the flowers while only one fits the light."

I may add that all during the concert people were really getting it on.

Then it happened. Wojo introduced Whammer Jammer Kid, Magic Dick, got out his licks' stick and gave us an ovation. Magic Dick let everybody know that he could really get down with his harmonica.

The J. Geils Band left the stage but the paying customers knew the party wasn't over as they whistled, howled and clapped expressing their admiration. Matches were lit by about 50 till the reappearance.

They came back to play their top 40 song "Give It to Me." There were a lot of "Whoa!"s in this song.

Another stage departure and another thunderous ovation. This time they really came back. Seth Justman and Stephen Bladd on drums earned a great J. Geils. Peter Wolf could not be outdone either. He was last seen pacing the stage at an electrolytically singing, into a microphone.

Howdy, smoke filled air and early twentieth century staliffs, the warmth of the popular music. The evening's entertainment will include such diversified numbers as the piano rags of Scott Joplin, the songs of Irving Berlin, and the music of the Stebbins and George M. Cohan. Morath is an accomplished actor and monologist as well as a versatile musician, combining affection for the past with a genuine interest in the present. He offers a bright and exciting trip into an era surprisingly akin to our own. And the date is the date for the Max Morath concert. It will be held at 8 p.m. in Michelson Concert Hall. Arts and Lectures will honor all "Jacques Brei" films.

Season ticket holders unable to attend the concert October 2 may receive a ticket refund if requested before 5 p.m. Wednesday, the day of the Morath performance. There will be no ticket refunds accepted by mail.

Film Society presents...

"Perspectives on the 32 depression."

"Perspectives" is a documentary that provides background information on anxiety and features interviews with a number of people representing various points of view. It includes interviews with Wisconsin resisters and veterans. The film is being made available by the Wisconsin Anxiety Project.

Following the film a panel of respondents will take up the issue. Serving on the panel are Lt. Col. John Porter from the Department of Military Science, Robert Cassidy, professor of religious studies and Dan Albert, Director of baggage for the Stevens Point area.

The audience is invited and encouraged to participate in discussion as well. The program is open to all interested persons in the program."Perspectives" will be shown.

Max Morath replaces Jacques Brei

"Jacques Brei is Alive and Well and Living in Paris" will not be here October 3 because the company producing the performance has canceled.

In turn, the widely ac­claimed "Jacques Brei At the Turn of the Century" will replace Brei.

Morath is one of the most noted authorities and performers of early and early twentieth century popular music. The evening's entertainment will include such diversified numbers as the piano rags of Scott Joplin, the songs of Irving Berlin, and the music of the Stebbins and George M. Cohan. Morath is an accomplished actor and monologist as well as a versatile musician, combining affection for the past with a genuine interest in the present. He offers a bright and exciting trip into an era surprisingly akin to our own. And the date is the date for the Max Morath concert. It will be held at 8 p.m. in Michelson Concert Hall. Arts and Lectures will honor all "Jacques Brei" films.

Season ticket holders unable to attend the concert October 2 may receive a ticket refund if requested before 5 p.m. Wednesday, the day of the Morath performance. There will be no ticket refunds accepted by mail.

UCM to present anxiety forum
Wisconsin's 1974 duck hunting season will include point system regulations similar to last year, with minor changes in the opening hour and some point values, according to the Wisconsin Department of Natural Resources (DNR). This season will open at 12 noon on Wednesday, October 2 and extend through November 20. The daily bag limit is 100 points and is reached when the point value of the last duck taken plus the total value of birds already taken that day reaches or exceeds 100 points.

Canvasbacks and redheads are worth 100 points, the hen mallard, black duck, wood duck, and hooded merganser are 90 points, drake mallard and ring-necked duck are 35 points, and all other ducks are worth 15 points. (Last year black ducks, drake mallards and ringnecks were all 25 point species.)

In addition, there is a closed season on canvasbacks and redheads along the Mississippi River, in Dodge and Winnebago counties, and on Rush Lake, Lake Winnebago and Lake Poygan. These area closures are the same as last year and include the bulk of canvasback and redhead concentrations.

Shooting hours are from one-half hour before sunrise to sunset, except for opening day which starts at noon. (Last year the shooting opened a half-hour later in the morning.)

Following the regular duck season, there will be a special scoups season beginning November 21 and ending December 6. This season applies only to those areas north of Highway 64, Shawano Lake, Lake Winnebago, and the outleting waters of Lakes Superior and Michigan, including Green Bay.

According to Kent Klepinger, assistant administrative of Forestry, Wildlife and Recreation, by opening the duck season at noon on a Wednesday the federal government allowed hunters five additional days.

This midweek opening is expected to give additional protection to local breeding ducks.

Klepinger added that the breeding population of canvasbacks and redheads is basically unchanged from the long term average and that the area closures are giving the necessary protection to both species.

The U.S. Fish and Wildlife Service indicates that the 1974 hunting regulations are designed to send more birds north next year, and that this season hunters can expect about the same number of ducks and geese as last fall.

The goose hunting season will also open at noon Oct. 2 and extend through Dec. 10. The daily bag limit is five, including not more than one Canada goose and one white-fronted goose.

The Canada goose season within the Horizon zone will start October 10 and end October 27, with a season bag limit of one Canada goose. A quota of 16,000, "Canada geese, the same as last year, will be taken within the zone.

Wisconsin waterfowlers are reminded that basic regulations concerning waterfowl hunting can be found in the new 1974 hunting regulations pamphlet and that information on the point system, including dates and bag limits will be contained in a separate waterfowl regulation page which should be available at license outlets in late September.

The DNR reminds hunters that the key to the point system is waterfowl identification, and all duck hunters should check with the nearest DNR office for the next time and place the waterfowl identification slide series will be shown. The series contains new slides and the audience will receive duck identification materials plus the opportunity to ask questions about hunting regulations.

CNR looks for accreditation

Accreditation Council members will visit UWSP next year to evaluate the CNR program. "If they accredit a program...what they are doing is accreditation the whole university," said Trainer. What the panel will do is evaluate not just the forestry or other natural sciences programs but also all supporting programs such as math, biology and chemistry.

"With a little adjusting and some financial help, we could meet their level without much change in the program," said Trainer.

The reason for the delay in the Council's visit is that they require a program to be in a building for two years and that existing programs must have been in existence for two years. The CNR moved into its building only last year and their science and paper science major is new.

"Trainer still remains optimistic, though. "I believe we have the type of program they are looking for," he said.

OUTDOORS CONT.

by Katherine Kowalski

Proposals are being made by students in the College of Natural Resources (CNR) to reconstruct introductory courses and Summer Camp Program.

Hunting safety course offered

Free small game hunting privileges with a wildlife conservation area, hunting safety certificate, and a hunter safety certificate license will be available in numerous communities throughout the state.

Wisconsin’s hunter safety program has been saving lives since its beginning eight years ago. The trend toward safer hunting seasons was dramatically discontinued last year when the state had a nine-day gun deer hunt without a single hunter fatality.

Although aimed primarily for young people, the gun safety courses are open to all persons, said Mel Lange, recreation safety specialist for the North Central District.

Laugher explained that the hunter safety course introduces the student to approved methods of gun handling, basic safety rules, proper orientation, first aid, accident prevention, hunter responsibilities and other subjects.

"We have vague ideas of what to do, we are not certain," said Robb, "and we must be prepared." Work is at hand for reconstruction of courses and new ideas to some hunter field work from summer to the introduction course to create more time and summertime and more in depth with other valuable field work.

"For introduction courses, there is consistency in course materials among instructors. We still could move the list of the proposals."

"It was very humiliating to be stuffed into a waste paper basket. I’m not going to be sticking out of a waste paper basket, try to make sure it’s properly attended with a pair of Farah plaid."

I’m EMBARRASSED!

Boys will be boys and once in a while we have to sit down and have a little heart to heart talk about whether we have headed on the right track or not. A couple of the boys saw this cute chick in Parkinson’s, buying jeans and trying to close in on her. They didn’t realize she was her boyfriend in the dressing room and just happened to be a line backer on the football team. They felt it was very humiliating to be stuffed into a waste paper basket. I think you call that a slight error in judgment. But anyway, if your backside is going to stick out of a waste paper basket, try to make sure it’s properly attended with a pair of Farah plaid.

Parkinson’s... OF COURSE!

Register now at Parkinson’s Win Henry or one of His Friends

Some proposals, which were drawn up by students for reconstruction of courses and new ideas, could move the list of the proposals. A new low allows students graduating, with a hunter safety certificate license during the first year. Youngsters 16 to 17 years old in Wisconsin are not permitted to hunt alone, unless they have graduated from a hunter safety course.

"It is valuable to know decisions and what necessarily the safety rules that are involved in hunter safety," said Seaman.

The proposed plan will occur approximately 120 acres with another 130 acres allowed for plant and service areas. An additional 2000 acres would be allowed as a tailing disposal area.

"We can see a day," said Seaman.

"If we get into our careers we don’t want to be replaced, and we need to know how to make decisions," said Seaman.

Joel Gutenher

"With a little adjusting and we do this, it is still highly personal, a little bit different than the way other people view it."

Nickel mines planned for northern Minnesota

Officials of International Nickel Company (INCO) have recently disclosed plans to begin mining copper and nickel in northeastern Minnesota next year.

The tentative plans call for two open-pit mines on the north side of Ely, Minn., just outside the Boundary Waters Canoe Area. At the moment, though, only one mine is in the planning.

The proposed mine will occur approximately 150 acres with another 130 acres allowed for plant and service areas. An additional 2000 acres would be allowed as a tailing disposal area.

The open pit would be 6000 feet long, 3200 feet wide and 1000 feet deep. At the bottom it would be 4600 feet long and 900 feet wide.

The mining operations is expected to employ 100 people working 50 days a year, 20 shifts per week.

The land in question lies in the Superior National Forest, north of Lake Superior. One section of the Superior National Forest, the Boundary Waters Canoe Area, is part of the wilderness program of the federal government.

Representatives of environmental and church organizations have co-signed a letter detailing their concern over possible environmental and economic changes. The letter was sent to 11 Minnesota, U.S. Canada governmental agencies which are dealing with the mining operation.

Conservation groups have expressed their concern over the possible detrimental effects to the unique beauty of this area and also, the effects on the timber wolf population.

Northern Minnesota is the last stronghold of the timber wolf in the lower 48 states. In June, the Forest Service began work on a coordinated federal-state environmental impact statement, which is expected to take two years to complete. Until then, no mining can be undertaken on the federal lands in question.

by Joely Gunther

Speaking of his meetings with the Council of Accreditation, Daniel Trainer, Dean of the College of Natural Resources (CNR) said, “I’m more optimistic after I came back from New York than I was before I went.”

On September 21, Trainer and James Newman, usurmed by UWSP Natural Resources Department, held meetings in New York city discussing the possibility of the CNR and national accreditation. The CNR is seeking accreditation in hoping that it would help the university’s undergraduates in job opportunities. Trainer did say that the accreditation would help forestry majors but that they really are, predators who choose to kill unemotionally.

Trainer is the chair of the University's Student Advisory Council on Natural Resources, the UWSP’s student body organization. John Swanson, member of the Student Advisory Council on Natural Resources, was quoted as saying that the university was in need of a “clearer, more optimistic, more optimistic, more optimistic” view of the accreditation.

The growing need of a masters degree is a concern to the university. The university is looking towards next year’s visit.

**UWSP news**

The University Philosophy Club will hold its first meeting at 8 p.m. Thursday, Sept. 26 in the home of Pat and Peter Wenz, 1715 Lincoln Avenue.

The topic for the meeting is “A Dialogue Between Philosophy and Christianity” as Pastor William Nicholson of the Assembly of God Church will present to the group the point of view of what is commonly called the ‘Jesus Movement’. This will then be investigated through, and contrasted with, the philosophical perspective. Refreshments will be served. Everyone is welcome. You do not have to be either a Christian or a student of philosophy to attend.

- A film and panel discussion on the subject of amnesty will be held at 7:30 p.m., Monday, Sept. 30, in the Wisconsin Room of the University Center (UC). 

- INTER-VARSITY CHRISTIAN FELLOWSHIP all campus meeting, at 7:30 p.m., Sept. 26. The meeting will be in room 112 of the College of Natural Resources Building (CNR).

All graduates are urged to take advantage of the following interviews by contacting the Placement Center, 106 Old Main Building at their earliest convenience.

Literature concerning the companies listed below is available in our placement library and should be read in preparation for your interview.

October 14, Sentry Insurance of Stevens Point: All majors.

October 15, S. S. Kresse Co.: All majors in General Business, Management, Economics, Marketing, Political Science, Personnel and Liberal Arts.

October 16, Wisconsin State Government: All majors.

### New postal station in UC

The University Store, located in the University Center (UC) has been appointed to handle personal mail and parcels.

The store is designated a Post Office Station Number 2 Stevens Point.

Stamps, money orders, registered, and insured parcel service are available during normal store hours excluding Saturdays and Monday evenings.

The station is located in the display area of the supplies section.

### SSSSH!

To the casual observer, this would seem like a great place to take a snooze! Right? Wrong! There didn’t seem to be anyone around and I didn’t think it would matter. . . . I was just dozing off when a guy turned on the lights and asked me to kindly get my------- off of his desk. One would probably call that a slight error in judgment. Now when it comes to clothes, there’s no margin for error at Parkinson’s. The styles are right, the prices are right and everything is guaranteed. Whether it’s jeans, leisure suits or sport coats, you’ll be “Right On”. There’s new exciting things coming into Parkinson’s every day so stop in and take a peek!

### Physics - Astronomy Dept. now at UWSP

Influences by the public's growing interest in outer space since the advent of astronauts and moon missions, UWSP now has a Physics and Astronomy Department.

The astronomy part of the name is new in view of emphasis on that subject in what formerly was the Physics Department.

Francis Schmitz, chairman, said about one third of the departmental workload now is in astronomy.

Although nationwide interest in astronomy has been growing, it was pushed a little faster on the Stevens Point campus when approval was given for students to fulfill basic science study in the general degree requirements by enrolling in a laboratory related astronomy course.

Since the new addition to the science hall was opened about a year ago, the university now has an observatory to complement the astronomy program. The campus has had its own planetarium since the science hall opened about a decade ago.

Allan Blocher serves as planetarium director, which in addition to his teaching, involves planning and preparation of public programs on weekday afternoons during the regular school year.

There is also public demand for observational programs, Schmitz said, and he is hoping a director can be picked to handle those activities.

Coinciding with the growing interest in astronomy are new opportunities for the campus. Allan Blocher said Schmitz. “People with experience in this field really have good chances for jobs right now,” he added.

### Instructions in Catholic faith will be offered at Newman house located at 1125 Fremont St. at 7 p.m. on Tuesday, Oct. 1.

**First Baptist Church** (American) 1948 Church St., Sunday Services at 10-45 a.m. & 7 p.m.

Intramural teams continue battle

by Bob Schalloch

Football action was heavy in the intramural leagues last week.

In Sims Hall: S3 tipped 20-14 as Steve Snow, Bob Wenberg and Bob Olson scored touchdowns. Dan Preshback scored for S2. SN, behind a touchdown by Vanzo, slid by 15-8 to Bob. Newville had South's only score.

Pray Hall: 1W shutout 4W-0. In this game the scoring was done by West's Rick Greene (two touchdowns) and Dennis Werbley. 4E narrowly beat 1E 16-10. Scoring for the winners was Pat Keenan and Randy Oswald. Charles Woolley tallied 1 East's score.

Smith Hall: 3S was led by Roger Gerczynsky who scored twice as it beat 2S 12-6. In an overtime affair, 2N beat IN 15-14. Dan Tim and Ken Porter led the winners while Rex Miller and Dennis Kennedy scored for IN.

Burroughs Hall: Tim Schmidt scored two touchdowns for 4W as it trounced 1S 40-6. 2N got touchdowns from Babe Korpal, Brian Leigh and Fran Winter as it shutout 1W 22-0. In other games it was 4N-22 over 4S-14 and 3S-8 over 2S-6.

Knutzen Hall: In a game reminiscent of the Point-LaCrosse fiasco, IS whipped 4W-6. Bob Defay led the route with three TD's. Brian Christiansson scored for 1E to allow it to beat 2E 6-0.

Byczek scored for 2E.

Watson Hall: May scored six touchdowns for 2W as it blanked 1W 8-0. 2E, with touchdowns by Jeff Patt and Jim Schizater beat 4N 14-0. In other action 4E outscored 4W 36-12.

Baldwin Hall: Two touchdowns by Mike SWanson led 2E past 3S 30-6.

Independent: The English fog swarmed all over the Aerial Fiasco 26-0. Touchdowns by Mike Schroeder and Dennis Bubblitz led A, Warsaw past Magnus Rux 14-0.

The Reserves finally showed the coach what they can do as they swallowed the Digesters 15-0. Matt Smith and Bob Ramler scored for the reserves.

Open Division: The Vets remained on top as they crushed ROTC 14-0. Gerald Roebuck, Ted Clark and Farris Haynes scored for BSC as they took the Siafos 19-0.

In overtime STG beat SPE 17-16. Harry Babcock and Jake Halfer netted for STG while Mike Deeter and MIke Daley scored for SPE.

Pointers Fall to Knights' Lance

by Jim Habeck

On the first day of fall, the Pointers celebrated by doing just that.

They fell 13-10 to the Green Knights of St. Norberts, despite out playing the opposition in virtually every category.

The Pointers led in first downs, passing yardage, total offense and total frustration.

Five Green Knight interceptions, one of which sewed up the victory, repeatedly stunted Pointer drives.

Prior to the game, the UWSP drum major exhibited a preview of future events, strutting through the band only to fall and slide to the 25 yard line.

Krueger Giordana connected on passes of 12 and 18 yards before a holding penalty and interception gave St. Norberts possession.

Another Green Knight interception and a missed field goal added more frustration to a scoreless first quarter.

Opening play for the second quarter, defensive end Joe Veronica grabbed the loose football before giggling 20 yards for the initial score. The extra point was missed.

Their roll out, and stopped it well. We had Harry Finley in there today, and he played a pretty good game.

Finley received defensive player of the week honors, while Doug Krueger, with seven catches for 155 yards, earned offensive honors.

Russ Golla, who made the Pointers' lone interception, received defensive player of the week honors, while Doug Krueger, with seven catches for 155 yards, earned offensive honors.

Golfers Tie for Second

by Jim Habeck

Roman Hytry led a field of UWSP golfers Saturday, Sept. 22, who tied for second place with Madison at the Green Lake Country Club.

Hytry fired a 77 to place second among all competing golfers, while the Pointers finished with a 411 total. Lettermen Jay Goers, Keith Nelson, and Mark Lubeck each finished in the low 80's.

Lynn "Red" Blair is the new golf coach this year.
Super Sports Quiz

by Tim Sullivan, Randy Wievel, Mike Haberman and Joe Burke

1. What pro receiver holds the record for most touchdown passes caught in one game?
   a. Paul Warfield
   b. Larson E. Whispnade
   c. Bob Shaw
   d. Isaac Curtis
   e. Harold Jackson

2: In the Packers' first regular season game of 1972, Scott Hunter threw two touchdown passes. The catches were made by?
   a. Carroll Dale and Leland Glass
   b. MacArthur Lane and Chuck Lane and Bob Schultz
   c. Rich McGeeorge
   d. Perry Williams and Dave Kopy

3: In the Packers' seventh regular season game of 1972, Scott Hunter threw three touchdown passes. The catches were made by?
   a. Leland Glass, Barry Smith, and Perry Williams
   b. Carroll Dale, Paul Krause, and Wally Hilgenberg
   d. Andy Uram
   e. The "Hammer".

4: Who put an alligator in the Chicago Cardinals in 1939, 7.
   a. Carroll Dale, Paul Warfield
   b. Carroll Dale, Paul Warfield
   c. Rich McGeorge
   d. Andy Uram
   e. The "Hammer".

5: What player holds the record for most touchdowns in one season?
   a. Gale Sayers, Chicago Bears
   b. Doug Swift
   c. Rich McGeorge
   d. Sammy Baugh
   e. The "Hammer".

6: d-Sammy Baugh. 10.
   a . Bill Brown
   b. Carroll Dale, Paul Warfield
   c. Jack Ham
   d. Greg Landry to Ron Jessie
   e. Hamilton Burger

7: Which player found a ten dollar bill in the end zone during a pro game last year?
   a. Jim Taylor
   b. The "Chisel"
   c. "Freddie"
   d. The "Hammer"
   e. The "Chisel"

8: Name the two players who combined for the longest touchdown pass in the NFL last year?
   a. Ken Stabler to Cliff Branch
   b. Bobby Douglass to Jim Harrison
   c. Johnny Evers to Frank Chance
   d. Greg Landry to Ron Jessie
   e. Fran Tarkenton to John Gilliam

9: Who was the first coach of the NFL New York Titans?
   a. Weeb Ewbank
   b. Allen Ludden
   c. Sid Glenn
   d. Sammy Baugh
   e. Bob Waterfield

10: What is ex-ABC announcer Fred Williamson's nickname?
    a. The "Chisell"
    b. The "Scrub Driver"
    c. "Freddie"
    d. The "Hammer"
    e. The "Toe"

Answers
1. c- Bob Shaw, Chicago Cards, with five TD catches in a 1956 game versus Baltimore. 2. d - Rich McGeeorge (23 yards and two yard passes). 3. b- Carroll Dale caught a six yard pass for the Pack; Vikings scored on the other two as Paul Krause returned one interception 32 yards and Wally Hilgenberg brought another one in for six yards out. c- Manny Fernandez, Dolphins, and Shula was unimpressed.

Soccer team reaches goals

The UWSP soccer club extended its win-loss record to 2-3 here Sat., Sept. 21 by walking over the Indians of LaCrosse in a near shut-off 7-1. LaCrosse managed its score with three and a half minutes remaining in the match. Leading scorers for the Point were Jim Cocalis and Richard Lenkey, each with two. Francis Haynes had one on his own in the first half while Steven and Andy Cheung scored during the second frame.

The soccer team is now headed on the road for the next four weeks. Next home game will be against Mt. Senario at 11 a.m., Oct. 19.

Grid scores

All students having un- decided majors who are un- assigned will be advised members of the Faculty Advisory Council for Students (FACS) for the fall semester.

FACS is concerned with aiding students who have problems in areas of dropping a course, un- registering for a course or any other area where the student needs the assistance of a faculty member.

FACS consists of 30 faculty members who have volunteered their time and services to advise students. Each faculty member is available for one hour a week.

The director of FACS is William Johnson, assistant dean of the college of letters and science. Working with Johnson is Ed Bonne, director of Watson Wall and associate director of FACS, Mary Scott, a psychology major and John Bawdow, a freshman.

Each faculty advisor serves as a general advisor to each individual student, but the student can cross over to a different faculty member in a specific area for a specific problem.

FACS also works with the Writing Lab and the Reading Skills Lab. Should the faculty advisor find that the student's problem lies in his reading comprehension or his lack of ability in writing, the advisor will refer him to one of the labs for special help.

FACS has been in operation since the spring of 1974. During the semester FACS served approximately 750 students. Of the 750, 257 students were extensively advised.

FACS is located in room 105 Collins Classroom Center and is open from 9 a.m. until 3 p.m.

The faculty members involved in the FACS and the times available are:

Monday:
- M. Fang
- A. W. Clark
- C. La Follette
- J. Moore

Tuesday:
- M. Seiler
- H. Theory
- G. Hendel
- J. Billings
- G. Gibson

Wednesday:

Sigmund, assistant to the Chancellor for Planning Analysis.

This plan would also lower the tuition rate for freshmen and sophomores possibly as much as $79 per semester, said Bob Badzinski, Student Controller.

The tri-level plan would increase tuition for freshman state schools (University Cluster) more than at UW Madison and UW Milwaukee (Doctoral Cluster) because the students at Madison and Milwaukee are already paying the 25 percent instructional cost. This is because freshmen and sophomores in the University Cluster are taught in mass lectures and by teaching assistants who are not compared to the University Cluster which uses professors and associate professors on all grade levels, said Badzinski.

This causes a greater instructional cost differential at the Doctoral Cluster, however, in the University Cluster there is little cost differential so lower upperclassmen should already pay equal tuition said Badzinski.

"The tuition should be frozen across the board as it now stands," said Student Government President Lyle Updike. Freshmen and sophomores also received 70 percent of all financial aids; the tri-level plan would put an additional $3 for each $100 on upperclassmen, said Updike.

The tri-level plan would turn the University Cluster into a group of two years colleges because students not afford tuition and senior rates said Updike.
To the editor,

As I read the article by Monaca L. Kaufman which appeared in the Sept. 12 Pointer, I could not keep myself from writing this rebuttal on behalf of us so-called bloodthirsty, ruthless hunters.

I attended the one-day conference "Hunting: Sport or Sin?", and being a hunter, Yes to hunting.

Dear Ms. Kaufman,

In respect to your article in the Sept. 12 issue of the Pointer entitled "Is Hunting Necessary?", I proudly and honestly believe that schools of thought concerning hunting to be necessary and essential to the future welfare of many wildlife species is truly correct and the only approach to wildlife perpetuation. You seem to be concerned with the future of endangered wildlife species and blame sport-hunting for possible extinction of these, but according to the U.S. Department of Interior there are 109 wildlife species on the endangered list, and not one of these 109 can be legally killed by hunters.

I'd like you to consider the recent history of deer in the United States. In 1900 our country supported approximately 500,000 deer and today the population of deer in the U.S. is over 15 million. We should also take into account the population of elk in the western U.S. Since the turn of the century elk populations have increased five fold, and note also that populations of pronghorn, turkey and beaver have increased greatly since 1900.

Secondly, I'd like you to recognize the source of support for wildlife care and habitat improvement. Did you know that the bulk of money for habitat improvement and wildlife assistance comes from sportsmen and not taxes, federal aid, or anti-hunting protection groups. This comes to nearly $400 million annually, and roughly $2.8 billion in the last 50 years.

Finally, we should consider the millions of dollars that keep wildlife populations in check with available habitat; these being sport-hunting, predation, poaching, natural evolution and habitat destruction. Wildlife conservation experts are in agreement that habitat destruction has been the major factor in the decline of wildlife populations.

I, like you and millions of other citizens, am concerned with the future welfare of our wildlife species, but only through a cooperative effort and plan of action can we successfully procure a tomorrow for our wildlife.

Thank you.

Ford abuses power

To the editor,

I believe President Ford abused his power as Chief Executive by granting Richard Nixon amnesty from any punishment for Nixon's involvement in the Watergate coverup.

If there was equal justice under law in this country, Nixon would be tried in a court of law, as any other citizen and found guilty or innocent by the judiciary branch of our government.

In his resignation speech, Nixon claimed innocence on all accounts and accusations, (except for "bad judgment in a few decisions"). If Nixon is really innocent he would want to get his name cleared once and for all. But Ford granted amnesty to Nixon, who claimed he was innocent, and whom against no formal charges had been handed down. I believe this is just a coverup of the coverup. Why else would amnesty be given before guilt is proven?

I think Gerald Ford has a moral as well as official duty to see that people involved in the Watergate scandal are tried and either prosecuted or cleared completely. He has this moral duty to me, because about two months ago he swore he would uphold the Constitution of the United States, under which all men are supposedly equal under the law. He is morally wrong in granting Nixon full pardon at this time.

Both Nixon and Ford claimed they wanted to get to business for the country and leave Watergate behind or for others to ponder. In my opinion Watergate is the most important business at hand.

I'd rather see my tax money go towards a trial than towards retirement funds and protection for a man that I believe is guilty of crimes against the people of this country.

To the editor:

In lambasting hunting ("Is Hunting Necessary?" Sept. 12, 1974) for among other things, being unnecessary, Monaca Kaufman is losing contact with the realities of the situation.

Kaufman said "When scores of animals are on the verge of extinction and many more are being slaughtered by so-called sport hunting, we needn't look to the future and must protect our animal friends. After all, if we don't, who will?"

I will concede that the last sentence makes sense, especially when it is hunters and sportsmen who are trying to save many endangered species of wildlife. The fact is that no animal on the endangered list is being hunted. Moreover, in many cases, the animals would die a slow, agonizing death if it weren't for the pressure from hunting. For example, rabbits have an 90 percent mortality rate over the space of a year, with or without hunting. How can one logically see fit to criticize hunting in this instance?

Many sportsmen's groups made up mostly if not entirely of hunters, are about the only thing standing between some species and extinction.

When thousands of ponds and marshes were being turned into farmland in the Northern States and Canada, "Ducks Unlimited" was formed, seeing the need to stop this destruction of valuable nesting grounds, sorely needed if ducks are to survive.

"The Ruffed Grouse Society of North America" is an organization that sees the need of developing and protecting habitat suitable for grouse. "Trout Unlimited" also has similar goals, and has done much for the benefit of trout.

Now, there are game-hogs and poachers, to be sure, who should be locked up and the key thrown away, but to labor under the illusion that they represent the large number of hunters in general is a gross injustice.

Furthermore, the claim that hunters hunt solely to protect their masculinity is totally unfounded, and has its roots in ignorance. Are women hunters (heaven forbid) trying to protect their masculinity, too? Who can say, although I don't think that hunters are this licentious, lewd and otherwise perverted.

Let the non-hunters do as they please, but don't try to force your opinions upon us hunters by force of legislation.

S.W. Schultz

It's no surprise

To the editor:

Gerald Ford pardoned Richard Nixon.

Why is everyone so surprised?

Jerome A. Long

Affairs of the area

by Sharon Hole and Joan Shafer

Mr. Lucky's has recently been viewed as something less than a utopia for black and white relationships. Yet despite the friction which has occurred we would like to throw in some idealism by talking about "what could be" and in a lot of cases "what is" rather than discuss what is lacking between blacks and whites here in Stevens Point.

Because this is a situation involving people, and there are so many variables surrounding human nature, we decided to ask students what they thought to be positive aspects of black-white relationships.

One of the main themes which emerged was the feeling of ignorance not necessarily toward a different race but towards a different culture. The idea developed that things we do not understand are things which tend to threaten us.

One white student said that at first she didn't want to admit there was a difference. Later after becoming friends with a black student she learned to admit and appreciate the differences which emerged. This she felt gave her the chance to see another culture and to review her own.

Another white student admitted to having hardly any contacts with blacks and felt there was no difference between the cultures.

The feeling that some white students just don't understand black culture was brought up by one black resident assistant(R.A.) During the first day at school she noticed that parents of the white students on her wing wanted to talk, but at times felt uncomfortable approaching her. She further stated that by simply talking to each other as people you can learn to accept them for who they are.

Another feeling we discovered when talking to others was that when blacks and whites are in a group situation it's more threatening than talking to each other on a one-to-one basis.

Yet we would like to suggest that it is often the case that it is more difficult to approach any group rather than a single person.

Perhaps we merely like to pinpoint and use race as a reason for approaching a group rather than admitting that we are simply threatened by the presence of numbers.

We ourselves feel limited in this discussion - being white, and having to worry about the dimensions of space and language. But we agree with a feeling which was brought out. It is important to discover the uniqueness of another culture but that it is even more important to appreciate the uniqueness of another individual.

As one black student so beautifully said,"We must learn to open our eyes and hearts."
ATTENTION: ARTS & LECTURES PATRONS

"Jacques Brel Is Alive & Well & Living In Paris"

Originally scheduled for Thursday, October 3, has been CANCELLED due to contractual difficulties beyond our control.

MAX MORATH RAGTIME PIANIST WILL APPEAR INSTEAD ON WEDNESDAY, OCTOBER 2-8:00 P.M.

all tickets for "Jacques Brel" will be honored at this performance.

Don’t Miss This Exciting Performance of Real Live Turn of the Century ENTERTAINMENT

by MAX MORATH

(Music of Scott Joplin; Geo. M. Cohan; Irving Berlin; Jelly Roll Morton & many more)

IF YOU DON’T HAVE YOUR TICKETS GET THEM NOW!

By Calling 346-4666 - Wednesday - Oct. 2 - 8:00 P.M. - Michelsen Concert Hall

STUDENTS ONLY 50¢
Tomorrow is the beginning
And this is only the beginning.
A day filled with new people, new places and perhaps a new idea.
Tomorrow is only the beginning!
