

UWSP first lady caste for play lead

If there's a stereotype of a university chancellor's wife, Joyce Dreyfus probably doesn't fit it.

A few tea parties now and then are alright in her estimation, but a steady diet of hosting them as-was expected of her counterparts in bygone days isn't her forte.

After 28 years as full time mother and wife and for the past eight years as first lady of UWSP she has become a full time coed at the institution headed by her husband, Lee Sherman Dreyfus.

Between April 25 and May 2, she'll be one of the most active members of the student body in terms of extra curricular involvement

because she has been cast for the largest female role in the zany Broadway hit, *Arsenic and Old Lace*.

She portrays Abby, one of two spinster aunts who make a hobby of murdering homeless old men by offering them elderberry wine laced with a bit of arsenic, strichnine and cyanide.

The University Players, of which she is a new member, will be staging the show each night at 8 p.m. (except on April 28) in the Warren Gard Jenkins Theatre of the Fine Arts Center.

Dreyfus, a grandmother for nearly five years, said, "I am one of the most liberated women I know but only because I have a nifty husband who gives me the

where-with-all to do all these things."

On the other hand, she said she also likes being a "kept woman."

If there's anything revolutionary about her activities, some might argue she's getting at the heart of what a good chancellor's wife should be doing in these times when universities are reaching out for non-traditional students. She serves as an example in higher education which encourages women whose families are grown to get a new dimension in living by starting or returning to college.

"I'm seeing a lot more men and women my age," she said in recalling changes in the

makeup of the student body since she began taking a limited class schedule several years ago.

But she said she may be having a little harder time of it than some of the others because she said she feels a certain pressure to never cut classes, never be late with a paper, to never put anyone in a compromising position about a problem with the chancellor's wife.

All-in-all, she said most of the worries she had about enrolling on the campus her husband heads were for naught. The faculty and students "are just great-I've really been stimulated to achieve and best of all I get treated like everyone else," she said.

To students and professors alike, she's just plain Joyce and when someone not well acquainted with university administration asks her what her husband does, she tells them he's a member of the Communication Department faculty. That's true, of course, because he teaches one class each semester, but not the whole truth. "I don't think it's important for me to go into all the details," she said.

Why did she enroll at UWSP in the first place? Before she was married, she had started her college education at UW Madison and always wanted to finish her degree requirements and become an elementary teacher. "Lee suggested I get started so I could graduate before I'd be up for retirement," she said.

Her minor is in theatre arts which is a subject "I so thoroughly enjoy-and, you know, should be a great asset because good teachers have

to be part actress to get kids to respond and be creative."

Have her new activities interfered with her responsibilities as the chancellor's wife? Not really, she said because she still accompanies him often, represents him when he can't attend some events and pursues a variety of activities in the community including acting for the Shoe String Players, a children's theater group. What she said she's giving up is her personal time and the few evenings she might otherwise have to spend at home with her husband, whose schedule is unusually busy. "But I'm thoroughly enjoying this despite all of that," she added.

"I guess I'm a type of person who likes to mix," said Dreyfus who believes it important, as does her husband, for university people to be active in the life of the community as well as the campus.

If the two Dreyfuses have come to think alike, there's good reason. They've known each other for 42 years, having been reared only a few houses apart on 39th St. in Milwaukee.

As a child, she sometimes performed as a dancer on the radio station her future father-in-law managed for the Hearst Corporation. Her husband and his brothers were singers.

In high school, she won contests in serious declamation and Dreyfus, who was in a class ahead of her, took honors in debate. "I called him flannel mouth then and nothing has changed," she said with a wink and chuckle.

Badzinski blasts budget "wastes"

by Brian Mack

UWSP Student Controller Bob Badzinski last week blasted UW Madison for what he called "tremendous amounts of wastes" in their past budget expenses.

Badzinski made the statement while state legislators continue to study the UW System's 1975-76 budget.

The "wastes" add up to approximately \$6.7 million for the 1974-75 year, Badzinski said.

The figure was calculated through a concept known as the 'economy of scale', which Central Administration adopted in March of 1973, Badzinski said.

"The scale was developed to show that the larger the institution the lower the per student cost."

"But at some point that cost levels and then begins to rise if you produce too much," he said.

This year, with an enrollment of 24,855 "full time equivalent" (FTE) students, Madison was the largest state university in Wisconsin.

UW Milwaukee ranked second with 17,243 FTE students.

The indication is that the state of Wisconsin is paying about \$9.2 million more than is necessary at these two institutions for undergraduate education, he said.

The leveling point this year was UW Eau Claire, with 8,228 FTE students at \$1313 of net state support per student.

The net state support per student at Milwaukee was \$1460, a difference of \$147 per student.

At Madison the net support per student was \$1586, a difference of \$273 per student. (Figures used are from Central Administration releases.)

The results are extra costs of approximately \$2.5 million for Milwaukee and approximately \$6.7 million for Madison, Badzinski said.

What is the money going for?

There are about 2,100 teaching assistants at Madison with salaries of about \$3,000 per year, Badzinski said.

And "distinguished professors" add to the costs, also, he added.

But Elwin Sigmund of UWSP Planning and Analysis expressed other views.

Since Madison and Milwaukee are the only schools in the UW System offering doctoral programs, they must be dealt with separately, Sigmund said.

"It's a matter of lumping apples with apples and oranges with oranges," he said.

As for Madison, many graduate and undergraduate programs are closely directed toward each other, he said.

"It is difficult to assert that you can separate the graduate and undergraduate programs at Madison," Sigmund said.

Also, the degree of quality and quantity of services, which contribute to costs may differ from institution to institution, he said.

Sigmund did say that there is "fat" in the Madison budget.

But, "It is now being squeezed out and has been for the past two to three years."

On the same subject, Badzinski said that the possibility for change is "more realistic than at any other time."

The legislature is expected to vote on the UW System budget sometime this summer.

The Pointer is published under the authority granted to the UW Board of Regents by section 28.99, Wisconsin Statutes. Costs are paid by the students of UWSP and awarded under contracts made by the State Printing Section, State Department of Administration, as provided in State Operational Bulletin 9-24 of Aug. 28, 1974. The Pointer Offices are located in room 130, Gesell, UW Stevens Point, WI, 54419. Phone 346-2249.

1974-75 Editorial Guidelines

1. The Pointer will be published twice a week during the school year except for exam and vacation periods. Remaining publication dates are: April 10, 15, May 1 and 6.

2. All material submitted to the Pointer must have the name, address and phone number of the author in order that he may receive credit for publication and questions. All material must be typed, double-spaced with one inch margins and submitted to the Pointer Office by 10 a.m. on the Monday before the Thursday publication and 10 a.m. on the Thursday before the Tuesday publication. Ads follow separate deadlines. The editor reserves editorial rights over all material submitted to the Pointer.

3. All material submitted to the Opinion Section must be no longer than 250 words and be signed with the name of the writer.

4. The Pointer will publish the Campus Calendar as arranged with the Student Activities Council.

5. Any UWSP student may work on the Pointer. The editor reserves the right to make assignments in keeping with the needs of the paper.

6. Rates for display ads may be obtained by calling the Pointer Ad Manager at 346-2249. Special rates for public service organizations are available with the permission of the editor. The Pointer will not run classified advertising.

UWSP

operates air lab

by Brian Mack

The 'air' staff consists of Thurmaier and three students; Steve Stirdvant, Jim Murat and Reynold Lang.

In 1971, UWSP received approval from the Wisconsin Department of Natural Resources (DNR) to begin operation of an air analysis lab, Thurmaier said.

Since then, we have kept a continual record of particulate and sulfur dioxide levels in parts of Stevens Point, he said.

The lab monitors every six days for particulates and sulfur dioxide levels at the County-City Building and the city treatment plant, Thurmaier said.

We send our samples to Madison for evaluation and the results go to the National Air Quality Data Bank, he said.

Data is collected nationwide and then plotted on a map to determine shifts and variations in regional conditions, he said.

To date the local lab has monitored some 'irregularities' in the air over Stevens Point.

But, we haven't determined any emissions violations as of yet, Thurmaier said.

Possible violations reported to the lab by students or members of the community are welcome and complaints will be looked into if warranted, he said.

UWSP was one of the first "cooperatives" out of all the state universities in the air analysis system, said Thurmaier.

The lab is financed through the DNR as are other 'air' labs throughout the state.

AIRO assists at correctional facility

by Bob Knoff

About one and a half years ago Charles Wheelock, a member of American Indians Resisting Ostracism (AIRO) and graduate of UWSP, got a job at Lincoln Boys School.

According to Larry Waukau, assistant director of Upward Bound, Wheelock saw the need for a program to encourage the Indian students there, due to the high rate of students returning to the institution.

The AIRO organization, according to Waukau, has been involved with a program to help the Native American students at the school ever since.

"The Lincoln Boys School is a correctional institution for

minors who have committed misdemeanors," Waukau said. "It's located in Irma, WI, a small town just outside of Merrill."

According to Waukau the school is run on a regular high school basis but in a very strict setting. "There are about 260 coeducational students at the school, 36 of which are native Americans," Waukau said.

The program has been informal and unstructured since the beginning, said Waukau. All participants are on a volunteer basis.

"AIRO volunteers usually visit the school two or three times a semester," said Waukau. "Visits are made on

Saturdays when volunteers and students both have free time."

Transportation to the school is paid by AIRO and all additional expenses are paid by the volunteers, Waukau said.

The AIRO volunteers are usually at the school in the afternoon and become involved in a variety of activities with the students, Waukau said. Activities included are volleyball, basketball, arts and crafts and an occasional film from the campus film library.

"We also engage in discussion of Indian awareness and issues in the news concerning Native Americans," said Waukau. "Most important is the encouragement, stimulation and interaction the volunteers offer the students."

"The kids have someone they can relate to on the outside after they get out," Waukau said. "These kids came from a bad background and when they get out they usually go right back where they started from. We want to give them a chance to relate to someone positive instead of negative," Waukau said.

Besides visiting the Lincoln Boys School, AIRO volunteers arrange for interested students to spend a day on campus. "It's a real treat for these kids," Waukau said, "because most of them never saw a campus or know what

SEE THEM ALL — AT THE SUNDIAL

Students observe Russian life

Impressions of life behind the Iron Curtain weren't entirely what the students had expected before they left home. Unlike travelers there in earlier years, regimentation of their activities and checks by Soviet police was minimal.

Countrymen appeared well dressed, cities are exceptionally clean and cultural centers were booming with big demands for opera and theatrical productions by Russians of all walks of life. Alcoholism, the students observed, is a problem of greater proportions than in the United States.

Russians appear to be eating relatively well, at least tourists do. The traveling students had evening meals that involved numerous courses, usually including ham, smoked fish, cabbage, a vegetable, canned fruit, bread, soup and the main dish of meat or fish always with potatoes and usually with cabbage. For dessert came a pastry and ice cream that could, according to some students, top any U.S. brand.

There were opportunities for the Americans to both talk seriously and occasionally engage in games with young Russians, who to the surprise

of their visitors, tended to avoid long discourses on the attributes of Communism.

There appears to be little freedom of choice for persons once they get into a particular field of study. Education at all levels, the students estimated, is exceptionally good, but many people are unable to get it at higher levels. Public transportation is well administered, too, they said.

But the Russians tend to desire a higher level of consumer products, the students found.

Although religion is left out of Communist dogma, the Orthodox Church still exists with older people making up the bulk of those still faithful. Ironically, though, there is a new interest among young men in entering the clergy and the students here believe part of the incentive is because Soviet clergymen have a relatively high standard of living.

On their tour, the Stevens Point group visited Leningrad, Kharkov, Moscow, Riga and Latvia. They had a brief stopover in Stockholm, Sweden.

There were visits to operas, museums, a kindergarten where 6-year-olds speak English, a state-owned farm where the dairy herd was made up of what appeared to be Holstein cows, the Kremlin and other points of interest.

Where did they encounter the most armed guards and security precautions? At the place where the glass casket of Communist pioneer Nikolai Lenin is on display.

The students were led in the tour by Professor John Zawadsky of the Philosophy Department at UWSP, and his wife, Patience, a free-lance writer. Zawadsky, whose Ph.D. at Harvard was, in part, based on the study of early Communist thinkers, has led previous overseas contingents from UWSP and had experience as a staff member of the Institute for Soviet Studies at Harvard. In Moscow, he received an honor from a group of Russians during a public program.

UWSP student Scott Dykema poses beside the statue of Karl Marx, the father of Communism, whose likeness is displayed in rock just off Revolution Square in Moscow. Photo by Scott Dykema.

A poster showing a woman utilizing a milking machine is displayed at the entrance of a state-owned dairy farm near Kharkov in the Soviet Union.

Visiting students from UWSP are from left, Gary Tuma, Sally Smits, Len LaRoche and Daniel Kursevski. Photo by Scott Dykema.

Barry serves as UC director

by Carol M. Martin

Mike Barry, a freshman chemistry major, was appointed to the position of UC director after the resignation of Jon Nybakke.

Barry has been the UC director for two months now.

I have previously been involved in UC with various projects such as voter registration and tuition reduction, Barry said. I have been a senator since the beginning of the school year and am also a member of the Finance Committee, he said.

"United Council is the link between campus and Madison," Barry said.

The UC director has a number of responsibilities on campus and they are as follows:

The director sets up interim programs on each campus to be utilized jointly by UC and Student Government.

He handles all legislative visits to campus. This includes scheduling tours, speaking engagements, arranging for press conferences and meetings with students, Barry said.

The director works for better relations with the press by keeping the press informed as to what UC and local Student Government are doing.

He conducts research on various UC and related Student Government projects, Barry said.

He develops and maintains regular communication with leaders of all student organizations on campus and he analyzes student vote on individual campuses in conjunction with UC's statewide study after major elections.

Barry said the director acts as intercampus communication specialist and he will do the followup to any requests other campuses make for information.

The UC director shall be responsible to the general director, Barry said.

My main goal is to get legislators and local administrators to become aware of students as being a viable force in local and state matters, said Barry. We are trying to accomplish this by using lobbying methods in the state capitol.

UC is working on House of Representatives Bill 1787

which would permit any nonimmigrant foreign student to be employed with the approval of the school attended by the student. We are also lobbying for the UW System to gain enrollment funding of \$10 million. This would mean approximately \$50,000 for UWSP.

We are presently investigating the possibility of getting GPR support for the president and vice president of Student Government. This would be funding the president and vice president or a possible tuition remission.

At present my involvement

with Student Government for the 1975-76 school year is somewhat vague, Barry said. I have been accepted at Stanford and I don't know if I'll transfer or stay at UWSP. If I do stay I expect to be appointed to some administrative position next year, Barry concluded.

Lerand to head psych dept.

L. Wayne Lerand has been appointed chairman of the Psychology Department at UWSP where he has been a teacher and counselor since 1966.

He will succeed Lloyd Beck, who declined reappointment after heading the department for three, three-year terms.

Lerand will begin his post in September at the beginning of the fall semester, according to S. Joseph Woodka who made the appointment

upon the recommendation of the psychology faculty members.

Lerand will leave, at that time, his part time responsibilities as a staff psychologist in the university Counseling Center to devote full time to administrative duties and teaching with the rank of associate professor.

He has done clinical consulting work for public agencies and recently was accepted as a member of the National Register for Health Psychology.

Portage Co. appoints public defender

by Kim Erway

What happens to the unfortunate individual who finds himself in jail without a lawyer or the money to hire one?

Throughout most of the country, the court will appoint a lawyer for the in-

digent (person financially unable to hire a private attorney) at the preliminary hearing. This attorney will undoubtedly have other clients of his own to defend and may be able to devote only minimal effort to the defense of the non-paying client.

The indigent may even be encouraged by his "defense" to plead guilty on the hope that the judge will go easy on him.

Here in Portage County, a Public Defender Program (PDP), headed by James W. H. McCord, is being set up to attempt to equalize criminal justice.

McCord, a native of Milwaukee, was appointed public defender by the county board several weeks ago. His duties include organizing the PDP in addition to defending indigents in court.

The PDP is a pilot program which may become statewide in the future, said McCord.

The program is now in the final stages of development and McCord will begin taking cases by the end of next week, he said. Within six months, he said he expects to have a full case load.

The PDP is financed by federal, state and county funds and will handle three major types of cases—criminal cases (felonies and misdemeanors), juvenile cases and commitment proceedings.

Civil cases, such as minor disorderly conduct, do not come under the jurisdiction of the PDP, McCord said.

Any individual, including the student, who is financially unable to hire a lawyer is eligible for PDP. The personal circumstances of each individual are taken into consideration in the determination of his eligibility, said McCord.

The PDP is set up so that McCord will make contact with the jail each morning regarding the individuals arrested the night before.

Eligible persons will receive full legal representation beginning with their initial appearance in court at the preliminary hearing later the same day.

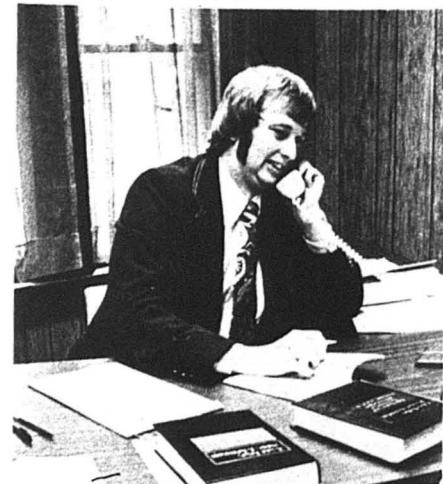

About 75 percent of the indigent cases will be handled by the office of the public defender, McCord said. The remaining 25 percent will be handed on a rotation basis to qualified Portage County

attorneys.

One of the major goals of the PDP is to prevent injustices in sentencing, McCord said. The PDP looks for alternatives to imprisonment which may be more

beneficial to both the individual and the community, he said.

Some of these alternatives include probation, employment and educational programs.

James McCord, Portage County's new public defender, takes a call in his office. Photo by John Hartman.

Budget contingent on governor

by Harriet Pfersch

"I can't see any big problems financially unless our enrollment goes up to 8,300-8,500 then we may be understaffed," said Len Sippel, Administrative Budget and Management analist.

"Our estimated budget is contingent on the governor's acceptance, he added.

The next biennium budget calls for an 11.8 million funding which is strictly from tax revenue fees according to Sippel. This doesn't include faculty salary and fringe benefits.

There is estimated a \$100,000 will be received as outright federal grants, contracts, gifts and trusts, Sippel added.

"UWSP is no longer below average in funding. Central Administration (CA) gave us about \$500,000 extra from fiscal emergency. \$300,000 was put into the base," said Sippel.

Salary and fringe benefits such as health insurance and retirement benefits should be slightly higher than last year, according to Sippel.

Basically, there are two budgets, an operating budget which includes funding for salaries, supplies and equipment and a capital budget which includes funding for new building construction and old building repair and remodeling.

According to the UW Budget Primer, the capital budget has until recently been funded primarily by long term bonds. It is developed and proceeds to the legislature on a tract separate from the operating budget.

Perhaps most important to faculty, staff and students, is the fact that capital budget

funds are by statute not transferable to an operating budget. This is why money for a possible new building cannot be used instead to improve faculty salaries, reduce student fees or retain faculty about to be let go.

In the same booklet, upon approval from the governor and the legislature the budget request becomes the basis or authorization for the annual budget proposals. This in turn is presented to the regents by the campus and CA in advance of the start of each biennium. When the regents approve an annual budget proposal it becomes the end product or the annual operating budget.

According to the primer, the annual operating budget governs the expenditure of funds by the system and by the individual campus.

According to Planning, Programming Budget Analysis Committee minutes some definitions should be clarified to understand the headings in the budget.

Student Services includes student affairs, admissions, guidance and counseling, registrar, housing administration, financial aids administration, placement, dean of students and PRIDE program.

General operations and services include those administrative costs outside the schools and colleges such as the chancellor's office, business administrations departments, data process and other special services departments in these areas (affirmative action program, news service).

Instruction includes any costs of teaching students enrolled for credit toward a degree.

Auxiliary Enterprises include those self supporting

operations, such as residence halls, student unions, student centers, stores, athletics, cafeterias, parking lots and support for intercollegiate athletics.

In the 1974-75 budget UWSP allocated \$122.90 per student for student services ranking them eighth in the state for expenditures. Ranking first in student services expenditures is UW Green Bay and least UW Eau Claire. UW Green Bay spent \$252.65 per student.

For instructional costs,

UWSP was ranked ninth out of a possible 11. UWSP was allocated \$1,258.36 per student for instruction. UW Superior allocated \$1,148.61 for instruction ranking them 11.

UWSP spends \$14.89 out of its budget per student for auxiliary enterprises, which ranks fifth in the state. Superior spends \$30.06 ranking them first with UW Green Bay only spending \$9.41. UWSP also ranks eighth in general operating and services. UW Green Bay

at the top spends \$313.53; UWSP, \$167.25 and on the bottom, UW Eau Claire at \$134.18.

UWSP was to have received from out-right federal grants and contracts including gifts and trusts, \$2,050,158.00, in comparison with Madison whose total came to \$78,322,693.00. System wide \$109,238,042.00 was allocated in the form of gifts and grants.

"The percentage of funding is to stay approximately the same," Sippel said.

Youth educator to speak here

Author and educator Kenneth Koch, who has developed a national reputation for his ability to spark creativity among secondary and elementary level students will speak at UWSP.

Koch will be at UWSP on April 24 and 25 to conduct a series of programs that are geared for teachers, students and their parents.

He is best known nationally for two textbooks for use in teaching children to write and appreciate poetry, *Wishes, Lies and Dreams* and *Rose, Where Did You Get That Red?* He has penned numerous books of poetry.

At 8 p.m., Thursday, April 24, he will deliver a public reading of his works in the Wisconsin Room of the University Center (UC). In his honor, a reception will follow.

Beginning at 4:30 p.m. in the Program-Banquet Room,

UC, he will lead a workshop for students and teachers, using a film to show how he has worked in classrooms teaching creative writing to youngsters.

On Friday, April 25, he will hold another workshop for a select number of fifth graders at Washington School in Stevens Point. Observers are welcome to attend.

At 12:30 p.m. the same day, another workshop will be held in the Wisconsin Room, UC, with a select number of seventh and eighth graders from local schools. Observers are invited.

His final session will be an extension of the 12:30 p.m. event, beginning about an hour later in the Wisconsin Room, UC. Koch will discuss with the observers what had

taken place in the sessions with the observers what had junior high students.

All of the events are open to the public without charge.

He is being brought to campus primarily as a resource person for special courses in communication, English and education and as a public service for area teachers.

James Moe, a communication specialist, described Koch as having "an incredible talent for teaching children and bringing out the best. He has made an exceptional contribution to the whole subject of teaching language arts in our schools."

Koch is a professor of English at Columbia University. Besides his involvement in poetry and development of textbooks, he is also a playwright of approximately 12 shows.

"It's still the same old story, a fight for love and glory."

Economic historians to hold 15th annual meeting

Experiments in bygone days that may still be useful in reversing current economic problems will be among the topics Saturday, April 26, at UWSP for the 15th annual meeting of the Economic Historians of Wisconsin.

Sessions will run from 10 a.m. to 3:30 p.m. in the Helen Parkhurst Lecture Hall of the College of Professional Studies.

All of the lectures will be open to the public without charge. Tickets for the noon luncheon may be secured by contacting planners, Rene C. Alltmont and Charles H. Rumsey, history professors, and Lawrence A. Weiser, an economics professor, all of the UWSP faculty.

The opening paper will be read by a visiting professor in the United States, Margaret Walsh, who teaches social history at the University of Birmingham in England. She will discuss "Business Success in the Milwaukee Metal Trades in the Middle Nineteenth Century, 1840-1880."

Others on the program in the morning will be Michael Sullivan of the economics and business faculty at UWSP, on "Automation and Employment, The Case of the Telephone Industry." Also, Jeff Mills of the economics faculty at the University of Illinois-Urbana, will speak on "The Economics of Price Control: The OPA Experience, 1941-1946.

The noon luncheon speaker in the Formal Dining Room of

the University Center will be Douglas Lamont, senior academic planner for the UW System Central Administration on "Multinational Enterprise: Prospective and Prospect."

Sessions in the afternoon will be led by Larry Neal, Economics Department at the University of Illinois-Urbana, on "A Reinterpretation of Schacht's Neuplan in the Light of Central Bank Cooperation, 1934-1938;" Arlo Anderson, History Department at UW Oshkosh, on "Scandinavia and the Common Market" and Yaqub N. Karkar, Business and Economics Department, UW Marathon Center in Wausau, on "A Comparative Study in Trade Relationships between the Nineteenth and Twentieth Centuries."

UWSP NEWSERIES

UWSP will offer a variety of mini-courses to be taught between second semester and summer school, May 19 and June 6.

Information concerning registration and fees may be obtained from the Extended Services Office, room 117, Old Main.

Courses offered will be: Education 370-570, Natural Resources 393, Philosophy 205, Philosophy 250, Home Economics Education 290 and Philosophy 221. Courses with insufficient enrollment may be dropped.

Courses offered will be: Education 370-570, Natural Resources 393, Philosophy 205, 250 and 221, and Home Economics Education 290. Courses with insufficient enrollment may be dropped.

LRC Materials Return: All LRC material charged to students and faculty must be returned by Tuesday, May 6, 1975. We would like to close our books by Wednesday, May 14, 1975. After Wednesday, May 14, all unsettled accounts will be turned over to the Cashier's Office for collection.

Students enrolled in Intramural phy. ed. Sec. 71 and Sec. 72 should meet at 6:30 p.m., Monday, April 28, in room 119 of the Physical Education building to discuss the final grade for intramural credit.

Contact Coach Rich Blanche to make other arrangements if unable to attend.

The Student Health Center will be open during regular hours, 7:45 a.m. to 4:30 p.m., Monday through Friday, during the summer session.

All students enrolled in the summer session are eligible for care at the Student Health Center.

UWSP students residing in Stevens Point during the summer but who are not enrolled in the summer session may obtain medical care at the Student Health Center by paying the Health Center fee at the university cashier's office during the first week of the summer session.

Anyone that has borrowed publications from the UWSP Environmental Council, please return them so we can start with a complete library next year. Let's share the information so more people know what's happening to our environment and can do something. For more information contact UWSP Environmental Council room 109 CCC.

The Child Learning and Care Center will hold fall semester registration for children, ages 2-5, of continuing students at 8 a.m. to 5 p.m., April 28, in the Coffeeshop of the Peace Campus Center.

New and transfer students may register their children from 9 a.m. until 2 p.m., August 28, at the table near the regular university registration.

The UWSP faculty and staff parents of preschool children may register between 9 a.m. and 2 p.m., August 29, at the Child Learning and Care Center.

For more information and costs please call 346-4370.

CLANCY CRICKET: STUDENT The Village

(OR BY APPOINTMENT)

The History Department is accepting applications for graduate assistantships for the 1975-76 academic year. Application forms are available in the history office (422 COPS). The completed applications should be returned to Robert Knowlton (412 COPS). The deadline for submission is Monday, May 5, 1975.

An experimental pilot project will be undertaken on campus this spring using an adaption of the LaMaze Childbirth method to teach women how to reduce the discomfort of menstrual cramping. Enrollment will be limited to 20, on a first come first serve basis.

The first two class sessions will be limited to those who require prescription drugs for pain relief.

An information and pre-registration session will be held at 6:30 p.m. Thursday, April 24, in the basement lounge at Thomson Hall.

Classes will start at 7:30 p.m., Monday, April 28 and May 5, room 129A-B University Center.

If you are interested and unable to attend the Thursday session you may register by calling the Health Center, ext. 346-4646.

Instructors for the LaMaze course will be Becky Erlenbach and Rhonda Ford.

April 24, the SAF Conclave on the east side of the College of Natural Resources Building starts at noon today and continues until all events are completed. Free beer for all conclave contestants. Everybody is invited to watch this lumberjack contest.

Why do people smoke?

by Sally Dustir

You simply have to set your priorities and then go out and do something about them, said Bill Hettler of the UWSP Health Center.

Smoking is something we can all do something about before it kills us, said Hettler.

As we get older the chances of heart and lung trouble greatly increase, said Hettler. Ninety percent of all lung cancer originates in smokers, he said. The average smoker, who smokes from one to three packs a day, dies eight to ten years sooner than a nonsmoker.

The average person will also not feel anything from smoking for ten to fifteen years after he starts smoking, said Hettler.

It isn't as though the smoker is hurting only himself when he smokes, because every other individual in the room is getting

the same effects, said Hettler.

The average smoker gets about eight puffs on a cigarette while it burns in open air all the rest of the time, he said. This smoke is the same smoke the smoking individual is breathing and being consumed by.

The tobacco industry spends \$1.5 to 2 million per day to influence people to smoke, said Hettler.

"But, why do people smoke?" he asked.

It seems as though people think it is glamorous to have a cigarette, he said. Many people also think it is a friendly gesture to give someone a cigarette, in addition to the adage that a cigarette may be soothing or relaxing, said Hettler.

Nicotine actually serves as a stimulant and is associated with heart attacks and addiction in addition to lung cancer, he said.

Continued use of cigarettes causes vessels within the body to contract, wrinkles in the face and poorly functioning lungs, Hettler said.

Hettler said he felt there is definitely a smoking problem on this campus and around the world. Younger people are smoking more and more because they would like to assume the adult image, he said.

Smokers see themselves as sophisticated and "in" with a pile of butts in front of them, he said.

What outlet is there for the nonsmoker?

The individual has the right to kill themselves, however they don't have the right to affect anyone else's health, said Hettler.

We can all say "Don't smoke around me," said Hettler, and we're going to see more of it.

The only problem is that we've become a nation afraid of hassles, said Hettler. We're

afraid to hurt someone's feelings by saying we don't want them to smoke around us, he said.

The Portage County unit of the American Cancer Society has initiated their crusade which will run from April 7-30. An information booth was held from 12-4 p.m., April 7-11 in the main corridor of the University Center. The booth contained information about preventing cancer, a short audio-visual presentation and donations were also accepted. In addition, volunteers will be going door to door this month to collect donations to the American Cancer Society.

The money that is collected during the crusade will be used in research, education, aid to cancer patients and their families, medical supplies and administration in the American Cancer Society.

People won't quit smoking, but those of us who don't want to be affected by smokers don't have to have them around, said Hettler. We just have to speak up, he added.

Receives top honor

A UWSP student won top honors at the recent four-state meeting of Beta Beta Beta, a society for biologists, held in Cedar Falls, Iowa.

Mark Krejci received the Frank A. Brooks Award and a \$25 prize for a paper he read, based on his own research.

Brooks is the founder of Beta Beta Beta.

A senior at UWSP, Krejci is a water science major. He was one of several students who attended the meeting including two others who presented papers: James Czarnecki and William Trumpf.

Options sought on faculty layoffs

by John Keller

The professors, whose contracts will expire May 1975, will not have them extended, according to Elwin Sigmund, assistant to the chancellor of Planning and Analysis. Even though the enrollment is basically the same, there are fewer full time students on campus, Sigmund said.

Since the total student credit hours help pay the fees, there are less funds to be spent, he added.

The procedure on how a professor is laid off was explained by Sigmund. Each respective department chairman sends a list to the chancellor. The list contains the department members in order of seniority. Very seldom is the list arranged on merit, he said.

Chancellor Dreyfus then chooses from the list the professors to be laid off because of the decreasing

enrollment in the specific department, Sigmund said.

The professors laid off in 1973, which would come in effect May 1974, had their contracts extended to May 1975, Sigmund said. Their contracts have not been renewed for the 1975-76 year, he added.

There are two options for a tenured UWSP professor to take when his contract has expired, Sigmund said.

The professor may either take a relocation leave or a retraining program. The first option involves the university paying the professor for one year, wherever he may be, whether he does work or not. The second deals with the professor becoming specialized in another course within the same field. The university also pays the professor for one year under this retraining program.

Sigmund said he felt that the university should be able to get by with no layoffs of

tenured faculty members.

The History and Geography Departments will be hurt the most by faculty layoffs, Sigmund said. Two tenured political science professors are taking a relocation leave after this semester, he added.

The enrollment in elementary education is slacking off because of the surplus of elementary teachers, said Sigmund. He acknowledged that the College of Natural Resources is still growing, possibly because of the graduate program being offered.

Sigmund said that the physical education requirement may possibly become non-mandatory. He said if no credits are needed, as many as 10 tenured faculty members would be laid off in the next year or two.

Sigmund also said that athletic coaches are being shuffled around so fewer people will fill more positions.

Petitions are in and various senate candidates have voiced their opinions concerning Student Government. Students can vote for senator of their choice. Monday, April 28, Registration Day.

Tom Plasky

Ann Marie Nepper

Rick Zaborske, Richard Brouillard and Jeff Thompson are the senate candidates for 1st District.

"A lot of students feel that there isn't anything you can do, but I feel that Student Government is a way to solve the problems and gripes people have," Zaborske said.

I'm interested in government. I could do a better job because I have the interest and the time to spend on Student Government," said Brouillard.

Even though I have been on the assembly for two years I would like to see the right of the assembly equalized by getting on the senate. Thompson said.

2nd District

"I started reading an article in the Pointer concerning the lack of student involvement, I decided to run for senator. I am a political science major and I have always been interested in government."

3rd District

The main reason why I ran was to find out how the system works, and how the little people can change things and if they can, said Bly Eddy candidate for District 3.

4th District

"I am running for senator because I feel that the issues concern me. I feel I can help out," said Rick Tank, candidate for District 4.

I feel the students need to be better informed. Nobody knows what's going on in Student Government," said Jim Kotcon another candidate for District 4.

5th District

Mark Waltman, representing District 5 said,

"After reading an article in the Pointer concerning the lack of student involvement, I decided to run for senator. I am a political science major and I have always been interested in government."

"I'm running because I am an interested individual who cares about the people around me. I feel majoring in political science gives me a view into the shaping of people's environment," said Mike Kapalin another candidate for District 5.

"I feel that I would be able to contribute a greater degree of effectiveness to the Student Senate and that I would be an able representative of my constituents," said Steven Sheldon, also candidate for the 5th District.

6th District

"There are many things that can be accomplished in Student Government and I would like to be a part of it," said Sue Kaestner, candidate for District 6.

"I am going to look at Student Government critically. Too many people are thinking the same way in that body," Guenther said.

"Running for Student

7th District

The candidates for District 7 are Liz Smith, Wayne Wanta and Christopher Badgley.

"I am running to get informed on issues concerning students and to have a voice in issues that may affect my education as well as everyone else," said Smith.

"I am running for senator because I have been student senator for the past year and I feel that if I could continue in this capacity I could accomplish a great deal," said Wanta.

"I feel that I can help out in Student Government," said Badgley. "I want to continue in 'policy-making' which I have been a part of as president of my resident hall."

8th District

Candidates for the 8th District are Joe Weigand, Bruce Blokowiak, Kathy Secor and Kurt Andersen.

I want to know more about Student Government and being a political science I will receive experience in my field, said Weigand.

"I think that Student Government will make my life more interesting. I feel I

Government appears to be a good way in which I could actively become involved. For too long I've been apathetic. I feel I can benefit my constituents," Blokowiak said.

"I am politically motivated and it's a challenge to run said Andersen, incombent senator.

"I currently serve on the Student Affairs Committee and the Faculty Senate-Student Affairs Committee and want to become more politically aware through Student Government," said Secor.

9th District

Candidates for the 9th District include Peter Doro, Tom Plasky, Jim Eagon and Kris Arndt.

"My main reason in running for Student Senate is to get involved in Student Government affairs," said Doro.

"I think that Student Government will make my life more interesting. I feel I

Photos by Rick Cigel

will be able to devote a lot of my time to it," said Plasky.

"I am not out to be a 'politician' because I think that too much of that already exists in Student Government. My main concern is with the students and their economical and educational well being," Arndt said.

Jim Eagon was not available for comment.

10th District

Jack O. Peck and Bob Shaver are the candidates for the 10th District.

"I ran because of the apathy which was evident because of the total absence of nomination papers submitted from the district. My vote is worth less as an assembly person as it would if I were a senator, even though I would be representing less students numerically as a senator," said Shaver.

I ran because I really wanted to see if Student Government is as bad or as good as the Pointer says," said Peck.

Rambling wrecks

run over Michigan Tech

by Randy A. Pekala

The UWSP Pointer track team defeated Michigan Tech 134-20 here, Tuesday, April 22.

The trackmen earned firsts in all of the 18 scheduled events, scored 12 seconds, 13 thirds and had three double winners.

In the meet, Ted Harrison set a new conference record in the long jump with a distance of 24' 1/4". Harrison, who won the triple-jump with a mark of 47' 2 1/4", now qualifies for national honors with his record setting leap.

Don Buntman was first in the mile with a 4:19 clocking and added another first in the 3000 yd. steeplechase. Pete Fronsee also earned two firsts with his 10.7 and 23.3 timings in the 100 and 220 yard dashes respectively.

Ted Harrison

"I felt our guys did very well today, it was mostly individual effort which kept them going. This was Tech's first outside meet, they have a lot of building to do," said coach Don Amiot.

"The long jump and triple jump people did real well as did Al Gamroth in the 880 and Bob Nistler in the 440," he added.

For the Pointers, Bill Wright finished first in the shot put and second in the

North Central

Tennis team wins two of three meets

By Don Schroeder

The UWSP tennis team played three dual meets last weekend and emerged victorious in two of them.

In a double dual meet at Stout they defeated Whitewater 7-2, and shut out River Falls 9-0. Saturday they traveled to Eau Claire and came up on the short end 7-2.

With the two victories Head Coach Jerry Gothams' team upped their conference slate to 4-3.

Stevens Point won all six singles matches against both River Falls and Whitewater. Against Whitewater Gotham said "it was the best singles match play by all six men this season."

In doubles the three teams of Vinh Pham-Dave Fletcher, Mike Lewis-Rick Wanta and Bruce McNeil-Bob Joehnk all registered victories in two straight sets against River Falls. Only the team of Pham-Fletcher could record a doubles victory against Whitewater.

Saturday proved to be a different story. Eau Claire swept five of the six singles matches and two of the three doubles.

Only No. 1 single Vinh Pham and No. 2 doubles Wanta-McNeil could muster victories. The win gave Pham a 5-2 conference record.

The Pointers hope to get back on the winning track tomorrow when they host

Michigan Tech. The match is set to begin at 9:30 a.m.

Saturday April 26 UWSP will travel to Platteville to close out their conference dual competition. Also featured that day will be a dual meet with the University of Dubuque.

The junior varsity is also busy as they have home meets against UW Marshfield today at 4 p.m. and UW Marathon at 3 p.m. Monday, April 28.

Gotham's varsity squad is getting ready for the conference championship held at LaCrosse May 1,2,3. Oshkosh is the favorite with last year's winner's Eau Claire, UWSP and LaCrosse, expected to provide them the stiffest competition.

Aar—on Wolf?

by Tim Sullivan and Randy Weivel

Bob Wolf, The Milwaukee Journal's sportswriter, has been in a writing slump lately.

He repeatedly told his readers that the Milwaukee Bucks would make it to the NBA playoffs this year. Well, they still have a chance, providing they're willing to buy tickets like everyone else to go watch the Chicago Bulls and Kansas City - Omaha Kings fight it out.

Next we come to Wolf's April 13 Journal column, in which the Milwaukee writer described the Buck's "colorman" Ron Blomberg as being "steady, easy going" and generally excellent. What a joke! Blomberg is about as boring as a wilting dandelion.

Wolf finally "shot his wad" when he hit upon a remarkable series of parallels between the careers of Babe Ruth and Hank Aaron in the April 6 issue.

Wolf, calling himself an incurable trivia buff (we wonder how far he'd get around here), went to great pains researching facts and figures of the two slingers and came up with several startling comparisons. For example, Wolf let his readers know that he thinks both superstars' birthday is either February 5, 7 or 8. Isn't this dandy?

Moving along, Wolf discovered that both Ruth and Aaron suffered a drop in home run production before changing cities. Nothing personal towards Henry, George Herman or Wolf, but

could not this be a good reason why the sluggers were traded?

You see, we don't think Wolf covered all the bases in his Ruth-Aaron comparison fling. Uncertain birthdates and declining home run totals are fine, but the Milwaukee scribe managed to overlook some of the more earth-shattering trivial facts that the two sluggers had in common.

You wouldn't have to look far to realize that both players have biblical names. "Aaron" was Moses' brother, the guy with the snake stick who drove Pharaoh Yul Brynner crazy in *The Ten Commandments* flick. "Ruth" was some chick who told her own story somewhere early in the Bible.

In fact, there are several other accomplishments, dates and non-accomplishments that the two fence-busters had in common. We don't know how Wolf managed to miss these coincidences in his column, but he somehow did. Therefore, without further ado, here are some of the other little-known oddities that Ruth and Aaron have in common:

- 1) Believe it or not, neither slugger ever played for the Philadelphia Phillies.
- 2) Both players rarely hit into triple plays.
- 3) Neither star ever voted for Millard Fillmore as president.
- 4) Both players were featured on separate baseball cards.
- 5) Neither player hit a fair

ball completely out of the Astrodome.

6) Neither player was born in any month starting with the letter 'J'.

7) Both players knelt in the on-deck circle before coming to bat.

8) Both players' home run partners (Lou Gehrig and Eddie Mathews) were infielders.

9) Neither slugger ever played in a Super Bowl.

10) Both players had a peculiar habit of returning to the dugout from the field after the third out was made.

11) Neither player led the Japanese League in home runs.

12) Both players wore gloves while playing the outfield.

We understand how Wolf envisioned the Bucks making the playoffs, because they did look like a contender on paper.

We can also understand

how Wolf described Ronald Blomberg as being steady and easy going and at least he didn't make the mistake of calling the old professor exciting or colorful. However, we're not about to let Wolf's Aaron-Ruth comparison column pass without taking a shot at it.

In the immortal words of Pointer reader Terry Koss, a Shippy Shoe Store salesman,

"The Aaron-Ruth comparison idea has run its course. They could be twins for all I care. Henry still has to prove he's a home run slugger to this year's American League pitchers. The least Wolf could've done was come up with some meaningful comparisons."

We agree, Koss. How he could've missed all the ones we found is beyond us.

Women tracksters 2nd of six teams

Saturday April 19 the Pointer women finished second of six teams in the track team's home opener.

LaCrosse won 10 of 16 events to win with 212 points.

The Pointers finished second with 115 points, trailed by Oshkosh, RiverFalls, Platteville and Stout.

Stevens Point had three first places, winning the 440 yd. and 220 yd. races, and capping the 880 medley relay.

Deb Vercauteren won the 440 with a 1:01.1 time, while Sheila Shoulders' 26.3

clocking took top 220 yd. honors.

Mary Vandertie and Mary Hertzfeldt joined Vercauteren and Shoulders in the 1:55.9 relay win.

Kathy Grotbeck finished second in the shot put and third in the discus, breaking her own records in the process.

Grotbeck's discus throw totalled 112' 5", bettering her old school record of 107 feet. Her 36' 2" shot put toss also bettered her previous UWSP record.

Army ROTC lets you qualify for a double life!

You can earn a commission while you earn your degree.

And that doubles your professional opportunities. You can pursue either a civilian career or serve as an officer.

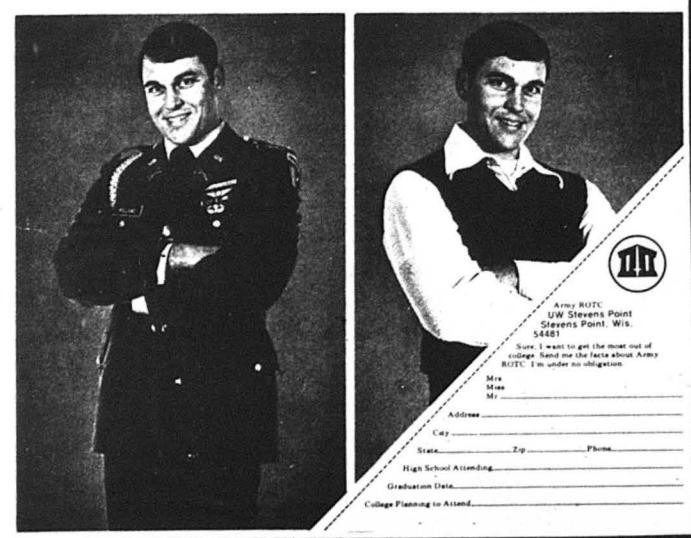

Either way, Army ROTC trains you for success. You learn valuable leadership and management skills which usually aren't offered by other courses.

You make no commitment when you

enroll in the Basic Course. You can ace it or flunk it. Or, you can drop it. That all depends upon you.

But you owe it to yourself to look into Army ROTC. It might be your thing. At least it's worth checking into. Mail this coupon so we can send you the facts.

Army ROTC. The more you look at it, the better it looks!

Women shoot down UWEC Blu Golds

by Randy A. Pekala

The women tracksters of UWSP defeated Eau Claire here Tuesday, April 22 by a 79-64 margin.

Deb Vercauteren and Karen Snyder were double winners as their team captured 11 firsts in 16 events against the Blu Golds. The Pointer women also added five 2nd place and eight 3rd place finishes to reinforce their win.

For the female thinclads it was their first dual-meet win but the 6th victory in seven outings considering action in other triangular and quadrangular contests.

Snyder earned her victories with firsts in the one and two-mile runs with times of 5:59.5 and 13:20.7 respectively. The other double winner, Vercauteren, swept the 220 and

440 yd. dashes with clockings of 26.7 and 59.7 seconds respectively.

Also earning firsts for the Pointers were Kathy Grotbeck in the shot put, Dee Simon in the javelin, Kris Gunderson in the long jump and Jackie Jackack in the 880 yd. run. The 440 and mile relay teams also finished first.

The women will host a quadrangular meet this Saturday, April 26, at Colman Field. One of the teams participating, UW Madison, is considered one of the best teams in the nation.

Head Coach Judy Tate said that spectators will have a chance to see three of the best 440 yd. dash women in the country compete. Point trackster Vercauteren is among the group of three tabbed by Tate.

Weaver lists system alternatives

Criteria, procedures and enabling legal language, should the legislature determine that it is necessary to reduce the present size of the UW System, were presented to the Board of Regents May 18 by President John C. Weaver. The board adopted it unanimously.

Weaver had been directed by the board to draw up the recommendations for phasing down the scope of the university system after the governor, in January, asked the regents that such a study be undertaken. He set a deadline of mid-April for completion of the report.

"I obviously am not neutral on the issue posed by this request, nor am I oblivious to the current fiscal dilemma of the state," Weaver said. "I happen to believe that the board's present course of action and the state's traditional commitment to public higher education should be sustained."

The report states that the major public policy decision before the state government is whether:

"It judges the UW System's fiscal and enrollment prospects for the next decade to be sufficiently uncertain as to warrant the immediate initiation of steps designed to reduce the present scope of and access points of the system in order to sustain quality with extremely limited resources."

"It judges the public interest to be better served by an affirmation of its traditional priority commitment to provide higher

educational opportunity and services of quality to those people wishing and able to benefit from them..."

Part Three of the report, on reducing the scope of the university system, responded directly to the request from the governor. However, the report cautions that overall enrollments, unless unpredictably depressed by high tuition or other factors, will continue to rise until 1983 and "decisions made now to anticipate enrollment declines after 1983 would not be warranted."

It is conceded that if the governor's assumptions about the level of fiscal support possible in the next decade are sustained by the legislature, "then reduction of the system would be warranted."

Should phase out of the institutions be imposed upon the university system, it is recommended attention first be directed to two-year centers with current or projected enrollment over a four-year period of 250 or fewer full-time equivalent students enrolled each semester and whose composite support index (an administrative statistic indicating funding efficiency) falls below a certain level.

Other factors would also be considered, including the location of the campus in relation to other educational facilities, the mix of its upper and lower division students and the uniqueness of programs offered.

Under one alternative, the regents would first seek alternate educational use of the facility, such as con-

verting it to an adult education center operated by UW extension, or as a joint operation with the district vocational-technical program program.

If these were not feasible options (or were not permitted under legislative mandate) the regents could then consider closing the institution.

Before any final decision to make alternate use of a two-year center, or close it down, the Board of Regents would be required to hold a public hearing in the community affected.

Three alternative sets of enabling legislative language were proposed. (The Board of Regents, at present, is statutorily prohibited from closing a campus.)

Under the first alternative, the legislature would direct the board to identify centers to "phase out or otherwise change in use" on a time schedule to be established by the regents. The second alternative would direct the board to identify such campuses and to proceed if the decision is to use the facility for other educational activity. Campus phase out would be requested of the legislature, for 1977 action.

The third alternative would simply direct the regents to "proceed during 1975-77 with the phase out of one or more centers selected...on the basis of their performance criteria."

Criteria are also provided if the legislature mandates four-year campuses be cut back in programs, reduced in levels of students served or

eliminated. The criteria are more complex than for selecting potential centers to be cut, but roughly equivalent legislative language is proposed.

The report also reveals that under university system planning policy, now in effect, a feasibility study is proposed for the consolidation of UW Superior with the University of Minnesota Duluth. "Should current studies indicate the feasibility of (this) consolidation, enabling legislation for final planning should be brought to the 1977 session of the Wisconsin Legislature with a goal of formal consolidation in 1979."

The report states that current planning by university system administrators already agrees with the apparent assumptions by the governor in several areas:

The regents have been and are prepared to provide alternative educational use, or to phase out, and UW Centers not meeting quality-cost-size criteria...

The regents are prepared to change the mission and reduce the scope of any university when four-year enrollment projections and fiscal projections make phase down desirable in order to sustain quality at a reasonable per student cost level for the university.

The regents, the system and the institutions will continue to phase out or alter programs which do not meet reasonable tests of quality, cost, productivity, responsiveness to societal need or centrality of mission.

Any resource freed by such steps will be directed toward higher priority needs to sustain the quality of the system and its responsiveness to newly emerging needs of the people of Wisconsin.

Where the report states the regents and the university system "differ markedly

from the governor's fiscal assumption" is summarized:

Given the projected enrollment increase of the next five years, this will require marginal investment of state resources above those needed to sustain quality in the system at its present level of service.

The fiscal assumption in the governor's request to the Board of Regents is that such resource expectations will not, or should not or cannot be met, and that therefore the system should now move to reduce its scope and range of educational opportunity and service.

The regents propose a planning process which would enable the system to move on a four-year front on reductions in scope when and if state projections of resource expectations or when and if projections of declining enrollments could be made.

The fiscal assumption in the governor's request is that static or declining resources can or should be projected now for the next several biennia and that direction to reduce the scope of the system should therefore be given now.

The report proposes a "2 plus 2 planning and budget cycle," in which the university system would submit biennially, a budget request for the coming two years along with a tentative proposal for the following two years.

While the legislature cannot commit funding for more than two years, the report states, "It is possible to normalize the basis for resource expectations on the part of the system by projecting the policy base for such expectations in a four-year front and by annual updating of the projections to maintain a four-year front on the development of new bases for funding and the time when these become applicable.

DEADLINE:
MAY 1, NOON**

Pointer Office Gesell Bldg.

**5 BEST PHOTOS
WILL BE PUBLISHED
ON MAY 6.**

All entries become the property of
the **POINTER**.

Members of The **POINTER**
STAFF are not eligible

Studio Theatre entertaining

This semester has provided some interesting entertainment in the Studio Theatre for those students who have attended.

Studio Theatre is a place designated to give students the opportunity to direct, act and produce plays, readings and other forms of theatrical entertainment. The most recent of these was a production entitled *The White Whore and The Bit Player*, which ran April 15-17.

It is an intense drama dealing with the emotional and physical traumas of one woman, as she re-lives the time up to her suicide in a mental institution.

The director, Karen Ann Staples did a very good job of getting the audience involved in this emotional struggle through a good working relationship with her actresses; Julie Barras, and Karla Widner. Both protracted the woman at various stages in her life simultaneously and both did an excellent job of moving from one personality to the other - through the disappointments and failures in her life.

At times the blocking seemed somewhat awkward and limited to the audience sitting directly in front; this was partially due to the closeness of the set to the audience. The placement and use of the music, as well as the blackboards seemed also confusing and unnecessary.

The lighting, done by Skip Blank was very good and

captured each emotional peak completely.

Studio Theatre is and can remain to be a valid educational experience, as well as an entertaining one, as long as UWSP students continue to support its efforts. These productions are meaningful efforts produced by interested and talented students.

WWSP staff chosen

The executive staff of WWSP FM-90 held their annual reorganization meeting Wednesday, April 16.

New staff members selected were: News Director-Chuck Bornhoef, Campus Affairs Director-Sue Kaestner, Public Affairs Director-Andy Fischbach, Public Relations Director-Debbie Behm, Sports Director-Scott Krueger and Continuity Director-Penny Gillman.

Remaining in their present positions are: Program Director-Chris Shebel, Music Director-Jerry Gavin and Production Director-Tom

Film Society

presents

'the Fountainhead'

Based on the novel by Ayn Rand, the well known author of *Atlas Shrugged*. We the Living and *Anthem*, *The Fountainhead* deals with the story of an idealistic architect who is brought to trial when he destroys the buildings he has designed.

Gary Cooper stars as Howard Roark, the individualistic architect and Patricia Neal portrays the infamous, Domonique Francon, the woman in rebellion of the collective society. This movie will be shown at 7 and 9:15 p.m. Tuesday, April 29, in the Banquet Room of the University Center.

'Outstanding' students named

Tony Charles and Richard Bayer of Racine have been named "Most Outstanding Student Programmers" for 1975 at UWSP.

The recognition is sponsored annually by the University Activities Board (UAB), a nearly 20 member body, for the person or persons judged to have made the greatest contribution as a member of the board.

The UAB receives a large appropriation in activities fees, schedules most of the special programs held both on and off campus for students.

Besides receiving a plaque, the names of this year's

winners will be engraved on a large plaque that is permanently displayed in the University Center (UC).

Charles, a senior who will be receiving a degree in communication next month, will be employed on the news staff of WFRV-TV in Green Bay. Previously, he has served the staff as a summer intern and correspondent in central Wisconsin.

Bayer, who will be finishing up his undergraduate work next year, has been appointed to the position of student manager of a technical crew handling sound, lighting and video equipment in the UC.

Coffeehouse plans variety

by Terrell Bauer

"Next year, we plan to stress variety," reported Todd Dillmann, committee chairman of UAB's Coffeehouse Committee. "If anyone has suggestions, contact the UAB Office."

Dillmann said that next year the entertainment will range from comedian acts, folk, blues and jazz. "A lot of professional acts have been booked," he said. "We will also try to get the good acts from last year back." As in the past, Dillmann said that student auditions will be held in the fall.

"Next year, people can expect a coffeehouse three to

four nights a week. A combination of student and professional talent. As far as we know, most of them will be free."

Dillmann also said that he would like to see the coffeehouse decorated according to the theme name. As of yet, no name has been picked. "We would like people to submit suggestions by May 1. If not, we will pick a name from the entries we've already received," Dillman said.

This year, Dillmann said that they will hold a folk fest May 3 featuring campus talent. Details will be given at a later date.

The UWSP Music Department will present the Renaissance Consort in a program of Elizabethan madrigals, instrumental pieces and dances at 8 p.m., Thursday, April 24.

The concert, free to the public, will be given in Michelsen Hall, Fine Arts Center.

The program will include unaccompanied madrigals, vocal solos, guitar solos and duets, small and large instrumental ensembles, consort songs for voices and instruments and a variety of solo and group dances. It will be performed in costume and upon authentic instruments of the period.

The group is under the direction of Carol Knell of the UWSP music faculty and includes 16 students and two music faculty members.

College unions have long history

Guest feature
by Sunny Narag

Communication is of the essence on the college campus. Classroom lectures provide some, but the larger part of the exchange takes place in the college union where students interact. The campus union has made a great impact on the university's social and academic life.

The history of college unions began in the late 19th century when a handful of bold debators at Oxford University insisted on debating in a free and independent atmosphere. This gave rise to an association of people who endeavoured to achieve the same. This debating society soon acquired its premises in the university and was on its way to influencing a multitude of inhabitants, of that institution, who flocked to hear its controversial debates.

The turn of this century witnessed this concept crossing the Atlantic and taking the shape of Hart House in Toronto University in Toronto, Canada.

A delicate blend of tradition and innovation is what Hart House embodies. It developed the idea of a debating club into a large complex, offering a diversity of activities ranging from lunch-time concerts to farm picnics. Its founders prayed that it may create an "uncommon fellowship" among men who cross its threshold.

Several of its prominent members are national figures in Canada today, but they are a few of the many who came to this house to imbibe the finer qualities expected of an educated gentleman.

Today Hart House, still going strong, stands as a continuous home for students, alumni and faculty members who wish to have a life long

association with their alma mater. It is also the pilgrimage center for many who wish to develop unions in other parts of the continent. It is indeed the soul of Toronto University.

The proliferation of students in universities after World War II created a problem for every nation because of the increase of diversity. More important still, the educators were dealing with students who expected much more from a university than a classroom education. The answer of course was a college union but it had to be modified or rather evolved to render it useful to the diversity of interests students possessed. The best answer was provided by York University in Nortern England.

This university built a man-made lake, an ideal example of how concrete can be transformed into an imaginative, aesthetic and harmonious building material.

The university is divided into six colleges possessing their unique classrooms, resident areas, dining area, recreation area and a tavern. Each college has a "Provost" as its head while the day-to-day administration is carried on by the Bursar.

This physical environment creating six different areas for students to interact have made the student body more specialized and yet more aware because the variety of programs is immense. It also allows the students to mix rather personally with each other in their own colleges and yet they form a student brotherhood living in the same university.

Till now we have confined our enquiry to the Western Hemisphere but let us travel now towards the east and discover its impact there.

One of the best example of unions in India is that of Stephen's College. A large sprawling college, it reminds visitors of imperial British India. Most of its inhabitants are handpicked from across the nations and the majority of its alumni have occupied a number of influential offices in the nation.

The union itself consists only of a small cafeteria surrounded by lawns. But it is amazing to notice the interaction taking place and the diversity of arguments, the conversations and discussions over copious gulps of coffee—the food for thought.

Today as we hurtle through time, condensing the achievements of the last 30 centuries into 30 years, it become very pertinent to have an ever increasing number of centers where not only students but any member of the community can visit, exchange views and indeed learn how to live in times as transient as ours.

Speaking in terms of our union, still in its infancy, it could be made more meaningful if culturally enriching programming could be provided than mere entertainment.

It is the duty of a college union, to make students more aware of their environment and help them to discover the finer qualities of civilization so that they may enter society with the profound and proper understanding of it.

It is in this direction we should endeavour to move as we develop our union at UWSP into a viable institution.

It is not only the efforts of a few individuals who maintain the union, that will fulfill the herculean task. But the united efforts of all those students, administrators, teachers and community members that will make this possible.

Garden plots offered

Open letter,

Dreamin' of red-ripe tomatoes, juicy whole-cob corn and the crisp lettuce of summer? Would you prefer to gather these succulent items from your own garden rather than from the supermarket bins? Do you live in an apartment, or otherwise lack the dirt necessary for such a project?

If this is your ailment, The Portage County Community Garden Project may be your remedy.

The Portage County Community Garden Project is a group of students, faculty and area residents who lack the facilities to make a garden at home. The organization is non-profit and cooperative. They have contracted for a parcel of land near McDill Elementary School, and are renting

garden plots to anyone interested.

Individual garden plots of 20' by 60' are being offered. The summer rental fee is \$20. The service to be supplied by the group will be plowing and manuring in the spring and irrigation throughout the summer.

If \$20 seems too steep, or you have no desire for such a large plot, the project encourages individual gardeners to sub-divide their own plots.

The project hopes to supply the Stevens Point community with an in-town parcel for gardening, as well as promote a friendly gardening dialog.

More information can be obtained by calling Nina Cass at 341-5318, or Jim Gilmore at 346-3573.

Rex Cass

Open letter.

Now that streets are clear of snow and ice, the Stevens Point Police Department has reminded the motorist to be cautious of increased travel by bicyclists and of children playing in the streets.

The Police Department is asking parents to instruct their children in bicycle safety and to insure that children play on playgrounds or in their own yards.

The Police Department asks parents to select bicycles to fit their children and not let children ride in the street until they know the safety rules and laws and are proficient at handling the bicycle.

Bicycle riders must follow the state's motor vehicle laws and city ordinance's. Violators will be issued

traffic citations if they are over 16 years old.

Violators will be fined not more than \$20 plus court costs.

Bike riders under the age of 16 shall be given bicycle violation tickets and must report to the Police Department for their penalty.

According to the Police Department, the most frequent violations by bicyclists are failure to stop for stop signs, disregarding yield right of way signs, not having lights when traveling at night, unregistered bicycles, going wrong way on one-way streets, not giving a turn signal and not having a rear reflector.

Because of the increase in

bicycle thefts, the Police Department suggested that bicyclists use a heavy duty chain and secure their bicycles to a stationary object when leaving them unattended.

A copy of the new Laws Governing The Registration and Operation of Bicycles which was adopted by the Common Council of the city of Stevens Point and took effect Nov. 2, 1974, is available when purchasing a bicycle license plate at the Fire Department at the corner of Divison and Franklin Sts. Effective this year the bike plates are two year plates and must be purchased.

Foresters start tree ID

Open letter.

continue to pick up momentum.

The Society of American Foresters Student Chapter has undertaken the project of tree and shrub identification on campus.

This project will extend over the next couple of years with experimental sections of trees identified to test the reaction of on and off campus people coming in contact with the labeled plants.

If the reaction is negative, we would expect a great deal of vandalism, which would prove UWSP would not be a good location to sink hundreds of dollars into tree and shrub labeling. Likewise, if destruction is kept to a minimum, the project will

There is no doubt in my mind that the identification program will be accepted by on campus and off campus interests alike. This has been the case of many visited universities with identification programs that don't even have a college of natural resources, which proves you don't have to be a resources or biology major to respect that natural part of life all of you are affected by.

So please, respect the continual work that people are putting into this project, for you.

City bus replaces car

Open Letter.

For the students oppressed with financial difficulties and problems with housing for next fall, there is one area of relief, the city bus lines. It's not a strange connection when one considers these points:

In the area of housing, the student has been liberated in the selection of location. One no longer has to worry about long walks to school, car expenses or the necessity of an expensive cab, the bus comes within three blocks of most areas in Stevens Point reaching as far south as

Whiting and parts of Plover. So, feel free to take that cheap room across town. The bus will get you to classes.

Financially, the bus is a wonderful form of cheap transportation. It's absolutely free to any UWSP student carrying an ID card, thanks to negotiations between the Student Government and the City Bus Coop.

There is no need for car expenses and parking problems. The bus fits school schedules perfectly, so there's actually no need for a car during the week.

Ecologically, the bus is

more sound, operating as a form of large car-pool. Several people per bus trip is a much better ratio than one or two people per fuel-intensive car.

I know these things- I have become dependent upon this fine system. It gets me to school and to two different jobs across town daily. I have no worries concerning transportation expenses, parking and housing location because of the city bus.
