UW-Stevens Point, Tuesday February 11, 1975

NO. 25

Fast day draws national leaders

Three national leaders in programs concerned with the current food shortage crisis and widespread starvation will speak Tuesday and Wednesday in programs at UWSP.

Their appearances will coincide with a UWSP originated "Fast Day for World-Hunger" Wednesday.

Leading discussion groups and presenting lectures will be Joel Underwood, director of Organization for Bread for the World; John Strasma, agricultural economist at UW Madison; and William Whitcomb, director of the Wisconsin office of the Community Hunger Appeal of Church World Service.

On Tuesday, Strasma will talk in the lecture hall of the Collins Classroom Center on "The Economic Roots of World Hunger." Whitcomb and Underwood will serve as reactors. At 7 p.m. the same day at the Wisconsin Room of the University Center, a world hunger symposium focusing on political,

economic, moral and ethical questions will involve the same three men plus Dr. Robert Cassidy, a religious studies specialist in the UWSP philosophy department.

On Wednesday, Underwood will deliver a lecture at the Wright Lounge of the University Center on "Hunger and Third World Politics." At noon in the lounge of Neale Hall, Whitcomb will explain projects supported by the fast day.

Students participating in the fast will not take meals all day Wednesday in University Centers, and as a result Saga Food Service will contribute its savings for having fewer diners to a special fund earmarked for world hunger relief.

The speakers to be heard at times when many people ordinarily have meals include a United Methodist clergyman—Underwood. He also served as executive director of an ecumenical

church-related documentation and publishing program on Third World issues and on Methodist Board of Global Ministries. He has worked in India for four years in urban and industrial mission projects.

Strasma, in 1959, was a Fulbright Scholar at the University of Chile, and a visiting professor at the University of Chile—Graduate School of Economics. He has had long and varied involvement in economic affairs in Latin America through the Food and Agricultural Interamerican Development Bank, and the Chile Planning Society. He is author of *Free Trade Zone in Latin America: Some Unsolved Problems*.

Whitcomb recently returned from India where he served for 23 years as an agricultural missionary for the United Church of Christ.

All of their presentations at UWSP will be open to the public without charge.

UWSP building faring poorly

by Chris Kroll

The Department of Administration (DOA) has recommended that the UWSP request for a new administration building be denied.

However, university planner Ray Specht said, "The program is still alive." Five decision-making bodies contribute to the actual outcome of the state budget process. The DOA is not one of them.

It is anticipated that the Building Commission will meet March 1, said a high-ranking administrative official. After the Building Commission reviews the matter, it will be passed on to the Joint Finance Committee and full legislature.

Governor Lucey has stated he is not optimistic about any major University of Wisconsin projects due to an expected shrinking enrollment in the near future. He has the option to veto any decision regarding the program.

Should the UWSP building request be accepted, it will become part of the total 1975-1977 state operating budget.

The complete building program includes two major projects, the \$1.7 million administration building and a \$3.8 million addition to the Learning Resources Center (LRC).

Last year the Building Commission allocated funds to raze Old Main and convert Delzell Hall into an administration building. The residence hall is in operation again, however.

The DOA is still trying to relocate the UWSP administrative staff in other campus buildings, said Specht.

Recently, the Bureau of Facilities Management recommended that Nelson Hall be converted to administrative offices. Nelson Hall now houses faculty offices, the student health center and other public agencies.

The DOA has also suggested denial of funds for the LRC addition. The book stacks are designed to store 300,000 volumes. The number surpassed 312,000 last fall.

Minor projects requested in the UWSP building program include:

-Acoustical treatment to

alleviate extreme dust and noise in Art Department labs, at a cost of \$52,600.

-Suspended balcony and storage loft in Jenkins Theatre, costing \$50,000.

-Remodeling the physical education complex, costing \$32,700.

-Campus beautification and arboretum, at a cost of \$73,000.

-Developing a fluid mechanics and hydraulic laboratory for the Pulp-Paper Science Department, costing \$38,000.

-Stage lighting and dimming systems in the Jenkins Theatre, costing \$31,000.

-Campus lighting project to promote safety, at a cost of \$37,500.

The Pointer is published under the authority granted to the UWS Board of Regents by section 36.09, Wisconsin Statutes. Costs are paid by the students of UWSP as awarded under contracts made by the State Printing Section, State Department of Administration, as provided in State Operational Bulletin # 24 of August 28, 1974. The Pointer Offices are located in room 130, Gesell, UW Stevens Point, WI, 54481. Phone 348-2249. 1974-75 Editorial Guidelines: 1.) The Pointer will be published twice a week during the school year except for exam and vacation periods. Remaining publication dates are: Feb. 13, 18, 20, 25, 27; March 4 & 11, 12, 18; April 3, 8, 10, 15, 17, 22, 24, 29, May 1 and 6. 2.) All material submitted to the Pointer must have the name, address and phone number of someone to contact for verification and questions. All material must be typed, double-spaced with one inch margins and submitted to the Pointer Office by 10 a.m. on the Monday before the Thursday publication and 10 a.m. on the Thursday before the Tuesday publication. Ads follow separate deadlines. The editor reserves editorial rights over all material submitted to the Pointer. 3.) Material submitted to the Opinion Section must be no longer than 350 words and be signed with the name of the writer. 4.) The Pointer will publish the Campus Calendar as arranged with the Student Activities Office. 5.) Any UWSP student may work on the Pointer. The editor reserves the right to

make assignments in keeping with the needs of the paper. 6.) Rates for display ads may be obtained by calling the Pointer ad manager at 344-2249. Special rates for public service organizations are available with the permission of the editor. The Pointer will not run classified advertising. **POINTER STAFF**

Primary next week

by Bee Leng Chua

The primary election for the position of alderman in the 13th Ward will be held on Feb. 18, 1975.

From the four candidates, two with the highest votes will run on April 1, in the final election.

The four candidates contesting for the position of alderman are: Wayne Gorell, George Lilquist, William Nuck and Donald Werth.

The 13th Ward covers the area south east of campus and the elected alderman will serve in this ward for two years.

The four men were interviewed by the Pointer on some of the current most topics of major concern to both the town and student community in Stevens Point.

Franklin Street between the Fine Arts Center (FAC) and Collins Classroom Center (CCC) will be closed to traffic and converted into a pedestrian mall.

All four candidates agreed that the Franklin Street Mall is a good idea in view of the safety factor.

"This area is the focal point of the campus, and used heavily by students who commute to and back from the various instructional centers," said Gorell.

On the Michigan Avenue Extension, Nuck commented that the extension should not only be beneficial to a specific body of the community, but to the others whether Sentry, the town or the university.

On the question of environment, Gorell said he would like to see a compromise struck between development and the environment.

An instructor of Physical Education at UWSP, Gorell said he is concerned with the congestion of facilities and the development of Dreyfus

Lake as an opportunity to expand. Instead of letting the area lie as it is, he said he would like to see it developed into a nine-hole golf course beneficial to both the students and the community.

One thing that the candidates would like to see is more student input, as Nuck said "in community activities such as voting."

Although the majority of students are not from the 13th Ward and therefore cannot vote for the alderman, they can vote in the mayoral race.

"Students should get involved as they too will be effected by the changes in Stevens Point," says Lilquist.

It is acknowledged by all four candidates that the university is an economic asset to the community and therefore it needs demand consideration.

Lilquist would like to see a reassessment since he said he feels that the recent one has been unfair. People who do not deserve this injustice have had their property tax spiral exorbitantly in proportion to the actual value, said Lilquist.

Income tax is something that we have to live with and a tax which tries to be fair, but as far as sales tax, property tax and social security taxes are concerned, they are all "horribly regressive," said Werth.

Nuck said he advocates stability and realism in the tax issue.

"The way the United States economy is going, taxes may be increased," said Gorell. "Property tax is a sticky situation, I don't have all the answers, but I'm willing to put time and energy to solve the problems," he added.

Changes at WWSP FM-90

This semester at WWSP FM-90, a number of changes have occurred. Some shows have been retained from last semester and a few new music shows have been acquired.

Among the shows from last semester is David John Doe's Blues Show from 8:30-10 p.m. on Tuesday nights.

Doe features the blues from previous years and presents popular blues music.

Ed DiMicelli hosts Nightwatch from 10 p.m. - 2 a.m. Tuesday nights. He features a particular artist or group during the last hour of Nightwatch. Call WWSP, Ext. 2696 for requests.

One of the new shows for this semester is the Folk Show with Tom Chapman. It is presented on Sunday afternoons from 4-7 p.m.

Folk music and country rock is mixed. All requests are welcome.

From 9-10 p.m., every Saturday night Jerry Gavin's Album Hour features the week's latest progressive music releases.

All the songs are done in entirety with no voice interruptions.

The Top of the Morning Show from 9 a.m. to 1 p.m. Sun. is hosted by Andrew J. Miller.

Michigan Ave. 'up to the university'

by Joel C. Guenther

"The university... must now make the decision on which route," said William Burke, areawide planner in concern of the direction of the Michigan Ave. extension.

Burke's statement was supported by Jeff Littlejohn, chairman of the Environmental Council and William Vickerstaff, executive secretary to the chancellor.

UWSP chancellor, Lee S. Dreyfus said at the Jan. 23 public hearing, "The final decision is pretty much mine."

Since the hearing, the chancellor has called for input from the city, the students and the faculty. The faculty formed an ad hoc committee to study the two proposals in question, the proposed route number five which would use existing roadbeds and the route proposed to cut through university lands north of Maria Drive.

Right now we are planning to meet with the chancellor, said Littlejohn. He also said the Council is trying to get more faculty input into the issue. This would be through the ad hoc committee, said Littlejohn.

The Council is also analyzing the five candidates for mayor as to how they stand on this issue, Littlejohn said. "The mayor is going to sit on this through the election," said Littlejohn

speaking of the incumbent mayor, Paul Borham.

After the public hearing there has been a great deal of input from other university factions, said Littlejohn. "We, as students, are totally saturated and drained of this issue," he said.

William Vickerstaff noted there were several things they were looking at. Proposal five would extend the route by about 300 feet through the campus, he said. Number five would cross more wetlands which would add also to the costs, Vickerstaff added.

In the cost analysis "the city engineers estimate the cost savings, if any, would be minimal," said Vickerstaff. "My biggest concern is how we can protect the biggest parcel of land out there," Vickerstaff said. He noted because of the economic situation of the universities, certain lands might need to be sold. This may open the land north of Maria Drive to developers, he said.

"We can make a bigger argument for preserving the land west of what we build than we could east of the road," said Vickerstaff. With the proposed route, there would be more open space left as a natural area, he said.

The decision from the chancellor should be soon, said Vickerstaff. "I think the chancellor will reach a decision by the 15th of February," he said.

Fast day tomorrow

Students at UWSP will go on an all-day fast Ash Wednesday, Feb. 12, to help heighten the consciousness and raise money for starving people of the world.

Called "Fast Day for World Hunger", the project is the outgrowth of a Thanksgiving Day service held on campus by the ecumenical University Christian Ministry (UCM). The theme was world hunger.

Planners are hoping that after the fast, a campus chapter of Bread for the World can be established.

Students who sign up to go without meals on Wednesday will be credited by Saga Food, and the savings recorded by Saga for cutting back on its service will go to a special fund.

In addition, contributions will be received at the UCM headquarters, 1125 Fremont St. The planners hope to receive support from area residents, they said.

Specialists on food shortage world relief will be scheduled for talks throughout the day of the fast and on Tuesday, Feb. 11.

There will be a dance Tuesday night in Allen Center and music entertainment in coffee house style Wednesday

night in the University Center, where contributions will be accepted.

On Wednesday, there will be booths in the new concourse of the University Center where people will be given stationery, postage and addresses to write to government officials concerning the mounting problem of starvation. Also, demonstrations on "alternative diets" will be held and literature available about the local food cooperative provided.

Films and video tapes on the world hunger crisis will be shown in the University Center Coffeehouse from 2 to 5 p.m.

All the events are intended for participation by members

of the general public as well as students and faculty members.

Pastors James Schneider and Stephen Edgington of the UCM staff and John Jury, residence hall director, are coordinating the activities. Student leaders are Gary Strehlow, Kathy Hoffman, Kathy O'Bryant, Robert Simeone, Mrs. Jackie Murray Brux and Gerri Boos. Richard Steffen is assisting with coordinating efforts in the community.

Money collected will go to projects sponsored by the Church World Service in famine stricken India for bean purchase and shipment to Africa and improved agricultural development in Bangladesh.

CTV begins broadcasting

by Kathy O'Connell

Campus TV (CTV), which can be viewed on channel 6, cable TV, will begin a new season of broadcasting tonight.

Included among tonight's shows will be "Music Makers," a program which will examine different fields of music from classical to rock. Viewing time is scheduled for 6:00 and hosting the program will be Chris Arndt.

Also shown tonight will be "Pointer Postscripts," a live, 30 min. program which will cover athletic events on the Stevens Point campus. The show will be hosted by Mark Kregg at 6:30.

It will be followed by "Perspective on Point" at 7:00. This program will be a unique look at subjects of interest to the community. Shoplifting, health, drugs, and urban development are some of the topics planned for the show. The program is scheduled for 7:00.

Wednesday's lineup will include "Coffee House," a program consisting of folk performers, recorded live at CTV studios. The program is scheduled for 6:00 p.m., and Elaine Donaldson will be the host.

Following "Coffee House" at 6:30 will be "Kaleidescope," a live, 60 min. talk-show that will deal with anything and everything. Planning to host the show is Tom Jorjorian.

On Thursday show time will begin with "N.E.W.," a program which will look at various new aspects in the educational process in Central Wisconsin Schools, from grade school on up.

Viewing time will be at 6:00 and serving as host will be Chris Cwiklo.

In addition to "N.E.W." on Thursday nights will be "On the Town," a live, 30 min. preview, informing the viewer of what's happening in and around Stevens Point. Hosting the program at 6:30 will be Tom Collins.

Following it at 7:00 will be "The World Around Us," a talk show evolving around environmental and natural science issues in the Stevens Point area. Hosting the program will be Pete Mann.

"Special Features," scheduled for 7:30, Thursday evening, is a semi-regular program which will deal with topics of local concern, such as the up-coming elections. Jim Tenuta will be the host.

"Remotes," an addition to the weekly scheduled programs, will cover men and women's basketball, wrestling, and hockey. One of the hosts will be Don Schroeder.

CTV, presently located in the basement of the LRC, is a student organization of about 100.

CTV's executive staff includes William Davidson, Peggy Rajski, Ed Korleski, Jack Caldwell, Kathy Rossmiller. Rajski is student manager and faculty managers include Davidson and Elizabeth Keyes.

"The goal of CTV is to produce programs related to community interest," said Caldwell, publicity manager for CTV.

The CTV organization has been in existence two years and has expanded its broadcasting time from two hours a week to over nine hours a week.

Powderburns and backlashes

by Joel C. Guenther

Due to a rather taxing class schedule plus various writing, governmental and social duties, I've grown delinquent in answering the volumes of fan mail bestowed upon this department.

For this reason I'd like to take this opportunity to answer them.

Dear People,
I am not!!

Now that we've gotten that out of the way, serious matters can be discussed.

For instance the Eco-Outdoors Department of the Pointer would like to announce a contest.

This contest is an essay competition in which you, as the writer, must tell in 200 words or less who you believe is the best outdoors writer in the world and why.

All entries must be typewritten and double-spaced. They must also be signed and include the address of the author.

Getting down to the nitty-gritty, first prize will include an all-expense paid round trip tour of the Pointer offices.

Second prize is an autographed copy of Outdoor Editor Joel C. Guenther's new book **Everything I Know About Hunting**.

Third prize, due to the rapid rate of inflation, is a totally free 12 ounce glass of water from Debot Center.

Now make sure to get your entries in before Feb. 29.

Entries submitted after that date will be recycled into toilet tissue or something somewhat comparable, like maybe English exams.

ECO/OUTDOORS UWSP POINTER

Moments after release, a female pine marten kicks up a fluff of snow as she races for safety.

Pine Marten to be studied

by Brian Mack

Wisconsin may once again become a home for the elusive, but beautiful, Pine Marten.

The Pine Marten, a slender-bodied carnivorous mammal larger than the related weasel, once inhabited the state until logging and agricultural expansion destroyed its home and eventually, the marten itself.

UWSP, in conjunction with state and federal agencies, has begun a study on the reintroduction of the Pine Marten into Wisconsin.

The study will take place on a 59,000 acre portion of the Pine River furbearer area of the Nicolet National Forest. The site is located where dryland trapping is prohibited.

"This Pine Marten study is a cooperative venture between the U.S. Forest Service and the Wisconsin Department of Natural Resources (DNR)," said Raymond Anderson, a wildlife professor and supervisor of

the study at the UWSP level.

"The DNR is providing the animals...the U.S. Forest Service is providing the habitat and our (UWSP) funding for the follow-up," Anderson said.

The study entails the marking and releasing of about 100 martens followed by close observation of the mammals, their movements and their physical conditions.

A percent of the martens will be monitored through the use of tiny radio transmitters attached to the mammal. Through this method the martens can be accurately located. And once this is done, tracking and observation by foot can be accomplished.

Mark Davis, a 1974 UWSP graduate from Fort Atkinson, will be doing much of the field work for the study.

Davis, who is working toward a masters degree in Wildlife, began field work on January 29 when the first eight Pine Martens were processed and released.

Flown here from Canada in

cooperation with the Ontario Ministry of Natural Resources, the martens are ear tagged, sexed and equipped with radio transmitters. They are then released into the Pine River area for observation.

"Evaluating the success of the venture" will be our responsibility, said Anderson. "I'm very optimistic."

DNR cites snowmo hazards

More than a third of this winter's snowmobile deaths are drowning victims, says a Department of Natural Resources (DNR) official who expressed concern over the number of water-related snowmobile fatalities that have occurred this year.

Seven of 18 snowmobilers killed so far this season were drivers or passengers of machines that plunged through the ice, said Mel Lange, recreation safety specialist for the DNR.

In recent years, it has been observed that a surprisingly high number of persons involved in snowmobile drownings are local residents who live immediately adjacent to the body of water in which they were killed, said Lange.

Mineral output soars

The value of U.S. raw mineral output in 1974 reached a new high of \$54.9 billion, despite drops in production of many commodities, Secretary of the Interior, Rogers C.B. Morton said.

Based on data provided by the Interior Department's Bureau of Mines, the 1974 record-breaking figure for raw mineral output surpasses the 1973 value of \$36.8 billion by almost 50 percent.

Reflected in the totals are value increases for all sectors of the mineral industry, including metallics, non-metallics and mineral fuels.

"Most of the raises resulted from higher prices, not increased output," Morton said. "Of the 80 mineral commodities included in the totals, 38 showed production gains, while 63 registered value increases."

Noting that the value of processed materials and energy derived from imported and domestic minerals was now in excess of \$200 billion, Morton said, "This emphasizes the need for increased productivity, both in production of raw materials and in their conversion to useful forms as a major part of our efforts to reduce the serious erosion caused by inflation."

Fuels alone accounted for some of the most pronounced increases, with the total 1974 production value for them exceeding the total 1973 mineral output value by \$4.8 billion. Of the \$18.2 billion value gain in 1974, \$16.4 billion was in the fuels sector.

Although three of the 12 fuels reported production gains, 10 showed value hikes ranging up to 99 percent for LP gases.

Of the 24 metallic commodities, 12 showed quantity advances and 19 increased in dollar value. Of the 44 non-metallics, 34 had higher total values than last year and 23 showed production gains.

News briefs

Beginning on Feb. 14, vacancy listings may be picked up at the Student Teaching Office, room 112 in the College of Professional Studies (COPS).

Applications for student teaching Fall Semester, 1975-76 must be in room 112 COPS by Friday, February 14. Anyone who has not yet picked up forms should do so immediately by stopping in room 112 COPS.

Pictures talk. Some little boys don't.

Some inner cities have special schools. For little boys who don't talk.

Not mute little boys. But children so withdrawn, so afraid of failure, they cannot make the slightest attempt to do anything at which they might fail.

Some don't talk. Some don't listen. Most don't behave. And all of them don't learn.

One day someone asked us to help.

Kodak responded by working with the teachers. Showed them how, through the language of pictures, the children could communicate as they never could before. And the teachers sent the kids out to take pictures with their cameras.

And then the miracle. Little boys who had never said anything, looked at the pictures and began to talk. They said "This is my house." "This is my dog." "This is where I like to hide." They began to explain,

to describe, to communicate. And once the channels of communication had been opened, they began to learn.

What does Kodak stand to gain from this? Well, we're showing how our products can help a teacher—and maybe creating a whole new market. And we're also cultivating young customers who will someday buy their own cameras and film. But more than that, we're cultivating alert, educated citizens. Who will someday be responsible for our society.

After all, our business depends on society. So we care what happens to it.

Kodak.
More than a business.

Hi-Rise Manor houses 'one big family'

Photos by Roger Barr

by Sally Duxir

Over 100 older adults in the Stevens Point area find their homes on Briggs Street.

Hi-Rise Manor, a federally funded project which was originated in 1966, houses eligible people in one bedroom apartments which also include a living room, kitchen and bathroom.

Persons over the age of 62 or who are disabled are qualified to live in the building at a rate of rent not to exceed 25 percent of their net income, said C.R. Frazee, executive director of Hi-Rise Manor.

The project began in 1966 with the appointment of a Housing Authority by the mayor and with approval of the City Council.

The authority consisted of five members or commissioners. The purpose of the Housing Authority was to study or determine the need for low income housing in this area, said Frazee.

The study revealed that this type of housing was needed in the Stevens Point area, and funding would have to come from the department of Housing and Urban Development (HUD) on the federal level.

In order to get funding the Housing Authority had to enter into a "cooperation agreement with the city." This meant the city of Stevens Point would agree to supply all the services to this building it gives to any other residence.

After working with four or five developers and choosing the one with the most acceptable plan for the building, construction began in 1969.

On Feb. 21, 1971 the builders turned the key over to the housing authority and within four months Hi-Rise Manor was full of tenants.

Point, however the apartments are available to anyone residing in Portage County, said Mavis Gaedke, office secretary at Hi-Rise Manor.

Presently, there are approximately 60 qualified people on the waiting list to get into the manor.

Over a period of 60 homes such as this find about a 6 percent turnover annually, said Frazee. This includes vacancies which occur due to death, or the tenant is moved to a hospital or nursing home because they can no longer take care of themselves, he said.

Six couples, nine single men and 85 women occupy the apartments at the present time, said Gaedke.

When asked about the outstanding number of women, Frazee said there are two basic explanations for this. First of all, it is a fact age then men, and another factor is that more men go into retirement or hospital forms of care supplied through the benefits of armed services or employment, said Frazee.

The residents of the manor are responsible for themselves and for the upkeep of their apartments.

Rosalie Wentworth said she sees the people in the manor as "one big family."

"I've been sort of hit and miss until I came here," she said.

Mrs. Wentworth is 82 years old and has been a resident of Stevens Point almost her entire life.

When asked about inflation, she said, "It doesn't bother us, we've got plenty. I can't see anyone suffering here."

"You might even say that

I'm an antique," she said and laughed.

Edna Martin has been a resident of Hi-Rise Manor since it opened.

"I love it here, it's very lonely living alone," she said. "I know all of the people here," she said, "and I have a lot of friends."

"If I would have been living alone I would have been out of my mind by now because in an old house, there's always something going wrong," she said.

"I worked for 17 years and was always hurrying, but now I don't do that anymore," she said.

"I enjoy it here because if I want company I can have it and if I want to be alone I can have that too," the 70 year old Mrs. Martin concluded.

"It's really nice here, and that lady in the office, well...we get along just like a prince," said Ed Clussman, one of the few male residents.

"I've been kind of lonesome ever since my wife died," he said, "but I keep busy." "Every summer I help plant and keep up the flowers around the outside," said 89-year-old Clussman.

"I don't know where I could do any better," said Clussman.

"The lobby is pretty well filled in the evening and you can talk and some play cards. Some of the schools come over and put on programs or have a chicken supper sometimes," he said.

"All those I've ever talked to like it here," he said, "and I don't like to stick my nose in other people's business. That's the best way to get along."

Clussman, like most of the other residents, has been a resident of Portage County all of his life, and moved into the manor shortly after it opened in 1971.

SPECIAL FEATURE POINTERS

Edna Martin's indoor plants survive the winter with a little tender care.

"This is my gallery . . ." —Rosalie Wentworth. (Women looking in mirror)

Ed Clussman is one of only nine male residents of the manor.

SPORTS UWSP POINTER

Umpires offer spring training

A clinic emphasizing the fundamental and practical aspects of baseball umpiring will be held at UWSP Sunday, Feb. 23.

Ken Kirby, an established umpire with the Big Ten, Wisconsin State University Conference, state high schools and the American Legion program will be director.

Bob Abbott, a veteran of

central Wisconsin college, high school and American Legion umpiring will be assistant director.

The clinic will run from 1-5 p.m. and will be set up to benefit both players and umpires.

Registration will be held immediately beforehand from noon to 1 p.m. A fee will from noon to 1 p.m. A fee will be charged.

Missed free throws factor for losses

You don't spit into the wind,
You don't pull the mask off the ol' Lone
Ranger,
And you don't foul Eau Claire or Stout.

Paul Woita

"If it isn't one thing, it's another," said Krueger in regard to the Pointer's dismal free throw shooting.

"What can you say?" asked Krueger. "No kid goes out there with the idea he's going to miss a free throw."

Eau Claire missed 18 second half free throw attempts and were outplayed in many areas.

The Pointers collected eight more baskets, eight more rebounds and committed three fewer turnovers than the defending champions.

The Pointers, however, also committed 28 fouls to Eau Claire's 16.

Eau Claire's scoring was led by Dennis Blunk and Tim Valentyn with 16 points apiece.

Bob Omelina

Romie Thomas, who hit on nine of nine free throws, finished with 15 points, while forwards Ken Kaiser and Randy Wade scored 12 and 11 points, respectively.

Bob Omelina led Pointer scoring with 17 points, while Ruys, Cal Kuphall, and Woita followed with 15, 12 and 11 points, respectively.

The losses dropped UWSP to a 3-9 conference mark and a 5-16 overall record.

Stout and Eau Claire have six of the conference's top 10 free throwers, and last weekend they proved it.

Stout dumped the hosting Pointers 86-75 Friday Feb. 7, and the Blu Golds followed by beating the Pointers 75-66, Saturday, Feb. 8.

Against Stout, UWSP shot 17 of 22 from the line, but made only four second half free throws to Stout's 12.

The Pointers committed 29 fouls to Stout's 21. Starter Reed Giordana fouled out, and four other Pointers finished with four fouls apiece.

"It hurt us when (center) Chuck Ruys got in foul trouble," said Coach Bob Krueger. "We needed his rebounding strength on the boards."

The Pointers held a slight 31-29 rebound edge, but in taking one more shot made five fewer baskets than the Blue Devils.

Taking advantage of their quickness, the Stout guards and forwards penetrated the Pointer zone. Stout shot 57

percent from the field compared to UWSP's 48 percent.

Guard James Rhett, a 5'7" Blue Devil reserve, scored 21 points, while forward Sam Sanders took game honors with 23 points, including the first six points of the contest.

Four Pointers finished with double figures, led by Ruys' 18 point total.

Guard Reed Giordana finished with 13, forward Mike McDaniel 12 and guard Paul Woita 11.

Woita, who also finished with 11 points Saturday, said he felt Eau Claire beat the Pointers at the free throw line.

UWSP hit on only four of 15 free throw attempts, a 27 percent average.

Eau Claire, however, connected on 29 of 33 attempts for a 88 percent performance.

Rejectors hope for high finish

by Rob Schallock

Last year the Rejectors made it all the way to the final game of the intramural championship before yielding to the Black Student Coalition.

After talking with Mike Lynott and Mark Lubeck, two members of the Rejectors, one gets the impression that the Rejectors will make it at least that far again this year. "This year we will be a lot stronger on the boards. Last year in the final game our big

men tired down the stretch and Black Student Coalition was able to dominate the boards," said Lubeck.

Scott Howard, a 6'7" transfer from Eau Claire has decided to play for the Rejectors this year. Howard should provide the rebounding power that the Rejectors lacked.

Howard isn't the only new face on the Rejectors. Joe Burkheiser, Mike Ferguson and Mike Dembrowsky will also be added to the roster. Last year, some felt that

one factor that hurt the Rejectors was a lack of team play. Although Lynott didn't agree, Lubeck said, "Last year we played too much one-on-one ball but that won't be a problem this year because we are playing together more often and we know each others moves better."

Both Lynott and Lubeck seemed confident of a championship. Lynott summed up the feelings of both the best when he said, "This year we have a very good chance to win it all."

Intramural buckets—

Some squeak past, others roar by

by Matt Gonring

In a make-or-break week of play, Sims' 1 South was good enough to squeak past rival 3 South. Mike Neville's 20 points led the victors to a 47-46 win, with a last second 3 South shot bouncing off the rim.

Mike Miller poured in 27 points for 1 East Pray, but the effort was in vain as 3 East took a 50-48 victory.

Hyer's 1 West pulled out one close game, but was unable to catch Delzell's 2 South in a 42-40 thriller. Hyer's Joey Kinsella led game scoring, with a 16 point effort.

Jeff Gosa's 23 point performance led 2 North Sims to a victory over previously unbeaten 4 South, 49-42.

Hansen's 1 East would have had a rough time in a football game scoring only 14 points. Opponent 2 West took advantage of the low point total, racking up 58 points. Jim Rosenberger scored 13 of the loser's 14 points.

Tom Jacobs' 26 point total led 3 South Knutzen past ineffective 2 West, 74-30.

Third South Burroughs slipped by 2 West 42-39, paced by a balanced scoring attack. Tim Kress led game scoring with 16 points.

Wayne Golz accounted for more than one-third of 4 West Watson's point total as he led them to a narrow 55-51 victory. Golz tied for game high scoring honors with 21 points.

Four North Sims' Meyer tallied 26 points in leading his team to a 50-45 victory over 2 South. The losers were paced by Mike Fisher's 15 points.

This UWSP wrestler acts as if his opponent has bad breath. The Pointer matmen were defeated by Whitewater 34-6 on February 3. Photo by John Hartman.

Boxing card slated for Friday

by Steve Schultz

At 8 p.m., Friday, Feb. 14, at Quandt Gym, there will be an amateur boxing card.

The card will be put on by the Stevens Point Boxing Club. President Dale Holen has indicated that each bout will consist of three two-minute rounds.

He also related that boxing practice has been underway since the last part of first semester.

"The fighters have all been working very hard, and we've also made several trips to Auburndale, where they have a ring," said Holen. "Most of the actual sparring that we have done has been at Auburndale, and this has been an invaluable aid to our program," he added.

Boxing, which has not been seen in central Wisconsin for years, except in Auburndale, is getting its start here through the efforts of Bill

Mercer, former professional boxer and full-time student at the university.

His program has stressed conditioning, fundamentals, and proper safety precautions such as secure glove lacing and proper hand taping.

He said he feels that his pupils should provide exciting entertainment and said, "I think the fans should like it, because these are some highly competitive, very dedicated athletes."

THEY ARE AVAILABLE AT THE ALLEN AND DeBOT CENTER'S STUDENT MANAGER'S OFFICE OR AT THE CAMPUS INFORMATION CENTER.

Eagles proves to be convincing

by Allen Schuette

"Entertaining" is exactly what Gil Eagles' act was. Amazing and hilarious are two more good descriptions.

Eagles performed in a packed Program Banquet Room in the University Center (UC) Feb. 5. He opened with demonstrations of his psychic abilities and said, "My goal is to convince each and everyone of you that ESP (extra sensory perception) is a reality."

After intermission he hypnotized 12 volunteers and

incorporated them into his act.

A few demonstrations were given after which he had two volunteers from the audience help blindfold him. With a silver dollar, a blindfold and five layers of tape over each eye, Eagles continued his show.

A girl randomly set a watch while holding it behind her back. Eagles told the time on that watch to the second. His accuracy was verified by the front rows of the audience.

Later, everyone in the audience wrote their names

and a question on slips of paper. The slips were collected and Eagles, still blindfolded, drew some, named eight people in the audience, told two their social security numbers, one her phone number and two their birthdays.

Just before intermission Eagles answered questions. When asked if he felt everyone has a sixth sense, Eagles said, "I think...there is an innate ability within each of us. It's an environmental thing." He also said he can't tell the future

and is skeptical about that area of psychic endeavors.

After a 10 minute intermission, Eagles hypnotized 12 students. Through hypnotic suggestion he had them painting, sweating in 120 degree heat and catching fish. He then had them cheer for a horserace and later compete in an ice cream cone licking contest.

The last 45 minutes of the show had each of the hypnotized persons responding to different cues. As with the rest of the performance, the audience greatly enjoyed this.

Throughout his act Eagles mixed in quick humor and brilliant use of timing. Though he said he doesn't feel his psychic power is increasing with age, he said that his staging is getting better so his acts become more convincing.

Eagles performed on campus last year also. Chances are he will be back next year again, said Anne Melchoir, president of Residence Hall Council (RH-C), the sponsoring organization for Eagles' performances the last two years.

Ballet debut review

by Terrel Bauer

An original ballet with music and choreography by two UWSP faculty members, was performed in the Warren Gard Jenkins Theatre of the Fine Arts Center (FAC) on the nights of Feb. 6, 7, and 8.

The ballet made its debut at the Theatre Arts Department's annual dance concert.

Based on an Oscar Wildes' fairy tale, "The Birthday of the Infanta" ballet was set to music by Ronald Combs of the UWSP Music Department and was choreographically designed by Susan Hunt, UWSP dance instructor.

It featured a cast of 26

dancers and a 17-piece orchestra conducted by the composer. Cast members included UWSP students Karen Pinter and Suzzette Zariba Zarak.

The concert also featured four other works with a variety of dance styles ranging from a suite of Renaissance dances to a modern swing number called "The Jitter-ABug-Hop-Stop."

The choreography for George Gershwin's "Rhapsody in Blue" was specially done by guest artist Gisela Lemmens, a professional dancer and choreographer in Germany now living in Stevens Point.

Susan Hughes and Sterling Calder rehearse for the performance of "Dance: The Oldest Art." Photo by Loren Zell.

ARTS/ ENTERTAINMENT UWSP POINTER

Serpico on campus tonight

Al Pacino stars in *Serpico*, as an honest cop who not only captures criminals, but sports long hair, lives in the Village with his woman friend, and might even smoke a little pot.

His ultimate goal is to be an honest cop and his sin is turning in other cops who take payoffs.

His reward for being an honest cop is ostracism and defeat in the hands of

superiors who refuse to rock the boat.

This film is based on the experiences of Frank Serpico, the New York City plainclothes policeman whose disclosures led to the Knapp Commission's investigation of the department.

An explicit portrayal of the raw truths of urban law enforcement and the underlying political games of graft and corruption is presented.

The film will be shown at 7 and 9:15 p.m., Feb. 11 in the Program Banquet Room of the University Center (UC), and at 7 and 9:15 p.m. on Feb. 12 in the Wisconsin Room of UC.

The lover sees no resemblance in his love except to summer evenings and diamond mornings, to rainbows and the song of birds.
Emerson

Love is a canvas furnished by nature and embroidered by imagination
Voltaire

I can't remember the date, or what you wore, or what the weather was like on the day we met. I only remember that you said hello in a voice that sounded like love.
Dean Walley

A man loves most truly that woman in whose company he can feel drowsy in comfort.
George Jean Nathan

For those like me... in love—glowing, content and thankful.
Doremus

We enter into love... as purely and happily as the song of birds into the hush of daybreak.
Walter Bela Mare

Warning To love a man wholly love him feet first head down eyes cold closed in depression. It is too easy to love a surfer white eyes godliness and bronze in the bright sun.
Alice Walker

I'll be damned if I'll love just to love—there's got to be more to it than that.
Humphrey Bogart

Love is nothing... no points scored.
Official Tennis Yearbook and Guide

With your burning lips you print a kiss upon the lips of my soul and set it aflame like a torch.
Gibran

Please submit any additional programs or changes which you may have 2 weeks prior to the event if you wish to have them included in the calendar update.

DATE EVENT—Information on "what is happening on campus" can be obtained by dialing Ext. 8199. All student organizations are welcome to have their occasional events recorded on this tape at no cost if the information is submitted to the Student Activities Office at least 1 day prior to the event.

OPINION
UWSP
POINTER

**Student questions
the quality of education**

To the editor,
Although registration for fall semester classes may seem far away the Subcommittee of Audit and Review will soon begin planning this university's class offerings.

This committee, under request of Central Administration, will play a major role in deciding what classes will be offered for the student in the up-coming year.

Through the process of Audit and Review, all existing programs will be looked at and evaluated. Criteria will be based not only on whether programs are academically beneficial but also whether programs are economically feasible.

What is important for the student to realize is that changes will be made, changes that will be felt directly.

The student cannot be an innocent by-stander in this process. Changes in programs are not a separate issue from the student. These are his classes, his major or minor, his higher education that will be changed or remain the same. To sit back

and have no part in such decisions is to sit back and have no part in your education.

As stated by Central Administration, "The general intention of Audit and Review of established undergraduate programs is that of enabling institutions of the system to provide for students the most effective range of Academic offerings possible within their available resources."

It is time that the student, not Central Administration alone, think about what they believe to be the most effective range of Academic offerings.

What does the student believe to be included in the quality of Education? This is not a time for students to sacrifice a meaningful education, but a time for students to critically redefine what their education and this educational institution is.

Talk to your instructors, find out how this Audit and Review might effect you, your classes, your education. After all, in the end it's the student who foots the bill.
Maria Alvarez
2223 Simms

**Consumer complaints
will be heard**

Open letter,
On Tuesday, February 11, students will have an opportunity to meet with Michael Brown, an investigator for the Bureau of Consumer Protection.

Students with complaints in the area of Consumer Affairs will be able to discuss these with Brown during his visit.

Problems dealing with business practices, commodities, landlord relations, etc., can be referred to Brown for investigation.

He will be located in the Communications Room of the University Center (UC) from 10 a.m. to 2 p.m., and in the South Private Dining Room of Debot Center from 4-7 p.m. Students should fill out a consumer complaint form before they meet with Brown.

These may be picked up in the Student Government Office or at Brown's office locations.

Barb Kiely
Student Government Secretary

Norman

**Student disagrees
with Bainter**

Reply to Dr. Bainter:
Since my hometown, Fort Atkinson, Wisconsin, is named the site for a proposed 1,800 megawatt nuclear power plant, I have followed the nuclear debates with considerable interest.

Unfortunately, whenever a high level debate over atomic energy is proposed the pro-nuclear people have often neglected to participate. Such was the case when the League Against Nuclear Dangers (LAND) tried to promote a debate between the former chairwoman of the Atomic Energy Commission (AEC), Dixy Lee Ray, and Dr. John Gofman, former associate director of the AEC's Lawrence laboratory.

Dr. Ray claimed her schedule would not permit her to participate in the debate. But, I find that rather odd since Dr. Gofman's response was "just name the time and place".

To this date Dr. Ray's schedule has been so full that she cannot debate Dr. Gof-

man. However, her schedule did permit her to visit Ripon College last year.

Last summer I attended the Public Service Commission hearings on the proposed Koshkonong Nuclear Plant. Much to my dismay, the Utilities blatantly refused an order from the hearing examiner to discuss nuclear safety.

I feel there is ample reason for concern over this Faustian bargain we are asked to accept. In the restrained language of a prestigious international scientific body, assembled at the 23rd PUGWASH Conference in 1973, the following statement was accepted, "No general solution for the isolation of long-lived radioactive wastes from the biosphere, necessary for many thousands of years, is yet in hand. That is, despite a wide variety of proposals, 'experts' still disagree on whether any of them will suffice...It is impossible to be

complacent about expansion in the use of nuclear power without having a solution in hand."

As one who may live next to a nuclear power plant, I feel that we should first develop permanent, long-term, safe methods of storing nuclear waste. Also, emergency safety systems, i.e. emergency core cooling system should be successfully tested; adequate monitoring systems for low-level radiation be installed; 100 percent insurance coverage against nuclear accidents provided; utilities be forced to periodically update their evacuation plans; and to answer or debate questions on nuclear safety.

And, too, I would like to know what effect a 1,800 megawatt nuclear power plant will have on a lake with a maximum depth of five feet? (Which is the maximum depth of Lake Koshkonong).

Values questioned

Open letter,

Appreciation must be expressed to some thoughtful individuals of the Point community. Thank you very much for whoever backed out or pulled into the municipal parking lot by the square on Saturday night of the last weekend in January.

You thoughtfully hit my car at least once and enough to put two dents in the body.

The owner of one body shop rated the repair cost at about \$100. My insurance company (who charges me enough already) reminded me graciously that the policy states through the "deductible" portion that I have to pay for the first \$100 myself.

But any contempt I might have for the unknown driver is uncalled for. After all, he was probably just out getting drunk and having a good time. So what if he has to drive? It's the other guys that

get into accidents from alcohol.

The grand prize deserves even more commendation though. That impressive individual took the gas cap from the same car on the first weekend of Feb.

We have been seeing ads on the tube and in the papers reminding us that shoplifting is stealing.

So this clever person must have figured, "Why should I take something of value, something that I could use and risk being caught and jailed or fined? Why not take something of no value to anyone except its owner?"

But this is where the majority of us know he was wrong. There is a massive black market for gas caps off of Fiat Spiders. In fact I am thinking of opening a shop in town selling just gas caps. In a few months I could have a chain of stores rivaling chains like K-Mart, Mac-

Donalds or Holiday Inn.

I will hit the history books as the one responsible for curing the economic turmoil of the mid-70's.

Then someday, when I decide that my life's goal is to be a philosopher I could write a volume or two entitled "On the Value of Valuelessness" that would rival greats such as "The life Story of the fabulous Freddie and the Dreamers".

Again, any contempt I may have had for the individual responsible is unfounded because that contempt in conjunction with my remarkable innovative talent created a value not often thought of.

So I suggest everyone go out and take something you don't need. I assure you, before long you'll be famous.
