SPRING

OCTOBER 15, 1976 15¢ OFF CAMPUS

WARREN

By Jim Warren, Graphics Editor

**To the Teachers of Point:** Face it, most university level professors are not the "White Tornado" in lecture sessions. Bobbing heads and half-closed eyes seem to be the trend in lecture halls these days.

A teacher cannot simply "present" the material and expect students to sit and absorb! This system works for a week or two but by the end of the semester, attendance drops and those students that do attend class bring pillows.

I agree that making a class interesting is not easy. I do believe, though, that it's essential for the professor to at least try a new concept or possibly a new teaching style.

Some teachers may feel it's not their obligation to oblige uninterested students. These teachers feel it's the students' obligation to attend class and either take their style or leave it.

These professors are obviously not concerned with the advancement of student knowledge but instead are content to present the material unenthusiastically.

Fortunately, these teachers are a minority. I feel the great majority of teachers are willing to try new ideas in the interest of the "exciting 50 minute lecture."

The following paragraphs contain some suggestions that might be helpful to the teachers of Point. These suggestions which I've gathered through classroom experience here at Point are directed toward the "dry" teacher (and you know who you are).

Discussion is very important in my opinion. I believe the teacher should encourage discussion in the classroom and not suppress it as I've seen happen in many lectures. Most students enjoy getting involved by simply stating their opinion. Even those students who don't become talkative will at least hear a voice other than the instructor's.

If the subject doesn't lend itself to daily discussion, possibly once a month, a discussion could take place on some other, though, related matter. This brings me to my next point.

Give the class something to look forward to. I know I can stay awake if a movie or a field trip is planned in the near future.

All the extras are nice, but I do realize that the lecture is essential to the teaching process. One way I've found that some teachers make the lecture more interesting is by relating the material to present day events.

I also realize that a few of these suggestions may sound rather elementary to some of the professors on this campus. These suggestions are not aimed toward those though; they are aimed toward the teachers who seem to be working for the NO-DOZ company.

I'm not by any means grouping the teaching staff here at Point into one big pile. Without the good teachers I've had, these suggestions would have never come about.

## Letters

### Funding around

#### To the Pointer,

Who's idea was it to fund the Coop? I wonder now how many students actually frequent the Coop on a regular basis. If my hunches are correct, it is a decided minority. If this is the case, then student fees are going to be used for the support of some outside, off-campus project which will only serve the needs of the few. What happens to the utilitarian principle, the greatest good for the greatest number?

What good are dormitory people going to get out of this? Food preparation is handled largely by Saga except for the small, rarely utilized kitchens. Time is another factor. Who has time to prepare elaborate organic meals or brew organic teas? Granted, there is a certain nutritional value in organic food, they just aren't especially practical to the typical, involved college student.

Any way why the Coop? Will Har-dees be next? Burger Chef? My guess is that they cater to more students. Is this someone's pet project for unrevealed reasons? I'd like to see more information before any final decisions are made—that is if they haven't made them already! Where's the student input on this decision? How can this funding be justified aside from poetic, socialistic philosophies?

Jack Ricker

### Babble on

#### To the Pointer,

For the past four years State Senator Bill Bablitch has worked hard for the people of central Wisconsin and the students of UWSP. Senator Bablitch co-authored and fought for probate reform and new campaign reform laws. He wrote Wisconsin's new rape law and the no-fault automobile insurance bill. Bablitch has not voted for a single general tax increase during his four year term in the Senate.

Senator Bablitch has done a great deal for us and now we have the opportunity to do something for him. He needs your help and support in his bid for re-election to the state Senate. If you would like to help Senator Bablitch to continue to work for us in Madison, please contact the Portage Co. Democratic Party at 341-7073 or stop in at 901 Clark or leave your name and phone no. at the Carter booth in the University Center.

We need volunteers to coordinate Senator Bablitch's campaign on each wing of each dorm in every student neighborhood.

Please help us to help Senator Bablitch. By doing so, you will be helping yourself.

Mark D. Waltman

### Seeing the light

#### To the Pointer,

In answer to all anti-hunters of the world, and in particular Mr. Flatley's letter in the Pointer. Add to the pile one more grip hunter vs non with no answer. Can it never be a truism that

a complaint by this group be followed with a solution. I find this in itself un-sportsmanlike (as we are called), to interfere with the true gains one receives in the hunter's endeavor. Is there such a thing as a license to hunt the hunter? Apparently, there is none or a set of regulations or limit.

Gentleman such as yourself, Mr. Flatley, knowing all about "true conservation" being so righteous as not to MURDER animals must surely know the proper method of game management. Myself being left of the path, not yet seeing the light, feel very left out. PLEASE, guide me.

I claim not to know the true solution to insure stable populations. Being misguided as you state, I seriously believe the best method is presently being implemented. Let's not argue because we stand on the opposite side of the fence and find faults in the people there. Let us condemn the personalities elsewhere.

And so, anti and non hunters, I ask not that you stifle your pens and mouths, but approach with answers that will guide the animals to proper management which I am truly interested in. Until which time this occurs, let individuals who fund, work at, and support management through hunting continue to do so, so it will become an endeavor which all might accept its benefits.

Sincere in solutions,  
Tom Presny

### Utter nonsense

#### To the Pointer,

The words uttered by the President of the United States that Eastern Europe is not under the influence of the Soviet Union shows a lack of knowledge of Eastern Europe by one of the most important people in the United States. How many other people do not know a thing about Eastern Europe? I am willing to wager many.

How many of you readers have heard of the Magna Carta, but not the Golden Bull of Hungary, of the Rights of Man and Citizen and not the Polish Constitution of May 3, 1791, of George Washington and not Thomas Maroryk, and who among you really knows what a croat is?

This University gives students and others the chance to learn what these terms mean along with learning how to speak Russian, how to interpret Russian philosophy, or how the Soviet government works. Through the Russian-East Central European Studies program, one has a chance to learn about these areas and others. It is to the credit of this University that a program such as this exists.

I have been a part for the past three years. Even though it is a good program, it should be improved. The program should be expanded to encompass more areas of Eastern Europe to give the students and others a more rounded view of what has happened or what is happening in Eastern Europe. This may help others from uttering similar inane statements as those stated by our President.

David Stefancic

## The choice is yours

### To the Pointer,

I wish to take issue with the statement made by Terry Flatley that only hunters are covered by the closed hunting rule imposed Sept. 16. To quote from the S.P. Daily Journal, Friday, Sept. 17, "The secretary's order also bars the PUBLIC from state parks and forests... except for DEVELOPED CAMPGROUNDS and PICNIC AREAS." Unless the meaning has changed recently, 'public' means everybody.

Also, to answer his question, no, these hunters probably would not send the DNR money, but then who sends Ford 150 dollars a month to pay for a \$5,000 car when they don't drive, who sends Sentry any money if they are insured with ZCJB, who pays for anything they don't use (with, perhaps, out taxes being the exception)?

I can think of other places to spend \$22.75 a year, other than in hunting and fishing licenses, but until some better way is found to do what the hunters are doing, I will continue to hunt because I feel that the few seconds or minutes it takes me to kill an animal is preferable to the months of suffering nature can inflict, and my use of that animal as food is preferable to seeing that carcass bloated and putrifying along some road, in some garbage dump, or even in the ex-animal's natural habitat.

Whether I'm right or wrong, who can say? Like other situations in life, you weigh the facts, consider your emotions, make your choice, and, right or wrong, you live with that decision.

James E. Benak

## Homecoming or going

### To the Pointer,

So this is homecoming. The best I can say about it is "big deal". Certainly I don't speak for everyone but, I'd like to ask - why celebrate homecoming at all? I'm not an anti-traditionalist but the event seems exaggerated and unnecessary. The same events are part of homecoming every year so the old routine seems tiresome and not all that fun. Tradition is not necessarily worthwhile, especially for this dull event. We all need a break in our demanding schedules so I'm not opposed to recalling good times with old friends, or having a grand time but, we have so many more activities that we can wholeheartedly participate in (whatever strikes your fancy) so why waste time on some event summing up the "good fellowship"

toward alumni that we don't necessarily feel? That seems so phony. Homecoming just doesn't have the glamor it once did. It might have been more appropriate when universities were just starting, and getting back to your old school was more difficult, so, that if you were able to go back for a visit sometime it was really quite an occasion. Besides, I think that homecoming connotes a feeling of abiding admiration for the school attended. While I enjoyed my school years at Point and think there were many fine experiences to be had, I don't feel awed by the school's distinction (if has any) nor do I feel inseparably bound with UWSP like some students do toward their alma maters. On the other hand I don't think homecoming is inherently evil and thus needs to be eliminated. However, I do think it has lost its appeal and needs to be replaced with any activities that spark a lot more feeling and meaning for us.

Name withheld upon request.

## Co-operating

### To the Pointer

Just a short note to let my student government representatives (off campus-CCC) know I'm in favor of the proposal to join the students in the Ellis Street Food Coop, soon to be located on 4th Avenue and 2nd street. I support the Coop because of the nominal fee charged for the student membership with all its benefits, and also because of the idea of the Food Coop is to provide lower food prices. Also the Coop is one of the only two stores that I know of in town that have "health foods" at reasonable prices; plus located considerably closer to campus. Thank you and please vote for the Coop.

Gerald L. Konkol

## Straightened out?

### To the Pointer,

I was once a sadistic hunter—every weekend racing to the woods to inflict pain and torture on helpless little animals. In the recent past, I have changed my ways due to the realization of my sins brought to my attention by the provocative, logical anti-hunting arguments people have published. Now I am a fine, outstanding member of the non-hunting society. I even got a new job—I humanely tie up cattle and smash their heads wide open with my trusty sledge, in the better interests of humanity.

Dan Spethmann

## Moving on

### To the Pointer

I'm surprised that B. Puschel in her countryside sojourns did not mention the Myrtle Warblers. The migration is in full swing about now and it is a good time to observe these birds before they move on down south. A little sunflower seed will attract them.

Rick Kingsbury

## Bloody success

### To the Pointer,

The Red Cross Bloodmobile visit was a huge success, and everyone who donated blood and all those who volunteered their time deserve congratulations. Faculty, area residents, and especially students combined to exceed the quota by 36 pints.

Thanks must go to Beverage Bottlers of Wisconsin Rapids and Saga Foods for their donations of beverages and supplies, to the office of Protective Services and the office of Conferences and Reservations for their cordial assistance in parking and facilities arrangements.

Special thanks are due Alpha Phi Omega, a campus fraternity which handled the publicity arrangements, organizing of the student volunteers, as well as the setup and takedown of the Bloodmobile; the Stevens Point Junior Women's Club which coordinated the entire solicitation and scheduling of volunteer nurses and aides; and Mrs. George Isackson and her very capable assistants who prepared the cookies and sandwiches for the blood donors.

The next Bloodmobile will be on December 7 and 8 at the Elks Club.

David J. Eckholm, Chairman

### Letters Policy

1. Letters should not exceed a 250 word maximum. Longer letters allowed at editor's discretion.

2. Letters are to be signed as evidence of good faith. Name withheld upon request.

3. Deadline—noon Tuesday.

Deposit letters in the boxes outside the Grid, Cops or CCI. Address mail correspondence to Pointer, 113 Gesell, UWSP, Stevens Point.

## Series 9, Vol. 20, No. 7

Written permission is required for reprint of all material presented in the 'Pointer.' Address all correspondence to 113 Gesell, Stevens Point, WI 54481 Telephone (715) 346-2249.

SPONSORED BY STUDENTS FOR COOPS (SCOOPS)

# Tenant - Landlord rights reviewed

By Jill Unverzagt

Are you having trouble getting your security deposit back? Understanding your lease? Has your landlord been making unannounced appearances to finally make those long-over due repairs?

These are the types of problems that students have been coming to the Student Legal Services (upstairs UC) with, according to Ted Sullivan, president of Student Legal Society. He said that 64 students (20 percent of all student problems received) this year have had housing complaints.

Sullivan says that many of the questions that students have concern their leases. He said that many of them signed their leases without really reading them and want to know just what the responsibilities of their landlord are and theirs as tenants.

According to Sullivan, some of the problems students have with their leases are interpreting who is responsible for what repairs, when a landlord can enter the building, and what the tenant is responsible for.

Sullivan said that many times the Student Legal Services refers the students to the state statutes for information on termination and eviction policies, who does structural repairs, repairs because of negligence of landlord or tenant, and other legal technicalities.

He said that many students come to Legal Services because they want to know what the city housing codes are and whether their house measures up or not. Housing codes define how many people a landlord can stuff into a house, lighting, heating, fixtures, number of bathrooms, fire untenantability (what makes a house so bad that it can not be rented), etc.

A major problem that students come in with is return of security deposits, Sullivan said. He said that there is no law written anywhere about security deposits and what the conditions must be for retention or return. He said that landlords refuse to return security deposits for various reasons and there isn't much a tenant can do except take him to small claims court.

Sullivan says that the Student Legal Services cannot give professional advice to anyone, but Mr. John Finn, the Student Legal Services attorney can.

When a tenant wants to take a landlord to court, Mr. Finn would advise the student as to what grounds are necessary for prosecution, what the laws concerning this action are, and in general, the legal procedure. Sullivan added that the Student Legal Society not only refers students to Mr. Finn, but to the Housing Inspector. In this case, the problems usually concern housing codes.

Mike Lorbeck, Second Ward Alderman, says he hasn't heard much about student housing problems. All

he's heard is that some places are cruddy for the amount of rent, heat or cooling won't stay inside and there are similar problems.

Lorbeck said the only real complaint he's received was from a next-door neighbor complaining about the shabby appearance of a house. There were cars in the front yard and junk all over. Lorbeck said when he went to check it out, the five guys that were living there were moving out.

He returned the next day with the Housing Inspector and they discovered the landlord was renting and building in the house without a permit. He added that they saw mice in the basement and closed it down.

"Students seem to be afraid to complain," Lorbeck said, and added, "People won't come to me."

Lorbeck said that soon he would be receiving a list of common problems from the Housing Inspector. He mentioned that the Housing staff are more than willing to help with any problems a student may have. All a student has to do is call and the Housing Inspector will be there to check on it right away.

Lorbeck said the Landlord-Tenant Bill, proposed by Lyle Updike, would have addressed many problems, but that it died when Updike lost the primary. He said that Updike was campaigning for assembly on the bill, trying to get students out to vote for it and himself. Lorbeck explained what happened to the bill.

"Updike knew the City Council would never pass the bill and it would go to referendum," Lorbeck said. He explained that you can pass any law on a referendum vote. All you have to do is draw up your demands, take it to your alderman, and he will present it to the city attorney.

You also have to get 1200 signatures on the proposed bill, 15 percent being from people who voted in the last election. Then the bill can be voted on in a referendum.

In the case of the Landlord-Tenant bill, many of the signatures were invalidated because of a technicality, Lorbeck said. When people sign the petition, they must write out all the information.

Lorbeck explained that if the first person on the page writes Stevens Point as his address, and the rest of the people on the page use ditto marks (""), instead of writing it out, their signatures are invalidated. He says this is a state law.

Because of this, Lorbeck said, Updike did not get the necessary number of signatures and the bill never went to referendum. Lorbeck added that the concepts of the bill were good, but the enforcing of it needed to be more practical, more thought out.

Lorbeck stressed that students should not hesitate in coming to him or the Housing Inspector with their complaints.

## Socialist presidential candidate to visit Point

Frank P. Zeidler, candidate for president on the Socialist Party ticket, will speak Monday afternoon, October 18, at the University of Wisconsin-Stevens Point. His talk will begin at 1 pm and last about one hour in the Program-Banquet Room of the University Center, sponsored by the Student Political Science Association.

Zeidler will be the third presidential candidate this year to speak at UWSP. The others were Democrats Jimmy Carter and Morris Udall, but different from their bids for high office is the fact Zeidler has never had illusions about winning. He has a budget of \$15,000 from small contributors.

In a recent interview he said "it would be nice if I could get one percent of the vote in Wisconsin" which is one of only seven or eight states

where his name will be on the ballot. Zeidler, who lives in Milwaukee where he was the socialist mayor from 1948 to 1960, isn't the first mem-

ber of his small party to visit UWSP. Years ago, in one of his many bids for the White House, Norman Thomas made a campus appearance.

Currently, Zeidler teaches a university course in Milwaukee, arbitrates labor disputes, serves as a consultant to schools and is an active promoter of several causes including the United Nations and his brand of socialism which he says stands for "a democratic cooperative society and not a totalitarian one."

UWSP also announced today it has received regrets from both Carter and President Ford for campaign appearances on campus prior to the election, though attempts are still being to book their vice-presidential running mates, Senators Walter Mondale and Robert Dole, respectively.

The Student Political Science Association which traditionally sponsors campaign appearances also is in contact with Congressman David Obey (D-Wausau) and his Republican challenger, Frank Savino, (R-Wausau), for a debate but a time has not been worked out.

Scheduled earlier was a debate between incumbent U.S. Senator William Proxmire, Democrat, and his challenger, Stanley York, Republican. It will be Monday Oct. 25, in the fieldhouse beginning at 1 pm.

Representative Leonard A. Groshek, the Democratic incumbent, and his challenger Mark Dutton, Republican, will appear at a candidate's forum sponsored by the League of Women Voters on Monday, Oct. 18 at 8 pm in the SPASH auditorium.

## New assault law protects victim

By Dawn Kaufman

There have been radical changes in "antiquated" rape laws in Wisconsin that served to brutalize the victim. According to a recent panel in Watson Hall, one such change has been an entirely new law that provided greater protection for the victim once they have been assaulted, and to instigate changes in societal attitudes toward rape.

Speaking Wednesday evening on the subject of rape and assault were Dr. Marilyn Scammon from the Health Center, Senator William Bablitch, the chief author of the new assault law, and Plainclothes Officer Audrey Reeves of the Stevens Point

Police Department. The panel was well balanced and panelists elaborated on several aspects of assault.

Dr. Scammon spoke of the rapists themselves and how they are classified by their behavioral patterns in rape. She stated that only 13 percent of the rapes are incarcerated. Even more astonishing is the fact that 43 percent of the rapes reported involve more than one person. Dr. Scammon said that the number of group or "gang," rapes is increasing steadily.

Senator Bablitch thoroughly explained the new assault law, and the four degrees of assault. It was pointed

out that the word "rape," has been scratched and replaced with "assault" in order to include attacks of homosexuality and males as victims of female assault.

Consent is also a major point of the new law, according to Bablitch. If one of the persons involved is against pursuing activity, then consent is not given and a conviction can be sought. Terms of consent are not necessarily given through written words, but rather spoken words or overt actions that indicate consent. Exceptions include intoxicated, mentally impaired and persons under the age of 15. These people are considered as unable to give consent.

Officer Reeves spoke of the security and procedure taken once the rape or assault has been reported. The major concern, though, is the state of mind of the victim. The victim is handled with great care and is not forced into saying anything nor urged to prosecute. All information is kept confidential.

Ms. Reeves stressed that anyone ever having been a victim of assault or knowing of someone who has is urged to give the necessary information to the police. Nothing can be done unless they are made aware of the incident. Officer Reeves concluded with a warning against hitchhiking, especially alone.

# Former spy pushes peaceful revolution

By Chris Wampler

Peter James, former American spy, was here last Thursday and not only captured his audience with CIA stories, but also tried to sell his new movement.

This movement will be a "Peaceful Revolution," he said and will officially open Saturday, Oct. 23, at Kent State campus. According to James the task would involve organized research by separate college communities, to track down any wrongful acts performed by government agencies.

In future generations, he said, corruption in government would disappear, as a result of this revolution. James said he sees the U.S. heading towards a police state, and said the revisions in government agencies must be made today by people who will govern the future.

In 1973, when James was in the CIA, there were over 30,000 letters sent to the Soviet Union from the U.S. James said 15,000 were mimeographed unopened, and 7,500 were opened and their contents copied, by the CIA

James said it is activities like this that must be stopped.

The former spy, reflected that he wasn't on a crusade to crash the walls of the CIA, but planned on going about the investigation both practically and with patience. "And hopefully," James continued, "We'll show Congress how to run a real investigation."

James, however, was never paid by the CIA, nor did he sign the traditional "secretary oath" so often endorsed by legitimate spies. Nonetheless while he traveled through Europe and the Soviet Union as an aircraft engineer for Pratt-Witney Aeronautical Co., he compiled a considerable stack of "raw intelligence" that he voluntarily turned

over to the CIA. This information included thousands of photographs of Soviet space engineers, jet engines and the space vehicles themselves.

During his duel career from 1965 to 1971, he became familiar enough with wrong-doings of U.S. investigative agencies to produce two rather incriminating books: "The Airforce Mafia" and "Soviet Conquest in Space."

Getting the novels published was difficult and according to James, he and William Proxmire had to ignore threats by both the CIA and Pratt-Witney Aeronautical Company, to get them published. After the speech slide presentation one audience member asked James if he felt everyone in the CIA operated unethically. James remarked that "only a small percentage in the agencies operated illegally. However," he continued, "it only takes a few in high positions to perform some wrongful act and it spreads like a fever to the rest."

## Chileda's campaign off to slow start

By Jerry Owens

Chileda Institute's Fund Raising Campaign, recently ran into some difficulty trying to get off the ground.

Chileda's difficulties seem to stem

from the lack of public awareness in the goals of the campaign, said Donald Heidel, director of social services at Chileda. The goal of the campaign, Heidel said, is to raise one million dollars to purchase Steiner Hall and to build four residential treatment centers.

In the first week of September the campaign commenced with representatives of the local media present. Chileda was then working with a

professional fund raiser, to guide them along in the preliminary stages of the campaign. However, because of the expense, the fund raiser was dismissed.

Presently, Chileda is using a more personal approach in achieving its campaign goals. This approach, explained Heidel, is to obtain volunteers in order to contact all prospective donors on a personal basis. Heidel feels that this process is slow, but once the public is aware that their money is being put to a good use they will want to participate in the campaign. Heidel stressed a need for more individuals to assist in advancing the campaign. Presently only eight volunteers are informing the public about Chileda.

According to Heidel, Richard Dudley, president of Forward Communications and public relations chairman for Chileda, is presently coordinating a campaign through the media. Heidel said that if any UWSP student wishes to either contribute money or to encourage persons to become involved with the campaign that student should contact Jim Eagon, Student Government Association (SGA) president, and he will relay any information to Chileda.

When the money from the campaign is finally raised, approximately \$550,000 will be used toward purchasing Steiner Hall. Included with the purchase of Steiner Hall is an adjacent area, 260 by 210 feet. This area will be used to build four residential treatment centers.

Heidel said the concept behind the treatment centers is that "all behavior is learned, and thus you learn what you live." He said the proposed resident homes have been designed to eliminate barriers to ambulation and contain special living and learning centers, based on a homelike setting. In essence, Heidel said, this physical arrangement will enhance the entire educational and developmental process of the children involved and speed their return home.

Heidel concluded by saying, if Chileda's vital work with the multi-handicapped is to continue, the children's fund campaign must be a success.

By 2nd Ward Alderman  
Michael Lorbeck

In a democracy, all citizens should be able to give input to their government and participate in the decision making process. In order for people to do this, they must be kept well informed about what the government is proposing to do.

On July 2, 1976, the state's Amended Open Meeting Law went into effect. This law was designed to force government to let its citizens know what will be acted upon at its meetings. To accomplish this, the news media must be told what will be on the agenda of a meeting twenty-four hours before it is held.

Questions have been raised concerning the legality of adding items to the agenda at a meeting, when these items were not included in the list which was given to the press.

According to Portage County District Attorney Daniel G. Golden, "...an agenda should be specific enough to include all items intended for consideration and action by the body in question, and that said agenda should in fact be part of the public notice of the meeting in question. This is the logical interpretation of the language in the Open Meeting Law, which requires that notice be made of the 'time, date, place and subject matter of the meeting...in such form as is reasonably likely to apprise members of the public and the news media thereof.'"

"This language would be meaningless if public bodies were able to properly give notice of their meetings, but not the specific items to be considered."

If this is true, the City of Stevens Point has probably been violating the law since it was amended in July.

Stevens Point Attorney Louis J. Molepske disagrees with the District Attorney. In a memo to the Mayor, Mr. Molepske states, "As the city's counsel, I do not agree with his (Golden's) particular opinion as it absolutely prohibits the amending of the agenda to add materials which were omitted."

In a memo to the aldermen, Mayor James Feigleson has said, "This memo concerns the diverse opinions of the District Attorney's and City Attorney's offices in regard to the Open Meeting Law.

Since it has never been or will be my intent in adding items to the official agendas for the Plan Commission, Board of Public Works, Airport Committee, or Common Council meetings which I chair to surprise members or slide controversial items through, I shall add only items which have been consented to by two-thirds of the majority present and only if I feel an item is of extreme importance in conducting the business of our municipality."

Clearly, what is at stake is the public's right to know what government is doing. Although we probably won't know what the exact definition of the law is until a government is taken to court for violating it, and a judge decides what it really means, I feel that the city should follow the intent of the law as defined by the District Attorney.

At this point, I intend to vote against adding items to the agenda of Common Council meetings unless it is extremely important that we act quickly.

**NOTE**

The C.D. hearing mentioned in last week's column has been moved to Nov. 4th, at 7 pm in the Sentry Ins. Auditorium.

**News Notes**

**Child care opening**

The Child Learning and Care Center now has several openings for children ages 2 to 6. Two more children may be accepted for full-time care (7:45 to 4:00 daily). The cost is \$20 per week if either parent is a UWSP student or \$35 per week if one parent is a faculty or staff member.

Several children may be accepted on a part-time basis at a cost of .60 per hour for student parents or \$1.00 per hour for faculty or staff parents. Most of the openings exist during the after-noon hours. Stop in and visit at 009 Main or call 346-4370.

**Candidates forum**

The Stevens Point League of Women Voters, in conjunction with the Marshfield League, has announced a candidates' forum with incumbent State Senator William

Bablitch and Republican challenger Sydney Rouse at the Marshfield Public Library, Second and Maple Streets, on Thursday, Oct. 21 at 8 pm. The event will be broadcast live over WDLB Radio and will include a question and answer period.

# UWSP in Taiwan?

The University of Wisconsin-Stevens Point may have a branch program at a Nationalist Chinese university in Taiwan as early as next fall.

UWSP Chancellor Lee S. Dreyfus said Wednesday he made contacts for this university during a 12 day educational tour in Taiwan which had concluded the day before.

It would be the fifth nation—the second in Asia—where UWSP has a branch. Others are in England, Germany, Poland and Malaysia. The university also is in the process of working out arrangements for new branches in India and Spain.

Dreyfus had been on an educational mission to mainland China about 18 months ago and had hoped arrangements could be made for a program there even if it were shorter than a

semester. But he has had difficulty progressing with that plan.

In Taiwan, he says UWSP has the best prospects of co-operating with the University of Soochow in suburban Taipei or the University of Tungkai in a more rural area.

Dreyfus, who joined other directors of the American Association of State Colleges and Universities for the tour, said the Taiwanese emulate the United States "in just about everything."

The people "see themselves under a war footing" and live in preparedness of possible attack from the mainland Chinese. He said, however, that the nationalists are getting "so they'd like to take a crack at the mainlanders and believe they someday will recapture the mainland."

By Jim Eagon

Revolution! That's what Mao called for every seven years to revive a nation. Well, much short of a revolution, but a hopeful move to revive responsible representation in the Student Government Association is a resolution eliminating "college representation" in Student Government.

Instead of the present Student Government Association, consisting of students elected proportionately from the colleges and on and off campus districts, the resolution calls for a constitutional change to read "Membership of the SGA shall consist of forty (40) Student Representatives elected proportionately from an on-campus and an off-campus district."

What would instigate such a change? There are several reasons. One is that acquiring enough students to represent their colleges has been difficult to do in the past. This year, those college representative seats not filled were changed to "open seats" and a proportionate number of off campus and on campus students interested in SGA filled these immediately.

A second reason for the abolition of college representative seats is that the purpose for which they were established in the first place no longer applies. They were originally formed to serve in the now non-existent assembly to balance the special interests of the organizations with the special interests of the college.

With a forty member body being elected without the inclusion of obvious special interest groups, the SGA will do a better job representing the students as a whole. The need for college representation no longer exists (if it ever did). Students must be represented in the most effectual manner the two districts designated by population of the students.

A cry has been sent out asking that the SGA be reduced in size from 40 student representatives to 30 or even 20. This indeed would be a step in the wrong direction. It has been said that with the number of seats now existing, the SGA is bending toward communism—the ratio of representatives to number of students is too low.

To paraphrase: if this is communism, let us make the most of it (or at least utilize some of its positive aspects). Forty seats obviously allows for a greater diversification of student ideals—is that not what governance is all about?

The resolution calling for the abolition of college representation will be on the docket this Sunday for consideration. If you wish to present your views, attend the SGA meeting, 6:00 Sunday in Allen Center Upper. Your voice as a student is at stake.

# Ancient film excavated

By Carl Lundgren

The beginnings of film are lost in the shifting sands of prehistoric times. The only proof we have that stone age film existed is the marquee over a Cro-Magnon cave. The last movie show appears to have been "Gidget Goes to Mesopotamia." Beneath the title were the words "Rated 'X' by an ali-Neanderthal jury."

We know that the ancient Egyptians tried to develop a film industry, but they didn't get very far. Their drive-ins were a complete failure—they could never get the shape of the screen right. Actors unionized and complained constantly about poor treatment. Finally, the whole business collapsed when Moses led

the extras out of Egypt.

Jerusalem had a small film business going for awhile. Only one memorable film was made, "David and Goliath," of which the Bible says, "David got rave reviews and was in great demand with the talk shows." Unfortunately, this passage has been inaccurately translated in English Bibles, and reads, "He looked upon the zebra with regret."

Greece became the next film capitol of the world. Sophocles is considered to be the greatest of Greek filmmakers. His "Oedipus" series earned him the title, "King of Ancient Comedy." The famous scene in "Oedipus Rex," of the meeting between Oedipus and the Sphinx, has the distinction of being the first pie-in-

the-face gag in film history.

Roman film got off to a shaky start commercially, because they had not yet perfected the indoor theater. Drive-ins were never very popular because the horses got in the way. Besides, it's not easy to make out in a chariot—your feet keep getting caught in the wheel spokes, and your other important parts get tangled up in the reins.

Ovid sympathizes with those who try to make out at drive-ins, in his "Art of Love." He warns,—"Instruct your lover to never say 'giddap' no matter what happens."

The rise of the Roman Empire marked one of the most tragic periods in film history. First Julius Ceasar burned the great Film Library at Alexandria, and then Nero attempted to purge Rome of all film journalists. Gibbon states that many "Christians" were burned at the stake, but it is now generally agreed that he meant "Critics."

Despite numerous hardships, the Roman film industry continued to thrive, as we can see by reading the book of Revelations, which predicts, among other things, the coming of Ken Russel.

Around medieval times, things really began to pile up. Large numbers of barbarians started cranking out cheap "B" movies about guys riding around on horseback, raping and pillaging. This trend began with a commercially successful picture called "The Wild Huns," which, of course, spawned hordes of sequels.

Later, these filmmakers switched

to Viking films, which were essentially the same thing as the Hun pictures, except that these guys used boats.

Saint Augustine was the first really big medieval filmmaker. He made a classic movie called "The City of God," which was about the barbarians arriving at Rome. It was kind of an old world version of "Nashville." When he got older, he produced a semi-autobiographical picture called "Confessions." It was about this guy whose mother dies, causing him to become a Christian. He starts to worry about when he was a little kid, and stole some pears. Later, he develops a fear of women.

The age of feudalism brought with it a plague of films concerning macho guys wasting dragons on their way to Jerusalem. Also this period gave birth to that ever-popular entity, the Cerf Movie.

Despite attacks from radio DJ's in Constantinople, and independent heretics like Cassius Kubrick and Flavius Warhol, the big Holy Roman Studios continued to control the film industry throughout the Middle Ages.

Changes in the film world came about slowly largely because movies had to be hand-copied. When film printing came along, thousands of monks were put out of work. Fortunately, the new world was in the process of being discovered and all these unemployed monks headed for America, hell-bent on bringing talkies to the Indians.

## Speed up your reading

By Scott Simpkins

Have you ever studied all night for a test, only to flunk it the next day? Are you having trouble deciding your major? Does it seem to take forever to go through reading assignments? If you answered "yes" to any of the above, a trip to the Reading and Study Skills lab may be just the thing to help rid you of those problems.

Some of the problems they can help you with are: increasing reading comprehension, how to study for and take exams, how to take better lecture notes, how to study a textbook for better comprehension, and how to listen better.

At the lab, they use a very simple method of helping you with any reading or studying problems. They determine what is causing the problem and then help you practice to

eliminate it through various exercises.

There are many other things you can better yourself at by stopping in periodically at the Reading and Study Skills lab.

You can get help in deciding your major or setting up future goals, developing your vocabulary, organizing time for achieving set goals, and the lab's "specialty", improving your reading rate.

The average college student reads about 250 words per minute and you can check yourself to determine your own rate very easily by reading a passage out of a book at your normal reading speed for one minute, then count the number of words you read. If your speed turns out to be much less than 250 w.p.m., it wouldn't be a bad idea to stop over at the lab for some help.

One of the ways the lab can help students deal with their reading and study skills problems is through offering Psych. 101. Through this course, you can usually double your reading speed and eliminate a good deal of your bad study habits. This is the third year Psych. 101 has been taught and this year there are 88 students enrolled in it.

Mr. Randall Peelen, director of the Reading and Study Skills lab with the assistance of Linda Kaiser, teaches Psych. 101. This is Mr. Peelen's first year on campus and also the first year the lab has had a full-time director. The lab was established by Dr. Elsenrath with the help of Dr. Mosier four years ago and was then located in the basement of Nelson Hall.

Mr. Peelen, along with Linda Kaiser and five other student employees, make up the working staff of the lab and are generally on hand, ready to help.

Mr. Peelen said that in the future, he wants to expand the Psych. 101 course and the services they now provide because more and more students are coming to college lacking the skills necessary for learning at college levels.

He also indicated that in the future he wanted to split the Reading and Skills lab up into two parts to make it easier to reach more students.

Mr. Peelen, in addition to his work at the lab, goes to dorms and various classes giving "How to study" talks and trying to make more people aware of the lab's existence.

The lab is located in room 307 of the Collins Classroom building and is open between 9 am and 4:30 pm on Monday through Thursday, 9-12 on Friday, and on Tuesday and Wednesday evenings from 7-9 pm. You can stop by or call 346-3568 for an appointment.

# New TM group formed

## TRANSCENDENTAL MEDITATION

"Inner happiness is the basis for successful and fulfilling activity."

series of classes, students are taught to induce a state of mental relaxation. Through suggestion students are able to rid themselves of addictive habits, such as smoking and "negative thoughts."

Arico, meaning "open door" in Bolivian, teaches students to achieve and maintain the divine life through various physical and mental exercises such as chanting, dancing and meditating on wall symbols.

Psychosynthesis believes the self is a center of awareness around which the true self is thrown off balance. To restore this balance, psychosynthesis uses group and individual therapy, meditation and written self-analysis.

of this movement is to put individuals more in touch with themselves, others, and nature. It reinforces the traditional beliefs that man is basically good, human progress is inevitable, and man's character can be altered.

The purpose of Transcendental Meditation is to increase our consciousness through meditation and by

so doing increase our mental capabilities, thus enabling us to experience finer levels of thinking. Transcendental Meditation removes stress accumulation, therefore improving our attitude toward others. It provides both freshness of body and mind. Mr. Lansdorf stated that the benefits of meditation are far reaching.

By Rosanna Greunke

Are you looking for a way out of all the tension and frustration you experience every semester when you have three finals within two days? Well, then maybe the newly organized Transcendental Meditation group on campus can help you out.

Transcendental Meditation is only one of over 8,000 techniques practiced in America today. Some of the more popular techniques include Silva Mind Control, EST (Erchard Seminars Training), Bioenergetics, Arico, Psychosynthesis, and Biofeedback. All are aimed at releasing the self from domination of the ego.

Silva Mind Control relies mainly on meditation, self-hypnosis and guided fantasy to expand consciousness. In a

Biofeedback uses machines to tell an individual when his mind has achieved control over involuntary bodily systems. An individual is wired to a machine while meditating and when a mental exercise produces the desired effect it is signaled by the machine.

According to David Lansdorf, former student of Maharishi Mahesh Yogi (founder of the Transcendental Meditation program) and organizer of the new campus group, "the quality of consciousness determines the quality of anything else we do."

The new group is a result of a so-called consciousness revolution sweeping the country of late. The goal

## First yearbook in five years

By Heide Heldt

Five years ago was the last time UWSP produced "Iris," the campus yearbook. It's going back into circulation this year, but under a new title-Horizon.

Editor Julie Berlin who, two years ago, was a member of the revival yearbook committee, has great expectations for the new yearbook. She feels once the students are aware of what the yearbook has to offer, they will appreciate its revival.

Bob Kerksieck, Business Editor in charge of advertising and sales; Bob Busch, Advisor and director of Student Activities; Rick Cigel, Photography Editor; and Dorothy Sorenson, Managing Editor were responsible for helping Julie get the staff together for a good start. They too, were on the initial committees concerned with reviving the defunct Iris.

Thanks to a group of about twenty aggressive, "go-getting" students, the yearbook is beginning to take form with the help of new, fresh ideas and a lot of time, creativity, and effort. At the present time, the yearbook is only in its early planning stages. The staff is only at the bottom of a tall ladder to climb.

When some people first heard of the new creation, they immediately decided the student body was too large to understand the importance of a yearbook. Julie feels our campus is not too large for students to benefit from and appreciate a yearbook. As of now, the yearbook will be approximately 200 pages in length, but this will vary, as the production process continues. Julie also explained that a college yearbook is

much different than the high school yearbooks we are all familiar with. Not only does a college yearbook preserve memories, but it functions as a public relations source as well.

The staff feels an appealing yearbook could draw many new students to our university. Every high school in the state will be receiving a copy of our new yearbook to use for a reference guide. She adds, "Even if your picture isn't included in the book, it will bring back many good and valuable memories." She feels "a yearbook should be a kind of scrapbook—a collection of fond memories you can look back upon. It serves important social needs of a campus, and promotes good relations between students."

With regard to budget problems, the staff goal is to sell 1,300 copies. The price is \$9.00. The yearbook should be self-sufficient after this year. That is, it should no longer need financial allotments from Student Government or any other organization to fund it. The yearbook will be available after classes start in September of 1977, although it can be mailed during summer at the student's request.

While the Chancellor has been very supportive of the new yearbook, the Student Government hasn't. The staff is hoping for strong student support: a most important factor.

Yearbook time is finally here once again. Horizon is guaranteed to be packed with knowledge, full of new and old experiences alike, and will bring back and preserve the flavor of Point.

# Liberating the soul through ECK

By Gene Irwin and Connie Knutson

ECKANKAR, or ECK, is not a yoga, religion, philosophy, metaphysical system or an occult science. It does not use drugs, hypnosis, or other artificial means of consciousness expansion.

ECKANKAR teaches that the heavenly worlds are comprised of several planes of existence, each denoting a certain amount of spiritual growth and level of consciousness. Throughout history, mankind has been told that the normal evolutionary procedure is ascension into these planes following death.

ECK, however, bases itself on the premise that death need not be man's only ticket to the heavenly regions. He may, according to ECK beliefs, through the practice of Soul Travel, daily transcend his cloak of flesh and roam unencumbered through the mighty God Worlds.

Soul Travel is said to be the art of shifting one's attention away from the material worlds into the worlds of

true beingness beyond energy, matter, time and space. Through the spiritual exercises of ECK and the inner guidance of the Living ECK Master, one proves, through his own experiences, that he may exist beyond the physical body and begins his journey back through the lower worlds known to us ECKists as the astral, causal, mental and etheric planes to the Soul Plane, the source from where he came

This is said to break his cycle of Karma and reincarnation and finally lead him into realizing himself, the state of total freedom and wisdom, and then to realizing God.

"Soul is total consciousness. It has the complete knowledge, love and power that all men seek, yet few people realize that these qualities are within themselves. They look to the outer, instead of the inner, self. The liberation of Soul is, of course, freedom from the surrounding materiality which has all but made a prison for it in the lower worlds. When Soul leaves the physical body to journey into the far worlds, it does so through the Tisra Til, the third eye. It meets the Mahanta, the Living ECK Master, after passing through the gate of the tenth opening, who escorts it into heavenly worlds where it experiences the joys and bliss of life," said Paul Twitchell, one-time Living ECK Master. The following is an account of an ECKist on campus and his point of view.

As a student of ECKANKAR at UWSP, my concepts of life and what comes after death, have undergone

considerable change.

I began studying the works of ECKANKAR two years ago, while attending classes at this university. At that point in my life, I was going through what is termed, a "state of search", meaning that condition or state of mind one has reached in the evolution of his consciousness where a particular set of religious or philosophical beliefs no longer satisfy the strong inner drive for the expansion of consciousness.

The whole purpose of ECKANKAR is simply that the individual establishes the fact of survival beyond the physical body or this life and the management of it. Hence, Soul Travel.

Studying ECK and practicing the techniques for Soul Travel give one an understanding of spiritual liberation within this life time. It is to show us there is salvation in this life, or survival of the true self. No other system is so oriented except Hindu religious teachings—Vedanta, yoga, etc.—which can give one a sense of immortality but not proof of survival.

ECKANKAR is a way of Life. It is the most ancient religious teaching known to man. All the sacred scriptures of man and writers, from Plato to Kipling, have spoken of the "Far Country" which all men hope to reach. There are more than three million followers of ECKANKAR throughout the world today, proof that the experience of the Far Country is not sole province of the spiritual

figures of the past, but can be achieved by anyone of any age with a bold heart and adventuresome spirit.

ECK teaches the continuation of the individual throughout eternity, not the personality which varies from life to life. The personality will eventually be lost, leaving the individual to endure as a co-worker with God. The individuality is the essence of the individual.

I am an ECKist and I follow the man-made laws. We are not out to change social structures or to become politically influential. ECK is the first truly individual religion, and it is not concerned with mankind in the masses, but only with each person as an individual. It is the study of truth and is not a product of the imagination or does it have anything to do with psychic games.

Before I got into ECKANKAR, I had little awareness that there was something beyond what could be seen with the physical eyes and experienced with the physical body. I am now more aware of different planes of existence which are not available through other teachings. Also that this path cannot be bottled in creeds or dogma. Everyone must experience this directly for themselves; for some, this will take lifetimes.

When one gains an insight or a glimpse into the worlds beyond this physical world, there is a realization that what is being given him in the study of ECKANKAR, is Truth.

# Homecoming: A flexible tradition

By Sharon Malmstone

Homecoming has traditionally been a time when people are welcomed back to the old alma mater. Parades, floats, and dances are but a few of the festivities marking the occasion. The meaning and relevance of Homecoming is different today than it was half a century ago. As people's ideas change, so do their patterns of celebration. Because of this, Homecoming festivities will always remain flexible.

The first Homecoming took place in Champaign Urbana in Illinois. It originated in 1910. At this time, Central State Teachers College in Stevens Point was still recruiting a football team. It was not until 1922 that Homecoming became a reality locally.

It began when CSTC realized a need to secure new students. Advertising seemed to be the obvious solution to the dilemma. A committee was appointed and funds appropriated by the faculty. Results of the publicity were good. The following year at a meeting of faculty students, and alumni, someone suggested an annual celebration in which all groups could participate. Enthusiasm

spread throughout the group and new ideas were generated. As a result of this meeting, the Homecoming tradition was born on this campus.

On October 24, 1922, CSTC hosted Milwaukee Normal School in their first Homecoming game. Although Milwaukee won, a pattern for Homecoming's future had been established. The social festivities began with a pep rally, followed by a snake dance. Later a parade four-to-five blocks long traveled through the streets.

The parade was an elaborate device designed to instill homecoming spirit. All worked together to make the affair resemble the Mardi Gras in New Orleans. In honor of the occasion, Stevens Point businesses arranged displays and trimmed their windows, while city officials decorated the streets. Each year a committee developed a theme to be reflected in the ideas the floats represented and the type costumes that were to be worn.

Faculty members involved themselves extensively in the homecoming celebration. For years they took part in the parades, dressing up in costumes and competing in various stunts. One year, the women faculty

members rode different types of vehicles in the parade. After pushing her way through the entire parade on a scooter, Miss Roach complained of one worn out shoe and two worn out legs.

Frequently incidents occurred during the parade which added an element of humor to the scene. One such episode, which took place during the time when floats were still being drawn by horses, left a lasting memory in the minds of those involved. Ferdinand Hirzv, a member of the faculty, prided himself for his idea of entering a cannon in the parade. This latest addition followed the hayrack. Mr. Steiner, a knight in armor, rode gallantly next to the cannon. The parade moved jubilantly across town, and when suddenly, the cannon exploded.

The crash startled the horses, which instinctively took off down the street. The frightened teachers on the hayrack cried at the top of their lungs for help.

The shock of the cannon was so great that several windows in nearby buildings shattered. It took nearly two years before the controversy over payment of damages was settled.

Homecoming continued to grow despite such problems. It became increasingly important and meaningful each fall. Almost everyone attended: alumni, students, faculty, and residents. The reason for such elaborate celebration was to lure old friends back to their alma mater and extend to them a hearty welcome. Together students and faculty worked to make each homecoming a time never to be forgotten.

One student expressed representative feelings when he wrote this welcome message to the returning alumni in an October 1936 issue of the Pointer:

"The longer one is in school, the more he comes to realize the full meaning of homecoming. He looks

forward eagerly to seeing and greeting again his friends of former years, exchanging with them reminiscences which are now cherished memories and delighting in their companionship.

"This writer is only a senior, so he cannot describe accurately an alumnus' feeling on that day, but if they are anything like this, they are emotions that are too deep to permit an explanation.

"So again, welcome grads! May there never be a dull moment in the day. Let us know that you're glad to be back, and we will do our best to show you a hearty and sincere welcome."

To encourage even greater participation in future years, prizes were designated for the most beautiful car, the most comical car, and the best stunt. By 1928 almost every organization had a float. Float building proved more economical when originality was stressed rather than beauty.

Students admire their float

A bevy of

Heads turn.....

To add a special touch to the festivities, a band was formed. It became an important part of the parade. By the end of the decade some felt the band lacked participation and spirit. Former members among the alumni received letters asking them to come together on homecoming day to form their own band which would "blow the college band off the map." Rather than competing, alumni and students teamed together. They generated inspiration to many who attended.

Dedication of the new football field took place in 1932. Loud speakers had been installed. For the first time, play by play events were broadcast to the fans.

A few years later, the football game was watched by a most distinguished guest, Miss Sara Margretha Anderson, the first homecoming queen by popular vote. This turned out to be so successful that it remained an annual event.

In 1942, students and faculty applied themselves enthusiastically to Homecoming. Hobo Day was initiated at the time. Everyone dressed in their oldest and grubbier attire to complete the picture. The hobo king was designated at the pep assembly by popular applause. He joined the newly crowned queen. The festivities following the assembly included a

snake dance winding its way to the bonfire and a semi formal dance.

In place of Homecoming the following year, a Harvest Ball was held for the students remaining on campus. The next year also brought an autumn festival. The few men on campus elected a queen. A Sadie Hawkins dance made it possible for the girls to choose their partners. Homecoming, labeled Football Frolic the year after, revived previous activities and pre-war school spirit.

The Friday before that homecoming day, students organized a band. At 2:30 they marched through the halls of Main, playing their instruments. The music served to entice the students from their classes into the auditorium for a pep assembly. After several cheers the captain of the football team crowned the homecoming queen. Loud cheers and vigorous clapping determined the hobo king.

That night the queen lit the bonfire, which, in line with tradition, was organized by the freshman class. Afterwards a snake dance, enabled participants to join hands, and, in a tug o' war, crack the whip fashion, the enthusiastic group moved to the square, yelling and singing as they danced. The evening ended in a juke box dance in the gym.

On Homecoming day a crowd gathered to watch the parade which was the most important aspect of the whole ordeal. Nearly every organization had a float. High school bands traveled from other towns to march before the many spectators. Faculty, as well as students, actively and eagerly participated in the parade. The vigorous spirit of the fans spurred the team to victory. During the decade of the 40's the team lost only one game.

Throughout the 50's as in past decades, the chief goal of each homecoming committee focused on making that particular Homecoming biggest and the best of all. Posters, slogans, buttons, pom-poms, and mums were a few of the devices used to build school spirit. The students and faculty eagerly awaited the return of the alumni and made a special effort to plan an exciting weekend for them.

as Pointers head for victory

The most remarkable homecoming festivities took place in 1960. With the addition of a "yell like hell" contest, a large crowd gathered on the street in front of the Union. Cheers such as "Arf, Arf, Arf, Come on Pointers" were heard frequently.

An enormous parade took place on Saturday. For the first time, the Air Force Drill Team and the Stevens Point Chamber of Commerce took part. Nine high school bands participated. Thirty-two floats represented the hard work of nearly every organization. Eighty girl scouts gathered from the surrounding area to march along. Homecoming was made even better that year with a Pointer win over Platteville, 32-6.

As the school grew, various fragments of the homecoming activities were modified or changed. The whole basis of homecoming began to slip away. Instead of chief efforts toward school unity, energy was focused on group competition.

Students quickly lost interest. A complete revival of school spirit did not filtrate through to many students or faculty, who found themselves caught in a period of extreme individualism.

Today, many students don't realize what Homecoming really stands for. They have lost much enthusiasm for the spirited activities designed to set the mood for the game and the arrival of past students returning "home." When Homecoming was first originated, everybody worked together to make the next one the biggest and best yet. They did all they could to show alumni a spectacular time and again make them a part of the university, if only for a day.

Homecoming, like the fall season, is revival of the old and a continuation of the new. The ever growing enrollment makes group involvement and class identification a fading concept. School spirit is not the same. The future of Homecoming is speculative.

Hot night down at the Square

# Watershed plan for Wisconsin River

By Vicki Billings

A news conference was held at UWSP last Friday, Oct. 8, to help explain the new watershed plan being developed for the Upper Wisconsin River Basin. This and similar plans are being developed across the nation in response to the Federal Water Pollution Control Act Amendments that went into effect in 1972. Section 208 of the amendments requires that states "identify their own water pollution problems and recommend alternative solutions to those problems."

Accordingly, Wisconsin is developing a watershed plan to meet "208's" standards under the direction of a four man task force. Heading the

task force is Gary Schenzel. Working with Schenzel are Robert Martini, a natural resources specialist; Ronald Becker, a planning analyst; and Charles Olson, an environmental engineer.

The Wisconsin 208 plan has many goals as suggested by federal regulations. For example: "all water area segments must be assessed for quality; municipal and industrial pollution sources must be inventoried and projection made of future waste loads; municipal and industrial waste treatment needs will be decided upon; and the environmental, social and economic impact of the plan will be studied." The major goal of the plan is to meet the

federal water quality standards by mid 1983. That means that not more than 5 parts per million BOD and SS should be dissolved in the water.

This plan is not going to be developed just to be shelved says Schenzel. According to him, this plan really tries to clean up Wisconsin rivers, and thus, if it is going to work, it needs not only the cooperation of trained personnel like biologists and chemists but also the active support of Wisconsin citizens to appreciate the seriousness of the plan and to help where they can.

"208", once it is totally developed, will need approval by the Natural Resources Board, the Governor's signature, and the approval of the U.S. Environmental Protection Agency. "Thereafter any state or federal monies granted for pollution abatement purposes must be consistent with the 208 plan." The first phase of the plan is to be completed by November 1, 1978. Each year, the plan must be updated and reviewed so that in the time period between now and 1983 an adequate water level can be reached. More specifically, that means changing the technologies of industries and municipalities to better handle the wastes they discharge without increasing pollution in water systems.

A plan of this magnitude is not problem-free. Certain industries might be unwilling to comply with regulations, or be unable to forsee the benefits of such a program, but, as Schenzel explains, regulations are

already written into the Wisconsin Pollutant Discharge Elimination Systems permits (WPDES). "WPDES permits are issued to industries or municipalities where waste loads are occurring. The permit established a schedule for reducing the loads through better handling and treatment processes until they meet the nation's clean water goals," says Schenzel.

With 208 into effect the regulations will be more stringent. Permits will be issued in cooperation with the philosophy of the 208 plan. Failure to comply with the regulations will mean more misery for the industry or municipality. Failure to comply will result in the imposition of fines or, under "maximum consequences", imprisonment.

Schenzel emphasized that it is not their intention to put other businesses out of business. It's just their business to clean up the rivers. They can't really do that unless they develop standards and see to it that they are enforced. That may mean that industries are going to lose some of their profits into even more pollution abatement equipment but, once in and running effectively, their businesses will again stabilize.

Schenzel sees great promise in the program because it is the "first major environmental effort that stresses carrying out the recommendations of the plan, and, even though it will be an arduous task achieving the goals, we'll be better for it when we can appreciate more fishable and swimmable waters again."

## Environmental ethics

By Rick Kingsbury

The question that most often comes to mind immediately after witnessing any environmental catastrophe, such as the plans for a coal fired power plant in a national park, or, closer to home, the continuing destruction of the woods north of campus is; why? Why do we allow them to happen? Why does our society place only a dollar value on land?

Students at this university have a unique opportunity to explore basic and unconscious attitudes and values, on which people base their lives in respect to nature, in Environmental Ethics (Philosophy 380) taught by J. Baird Callicott.

The class follows a logical flow of ideas. The first consideration is about how what you are fits in with what you do—an investigation into how beliefs can temper or give aid and justification for actions. The second stage is an examination of the past in order to identify the bases that we have built our ideas about nature on. Many factors are examined including a hard look at the role Christianity has played.

An examination of the present is then made. What does science tell us? How is the process of evolution related to man, and does this provide us with a new understanding of ourselves as not separate, distinct, and above nature, but as a part of the dynamic nature of the earth? What does the often mis-used word "ecology" really mean, and of what significance is man's role in the environment?

Then with this back-ground, material examinations are made into

what a new and enlightened philosophical basis would be for an environmental ethic. Aldo Leopold and other modern environmental philosophers are discussed here, as well as the land ethic of the Native Americans. Discussions are held on how we can come to recognize ourselves as part of a larger community than the community of man.

While carefully avoiding dogmatic equations of what is "right", the class offers another point of view that, if taken in and put into practice, will result in a different kind of relationship with natural resources.

As a discipline of philosophy, Environmental Ethics is not yet established. Dr. Callicott is working to see it evolve as an extension of ethical theory and thereby raise it in status and consciousness in the public eye.

Many students who take the class are not "environmentally inclined," but dozens of these students have remarked that this class has really turned them around. They have gained a feeling of empathy with other living things on this planet, and feel more involved with the earth.

Some of the aspects of the course that students have found to be most interesting and rewarding include the examination the class makes into Native American thought in regard to land, and how it differs immensely with the Europeans who took the land and with that of most Americans today. The book, *Black Elk Speaks*, offers one different point of view toward land. The writings of Aldo Leopold are other favorites in the course.

prohibiting this year's bonfire. Due to the serious drought conditions this year, officials are not issuing any fire permits as a caution against starting any accidental fires, which could spread quickly and do considerable damage under these conditions. So take heart and enjoy the other activities.

The Eau Claire Dells controversy (over the placement of large power lines near a very scenic park) comes to the Marathon County Board meeting Oct. 26 at 2 pm. UWSP Environmental Council (109 CCC) will provide transportation to the Marathon County Court House for those wanting to testify or give their support by just being there.

**ATTENTION:** This is to assure all those attending Homecoming events that there isn't any plot against you in

The latest development on the proposal for a bike trail along Hwy 66 (northeast of Stevens Point) is being sent to State Senator Bablitch for presentation to the proper agencies. As of now the Environmental Council's proposal calls for a six foot wide trail, including foot wide yellow lines on either side adjacent to the main highway, but with ridges to keep cars off. The extent of the trail proposed will take it from the edge of town where Hwy 66 is the narrowest, to

Ellis where it would intersect with county highways.

Watch for further developments through the Environmental Council office-your support will be needed.

Thousands of salmon are dead as a result of the illegal dumping of up to 240 pounds of deadly copper-cyanide into Michigan's Grand River.

Although officials say the poisonous discharge apparently came from one of the nearly 40 copper plating plants along the river, they admit they may never be able to pinpoint the culprit.

The chemical first was detected in Grand Rapids sewers Sept. 30 during routine sewage sampling by city workers. Concentrations of cyanide in the sewers were five times the permissible levels, while copper quantities were 15 times higher than the legal maximum.

Chlorination treatments eliminated some of the poison, but samples from the river continued to show cyanide levels 3½ times higher than the normal one part per million.

State law provides fines up to \$10,000 for such discharges while a Grand Rapids ordinance imposes up to 90 days in jail for violators.

You are cordially invited to volunteer to help the Environmental Council this Saturday morning with the Recycling program. No experience necessary, coffee and donuts served free. Meet in Rm 109 CCC at 9 am, Saturday, October 16th.

## Hiking along the glacier's edge

By Barb Puschel

As any Wisconsin school child can tell you, there used to be a huge glacier that covered half of Wisconsin once upon a time, eleven thousand years ago. If he's an observant child from a hilly country along 600 miles of

a roughly northwest to southeast line across Wisconsin, he may tell you that the glacier made those hills that are called moraines.

Several years ago a group of Wisconsinites recognized these unique land formations and

organized the Wisconsin Ice Age Trail so the public could enjoy them too.

Here in Portage County, Tim Victor is responsible for the continuation of the trail. His biggest job involves getting permission and cooperation from private landowners to let the trail cross their property. This involves agreements that the trail make the least possible impact and least interference with the owners management practices.

The only restrictions to the trail's use include motor vehicles, hunting weapons, littering, and picking or damaging vegetation as well as camping without permission.

All the trail work, from blazing trees to brushing out trail, is done by volunteer labor. In this day and age there's no better way to work up a sweat and feel kinship with your ancestors than clearing a trail.

If you are interested in any aspect of this trail, there will be a meeting of the Portage County Ice Age Trail Oct. 20, at 7 pm in the Grid. (look for the rustic types or a hiking boot hanging over the table). There will be talk about working on the trail Oct. 30. For further information contact Tim Victor, UAB Trippers, or Environmental Council.

The Ice Age Trail is built for hikers, cross country skiers, and sight seers to enjoy the Wisconsin scenery. Campsites are provided by private land owners in places. From the educational point, aspects of the area's geology, botany and zoology, as well as it's Indian and pioneer pasts, are being made for public use.

By Barb Puschel

The smell of people burning their leaves is not around this year and we're missing one of the essential elements of autumn. Instead we're more likely to smell Mosinee.

Keep your ears open this season for the sounds of chattering chipmunks, honking geese, and children shuffling through the leaves on their way home from school.

Besides being the season for putting up storm windows, it's time for pumpkin pies and pumpkin seeds before the kids claim all the pumpkins for Halloween.

According to Mr. James Underwood Crockett, October is the springtime of indoor gardening in the gardener's circular year. Anyone know the secrets to blooming African violets?

Start getting ready for next week's eclipse of the sun, Oct. 23. To see it, you'll need a plane ticket to somewhere between central Africa and lower Australia where it will pass.

For those of you unable to hunt, the Almanack predicts good fishing today and tomorrow, Oct. 15 and 16. Take their word for it, not mine!

The last time the UWSP football team was a legitimate contender was in 1967. However, Monte Charles finally seems to be doing what he promised to do when he came to Stevens Point five years ago, make the Pointers contenders for the Wisconsin State University Conference title.

The Pointers pushed for their conference record to 2-1 and their overall record to an almost unbelievable 4-1, with a 17-9 win over Eau Claire last Saturday. Although they were victorious at the Bluegolds' homecoming, the Pointers appeared to have suffered a letdown after their upset win over LaCrosse the week before. And Coach Charles may have caught the Bluegold defense off guard, as the Pointers actually ran the ball twice as many times as they passed, something that has never happened under a Charles coached

team here.

As they have been doing all season, Stevens Point looked to the defense to come up with the big play, and they rarely disappointed. Only in the second quarter, were the Bluegolds able to mount successful drives. One 73-yard drive consumed nearly six minutes of the clock and fifteen plays, as the Pointer defense appeared helpless.

Halfback Noel Carlson capped off that drive with a two yard run. With four seconds left, the Point defense again gave in, and left Eau Claire just enough time to put over a field goal to give them a 9-7 lead at the half.

Of course, few should have worried when the Pointers went to the lockerroom at halftime with only seven points on the board, since the Pointers had outscored its opponents in the third quarter of the previous week 24-0.

The Pointers reverted back to their old dependable offense, the shotgun formation. "The Charles challenge" gave quarterback Reed Giordana some time to throw, which he lacked in the first half, and consequently, the Pointers were able to move the ball upfield 81 yards in eight plays, ending in a Giordana sneak from inside the one yard line.

From that point on, the game was at best dull. Both offenses sputtered, with flashes of offensive spurts lacking in both teams. While the Pointer defensive line was unable to sack scrambling Eau Claire quarterback Steve Krueger, it did hold the Bluegolds' workhorse fullback, D.J. LeRoy, to just 35 yards on fourteen carries.

Meanwhile, Dale Fleury, coming off an injury, replaced injured starting runningback Steve Stokes, and

piled up 72 yards in 17 carries while catching two key passes from Giordana for a total of 66 yards. Giordana passed only 23 times, but completed 16 for 223 yards and one touchdown, that to tight end Doug Krueger early in the game.

Giordana, who undoubtedly passes more than any other quarterback in the conference, has yet to throw an interception in the 1976 season.

The Pointers now find themselves in second place in the conference, trailing only undefeated Platteville. And this week's game is against Superior, the most natural opponent for homecoming. On paper, it would appear that the Pointers record should easily move up to 3-1, but the way the State University Conference has been operating this year, even the Yellowjackets could sting an unwary victim.

## Point ruggers stun Milwaukee club

By Todd C. Brenard

The Stevens Point Rugby Club scored a stunning upset last Sunday, topping Milwaukee 11-8. Many of the games more interesting moments were provided by Point's exciting Scrum Half, Ray Newcombe, who came through with two crucial scores. Newcombe, who played rugby most of the summer in Alaska, also plays on the Stevens Point football team.

The match began at 1 pm Oct. 10 and was a tight defensive battle most of the way. About 12 minutes into the first half, however, Newcombe plummeted through Milwaukee's defensive line and scampered 65 meters for the game's first score. Point followed with a successful follow up to make the score 5-0. After another 10 minutes, though, Milwaukee's experienced ruggers tied the score at 5 with a short run of 1 meter.

The second half began much like the first with both defenses playing tough. It wasn't until 10 minutes had passed that Milwaukee moved in close enough to take the lead, 8-5. Point immediately struck back by kicking a 30 meter goal to tie the score at 8, with only seven minutes remaining. As the clock wound down, the Stevens Point club was desperately inching toward their goal line. Then, with four minutes left in the match, Ray Newcombe again darted across the goal line to put Point in

the lead for good, 11-8. Three minutes later, the match was over; Point had upset the strongest club in the Midwest.

Milwaukee as a club, has been together for twelve years. They are considered the "fathers" of rugby in the state of Wisconsin. Each year the club sponsors a tour of England and Wales, where the best teams in the world compete. Milwaukee looked very impressive in last year's tour, winning one, tying once, and losing a very close match.

In comparison, our local club began about 2 months ago. Steven's Point's first two games were against very strong teams. Dodge County pulled off a victory by a very slight margin, as did Madison. Point showed great promise, however, in these first two games. All of a sudden, then, the club pulled together and took an exciting victory from a great team. Next week, Point will travel to Kenosha where they hope to continue their winning ways.

Our rugby club is still in its birth stages. It's a young, exciting, and interesting club that needs your support. All interested newcomers are very welcome to come out, join, and learn the skills of rugby football. Give Todd Brenard, Public Relations Director, a call at 346-4577 for information about the club's next meeting. Also, keep watching the Pointer for information

## Campus Bowling

By David Dettmann

This week's Pinbuster award goes to Bill Crown of the Monday afternoon league. Bill led his team, Camp Kawaga, to 3 wins by rolling a 539 series with high games of 214 and 181. That series was a tremendous jump of 145 pins over his average and earned him the award.

Other highlights this past week included two 600 series on Monday, with Tom Putskey's 641 taking top honors. Tom used games of 223, 223, and 195 for the fine set. Bob Maki also cracked the 600 barrier with a 609 series on games of 191, 207, and 211.

Top women bowlers Monday were Appie Trzebiatowski's 471 series (174 and 166 top games) and Cherrie Zierke's 466 series with top games of 167 and 161. Monday's fight for first place among teams found four teams tied at 4-2 and the rest of the league on their tails.

Tuesday's league also does not have a clear-cut leader in the team standings. Bob Bolstad took top individual honors with a 208 game and a 557 series.

Sue Beech hit a 183 game while Terri Lee was right behind her with 182 and 166 singletons. Janet Brixius took top series with a 461. The men had difficulty in coming up with scores as good as the women; Greg Kaczmar's 190 was the best they could do. Two teams lead the league in team standings with four more teams a game back.

Clutch bowling by several bowlers in the Thursday afternoon league highlighted the action there. Bruce Chapman used crucial 10th frame strikes to put together a league-leading 575 series and his games of 215 and 199 helped his team "A Bowling Team" take their first game of the year. Tom Pesanka used games of 210 and 184 for second high series of 551. Dora Gallardo captured top women's scores with a 167 game and 452 series. The Raiders B., in the league for who knows how many previous seasons, are making a strong bid for their first trophy as they lead the league by one game.

## Tennis

The women's tennis team took a double victory this weekend defeating Carroll and Stout, by identical scores of 4-1.

In the match with Carroll, the Pointer victors had a very easy time winning. Winning for Point were singles players, Anne Okonek 6-0, 6-0; and Kathy Janz 6-0, 6-0 and the two doubles teams, Mary Splitt and Mary Wach 6-0, 6-2; and Carol Weston and Sheryl Schubert 6-1, 6-0.

"Schubert and Weston (number 2 doubles) played extremely well. This could mean a great deal to us in our state competition," Coach Tate commented.

Stout was no more of a match than Carroll had been as the netters again won easily. Coach Tate was pleased with her team's victory and cited Anne Okonek as playing well. "Anne Okonek played her best match of the season," Tate said.

The Pointers close their regular season today at home at 4 pm against Green Bay.

# Duren speaks on

Former New York Yankee pitching star, Ryan Duren, came with just one message: alcohol is a drug and ignorance of this fact is the largest problem.

A fair-sized crowd composed mostly of students gathered in the Berg Gym Thursday, October 7, to hear Ryan Duren speak. Duren spoke in conjunction with the Responsible Drinking Program. The program is put on by various local organizations and this session's topic was entitled "Alcohol And You."

Since alcohol is a drug, Duren preferred to speak of "alcohol addicts" (instead of alcoholics) of which he admits he was one. He said that alcohol addiction is so common and ordinary that it goes on unnoticed under our noses.

In the half hour film, "The 3-2 Pitch," as well as in his talk, Duren spoke of his contact with this "mood and mind altering drug." At eleven years old, Duren decided that he would never become involved with drugs. He thought that he had lived up to his standards. Later he realized,

in his rehabilitation, that a drug was exactly what he had been dealing with.

Society has just never let alcohol be considered a drug. Duren felt that if society would regard alcohol as the drug it is, he would have been able to have received his treatment sooner. He might not have had to "give away the quality of life" for as long as he did—25 years—as an addict.

Duren cited the number one reason for problem societies is alcohol. Society puts it up on a pedestal, Duren said, and it is as if we are involved in a conspiracy, "the alcohol thing." No where on any bottles of alcohol is there a warning that it is a potentially addicting drug, as there is with other addicting drugs. And it can be obtained without prescription, without laws governing its use.

Each year \$10 billion is spent in advertising alcohol. Advertisers glamorize alcohol for the public and the public lets itself be lied to. The GNP of alcoholic beverages is in the early 40 billions, Duren related.

As co-ordinator of rehabilitation at

Stoughton Community Hospital. Duren spoke of the effectiveness of the treatment of addicts. The treat-

# alcohol

ment is "800 percent effective," Duren stated. If you treat one who is sick enough, he becomes the "banner carrier" for the whole gang. "Everytime we treat one, we educate others," Duren said. He considers himself lucky to have been treated. "One out of 36 addicts gets treatment or becomes rehabilitated," he said. "We lay the truth on people and it is amazing how well they get well."

In many cases, Duren said it doesn't make any difference if the user is an abuser or an addict. "You are dead if you drive off the highway as an abuser or an addict."

When is a person drinking in moderation? Duren cited this prescription as being sound. One ounce of alcohol for every 50 pounds per day, with the intake not greater than one ounce per hour; anymore than this lends itself to abuse.

"We are being held ignorant," Duren said. "Everybody is afraid to comment to others about abuse and this will only change if we acknowledge that it is a drug."

## Platteville still on top

Platteville football Coach Bob Seamans takes his "young and innocent" Kiddie Korps to Oshkosh Saturday for a major test against the rough-and-ready Titan defensive unit.

The freshman-laden Pioneers slipped past Stout, 10-7, in the final minute last Saturday and currently stand alone at the top of the Wisconsin State University Conference with a 4-0 record. They also won their only non-conference game.

Seamans' major concern at the moment seems to be that his youthful charges soon might realize what a tough league they're competing in and possibly lose their reckless abandon.

"We're so young we could lose to anybody," the veteran coach frets. "But, they're hanging in there. These kids are so innocent they don't know any better."

Despite the youth, the Pioneers do have a healthy blend of youngsters and veterans. Freshmen carried the day against the Blue Devils. Bob Clemens, a Lodi halfback, carried 16 times for 128 yards, including a 72-yard scamper, and also threw a 16-yard option pass to junior Ken Jakubowski with 42 seconds left in

the game for the touchdown that nipped Stout.

Another freshman, Larry Rohrwasser of Franklin, gained 132 yards rushing in 25 attempts.

Although River Falls turned two pass interceptions into touchdowns against Oshkosh in a 22-7 victory, the Titans still present a formidable defensive challenge with middle guard Len Kurzynske leading the charge.

River Falls and Stevens Point, both 2-1 in the conference, hope to remain within striking distance of the

Pioneers in home games Saturday. The Falcons entertain Eau Claire, while Stevens Point takes on winless Superior.

La Crosse, which whipped Winona in a non-league game last week, aims to snap a two-game conference losing streak in its Homecoming game against Stout. Whitewater plays host to national power Northern Michigan in this week's non-conference game.

Stevens Point's Jeff Gosa now has caught more touchdown passes (23) than anyone in conference history, surpassing the old record of 21 by Platteville's Rich Smigielski, 1968-69. Gosa has boosted his career records for most passes caught to 184 and yards gained on receptions to 2,397.

## 90-FM begins "Sportsline"

Beginning on Wednesday, Oct. 20, WWSF-FM will bring its listeners something which has become somewhat common in many major media markets across the country, but never before heard in this area. The new program is called "Sportsline," and it will be the first listener telephone call-in show in this area that is completely devoted to sports.

The show will be aired every Wed-

nesday night beginning at 9:30, and will run one-half hour. Sports Director Jim Maher will host the show, along with one or two other members of the 90FM sports department.

For the most part, the program will follow an open-line format, except in several cases, where sports guests will be invited to appear on the show. Anybody wishing to call in and air their comments in the field of sports should call 346-2696.

## Fill up that empty, Sunday night feeling.

The weekend's over and the dining room's closed. Sunday nights are a drag. So come by McDonald's® for a delicious Quarter Pounder™—a large order of world famous french fries and a soft drink. We can't do anything about Sunday nights, except make 'em a little easier to stomach.

# Pickers suffer bogus week

By Randy Wievel, Tim Sullivan, and Mike Haberman

The Superpickers were shocked by upsets in Week Five, and a bunch of top-flight NFL clubs went down with us. Week Five, to be blunt, was incredibly weird!

We were more than slightly befuddled over the turn of events. For example, take the Buffalo-New York Jets game. The Bills were coming off a 50-17 win over Kansas City. It looked like O.J. Simpson was back in form. The Jets, meanwhile, had chalked up four losses in a row. Buffalo was the obvious choice, right?

Wrong. New York beat Buffalo, 17-14.

Coming up next was the match between Detroit and New England. That one we thought we had in the proverbial bag. The Patriots had piled up victories over Miami, Pittsburgh, and Oakland. Not a slouch in the crowd. Meanwhile, the Lions were battered by the non-contending Packers and were briefly left without a coach on top of it.

Final score: Detroit 30, New England 10.

And on it went all day. The Super Bowl champion Pittsburgh Steelers went down again, taking us with them. Another one of our choices, the Atlanta Falcons, put up a good fight against New Orleans for three minutes. Then they were blown out, 30-0! One of our long shots, the Bears, screwed up an extra point and lost to

Minnesota. The Redskins scored an impressive 30 points but unfortunately gave the Chiefs 33.

All in all, we staggered in with 7 wins if the Rams won on Monday and were completely incorrect on the other six. Wievel finally won a tossup, making him 1-4 on the year, while Haberman and Sullivan slipped to 3-2.

Here are our choices for the sixth week in the NFL:

**NEW ENGLAND OVER NEW YORK JETS** - The Monday Nighter. In this one, the Jets are in trouble. Whatever they score, the Patriots will double. New England by 14.

**SEATTLE OVER TAMPA BAY** - This is the big game the world's been waiting for. Our roving reporter Harvey Hirohito thinks 17 points will be scored, and they'll all be Seattle's.

**SAN FRANCISCO OVER NEW ORLEANS** - It isn't often that we pick New Orleans to win. In fact, we're not picking them now, either! 49ers by 8.

**BALTIMORE OVER BUFFALO** - This game actually could go either way. Either the Colts will win, or the Bills will lose. No matter how you look at this, it's still Baltimore by 14.

**DALLAS OVER ST. LOUIS** - It's about time the Cowboys had to play somebody decent. If Dallas bothered to practice this week, they'll probably win by 7.

**WASHINGTON OVER DETROIT** - Both of these teams like to use tricky fake field-goal plays, but unfortunately for the Lions, they seldom get in range to try one out. Should be the Skins by six.

**MIAMI OVER KANSAS CITY** - It wouldn't bother us much if this game got cancelled or rained out, because we can't figure out either one of these outfits. Let's just say we believe (or hope?) the Dolphins win by 2.

**CHICAGO OVER LOS ANGELES** - This is not a misprint. Haberman's system has the Rams winning easily, but the NFL is good for at least one upset each week, and this is it! Bears win by 3.

**OAKLAND OVER DENVER** - Watch out for an explosion here. They might need two scoreboards to keep track of the points as the Raiders win, 35-31.

**CLEVELAND OVER ATLANTA** - The Falcons' running attack is about as dangerous as Mongolia's navy. In other words, neither one of them exist. Browns by 6.

**PITTSBURGH OVER CINCINNATI** - The hometown Steeler crowd should go berserk in this classic confrontation. We frankly don't think the game will even be close as Pittsburgh pound the Bengals by 17.

**SAN DIEGO OVER HOUSTON** - The Oilers depend too much on Billy Johnson's punt returns, and the Charger offense should be good enough to keep the ball away from Whiteshoes most of the afternoon. San Diego wins by 10.

**PHILADELPHIA AT GREEN BAY** - The weekly tossup. Wievel and Sullivan decided the Eagles will squeak out a win, while Haberman and Harvey Hirohito insisted it's the Packers on a last minute field goal.

**VIKINGS OVER NEW YORK GIANTS** - The Giants were mathematically eliminated from playoff contention when they lost their season opener on September 12. Minnesota will win this by at least ten points.

There will be an organizational meeting for all women wishing to try out for the 1976-77 UWSP Women's Basketball Team on Thursday, Oct. 21. It will be held at 7 pm room 119 of the Physical Education Building.

## Women beat NMU

The women's volleyball team played five matches this weekend and upped their overall record to 8-2. Winning four out of the five matches at Northern Michigan University, the Pointers looked great, Coach Moley said.

"We are playing better volleyball every time we get on the court. The girls are improving and we no longer have six people who play better than the other girls," commented Moley.

Moley attributed the lone loss to weak serves. The loss came at the hands of Western Michigan University. "In the games against WMU, Kathy Grotbeck and Wendy Kohrt probably played the best they have all season," said Moley on the success of her players even after the loss.

Beth Warnock, Lisa Patefield and Mary Beth Wintercorn were singled

out by Moley as playing well in the other matches. The Pointers used a 5-1 offense against Lake Superior State College with Warnock as the setter and it was very successful.

Against Ferris, Patefield and Wintercorn not only played well in their respective positions as spiker and setter but played excellent defense as well, Moley commented.

In the other victories everyone played well, Moley said. "The girls are beginning to act as one unit which caused the success so far."

Scores for this weekend's matches were: WMU over UWSP 15-13, 11-15, 15-13; UWSP over LSSC 15-6, 15-13; UWSP over Grand Valley State College 15-10, 12-15, 15-13; and UWSP over Northern Michigan University 15-6, 12-15, 15-3.

# "The Boys in the Band" is not a musical

By Kenneth Hobbins

"The Boys in the Band" is the second theatrical production of the UWSP season. Written by Mart Crowley, it is the first play in which everyone is homosexual.

The central action of "Boys" takes place in a New York apartment, in the present time. Eight men, all of whom are homosexual, are gathered at the apartment of one of them to celebrate the birthday of another. The beginning of the play is almost entirely comedy, with sexual jokes, inside chatter, and allusion to old movies and movie stars. But there are strong hints of misery beneath all of this gaiety. And with the unexpected arrival of Alan, an old "straight" friend of the host, everything begins to fall apart.

The host, Michael, grows edgy and angry, his spite and savagery overriding all decency. He proposes a cruelly personal game, and forces his guests to play. By the time the party is over there has been a fight, defenses are in ruins, and the party ends as a disaster. But although the party has been a disaster, one gets the feeling that the eight birthday celebrators will probably meet again at some other party, and manage to make do.

Life in the homosexual world as seen in this play, seems to parallel the day to day life among heterosexuals. There are jealousies and verbal recriminations and there are permanent unions, comparable to those of marriage, as well as infidelities and random connections, just like in the heterosexual world. According to student director Bart Schilewski, Stevens Point may not be ready for such a taboo subject.

He feels that "Boys" has a pertinent message for present day society. Basically the message is to beware of social conditioning as a basis for stereotyping, for stereotypes seldom work out. Stereotyping is dangerous in all forms of society and even actors themselves are leery of

being victimized. In this particular production evidence was present, as only fourteen actors auditioned for the nine roles.

The role of director is not easy, and often times misunderstood. He is the person who chooses the script and actors. He has final decision as to the

stage setting, choice of costumes and even the lighting. It is his job to arrange and determine the mood of each scene and guide the actors as they play it. Bart Schilewski feels that directing is more of a challenge than acting. As he viewed it, "there is a little bit of the director in every actor. Unlike the actor, the director can sit back and view the finished product."

"Boys" isn't the first finished product for Bart. A senior from Marionette, Wisconsin, he has directed several plays, recently working on "Damn Yankees" in Marionette this past summer. With plans for graduate school, he hopes to secure a directorial scholarship, thus make directing his career.

"The Boys in the Band" is a unique production. The script covers a time period of just two hours, with no break in the script. The cast consists of nine males, all of whom are on stage at all times. The characters and the actors are: Michael, (Greg LaGault), Alan ((Paul Bleizin), Hank (Dave Lent), Donald (Dave Glodowski), Larry (Mike Dempsey), Emory (Tim Zimmermann), Bernard (Mike Scott), and Cowboy (David Lamoreux).

Tickets for this production are available at the Theatre Box Office located in the Fine Arts building, on weekdays from 9 am to 4 pm. The cost for student tickets is \$1.00 plus student I.D. and activities card. The price for the general public is \$2.00. Telephone reservations can be made.

Performances are scheduled for October 17, 18, 19, 20, 21, 22, and 23. Curtain time is 8 pm. There will be two matinees on October 22 and 23 at 2 pm.

## Advice for Myopic Poets

Editor's note: This column is must reading for all individuals interested in publishing poetry.

### My Dog Smiles at Me

My dog smiles at me.  
I love my dog.  
We romp together and play.  
When it is cloudy we are sad.  
When the sun come out my dog smiles at me.

But I get so upset when we quarrel.  
I feel sick.  
I really feel sick.

Why must you frown, my friend?  
I just want to be loved.  
I'm sick the way nobody loves me.

Then my dog smiles at me and everything  
Is OK  
For awhile, at least.

Arthur Xavier Quibble III

"My dog smiles at me" is one of the better pieces I've received lately as Professor of Creative Writing at an obscure branch campus of a little known land grant college in the Mid-

west. However, though it is punctuated with accuracy and precision, the sonnet is far from perfect, and illustrates what I suggest here is a disturbing trend among the avant-garde intellectuals of the college set.

"My dog smiles at me" first disregards the facts of life. Dogs do not smile; they merely bare their teeth to allow gases to escape, as anyone who has come face to face with a canine lately, realizes.

"My dog smiles at me," more importantly, while a type of lyric cherished by poets and their mothers (occasionally dogs), illustrates a common limitation. The average young writer is not interested in science nor dogs, nor art. The boy is obsessed with himself.

"My dog smiles at me" is not a poem about a dog. It is quite obviously and embarrassingly concerned with Arthur X. Quibble III and his unenlightened self-interest. Frankly, who cares about Art? He must do more than indulge his sentiments to gain our interest and respect.

"My dog smiles at me" must be improved by more than editorial revision. The author must rearrange his face, his eyes, his ears, must abandon the obvious, the trivial, and the self-indulgent, must attempt to learn something worth writing. TO SEE. If this seems like a plea against self-expression, to a great degree it is. Don't be satisfied with shallow insights about subjects inherently more interesting to yourself than to others: your dog, your feelings, thoughts, hopes and aspirations, trials and tribulations, your opinions. Write beyond the merely personal. Write beyond yourself. TO KNOW.

Try to get past the superficial sentiments of the moment to write something so good it justifies in part the plants, insects, animals, humans, and other beings you kill.

By Dave Engel

## Harrell's magic cello

today. This particular program began with Bach's Third Sonata in G minor. His careful execution and thorough stylistic understanding recreated the spirit of the Baroque and gave the music a life-like quality. The driving verve of the Bartok's first "Rhapsody" became clearly evident in the efforts of Mr. Harrell and his extraordinary accompanist, Meg Bachman Vas.

It was all there: the ensemble, the technique, the intonation, and the depth of understanding. All this, plus a relentless kind of tender, loving emotion, commingled with the music of Brahms F major Sonata to create an intensely moving rendition which transcended ordinary musicianship to the level we call "artistry."

Schubert's "Arpeggione" sonata and Chopin's "Introduction and Polonaise Brillante" concluded the printed program. The ability of Meg Bachman Vas contributed greatly to the superb effect of the music. Her abashed display of musicianship was tremendously commendable.

By Kent Petzold

It was Lynn Harrell and his Magic Cello in Michelsen Hall Wednesday evening, September 29. The proclaimed 'cellist presented a singular and profound recital which could hardly be equalled by any touring artist in the United States

## Duo plays "American Fables"

By Steve Edington

A series of humorous, satirical, and thought-provoking sketches about various aspects of contemporary American life comprise Norman Dietz's dramatic presentation, *American Fables*. The dramatic team of Norman and Sandra Dietz will perform *American Fables* this Tuesday evening, Oct. 19, at 7:30 pm at the Peace Campus Center.

Among the sketches to be presented is "Tilly Tutwiler's Silly Trip to the Moon," described by Dietz as "A lyrical piece, set in early America, about childish things, and growing up, and seeing through a glass darkly; about faith, hope, and love--which is still the greatest of these."

"Sonofthebeach," was described by Dietz as "A vaudeville fable about the American penchant for paving and improvement-through-technology and about how we sometimes improve

things right out of existence." These and six other vignettes make up the program for the evening.

Norman Dietz is a writer, actor, and director. His wife Sandra is an accomplished actress. Based in New York, they have been performing for a dozen years, having made numerous nationwide tours. They have played hundreds of Norman's unique short drama pieces on college and university campuses, in churches, and in convention centers from coast to coast.

While their career has gone largely unnoticed by the mass media, they did surface briefly one year when they opened Theater at Noon, a luncheon theater series at Saint Peter's Gate in New York's East Side office district. The *New York Times* gave them a very favorable review.

Norman and Sandra have released a record album, *Tandem*, which contains some of their best known material recorded during live performances. In addition, Norman's plays have been widely published and even more widely performed notably in the United States, Canada, England, Germany, and Australia. He has also published two books of plays, *Fables & Vaudevilles & Plays* and *The Life Guard and the Mermaid*.

Between tours, Norman and Sandra live in an old ice cream parlor next door to the village post office in the tiny hamlet of Orient, New York, which is close to the ocean, on the eastern tip of Long Island.

Norman and Sandra Dietz's *American Fables* is being sponsored locally by the University Christian Ministry and the Frame Memorial United Presbyterian Church.

MEL BROOK'S COMEDY "THE TWELVE CHAIRS"**

By Bob Kralapp

The St. Paul's Chamber Orchestra gave a performance at the Quandt Gym on October 5. It was the third presentation in the Arts and Lectures series.

The musicians in the orchestra had been hesitant and a little unhappy about playing in the gym, but they have already performed in factories and large airplane hangars. A much finer sound would have been achieved in Michelsen Hall, but the orchestra's musical worth was proved in the acoustical wasteland of Quandt Gym.

The first half of the program comprised of music by three American composers. Charles Ives' Symphony No. 3 was first and its beginning was marred by an indecisiveness in musical phrasing and ensemble playing in general. It couldn't have been a lack of preparation on their part although it is possible that they had had no rehearsal to test the response of the gym. This flaw was

gradually repaired through the rest of the piece and the last movement was very well played.

The following pieces were by two of Ives' musical disciples, who together, gave an abbreviated history of the first important American music free from the influence of European music.

"Lilac" by Carl Ruggles was from a longer piece called "Men and Mountains" and was probably the most demanding piece of music. In comparison, the other piece by Wallingford Riegger, was quite easy to listen to, though there were moments that definitely stretched the ear.

It was interesting that the first half of the concert was more difficult to listen to than the second half. It is usually the other way around. Having the more familiar pieces by Bach and Vivaldi in the later part of the concert permitted them a different sort of appreciation from what they are usually allowed.

Antonio Vivaldi's "Summer" from the Four Seasons could not easily have been played better. The sound and dramatic energy generated might be compared to the Warsaw Philharmonic performance which occurred three years ago. Bach's "Brandenburg Concerto No. 1" was similarly well played; the solo presentation was beautifully relaxed and unforced.

The St. Paul Chamber Orchestra was one of the finest groups to have played here in several years. The audience, though small, was generally receptive (while it is true that they often didn't realize when to applaud) and appreciative of the musicianship.

# VET'S CORNER ... VET'S CORNER ...

By Tom Pesanka

Recent changes in VA regulations require that a veteran or eligible dependent's GI Bill payments be terminated where a student fails to meet the school's standards of progress. The VA will require counseling by a VA counseling psychologist before payments of G.I. Bill are continued.

Counseling will be required when a veteran or eligible dependent: (1) is placed on probation for the second consecutive semester; (2) is suspended; (3) withdraws completely from school after the second week of classes; (4) receives no passing grades for a term i.e. receives all F's, W's and WF's. Results of the counseling session will determine whether or not a veteran or eligible dependent will be able to continue under the GI Bill in their current education or not.

When a veteran or eligible dependent receives no passing grades, the school is responsible for determining when the student stopped pursuing his course work. For example, if a student receives all F's, it may be because he did not sufficiently understand the subjects or perhaps the student stopped attending before the term was over and did not go through the formal withdrawal procedure. In this case, the school must determine the last date of pursuit.

The school determines the last date of pursuit in a number of ways: (1) last activity as reflected in the instructors records; (2) last papers submitted; (3) last examination completed; (4) a student's reasonable statement of last date of attendance.

If it is determined that the student stopped attending before the end of the term, he must refund to the VA any money he received for education beyond the date of last pursuit.

A common question asked by veterans who have terminated their schooling is "What do I do with this VA check I received after I dropped out of school? Answer: Immediately return it to the nearest VA office and submit a letter to the VA with the check indicating the reason you are returning it. If you drop out of school, the wise thing to do is let the VA know (along with school officials). If you choose to wait until the school or VA representative catch on to the fact that you've dropped out, you may end up paying back many hundreds of dollars of overpayment.

Next week: How an overpayment is created.

honey when you come home. And you never go back-packing or cross country skiing so you don't need light, high energy food, or freeze dried goodies to take along. And you don't have a popcorn popper on the wing.

Whether you live on campus or off, settle here or elsewhere, we offer good food, low prices, and nice folk. In the new building we hope to offer more non-eatable services, and you can help us get in the things you want and need.

Come on down to 1916 Ellis Street and look around, make suggestions, meet the folk. Come to the Benefit, 7:30, October 21st, at the Program Banquet Room, University Center and hear the Right at Home and Jazz Dance bands... try the food, have a beer, and meet the folk.

By Phil Sanders

"And that's the way it was two hundred years ago, today." A familiar line in this bicentennial year. Many Americans have had their chance at the bicentennial salute but to my knowledge none as original as that given by the "unofficial Minister of Laughter," Mr. Richard Pryor, on his newly released album "Bicentennial Nigger" on Warner Brothers records. This album, with the catchy name, is, in my opinion, his most hilarious to date. Many recognized characters are in there, crackin' in the grooves along with assorted other celebrities who are present at the "Live" recording of this Comic Masterpiece. So, if you can get past the trauma of asking your favorite platter salesman for "Bicentennial Nigger," you're in for a laugh session that's waaay out!!!! and that's a Big 10-4.

While cruisin' around town in the Brotherhood, laughing my antennae off with Bro. Pryor, I noticed an astroid with a strange inscription on it, "Wine Psi Phi." At first I thought it was an advertisement for a Boone's Farm science fiction movie. Upon closer examination I also noticed the initials "G.M." etched soberly beneath. With the help of the Soul Mob, I was able to find out that the initials belonged to Bro. Gary Moore, a Phy. Ed. major here at UWSP. After hours of heavy detective work, I was able to corner Bro. Moore, (in the Grid) and ask the question that had been driving my computer banks up the wall: what's "Wine Psi Phi?" A smile came to his face as he began to unveil the meaning behind this mysterious phrase.

Wine Psi Phi is a national fraternity. The first word "wine" is actually a combination of letters derived from the basic concepts of the fraternity, We Initiate New Experiences. Bro. Gary Moore has been a member of "Wine" for approximately three years; he presently serves as the Stevens Point Chapter's President or in "Wine" terminology, Grand Grape. The term used to denote the UWSP chapter is "Chianti", "Chianti" was formed by a former black UWSP student, Mr. William Wright.

The national organization was founded at Howard University in 1962. "Wine" has chapters as far as Hawaii. Dig it, Wine in Hawaii, ooh!!! too cold. According to "Grand Grape" Gary Moore, "Chianti" Wine Psi Phi, which incidentally is now a UAB recognized organization, plans to participate actively in the Homecoming activities planned this year. "Chianti Wine Psi Phi" is a growing vital organization founded by blacks, but open to all.

After checking the Brotherhood Newslite, I find that a right on! is in order for the BSC effort in Monday night's Homecoming Talent Show. The brothers and sisters of BSC got a standing ovation for their vocal rendition of the "Black National Anthem" and two other selections. Their performance was so good that they were offered a singin' job at the Coffeehouse, so look for them in the immediate future. The first prize went to that fantastic skit done by Wine Psi Phi. Homecoming seems to bring out the best in most of us. In the case of Ms. Yavelle Draper, the BSC candidate for the "ugly" person on Campus Contest, it brought out the.....worst?

Well, Folks it's time for me and the Soul Mob to go 10-8 (stand-by) to check out the Universe of blackness and find out what 10-36 (time) it is, so until next week.....numbers and out!!!!

# CO-OP NEWS

By Carrie Wolvin

HEY DORMIE! YEAH, YOU! Been pretty much ignoring this Co-op thing, haven't you! I mean what's it got for you... personally. Hardly worth going to take a look, right? Wrong! You eat at a center... every meal? What about munchies? Out of machines? Your body belongs to someone you don't like much? Wouldn't nuts, dried fruit, soy nuts, yogurt, bagels, granola cookies be a nice change of pace? How about some fresh fruit and a steaming cup of tea when you are studying late?

No, you don't need the Co-op. You're going to live the rest of your life in a dorm, right? Have you ever noticed that there isn't much of Gray Panther movement going on around you? Either people are moving out or dying off... think about it. Chances are you will eventually move out of the dorm... THEN you'll be interested in the Co-op... if there is one. Or you'll move out of Point and want to start or use a Co-op, if you know anything about them. Or maybe it's a door you want to keep closed... sad. Of course, right now you never eat with off campus friends, and you never want to bring the makings for a good salad, or some super good ice cream, or a pizza, and you don't care if they call you a mooch. And your mom would like some good tea or fresh
