Two injured as pickup drives through square

By John Stein

Two UWSP students were injured at the Square Friday night when a pickup truck, making its way through the crowd, ran over one and struck the other.

Injured were Mark Grinder, 19, 204 Knutzen Hall, and Kieran Mulligan, 20, 209 Watson Hall. Grinder suffered torn ligaments in his left knee and ankle when both wheels of the pickup rolled over his leg. Mulligan received abrasions to his face and leg.

The incident occurred at approximately 2:10 a.m., shortly after the closing of the bars had sent hundreds of students pouring into the street. According to Stevens Point police, a truck driven by John D. Cousineau, Almond, was proceeding slowly through the crowd when a human pyramid toppled in its path.

Grinder gave this account: "I was attempting to get on top of a pyramid when I fell to the ground. Someone landed on top of me and I couldn't get up. There were people yelling for me to get out of the way, but I couldn't."

Some witnesses claimed that the truck had "barreled through" the crowd. But, according to Grinder, the truck proceeded very slowly. "And believe me, I wish he would have been going fast," Grinder said, adding that the truck had inches over both his feet "at about five miles an hour."

Witnesses said that the truck proceeded to the corner of Second and Clark Streets, where it was mobbed by angry students, who kicked and beat on the vehicle. At least one of its mirrors was broken, as were several lights, witnesses said.

Grinder said that one of his friends told him that he had struck the driver. Several witnesses saw the driver being pulled from the truck by some of those who mobbed it.

Shortly after the incident involving the pickup truck, Erwin Wroblewski, 1900 Illinois Ave., attempted to drive his car through what had then become a somewhat irate crowd. Several men stepped in front of the car and attempted to stop it by pushing on its front, while others rocked and kicked it. The offenders dispersed upon the arrival of police, leaving the car with a broken windshield. Damage was estimated at $100.

Ironically, the only two arrests made at the Square Friday night were those of Grinder and Mulligan. Both of the injured men were issued citations for loitering in the roadway.

But police made 45 arrests on the Square Saturday night, for offenses that included disorderly conduct, loitering in the roadway, possession of open containers of intoxicants on the street, and urinating in public.

There were no visible damages at Polston's Furniture Store, 825 Main St., between Saturday evening and 2:45 a.m. Sunday. The damage was set at $400.

Student Groups Risk Receiving Money

By Lori Holman

The Pointer and several other student groups almost forfeited the money they receive through Student Government (SGA) this past week. Kathy Martinson, SGA Budget Director, said that all student organizations '80-'81 annual budgets were due in the SGA budget office on Thursday, October 16.

Martinson brought the matter before SGA this past Sunday night, seeking suggestions. Annual budget forms for student organizations were made available approximately a month ago, and Martinson said that the due date for the return of these forms is printed boldly on each form at least three times. She said that some 20 student groups had not returned their budgets or made contact with her. Martinson added that many of these groups are "chronic delinquents," meaning that their budgets have been late in previous years.

The possibility of refusing to accept such delinquent budgets as a form of punishment was discussed. Several senators felt that the budget deadline should be strictly enforced and that by denying these groups money, the deadline would be adhered to more rigorously in the future.

"Our current reputation is that we're a pushover," said Martinson. She explained that although some groups could receive funds through other channels, several groups, such as The Pointer, could barely survive without the funds allocated by SGA.

After prolonged discussion, Senator John Olson moved to recommend that Martinson contact each organization at fault as soon as possible to notify them that their budgets must be submitted by Tuesday, October 21 at 9 a.m. The motion stemmed from a general sentiment that SGA should avoid inflicting punitive measures in such a case. Rich Eakins, SGA Executive Director, cautioned the Senate against being too harsh on student groups that contribute much to the campus. He said that student groups are often under various time constraints.
Alcohol Task Force reveals Survey Results

By Lauren Cnare

UWSP students are encouraged to drink alcohol through peer pressure, for release from academic and social pressures, because drinking-centered activities are inexpensive and because there is a perceived lack of alternatives, according to a recent survey conducted by the Alcohol Task Force.

The group met October 9 to discuss the results of the spring survey and how to use it in the future for the benefit of UWSP students.

The survey was given to a random sampling of 206 students and 24 faculty members, to examine the drinking habits and attitudes at UWSP and especially to discover the factors that encourage and discourage the consumption of alcohol.

By discovering which factors do encourage drinking, especially irresponsible drinking, the Task Force can devise programs and make suggestions to remove or lessen these influences. By determining the factors which reduce the consumption of alcohol, the Task Force can promote or encourage these forces.

Part three asked the respondent to do the same with factors that reduce the consumption of alcohol. Academic responsibilities ranked as number one, with physical effects, knowledge of wellness gained through reading, serious medical consequences and negative consequences of drunk-related behavior following, in that order.

By working with other organizations on campus such as RHC, PHC, residence hall staff and students themselves, the Alcohol Task Force would like to use and share this information to increase the awareness of alcohol use and abuse at UWSP; to provide alternatives to alcohol and provide an atmosphere for responsible drinking.

UWSP alcohol educator Stu Whipple is optimistic about reaching this goal. He believes in the community and feels it can be attained with cooperation. He says, in the first step, the community must take responsibility to know the problem, devise a tool to correct it and then use it. Someday, the problem of antisocial, abusive drinking can be solved.

The Alcohol Task Force is a relatively new organization, yet it's purpose is not to eradicate drinking among college students, but to create an awareness of problems related to alcohol abuse and promote responsible drinking.

The group had its first meeting in February of this year. Nonetheless, it has already completed two major projects — the survey on alcohol and the implementation of an incapacitation policy, which will go into effect in all the residence halls. Stu Whipple, the head of the group, stressed the fact that this is a life-saving policy, and is a response to several alcohol-related deaths at UWSP in the past, and not simply one designed to harass partying students. The Alcohol Task Force is composed of faculty, hall directors, hall council members, Student Government members and other concerned leaders and is open to everyone.

News Briefs

O'be, Vesta to debate

Seventh district Democratic congressman David Obey and his Republican opponent in the upcoming election, Mr. Vinient Vesta, will debate Friday, October 24, in the Program Banquet Room. The debate will begin at 1 p.m. and last about an hour. The public is invited.

State referendum reminder

A referendum on the Wisconsin ballot Nov. 4 will decide if inland lake rehabilitation districts landowners won’t or do not reside on their land will be allowed to vote in districts elections. Currently only residents, landowners in such districts are allowed to vote in elections there.

Peace Corps Recruiters Visit UWSP

Peace Corps recruiters will visit UWSP October 23 and 24. Group officials say that UWSP has been one of their best sources for volunteers. Interested persons can talk with recruiters October 23 in 134 Old Main, and October 24 in the Placement Office.

UWSP Faculty member displays art

Herbert Sandmann of the Art faculty is exhibiting 45 of his recent paintings at West Bend’s Gallery of Fine Arts. The exhibit will continue throughout the month of October.

THE NAVAL FLIGHT OFFICER
HE DOESN’T FLY THE PLANE
HE RUNS IT.

Look in the cockpit of a Navy jet and you’ll see something you wouldn’t have seen a few years ago.

Two seats.

Today’s planes are too fast — and too sophisticated — for one person to handle by himself. So the Naval Flight Officer is there.

To run the weapons systems, the computers and the advanced electronics. He’s a navigator, radar operator, sub hunter, target tracker. He tells the pilot what to do, and when. And he wears the wings of Naval Aviation.

If you’re a college man in good physical condition (20/20 vision, not necessary), with an aptitude for math, and an aptitude for adventure, you should visit with the Navy Officer Information Team when they visit your campus.

SIGN UP FOR INTERVIEW AT THE PLACEMENT OFFICE OF STOP BY OUR TABLE IN THE UNION OCT. 27-30
SPBAC, the Student Program and Budget Analysis Committee, whose members are assigned by the Senator and the Director, has been given a form of standing subcommittee of the Senate. Senator Government, Directors, and Executive Secretary, each one of which is responsible for the Senate's personnel, has the authority of over $1.500,000 of your segregated fees. How does this work? First, each fall semester SPBAC reviews annual budgets from all recognized student organizations. After long, long hours of deliberations, the final amount recommended by SPBAC for each organization is presented to the Senate Government for its approval. With approval from SGA, the funds are then forwarded to the chancellor for his signature.

SPBAC also handles all requests for money from the Senate Group Monies and the Senate Reserve, which is set up to provide a source of funds for those student organizations which qualify for, but are not granted annual funding and for special activities sponsored by those organizations which have been denied annual funding. It is SPBAC's responsibility to determine who will get how much.

SUBCOMMITTEE OF SPBAC

SPBAC, the Student Program Allocation and Analysis Committee, a standing subcommittee of SIBCSP, which is composed of members from Arts and Lectures, SPBAC, UAB, RHC, and two students at large, has three major purposes. 1) SPBAC reviews all requests for program projects and allocates funds to those projects from the Student Program Governing Fund. 2) SPBAC advises organizations as to program planning, contractual arrangements, and program implementation. 3) SPBAC evaluates all programs funded through the Student Program Governing Fund.

The following student organizations have requested annual funding from SPBAC for 1980-81:

- Theater Arts & Lectures
- Student Experimental Television (SET)
- Political Science Assoc.
- Child Care
- Wildlife Society
- Central Wis. Naturalists
- WPRA
- AWRA
- Woman's Resource Center
- University Writers
- American Indians
- Resistion Oktibio (AIBO)
- Student Legal Society
- Gay Peoples Union
- Student Art League
- WSFP-90 FM
- Black Student Coalition (BSC)
- Fisheries Society
- Athletics
- University Activities Board (UAB)
- Association of Community Tasks (ACT)
- Public Administration
- Student Organization (PASO)
- Horizon
- Student Government Association (SGA)
- Environmental Council

Budget deliberations will be held November 1 and 2, and final budget allocation recommendations will be held at the Senate Government November 23.

Here is your chance to see where the bucks really go!

By Jeanne Pehoski

Donna Gara, assistant to the Vice-Chancellor of the UW System, has said that the English Department, spoke about "Writing Across the Curriculum" program at the Second Annual Language Conference held last Friday.

Garr, Coordinator of the Literacy Task Force (LTF) from 1978-1979, said that after two years of study, the LTF suggested that literacy at UWSP be an all-faculty and all-campus responsibility; that students should be able to demonstrate their reading and writing competence when they enter UWSP as an upperclassmen, and that some members of the committee felt that students were graduating who were not as literate as they should have been, so the committee said an "all-faculty commitment" towards the reading and writing literacy program.

The LTF provides the impetus for the following results; a faculty assessment program was initiated that requires all incoming students to place an essay for English composition placement; the English faculty was educated on the holistic approach to reading and evaluating the students' work; criteria were established by the English department to determine what writing course the student is placed in; an experimental reading and writing module program was held where a member of the English department taught reading and writing modules at a different department; and training sessions were held for faculty in other disciplines so certain courses in a student's major would be taught with an emphasis on writing.

Garr added that UWSP is a front-runner in the UW System in striving to improve the students' literacy and that many faculty members are committed to this task.

In addition to the Native American Center request, the other projects to be considered are minority recruitment and outreach, a basic skills program, and a Native American natural resource program.

Aggie Trzebiatowski, who was invited as secretary of the Senate, said that last year was presented a plaque for her service to the Students Senate.

Radke referred to as "able and dedicated service."
Cont. from p. 1

constraints and pressures and that these constraints should be taken into consideration.Martinson announced that the annual budget hearings will be held the weekend of November. The Gamma Theta Epsilon was funded $75 from Student Group Monies for a trip to Devil’s Lake and $450 from the Student Senate Reserve for a trip to South Dakota. The Soil Conservation Society of Americans was funded $473 to attend a regional soil judging contest in Athens, Ohio, and $440 was allocated to the International Club to attend a regional conference in Michigan.

UWSP students voted through a referendum to fund United Council (UC), $1 per student per year. Mike Pucci, SGA Vice-President and UWSP UC Director, announced the tally taken to be 431 in favor and 139 against student funding of UC. Students also approved the measure to tack on an extra 50 cents to tuition fees for the renovation of Goerke Park. The majority of voting students thought two Physical Education credits should be sufficient to fulfill general degree requirements. Candidate John Anderson came out on top in the Presidential straw poll, followed by President Carter, Ronald Reagan finished last.

SGA Executive Board members publicly remained neutral on funding of UC through students’ tuition prior to and during the referendum. When asked on Sunday how they felt about the results of the referendum, their answers remained restrained. President Linda Catterson said she wished there had been a higher voter turnout. She felt funding UC would be good for the UWSP campus in that it offered extra representation. Catterson explained that it was beneficial to have UWSP students present at UC meetings, “because we’re always questioning them and watching how the money is spent.”

Pucci interpreted the vote as being indicative of student support of the idea UC represents—a student union. However, Pucci expressed concern about the personalities of some of the UC officials. “It’s their temper—to use their own word—that concerns me. Often their actions are rash and extreme.” He questioned the effectiveness of such an approach.

Eakins felt optimistic now that UC has more funds to work with. He also expressed concern about the effectiveness of UC. “Honey attracts more than vinegar,” he said, and explained that the inflammatory writing, especially that used by UC Legislative Affairs Director Mark Hazelbaker, is reckless and most likely diminishes the effectiveness of their lobbying. Eakins added that he “felt good about the method of funding,” and that the additional $1 tuition, “won’t make or break anybody.” He also questioned whether UC could lobby effectively within the legislature, since students are not prime constituents. This results from the fact that, statistically, most students do not vote. Eakins added that despite its ineffectiveness in the legislature, UC is very effective in lobbying within the system.

Although the “Fair Square Deal” resolution was withdrawn from the floor last week, many SGA members expressed concerns about the incidents at the square over Homecoming weekend.

“Police were very negligent at bar time,” said Pucci. He said that from what he saw, people were being arrested for stepping on the street, despite the crowds on the sidewalk. He felt that the police should have mobilized and parked a squad car at the end of the street. “They just didn’t handle it correctly,” he said. Pucci urged student senators to write to the aldermen of their district. He explained, “Police will act on what the aldermen tell them to—so that’s where to put the pressure.”

Lori Beirl, Communication Director, announced that the SGA newsletter would be released this week and the student senators would soon be wearing buttons with the slogan: “SGA is not POINTless” on them.

Senator Don Heaster announced that the Academic Affairs Committee responded positively to SGA’s resolution concerning the 1980-81 Thanksgiving break. The committee officially changed the closing of the university to 12 noon. Originally, the university was to be closed at 10 p.m. on the Wednesday before Thanksgiving.

Senator Sheila Bannister announced that the Student Affairs Committee passed a new student code of conduct. A copy of the code will be displayed in the LRC. The next SGA meeting will be held on Sunday, October 26 at 7 p.m. in the Wisconsin Room of the University Center.
By John Sleln

Campus radio station 90 FM last week extended its air time to 24 hours, a first for the rapidly expanding UWSP medium.

The station previously went off the air from 2 a.m. until 6 a.m., but this year, said O'Brien, it was in the process of obtaining access to constant National Weather Service transmission, which would make the station the only one in the area so equipped. Other stations rely on weather reports from wire services such as the Associated Press, but these are not as current.

The move to 24 hours makes 90 FM the only station in the Stevens Point area with air time filled around the clock.

Concerning another matter, O'Brien said that 90 FM was in the process of changing its format, according to O'Brien, is very attractive to students. "We are not a typical college station," he said, adding that the difference came in the fact that the station was consistent in programming and didn't play "irrelevant educational tapes all the time." He said that 90 FM is "answering this community's demand for professional, alternative programming," and that such educational tapes were not a primary forte of 90 FM, because they are "of little value" to most of its listening audience.

O'Brien explained the programming consistency that he says distinguishes 90 FM from typical college radio stations: "The listener has a good idea of what is going to be on the air at all times," he said, adding that the station's programming, unlike most other college stations, was highly organized.

The move to 24 hours makes 90 FM the only station in the Stevens Point area with air time filled around the clock.

Concerning another matter, O'Brien said that 90 FM was in the process of obtaining access to constant National Weather Service transmission, which would make the station the only one in the area so equipped. Schultze speaks on Inflation

Last week's appearance of Mr. Charles Schultze of the President's Council of Economic Advisers was largely unnoticed by the majority of students, but not because he is a minor figure in government. Schultze is the Chairman of the CEA, the body responsible for the federal budget. He is one of the most influential advisors to the President on economic affairs.

Schultze's distinguished background includes service as the Director of the Budget Bureau during the "Great Society" of Lyndon Johnson, and as a senior economist at the Brookings Institution, a "think-tank" composed of leading corporate, academic, and government figures. It was founded in 1919 by Herbert Crooks to help "American Capitalism correct its injustices and thus bring about the more equitable distribution of wealth." While at the Brookings Institute Schultze helped prepare commentaries on the federal budget.

He is now in the Midwest as part of the Carter-Mondale campaign, though his appearance at UWSP was not billed as a campaign speech.

His talk to about 30 students and faculty centered on the issue of inflation.

"It is important to understand that inflation can be caused by many things, not necessarily just government spending," he told the audience. The importation of oil at high prices is an important inflationary factor as is the decline in industrial productivity, he added.

Schultze said, "No one knows why productivity growth has declined so much." However, he pointed out that there is less capital being invested in new machinery and in modernizing factories. In the previous five years the average growth of investment per capita worker was two percent per year. By 1979 it had fallen to only one-half percent per year. Consequently, productivity has declined, causing the prices of US goods to rise in comparison with foreign products.

The Carter solution to productivity decline is a $30 billion tax cut, 50 percent of which will go directly to business to increase its capital so it will reinvest in its factories. However, a 1979 survey conducted by Fortune of 500 corporations (which manufacture 88 percent of US goods) showed that they have had their best year in 25 years in terms of the rate of return on investment. Asked why the government should give them more money if they won't invest even with high profits, Schultze replied, "I haven't seen that study and I don't believe it either."

The Pointer asked if there was anything in the Carter reindustrialization program which would stop the deliberate closing down of productive and profitable factories in order to receive rebates of past taxes (such as in Youngstown, PA, where 4,100 steelworkers became unemployed when the Youngstown Sheet and Tube Works closed at a time when it was among the top producers for US Steel.) Schultze replied that, "The administration can't keep tabs on every abuse in the system."

When asked if the recovery plan would guarantee that multinationals will invest in American factories rather than set up "sweat-shops" abroad, Schultze replied, "The word 'multinationals' has become something of a cussword. Don't undersell greed, it brings people together." He admitted that there were no guarantees.

When asked about the effects of military spending on inflation he replied, "Military spending is no more inflationary than public works spending because it is a legitimate need. It satisfies something we want."

"You may think we are idiots for wanting it," he said, adding that this did not necessarily make military spending less productive or more inflationary than public works spending.

Schultze explained the programming consistency that he says distinguishes 90 FM from typical college radio stations: "The listener has a good idea of what is going to be on the air at all times," he said, adding that the station's programming, unlike most other college stations, was highly organized.

The move to 24 hours makes 90 FM the only station in the Stevens Point area with air time filled around the clock.

The result: some of the profiling himself. came from the fact that he had recently presented a paper at an international symposium in France. But it turned out that Lewis himself was more the novelty of this story, so rather than a conventional profile of him, we decided, through the inclusion of more quotations than usual, to let Lewis do some of the profiling himself.

The first American violinist to win Grand Prize at the Montreal International Competition; second place winner in the Queen Elizabeth Competition.

His 1981-82 season is already sold out. Hear his fine performance now.

Ticket sales begin October 24.

Bruce Springsteen Wins World Championship for a third straight time

Living After Darkness

By John Teggatz

The opening power chords of Born to Run have probably accompanied more full-throated charges to parties and other rendezvous in the night than any other rock hit. By mid-song, it’s hard to tell which is more powerful...the music, or one’s own body, surging with adrenaline-saturated blood. Bruce Springsteen’s music is a nusay for the soul.

After the release of Born to Run, no one expected Springsteen to record a masterpiece out of his next album. In 1975, even being an established superstar could not guarantee back-to-back hit albums. Although no newcomer, Springsteen was still under the hope that surrounded Born to Run didn’t help any either. Most critics were looking forward to a pretty hard fall. And then Darkness on the Edge of Town was released.

Springsteen had another critically acclaimed, commercially successful record on his hands, but there were still some skeptics. Two in a row, however impressive, just didn’t ring. After every Springsteen call, the ante was raised. Until about a week ago, the ante was the magic number three. Springsteen, unaffected by the pressure, played The River, won the hand and the game.

The River is a honed-down, two-record set of the finest rock music released in recent memory. It is a triumph, it is three in a row. The hope that silenced his detractors forever. Yet what Springsteen has done takes a back seat to how he did it.

Once I spent my life playing tough in 1978
Once I was living in a world of childish dreams
Some of these childish dreams must end
To become a man and grow up to dream again
-"Two Hearts"

Maturity is the important theme in The River. Springsteen has grown up. He’s learned a lot from his odyssey in the Darkness, and has emerged as a man who is at peace with his past and is doing the best he can with the present. The future will always hold his promised land.

"Independence Day" is the song that settles the score between Bruce and the father character that ran through Darkness on the Edge of Town. Rather than fight with the man as a son, Springsteen tells him as a man himself:

I guess that we were just too much of the same kind.

Well say goodbye It’s Independence Day. It’s Independence Day, all boys must run away

Springsteen did run away, he was born to. For awhile, the world was as fascinating and romantic as he thought it would be, on Thunder Road, on the Backstreets of Jungeland, and simply in the Night. The dream didn’t go bad, reality did. Suddenly, there was a Darkness, the Streets were on fire, there was something in the Night that he had to prove. He couldn’t drive around all day and night for fun, it became a living...he had a working life. He lived like his daddy in the Badlands, couldn’t even get to Candy’s Room, but still believed in a Promised Land.

The hot Streets of Fire have made a stronger Springsteen. He is now aware of the "Ties that Bind." This song opens side one, and it boldly asserts that Bruce has re-entered society. No longer does he advise anyone else to:

You don’t want nothin’, don’t need no one by our side you’re walkin’ tough baby, but you’re walkin’ blind to the ties that bind.

The theme of togetherness as opposed to being alone is recurrent, and appears again in "Two Hearts" and "Hungry Heart."

There’s one thing mister that I know
That if your think your heart is stone
And you’re rough enough to whip this world alone
Alone ain’t no piece of mind.

-"Two Hearts"

Everybody needs a place to rest
Everybody needs to have a home
Don’t make no difference what nobody says
Ain’t nobody like to be alone

-"Hungry Heart"

The togetherness theme is extended to a new penchant for domesticity. Bruce Springsteen tells his lovers on The River things he would never have dreamed of telling Wendy on Born to Run.

Now Honey I don’t want to clip your wings
But a time comes when two people should think of these things
Having a home and a family
Facing up to their responsibilities
-I Wanna Marry You

Throughout The River, Springsteen sings of weddings and making commitments like never before. The world, however, is a different place than it was five years ago, and so is Bruce himself. Darkness on the Edge of Town was about the stark realization that life cannot be lived on the run. The River is about living, loving, and dying with that knowledge. Darkness was about surviving, The River is about prevailing.

In an album as vast and varied as The River, it is hard to find one lyrical key. Out of many, one could be selected as well as another. This one describes the realistic, mature, near-optimistic mood of the album perfectly:

Well let there be sunlight, let there be rain
Let the brokenhearted love again
-Sherly Darling

One must hear the way Springsteen sings these lines to get the feeling of relief spilling out of the music...Bruce has endured the worst, and has returned not as a bitter man, but as one who has reached a level of moral harmony. For now, Bruce has struck a balance with his world.

This new-found balance is what allows Bruce to work all day five days a week and yet rock like no one else can all weekend.

Now tonight you’re gonna have a good time
I work five days a week girl
Loading crates down on the dock

When the whistle blows
-"Out in the Street"

I’ve been working all week
I’m up on my neck in hock
Come Saturday night I let my ramrod rock
-"Ramrod"

Many people criticized Darkness for being too depressing, but actually it was a total rejection of despair. It was hard, relentless, sad, angry...but it never gave up. The River certainly isn’t all sweetness and light, but then neither is life itself. It is balanced. Springsteen has captured the majority of Americans live it...and that, friends, has to be first in rock music.

Words cannot adequately describe the compassion Springsteen has for the people he sings about (and sings to), which is why he often uses wordless moans and screams to underline his emotions. Yet The River does not use the non-verbal wail as much as the previous albums...
Bruce has struck a balance with his world.

The song opens side two of The River, and won both the hand and the game.

Now for beauty it’s fair enough
To say I’ll make your dreams come true would be wrong
But maybe, Darlin’, I could help 'em along.

When Bruce sings "Darlin’..." the affection, the angst, the love can be felt in his voice. It’s most probably the only romantic moment on the album. As far as double albums go, there is surprisingly little "fill" here. Although there are some weaker songs, some are stronger than others. "The Price You Pay" is a rather dull lull. Lyrically and musically, it’s somewhat of a disappointment. (If only it were Buddy Holly’s “Not Fade Away!”) Perhaps it is just a victim of unfortunate placement — "Fade Away" follows two screamers, "I’m a Rocker" and "Caddillac Ranch," both of which follow the haunting and awesome "Point Blank." "Drive All Night" suffers because it is the second to the last song on the album, and after two discs worth of emotionally intense music, the listener can get worn out...not from Bruce mind you, because after The River anything else (except another Springsteen album) sounds kind of shallow...it’s just that listening to these albums all day long does tend to mandate an emotional rest period. At any rate, The River will make you feel alive.

A few words should be said about the title itself. In the song, Bruce and "Mary" are young lovers who have to get married and are forced to lead dead-end lives. Yet the
lovers have a way to temporarily escape their circumstances:
We'd go down to the river and into the river we'd dive
Down to the river we'd dive.
As an album, The River can be used in the same way, for escape and for confirmation. The River gives life; The River washes sins away.
What can anyone say about the E Street Band, except to say they are the finest rock band in the world? Each member of the band could be either the front man or most valuable player in any other lesser group, but these guys have chosen to be together because together they do incredible things. Their formidable playing skill is incongruent with their egos. No one has to steal the show, trashy, showy, wonderful.

As an album, The River can be used in the same way, for escape and for confirmation. The River gives life; The River washes sins away.

Any song, but there are seven
"The Ties That Bind" rings to me; it doesn't sound like Carl Wilson as a singer, but it sounds like the kind of responsibility you're looking for, speak to your Navy recruiter. He can help you get up for an interview at:

The library turnstile system:

Playing the backpack blues

By Joe Palm

To some it is the moral equivalent of having an airport security guard dive into your suitcase searching for dangerous weapons among your underwear. To others it is an essential process until alternative and more effective means may be funded.

You might be wondering what's being discussed. Ahh, you guessed it — the turnstile security system used in the Learning Resource Center. The system, which has been in operation here since 1965, is slowly but surely becoming obsolete as the margin of human error stretches, the battle of the criminal mind vs. security personnel reaches new heights, and the soaring computerization of our country takes place. With these factors to consider, it is no wonder that many feel frustrated about the inadequacy of the present system used in the LRC.

As we plunge into this diverse topic, the first question to ponder is: Is the present system valid? That is, can it stand with a solid level of effectiveness? Can it meet the standards essential to its function? Allen Barrows, chairman of the LRC Circulation Department, explains, "This was the system in those days but this is a very antiquated system in the light of modern technology. Back in those days there weren't any electronic systems we could use for our library." Barrows reminds us of the older days of the library, when the student didn't even have access to the library stacks. As he describes it, the student had to sit on a bench while library aids found books for him. This ensured the library that books would not be stolen.

Then came the days of the turnstile security system, which proved to be very modern and, at the same time, allow students to enter the vast confines of the library to find books on their own. After finding the book and checking it out, however, there came the wonderful time of discovery when the student and the security checker would meet, and consequently many problems arose.

Before we discuss these problems, let us first understand the plight of the checker. He (or she) is behind the security desk being paid by the university students (you and me) under the terms of a Work Study plan. For $3.10 an hour, this person is trained to screen library patrons for possible stolen books. It is a considerably important job when one understands the cost of library materials. Now to the problems — regardless of what is expected of the checker, he cannot be expected to possess superhuman qualities — complete with X-ray vision to see past bulky winter coats and recover a nearly lost book. Add to this the fact that friends come into the library with the old, "Aw, come on, I thought we were friends?" routine and expect to walk out with valuable books, and you have a problem which needs solving. The margin of human error is simply too great.

Also, the system is seen as a hassle. The student leaving the library has already packed his books up to leave and now must take his bookpack off, open it up, and allow someone to comb through it. Yet as Barrows pictures it, "True library patrons appreciate the fact that it has to be done."

The system is seen by Barrows as being effective overall, but a total of three percent of the books making up the library stacks managed to evade the system last year. When you consider the library babysits for 300,000 plus items and books cost an average of $22 each, then a mere three percent may well reach into the thousands of dollars. How then may we have a totally effective system which could ensure a zero percent material loss and cut down on the number of problems presented by the current system? The problem isn't insurmountable as many of the other schools in the UW system have come up with an answer.

This ideal system would come in the form of the Tattle-Tape system, produced by the 3M corporation, and Barrows has been appealing for funds to acquire it ever since. This book-detection system is designed to reduce book losses, inventories, and search for missing volumes; in short, saving time, money, and much, much hassle. The technological masterpiece is comprised of a smooth electronic system utilizing a magnetic tape in the binding of each volume in the library. When a library patron wishes to check a book out, he first has to have it desensitized, then walk through the detection area without the "search the bags" routine. Should a student slyly decide to foil the system, we wish him luck, as the machine will sense that the book buried in his coat isn't demagnetized and will assume he is in the process of stealing the treasure. The machine will remind him of his little boo-boo by flashing lights, sounding an alarm, and locking the doors in his area of the building all within a matter of seconds. This will occur no matter how much metal you try to clothe the volume with.

The system completely cuts out the margin of human error (it is unmanned), and plays no favors. The machine will also pay for itself in four years and cut out the expense.

Cont. on p. 10
ASK THEM WHY

By Jeanne Pehoski

Recently, the Health, Physical Education, Recreational and Athletic (HERA) faculty unanimously passed a "two plus two" concept to be implemented into their general physical education requirements.

John Munson, Coordinator of the Physical Education major, and Linda Barrows, Coordinator of the Health Education major, said that part of the reason the plan was implemented is because "UWSP wants to have the best undergraduate Physical Education Department in the U.S."

He explained that the Physical Education requirement should be "out of the past...future. Therefore, we should be offering programs in each area of our curriculum, physical activity, recreation and athletics."

Because of the Wellness Promotion Campaign on campus, the HERA staff realized that not only do people have to choose leisure activities wisely, but they also have to be concerned with their physical health.

"In the future, we are going to allow our students flexibility and choices," Munson explained. "For some students, a stop smoking program is more important than a course in volleyball. However, because we believe physical and recreational activities to be important, we are requiring them to take at least two credits in the areas of Health Recreation, and Athletics. If they choose the other two courses may be in the wellness areas. But they can also take all four credits in the physical and recreational areas. It is the essence of the "two-plus-two concept."

Munson said that the Health and Counseling Centers are working in conjunction with the HERA faculty in some of the courses, such as Alcohol Education, Weight Control, Relaxation and Stress Reduction Techniques, Bio-Feedback Training, Stop Smoking Clinics and Body Tune-Up—a combination of nutritional information and exercise programs.

A special program is also being set up for the non-traditional student. Tapes from the past three Wellness Conferences will be recorded and the student will view the tapes and write reaction papers to them.

Munson said they also may be asked specific questions about the tapes to make sure they understand the basic concepts.

Other new courses are also being proposed. Munson said that the HERA faculty asked ROTC if they would be willing to teach courses in Marksmanship, Advanced Orienteering, Rock Climbing and a Leadership Lab. If these courses are approved, a student could earn credits in both departments.

Some trips over winter and spring break are also being proposed to count toward the requirement.

Says Jim Ramsay, a sophomore here at UWSP, "How can we not afford the new system? The turnstile system is so perfect and is financed to support a security checkers."

Ramsay continues, "You can't afford to drive an Edsel in today's economy."

Nevertheless, and for all practical purposes, we are in this new system. The future of UWSP? Barrows says yes. "Automation forces our whole structure to change. There is a technical revolution we have in this country—you have to think technology."

Let us hope in the next matter of time before we are granted funding for this system.

Until then, we'll continue to see the need for a new system which could all but wipe out the margin of loss of materials we view at our LRC. For now, we must continue to drive our faithful Edsel towards the shining Porsche on the horizon.

By Mike Daehn

What makes a hunt successful and how many of us hunt ethnically

Hunting ethics and the successful hunt

By Robert J. Einweck

If you had only one more day to hunt, how would you spend it? The 40 or so people who attended a thought-provoking presentation on hunting ethics on Wednesday, October 15, were poised to kill.

Jackie Jackson followed this bit of self-analysis with a presentation of the results of a Hunter Performance Study he has been compiling. Within the study is incorporated a series of questions asked of hunters to determine the degree of satisfaction they found in the hunt.

Hunters are asked these questions after observing them in the field for legal and ethical violations. Ethical violations include shooting at ducks out of range or crowding other hunters. Robert Jackson is a hunter, motivated by a love of the activity. "So much so, that I changed my birthday from the traditional date to the Friday before bird (grouse) season. I lived another year to celebrate another hunting season." It is the intensity of his interest in hunting that led him to investigate other hunters and their behavior in the hunt.

The study involved observation of waterfowl hunters in the field from a blind. The study sites were the Mississippi River by Prairie du Chien, the Mead Wildlife Area, the Green Bay area, and the Horicon-Mud Lake area.

The observers, student volunteers recruited from UWSWP trained in waterfowl ID, hunting regulations, and observation techniques, watched a specific hunter for ethical and legal violations. As the hunter left the field, they would approach him and ask what he had accomplished. Following the close of the season, results were compiled.

The statistics were interesting: 29 percent of the observed hunters were seen to have satisfied the study. The Poconos (Refuge) area had the highest incidence of violations—35 percent. A greater percentage of violations occurred on Fridays and weekends. They were committed by those using retrievers, or by sportmen hunting in groups, as they had no record that members of Ducks Unlimited and other sportmen's clubs had a greater tendency to violate.

In Jackson's study, 50 percent of the hunters claimed to have a poor hunt, while only about 10 percent claimed to have an excellent hunt. "We found that the traditional idea that satisfaction is based on a successful hunt is not true. A hunter who gets a six-point buck three hours after the season opens is not satisfied if he has a bigger buck." Rather, Jackson found that hunter satisfaction is based on expectation. The ultimate example of this would be the sportsman who hunts with a longbow and may get one deer in 12 years of hunting.

Hunters in the study who were legal and/or ethical violators tended to be more satisfied with the hunt. However, for them, satisfaction was based on getting the bird or having opportunities to shoot. Non-violators tended to be satisfied by companionship and seeing game and nature.

Jackson found that the ultimate answer to "Social approval or disapproval is what carries weight in an activity like hunting, where companionship and shared experience are important factors."”

improving hunter responsibilities will be found in education. "History indicates that morality or ethics cannot be legislated; there is little support for this carrot and stick approach to unlimited pursuit. Education is important." A successful education program should involve those who can afford its great cost comes nearer to reality.

The tradition of the hunt should be preserved, but quality hunting on a limited basis is needed, rather than an unlimited approach. Education will lead the hunter to understand that the wildlife he hunts is in the domain of government departments and some forensic foresters.

Bill Cook, a forestry student who headed up the trip said that even since Stevens Point has sent representatives to S.A.F. conventions, they have been the largest student group there.

The convention, a primarily professional function is attended by students, educators, private industry, state and national government departments and some forensic foresters.

Chapter of S.A.F. under the faculty of President Cook mentioned that there were several functions of the Stevens Point Chapter visit to the convention. One was to fill out the College of Natural Resources Scholarship and Award information forms. These forms are to be picked up in room 107 of the CNR building. These will be completed. November 3, 1980 is the absolute latest that forms can be turned in.

Nun rous scholarships and awards are presented each year to CNR majors. To qualify for these awards, it is necessary to complete and submit forms on which financial, scholastic and personal information is documented. Any CNR major is eligible for the scholarships and awards that will be presented March 17, 1981 at the CNR banquet.

The evaluation of the forms is based on more than grade point. Other factors that determine who receives these awards are geographic locations, majors and backgrounds—for example, farming.

Valuing the scholarships and awards range from $100 to several thousand. Awards are made to students in various majors as well as classes.

Some of the 25 groups that sponsor the scholarships and awards like to look over the students' applications before the end of the year; thus, the early deadline is important.

Professor T. Roeder, Chairman of the Scholarship Committee, said that many forms have been handed out, but few have been returned. He urges students to get forms if they have not yet, and to turn them in as soon as possible as some of the scholarships have to be picked right away.

Environmental Notes

Environmental Law Enforcement, Natural Resources 393, a 1 credit course for students enrolled in the Environmental Law Enforcement Minor will be offered January 12-16, 1981.

Phase II of the course will be offered March 16-20 and Phase III will be offered May 26-30, 1981. It is important to note that for Phase III the class will be held from Tuesday through Saturday, since Monday, May 25 is Memorial Day.

The classes will meet at the University of Wisconsin-Stevens Point in the College of Natural Resources Building, room 112 from 8 a.m. to 3 p.m.

The class content will include environmental law enforcement practices including such subject areas as search, seizure, ballistics, criminal codes, evidence collection and preservation.

The instructor for the class will be William L. Rollmann, Law Enforcement, Other resource staff are to be selected.

Costs for undergraduate Wisconsin residents is $33.80. Non-resident costs will be $125.30. These prices are subject to change.

Class size is limited and registration should be made in the Office of Continuing Education and Outreach, 1st floor (southeast area) of Main Building.

For additional information contact the Office of Continuing Education and Outreach, Main Building, Room 103, 346-3717.
Seems like the first time

By Jeff Dabel

This article will be dealing with sex — a subject that has been under a great deal of discussion and concern recently. The purpose of this article is to gain a better understanding of these areas, I spent part of last week interviewing various individuals on campus about their "first time" experiences. Not because I was pervy; but because, chances are, by the time you graduate from here, you will have engaged in some form of sexual activity — and if you're not aware of the precautions needed for such a responsibility, you could end up as merely another statistic at the University Health Center.

Of the 17 people I interviewed last week, only two were men. The others were asked many questions. Out of the remaining 15, three replied that they are leaving, one of the other 12 to relate their 'first-time' experience. Of course all names have been changed for fear of minor recognizable details. When asked about his first sexual experience, John regaled, then he began to recreate the story from memory.

"I was 17... maybe 18. It was the summer before I came to college. I remember being nervous and hanging around with used to boast about all the ass they were getting. I didn't believe all that bullshit... and even wondered what was was going on with me. Maybe women didn't find me attractive." John shifted his weight and nervously glanced around before continuing.

"One night, we were all at the local bar following a ball game. We had lost and were drowning our sorrows in beer. After awhile, a women's baseball team came in and joined us. We were all singing and drinking — having a great time. Then I noticed that one was really giving me the eye. I was kind of scared.

"Yeah, I had the feeling something was going to happen.

"Well?"

"That next to me, pretty soon we were holding each other while singing with the jukebox in the background. We ran to the back seat of my Buick making out. I don't think it was her first time...I just was really nervous. She was a few years older than I was."

Were you adequately prepared?"

"Huh? You mean birth control? No, we didn't use anything. We probably should have thought about it...just wanted to get laid.

"Are you regretting it?"

"Not that night...I really didn't. I dropped her off at her apartment and then went home. The next morning I saw a couple of my buddies. They told me what had happened. I felt offended. I felt upset. I felt hurt. I felt the most I had ever felt in my life. I had been preoccupied with what I had scored. I really felt proud, kind of like putting a notch in the score book."

"I just kept thinking about that, that she must have taken care of it, I mean she hustled me. Besides, I was too worried about having caught a disease."

Greg had a different story to tell.

"My first time? I was 20, and enrolled at Green Bay. She was a real good friend of mine. I'd always thought of Sherry as a friend... We would put on occasion, party together, have a few drinks. We sat around getting stoned, listening to some music when we would run out loud."

Think out loud?

"She was wondering if we could keep a secret and still remain good friends. I didn't answer. We just started to make out. I guess were both pretty horny things just came naturally—almost."

Can you elaborate?

"I had the most pressure and get some protection, you know, rubbers."

You were able to think of those at that time?

"Sure...we didn't want any accidents. I always had my bike down to the drugstore. I must've walked around the place four times before I got the courage to go inside. I was really high and sort of paranoid. I think the pharmacist thought it was because I sold the largest box — at least a year's supply!"

Did you ever accomplish your mission?

"Yeah, except things went pretty quick. Then I started to feel sort of guilty. I think she did too. Sherry left after awhile. It was a long time before I saw her again. Things just were never the same."

Reene wasted no time relating the details of her first experience. She was blunt and to the point.

"My first experience was on my 17th birthday. My boyfriend got his parents' cabin for the weekend. We were going to drive up there in the afternoon. He had bought some beer and South Pacific for us. It was fun at first, but then I started to get sick from the motion of the car. When we got to the cabin I was puking. On the seat, the front lawn, everywhere. After awhile we decided to go inside and pass out. We laid on the floor together by the fireplace — then Dick started playing with me. I said something about "getting my birthday present. I really don't remember much. In the morning I felt terrible. From the hangover, huh?

"Well, that too. But I felt bad that I had given myself to Dick. I didn't really like all that much. It was something I wasn't sure I wanted him to have."

What about pregnancy?

"I just thought that, she must have taken care of it, I mean she hustled me. Besides, I was too worried about having caught a disease."

"I was in love, or at least I thought I was. We had been going for five months before we decided to have sex. Matt never pressured me, I was ready."

"I didn't think it was right for both of us. Soon, it was. It wasn't anything I wanted. I was scared. We used both rubbers and foam to be safe."

The next day I was so sore that I could hardly walk. I remember thinking how great sex wasn't what was everyone so excited about?"

"Are you still going out with this man?"

"No, we stopped seeing each other four months later. I don't think it had anything to do with sex — we just went our separate ways."

Did you have any regrets?

"No, none at all. It was a new experience in my life. It made me feel more mature."

More mature that you could have added responsibilities?

"Yeah...that's it."

Have you had any other experiences since? How about precautions?

"I've had my moments...but I've always taken the precautions. Pregnancy and college just don't mix. People have enough problems on their minds without an unwanted pregnancy to really screw things up!"

Is it the responsibility of the female then?"

"I feel that women should always protect themselves. Because they're the ones left holding the bag. But the guy should be expected to share the responsibilities, after all, he's sharing all the fun."

How about the guys that refuse to take precautions?

"They will never be with me."

The last four stories included a variety of methods used, some used precautions, others didn't. But all were ready in one way or another. What were some of the reasons for not using precautions?"}

When you're only 18, that's quite a deal! The Navy was giving you a good chance to protect ourselves against disease. But when you've been diagnosed about those things, I wanted some ass real bad.

"He first went on base I got some on of the local Philipino girls. She didn't even charge me. Three days later she came back."

"I got up early to take a piss...My God! it hurt. The next day I told her I thought it was funny when I told them, I didn't, I was scared. Even though I had hurt it hurt more and more. It really caused me to "bend some pipes."

In Navy lingo, he was experiencing a great deal of pain.

"After two days I went to the infirmary, I couldn't stand it anymore."

"They thought it was funny too. It was a real pain in the butt. And I screamed so much for help, the intern told me that only I had a mild case. He went on to explain that there were some strains of the clap that were developing a resistance to penicillin. It's only known what happens then.

A lesson learned then, huh?"

"Yeah...it was a little more careful after that — but I still managed to get infected twice more. After all, we had a big deal — couple of shots in the butt and out you go. I even heard about some guy that had the clap so often that the Navy discharged him, he was probably sterile."

After conducting these interviews, I was surprised by the results. But even more, I was overwhelmed by the bottom line. As Doris and John told me, sex is a personal decision that only you can make. No one else has the right to decide for you. If you plan on having sex, don't be stupid. Even though the Health Center posters are sexist and tacky, their message isn't. Take precautions and protect yourself. But then, you knew that already, right?

Answers:

1) Mead, a wine made from honey.

2) A centillion (10 followed by 600 zeroes).

3) The fruit best tortoises of the Galapagos Islands

4) Leo Roberts of Rio, Brazil

5) The coordinates (38 feet, 8 1/4 inches)

6) Margaret Hamilton

7) (One they won 116)

8) Tom Dempsey, with the New Orleans Saints — 63 points

9) Eucalyptus leaves

10) The American Indian brought some to the First Thanksgiving.
Letters

To The Pointer:

The young people of this country could very well decide who the next President of the United States will be ... that is if they get off their "duffs" and take the time to vote!

It's rather a simple process to register to vote. The City Clerk or the County Clerk can give you information as to how and where to vote. This information will also be in the UC concourse before election day. It's a very good idea to get registered before the election but you don't have to.

You can walk in, register and vote if you have proper identification and proof that you have lived in your present address at least 10 days. It saves a lot of time for you to register before election day, however.

I am one of the poll workers that will be "greeting" you on November 4. The more of you I see the more I will believe that there is hope for the future.

See you on November 4!

IMPORT NIGHT ON TUESDAYS 7 - CLOSING
ALL OF OUR 25 IMPORTS—ALL FOR 90¢
(SATURDAYS TOO! NOON TILL 6:00)
Two hundred years ago, a grueling, bloody war was fought on the eastern seaboard of this continent. Casualties were heavy, suffering and sacrifice were plentiful. Yet one transcendent thought, one blazing image kept the American Revolutionary Army battling on and ultimately turned back the tide. The motivator I'm referring to is a picture of freedom and justice that was locked in the forefront of each patriot's mind. These soldiers were even willing to sacrifice their right to life so that their fellow countrymen could thrive in an atmosphere of freedom.

This dedication to ideals makes recent actions by the Veteran's organization on campus, men who have fought to protect inalienable rights, all the more deplorable. The Vets have jumped on the notorious 'SlASEFI' bandwagon to prohibit the campus Gay People's Union (GPU) operating freely as any other campus organization does. It appears that the SIASEFI's, a university fraternity branch best known for their wild drinking bashes and an alcohol-induced fatality several years back, have taken it upon themselves to uphold the moral fortitude of UWSP. Consequently, this involves doing all in their power to berate, aggravate, and intimidate the campus GPU. Together, these groups are prepared to petition SGA to cut out or at least significantly reduce the GPU's budget.

Several matters should be brought up at this time. First, and this is important to remember, not all SIASEFI's or campus vets are involved in this undermining effort. However, it does appear, despite statements to the contrary, that the parent organizations are the primary instigators. Second, regardless of their intense concern with inebriation, the SIASEFI's are supposed to be primarily a service fraternity, one geared toward the advancement of fellow student organizations in any way they can. At least that's how it reads in their charter. Finally, let me add that I both encourage and respect these two groups for bringing this issue before SPBAC and SGA if they think they have a legitimate gripe. That's the democratic way!

Unfortunately, this isn't all they've been doing or even their major approach to the supposed problem. Instead, a rain of harassment in many guises has taken on frightening proportions. In the last few months, GPU members have had to cope with death threats, property damage and a variety of slanderous verbal abuses. Dr. Louie Crew addressed some of the specific problems encountered on this past week's Two-Way Radio program on WWSP.

The reasons given by the SIASEFI-Vet alliance for their actions are a grave concern over just who's getting the funds allocated from student segregated fees for the GPU. Since there is no published membership list for this organization, these opposition groups are complaining that non-students could be benefiting from student resources. Ironically, if this and not some deep-seated prejudice is the primary motivation behind recent behavior, they have conceived a self-fulfilling prophecy. The methods of expressing displeasure that the two groups have chosen have created such a heavy atmosphere of fear and distrust that it is now virtually impossible to safely post a membership list. Furthermore, there are other elements to this conflict that have yet to be brought to light, some of them constituting very serious matters.

Overall, this entire situation is more sad than anything else. I personally am a dove, don't drink, and have very satisfying heterosexual relations with my wife. On the other hand, I see a primal vitality issuing forth from each of the groups involved in this triumvirate. There's an energy being spent in this petty squabble not often found in the everyday run-around existence of this campus. It is a tragic indictment against all of us that we must spend our time and effort picking sides in these foolish clashes, dividing into schisms, when the sum total of our enthusiasm could be devoted to making the academic experience a better one.

To The Pointer:
For awhile there I was really angry. Not just a little miffed. But downright ticked off. Here I was getting angry at the University Activities Board when I didn't even know what they were really up to. I had gone to a recent concert at the Starlite Ballroom which featured a highly talented jazz group from Milwaukee called Sweetbottom. And I said to myself, "Jim, how can a place like the Starlite Ballroom (an oversized, heated cow palace) get a group with the quality of talent that Sweetbottom possesses and the UAB can't even get Slim Whitman?"

But as usual, I was wrong. I didn't know the complete picture. I looked up UAB's budget for the academic school year of 81-82 and found out that they were only allocated a measly $73,920. I couldn't believe my own eyes. How can we expect UAB to get anyone of any fairly decent caliber with that amount of money? Sweetbottom wouldn't play for fifteen minutes for that kind of money.

But then UAB pulls the biggest surprise of all. Even with that incredibly low budget that they possess, they come up with a really incredible blockbuster. Conway Twitty. Now if I
Homecoming a success

Homecoming: A Time to Celebrate!

By Jeanne Pelcski

Although the weather was dreary, UWSP’s Homecoming had a festive flair to it. Everybody was certainly “in the mood” as students enthusiastically participated in the apple bobbing of war, cracker whistling contest, the hog call, pyramid building, tug of war and the three-legged race.

The parade was one of the longest UWSP has had in years—with over 30 units participating. Eight area high school bands competed for first, second and third place trophies. Marathon City finished first, followed by Spooner and Tri-County.

Eleven floats also competed for trophies. Sigma Tau Gamma placed first. Their float, a “papier-mache Point Beer can with the saying, ‘We’re in the mood—let’s get a little fun’,” placed second and Tau Kappa Epsilon won the third place trophy.

Quari Kung-Koon, the parade chairperson, said that this was the first year that off-campus groups were encouraged to enter the parade and were pleased to see two off-campus units participate.

Kung-Koon also said that the “Greens” should be commended not only because over half the floats entered were by their organizations, but also because they did most of the organizing for the Homecoming games.

“Our there was a lot more participation from everybody this year than there had been in the past,” said Kung-Koon.

The Student Government Association should especially be commended—this is the first year that I know of that they participated in Homecoming events,” Kung-Koon said.

“We in the mood—let’s get a little fun”...and that’s what Homecoming is all about.

Students build a pyramid

The Marathon City band demonstrates their winning form

“Come on! Let’s win this tug of war!”

Preparin for the three-legged race

“Apple apple, where is the apple?”
"Oscar" Meyer is no bolonga!

Point's newest pizza prince

By Jeff Dabel

"Oscar" Meyer knows how to make a great pizza, and that's no bolonga! Rick "Oscar" Meyer is the owner of Stevens Point's most recent fresh pizza parlor - the Square Wheel. The Square Wheel is located at 1226 2nd Street, nestled in between the Skipe Sera Cheese Shop and the Square Bar. If you should happen to stop in to pick up an order, don't expect to have a piping hot pizza waiting for you. It doesn't work that way.

What you can expect to pick up, is one of the tastiest fresh pizzas around. Your pizza is prepared while you wait, and it's made entirely with fresh ingredients. Then, after paying a modest price, you wait little time scurrying home to bake the final product yourself. After paying a modest price, ingredients I can find without with fresh ingredients. Then, you waste little time around. Your a piping hot pizza waiting for you. I keep my prices low and it's no bologna! Rick Meyer knows how to make a great pizza, and that's no bolonga! Rick "Oscar" Meyer knows how to make a great pizza, and that's no bolonga! Once he generously pounds cheese onto the pre-made crust. Then he generously adds all the ingredients used, "Which, according to him, makes one taste pizza."

From a nearby cooler Oscar produces a large plastic tub of shredded mozzarella cheese. "Our cheese is delivered fresh twice a week from a small factory in Van Dyne, located near Fond du Lac." Costly? "The price of cheese goes up constantly, and that can add up when you use nearly 300 pounds of it a week." The bell above the door rings brightly, momentarily drawing my attention away from the cheese. Oscar takes the order, and begins to prepare a large pizza while I watch hungrily from the backroom. Oscar ceremoniously pours ladle upon ladle of his secret sauce onto the pre-made crust. Then he generously mounds cheese on top of that. Proudly he tilts the pizza in my direction to show me.

"There must be close to a pound of cheese on this one." Then, using his massive hands for measuring cups, he adds the finishing touches - pepperoni, Canadian bacon, and sausage, complemented with garnishings of olives, onions and mushrooms. I watch as the customer's face brightens with approval - a look that seems to say, "I'll be back!"

As the door closes with a ring, Oscar reveals his business philosophy. "I keep my prices low and hope to make up the balance by selling more... I don't know if this is going to work yet, but my customers keep coming back for more. That last pizza, for example, it cost me about $4.50 to make, and I gave it to him for $2.25." -Oscar is obviously a salesman confident of his product's ability to sell itself. This is the major reason that he insists upon fresh ingredients.

"Out of every ten new customers I get, I know eight will return. And those eight will usually bring others. My best advertising has to be word-of-mouth. Many people will come in and say, "Hey, so-and-so told me to try this, so here I am!" Oscar doesn't have the background one would normally associate with the pizza business. He is a 1976 UWSP graduate with a major in Applied Music and Music Education. During his spare time, he played the bassoon in the Stevens Point University Civic Orchestra. The next few years were spent substitute teaching, and at a variety of other jobs before he decided to enter the business world.

In March of 1980, Oscar and a partner purchased "Bugsy" Couillard, purchased NJ's Fresh Pizza (as it was known then) but both spent 80 hours a week learning and keeping the business going. On August 1, Oscar became the sole owner, and the first change he made occurred within the menu.

"When I started here, we only had pizzas, submarine sandwiches and soda. I've added everything else since then -- including carryout beer."

And has the move paid off? "It's hard!" Oscar answers enthusiastically. "I've increased the gross sales over 50 percent while nearly doubling my lunchtime business."

I look over the menu. Boldly stamped across the top is, "FRESH WHEN YOU TAKE UM -- DELISHUS WHEN YOU BAKE UM." Whatever your fancy, there's something for everyone. Subs, (available with fresh mozzarella cheese), pizzas, hot beef and salads.

There are even a couple of Square Wheel pizza creations -- the Carp Wheel, which features tuna and shrimp, or the Polish Delight, a pretty good concoction if you're in the mood for Polish sausage and sauerkraut.

"You know," adds Oscar from behind a stack of sub buns, "I'll make anything the people want if I have the time. I've even made cheeseless pizzas for people who are allergic to dairy products."

On occasion, he's been called on to cater large groups, one time in a move above and beyond the call of duty, Oscar and "Bugsy" once made 60 submarine sandwiches in an hour for Joerns Furniture Company. "We had to come in early so that we could work uninterrupted." Oscar pulls up a chair, finally able to rest during the lull. A satisfied customer is what keeps him in business. And that's hard to do when most of the town is not familiar with his name. "I believe that the majority of this town doesn't even know we're here." Oscar sighs and reaches for his beer. "I have to really thank the students for my sales. They've really supported me."

But not all of Oscar's sales come from the students. He gets a good mixture of city people stopping by too. Most of them are regulars, including former Wisconsin Governor Martin Schreiber. "We just have to get at the people of this city," Oscar remarks as he shows me an ad that will appear soon in a local coupon magazine: a free liter of soda for every large pizza sold.

Oscar also has nearby competition to contend with -- the Portesi Pizza Company, which makes a sales pitch that will only work two blocks away. Asked if Portesi has any effect upon his sales, Oscar just chuckles. "I don't believe they've had any effect on our sales, but I'm sure we've had some effect upon theirs. Portesi makes a pretty good pizza. They have many loyal followers. I have even been known to sneak one on occasion myself," admits Oscar, "but it's difficult to compete with a frozen pizza with a fresh one."

Oscar has hired several students to work part-time. Some of our of them are regulars, too. Most of these students have found that our student workers with extra work study while working. For example, the slow hours, some will study while others will watch TV. Subs, (available with fresh mozzarella cheese), pizzas, hot beef and salads.

With the returning students, Oscar anticipates an increase in business. But he's already discovered that the name change has left some fresh pizza lovers confused. "We bought NJ's Fresh Pizza on March 1, and kept the name until the first of June. During that time we were the Square Wheel. The students have found out that our name is different, but not our product."

Oscar is anxious to greet his returning clientele, and adds that they should "call ahead. It's quicker for you and easier for us."

The Square Wheel is open longer hours this year too - from 11 a.m. to 10 p.m., Sunday through Wednesday, and from 11 a.m. to 1:30 a.m., Thursday through Saturday.

Customers returning this year will notice something familiar about Square Wheel. That is their prices. I've held prices for quite awhile now. Our deluxe subs are the same price as when we first took over in March -- and they're our best deal. Hopefully you're near the square, stop in at the Square Wheel and sample some of their fresh products.
Pointers rush to Homecoming win

By Chuck Witkowski

Isn't it the truth? So many times you find yourself opening that memory box, locating something good, wiping off the dust, and deciding to re-use that object once again.

On a Homecoming Saturday and finding themselves on the tail end of a 7-0 halftime tally, the UW-Stevens Point football team decided to do a bit of this "dusting." In the process, they found their 1980 ground game, along with a revitalized defense, thus gaining a seat in the 20-14 winners circle over UW-Superior.

Spinning the Yellowjackets an early first quarter seven points, the Point offense turned to a healthy backfield, lead by workhorses Jerry Schedlbauer and Andy Shumway, that responsed with 14 points and 198 yards, in notching its first conference victory of the season.

The ground attack first became evident after halftime activities, as the sophomore fullback Schedlbauer broke clear from Superior tacklers and powered 77 yards for the Pointers first score. The Antigo grad, with his longest college run placed in the books, was seemingly low-keyed after his score, which followed the Superior kickoff.

"It was just a belly option play off tackle. The guard and center cleared the way and I just tried to keep my balance and get as much out of the play as I could."

Following the extra point conversion by Randy Ryszkowski, the Point defense began its "Oscar-winning" performance with its sound third and fourth quarter play. Opening the final period, Superior free safety Bob Blake intercepted his second pass of the game and returned it to the Pointer one yard line, as the skies turned cloudy for a successful Homecoming celebration.

But the Pointers were not to be denied as the defense held its ground and turned away the big play from once again disrupting victory plans. Following a clip penalty that moved the ball back to the Pointer 28 yard line, and a UWSP sack that dropped Jacket quarterback Jeff Mumm another 12 yards from pay-day, defensive back Tom Meyer closed Superior's rally with his first of two interceptions.

Minutes later on the soggy Goerke Field, the special teams, a season-long disappointment for Stevens Point, broke from the gates with defensive back Jeff Seegar blocking a punt, on an attempt by Superior's Blake.

Following the Bill Hoeft recovery of the punt, the Pointers once again opened its running playbook, with junior Andy Shumway scoring from the Yellowjacket five yard line, and the Pointers showing 14 on the scoreboard. The Wisconsin transfer credited his offensive line for the tally. "My touchdown came on a power play off-tackle and I got good blocks on the left side from Al Mencel and Dave Brandt. Our line just kept gaining confidence as we stuck with the running game," explained the Wisconsin Dells native.

Following the Shumway score, the defense again rose to the occasion, giving the UWSP offense good field position after another Blake punt. Beginning at their own 46, the Pointers took four plays and added its 20th point of the contest with a Brion Demski to Chuck Braun pass connection. The play covered 32 yards, with nine minutes to play, as Braun finished with six receptions and 92 yards on the day.

The Yellowjackets closed the game's scoring when a low snap on a-Point punt resulted in a first and ten for the Superior Jackets on the UWSP 15. Reserve quarterback Steve Hendry then hit split end Bob Frenchick with a 4-yard scoring toss, and the extra point kick showed a 20-14 Point lead with less than a minute showing. An on-side kick-off attempt failed and the Pointers continued to run out the clock on the winless Yellowjackets.

The Point defense allowed only one Superior drive during the game, by holding a strong opponent's running game to just 67 yards. Still, this drive amounted to the 7-0 UWSP halftime deficit, as Superior marched 60 yards in five plays, finishing on a 20-yard Mumm to Brian Matye touchdown pass, as the first quarter came to a close.

Meanwhile, the Pointer offense struck cold in the first half.

Bucks seek NBA title

By Joe Vanden Plas

Kareem backs down on Lanier. A turnaround 10-foot sky hook, off the right sideline, the rebound, he outlets to Brian. Brian dishes it up ahead. Elmore gets it. Lanier with the rebound, he outlets to Brian. Brian dishes it up ahead. Elmore gets it. Lanier with the rebound, he outlets to Brian. Brian dishes it up ahead. Elmore gets it.

Since the days when Abdul - manning the pivot. The Bucks boast a league. The Bucks have one of the most imposing line-ups in the league. The Bucks boast a league. The Bucks have one of the most imposing line-ups in the league. The Bucks boast a league. The Bucks have one of the most imposing line-ups in the league.

The sky walker, he outlets to Brian. Brian dishes it up ahead. Elmore gets it. Lanier with the rebound, he outlets to Brian. Brian dishes it up ahead. Elmore gets it.

The power forward spot was left vacant after last season when David Meyers was Meyers' heir apparent. But the Bucks had traded for veteran Mickey Johnson before training camp began. Johnson, who has had attitude problems in the past, has won the starting job. The little 6-foot-10 forward is a consistent scorer and a slick passer, but his defense leaves something to be desired.

Brian Winters and Quinn Buckner will continue to start at the guard spots. Winters became more of a ball handler last year but still remains one of the most deadly outside shooters in the game. Buckner is the unquestioned team leader on the court. A defensive standout, Buckner will score more this season with an improved outside shot.

Milwaukee's reserve guards could start for most NBA clubs. Junior Bridgeman averaged 17.6 ppg last season as the league's best sixth man. The versatile Bridgeman will also be called upon to play forward of a team. Milo will receive more playing time this season. The former Arkansas All-American has adjusted well to his reserve role in the pros but it may be only a matter of time before he cracks the starting line-up.

Forwards Len Elmore and Scott Lloyd have made the Bucks roster. Expect the steady Elmore to remain with the team. Lloyd may be waived to make room for play-making guard Michael Evans. Milwaukee acquired Evans from San Antonio during the pre-season, but placed him on the injured reserve list. Harvey Catchings, an excellent rebounder and shot blocker, spells Lanier at center.

Coach Don Nelson and his assistant, John Killeya, have installed their Boston Celtic influence on Milwaukee's style of play. Look for the Bucks to employ the fast break offense and pressure defense.

The Bucks have moved to the Central Division of the NBA's Eastern Conference because of the addition of the expansion Dallas Mavericks to the league. The Bucks will be battling for the divisional title with Atlanta, Indiana, Chicago, Cleveland, and Detroit.

Field Hockey team wins own invitational

By Joe Vanden Plas

When you're hot, you're hot, and the UWSP field hockey team is the hottest thing on campus these days. The Pointers upped their winning streak to 11 straight games this weekend with four victories and a championship in the Stevens Point Invitational.

After playing their first 22 games on the road in 1980, the ladies were glad to be home. "We figured out that we traveled 340 miles so far this year," related Coach Nancy Page. "It was great to be on our home field."

On Friday evening, the Pointers took advantage of the home field with a 3-4 victory over a tough Northern Michigan team. Ann Tiffe scored at the 17:00 mark of the first half to give UWSP all the points it needed. Mary Schultz tallied in the second stanza to round out the scoring. Coach Page was surprised at the ease with which her team won. "We were expecting a better game from Northern. They were flat," she observed. "We controlled the entire game. I thought everyone played very well."

The Pointers continued to roll as they defeated River Falls 5-4 in the third game on Friday. The contest wasn't nearly as close as the final score indicates. Point unleashed 32 shots while the Falcon women did not get off a shot. Ann Tiffe scored twice and Barb Bernhardt once to aid the Pointer cause.

In Saturday's contests, played in front of a Parents' Day crowd, the Pointers had earned another 3-0 win. This time the victim was UW-Green Bay. Ann Tiffe was Point's catalyst once again as she scored at the 24:00 mark of the first half. UWSP continued its dominance of the Phoenix as Mary Schultz scored for the Pointers.

The Pointer cause.

The Points have now recorded 13 shutouts this season.

UWSP then met Whitewater for the championship and came away with a 5-3 triumph. Mary Schultz earned a hat trick as she scored three goals for the victorious Pointers. Shannon Houlihan and Becky Streeter also scored for the Pointers, who substituted liberally late in the game. "I played everyone because it was Parents' Day," explained Page. "Two goals were scored at the end, but that is immaterial. We wanted everyone to play," she added.

UWSP's overall record now stands at 22-3-1. Coach Page explains the reason behind the Pointers' success. "Our real asset is our speed. When we pass the ball well, we can outrun anyone."

The Pointers will be hosting the WWIAC tournament on October 31 and November 1. "We are the definite favorites," asserts Coach Page. "Our conference record is 7-0 and we have beaten every team that will be there," she adds.

The winner of the WWIAC will move on to participate in the regionals at Dennison College in Granville, Ohio.

Cont. from p. 19

half, as five scoring opportunities from good field position died in the chilly atmosphere.

With Schedlbauer enjoying his first 100-yard collegiate game (113 yards in 13 attempts), and Shumway coming off the injured sheets to add 95 yards, the Pointers finally showed a powerful ground attack that was missing in previous WSUC games. For his efforts, Schedlbauer also received honors as the offensive player-of-the-week, as the team's second leading rusher with 366 yards. Schedlbauer was praised by head coach Ron Steiner:

"Jerry is an outstanding runner, one who doesn't know what it means to quit. A number of times everyone thought he was down, but he just kept battling and gaining yards."

By posting this conference victory, the Pointers moved their overall record to 3-4, with UW-Platteville next on the schedule. Highlighting a strong defense led by Milwaukee Concordia transfer Chuck Voltner, Platteville marks the end of the '80 UWSP home stand, as the Pointers perform before a Parents' Day crowd. Kick-off is at 1:30 p.m.
By Kurt Denissen

The NFL is at the halfway point in the 1980 season. The Prophet chatted up an 8-0 record, bringing his yearly total to 33-45. The Prophet and his elf were perched under the “L” in Lambeau Field this weekend for the Viking contest. Now week, eight!

PHILADELPHIA (6-1) OVER CHICAGO (3-4) — The Bears ring Banquet-hall somewhere with Vince Edwards at QB. Unfortunately, they have to contend with one of the best teams in the NFC. The Eagles are tough. Philadelphia swipes the Bears by 12.

HOUSTON (4-3) OVER CINCINNATI (2-4) — The Oilers must win to stay at the top of their division. The Prophet rambles the Bengals in the Astrodome by 3. offensively and defensively.

SAN FRANCISCO (3-4) OVER TAMPA BAY (2-4-1) — The Prophets have been winning lately and making mistakes. This momentum keeps them rolling over Seattle by 6.

SAN FRANCISCO (3-4) OVER SEATTLE (4-3) — Seahawks have been unpredictable this season. The Raiders come from behind to win 17-14.

PITTSBURGH (6-1) OVER PITTSBURGH (5-2) — The Bills have been letting up lately and making mistakes. Pats are a hot team both offensively and defensively. N.E. 35 • Buffalo 27.

DENVER (5-2) OVER NEW ORLEANS (3-4) — What’s the story on the Broncos? They can really batter a team and they can really blow it. The bummed out to the max. Joe Riley saying, “Doris was able to hit around their blocks as well as through them. She also blocked well and did a good job defensively in the back row.”

Continuing in its winning ways, the UWSP women’s volleyball team won three of four matches, finishing second in the Third Annual Invitational Tournament held in Berg Gym last weekend. Northern Michigan, Minnesota, and UWSP Invitational by winning every match, while the Pointers’ only loss was at the hands of the Wildcats.

UWSP opened action Friday night against UW-Oshkosh and defeated them in straight games, 15-7, 15-4. The Pointers earned the score against the Titans, who played well despite being unable to go full force on her knee.

Pleased with the play of her setters, Post and Mary Jo Wamser, Coach Schoen said, “They both did an excellent job all weekend. They are both great setters and do a super job of running the offense. This weekend they saved a lot of balls that would have hit the floor.”

The Pointers command an impressive 19-7 overall record, with a 6-1 conference mark. They will travel to Carthage College in Kenosha this weekend, and will host Marquette the following Tuesday night in Berg Gym.

UWSP Athletes honored

By Carl Moesche

Denise Goodwin, the rowdy, festive atmosphere that a Stevens Point Homecoming entails, a number of people found their way to the Banquet Room to celebrate this past weekend.

At the annual Alumni Homecoming Banquet last Saturday night, both alumni and athletes, both former and present, were honored.

Baseball coach Ken Kulick emceed the evening, which attracted about 300 people to the Program Banquet Room of the Union.

Former Pointer football coach Charlie Culp was the guest speaker at the event. Charles coached the Pointers from 1972-76.

Inducted into the UWSP Hall of Fame were faculty members Duaine Counsell and Bernard Wielow. Also inducted were Michael Hughes and Peter Teryansk, who played on the 1970 All American football team.

There is a new form of massage developing in this country. It is called rolfing. It is under a bit of controversy because of the pain involved and just the whole concept of realigning the body. However, those people who have had rolfing say it has helped them.

In order for the human body to function at its best, it must be vertically aligned so that the weight is proportioned equally. The average human body has slipped off its vertical axis, causing perpetual tension in various parts of the body. Some causes of the slippage date back to childhood injuries and emotional traumas.

When one area of the body gets injured, such as a broken or twisted arm, the body compensates by favoring the good tissues for awhile. This patient has ten one-hour sessions with the "Rolfist." Sessions with the "Rolfist." cause the fascia! tissues to slip off its vertical axis, causing perpetual tension in various parts of the body. The average human body has an average of one-third of the students on this campus share this confusion on alcohol. There seems to be a popular belief that "Candy is dandy but liquor is quicker." Alcohol is reputed to be the grand old aphrodisiac of them all. Actually Shakespeare had the right idea in Macbeth when he wrote, "Drink provokes the desire, but it takes away the performance."

The fact is, alcohol is a general brain depressant. Alcohol affects the brain in stages. First it depresses the brain centers which govern fear, so it reduces anxiety and makes people less inhibited. People become braver and will try things they normally would feel too uncomfortable or embarrassed doing. This is when we start feeling like Jaclyn Smith or Robert Redford, ready to sweep anyone and everyone off their feet (and into our beds). Mentally we feel like a sex idol, but physically it is a different story.

After the inhibitors have been numbed, alcohol starts to work on our coordination and thinking abilities. Normal thinking and physical movement and thus sexual activity become more difficult. Alcohol definitely can impair erection ability, arousal, and orgasm. Research at the University of Georgia has shown that women are not able to enjoy sex as much after drinking. Victor Malatesta, Ph.D. from Georgia University stated, "Alcohol not only reduced the physiological arousal experienced by women, but also delayed the female orgasm." Women are not the only ones adversely affected by alcohol. Zick Rubin, Ph.D., in an article in Journal of Personality and Social Psychology, stated that a recent study demonstrated that the amount of male hormone present in the blood may be dramatically reduced by chronic drinking.

Summing it up, frequent use of alcohol may result in general physical deterioration, a process which commonly reduces a person's interest and capacity for sexual activity. Try and be aware of both the mental and physical effects alcohol has on you. It will enable you to better understand your feelings and behavior after drinking. Don't be fooled by the myth that you will be more successful sexually after drinking.

Love Won't Protect You . . .

Don't be swept up in the romantic moment . . . sure you're lucky in love and that's really great for you. But love is not an effective form of birth control. For information on contraceptives and individual counseling, come to the Unvirsity Health Center, second floor Delzell, phone 346-4646. Information also available on Dial-A-Tapes, phone 346-4357 on tapes 50 thru 57.
A Valuable Resource to Utilize

Career Counseling and Placement

By Chris Bandettini

Many students believe that the Career Counseling and Placement Office is an excellent source of career information available to all students from their freshman to senior years. Early use of these services is encouraged to maximize career choices. Valuable resources at this office include:

1. Career interest and aptitude testing upon request.
2. Federal and state civil service information.
3. Resume duplicating services for seniors and students seeking summer work.
4. Distribution of College Placement Annual to all seniors.
5. Distribution of weekly job vacancy listings to all students.
6. Maintenance of a large placement library where current vocational information concerning hundreds of businesses, industries, government agencies and school systems is cataloged.
7. Maintenance of a large graduate catalog library where hundreds of current graduate school catalogs and applications are stored.
8. Information concerning scholarships and assistantships of interest to those continuing their education in graduate school.
9. The organization of 125 on-campus employment interviews where seniors may interview for government, business and educational positions.
10. Information concerning the art of interviewing, with role-playing sessions for those needing special help.
11. Information on supply and demand of academic majors relevant to future employment opportunities.
12. Distribution of special placement publications to all students.
14. Responsibility for the university Cooperative Education Program which provides job experience to students before graduation.

Career Counseling and Placement encourages students to take an active role in seeking employment and in carrying out the tasks necessary to complete career plans.

As students proceed through college, Dennis Tierney, Director of Career Counseling and Placement, emphasizes that job experience is a vital step in the career process. Through job experience, students mature, develop responsibility, and a sense of work ethic.

In addition, as students integrate their academic work into work situations, enormous insights are gained that would not be obtained in the classroom setting.

Interview Guidelines, a booklet organized by staff members of Career Counseling and Placement, outlines specific components which enhance future career opportunities.

These elements include:
1. Academic Major. Certain majors tend to be in great demand and provide a high placement percentage without the inclusion of other elements. However, any major, including all areas of liberal arts, can be vocationally attractive and provide high placement in a field, if many of the following components are reflected in the resume upon graduation.
2. Grade Point Average. Your grade point reflects many things, including your perseverance, cooperation, reliability, dependability, writing skills, and academic insight. The grade point is considered by some employers to be vitally important in the selection process, and to others it is considered insignificant.
3. Personality Factors. Your personality is composed of many subtle factors which are reflected in your verbal, and to a lesser degree, your written communication skills.
4. Employment Experience. Excellent communication ability is an absolute necessity in obtaining most meaningful career opportunities. Research indicates that employers make a selection judgment within the first two minutes of the actual interview.
5. Special Skills. During the course of your college experience, it is important for you to develop as many of the following skills as possible to enhance your employment credibility:
   a. Knowledge of Computer Language
   b. Knowledge of a Foreign Language
   c. Art Ability
   d. Music Skills
   e. Knowledge of Athletics and Recreation
   f. Accounting
   g. Typing and Shorthand
   h. Evidence of Organizational Ability
6. Paid Experience Related to Your Academic Major and/or Career Field. The very fact that a professional agency or business paid you as a trainee provides a work reference and lends increased support to your candidacy as a professional upon graduation.
7. Volunteer Experience. Volunteer experience in activities related to your major or choice of career field will not only provide you with a valuable reference, but it will provide experience for your resume upon graduation.
8. Leadership. It is favorable to have held leadership positions in clubs, activities, and university organizations. Become involved in campus activities, and keep track of these opportunities as they are available.
9. Interview Skills. Interview skills can be sharpened through role-playing sessions in the placement office and through course work in Communication and English.
10. References. Whenever possible, choose your reference on the basis of prior academic achievements and successful work experience.
11. Mobility. Only those students who can take jobs where they find them realistically expect entry level professional jobs and significant career placement.
12. Honors. Any awards, special honorary recognition, or honors which you have earned should be reflected in your resume and objectively mentioned as they will offer extra credibility in your employment search.

The most important determining factor in obtaining job satisfaction upon graduation involves the students taking the first initiative in pursuing their career goals. If you haven’t done so already, take some time out of your hectic schedule and tap the valuable resources available to you at the Career Counseling and Placement Office.

Marshall returns from Poland trip

By John Anderson

For economy in travel, the Chancellor of UWSP suggests that tourists consider visiting Poland.

Philip R. Marshall, and his wife, Helen, just returned from a visit there, where they conferred with officials at Jagiellonian University in Krakow about an academic program there that serves UWSP students each fall.

It costs a penny to ride a streetcar anywhere in Krakow, Marshall observed. "Basically, everything that is a necessity in life is very inexpensive there — but many of the luxuries can be very expensive," he added.

The Marshalls spent two weeks visiting UWSP semester abroad program headquarters in England and Germany as well as Poland, and they were particularly impressed by the wide variance in the cost of living between the places.

In Poland, they hosted an elaborate banquet for eight people which carried a price tag of $18.75. A light luncheon in London for four people cost £2. Oktoberfest was being held when they were in Munich, Germany, where an individual serving of beer cost $2.70.

That penny ride on a streetcar anywhere in Krakow contrasted with a fee of $2.70 for roundtrip bus rides from the UWSP quarters in suburban London to and from the interior of the city, Marshall said.

Though the university is having no difficulty recruiting students for the overseas programs (usually there are more applicants than openings), he said it will be important for the future of interest and study offerings here to keep fees at reasonable levels.

An alternative for the Munich program, Marshall suggested, is to reschedule it from the fall to the spring semester to avoid Oktoberfest when housing is at a premium price in that city. But autumn is a much more preferable time for students to be there, he added.

The Marshalls decided to make the trip after the chancellor received an invitation from Jagiellonian University to participate in its official "inauguration" of a new academic year.

He spent considerable time with Professor Hieronim Kubiak, director of the university's Polonia Institute which is concerned with the assimilation of Poles throughout the world. Because Stevens Point is a major Polish settlement area, the institute has been interested in being involved with UWSP and currently is arranging to serve several other campuses located in communities with a similar ethnic configuration.

About 15 American universities are currently linked with the Polonia Institute, including UWSP and UW-Milwaukee.

Some of the professors Marshall met in Krakow have visited Stevens Point and "know more about our town than I do," the chancellor said smiling. He was asked specifically about Leo Gwidt who operates a drug store on the Public Square and Adam Bartosz, retired editor of Gwiazda Polarna, an internationally circulated Polish language newspaper that is published here. Bartosz died this summer.

The program in Poland is different from those offered in the fall semester in England and Germany, where UWSP sends its own professors with students and also contracts specialists from colleges and universities in and around Munich and London to teach additional courses. At the university in Krakow, the faculty is exclusively from Jagiellonian's Polonia Institute, with the exception of the one UWSP professor who annually accompanies the group.

Marshall reported that tradition and religion are important to the Polish people. While the leaders of the Jagiellonian University don't mention him so much, the faculty does call attention to local pride in Pope John Paul, who lived in Krakow while serving as a cardinal.

One professor told Marshall that Poles are "very strong in the Catholic Church," but that doesn't mean they are more religious than Catholics elsewhere. The difference, according to the professor, is that Polish nationalism is tied directly to the church — which maintained the country's tradition and culture during different times in history when all or parts of Poland weren't officially in existence.

Marshall said he was interested in a tradition that has been kept alive for more than 700 years in Krakow. At the time of a Turkish invasion, a "Polish version of Paul Revere" was sounding a warning by trumpet from a tower in St. Mary's Cathedral. During the call to arms, the man was killed by an arrow piercing his throat.

In commemoration of that event, that same call to arms is played every hour of the day from four different directions of the tower. Each time, the musician stops on the note which was being sounded by the man who died in the Thirteenth Century. Firemen now carry on the tradition, and Marshall observed that "not all of them are the best musicians."
