HOW TO RELATE
well water worries

ask uncle bob
As you might have noticed, the Pointer newspaper is no more. It had become increasingly evident to our editorial staff that the weekly's traditional newspaper format had a tendency to produce static, warmed-over news. The Pointer could hardly hope to provide fresh information and insights except about the most parochial of topics.

Consequently, last year's editor-in-chief steered away from the newspaper approach and began a philosophical commitment toward a magazine style. This year's staff believes the overhaul revitalized a sinking ship and have adopted its basic tenets. However, we have also gone a step farther and decided to call a club a club. So, you have the reason for the new Pointer Magazine logo on the front cover.

Pointer Magazine will still attempt to follow its journalistic mission to keep the student body informed of the hard news stories which affect their lives. But in a magazine format, we believe there is added room for expanded coverage of relevant student issues as well as news analysis and commentary. Bob Ham's madcap contributions and the rest of our diverse features' offerings also seem somehow more appropriate in such a setting. The tabloid layout should make it easier to get opposing views and your opinions into print as well.

For all these reasons, The Pointer is dead! Long live the Pointer Magazine!

Upperclassmen granted reprieve

The average upperclassman should be breathing a deep sigh of financial relief now that what was feared a favorable vote by the Higher Educational Aids Board (HEAB) last week.

James Jung, the executive director of the Higher Educational Aids Board, had submitted a proposal for approval which would have completely eliminated juniors and seniors from state grant monies. Jung's contention was that underclassmen are in greater need of the WHEG grants because they are in a more financially vulnerable position. The HEAB, in a display of egalitarian sense, didn't buy Jung's feeble argument and voted against such selective funding.

There were serious moral and practical problems with Mr. Jung's plan. Morally, there can be no justification for such wholesale discrimination against one large body of students against another. Certainly, something is amiss when a relatively affluent freshman could receive a small grant check while a penniless junior or senior would be turned away empty-handed.

On a practical level, Jung's contentions are even more suspect. His claim that underclassmen are more vulnerable shows very little knowledge of the escalating costs actually incurred during the course of schooling. The upperclassman must cope with the reality that dollars which used to come from parents have slowed to a trickle, while dealing at the same time with higher academic fees and added expenses from living off campus. This is hardly a less vulnerable position in my perception.

We are indeed fortunate that the HEAB has a voice apart from its director.

-Michael Daehn

On relationships...

Relationships are strange things because through time they have proven to be both constructive and destructive.

The events of 1982 typify the love and hate human beings are capable of showing toward one another.

On one hand, the year 1982 may well be remembered as the year respect for human rights and dignity hit an all-time low. In Lebanon, two governmental bodies, Israel and the Palestinian Liberation Organization, waged war on opposite sides of a fragile barrier of women and children who were helpless pawns in the mad chess game of political realities.

In the South Atlantic, Argentine commanders shot their own troops in the feet in trenches at Port Stanley to achieve a military victory that, in esse, was a pipe dream. No surrender was declared to prevent what amounted to scores of unnecessary deaths.

And let us not forget El Salvador.

The skeletal remains of the innocent continued to mount as the United States government provided increasing amounts of military aid to the corrupt regime that was partly to blame for the slayings.

Elsewhere, martial law remains a grim reminder of the despotic iron hand that rules Poland, the Iran-Iraq war is stalemated after two years of bloodshed and Soviet troops are still fighting in Afghanistan.

In Stevens Point, a brutal racial beating has served to remind us that atrocities can occur in our own backyard.

Nevertheless, 1982 has also been an exemplary year for heartwarming displays of compassion.

Generous contributions by friends, well wishers and private industries saved...
Library to expand horizons

Construction of an $8.3 million dollar addition to the James H. Albertson Learning Resources Center, a library at the University of Wisconsin-Stevens Point, could begin as early as November of 1983, it has been learned.

Harley Hoffbeck, director of the campus physical plant, said the design for an addition is under way. Completion and final approval for funding will be sought in January.

The tentative timetable now being used is to solicit bids by opening in September of 1983, construction beginning two months later and completion of the project in January of 1985.

Hoffbeck said university officials are hopeful there will be no more delays in the project.

Grad exams slated

Dates have been announced for graduate examinations in education to be given at the University of Wisconsin-Stevens Point.

The fall education graduate examinations are scheduled for Saturday, October 16, from 8:30 a.m. to 12:30 p.m. in room 326 of the College of Professional Studies Building. These are for students enrolled in education graduate programs.

Any person electing the exam option in the Master of Education Program will be eligible for tests at Stevens Point.

International undergraduates sponsor contest

Foreign students studying in the U.S. can win a First Prize of $1000 in an essay Scholarship Contest, it was announced today by the contest sponsor, International Underwriters, Inc. Students have until November 1, 1982, to submit their 1500-word essay on the topic of "From your personal viewpoint, how could the intercultural educational experience be made more effective in the U.S. for international students?"

Criteria for winning the First Prize are: (1) the essay must be in English, (2) the essay must be original, (3) the essay must be typed or written in clear, readable style. Winning entries will be judged by a panel of distinguished professionals from the field of higher education. Additional prizes include: second prize of $500 and ten honorable mention awards, each $250 will be awarded to the International Student Office of the First Prize winning student.

Foreign student advisers who are members of the National Association for Foreign Student Affairs, (NAFSA) were informed of the contest over the summer and invited to encourage their students to participate. Thus, many schools have information available at the International Student Office. Announcement posters and information packets are also available from International Underwriters, Inc., Suite 203, 1511 K Street N.W., Washington, D.C. 20005.

On the road to Shandong

Julia Dietche, who lived and taught for a year on mainland China, will be the keynote speaker at the fall meeting of the Wisconsin Council of Teachers of English, Thursday, at the University of Wisconsin-Stevens Point.

Dietche, a member of the UWSP English faculty, will talk about "Teaching and Living in Shandong University, People's Republic of China," from 6:45 to 7:30 p.m. in the Wright Lounge of the University Center. Between 50 and 100 high school teachers from throughout central Wisconsin are expected to attend the conference.

Dietche, who holds a bachelor's degree from Vassar College, a master's degree from New York University and a Ph.D. from the University of North Carolina-Chapel Hill, has been at UWSP since 1976. She says the position at Shandong University, located in northeast China, was advertised nationally. She applied and was chosen to teach at the university's Institute of Modern American Literature from August, 1980 to the summer of 1981.

Dietche lived on the Shandong campus in a university apartment, where members of the faculty, staff and their families were housed. Two other American couples from Utah and California also spent the year there. She knew nothing about the country or its language when she arrived.

She says her salary was low by American standards, $250 a month, which was treated as a "foreign expert," and everywhere she went she was treated with awe and respect and had to look at her—sometimes it was fun, but at other times it made her uncomfortable.

Owl lover gives a hoot

"I've always been interested in predatory birds because I've thought they're too harshly persecuted," says Don G. Follen of Arpin, who may be the great gray owl's best friend in Wisconsin.

Follen has invested thousands of hours of his own time and thousands of dollars of his own money to generate more public awareness of what he describes as these "beautiful" birds.

He hopes his campaign will result in more security for protected owls which he says are "still being shot by thoughtless gunners."

Follen has a reward for people who, with photographs or other means, can prove sightings and/or locations of nests.

"Why? For no particular reason other than the fact he has a deep interest in wildlife, particularly the great gray owls, and has dedicated himself to their cause."

He is in the midst of a five-year study of the birds to get basic population data. His count so far this year is about 25, the highest he has seen in the project in the late 1970s.

Follen's project requires that he be financially successful in his job because it involves a significant personal expense. He travels between 12,000 and 17,000 miles per year pursuing reports of the owls, and he pays $25 to people who prove sightings and $50 to those giving proof of nesting sites.

Last year, he received a $1,000 grant from the American Philosophical Society to augment his own expenses.

Follen's project has been aided by many newspapers across Wisconsin which have published announcements of his rewards for information.
Behave yourselves

To the Pointer

Two years ago, the Homecoming Parade was screwed up by a number of drinking students who caused disruption by shouting profanities, grabbing band members' instruments, and frightening female band members by lifting their dresses and pinching them.

Because of this action, last year's Homecoming Parade was cancelled partly because none of the high school bands wanted to return. A small number of people ruined it for the rest of us.

This year's Homecoming Parade will be patrolled by students, security, and police but unless all of us work together to help the Parade be successful, there are no assurances that it will be successful. By taking the obligation to make our community a happier and safer place for all people, we may continue to enjoy and be treated by an annual Homecoming Parade.

Please enjoy the Parade by sharing with your friends the Last May, I had to sit there and I didn't even wait to just give up and say it is lost forever, because my photos are very special to me. If anyone has seen a photo matching this description, with my name on the back, please call me.

Cheryl Plante Brown

Gripe No. 3: This concerns the SLAP office, which I feel is totally unorganized.

Last May, I entered a wetlands photo contest sponsored by EENA. The photo was then sent to EENA's mailbox, in the SLAP office, and returned by May 14th.

On May 15th I made an inquiry in the SLAP office as to the location of my photo, which was a 10 color swamp picture mounted on black tag board, and has been missing since I submitted it. The SLAP people gave me names and phone numbers of various people involved in EENA. I called them and they had no recollection of my photo.

I don't wish to just give up...
Exec recommendation rejected

Aids board endorses grant hikes

By Chris Ciechowski
Pioneer News Editor

Last Friday, the Wisconsin Higher Educational Aids Board (WEHAB) endorsed a 42 percent increase in state grants for students attending college during the next bimonthium, but refused a recommendation by the Board to double the amount of funds which would have made juniors and seniors ineligible for state funding.

WEHAB Executive Director James Jung had proposed doubling the grants to level I students, freshmen and sophomores, because funding for the program failed to keep pace with demand. As a result, too many students were eligible for too little money. Jung felt the restriction would get money to the most financially vulnerable students.

The United Council (UC), a UW student advocacy group, opposes Jung’s recommendations on a number of grounds. While reducing the amount of eligible students, it would base grants on academic standard in addition. The UC questioned the efficiency of awarding grants to students associated with “academic vulnerability.” Also, since level I students must live in university housing and pay its mandated prices, much of the grant money could end up paying mortgages on dorms rather than tuition. Finally, the UC believed eliminating juniors and seniors amounted to discrimination.

While a 42 percent increase in the grant looks ostensibly good, the reasons for such an increase must be examined closely. Director Jung has traditionally funded grants to higher education well. State support via grants peaked in 1978-79 when $13.9 million was available for students meeting need requirements.

The following year, the state made a 25 percent cut in the program in response to President Carter’s Higher Education Reauthorization Act. The next year, another act, Pell Grants would have absorbed $75 percent of students. In addition, the act increased the interest rate on student loans from six percent to 10 percent. It also established a program designed to aid parents in getting loans to fund their children’s educations.

Carter’s programs, however, have been dramatically altered by the priorities and philosophy of the Reagan administration. America’s present education budget is 36 percent and 38 percent in the Pell Grant Program over the next two years will reduce the amount of funds available from $2.6 billion last year, to $1.4 billion in 1982-83.

In addition, the current administration has tightened the requirements for federally-backed student loans. Many stipulations that students pay the interest while attending school. Under the parent loan program, Mom and Dad will have to pay current market rates on their loan.

How do Uncle Sam’s actions affect the decisions of future students? Simply put, a reduction in federal programs pushes the burden for maintaining the current level of aid to students back on the state. Wisconsin, however, is experiencing perhaps its greatest fiscal crisis. Wisconsin’s Legislative Fiscal Bureau has projected a state deficit of $1-41.5 billion dollars in the next bimonthium. Every involved involved in educational funding wonders whether legislators and the next governor will be sympathetic to their cries for increased funding in the face of such dire predictions. The WEHAB Board’s budget recommendation is based on the most costly of six alternatives presented in a position paper to the legislature last fall for grants. Essentially, the Board’s recommendation raises state funding levels consistent with those of the 1978-79 school year. For example, the Board recommended state aid for education would have been $1.3 billion for the 1978-79 school year. The budget now projects a $2.3 billion budget for the 1980-81 school year.

The following year, the state would maintain the current $1-41.5 billion deficit. The budget for 1981-82 would increase to $1.9 billion, raising the deficit to $2.5 billion. In 1982-83, the deficit would reach $3.1 billion.

Jung said his recommendation was “the only ones that stand to benefit from the WHEA Board’s recommendations. Wisconsin state legislators are concerned with increasing the funding for private colleges. For example, the Board’s recommendation would have increased the funding for higher education by $2.5 million, a 51 percent increase in the next two years.

These in favor of aid for private school students believe the increase is justified in view of the high cost of a private education. In contrast, those who oppose the increase believe the money would have been better spent on public education. Some feel the increase would have eliminated the need for cutting the state’s budget for education.

A 19-year-old Stevens Point woman has been treated for injuries suffered when she was sexually assaulted near the corner of Briggs and Smith streets between 2:15 and 2:30 a.m. Sunday.

Stevens Point police said the woman reported the incident on Monday but gave no details as to the description of the assailant.

Budget freeze delays LRC security plans

By Paula Smith
Pioneer News Writer

"We're nearly, but not yet so far," says Al Barrows, Director of Public Service for the LRC. Barrows was referring to the LRC's request for an Electronic Security System. Theft of materials has always been a problem at the LRC, but is growing worse.

In an attempt to reduce the number of thefts, Barrows and the LRC asked the administration for funding of the system. Beginning July 1, they were allocated the money, but before they had their hands on it, a fire was put on the budget. The date that the freeze will end has not yet been determined, but now with the system planned out, Barrows says they are just waiting for the green light to go on."

The first step in setting up the system would be to put markings on all the LRC materials. The cost is from 9.2 cents to 15.5 cents per mark, depending on how many are ordered. In addition, there is the cost of the printing the marks on, which takes time and people.

A sensing unit and exit turnstiles would be set up at the LRC's main entrances. If a person passes through the sensing unit with material that has not been properly checked out, an alarm will sound, and the exit turnstile will lock.

The person will then be detained to find out the reason why the material was not checked out. In most cases, he will be asked to go on to the next. If it is found that the person has been stealing, he will be charged by the chance, and be made to pay the penalty for the crime.

Inspecting books will take a different twist if the LRC installs an electronic security system.

Majorette's height a worry issue

A Finneyville, Pa., drum majorette has been told by high school administrators that she is simply too fat, at 5'-4" and 193 pounds, to perform with the marching band.

Although she believes she can lose the required four pounds, 16-year-old Peggy Ward feels that the restriction is unfair. She was one of 11 girls told to lose weight by their high school band instructor.

The instructor threatened to bench the girls if they failed to lose enough weight to comply with weight charts. By this fall nine of the girls had lost the required poundage, leaving Peggy and another schoolmate to play the baritone.

Peggy's mother complained that her daughter has come home crying, depressed, and even nauseous because of requirements. The majorette's doctor feels that Peggy's weight is consistent with the height and age of other girls her height and age.

Noting that fans taunted the girls because of their excess baggage, band director Joe Cerasano claimed that the school wants "girls who are disciplined enough to want to look good." Peggy admits that she feels better after shedding initial flab, and 'believes that she can look better after football season.

"If I lose those few pounds, I want to get even below 136. Just watch them," Anorexia anyone?

55 saves lives

The Wisconsin Department of Transportation's figures on traffic fatalities for the years 1940-1949 tell us that 1946 has been the safest year since 1944.

From January to August of this year, 483 persons have lost their lives on Wisconsin state roads, compared to 466 fatalities for the same span in 1949.

At this time last year 194 more drivers had lost their lives in traffic fatalities. For those who doubt the efficacy of the 55-mile-per-hour speed limit, statistics indicate that 54 fewer lives have been lost this year in comparison to 1974 when 55成了 the law.

Court rules gays are fit parents

The Oklahoma Supreme Court voted 5-2 in a decision allowing an admitted homosexual to retain custody of his twin 11-year-old sons. Reversing a ruling by a county judge, the Court held that the only evidence of the father's unfitness as custodial parent is his bare admission of his sexual preferences for men.

The Supreme Court found no other questionable evidence sufficient to deny the father custody.

While noting that courts have held homosexuals per se to be insufficient to withhold parental custody, the Court said that the interests of the children were of utmost importance. Hence, parental custody was preferred to that of a third party.

In addition, the Court noted that the father strove to separate his son's life from his relationship with the twins.

Sidewalk surfers suffer

Maybe joggers in Mill Neck, N.Y., should get sidewalks before skateboarders in Madison to protest newly enacted restrictions on their activities.

The Madison City Council recently passed an ordinance permitting skateboardboarding in an area including the State Street Mall, which joins the campus and the UW campus. Violators, who would statistically be university students, could have to fork over $25 or cited.

The ordinance was enacted on a voice vote by the council after hearing testimony on the dangers created by the boards and their riders, including reports about a five-year-old girl who was run over by a skateboarder.

Critics of the ordinance described it as "totalitarian"

Whose body is it anyhow?

Last week the Cape Girardeau, Mo., City Council passed an ordinance that would require women to notify their husbands prior to seeking an abortion.

It probably is one of the most useless ordinances we ever considered passing," said Cape Girardeau Mayor Howard Tooke. The mayor, however, voted for the ordinance to avoid a petition drive which might have resulted had it not been passed.

The director of the Cape Girardeau Gynecological Center, Bolivar Escobedo said he would seek a court order to halt any action under the ordinance, scheduled to take effect today. Escobedo believes the ordinance is unconstitutional.

The law was passed after successful lobbying efforts by a local pro-life group, the Lifeboat Crusaders for Life. A spokesman for the group said they would push for further local and state laws, if the law was upheld by the courts.

The ordinance failure to notify a husband of intentions to get an abortion could cost a maximum of $500 for convictions and/or up to three months in jail and a $500 fine.

Pin the tail on... the human?

In a recent issue of the "New England Journal of Medicine," a Boston doctor claimed that evidence indicates that we may still be genetically close to the animals we evolved from.

Dr. Fred Ledley based his conclusions, including the fact that one of every 100,000 infants is born with "tails," on legal instruments among human fetuses possess a tail up to six weeks after conception, it usually disappears before birth.

Some infants, however, are born with "tails" composed of fatty tissue. These are easily removed by minor surgery.

During the 1900's, fetal and newborn tails were controversial among scientists debating Darwin's theory. Some scientists believed that the tail indicated that humans passed through lower stages of evolution in the fetal stage. Those babies born with tails, they theorized, demonstrated an arrest at a lower stage of development.

Dr. Ledley debunked that myth in an article, claiming that since none of the "tails" contain vertebrae, like those of animals, they do not represent any evolutionary throw-back.

Religious revolt

Last week, justices on the New Hampshire Supreme Court heard the pleas of four nuns protesting the failure of church officials to renew their teaching contracts at Sacred Heart School in Ripton, N.H.

The sisters are suing Bishop Odore Gendron, charging that the dismissals violated their contracts and due process rights. The plaintiffs contend that all they want from his eminence are reasons for the firing and reinstatement in the teaching positions they have held for 25 years.

Lawyers for the diocese believe that the Court cannot rule on the issue, because any decision would violate the Constitution's prohibition against establishment of religion.

So far, it appears that the nuns have widespread support from many of the parents of pupils at Sacred Heart who have withdrawn their children from the school, causing its enrollment to drop 90 percent from 100 pupils.

The diocese has remained mute, except for claims that the nuns were dismissed for lack of cooperation and "cliquishness."
**Differences split UWSP soccer clubs**

By Joe Slenson

**Pioneer News Writer**

In a呜叫 on the sports pages are dominated by news of tight ends, power forwards and first baseman.

On campus, the story is the same, except if you look closely, you will notice that there are two soccer clubs at UWSP that are fighting hard, looking for spectators.

Why then, on a campus of only 9,000 students, is football and basketball of play, he said. “I think the UWSP and International American students who were to the immense popularity of tight ends, power forwards Malaysia, Germany, El Salvador and Turkey—that has been playing together for about 18 months.

Players Cabak, president of the UWSP club for the last two years, concurred with Efange.

“We used to have a lot of foreign players on our team but they didn’t like our style of play,” he said. “I think foreign players look at soccer as their sport, and there are some very skilled foreign players, but I think they became frustrated with how we play the game.”

“European and African players take a more individual approach,” he commented, and are therefore “reluctant to pass the ball to the Americans.”

“They play the ball a lot more than we do,” he said.

Foreign students, he said, were not getting much playing time because there were two soccer teams competing for similar coverage and an individual group of fans.

Representatives from both the UWSP and International Soccer Clubs agree the biggest reason is frustration.

Kenneth Efange, manager of the Internationals, said that his team got organized because there were foreign students who were trying to play together under the UWSP club banner.

“European and African players take a more individual approach,” he added, “foreign players are far superior to us,” and pointed to the immense popularity soccer enjoys all over the world as one reason foreign players take a more individual approach.

“Some of the UWSP club members have sharpened their skills in the soccer field.

“What we (Americans) don’t have in skills,” he said, “we make up for in hustle.”

Efange agreed the “differences between our teams arise from skills alone.”

Apparently, this rivalry is worked out by the teams, as they both share practice facilities at the UWSP soccer field.

The UWSP club normally practices five days a week, Cabak said, while the Internationals under Efange, practice twice a week.

Efange and Cabak also explained that their clubs are hurting for money. The UWSP club, which is the team traditionally funded by the Student Government Association (SGA), submitted their 1982 budget proposal late, Cabak said, so the club lost its funding. They did manage to get enough SGA funds to defray some travel expenses for their away games, but Cabak said, “We didn’t get enough money to get through the whole season.” As a result, Cabak explained the club was forced to raise its entrance fees.

The Internationals, Efange said, initially went to SGA for funding last year, but were told that there was not enough money to fund two soccer clubs on campus. The club then chose a different route and sought outside sponsors; they have approached the local Coca-Cola distributor and Holiday Inn, but so far, no one has agreed to fully sponsor the club. However, the Stevens Point Brewery did give the team T-shirts, Efange said.

“We played six matches in one day and lost the final only because we ran out of legs,” he said. “The team decided on penalty kicks.” A Kimberly team, sponsored by Kimberly-Clark Corp., captured 1st place.

Last Sunday, Sept. 26, the UWSP club took on the Neenah Bombers 5-2. Their next home contest will be Oct. 9 against the Fond du Lac Arbuckles.

As for the UWSP club, they played two matches last weekend, clobbering UW-Stout 12-2, Saturday, Sept. 25, and then fell to UW-La Crosse 2-1, Sunday.

Their next home outing will be against UW-Green Bay on Oct. 19, at 1:00 p.m.

**UW-O to be exposed**

Actor Ted Knight will give the University of Wisconsin-Oshkosh a natal birthday celebration exposure tonight when he dons a UW sweatshirt on the season premiere of the hit series, “Too Close For Comfort.”

Knight, who regularly wears different college and university shirts during the filming of the television comedy, will wear the UW shirt in a scene where he experiences the anxieties of an expectant father.

“The wearing of university shirts is a tradition on the show when its producers decided Knight would wear a sweatshirt as his typical casual attire. Knight usually wears three to five sweatshirts on each show.

**Loan default rate low: George**

By Wong Pak Foo

**Pioneer News Writer**

Contrary to popular belief, students pay off their loans on time, according to Financial Aid director Phil George. He says that the loan default rate on this campus is low and has been declining over the years.

Mr. George says the default rate is lowest in 4-year public institutions. In Wisconsin, loans for students carry very low interest rates—probably among the lowest in the nation.

One of the reasons why the loan default rate among students have been known to be low is because of widespread news coverage. Every time a newspaper covers a story on student loans, the focus is usually set on default rate. Although some of the aid programs for college students might have been abused, students usually pay off their loans.

Mr. George feels that students are more responsible now and pay off their loans on time. Among the factors that keep the default rate was around 5 percent last year.

Mr. George called up a local bank recently and found out that the bank faced more problems collecting payments from other customers than from students. He said it had a default rate at around 5 percent after repossessing of vehicles or after closing the accounts.

Phil George, mortgage specialist.

Mr. George says that it is good news that students pay off their loans quickly. Every time a student pays back a loan, he or she is supposed to have more money available to other students.

Under rules of the loan programs, students cannot declare themselves bankrupt; that is, even if a student files for bankruptcy, he still has to pay the loan.

“If a student defaults payment of a loan, a collection agency is usually engaged to collect the money. The student will find that collection agencies are not easy to deal with, and that they demand to know how to handle a situation. A lot of students can’t deal with the collection agency.

If a student is still reluctant to repay the loan, the collection agency would sue the student and take him to court. If the case should reach the court, a student would incur even more expenses in the form of legal fees, travel expenses and legal fees. Even after that, a student still has to repay the loan.

The club gets some financial backing from the International Students Association, which is going back to SGA in mid-October to ask for funding, according to Marcus Fang, ISA head.

The latest outings for both teams have been fairly successful. The Internationals, who play in the Eastern College Athletic Conference, lost 2nd place in a tournament held in Door County Sept. 19.

“We played from 11:15 in the morning until 5 o’clock that night,” Efange said.

Minority, Legislative Affairs highlight SGA meeting

By Marian Young

Pointers News Writer

At the recent SGA Saturday meeting, held Sunday, reports by Minority and Legislative Affairs were made and discussion concerning the allocation of $5000 to the recently formed Natural Resources group was heard.

Co-directors of Minority Affairs, Deb McDonnell and Tracey Mesley explained the purpose of Minority Affairs and some tentative future plans. They hope to educate the community to accepting various minorities.

Minority Affairs worked with the United Council concerning the incident where Nigerian students were beaten.

It was announced that Bert Simpson, a UW-Madison law student who is working on the Nigerian incident, will speak with the senators sometime in October.

A workshop for both committee members and students is being looked into for the second semester. The possibility of having UAB sponsor performances of Black American artists was also discussed.

Legislative Affairs was represented by co-director Susan Lukasavage. He explained that Legislative Affairs is designed to handle trial on charges of illegally supplying explosives to Libya.

Wilson may also stand trial on charges he conspired to overthrow the Libyan leader who was openly critical of Libyan leader Moammar Khadads.

The Senate Subcommittee on Defense approved a $201.6 billion spending bill that includes $1 billion for the MX missile.

It provides $888 million to buy five Pershing II missiles. Additionally, $2.46 billion was approved for MX research and development.

The committee also recommended $456.9 million for ground-launched cruise missiles, $934.5 million for sea-launched cruise missiles, $339.5 million for air-launched cruise missiles and $498.3 million for the Pershing II missile system.

The Reagan administration said it will postpone any regulatory action to reduce acid rain until more is known about the effects of the pollution.

In announcing the move, Alan H. White, a White House aide on environmental affairs, said the administration was looking for a "science-based" basis to reduce acid rain. "We are talking about an investment in excess of $200 billion for the next 23 years for a program whose outcome remains uncertain," Hill said of measures that would slash sulfur dioxide emissions from coal burning plants.

STATE

Wisconsin's unemployment rate rose to 10.7 percent in August, ending hopes that the recession had bottomed out sooner than expected.

The jobless rate had declined slightly the previous month, providing optimism for a solid recovery.

Unemployment reached 14.5 percent in the Janesville-Beloit region, 13.7 percent in Racine and 12.6 percent in the Milwaukee region.

The contamination of 11 water wells in North Central Wisconsin has become a child health issue for the State Department of Natural Resources.

The wells, located in Waushara, Marathon and Langlade Counties, were political groups on campus and publicize local proposels and legislation on a state level.

"Getting students informed and out to vote is one of the main goals of Legislative Affairs," said Englehardt.

He also said Legislative Affairs would be reviewing information on candidates and sponsors buses taking students to the polls during the primary election.

The use of buses for transportation to the polls is a possibility for the November election.

Sarah Dunham, SGA Vice President, reported that two new student organizations effectively recognized this summer. They are the Students for Nuclear Freeze Campaign, a group whose purpose is to stop the possibility of nuclear war.

Three Prescott men, applying the U.S. Army is not responsible to the city of Prescott, the right to take possession of Prescott Island away from the Army.

According to the three men, Bruce Laning, Gary Rawn and Peter French, the Army has yet to give a clear reason for the sudden takeover of the islands.

The islands located on the Mississippi River in southwestern Wisconsin.

Brands says the move was in no way done for personal gain but was done to bring attention to "a natural resource that has historical ties to the city of Prescott."

"Prescott Island has been targeted as a dump site for dredge material.

Obstacles that are present include a new maximum security prison in Portage can be overcome, according to Rep. Thomas Loftus, major leader of the state Assembly.

Lof tus said it may be difficult for the Governor to Legislate to pass a bill in special session that would remove legal barriers in the building of the prison.

However, Loft us was quick to add that any changes in the rules of the prison construction game may lead to litigation against the state.

Jackson County authorities confiscated about 5 pounds of marijuana and arrested three people for possession of the drug.

Leslie Nelson, 30, of Harbor, Wash., Michael L. Johnson, 28, of Madison, and Leroy Melrose, were charged in Jackson County Circuit Court for the possession of the pot.

Federal authorities also arrested a fourth suspect on warrant charges related to drug delivery and conspiring to deliver a controlled substance.

appointments fill Senate positions

With the appointment of seven new senators, the SGA Senate now has its full complement of 30 representatives.

The newly appointed senators include Larry Lukasavage and James Grimm, representing the College of Fine Arts; Ken Wysocki, representing the College of Letters and Science; John Bruton, Kevin Olson, Tim Slehr and Todd Varner, who will represent the College of Natural Resources.

"It's an amended resolution was passed for $5000 to be used for SGA candidates for a Fall election. About $2000 is being placed in the general fund of SGA and $3000 is being placed in a fund for recruitment done by student organizations. However, it was decided that allocations will be made from the student organization account until basic guidelines are adopted.

Interim posting policy announced

By Chris Celichowski

Pointers News Editor

In order to avoid the "one-size-fits-all" inconsistent posting policies, Robert Baruch, Assistant to the Assistant Chancellor for Student Life, has announced a new interim policy effective immediately.

Baruch requested that the following announcement be printed:

"A new posting policy has been adopted and will remain in effect until the Faculty Senate passes the institutional policy. The new policy requires that all materials be posted by the office or department who sponsored the posting at the UC information desk. (This does not pertain to departmental materials.) Copies of the interim policy are available in the office of the Assistant Chancellor for Student Life, at the UC information desk, and at the Office of Student Activities and Programs.

Materials sent directly to and ride the U.S. General, or sent directly to the offending organization, will be returned.

Penalties for violating the policy range from a letter of complaint to the offending organization to possibly revoking recognition of the organization.

The policy also covers special areas like residence halls, the university store, and ride boards. Handouts and brochures are also handled under the policy's provisions.

The interim posting policy goes into considerable detail.

Consequently, the Pointers News encourages those concerned to pick up a copy of the policy at the UC information desk. Call Robert Baruch at 346-3611.

Limitations are put on political endorsements, the number of items posted per event, the size of the materials, substances used to affix posters, and the length of time posters can remain up. In addition, posting in a first-come, first-serve basis.

According to the policy, the University Affairs Centers is responsible for interpreting the interim policy.
Beyond fear, beyond hatred: prospects for peace in the Middle East

For all involved, there will be risks and costs in striving for peace. However, a failure to do so will involve greater risks and higher costs.

Black student coalition slates banquet

By Chris Colichowski
Pointer News Editor

The UWSP Black Student Coalition will hold its first annual dinner on Saturday, October 2, in order to honor the university’s first black graduates, Jerome Vance and Barbara Higman.

The dinner, slated to begin at 6 p.m., will also honor other black graduates of UWSP. “Living in Harmony” will be the inaugural dinner’s theme.

The evening will begin with a dinner and cash bar in the Program Banquet Room of the UC. Dinner will follow at 6 p.m.

Billy Brooks, a frequent attraction in Milwaukee night clubs, will provide the evening’s entertainment beginning at 7:45 p.m.

Tickets for the two-hour show can be purchased at the UC information desk for just $5.

Although dinner reservations will not be accepted after the Pointer has gone to press, tickets for Billy Brooks’ exciting show can still be purchased at the Program Banquet Room Saturday evening.

Helbach calls for debate

State Representative David Helbach (D-Stevens Point) has requested the League of Women Voters of both Jostens and Waupaca Counties to provide a debate setting for him and his opponent sometime in the later part of October in their race for the Assembly.

Citing what he pointed out to be an increasing trend of “campaign by press release”, Helbach stated that “a campaign by press release may provide entertainment, and at times a lot of heat, but very little illumination.”

Helbach said that the public likes to have a balanced discussion of all the issues, with both side’s views being fully and accurately presented to the public. “Increasingly over the last few years, media campaigns for local officials such as the State Assembly depended too much on ‘campaign by press release’. Particularly where and the guilt of European and American Jews.

After five Arab-Israeli wars it should be clear that peace and coexistence will continue to exist. Yet the Palestinians also exist and must have their own national consciousness. Genocide, which should be by any reasonable standard an outcome for any party to wish or force the other out of national existence, cannot be recognized by all parties if peace in a nuclear era is to be attained. Some Israelis, including Prime Minister Begin, movement, do recognize the demographic and geographic facts and also the principle that Israel owes a moral and political debt to the Palestinians. Begin, on the other hand, refuses to admit this, and in a vicious zero-sum approach says simply, “If the Palestinians have rights, then we have none.”

Even arithmetic is ultimately against Begin’s dream of perpetual sovereignty over all of what once was Palestine. Within the pre-1967 frontiers of Israel there are approximately 3,500,000 Jewish Israelis and approximately 500,000 Palestinian Arabs with Israeli citizenship. On the other hand, there are some 750,000 Arabs in Israel with some 450,000. If Israel annexes these territories and accords the Arabs citizenship, Israel is immediately less of a Jewish state; and once an Arab were to replace by men of reason and compassion, Israelis themselves have the primary responsibility for achieving this, but Americans, both Jews and gentiles, have the right and duty to make certain that our support of Israel is contingent upon moderation and the pursuit of genuine peace.

The present Jewish and Israeli sensitivity and moderation must be matched by a comparable response on the part of Palestinians. If the Palestinians in their turn sincerely desire peace, then they must be prepared to renounce terrorism, repudiate that part of the P.L.O. charter which calls for the destruction of Israel, and recognize Israel within its pre-1967 frontiers in return for Israeli compliance with U.N. resolution 298, which calls for the evacuation of territory which Israel occupied in 1967.

The difficulties to be faced and overcome should not be minimized nor taken lightly.
College: A shelter from the storm

By Mike Robillard
Pointe Features Writer

Upon completion of high school, students are confronted with basically three choices: work, military or college. If you opted for the latter of the three, you’ve been awarded the generic title of College Student. Does this make you somehow special in society, or have you merely added four cars to your school train? Probably a little bit of both.

For a substantial sum of money, the college student can purchase rights to a sanctuary safe from the perils of the “real world.” The headaches of job hunting in jobless times are postponed for as long as the student is willing to pay for the sanctuary. This financial arrangement has bred a generation of students, or “professional students.” This particular class of students places monetary value on their right to a safe sanctuary. They are willing to sacrifice both skills and time, skillfully avoiding the dreaded graduation, and therefore avoid being tossed out into the societal storm.

This sounds tempting indeed if the “cash flows. If your parents ever told you to appreciate high school as “the best years of your life,” they obviously never went to college!

All this aside, the basic principle underlying a college education is exemption from criticism. If a young person is willing to invest the money needed, this person can theoretically receive dividends in the forms of knowledge and later in life, income that can alone make the investment a wise one.

The coed is not the sole beneficiary of these dividends. If it can be said that a society suffers at the hands of its people’s ignorance, then reciprocally one may also benefit from an individual’s education.

College and universities are the three choices:

1. Relationships fulfill a basic group counseling need. They are a framework of “shoulds” which children tend to feel that they should obey.

2. College exposes students, through the classroom, dormitories and general social interaction, to numerous opportunities and choices. More than half of the students change their major, indicating the new college influence. Some do not follow their parents’ wishes and may feel insecure or frustrated with their shaky step toward independence.

3. The generation gap is healthy in that it allows people to make their own choices to become themselves. Once they have established their own autonomy and feel good about themselves, they can get back to friendship with their parents,” offers Elsenrath.

Pulling apart from parents and reducing closeness can allow individual decision making and maturing. This gap must be filled, however. “People need intimacy.”

Although there are 9000 people on this campus, there’s loneliness. Deep friendships and meaningful relationships fulfill a basic human need,” believes Elsenrath.

Often a student starts school and is glad to get away from Mom and Dad, but the first weekend, he heads out of Point to his real home. This tends to lessen as he establishes more relationships at school and becomes less and less dependent on his parents. By the time he is a junior or senior, often he stays at school all the time; even spends some vacations elsewhere besides his home. This does not indicate an aversion to parents, simply a growing independence.

Elsenrath feels that the majority of students love and respect their parents as well as appreciate all that they have done for them.

During this breaking away period in students’ lives, UWSP has provided supportive facilities to make the process more comfortable. The entire residence hall program is designed to create a sense of community, providing programs on life skills and availing students to resident assistants who have extensive training in interpersonal skills.

The Counseling Center offers both individual and group counseling from a trained staff to help students explore options and develop interpersonal skills to become autonomous, fulfilled human beings.

For those who recognize this breaking away period, Elsenrath offers a few tips to deal with the situation:

1) Accept the need for

Counseling’s couch available to everyone

By Wong Park Fook
Peonter News Writer

If any student should feel emotionally depressed, has personal problems affecting his well-being, and needs someone to share his problems, he or she is in the right place to go for help—the Counseling and Human Development Center.

There are various counseling programs available in the center which will provide students with a special opportunity to learn, to develop greater self-awareness, and to acquire better problem-solving and interpersonal skills. Dennis Elsenrath of the Counseling and Human Development Center says these programs offer students a number of personal development opportunities.

Of the total number of students that have visited the center, almost half of them have concerns in the personal emotional area, says Dr. Elsenrath. The other ones were concerned with their career exploration.

Dr. Elsenrath says that those who went for career or academic reasons have a better understanding of themselves now and know what they want to pursue.

Counselors will spend some time with an individual and when appropriate, provide an opportunity for assessment of abilities, interests and values.

Whatever people share with counselors is confidential, remarks Dr. Elsenrath. All counseling is provided free of charge, but there is a small fee for several vocational tests.

Students seek individual counseling for a variety of reasons, such as anxiety, relationship problems, loneliness, depression, sexuality conflicts, roommate conflicts, difficulties with close back home, homesickness, and stress reaction. Dr. Elsenrath notes that there has been an increasing number of students who are seeking assistance with alcohol problems and drug abuse.

In the career area, a lot of students have difficulties choosing a career field or selecting a major. Counselors work closely with students, helping the student identify an area that would be satisfactory.

There is a computerized career exploration system in the center that helps an individual learn about his personal values and how to use them in making decisions. The System Interactive Guidance and Information (SIGI) is a new addition to the career development services of the center and has been in operation for a year. Dr. Elsenrath says that a vast amount of information is stored in the computer. Tailored to meet each individual’s needs, the computer assesses information on an individual and then provides information about careers and educational programs that are likely to suit the individual.

One of the more serious problems faced by the center is suicide. Over the last 17 years, there have been three successful suicides on this campus. Dr. Elsenrath estimates that there are 10 to 20 attempted suicides each year. The most frequently used method is an overdose of pills. He says that suicide is a very unnecessary death and all threats and attempts must be approached seriously. About 200 students on campus have been trained to assist in responding to this difficult situation.

The center also receives an average of three to five serious suicide cases a year. These cases usually involve major emotional upset, including suicide threats and attempts.

RELATIONSHIPS

Feeling blue?

On Tuesday, October 5, Don Steele, Ph.D., director of the Center for Grief Counseling and Education, Madison, will be speaking about grief to students and faculty in the Communications Room of the University Center at 2:00 p.m.

Grief is a natural part of life but it can be intensified when someone close to you dies. Learning to cope with these feelings can be difficult, especially for college students away from their home and family. No one can tell someone who goes through grief in what manner one “should” grieve—everyone’s grief is unique. There are elements of bereavement that are more or less common to all who pass through it. Understanding these common elements and how others have dealt with them can be of great help. Therefore, during his presentation, Mr. Steele will address the importance of dealing with grief, describe the grieving process, and suggest how we can manage it.

Several students brought their grief to the attention of campus ministry staff personnel while they were in training themselves at a point in their lives where they were facing the grief process for the first time, the loss of a grandparent. Others have encountered friends and roommates who are grieving. To address the needs of these students, United Ministries in Higher Education Lutheran Student Community, and Newman Community with the help of St. Michael’s Hospital and Portage County Community Human Services provided information from the Psychology Department, the Sociology & Anthropology Department, Religious Studies, and the Counseling and Human Development Center. This visit was for Dr. Steele to come to campus for the presentation. Dr. Steele, who is a professor from UW-Madison in Counseling and Guidance, does seminars, writing, and grief counseling through the Center for Grief Counseling, has a private practice in Madison, and has taught at UW-Oshkosh, UW-Madison, and UW-Platteville.

Plans are being made by the campus ministry groups to establish a weekly grief support group for students. This will provide opportunities for members to share their grief with someone else going through a similar ordeal. There will also be opportunities for educational development through filmstrips or other media resources on the subject of death and dying. More information will be available in the area in the near future; call Nancy Moffatt at 341-0266 or Art Simmons at 346-4444.

Dr. Steele will also do a presentation on grief at 7:00 p.m. at Trinity Lutheran Church, Clark St. at Rogers St. This is free and open to the public.

You too can relate to minorities

Acts of violence that are perpetrated against any student in the UW system should be deplored by all of us. It is my strong feeling that whenever the safety of any student is threatened, coordinated action by student government is an essential part of any meaningful response.

More to the point, each individual campus student association should be in the forefront of any reaction to violence against our students.

In recent memory, two UW-System campuses have been sites of violent acts against minority students. At UW-Stout and UWSP, certain individuals were charged for the violation of the rights of their fellow minority students. At UW-Stout, the student government reacted in a positive manner. Because of the involvement of the UWSP student government, committees were formed, investigations were made, hearings were held, and reports were filed. This action did not, by any means, erase the effects of the harm done. However, such action does indicate a willingness to respond when there are important issues of safety of all students.

I must mention that I have no knowledge of how UW-Stout responded to a similar situation. I am gratified to learn that the Minority Affairs Office at UW-Stout acted quickly and decisively.

You too can relate to minorities in your own way. If you are interested in forming a plan of action to combat these acts should contact the Minority Affairs Office of United Council, or the UWSP Student Government. What SGA has accomplished is urgent for action, but rather a solid base of responsiveness that, with your help, could become a meaningful system-wide approach to this ugly problem.

He took my heart to Madtown

By Barb Harwood

Pointers Features Writer

How a love-struck bunny in Stevens Point when my boyfriend Brad lives in Madison, and I can't hop on a train to Madison as often as I can.

But you're right, this is not exactly cheap. There are the long distance phone bills, the monthly fare, the tip (the cost of cute, mushy cards). Not to mention the frequent Madison excursions in a car that drinks gas like a preppy drinks suds.

While he was attending graduate school, I am up here. Choices seemed realistic:

on the law, we elected · (by

my heartstrings

he's so furtively

Love conquers all

It's amazing the things that we'll do because of it–almost as amazing as the things we learn through it.

As the final days of August trickled away, I became obsessed with leaving Des Moines, Iowa. You know how it is, my better half is attending Drake Law School in Des Moines. While he's so furtively in search of the law, we elected (by mutual consent) that I should be the better half this year. No problem, I had thought. So I began a cohesive research on all the ways to get to Des Moines, only two choices seemed realistic: fly down only once this year, or go Greyhound whenever the heartstrings tug. I've recently returned from my first trip on the silver screen. God, I'm glad I ever recover to do it again.

By car, the drive is about 7 hours, the best advice I can give: if you then when I discovered a large bus, the trip takes 12 hours down and 15 hours back.

An apple a day keeps the teacher at bay

By Laura Stereweis

Pointers Features Writer

Glory, glory hallelujah! Teacher hit me with a ruler.

Shot her to the floor.

With a loaded 44.

And she ain't comin' back no more!

Ta-ra-ra-boom-de-ay.

Ta-ra-ra-boom-de-ay.

The teacher passed away.

The teacher passed away.

The sharks had lunch today.

Ta-ra-ra-boom-de-ay.

Years ago, when you were still in grade school, you probably sang one of these songs or countless others like them.

Perhaps you sang them at recess, in a secluded corner of the playground. You might have sung them in the long distance phone bills, I am void of solutions. But, as a general rule, you can't grocers, a necessity you can't live without.

RULE No. 1: Don't fight it. Accept what cannot be changed. "You can't fight City Hall" you can't fight the ignorance of Greyhound. If they don't know enough to go through La Crosse and head northeast to Stevens Point, they aren't going to let you teach them.

So having learned lesson one on how to day same on a Greyhound, I decided to go to sleep. "It'll go much faster that way," I consolled myself. And it might have too if there were a comfortable way to lay down in those dingy vinyl seats.

After trying every traditional sleeping position, I became impatient, flipped on the miniscule overhead light and tried to read. By 3 a.m., I couldn't even see the book let alone the words feebly coming before my eyes. I only wanted for a flashlighthand.

I, with my key, glanced around the darkened bus.

Everyone except two men seated just in front of me was asleep. Inconspicuously I tuned in to their chatter.

They were carrying on a conversation about a history of bars and "fallen angels." I wondered for a minute what they call sexually promiscuous men, misguided God? As the man talked, Southern Iowa counterpart responded to each comment with a chuckle and a laugh. I thought it was cute. Then, I began to count how many...
How many ways do I love thee? 

Love: How To Understand and Enjoy It
By Leo Madow, M.D.
Charles Scribner's Sons, New York
Reviewed by Lena L. Harmon
This is not a book on sex, per se. It's not a book on gushing first love. It's not a book on egoistical narcissists. It's a mellow blend of all these and many other forms of love. Its depth lies in the motivations and psychological intrigues explained by the writer, Dr. Leo Madow. Gratefully, the psychological jargon is clarified by Madow's common sense approach.

The psychology involved in this book offers understandable insights for those of us who haven't advanced past Psychology 101. It's a book which provides the amorous needs. Madow writes that our relationships with others are this life's pivotal influence throughout our lives.

Most importantly, perhaps, is that Madow discusses the old saying: "Love thyself. You can't love yourself before you can love someone else." I had always thought this to be true until Madow points out that without healthy self-love, our neediness, unsatisfiable and the partner will probably pull away, feeling inadequate, frustrated, or overwhelmed. The psyche lacking in self-esteem is the excessive narcissist. This, defines Madow, is someone so in love with himself that no one else can cut in on the dance. So, the narcissist ends up dancing alone. As in the opposite instance, the partner of an excessive narcissist will likely end up feeling inadequate, frustrated, or overwhelmed. Madow describes the stages that our relationship with parents goes through, each being essential to our maturation. He cautions that many times we end up replaying early stages. One reason is that we are frozen in a juvenile stage, we're likely to stay in that character for the rest of our lives. This, writes Madow, is one of the major causes of problems in love relationships.

"All forms of love are important," Madow begins in explaining marital care. "But the single most significant ingredient in the emotional experience of all our lives is the element we call mother love." Fortunately, Madow is progressive enough to acknowledge that mother love can be supplied by a father, a grandfather, anyone who is early enough in the child's life to form a consistent bond.

A person may receive such an overwhelming love of mother love, writes Madow, that he stails in the narcissist stage and continually has problems in love relationships. Or, in a less severe circumstance, he may always be looking for that type of motherly security.

Another person may, for many reasons, feel unloved by their mother and wander through life with low self-esteem. Sadly, Madow writes that without help, these people will likely feel insecure and unloved in spite of reassurance and love given by their partners.

Father love, admits Madow, is a much vaguer concept. "though this need not be so," he adds. Both mother and father love, he goes on to explain, are not inborn, they are taught. Normal paternal love," writes Madow, "begins as an overall support of the mother during her pregnancy and in the early years of child raising."

For a boy, Madow instructs, father becomes the object of identification. There is also, he notes, an element of competition between the two. Either being overly praised or consistently belittled by the father naturally leads to an unhealthy grown son and usually results in problems in love relationships.

Madow's excerpts on father-daughter love may be interpreted as chauvinistic, but are probably fair and accurate for our generation. "The little girl needs to feel that her father loves her, accepts her, and finds her attractive and lovable," he writes. Once again, extremities in this love will likely lead problems for the adult woman.

"If you show them that you love them, and keep the lines of communication open, most future problems will be averted," says Madow reassuringly to parents.

"There are actually two broad reasons," according to Madow, "why a love relationship fails, the first failing being a failure to function on a mature level. The first is that we become trapped on too small a scale that maturity remains in our process of love relationships."

He cautions that if the mature factor becomes the dominant one in subsequent relationships, he continues, "is the development of a certain type of love as a solution to an earlier problem."

Love puts forth a clear, concise approach in dealing with love problems. Especially helpful are the passages of some of Madow's patients' letters. It's encouraging to read of how they solved their problems.

Madow offers four essential elements for a couple to use in resolving their love problems. He names them the Four Cs: Cognizance, Communication, Compromise, and Commitment.

A "good partnership in love is not a static affair," Madow says. "One of the Four Cs-a love will not only survive, but also grow through the changes, he believes.

Love goes much deeper than this superficial summary. Each of the seven types of love are simply defined and adequately dealt with.

It is helpful with its examples, and the encouragement sprinkled throughout each page. It is readable, interesting, and educational.

The jacket cover offers a separate rating for prospective readers: "This book will tell you the truth. Those to whom emotional demands on their partners may be unrealistic and destructive. Help in your relationship, to everyone find and preserve a loving relationship with another person."

Single parents aren't alone anymore

By Bonnie Miller
Pointers Features Writer
"Changing Families-Changing Lives" was the theme of this year's conference for single parents, sponsored by the Portage County Human Services Department and Parents Without Partners.

The conference included the second of its kind, was held at the Holiday Inn on Saturday, Sept. 26. Forty people attended the conference, compared to last year's show of 80.

The speakers at the conference included many specialists from the Stevens Point area. Speakers from the Portage County Community Human Services Department included Beth Davis, Ph.D.; Richard Pokrywka, director of Human Services; Steven Pray, a social worker; and Tom Urmski.

Representatives from Parents Without Partners were present Bobbie Bohm, and vice-president Bob Spahn.

The program, enceed by Dennis Johnson, a member of the conference's planning committee, began with a welcoming introduction and keynote address. Reverend Devin Allen of the Peace United Church of Christ gave the keynote speech.

Allen's words evoked many thoughts, expressions, and even a few tears. He listed some eye-opening facts about single parenthood. He said that there are approximately ten million single-parent families in the U.S. Also, one-half of all single-parent families, he pointed out.

Reverend Allen discussed the problems that single parenting creates. He addressed the problems of the extra work, difficult financial situations, rejection from others, and often a resulting poor self-image.

He also gave many suggestions for coping with single parenthood. Among these were joining groups, developing new hobbies, and taking time out for yourself. Allen feels that professional help is not always sought if necessary, but this provides for temporary relief, he added. In his statement of "one or two good friends are necessary for long-term help," he continued.

After the keynote address, participants were able to choose a variety of workshops to attend. There were four sessions in the morning and four in the afternoon. Each group offered two one and one-half hour sessions, and two 45-minute sessions. Participants could attend one of the longer workshops, or both of the shorter ones.

Steven Pray, a Portage County social worker, and Dexter McKelvey, a Stevens Point attorney, were the instructors of the Legal Issues workshop. Pray based his presentation on his job and the experiences he has had with child custody cases. He is a firm supporter of mediation, which he initiated in Portage County. The mediation process involves counseling for the divorcing couple so the two may settle their dispute with fewer complications, he explained. McKelvey's presentation looked toward how to get the most of the custody issue, with much of his information taken from Wisconsin Statute 767.24. He pointed out the shortcomings of the legal system and how emotional demands on their partners may be unrealistic and destructive. It's helpful for everyone find and preserve a loving relationship with another person.

intimacy and act on it.
2) Sometimes it's well worth making mistakes on your own.
3) If it's overwhelming, get help from either a trusted friend, the Counseling Center or another clinic.
Well boys and girls, three whole weeks have passed, and once again it's time for Ask Uncle Bob, the advice column that answers the age-old question, "Is there intelligent life on earth, and if so, how do you explain Cleveland?"

This week's letters all have to do with relationships, so they're pretty darn upsetting. Whatever you do, don't read them if you have any razor blades lying around the house.

Many of the problems associated with relationships come from having ridiculous expectations. Forget about men and women being made for each other, loving, and all that other Hallmark card crap. If men and women were really made for each other, they'd be pretty darn upsetting. Whatever you do, never really bad any hopes of ever being able to deal with the other sex ever again.

Dear Uncle Bob:

I've been seeing this kind of guy, so we're into their utterly charming personalities. After a few months of getting treated like potting soil by these creeps, women are filled with anger and frustration, and when they

umbrella (there's always
one on every bus) and
knock yourself over the head.
If you're of the sleep-eaz
set, watch out for resentful
hypers with old ladies' umbrellas.

Bus No. 1 arrived in
Minneapolis on schedule. Bus
No. 2 departed from the Twin Cities at 10 a.m.
Too tired to read, too hyper to sleep, a
new crisis is born—the boredom syndrome.

RULE No. 3: Always pack
a portable colored TV, a
Betamax video recorder
complete with screen,
projector, Gone With the
Wind and Reds. Or, you'll
have to pass time by counting
heads on the bus, trying to
figure out how to escape in
the event that the bus goes off
a bridge and into a river, or
counting strands of hair on
your head.

Again. Chris L.

Dear Chris:
I'm very happy to pass
your inspiring letter on to my
readers.

Dear Uncle Bob:
Hey, I've just met this
dynamo dish, and I want to
impress her right out of her
tight little designer jeans.
I'm thinking of winning and
dining her at The Restaurant.
I've heard the place is
dirty as hell, but I've never
been there so I don't really
know. I figure a good act like
yourself probably feeds there
all the time, so how about
filling me in. Thanks.

Troy D.

Dear Troy:
Ah, The Restaurant.
Located in the amazingly
modernistic yet shockingly
unattractive Sentry
Complex, this little gem of an
eatery absolutely reeks of
class. What atmosphere?
What service? What an
incredibly pretentious name,
huh? What can you say about
its place settings? Napkins are
made of a nicer material than
your average sports jacket?
And if you think you'll have
to get all dressed up in your
Sunday duds to get served
in such a swank dive, think
again. Uncle Bob once went
there dressed casually in
orange swim fins and a
snorkel mask, and was
seated immediately, under
the best table in the house.
Good luck with your date, you
animal you.

There's a 75 percent chance
that Uncle Bob's next advice
column will be all about the
joys and heartaches of
Halloween. Send your letters
(any and extra candy you
happen to have lying around)
to Ask Uncle Bob, Pointer
Office, 113 CAC. Before Uncle
Bob signs off, he'd like to
misuse his privilege as a
writer to say "Hi" to the cute
lady you met at the Yacht Club last
weekend, and to invite her to
come check-out-trading at
his apartment. Bye for now,
kids.

Continued from p. 12

times he said it. Right about
number 129 (and in barely ten
minutes) my senses took
hold and tuned it out.

Then I started a new
project. I looked at the
man across from me, sleeping
soundly, and tried to imitate
his slumber proven position. I
desperately tried to find
myself in a similar stupor,

Mimicking his “sleeping
on the bus technique,” I
clumped my body into a
ball, stuck my left foot on
the armrest and gave my neck a
twist so that my head was
on the seat. Not only did this
result in aching knees, since
my foot got stuck on the
armrest, but my back and
neck ached to see who could cause the most pain.

If you don't succeed...I sat
up, looked at the guy behind
me and imitated his position.
After an hour or so I had
copied every visible sleeping
person on the bus—but to no avail.

The two men in front of me
were now engaged in a
philosophical inquiry into the
fine art of corn farming and
contesting the respective
merits of various manures. I
dragged my book out again.

"McDonald's Coupon Of The Month"

Contaminated Wells in Area

By Todd Hotchkins

Pointe Environment Editor

At least one pesticide was found to be above state drinking water guidelines in each of 11 wells in Waushara, Marathon and Langlade Counties, according to results released on September 24 by the Department of Natural Resources.

The U.S. Environmental Protection Agency sent the DNR results of 11 of 29 wells collected by the DNR's North Central District office in Rhinelander. The remaining 18 wells that were sampled are in Portage and Adams Counties. Results from these wells are expected by the end of October.

"Each of the 11 samples were found for more than 10 pesticides used in the Central Sands area," said Bob Martini, leader of the North Central District Water Quality Planning Section. "Of seven chemicals detected, four exceeded guidelines for long-term drinking water consumption advised by the State of Wisconsin Department of Health and Social Services."

The 29 total wells were selected by the DNR for testing in March of 1979 because each was either higher in aldicarb or nitrate levels than the drinking water guidelines. According to the DNR, these wells are thought to represent "worst case" wells, and do not necessarily reflect the quality of an "average" Central Wisconsin well.

The 29 wells were analyzed for the following compounds: atrazine, chlorothalonil, manebe, oxamyl, aldicarb, atrazine, carbofuran, dinoseb, disulfoton, linuron and methoxychlor.

Results released by the DNR on the first 11 wells show that atrazine, linuron, metribuzin, aldicarb, dinoseb, disulfoton and carbofuran were all detected in at least one of the wells. Two wells were found to contain six pesticides each.

The four compounds found in some of these 11 wells while excluded the state drinking water guidelines are aldicarb, dinoseb, disulfoton and carbofuran.

Martini told the Pointer in a telephone interview that disulfoton and aldicarb were the grossest violators of the drinking water guidelines. (See Table.) The drinking water guideline for disulfoton is 1 part-billion and the highest disulfoton measured was 3 parts-billion. Dinoseb's guideline is 13 parts-billion and the maximum level found was 13 parts-billion. Martini indicated that the 11 well owners had been advised to seek alternate sources of drinking water.

Safety factors are provided for each pesticide's guideline, according to Martini, which are designed to protect drinkers of water from severe health effects. These safety factors are established because the DNR, the Department of Health and Social Services, and the Department of Agriculture, Trade and Consumer Protection know no very little about the health-related impacts of these pesticides. These three agencies are coordinating by developing an "action plan" to approach the presence of these pesticides in drinking water.

Disulfoton has a safety factor of 2000, meaning that 2000 parts-billion of the pesticide would have to be found before an immediate health hazard is believed to water. The safety factor for aldicarb is 100.

According to the state Drinking Water Guidelines, 29 of 30 Wisconsin wells were tested for more than 10 pesticides, which exceeded the state drinking water guideline for other than aldicarb in drinking water other than aldicarb didn't surprise him. Shaw referred to a report released three years ago by the UWSP CNR, sent to state agencies and affected well owners, that concluded that testing indicated unidentifiable pesticides in the tested well water. The CNR test facilities were not capable of identifying individual pesticides. That report, according to Shaw, "led to everything that's been done" in the state on pesticides in groundwater.

Your water: Straight up or on the rocks?

**PESTICIDE** | **MINIMUM LEVEL FOUND IN A WELL** | **MAXIMUM LEVEL FOUND IN A WELL** | **STATE DRINKING WATER GUIDELINE**
---|---|---|---
Disulfoton | -- | 100 | 1
Aldicarb | 3 | 17 | 10
Carbofuran | 2 | 12 | 5
Dinoseb | -- | 74 | 13

1. Numbers in parts-per-billion
2. Minimum levels for Disulfoton and Dinoseb were not provided.

Pesticides exceeding state drinking water guidelines

What's it all about Reddy?

**Know your electric bill**

Electricity, the foundation of modern society, the energy of the electronic age, still remains a mystery to many of us. We have grown accustomed, with little physical and even less mental training, to flicking that switch on the wall and filling our homes with light. Our stereo come alive with a touch of assembly, a plug into the socket, and a push of the "on" button. Foods stay cold, our water pours from the faucet, and where would many of us be if that little box in the living room did not come alive every night? To most of the people an everyday life we owe a debt of gratitude to electricity.

Yet, use does not necessarily imply knowledge. Webster's Dictionary defines electricity as, "A fundamental entity of nature consisting of negative and positive kinds composed respectively of electrons and protons." A definition such as this begs more questions than it answers. Perhaps to the physics majors, this will suffice in explaining what brews our coffee or toasts our bread every morning, but such a definition will not explain how it is produced, its means for arriving at our fair city and homes, and finally, who owns and who pays for it.

In a series of four articles, electricity will be examined through a guided tour from the home where it is used, through the lines, to the generating plants, and eventually to a look at the owners of this energy—the pullers of the big switch.

**Part One: Electricity in the Home**

Regardless of what Webster says, the electricity that comes out of the socket in your home is not a "natural entity;" it is manufactured and sold by the kilowatt hour. In Wisconsin there are five major energy suppliers. The one that sells electricity to Stevens Point is the Wisconsin Public Service Corporation (WPSC). While an argument can be made that WPSC is also a part of the nature of the earth and therefore, the energy it produces is natural, it must be noted that nature has no price tag, while this energy surely does. What Benjamin Franklin discovered running down his kite string into his key was much closer to nature than what a nuclear or coal generating plant produces. However, Ben's form of electricity is not as available, nor is it very practical. To use electricity today, it is necessary to create it, and in our capitalist society, it is necessary to sell it.

The difference between the physical force in nature that we call electricity and the salable item we use in our homes is fundamental when we examine energy usage in the home. It is in the home where we often forget that there are major costs involved in creating this energy. The only time we feel affected by electricity is when it is no longer there, as in a power outage, or when reality comes crashing down and we have to pay our electric bill. Although the costs we pay for energy goes beyond the payment for services rendered, this is...
Continued from page 16

where it affects us while in the home, and an examination of this charge is needed.

To have my bill explained to me, I took it to the Wisconsin Public Service Corporation's office, located at 1348 Main Street. The supervisor, John Jankovich, was very helpful in explaining the intricate details of my bill. Even though I appreciated the effort the Public Service Commission, Wisconsin's regulatory body, had put into getting this extensive information on the bill, I found the detail perplexing. Mr. Jankovich showed me a brochure, reprinted here, and because of the numerous questions I had, I took it to the Wisconsin Public Service Corporation's office, located at 1248 Main Street. Mr. Jankovich told me that the WPSC averages the bill. Point has five of these supervisors, three of whom are very helpful in examining this charge is needed.

For seasonal users, the WPSC does not provide a monthly charge for each kilowatt hour lines result in a continuous burning a 100 watt lightbulb. Handwritten in the WPSC in Stevens Point are plans for past records of previous year-round power for you. It is very helpful in Point Point has five of these brochures, reprinted here, and because of the regulatory body, had put into getting this extensive information on the bill, I found the detail perplexing. Mr. Jankovich showed me a brochure, reprinted here, and because of the numerous questions I had, I took it to the Wisconsin Public Service Corporation's office, located at 1248 Main Street. Mr. Jankovich told me that the WPSC averages the bill. Point has five of these supervisors, three of whom are very helpful in examining the WPSC averages your energy consumption and bills you accordingly. The future of the meter reader is in jeopardy because of this and because of the company's reliance on five people to handle the Stevens Point area. Mr. Jankovich told me that there are plans for meters to be read by a van that picks up the information from a rooftop antenna, and of the possibility that our meters will be monitored through our telephone lines. Even though the dependability of such information gathering devices is uncertain, it appears that automation will eventually replace the travelling meter person.

The end result of all this is power for you. The meter reading, the itemized bill and the maintenance of the power lines result in a continuous supply of electricity to your home, school, and city. The amount of money we pay for electricity seems rather small in comparison to the many benefits we derive from it. The use of the energy is not without other costs. However, the bill we receive is only a fraction of what we as a society pay to produce electrical power.

In the following articles, the hidden costs of energy will be examined with the hope that a better educated public will not accept abundant energy as a natural entity simply because it is always there, and will take steps to curb personal consumption and complacency when it comes to the creation of electricity and its use.
After getting a funding reprieve from the Wisconsin Legislature's Joint Finance Committee, the Wisconsin Solid Waste Recycling Authority may be closer to completing a contract with Ore-Ida Foods, Inc., than at any time before. A $21,886 appropriation by the Joint Finance Committee on September 22 enables the Authority to continue functioning. The Committee voted 13 to 1 to appropriate the money to the Authority contingent on the Authority completing a contract with Ore-Ida Foods in Flover by November 1.

This appropriation became vital to the Authority after the Department of Administrative Services sent a request to the Authority to get Joint Finance Committee support. The Authority would have had to set aside money to cover closing costs as the Authority had to reserve costs for October as closing costs.

Two-thirds of the Wisconsin Legislature's Joint Finance Committee, the Wisconsin legislative appropriations committee, supported the proposal, the Governor will not use his veto authority, “said Helbach. A veto by the Governor could be overridden by two-thirds of the Joint Finance Committee.

Warren Porter, director of the Solid Waste Recycling Authority, and Jim Fisher, general manager of engineering for Ore-Ida Foods at its Boise, Idaho, headquarters, both feel optimistic about settling the recycling agreement soon. The agreement would enable the Ore-Ida plant in Flover to receive steam generated energy from the burning of recyclable trash collected in Wood and Portage Counties.

Fisher toured similar facilities in the south and was pleased with their performance. One problem facing Ore-Ida, according to Fisher, is who the owner-operator of the incinerator will be. Fisher indicated the Authority, not a prospective owner-operator of the incinerator, wants a third party to be the owner-operator. Ore-Ida, also not to be the owner-operator, would like to assist with the determination of who will be the owner-operator. Fisher, in a telephone interview, said that there have been similar resource recovery efforts which have not succeeded because the owner-operator lacked competence.

As the Pointer goes to press, we are unable to report on a meeting between the Authority and Ore-Ida held yesterday day to negotiate the contract. Warren Porter felt "only one face to face meeting would be needed" to work out major aspects of the agreement. Also, having a complete agreement between Ore-Ida and the Authority by November 1, Jim Fisher, said, "I'm positive at this point."

Perhaps the eloquent wisdom of the late Dr. Martin Luther King Jr. can provide optimism for the future of human relationships. In a letter to the clergy of Birmingham, Alabama, written while he was jailed in Birmingham in 1964, King defended the civil rights movement and offered this profound wish: "Let us all hope that the dark clouds of racial prejudice will soon pass away and the deep fog of misunderstanding will be lifted from our dear drenched communities and in some not too distant tomorrow, the radiant stars of brotherhood will shine over our great nation with all their scintillating beauty."

-Joseph Vanden Plas
**Pointers dent Knights armor 14-7**

By Tom Burkman  
Assistant Sports Editor  
Off to their best start in 18 years (now 3-0 overall), the Pointers, playing in their home opener, defeated St. Norbert College 14-7 in the annual Shrine game last Saturday night.

Defense was the key for the Pointers as they held St. Norbert to 176 yards of total offense (85 rushing, 91 passing) and caused four turnovers — two fumble recoveries and two interceptions. Pointer defensive coordinator Dale Schallert said, "That's the best 60 minutes of defense we've played in quite awhile. We were consistent, had a good group effort, and had a chance to look at a lot of people."

But while the defense was keeping St. Norbert from moving, the Pointer offense couldn't move the ball too effectively either. The Pointers only managed 201 yards of total offense but scored twice in the second period. Quarterback Dave Geissler, who completed only nine of 23 passes for 114 yards and two interceptions, said, "I wasn't throwing the ball well. They were in a 5-2 defense most of the time."

But he then said, "established the ground game early like we planned, but didn't execute after that."

Senior halfback Royce Ryskoshi had a lot of the rushing yardage, gaining 113 yards on 20 carries, plus an additional 36 yards as a pass receiver on five catches. In all, Mayer had 197 total yards and scored both Pointer touchdowns.

The first score (set up after linebacker Jeff Rutten intercepted a pass at the Norbert 27), a 12 yard run around left end, came with 11:47 left in the second period. Randy Ryskoshi then kicked the first of his two extra points to give the Pointers a 7-0 lead. Mayer said, "(The touchdown) was a power sweep out of our spread formation. I got good blocks from (Dave) Brandt who pulled and (Mark) Rietvedt."

St. Norbert then capitalized on a Pointer turnover. The Knights punted and Gerry O'Connor caught the ball on the 30 but fumbled as he was hit at the 31. Then after three plays and a first down, Knight quarterback Pat Sullivan fired a 17 yard touchdown pass to tight end Tom Schnell. After the conversion, at the 4-29 mark, the score was tied at seven.

After each team was forced to punt, UWSP got the ball on their own 21 yard line with only 51 seconds remaining until the half. After Geissler completed passes to fullback Gary Pazenick and halfback Mike Gabb all the way to the 41, Mayer caught the ball 16 yards downfield and ran the rest of the way into the end zone — 59 yards in all for the go-ahead and eventually winning score. Ryskoshi then converted his second PAT to put the Pointers ahead 14-7 with only 18 seconds left until the half. "I just got behind the linebacker, jumped for the ball and took off," said Mayer of the game winning play.

The Pointer defense then totally shut down St. Norbert in the second half, so much so that the Knights only managed to cross midfield once. That came after Geissler's second interception was returned to the 47. St. Norbert moved the ball down to the 32 but a 38 yard field goal try by Mark Schneider was blocked by Jeff Rutten with 12:35 left in the third quarter.

After a fumble recovery by Pointer defensive back Doug Whitmore at the end of the third quarter gave them good field position, Point couldn't capitalize, as Ryskoshi's 47 yard field goal attempt was off to the right. That turned out to be the last scoring opportunity for either team.

One defensive player, Bob Lewitzke, said, "We ran a defense that had the linebackers right in the holes most of the time. We felt all along that we could hold them although we did have a few breakdowns early."

Mayer, a graduate of Green Bay's Premontré High School who had one of his best days as a Pointer, said, "I really wanted this one because there were a lot of guys on the other team that played against in high school."

Coach D.J. Leroy said, "We wanted to control the ball because we knew they had some good defensive backs. Offensively, we had a very poor showing. We were very inconsistent and didn't execute very well." Referring to the defense, he was more pleased, commenting, "They hit hard and caused turnovers, they had a real good game."

The Pointers return to action this Saturday afternoon when they take on UW-LaCrosse for the annual Homecoming game. Kick-off is scheduled for 2 p.m.

**Spikers win one, lose one over weekend**

By Julie Denker  
Sports Editor  
The UWSP Women's Volleyball team lost to UW-Eau Claire in its first match over the weekend 15-13, 15-8 before rebounding to defeat host UW-Platteville 15-13, 15-8.

In the first match, UW-Eau Claire sailed to an easy win as Pointers were victims of their own errors. Karla Miller led UWSP with nine kills, followed by Debbie Loch and Melanie Breitenbach who each had two kills.

Against Platteville, Point cut down the number of errors and pulled together to earn the victory. Lisa Tomn led the Spikers, scoring eight points, while Sally Heiring and Chris Samp each scored six.

Coach Nancy Schoen was pleased with the play of several players in the second match. "I was pleased with Tonn's serve and Miller's hitting, plus Miller and Loch teamed up well on their blocks at the net."

The split brings the UWSP record to 3-1 for the season.

Looking at the rest of the season, Coach Schoen commented, "We have a lot of potential and talent. Senior Mel Breitenbach, junior Sally Heiring and sophomore setter Chris Samp are our only returning letter winners and players from last year. "Kaukauna's Karla Miller, I felt, was the best player in the state last year and I'm excited about what she can do for our team. Another good high school player who was also down at the state tournament was Lisa Tomn. They are both good players and I'm glad they are here. Both are starting in the present line up along with Julie Adams."

"Generally, freshmen don't get much playing time on my teams because there is so much learning to do. But this year it is different with only having four players who are returning."

Additional Spikers who will see some action throughout the season are Jackie Haydock from SPASH, Jill Prange from Merrill, Carol Larson (one of the two setters on the team) from Rhinelander, and Debbie Loch from Green Bay.

With a good recruiting year, it looks like the Spikers, along with learning this year, will continue the winning ways of Coach Schoen's teams of the past and will be an imposing force to deal with in the future.

The first home game of the season will be today, Thursday, Sept. 30, when opponent UW-Stout. They host conference...
Stickers one goal shy in three contests

By Tamas Houlihan

Pointers Sports Writer

The UWSP Women's Field Hockey team lost three games by one goal each to tough opponents.

The Pointers fell to UW-La Crosse 2-1, Central Michigan 5-4 and Northern Michigan 2-1, beating Eastern Michigan 9-4.

The Pointers and La Crosse played a scoreless first half before Sara Bohneilin scored at the 4:17 mark of the second period. "It was a big mark, La Crosse's Suzanne红defelt a free hit into the goal to tie the score and send the game into overtime. The teams then played two scoreless five-minute overtime periods, which meant the game would have to be decided by a flick-off.

Each team received five shots with La Crosse coming out on three to the Pointers' one. A La Crosse coach Janet Wagner said, "We won't have a very well played game. It was very physical."

Point coach Nancy Page added, "Sara was very sharp. We could have won, but we didn't take advantage of numerous opportunities."

The Pointers outshot La Crosse 15 to 8 and had 13 penalty corners to 4 for the Rookies. Coach Page praised the play of first-year goalie Chris Smith who recorded 3 saves. The loss left the Pointers with a 1-4 record against Division III opponents.

Three goalkeepers honored

(SID)—Rod Mayer of Green Bay, Jeff Rutten of New York Mills, Minn., and Dan Rubenber of Chippewa Falls have been named the UWSP men's football players of the week for their roles in the UWSP 14-7 win over St. Norbert.

Mayer, a running back, earned first team honors after scoring two touchdowns while Rutten received the defensive award for his line play and was selected to receive the special teams award.

The Pointers improved their season record to 3-0 with the win. UWSP will host UW-La Crosse on Saturday, Oct. 2, in the school's annual Homecoming Game. Kick-off will be at 2 p.m. at Goerke Field.

Mayer, a 5-foot, 110-pounder who prepped at Green Bay's Prentice High School, had his biggest statistical day as a Pointer. He rushed for 113 yards in 20 carries and caught five passes for 64 yards while scoring both of Point's touchdowns. The first came on a 16 yard run and the second on a 59 yard pass from Dave Gesieler.

"Rod has had a number of big games for us but I don't think this win would have been possible without his determined effort," UWSP coach D.J. LeRoy said. "He was always giving us 110 percent and came up with the big plays when we had to have them."

Rutten, a 6-foot, 1-foot 255 pounder who transferred to UWSP from North Dakota, also came up with a big play as his interception and return of 10 yards set up Mayer's touchdown run. He was also credited with three solo and four assisted tackles in the contest.

"This was a big game for Jeff for a number of reasons and I am really proud of him for the performance he came up with," LeRoy said in saluting Rutten. "He played with great determination and spirit and really made his presence felt on the field."

"Our guys who ran had an average time of 30 seconds better than our team did on this course at this meet last year," Ray Rutten remarked. "I really think he has almost recovered from his leg injury, and Dennis Koncin ran his first race in almost two years after having leg surgery and showed he is really going to help us.

"It was a wide open, well played game," commented Page. "We shut them down in the second half, but they came up with some big drives and made some big plays to hold on to the lead."

For the game, UWSP had 13 shots to 8 for Northern Michigan and also had the edge in penalty corners, 12 to 6. Jane Christiansen scored the long goal for the Pointers. Chris Smith saved 3 shots on goal. Overall, Coach Page was pleased with the team's play. "We played well against some very tough teams. It's good experience playing against the upper division schools. I think it will help us down the road."

Netters drop home meet

(SID)—The UWSP women's tennis team suffered an 8-1 defeat at the hands of Marquette University Saturday at the UWSP courts.

The only win for the Pointers came from the No. 3 doubles team of Mary Ellen Kircher and Wendy Patch as they defeated Cathy Ganshirt and Cecile Gallager 4-6, 6-4, and 6-4. Eileen and Tom Anderson headed well in her No. 5 singles match but was defeated in the second set.

Despite the setback, UWSP coach Dave Nann had an optimistic outlook as he evaluated the overall play of his team.

"They did it or not, despite the beating we took, I have a good feeling about the way our doubles teams looked," Nann said. "All we are lacking is playing experience and match time, and we are building."

The Pointers are now 3-0 for the season and are in action again today, Thursday, Sept. 30, against St. Norbert and Mary's at the UWSP courts. Play begins at 3:30 p.m.

Women runners take first

(SID)—The UWSP women's cross country team captured its first place in the UW-River Falls Coed Invitational here Saturday at River Falls Country Club.

The Pointers won the meet with 28 points. They were followed by Carleton College, 15; Golden Valley, 67; and River Falls, 90.

Mary's and Mankato State were also in the field. A strong, well-balanced team, we captured three of the five first individual positions.

The top finisher for UWSP was senior Tracey Lamer who was second with a time of 18:27 for the 5 mile course. Mary Bender and conf. on p. 21

More $ on the way?

The Wisconsin Higher Educational Aids Board endorsed a 42 percent increase in state grants over the next two years for all college students. The WHEAB had been considering providing aid only to needy freshmen and sophomores but opted not to do so. Board Executive Director James Jung said the measure would have concentrated grants on students with the most pressing financial needs.

The overall biennial budget included $25.8 million in grants for public college students, a 32 percent increase over the previous grant, $32.6 million in grants for private college students, a 51 percent increase and $2 million for Indian Student Assistant Grants, an increase of 10 percent.

High tech growing pains

James Rutherford, Director of Science and Technology Education for the American Association of the Advancement of Science, is worried that the current deficiency of students in science and math will have adverse effects on the future of high technology.

"This country's future depends upon its ability to adapt to a marketplace based on high technology. And American students are not adequately educated in the basic skills they will need to compete and succeed," said Rutherford recently. "Are our schools preparing our students for a world dominated by science and technology? The answer to that is no; we simply are not doing that."

Hands in the till

The director of the Research and Training Center for Mental Retardation at UW-Madison, Howard Garber, has been charged with two misdemeanor counts for participating in a scheme involving the misuse of $23,629 in federal grant money.

U.S. Attorney Gen. John Byrnes said the scheme was formulated by Rick Heber, the administrator of the grant, allowing Garber to keep his wife on the payroll even though she wasn't expected to work at the center. Byrnes said the scheme was concocted by Heber as a way of compensating Garber for taking in Swedish students during the summer. Heber is currently serving a three-year sentence on embezzlement charges. If convicted, Garber faces a maximum penalty of one year in prison and a $1,000 fine.

Charity case

Led by Harvard University, which collected $90.97 million, colleges and universities in the United States attracted a record $4.23 billion in voluntary donations from individuals, corporations, and foundations in 1980-81.

That figure represented an 11.2 percent increase in contributions from the 1979-80 academic year.

Complaints drive FBI away

Complaints of discrimination toward gay people toward the end of recruiting efforts of the FBI at UW-Madison's Law School.

After the school's Student Bar Association filed a discrimination complaint over the FBI's refusal to employ homosexuals, FBI special agent H. Ernest Woody notified the law school that no FBI personnel would appear on campus "for the purpose of recruiting persons for potential FBI employment."

Mums the word

The CIA does not have to reveal the names of colleges and universities which it has covert contacts with, a federal court of appeals has ruled.

In upholding a lower court order, the U.S. Circuit Court of Appeals in Washington rejected a student's request under the Freedom of Information Act for the CIA to divulge whether or not it had contacts at the University of California.

Suckers beware

Taking a vacation to L.A.? Well, don't talk to any strangers who claim to be UW economics professors or you may wind up paying for it.

Since 1972, there have been over 50 instances where a sophisticated panhandler has swindled charitable good samaritans out of small sums of money. In each case, the swindler claims he is an economics educator on the Madison campus on a speaking tour of California colleges and that he has lost his wallet.

Paul Phillips is the name the panhandler has used most if the time while acquiring amounts between $5 and $100 from travelers in airports, many of them middle aged or elderly women returning from Hawaiian vacations. He promises to pay the victim three fold and gives the victim the address of the UW-Madison econ department.

After receiving a steady flow of letters from good samaritans seeking reimbursement, Administrator Eileen Bolland of the Madison Economics Dept. contacted the L.A. police and District Attorney's office. There has been no response to date.

TWO CENTS WORTH

DRAFT ELIGIBLE

MALE

FEMALE

STUDENT

FACULTY

VETERAN

The students of the 60's and 70's waged the "war at home" against what they perceived to be an unjust action in Vietnam. Perhaps it is true that sooner or later many lives could have been spared. Perhaps the "era of American error" could have been prevented.

Is a new era of unrest burgeoning in our country in light of sporadic crisis in the world? U.S. foreign military involvement, draft registration, etc., are issues that have immediate bearing on the lives of students.

I suggest that now is the time to assess your country's actions and share that assessment. You are being asked to voice your opinion. Do you care enough to respond to the issues that may be shaping your life? Please fill out the survey below and drop it in the Pointer boxes located in the CDFP building, Classroom Center and the Union. (Also feel free to comment further on any question.)

1. Suppose you were faced with direct involvement in foreign conflict as a part of the military. Present turmoil mounted between warring factions (which in fact it has in respect to the Middle East), do you or would you back U.S. military involvement in:
   a. the Middle East
   b. El Salvador
   c. Eastern Europe
   2. To what extent do you think nuclear weaponry is the basis of your decision on question number 1?
      totally
      to a large extent
      somewhat
      not at all
   3. The people of Wisconsin have set precedent with the passage of the nuclear freeze referendum. We are equally close as a deciding force to a draft registration, since two cases for refusal to register have reached the courts, with the possibility of there being many more. Do you feel that failure to register for the draft would justify receiving a prison term?
      yes
      no
   4. Next year will make 15 years of ROTC at our university. However, ROTC has not always found favor on the college campus as was the case in 1968-70 when protest was made against its value on campus. At the present time how would you evaluate ROTC?
      a. best program on campus
      b. indifferent to its presence

cont. from p. 22

careers of minority recruitment.

Cathy Glennon Bushman will continue as an examiner of transcripts and transfer requests. Claudia Griesbach, a 1977 graduate of UWSP who earned her master's degree here in 1980 and has been a home economics teacher at Xaverian High School in Appleton, is a new counselor who will travel extensively to high schools in the Fox Valley. Nancy Stokosa, Jane Shippy and Judy Zinda will be responsible for reception, clerical and general office management.

At least for this semester, Helen Heaston of the English department will serve in a quarter-time position handling special projects in the office.

Marshall explained to the senators that the responsibilities of the admissions-high school relations staff are complicated by two factors: the number of high school graduates will continue to decline each year through this decade while the admissions standards are being raised at UWSP.

Marshall said those factors undoubtedly had some effect already this year because the number of new freshmen is down. The official and complete report on the enrollment situation will be compiled in about a week, he said.

Tierney said after the meeting that he is especially interested in "zeroing in on prospective students who have high academic grade points." He said high schools in a wide area will be visited and the counselors will attempt to confer with students in them earlier than in the past "so we can have an earlier impact on their higher education decisions.

All prospective students who seek information from the university will receive personalized responses either from the admissions-high school relations staff and/or faculty members in academic departments. More direct telephone contact will be made with prospective students, he added. Also, greater attempts will be made to provide information on academic programs to adult learners, people seeking master's degrees and members of minority groups.

Some of the new expenses to be incurred by the expanded efforts will be raised through private sources, including organizations to which office staff members give public addresses.

While not leaving his directorship of career counseling and placement, an administrative position in his office currently is in the process of being filled.

Tierney, 39, is a native of Janeville who has received national and state awards from professional organizations involved in career counseling and placement. He currently is president of a state association in that field.

He holds two degrees from UW-Madison in the field of psychology and has taught courses on that subject at UWSP. He was a counselor and lecturer at his alma mater for two years before coming here.

The Wednesday senate meeting, at which his new office responsibilities were discussed, involved little action by the senators. A resolution was approved to honor the memory of Professor Emeritus Vivian Kellogg who taught in the School of Education here from 1953 to 1970. She died Oct. 2.

Small city workshop planned

The Center for the Small City will sponsor a workshop on the results of the 1980 federal census in January of 1983 at UWSP. The center, which is part of UWSP, will be involved in two forthcoming state meetings and is planning to publish proceedings on a conference it held last spring.

The Wisconsin State Data Center, North Central Wisconsin Regional Planning Commission, UW-Extension, and Portage County Planning Department are joining the center in planning the sessions to evaluate the census data.

In addition, the Proceedings of the Fifth (1982) Conference on the Small City and Regional Community will be published. The theme for the conference centered on the "Small City Economic and Energy Futures."

environmental protection and in so doing has brought down the wrath of local polluters.

As you are all aware, we have a most serious problem in central Wisconsin with groundwater, soil, and air contamination. I am inviting all of you who are interested to get involved by becoming better informed.

There is only one candidate for public office on the county level that is deeply involved in the environmental movement. That is myself, Mary Ann Krueger, candidate for County Clerk on the Independent ticket.

I welcome any and all support. I am running Independent because I feel that both major parties are letting us down. I am running for County Clerk because I need to get inside county government (which is the main part of local government that takes care of environmental issues as well as handling elections and county board business).

I have been a member of many organizations including Audubon, Defenders of Wildlife, Nature Conservancy, Humane Society, and many other political and health groups. I am now the chairman of the Citizen's Pesticide Control Committee Inc. I was chairperson of the Anderson for President (Portage Co.) campaign.

SHAPER members were entertained recently by a local professional magician, James Gavin. The year was kicked off with a watermelon social which featured the magician, a get-together between faculty and members, all the watermelon you could eat, and a watermelon seed spitting contest. James, a resident of Flower, magically spit the longest seed for the men, while Sue Kiekhaefer hurled the longest seed for the women, each winning a UWSP T-shirt. The show was greatly enjoyed by all.

The next meeting will be on Oct. 5, at 7:00 p.m., in the Berg Gymnasium. This is a mandatory meeting. Anyone with a minor in Safety or Health, a Physical Education major or minor, or a Dance and Recreation major or minor is requested to attend. Participants in athletics are strongly encouraged to come also.

This year, SHAPER has many new activities and events planned. One of these is the State WHAPER (Wis. Health, Physical Ed., and Rec.) convention, which is to be held in Milwaukee on Oct. 28 & 29. It is to be hosted by Nicolet High School. The SHAPER Club will have a booth there, where we'll sell T-shirts promoting our profession. If you think you'd like to go to the WHAPER convention, start your plans now. There will be a sign-up sheet at the Oct. 5 mandatory meeting for those planning to go. We will be arranging for transportation.

In November, SHAPER will be hosting a program involving interviewing. Two alumni principals will be our guest speakers with the major topics being the important aspects of interviews, personal mannerisms, and appearance, and a sample list of questions that those in their position ask potential employees. A lot of valuable information will be presented here so don't miss this one. Look for upcoming announcements.

International Programs: Who uses them?

The answer to that question, according to Dr. Helen Cornell, director of International Programs, is “just about everybody.” This fall’s distribution of students shows that Business and Economics and Political Science majors lead in numbers, with thirteen from each group participating in various Semesters Abroad. Communication and Education majors are in second place with ten each. Not surprisingly, Art majors are the largest group, with the smaller numbers of students from History, Psychology, Foreign Languages, Dietetics and Sociology are also populating the programs, but many departments (Politics, Philosophy, Computer Science, Drama, English, Fashion Merchandising, Food Science, Interior Design, Journalism, Math, Music, Natural Science, Paper Science, Physical Education and Water Resources) are represented by one or two students.

Dr. Cornell points out that these data show that the model on which our international programs are built is a sound one. “We provide an opportunity to earn upper division humanities credits on site, abroad. Thus we can serve certain majors and minors, while filling general degree requirements for students of varied interests.”

“A learning about the wider world is important to many professions today,” she said. “I am particularly pleased to see Business majors enrolling, since International Business is one of the growth areas of the future.”

This year’s group contains twenty-two transfer students from among the approximately one hundred who went abroad in August. Students from Eau Claire, Madison, Marathon Center, St. Norbert, Port Washington, St. Thomas and St. Paul, La Crosse and Oshkosh have been accepted into our 1982 program. Additionally, a Peruvian student, a student who grew up in Italy, one who lived in Halifax, Nova Scotia for ten years, and several who have traveled in Europe with their family joined our program to extend their experience of travel and learning. We also have a married couple with their baby, who visited his grandparents in Italy during the month-long study tour that the Britain group takes before settling in at Peace Haven. “This is the second year of our travel,” says Dr. Cornell. “We also have veterans of the Soviet Seminar, and a few participants from previous Semesters Abroad.”

“Our groups vary in composition and size,” says Dr. Cornell, “but their continuing popularity attests to the fact that UW-Stevens Point International Programs meet student needs. Our programs offer good value and a wide choice.”

Inquiries for 1983 programs to Malaysia, Spain, Britain, and Australia can be directed to Dr. Cornell at 206 Main or by calling 365-2717.

Over the ocean and under the continent to Koala land we go

UWSP is planning to establish a semester abroad program in Australia beginning in January.

Helen Cornell, director of the Office of International Programs, said she has begun receiving applications and has made initial plans for faculty and housing.

Between 20 and 25 students will be accepted, she said, and efforts will be made to have the register of participants filled well in advance of the departure date.

Rick Wilke, director of the Central Wisconsin Environmental Station and a member of the UWSP natural resources faculty, will be the leader with assistance from his wife. He will teach courses about resources in the region being visited. Australian scholars will be appointed by UWSP to serve as adjunct professors and teach humanities courses.

The group will be headquartered in Sydney, probably at the Women’s College, Sometime may be arranged for residence in the city of Canberra, too.

Professor Cornell said UWSP has been considering a program in Australia for several years because of student and faculty interest. Few institutions of higher learning in this country have such offerings there, she added.

She said she chose Sydney as a main study site because “it is such a fascinating cosmopolitan city with a fascinating fast-paced society.” It has outstanding facilities for the arts and also is noted for its sandstone architecture and extensive beach area, she reported.

Australia is the eighth country which has been chosen for a UWSP semester abroad. The first one was England in 1969 and its popularity continues to be high with both groups going there each year. Also, there are often summer tours to that country.

Currently, groups are in Taiwan, England, Poland and Germany. Next spring, groups will be sent to Malaysia and Spain as well as England and Australia.

The university has offered programs in India and continues to maintain contact there, but student interest in residence in that country is right now low, according to Professor Cornell.

The director also reported she has concluded a study on this year’s distribution of students, showing that business-economics and political science majors lead in numbers. Thirteen from each of these disciplines are enrolled followed by each one from communication and education. The remaining students in the descending order of their numbers are majors in art, history, sociology, foreign languages, dietetics and sociology. Many other majors are represented by one or two students.

Of the 100 students studying abroad this semester, 22 of them transferred to UWSP specifically to be part of traveling groups.

GAIN THE EXPERIENCE
EMPLOYERS SEEK

“We see a strong demand for B.A.’s with military service” says Sanford Fox, President, Fox-Morris Personnel Consultants, Philadelphia, (Wall Street Journal, 12 Sept., 1980)

If you are a BS/BA degree holder, 19-34 years o, U.S. citizen, in good health, highly motivated, and have a strong desire for achievement, you can gain this experience as a Naval Officer while earning up to $16,500 to start ($27,000 in 4 years).

* Applications are considered up to 15 months before graduation.

If you are 1000, please call Personnel office at 1-800-242-1160.

CONT. FROM P. 30
ever made. Love, Cindy-
Philadelphia.
PERSONAL: Thanks to all
the people who are making
the Computer Science
Association move onwards
and upwards. My special
thanks to Dave, Joe,
Jerianne, Deb P.,
Colleen and Prof. Morris.
Lynn.
PERSONAL: To my fellow
LA's: May the force of the
"other half" of the wooden
spoon be with you! B.B.
PERSONAL: My
Sharonna—What kind of
tongue will it be for this
week; orange, lemon, lime
or cherry?
PERSONAL: Lizardbreath-
—You almost fooled me, you
are a dynamite dancer. If you
dance too much you may
suffer nose bleeds days later
and never know what hit you.
Look out for wild women in
sharks clothing, they bite.
Tell the Beatles fanatic that
the Ant isn't too angry with
his cultural preferences.
PERSONAL: Juking
buddy—Cut me some slack,
you do know how to dance. I
did like your new wave shirt
the other night. See you at
H.H. in the near future. I
guess I can’t have my cake
and eat it too; I can’t make a
decision. Too confused so I’ll
drink myself into oblivion.
The Wino.
PERSONAL: To the
crowds down at Big
Moon—Thanks for coming
down to Happy Hour on
Thursday. Let’s keep it up,
the more the merrier. For $2
for 3 hours from 6-9, what
more could you ask. Big
Brother wants you there!
PERSONAL: Ken, best of
luck in S.G.A. Short-stuff.
PERSONAL: Big
Dave—Late night
Saturday—too much—too
fast—too hard—too bad!
Apologies are in order for
you. Rugby is a tough game
for the rookies—you're okay—talk to ya later. J.
PERSONAL: Congratulations
Rob! Good luck and good
life. Happiness to you & Mark
always. Your Roomie,
Darlene.
PERSONAL: Robb, Happy
5-month Anniversary!
Thanks for making every
month so special. Love, Dar.
PERSONAL: Sluggo:
you're fun to cuddle. Love,
Snuggles.
PERSONAL: Dear Nelson
G.L.A., it was nice being had
last Thursday night. You’ll
have to come in again for a
snack some time real soon.
Just remember guys, the fun
has just begun! How lucky do
you feel? Lust, "your"
women.
PERSONAL: Sharon, I’m
glad I met you, and I hope we
will keep having the good
times we’ve already had for
the rest of the year. Kelly.
PERSONAL: Sex!... Vote
for the sexiest UWSP
Homecoming representative-
s. Todd Zaugg and Debbie
Strauss! Good luck you
two—we’re behind you 100
percent. Roach-Knutzen
Rep's Fan Club.
PERSONAL: Karen,
surprise again! Hope you’re
doing your reading, if not I
still love you. Your Polska.
PERSONAL: The nymph
sends a kiss of Florida
sunshine to Hipster to
ergize his day. Love,
Forever.
PERSONAL: Honeybun,
looking forward to number
13. Love ya, Bunkybutt.
PERSONAL: Dear Ann, I
miss you very much! We
have a great thing going and I
want it to stay that way
forever. I love you and
always will!! Rob K.
PERSONAL: Lu, anxious,
ready & waiting. Let’s get
bubbly with our buddy. Mr.
Bubble.
PERSONAL: Dear Trough,
the Girl Scouts of America
would like to personally
thank you for your large
purchase. With the profits we
made from your purchase we
were able to buy new
uniforms for troops 377-425.
Ben Anette, Pishbowl.

TERM PAPER
SERVICE
FIFTEEN THOUSAND PLUS SELECTION CATALOGUE

Trident Marketing introduces the definitive answer to your term paper and assignment problems. Whether the paper that you require is 5 pages or 75 pages long, arts or sciences, undergraduate or graduate level. Trident Marketing can fulfill your requirements. Considering the number of term papers we carry on file, our price structure, our delivery system and our custom term paper service, we are the biggest and the best. Some of our more impressive features are:

- Absolutely the lowest prices of any term paper service in the United States
- Toll Free (800) number service to take term paper orders - 7 Day Delivery
- Over 15,000 term papers on file and we deliver custom made term papers on 14 day notice - Toll Free service to take these orders also.
- Complete and absolute confidentiality - We ship in plain brown envelopes.
- Never ever any duplication - we never send the same paper twice to the same university or college. This factor unconditionally warranted.
- All term papers typed and ready for submission
- Catalogue purchase price refunded in full against first order
- Our catalogue is cross indexed by faculties (Arts, Sciences, Commerce, Engineering, Computer Science, Business, etc.) and by undergraduate and graduate classifications - completely indexed for easy & fast use.
- Trident Marketing unconditionally guarantees an "A" (or:) on any term paper provided by us or money in full refunded.

Our unique directory is priced at only $5.00 plus $1.00 shipping and handling. Send us your name and complete mailing address for immediate delivery.
