“To believe what has not occurred in history will not occur at all, is to argue disbelief in the dignity of man.” Mahatma Gandhi

by Chris Cellechowski

Just one week ago, grateful folks around America celebrated a national day of Thanksgiving. Not surprisingly, our gatherings featured the bounty of foodstuffs grown and produced throughout our productive nation. We have much to be thankful for.

However, today we are sobered by the fact that many members of our global family do not have that luxury. They are part of the estimated 15-20 million of us who die yearly from malnutrition and outright starvation.

World-wide hunger is certainly not a new global problem. It has plagued humanity since we first chronicled events around us. Nearly 2,000 years ago the Roman playwright Seneca wrote, “A hungry people listens not to reason, nor cares for justice, nor is bent by prayer.”

We witnessed the largest technological explosion in the history of mankind during the 20th century. Today we have discovered the building blocks of life itself and can create simple living organisms. Yet, we have not discovered a method for providing sustenance to some of the human lives already in existence.

While the slaughter of neglect continues, many of us wonder whether we have the planetary resources to adequately resolve this continuing global paradox. Indeed, some of us raise serious doubts as to whether we should interfere with the invisible hand of Fate. A quick examination of the facts will shine some light on these perplexing problems.

According to the Hunger Project, a non-profit charity and advocacy group, our Gross Planetary Product (the value of the world’s collective annual output of goods and services) is $10.5 trillion. They estimate that a yearly expenditure of $25 billion through the year 2000, 25 percent of the GPP, would be enough to fund a continuing global program to end hunger.

But with the world economy still on the ropes, can we realistically afford a significant diversion of capital needed for economic recovery? The Hunger Project points out that the $25 billion needed for the proposed hunger-relief program represents less than one-half of annual U.S. expenditures on alcohol and tobacco. A yearly donation of $11 from each person in the non-hungry world would be enough to fund the program.

In 1981 the world produced 3.4 billion metric tons of food, 1.5 billion of which came in the form of grain. That amount of grain alone could form a tube one foot in diameter that could circle the globe 653 times!

Clearly, then, the crux of the problem to a viable solution lies not in our capacity to adequately control world hunger, but in our attitudes and willingness to do so.

We cannot approach world hunger thinking that it is merely the result of too many people trying to live off too little land and leave it at that. We must ask ourselves why there is a surplus of humanity and a shortage of productive land.

Simply put, the exponential growth of world population must cease. But it should end after the exercise of rigorous birth control programs and education, rather than under the slow, cruel hand of starvation.

In addition, the reason we have a shortage of productive land is our refusal to apply advanced agricultural technology to the world’s arid regions, most notably the horn of Africa.

The Heritage Foundation, a conservative think-tank, said, “There is now the scientific knowledge and institutional arrangement which makes it possible to overcome hunger, not only within the United States but throughout the world. This can be done within the lifetime of people now living, if there is the political will to do so.”

That brings us to our final point: political willingness. How high on our list of global priorities have we placed the world-wide problems of malnutrition and starvation? Not very high. The amount needed to fund the aforementioned program to curb world hunger represents 17 days worth of global military expenditures. As Gen. Dwight D. Eisenhower noted in somewhat similar words, every dollar we spend on arms represents a little bit less food for the hungry among us.

Approval sought for new majors at UWSP

The UWSP will seek approval to establish new undergraduate majors in arts administration and musical theater.

On Wednesday, Nov. 16, the UWSP Faculty Senate voted to submit a request to UW System's central administration for an "entitlement to plan" the programs which both would lead to the degree of bachelor of fine arts. In addition, senators approved a new option in the undergraduate major in home economics education. It would provide a special track to be pursued by students planning careers as teachers of non-traditional learning in adult and vocational-technical programs or as specialists in non-formal teaching situations such as banks, stores and non-profit organizations.

The existing home economics education program will remain for students interested in becoming teachers on the junior and senior high school levels; however, the existing practical experience of classroom teaching will be tailored more specifically in the new option for the kind of work the student is pursuing.

The new arts administration major would be one of very few and possibly the only undergraduate offering of its kind nationally. There are several institutions with graduate majors in this subject, including UW-Madison. Like the change in home economics, intent of this proposal is to provide more career alternatives to students.

The interdisciplinary curriculum will provide students with not only art skills but also the ability to handle responsibilities in financing, management, production, promotion, organization and marketing of the arts.

"Currently, most arts administrators are not trained as managers. Often the only business-trained person in an organization is the accountant. It is clear, then, that professionally trained administrators are vital to the arts and are necessary to improve the present state and future preservation of the arts," according to Paul Palombo, dean of the College of Fine Arts.

The new program in musical theater was proposed initially as a third option in the theater arts major, but UW officials recommended that it be a submission to plan for a new full-fledged major.

This major also would be unique, at least in the state, and would include instruction in both opera and musical comedy. Alice Faust, chairman of the theater arts department, has stated that the job market for actors, singers and directors is "always smaller than the talent pool available. Therefore, opportunities for employment are greatly improved with musical theater training."

In other curricular matters, the senators okayed these new courses: Physics 382, "United Nations at work" for one to three credits; Physics 106, "general introduction," one credit; Music 318, "instrumentation," two credits; English 106, "reading fiction," one to three credits; English 390, "independent reading," one credit; and Military Science 399, "special work," one to three credits.

Senators approved motions from the Faculty Affairs Committee which call for salary increases as first priority in any consideration of additional compensation to faculty; remission of tuition charges for children and spouses of full-time aca­demic staff members; and in a "multiplier fac­tor" used to determine bene­fits under the Wisconsin State Retirement Fund; state re­quirement benefits paid without penalty (for people under traditional students' age) for 30 years of service in the UW System.

Approval also was given to implementing new general degree requirements (passed by the senate last spring) for transfer students effective in the fall semester of 1983. The new requirement will be put into effect for new freshmen in the fall of 1984.

It's happening on campus

New Arts Trio

The New Arts Trio, a performing ensemble of faculty members from the Eastman School of Music, will present a recital at 8 p.m. Thursday, Dec. 1, at UWSP.

The performance in Michelle Hall, Fine Arts Center, is sponsored by the Arts and Lectures Fine Arts Series. Tickets are on sale in the Arts and Lectures box office.

Resume

A public program in which three local people who hold management positions in different types of offices will speak will be held Thursday night, Dec. 1, at the University of Wisconsin-Stevens Point.

Members of the UWSP Student Senate will sponsor the presentation entitled, "Career Service Resume," beginning at 6:45 p.m. in Room 125 of the University Center.

The speakers will be Phil Beinke of Oneida Foods, Inc.; Robert Clayton of First Financial Savings and Loan; and William King, principal of Washington Elementary School.

Recycling

A recycling program will be started this year and will continue most Thursdays through the end of the academic year in May.

The College of Natural Resources Student Advisory Board and members of environmental organizations affiliated with the board will sponsor the pick­ups of recyclable items in three campus locations. Aluminum, tin, glass, newspapers, car batteries, and oil may be deposited in the parking lot near the Allen Center, off Illinois Avenue, then to the De­Bolt Center off Isadore Street, and Parking Lots S and J between the Schmee­ckle Reserve and K-Mart on Maria Drive.

Hours of the pickup will be 9 a.m. to 2 p.m.

The public is invited to join university students and employees in the project.

The recycling will be held Dec. 1 and then break until Feb. 2 and continue weekly through May 10 with the exception of March 15, which coincides with spring break.

Discussion

Alcoholism will be the topic of an informal discussion sponsored by the Canterbury Club on Monday, Feb. 24. Professor Jack Osler will lead the tour, as he has done numerous times in the past since the program was started about the arrival in Mos­cow. Other stops will be in the cities of Samarkand, Tashkent and Leningrad.

The Stevens Point group will join contingents from other UW campuses which are participating in a seminar entitled, "Discover the U.S.S.R."

Information and registration materials are available from the UWSP Office of Continuing Education and Undergraduate Research.

Soc-Anthropy class

Population experts have predicted that by 1990 the United States will have more stepfamilies and single-parent families than traditional families.

The sociology-antropology department at the UWSP is leading the report and gearing up its instructional program to address the new social realities.

Professor Elfrida Maissler has developed a new three-credit course to be offered for the first time during the spring semester on the topic, "Women and Family in Contemporary Society."

Because it is expected to be of special interest to non- traditional campus students, in such situations, the class will...
P.M. Letters Policy

We encourage you to send your letters containing posi-
tional and pertinent ideas to the Pointer Magazine. We also ask you to follow a few simple conditions in doing so:

1) All letters should be typewritten, double-spaced, and no more than 250 words in length. The Pointer reserves the right to edit any letter that substantially exceeds the 250-word limit.

2) Refrain from character assassinations and ad hominem arguments in your letters. If a personal attack of this sort were deemed libelous, both the Pointer Magazine and the writer of the letter could be held liable.

3) If you want your letter to be published in a specific issue, it may arrive at the Pointer office no later than noon Tuesday before the next issue.

4) All letters should include the name of the writer and his/her phone number. The Pointer will not print letters if only a pseudonym is given. We will hono requested anonymity for justifiable reasons.

We try to make space for our letters every week, but some weeks we are unable to do so. We appreciate your understanding in this regard.

C.C.

Avo shocks, m'am

To Pointer Magazine,

I am an employee of UWSP and the past few years has read many a Pointer newspaper. This year, however, I'd like to commend the Pointer Staff for producing an outstanding publication. I particularly applaud Chris Celichowski for his poignant, insightful editorials. It seems to me to be a critic or writer, but the features, layout and graphics are enjoyable to read and pleasing to the eye. I especially congratulate persons involved in the cover graphics, which have been excellent this year and indicate a degree of professionalism that has been lacking in the past. Thanks for adding to my Thursdays!

Juanita Duncan
Home Economics

Tunnelvision?

To Pointer Magazine,

I would like to respond to the recent comments made by Michael Daehn last week. I found his letter to be very interesting yet his ignorance about certain realities was evident. All of us are short-sighted and narrow-minded at times and we are blind to certain things which we may not want to see or believe.

Most of us are Christians, as are millions of others in the world. Yet in this world there are some who believe in Marxism/atheism, etc., to influence their values. I believe as Christians that we are given the right to protect and defend by whatever means necessary our right to worship as we choose and protect those other freedoms which we are entitled to. Mr. Daehn seems not to believe that and thinks that it is wrong to stand up against those who try to deny us our freedoms. He seems to feel that others have the right to force upon us those atheistic policies which they practice. Often the Cubans/Soviets/Syrians, etc., show very little regard for human life. Yet Mr. Daehn seems to feel that it is only their crime which they are guilty of is denying those freedoms to people which we all have a God-given right to. He just closes his eyes to the evils of the Soviet/Cuban system and just accepts the methods in which they control and try to control people. It is clear that he doesn't seem to fully understand the Soviet system yet those of us who have been to the Soviet Union saw firsthand the methods in which they maintain control over their people. We know what their system is really like.

Mr. Daehn made a poor comparison in comparing the lack of capital punishment for violent crimes and hope we will soon show some consistency in those values. I'm not saying that killing is right and that we should enjoy killing but at times we are left with no other choice for we are not given any other choice. No one Marine or any member of the military enjoys killing but it's their duty to defend themselves and our freedoms.

We should show compassion for those unfortunate peoples who are held captive in the Soviet system. Yet we should feel no guilt for killing those who actively defend their atheistic policies of that kind of system. There is a difference in killing innocent people who aren't responsible for their government's policies from those who defend the policies of the Soviet Union with arms.

Maybe in Lebanon a Gandhi figure is needed to bring peace to that region. Yet the Syrians, the Soviets, the Iraqians and others don't believe in peaceful resistance. Look at what has happened to the Solidarity movement in Poland—how did the Polish government and the Soviets react to that? The Soviets believe in killing with bombs and other violent methods to gain their desired objectives; it is peace through violence.

As a nation, we have historically shown a high regard for the people of all lands yet some choose not to live in peace and have very little respect for human rights and life. Some put political goals ahead of human life—it is hard to respect those who turn to arms and violence. For those reasons, we believe in peace through strength to deter them from carrying out their goals and acts of aggression. Maybe the recent campus vigil should have been dedicated also to those innocent Lebanese and Grenadians who wished not to live by that sword but died for being caught up in some actions they weren't responsible for.

I look forward to the day when all people can live as one in peace in this world and when nations won't have to depend on arms to deter war and to settle disputes. But as long as the forces of evil exist that day will not come. As long as some turn to bombs and guns to gain their objectives, we have every right to protect our way of life by whatever means are necessary to defend our freedom which they try to take from us and others.

This is what the president so strongly believes in—yet some haven't been listening to him and find it easy to blame him for all of the world's problems. No one wants peace in this world more than President Reagan! Yes, nationalism belongs in the Olympics—tell the Soviets that!

Jeff Peterson

SRT's ahelp a help

To Pointer Magazine,

This letter is to introduce you to an organization on the UWSP campus, the Student Reaction Team. The SRT's, as they are called, are comprised of 18 students, sophomores through seniors, whose primary goal is to educate their peers about the use of alcohol. This organization, in its second year of existence, is still a pilot program located only in Watson Hall and is under the direct
Task force adapts UWSP to new drinking age

by Laura Sternerwes

When Gov. Earl signed legislation raising Wisconsin's drinking age to 19, he rolled out a barrel of questions for the 4UW System schools. How should the UWs regulate alcohol use in the residence halls? Should halls have "wet" and "dry" wings or should students be segregated into "under 19" and "19 and older" groups? Should alcohol be banned on campus? UWSP's Alcohol Task Force is working to come up with solutions to questions like these.

According to Stu Whipple, the task force was formed three years ago as a base for research into alcohol and other drug abuse problems. Currently the task force is working to "come up with a positive way to implement the law on campus," he said. The task force consists of representatives from various areas on campus including Residence Life, the University Centers, Food Service, SLAP, and SGA.

Although the 19-year-old drinking age doesn't go into effect until July 1, the task force has begun work now because "we don't want to rush to make a decision that won't be supported by students," Whipple said. "We want a policy that's reasonable to students and staff, and then we have to sell (the policy) to the students."

The Alcohol Task Force has been examining ways to implement the new drinking age in the residence halls. (B.B.)

Grenada

Grad student critiques invasion

by Laura Sternerwes

International

Geneva, Switzerland—U.S.-Soviet talks on reducing medium-range nuclear weapons were "indefinitely suspended" when the Soviet delegation walked out last Wednesday, officials at the U.S. mission said. Chief Soviet negotiator, Yuli Kuvitsinskly, and his team walked out of the Soviets' threat to end the talks when the North Atlantic Treaty Organization alliance agreed to extend a deployment of 572 medium-range nuclear missiles in Western Europe. The first missile sites will be deployed in England a week before the talks. Kvitiskly told reporters, "The talks are discontinued, and there is no resumption date."

NATO contends that the missiles are necessary to counter a buildup of Soviet SS-20 missiles.

In Washington, President Reagan said he would "do everything we can to bring (the Soviets) back" to the talks.

Madrid, Spain—Only 11 of 194 passengers survived the crash of a Sabena airline's Paris-to-Bogota flight last Sunday. The Colombian airliner crashed and then exploded five miles east of Madrid's Barajas Airport, killing 183 people.

According to Transportation Minister Enrique Baron, the cause of the crash was unknown. Searchers did find the flight data recorder or "black box," and officials cont. on p. 10.

John Savagan

critical of the president's decision. One such critic is UWSP graduate student John Savagan, who was recently interviewed by Pointner Magazine News Editor Joseph Vanden Plas. Since he received a Bachelor of Science Degree in Political Science and History from UWSP in 1979, he has worked for the Council on International Policy, a human rights lobby organization in Washington, D.C. He is currently the Environmental Editor of Pointner Magazine and President of Students Against Nuclear Extinction (SAME).

To establish a tone for the interview, a synopsis of Grenada's recent history is necessary. According to Savagan, Grenada was ruled by a right-wing dictator, Eric Gairy, from 1974-79. Although Gairy was supported by the United States, he had little popular support in Grenada. His government was overthrown in 1979 by the "New Jewel Movement" led by Marxist Maurice Bishop, who said the movement's motto was "Let those who labor hold the reins." The U.S. government, said Savagan, never wanted good relations with the Bishop government and did everything it could to bring about his demise.

In mid-October, a coup led by two Marines General Hudson Austin and Bernard Coard, dislodged Bishop. On October 19, less than one week before the U.S. invasion, Bishop was killed by supporters of the coup. Austin and Coard were captured during the invasion and are now detained by the U.S.

PM: Wasn't the president's main stated reason for the invasion, the release of the medical students, legitimate?

Savagan: Well, he patterned his reasoning after the invasion cont. on p. 6.

**Savagian, cont.**

couple days, they found the warehouses a quarter full and they found that some of the weapons dated back to the 19th century. There were some modern weapons as well, but the majority of these weapons, some of the Soviet weapons there but nothing that could provide any offensive capability for attacking another island or for invading another country.

PM: But couldn't it be possible that some time in the future the Soviets planning just that?

Savagian: Yes, I imagine that it might be possible. Then you'd have to realize that Cuba is much more able to do that than Grenada.

They have a secure island. They're not in any danger of an overt, aggressive invasion by the United States, not in the sense that Grenada was. Why set themselves up for something that they could see that's what they were doing. You don't put a lot of weapons and fortifications on an island that could be so easily invaded.

PM: Why would Grenada go on such lengths to build an airport?

Savagian: They needed it. PM: Why? I mean, what's the...? Savagian: Prior to the airport's completion, the Grenadians had an airfield on a runway of about 3,000 feet. That runway would not handle commercial aircraft, which a lot of the body who wanted to go to Grenada, or the United States, or Trinidad and then island hop to get to Grenada. The Grenadians were basically people from the United States and other islands were basically stealing tourists. They were able to come and to a extent could have some revenue in the islands and not have to spend the money on a plane ride. They could have an airport that gave them some access to their island and it was a well known fact that they needed this airport. What they had was one single runway, unlighted, cut out of a jungle, which was not adequate as a base for any large aircraft. PM: You have said the United States may have "caused a con..." invading the island. How so?

Savagian: The minute Maurice Bishop came to power the United States turned its back on the government they had estab­lished in the government. In other words, they did not allow for any type of negotiations or any turn around on going to go to Grenada. They followed the Grenadian government as they went to Europe and per­sumed many of the European countries not to give the Grena­dians any type of aid. They har­assed them on a number of differ­ent levels. For example, they did not recognize the representa­tive of the United States, Den­nisa Williams. They called her a gunnery, which is a totally li­beral statement. They refused all forms of negotiation or any type of recognition with the Grenadian government. And that caused splitting within the New Jewel Movement. One of the leading causes of the coup was a split within the movement as where the general direction of the revolution was going. There was a feeling that there was some sort of reconciliation with the United States government. You had these two ministers, disagreed with that. They wanted a closer relationship with the Soviet Union. When Bishop went to United States in June of this year to seek some form of recognition with the United States, he was kept wait­ing for three or four hours at Miami, and then saw the word with William Clark (then National Security Advisor) and that meeting lasted two hours and as Mathias (Rep. John) was holding a rally, he was ass­sumed that Bishop wanted to negotiate, the United States government was not interested in going back to the island, he was in a posi­tion of failure and I think that seriously weakened his stand amongst the people with the people on the island.

PM: Why would it be benefit­ful for the United States to maintain a good relationship with a Marxist government?

Savagian: Because if they're not maintaining any type of relationship, then they're not going to be able to maintain a relationship. Because that's exactly what the United States was building up to do in Grenada. By shutting off all forms of diplomatic negotia­tions, by not even negotiating into pushing the Grenadians into the Soviet camp, which would mean a military build-up on the island, or they were going to have to go in and keep the Grenadians from doing so. Of course, the Reagan administration has been militarily active all over the Caribbean, they've sought pol­itical solutions.

PM: The CIA has a history of covert activities in the Carib­bean. They have been "flimsy."

Savagian: That's probably . "I've been hard."

I know he made a number of missions. He killed Bishop, which was a big mis­take. It was a family move on his part to simply take over the island and then expecting anything but an invasion. That's why he's never going to. I personally think Austin had the assurances of the United States govern­ment.

PM: Is it wise for the United States right now to ing for new military bases in Grenada while a new govern­ment is formed?

Savagian: Right now the United States Army is the only thing holding the island together.

"...by the early 60's, it appeared that full disarmament was out of reach. The United States then became an advocate of non-proliferation and the stabilization of superpower relationships." Dr. William Saltton

lasers in space.

**Present Context**

The United States has begun deployment of interme­diate-range missiles in Western Europe to counter exist­ing Soviet missiles in Western Europe. The Soviets have announced their intention to develop intermediate-range missiles. The United States has responded last week by withdrawing the "Theater" missiles. The Soviet government has denounced the US withdrawal of the "Theater" missiles. It was a sobering expe­rience for me personally because I knew that he knew he would never have to turn the keys for real and he was going to destroy power. Taylor observed that with confidence, the United States is nuclear weapon, technolo­gy seems to be controlling man instead of man controlling technology.

**Health Effects**

Dr. Lawson, who currently serves on the governing council of the Institute of Medicine in Washington, D.C., then explained the short and long term effects of nuclear detonation would cause. First, blast waves from the explosion would create a gases from the explosion would create a gas cloud that would destroy all life within a very short distance.

Survey takes look at UWSP students’ voting

by Chris Celichowski

Many have accused UWSP's student voters of apathy, but few know the demographic and political make-up of this potentially powerful voting bloc. The following information, compiled by Scott Hall and Mark Greenwood, offers a revealing look at a sample of this campus' voters.

Two-hundred UWSP students, randomly selected by computer, answered a 17-item phone survey between October 15 and November 16, 1983. Questions and responses were coded and then entered into a computer for tabulation.

While the survey's results alone were informative, several surprising facts emerged when questions were compared.

Apparently, gender plays a significant role in party identification for students. Respondents were given three choices for partisan identification: Democrat, Republican, or "or what." (The latter option included third-party members and unaffiliated voters.) Fifty-eight percent of the Democrats were female, while only 42 percent were male. However, male Republicans outnumbered their female counterparts 70 percent to 30 percent. Those in the "or what" category nearly mirrored the demographic gender division with 59 percent of them female and 41 percent male.

There was no significant gender division among registered voters—52 percent were female, while 48 percent were male. This gap reversed slightly among unregistered voters, with 56 percent of them male and only 44 percent female.

Among 136 registered students, 58 percent lived off-campus and 42 percent lived in the dorms. Students surprised nobody by giving three common excuses for not voting—(1) "I didn't have time;" (2) "I didn't have time;" and (3) "I forgot."

Party identification of parents or guardians reflected partisan choices for 83 respondents. Fifty-seven percent of Republican students deferred to their parents' choice, while only 29 percent of the Democrats and 14 percent of the unaffiliated or third party voters did so.

The three categories were divided almost evenly over the question of whether or not their vote made a difference in an election's outcome.

President Reagan received the most student endorsements for the 1984 presidential race, getting the nod from 89 students or 34 percent. Fifty-seven percent of the Republicans said they would opt for the incumbent, while 30 percent of the Democrats and 28 percent of the "or what's" endorsed his candidacy.

Walter Mondale led the list of Democratic hopefuls, grabbing 34 endorsements or 17 percent. Only 30 percent of the Democrats said they could support him. As expected, Mondale found even less support among independents, 15 percent, and Republicans, 6 percent. John Glenn's support was very down to earth. He received endorsements from only 7.5 percent, or 13, of the respondents. Fifteen percent of the Democrats indicated they favored Glenn, while only 4 percent of the independents and 3 percent of the Republicans backed the Ohio Senator.

A significant number, 22.5 percent, of the students queried said it was too early for them to endorse a candidate. The authors would like to thank the following for their contributions: Dr. John Larson, Mr. Larry Szpisjorski, Dr. James Canfield, Mr. Richard Anderson-Sprecher, Ms. Ellen Clark, Ms. Debra Coombs, and to all those who took part in the survey, a special thanks.

**Editorial, cont.**

Redistribution of current food resources is only a temporary solution to the problem. We must begin earnest work on the problems of overpopulation and land reclamation if world hunger is to be stopped.

The Four Horsemen of the Apocalypse—War, Conquest, Famine and Death—continue to ride the global range undaunted. There are too many of our brothers and sisters being mercilessly dragged behind the last two riders. We can continue closing our eyes and minds to the problem, or we can grab the other end of the rope and pull like hell to save our family members from the lifeless abyss. Every hand that lies idle in the struggle against these two strong foes effectively helps the weakest among us closer to their end.

---

**CANCER, NOT KNOWING THE RISKS IS YOUR GREATEST RISK.**

A lot of people think cancer is unbeatable. That simply isn't true. In fact, over two million people have had cancer and survived to lead happy, normal lives. And not only can cancer be beaten, it can also be prevented. There are definite precautions that have been proven to decrease your risk of getting certain cancers.

- Ask your local American Cancer Society to send you a free booklet about cancer risks.
- Learn the facts about cancer.
- And make not knowing the risks, one less risk.

Expected bad weather didn't delay the launch of Space Shuttle Columbia. The shuttle lifted off on time, at 11 a.m. EST on Monday. The six-astronaut crew will conduct nine days of round-the-clock experimentation in the European Space Lab.

Thirteen nations have a stake in this first flight of the $1 billion reusable orbital laboratory. More than 70 experiments are scheduled and include investigation of space sickness that almost half of the shuttle astronauts have been plagued with.

The ninth of the space shuttle flights has a UW connection. Astronaut Brewster Shaw graduated from UW-Madison, and Astronaut A.R. Parker taught astronomy there.

Phoenix, Ariz.—More than 96 percent of the Amalgamated Council of Greyhound Local Union voted against ending the 3 1/2-week-old strike, according to Acting President Harry Rosenblum. He offered to "return to the bargaining table at the earliest possible time."

State

Park Falls, WI—The National Christmas Tree was cut from Wisconsin's Chequamegon National Forest Monday. Delmar Kline, Robert Felch, Frank Lapp, George Koehler and Ed Yune used a 50-year-old three-foot-tall deciduous white spruce.

The tree was 52-foot-tall white spruce that almost stood on Capitol Hill's west side facing the Washington Monument and Lincoln Memorial.

This is the second time that a Wisconsin tree has been chosen as the nation's official Christmas tree.

Local

Stevens Point, WI—"I am anxious to begin serving the people of the 71st Assembly District," said newly elected State Representative William Horvath (D-Stevens Point).

Horvath took his formal oath of office on Tuesday, Nov. 15, at the courthouse. Judge Fred Fleishauer conducted the ceremony.

Ground water protection and the elimination of the income tax surcharge are two of the issues that Horvath expects he'll be involved in.

Hunger Coalition fights world’s oldest battle

by Kelly Moran

“A Little Helps A Lot,” is the motto behind the Hunger Coalition that got up on the UW-Stevens Point campus. This group of concerned individuals feels that a place such as Stevens Point provides a great opportunity to educate others on world hunger.

This past semester has been proof of the coalition’s enthusiasm. The group started out with an idea of Kathy Roach (student). She felt a deep responsibility to act on the problem of world hunger. Kathy realized the need for students to get her plans off the ground. So through some hard work and some luck Kathy recruited some committee members who in turn got sponsors.

Sponsors to the Hunger Coalition consist of: Environmental Council, Lutheran Student Community, Inter-faith Council, United Minis­tries in Higher Education, Newman Student Community, SHAC, Dietetics Club, SGA, Volunteer Assistants, and SGA.

The actions of the group took little time to formulate. Plans for World Hunger Day on Thursday, December 1, have already become a reality for the group. Through the efforts of the Hunger Coalition, both students and members of the community will have an opportunity to help take that first step in providing direct aid to the hungry.

Hopes are that the action approved by SGA as a campus organization is one of the group’s goals. This Simonson’s first fine, support to provide future programming on world hunger.

Any persons interested in joining the coalition should contact Kathy Roach or Rev. Art Simmons (Peace Center director).

Kathy Roach commented as she handed me a poem from the last issue of The Hunger Times, “This is what our members believe in their hearts”:

I am only one, But I am someone. I can’t do everything. But I can do something.

UNICEF estimates it would have taken only $5 billion to save the children who died of malnutrition in 1983, which amounts to less than $100 each annually.

The U.S. led the world’s nations in giving foreign aid to the world’s nations. $7.1 billion in 1983. However, it ranked 14th when this amount was measured against its GNP.

Contrary to popular belief, foreign aid benefits those nations that provide it. Its primary center of efforts is provided by the U.S. on development programs is spent in the U.S.

Hunger kills 20 human beings, 21 of them children, every minute of the day. That’s 122 Hiroshimas every year.

Operation Bootstrap bucks down on hunger

by Chris Cheruk

Operation Bootstrap, a unique local service, has its helping hands reaching far beyond service. We are a referral agency. Other agencies call us when they have people that need help and they can’t help them,” noted Rosemary. Basically, it’s an agency for those who “fall through the cracks” and don’t qualify for help from other services. The people from other agencies won’t usually act as a referral agent when they feel another agency could help someone better than they could.

Operation Bootstrap is the brainchild of a nun from St. Stephens. Fifteen years ago a few area businesses were attempting to provide meals to hunger in the county and in the course of conversation she was asked possibly not having a job next year due to low enrollment. A few days later the same nun began calling these businesses to find out what they need. They were without help. Their response was positive and as a result Operation Bootstrap became a reality.

Rosemary remembers that, “Originally, these fellows thought were going to wipe poverty out in Stevens Point in a couple of years time at the most and they really got discouraged because this is really social work. And social work is really hard work and doesn’t move very very far forward.” Nonetheless, Operation Bootstrap has grown to its present size and is still literally a no cost organization. All work is voluntary and all services are donated.

In fact, their biggest cost is stamps to mail their Thanksgiving cards.

Even that money is well spent. “In October and early November people were asking us when our letters were coming for our annual plea.”

To mention that when the people mailed the out, 235 people mailed in their donations the next day. That is just a hint of the amazing amount of cooperation that Operation Bootstrap got not only from Portage County residents, but also other services as well. It was stressed how unique it is and how lucky we are to have such a great amount of communication and cooperation between agencies here in Stevens Point.

As the year gets close to Christmas, Operation Bootstrap gets busier. There is an increased need and the calls just don’t stop. Monday, Nov. 28, was a slow day with only a few calls for food, and single calls for rent, utility, furniture, and one family whose house has just burned down and needed everything.

Students number in need is increasing, the needs of the people haven’t changed.
World Hunger Day activates involvement

by Kelly Moran

Chancellor Philip Marshall has declared December 1, 1983 as World Hunger Day for the UW-SP community. The Hunger Coalition on campus has several events planned to help raise support for the hungry not only in foreign countries but also in the Stevens Point area.

The day of events will begin with a benefit concert from 11:30 a.m. to 1:30 p.m. in the UC Encore room. Canned goods for Operation Bootstrap Canned goods for Operation in the UC Encore room.

people knew that, they

would be very upset."

Music for '83

by Paul Gaertner

For the first 46 weeks of

1983, it became the first year

in 20 odd years that only four

albums graced the number

eone position. Up until a cou­

ple of weeks ago, The Po­
llice's Sychronicity album

was at the number one posi­
tion. For 17 weeks, no album

had been able to budge it

from that position. Michael

Jackson's Thriller held at

number one for 20 weeks,

and Men at Work set a re­
cord for a debut album, stay­

ing at number one for 13

weeks. For a brief stay dur­
ing the summer months, the

soundtrack to Flashdance saw

a home there. But it

only remained there for two

weeks.

In 1977-78, Fleetwood

Mac's Rumours album re­

mained at the number one

position for many weeks. That

trecord still stands, and it

doesn't look to be broken for a

long time. During 1978, the

Saturday Night Fever Sound­

track remained untouched for

34 weeks. As of this week,

that is precisely how long it

stays at number one. Howev­
er, that could change soon.

Michael Jackson's album,

Thriller, may show up next

to number one with the re­
lease of the million dollar

video in the near future. The

album was on the market

long time. During 1978, the

Possible measures to reduce world hunger:

1.sending food to other countries
2. airdropping massive quantities of food
3. using technology to transport food and disperse it
4. using money that is currently spent on armament for food and shelter
5. education and awareness among people
6. giving people the resources to take care of their own problems

Note: The measures mentioned are not exhaustive and can be combined with other strategies to address the issue effectively.
Music, cont.

Fourth on the list is the 1967 album, More of the Monkees. That album stayed at number one during the magic year of 1967 for 18 weeks. Coming up strongly behind that is the Police's Synchronicity album, which has held that spot of numero uno for 17 weeks. Men at Work's Business As Usual is just a little farther down the list at eighth.

Last week, the Billboard Music Awards were released. As expected, Michael Jackson's Beat It video took five awards, including best overall videoclip. Also expected was the success of Billy Joel and his videos. Fifty-two different videos were selected from 44 different acts. Only 16 were capable of winning and, with the exception of one tie, Jackson and Joel took one-half of them.

The rundown goes like this: Michael Jackson's Beat It—1) Best overall videoclip, 2) Best performance by a male, 3) Best use of video to enhance artist's image, 4) Best use of video to enhance song, and 5) Best choreography. Billy Joel's Pressure—1) Best special effects, 2) Most effective use of symbolism. Allentown—Most socially conscious. The others stack up like this: Best long-form video: Duran Duran; Best performance by a group: ZZ Top; Gimme All Your Lovin': Best performance of a female: Annie Lennox (Eurythmics)—Love is a Stranger; Most innovative video: Herbie Hancock—Roket. Best art direction: Herbie Hancock—Roket. Best lighting: The Police—Every Breath You Take. Best editing: Michael Sembello—Mac and Me. And, for the best use of computer graphics-animatión, many people cling to the thought that the English have better taste in music, and thus put out better tunes. But at the close of the past week, the top three singles in the U.S.A., and in the top ten worldwide were the same.

Lionel Ritchie's song ALL NIGHT LONG was No. 1 in the U.S. and No. 2 across the Atlantic. SAY SAY SAY, the very popular and catchy duet by McCartney and Jackson is No. 2 here, and No. 3 in ENGLAND. And Billy Joel's UPTOWN GIRL is No. 3 in the states, and holds the big No. 1 spot in the U.K. Let it also be noted that all three of these songs are backed up with very impressive videos.

Bootstrap, cont.

There has been a change in the type of people who are needy. There are more people who have had advantages in their life, and due mostly to the economy, need Operation Bootstrap in some way.

One of the Best Films This Year!

"WARGAMES" is wonder­ful! The most thoroughly entertaining movie I've seen since "E.T." Young Matthew Broderick, who carries the film comfortably on his 21-year-old shoulders...he is perfect..." - PEOPLE MAGAZINE

"WARGAMES" is clearly the summer's most original movie! It's fast, it's fun, and it's on target..." - Pat Collins, CBS MORNING NEWS

"WAR GAMES' IS WONDER­FUL! The most thoroughly entertaining movie I've seen since "E.T." Young Matthew Broderick is wonderful. Don't miss "War Games."" - Jeffery Lyons, PBS SIAH PREVIEW

"WAR GAMES' IS CLEARLY THE SUMMER'S MOST ORIGINAL MOVIE! IT'S FAST, IT'S FUN, AND IT'S ON TARGET." - Dennis Cunningham, WCBS-TV

"BY FAR THE MOST EXCITING FILM OF THE SUMMER SEASON. A fast, funny, timely and highly suspenseful rollercoaster ride through the world of electronics and computers. "WarGames" is both a cracking adventure movie and a very moving comment on technology versus humanity." - Richard Foreman, NEW YORK MAGAZINE

"A SUPER SUMMERTIME MOVIE! Matthew Broderick is the most alive and engaging actor in movies today...A non-stop, head-on exhilarating entertainment!" - Dennis Cunningham, WCBS-TV

One thing that sets Operation Bootstrap apart from other agencies is its speed and flexibility. Since it isn't a nationwide organization it can respond to a need in a matter of hours.

For those who are interested in volunteering time, money, services, or materials, Operation Bootstrap can be contacted through Portage County Information and referral service. The number is 346-2718. Donations of food, clothing, or furniture would be greatly appreciated. But there are some stipulations they put on donations as they only want things that they can use.

The U.S. government foots the bill for subsidized dining by top Pentagon officials at $24 per meal. Poor children in the U.S. get their school lunches at a cost of only $1.20 to Uncle Sam.

The world arms bill, $550 billion, amounts to twice the amount spent on food worldwide and over 2,000 times the amount spent on peacekeeping.

Those of us born in the developed world consume 30 times as much as a person born in an undeveloped nation. Consequently, the 16 million babies born in developed countries each year will have an impact on the world's resources four times greater than the 109 million babies born in undeveloped countries.

THIS FILM WOULDN'T WAIT FOR SECOND SEMESTER (So It Made "My Favorite Year")

Thursday, Dec. 1 U.C.-PBR Seats Only $1.50

Friday, Dec. 2
By State Law students have a right to share in the decision-making of the university they attend. Students make decisions at UWSP concerning course offerings, the academic calendar, student fees and other student related issues.

On Thursday, December 8, students will have the opportunity to vote for Student Government Senators to represent them on faculty and administrative committees throughout the university.

There are currently 15 candidates running for office. Candidates must receive a minimum of 35 votes to be elected and write-ins are eligible.

Voting booths will be open from 9 a.m. to 4 p.m. and students will be able to vote in the college of their major. A student ID is required to vote. In addition, Communications majors will be able to vote in the Communication Arts Center, 2nd floor, and Phy. Ed./Health majors will be able to vote in the Physical Education Building near HPERA offices outside the balcony. Undeclared majors vote in Collins Classroom Center.

In an effort to improve voter turnout and awareness, the Student Government Association has published an informational brochure for each college that will be mailed directly to all students. Each brochure contains voting information, biographical data on each candidate and a statement by each candidate stating how he will benefit the students in his college. In addition, photographs of candidates will be displayed at each voting booth, so that students can associate a name with faces.

Incumbents include Jean Prashar, Steve Ritter and Cal Tamanji in the College of Letters and Science and Mark Heil in the College of Natural Resources.

**Vote December 8th**

**College Of Professional Studies**
Candidate: David Nevins (Nipper)
3 Positions Open

**College of Letters and Science**
Candidates from left to right: Steve Ritter, Cal Tamanji, Jean Prashar, Kevin (Robert) Hammon, Jim Johnson. 7 positions open.

**College of Natural Resources**
Candidates from left to right: Steve Ruffolo, Scott K. Thomas, Carol Beckman, Mark Heil. Absent, Linda Goldsworthy. 3 Positions Open.

**College of Fine Arts**
Candidates from left to right: Michael Daehn, Cindy Selle, Susan Meshak, Dave Blocher. Absent, Mike Ormond. 2 Positions Open.
Write Your Mother

Ask her for an electric blanket so you can cut your heating bill.

No kidding. You can cut your heating bill substantially by climbing into a nice, warm bed after you turn down your apartment thermostat by ten degrees. It's a simple thing to turn it back up in the morning. A night under the electric blanket will cost you about a nickel. (And where else can you go for a nickel nowadays?)

Pointers blast past first four opponents

by Bill Laste
Can you say obvious? The Pointer basketball team sure can. And they did, four times. In fact, at Quadrant Fieldhouse in the last two weeks and a half. The Pointers opened their season by easily disposing of University of Chicago on November 19, and the Pointers got less than they expected out of the Lakers. Point pouring their opponents 97-51.

"Roosevelt had a fairly respectable season last year and they had a number of people supposedly returning," said assistant coach Jerry Gotham. "Well, prior to the game a returning veteran became ineligible, one got injured and one got sick. We didn't know that till they walked in the door."

Roosevelt walked in the door with only eight players and that became seven when 6-4 center Reggie Lomax sprained his ankle halfway through the first half. "All at least the big kid (Lomax) was giving us some competition inside. As soon as he was lost, they had nobody," said Gotham.

One got the feeling that Lomax would not have helped the Lakers cause much anyway. The Pointers stormed out to a 44-15 halftime advantage, led by some active play from Terry Porter, who led the team in points and rebounds in the half, with 11 and five respectively. Craig Hawley and Keith Pendergast each chipped in 10 first half points with effective outside shooting.

The second half was more of the same. The Pointers started off the half by running off 24 points to the Lakers' four and the game became more of a Pointer offensive exhibition than anything.

The statistics reflect the Pointers' domination of the game. Field goal percentage? .632 for the Pointers and .411 for the Lakers.

Hayden added 18 points and all 14 Pointers on the squad scored in the game which was never close afterwards.

Porter hit nine of 11 shots from the field and his 20 points led the Pointers in scoring. Roosevelt added 18 points and all 14 Pointers on the squad scored in the game which was never close afterwards.

The Pointers played Northland College in their second game expecting a little more of a battle, but this game went to the dogs too, pun intended. The Pointers rolled to a 109-46 victory.

It took both teams nearly two minutes to hit the hoop, but once the Pointers did, they scored in bunches. They put the game's first eight points on their side of the scoreboard and the game was never close afterwards.

Davie Davis of the Pointers unveiled an effective outside shot in the first half and accounted for the team's 55 first half points. Northland's largely inept offense scored 24 points in the first half and committed more turnovers (17) than points.

Porter hit nine of 11 shots from the field and his 20 points led the Pointers in scoring. Roosevelt added 18 points and all 14 Pointers on the squad scored in the game which was never close afterwards.

Women cagers win one, lose in tourney

SID — The UWSP women's basketball team fell to the University of Minnesota-Duluth, 56-55, in the semifinals of the American Family Classic on Friday, but bounced back to defeat Manitoba 74-53 to claim third place.

Against UM-D the Pointers held a 28-24 halftime lead behind Sue Murphy's 10 points and Kathy Bogan's six. However, turnovers and fouls plagued the squad throughout the second half and allowed UM-D to win the game in the last seconds.

The Pointers committed 25 turnovers while being whistled for 15 fouls. UM-D outrebounded the Pointers, 64-50. For the game, the Pointers made 26 of 75 field goals (.347 percent) compared to 21-74 for UM-D (.284 percent)

The Pointers were hurt on the free throw line as they only attempted four and made three (.750 percent) while UM-D had 30 attempts and made 18 (.555 percent). Sue Murphy led the Pointers with 18 points and grabbed seven rebounds, while Regina Bayer scored 12 points and grabbed 10 rebounds before fouling out. Amy Gradecki also chipped in 12 points.

Pointer coach Bonnie Gehling was disappointed in her squad's performance. "It was a game of turnovers and fouls for us," Gehling said. "We weren't much better. Gehling did see some good things in the loss. "Amy Gradecki (12 points, six rebounds) and Sue Murphy (10 points, six rebounds) played very good games for our team. Our team is strong and will bounce back and play Saturday night."

The Pointers did just that. With four players scoring in double figures, the Pointers powered their way to a 74-52 win over Manitoba in the consolation game of the tournament.

The Pointers converted 14 of 31 first half shots (.452 percent). They scored nine of 34 shots (.265 percent) for Manitoba to take a 32-19 lead at intermission. Regina Bayer scored 10 first half points while Sue Murphy and Amy Gradecki chipped in seven each.

In the second half the Pointers shot a sizzling .607 percent from the field making 17 of 28 shots to give them a percentage of .525 for the game (31-59).

The Pointers outrebounded the Manitoba squad, 48-30 with an 18-13 edge in assists.

Leading the scoring parade for the Pointers was Regina Bayer and Amy Gradecki with 18 points each, Kathy Bogan with 13 and Sheila Rickfels with 10. Bogan grabbed nine rebounds while Bayer and Guard Ann Maghin had eight. Magnin also dished out six assists.

Gehling was happy with how the team responded after Friday's loss.

"I was pleased with the comeback of my team," said Gehling. "I was glad that we didn't get dis- appointed with our play on Friday, but felt we could beat Manitoba by cleaning up our game a bit. Our turn- overs were cut down way and we had four people in the double figures while we were dis- appointed on the boards both offensively and defensively."

Gehling was pleased with how the Pointers stopped Manitoba's top scorer.

"We worked hard on keeping it out of the scoreboard and did a nice job as she only scored seven points. She is averaging 21 points a game."

The Pointers took a 3-1 re- cord into their next game at home on November 29.

With five members of this year's team being returning, Witt feels the Pointers have a "bright" future next year. The addition of Jim Kowalczyk, a talented senior at Stevens Point Central, "carried" the Pointer line during the season, according to Gehling. His running helped the Pointers finish well in the 200 and 500m events to achieve confidence-builders for the young team.

"Louie can back," noted Witt. "He really didn't have a 'great' race at the end of the year. I don't think he ran any worse than any other. Everybody started to get bet- ter as the season progressed."

Chris Celichowski, a junior from Stevens Point, probably overburdened himself with extra work this season, run as well as hoped, according to Witt. Still, Witt was satisfied with his performance.

"I thought he ran a good race. He ran the best time of his life, so what more can you ask?"

At 125 pounds, Jim Kow- alczyk was the Pointers' res- tident lightweight, but Witt found the Cedarburg sophomore's performance tipped the scales of excellence.

"I thought he ran a really good race... he was one of the guys that didn't even run hard in the race. The only thing Jim lacks now is that he is not athletic, strong physically and that's one of the things he's worked on."

According to the Pointer coach, hard work was the key to the harriers' successful- ness this season.

"If you want to be where everybody wants to be, you have to be able to come back and run pace after a 4:30 mile. Our philosophy of hard work really paid off at the end of the year," said Witt.

Women's, cont.

Parker praised Sue Hilde- brandt for her willingness to do the season's hardest workouts as her own due to a lack of it last season.

"Sue also gave us a solid spot in the top five, which is important because the fifth man is very important as the first in cross country," he added.

Junior Beth Geisfeld was also not expected to run this season, but her addition to the team made a big differ- ence, according to Parker.

"Beth probably put us over — it would have been hard to keep the top three natio- nals without her. She really strengthened our top three," he concluded.

Despite struggling through her first season as a very shinsplitting problem, sophomore Andrea Carlin was determined to stay in shape and help the team out, said Parker.

Forced to work out on an exercise bike, Ausloos endured workouts worse than any she could possibly do on the road," according to Parker. "She really helped out a lot for us."

Freshman Andrea Bercousse

Cont. on p. 21
they attempted field goals (14).

The biggest question in the game was whether or not the Pointers would reach the 100-point mark, which they hit with 4:07 left in the game.

Coach Dick Bennett expected more of a test from Northland.

"I definitely thought Northland would be a little stronger because they had some experience. I don't think they played very well and they're probably a little better than they showed." Dave Schlundt led the Pointer scorers with 20 points and sixth man Tim Lazarcik hit six of seven shots for 12 points and led the team in rebounds with eight.

The Pointers met their first real challenge of the season Monday night against Northern Michigan, a traditionally strong Division II school whom the Pointers hadn't beaten since the '41-'42 season. The final score, however, had indicated a challenge as the Pointers walloped NMU 64-46.

But the first half wasn't so easy for the Pointers. Appear to have nearly suffocated the Wildcats, who had promised to be a formidable team. The Pointers, however, got the same treatment from the Wildcats as Point was forced to play catch-up with the South s, times on several of their possessions.

And an intensely played but low scoring first half, the Pointers held on to a 20-18 lead.

The Wildcats opened the second half with an inbounds pass that was picked off by Brad Williams and gun type, out.

The Wildcats opened the second half with an inbounds pass that was picked off by Brad Williams and gun type, out.

Tim Lazarcik and Tim Naegeli await a rebound. (RB)

Porter was the game’s standout as he hit nine of nine floor attempts and scored 19 points. Porter is averaging 17.3 points per game and his shooting percentage is a blazing .750. Guard Craig Hawley has also been hot, averaging 14.7 points per game and hitting 63 percent of his field goal attempts, which are mostly from 15 feet or better.

Beattie had trouble finding anything his team wasn’t doing right so far this season.

"They’re all playing basically to their abilities, doing what they have to do. We’re trying to utilize our strengths and cover our weaknesses and I think for the most part everyone is playing with zest and confidence.

The Wildcats outrebounded the Pointers 30-20 but Bennett was not overly concerned with the statistic.

"That’s going to happen to us a lot. Rebounding is not one of our strengths. In all the years we’ve been here we’ve never been a strong rebounding team.

"The thing is to keep them from getting the second shots. I look at the overall quality of play and if second shots are hurting you, then rebounding becomes more significant. But if we’re limiting our second shots and hitting our own shots, then rebounding is not as big a factor.

The Pointers beat UW-Milwaukee with 56 points, UWSP with 22 points and UW Eau Claire with 18 points.

Leading the scoring for the Pointers were the 400 medley relay team, with 56 points, UWSP with 22 points and UW Eau Claire with 18 points.

Leading the scoring for the Pointers were the 400 medley relay team, with 56 points, UWSP with 22 points and UW Eau Claire with 18 points.

Earning fifth place finishes for the Pointers were the 400 freestyle relay of Santanek, John Johnstone, Steve Davis and Scott Moser, 3:28.68; the 300 breaststroke relay of Morse, Johnstone and Steve Michaelson, 3:18.28; the 300 butterfly relay of Velitch, John Rueden and Davis, 2:51.49; the breaststroke relay of John Rueden, Rick Lower, John Hanson and Stepanek, 4:26.07; the 200 freestyle relay of Santanek, John Johnstone, Moser, 1:30.54; and the 800 freestyle relay of Hanson, Santanek, John Johnstone and Stepanek, 7:31.14.

Finishing sixth for the Pointers were the 300 backstroke relay of Samuelson, Scott Jackman and Rueden, 2:57.59; the 1500 freestyle relay of Moser, Lower and Johnstone, 14:53.98; the 400 medley relay of Jackman, Johnstone, Rueden and Davis, 4:54.53.

Head coach Lynn "Red" Blair said of the meet, "This was not a good meet for us; as far as times go, we didn't swim well. But we didn't do poorly. I'm not saying we had all bad swims because we did have a few good ones." Blair noted that his team did accomplish its goal of finishing above UW-Eau Claire and did so with mediocre performances which is a positive indication for the WSUC relays later this season.
ICERS still seek first victory

SID — For the second con­
secutive game the third peri­
dium proved to be the Achilles
heel of the UWSP ice hockey
team as the Pointers
dropped a 3-1 decision to
Bethel College here Nov.
21.

The Pointers, now 0-4 on
the season, entered the third
and final period with a 2-1
lead, but saw that advantage
erode as the host team out-
scored UWSP, 4-1, in the fi­
nal period to claim the vic­
tory. Last week the Pointers
also entered the third period
with an advantage over UW-
Eau Claire but subsequently
were defeated.

Bethel took the early lead
by scoring the only goal of
the first period before the
Pointers came back with two
unmatched scores in the sec­
ond period.

Scott Kuberra scored first
for UWSP with the assists
going to Mike Stoskopf and
Greg Tessier. Don Chioldo
followed with the second
goal after taking a pass from
Mike Lobengo. Point out-
shot the host team 18-6 in the
second stanza.

Bethel scored three
straight goals in the first 11
minutes of the third period
before Joe Gruber finally re-
sponded for UWSP. Stoskopf
and Kuberra were credited
with the assists on Gruber’s
goal.

Jim Nelson of Bethel
scored an insurance goal for
his team with 2:23 left in the
game to increase the final
score to 5-3.

Dave Crisman, the fresh-
man standout from Schofield
D.C. Everest, had another
strong outing for the Point­
ers as he was credited with
40 saves for the night.

Pointers head coach Linden
Carlson was philosophical
about his team’s latest set­
back.

“I knew when the season
started that the first four
games would give us a good
indication of how much we
improved ourselves in the
off-season because River
Falls, Eau Claire and Bethel
had most of their players
back from last year,” Carl­
sen stated.

“It has been disappointing
and frustrating because we
have played well enough to
win at least two of the first
four games and have come
away short.

“Our two biggest prob­
lems are that we must generate
more offense and get more
good production or we will
have to see if they will allow
hockey games to be short­
ened to two periods instead
of three.

“We have played just hor­
ribly in the third period so
far in all four of our games. I
don’t feel it is a lack of condi­tioning, but more a lack of determination and
concentration. When the
opposition has really come
down and gone after us we
drop back into a shell in­
stead of getting tough and
aggressive.

“So far this season we
have been depending too
much on Dave Crisman, our
goaltender, to pull us
through. Dave did another
super job tonight and has
really been outstanding.

The Pointers return to
action on Friday, Dec. 2,
when they meet St. Mary’s
College in Winona, Minn.

V-ballers
named

SID — Karla Miller of
Kaukauna, Dawn Hey of
Wauwatosa and Carol Lar­
son of Rhinelander are the
new members of the UWSP
women’s volleyball team
who have been named to the
Wisconsin Intercollegiate
Athletic Conference
honor team.

Miller, a sophomore, and
Hey, a freshman, were
named to the first team
while Larson, another sopho­
more, was selected to the
second team.

The Lady Pointers of
coach Nancy Siekmann fin­
ished fifth in the WWIAC
and had a season record of
43-21.

Miller led the Lady Point­
ers in kill spikes with 247 of
the team total of 989 for an
average of 25 percent. She
had a 34 percent conversion
rate for all spikes. She was
also credited by 123 blocks
of 59 of those being kills
for a kill percentage of 48
percent.

“Karla has a personality
and an attitude which is an
asset to her,” Schoen said of
Miller. “She is a total team
player and as far as her traits
and hard work, there
is none better.

“Karla is our strongest
player as she hits extremely
hard. She is a leader and has
the respect of her team­
mates.”

Hey finished the season
with 34 serving aces which
was 23 percent of the team
total and had 144 team points
which was 13 percent of the
team total. She also had 295
kill spikes for a percentage
of 21 percent of the team to­
tal and had 35 percent for
her total spikes.

Ansorge cited

SID — Les Ansorge of Ste­
vens Point has been named
the first recipient of the
Athletic Director’s Award
which is being presented by
the athletic department of
the University of Wisconsin-
Stevens Point.

Ansorge will receive the a­
ward on Tuesday, Dec. 6, at
halftime of the UW-Stevens
Point basketball game with
UW-La Crosse. Ansorge is a
1965 graduate of UW-La
Crosse and was inducted into
that school’s Wall of Fame
hall of fame.

The UWSP Athletic Direc­
tor’s Award is a service a­
ward which is being given to
an individual who has given
of his or her time in the pro­
motion of athletics through­
out the state, but particular­
ly at UW-Stevens Point. The
award is to be presented
yearly at the UWSP Hall of
Fame Banquet, however.
Ansorge was out of town dur­
ing this year’s Homecoming
festivities and is being pre­
sented with the award now.
Bootstrap, cont.
found for every good toy they get five bad ones. Also, any other contribution, monetary or voluntary work help a great deal.

Class, cont.
be taught evenings for their convenience, Ms. Massier said. Meeting times will be 6:30 to 9 p.m. Tuesdays, beginning Jan. 24, in the Collins Classroom Center.

Ms. Massier will base her lectures in both research and personal experience. She is married with three stepdaughters.

Her discussion on topics will be: terminology in stepfamilies, who's who in the stepfamily, the instant parent, becoming a stepchild, living with one set of children, the visitors or the weekend family, impact of physical household on the blended family, sexuality in the stepfamilies, discipline matters and legal issues affecting the second spouse.

Information about signing up for the new UWSP course on the blended family is available in the registration-records office in the Park Student Services Building.

Leases for the 1983-84 school year now available.

by John C. Savagian

The nuclear industry has begun its much anticipated advertising campaign designed to renew America’s interest in nuclear power. The Committee for Energy Awareness (CEA), a consortium of major owners of nuclear and coal-fired power plants are filling the airwaves with expensive ads which all point to the same conclusion — Solar energy is nice, but it is still a long way off. We need coal and nuclear energy now! Special two and three page ads in Newsweek and Time leave the reader with the terrifying feeling that America is being left behind in the race to build nuclear power against a nuclear disaster.

To this day, no homeowners insurance will cover against loss due to a nuclear accident, whether it happens in front of their home or down the block at the local nuclear power plant. Only the federal government has an insurance policy guarding against a nuclear accident. In 1987, Congress passed the Price-Anderson Act, but this was designed to insure the nuclear industry against any accident that damaged property or killed people. Any liability which exceeds $560 million will be footed by Uncle Sam, the company responsible is held "harmless." Considering that the Atomic Energy Commission report completed in 1964, which was done with the expectations that the earlier report was excessive, revealed a substantial increase in the official estimate of the consequences of a major accident. The estimates were 27,000 fatalities and 73,000 injuries with a price tag of $17 to $280 billion. The Price-Anderson Act does not cover even a fraction of this, nor will it provide aid to families coping with cancers twenty years hence.

The Committee on Energy Awareness position papers state that a return to a healthy economy will remove any excess energy that anti-nuclear forces argue is an indication that no new nuclear power plants should be built. France and Germany study showed a nuclear accident in which the core melted down to be in the price range of $100 million. These savings equal the combined capacity of all new plants being built or planned.

The recent bankruptcy of nuclear energy in Washington State has made it clear that overcommitment to nuclear energy will result in a "financial meltdown" for this nation. Washington State was not caught completely off-guard by their energy disaster. In place is a plan to consider all generation and non-generation alternatives. Washington State now has an accelerated energy efficiency and solar plan that has virtually ruled out any major capacity additions for the rest of this century.

On a purely economic level, nuclear energy is fast becoming, if it is not already, a multi-billion dollar boondoggle. According to utility analyst Charles Koch himself, nuclear power plants will not come close to breaking even by the time they retire. And retirement will not end the problem, since each plant must be "decommissioned," a hefty word which will mean additional billions to cope with dead but highly radioactive power plants. One should not forget the tremendous problem of radioactive waste, which the same industry is trying to bury beneath its rate payers. One more cost borne by the customer to assure the continued financial success of Westinghouse, General Electric, Exxon, and so on.

While the Committee on Energy Awareness is pounding the TV airwaves with what Wayne C. Johnson of Solar Engineering and Contracting called a "pile of propagandistic claptrap," the reaction among such groups as the Harvard Business School is to continue to break this link the nuclear industry is trying to maintain between energy increase and nuclear energy. The Safe Energy Committee is countering with ads of its own, pointing to the tremendous costs of operating and constructing new plants. Their campaign motto is "Don't get sold on Nuclear Power. We can't afford the price." They argue that equal time should be provided under the Fairness Doctrine. But the FCC has been mum on the issue.

There's big bucks involved on both sides, but nuclear industry has the economic advantage. For one, they can rely on rate increases and tax breaks. For another they have the backing of the public.

Cont. on p. 30

The nuclear industry is spending millions in a nation-wide media campaign to convince the public that nuclear power is needed if we want to see the 20th cent.

The nuclear industry is spending millions in a nation-wide media campaign to convince the public that nuclear power is needed if we want to see the 20th cent.

The nuclear industry is spending millions in a nation-wide media campaign to convince the public that nuclear power is needed if we want to see the 20th cent.

The nuclear industry is spending millions in a nation-wide media campaign to convince the public that nuclear power is needed if we want to see the 20th cent.
Starving ignorance in the midst of plenty

by Andy Savagian
As you flip through the Pointer Magazine today, you just might have noticed that the theme for this issue is "World Hunger. So what, right? I mean, we’re talking about the WORLD here, not little ol’ Stevens Point—why should I care? Now not all of us are as ignorant as that dialogue obviously suggests; most of us still remember listening to those ancient dinner table horror stories of starving children in Asia, as we silently tried to stuff the brocchol down Rover’s throat. We know there are people, many people, dying every day from lack of food. So why is this joker from the environmental section drumming the same old song into our heads? Well, it might be the same song, it’s just in a different key. Here’s no letter given, no pinpoint statistics on hunger among the masses—just a story.

However, this story does deal with the environment—you and I.

Oh boy. Here I am in my dorm room—it’s 10 o’clock. I’ve been trying for three hours to read about 200 pages for History. As I turn to page 26, I suddenly realize I’m HUNGRY. This is no ordinary craving now, I mean, I’m FAMISHED—STARV­HINTED in fact. This is terrible! What am I going to do? Where will I go? Wait, don’t panic now, remember to keep calm. I’ve decided just like Dad did back in the war. O.K., I think there’s some food in my bo­ster, I’m really not sure. This could be tough, though. I’ve got to lean back in my chair and pull hard to open that baby. Well, what do you know! Filled to the brim with food! I forgot I brought up three carloads of groceries in our Toyota this Thanksgiving break! Even so, none of this stuff is very good and I want something original because I’m DYING OF HUNGER.

Wait a minute, maybe the candy machines have something exciting! Wow, am I resourceful. Dad would be proud! However, now I’ve got to walk down two grous­ing flights of stairs to the basement to feed my face. So I trudge downstairs and guess what I find—an empty machine! This is frustrating. I guess life just doesn’t let you have any breaks.

Hey, I know—a pizza! Nah, that’s too much trouble. I’ll have to decide on which place is going to per­sonally deliver my pizzas to my doorstep, and then my roommate will try to get pick­up out of all five of them. Forget the pizza.

Now I’m really in trouble. My mind, weakened by hunger, struggles to think of a way out. I had no idea college life was filled with these life and death situations! Amazingly, I seem to remember food once said by someone very wise: “If you don’t have it, go out and get it.”

So, with no regard to my own personal health, I de­cide to risk getting my fingers icy cold and wet, yes, walk almost an entire two blocks to get to hamburger heaven, or Happy’s, as most people call it. I grab cost, hat and gloves and set out on my trek. It’s slow going as my malnutritioned body sur­renders each burdening obstacle—stairs, sidewalks, even curbs. I gradually make my way southward in search of food, trying to lo­cate a pizza place, as my destination, but all I can see are the faint glimmer of golden arches and the Big Boy sign far off in the dis­tance. Soon I’m blinded by the lights of Happy Joe’s, Red Owl, Togo’s, Margarita’s, Kentucky Fried Chick­en, Ponderosa, Pizza Hut and—wait, there it is, the or­ange glow and the smell of mass quantities of food cook­ing—Hardee’s at last!

I pay my garbage bin loaded with wasted food and stumble in. Somehow I’ve made it, and put myself on the back for my endurance. I order and finally, I eat. I’m really starving now and try to eat all that food after my long, arduous journey. As I’m gorging myself, I see that the food in my plate has come down here, too. Somehow, he sees me waving over the heaps of hamburgers, french fries and Pepsi’s that surround me, and he comes over.

“When did you get down here?” he asks.

“About five minutes ago. I got bored in the room and I was hungry, so I just cruised down here and got something. What’s your order yet?”

“No,” he says.

“Here, have the rest. I can’t finish this—I’m stuffed.”

Wigeons on water a winner

Fifty years of federal waterfowl conservation will be celebrated next year as a pair of American wigeons on the water by Alabama artist William C. Morris graces the 1984-85 Federal Migratory Bird Hunting and Conservation Stamp, popularly known as the “Duck Stamp.”

Morris, 38, of Mobile, Ala­bama, captured the presti­gious honor in national compe­tition at the Interior Depart­ment in Washington, D.C., where his watercolor design won over 1,581 other entries in judging on November 8 and 9. It was the first time that Morris had ever entered the federal contest.

His design will be repro­duced on next year’s 50th “golden anniversary” Mi­gratory Bird Hunting and Con­servation Stamp, which must be purchased by all waterfowl hunters 16 years of age and older in the United States. Nearly two million of the colorful stamps are sold each year to hunters, stamp collectors, and a growing number of non-hunters who want to con­tribute to the nation’s wild­life conservation effort.

The design for each year’s “Duck Stamp” is selected through an art contest—the federal government’s only regularly sponsored art com­petition. Revenue from the sale of the “Duck Stamp” is used to buy vital wetland habitat under a program administered by the U.S. Fish and Wildlife Service since 1934.

Morris’ achievement fol­lows his win in the 1984 Ala­bama State waterfowl stamp competition held earlier this year.

“I’ve won? I don’t know what to say! What a delight­ful Christmas this will be! This is unbelievable!” Morris said when he was telephoned by G. Ray Arnett, Assistant Secretary of the Interior for Fish and Wildlife and Parks, and informed of his first­place finish.

A Mobile native, Morris has had no formal art train­ing except for a few weeks of in-studio instruction. “They wanted to make noth­ing different than what I am and tell me what to paint. I wanted to paint wild­life, so I left,” he said.

Rome development

The Town of Rome in Adams County is planning development of a five-acre parcel of land presently known as Lyon Park, Tom Grygo, Community Services Specialist, an­nounced.

The development total cost is $40,178 and would be cost shared on a 50-50 basis with the Town of Rome and LAW­CON funding administered by the DNR. Included in the plans are the development of picnic facilities, twing lots, shelter and storage and concession facilities, a tot lot, playground equipment, picnic tables and grills.

The DNR has made a pre­liminary determination that an Environmental Impact Statement is not required for this action under the National Environ­mental Policy Act.

Pelican power

The eastern brown pelican has recovered from the for­mer devastating effects of DDT and so well that it may be taken off the endangered species list, G. Ray Arnett, Interior De­partment—Assistant Secre­tary for Fish and Wildlife and Parks has announced.

“The recovery of the eastern brown pelican is a very good news,” Arnett said. “This is the ultimate goal of conservation efforts on behalf of endangered spe­cies—to bring them back to a healthy status.”

The U.S. Fish and Wildlife Service has proposed remov­ing the brown pelican from the endangered species list in Alabama, Florida, Geor­gia, South Carolina, North Carolina, and elsewhere along the east coast. The proposal was published in the No­vember 10, 1983, Federal Register, does not affect brown pelicans in Missis­ipi, Louisiana, Texas, Califor­nia, Mexico, Central and South America, the Caribbean, and the East Indies, where the birds are still considered endangered.

If she's a member of Army ROTC, that's a real compliment. Because she knows that ROTC offers the same opportunities for young women as it does men.

In ROTC, she'll have the chance to develop leadership skills and earn money at the same time. After graduation, she'll become an officer in the Army, where she'll get the kind of experience employers value.

If your girlfriend wears Army boots, she has a head start on an exciting career after college.

For more information, contact your Professor of Military Science.

supervision of Stuart Whipple, Alcohol Education Coordinator for the university.

The program, created by students seeking a need for peer intervention for incapacitated individuals, has grown since the school year started. SRT members came early to start training. First aid, Alcohol Education Coordinator, Stuart Whipple, is one of the lecturers. The training has become quite extensive. Before the training, students were not familiar with the signs and steps to take in the case of incapacitation along with review of previous material. A test was given at the end of training to ensure a qualified staff. Our group plans to become a more proactive force in the future, presenting programs on a hall and eventually campus-wide basis.

Your knowledge of our group and its purpose will greatly help in the success of our program. With your support and respect of our capabilities and judgment, mutual effort can be placed upon to ensure safety and care for individuals who have problems with alcohol. If further knowledge is needed, please feel free to contact Tom Gritton at 346-2897, or Coryn Kaercher at 346-2925.
END OF THE YEAR BASH!

U.A.B. CONTEMPORARY ENTERTAINMENT PRESENTS ITS SEMI-ANNUAL PRE-REGISTRATION DAY DANCE WITH THE R & B CADETS!

DATE: THIS MONDAY, DEC. 5TH
TIME: 9:00 P.M.
