Sexuality

Volume 26, No. 20
February 10, 1983
What do communists, collegians, and major league parties all have in common? All three pledge allegiance to the same taxonomy of frivolous pastimes—the mighty three: Sex, drugs, and rock 'n' roll. Perhaps you're among that wholesome minority of college-aged students who maintain little interest in any of these ephemeral pursuits. There's certainly nothing wrong with that—meditation to Haydn's Surprise Symphony can be every bit as stimulating. But please try not to pass judgment on those Pointer Magazine patrons who live for their personal satisfactions, whose very existences are in some way given meaning by combining elements of the mighty three.

To this breed of refreshing social revelers, we dedicate the Pointer Mag Trilogy—a brief look at Sex, Drugs and Drink, and Rock 'n' Roll.

Michael Daehn

Future hope in Brother's passing

Sunday is Brother James Miller Day across the state as officially proclaimed by Governor Anthony Earl. In honor of this day events will be held here on campus to which the public is invited to attend. I hope you will attend them because James Alfred Miller was an outstanding man of peace who devoted almost a third of his life to improving life for some of the poorest people on earth, the poor of Central America.

Brother James Miller was a Christian Brother who grew up in the Guatemalan area, eight miles east of Stevens Point. He spent eight years in Nicaragua and one in Guatemala as a missionary working with the extremely poor, resourceless rural people until he was gunned down on February 13, 1982, while working at the Casa Indigena De LaSalle near Huehuetenango, Guatemala.

A tireless and most ambitious worker, Brother Miller designed and constructed buildings, organized a fire department and a soccer team, administered schools and taught classes. At the time of his murder he was a teacher at De LaSalle High School and assistant director of the De LaSalle Indian House and farm of Huehuetenango. These positions involved the care and education of some 150 Guatemalan Indians of the Guatemala Highlands who were in training to be teachers in the rural areas of Guatemala.

Brother Miller provided hope and confidence for hundreds of people. While in Nicaragua and Guatemala he regularly had to press those military governments in each country for freedom of opportunity for himself and his people. The Mayan Indians of Guatemala, who Brother Miller worked with and who make up 56 percent of the population, are disregarded as inferior things by the Guatemalan government. Working with the Indians and defending their human rights in war-torn Guatemala precisely led to his murder.

Two days prior to his murder, the Guatemalan government forced one of Brother Miller's students into the army. As a regular way of meeting conscription quotas the Guatemalan army rounds up Indian boys. Students are by law exempt from such proceedings unless they are Indian. Release by the army of one of Miller's students usually required a visit by one of the brothers from Casa Indigena. However, one of the brothers, not Brother Miller, was unusually turned down by the army on February 11, 1982.

Two days later four persons in masks and army uniforms fired seven bullets into Brother Miller while he was plastering a wall at 4:15 in the afternoon. He was killed instantly. In the Jesuit journal America of October 30, 1982, Donald E. Tower wrote: "The murder of Brother Miller was probably meant as a warning to the brothers at the Casa Indigena to cease interfering in governmental affairs."

Progress for the vast majority of humans in Guatemala, particularly the Indians, ended in 1984 when the United States C.I.A. helped overthrow the government of Jacobo Arbenz Guzman. President Arbenz had expropriated unencultivated portions of huge United Fruit Brand Company plantations. He sought to redistribute the land to the landless poor.

Decades of U.S. support for the Guatemalan regime was discontinued in 1978 by President Carter because of human rights violations. Recently, however, U.S. support revived itself once again. Human Nairns wrote in the October 21 Washington Post that a U.S. military advisor was stationed in Guatemala in violation of the suspension of U.S. aid to Guatemala. One senior House of Representatives staff member called it a "massive violation of the law." Following that obvious disregard for the law, the Reagan administration declared that Guatemala had become one of the Improvers. Guatemala was judged to have reduced but not halted gross human rights violations. To reward the murderous government of Rios Montt, President Reagan awarded Guatemala $4 million in military aid, mostly in "spare helicopter parts."

These innocuous spare helicopter parts will be used to revitalize the fleet of 15 to 20 U.S.-made Bell Jet Ranger and Huey helicopters. Civilian models of these copters they may be, Congressional restrictions prevented otherwise, they have been equipped with "heavy machine guns," according to Nairns, and "are frequently used to strafe rural villages."

The Green Beret Captain illegally at work in Guatemala providing training in
Room, board and fees to rise 4.4 percent

Students will pay more for room, board and fees during the next academic year at UWSP, but the increase is expected to be half of the additional amount levied in 1982.

The rate hike of 4.4 percent would go into effect next fall, providing it is approved by the UW System staff and the board of regents. Last fall, the cost went up 8.4 percent.

Chancellor Philip Marshfield announced the planned charges Wednesday when he addressed the UWSP Faculty Senate.

Officials at campuses throughout the UW System recommended charges that will be imposed at their institutions for living expenses, and the amount varies from place to place. But the UW System Board of Regents, with approval from the Legislature, determines the tuition charges which are standard.

Charges in tuition usually are determined at summer meetings of the regents.

Oliver (Bud) Steiner, executive director of student life administration, said that under the present plan, a typical student who is enrolled on a full-time basis, lives in a double room in a campus residence hall and has a 20-meal-per-week ticket will pay $1,142.90 for a four-month semester. Besides room and board, that amount covers student activity fees, University Center fees, and the the bulk of academic fees.

Current tuition and all fees excluding room and board (paid by all full-time students) amounts to $534.65 per semester. Room and board for the semester is $610.45.

Steiner said the food charge at UWSP (largest part of the semester non-academic fee package) is a little higher here than at most—but not all—UW campuses because of a local student decision to have a "wellness menu."

There are more fruits, vegetables, salads and whole grain baked goods and nuts served here than elsewhere. The menu was offered on an experimental basis several years ago, and the students voted to continue it with a small additional charge.

Steiner said the health fees here also are above average because of extensive preventative medicine activities related to physical fitness, nutrition, non-smoking, assessments of present lifestyles and alcohol education.

The executive director said the university consistently receives recognition for the quality of its "auxiliary operations" and several years ago housing staff members at campuses across the country rated the residence hall program at UWSP number one in the country.

"Our whole level of programming is higher here than anywhere in our system," he added. He lauded student government officers for their role in the manner in which the student activity fees are expended. All of the decisions on allocations of that pool of money, he added, rest with students and not with administrators.

Guest speaker at Freedom Conference

Judith Guest, author of "Ordinary People," will be one of the speakers for the Pennsylvania Intellectual Freedom Coalition Conference, Friday and Saturday, Feb. 26-28, at the Wisconsin Center, 700 Langdon St., Madison.

Professor Lee Burress, president of the college and member of the English faculty at UWSP, has announced the schedule for the meeting. Registration is available through the Madison Reader, 432 N. Lake St., Madison. Further information may be obtained through Dr. Robert Arnold, UW-Extension Communication Programs, 610 Langdon St., Madison.

Burress says conference subjects will include the rights of children, the rights of parents and the rights of teachers. Professor Neil Postman of New York University will discuss the effects of communication, particularly television, on society.

Professor Franklin Haiman of Northwestern University will give a keynote address about government control of information. Other speakers will include classroom teachers, school board members and librarians.

The coalition was formed to involve local groups in the protection and support of the rights given by the First Amendment of the Constitution. The conference is open to members, nonmembers and full-time students.

Sponsors include the Coalition and UW Extension, in cooperation with The Association of University of Wisconsin Faculties, the Wisconsin Association of School Board Administrators, the Wisconsin Council of Teachers of English, The Wisconsin Education Association, The Wisconsin Library Association, the Wisconsin Association of School Board Administrators, the Wisconsin School Boards Association, and the Wisconsin State Education Association.

The recently released Skimney Report found a season's-high rate of frigidity among UWSP students.

BLACK HISTORY WEEK—
On Sunday we start ‘Living in Harmony’

"Living in Harmony," Black History Week 1983 will be a social, educational and cultural sharing experience. The Black Student Coalition extends an invitation to UWSP students and the Stevens Point community to participate in the activities of the week of February 13 through 19.

"Living in Harmony" is a celebration of Black achievement, and a statement of belief in the strength of working together. Black is White, in harmony and accord.

The schedule for Black History Week is as follows:

Sunday, February 13, 6:00 p.m. Heritage Room—Student Center. Reception and Introduction to Black History Week. The program will highlight the events of the week, including a display of art from the African Art exhibition showing at the Edna Carleton Gallery, in conjunction with the presentation to be given Thursday evening by Roslyn Walker, Curator of Research, at the National Museum of African Art, Smithsonian Institution.

Monday, February 14, 7:00 p.m. Wisconsin Room—Student Center. Robert L. Carter Jr., Ph.D. director of Educational Development Program, Associated Colleges of the Midwest, has been in Equal Educational Opportunity since 1965. He has held the directorship of the Educational Development Program since 1973, supervising the pilot project located at Beloit College, Beloit, Wisconsin. He also administers the programs of the ten colleges of the Associated Colleges of the Midwest. Dr. Carter is a member of the book, Systematic Thinking Curriculum, a program of instruction for disadvantaged students.

Tuesday, February 15, 7:00 p.m. Wisconsin Room—Student Center. Arnold L. Mitchell, Ph.D. Director, Educational Opportunity Program, University of Wisconsin, and Executive Director of the National Council of Educational Opportunity Associations. Arnold Mitchell has been director of the Educational Opportunity Program at Marquette since 1969. His program has been recognized nationally, and regarded as a model for other schools. Dr. Mitchell is one of the founding fathers of the National Council of Educational Opportunity Associations, an organization established to advance educational opportunity within the academic community and as a political force to influence the direction of programs and insure continued funding.

Wednesday, February 16, 7:00 p.m. Room 101 Collins Classroom Center. Gary R. George, State Senator. Gary George was elected to the 6th Senate District in 1980. He is a member of the Joint Committee on Finance, and Chairman of the Joint Committee on Audit. He is an attorney, member of the State Bar and the Milwaukee Urban League.

Thursday, February 17, 7:00 p.m. Michelle Hall, Fine Arts. Roslyn Walker, Curator of Research, National Museum of African Art, Smithsonian Institution. Roslyn Walker’s fieldwork in Nigeria for her Ph.D. in African Art forms the basis for her lecture entitled "The Royal Arts of Black Africa."

The presentation will also include films: "A Great Tree Has Fallen," the documentation of an 8-day burial of the King of the Ashanti of Ghana, and "Benin Kingdom," about the Kings of the Oba people.

Friday, February 18, 7:00 p.m. Wisconsin Room—Student Center. The Black Student Coalition presents "A Fashion Extravaganza."

Saturday, February 19, 8:00 p.m. Wisconsin Room. Dance. What better way to celebrate "Living in Harmony?"
To Pointer Magazine,

Perhaps this will seem like a trivial matter, but sometimes small deeds reflect important issues.

I feel frustrated when, as a member of a campus organization, someone takes down posters I have put up to publicize an event. I do not refer to posters inappropriately hung without approval, nor to posters hung on reserved bulletin boards or other restricted places, as this may happen from time to time, depending upon the experience of other posters in our group. Also, I do not refer to outdated posters, nor to non-event posters on overcrowded bulletin boards.

I refer to approved event posters hung on open boards, most of which had ample room for other posters. For example, someone took down our posters in the music department of the Fine Arts Building. The music department has very many large, sparsely used bulletin boards. Ours was the only group so discriminated against that I could determine. Only a day and a half after I had hung them, someone had pulled them down, while other posters that had hung there all week remained, and some of those were outdated. This has happened here and elsewhere this year, and over a period of several years, especially in the Fine Arts Building, Collins Classroom Center, the University Center, and less often in the Science Building.

Often our posters are down within a day of putting them up. Occasionally, they have been torn down literally as fast as I or others could hang them up, so that by the time one of us had finished Collins, for example, someone managed to yank half of them. Whoever is doing this continues to avoid face to face accountability for their actions.

Who does this and whether or not the same few people or group of people "perpetrate" these petty "raids" is irrelevant (though curious!), but someone shows significantly little regard for the First Amendment rights; specifically freedom of speech, assembly, press, and religion.

In other words, this small act of discrimination violates our right to express ourselves and to publicize our events through the poster medium. In doing this, someone has also interfered in our freedom to assemble. And since we represent a spiritual path, they have even tread upon our freedom of religion.

Perhaps these people would consider amending the Constitution to eliminate such freedoms? Or perhaps they could find or establish another country in which to nurture their totalitarian inclinations? Exaggerations aside, pulling down our posters does seem to be an inappropriate and inconceivable way to express religious preference.

What was the event? The ECKANKAR Campus Society sponsored a concert of contemporary, jazz, light classical, and even opera music entitled "Musical Adventures in the Creative Arts." Because of torn down posters and a lack of space in Pointer Magazine, some people probably never got a chance to decide whether to go or not.

All the more frustrating, ECKANKAR cherishes the principles of religious freedom and independent eclecticism. As an Eckist I believe in the ancient adage, "Truth is one, call it by various names." - Steve Leathy

Terrible Ts

To Pointer Magazine,

Last Friday you may have noticed a booth in the UC Concourse by the Arctic West. The men's intramural Rugby team sponsors the event yearly. The members have chosen to sell T-shirts as a method of making money for the Rugby team and for Arctic West's Annual Fund.

The T-shirts are, however, disturbing to say the least. The graphics on the shirts is degrading towards women. It reflects a direct attack on the ability of women to be equal humans. In addition, the T-shirts' graphics have no connection of any sort to Rugby.

Naively, I had thought, whenever was responsible would be reprimanded. After a brief discussion with one of the officers, I was disappointed. I learned that the point to marketing these distasteful and disgusting items is to make money. This, all at the expense of an entire sex. There was a rational intent in selling these shirts. This is not a joke. And it is clear how the perpetrators of this act feel about women.

Obviously nothing can be done to force the men who are involved in this scheme out of business. And we do not advocate unenforceable rules for our community. Our rights to be able to express freely should be upheld with the highest regard. In light of this act, it is difficult to focus on this.

As a counter move, we encourage all parties offended by the team's T-shirts to voice their complaints to the adviser of the club and to SGA. We encourage student government to take a hard look at this situation. It is our impression that this is not the first incident in which the team has acted inappropriately. These facts should be made public and considered. Some kind of action for this blatant distasteful act needs to be taken.

Finally, and most critically, we strongly urge the men's Rugby team to seriously reflect on how they view and treat the female sex for a profit.

Lynn McLetch, Women's Resource Center

Rebecca Prisk, Women's Affairs, UWSP student gov't.
Lisa Johnson, GPUR Rep. on Minority Affairs, UWSP student gov't.

You don't say

To Pointer Magazine,

Your article on dress code requirements in your February 3, 1983, issue attributes me as a person which I did not make. If I am to be quoted, I prefer to be quoted accurately.

What I told your reporter was that I had not been able to find anything that was specifically related to dress code, but that in two of the three cases which I had found which dealt with regulation of length of hair, a very similar circumstance, two federal courts had found that an attempt to control or regulate hair length, unless the regulation pertained to length of hair, a very similar circumstance, two federal courts had found that an attempt to control or regulate hair length, unless the regulation pertained to health or safety code (as for a food worker) was unconstitutional and violated the 14th Amendment. I also pointed out that in the third case, regarding two federal district court had upheld the regulation.

Further, the comment about a dress code being enforceable was conveyed by you to your reporter from the Office of Legal Counsel. I explained to your reporter that any student whose grade was lowered as a result of a dress code could probably challenge that grade quite easily, and, according to System Legal Counsel, at that point the code would undoubtedly be held to be unenforceable.

Escort Service needs volunteers

By Joseph Vanden Plas
Senior News Editor

The Escort Service is looking for a few good people.

That message comes from Escort Services director Lisa Herwald, who is finding it difficult to recruit volunteers for escort duty this semester.

The service provides volunteers to escort women home between the hours of 5 p.m. and 2 a.m. This year, Herwald has had to scramble to locate volunteers. On Monday of this week, only one of the 14 people needed to serve each week had volunteered (two volunteers are needed each day). For the week of February 13-20, only two people had volunteered. For the week of February 21-27, there is yet another volunteer problem.

This situation is new to Herwald, who had no difficulty recruiting volunteers during the fall semester. “I feared we would fill the schedule one month in advance,” she reflected.

Herwald and other existing volunteers rely on various methods to recruit volunteers who have served in the past and those who have actually served. She said some have either graduated or transferred, and the majority of them have told her they have no time to serve this semester. “People are either taking new jobs or more credits, so basically, the problem is the time limitation. Volunteering for one night each month seems to be too much for people. Many others say they will not be able to do it as often,” said Herwald.

With many previous volunteers suddenly unreliable, Herwald is turning to the dormitories for help. “With the loss of escort duties, that is the main way to recruit volunteers,” she explained. Herwald has been making her pitch to male dorms and so far the response has been lukewarm. “Pray-Sims was receptive. They were polite, they asked questions and seemed interested, and one person from Kuntzen applied. The dorms I have had the most escorts from are Pray-Sims, Thompson and South,” she related.

Only six people have applied for escort duty this semester. According to Herwald, applying for escort duty entails a trip to the Women’s Resource Center, located in room 10 in the lower level of Nelson Hall. Applications are filled out and returned to Herwald here. She then schedules an interview with each applicant to discuss the problems they can expect to face, their attitude toward the Escort Service and her own screening process,” she says.

Following the interview, Herwald contacts the accepted applicants to confirm their availability.

Herwald said that if she continues to have difficulty recruiting volunteers, she may have to reduce the number of escorts who serve each night, or even, if it is a man, she lamented. “In the past we’ve either tried to have a man and a woman or two women serving because it’s less intimidating for a woman.”

Potential volunteers need not be concerned about lengthy time commitments, she said. “I can’t find enough volunteers, I may have to find one escort each night, even if it is a man,” she said. “I’m spending all of my time recruiting volunteers, I may have to find one escort each night, even if it is a man,” she added.

Potential volunteers need not be concerned about lengthy time commitments, she said. “I can’t find enough volunteers, I may have to find one escort each night, even if it is a man,” she added. “I’m spending all of my time recruiting volunteers, I may have to find one escort each night, even if it is a man,” she added. “I’m spending all of my time recruiting volunteers, I may have to find one escort each night, even if it is a man,” she added. “I’m spending all of my time recruiting volunteers, I may have to find one escort each night, even if it is a man,” she added. “I’m spending all of my time recruiting volunteers, I may have to find one escort each night, even if it is a man,” she added. “I’m spending all of my time recruiting volunteers, I may have to find one escort each night, even if it is a man,” she added.

One last problem that concerns Herwald is encouraging people to use the Escort Service. She feels that some people don’t want to use the service because they think they are intruding on the escort’s personal time.

“There is no reason to feel uncomfortable about using the Escort Service because it is there to serve the public. I am concerned about people not using the service because they don’t know that it serves off-campus residents within a mile radius of the campus.”

Another reason people don’t use the service, according to Herwald, is that they don’t know how to get the escorts to arrive. “They (escorts) have to arrange their schedules around work or school and bring her home without the service of a university vehicle.” Although university vehicles have to travel a minimum of 50 miles each day, Herwald hopes the Escort Service will soon have access to one. “A university vehicle would be helpful in providing people with transportation to and from class.”

Despite the lack of a university vehicle and the fact that the service is not put to full use, Herwald’s main problem is recruiting personnel. She warned that if more volunteers aren’t recruited, she cannot continue to be underutilized.

“It’s (present situation) going to remain right where it is, I’m not expanding. We have to make the Escort Service more efficient in all aspects,” she said. “We have to start making progress. The Escort Service has served a lot of people in the past but it has the potential to serve many more.”

Pre-trial motions delay suspect’s court schedule

By Chris Celichowski
Fowler News Editor

Pre-trial motions have delayed the trial of a man accused of battering two Nigerian students outside the Outer Limits Nightclub last July.

Paul J. Wolajlewicz, 23, will go to trial March 22. He is charged with being party to the aggravated battery of Anthony G. Isua and Olufunso Adeshina. Isua forced his way into a rear alley andolla bar while Adeshina suffered an eye injury in the beatings.

Since early December, several hearings have been held in Portage County Circuit Court to determine the admissibility of a statement Wojtalewicz made to Stevens Polite.

Wojtalewicz testified that his probation officer, Robert Holter, had told him that he would have to make a statement to authorities prior to being released from jail. Holter maintains he advised his client to make a statement only to refute other inculminating statements given to police implicating his client.

Defense attorney James Babitch argued Wojtalewicz made the statement solely based on Holter’s ambiguous suggestion. In addition, an official from the state public defender’s office and Holter’s actions gave Wojtalewicz the illusion his statement would be protected by the same confidentiality as other attorney-client communication.

District Attorney John Osgina countered the motion, noting the defendant was read his Miranda rights, police questioned him and, therefore, any subsequent statements should be admissible.

The Miranda rights give a suspect the right to remain silent and be notified that any statements made to police may be used against him in court. In addition, they established the constitutional right to court-appointed counsel in the event a defendant cannot secure counsel because of indigency or other circumstances.

Circuit Court Judge Fred Fleischauer gave Osgina 10 days to file briefs in the matter after which Babitch was given 10 days to respond to Osgina’s briefs.

On January 29, Fleischauer extended the schedule for filing the briefs to ten days because court transcripts of three previous hearings is not efficient as it could be. Right now, running the Escort Service is too big of a job to be handled by one person. I want someone to handle the public relations end of the job. She mentioned that a director of the Escort Services would be a paid position but that she is trying to arrange that the Escort Services is underutilized.

Another problem that confronts Herwald is encouraging people to use the Escort Service. She feels that some people don’t use the service because they think they are intruding on the escort’s personal time.

Wojtalewicz, party to the original complaint, was underutilized. Another reason people don’t use the service, according to Herwald, is that they don’t know how to get the escorts to arrive. "They (escorts) have to arrange their schedules around work or school and bring her home without the service of a university vehicle." Although university vehicles have to travel a minimum of 50 miles each day, Herwald hopes the Escort Service will soon have access to one. "A university vehicle would be helpful in providing people with transportation to and from class." Although university vehicles have to travel a minimum of 50 miles each day, Herwald hopes the Escort Service will soon have access to one. "A university vehicle would be helpful in providing people with transportation to and from class."
Campus patrol officers take to the streets

By Wayne Fook
Pointer News Writer

A campus foot patrol that will help to prevent crimes on campus will go into operation today, says Prof. Kirk Beattie of the environmental law department (CNR). The patrol replaces the Reserve, used for informing campus security personnel of any crimes they might witness on campus.

Beattie says that thirty students have been recruited for the Reserve. Some of the students are receiving financial benefits through the Work-Study Program, while the rest are volunteers. Each student has to put in a minimum of four hours a week. The students on the Work-Study Program probably will have to put in more hours, depending on the amount of aid they are receiving, says Beattie.

One of the requirements for becoming a member of the foot patrol is being a declared environmental law minor. Beattie says it is possible that in the future, internships could be offered to students involved with the foot patrol. Students could then gain credits while working in the patrol. He says that because the program is new, it would probably take at least a year to see if the program is successful.

The patrol will be on duty from 8:00 p.m. to 2:00 a.m. every day. They will be responsible for five sectors of the campus: one section consisting of the residence halls in the Debot Center area; another in the Allen Center area; another in the five academic buildings (Science Bldg., COPS, CNR, COFA); another in the Schmeerke Reserve area; and one in the Old Main, UC, SSC, Deball Hall area. In each sector, there will be two separate patrols working on a rotation basis. Each patrol will have to work on a maximum four-hour shift for a night.

The patrol will be equipped with portable two-way radios which will enable them to communicate with campus security. They will be responsible for five sectors of the campus: one section consisting of the residence halls in the Debot Center area; another in the Allen Center area; another in the five academic buildings (Science Bldg., COPS, CNR, COFA); another in the Schmeerke Reserve area; and one in the Old Main, UC, SSC, Deball Hall area.

Elections moved back

By Lisa Penney
Pointer News Writer

In the future, student running for Senate seats will have one big advantage: elections will be held in April instead of September. This decision was finalized at Student Government's weekly meeting Sunday.

Student senator Eric Erdmann of the College of Letters and Science proposed an amendment to the constitution stating that senatorial elections be held the first week in April with the presidential elections. A roll call vote was requested, and the amendments was passed into law by a vote of 24 to 1.

According to Erdmann, April elections will give students more time to campaign. Under the old constitution, students had only two days at the most to campaign. With the amended constitution, students now have up to two weeks to campaign.

SGA expects a larger voter turnout because presidential elections will be held together. SGA hopes this will get students more involved in senatorial elections which hasn't been the case in the past.

It is hoped that student senators who are elected in April will be acquainted with SGA procedures by the time they take their seats in December. The training period from April thru August will give them more time to get involved, they will always have a trained staff operating.

Elections in April will also give the executive board time to make appointments during summer months.

Student Lobby Day set for Feb. 16

By Tracy R. Mosley
and Jean Prash
Special to
Pointer Magazine

The goal of the Student Government Association's Academic Affairs Committee is to circulate petitions around campus for students to sign if they are concerned with changing the tuition ratio. The University System has maintained a 75 percent-25 percent tuition ratio. The thinking is that the State supports the University by funding 75 percent of each student's tuition and the student pays the remaining 25 percent. But recently the state Legislature has increased the State's requirement to 27.3 percent and now the Board of Regents has also increased the requirement to 32.4 percent. If the student is paying 75 percent-25 percent, then the student is paying 101 percent of the cost of education and the State is paying 99 percent. The State does not pay the difference and the student pays twice what the State has paid.

"EQUAL OPPORTUNITY EMPLOYER"
Government's foot stuck in the family's door

By Mary Ringstad

The Reagan administration recently announced that, beginning Feb. 23, clinics receiving federal funds that give birth control pills or other prescription contraceptives to an unmarried minor must notify the parents within ten working days. 

Richard Schweiker, secretary of health and human services, claimed, "We've built a Berlin Wall between the kid and the parents." He contended that the new bureaucratic ruling would strike a balance between the need for the service and the need to strengthen the parental role. More than 600,000 girls under 18 obtain contraceptives at federally supported clinics each year. The new ruling may be responsive to the recent charges that the government promotes illicit sex.

After hearing the announcement, Planned Parenthood Federation, the American Civil Liberties Union, New York State, and other groups quickly took the issue to court. The coalition hopes that a federal judge will delay the imposition of the rule while issues are debated. The opposing groups claim that the rule threatens an invasion of privacy, violating both the U.S. Constitution and a 1981 law funding such clinics.

According to Mary Patoka, counselor at the Stevens Point Family Planning Clinic, the proposed rule would not enhance teen-parent communications. Half of the adolescents that seek help at the local clinic are afraid to involve their parents for a variety of reasons; she stressed. As a result, Patoka believes that teenagers will not come to Family Planning if there is obligatory parental notification. She has already observed a slight decrease in program participation due to the "sequeal" ruling has had in the news. Availability of contraceptives does not promote sexual promiscuity, said Patoka. Almost all of the teenagers who come to the clinic have already had intercourse.

Wattleton, president of Planned Parenthood, said that in 1980, 25 percent of the adolescents surveyed indicated they would stop requesting contraceptives if their parents were notified. Only 2 percent said they would stop their sexual activity.

Wattleton predicts that the result of the "sequeal" rule will be more teenage pregnancies estimated at 203,000 annually) and more children born to unmarried adolescents (130,000 annually).

When the rule was proposed last year, the administration was open to public opinion and comment. Cont. on p. 12

GPU: Campus gays bind in support

By Michael Daehn

The three most maligned letters of the campus alphabet are probably GPU.

It doesn't seem possible that two Berlin Wall between the kid and the parents." Private eyes, they're watching you

By Chris Celichowski

In a case that many consider affirmation of a constitutional right to privacy, Griswold v. Connecticut, Justice William O. Douglas rejected a state law banning contraceptives.

"Would we allow the police to enter the sacred precincts of marital bedrooms for telltale signs of the use of contraceptives?"

In many states, including Wisconsin, the sex lives of unmarried, consenting adults have no such privacy protection. Following established Judeo-Christian moral morality, states have sought to impose that morality on all members of its population.

Wisconsin currently has statutes making fornication, sex between two unmarried adults, and adultery illegal. Wisconsin statute states, "Whoever has sexual intercourse with a person not his spouse may be fined not more than $200 or imprisoned not more than six months or both."

In addition, the state, like many others, has statutes forbidding oral sex under any circumstances and forbidding married couples to the use of the missionary (man on top) position only.

Although I cannot expound on the morality or immorality of these statutes, the fact remains that they are virtually enforceable. When they are enforced, it is usually part of a police harassment campaign.

Wisconsin's law enforcement community, however, has even shown a reluctance to enforce the laws. Sixty-three percent of Wisconsin's district attorney's favored repealing cohabitation laws.

When a bill that would have legalized private, non-commercial sex acts between consenting adults came before the state assembly last year, it was defeated 60-49. Proponents of the act cited the right to privacy for consenting adults. Its opponents feared it would result in an increase in abortion, illegitimate births, and divorce.

The prospects for a renewed effort to pass the consenting adults bill remain unclear, especially with an expected heated battle over the next state budget and its effort to reduce the deficit.

If all other methods fail, perhaps the governor will consider enforcement of these obscure statutes as a means to reduce the deficit. If strictly enforced, Wisconsin could end up with a budget surplus.

So what exactly is this lifestyle that sends emotions soaring in the proponents and oppostents? As defined by the National Gay Task Force (NGTF) the term used to describe feelings of love, emotional attachment or sexual attraction toward people of one's own gender. According Cont. on p. 18.
Gay rights ramped up on state’s law books

By Laura Sternewold

Ohio State University (OSU) and WSPN Sports Editor

In 1965, the U.S. Congress amended the Civil Rights Act to include sexual orientation in the nondiscrimination provisions of Title VI of the act, which prohibits discrimination in the provision of any federal assistance. This amended law was the first time the term “sexual orientation” appeared in federal law. Despite this legal precedent, many states have failed to pass their own nondiscrimination laws, leaving many LGBTQ+ individuals vulnerable to discrimination in housing, employment, and public accommodations.

In 2013, the U.S. Supreme Court ruled in Windsor v. United States that the Federal Defense of Marriage Act (DOMA) was unconstitutional, effectively granting same-sex couples the right to marry. This decision paved the way for the legalization of same-sex marriage in several states. However, the issue of protections for LGBTQ+ individuals continues to be a significant concern.

The LGBTQ+ community continues to advocate for equal rights and protections, and many states have taken steps to address discrimination. However, the fight for equality is far from over, and the LGBTQ+ community remains committed to fighting for their rights and freedoms.
WIDE, WIDE, WONDERFUL WORLD OF SEX

By Bob Ham

Over the past twelve months or so, many fantastic, shocking, and yes, even repulsive developments in the field of human sexuality have taken place. As college students, you’ve all been too busy trying to get laid to take note of any of them, so good old Uncle Bob, that imprudent purveyor of prurience, is going to fill you in on all the juicy news you’ve been missing. Just read through this article and you’ll be in the know — and I think you all know what I mean by “know.” (If not, forget it and leave me alone.)

Amaze your friends! Embarrass your professors! Impress your dates with the latest easy-to-figure-out prose and nutty drawings — all you have to do is open the paper, dim the lights, lie back and enjoy it.

FEBRUARY, 1983 — The longest-running war in American history, The Sexual Revolution, officially comes to an end when both sides meet and agree to terminate hostilities. Fighting breaks out again a mere seven minutes after the signing of the pact, when a member of the male negotiating team asks one of his female counterparts for, “A lasting piece.”

NOVEMBER, 1982 — the city of Loonberg, Virginia, becomes the first in the nation to create an Anti-Clitoris Law. All forms of sexual satisfaction will carry stiff fines, and anyone suspected of having a climax will be asked to leave town until they’re under control. Several conservative congressmen hail the new law as, “Really neat,” and “A step in the Extreme Right direction.”

JANUARY, 1983 — UWSP Professor Donald Poontoon requires students in his Sex Education 453 class to conform to a dress code he thought up all by his little old self. Under the code, women are required to wear powder-blue or pink peekaboo nighties, bikini panties, and matching toenail polish, and men must dress in white boxer shorts with red hearts, and black stretch socks. Poontoon defends his code, saying it will give students the sense and feel of being typically unimaginative middle-class sex partners, and adds that, if students refuse to honor the code, he’ll stand on his head in front of the class, and strike himself repeatedly with a leather riding crop. When a UWSP administrator points out that dress codes have been found unconstitutional, Poontoon replies, “You know, if everyone would just look, act, walk, talk, and dress, and think the same way, we wouldn’t need a constitution.”

FEBRUARY, 1983 — Doodleday Books, Inc. announces publication of The H Spot (and 147 Other Ergenous Zones You’ll Never Be Able to Locate), the self-help book You Can Be Your Own Best Lover, and Oraldeal, former porn starlet Linda Loevelips’ revised autobiography.

SEPTEMBER, 1982 — Rubadubdub Products introduces the world’s first reggae sex toy, The Rastaman Vibrator. Enraged activists protest sales of the device in underdeveloped Third World countries where there are no “D” batteries.

JULY, 1982 — Physicians at the Holdamayo Clinic in Dorchester, Minnesota begin treating hundreds of cases of a puzzling new sexually related neurosis, which seems to affect only men. The affliction is marked by a feeling the men have that, no matter what they’re doing during sex, it’s wrong. After isolating the cause of the disease, the physicians named it neo-acrophobia — fear of The Hite Reports.

ÖCTOBER, 1982 — The producers of a controversial all-puppet X-rated film are forced to remove the “star” character from their production when a well-known puppeteer threatens to sue. One of the heartbroken producers is heard to say, “I just don’t know how we’re going to be able to continue without The Nookie Monster.”

JUNE, 1982 — Doctors at the world famous Retrouise Institute of Sexual Study in Paris discover the nasal orgasm — but nobody wants to have one.

MARCH, 1982 — John W. Petty, Superintendent of Schools in Deleter, Ohio, demands that all dictionaries be removed from school library shelves because they contain “dirty words.” Alarmed librarians demand that Petty be removed from office because he contains “stupid thoughts.”

Economics prevents entry of new contraceptives

By Kim Jacobson

Considerable attention has been given to newer forms of birth control in recent years. Several of these new methods are coming of age. Yet, there are economic considerations holding them back.

In particular, five approaches seem to stand a chance of being accepted in the future by the FDA (Food and Drug Administration): the contraceptive sponge, long-term progestin-elaborating IUDs (Intrauterine Devices), "tailless" IUDs, contraceptive vaccines, and a male birth control pill called gossypol. Certainly, the last method seems to draw a lot of appeal from women who are tired of carrying the burden of contraception.

Most of this information on future methods of birth control were made available through a book by Doctors Hatcher, Stewart & Stewart, and researchers Guest, Josephs and Dale called Contraceptive Technology 1982-1983, 11th revised edition.

The contraceptive sponge is considered the equivalent of the male contraceptive, the condom. The sponge would have over-the-counter accessibility, just like the condom. It is also disposable, and has a spermicidal agent within it.

The sponge has been said to be as effective as the diaphragm, being non-penetrable in nature. It will not need any preliminary fitting to take place unlike its counterpart, the diaphragm. The sponge will be available in a one-size-fits-all commodity. It can be used several times within a 48-hour cycle, and it serves both as a spermicide and barrier to the uterus. Vorhauer Laboratories is expected to introduce this product to the market by the name of "Secure Sponge."

The progestin-elaborating IUD serves the same purpose as the IUDs already on the market, except the risks that have given the IUD a bad reputation are alleviated. One possible problem with the original IUD has been that it increased the level of blood lost during a woman's menstrual cycle. Also, severe cramping has been observed in a number of women.

The progestin-elaborating IUDs are made to release progesterone. With an increase in progesterone, implantation of sperm is prevented without any known adverse effects to the woman's system. The main drawback in the use of this new IUD is that it must be removed and replaced at an average of one a year—a rate considered to be too much by the doctors and users of this method.

The new "tailless" IUDs are under serious consideration because they seem to decrease the possibility of infection associated with the original IUDs that have "tails." It is believed by researchers that there is a considerable amount of bacteria buildup on the tail of the IUD.

With the use of a tailless IUD, the infection rate is decreased and the IUD can be a healthier form of contraception. The first IUDs to be invented were tailless, so if this study proves correct, we would be stepping back in the technology of this method. These tailless IUDs are being used successfully in China today.

Another method under careful scrutiny is the vaccination. A vaccine would introduce into the body a number of self-produced antigens (chemically the body can naturally produce) that would interfere with pregnancy. Although doctors have been using vaccines for many years, the questions being asked about a contraceptive vaccine are:

Is the vaccine reversible?
Does the chemical introduced to the body react in a way that would cause an autoimmune reaction to develop? (i.e. fever, rash, rheumatoid arthritis.)

Squeal rule

for 60 days. The response showed overwhelming opposition to the proposal.

University of Pennsylvania sociologist Frank Furstenberg Jr. conducted a survey for the National Institute of Child Health and Human Development. Furstenberg based his survey on family planning clinics funded under Title X, the federally financed clinic program which will be affected by the "squeal" rule.

They discovered that 85 percent of these clinics had been making efforts to include parents in counseling, advisory boards, discussion groups, and training workshops. They also found that clinics were encouraged rather than required teenagers to inform parents of their decision to use birth control have a much higher level of active parental involvement.

Furstenberg concluded, "The current efforts by the administration to promote parental involvement by requiring parental notification may be both misguided and ineffective. The evidence from the survey indicates that obligatory parental notification is often used as a substitute for, rather than a supplement to, local program initiatives directed toward parents."

Birth control

Can too many risky allergic or other reactions to the vaccine occur?

A very controversial method that has been used for a long time in China but doesn't seem to stand much chance of being passed by the FDA is the pill for men. This method uses a natural extract from cotton plants called gossypol. In the 1950s in China, it was found that cooking with crushed cottonseed oil could lead to infertility, and the effect was found most often in men.

Since 1972, over 4,000 men were treated with gossypol in China for a period of six months. The results showed that after a period of two months of treatment significant decreases in sperm counts were obtained. The drug has two effects. It inhibits sperm production, and it alters the structure and mobility of sperm in the epididymis (an oblong tube alongside of, and resting against, the testicles). Like the pill taken by women, this pill has a few side effects such as nausea, weakness, lowered potassium levels in the blood, a decrease in libido, change in appetite, and gastric discomfort. When the male goes off the pill, fertility is restored to normal. Little testing has been granted in the U.S., so the market here has yet to be established.

Another future method is the cervical cap. This method seems to be most likely to reach people in the U.S. Yet, the cap hasn't been introduced in the market for economic reasons.

It's very much like the diaphragm, made of latex rubber, only the cap is smaller and more efficient.

The diaphragm has to be put in place no earlier than six hours before intercourse, and left in place for an additional six to eight hours after intercourse.

The cervical cap, in contrast, can be left in place for as long as three to four weeks, according to the Contraceptive Technology. However, most users of the cervical cap do not leave it in place for that long due to risks of infection. It is also not advised to keep it in place for more than a three-day period.

SEX

Dr. Betinis of the University Health Center said his main concern with the cervical cap was that "for some women, the cap would work fine but they have to be able to tell it is properly in place. The cap isn't as easy to detect correct fitness as the diaphragm."

Betinis pointed out that there is a current controversy over how long the cap can stay in the woman's vagina. In England, where research on the cap is being done, a physician puts the cap in for the woman and she returns after one month, so the physician can remove it. This procedure becomes lucrative for the physician because the patient pays for two office visits.

Betinis warned that the cap is much more difficult to insert than the diaphragm. With any contraceptive device, the largest factor is what works for the individual using it, and how effective it is for them. "If the cervical cap is too difficult to use, it won't be effective," he commented. "The effectiveness rate will go down with resulting pregnancies. This gives the device a bad reputation among prospective users."

Betinis frankly said that he didn't see any advantages to the cap. Betinis added to the list of disadvantages that the cervix goes through shape changes during the menstrual cycle. With some women, the shape change can be so pronounced that it would interfere with proper fitting of the cap.

Betinis agreed that economic issues are preventing the cervical cap from being marketed. "They aren't being mass produced because it hasn't got a patent." The cap, which started in the 1960s, is now an old concept which means that someone would have to invent something in a new...

In Central Wisconsin, when one thinks of an X-rated movie, they usually think of the Mosinee Theatre. Not anymore. Due to strong opposition from city residents, the Mosinee Theatre is now showing only movies rated R, PG or G. The same trend is seen in Tomahawk, Wisconsin, where theater has also begun phasing out X-rated films.

Estelle Gritch of Mosinee was involved in the opposition to the X showings. "We were not trying to throw the owner out of town. All we wanted to do was get rid of X-rated movies," she explained.

Public condemnation of the movies began four years ago, according to Gritch, when St. Paul's Parish in Mosinee celebrated its 100 year anniversary. A visiting bishop saw a "very descriptive" marquee for an X-rated film at the theater. Gritch said the罗马第一Scolded Catholics in the area the for showing the X-rated film at the theater. The only X-rated movie that was shown was a "very offensive," she said.

Another battle over X-ratings raged in Tomahawk last week, where 18-20 people in the community picketed the showing of 8 to 10. Neil Winker, the owner of the theater, said the movie was the only X-rated movie that had been picketed. He said the picketing was initiated by two new ministers in town.

Personally, I don't see anything wrong with it," disclosed Winker. "The bottom line is that I have an audience for it.

Winker added that he will not show X-rated movies with rape or violence in them. He tries to find humorous X-rated movies, and stressed that he would "not want to even think about showing those violent ones." He checks IDs and pointed out that, "if people bring young kids, and I think the movie is too much for them to handle, I tell the adults or parents with them.

George said the opposition will not stop him from showing X-rated movies in the future, but he plans to wait a while before the next one.

"The truth is, the town was behind me. The general attitude was that it's a person's right to go, he summarized.

Kenneth George, a pastor at Assembly of God Church in Tomahawk, disagreed. He feels the showing of X-rated movies is a "detriment to society." The reason for picketing was to "say something about the movie, and not just let it go unnoticed," explained George.

According to George, the harm to society is what can happen when certain people view an X-rated movie. He cited violent crimes such as rape, murder and armed robbery as correlating to the viewing of pornography.

Ratings: Shall the X in sex be taken out?

In Central Wisconsin, when one thinks of an X-rated movie, they usually think of the Mosinee Theatre. Not anymore. Due to strong opposition from city residents, the Mosinee Theatre is now showing only movies rated R, PG or G. The same trend is seen in Tomahawk, Wisconsin, where theater has also begun phasing out X-rated films.

Estelle Gritch of Mosinee was involved in the opposition to the X showings. "We were not trying to throw the owner out of town. All we wanted to do was get rid of X-rated movies," she explained.

Public condemnation of the movies began four years ago, according to Gritch, when St. Paul's Parish in Mosinee celebrated its 100 year anniversary. A visiting bishop saw a "very descriptive" marquee for an X-rated film at the theater. Gritch said the Roman Catholic bishops in the area were involved in the opposition. "The general attitude was that it's a person's right to go, he summarized.

Kenneth George, a pastor at Assembly of God Church in Tomahawk, disagreed. He feels the showing of X-rated movies is a "detriment to society." The reason for picketing was to "say something about the movie, and not just let it go unnoticed," explained George.

According to George, the harm to society is what can happen when certain people view an X-rated movie. He cited violent crimes such as rape, murder and armed robbery as correlating to the viewing of pornography. Also, he added, "the degrading of women should not be tolerated in our environment."

George said that he had not viewed the film, but said he had heard it was about sexual permissiveness of office workers. "There has to be a reason why it's rated X," he said.

In Stevens Point, one theater manager who preferred not to be identified, said that just because someone views an X-rated film does not mean they are then going to rape someone. "If the person is mentally sick, it won't make any difference," he said.

His opinion of people who oppose the showing of X-rated films is that "it's a crock. We're not dragging anyone into that theater. People go on their own free will." He also said that theaters occasionally showing an X film probably won't stop because then they have too much money in showing these types of films. "The problem," he explained, "is that one voice can be enough to stop the showing of X-rated movies."

Mike Breitner, vice president for Visual Arts at UWSP, said there is no policy against showing X-rated films at the university. However, a verbal policy is held that anything in poor taste will not be shown. Breitner agreed that there is money to be made in X-rated movies. Last year, he said, UWSP shows one X-rated movie a year, "just to round out the schedule."

In choosing the movie to be shown, Breitner commented, "I don't feel there is any place for X-rated movies with violence." He also discussed the decision on whether to view an X movie or not should be left up to the individual. Said Breitner, "If a single group of people are making value judgments on all movies, you end up with them controlling movies that would normally be acceptable."

This year, UAB will show its annual X-rated movie in April. But make sure you have identification before you go, because Breitner said there will be a mandatory showing of university or similar IDs to eliminate all problems. Extra usher's will also be on hand to do the checking.

Whoever should have their way in the battle over X-rated movies is yet to be decided in Central Wisconsin. To some, taking the "X" out means losing releasability. To others it means deleting personal rights. And to some theater owners, it seems to detract from the ticket sales.

Date: February 26

1983 International Dinner
Once again it is time for the International Dinner

During this event students from many countries present a different side of their backgrounds to the Stevens Point Community. Students from at least 20 countries represented in the club present foods from their culture and costumes in a unique show case.

There will be an international costume parade this year like never presented here before. Original dishes from Africa, Asia, Europe and S. America ensure there will be enough for every kind of taste. Also scheduled are entertainment performances from Asia, Africa and Latin America. This is a unique entertainment and educational event.

Lab tests: Shock the monkey: Part II

By Fred Posler
Pointer Features Writer

Last week we presented the defense of animal experiments in labs. Here's the prosecution.

"A day will come when the world will look upon vivisection in the name of science the way we look today upon witch hunts in the name of religion."

-Henry J. Bigelow
former Harvard
physiology professor

Are animal experiments in labs justified? Is the knowledge gained worth the price paid? In conversations with David Peters, a UWSP philosophy professor who specializes in environmental ethics, and Mary Ann Krueger, director of the Wisconsin Friends of Animals, they offered the disputed and questioned morals involved in animal experimentation.

Animal experimentation covers many different fronts and, as Peters explained, the experiments can result in a variety of distinguishable possible harms. Peters said that these fronts of testing in biological and psychological research involve hypotheses in fundamental areas such as applied basic biomedical research (disease, genetic defects and disfunctions), development of drugs in therapeutic chemicals, testing consumer goods for safety (poisonous and irritation) and the use of animals in teaching (dissection, surgery practice and demonstration).

Inhumane treatment in experiments has been brought to light by ethical questions entangled in needless harm and prolonged animal pain, Peters said. "I think treatment of animals is inhumane if it violated the fundamental moral principle: Do not do needless harm in the ways in which one can do needless harm," he said.

Peters defined needless harm occurring when live animals are used to gather data which there is a good reason to believe could be gathered, with the same degree of accuracy, by the use of non-animal alternatives. Non-animal alternatives, according to Peters, include forms of in-vitro (test tube use of mathematical modeling of systems), bacteria investigation and using of fewer animals in experiments proven to yield data which there is consideration inhumane to animals, as evidence of questionable research.

Cruel and savage experiments happen when techniques and chemical substances used are known to deteriorate and inflict obvious pain, Peters said. Examples of these methods of inhumane treatment include the use of animals at high levels of psychological complexity where there is good reason to believe that animals at lower levels would not survive. Peters also pointed to test results of techniques proven painful to animals when alternative methods would supply the information.

Peters offered two controversial tests, the LD 50 and Draize test, which are considered inhumane to animals, as evidence of questionable research.

The LD 50 (Lethal Dose 50 percent) is designed for acute toxicity and measures poisonous levels in consumer purchased substances, Peters explained. The technical problem with the test is that the quantity administered is in one gigantic dose whereby long term effects of small dosages are overlooked, he stressed.

Peters concluded that the moral problem of the LD 50 is that an alternative test (the Diechman-LeBlanc) could be used and would gain results using only nine animals instead of 60 to 100, as with the LD 50. Peters also objected to the fact that the LD 50 will kill 50 percent of the animals within 14 days.

The second test Peters cited, the Draize test, uses rabbits and other rodents for examination of eye irritation in cosmetics. He said, "They are subject to an grotesque degeneration of the rabbits' eyeballs. The question is, whether we really need another mascara, face cream or shampoos (generally considered luxury items) at the pointless expense of deforming animals?"

Peters added that later in February a public forum on the use of animals in labs will be sponsored by the philosophy department.

Mary Ann Krueger said that the group has a strong commitment to the injustices done to animals. She described some of what she termed senseless research done for profit and scientific recognition at the animals expense. Much of this research, she pointed out, could be accomplished with models and audio-video teaching techniques.

Krueger contended that major areas of animal abuse are warranted and exonerated in the name of science. Vivisection was Krueger's main concern. Broadly defined, vivisection is any form of animal experimentation, especially those putting distress on the animals in terms of administration of noxious substances, burns, electric or traumatic shocks, drawn out deprivation of food and drink, and psychological tortures leading to mental imbalance of the experiment.

Unnatural experimental conditions, such as bare isolation, feeding in small cages and psychological isolation lead to nothing positive, Krueger argued. This undeniable suffering in animals can be seen in the environmental imbalance of frogs, waterfowl, and birds when the rivers and bodies of water they rely on are polluted, she stated.

The misuse of what Krueger termed "bad lifestyle research" (injecting alcohol and tobacco) is useless, she said. It is obvious to the animal's health, Krueger emphasized. These animal experiments should be made public, she added.

Profits and scientific recognition are used to promote research for the wrong reasons, Krueger said. "These attempts to be made public, she added.

If you have at least two years of college left, you can spend six weeks at our Army ROTC Basic Camp this summer and earn approximately $600.

And if you qualify, you can enter the ROTC 2-Year Program this fall and receive up to $1,000 a year.

But the big payoff happens on graduation day. That's when you receive an officer's commission.

So get your body in shape (not to mention your bank account).

Enroll in Army ROTC.

Birth control

cap that would differentiate it from existing ones. Companies with necessary faculty and facilities don't want to spend the money on just one cap that isn't required before the product can be submitted to the FDA.

Betinis later consented with the cap was that it could be used over the cervix, which doesn't have a strong pubic bone ridge or women who may suffer from urethral infections.

Betinis added that before her cervical cap, which is covered by the cervix, she would have to see much more research done which would prove its positive factors.

In a recent article in Medical World News, Dr. James P. Koch confirmed Betinis' suspicions about the cap, saying, "about 30 to 50 percent of potential users of the cap aren't candidates because there are problems in teaching them how to fit it over the cervix." The same article revealed information on the controversy of the cervical cap being used with a cream or jelly. One doctor said that the original cap wasn't made to be used with a spermicide. This confirms the theory that the cervical cap isn't used in the U.S. due to economic reasons. The cap simply won't make enough money for the producers, they claim.

In opposition to Betinis' concerns about the cap being too difficult to put in, Evelyn Weaver, a worker at the Bread & Roses Clinic in Milwaukee, said, "that's a crock." Weaver continued to say that 98 percent of the women who come to the clinic for cervical caps are fitted; the others who can't use them have anatomical problems."

In a study done over the last two years, over 700 women have successfully been fitted with cervical caps at the Bread & Roses Clinic.

In response to the concern over the shape changes in the cervix during menstruation, Weaver claimed that it was a problem "here and there, but it is very sporadic." Weaver was optimistic about the cap's use and believes that the cap has no disadvantages in and of itself. However, she said one disadvantage was between lovers who began intercourse without adequate foreplay. Weaver explained that during foreplay, the natural process, shifts upward and out of the way of the penis.

Sexuality

When the uterus shifts up, the cervix raises—this is to permit sperm to enter the uterus. When there hasn't been foreplay, the uterus isn't in a ready position and the male's penis may hit the cap causing discomfort for both the male and female. Weaver said the advantages of the cap over the diaphragm were that: 1) it needs less spermicide, 2) women who have problems with urethritis (infections in the urethra) are relieved because the cap won't push up against the bladder and urethra, and 3) the cap stays in place better than the diaphragm during intercourse.

There is much to say about the cervical cap, both pro and con. Realistically, with all the experimentation in this country, it seems the cervical cap will be the next form of contraception to be introduced to the U.S. market.

Herpes

of infection no matter what precautions are taken, she warned. People should be aware of this possibility, she advocated, especially females. If a baby is conceived by an infected mother, the infant at birth can contract the disease and herpes can be a life threatening disease to babies. The possibilities for avoiding this should be discussed with your physician, she advised.

Prevention is a matter of knowing your partner and yourself, Eckberg feels. Oral and genital sex should be abstained from when people have cold sores or other symptoms of the virus, she suggested.

Bergin added that openness is the key. If a couple talks about the possibilities and responsibilities of sex before having it, a lot of the problems can be avoided. If a couple can't talk about such matters, they shouldn't engage in sex at all, he advised.

Eckberg said that cleanliness and good washing techniques also help prevent the virus from getting a start.

Herpes is incurable but treatable. An ointment called acyclovine helps patients with the first bout. A vaccine is on its way to being tested but its effectiveness is still questionable. The hope lies in future testing.

Gay law

toward homosexuals. The New York Times quoted Clausen as saying "the uniqueness of military service demands that nondiscrimination policies with respect to age, physical handicap, and sexual preference not be applied to the military services."

Homosexuals aren't allowed in the army because of "practical military requirements." Clausen continued, "Soldiers are required to live and work under entirely different conditions than civilians. Civilians generally need only associate with their co-workers during business hours. Soldiers, on the other hand, must often sleep, eat, and perform personal hygiene under conditions affording minimal privacy."

"Furthermore," Clausen continued, "homosexual conduct is a crime in the military."

Since the new law has yet been tested, the army's stance, along with possible discrimination in basis, remains to be seen. But the rights of gays are at least articulated in this state's lawsbooks.

Drugs and Drink

Next week:
food for the tables of people in the United States, Japan and Europe. As a result, 75 percent of the children under five years of age suffer from malnutrition. The average worker on the coffee plantations receives $1 per day.

These statistics are similar to wherever one surveys the U.S. supported military dictatorships in Central America. The 14 Families of El Salvador were responsible for such a country. Nicaragua's strongman Anastasio Somoza owned everything of value before the revolution. The communist charge is the politically acceptable way for U.S. policymakers to two the Reagan line of "staying the course" in Central America.

To this end, U.S. policy provides military and economic aid to prevent a redistribution of the control of resources. 50,000 Guatemalans may be killed because of it. Thousands of Salvadorans are being killed because of it. Thousands of Nicaraguans were killed because of it.

And Brother James Miller was killed because of it. This reason may be found in a portion of Brother Paul Joslin's statement when Brother Miller's body arrived in Minneapolis: "I want to state very clearly that Brother's death was no accident. Brother Santiago Miller died for what he was and what he stood for—a Christian educator, an apostle of the poor and the underprivileged, a worker for justice and of social change."

Brother Miller brought resources to a resourceless area, hope to a hopeless people, and fear to fearful killers. His efforts to improve the life of Nicaraguans and Guatemalans substantiated the most noble of characters and most just reason. Brother Miller's efforts stand as exemplary to a world seemingly short of both.

Todd Holch's lab's, cont.

experiments, it would dramatically drop the unnecessary duplicative scientific experiments," she said.

As grounds, Krueger cited the animal electrical stimulation in primates done in Ohio. She explained that the limbs are being cut off of these animals and stimulated. "And for what purpose beyond cruelty?"

The questions and extent to which scientific research leads to inhumane treatment of animals needs to be brought to public attention, Krueger advocated. Krueger recommended the Slaughter of the Innocent by Hans Reutess and the Animal Vivisection Society, as backing against the senseless torture of the animals in labs for scientific study.

---

**Bro. Miller, cont.**

"Direct action" and "destruction" patrols, helicopter tactics and use of U.S. weapons, told Nairns that the Guatemalan war will continue and its death toll will reach 50,000 people, most of them civilians. "It's going to be a big war. Korea in '50, Vietnam in '60, Central America in the '80s. And it's all because of communism."

Which appropriately brings me to my final point. The communist charge has been the bell-weather of U.S. foreign policy for years, intensifying with the Age of Reagan. However, what does this charge mean? With 50,000 lives on the line alone in Guatemala, what is the substance of mean? With 50,000 lives on the line alone in Guatemala, what is the substance of this charge?

Much as a lawyer or scientist does in searching for an answer, let us look beyond rhetoric to facts. In Guatemala 80 percent of the land is controlled by 1 percent of the people. Most of the land is used to grow coffee for the tables of people in the United States, Japan and Europe. As a result, 75 percent of the children under five years of age suffer from malnutrition. The average worker on the coffee plantations receives $1 per day.

These statistics are similar to wherever one surveys the U.S. supported military dictatorships in Central America. The 14 Families of El Salvador were responsible for such a country. Nicaragua's strongman Anastasio Somoza owned everything of value before the revolution. The communist charge is the politically acceptable way for U.S. policymakers to two the Reagan line of "staying the course" in Central America.

To this end, U.S. policy provides military and economic aid to prevent a redistribution of the control of resources. 50,000 Guatemalans may be killed because of it. Thousands of Salvadorans are being killed because of it. Thousands of Nicaraguans were killed because of it.

And Brother James Miller was killed because of it. This reason may be found in a portion of Brother Paul Joslin's statement when Brother Miller's body arrived in Minneapolis: "I want to state very clearly that Brother's death was no accident. Brother Santiago Miller died for what he was and what he stood for—a Christian educator, an apostle of the poor and the underprivileged, a worker for justice and of social change."

Brother Miller brought resources to a resourceless area, hope to a hopeless people, and fear to fearful killers. His efforts to improve the life of Nicaraguans and Guatemalans substantiated the most noble of characters and most just reason. Brother Miller's efforts stand as exemplary to a world seemingly short of both.

Area group petitions for public hearing on groundwater contamination

By Todd Hotchkiss
Pointer Environmental Editor

Seeking to enter the political process involved with the issue of groundwater contamination, the Town of Port Edwards Protection Association has successfully petitioned the State Legislature for a public hearing on groundwater contamination to be held on February 13.

The petition, which addresses a number of matters related to groundwater contamination, introduces a new concept into the groundwater contamination issue—human rights. According to the P.E. Protection Association, the issue of human rights is related to the destruction of nature as well. "We think we have a right to expect freedom from the misuse of nature and technology," says the petition. The petition notes that "our own technical utopias" have created the possibility of "freeing human beings from disease and hunger and pain." However, it continues on to say that "we have presented with horrifying possibilities for the destruction of nature as well."

"Human rights entail a proportionate balance of natural resources and the environment for the sake of ourselves and future generations," states the petition. "Our human rights are violated when the sole source of our water is allowed to be contaminated."

In an interview Juanita Martinson, newly elected president of the P.E. Protection Association, elaborated upon the issue of human rights and technology. Martinson said that technology clashes with human rights because of "misplaced responsibility."

"If I am not prejudiced against the farmer," said Martinson, a farmer herself, "I have the users of aldicarb are a much a victim as the people with contaminated wells."

"No one, however, has pointed the finger at the manufacturer of aldicarb. 55 percent of the problem is at their doorstep." Martinson indicated that manufacturers produce aldicarb and "is supposed to have researched the product." The product should be safe to use if label directions are followed. If problems arise from this proper use, as have with aldicarb use, the farmers are blamed. However, the farmers are caught in the middle, claimed Martinson, because they generally follow label instructions. She did account for "some misuse when dealing with the human factor."

Indicating that manufacturers, like Union Carbide, producer of Temik, have not disclosed to the public their research data, Martinson said, "The manufacturer should release all their information on their research." She called such information, including possible data on carcinogenic effects for humans from aldicarb, a "trade secret."

Their human rights to a clean source of drinking water is violated when my sole source of drinking water is contaminated," said Martinson. Describing the threshold where technology and human rights clash, she said it was based on need, the human need for clean water.

Commenting on the argument of needing to use the pesticides which contaminate the groundwater in order to grow food for the hungry of the world, Martinson continued, "The trade-offs are not to feed the hungry of the world because there currently is a surplus of food." She added, "You are supposed to feed the world is currently being grown, but that the food is not being distributed to those who need it. "If you don't have the money to get food, you can't get it."

Therefore, the argument for feeding the world is not a demonstrated need because of other relevant factors. However, everyone needs clean water and, as Martinson said, if your sole source of drinking water is contaminated, you have the right to demand that that water be uncontaminated. That is the nature of a need.

Martinson resonates the idea that manufacturers can market products that are not researched and documented as safe. Therefore, she rejects alternatives made in the use of aldicarb, like the reduction of aldicarb application from 3 pounds per acre to 2 pounds per acre. She also believes that as an experiment. They (State Department of Agriculture) are doing this. I don't think they know what they're doing."

They (pesticide regulators) haven't tried it anywhere else. They are giving the ENVIRONMENTAL EDUCATIONAL SANDS as an experiment. They should try it on test plots first."

Hoping to present their case to the State Legislature, the Port Edwards Protection Association will be among the testifiers at a public hearing on groundwater contamination on February 15. The hearing begins at 1:30 p.m. in room 321 NE of the State Capitol.

Rad-waste dump in Wisconsin to be discussed

The possibility of this state becoming a nuclear waste dumping site will be discussed in a program Thursday night, Feb. 10, at UWSP.

The speakers will be William Clare, Withee, member of Wisconsin Radioactive Waste Policy Council, and Naomi Jacobson, member of the League Against Nuclear Dangers. Their presentation, followed by questions and answer periods, will begin at 6 p.m. in the Communication Room of the University Center.

The lecture is sponsored by the Environmental Educators and Naturalists Association, a UWSP student organization.

The Committee on Latin America (COLA) of UWSP is participating with several community organizations in co-sponsoring the first annual Brother James Miller Memorial Lecture on Sunday, February 13, at 4:45 p.m. in Michelson Concert Hall of the Fine Arts Building on the UWSP campus. Denis Goulet, professor of education for justice at the University of Notre Dame, will speak on the topic, "The Users of the Third World: Economic Justice.”

The lecture will be one of several activities that day commemorating the life of a Portage County native who was murdered in Guatemala on February 12, 1982, allegedly by the military of that nation’s government. The son of Mr. and Mrs. Arnold and Lorraine Miller of rural Ellis, Brother James Miller was shot several times while doing repair work outside the school building for the Indian children and youth he taught. He thus became one more name on the long list of religious martyrs throughout Latin America—a list that is said to be longer in a quarter-of-a-century than is the list for the early centuries of Christianity.

A 3 p.m. prayer service at St. Stanislaus’ Church (near the campus) will focus attention on various passages in the life of Brother Miller, from a farm youth to a victim in one of the three greatest epochs in Latin American history, the movement of the Catholic Church from alliances with various elites to what is now called, “an option for the poor.” The other epochs are those of colonization at the beginning of the modern era and the emergence of independent republics in the early 19th century.

The day’s activities will conclude with a program at 5:30 p.m. in the Wisconsin Room of the University Center, featuring a “Third World” panel manned by several members of the UWSP Spanish Club, a reading of Governor Anthony Earl’s proclamation of February 13 as Brother James Miller Day, a memorial reflection by a classmate of Brother James Miller and the presentation of the first Brother James Miller award to Sister Thea Bowman of Jackson, Mississippi. Sister Thea has designated an orphanage in the Archdiocese of San Salvador to receive in her name a check for $1,000 from the Diocese of La Crosse. The orphanage, Zaragoza Refugee Children’s Center, represents the human rights of the many who were murdered on December 2, 1982, served.

Congressman David Obey will introduce the lecture series and its inaugural speaker. Goulet, who holds a doctorate in political science from the University of Sao Paulo, Brazil, is a specialist in the human dimension of economic development. He is the University of Notre Dame’s first O’Neill Professor of Education for Justice in the Department of Economics and is also a faculty fellow in the Kellogg Institute for International Studies. Goulet was a research fellow at the Center for the Study of Development and Social Change in

Cont. on p. 23
La Follette speaks on nuke freeze

"After meeting with members of Congress, I am convinced that the dream of millions of people hold for a nuclear freeze can become a reality, that Congress should take the time to let their elected officials know how strongly they feel about this critical issue," Secretary of State Doug La Follette said today after returning from Washington, D.C.

"Speaker of the House Tip O'Neill and Senator Edward Kennedy told our group of officials representing states and cities which voted for nuclear freeze of nuclear weapons production in the United States and the Soviet Union," La Follette said.

He added, "The president is slow in hearing the voices of his constituents, but those voices are being heard by Congress. Congressman Mark Kastenmeier (D-Wis.) told us that Congress is on the verge of cutting the funds which have fueled the ever-spiraling arms race and, in part, are responsible for our giant budget deficit and our badly weakened economy.

"Both the United States and the Soviet Union have already stockpiled enough weapons to destroy each other many times over. Strengthening our domestic economy and providing for the needs of people—education, employment, health care and rebuilding the infrastructure of our cities—is more important for our national security than fueling a nuclear arms race which threatens our very survival," La Follette concluded.

Tickets for the "Third World" meal will be available in the University Center Concourse Thursday, noon to 2 p.m., and Friday, 10 a.m. to 2 p.m.

The Committee on Latin America meets every 1st and 3rd Tuesday of the month at 5 p.m. in the University Center. On Feb. 15 members of COLA will discuss some of the ideas and processes now at work in El Salvador and elsewhere in Central and South America. Faculty, staff and students are welcome.

Pointers pay back E.C. in full

By Michael Daehn

Stout's 68-46 flying UWSP Pointers proved Saturday night, the high flying UWSP Pointers proved they're no longer just pretenders to the throne by disassembling the Blugolds 68-46.

Taking up where they left off in a lopsided win against UW-Stout the night before, the Pointers controlled the tempo of this contest from the opening tip. Utilizing a tenacious defense, disciplined shot selection, strong ball movement and an abundance of "smarts," Coach Bennett's charges overwhelmed their inexperienced opponents.

In all fairness to the Blugolds, the game started slowly. At the 4:40 mark of the first half when they were outscored 6-4 to go into the locker room trailing 22-21. After the first three minutes of the second half, the Pointers held a 40-27 lead, and enough momentum to end any speculation about who was going to win this one.

There were questions going into the game about whether the Pointer front line could rebound with the taller, bulkier Eau Claire players. But the Koch-Mack-Stemmeler connection more than made up for any size handicaps with excellent positioning, crisp threes and aggressiveness on the boards.

Some cynics also wondered whether Point's guards could keep up with the sharpshooting Blugolds guard trio of former Pacelli star Tom Saenzelby, "Downtown" Rick Dahl, and passing wiz Paul Mattiacci. Their doubts were quickly put to rest by the outstanding individual defensive maneuvers of Pointer backcourters Brad Soderberg and Terry Porter.

Porter in particular, turned in a sterling performance, perhaps the best of his collegiate career to date. The second-year player from Milwaukee's South Division High School hit 6 of 8 shots, scored 14 points, grabbed a game-high eight rebounds (at 4 feet, 2 inches), had three assists, made several spectacular defensive plays, and dribbled circles around the Eau Claire pressure defenses.

Blugolds Saenzelby and Dahl did get their fair share of points, 13 and 12 respectively, but Saenzelby was held to a single bucket after the intermission. Several of Dahl's hopes were of the "Hail Mary" variety. Mattiacci did manage to dish off a game-leading 5 assists, but down the stretch, was harassed into throwing several key passes away.

Coach Bennett was obviously pleased with the defensive effort put forth by his players. "If there was a single most important key to the outcome," said the coach, "it was the fact that we held Eau Claire to only 39 shots."

Another key was certainly the difference in turnovers between the two clubs. While Eau Claire was fumbling their way through 16 miscues, the Pointers had only 7 turnovers.

In the closing stages of the scoring load was again placed on the back of all-conference forward John Mack. The scrappy Mack took a little while to find his range in this contest but once he did, that was all they wrote for the defending WSUC co-champions. When the Blugolds set up in a man-to-man, Mack used his deceiving quickness to power down the lane for easy bunny shots. If Eau Claire tried to zone the Pointers, the 6-foot-5 Milwaukee Tech alumnus lofted rainbows from outside, untouched nothing but net. He finished with 24 points, 4 "rebbles," and another 4 assists.

Mack also had some positive things to say about the opposition. "Eau Claire has all the talent and is going to be a heck of a machine again next year and the year after. But talent is one thing and experience is another. Tonight we played up to our

Pointers rip Stout

By Tamas Houlihan

Pointer Sports Writer

The Pointer men's basketball team ran its conference record to 8-1 Friday night, demolishing UW-Stout 73-27. The Devils are now 5-6 in the WSUC and 11-10 overall, while UWSP is 15-3 on the season.

The rout was evident in the early going, as the Pointers surged to an 8-1 lead after just four and a half minutes of play. The lead was stretch to 34-18 at intermission when Mack drilled a 30-footer with 3 seconds to play in the half, giving UWSP a 35-18 advantage at intermission.

The Pointers canned 16 of 27 floor shots in the half for a sparkling 59 percent, while Stout converted only 15 attempts of which they made 6 for a poorly 40 percent.

The second half saw more of the same, as Stout never got closer than 15 points at 33-20.

With about nine minutes remaining and the Pointers holding a comfortable 49-28 lead, head coach Dick Bennett sent in the Purple Gang, a full court press because we didn't score enough. We tried everything possible, but we just got beat by a better basketball team," commented Bennett.

Mintz said he thought UWSP was the best team they had played this season and the best team in the conference. "I see Point pulling out ahead and running away with the title," he said.

"We played a very smart game," commented Bennett. "We knew we had to come out and play our game, and that's what we did. We were very important. We played solid defense and took intelligent shots. Brad Soderberg played an excellent floor game, which is just what we needed with the injury to Craig Hawley. Mike Janne also did a fine job coming off the bench. We know we're not going to lose much with the Purple Gang in there."

Bennett was also pleased with the fan support. "A lively crowd is always a positive factor," he said.

Pointers ranked 12th

SID—After posting a pair of victories over the weekend, the UWSP men's basketball team has moved up to No. 12 in this week's NAIA national rankings.

The Pointers, 16-3 on the season and tied for first in the Wisconsin State University Conference with a 9-1 record, moved up from the 15th position it attained in last week's poll. UWSP topped 123 points in this week's ratings.

Chicago State, a narrow 68-64 winner over UW-Parkside last week, has held on to the No. 1 position with its 17-2 record. It earned 37 of the 31 first-place votes and totaled 470 points.

Chaminade, Hawaii, is still No. 2 with a 25-0 record and 433 points while Walsh, Ohio, the only unbeaten small college team in the country, is No. 3 with a 25-0 record and 380 points.

The Pointers' WSUC co-leader UW-La Crosse coach received honorable mention along with UWSP victims Kearney State (Neb.) and Salem College (W. Va.).

Point will put its ranking on the line Wednesday when it hosts UW-Platteville at 7:30 p.m. contest in the Quandt Fieldhouse.

Saturday, UWSP and UW-Whitewater, the only unbeaten team in NCAA Division III last week, will tangle in Whitewater in another 7:30 p.m. contest.
Swimmers cop first at Coe

By Tom Burkman

Pointer Sports Writer

It was the kind of meet you dream about. To say that the UWSP men’s swim team dominated the field last weekend at the Coe Invitational in Iowa would be a massive understatement. The Pointers scored 1085.5 points to outdistance second place Grinnel’s 985.5 total, Lake Forest’s 440 points while Lake Forest had 386 points in the meet.

UWSP, one of the top clubs in Division III, captured 13 firsts (including all four relays), swept five events, and set an unbelievable amount of 12 national qualifying times.

First place finishes, which were qualifying times set by the Pointers, included: Greg Schneider, 200 butterfly, 2:03.05, and 200 breaststroke; Scott Slayburgh, firsts in both the one and three meter diving competition; Scot Moser in the 200 Individual Medley; Schneider in the 100 breaststroke; and Baron Richardson in the 100 butterfly.

“\"We dominated the meet,\" coach Lynn \"Red\" Blair said simply. \"Then, shockingly, he added, \"We would have swam even better if the competition was better.\""

A team can’t do too much better than the Pointers did last weekend. Even with all their firsts, UWSP still captured 13 seconds and had eight third place finishes. The Pointers also took the top three spots in five different events. These were the 400 free relay, the 200 breaststroke, the 200 free, the 1500 free, and the 100 breaststroke (where they managed to capture the first four places).

Even when they didn’t capture the top three spots in an event they were still dominating. For instance, in the 50 free, Stepanek and Scott Slayburgh took first and second respectively, and two more from the 400 free team with times of 3:20.22 and 3:20.60.

The other events which didn’t set qualifying marks but still placed first in the meet were: Jeff Stepanek, all firsts in the 50, 200, and 100 freestyle; Scott Blaney, firsts in both the one and three meter diving competition; Moser in the 200 Individual Medley; Schneider in the 100 breaststroke; and Baron Richardson in the 100 butterfly.

“If it turned out, we were really racing ourselves,” Blair said. “Like in some of the finals, we had four of the five and even seven of the eight in the lanes. Also, now almost our whole team will go on to nationals.”

“It would be hard to praise one person for his efforts, but Blair mentioned the name Scot Moser. “He probably had the best swims of anyone,” he said. Moser was a part of the winning 400 free relay “A” team, set a national qualifying mark."

The Pointers will take on the Madison varsity squad tonight at 7:00 p.m. Madison and then travel to La Crosse for the WSUC Championships Feb. 17.

Bumgarner honored

By Julie Denker

Pointer Sports Writer

Four-year starter Anne Bumgarner is now the all-time leading scorer for the UWSP women’s basketball team. Anne reached that goal with a Pointer win against UW-Eau Claire on January 26. On Feb. 1, she went over the 1000 point mark against UW-Stout.

For the last two years, the former high school standout has been team captain and has led the team in scoring and rebounding. She was also named to the second team of the All-WWIAAC last year after finishing third in the conference in both scoring and rebounding.

Anne Bumgarner, a senior from North Prairie, Anne Bumgarner will graduate this May with a major in Psychology and minors in sociology and business.

When asked what she thought her biggest strength as a basketball player is my intensity. College basketball is much faster and tougher and the level of competition is much better than it was in high school. To keep on this level the intensity has got to be there."

Women win two

By Julie Denker

Pointer Sports Writer

The UWSP women’s basketball team extended its season record to 9-6 and remains unbeaten in the WWIAAC at 4-0 with wins over UW-Stout, 77-61 and UW-Superior, 64-38.

Against Stout, Pointer Kathy Bennett went on a rampage scoring 14 of her 24 points in the first half. She was 11 of 17 from the floor and made 2 free throws in the game.

Ober scorers for UWSP were Dawn Mannebach with 12 and all-time leading scorer Anne Bumgarner has 19 as she went over the 1000 point mark.

Against Superior, the Pointers used a combination of spectacular defense and good offensive rebounding to gain a 34-14 lead. The lead never changed hands as UWSP held a commanding 34-14 lead at halftime.

In the second half Point picked up where they left off, dominating both on offense and defense.

Anne Bumgarner led all scorers with 14 points. Karla Miller added 13 and Kathi Bennett 12.

Bumgarner also led Point in rebounding with 7. Geri Papenfuss of Superior pulled down a game-high 11 rebounds.

Coach Bonnie Gehling was extremely pleased with her team’s defensive effort and felt that the added emphasis of defense in recent practices was the key.

“Most of the teams that we face are bigger and better so defense is the advantage that we have to have to beat those teams.”
Mermaids take third in Coe Invitational

By Tom Burkman
Pointers Sports Writer

The UWSP women’s swim team placed third in the Coe Invitational over the weekend. Lake Forest won the meet followed by UW-Green Bay, and host Coe College in fourth.

Five swimmers were ill and didn’t make the trip for the Pointers. Also, UWSP head coach Carol Huettig couldn’t make the trip. However, she mentioned, “I was impressed by the fact that we had enough guts to function with all the illnesses and injuries that we have.”

Mary Cram captured the only first for UWSP with a 1:07.67 in the 100 yard backstroke. Cram also placed third in the 200 back and 100 individual medley and fifth in the 200 breaststroke.

Second place was taken by the Pointers included Kim Swanson in the 200, 500 and 1500 freestyles, Jill Pickett in the 100 back and Sara Celickowski (who also placed third in the 200 free) in the 100 free. Noted Huettig, “Those were Kim’s season-best times in the 500 and 1500 frees.” She also placed third in the 100 free.

The Pointers also had six fifth place finishes. These included: Cram, 200 breaststroke; Celickowski, 50 free; Marcia Jahn, 100 butterfly; Jill Pickett, 200 back; and Lisa Reetz, 200 butterfly. Jahn also had a sixth place finish in the 500 free.

Coach Huettig praised Lisa Reetz who, as the coach said, “took 10 seconds off her best time and set a school record (2:28.80) in the 200 butterfly.”

Also drawing praise from the coach was Katie Lukaw because of her best time of the season (5:50.22) in the 500 free. Jahn’s effort in the same event also drew compliments from Huettig. Kim Swanson also set personal bests in both the 1500 and 500 frees.

The 800 free relay team placed second for the highest finish of any one of the Pointer relays on the day. UWSP finished fourth in the 400 medley, 200 medley and also the 400 free relay. As Coach Huettig said, “We don’t even want to talk about that.”

“Big thing now is that they have to stay healthy and get healthy between now and the conference meet,” mentioned the coach. “I’m really excited about the conference meet. We could end up as high as third or as low as seventh in that meet; the teams are that close.”

Before the conference meet, however, the Pointers (6-3 in duals) will be on the road to take on River Falls tomorrow at 6:00 p.m.

Sports Shorts... Sports Shorts... Sports

Men’s track

SID — The UWSP men’s track team captured second place in the four meet team Saturday at UW-Milwaukee.

DuPage College won the meet with 64½ points as UWSP was runnerup with 54. UW-Whitewater placed third with 48½ and was followed by host UW-Milwaukee with 33 points.

The Pointers efforts were fueled by the fact that they had six first place finishes and five second place finishes on the day.

One first place finish was captured by Rich Perona in the 220 yard Intermediate hurdles. Perona tied with DuPage’s hurdler with a time of 23.9.

Dan Bradford, who is replacing All American graduate Bruce Lammers in the 880 yard hurdles, finished first with 2:07.8.

Other first place finishers for the Pointers were Bob Ulrich in the pole vault with a jump of 14 feet; Jeff Crawford in the shot put with a throw of 46 feet; Tom Weatherspoon in the triple jump, 44 feet, 11½ inches; and Steve Bierlowski, 880 yard run in 1:56.5.

The Pointers will meet again in the La Crosse Quad Meet at La Crosse on February 12.

Women’s track

SID — Led by five first place finishes, the UWSP women’s track team finished second in the track meet held in Oshkosh Saturday.

UW-Oshkosh won the five team event with 130 points followed by UW-Stevens Point, 122; UW-Parkside, 57; St. Norbert, 46; Ripon College, 13.

Two of the Pointers’ winning efforts were in relay events. The 880 relay won with a time of 1:56.3, and the mile relay finished first with a time of 4:17.7.

The Pointers will return to competition Feb. 12 when they compete in a multi-team meet at UW-Milwaukee.

Thanks for being the best wing! Love—Your Fearless Leader

PERSONAL: Girls—Just think, approximately 400 new men will be here at UW-Slim Pickings this weekend! Go Rugger Huggers!!

PERSONAL: Good luck to the fans. Hope you get the trophy this year! See you at the games. Your devoted fan.

PERSONAL: Burrough—Now that you’ve stolen my crutches, you won’t mind if I break your legs. See you at Butter’s tonight. Cruelness and perversity is great, and it makes me so happy to know that I will be spending the rest of my life with the man I really love. Happy Valentine’s Day!!

Love, Mary

PERSONAL: Personal to Generic Partners: Thanks to everyone who made our party a success! A special thanks to Boomer, Tim, Tim (Krutzen), & the men from Watson Last but not least, an extra big thanks to Greg I’ll play-it-in-a-minute Peterson!

Way to be baby!! 2 (not tunal) North.

PERSONAL: Personal to my wife: Thanks for all the support and patience you’ve given the “New Kid” with the heartache! I appreciate it more than I can ever say! Also, thanks to Lurch & Oyt for the myriad of wisdom! I owe all you guys big! I think I’m gonna make it! Love NC (no chest).

PERSONAL: To the girls in the “green” house: thanks for all the million for the early birthday present. I’m all "tied" up with joy. You guys are super.—Till.

PERSONAL: Welcome back, George, I missed you. You know who (You better know what) P.S. Happy Valentine’s Day.

PERSONAL: Scott: You are my lover and now everyone knows it. Fred.

PERSONAL: Yes, Sue Schwebs, this is your long awaited personal. This is the real thing, Sue Schwebs. So, Sue Schwebs hope you are happy with this personal. Have a nice day, Sue. (MLT) (BI Doc, yes this is the real thing.)

PERSONAL: Hey Al, heard your birthday is Friday! Have a good one and behave yourself. Tracy.

PERSONAL: Mom: Happy 12th!! Thanks for putting up with me this long. I know it’s been hard at times but I’m sure glad you stuck it out! Don’t forget about your reserve. Ready for L.S. at 27 P.T.

PERSONAL: Thanks a million to everyone who helped make turning 20 a lot less painful! Especially Sue, Deb, Cindy, 4 East Hansen, 3 East Hansen, 4 West Pray, Rat, Ron, Dave, Whaler, and of course 2 South Sims. I hope you’ll be around for my 21st. Thanks again. Love, Sid.

PERSONAL: Wallie... Can’t wait till we hold out on the 10-m. coast. You’ll lose! Happy V-d day. Remember you’ve got my heart—I love you—if you don’t know who this is from I’ll kill you.

PERSONAL: “Da Free” So! Friday night was open mouth, insert foot at Ella’s night. I can still see Gary’s expression when he said that! The poor thing! “Sis Sue.”

PERSONAL: Lady Superior—Have you blown out any candies recently? Or do you only do that when a particular guy will relight them? Lady Chaplain.

PERSONAL: Sig Ep Frat—Had a blast at the party. Too bad you ran out of rocket fuel. Love ya all!!—Tom’s Lil sis.

PERSONAL: To crescent man and stir fry king: Not enough rice, too much oil. And I’m sure we will all agree, there are not enough hours in the day, beverage in the house, and ice cubes in the freezer to break in the Franklin St. bar. Love, Bill Miller & two squaws.

PERSONAL: Dear “Killer,” Happy 3-year anniversary. We’ve been through the good, the bad and the different together and that is why our love has become stronger. I love you. Always “Rosanna.”

PERSONAL: Hey Wally: Who put the quarter in you? 2-West wants to know how did it come out—heads or tails? Next time let’s play Mexican.

PERSONAL: Gina, I hope you have a fantastic 20th birthday. Maybe they’ll dedicate a polka to you at Chris’ wedding. Love, KL.

PRESENTS
SPRING BREAK IN DAYTONA BEACH

MARCH 4 - 13, 1983
Arrangements by
ECHO TRAVEL, INC.
MC132571F
UW 10, Pks.

SIX PER ROOM
$197

TRIP INCLUDES
- Round trip motor coach transportation via modern highway coaches to Daytona Beach, Florida leaving Friday, March 4
- Seven nights accommodations at the existing Plaza Hotel of Daytona Beach. Located at 600 North Atlantic Ave., it is the most demanded hotel on the strip at that time.
- A truly great schedule of activities including our famous pool deck parties and belly flop contest.
- Optional excursions available to Disney World, Epcot, and several other attractions.
- Numerous bar and restaurant discounts.
- The services of full time travel representatives.
- All taxes and gratuities.
- Guaranteed beachfront or oceanfront available at small additional charge. (4 per room only)

FOUR PER ROOM
$209

A QUALITY TRIP - A LOW PRICE - A GREAT TIME

The Plaza Hotel, located right in the middle of the strip, is definitely the place to be during spring break. Ask anyone who has been to Daytona. The hotel has a pool, big party deck, restaurant, four bars, color TV, air conditioned rooms and plenty of activities. Pictures are available where you sign up. Our motor coaches are nothing but the highest quality highway coaches. We also give you more extras with our trip than anyone else. Don't blow it and go on a lower quality trip. LAST YEAR OVER 8,000 PEOPLE ENJOYED THIS TRIP.
