A Parable

A long time ago, in a land not so far away, there lived a prosperous people known as the Mynds.

The Mynds occupied a tiny island off the coast of a huge, powerful country known as Acirema. Although their land was but a speck compared to Acirema, the Mynds were an important trading partner with their huge neighbor.

The Mynds most important export was nollige, a staple in the diet of all Aciremans, especially children. It gave the Aciremans strong bodies, but was absolutely essential to their intellectual development.

Nollige, however, could only be prepared by a special priestly class known as The Instructors. The Instructors, using an ancient, secret formula — known as the Three R's — handed down to them by their forebears, made nollige palatable to Aciremans.

Aciremansdevouredhugequantitiesofnolligeannually. Growing children were fed double helpings of nollige until they were 25 years old.

Nollige made Acirema the strongest planet. Its children were fed and educated to become the strongest bodies, but was nollige, a staple in the diet of all Aciremans, especially children. The Aciremans enjoyed huge quantities of nollige annually. Growing children were fed double helpings of nollige until their current generations of Aciremans developed a stronger constitution.

Children went to school for 12 years. The Instructors had experimented with the traditional nollige formula. The essential ingredients, the Three R's, became diluted by sweetened additives designed to make nollige tastier for children. The sweeteners caused cavities not only in their teeth but in their minds as well.

Parents had traditionally criticized the Instructors for diluting the formula, but the Instructors had some gripes of their own.

"If we're so important, how come we make less money than most garbagemen," they complained.

Furthermore, how can you expect us to cook with this lousy equipment," the Instructors added as a cooking still hissed its last and died.

By this time the Mynds began to experience serious difficulties. Acirema wasn't buying as much nollige as it once had. Things were so tough some minds began to die of starvation.

Meanwhile, both groups — The Instructors and parents — were crying to the Big Shots, who ran the country from a utopia known as Washington. Washington was a fantasyland with everything a person could want. Big Shots traveled to and fro in long, black limousines, ate expensive and lavish meals, and even voted themselves many pay increases. And best of all, the Big Shots paid for none of it. The rest of Acirema did.

The Big Shots listened to all the hoopla about the quality of nollige and were dumbfounded.

"We didn't know things had gotten this bad," they shouted, slapping their fat, little hands to their foreheads in amazement. They couldn't decide what to do — it took them a month just to decide to decide — so they went to see their leader, The Prez.

The Big Shots waddled over to the Prez's house and told him about the nollige problem.

"Well, I'd like to help you folks out, but we have more important things to spend our money on — like national defense," said the Prez. "Besides," he continued, "you can't solve your problems by throwing money at them." With that he stood up and threw a few more silver dollars on the growing pile atop the pentagon-shaped bank.

Back in the land of the Mynds, citizens continued to waste away. Exports of nollige had all but dried up over the past few years. Widespread famine gripping the land. More and more Mynds died of starvation.

Still the debate raged on between all Acireman factions — The Instructors, parents, The Big Shots, and The Prez. They had such a good time arguing they failed to notice glaring deficiencies developing in their children. No one noticed the demise of the Mynds.

Children went to school for 12 years and still could not write or speak the national language correctly. Yet when some Big Shots proposed exams to test children and The Instructors — to see if they were absorbing and preparing the nollige correctly — The Instructors rebelled!

Winter came and the debate subsided temporarily. The feuding parties went home to rearm themselves for an even bigger spring battle.

A great stillness settled over the land.

To their horror, older Aciremans slowly realized their children had reverted to a primitive language filled with double negatives, a limited vocabulary, and sentence fragments. The children also created a new "new math" where two plus two added up to
The 90th academic year of the University of Wisconsin-Stevens Point has begun. The chancellor, Philip Marshall, made that assessment in his annual address to the faculty on Friday, August 29. There is considerable discontent on campus over no salary increase this year and a plan of less than four percent for next year. But Marshall offered a "pledge" to do "as best as I can do" in helping correct problems in faculty compensation.

Theatre Arts

Entertaining year promised

"Coppelia," a full-length comic ballet, will be among the productions mounted by theatre arts faculty and students during the 1983-84 season at the University of Wisconsin-Stevens Point.

The season will open with "The Barber of Seville" by Ambroise Miller. Directed by Tom Nevin of the theatre arts faculty, "the show is purged of witchcraft in old Salem" will be presented on Oct. 7 and 8-12.

"Kismet," an operetta by Robert Wright and George Forrest from music by Bordon, will be directed by Alice Peet Feaut, chairperson of the theatre arts department. It will open Nov. 11 and continue on Nov. 12, 13 and 15-19.

Robert Beruch, professor of theatre arts and assistant to the chancellor assistant to the chancellor, will direct "The Royal Family," a comedy by George V. Kaufman and Edna Ferber, will be presented on May 5, 6, and 9-12.

Theatre Arts will be presented at a later date.

All of the plays begin promptly at 8 p.m. in the Studio Theatre of the Fine Arts Center. Tickets are available on a first come, first served basis at the theatre arts box office.

Native Americans

Associate degree program gets boost

The University of Wisconsin-Stevens Point has received a federal grant of about $45,000 to cover most of the expenses of an associate degree program during the ensuing year for adult Native Americans.

About 50 men and women from eight of the state's 11 Indian reservations will be enrolled this fall in special classes that will be taught at convenient times for the commuters -- Friday evenings and Saturdays. They will be studying computer science, tribal law and sociology. There may be several available seats in the law and sociology courses, and if that is the case, any residents are eligible to join the class for academic credit. People interested in joining the class may contact the UW-SP Native American Center in the Park Student Services Building.

Sabbatical exhibition slated for Sept. 5

"Mythic Vessels" is the title Gary Hagen, member of the art faculty at the University of Wisconsin-Stevens Point, has chosen for his sabbatical exhibition, which opens Monday, Sept. 5 in the Edna Carlsen Gallery. A public reception will be held from 7 to 9 p.m., Sunday, Sept. 11 and a lecture about his work is scheduled at 7:30 p.m., Wednesday Sept. 14, both in the gallery of the Fine Arts Center.

Included in the show will be 20 rhoses plates and 10 drawings completed during the past academic year while Hagen was on sabbatical. His project was funded through a fellowship research grant from UW-SP.

Hagen says the titles of his works were taken from the names of rivers and lakes north and south of the state in the land of the Cree and Ojibwa. He was influenced by primitive cultures and certain geographic areas, particularly desert and tundra, which he visited in 1979.

Hagen, an associate professor of art, formerly served as director of the Carlsen Gallery.
The International Club is one of the largest student organizations on the UWSP campus with membership of over 150 students representing 30 countries. In past years, American club members have played an important role in the university's activities and cooperation. The UWSP International Club's members have had an active and important role not only on the local level of club affairs and Student Government, but also in regional affairs for the National Association of Foreign Student Affairs in Region 5. Club members, from international friendship, have made important and lasting contributions to international haute cuisine and foreign countries and to our students.

The International Club meets every first Friday of each month—beginning this year with our annual opening picnic at Bukolt Park—with our first regularly scheduled meeting to be held in the Wright Lounge of the University Center at 7:30 p.m., September 9. UWSP Student Government President Scott West and Jerry Groh, president of the UWSP Campus Leadership Association, will be guest speakers. Membership: $3 per year.

We invite all interested students and persons in the greater Stevens Point community to join us this exciting, stimulating and highly rewarding organization.

The International Club meets every first Friday of each month—we begin this year with our annual opening picnic at Bukolt Park—with our first regularly scheduled meeting to be held in the Wright Lounge of the University Center at 7:30 p.m., September 9. UWSP Student Government President Scott West and Jerry Groh, president of the UWSP Campus Leadership Association, will be guest speakers. Membership: $3 per year.

Aviation Ground School
Offered By Sentry Aviation Services
Location: Stevens Point Airport
Time: 5-8 p.m. Monday Nights
Cost: $100.00 per year. 10 classes—starting dates to be announced after all students have registered.

The International Club's soccer team won second place in the Wisconsin State Soccer League last season. A much-anticipated yearly event is the International Dinner which brings to students over 400 friends and members of the international community for an evening of international haute cuisine and top-rate entertainment—all prepared and presented by members of the International Club. This year will mark the 14th Annual International Club Dinner.

Sharing positions of leadership with young men and women from Africa, Europe, Asia, and the Middle East, American students and foreign students alike have learned to work in an atmosphere of trust, cooperation and mutual respect.

Chancellor Philip Marshall, recognizing the importance of the opportunities which result from international friendship and understanding, said, "I encourage students, foreign and American, to join the International Club."

The International Club is among the largest student organizations on the UWSP campus with membership of over 150 students representing 30 countries. In past years, American club members have played an important role in our organization's affairs and will continue to make important contributions to the success of the club—Americans like David Kaminski who has been an active member for three years.

United Council
Probe puts Bentley on defensive

By Joseph Vanden Plas

New allegations of fiscal improprieties have incited an investigation focusing on University of Wisconsin-Parkside President Scott Bentley.

Tracey Mosley

According to UWSP Student Government Vice President Tracey Mosley, an investigative committee comprised of one student representative from each U.S. campus will meet Sunday in Madison. Its agenda will include testimony from Bentley and at least two former members of his staff, Curt Pavlisich and Jane Shattuck, who have levied a number of charges against the embattled U.S. President in recent months. Some of the more serious charges have included: parking violations committed by Bentley which were allegedly paid for with U.C. funds (and in effect by UW students); exorbitant travel expenses, including trips to Fond du Lac and La Crosse last spring; and failure to reimburse U.C. for materials used during his successful re-election bid in March.

However, it was the latest charge, one levied last spring, which Mosley "sparked" the investigation, which was initiated by a UWSP Student Government Association petition. According to Mosley, Bentley spent "a few hundred dollars" over the amount he was allotted at a recent United States Student Association meeting in Atlanta, Georgia. Bentley's extravagance, said Mosley, was typified by his refusal to stay in a dormitory with other student representatives. Instead, Bentley booked lodging in a plush, air conditioned (and more expensive) hotel.

Mosley said Bentley's justification was that the 105 degree heat in Atlanta made it "unlivable" in the dorms. Moreover, Mosley said that Bentley fired his newly appointed Executive Director in Atlanta because he tried to prevent Bentley from running up a large bill.

Conflict of Interest

Since the investigation committee is comprised of U.C. delegates, some of the same delegates who re-elected Bentley and thus are ideologically tied to him, such an investigation be on the level? Mosley answers in the affirmative, citing what he says is a large turnover in U.C. personnel this year. "I don't think there's much of a conflict of interest because most of the people (on the investigative committee) are new, which I boycotted."

Refereendum

Last spring, Pointer Magazine recommended that SGA call a referendum to reconsider its U.C. membership if Bentley wasn't removed from office. Mosley admits that such a step is now being considered at UWSP. "Very few of us would vote yes," Mosley said when asked if a referendum was in the offing. "Either we see some results or we take out student's money and give it back to them." When asked to elaborate, Mosley said "we want to know who is in the wrong, whether it's The U.C. staff or the execution."

"This whole situation is really affecting their ability to lobby for students.

Lack of funds leave Nigerian students in bind

By Trudy Stewart

Once again, Nigerian students have become the focus of media attention, this time because of difficulties in obtaining funds from their government for educational fees and expenses.

UWSP Assistant Chancellor Helen Godfrey, of University Relations, explained that these are not a recent development. "As long ago as February, 1981 problems started to arise in regards to obtaining proper funding for the Nigerian students. The students are granted as a form of nonfiscal obligation."

The coordinator for Nigerian Students, Julie Rose, of the National Association for Foreign Students, estimated that US colleges and universities are owed at least $22.1 million in tuition and another $65 million in living expenses.

The University realizes that the Nigerian students are the victims of circumstance and regrets that sometimes compromise is not possible. Dr. Godfrey concludes that this is not just a local concern, or even national, but of worldwide proportions. She cites The Chronicle of Higher Education, which, in its August 10, 1983 issue, states that Nigeria's foreign debt to the United States is $9 billion. She points out that Nigeria's state government owes Great Britain as much as $6 million in student loans.

According to UWSP controller Ron Lostetter, states that the debt owed the university is approximately $108,134, including fees for enrollment in the fall semester, although until the third week of classes the final figures will not be processed. Of the thirty Nigerian students enrolled this fall, Lostetter says that twelve were given notice in July that they would not be permitted to enroll unless they either paid for all fall fees, thereby not increasing their debt. Lostetter reports, as of check point, eight of those twelve students have been able to come up with funds and were therefore allowed to enter. However, Lostetter says that only one student actually received a scholarship from Nigeria, the others had to rely on family, friends or private sources.

The University realizes that the Nigerian students are the victims of circumstance and regrets that sometimes compromise is not possible. Dr. Godfrey concludes that this is not just a local concern, or even national, but of worldwide proportions. She cites The Chronicle of Higher Education, which, in its August 10, 1983 issue, states that Nigeria's foreign debt to the United States is $9 billion. She points out that Nigeria's state government owes Great Britain as much as $6 million in student loans.
Adequate compensation vital to UW: Haney

UWSP Communication professor Jim Haney is a rela-
tive newcomer to the UW faculty and is in his third year of teaching at
UWSP. Nevertheless, Haney and other faculty mem-
ers who have recently thrust
themselves into the media
limelight with militant pro-
tests of Governor Tony Earl's
decision to freeze their
pay this academic year.

"...he (Governor Earl)
has turned around and
he's knitted a group of
people who supported him,
in the general election, in
the back."

Professor
Jim Haney

Gov. retorts

Fiscal crisis takes precedent

by Governor Anthony S.
Earl

Like most Wisconsin's,
I believe the University of
Wisconsin System is one of
our state's greatest assets.
The importance of the
University to Wisconsin's
cultural, political and eco-
nomic life cannot be over-
stated.

I also realize that there
are some inequities between
faculty salaries and those
at other universities in
the Big Ten and across
the nation. I know that this
is an area that has been
discussed, and it is
one that I have also
given a great deal of thought.
Nonetheless, Wisconsin
faces the most difficult eco-
nomic times since the
Great Depression, and the
state has had to deal with
an impending budget deficit of
unprecedented proportion.
We simply do not have the
luxury to expand or increase
funding for many programs
and departments. And,
unfortunately, this includes
pay increases for state em-
ployees, academic or other-
wise.

But, let me stress the in-
creases that the University
did receive in the 1983-85
biennial budget. This is espe-
cially important in light of
the cuts in funding for the
University which occurred
during the previous admin-
istration. The 1983-85
budget provided:

- a $23.5 million increase
for University instructional
programs and libraries;
- a $45.5 million increase
for compensation, benefits
and other programs; and
- a $35.2 million restora-
tion of academic and non-
academic staffing levels
that had previously been cut
by the previous administration.

This $95.2 million increase
in the same budget that was
cutting back or holding con-
stant virtually every other
activity of government should
be construed as a tangible
indication of my strong sup-
port for the University and
its faculty.

I am certainly not happy
to have offered such low in-
creases in faculty salaries. I
know the University needs
you to stay competitive in order
to attract new talent. I know
the importance of morale to
senior faculty. But, our eco-
nomic difficulties cannot be
ignored.

Recently, you already
know, I have announced the
creation of a special commit-
tee to study University facul-
ty and staff pay. The com-
mmittee's task is to examine
in detail all the issues that
have been raised, such as:

- equity among state em-
ployees; parity among doc-
toral and other University
employees; merit increases
for faculty and staff; and
access to the University for
students of all economic
circumstances. These are
important and difficult issues,
but I have great hopes for this
special committee. And I believe
that its recommendations for
the 1985-87 biennial budget
will be most helpful to the
University and will provide a
remedy for any inequities that
exist.

On the meantime, I unde-
stand that your efforts and
hope you can understand the
background to the difficult
decisions that will have to be
made.

And, I sincerely hope that
the budget will not appear to
me to be one that you do
not intend to see this great
institution decline while I am
governor.
Summer update

State asked to aid in camp funding

The University of Wisconsin System Board of Regents recommended June 10 that state funds be used to defray some of the building expenses for a new natural resources camp near Tornado.

Treehaven, a 900-acre facility owned by the University of Wisconsin-Stevens Point Foundation, Inc., was intended to be developed entirely with private funds.

But inadequacy of state planning funds has made it necessary for the university to vacate its old camp site earlier than planned. UW-SP officials said they cannot raise enough money from foundations, private donors and fees to have the new camp ready for occupancy next spring.

The regents therefore recommended that $3,000 be spent to plan a new academic building that would cost a quarter of the million dollars plus a sewer/water and sprinkling system that would carry an $85,000 pricetag for Treehaven's total building compound. The expenses would be defrayed with tax revenues.

The regents also voted in favor of a $5,000 expenditure to plan a 48-bed residence hall and two 24-bed residence halls with total costs of $400,000. Money for the plans and construction and further maintenance would be from a self-sustaining account created by pay-per-use fees.

Wisconsin's Building Commission will deliberate on the recommendations at its meeting in Madison on June 22, and university officials are optimistic about the projects.

UW-SP Chancellor Philip Marshall and Natural Resources Dean Daniel Trainer describe as "god sends" the turn of events putting pressure on them to speed up construction of Treehaven in the Town of King, Lincoln County.

The foundation was hoping to do more work at Treehaven, but the recession has taken a big toll on contributions to the project and called delays in further building. Several weeks ago, however, the Department of Health and Social Services -- Division of Corrections announced plans to develop the Clam Lake Field Station as a minimum security correctional facility beginning this September.

The Clam Lake facility, originally developed as a Jobs Corps installation in the late 1960s as part of the Lyndon Johnson Administration's war on poverty program, is now the property of the U.S. Forest Service. It is located in the Chequamegon National Forest and on lease to the UW System through February 1985.

At a meeting of the Wisconsin Building Commission on May 25, approval was granted to the Division of Corrections' request to negotiate an agreement with the Forest Service for the new use as a minimum security institution.

In making its pitch for state support in the Treehaven project, UW-SP submitted a proposal stating that, "One of the key aspects of the academic program in natural resources is the requirement that each student spend six weeks in a summer field program."

UW-SP officials noted that after receiving the gift of Treehaven property, a decision to relocate the camp there was made, in part, because it is 100 miles closer to the campus and cost of operation can be substantially reduced. There had been growing problem at Clam Lake because of deteriorating properties and inadequate facilities.

After the donation of the land by Jacques and Dorothy Vallier of Whitefish Bay in 1979, the university foundation raised funds to construct a 7,700 square foot dining/recreation center named for the late Irvin Young of Palmyra, a station manager's home, roads and parking, and water and sewer systems for those facilities.

One requirement the state has in order to put money into buildings at the camp is to gain ownership of 10 acres of land on which the structures will be located.

Marshall and Trainer said they hoped the state could forego some of the red tape procedures in preparation of construction so there will be no delay in the camp's opening by next spring. Some planning has already been done at foundation expense.

The hope is that the new buildings will be of cement block construction like the Young Center.

There will be continued involvement by the foundation in completion of the project. More student housing will be needed as well as finishing touches on the grounds.

Trainer said Treehaven will be more than a natural resources camp. Faculty in other disciplines have expressed interest in using it for a variety of purposes. Among them is Paul Palombo, dean of fine arts.

WE'RE LOOKING FOR ONE GOOD PERSON!

Applications for Head Student Manager of Technical Services are now being accepted.

The Technical Services Head Student Manager must exhibit a willingness to meet and help others, must display an ability to organize, supervise and instruct, and must be willing and able to accept responsibility. In addition, the applicant must meet the general qualifications for all UWSP student employees:

Must be a full-time student (6 credits) with at least two semesters remaining at UWSP and a GPA of at least 2.0.

A strong technical background i.e. audiovisual, sound reinforcement and lighting system experience is not mandatory, but is preferred.

Applications may be picked up in the conference and reservation office located on the second floor of the University Center Monday-Friday from 8 a.m.-4:30 p.m. (We're closed 11:45-12:30.) The deadline for all applications is Sept. 9 at 4:30 p.m.

Jock standards upgraded

The Milwaukee School Board recently upgraded their academic standards for athletes by announcing that for the 1984-85 school year those participating in athletics must maintain a 2.0 grade point average.

Last year the board had required a 1.5 gpa, or a C-minus, which was one-half grade point above the lowly Wisconsin Interscholastic Athletic Association requirement of a 1.0 gpa, or D.

Worried that this may reduce athletic participation by one-third to one-half, the School Board requested that athletes should earn their athletic privileges by learning. The request is tied to the accepted standards. One board member put it this way: "On the outside we're creatives, but inside we don't just ask them to." No strike for now in Chicago

The Chicago Teachers Union voted last week to keep the schools open for 420,000 students, thereby temporarily avertting a strike.

The strike was voted down by the union in an attempt to keep the schools open and to give the Chicago Board of Education more time to draw up an acceptable contract. The union is planning to vote on a new proposal September 15. If the 28,000 members reject the board's proposal the union will follow the recommendation of its governing body to strike beginning October 3.

Through last Friday, other areas of Illinois and 16 Michigan school districts were on strike keeping 61,000 students out of school.

Can you walk a straight X-walk?

Due to budget cuts for the Las Vegas Police Department, it will soon be forced to eliminate its crossing guard program. However, a new idea has taken form-use convicted drunk drivers as guards.

Under Nevada law, first-time offenders are to receive a minimum sentence of two days in jail or 48 hours of community service. While performing the sentence, the offenders must wear uniforms which will single them out as convicted drunk drivers. Hence, the possibility of drunk drivers becoming Las Vegas crossing guards.

The secretary of the Las Vegas branch of Mothers Against Drunk Driving said she would make drunk drivers more concerned about their and others' children's safety than to the successful rehabilitation of these offenders.

WI students over nat'! average

In his annual report on random statewide testing of 9,867 fourth, eighth and eleventh grade students, State Superintendent of Public Instruction Herbert Grover announced that one-third of the high school juniors scored below the national average in reading, language and mathematics.

Grover said that compared with the national average, the Wisconsin students were doing well. He also said that a number of students fall below the state average. Slightly lower percentages of the fourth and eighth grade students fell below the national average.

Grover said that the proper tool to deal with this situation is the state competency testing program. More than 25 percent of Wisconsin's 332 school districts have enrolled in the voluntary program.
DO YOU EXIST?

For legal and practical reasons, student organizations need to be re-recognized each fall to maintain formal recognition status. Please let us know if you exist! Re-register your organization (if you haven’t already done so) in the Student Life Activities & Programs Office as soon as possible. Services will not be provided to your group until this process has been completed! Report to us your new officers with addresses and phone numbers and have your organization advisor sign a form stating that he/she will advise your group.

Groups not re-registering their organization by Friday, September 23 will be assumed inactive and will be stated as being inactive in our semester organization listing which is distributed all around campus.

PLEASE VISIT US SOON IF YOU DO EXIST!

EVERYONE WELCOME!!
A random sampling of UWSP student opinion.

Gini Waddick
Sophomore
Wauwatosa
Natural Science
"I'd classify 90 percent as 'good'. I wouldn't classify any as poor. Yes, give them a pay raise. If they're teachers they're probably not making too much."

Niki Dalbesio
Sophomore
Stevens Point
Business Administration
"Seventy percent good and 30 percent bad. Yes, they deserve a pay raise."

Steve Kramer
Senior
Menomonie Falls
Water
"That's tough. I'd say 40 percent good, 60 percent poor. I don't think they deserve a pay raise."

Lisa Felber
Senior
Columbus, OH
Early Childhood Education
"I'd say about 10 percent were poor. The rest were good or average. Yes, I think they deserve a pay raise."

Tom Runnels
Freshman
Coloma
Computer Science
"I'd say about 80 percent are good so far. I've got one poor professor. Have they kept up with inflation? (P.M. "No") Yes, give them a pay raise. Will it raise tuition? (P.M. "probably") Then I guess they shouldn't get one. It cost enough to go here already."

Patricia Newman
Senior
Stevens Point
"I'd say every semester I have 35 percent that are good. Since I've been here, I've had two poor professors—seven to 10 percent. Administration people have kept up, but as far as Joe Professor goes I don't think they're keeping up with inflation."

Mike Gravenert
Freshman
Niagara
Music
"I'd say about 75 percent are good. None of them are really bad. They don't deserve a pay raise if tuition goes up."

Tami Dandelon
Freshman
Park Forest, IL
Sponsor Major
"Of the instructors I've had, I'd say all of them are good. Based on what I see, they all appear to be living comfortably. But I don't know all of the ins and outs. They all seem to be excellent, but can you put a price on excellence?"

Lynn Foley
Senior
Seymour
Business Administration
"I'd say 85 percent of them have been good. Maybe about 10 percent poor. I think they deserve a pay raise."

Nadine Palmer
Junior
Addison, IL
Dance
"I think they're all pretty good. Boring or not, I'm learning. I couldn't tell you (if they deserve a pay raise), because I am a transfer."

Cont. on p. 23

"Of the instructors you've had since you came to UWSP, what percentage would you classify as 'good'; what percentage as poor? In light of your analysis, do they deserve a pay raise?"
Campus Security: cuffed to a dead issue?

By Kim Jacobsen

Every year around this time, there echoes a plea from campus security for a bill to be passed allowing law enforcement status for Campus Security Officers. Every year, that plea is made, and every year, the committee forms, debates this issue, and the rules that campus security shouldn't be granted law enforcement status.

This year is no different than past years except that thus far, a committee hasn't been appointed. Without a body to discuss this issue, as it looks, they will make a recommendation to Philip Marshall, UWSP's Chancellor, who will in turn give the issue over to the Faculty Senate, who in turn will probably scream as loud as Bob Baruch of Student Life stated, "this is a dead issue."

No matter how some people feel, there is an equal number of people who feel this is not a dead subject. It's very much alive, and affecting their daily lives.

Some campus security officers feel that campus powers should be granted to them as adequate protection against criminal persons. In cases where a campus security officer has dealt with an incapacitated individual, they can make no decision on whether or not the person should receive medical attention until they have notified a city police officer. This situation can be especially frustrating. According to people who work for campus security, the entire job becomes frustrating when they feel there is little respect for the uniform they wear. Campus Security has asked to carry handcuffs. They were told they could carry them if they wanted to, but that it would be illegal for them to use them. As the matter stands, the campus security officer whose job is illegal, must rely on tactical maneuvers to detain a person in violation of the law until a city police officer can get to the scene. It is the opinion of some security officers that if they had law enforcement status, they could avoid such sidestep.

Further, some campus security officers feel they should be an education unit for the campus in general. In their view, many residence assistants and dorm directors aren't informed as to the duties of the campus security unit. The officers are left in a vulnerable position whenever they respond to a call.

Last year, the university had student volunteers to accost students until 2:00 a.m. Though this was 'a good idea by the security officers, the volunteers ran away from being just too louzy. Many times student patrol officers wouldn't show up for their shift. The problem for a large number of the student patrol officers was they felt used because the job was a voluntary position.

Many students weren't receiving pay or credit for the time they put in. As a result, many lost interest. When campus security officers feel they would be best suited to handle instances of arrest they deal with the students on a full-time basis. Our campus security officers want to be paid to handle student arrests. It is felt that when city police are brought into university matters it is usually for the purpose of making an arrest. If city police are only in contact with students to make arrests, it is likely they could develop hostile attitudes toward college students. This attitude may have an adverse affect on how the officer handles situations with college students in the future.

On the other hand, campus officers know what's going on. They see the good and the bad, so they know that not all happenings on campus are of an unpleasant nature.

Campus Security put together a review of the perceived problem, along with possible solutions. In their report, they stated the problem to be that: 'lability exposure is created; officers cannot provide a complete security and protection service to the University; the idea that reform is not uniform with other University system campuses; unnecessary inconveniences to the campus community; need to be handled by a campus law enforcement officer; the university community has unrealistic expectations of the security officers; and unsafe working conditions exist for the security officers.'

The solution to this problem, as seen by the security officers, is to have the Board of Regents and UWSP's chief administrative officer grant campus security officers law enforcement status. This was provided in the 1973 Wisconsin Statutes to the UWSP Security Officers.

When Administration is approached on this matter, they feel it all comes down to dollars and cents. If campus Security Officers are granted law enforcement status, they will have to be paid more. In a report submitted to Chancellor Philip Marshall in November 1982, the

Tide of mediocrity

Report shook academic world

by Joseph Vanden Plas

The University of Wisconsin-Stevens Point was shocked to many. After 18 months of thorough study, the National Commission on Excellence in Education, told the nation in May that "a tide of mediocrity" had crippled public education. Its message was distressingly clear: American education was decrepit, and so was the nation's educational system.

Suddenly educational reform was a top priority for most of the prospective presidential candidates. President Reagan was particularly outspoken, utilizing his bully pulpit to push proposals such as merit pay for teachers and a "back to the future" approach to improve curriculums. Others such as Walter Mondale and Gary Hart stressed the need for greater federal support of education.

Although there was some evidence that major reforms were already being implemented across the nation, the commission's frightening conclusions were not ameliorated. The commission reported that: the quality of teaching in the public schools is inadequate and there is an urgent need for qualified math and science teachers in all 50 states.

An increasing number of elective courses in secondary schools has undermined the strength of curriculums, thereby inducing the nation's colleges and universities to provide remedial courses that would otherwise be unnecessary. Moreover, the commission reported that only one year of math and science is required for a high school diploma in 70 percent of the states. No state has a foreign language requirement at the secondary level.

College admission requirements are reported to be inadequate and perhaps because secondary school curriculums are so weak. One-fifth of all four year state colleges must, by law, admit anyone with a high school diploma. Maintaining sufficient enrollment levels is of greater concern to college and university administrators than maintaining tough academic standards.

The commission suggested several reforms, including compulsory instruction in the basics: four years of English, three years of math, science and social studies, one-half year of computer science for all students, and two years of foreign language for college bound students. In addition, the commission recommended that museum standards for teaching candidates, teachers salaries be increased, performance, seven-hour work

The UWSP physics/astronomy department doesn't receive enough funding to keep up with "the state of the art," according to department chair Francis Schmitt. The department hasn't received substantial funding since the Science Building was built in 1964.

"There are no funds to refurbish aging equipment or get new technologies," Schmitt said. "We haven't been able to buy adequate research equipment. We run a respectable physics/astronomy program here, but at the absolute limits of doing so."

Schmitt said that the department can offer students theory and quality teaching, but not the opportunity to work with the latest equipment. It offers students new ideas with new equipment — not the "outmoded pieces we have now."

Physics has the best enrollment that it's had in the last ten years, Schmitt said. But in the labs, there's not enough equipment to go around.

The physics/astronomy department received $11,300 as its total operating budget, he continued. Paper costs, telephones, and laboratory supplies eat up the majority of the budget. "What is left is residual income — that's what we're talking about."

The money that is left doesn't go very far. Lab equipment prices have been hit hard by inflation. For example, a lamp system for optics costs $1500.00. A vacuum pump costs $600.00 and a digital multimeter costs $1200.00. A microcomputer printer costs $650.00 while a disc drive system costs $1200.00. Regulators for oxygen and hydrogen gas cost $150.00 each. And this is the microcomputer equipment.

"Our old oscilloscope and audio visula aren't up to date either," Schmitt said. "We sometimes have to use film costs with the library. It costs $600.00 to $700.00 for a good film.

Features
Educational Systems: a tale of two countries

By Cal Tamanjti

Many American and other foreign students on this campus, as well as professors who have often stopped me around the campus to ask questions, have been interested in the differences between the US and Cameroonian systems of education. This essay will make a long story short.

Because geographic, political, historical, cultural, religious, and financial factors are necessary for the establishment of an educational system in a country, I think that Cameroon, though a developing country, is blessed. She has had a touch of most Western traits whether they are real or not. She don't mean a damn what a student gets or how good a student she is.

I grew up in a country where I had to depend upon what a student gets or how good a student she is. No employer asks how good are the students. I was sent to a school even from a plus to a minus. I was sent to school in the most ridiculous way that I could sit in your stomach and tell you they're "awfully disappointed if they don't do as well as you did in the past." Even when you try to tell them that when you broke your leg, you fell on the floor in the middle of a dance and that you lie there, they still tell you they are ashamed.

Security, cont.

Committee to Review the Role of Protective Services stated they saw no just cause for Protective Services to be in any way involved in the law enforcement status. The Committee concluded in a frequently-repeated recommendation report that: Protective Services should be reviewed and, under the new report on a student's license, the new responsibilities for at least a year before other changes are contemplated. Nonetheless, a committee also recognizes that certain recommendations, when adopted, may result in a change in the overall direction; and that Protective Services must have the latitude to recommend changes to the Assistant Chancellor for Business Affairs at any time.

The committee also believes that Protective Services and the Assistant Chancellor recognize the importance of the student's health and there has been an effort to bring about the appropriate Student Government Association and Faculty Senate involvement if deemed appropriate.

Bob Baruch, who has been the president of Baruch College for the past five years stated he was discouraged. He listed three reasons why law enforcement status hasn't been adopted on this campus. They are: "1. It hasn't been shown that Protective Services would function more efficiently if arrest powers were granted, 2. There is considerable feeling that if arrest powers were granted it would create a less than harmonious relationship between Protective Services and the students, and 3. Protective Services doesn't have any relationship with most students, and can accomplish most of what needs to be accomplished.

Baruch felt the base line of why this issue has failed in the making is because, "everything found proves arrest powers are necessary for our Campus Security personnel. As of yet, I have not been provided with a persuasive logical reason why arrest powers should be granted."

Baruch, as well as people like A.J. Torzewski, feel campus security serve a completely different, positive function in the university more than that of a regular Police force. Baruch said he feels that Protective Services worked well and was in tune with the developmental philosophy practiced on the campus. Their behavior in dealing with problems in the past has been super.

Report, cont.

school days longer school year. The importance if standardized achievement tests to upgrade college admission requirements is always the something as important as the methods we choose to improve it. Nevertheless, the onset of the technological age may yet inspire another deep change in the pursuit of academic excellence, as the challenge of Spunkin in the 15th century always warns that we risk "our very future as a nation and a people."

 Sciences, cont.

The top item that the department needs is a new projector for the planetarium, Schmitz said. "The projector is 20 years old and it's in need of replacement. It was given to us by a customer who has now made it a profit," he said.

The department restructures an optics lab and an electricity and magnetism lab for juniors and seniors. The optics lab needs $2,000 worth of equipment, while the electricity and magnetism lab needs $13,000 worth. "The optics equipment is all too old," Schmitz said.

"If the primary function of the physics department is the education of students, the primary part of the budget should be toward student instruction," Schmitz said.

Schmitz questioned whether auxiliary University functions should be in the budget at all. "Are those functions the University performs that are not necessary for the education really necessary?" "The state isn't seeing to this," Schmitz said. "We have not done well. There is no money coming in. We're working our butts off just to make the semester basis, trying to keep up."
College paper under attack

An argument over the U. of South Alabama student newspaper's right to endorse candidates has turned into a legal dispute over control over the newspaper.

Mike Scogin, editor of the Vanguard, the student newspaper, currently faces contempt of court charges from the student Supreme Court for failing to obey an injunction prohibiting him from endorsing candidates. Scogin sees the conflict as a First Amendment issue. "I don't think the Supreme Court, which is part of the Student Government Association, should have any control over what goes into the newspaper," he says. "I don't think I should have to obey instructions from anyone other than our Publications Board." For that reason, Scogin doesn't plan to attend a court hearing on the charges.

But SGA President Leonhard Tillman believes Scogin is placing the Vanguard above student law. "You can't selectively choose the laws you want to obey," he maintains. "They get $1 from every student on campus. They have a responsibility to follow the law just like everyone else."

Lost in the shuffle is the original dispute over the Vanguard's right to print endorsements. The paper hasn't endorsed candidates in the past. In fact, the university administration halted a previous endorsement plan in 1980, on the grounds that a student-funded paper shouldn't favor one candidate over another. This year, with the backing of the Board of Publications, Scogin held interviews with all candidates, and chose endorsements based on a committee vote. When SGA heard of his plans, it got the injunction to stop the Vanguard from printing the endorsements. Scogin printed them anyway, drawing the contempt of court charges.

Technically, the student court has the power to impeach Scogin, but he doesn't believe that can happen. "In a way this is positive, since it will help resolve a long-standing question of control of the paper," he says.

"World Views Through Film" looks attractive

The department of geography and geology at the University of Wisconsin-Stevens Point will offer a second annual "World Views Through Film" series to the public during the fall semester.

The films will be shown without charge on Wednesdays at 7:15 p.m. in Room D103 of the Science Building, beginning Aug. 31. One could be provided on the pass-fall system for those who register and pay the tuition fee. Registration is open through Sept. 2.

Thomas Detwyler, department chairman, says the showing of the films and accompanying group discussions will focus on recent geographical issues in various regions of the world. He describes the films as reflecting views from other cultures as a means of helping the class transcend American ethnocentrism.

The schedule of films, which vary in length from about one-half hour to slightly more than one hour and a half, is as follows:

Aug. 31, Controlling Interest: The World of the Multinational Corporation, an examination of corporate impact on economic and political development in the U.S. and the Third World;

Sept. 7, Acid Rain: Requirements or Recovery, an exploration of what acid rain is, where it originates and how it threatens our environment;

Sept. 14, The Patriot Game: A Decade-long Battle for the North of Ireland, a review of 10 years of warfare by the IRA;

Sept. 21, The Volga, an insight into modern Russia against the background of the river;

Sept. 28 — Calcutta, Louis Malle's documentary about Helen Caldicott;

Oct. 5, Farm Song, interviews with four generations of a Japanese family;

Oct. 12, Takeover, "Inside" look at a community under threat from "development" and the behavior of politicians when dealing with the Aborigines;

Oct. 26, Factorys for the Third World: Tunisia, an analysis of the economic changes in Tunisia;

Nov. 2, South Africa: The White Laager, history of Afrikaner nationalism and the development of Apartheid in South Africa;

Nov. 9, Mexico: The Frozen Revolution, an illustration of the Mexican Revolution of 1910-17;

Nov. 16, El Salvador: Another Vietnam, an examination of the civil war in El Salvador with an overview of American policies in the region;

Nov. 30, America: Everything You've Dreamed Of, four sequences of life in America, accompanied by this is the House of Mrs. Leivant Graham, a story of a poor black family.

People choosing to sign up for attendance for academic credit may do so at the Office of Registration-Records in the Part Student Services Building.

Topeka goes to the dogs

Attention entrepreneurial college students: If you're searching for a way to finance tuition, rent or text book costs, take a cue from Lauren Johnson, 24, of Topeka, Kansas. Johnson wanted to operate her own hotdog stand. But until recently, there was no ordinance allowing retail sales on Topeka's city streets. Moreover, the owners of local restaurants were trying to thwart her efforts.

Nevertheless, Topeka's city council, following weeks of heated discussion, adopted an ordinance last week allowing Johnson to deal her dogs. And frankly, business has been booming, said during her first day in business. Then I went out and got 150 more. If this keeps up, I'll have to restock again to make it through the day.

Where have all the flower children gone?

It seems there's no respect for tradition any more.

An informal survey taken recently at the University of California at Berkeley indicates that political awareness at UC-B has declined.

According to the survey, students are interested in wind surfing, love macaroni and cheese and believe basic campus equipment includes stereo head sets and mini calculators. This is a far cry from the days when a Berkeley student's main concerns were the Vietnam War and a conservative governor named Ronald Reagan.

"Political sensitivity has dropped," agreed professor Charles Muscatine.

Students need a shot in the arm

The threat of a measles outbreak may still exist on college campuses across the country, according to public health officials.

As many as 20 percent of today's college students may still need vaccines for measles.

Health officials also cite nonuniform vaccine requirements from state to state for other diseases such as mumps, rubella, diphtheria, tetanus, whooping cough as the basis for concern about health on college campuses. "Very few states require vaccines for everyone," said Richard Bruce, a public health adviser for the Center for Disease Control in Atlanta, Ga.

Flashdance gives dreamers hope

By Chris Celichowski

Many of us chase dreams, like elusive butterflies, hoping to catch them and savor their beauty and vibration. "Flashdance" is an enchanting film portraying a young woman's pursuit of her fluctuating dream in working-class Pittsburgh. As in your own lives, the spirit and passion of her venture may not only in her lofty goal, but in its pursuit.

Alex Owens, played by an alluring and spirited Jennifer Beals, works as a welder in a steel factory while moonlighting as a dancer in a local bar. Although a talented modern dancer, she yearns to join the Pittsburgh Ballet Company. Unsure of herself and fearing failure, she nearly abandons her dream. Nick Hurley (Michael Nouri), a made businessman Nick Hurley (Michael Nouri), enters her life.

Nick's personal success story provides the impetus for Alex to pursue her dream. In turn, Nick lacks and would like to capture the innocence of Alex. After initial antagonism, prompted by Alex's desire to avoid dating her boss, the two predictably fall in love.

"Flashdance" goes beyond Alex's personal search for success and touches on the lives of her friends searching for the same thing. Her closest friend is an aging ex-Ziegfeld girl Hanna Long (Lilia Skala) who nurtures and encourages Alex's high hopes. Waitress Jeannie Szabo (Sunny Johnson) wants a job with the ice follies whileburger cook Ritchie Blazik (Kyle Hefner) yearns for a stand-up comedy's job in L.A.

The subsequent failure in those close to her dampens Alex's hopes and strains her relationship with Nick. Their love affair is nearly destroyed when she discovers Nick used his influence to get her an audition with the ballet company. The film's soundtrack, lead by Irene Cara's performance of "Flashdance... What a Feeling!" has climbed to the top of the charts for good reason. The songs are entertaining and electric present in the many dance scenes. Cara's rendition of the title song rivals her shockingly powerful performance of "Fame's" title cut. Donna Summer, Laura Branigan, Kim Carnes and Joan Jett and the Blackhearts are just a few of the many singers lending their talents to the flick.

Jennifer Beals gets her creative inspiration from the street.

The dance numbers drew gasps of delight and surprise from many in the audience due to their frank sensuality and power. One of the film's highlights features a group of street kids performing "break" dancing with some unbelievably slick and stylish moves ala Michael Jackson.

After her spectacular performance in "Flashdance", Ms. Beals appears headed for sure stardom. Drawing her strength from the raw energy of street life, Alex becomes a lovable character. Beals imbued her character with just the right measure of charismatic warmth and sweetness, avoiding a fairy-tale stickiness that would have been too much for us to swallow.

Nouri, a former member of the "Search for Tomorrow" cast, gave a strong but not spectacular performance. Casting him in the role of Nick Hurley was wise because his age and apparent maturity complemented Beals' young innocence well. If, like the mass of humanity, you have an elusive dream that remains unfilled you should consider viewing "Flashdance". It might inspire you enough to resume the chase.

P.M. Invite

Feel write at home with us

So you think you've got ink running through your veins. It's time to put on a mug that just won't take "no" for an answer and which is threatening to foreclose on your considerable writing skills unless you find it a public forum. What's an aspiring artist to do?

Don't despair just yet. Pointer Magazine is in constant need of writers, especially the highly skilled, creative kind. If you fit this description and would like to see your work get some long overdue exposure, bring your stuff (articles, cartoons, dream when her boss our office (113 CAC) and we'll discuss its possible inclusion in one of this semester's Pointer Mags.

Some general tips you should consider. If you really want to see your creations in print, your Ads in the form of articles are never printed.

1) Articles whose sole purpose is to pitch a small campus organization without some form of broad student appeal will not be run.

2) Areas that usually don't receive much mention like the campus sciences and the Home Ec. school are especially fertile subjects for possible stories if you possess some first hand knowledge about them.

3) Review people are needed most to cover campus art and music offerings. Book reviews, especially when written about works with some academic value, are always welcome. Record and movie reviews are pretty much reserved for our features staffers.

4) Humor, satire, and other types of feature articles will be accepted strictly on a hit or miss basis. If we can use it, great! If not, sorry...try again.

7) Guest editorials may also be brought in. In the past, we have run all guest editorials that were well written and logically reasoned. If, in the opinion of the Pointer Magazine editorial staff, an editorial doesn't meet those two criteria, then it will be boxed onto the "mail" page as a personal letter.

8) No one but the editor-in-chief can PROMISE you that an article will be published—and he's usually smart enough not to do that. What we will promise is that if you submit quality work (in any area), we will certainly give it serious consideration.

9) There's no money involved in this deal for you, although it could lead to your discovery by next year's editor. He, in turn, may want to hire you to work for him.

10) We are not interested in columns, plagiarized work, or harshly critical copy. Please type, write your own stuff, and wait until you get the cushy job with the L.A. Tribune before starting your columnist career.

If you need to go to a phone booth to call this number, you need to call this number.

New Path for CNR Dollars

by Andy Savagian
Environmental Editor

A new budgetary system that puts added responsibility on each individual college tops the list of variations in the College of Natural Resources this year.

In the past, the money budgeted to various colleges was handled at the university level, creating a type of central funding organization. This integration of monies would pay or help pay for certain personnel and departmental endeavors—the hiring part-time faculty and the taking care of the work study program dollars to name a couple. Now the funds are budgeted to various colleges, allowing for university units, such as business affairs, student affairs, and academic affairs, which are in the CNR under the Vice-Chancellor of Academic Affairs. The dollars are divided up to the dollars that go to the individual college, and they can be used effectively to where they want and whenever they want. In an interview with Pointer Magazine, the Dean of the College of Natural Resources, Daniel Trainer, pointed out that the CNR is "kind of different," compared to most of the other colleges.

"They (other colleges) tend to departmentalize, so that they set their dollars and then divide up their dollars by each department. In other words, history will get X number of dollars, biology will get Y, math will get a certain amount, and so forth. We don't do it quite that same way because we don't have departments. As a group we always decide how to spend our money within the college." Dean Trainer also stated that the new system does cause some problems. Besides the problem of less dollars this year than last, which most colleges are experiencing, Trainer also referred to difficulties with the new budgeting program.

"It used to be that work study dollars were allocated from the financial aid office," said Trainer. "We would request what we needed for work study help, then we would get it, and so forth. Now, we are always able to acquire pretty much what we needed for work study. Now what they did, they took an average of two years as to how much we spent here, they gave us those dollars, and we have to do our own hiring, keeping track of how much is spent and so forth. There's a lot more work with bookkeeping now than we ever had before. The other thing that happened is we ended up with less work dollars than we had in the past. Time will tell if we can work that out in the future."

Another disadvantage Trainer mentioned was the small size of the college. "We have 50 percent of all the students that are in our college, and in the faculty it's only like 6 percent. For actual dollars we don't have a lot because of the small number of faculty. Where that becomes a problem is that certain things used to be handled at the university level. For example, we had a sick leave coverage: if somebody got sick (a faculty member) and couldn't teach, they would have a reserve fund that could be used to hire somebody to replace that sick faculty member."

Dean Trainer

We're such a small college in that area that if we would lose somebody in a specialty area, we couldn't cover for it. I don't know where the dollars would come from to hire someone to replace that sick faculty member. So, if we had a real emergency like that we might be in trouble. Our budget now, everything we have, is committed—we've got it all spent. There's just no flexibility."

The change in budgets did not affect all areas of the CNR, such as the section dealing with the University of Wisconsin-Extension, which is budgeted separately, and most lab research, which comes from outside grants. Dean Trainer added that the main objective of the change is to make each college more money conscious. "That's the idea. They'll have to live within their allowance, now you go ahead and spend it, and spend it wisely or you're in trouble."

In other areas of the CNR, enrollment seems to be relatively stable. "The early reports on student hours. Some departments have shown a heavier enrollment, which is budgeted separate-

Standards improved for environmental education

By John C. Savagian
Environmental Co-Editor

For the past forty-eight years, Wisconsin's natural resources have been required to learn about receiving certification, environmental education. The proposed amendment includes early childhood, elementary, early childhood-except educational needs, and agriculture teachers among those who would be required to complete preparation in environmental education. Also required to meet the new requirements are those in the science and social science fields.

The effort to improve the standards for environmental education has transcended the typical boundaries of academia. UW Stevens Point Associate Professor Richard Wilke has been the chairperson of the study group which submitted the proposed changes to the State Superintendent's Advisory Council for Teacher Certification and Education. He commented on their efforts to garner support for the new rules. "This has been a long process and we have had to get a lot of support for it, bringing in people who when we were starting this were opposed to this rule because it was outdated and didn't reflect current thought, or current problems. They said, 'Get rid of it,' and others were saying, 'We can't do without it.'"

The proposed environmental education amendment includes early childhood, elementary, and secondary level students. "Environmental education programs have been the forerunners of things like recycling, and environmental clubs, and the like. The proposed environmental education amendment would be integrative," Wilke said. "It would be very difficult to separate environmental education from other educational areas." Wilke noted that the Standards Improvement Committee, an advisory group to the State Board of Education, has been meeting to discuss the proposed environmental education amendment. "We are looking for action on the Standards Improvement Committee in the near future," Wilke said.

by Todd Hotchkiss

How are the financial resources of the UWSP budget distributed? Where does the money come from?

A visit to Ron Lostetter, UWSP budget controller, provided the basic, general answers to these questions. Lostetter provided the most up-to-date information to Pointer Magazine, which meant last year's budget figures.

Last year's projected revenue and allocations for UWSP was $47,978,292. A noteworthy importance is that these figures were budgeted rather than actual figures. Actual figures will be tabulated by the end of this month and publication is forecast by the end of November. These figures represent the de facto revenue and spending levels for UWSP last year. The budget figures are the planned-for spending levels last year.

There should not be "significant" differences between the budgeted and actual figures, said Lostetter, because there are many "controls" regarding revenue and spending distribution. Speaking as President of UWSP, Lostetter, "There will be some swing."

Chart 1

<table>
<thead>
<tr>
<th>Revenue Source</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student Tuition</td>
<td>$47,978,292</td>
</tr>
<tr>
<td>Private Gifts and Donations</td>
<td>$2,320,388</td>

<tr>
<td>Tuition Waives</td>
<td>$1,293,888</td>
</tr>
<tr>
<td>Tuition Fee</td>
<td>$9,465,292</td>
</tr>
</tbody>
</table>

Benefits was projected to absorb 11 percent or $5 million of the UWSP dollars. Next in the spending are Real Estate and Student Fees, which includes Tuition, Tuition Waives, Tuition Fee, and Private Gifts and Donations.

Two categories, Loans and Grants to Students and Capital Items, each comprising 7 percent of UWSP plans and amounting to $3,34 million and $3,35 million respectively projected to be spent last year. The former category represents the amount spent by financial aids while the latter category represents money spent on library books, typewriters, computers, anything purchased for over $500.

The smallest spending category projected for UWSP last year was $2.3 million for Student Salaries. Constituting 5 percent of UWSP's categorized spending plan, this money, according to Lostetter, was allocated by all regular work and work study-whatever was paid to students in salaries.

Another major way of outlining UWSP's spending is via "Budgeted Expenditures by Major Activity." This classifies money spent according to the various operations or functions of UWSP. Ten major "activities" are used in the UW system, of which only nine can be used here at UWSP. The tenth activity is Hospitals.

The cost for Instruction is the most expensive activity for UWSP, consuming 40 percent of its budget or $18.55 million. Included activities are course development and classroom instruction. Lostetter pointed out that all of these activities are not purely personnel. Instruction also includes purchases of books which directly support it, like xeroxing.

Civil War Enterprises constitutes 25 percent of UWSP's spending plan, consuming $12.3 million. Included in budgetary division

Less noteworthy expenditures are incurred by Extension and Public Services, 1.5 percent or $89,522, and Research, 1 percent or $126,292. The former includes all activities and services available to the general public but which do not produce academic credits.

The final manner of showing how the $47,978,292 UWSP budget was expected to be spent is "Budget by Cabinet Officer." This lays out the cost distribution for each of the highest ranking administrators at UWSP is responsible for managing. The Vice Chancellor in charge of spending for all of the Colleges, was responsible for 45 percent of last year's budget, or $21,47 million.

The Assistant Chancellor for Student Life anticipated to be responsible for 38 percent of last year's spending. Responsibility over this $18.9 million included spending for residence halls, student organizations and student activities.

Together, therefore, these two positions control 80 percent or $39,431,867 of aggregate UWSP spending.

The Assistant Chancellor for Budget Affairs was to command 15 percent of last year's expenditures or $7.1 million.

The Assistant Chancellor for University Relations, responsible for such assets as News Service and Extension and Public Service, was to keep watch over $1.2 million last year. This constituted 3 percent of UWSP's spending.

The Assistant to the Chancellor was responsible for 2 percent of UWSP's spending or $0.86 million. Both the Chancellor's Office and "University Wide," a catch-all for those expenses not hemmed in by the boundaries within the university, each anticipated to be responsible for 1 percent of last year's spending.

Less noteworthy expenditures are incurred by Extension and Public Services, 1.5 percent or $89,522, and Research, 1 percent or $126,292. The former includes all activities and services available to the general public but which do not produce academic credits.

The final manner of showing how the $47,978,292 UWSP budget was expected to be spent is "Budget by Cabinet Officer." This lays out the cost distribution for each of the highest ranking administrators at UWSP is responsible for managing. The Vice Chancellor in charge of spending for all of the Colleges, was responsible for 45 percent of last year's budget, or $21,47 million.

The Assistant Chancellor for Student Life anticipated to be responsible for 38 percent of last year's spending. Responsibility over this $18.9 million included spending for residence halls, student organizations and student activities.

Together, therefore, these two positions control 80 percent or $39,431,867 of aggregate UWSP spending.

The Assistant Chancellor for Budget Affairs was to command 15 percent of last year's expenditures or $7.1 million.

The Assistant Chancellor for University Relations, responsible for such assets as News Service and Extension and Public Service, was to keep watch over $1.2 million last year. This constituted 3 percent of UWSP's spending.

The Assistant to the Chancellor was responsible for 2 percent of UWSP's spending or $0.86 million. Both the Chancellor's Office and "University Wide," a catch-all for those expenses not hemmed in by the boundaries within the university, each anticipated to be responsible for 1 percent of last year's spending.
HUNGRY UNIVERSITY?

Chart 5
Of the revenue base for UWSP, 59 percent of the generation of money comes from two sources, Student Tuition and Wisconsin General Taxes.
Chart 5 indicates what portion of this 59 percent revenue base is constituted by these two factors, both of which were explained above.

Wisconsin General Tax account for 70.7 percent or $20.3 million of this revenue base. Student Tuition Payments constitute 29.3 percent or $11.42 million.

Chart 4

Chart 6
The following three charts are based on the revenue model in Chart 5. In other words, the revenue base for Charts 6, 7 and 8 has been reduced to 59 percent of the total revenue base for UWSP. This revenue base is referred to as funds from General Purpose Revenue (GPR).
Charts 6, 7 and 8 are comparable to Charts 2, 3 and 4. The only difference is the reduced revenue base. The next three charts are intended to show how GPR funds, revenue from state taxes and student tuition, are spent. All of the funding levels have understandably been reduced because of this revenue reduction. However, the importance lies in the percentage of funding and how these figures change when the revenue base is concentrated on GPR funds.
Chart 6 illustrates how the $28.72 million GPR revenue base is spent "by major category." This is similar to Chart 2.
Although decreasing from Chart 2's expenditure of $15.43 million to $13.9 million in Chart 6, Faculty and Academic Staff Salaries jumps 16 percentage points to 48 percent of spending. This indicates that more of tuition and state tax revenue are proportionally invested in salaries than the other sources of revenue.
The same story can be told for Classified Salaries and Fringe Benefits. Each dropped in the amount spent from Chart 2, the former dropped just under $2 million to $4.8 million, the latter lowered by a shade over $3.9 million to $0.2 million. However, the percentage of the revenue base rose for each from Chart 2 as the former rose 3 percent to 12 percent and the latter rose 4 percent to 15 percent.
Supplies and Travel proportional is funded less by tuition and state taxes as it dropped $.7 million from Chart 2 to $.76 million, and dropped 24 percent of the revenue base to 16 percent in Chart 6.
The last three categories tell a similar tale as summarized below:
- Capital Items: Over a $3 million drop from Chart 2 to $.53 million, with a 5 percent drop in proportional funding to 2 percent.
- Student Salaries: Under a $1.5 million drop in spending totaling in Chart 6, the proportional spending dropped from 5 percent to 4 percent.
- Loans and Grants to Students: Chart 6 graphically illustrates after looking at Chart 2 how little tuition and state taxes play in financial aid. Dropping from Chart 2's $3.54 million spending level to $.027 million spending level, Chart 6 proportionally drops 8 percentage points to 1 percent of spending.

Chart 7
Budgeting state taxes and tuition by major activity results in numerous forms of shakeup in Chart 7 when compared with funding levels and percentages in Chart 6.
Instruction remains the largest expenditure as it suffered only a little under a $2 million funding drop. However, the percentage of instruction from Chart 3 to 1 percent in Chart 7, Auxiliary Enterprises dropped from $12.2 million in funding to $.15 million.
- Loans and Grants to Students dropped proportionally to Student Aid's 7 percent to 1 percent on Chart 7. The funding level decreased from $3.54 million to $.027 million.
- Enduring the smallest drops in both proportional and funding levels was the least consequent activity. Extension and Public Service dropped from 1.5 percent to 1 percent of spending while dropping from $.69 million of spending to $.083 million.

Two new activities were delineated by the discrimination of the revenue base: Building Amortization and Utilities. The former spends 7 percent or $1.39 million of the state tax and tuition generated revenue, while the latter spends 4 percent or $1.14 million.

Plus, one activity, Research, maintained its proportional funding of 1 percent while dropping from $.36 million to $.051 million.

Chart 8
"Budget by Cabinet Officer" through money generated by state taxes and student tuition shows how the responsibility over the vast majority of these two revenue sources is extremely centralized.
The Vice Chancellor is shown to have 65 percent control over all state tax and student tuition generated revenue. This means that the Vice Chancellor has 65 percent control over approximately 53 percent of all spending at UWSP, or $18.75 million. The Vice Chancellor has the most centralized, important budgetary position at UWSP.

The flip-side of the Vice Chancellor's position is the Assistant Chancellor of Student Life. The Assistant Chancellor of Student Life drops in 5 percent of tax and tuition generated spending, or $.33 million. However, this Chancellor, you Cont. on p. 28.

$30 college membership/semester stop in today - 1000 Division St.
The 1983 season for the UWSP football team began Wednesday when approximately 140 candidates reported to the school to begin fall practice.

The Pointers of second year coach D.J. LeRoy open the season on Saturday, Sept. 10, when UWSP hosts Bethel College in a 7:30 p.m. contest at Goerke Field.

Included in the group of returning letterwinners are top returner Mike Van Asten (6-0, 220) and Jeff Rutten (6-1, 235) return to the linebackers as does highly touted sophomore Rick Paulus (5-11, 235). Robin Retterath, a transfer from UW-River Falls, and a number of freshmen will also be contending for playing time. The secondary also needs rebuilding as only junior Rick Wietsendorf (5-8, 160) and senior Ron Whitmore (5-11, 190) return. Lincoln Meinen (5-7, 155) is a returning letterwinner while Pacelli all-stater Mike Brekke leads the incoming freshmen class. Two-time All-UWSP performer Gary Van Vreden and Doug Whitmore are two starters who will be missed. Standout placekicker Randy Rysko has graduated and punter Mike Bauer (5-10, 190) will hold to create a big void on the special teams. Senior Jon Kleinschmidt, the punter two years ago, is up against some competition for both duties. All-state kicker Kim Drake of Milwaukee will battle for the kicking position while fellow yearling Brad Roberts of Green Bay (Southwest) was a prep standout at both slots. Chip Klabough of Fau' Claire (Memorial) is also an accomplished punter.

Cowboys should walk 49ers in 4-way battle for West

By Bill Laste

This week Pointer Magazine picks the best of the NFC East and West divisions.

**NFC West**

1. San Francisco 49ers
2. Atlanta Falcons
3. New Orleans Saints
4. Los Angeles Rams

Can a divisional race end in a 4-way tie? Not likely. But for the love of the division, it would happen in this year’s NFC West. No team appears good enough to win the division, but no team appears bad enough to lose it. However, a quick glance over the San Francisco 49ers’ roster shows just how much talent the team possesses. The team boasts a really good nucleus of offensive talent and they are being complimented by an already strong pass rush and take some heat off of the offense.

The New Orleans Saints made some rather odd moves after their disappointing 2-14 season. They traded away two-thirds of their draft class choices. Why would anyone want to trade away a good draft class? Well, Bum Phillips has a plan.

Two years ago Bum put 21 first year players on the field. The result, of course, was a losing season. But 21 rookies gained a lot of big-league experience. Last year the Saints played more rookies than any other team and you can find in the list many of the players they signed this year.

John Riggins was the horse the Washington Redskins rode in on last year, but after he was traded a number of the Redskins players are available with this new team. It is pretty much the same team that won Super Bowl XVI. But a number of those who were lauging at the antics of Joe Montana have dropped the 49ers to a 3-4 record last year. This year Joe Montana should be back from injuries to a knee and elbow. Pins, the addition of running back Wendell Tyler should give the Niners a strong ground game. The offensive line, however, is still pretty banged up with last year’s top drafthee, tackle Bobbette Paris, recovering from knee surgery. But there’s still a lot of talent on this team and the 49ers only have to be slightly better than average to win this division. They’re capable of that.

**NFC East**

1. Dallas Cowboys
2. New York Giants
3. Washington Redskins
4. St. Louis Cardinals
5. Philadelphia Eagles

Unfortunately for the Rams, however, the defense is not as good as the offense and as the offense has the potential to be good. The Rams traded their starting quarterback to the Saints and drafted a few promising defensive players but they’ll need more help than that. Watch for the Rams and the Cowboys to score a lot of points.

The Dallas Cowboys look like a fourth place finisher in the west. But fourth place in this division could mean being only a game out of first, so if the Rams get some help in the division they could finish near the top. Their strength is in the offensive line. The secondary includes All-Pro Kent Hill and Dennis Harrah. And now the Rams have a running back who could take advantage of the line in rookie Eric Dickerson. Plus, quarterback Vince Ferragamo appears to be back in top form. He just missed an all-time NFL record with a 509 yd. passing performance against the Bears.

Two years ago Bum put 21 first year players on the field. The result, of course, was a losing season. But 21 rookies gained a lot of big-league experience. Last year the Saints played more rookies than any other team and you can find in the list many of the players they signed this year.

John Riggins was the horse the Washington Redskins rode in on last year, but after he was traded a number of the Redskins players are available with this new team. It is pretty much the same team that won Super Bowl XVI. But a number of those who were lauging at the antics of Joe Montana have dropped the 49ers to a 3-4 record last year. This year Joe Montana should be back from injuries to a knee and elbow. Pins, the addition of running back Wendell Tyler should give the Niners a strong ground game. The offensive line, however, is still pretty banged up with last year’s top drafthee, tackle Bobbette Paris, recovering from knee surgery. But there’s still a lot of talent on this team and the 49ers only have to be slightly better than average to win this division. They’re capable of that.

The Atlanta Falcons only need some consistency to give the 49ers some trouble. The offense has almost limitless potential with QB Steve Bartkowski, William Andrews and Qb Joe Montana at quarterback. The defense is loaded with talent and Marv Levy has his trademark 3-4 defense.

The Washington Redskins’ outlook is less than promising. But they do have a potential running back in John Riggins and they’ve got a chance to win this division.

The Dallas Cowboys look like a fourth place finisher in the west. But fourth place in this division could mean being only a game out of first, so if the Rams get some help in the division they could finish near the top. Their strength is in the offensive line. The secondary includes All-Pro Kent Hill and Dennis Harrah. And now the Rams have a running back who could take advantage of the line in rookie Eric Dickerson. Plus, quarterback Vince Ferragamo appears to be back in top form. He just missed an all-time NFL record with a 509 yd. passing performance against the Bears.

But there’s still a lot of talent on this team and the 49ers only have to be slightly better than average to win this division. They’re capable of that.
Outlook is good for harriers

He is ‘without three of last year’s top performers and this year’s squad is a bit of an unknown entity, but UWSP’s cross country coach Rick Witt has a good feeling about his 1983 team.

The squad began the 1983 season in impressive fashion after competing in the Pointers easily won a triangular meet.

Witt has four mainstays and five of last year’s letterwinners returning from last year’s team which finished third in the WIAA State Meet and fifth at the NCAA Division III National Meet. He also feels that a number of newcomers may make an impact.

The thing that Witt makes Feel good his 1983 team is the attitude it has reported with and the depth which the team will possess.

I feel that our biggest asset will be our depth as we have a good number of runners and they will really be pushing each other,” Witt said. “Many of the guys in the top 10 have really come up the season and the best shape they have ever been in. These guys are very hungry and they really want to have a good team and a great year.”

The Pointers no longer have the services of standouts Dan Schoepek, Ray Pryzbylski and Dave Parker, but three seniors are back to help pick up the slack. They are Lou Agnew, who finished 10th in last year’s WSUC meet, and brothers Tom and Mike Butcher, both of Stevens Point. The latter was the NCAA Division III 800 meter record-holder and National champion last season.

The remaining national meets that a competitor returns is sophomore Jim Kowalczyk of Cedarburg. Other veterans who should be contributors are track standout Dennis Koton who has missed the last two cross country seasons because of injuries; Ken Bauer, a former WISSA cross country state champion who did not compete last year; Fred Hohenese and Tedd Jacobsen.

In addition to Kowalczyk, last season’s freshmen also produced Bob Hujik, Don Reiter and Kevin Seay.

This year’s freshmen newcomers include Arnie Schroeder, Nekoosa, the second place finisher in the WIAA Class A State Meet last year; Randy Bucheger, Brookfield, the eighth place finisher in the WIAA Class B State Meet; Paul Race, Appleton, the WIAA Class A two mile state champion; and Mike Butcher, Milwaukee, the 12th place finisher in the WIAA Class A State Cross Country Meet.

Witt admits that he isn’t sure about what to expect from this year’s team, but says the team goal has been established.

“It is very difficult to say how good a team we can have this year,” Witt remarked. “I feel that we can have a good team but only time can tell if we will have what it takes to try and regain the conference championship (UWSP won it in 1981).

“I do know that a WSUC championship is one of our goals this year along with a top 10 finish in the NCAA Division III National Meet.

Coach Rick Witt’s runners won the contest with 23 points and were followed by UW-Parkside with 42 and host UW-Whitewater with 68.

Lou Agnew, a senior from Greenfield, was the individual winner in the meet as he covered the new five-mile course in a time of 27:47. Teammate Chris Celichowski finished third with a clocking of 28:01 while freshman Arnie Schroader and sophomore Kevin Seay were fifth and sixth, respectively.

Women’s hopes still high after defeat

The UWSP women’s cross country team will have a new look in 1983 with a new head coach in Dave Parker and a team which includes a large number of newcomers.

Parker and the Pointers are optimistic about the new season. The team includes a healthy makeup of experience and youthful aggressiveness. Last year’s team placed seventh in the Wisconsin Women’s Intercolligate Athletic Conference, and fourth in the NCAA Division III Regional Meet. Barb Sorenson represented UWSP in the NCAA Division III National Meet and became the third Lady Pointer to earn All-America honors in the sport when she placed 11th in the meet.

One of the big questions facing UWSP and Parker this fall is whether Sorenson will be competing this fall. The Manawa native has yet to decide on her competitive plans. The team will definitely be without Mary Benso
Men's X-C cont. with times of 28:17 each. Rounding out the UWSP scoring was second year runner Jim Kowalczyk who placed eighth with a time of 28:44.

The Pointers displayed strong team balance and former SPASH standout Steve Brilowski was 10th with a time of 29:02 and was followed by Bob Hujik, 12th, 28:07; Eric Parker, 13th, 29:00; and Rich Eschman, 16th, 29:45.

Witt felt his team came up with a strong early season performance and did it on a course that was not conducive to fast running.

"This was a very difficult race as it was about 90 degrees at race time and the course was one of the most difficult I have ever seen," Witt said. "It was an old cross country ski trail of which a lot of it had not been mowed in years.

"The race went as we planned as we followed the other teams for three miles and then made our move. Lou Agnew was particularly tough the last two miles and he easily won the race.

"Chris Celichowski, Kevin Seay and Jim Kowalczyk ran good races and Arnie Schraeder ran a super race. He showed that he is a very intelligent freshman runner who runs what he is capable of. He ran well within himself and did not press and thus ended up running an excellent race."

The Pointer barriers return to action on Saturday, Sept. 10, when they compete in the Oshkosh Invitational.

NOMAD ADVENTURES.

A volunteer program for safe outdoor trips is looking for interested students who are willing to volunteer their time to learn to be Outdoor Trip Coordinators. Our goal is to provide trips with experienced trained people to accompany others into the wilderness for enjoyment, learning, and experience.

No experience is necessary. Nomad Adventures will provide instruction in techniques, skills, equipment, first aid, environmental ethics, and group dynamics in the areas of backpacking, canoeing, cross-country skiing, and winter camping.

Parable, cont.

five; where decimal points were used like a grammatical period — at the end of an equation.

Soon the Instructors, The Big Shots, and The Prez discovered the transformation in their children as well.

But it was too late.

The Mynds had all died off, the victims of a free market where nollige was no longer in demand. And with them died the secret for creating pure, raw nollige.

The Aciremans looked teary-eyed across their beautiful homeland. They saw it deteriorating before their eyes.

"Maybe we should have stuck to the original Three R's formula and tested ourselves and the kids," said The Instructors.

"Maybe we should have spent a little more money on nollige," said The Big Shots and The Prez.

But eventually the complaints died down. No one could speak the original language anymore.

The moral of the story is: A Mynd is a terrible thing to waste.

Lack of $ dulls UWSP faculty stars.

The University of Wisconsin-Stevens Point got a small slice of the new “faculty star fund” for outstanding staff members in the UW System. But it won’t be using the money exactly the way it was intended.

UWSP received about $14,000 of approximately $500,000 allocated this year by the Legislature to encourage retention of quality faculty members.

The fund was to provide salary adjustments for faculty members who received promotions in academic rank and bonuses for people rated as outstanding teachers.

The problem, according to Vice Chancellor Patrick McDonough, is that the $14,000 isn’t enough to cover the full amount of the adjustments that should be made for the 19 people who were promoted. “Our people are only getting about 47 percent of what they have coming,” he added. There is no money available for the bonuses here.

Nearly all of the adjustments were in the $500 to $900 range. In view of the fact universities such as UWSP can only promote faculty a maximum of three times, Mr. McDonough said to give such accompanying small raises is embarrassing and unfair.

The vice chancellor expressed particular regret about the situation because he had planned far ahead to cover full amounts of the proposed raises. He was denied use of the money he had budgeted in part because state officials froze all salaries of state employees, including faculty.

By comparison, a newspaper article published last week in Madison about appropriations of the “star fund” money on the campus there indicates that faculty fared better under the new program than the UWSP faculty.

Madison received about $250,000 in the “star fund” or about half of the total amount appropriated for the total system which has 15-degree granting institutions plus a like number of two-year centers.

New accounts stated that at UW-Madison, 76 “young” professors were given monetary recognition under the program, receiving a combined total of about $120,000. The remaining $114,000 covered salary adjustments for promotions.

Three percent of the Madison faculty received the recognition raises in addition to those who were promoted. At Stevens Point, while zero percent received recognition, about half of one percent of the faculty share half of the normal amount of money given for promotions.

Reagan budget cuts doom poor blacks

By John E. Jacob

As America's economy struggles towards recovery, it's important to assess the damage caused by the latest recession. The devastation caused to the general economy, while painful, may be temporary. But the damage done to black and minority Americans will be felt for another generation.

Further, it is probable that the recovery will be twotiered. Since black unemployment is nearly twice as great as white unemployment, the benefits of any recovery are likely to be spread unequally.

And, the cuts in federal programs which were initiated by the Reagan Administration are concentrated on the truly needy — people on welfare, on food stamps, in public housing, on Medicaid, in job training — in a host of programs that provide life-line assistance and open fresh doors of opportunity.

The Reagan recession has had a disastrous effect on black America.

First, the small, struggling black middle class is being decimated. Blacks are disproportionately employed by government, and federal personnel layoffs have hit black government workers especially hard. The last hired, first fired principle is working with a vengeance. Black workers have been laid off by corporations and state and local governments in disproportionate numbers. The net result is a sharp blow to the middle class backbone of the black economy.

Second, the nearly 50 percent unemployment rate among young blacks means that millions of black teenagers will be deprived of the work experience, discipline and skills needed to enter the economic mainstream. Their generation should have been the one that made the breakthrough for youth with the white majority. Instead, they could become a depression generation doomed to marginal activity.

Third, the impact on the working poor through layoffs and federal program cuts forces many into total dependency on government assistance. There is no body count on the number of people forced to drop out of college and technical schools, forced onto welfare rolls, or drafted into the rapidly expanding army of the permanently poor. But, we do know that black poverty figures are rising; that blacks dropped from CETA jobs are still unemployed, and that black enrollments at colleges are down. Many of those victims of the recession will never recover.

All of this takes place in a setting that finds the typical black family earning just a little over half of what the typical white family earns. Moreover, the typical black family earns less than people are no strangers to the duty of making sacrifices for our country. But it's a very different thing to be singled out to make sacrifices for the sake of theories of limited government and radical experiments in economics.

This is not solely a political issue or an economic issue. It is also a moral issue. I believe all Americans and their leaders have faced up to the moral dimensions of this problem. Policies that make the poor poorer and the rich richer raise inescapable questions of fairness and justice.

I believe it is a moral issue when food stamps are cut and poor people have to stand on line in the bitter cold to collect a package of surplus cheese. It is a moral issue when school lunches are cut while billions are poured into the Pentagon's budget.

It is a moral issue when working welfare recipients pay a marginal tax rate of 100 percent while depreciation schedules and tax-losing loopholes virtually wipe out tax payments for many corporations.

A. Philip Randolph said it best more than 50 years ago: "The tragedy is that the workings of our economy so often pit the white poor and the black poor against each other at the bottom of society. The tragedy is that groups of only one generation remove from poverty themselves, haunted by the memory of scarcity and fearful of slipping back, step on the fingers of those struggling up the ladder. And the tragedy is that not only the poor, the nearly poor and the once poor but all Americans are the victims of our failure as a nation to distribute democratically the fruits of our abundance."

No recovery will be complete if society looks over its shoulders and sees another generation of black and minority Americans doomed to economic stagnation and a lack of economic opportunity.

**POINTER PROGRAM is published weekly to keep students up-to-date on all the really marvy events going on in the university universe, and to prevent them from dying of boredom. Anyone wishing to have an event considered for publication should bring or send pertinent information to: POINTER PROGRAM, Pointer Magazine, 113 CAC, UWSP, by noon on Tuesday. Publication is not guaranteed. Events most likely to see the light of print are those with strong student appeal.**

**UNIVERSITY FILM SOCIETY Presents: Lord of the Flies**

Directed by Peter Brook, from the novel by William Golding.

"One of those rare instances in which the movie is better than the book..." — Esquire

**Tuesday and Wednesday September 13 & 14**

7 & 9:15 p.m.

**U.C. Program Banquet Room**

Admission Only $1.50 or Season Pass $10
Not everyone supported ad

By Chris Celichowski

Last Wednesday's controversial advertisement in the Wisconsin State Journal put some UWSP faculty members in the national spotlight, but they also put themselves in the hot seat with other UW faculty and state officials.

The executive committee of the faculty at University of Wisconsin-Madison called the ad "inappropriate and self-defeating." The committee called for continued bargaining by "responsible" faculty and state officials.

"We do not believe most faculty members are prepared to write off the future of their university as readily as the advertisement implies," they concluded.

The ad read as follows: "Professionals in all academic disciplines are available at a cost that was deemed by a universities with commitments to quality higher education. Contact department chairmen at University of Wisconsin campuses."

Rep. Marlin Schneider, D-Wisconsin Rapids, said the advertisement may have alienated Madison legislators to the causes of UW faculty, including the right to collective bargaining.

"This irresponsible action is certainly not going to induce sympathy in the hearts of lawmakers," said the veteran state legislator.

Governor Earl Point administration and faculty were more cautious in their criticism.

Chancellor Philip Marshall said he had used different methods to dramatize the plight of faculty. However, he expressed sympathy for the faculty cause.

"I certainly don't look at it as a legitimate attempt to obtain positions elsewhere, rather it was to draw attention to a situation that's getting worse," noted Marshall.

Pete Kelley, an outspoken UWSP faculty member and Bakery Department complete with a variety of salads, sandwiches, cheeses, assorted breads, cakes and rolls.

federal health care costs, the government announced a plan to phase in fixed rate Medicare hospital payments. Uninsured hospital patients will be paid in advance for the treatment of 467 types of illnesses and injuries.

The current system allows hospitals to receive wide ranging rates for Medicare services.

Washington, D.C.—The nation's civilian jobless rate held steady at 9.5 percent in August, according to the government.

The total number of people with jobs reached an all-time high at 101.6 million. Nevertheless, about 10.7 million were still out of work and the unemployment rate for black male teenagers jumped from 47.6 percent to 56.3 percent.

Science Magazine reported that a high number of hemophiliacs show signs of being exposed to a virus that also infects victims of AIDS, the incurable, deadly disease that destroys the body's immune system.

The report stated that the human T-cell virus, which affects some hemophiliacs, also plays a key role in AIDS; although there is no direct evidence to prove the virus causes AIDS.

Hanky, cont.

good faculty members. You need the books, yes. You need the silver clips and the staples and the secretaries, and the janitors, I don't deny that. But ultimately the quality of an institution is based on the quality of the students and the quality of the faculty going to go down.

I would hope that nobody who graduated from the UW campuses in the 1980's would look at somewhere down the road as having a degree that was worthless, that was only a piece of paper or that was of that degree factory, that UW system, ha ha, snicker snicker. And I think that is a risk we...

run and I would think that this would be an issue that students would be concerned about.

PM: Let me pose a hypothetical situation to you. You've talked about a pending surplus. Suppose there was a large enough surplus by the next fiscal year for the UW system to use to pay raises the Regents would like to have for faculty. But Earl was still not convinced that the fiscal solvency was a permanent thing and he asks you to wait until the next biennium. What would be the result?

Hanky: Morale has already dropped to a good deal. And that kind of a decision on the part of the governor is bound to change bad morale into terrible morale. I really think that the numbers who are jumping ship are realis-... if we are not able to attract good people to the university system to teach, if we're not able to hang on to a situation to a teaching roles, the quality of the institution is going to go down."

ty. And if we are not able to attract good people to the university system to teach, if we're not able to hang on to good people in teaching roles, the quality of the institution is going to go down.

And if the institution goes down hill, students are going to be affected. And how are you going to do that? One, the quality of the instruction is going to go down. Two, the quality of your degree is going to go down.
Get down to business faster.
With the BA-35.

If there's one thing business students have always needed, this is it: an affordable, business-oriented calculator. The Texas Instruments BA-35, the Student Business Analyst. It's built-in business formulas let you perform complicated finance, accounting and statistical calculations - the ones that usually require a lot of time and a stack of reference books, to help you get the most out of each course and classroom.

A powerful combination. Think business. With the BA-35 Student Business Analyst.

Ruggers sweep

The Stevens Point Rugby Club won its third consecutive Wisconsin Invitational Rugby Tournament in Milwaukee last weekend.

After receiving a first round bye, Stevens Point defeated Marquette 20-10. In the championship game, Stevens Point beat Milwaukee B-side 15-3. Contributing in the victories were Dennis Rue, Tim Kevan, Tom Rolf, and Mike Minolta.

Next week Stevens Point hosts UW.

Women's X-C cont.

highly competitive and has a strong chance for the third place slot.

Beyond the goal for the conference meet, Parker would like to see his entire team earn a berth in the NCAA Division III National Meet which is being held Nov 19 in New Port News, Virginia.

"I am confident that we have the three big finishers up front, all we need to do is have a couple of more runners advance forward and provide them with solid support in the No. 4 and No. 5 positions," Parker declared. However, the difference in winning a three-mile race came down to a matter of yards for the UWSP women's cross country team as the Pointers dropped a 26-29 dual meet decision to UW-Whitewater here Saturday. Tracey Lammers, a senior from Kimberly who was an All-American for UWSP in 1981, showed off that form as she earned first place honors in the meet. Teammate Jan Murray finished third but teammates Cathy Ausloos and Pam Small were edged out for better finishes and ended up in seventh and eighth place, respectively. Sue Hildebrandt concluded the UWSP scoring by placing 10th.

Also finishing strong for the Pointers were Kathy Hirsch, 11th; Linda Williams, 13th; Kathy Seidl, 14th; and Pamela Croke, 15th.

UW-SP coach Dave Parker was pleased with the effort put forth by his runners, but felt the team's inexperience was a factor in the defeat.

"Simply put, I felt that inexperience rather than a lack of talent was what beat us today," Parker explained. "Tracey (Lammers) used her experience to go out and get the job done, but we had seven women who never ran a college cross country race before and it hurt them. It was a real learning experience for them."

The Pointers return to competition on Saturday, Sept. 10, when they compete in the Oshkosh Titan Invitational.
EMPLOYMENT: Earn $500 or more each school year. Flexible hours. Monthly payment for placing posters on campus. Bonus based on results. Call Monday through Friday as well as Saturday. 800-536-0583.

Nigerians, cont.

tending for their funds.

Because of their status as aliens, the Nigerian students are now allowed to work at jobs off-campus. However, according to Lottetor many of the students took advantage of on-campus employment to supplement their incomes. Some of the students reported that their telephone service had been disconnect-
ed and those who were arrears in their rent had been asked to move by their landlords.

George lends hand

In a letter to the governor, Sen. Gary E. George (D-Milwaukee) suggests that the state of Wisconsin and the UW system take steps to aid Nigerian students who are facing the vicissitudes of governments that cannot resolve their difficulties.

George proposes that:

- A state-wide account be made of the amount needed to absolve the debts.
- Registration be extended and students be allowed to attend classes.
- Nigerian embassies and the governor's office cooperate to help those students in need.
- Assistance be offered to students who wish to return to Nigeria.

United States professor — Many tax-

paying students in all academic disciplines feel you are making an honest wage at a university that has proven a commitment to quality education. Because you obviously disagree, please leave the UW System to make way for educators willing to give full efforts towards the quality education we have paid for.

Enrollment down nationally

College and university administrators say they expect enrollment to decline slightly this fall to about 12.5 million nationally.

Ohio State University is expected to have the highest enrollment in the nation with 53,183 students. The University of Minnesota is second with about 47,000 students.

The University of Wisconsin ranks fourth.

UW-Stevens Point enrollment will decline by approximately 200 students to 8,800.

The recession and higher tuition costs are considered primary reasons for the decline in enrollment.

PERSONAL: Disgruntled UW Professors—Many tax-

paying students in all academic disciplines feel you are making an honest wage at a university that has proven a commitment to quality education. Because you obviously disagree, please leave the UW System to make way for educators willing to give full efforts towards the quality education we have paid for.

1983 Domino's Pizza, Inc.
Stan Gruszynski
for state representative

Shown with Stan is his wife, Nancy Kaufman, an assistant professor in the School of Education and a full time faculty member at UWSP.

"The future depends on our willingness to preserve our environment and natural resources. Stan knows the importance of environmental protection and will make the tough decisions that are necessary so that all of us and our offspring will enjoy a better quality of life."

Nora Boyce, Vice Chair
Environmental Educators and Naturalists Association

"I believe that Stan is the one candidate who can best represent our university community. He truly understands faculty issues, and is totally determined to reverse the destructive salary policies of the Earl administration. While other candidates in this race have made general statements of support, I believe that Stan is the only one who has promised specific action."

Jim Haine, associate Professor
Division of Business and Economics

Stan worked four years as the district representative to eighth district congressman Fr. Robert Cornell and has an additional two years experience in the Wisconsin Legislature as the Director of the State Senate Democratic Caucus.

He held positions as the regional representative for the Wisconsin Council on Consumer Affairs. The Wisconsin Environmental Council, and was on the Administrative Committee for the Wisconsin Democratic Party. A leader in Democratic Party politics, he has coordinated a number of campaigns for people seeking local or national offices.

Stan currently serves as a community consultant/developer for Neighborhood Reinvestment Corporation. He lives with his wife, nancy, who is a full time faculty member in the Education Department.

Stan Gruszynski understands the political process. He knows how to get things done. He will be a strong voice in the Wisconsin Assembly.

Stan discusses important issues of higher education with Judy Bierley, a UWSP student, and Bill Kirby, a UWSP professor.

"Stan Gruszynski is committed to the idea that students deserve quality education that is also accessible. Stan is the one candidate who knows how to make government work for student concerns and issues."

Tracy Mosley, Student

"Stan Gruszynski has broad work experience, a solid record of community involvement, the political expertise and commitment to carry on the tradition of legislative excellence we have come to expect from this district."

Neil S. Lewis, Associate Professor
Department of History

Stan believes that government should serve, not rule. He knows the most important thing a legislator can do is listen.
