Checking in with Mr. Universe

The K-Pointer connects with God

First contact with the press in over 2000 years!!
The Pointer Interview:

GOD

A candid conversation with the outspoken author of everything

After a long and arduous search, we found GOD... in the University Bookstore, leafing distantly through the asked copy of Billy Graham's God's New Wave Angels. He seemed upset at being recognized, and when asked about doing an interview, treated us to a denotional gesture and a few choice verses from The Book of Demucinations.

Six weeks later, He phoned us collect from Los Angeles, where He was laying down some background vocals for a Dan Fogelberg album. ("When Dan sings, Everybody get mellow, everybody get unconscious," I sort of said, "asannahhh AAAAAHHHHHOO- oonaaahhahh... ") Although maintaining that He hated interviews, He agreed to talk to us in L.A. Gigs in the near future, on the condition that we didn't ask Him anything about "those damned Moral Majority yahoos."

After some high-level journalistic soul searching, the Pointer staff decided to throw caution (and about 70 percent of its total budget) to the wind and send cab reporter Wang Homespun to Los Angeles to talk to The Man. Homespun, no stranger to difficult assignments, nonetheless found this particular interview a challenge.

"I've cracked some cracked room cookies before, but this was something else. It's hard to establish a rapport with someone who turns into a burning bush whenever He doesn't want to answer a question."

"Though He was a gracious enough host, I got the distinct impression that He was the press. Since He seemed to have a strong feelings on the subject, it seemed like a good place to begin."

HOMESPUN: Why do you...

GOD: Look, but you see the decent sort. But I really don't see much point in pursuing this. I know all the questions you're going to ask. I know all the answers I'm going to give. I even know which part your goddam newspaper is going to edit out.

HOMESPUN: If that's the way you feel, why did you agree to the interview?

GOD: It seemed like a harmless idea at the time, but I've been thinking it over. HOMESPUN: I sensed you might be having second thoughts when the landing gear on our plane dropped off 41,000 feet over L.A.

GOD: Sorry about that.

HOMESPUN: Why don't we begin, and if at any point you don't feel like continuing, we can stop.

GOD: That seems fair enough. Very well, proceed.

HOMESPUN: Could you make a rock so heavy that even you couldn't lift it?

GOD: What is this? Right away we have a trick question?

HOMESPUN: Come on, this has been bothering me ever since Sister Mary Drueda brought it up in the place I'm staying. Could you lift it?

GOD: Certainly.

HOMESPUN: But how?

GOD: I'd get some big guys to help me. What do you think - I don't have any friends?

HOMESPUN: Hmm. Let's go back to it, shall we? Could we talk about your book - The Bible?

GOD: Let's get this straight once and for all - there's no book of mine. I haven't seen any royalties. No one asked my opinion of the scriptures when I'm ready to review the galley proofs.

HOMESPUN: Nevertheless, the Bible is supposed to be your divine Word.

GOD: Okay, so I talked to some people. But they misunderstood me all over the place. Honestly, one minute I'm loving and forgiving and the next minute I'm turning some skirt into zalt.

HOMESPUN: What about the part that says you created the world in six days?

GOD: Completely inaccurate. It took 3.5 billion years - and I still haven't finished the rim.

HOMESPUN: Where did that ad-hoc story come from?

GOD: Boats. It took me longer than that just to order the parts.

HOMESPUN: I see. If you're perfect, as people say, how come the world is in such a shape?

GOD: The world is in great shape - it's your little corner that's fucked up.

HOMESPUN: Is that a mere subject?

GOD: How would you feel if somebody came into your house just to tear up the carpet, then complained that the place was filthy? Cool your jets, Wong Homespun.

HOMESPUN: Let's talk about The Ten Commandments.

GOD: Completely outdated. It took 3.5 billion years of man's doing for the world to get mellow, and now they're burning like a talking m anze.

HOMESPUN: Where do war and poverty and loneliness and crippling irregularityfit into my so-called grand plan, right?

GOD: How did they fit in? I knew it. They don't fit in, none. They're like potlatches in the road - you see them coming, you try to drive around them. You don't sit there in the middle of the highway with your hazard lights flashing, wondering how they fit into the grand design of the road.

HOMESPUN: Why don't we move one to another subject?

GOD: Move on all you like. Don't let me bog you down.

HOMESPUN: Is Heaven like?

GOD: Don't ask.

HOMESPUN: I'm asking.

GOD: What can I tell you - business is bad. People are going someplace else. We've been having such problems - the chef walked out on me, the people has a crack in it. And our air quality is absolutely shot to hell - you clowns and your damned fluorocarbons.

HOMESPUN: HOMESPUN: What about drive around them. They're like apples?

GOD: Completely out of Eden for partaking of the forbidden fruit through teed-colored glasses, and castor for lunch with your tongue.

HOMESPUN: Okay, okay. Let's drop it, shall we?

GOD: Fine.

HOMESPUN: Let's talk about The Ten Commandments.

GOD: Great movie. Loved it.

HOMESPUN: No, I mean the real Ten Commandments. The ones you gave Moses. Don't you think they're a little bit outdated today?

GOD: I suppose you'd prefer something like, "Though shalt not come in my neighbor's Janitor!"

HOMESPUN: No, it's just that so many of the original commandments aren't

"In the beginning the earth was without form and void—a real mess, if you know what I mean. I'd been meaning to straighten it out, but I just kept putting it off and putting it off."

"I just can't figure Credicards out. They're horrified at the idea that man evolved from a more primitive life form, but they cheatfully accept that he was led astray by a talking m anze."

"Real Roberts, Billy Graham, Jerry Falwell—those guys say they talk to me all the time. Listen, I haven't talked to any plane from any of them in years."

Healther at ease with disease

By Jingo Rygum

He used to practice what he preached, but an annoying disease has forced UWSP Health Services Coordinator Bill Healther to, as he puts it, "suck up to the vices of ill health.

Healther, it was recently diagnosed, is suffering from a pathological condition which compels him to smoke two cartons of cigarettes and consume a quart of tequila daily. The disease, according to doctors, is characterized by Healther's tendency to lapse into periodic states of uncontrollable laughter. In apparent mockery of Wellness, Healther toasts his head in mad, incessant laughter and, through an insane grin, shouts such slogans as, "I regret that I have but one life to preserve for my country," "Give me Wellness or give me death," and, "Ask not what your body can do for you, but what you can do for your body."

Healther had this to say in an interview with The Pointer's health columnist: "As Dr. Hittler once said, the best defense against pregnancy is an all-important offense. As we were concluding the interview, this reporter was surprised to be making the best of my short life. My new motto is going to be, 'Die and let die.'"

A bright spot

Just when everything seemed to be darkening for Healther, so did his office. Apparently, a fuse blew just as we were concluding the interview. This reporter was alarmed, but Healther took control immediately, displaying at least one redeeming attribute of his disease. "Not to worry," he reassured the doctor. "I'll light this place up."

Excavation for the new Wellness Complex is almost complete, according to officials of the multinational Wellness Corporation that is financing the $4 billion project. The complex, which will include three gymnasiums, a ten-mile temperature-controlled plexiglass jogging tunnel, parking facilities for 50,000 bicycles, and a "high on health" private hedge, will occupy a 200-acre parcel of land north of campus. Officials have not yet decided what to do with the Selfridge building, which the firm says it bought so its members can walk steps where there are eleven stories in order psychologically as well as physically invigorated.

Does this ad offend you?

Well good, we were hoping it might.

As Dr. Hittler once said, the best defense against pregnancy is an offensive ad campaign. "You see, by using an eshirine, sexist gimmick, we've drawn your attention to that all-important fact that people who have sex take a chance of getting pregnant--especially women.

So we're sexist--big deal.

So we've unlawfully infringed on Charles Schultz's copyright. Do you think that bothers us? Hey we're doctors, man. We've been to medical school. We know what your insides look like.

So get out of here.
The Big Apple goes apeshit over King Kongservative

By Tara Raboomezhey
King Kongservative, director Frederick de Cordova's first motion picture in decades, is a politically laced remake of the legendary King Kong, made by RKO in 1933 and remade in 1976. This latest version of the beauty-and-the-beast classic retains much of the charm of the original and avoids the campiness of the '76 remake.

The story begins in New York, but, like the original, quickly moves on to more exotic locations. Fay Random (Bette Midler), an out-of-work social worker, is kidnapped by ACLU terrorists and taken to Numbskull Island, where she soon finds herself in the hairy clutches of King Kongservative, a 100-foot-high ape with only one thing on his mind. After watching Kong nosh on a few dozen natives like they were salted nuts, Fay fears she's next on the menu. But Kong has other plans for her. He takes her to his cave hideout, peels off her jogging duds, and, in a surprisingly touching scene, confesses that he's never done it before with a woman one twenty-fifth his size. After the two spend a few hours playing "Kiss and Screem" and "Pardon My Paws," Captain Jim O'Brien (Tab Hunter) arrives and rescues Fay.

Kong soon catches the couple in the jungle, and pounds an amazing quantity of gross, awful red and brown stuff out of O'Brien's beard, arms, legs, and torso. He then turns to Fay for a quick game of "Hide the Banana." Impressed by Kong's show of jealous affection, Fay grabs the late Captain's gun and empties it into the beast's right foot. While he's hopping around in pain, she escapes to the beach and is rescued by some boat people. Eventually, Kong is taken to New York. The love scenes between Fay and Kong are handled with taste and a certain amount of humor—especially the initial encounter where he first up her Virginia Slim by dipping a native in lava and using him as a disposable lighter.

Cinematographer Sven Nykvist's lucid, penetrating lens captures the steamy, ripe lushness of the jungle and the hard, monolithic skyline with equal brilliance, and the musical score by ex-superstar Stevie Nicks is perky and appealing. Trivia buffs should note that Mr. Nicks appears briefly in the film in a non-speaking part (she gets stepped on). The University Film Society will present this towering thriller Tuesday and Wednesday, April 7 and 8, at 9 and 11 p.m. in the Program Banquet Room of the University Center. Admission is $2.

MacMurray to speak

By Hal W. Newsbreef
Secretary of State Fred MacMurray, former actor and star of the Sixties hit sitcom, My Three Sons, will speak at UWSP this Friday. MacMurray, asked to take over the all-important cabinet position when former Secretary of State Al Haig was offered a spot on Three Stooges, says he's an old-fashioned guy, and proves it by singing "I Love New York." Just as Fay begins to think she may be falling in love with the big lug, a mob of dope-crashed... Sixties malcontents arrives and starts making trouble. Fay leans over a railing to shout at the mob, slips, and accidentally falls off the building. Heartbroken, Kong goes back to Numbskull Island and has an affair with a Bogoacaurus.

Thanks to de Cordova's sensitive touch, the film is an unequivocal artistic success. The love scenes between Fay and Kong are handled with taste and a certain amount of humor—especially the initial encounter where he first up her Virginia Slim by dipping a native in lava and using him as a disposable lighter.
God, continued

meaningful today. I mean, all that stuff about your neighbor's ass.

DOG: You ever eaten any flies, Hardparp?

HOMESPUN: I only meant...

DOG: Listen, I wrote those a long time ago. I happen to know you cracked out some pretty smarmy prose when you were a kid. A short story about a squad of pompon girls and a gang of alien football players springs particularly to mind.

HOMESPUN: But back to the Ten Commandments. Did you really part the Red Sea like they did in the movie?

DOG: Yeah, I did that. But not quite like in the film. DeMille parted it on the left and浦tured it on the right.

HOMESPUN: What do you think of Reagan's Defense Program?

DOG: What channel is it on?

HOMESPUN: It isn't a TV show. I'm talking about the U.S. spending billions on bombs to blow up the world when people are starving to death.

DOG: Well, if you're going to put it that way, I guess I'm against it.

HOMESPUN: So why don't you do something about it?

DOG: What, you mean like setting off a few H-bombs or knocking a few jets out of the sky? Then you croons would be whining about that.

HOMESPUN: You're probably right. Are there beings on other planets?

DOG: Sure. Some of us learn from our mistakes.

HOMESPUN: If...

DOG: Say, I'm starting to get a little headache here.

HOMESPUN: Just a couple more questions—these are really important.

DOG: I can feel my temples starting to throb. You got any Tylenols on you?

HOMESPUN: If a tree falls in the forest and there's nobody there to hear it, does it make any sound?

DOG: If I could just lie down for an hour or so, I'd be fine...

HOMESPUN: Will you please just answer the goddamn question for once?

DOG: Oh, for crying out loud, yes! It makes a sound. It goes, "Grrrr, Grrrr!"

HOMESPUN: "Grrrr?"

DOG: That's "wrong"?

HOMESPUN: Just one more—why do they glue the liners inside cereal boxes so that when you try to roll them up, they rip and the cereal leaks out?

DOG: Come up with the answer to that one and you can be God.

Snipers vs. Joggers: A guest editorial

Last week— I think it was Thursday or Friday—a UWSP student under the influence of drugs climbed to the top of Old Main and opened fire on his fellow man with a high-powered rifle. Because some joggers were injured, the local press jumped on the story, calling the perpetrator a “confused individual” and referring to the sniping as “really socially unacceptable behavior.”

It is this last characterization that I take exception to. What is exactly socially unacceptable behavior? Behavior that is acceptable in one context may be unacceptable in another, and vice-versa.

To attempt an understanding of how social context determines the acceptability or unacceptability of behavior, let us compare and contrast the two types of activity involved in the incident—jogging, which is currently all the rage, and sniping, which is going through a bit of a slump.

So popular is jogging nowadays that people are building entire lifestyles around it, claiming it builds strong bodies, relieves mental tensions, and produces moments of near-mythical incipiency. Joggers are widely admired, and books have been written about jogging as an “art.”

On the other hand, picking off citizens with an automatic weapon is considered childish and a mess. You don’t see any bestsellers entitled The Complete Sniper. Snipers are feared, pitied, and—often—dehumanized.

Jogging requires only a decent pair of shoes and some suitable clothing. Sniping requires sophisticated military hardware, certainly no advantage in a society that has come to equate advanced technology with dehumanization.

Jogging is often done in groups, and a certain amount of camaraderie is generated. Snipers are loners. Studies indicate that we tend to distrust people who keep to themselves too much, particularly if they go around making machine-gun noises in supermarkets.

Perhaps most importantly, joggers pose no direct threat to their fellow men and women. Snipers kill people—if they’re decent snipers. Yet even killing is acceptable in certain contexts. During times of war we must all pull together and make democracy safe for the world, the people shooting the guns are heroes. People who are into running are called “deserters,” and are dealt with rather harshly.

J. Michael Bent

Sip sip, bang bang

By Bore Vidal

Have you ever wondered what kinds of unhealthy things coffee can lead to if you’re not careful? Duane Rushmore, a sophomore Economics major, found out the hard way last Friday, when academic pressures combined with an overdose of java to push him over the brink of tension into the arms of antisocial behavior.

Rushmore, a New Berlin native, climbed to the top of Old Main at 2:43 Friday afternoon, and began firing at passing pedestrians with an M-16 rifle. Three joggers were injured when bullets from Rushmore’s gun passed through their bodies at extremely high speed. They were rushed to St. Michael’s, where they’re presently listed in serious condition.

When he finally ran out of bullets at 5:30, Rushmore surrendered himself to Campus Security officers at the scene.

A subsequent police investigation revealed that Rushmore had been “preparing” for exams in his dorm Study Lounge the night before the sniping incident. Friends who were with him said he was acting strange. You’d think the best sellers entitled The Complete Sniper. Snipers are feared, pitied, and—often—dehumanized.

Perhaps most importantly, joggers pose no direct threat to their fellow men and women. Snipers kill people—if they’re decent snipers. Yet even killing is acceptable in certain contexts. During times of war we must all pull together and make democracy safe for the world, the people shooting the guns are heroes. People who are into running are called “deserters,” and are dealt with rather harshly.

That’s why Milo Whitman says, “If you find yourself in the throes of a coffee jag, knock down a few pints of Jack Daniels. It’ll cool you out in nothing flat.”

3. Try not to let it get to you. Sure, you’re all turned up and your heart is going like a percolator. You want to blurt, you want to pummel someone up and brew their brains. Try watching Vegas instead.

4. Calm down. If nothing else works, try this special relaxing technique developed by the friendly folks at the Health and Wellness Command Bunker: take some deep breaths. Let them out. Repeat as often as necessary.

NO MORE RUNNING FOR THESE KIDS. Joggers, victims of Duane Rushmore’s java-induced marksmanship, stretch out and relax while waiting for an ambulance.

A SEX LIFE IS A TERRIBLE THING TO WASTE.

This is Milo. He needs your help. And help.

You see, Milo can’t get any nookie. It isn’t his fault. He comes from a low-nookie neighborhood.

Milo doesn’t need pity. All he needs is a chance. And some boss threads. And lots and lots of money. And a shiny new sports car. And a new face.

Won’t you help? Send whatever you can to HELP MILO MAKE IT, PO BOX 1493, KITCHY-KOO, PA, 09343.
Cities Conference stresses development

By John Stein
Upper Great Lakes Regional Commission Executive Director Oscar Lund opened last week's Conference on the Regional Conference and Regional Community with a discussion of how the conference would support the purpose of the conference—regional planning.

Lund was explaining the process of regional development—a process of "looking at the data and laying out alternatives," while conference participants were preparing to present data they had gathered and alternatives they had formulated as part of their research on various aspects of the regional community.

Lund said that development in today's society is "a process of growth, but to change. "Michigan's urban institutional structure grew out of the thinking of planners of the 1950s."

Planning commissions such as the one established by himself, Lund said, function to develop "long-range plans which would be subject to funding and policy making."

The Upper Great Lakes Regional Commission, however, recently had its second session out of town. Critics of the commission, said Lund, complained that it had made them more bureaucratic, and that it was "swamped with paper." Lund added, "With today's plans that sit on the shelf."

But Lund gave several examples of the commission's success: it had provided data for the assessment of the impact of energy development in its region, revitalized a fishing industry, and established state and international trade. He also cited the endeavors of other commissions. The Northeast Commission, he said, had been used as a basis of study by three countries to deal with waste disposal issues, and a Western Commission had previously been used as a basis of study for the city of Edmonton.

Lund concluded that such "bureaucratic middlemen" as himself were in for dismal days in the '80s in terms of employment.

"Bureaucratic middlemen of the '70s," he said, quoting another source, "will get pink slips that say: 'welcome to the '80s. Your services are no longer needed.'"

A previously introduced amendment to the conference coordinators' resolution, co-authored by Teacher Marshall, who will be reached. The ultimate purpose of the conference was "to provide a forum for the presentation of research, to provide a valuable educational experience to students, and to expose college officials to research about doing community similar to those they represent will be served.

Ethnicity and Race discussion held

Senator opposes arrest powers

By Linda Raymon
The Senate Student Senate was considering granting arrest powers to Campus Security officials "until a comprehensive proposal is been submitted," and rejected funding for the establishment of a university-wide panel as an alternative.

The decade-old debate over granting arrest powers stimulated a lengthy discussion among the Senators. It was decided to oppose granting arrest powers until a committee was set up to study it further. After more information is submitted, a final decision will be reached. The ultimate decision will be made by Chancellor Marshall, who will then present his recommendation to the Board of Regents.

A previously introduced resolution, co-authored by Senators Greg Brooker and Richard Starks, was defeated by a 10 to 9 vote at the Senate's March 12 meeting.

Executive Board Chairman Jack Buswell reported that there is a surplus of $4,000 from Unions. The student fund money has accumulated since the beginning of the year. Linda Catterman, President of SGA suggested some uses for the fund. An all-day outdoor concert or registration day, behind Quad's Fieldhouse was the main proposal. Others included the purchase of prizes for fundraising, anything else, or putting the money into the account for future use.

An SGA-sponsored Happy Hourf an evening music event will be held Friday, April 3, from 3:00-6:00 in the Grid. An Open Mike for Presidential candidate Jack Buswell would be the focus of the event. Buswell's running mate is Senator Ed Karrama. SGA elections will be held April 1 and an L.D. is required.

Mike Pucci, Vice-president of SGA, told the Senate that a rally was to be held April 1 in Oshkosh to protest financial aid cuts by the Reagan Administration. "These cuts will result in a 50-70 percent loss in aid to students," Pucci stated. To protest, a letter-writing campaign is planned. In other action, the Senate approved SBEAC allocations of $300 to Stetler Hall for research and $300 to the Wisconsin Alumni Research Foundation for alcohol awareness on campus through a "Fund for Student Awareness." The Senate also approved $200 to the Fishes Society, and $500 to the Wildlife Society. The Senate also approved SBEAC allocations of $125 to Central Wisconsin Naturalist.

Mahrer says he has made very little progress in the 21 years he's been a rabbi speaking to people in light of these problems. He hopes that eventually they will be recognized and dealt with properly. He cautions, "Please be aware that there are people among you that are different. Jews are not easily identified. You probably won't know one when you see one. For that reason, you might say we're an 'invisible minority.'"

Waclaw Soroka, next gave a brief summary of a study entitled, "The Polish Settlement in Stevens Point, Wisconsin," which was presented by Richard H. Zelinski of the Wisconsin Veterans Museums in Madison who could not be present for the session.

Mr. Zelinski considered mainly the historical and sociological development of the Polish community. He found that one of the first settlements in Portage County was in Polandia.

People who settled there were granted mostly poor lands and established a small agricultural area to sustain themselves. They were a thrifty group who saved most of their money to avoid debts. When other settlements had begun to employ mechanical innovations such as the invention of the rototiller, the Poles continued using manual labor. They were, however, among the first to use electricity.

Russell Nelson Jr. gave a commentary on the three studies that had been presented. Following his comments, the floor was opened to questions.
By John Stein

If we think activity on the campus on such occasions as Homecoming and Halloween boils over in a wild rush, we'd better look at the behavior of some of the characters off the UW campuses will provide a perspective that makes the student protests pale in comparison.

In a paper presented last week for the American Political Science Association conference on the Small City and Regional Community, Dr. Martin Gruberg, a Political Science professor at UW-Oshkosh, painted a vivid picture of what a celebration turned-riot is really all about.

Gruberg is primarily concerned in the paper with the annual St. Patrick's Day celebration in Oshkosh, which attracts thousands each year from as many as 30 states. The celebration went smoothly this year, unlike the last two years, which saw considerable damage and destructive rampages. In 1969, much to the dismay of the Oshkosh town council, the St. Patrick's Day celebration fell on a weekend. To make matters worse, five UW campuses, including UW-Oshkosh, were on spring break. The result: 388 were arrested, 53 were hospitalized, and 160 were cited.

The celebration has been a matter of some discussion, according to Gruberg, for a number of years. The question of what that "get tough" with the celebrants. In addition, police are now more prepared to overreact to the situation by making numerous arrests, using handcuffs, and strip-searching celebrants who are contributing to their own arrests. The result, as Gruberg sees it, is a crowd of 359-5000 flattened, towed down street signs, and broken dormitory windows.

PLACE: THE CONCOURSE, UNIVERSITY CENTER

Offer good only while they last.

By Jeanne Polsinski

Bob Clampett, inventor of Bugs Bunny, Tweety Pie and other Warner Brothers characters will be on the UWSP campus Monday, April 6. He will speak in the Program Banquet Room of the University Center at 7:00 p.m. His appearance is being sponsored by the University Film Society and is open to the public without charge.

Clampett said that during World War II, Bugs Bunny was a symbol of America's resistance to Hitler and the fascist powers—symbolized by Elmer Fudd—"who wanted to destroy the free world." He also said that Clampett was inspired by the public subconsciously identifying the stupid little man with the gun and his counterparts with Hitler, and strongly identified the rabbit—unarmed except for his wile and will to win—with themselves. They further realized that this was the beginning of the end for Hitler.

Clampett advised that justification was already established and the sooner and more often that the audiences' alter-ego (Bugs) could get back at the Hitler symbol, the greater the turn of events could be explained.

Also during World War II, Clampett made Private Snafu, the first cartoon for Frank Capra's Army Signal Corps. And in this film Clampett used Bugs Bunny. The result was that Clampett, with Bugs, became the first actor to receive an Academy Award for his work in cartoons.

Clampett also made technical training films for the government, and did a special Bugs Bunny bonding special for theaters entitled Any Bonds Today?

Clampett said that when he invented Tweety Pie, he was satirizing his own baby pictures. He's happy that Tweety Pie was Warner Brothers' first Oscar-winning character. "I'm mighty proud of my little guy," he said.

Clampett essentially left Warner Brothers to go on his own. He designed the first Mickey Mouse doll for Disney, and eventually began making puppets, including Cecil the Sea Serpent, who received the true mark of success in Hollywood—his caricature on the wall of the Brown Derby.

SGA election April 7 and 8

Candidates seek more visible Senate

By John Stief

UWSP student body presidential candidate Jack Buswell and his running mate Ed Karshna, who are seeking their positions unopposed in this week's election, are nevertheless campaigning on a platform which includes more student involvement and increased visibility of the Senate.

"I'd like to be more visible next year," Buswell told the Pointer. Among his proposals to accomplish this are more contact with student organizations through workshops for providing them with fund raising ideas and suggestions on preparing their budgets; and more use of information booths and handouts in the UC Concours. In addition, there will be an information booth at registration, "so that students can be aware of us right off the bat," Buswell said.

The non-visibility of the Senate, its members generally feel, reflects the student apathy more so than the body maintaining a low profile. Vice presidential candidate Ed Karshna suggested that this lack of concern is necessarily accompanied by a lack of awareness of the Senate.

"People see the SGA logo and they think it's for the food service or something," he said.

"What we need is a lot more feedback," added Karshna. "We can have more influence if we have more students behind us. Our recommendations would carry more weight.

Making recommendations to decision-making officials on campus is one of the main functions of the Student Senate.

Another main function of the Senate — perhaps the most notorious because it directly affects many students — is the allocation of funds to student groups. The Senate performs this in a very simple way: SPBAC, a small group resembling a subcommittee of the Senate but with several at-large student members, hears a request for funds from a student group. After SPBAC deliberates and recommends this to the Senate, which must vote to approve the request. With few exceptions, the Senate approves the SPBAC recommendation.

Buswell plans to move the main SPBAC hearings, when the request of virtually every student group is heard, from November to sometime in April. This, he said, will give the Senate more time to formulate its decisions. Budget proceedings this year were said Buswell of last November, budget proceedings, "At times I felt the decisions may have been hurried."

The Candidates

Buswell and Karshna will both be seniors next year, and are both political science majors. Buswell, a pre-law student, is currently Executive Director of the Student Government Association. Karshna, a student of pre-law basketball player and a native of Sparta, WI, is from Harland, Wi.

Both say they are running for the experience. Contested Buswell, "I like working with people and student government. I'm interested in political issues and in getting more of a dose of campus politics."

"I'm the type of leader that likes to take a stand. I don't think I can be impartial too often." I like to have my views heard before the senators make up their minds," Jesse Stief

Buswell and Karshna have this to say about some of the current issues confronting the Senate:

- The Tenant Association will be expanded next year; more people will be involved, according to Karshna.
- SPBAC's funding recommendations will be subject to closer scrutiny by the Senate. There will be more involvement by the senators in the committee's decisions and policy guidelines.
- Arrest power for campus security officers will be opposed by Buswell and Karshna until further study on the matter is completed.
- The candidates oppose taking any action on the Blue Jean Day controversy should it arise again beyond normal questioning of the GPU about its budgeting of programs.
- UWSP will continue to participate in United Council lobbying. Buswell said that this allows student government to get together and discuss problems, and that it gives the Senate access to information from Madison not otherwise available.

Clampett from p. 9

He has also developed cartoon characters for commercials, including The Lonesome Lovebird, "an amorous but lovesick little guy from whom all the little girl birds ran, due to his problem" — which was cleared up by a "Lifebuoy bird bath."
Wisconsin residents lack confidence in justice system

By John Steh

What are the attitudes of Wisconsin residents concerning crime? If theirs are similar to the attitudes of residents of the southeastern part of the state, then Wisconsin gives its police a better evaluation than judges or prosecutors in job performance; its citizens do not believe in reporting crime as much as 60 percent of the time; and they feel that more police patrols and investigation and less judicial leniency are needed to handle crime. These are among the findings of a recent survey of 1190 residents of southeastern Wisconsin conducted by John Keszlovecz, Samuel J. Pernacclaro, and David Wegber and presented last week at UWSP as part of the Conference on the Small City and Regional Community.

Residents of the survey indicate, feel that there should be more policemen, that they should be better paid, and that they should spend less time on traffic control and more on patrol and investigation, to seek out, the authors suggest, "real criminals." "Public perception of the police role is that of primarily preventing crime and secondarily catching criminals," the survey report stated.

Regarding job performance of officials of Wisconsin's judicial system, about 86 percent of the respondents gave police a favorable rating, while judges and prosecutors were favorably perceived by only about 51 and 49 percent of the respondents, respectively.

Other data from the survey indicate, according to the report, "a consensus that both judges and prosecutors are far too lenient with criminals.

The report gives four of what the survey showed to be the most common reasons for citizens failing to report crime: 1) they felt the matter was a private, not a criminal, one, 2) they thought police couldn't do anything, 3) they didn't want to bother the police with the matter, 4) they were not sure the offenders would be caught.

The report also concluded that there is a "general lack of confidence on the public's part in the criminal justice system of Wisconsin.

Survey of Victims

The researchers also surveyed 389 crime victims who resided in southeastern Wisconsin, to determine the efficacy of victim assistance programs. 279 of those victims surveyed were not sentenced, while 110 were.

Victims of crime, the researchers concluded, need special assistance. In addition, the survey indicated that "victims are concerned with information on the progress of their cases."

Existing programs to aid victims "appear to foster a belief in the efficacy of the criminal justice system," the report stated. Those programs serving victims in Waukesha and Kenosha, it stated, "have been well received by victims of a crime who were aware of its existence." The report added that these programs needed to be highly visible in order to be used by victims.

The SGA "Election"

The election of a new student body President and Vice-president has seldom been an event that commands the overwhelming attention of UWSP students. Nevertheless, there have been some pretty competitive races, including last year's.

This year, however, it appears Jack Buswell, present Executive Director of Student Government, along with his running mate Ed Karnas, an off-campus senator, have already won the election by default. As they are running unopposed, one has to wonder why they are even bothering to campaign.

That students are apathetic to the selection of individuals to fill two of the most important positions on campus is a disturbing fact, and even more disturbing is that the few who do care and intended to vote are now provided an incentive not to bother.

Rites of Writing

Today is the final day of the UWSP Rites of Writing Symposium. Some of the nation's leading writers will be speaking at various locations on campus, and UWSP students will be wise to attend some of these sessions. Well-developed writing skills have always been a key factor in obtaining graduate employment, but in recent years, these skills have become particularly important. The ability to write is your right.

There will be a $3.00 donation fee.

So you think you know it all? You think you have the answers? We have all the questions?
Small Cities: boom, bust, and maintenance

By Robert J. Elswit

"Small cities carry seeds of deception rather than fruits of victory, and the ultimate success of our cities lies in maintenance, not abandonment."

William Burch, Yale professor and featured speaker for the 4th annual Small Cities Conference held here March 26 and 27, had that and much more to say about the urban areas in which most people live. Dwelling on the typical chronology of cities, Burch made it clear to the audience of about 175 that small is not necessarily better, and our big cities can and should be revitalized.

The Small Cities Conference included discussions reflecting the problems of urban life, while seeing the rise of the small city, in an attempt to forecast the future, Burch shared his view on what urbanites should work for.

First, addressing the problem of defining the small city, he said, "Is it where there are no buildings over two stories, or where there are no minority problems? I don't know. The appeal of smallness has been developed by the romanticism of 16th century humanists and the notion of establishment by agrarian pioneers."

Modern concepts of the small city are being promoted by "realtor rhetoric," as Burch called it, and the Rancho Vistas across the country will need sewers in ten years, also. He warned that small cities can be crushed just as easily as large cities, and the reality of it all is that "Main Street is a place that we all like to be until we are there."

Burch reminded us that we have been on a four hundred year boom, but modern technology is ending as a frontier. "Carboniferous capitalism is ending," he said. Flint, Michigan is a prime example of what is a modern boom town. The automobile built the city, quadrupling its population in a few decades. Now, with fast but obvious changes, its unemployment of 15.3 percent is the highest in the nation. Flint, not too long ago, was a small city with a bright future. Nothing is safe now."

Addressing the present move by people and industry to the Sunbelt as a means to lessen the demand on energy, Burch saw this migration as "no solution. The way out of our problems is not to run away from them and leave the refuse for somebody else to live in."

Our government leaders can provide guidance, but apparently the present Administration is not the solution.

"We are now beginning four years of the gladhanders, who plan to bring us the cowboy economy of the 1860's, the stock market of the 1920's, the Fireside chats of the 1930's, the self-involvement of the 1950's, and the War of the 1969."

The Administration must be concerned with the northern cities as much as they are concerned with Palm Springs. "Norther cities have something else besides gray skies, cold, and lousy golf courses," Burch considers the tight, compact northern cities crucial to our survival. "The water pipes are there and the sewers are in place. "The South Bronx must be the better idea in our future. It is a place bombed out, waiting for flowerpots."

Perhaps the problem is that we are trying to make our northeast cities what they are no longer — they have become cultural centers, not industrial centers."

The opportunity for a small city is to build a community with a holistic use of natural resources. We should challenge ourselves to adapt the concept of the American Indians — to waste not, want not. The possibilities are available, from utilizing the energy produced by decomposing wastes to community recycling. Everything depends on the efforts of the people, though.

"Now, there is easy acceptance of reductions in public arts funding, welfare, and library sciences and most everything else. But humans are as other animals, and are different, too. We humans have moved to the associated endeavors of art, religion, learning, and literature. This is what defines us as humans. These must be preserved."

"A city is a contrast of crass commercialism and high aspirations, of old and new. A city without these qualities, a sense of play, a link with nature, is indeed impoverished."

William Burch's visit to Yale also allowed Wilbur S. Smith, director of the Yale Social Ecological Center, an opportunity to talk with Natural Resources classes. Depending on the interest of the students, he made presentations drawing on his teachings as professor of Social Ecology, Forestry and Environmental Studies at Yale University.

Position Description

Student Lifestyle Assistants

14 Newly Created Student Lifestyle Assistant Positions

Now Open

Salary: Minimum Wage

Work Study Eligibility Preferred

If interested, please pick up an application blank at the Health Center at the front desk or room 201.

Student Lifestyle Assistants (L.A.) are energetic, friendly, enthusiastic, and dedicated people who want to help other students develop to their potential by molding healthy lifestyles. This position is intended to promote wellness activity among UW-SP students. Assistants will assist professional staff in helping students become aware of and make choices about healthy lifestyles. Lifestyle Assistants have a chance to develop themselves professionally in communication skills, counseling, advertising, and programming.

The Lifestyle Assistants will arrange the desired development programs, e.g., nutrition, physical fitness, stress reduction, etc. for students. L.A.'s need not be knowledgeable in all interest areas but must know how to set up a broad range of programs. Thus, L.A.'s need to have organizational and leadership skills. There will be approximately 25 hours of training for L.A.'s to learn about group facilitation, leadership, wellness resources, operation of audiovisual equipment, and program evaluation.

L.A.'s will help students define their interests and locate and secure resources that will meet their needs. The L.A.'s will be expected to encourage student leadership within the special interest groups. L.A.'s will conduct student evaluations after each program.

The Lifestyle Assistants will also have the opportunity to talk with students through weekly meetings on an individual basis with a Residence Hall Director and the Health Center Director.

In general, the Lifestyle Assistants will be expected to actively promote and support other wellness programs on campus and contribute to ongoing wellness program development.
Environment

Smokey Mountain Breakdown

By Kevin Howard

"What boy, exciting and adventurous way could I find to spend my 1981 spring break?" This question bothered me ever since last year's 8-10 day vacation ended with nothing more to show for it than being able to recall an entire week's worth of "Leave it to Beaver" and an added inch or two around the middle from Mom's home-cooked meals.

Well, last February was one of my roommates approached me with the idea of doing some backpacking in the Smoky Mountains, my question was answered. Never being able to come up with enough money to head far enough south to get a good sunburn, this sounds like a reasonable reason to run and stay running. Of course I had never been backpacking before, but a few backyard camp-outs when I was in the fourth grade seemed like enough experience to me.

When long awaited Friday the 13th arrived, all that had to be done was to breathe through a calculus test and then hit the road. After a pro-journey delay of trying to get the truck to reason, we were on our way. After what seemed like days already, we arrived in Gatlinburg, Tennessee. We located at the local Big Boy, as we all knew this would be our last nutritious meal. However, we would be able to return to civilization.

A ranger greeted us at the Cataloochee Ranger Station and wished us an enjoyable trip. We were finally hiking! The first day's hike was cut down to only two miles because of the little delays along the way, but when camp was finally made, we all marveled at the new surroundings and pondered where in the United States we were. After being joined by eight white-tailed deer while we ate our first meal, darkness arrived and we all hit the sack.

Expecting warm days and mild nights, I had not packed enough shelter. Possessing my backpack, I was not sure whether or not this was a reasonable alternative. Of course I had never been to the Smoky Mountains, my had never packed enough shelter. Possessing my backpack, I was not sure whether or not this was a reasonable alternative. Of course I had never been to the Smoky Mountains, my

Backpacking in Colorado

A Taste of the High Country

By Tom Woodside

It was late in the afternoon and the 20 hour ride to the Colorado Rockies was entirely tiring and loathing. No doubt about it, two empty cases of Coors beer, a pile of sandwich wrappers and empty styrofoam coffee cups scattered about the car signified a successful road trip.

No ticket, no accidents, just miles and miles of Interstate 80, and of course, gaffins of Coors finally brought us into the paradise of Estes Park, Colorado a beautiful national park located in north central Colorado.

Four of us, destined to pack the park's back country and set camp before darkness, found our way to the park's main ranger station to register for our trip.

Upon pulling into the ranger station's parking lot, we talked of how refreshing it was to get away from Steven's Point. Ironically, as we entered the building we were greeted by four female rangers, all of whom recently graduated from Stevens Point.

Small world, isn't it?

After a minute, we expected the unexpected, as was the case that evening. The two mile hike to our first campsite seemed like 10, especially when hiking by moonlight. Lesson number one; never believe rangers who smile and say "it's only a mile." Being the experienced hikers that we are, setting feet into the mountains was a snap and so was the weather. On first sight it was snow covered, frozen lake, surrounded by mountains covered with Ponderosa pines and glistening snow-capped Buena Vista's captured our sight, creating a feeling of "Rocky Mountain High," almost as if the mountains cast a spell on us.

We agreed to camp for two nights at Fern Lake because it provided the tranquility we so desperately needed. Afternoons at the lake consisted of sun bathing, soaking up the 60 degree weather, drinking cold Coors, and of course building snowmen. (Daytona, eat your heart out!) Yeah, we all agreed we had finally found "the good life," and good it was. However, in our amazement, the tranquility was interrupted on Sunday afternoon.

While sun bathing on the lake, pondering various philosophy questions, we heard a yell from the top of the hill. Could it be an old mountainman? Or maybe Bigfoot? No, it was another hiker, followed by 12 others, and yes, they were all from UWSI! "Could this be a cup of tea?" we thought.

Actually, the group was a Physical Education class led by Professor Powers of that department. (What a great way to earn a Phy. Ed. credit.)

Our first reaction to the group was negative—they had intruded on our "paradise." However, after further evaluation, we decided their presence would be fun. Of course, the whiskey that some of the hikers had packed added to our acceptance of the group.

That sunny Sunday afternoon was full of surprises. Besides having 13 people from UWSI camping next to us, three more strangers invaded our camp—two women and one man, all on a day hike. By talking to them, we learned that one of the women was from New Jersey. We assumed she wasn't from Colorado by her soaked, frozen tennis shoes. Smart hiking, eh? The man wasn't much better off because he wore socks "earth" shoes and he was from Denver! After that, we questioned the mentality of native Coloradans.

The day's hike was nights at Fern Lake because strangers invaded our campfire gathering. We even met a Psychology graduate from Purdue who recited the "Jabber Woky" poem by Lewis Carrol during our Monday evening camping gathering.

After the brief rest, we were ready to tackle bigger

Forestry Quiz

By Terry Burszt-Schau

1. One method of classifying trees is by the position of their crowns in the forest canopy. Name the four classifications.

2. Name the tree, commonly found on moist organic soils in bogs, that drops its leaves in the fall.

3. What is the length of a "ferry" in chains?

4. What are the two systems of land classification used in the United States?

5. What is a board foot?

6. What is meant by D.B.H.?

7. What plant is needed to complete the life cycle of the fungus that causes white pine blister rust?

8. What is the common name for Tsuga canadensis?

9. What is sustained yield?

10. What is site index?

answers on p. 14
Smokies from p. 13 including a warm sleeping bag, so I froze the first night. Little did I know that I would freeze over and over again until I could once again return to a nice warm bed. As we hiked the following day, the scenery was beautiful and the weather was sunny but cool. That night we were greeted by a big cloud that dumped about four inches of fresh snow on everything. As it turned out, the mountainsides all had snow waiting for us, and only by hiking down into the valleys could we find warmer temperatures and dry ground. However, five of our six campmates were all up on the mountainsides, so the majority of our backpacking trip involved gaining experience about winter camping, including learning how to hide over a campfire for hours on end and trying to stay warm.

As I look back at it now, the solitude was great. The challenge of facing nature, one on one, with really nothing more than the clothes on my back, a small assortment of food, a tent and a sleeping bag, give me a different perspective on how we all take the modern conveniences of home for granted.

Colorado from p. 13 and better mountains, thus we registered to hike the Wild Basin area—a dry 3,000' area in the southeast corner of the park.

Remembering the information the rangers gave us before our hike, we used caution in approaching the Basin area trailhead, and rightly so because the trail to our destination was covered with over three feet of snow. No dice. We decided not to hike that one, although our ranger friends said the trail was open. Ha!

We then proceeded to find a lower elevation to hike because there would be less snow. According to our map, a trail started near the Wild Basin area at Sandbeach Lake. Antzox for the hike we had broken our packs and trudged into the forest in search of the trailhead. After 20 minutes and no sign of the trail, we decided our map was a misprint. After all, four collegians couldn't find the trail, so it was an obvious misprint.

Luckily, we were in a huge national forest so we spent our last night camping there. Let's see, the tents were up, the sleeping bags were snoring, and oh yes, our hammock was finally put to use. It was snowing and four crazy people sat up a hammock. Well, it seemed like summer. That evening we had a snowgabash and ate the rest of our freeze-dried dinners. Yum, tasty stuff!

We sucked out early because Thursday's plans called for a road trip to Boulder, then Denver. As the day dawned, we donned our frozen boots and hiked to the car. Boulder, watch out! As the day progressed, we found that 19 trained people can do the work of 100 untrained fighters.

Although all DNR personnel are potential fire-fighters, the potential movement of crews is difficult. The UWSP crew is mobile and deployable anywhere in the state. The DNR is wary of a critical national forest fire potential this year especially now as spring is in full swing.

The S.A.F. and the university have organized some new training. Shown trained share the DNR's reasons and go a few steps further. Exposure to the actual employment conditions offers field experience for the UWSP crew. Action is a service to the community and state as it fulfills a demand for fire protection (i.e., Minong, Ernie Smith camp training and fire call last spring). People who participate are looked upon favorably by potential employers for their efforts.

This session is a trial program of such training. Crews work well and they may set a national precedent. Also the DNR, the customers, stand to gain bettered relations with the public.

Quiz Answers:
1. Dominant, co-dominant, intermediate and suppressed.
2. Tamarack (Larix laricina)
3. 20 chains. One chain equals 66 feet.
4. Motes and bounds and rectangular surveys.
5. One chain is 66.00 feet.
6. Diameter breast height.
7. Grouping (A.k.a., genus Ribes).
8. The woven blanket.
9. The yield of a forest can continually produce at a given stage of management.

Rendezvous '81

The fire traders of the past gathered every year to socialize, exchange stories, and speak of their adventures of the year that had passed beneath their canoes and over the portages. These gatherings were called Rendezvous.

On March 27, Rendezvous will look place. The UWSP College of Natural Resources held their banquet to gather students and faculty along with guests that included the Secretary of the DNR, paper company executives, U.S. Forest Service people and many more.

The event began with an art show and social hour at 5:30. After the exhibit entitled the "Natural World and Art" a dinner was served in the Program-Banquet Room. Chancellor Philip Marshall gave a welcome speech praising the CNR and the students in the various majors of the college.

Then, charging back to wonderl Stevens Point, sunburned, broke, full of great stories. A good night's sleep in a warm house did wonders.

It is by fire call of last spring (1981) that we were greeted by a smorgasbord and fire call of last spring.

Those involved were volunteer CNR majors who were members of S.A.F. All told, 200 people comprised the UWSP crew.

The Department of Natural Resources, who performed the training, has several reasons to want a UWSP crew trained for fire fighting. They have found that trained people can do the work of 100 untrained fighters.

Fire Training

By Steve Schaad

"Fight fire with training." This philosophy was the motivation for the fire fighting training session held Saturday, March 28 on the UWSP campus. The session sponsored and organized by the Student Chapter of the Society of American Foresters under the leadership of Ken Machca, president.

Those involved were volunteer CNR majors who were members of S.A.F. All told, 200 people comprise the UWSP crew.

The majority of the training was centered about mountain fire behavior and fire fighting skills. In the off season, the students were trained for fire fighting.

Students Secretary Forest Art show and social hour at park.

"Fight fire with training." This philosophy was the motivation for the fire fighting training session held Saturday, March 28 on the UWSP campus. The session sponsored and organized by the Student Chapter of the Society of American Foresters under the leadership of Ken Machca, president.

Those involved were volunteer CNR majors who were members of S.A.F. All told, 200 people comprise the UWSP crew.

The Department of Natural Resources, who performed the training, has several reasons to want a UWSP crew trained for fire fighting. They have found that trained people can do the work of 100 untrained fighters.

Although all DNR personnel are potential fire-fighters, the potential movement of crews is difficult. The UWSP crew is mobile and deployable anywhere in the state. The DNR is wary of a critical national forest fire potential this year especially now as spring is in full swing.

The S.A.F.'s reasons to organize the training were to help trained share the DNR's reasons and go a few steps further. Exposure to the actual employment conditions offers field experience for the UWSP crew. Action is a service to the community and state as it fulfills a demand for fire protection (i.e., Minong, Ernie Smith camp training and fire call last spring). People who participate are looked upon favorably by potential employers for their efforts.

This session is a trial program of such training. New crews work well and they may set a national precedent. Also the DNR, the customers, stand to gain bettered relations with the public.

Quiz Answers:
1. Dominant, co-dominant, intermediate, and suppressed.
2. Tamarack (Larix laricina)
3. 20 chains. One chain equals 66 feet.
4. Motes and bounds and rectangular surveys.
5. One chain is 66.00 feet.
6. Diameter breast height.
7. Grouping (A.k.a., genus Ribes).
8. The woven blanket.
9. The yield of a forest can continually produce at a given stage of management.

CALLAHAN & FARICY DUO-PIANISTS

MONDAY APRIL 13, 1981 8:00PM MICHELESEN HALL
Ticket Information: 346-4666
To The Pointer:

I recently received word that the Pointer did an article on Mr. David P. Laing. I am curious to find out if he has been located. Enclosed is the last correspondence I have received. I feel it my duty to temporarily surrender it for publication, if desired. I can vouch that the photo is of David. (Please excuse where I've manuscripted it to a board.)

Sincerely,

Peter Olive
Arlington, MA

---

To The Pointer:

The vultures prune their feathers quietly as they perch in mutual anticipation, monitoring the television. They watch other vultures in a frenzy, picking away at information that isn’t there. Is this spectacle within a spectacle compassion for mankind?

"Did you hear what happened to the President?"

Oh sure, but that was nothing. Did you hear what the media did? They killed Brady and then a short time later, with the power of a registered messiah, they raised him from the dead...now that’s news! (I just hope they can repeat that trick if need be.)

When we ride these nauseous anymore park attractions, we subject to hold each others hands. Who’s to blame? No one. Let us force us to pay the fare.

Levan Bairani

---

To The Pointer:

In regard to the current flap about Campus Security and their demands for increased power, I have yet to see any extra arrest powers or (my dollars!) violent security officer move on to higher pay at Sentsy. Sentsy’s chief security officer appears to be a violent crime? Here we are hearing where, for example, the murder rate is at most ten cases a day, and nevertheless At Kurzweil & Co. are trying to promote a dubious “war on crime” that reminds me very much of a situation in Nixon once pretended to do.

What’s going on? Is UWSS really being subject to yet another example of the rent-a-cop ranks? If the above has over the last several years, given the world more and more private security thugs with licenses will tend to of innocent person here going to be shot by a campus cop before the total madness of all of this becomes obvious?

My answer to this dilemma is that I am exaggerating at all. Mr. Deaver’s letter of March 28 is quite clear. The martinet-like mentality, the “poor judgment and total lack of common sense” of those who are now trying to arm themselves at public expense, of course. What tales of abuse of authority are the argument so far. The arguments Security has used, is a now power grab have already been adequately debunked in Mr. Sepsenwol’s letter (March 28). What I would like to know is that things have been placed in a somewhat more balanced light, is the Wisconsin Department of Justice. All of us are also strongly encouraged to continue our education in the law enforcement field and personally working toward my B.S. Degree in Police Science.

3. Dr. Sepsenwol stated that Campus Security lacks consideration for students and faculty, and has a generally antagonistic relationship with other officers. However, if you were to consult with all genuine complaints made against officers with the amount of calls they handle you would find the ratio quite low. I am not aware of any general complaints we do receive. Any time someone voices a complaint in my presence, it is by an officer, they are investigated by supervisory personnel.

4. Dr. Sepsenwol quoted that Campus Security personnel believe they are expected to help us better protect our persons and property. As compared to other officers, this is clear. Out of line with its to serve the university, not to protect the students better. Your proposed crusade for an enforcement is commendable.

Siegel Sets Crowds Stomping

By Jeff Dabel

Corky Siegel returned to the UWSP campus last Friday night, providing the near-capacity audience of rhythm and blues fans in Allen Center with a concert they won't soon forget.

The Corky Siegel Band topped off an eventful evening filled with good fun and drink with a two-hour performance that left the crowd stomping and clapping for more. Hats off to the UAB Contemporary Entertainment people for bringing such a quality performance to our campus.

Snopek, a Milwaukee-based band, started off the evening at 8 p.m. with several cuts off their newly released album, First Band as the Moon. Led by keyboardist Sigmund Snopek III, Snopek is by no means a one-man band. They incorporated a heavy metal sound that realized the mood for the night's entertainment.

One observer commented that Snopek sounded somewhere between Styx and Devo. And I would agree.

Snopek should have quite a successful future—providing they can find a lead vocalist to complement their fine musicianship.

When the Corky Siegel Band started playing at 10 p.m., everybody was ready to hear some fine harmonica solos. Corky has been called one of the finest harmonica players of all time—and he certainly proved that as he performed solo after spectacular solo. But a Corky Siegel harmonica does work with band make.

The success of Corky's newly formed band came from the harmony supplied by his fellow musicians. With Rollow Radford on bass, Bobby Diamond on guitar, and Frank Donaldson on drums, the Corky Siegel Band produced a sound that combined rhythm, blues, jazz, and rock into one unique performance.

They began their set with an old Siegel favorite, "I Think It Was the Wine." Corky wasted no time warming up his harmonica, captivating the audience with his incredible range and stamina. The next number, "First the Bleet and Then the Thunder," featured guitarist, Bobby Diamond. Diamond, one of the top session players in the Midwest, wasted no time in warming up his guitar, either. The audience went to its feet after hearing his aggressive style.

Rollow Radford soon had his come to the limelight, the bassist performed his version of the song, "I Need Something." He amazed the audience with his precision playing—something he accomplished without the aid of any frets (wooden ridges which help the fingers locate notes) on his instrument.

After the solos were finished, the entire band came together on a blues-rock version of "Steak and Potatoes Man," which ended with all four musicians playing the keyboard side-by-side. By this time the audience was hot, but the band was just beginning to get warm.

Siegel noted his audience's enthusiasm. "Boy are you ever rowdy!" With that, he launched into "Billy Jean," a song which featured such favorite lines as, "Stomping your feet and chug-a-lugging your beer," and, "Billy Jean, you don't act like a whore but you know how to love." Siegel ended the song with a marathon harmonica solo that continued for nearly 10 minutes, punctuated by an occasional echo, grunt, and groan.

One of the favorites that night had to be, "Asleep at the Wheel," a funny, rollicking trucker's song which ignited a large dance floor that began to weave in and out between tables and the stage. When the song was over, Bobby Diamond grabbed the mic and proclaimed: "Stevens Point, really knows how to kick some ass!" The crowd loved it.

Harpsit Siegel blows the blues

MDA Dance Marathon

By Mike Dakeh

On April 3 and 4, a dance marathon will be held in Allen Center Upper for Muscular Dystrophy. This event, the third held Stevens Point for the disease, is being sponsored and organized by the campus Greeks.

The marathon will begin Friday at 6 p.m. and carry through nonstop until Saturday's Final Dance at 10 p.m. In between, dances will have the opportunity to get down for as many hours as their bodies will allow. The kickoff band will be Entropy and spectators are welcome to come, view, and listen.

Each participating couple (male and female) must register and pay a $10 entrance fee in advance. The fee is applied to their total donation figure. The couples also are encouraged to solicit donations from friends and relatives, pledges of a certain amount for each hour danced. This serves as an incentive to stay up on one's feet.

Couples dance for four hours with a 30 minute break and cannot leave the dance floor except during rest periods. All participants also take part in other provided activities, whether they be outrageous contests, bizarre dances, or merely luring changes or peace. After all, the dancers are the ones the spectators are donating gratis to see perform. All meals and snacks will be given to the couples free of charge.

The money raised by the marathon will go to the Muscular Dystrophy Association, an alliance between concerned citizens and scientists aimed at conquering neuromuscular diseases which affect thousands of Americans. As of yet there is no cure for Muscular Dystrophy and its cause isn't even fully understood. Medical treatment is limited to relieving symptoms of the disease.

MDA's programs are funded almost entirely by private contributions and such organized activities as the marathon. This money, in turn, is used to support MDA's worldwide research program, a nationwide program of medical services, and patient aids and their families cope, a network of free clinics, a summer camping program for the afflicted, and education programs for both professionals and the general public.

If you wish to register or seek further information, contact Richard Johnson at 314-9753.

These April Fool's Day jokes make for a special day at the University.
Shakespeare's Tempest: A Supernatural Frolic

By Mike Decha

Shakespearean scholars speculate in light bemusement, that were Shakespeare alive and writing today, only the musical comedy marketplace would give him a chance on his plays. For this genre alone can translate such diverse elements as well-conceived and written script, felicitous buffoonery, and a serious message about society into a total product that arouses mass appeal. Certainly all three elements were essential to the successes of such powerhouses as West Side Story, Hair, and Etoile. Yet what really distinguishes a musical is, of course, its music. Many a miserable script has had its behind scraped out of the fire by a memorable score.

With this in mind, the National Players Touring Company brought its production of Shakespeare's fantasy masterpiece The Tempest into the Sentries Theatre for five evenings. Working with a Shakespearean comic-fantasy, the troupe already had a strong base for the requisite quality writing, because of a consistent theme. To overcome the Bard's notoriety among the general public for playing that point, no small feat, the light designer made numerous pictures with color, and the stage as a result was iridescent.

Artistically and technically, the show was a success. For many Stevens Point folks who may have come to the theater last Thursday expecting the worst, that means the word "Shakespeare" will no longer be linked with "think too much."

The cast seemed much more in command of the role than during the second act numbers. The only major exception to this vocal criticism was found in the character of Prospero, who was as strong in his deep, resonant singing as he was in every other aspect of his performance. The play takes place on an island where the noble sorcerer Prospero has been stranded for many years with his beautiful daughter Miranda. Also in the magician's service are the man-animal Caliban and the mischievous spirit Ariel. During the course of the show, Prospero mysteriously and without further ado, plays havoc on them for his own edification, and finally brings them to trial. Simultaneously, Miranda meets the son of one of these former foes and after a short courtship, marrys him. A bit unrealistic obviously, but it is the jovial, tidy ending nonetheless.

Friday's performance of The Tempest was very well-received, and for good reason. The play was acted - the way it was acted. Looking up and down the program, there wasn't one character who didn't contribute handily to the ensemble. Each performer had a solid idea of where his role was to go and pushed it to that point, no small feat for young actors attempting Shakespeare. The audience's initial fears about comprehending the language were quickly set aside, for each one's voice crackled or glowed, and glance clarified exactly what the soothing lift of the language was saying. Particularly impressive in this cast of standouts were a handful of actors. Prospero (Rick Ingianti) foremost among them. Not only does Ingianti make us delight in the ability of his tongue but in that of his mind as well. He takes an all-powerful, God-like character who's capable of horrible deeds and makes us approach him as noble, wise, and fair. The actor also deserves credit for his masterful month of the rest and supernatural worlds; his subtle handling of both provides a credible foundation for the rest of the play.

The audience favorites were the stock comic buffooners, played by "Two Stooges" slapstick to incite even the dullest, and the tart-tongued misanthropes to rousing laughter. Another extremely popular character was Gonzalo, the white sheep of the court, brought caustically to life by Roger Riggle. His curious stutter gait had audience members twittering over his prospects of surviving the play without a fall.

Technically, the show was also of high quality. The island was represented fragmentarily by several impressionistic units wearing a blue-grained velour. All three units, and particularly the sorcerer's abode, were comprised of an effective network of eerie lines, curves, and points that draw comparison with Gorey's Dracula styles. The costumes was lavish or simple as the script dictated. Prospero's magic gown was magnetic in its design. The lighting designer made numerous pictures with color, and the stage as a result was iridescent.

Trivia '81 Tune-up

By Jeanne Pruski

(Note: This is the first of two columns designed to fine tune your powers of trivial recollection in preparation for WSUP's "Weird Extravaganza April 11, 11 and 12.)

1) In the movie Fame was the license number of the car the students dance on.
2) When Pope John Paul visited Chicago, what recovered teddy sang on his behalf and what did he sing?
3) In Being There, who directed the video segments of "The Gary Burns Show"?
4) Who carried the torch for the U.S. Olympic team in the 1978 Winter Olympics and what sport did the carrier participate in?
5) Who was last year's SGA President?
6) In "Killing Me Softly With His Song" who is he and what's the song?
7) In All That Jazz, how much would the production company gain if Joe died before February 1?
8) What was the last date Walter Cronkite broadcast the CBS News?
9) What T.S. Eliot poem did Marko Brando recite in Apocalypse Now?
10) In The Shining, what was the number on the box of Lia ribbons in the store room?

answers on p. 19
Vote April 7th and 8th
Elect Jack Buswell and Ed Karshna
For Student Government President and Vice President

EXPERIENCE WITH A DIRECTION

Next year if elected we will work hard for you in the following areas:
- Expansion of tenant association to protect the rights of students in off campus housing.
- Opposition to the granting of arrest powers to protective services.
- Vigorous opposition to any student financial aid cuts whether they be state or federal cuts.
- A commitment to insure your student activities fees are spent wisely and efficiently.
- A promise to provide leadership for a student government that is more responsible, more visible, and more receptive to the interests and needs of the students of UWSP.

Qualifications:

Jack
Current Executive Director of SGA
Tenant Association Member
Former Student Senator
Former Member of Student Legal Society
Deans Advisory Council
Pre-Law Major

Ed
Student Senator
Academic Affairs Committee
Tenant Association Member
Communications Committee
Former Director at 90-FM
Political Science and Public Administration Major

Brewers Hope New Pitching Strength Brings Pennant

By Joe Vanden Plas

Certain baseball experts were blinded when they predicted the Milwaukee Brewers to finish on top of the American League's Eastern Division before the 1979 and 1980 seasons.

The experts were blinded by Milwaukee's awesome hitting. The Brewers, baseball's modern day version of Murderer's Row, were thought to possess enough power to overcome their pitching deficiencies. But the experts were wrong. The Brewers were living proof that good hitting is not enough.

But the experts were wrong. The Brewers were living proof that good hitting is not enough. Enough power to overcome the 1978 and 1980 version of the Yankees. Gossage of the Yankees, finishing eight games behind the majors in several categories since 1979 and the Orioles in 1981. Simons will become serious for the Brewers nevertheless.

The Brewers were living proof that good hitting is not enough. Enough power to overcome the 1978 and 1980 version of the Yankees. Gossage of the Yankees, finishing eight games behind the majors in several categories since 1979 and the Orioles in 1981. Simons will become serious for the Brewers nevertheless.

By Joe Vanden Plas

Certain baseball experts were blinded when they predicted the Milwaukee Brewers to finish on top of the American League's Eastern Division before the 1979 and 1980 seasons.

The experts were blinded by Milwaukee's awesome hitting. The Brewers, baseball's modern day version of Murderer's Row, were thought to possess enough power to overcome their pitching deficiencies. But the experts were wrong. The Brewers were living proof that good hitting is not enough. Enough power to overcome the 1978 and 1980 version of the Yankees. Gossage of the Yankees, finishing eight games behind the majors in several categories since 1979 and the Orioles in 1981. Simons will become serious for the Brewers nevertheless.

UWSP Eighth in
WWIAC Indoor

By Carl Moesche
Without substantial depth at various events, seldom does a track team have a legitimate chance of winning a track meet.

The task is even more difficult when trying to vigorously defend champion on its home track.

The UW-Stevens Point women's track team found this to be the case as it finished eighth in the Wisconsin Women's Intercollegiate Athletic Conference Indoor Track Meet held at UW-La Crosse last Saturday.

UW-La Crosse accumulated 121 points in successfully defending its title. Finishing second was UW-Eau Claire with 61 points, third place went to UW-Parkside with 56 points, and following in order were UW-Milwaukee with 37; Marquette, 35; UW-Oshkosh, 28; UW-Whitewater, 11; UW-Superior, 16; UW-Platteville and Carroll, 8; and UW-Stout, 7.

The Pointers failed to capture a single first place, and only recorded one second place. That went to Ann Maras in the 800 with a distance of 2.58 meters.

The only other individual winners for UWSP were Dawn Broeker, Allison Holzendorf, Betty Jirgi and Houlihan. Broeker took sixth place in the one-mile run with a time of 5:14.58, while Houlihan likewise took sixth in her event, the 600-yard dash, with a 1:30.86 clocking.

The Pointers' 800 relay team earned the remaining points, with a third place finish of 1:33.46. Members of that relay included Ann Broeker, Allison Holzendorf, Betty Jirgi and Houlihan.

Pleased with her team's improvement in the meet, Pointer Coach Nancy Schenck said, "We did well even though the score doesn't seem to reflect our improvements.

"The team gave it their best effort, we did as well as we could have, but we just don't have the depth."

The Pointers will be looking forward to their outdoor season which opens on Saturday, April 4, when they travel to Kenosha to compete in the Carthage Invitational.

"Lake Race" Slated for June 6

College students throughout the Midwest are invited to participate in "The Lake Race" to be held in Clear Lake, Iowa, on June 6. The Lake Race is a group of four different races to be held on the same day along the shores of Clear Lake. The races include a halmarathon run (13.1 miles), a ten-kilometer run, a one-mile fun run, and a bicycle race around the lake (approximately 14 miles).

The event is being billed as a weekend of fun and fitness to kick off the summer. Plans are being made to accommodate 1,000 participants.

The event is sponsored by the Clear Lake Area Chamber of Commerce with the cooperation of the City of Clear Lake. Chamber Executive Dave Voss said, "We expect the event will draw many young people to Clear Lake for the weekend and we're happy to have them coming here to start their summer. While the races will be the featured activity of the weekend, we expect many people will come just to watch and enjoy the lake by swimming, skiing, sailing, and the like."

For years, Clear Lake has been the traditional watering hole for young people to start their summer.

The committee organizing the event announced the entry fee will include participation in the race, refreshments along the course, a noon pork chop luncheon, and a souvenir T-shirt.

Persons interested in participating should write "The Lake Race," P.O. Box 107, Clear Lake, Iowa, 50428, or pick up information available at college physical education departments.

Hartman Named

Dr. Paul E. Hartman, director of athletics at UWSP, was named Vice-President for the Division of Sport and Athletics at the recent convention of the Midwest District of the American Alliance for Health, Physical Education, Recreation and Dance. Hartman, athletic director at UWSP for the past five years, will be responsible for public relations within the Midwest District and will oversee the entire program including convention areas.

Areas within the Sport and Athletics Division include women's and men's sports, sports medicine, and athletic administrators.

Brewers from p. 23

field after manning second base for three years. The former University of Minnesota standout looks like a natural for the position and "has adjusted well to it thus far. Former Brewer Manager George Bamberger has compared Molitor to one of the all-time greats of the position. "I think Molitor could be another Paul Blair," observes Bamberger. "And Paul Blair was about the best center fielder I've ever seen."

Gorman Thomaes will move to right field, a position he is better suited for. Thomas' lack of speed was a liability in center. In right he will not have to cover as much ground and his strong throwing arm will make Brewer fans forget about Bamb St.
Thincclads Second
in Triangular

By Steve Heiting

The UWSP men's track team finished second to UW-La Crosse in the conference outdoor meet last year, and on paper it looks as if they will again this year. So far this season the Pointers have finished behind the Indians in every meet in which the two teams have participated, including last Thursday night.

Stevens Point chalked up nine first place finishes but it wasn't enough. UW-LaCrosse won the triangular event with 124 points, well ahead of Point's 72 and Northwestern College's (Minneapolis) 3.

The standouts didn't bother Stevens Point Coach Rick Witt, however. "It really wasn't much of a meet. We kept a lot of people out of their main events with the conference meet coming up this week," stated Witt. A good example of what Witt was talking about was in the case of freshman speedster Len Malloy, who sat out of his specialty, the 60-yard dash. "Their guy (La Crosse's Reggie Raab) was really psyched up to run against Malloy. Maybe this week he won't be as ready," Witt pointed out.

Warming up for the conference meet was All-American Jeff Ellis who headed the list of UWSP champions Thursday as he turned in a first place finish. He took the two-mile walk and the 880-yard run in times of 14:13.9 and 1:57.5, respectively.

Coach Witt praised a number of his thincclads, but he especially cited the 81 foot, 8 3/4 inch effort by Kirk Morrow in the shot put, which was good enough to qualify him for nationals.

Others taking individual honors for Stevens Point included Bruce Lammers in the 60-yard high hurdles with a time of 8.73, good enough to set a La Crosse fieldhouse record. Barry Martzash outclassed the field in the 300-yard dash in a clocking of 33.2; Dennis Kotcom took the mile run in 4:23.9; and SPASH product Steve Brilowski broke the tape in the 600-yard dash in 1:14.3.

The 880-yard relay squad of Malloy, Jon Gering, Lammers, and Dave Lutkus captured first place honors in 1:33.1, while the mile relay unit of Dave Soddy, Tim Fitzgerarl and Erik Parker burned up the track ahead of everyone else in 3:38.6.

Three second-place finishes and six third also contributed to the Point total. Mark Wittveen came forth with a strong showing in the three-mile run, but finished second in 14:91.3. Parker also turned in a second in the 440 with 52.1, as did triple jumper Tom Weatherspoon with a leap of 43 feet, 1 1/2 inch.

The host of third place finishers included Ken Bauer in the mile run, Shane Brooks in the three-mile run, Fitzgerarl in the 440, Ron Rost in the two-mile walk, Lammers in the 220-yard intermediate hurdles, and Mike Baumgartner in the 60-yard high hurdles.

Witt was full of praise for Bauer's effort in the mile run. "He really hadn't had a good race until Thursday, and he came through with a good one. In order to win conference we'll need good performances like this out of him and others."

The fact that 52 points separated the two teams doesn't seem to have Witt worried at all. "There's no way they're 52 points better than us," he said. "The conference meet will probably be decided by less than ten points, and a lucky break could make it go either way. However, LaCrosse has the advantage of running at their home fieldhouse, but I think we can win it."

Either way, the Pointers face a stiff challenge Friday and Saturday against the rest of the WSUC in the Conference Indoor Meet.
Applications are now being accepted for the 1981-82 Pointer Editor
