**Pointer presents UWSP history**

"We present to you the first issue of our school paper. We believe as students that the advantages to be derived from the publication of this paper are many."

Opening paragraph, editorial

The Normal Pointer, Vol. 1, No. 1

December 1895

J.S. Hamilton, editor in chief

With this issue, this year's Pointer staff hopes to start an annual tradition. We would like to see the "History" theme become a yearly topic for the Pointers to come.

This week's cover is a replica of the original Pointer, first published in 1895, one year after the Stevens Point Normal School first opened its doors.

---

**slaying dead Gang Rape death too soon abuse**

The Women's Resource Center has distributed posters bearing these messages around campus, encouraging the use of the Escort Service. Many have commented that these posters are "frightening" and "shouldn't be distributed" since they are "scaring people."

On October 15, UWSP sophomore Janet Raasch disappeared from the Stevens Point area. Her partially clad body was found on November 17. She died by strangulation and was presumed to have been sexually molested. As of now, the Sheriff's Department has "no leads."

In 1983, the Stevens Point Police Department reported 21 sexual assault cases. In 1984, there were 18 reported cases. Of these 39 total cases, 23 were classified as first degree ("forcible sexual intercourse or sexual contact accomplished without consent, through inflicting great bodily harm or while armed with a dangerous weapon, or while aided by another person or a person age 12 or under").

Sexual assaults do not take place only on large campuses or in big cities. They happen here in Stevens Point and people need to be informed. The Escort Service posters are frightening, not only because of what they say, but because the phrases they display were reprinted from newspapers and magazines. The events they describe actually happened and will happen again.

The fear of sexual assault robs people of their freedom to walk alone. It affects their peace of mind; their sense of security.

That's unfortunate. But sexual assault is a reality, (for men as well as women), which should not be ignored. It is an ever present danger, but there are measures which may prevent it.

* Never walk alone at night, particularly if you are a woman. Call Escort Service at 346-3456. They will walk with you anywhere within a two-mile radius of campus between the hours of 5 p.m. and 2 a.m.

* Never walk or jog alone in Schoenbeckke Reserve, regardless of the time of day. There have been several incidents of indecent exposure.

Education would make a giant stride forward if school children, their parents, teachers and college professors all spoke the same language about learning.

That theory is being advanced by a faculty member at the University of Wisconsin-Stevens Point.

Robert Schmatz is one among many American educators who have become disciples of Madeleine Hunter, developer of a teaching method which bears her name.

Schmatz spent part of last summer in a program she conducted at the University of California—Los Angeles where she has been a psychologist and laboratory grade school principal for ten years through the University Center.

The Hunter method is featured in several new courses on mastery teaching that Schmatz has helped develop for both the graduate and undergraduate levels in UW-SP's School of Education.

Concepts in the method aren't billed as new ideas, instead they are being presented as organized teaching approaches that have been successful throughout the country. Teachers are enabling the Hunter approach as they respond to criticism leveled against public education. And they are using it as a form of remedial training for themselves also in sharpening tools they acquired as college students.

In a recent news account about the Hunter method's implementation in the Eau Claire School system, battalion commander for Wisconsin University's second regiment, the district superintendent observed: "There is nothing new in these learning principles that I or anyone else didn't learn in our first college psychology course. But we didn't learn them as meaningful a manner as it is applied in the Hunter method."

During the past week, nearly 30 UW-SP students who will either be intern or practice teachers this semester are participating in the training which was given to them by Professor Schmatz.

The Hunter method in learning

Examples of how various aspects of teaching are pursued with the Hunter method, as explained by Robert Engelhard, are:

- **Student motivation is attempted by raising a level of concern so students transfer so children can use what is learned in more than one situation, extending students' thinking to higher levels, structuring effects of lesson planning, and classroom discipline.**

- In all of the situations, a common language was used which will be repeated by the student teachers in their dealings with children in their classrooms and parents.

- **Assertive discipline is applied broadly including emphasis on knowledge learned as something to be used in different classroom situations and especially future assignments.**

- **Wellness program well-known**

**Folksong coming**

Folksong-songwriter Claudia Schmidt will perform at the University of Wisconsin-Stevens Point at 9 p.m. on Friday and Saturday, Feb. 1 and 2.

Sponsored by the University Activities Board, the event will be held in the Eau Claire Room of the University Center.

Schmidt, who has been performing for 10 years throughout the United States, Canada and recently western Europe, plays for a variety of audiences in coffeehouses, clubs and folk festivals. Her music has been played on radio stations across the country and was a frequent guest on American Public Radio's "A Prairie Home Companion."
Peterson for SGA

To the editor:

In last week's SGA Update in the Pointer, the College Republicans chairman stated "This Senate (SGA) cannot look beyond it's own partisanship". Such a statement is an insult to those of us who serve on the Student Senate.

UWSP is fortunate to have a quality student government system where partisan politics have been kept out. Such party politics have no place in student government.

SGA has an obligation to act in the best interests of the student community. In no way is the SGA a Democratically controlled body where decisions are made along party lines. Each year more than 500,000 dollars are allocated in a just manner by a group of responsible and conscientious students. On the whole, SGA is financially conservative since funding requests are severely scrutinized and often cut to responsible levels. SGA is not a money tree or some welfare agency for those student groups who lack the initiative to undertake fund raising, thereby becoming self-sufficient.

It's very ironic that the College Republicans come to SGA for funding while the Young Democrats are financially independent. What has happened to political principles? How can the CR's even call themselves Republicans if they don't practice what they preach? Are the CR's just disguising themselves as CR's for status?

The CR's have flunked the student group and GOP validity test. That test is the ability to survive in the market place of ideas and to become self-sufficient.

Being a conservative card carrying Republican, I find it hard to support many of the CR funding requests because of these principles which I so strongly believe. The CR's, who request such SGA funding, are establishing a double standard for themselves. They attack the "Great Welfare Society" while demanding to be a part of it by asking for funds to pay for their expenses. Thomas Jefferson would roll over in his grave. It's time the CR's had some faith in the free market system. If people believe in a cause, they should be willing to help support it: you don't need to be rich to survive. Handouts are for liberals. Are the leaders of the CR's Republicans or really closet liberals? Most Republicans consider asking for such funding immoral. Yet here at UWSP, the CR's receive more funding than many groups. Nationally, only a few CR organizations receive funding. It's time the CR's start living by their principles and start setting a self sufficiency example for others to follow.

Robert O'Neil

"People in Wisconsin—all across the state and at every one of our institutions—have been unaffectedly gracious and kind, and I have been blessed by the strong support of an exceptional Board of Regents and a superb group of colleagues. Governor Earl had consistently shown both a forceful commitment to Wisconsin higher education and a personal friendship beyond any reasonable expectation."

The President said that in the time available before assuming his new September 1 assignment, he would do "everything I can" to support the biennial budget request and other needs of the university system.

"The timing permits an orderly transition, involving close collaboration with President Lyall, Vice President Stevens, and other members of the system administration and the chancellors. Since I believe deeply in the quality and future of the University of Wisconsin System, I shall give it the fullest measure of my time, energy and counsel these coming months."

Virginia has an enrollment of 41,000 students and is most noted for its law school and liberal arts studies.

A pleasant surprise

New ordinance passed to recycle newspapers

by Al P. Wong

The City Common Council of Stevens Point has approved an ordinance that would attempt to recycle used newspapers effectively.

The new law will require residents in the city to dispose of newspapers in recycling bins. They cannot simply throw unwanted but recyclable newspapers into the garbage bags or bins. If they do, the refuse collectors may not collect their garbage, according to Alderman James Shuler.

This pilot project to recycle newspapers will be funded by the Public Works Committee. It will be conducted by the City of Stevens Point Recycling Corporation, a non-profit organization. At a meeting of the Common Council, the city's aldermen approved the ordinance.

The measure will be effective April 1. To evaluate the effectiveness of this measure, the Common Council has set Dec. 21, 1985, as the end of the pilot project, said Shuler.

According to the ordinance, "No newspaper shall be disposed of with the regular city refuse except for newspaper rendered useless for recycling purposes.

"All newspapers shall be placed at the curbside collection point for collection by authorized collection agencies or shall be recycled by the residents in any other lawful manner.

"Newspaper shall be tied with heavy string or cord not exceeding 30 pounds per bundle, or shall be placed in containers provided by the authorized collection agency.

To prevent unauthorized people from collecting the newspaper, a clause has been included in the ordinance to impose a fine of $25 to $50 on violators, Shuler said.

If the procedures are not followed, the ordinance says that "City refuse collectors may refuse to collect any residential refuse which regularly contains recyclable newspapers."

New ordinance passed to recycle newspapers

News Editor

Loftus on UW future

by Noel Rodamski

News Editor

Can we continue to afford to educate all the students who show up in the University System?

It was one of the questions State Assembly Speaker Tom Loftus posed at the University of Wisconsin System.

Loftus, acting Chairman of the Select Committee on the Future of the University of Wisconsin System, spoke of five points that should be included in the council these coming months.

"Many people in the state are patting themselves on the back and saying that we have a relatively low tuition. Those of you who are students know it is only relatively low," Loftus also said that he had not fund in any state for less than 15 percent increase on a higher item.

"We should get together and compromise on the tax money that we are going to use to pay for the students not as well funded as they should be," he said.

"We should establish a 75 percent increase on a higher item," Loftus said.

"We should all share financial rewards equally.

Fire in Nelson Hall

by Tamas Heidhall

Senior Editor

Shortly after 1:00 p.m. on Sunday, January 27, a fire broke out in room 210 in Nelson Hall.

The fire appeared started after a match was thrown into a wastebasket, which contained tissue paper stuffing from a pillow.

The two occupants of the room attempted to put the fire out themselves using fire extinguishers and buckets of water. When the Stevens Point Fire Department arrived, the fire was still smoldering and there was a lot of smoke.

The blaze caused an estimated $200,000 in property damage. The room was a common room with a couch, chair, two pairs of tennis shoes, a pair of jeans, a shirt and miscellaneous items.

UWSP Campus Security officers reported no violation of any state property, although they said the room must be reepainted.

The Stevens Point Fire Department said the cause of the blaze was misuse of smoking materials.
A call to protect Indian rights

by Eric Post
Staff Reporter

Wisconsin. It is an Indian word which means, loosely translated, "the meeting of great waters." It is a state in which one would be hard pressed to travel a great distance without coming into a town or city similarly named. It is a land that was once exclusively populated by Indians and subject to their frugal way of

life, a land which was justly nurtured by the Indians who gave back to the earth as much as they got from it. And it is also a land which eventually saw the arrival of the white man, and, simultaneously, the arrival of industry. With industry came the exploitation of the resources and thus the land was raped, its forests exploited, in a whirlwind of diminutive progress called the Log- ging Era, during which the Indian saw his homeland begin to disappear. But the white man, perhaps showing a spark of compassion, allowed the Indians to stay in Wisconsin, allowed certain areas in Wisconsin to remain unscathed so that the Indian could carry on his way of life, free of the white man's insidious influence. After the Indian man called "reservations", and through signing treaties he promised they would remain for the sole use of the Indian forever. Or until he changed his mind. For as quickly and easily as the reservations were established, many of them were diminished or simply eradicated. Today, in fact, Wisconsin is a state in which one would be hard pressed to travel a great distance without encountering signs of the white man's antipathetic feelings towards his Indian neighbors. It is a state in which slights such as "Spear an Indian - save a fish" or "Shoot an Indian - save a deer" bring hearty laughs to those who think Indian treaty rights (the few that remain) should be revoked immediately. And it is a state in which many white men feel the Indian has no place. Racial prejudice toward Indians in Wisconsin is evident; there can be no gain saying its existence. But we must also come to recognize the product of the white man's relentless antipathy toward these American natives - Indian intolerance of the white man.

How much more can the Indian in Wisconsin be expected to take? Surely, if we continue our headlong rush down the path we have blazed for ourselves, a century and a half, a collision is inevitable. Something must be done to ease the separatist views of the whiteman, out of which the Indian has been driven to profound mutual understanding, and mutual sound acceptance between the white man and the Indian. Something, it is apparent, must be done to alleviate the racial tension which is mounting in Wisconsin and over conditions provided for in the 19th century treaties.

The solution is the incorporation into schools, universities, and churches, programs which will teach people the history and culture of the American Indians. Only through spreading and understanding of Indian backgrounds can we hope to avoid the prejudicial fallacies seeded into the minds of people by their teachers or their friends. Let the programs plant new seeds of compassion for the lives of those who have been honored with the white man's treaties for their proposed fortitude, only to have them altered or, in some cases, extinguished to suit the times. Let the programs teach the importance in the act of signing a treaty and acknowledging its stipulations, the importance of integrity. And let the programs pass on an insight into the values of the American Indian culture, and how those values have been insulterd, battered, and bruised by the white man's ignominious breaking of his treaties and of his word.

The results are evident and irrefutable. Take away the white man's distorted conception of Indian way of living and, all with it, understanding; take away the white man's hatred, and replace it with that of the Indian's; take away the white man's urge to break treaties and, while the Indian's, and replace it with a strong sense of virtue, and what you have accomplished is the opening of a door toward peaceful relations between the white man. For only after the white man has come to understand and accept the Indian can we see the importance in complying with treaty agreements, the solution is the incorporation into schools, universities, and churches, programs which will teach people the history and culture of the American Indians. Only through spreading and understanding of Indian backgrounds can we hope to avoid the prejudicial fallacies seeded into the minds of people by their teachers or their friends. Let the programs plant new seeds of compassion for the lives of those who have been honored with the white man's treaties for their proposed fortitude, only to have them altered or, in some cases, extinguished to suit the times. AMERICAN NEWS
THE NEWS THAT WAS

by Al P. Wong
News Editor

(Caracas) -- The Audencia: Pope John Paul II arrived here last Saturday to begin a 12-day visit to Latin America. He issued a firm call for greater discipline in the matters of Roman Catholic doctrine and a warning against the theology of liberation. He also called for the deaths of people that calls for the transformation of society through political action and that has been criticized by the Vatican for its use of some Marxist concepts. The influence of liberation theology is strong in Latin America, particularly in its emphasis on the church's commitment to the poor. The pope's visit will take him to Brazil, Peru, Trinidad and Tobago.

VIENNA, AUSTRIA: The president of the World Jewish Congress said that the Soviet government has invited him to visit Moscow, but he will be the first such visitor by a leader of the international federation of Jewish organizations. The visit is scheduled to begin at the end of March. Among the issues to be raised and discussed would be the Soviet restrictions on Jewish emigration and the imprisonment of Jewish dissidents and activists.

JOHANNESBURG: South Africa's most prominent jailed black leader, Nelson Mandela, was quoted as saying that his release followed tradition. A leader of the African National Congress, would call a truce in their negotiations with the authorities would legalize their, treat us as a political party and negotiate with us. Until they do, we will have to live with the
Senior Honor Society

The Senior Honor Society that was created on our campus in 1985 is a select group of students who have the potential to become leaders and achievement and leadership qualities of its members, but a potential member also had to qualify by score. This is because the organization began as the not Wisconsin's population would be able to give prizes to compete with Illinois' or Michigan's. Loftus also noted that it takes a great deal of bureaucracy to run a state lottery. Thus, "It's a most inefficient way to gain taxes. However, it may fool a lot of people that they are not paying taxes." Loftus indicated this as the reason for the lottery being politically acceptable. "State government would be the inducer. People may do something irrational just for the benefit of getting more taxes."

Loftus later spoke of the groundwater bill which was passed recently. Comparing the test of a marriage after the first six months, Loftus claimed the bill to be a foundation for a more "strict" bill in the future. Loftus added, "With the bill passed, we can go back to bring the law up where inadequacies are apparent." Loftus concluded by saying that a consensus has emerged to form a stronger groundwater bill.

Newscapule, cont., armed struggle," said Manrella, who is regarded by many blacks here as their true leader. The nationalization of the police has been in jail for over two decades, said his organization would not halt the campaign of sabotage unconditionally. The South African government insists that it abandon violence before any negotiations can take place.

WASHINGTON: President Reagan said that he would resist Senate Republican efforts to make further cuts in the growth of military spending to curb the federal deficit. He said that such a proposal would be "very risky." President Reagan's response to a live radio interview with representatives of seven independent newsmakers reflected the president's intention to support the spending goals of Defense Secretary Caspar Weinberger, despite criticisms that his stance could jeopardize congressional support for a deficit-reducing package.

If you are a married woman on campus and feel the drudgery of caring for a group on campus for you. This group is called the Married Women Support Group. It is made up of married women who must deal with the fact of being married yet must find time for personal growth and for establishing a career. Many times compromises must be made and some can cause frustration, anger and confusion. It is at these times when listening ears and people who understand these frustrations can be helpful. Even if you currently have few frustrations, you are experiencing severe conflicts. This group is co-sponsored by United Ministries in Higher Education, the Newman Center and the Campus Peace Center. We'll pay you to get into shape this summer.

Married woman support group

Inaugural note

Nine students who are members of the College Republicans at the University of Wisconsin-Stevens Point had a "good view" of President Reagan and the first lady during the inaugural festivities Monday, Jan. 21, in Washington, D.C.

Diane Engelhard said the group was within close range of Mr. Reagan when he made an appearance at a youth ball they attended at an armory. It was the first of nine appearances the Reagans made that night at official parties in the capital city.

Miss Engelhard said the UWSP contingent was the largest college group from Wisconsin at the event. She is a former chair of the local organization and the present state vice chair.

While in Washington, the students toured the White House and other public buildings, attended several receptions including a "Salute to Wisconsin" hosted by U.S. Senator Robert Kasten.

If you have at least two years of college left, you can spend six weeks at our Army ROTC Basic Camp this summer and earn approximately $600. And if you qualify, you can enter the ROTC 2-Year Program this fall and receive up to $1,000 a year.

But the big payoff happens on graduation day. That's when you receive an officer's commission.

So get your body in shape (not to mention your bank account). Enroll in Army ROTC. For more information, contact your Professor of Military Science.

ARMY ROTC, BE ALL YOU CAN BE.

bY TOMAS HOULIHAN
SENIOR EDITOR

Few people are aware of the valuable resource materials that are available in the University Archives.

Located in the basement of the Old Main Building, Archives has been under the directorship of Mr. William Paul since 1973. Paul came to UWSP in 1969 as a history professor, and still teaches one history course per semester. His assistant at Archives is Mr. Raymond Strook.

According to Paul, the purpose of the Archives office is to collect, preserve and make available to researchers historically valuable records of the University.

Most of the materials are non-current with the exception of some up-to-date university newsletters and committee minutes.

The Archives has a complete run of University yearbooks, catalogs and newspapers as well as thousands of photographs of people, events, places, buildings, sports activities, etc. Archives also houses audio and video tapes, personnel files, posters, trophies and other memorabilia.

The Archives also contains several special collections, including the papers of former faculty members, newspaper clippings and printed materials pertaining to the Women's Liberation Movement, as well as clippings and materials pertaining to racial and ethnic groups in the United States and elsewhere. There are also over 40 boxes of resource materials (correspondence, reports, contacts, periodicals, clippings, tapes, slides, photographs) relating to the involvement of UWSP in the educational development of South Vietnam. Also, by agreement with the Portage County Historical Society, the University Archives preserves and services the historic records owned by the Society that pertain to the history of Stevens Point and Central Wisconsin. Included in the Society's holdings are: The Stevens Point Journal (1875-present), The Stevens Point Gazette (1870-1922), The Pinery (the first newspaper published in Portage County, 1853-1886), state and local histories, plat maps and roll maps, local biographical and subject files, City Directories, periodicals and much more.

Paul says that "if there's a gap in the records, it's in the area of student activity and organizations." Students are encouraged to give old information to Archives to preserve it. Says Paul, "rather than throw away records, give them to Archives. Such things as minutes of meetings, trophies, certificates, awards or other memorabilia may be valuable in the future."

Paul also encourages students to use the services Archives offers. "Many students don't utilize our resources," he said. "But we can be a valuable source of information for term papers, for finding out about the history of the University or the history of Stevens Point, or for those interested in finding out about student life and concerns in past years."

Most of the materials in the Archives are accessible to anyone with legitimate research interests without restrictions. Some materials, however, (e.g. personnel files or placement files of former students) are restricted and available only with special permission.

Archival materials generally do not circulate and must be used in the Archives reading area or (with permission) in the Learning Resources Center. Some materials can be checked out, while reproducible and photoduplication services are also available.

Paul expects to see more people using the Archives in the future. "Right now we're not in a central location, but the office will be moving to the 5th floor of the LRC either this summer or early next fall. At that time, we'll have more space and the location should make more people aware of our function. We'll also be in charge of and make available the Area Research Center for Central Wisconsin."

UWSP Archives — a mine of historical information

Profiles on Krokus & Dokken — coming on Feb. 3

_Dokken_

If you want to hear a bogus, sugar-coated story about how the four members of Dokken all get along, you won't read it here. Because they don't. "It's like a husband and wife who hate each other but they stay together for the kid," Don Dokken explains. "Our music is the kid."

As the title of their second album on Elektra suggests, these guys fight each other. Tooh and Nal 디 to create their more melodic version of heavy metal. It's difficult to imagine four more unlikely people finding themselves together in a band.

Don Dokken is a romantic. He collects old lithographs and enjoys baroque paintings. Soft-spoken and sensitive, he doesn't listen to rock and when he's playing his guitar at home, it's usually acoustic and classical.

George Lynch is a supreme rock guitarist. When he isn't playing, he wrecks cars, gets into fights and isn't seen for days. Nervous and uncommunicative, a high school dropout, he lives to rock 'n' roll.

Jeff Pilson is a quick-witted joker. His rendition of "I Left My Heart in San Francisco" was a big hit at a Buffalo, New York motel on a recent tour. A former music student at the University of Washington, he's written symphonies in his spare time.

Mick Brown is a wild man. Self-destructive and not one for responsibility or a home life, Mick just wants to have fun. He says that the best thing about gold album for Headhunter (which sold over two million copies internationally), and touring America with Def Leppard. (The Def Leppard-Krokus combination came to a premature end, however, when the headlines decided that Krokus was a tough act to follow.) Now, the reorganized outfit is ready to make an even bigger bang with The Blitzz, an album produced by Bruce Fairbairns that contains their most impressive batch of songs and performances yet. Except for a blistering version (cut live in the studio) of The Sweet's hit "Ballroom Blitz," all of the tracks on the LP were co-written by Storace and guitarist Fernando Von Arb ("Boys Nite Out" was a writing collaboration with Bryan Adams and Jim Valentien). Among the key cuts are the initial single, "Midnite Ma."

Krokus "There are other ways to have a good time."
Academic progress standards stiffen

by Cyle C. Bruegeman
Staff reporter

Sixty percent of students at UWSP receive financial aid. In order to continue receiving that aid, students are required to meet new standards of Academic Progress. In addition to the GPA requirements, students will be required to maintain a certain percentage of total credits earned as compared to total credits attempted. The new requirements are as follows:

<table>
<thead>
<tr>
<th>% of total semester credit earned</th>
<th>Total enrolled semester hours earned</th>
<th>GPA that must be earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>17 and under</td>
<td>1.6</td>
<td>—</td>
</tr>
<tr>
<td>18-20</td>
<td>25%</td>
<td>B</td>
</tr>
<tr>
<td>31-43</td>
<td>40%</td>
<td>C</td>
</tr>
<tr>
<td>44-60</td>
<td>60%</td>
<td>D</td>
</tr>
<tr>
<td>61-80</td>
<td>80%</td>
<td>F</td>
</tr>
<tr>
<td>91-120</td>
<td>120%</td>
<td>required</td>
</tr>
</tbody>
</table>

These standards are effective as of this year and will be used to determine financial aid awards next fall. The new standards of academic progress apply to all undergraduates. The academic progress of students will be determined each year in August after the summer term and prior to the fall term. The percentages of the total semester hours earned are calculated using all semester hours received in a grade of A, B, C, D, F, P, I, W or WP. Students not making satisfactory academic progress will be ineligible to receive financial aid until they earn enough credits to once again be making satisfactory academic progress. Students who reenter after being out of school for one or more semesters must be making satisfactory academic progress at the time they reenter in order to qualify for financial aid.

How do these standards differ from previous years? According to Larry Sipiorski, Associate Registrar, "Before, satisfactory academic progress was based on the student's previous two semesters of work. The student was only required to earn credit in half of the courses the student was enrolled in during the preceding two semesters.

The reason for the change?" Director of Student Financial Aids, Phil George, said, "Originally, the government required that there be a progress standard or they wouldn't pay.

According to statistics from the fall semester 1984, there are 1,739 students majoring in natural resources at UWSP. There have been changes in the number of students in natural resources ever since Dan Travis arrived. The enrollment has nearly tripled under his leadership.

In the College of Natural Resources, there are six different majors for students to choose from. The first and original major is resource management. It was the only major in the college from 1946 through 1968 when it was titled Conservation.

It is also the most popular major chosen, partly because there are the fewest required courses than the other majors. This major prepares students to be environmental planners, division planners, resource development agents and environmental law officers.

Another major offered at UWSP is water resources. This department's main goal was to keep this quality program one of the finest in the country.

68-72: underground tabloids

by Amy L. Schroeder
Features Editor

The latest outlook on the early 1960s was a period of much change on the Wisconsin State University campus at Stevens Point. There had been many recent additions to the campus including the addition of a dormitory, the Debot residence complexes, as well as the addition of new academic programs.

But the campus was not the only thing changing during this time; the newspapers were undergoing a lot of change. They no longer sat back and let society know their views and concerns.

In February of 1968, two enterprising young students started their own newspaper into which they poured the fruits of their labor. They were the beginning of The Campus Journal, which they fondly called The Student Foundation. Co-Editors G. Stanley Ornutt and Charles Kemoine began selling the paper for 1 cent per issue. The Campus Journal continued in its goal to make students question society by contributing, "We do not deny that your feelings of disgust are strong, we only want you to ask why you have them!"

The year 1970, saw The Campus Journal "face the Grim-Hampner", but it also brought with it another publication entitled The Disapperter.

September 16 was the date Paul Jantly (a former pointer editor) thrived The Journal. It was still another means of voicing the opinions of the students. The Campus Journal listed its purpose as "a means to capture your attention, justify your opinions, and perhaps provoke some response, but most of all to stimulate your thoughts."

Jantly also clearly stated that their purpose was not to provide news stories in the typical fashion, because."there were enough other publications that perform this function well" (meaning The Pointer which was not allowed to print any letters to the editor, articles, or editorials that showed the slightest hint of criticism of the university).

The Campus Journal carried articles such as "大爷, how many cash dealers and rock concerts, in addition to a series of political parodies."

In 1971, it was once again time for the "old and with in," and a little bit new, "The new was a publication called The Student Foundation Campus Rag."

The Campus Rag carried information about events on campus such as various dance activities, hall councils, theatre and concert reviews, and information about student organizations, in addition to student opinion on a variety of moral issues.

The general overtone of "The Rag" was more softened than its predecessors, however it continued in the same vein. The campus journal carried the "real" opinions of the students in an era before "The CounterePoint", "The Journal", and "The Rag", another tabloid was introduced. This tabloid was another attempt to lighten the mood of campus. By far, the most popular campus newspaper was "The Siasel newsletter, which was actually a parody of The Pointer."

The Disapperter, under the direction of Dan Travis, was signed to "sort of pull the tail of pretentiousness," said Karg. In those days the Siasels were mostly Ex-G.I.'s from the Korean War, whose goal was to obtain high G.P.A.'s and sort of "kid the kids" (meaning the younger students), added Karg. The 1960's were a time of social stillness amongst students, so the Disapperter was a new twist on a campus that was "too conservasive."

Warren C. Jenkins, a prominent faculty member on campus, was so fond of The Disapperter that he had an issue sent to his office each week, said Karg.

Over the years there have been less successful attempts by students to start their own publications. Although they may not have succeeded, they approached their goal with the same vigor that their predecessors mentioned tabloids. That was to voice their views and inspire others to question the things they don't understand and challenge those that they don't agree with.

Faculty of Stevens Point Normal School (1895)

Dokken cont.

Krokkus cont.

Dokken, with the Model and Normal schools on the first and second floors. The laboratories were on the third.

The first president of the Stevens Point Normal was Theron B. Pray. He came to Stevens Point from New York with a degree from the University of Chicago.

February, 1906 Pray served as president until the Board of Regents requested his resignation, September, 1906. Just as Dreyfus was known for his red vest in later years, Sims was known for the red flower in his lapel. He was seldom seen without one.

Several familiar names were added to the list of faculty under the Sims administration. Oscar W. Neale became head of the rural education department with the help of May Roach. Beside May Allen also joined the faculty, expanding the home economics program.

May, 1906 John Sims died "after an illness" prior to the SPN transformation into the Central State Teacher's College.

September, 1906 Robert Dodge Baldwin, with a BA from Princeton and an M.A. from Stanford, took over for Sims and saw SPN through the transitional period.

Krokkus was a local bar band, Von Arb joined as vocalist after that album in the U.S., combining with an acquisition of a strong lead vocalist in Marc Storace. Storace flew back to London and formed Easy Money. Then they formed a friendship with Fernando, "the world's premier H.M. sound and cut Metal Heads-eve."

The 1980 release of "Headhunter" prompted tours around the world, the tea bag burst, and "Headhunter" became a num-research: "The genre puts the band in '82 at the age of 18."

Dokken played drums and knocked them over at the end.

"The sum of this band is greater than the four individuals," says George. "Each of us serves a function. We need each other."

Krokkus' worldwide impact is the culmination of several years of dedication, and some frustration. The band, which formed a decade ago in Switzerland, was initially given the cold shoulder by apathetic local youth (who have since made Krokkus the country's number one group, packing the nation's largest arenas), as they set out to make their reputation by zigging wherever they could. Persistent performance paid off, and Krokkus landed a recording contract that yielded two moderately successful albums, Pay It In Metal and Painkiller.

In 1977, while Krokkus was still a local bar band, Von Arb joined as guitarist/songwriter. A veteran of such bands as Hamburger (he was 15 at the time) and Montezuma, Von Arb was also a grammar school teacher and gave private guitar lessons. Following the initial Krokkus LP's that featured Von Arb on guitar, the band got a major boost with the acquisition of a strong lead vocalist in Marc Storace. Storace, born in Malta, had been a member of Stonehedge Union and Storace flew back to London and formed Easy Money. Then they got a phone call from Switzerland asking him to audition for the lead vocalist spot in Krokkus.

With Storace out front, the band honed their guitar-based metallic sound and cut Metal Heads-eve. The 1980 release of that album in the U.S., combined with an extensive tour, won them a substantial America coming following that was solidified with "Headhunter" resonated with audiences worldwide. 1951 Central State was re-

named Wisconsin State College and began to award bachelor of arts, science and education de­

Hansen's reign also saw the development of the conser­

vation education.

1957 Wisconsin State College was granting degrees in more areas than ever before. These included Conservation, Music, history, home Economics, Eco­

nomics, English, Chemistry, Bi­

ology, geography, French, Educa­

tion, General Science and So­

cial Science.

After serving for 22 years as the first alumni to assume the role as Stevens Point College President, Hansen ran for the state Legislature and was even­

ially elected to the Wisconsin Senate.

July 1, 1962 James H. Albert­

son was chosen to succeed Han­

sen out of 122 applicants. At age 66, Albertson had his first position as the executive assist­

ant to the president at Ball State Teacher's College in Muncie, In­

diana, and came to Point.

"Under Albertson, the enroll­

ment reached 3,900—more than ever before. The Science Building and Classroom Center were

built, along with several resi­

dence halls.

1963 The School of Fine Arts was separated from the College of Letters and Sciences. Plans for construction of the Fine Arts Building began in 1967.

July 1, 1964 The college once again changed its name, this time to Wisconsin State Univer­

of Stevens Point.

March 31, 1967 Albertson tra­

veled to Vietnam where he was stationed to evaluate the Vietnamese pub­

lic school system. Two days be­

fore Easter, Stevens Point re­

ceived word that his plane had

been shot down in a mountain north of

Old Schmeeklee field — site of present day U.C. and Comm bids.

"You never had to worry about a coach knowing you be­

cause you were playing for the

perennial sports question of

whether today's athletes are

as an example of this. "Athletics, I think, at Stevens

Point have always played a part in the retention of students. I can honestly say that if it weren't for athletics, I don't think I would have stayed in college, so I think I owe that much to athletics."

Many other things can be owed to UWSP athletics as well. Things that range from giving students an outlet for their en­

ergy, to turning out professional prospects. And the growth of the athletic program can be given the credit for this.

To understand what kind of growth I am talking about, all you have to do is compare the following figures. In 1960, UWSP boasted 19 varsity sports with a budget of just over $25,000. Now, 16 years later, UWSP offers 18 varsity sports and their new 1985-'86 budget will total almost $104,000.

When Kulick quoted these figures, he said UWSP should be proud of the way their athletic programs have developed. Through it all, he says a lot of the credit has to go to one man, and that's Hale Quandt. He did more for all of us than any person I ever known. I think if you talk to anybody about athletics and how they've grown at the university, you always keep on going back to one person—Hale Quandt."
Study time at the State Normal School

Dr. John Ellery's 16-month stint as acting chancellor, Dr. Philip Marshall came to UWSP. Marshall entered during a time of high enrollment, but anticipated a decline in this area. From his first press conference, Marshall has been supportive of UWSP faculty. In recent months, Marshall has fought for increases in teachers' salaries in all UW schools.

Residence Halls, cont.

Melvin Karg, currently UWSP Coordinator of Publication and Media, recalls dorm life in the '60s. Karg, who used to live in Delzell Hall in 1956, was reminds of the days when he and other students used to sneak over to the women's dorm, go up the fire escape and scare the girls, then run out. He said the Dorm Mother used to call the police but they always managed to be evasive of the "long arm of the law."

Except for one time when a current prominent faculty member (whose name shall not be revealed) forgot during an "attack" that he was on the second floor instead of the usual spot, first floor. He tried to escape by jumping out the window which he found to be two stories. He landed up to his waist in mud below, thus failing to escape justice.

"Things were a lot different back then," he said. "There were curfews for the women (10:30). If they weren't in by this time they would be 'campaused,' which meant temporarily not being able to leave your dorm, except to go to class, to eat, or to the library.

Karg added that the '60s was a time of tremendous backlash amongst the students. They fought anything that dealt with tradition. They didn't join the Greek organizations or celebrate Homecomings as enthusiastically as the students of the '50s. Women were also pressing for more equality in university regulations, while at the same time they showed opposition to policies that might grant them their equality.

U.A.B. PRESENTS:

DAYTONA BEACH, FLORIDA
MARCH 29 – APRIL 7, 1985

THE PLACE TO BE . . . THE WHITEHALL INN! The Whitehall is Daytona's most deluxe hotel. Located at 640 N. Atlantic Avenue just north of the Main Street Pier, directly on the beach in the heart of the action! Each room has a private oceanfront balcony, two double beds, telephone, color TV and air conditioning. The Whitehall also features a large heated swimming pool, party deck, gameroom, pool bar, restaurant and nightclub.

COMPLETE PACKAGE INCLUDES:
• Roundtrip motorcoach transportation
• 8 days / 7 nights lodging at the luxurious Whitehall Inn
• Poolside welcome party with free refreshments
• Organized sports activities with prizes
• Discount booklet for big savings in restaurants, nightclubs and stores
• All taxes and service charges

OPTIONS:
• Deep sea fishing
• Disney World/EPCOT Center excursion

$207 PER PERSON

The University of Wisconsin Stevens Point's fourteenth annual trip. For only $207, $12 cheaper than last year, you get a top quality trip with no surprises. For the ultimate college experience, go Daytona with UAB.

U.P. Trades Turkeys for Canadian Moose:
Champion, Michigan — Last Wednesday marked the first day of the 1985 U.P. moose-hunting season and the beginning of the moose release program. The DNR plans to truck in at least a dozen moose a day until about Feb. 1, says Louis Verme of the Michigan DNR's Wildlife Division. In all, 36 moose are being imported from Ontario's Algoma Peninsula and released in exchange for 150 wild turkeys. The rugged U.P. terrain near Champion is ideal for a "free range" herd, said Mike Koss, a wildlife biologist for the DNR. The moose receive shots for parasites in Ontario before they are equipped with radio collars in Michigan.

Lack of Snow Hampers Ridge Runners:
Pointe au Baril
The lack of snowfall accumulation in the northwoods so far this year has made it hard for groups to "snow roast." The birds have had to resort to snow bowls and roosting in trees which expose more of the bird's body to the cold and makes it more vulnerable to predators. Usually, the best winterers for the ruffed grouse are when there is more than a foot of soft fluffy snow for the bird to tunnel into. Although there has not been a sufficient amount of snow for grouse, this has been a good winter for our white-tailed friend. They can travel about the countryside with ease to find the much needed buds and twigs they feed on. The shallow depth of the snow also aids the deer in escaping enemies too.

"Intruder" was Dolphin:
Seoul, South Korea — Soldiers shot and killed a dolphin they mistook for a "North Korean infiltrator" trying to swim ashore, Seoul newspapers reported Tuesday. Just another example of the plight of our finned friends are facing!

Canadians Have a James Watt to Fight:
Americans who remember with affection James Watt's and Anne Gorsch Barford's assault on environmental protection will experience a "sense of deja vu" if they were to visit Canada today. Those who are of a negative public reaction that resulted when the Reagan Administration sought to relax environmental safeguards did not make much of an impact on the new Canadian regime.

Conservative Prime Minister Brian Mulroney is following the same story line with the familiar refrain: "Environmental protection must take its - along with other government services. if the national budget deficit is to be significantly narrowed.

Dr. James Newman, a man remembered

Newman started the forestry major in 1960 and his dedication helped create the first large forest in the province, an act that earned him the name "Father of the CNR." Dr. Harspstead said that Newman "had an open door policy concerning students. They could go in and talk to him."

Newman was able to share his knowledge with the students as an assistant professor of forestry while working as assistant director of the national program. Newman worked on several research projects, including one on the effects of pollution on plant growth. He was also involved in the development of a new method for measuring the amount of CO2 in the air. Newman's work helped to establish the foundation for modern forestry research.
Excerpts from the '84 Hunting Log

by Christopher Dorsey

Environmental Editor

"Old Reliables"

Although October I marked the opening of the '84 duck season, the Monday opening left little time for me to hunt out and-about. In fact, it wasn't until the following Saturday that I was able to return to my favorite waterfowling slough. All week, I kept thinking about the cattails strawed about Shainenberg's 60-acre marsh, the muskrat houses that would serve as my blind, and the credible number of mallards that would sure to fly overhead.

When I arrived back to my hometown of DeForest (10 miles north of Madison), I quickly dialed an old hunting buddy, Keith Gilbertson and I have worked out a routine that could do double the size of any hunt.

Keith and I have worked out a routine that could do double the size of any hunt. Every morning for a duck hunt. The ideal mixture of cornfield, cattails and water seems to have been revealed in waders and camo and shooting down to the cattail along the grass drive leading down to the cattail slough. We moved out concealed in waders and camo and the other familiar gars of waterfowlers—ducks and goose calls, shotgun and a dog.

As we drove down the very familiar stretch of U. S. Highway 51 to Shainenberg's marsh, the eastern sky began to lighten with the early morning sun. Adjacent to the eastern clouds, the western sky was still speckled with the faint glimmer of half-lit stars. It truly was a classic morning for a duck hunt.

Keith pulled his Fairmont alongside the grass drive leading down to the cattail slough below. We moved out concealed in waders and camo and the other familiar gars of waterfowlers—ducks and goose calls, shotgun and a dog.

The first inductees in the hall will be honored at a program at Sentry Theater in April. As early as next year, the foundation may raise a major addition that could double the size of the center. Zimmerman has high praise for the work William Harvat of Stevens Point has done to help draw about 16 different organizations together to sponsor the hall for its fame, in promoting the visitor center for its home.

Preliminary discussions about the hall of fame displays center on ways of making them "interactive," as guests can push buttons or turn on switches to see films or slide presentations, or to hear tape recorded comments by and about the people enshrined in the hall of fame and the conservation movements they led. The "hall" will be a major tourist attraction, Zimmerman predicts.

A closer view of the visitor center will be held at a program at Sentry Theater in April.

Newman cont.

not want him to have changed anything about himself."

James Newman was a dedicated husband and father, friend and professional. He loved life and his enthusiasm rubbed off on his colleagues and students. Although he is no longer with us, his influence will affect people for years to come. He has made a difference in the lives of many that will always be felt and remembered.

(Darlene Loebrke is a junior majoring in wildlife with a minor in writing.)
DNR lists unsafe landfills:

Two other reported trends which will warrant DNR and legislative action. First, approximately 75 percent of landfills lack both lids and leaks and are reported annually. Each case needs to be investigated and cleaned up. Projected state resources for the next two years will be used to clean up both new and old waste problems. Consequently, the backlog of unresolved waste problems will continue to grow unless Wisconsin develops a strong program to prevent spills and reduce new incidents which could damage the environment. Second, as old sites are further investigated, the number of known environmental hazards warranting state attention will grow.

"Work on these problem sites will extend well into the next century," Besadny said. "We need to plan continuing funds and commitment to restore these sites one at a time, build public awareness of waste management problems and achieve a long-term goal of making Wisconsin environment safe and nontoxic."

For more information, contact the state Department of Natural Resources, 727 West Gilman Street, Madison, WI 53706. (608) 266-6300. (C) 1985, The Independent, Inc. All rights reserved.
flight, hearing, sight, feeding, camouflage, behavior and identification. Nearly 30 different kinds and sizes of mounted owls, collections developed by and donated to the College of Natural Resources, are on display. All of the species, the barn owl, is now on the endangered list in Wisconsin.

Visitors will learn, by looking through a magnifying glass at a feather, that owls are able to fly silently for their night hunting. Modified ears fringe the edge of the flight features to quiet the air rushing over them.

Explanations will be given of the bird’s hearing apparatus which is so sophisticated that it makes possible the hunting of prey by sound alone. Owls, which take up more room in the skull than the brain, are of tubular shape to provide better vision. Their eyes are moved more than those in their skulls, but they compensate by having flexible necks which allow them to turn their heads almost backward.

Owls’ eating habits can be often connected with human standards,” Zimmerman reports. They prey on members of their own tribe at every apparent opportunity.” But the usual diet is rodents and insects.

Besides viewing the display, visitors will receive a printed “resource sampler” about owls to take home.

The owls will share cen­ter stage. A three-day tribute to honor the late Fred Schnee­cke, a visionary science profes­ sor at UWSP, will be held as half century ago who said, “Visitors to the center were opened to create one L-shaped room with a new modified cathedral ceiling. A small bedroom became an office, a double garage was trans­formed into a classroom-meet­ing room that will accommodate about 90 people. The doorway was closed off, and work­work was done on the outside to be compatible with the existing exterior.

Rough sawn white pine was used on the wall and on the floors to create a “rustic” effect. A large area of stone sur­rounding the fireplace was re­tained. So was the kitchen, where groups will be invited to use stove and refrigerator if they bring along food for lunches.

Zimmerman’s program assistant, Char Pingel, says she is a parent group that have pro­gram­gs on edible plants and cook­cattails, roots and dandelions near work station.

The basement will be used for storage and student offices and work­rooms.

A parking lot for about 30 ve­hicles is nearby, on a former lawn area and site of the Mr. and Mrs. Walter Skowrons­ki home, which has been moved.

With most of the work on the center completed, Zimmerman is looking ahead to negotiations with representatives of govern­mental agencies and private land­owners for the acquisition of more marshland. The city has pledged three and one-half acres near The Village apartment complex, to remain undeveloped and serve as a retention area for storm water. That gift will make the reserve eligible for federal funds to use in purchasing neighboring parcels. The expan­sion would be a means of better controlling water runoff in the eastern part of the reserve that could cause damage to Universi­ty Lake.

Looking ahead at ways to in­volve more members of the pub­lic in activities at the reserve, Zimmerman says representa­tives of organizations may con­ tact his office to arrange use of the center for special programs conducted for them there. Hours of operation are 9 a.m. to 4 p.m. weekdays and noon to 5 p.m. on Saturdays and Sundays. There is no charge for use of the facility. However, do­nations are accepted to defray costs of new seasonal displays.

Besides viewing the display, visitors will receive a printed “resource sampler” about owls to take home.

The owls will share cen­ter stage. A three-day tribute to honor the late Fred Schnee­cke, a visionary science profes­ sor at UWSP, will be held as half century ago who said, “Visitors to the center were opened to create one L-shaped room with a new modified cathedral ceiling. A small bedroom became an office, a double garage was trans­formed into a classroom-meet­ing room that will accommodate about 90 people. The doorway was closed off, and work­work was done on the outside to be compatible with the existing exterior.

Rough sawn white pine was used on the wall and on the floors to create a “rustic” effect. A large area of stone sur­rounding the fireplace was re­tained. So was the kitchen, where groups will be invited to use stove and refrigerator if they bring along food for lunches.

Zimmerman’s program assistant, Char Pingel, says she is a parent group that have pro­gram­gs on edible plants and cook­cattails, roots and dandelions near work station.

The basement will be used for storage and student offices and work­rooms.

A parking lot for about 30 ve­hicles is nearby, on a former lawn area and site of the Mr. and Mrs. Walter Skowrons­ki home, which has been moved.

With most of the work on the center completed, Zimmerman is looking ahead to negotiations with representatives of govern­mental agencies and private land­owners for the acquisition of more marshland. The city has pledged three and one-half acres near The Village apartment complex, to remain undeveloped and serve as a retention area for storm water. That gift will make the reserve eligible for federal funds to use in purchasing neighboring parcels. The expan­sion would be a means of better controlling water runoff in the eastern part of the reserve that could cause damage to Universi­ty Lake.

Looking ahead at ways to in­volve more members of the pub­lic in activities at the reserve, Zimmerman says representa­tives of organizations may con­ tact his office to arrange use of the center for special programs conducted for them there. Hours of operation are 9 a.m. to 4 p.m. weekdays and noon to 5 p.m. on Saturdays and Sundays. There is no charge for use of the facility. However, do­nations are accepted to defray costs of new seasonal displays.

Sanookill cont.

flight, hearing, sight, feeding, camouflage, behavior and identification. Nearly 30 different kinds and sizes of mounted owls, collections developed by and donated to the College of Natural Resources, are on display. All of the species, the barn owl, is now on the endangered list in Wisconsin.

Visitors will learn, by looking through a magnifying glass at a feather, that owls are able to fly silently for their night hunting. Modified ears fringe the edge of the flight features to quiet the air rushing over them.

Explanations will be given of the bird’s hearing apparatus which is so sophisticated that it makes possible the hunting of prey by sound alone. Owls, which take up more room in the skull than the brain, are of tubular shape to provide better vision. Their eyes are moved more than those in their skulls, but they compensate by having flexible necks which allow them to turn their heads almost backward.

Owls’ eating habits can be often connected with human standards,” Zimmerman reports. They prey on members of their own tribe at every apparent opportunity.” But the usual diet is rodents and insects.

Besides viewing the display, visitors will receive a printed “resource sampler” about owls to take home.

The owls will share cen­ter stage. A three-day tribute to honor the late Fred Schnee­cke, a visionary science profes­ sor at UWSP, will be held as half century ago who said, “Visitors to the center were opened to create one L-shaped room with a new modified cathedral ceiling. A small bedroom became an office, a double garage was trans­formed into a classroom-meet­ing room that will accommodate about 90 people. The doorway was closed off, and work­work was done on the outside to be compatible with the existing exterior.

Pointers regain conference tie with two wins

by Alan Lemke
Sports Editor

Home sweet home! That phrase was very refreshing to the Pointer track team as they registered two impressive victories in two conference meets this weekend. Following a weekend sweep against Quandt Fieldhouse, which boasted a powerhouse in eliminating their turnovers, Falls was capable, and had a little shaky. We were tense; I thought we were going to lose the meet, but then with a game on Friday, we didn’t go real hard on Thursday. We were tense and I could feel the people with the most big experience they needed."

"Coming off the experience we had the previous week with the tough games we were a little shaky. We were tense; I was tense and I could feel the kids were tense. We knew River Falls was capable, and had a feeling they were going to slow down, and that made us nervous. In light of that I thought we kind of played our way through the tension and performed rather well."

Bennett was also happy with the progress his team has made in eliminating their turnovers, but admits they still need work.

"We have been working on it, but with the number of games we played, the last one being on Tuesday, we came back Wednesday kind of light, and then with a game on Friday, we didn’t go real hard on Thursday. So we really need time to work on these things."

In Saturday’s game, the outcome was much the same. The Pointers buried the Superior Yellowjackets, 71-41. In this game, Bennett’s second team, the Purple Squad, saw extensive action. They played about four minutes in the first half, and the last three quarters of the second period. Kulas and Dimitrich Roseboro shared scoring honors for the Pointers with ten points, in a game that saw every available Pointer score. The Purple Squad was able to add 29 points to the final tally. Despite the loss, the Yellowjackets did get an outstanding effort from Joe Connors who scored a game-high 16 points.

Bennett was glad that his reserves were able to see this much action. "I planned on using them. I only hoped I would be able to give them some extended time, because they really deserve it. I also thought it was good to rest the first team. I didn’t think they’d play as much as they did and I was very happy that they were able to get that kind of extended time."

Bennett is hoping his Purple Squad will work its way into his plans, but notes they need more experience at this time. "Their future is still uncertain as to whether I’ll use them as a unit this year. I would like to, because it really does give me a chance to rest the regulars. The difficulty comes in the fact that they are not very big and not very experienced." When speaking of experience, Bennett noted the progress of Michael Janse. He is hoping Janse will be available for spot duty next Wednesday in the Oshkosh game.

Bennett says his team needs time to work on things like rebounding.

"I’m hoping this weekend he can start to do some things. The whole list is pretty iffy, but that’s what we’re shooting for.

The Pointers next conference test will be at UW-Oshkosh Wednesday night. Oshkosh is one of the teams still knotted at the top of the conference with the Pointers. Bennett’s squad will have the weekend off to prepare for the game, and he feels this is just what they need. "We just want to get back to solidifying the things we do best. We want to make sure we’ve been back to being sound defensively.”

"Offensively we want to continue working to get the good shots. We haven’t worked on our shooting much. When you’re playing games you have pre-game warm-ups and maybe you take ten shots during a game, but you need some extended shooting time," Bennett added.

Bennett also noted that the Purple Squad will be doing some hard work during this time. "The second team needs to get some more conditioning because other than Saturday night, those guys are either going to a game, coming from a game, or at a game, and they don’t get any conditioning and they lose it."

Bennett concluded, "We want to do an assortment of things just to get back to full strength for the stretch run."

The Pointers will return home Feb. 12 to try to avenge their loss to UW-Whitewater.

Young runners to start season

by Alan Lemke
Sports Editor

With the ground still covered in white and snowstorms coming about once a week, a person tends to have visions of skiing and skating, not running. Still, the UWSP men’s track team put on the running shoes last week and took to the streets and sidewalks to prepare themselves for the upcoming indoor track and field season.

Men’s coach Rick Witt is quick to point out the major factors that contributed to the team’s success or failure this spring. "We’ve got quite a few people coming back, but not a lot of people that have a lot of experience."

Witt said these people will have to be the ones to prove themselves if the Pointers are to have a good year. "It should be a real interesting year, because we don’t have any superstars anymore. All the Weatherspoon, and point men, Parker, and Van Vreede; all those kids are gone. They’re the ones that had the big meet experience."

When looking ahead to the season, Witt feels the biggest strength his team will lie in the hurdle events and the middle distances. He points to three factors for drawing this conclusion. "Not only do we have the most talent there right now, we have the people with the most meet experience, plus we’ve also got the greatest number in those areas, which also gives us the greatest depth."

Witt said this is not surprising to him. He points to the fact that most schools are known for excelling in certain areas, and when it comes to Point these are the areas they are known for. Witt continued by saying these two areas are what seem to draw runners to Stevens Point. For these reasons he expects to do well in these areas.

However, Point does have its share of bright prospects. Three freshmen who placed first or second in the state high school championship will be running for the Pointers. "We’ve got three guys that are freshmen who have shown up to have the ability at the high school level, that we are hoping will come in as a group and maybe start to fill the void left by that one guy." That “one guy” Witt speaks of is Tom Weatherspoon. Weatherspoon captured the NCAA III National Championship in the long jump and triple jump in both 1983 and 1984 for the Pointers.

Pointing to the experienced members of his team, he restates that these will have to be the guys that really come through for him.

These men include Tom Peterson, 100m; Al Hilgenord, 1M hurdles; Ric Perona, 1M hurdles; Mike Christman, 1M hurdles; Mike Walden, pole vault, all of whom have national meet experience.

"So we’ve got about five guys who have had big meet experience, but then we drop off real quick because the other people just didn’t get the big meet experience they needed."

Overall, Witt heads into the season with an optimistic view. "I think this team is too young of a team to be a challenger for the championship. I think that’s a year or so away, but we have some very good young kids, and I think we’re definitely ready to make a run at the number two spot."

The Pointers will take to the track this weekend at La Crosse. Witt said this meet will give him a chance to see just what he will have for the upcoming season.
Samuelson: recipe for success

by Scot Moser

Samuelson began his swimming career only eight years ago, a relatively very late start in the sport of swimming where many outstanding swimmers begin before the age of 10, when he was a "freshman at Loyola Academy in Wilmette. However, swimming wasn't his original sport of choice.

At 6'6" Samuelson is a logical candidate for basketball and the sport he would have participated in from fifth to eighth grade. It wasn't until ninth grade that swimming entered the fall of his freshman year at Loyola," said Samuelson, "I was looking for a sport to keep me in shape. Basketball was by far the most popular sport among the team, so I didn't take

much to get me to make the switch."

Luckily he did! Along with becoming a high school All-American in both water polo and swimming, Samuelson went on to be a seven-time WSUC champion, holder of numerous school and conference records, and a two-time NAIA college All-American—the man has found success in swimming.

Coach Blair attributes Samuelson's success to many factors.

Peter Samuelson

"There is no doubt that Peter is an outstanding swimmer," says Blair, "but he has earned that success. Peter is an exceptionally hard worker and he's always had a good vision of where he wants to be."

"He's a goal setter and a doer as opposed to a goal setter and a wisher—that's the kind of athlete that finds success."

For Samuelson, however, it doesn't seem to be the number of awards or amount of success that he likes most about swimming.

"Along with giving me the chance to excel," says Samuelson, "more than anything, swimming has presented me with an opportunity to challenge myself. Being the solitary type of sport that it is, it gives you a chance to constantly think and examine yourself along with gaining a great amount of self-discipline—something that has helped me in all the other areas of my life."

The self-discipline he's talking about manifests itself in the way he manages his busy lifestyle. Along with being one of this season's Dogfish co-captains, Samuelson is a biology major—chemistry and religious studies minor; a member of the Campus Leaders Association; president of the Water Polo Club; and a graduating senior (May '85) in his fourth year—that would be a lot for anyone to handle, but for Samuelson it's all just a part of what college is all about.

"My academics have always been the most important thing to me; they're the reason I'm here. The other things I'm involved in, including swimming, are things I enjoy and do as extracurricular activities. This doesn't mean those things aren't important that I enjoy doing them in perspective."

According to Samuelson keep everything in perspective are both family and his girlfriend, Marjol Folan.

"My family has probably been the single greatest source of influence and support in my life; we are very close. As far as Marjol, well, our relationship definitely means a lot to me. She provides me with so much motivation. I really owe her a lot."

As already mentioned, Samuelson is no small individual. At 6'6" he is by far the tallest swimmer both at UWSP and in the WSUC. Is this an advantage?

Peter Samuelson

"We were down from Friday's defeat," said Carlson. "It hurt us to be ahead last night in the third period and then lose. It was difficult to get going today."

Eric Brodin, a freshman from Burnsville, Minnesota, who has emerged as the Pointers' top goalie this season, registered impressive totals of 38 saves during Friday's game and 17 more on Saturday. Engelhart and Scott Kuberna accounted for the two Pointer goals in Saturday's game.

The Pointers now enter a season-ending six-game conference stretch, beginning with UW-Eau Claire this weekend.

The UW-Stevens Point wrestling team encountered some difficulties in their last two outings against conference opponents. The first blow came last Wednesday when an outnumbered Pointer team came out on the short end of a 38-15 score to UW-Platteville.

The Pointers, hit by a rash of injuries in the last two weeks, earned just three wins against the powerful Pioneers and one of those came by forfeit.

The setback was just the second of the season in dual meets for the Pointers against five victors.

Shane Bohnen continued his strong early season showing for UW-SP as he won again at 150 pounds. The senior from Colfax earned a 16-10 decision. Also earning a win on the mat was Bill Zakrzewski at 190 pounds. The junior from Wisconsin Rapids earned a pin at the 2:10 mark of his match.

The remaining UW-SP points were earned by Todd Stoberl, who gained a forfeit at 126 pounds.

Even though his team was shorthanded, Pointer coach John Munson was not pleased with the showing of his team overall.

"We had a very poor outing," Munson said. "Our mechanical approach lacked spark. From the beginning we made mistakes that we haven't made for weeks and it just snowballed."

"Platteville is a fine team, but they are not that much better. Shane Bohnen and Bill Zakrzewski both performed well and we thought Ted Kiefer had won his match, but the official saw it differently."

Hopefully we will be able to get Scott Klein back at 126, Jeff Wingert at 134, and Duanbe Keip at 177. Duane hurt his shoulder last week and we will be out for about a week."

The other problem that now faces the Pointers was discovered in Saturday's meet against UW-River Falls. River Falls dominated the meet by beating Point, 50-4.

The only Pointer to win his match was Bill Zakrzewski at 190.

The big problem for the Pointers came when Shane Bohnen was injured during his match. Bohnen tore some cartilage in his rib and will be sidelined for the remainder of the season. Before his injury, he had been the standout on the Pointer team with a 16-2 record.

The Pointers will try to regroup and come out strong against a tough UW-Eau Claire team Saturday when they travel to the Blugolds home mat.

Freshman goalie Eric Brodin has been a bright spot for the UWSP skaters.
Angelfish close in on second place goal

by Scot Moser

The University of Wisconsin-Stevens Point men’s swimming and diving team claimed an important victory as it defeated undefeated La Crosse 56-46 here Saturday. A Stevens Point victory in La Crosse would have put them at the top of the WIAA Collegiate Athletic Conference championships coming up in February.

Earning first place honors for the Lady Pointers were the 400 medley relay team of Laura Adele, Michelle Thomason, Kathy Frohberg and Pam Steinbach with a time of 4:25.3; Roxy Fink in the 50 freestyle with a time of :25.9; Frohberg in the 50 backstroke with a time of :27.1; Sarah Celichowski in the 100 freestyle with a time of :57.2; Adee in the 100 backstroke with a time of 2:36.3; and Thomas Lon in the 200 breaststroke with a time of 2:43.8. So far the season was a disappointing 8-7 loss to UW-La Crosse.

Dogfish notch NAIA times at La Crosse

The University of Wisconsin-Stevens Point men’s swimming and diving team defeated the La Crosse team in a dual meet with a score of 142-78. A meet competition, 65-46, here Saturday.

Leading the Dogfish, while also clocking NAIA qualifying times were the 400 medley relay team of Pete Samuelson, Greg Schneider, Steve Davis and Jeff Shaw, 3:39.6; Samuelson in the 200 backstroke, 2:03.2; Schneider in the 200 freestyle, 1:45.1; and 400 freestyle relay team of Shaw, Davis, John Johnston and Scot Moser, 3:17.8.

Also earning first place honors were Ken Brumbaug in the 200 and 1,000 freestyle, 3:40.9 and 10:11.4; Johnston in the 50 free, :22.7; and Tom Thoro in the 100 backstroke, 2:09.85.

Scoring second for the Pointers were Davis, 200 freestyle, 1:54; Shaw, 50 freestyle, :29.2; Moser, 200 individual medley and 100 freestyle, 2:04.5 and 49.3; Tom Veitch, 200 butterfly, 2:08; and Thoma on the three meter diving board, 281.1 points. Coach Lynn “Red” Blair felt this victory said a lot.

“This meet was in an indicator as to where we are in training and the positives we need getting into the next month. Our young people are really respond­ ing to the program and understand­ ing how tough it is to swim in our conference and win.

“However, we can’t lose our mental and training intensity just because we are swimming as we are still the underdogs going into the conference championships (though I think we might have it to our advantage).”

Coach Blair selected the entire team for this week’s Dogfish a­ ward but noted that Brumbaug may have stolen the show by posting the fastest second times in the conference this season in both the 500 and 1,000 freestyles.

Ski Team

The UWSP Cross Country Ski Club Team traveled to Crivitz this past weekend to participate in the Thunder Mountain Classic.

In Saturday’s 10km event, John Spade paced the Pointer Xc team to a 2nd place finish. He was followed by Joe Wawrze­ zek in fifth, Mike Trecker in eighth and Tom Friesen in ninth. Eric Wiberg in 12th. Renee Fiet placed second in the women’s di­ vision.

Later on Saturday Trecker, Spade and Wawrzezak placed second in the 3x2 relay race, missing out on first place by a matter of seconds.

Spade led the Pointers again in Sunday’s 15km event by plac­ ing third, Wawrzezak placed fifth, Zielke came in ninth, and Eric Wiberg in 18th. Renee Fiet placed third in the women’s class.

Outdoor Sportsman returns next week

Country living at its best. Farmette with a partly wooded and cleared 2.20 acre pine. 2200 square foot, 2-story home, 4 1/2 bed­ rooms, remodeled.

Home is neat and clean.

Several out buildings including 32 x 56 barn and 20 x 39 garage. Farmette has highly productive, established garden.

Located south of Plover. $49,000. Additional 40 acres available for $10,000. Call Ward Wolff, Century 21, Golden Sands Realty at 341-7800.

Indians beat lady Pointers

Shooting, or specifically a lack of accurate b.d. goal shooting, was the one factor that women’s basketball team here lost Thursday night. This result re­ sulted in a disappointing 85-73 loss to UW-La Crosse.

Stevens Point men’s swimming: for the point- fourth straight for the season and in Wisconsin Women’s Intercollegiate Athletic Conference, the 34-34 meet that day.

The Lady Indians were unable to convert 12 more free throws than UW-La Pointers lost it itself with 11 less field goals to spell the difference in the game. In addition, Pointer had nine more rebounds than UW-L while the turnovers were about equal.

Crosse never trailed in the contest. The Roostiers jumped out to a 10-3 advantage after the first quarter, and extended that first-half lead to as many as 30 points before settling for a 40-23 halftime advantage.

First half shooting was the start of the Point downfall as it made just eight of 36 field goals for 22 percent while UW-L, hit on 12 of 19 shots for 31 percent.

The Roostiers, now 5-10 for the season, maintained control of the contest for the first part of the second half but UW-SP began to sink away at the lead. Point narrowed the gap to 68-63 with 5:06 left in the contest and to 71-67 with 3:22 remaining, but could get no closer after that point.

Overall the game the Lady Point­ ers made just 24 of 51 field goals (47 percent) while the Roostiers converted 31 of 63 shots (49 percent). UW-SP was outstanding at the three point line with 20 of 32 conversions (.625 percent) while UW-L made 13 of 16 chances (81 percent).

Point had a 43-32 rebounding advantage and the turnovers were about equal with UW-L committing 24 miscues and La Crosse 25. The Roostiers had an edge of 35-26 in assists.

Mary Miller, a freshman from Kauskaua, paced UW-SP with 14 points. Point’s Glenda Stanta and Baraboo’s Linda Light had 12 and 11 points each.

Gradecki had seven assists.

Lady Pointer coach Connie Gehling noted that shooting was the big difference in the game.

“Our shooting has been a big problem all year and again it killed us,” Gehling noted. “La Crosse had many turnovers in the first half and we could not capitalize on all of our opportu­ nities. We went dry for over five minutes at one stretch.”

“We can’t win without more discipline than we had tonight. It was a raged game with a lot of fouls. It was also a very fast moving game.”

“In spite of having difficulty handling the ball, Mary Miller came through with 25 points and 12 rebounds. Sonja Sorensen was also a factor with a decent game.”

Amy Gradecki

NORTHERN WATCHES

As the need for specialized health care continues to grow, Northwestern College of Chiropractic is offering a challenging and satisfying career taking care of people as a Doctor of Chiropractic.

Committed to high standards in education and research for over 40 years, Northwestern offers you comprehensive chiropractic training on a modern campus distinguished for its excellent facilities and dedicated teaching staff.

Located in the Twin Cities of St. Paul and Minneapolis, Northwestern College of Chiropractic puts you within the heart of a metropolitan area known for its cultural and recre­ ational opportunities. With the largest number of parks and lakes in any U.S. city, the Twin Cities metropolitan area offers everything from swimming and boating to skiing, skating and camping. A wealth of museums, theaters, musical events, professional sports activities, exceptional restaurants and shopping centers are all within minutes of the campus.

If you would like to know how Northwestern College of Chiropractic can help you achieve your career goals, complete the form below or call the admissions office.

Sexual Assault cont. reported to campus security over the last year:

- Never hitchhike.
- Walk on well-lighted streets and sidewalks when possible.
- Volunteer to help a friend.
- Offer to accompany each other when walking, especially at night.
- Take precautions against sexual assault. Utilize the Escort Service and practice other safety measures.

The next Janet Raasch could be you.

Samuelson cont.

In the view of Blair, no midget himself at 6'4", he says...

"As his height converts to length in the water it's got to be a plus. With all other factors being equal in a race, Peter often has a good four-inch advantage over everybody else.

And according to Samuelson! "Well, sometimes it's hard to find warps that fit right."

Peter is not only an all-around athlete, he's got drive, leadership, he's got drive academically...

Although he has found great success while swimming here at UWSP, Samuelson never did have to forget how good this university has been... to him both academically and socially. Maybe that, if any one thing can be singled out, is the key to his accomplishments.

As Blair puts it, "Peter is an all-around good person. He's a leader, he's got drive, self-discipline, a sense of responsibility— he is, quite simply, a walking recipe for success.

Samuelson will be graduating this spring with a bachelor of science degree after which he hopes to work in the field of biology for a couple of years before returning to graduate school to earn his MBA. He would like to eventually hold some type of business management position.

CNR, cont.

...in which a typical light-hearted Samuelson smile.

Although he has found great success while swimming here at UWSP, Samuelson never did have to forget how good this university has been... to him both academically and socially. Maybe that, if any one thing can be singled out, is the key to his accomplishments.

As Blair puts it, "Peter is an all-around good person. He's a leader, he's got drive, self-discipline, a sense of responsibility— he is, quite simply, a walking recipe for success.

United Way

ON WINGS OF WAR

The day was long, the clouds hung low; all the world sat in silence, expecting the unknown;

The birds all flew to a destination north; like angels of hell, they flew on wings of war.

All the world was calm, there was no more commerce; there was nothing to be said, no more emotion...

A moment of brilliance filling the sky; I kneaded and prayed to be accepted to die.

Eagles of hell and a million screams;

As a world spoke with death, and lived a horrible dream.

This heat of fire leaving me to live; in tears, in death and no heart to give.

The blood is spilled, the bread is cold; light turns to darkness, and warmth turns to cold.

A fiery savage nursed by breaths of a demon... food for his life, and wind for his screams.

What was the King, I read in a book that this was the day;

Was this always our destiny, is there no need to please...

All about me were the sounds of sickness and the hands of hell; lost in my mind as I followed the tolls of a bell.

I drank His blood, I ate His bread; I followed all the rules the wicked said.

To all that must live and all that must die;
it is the spirit of humanity that will truly cry.

Your heart is in the mind and not in the soul; and so your quest for power has taken its toll.

Jefferson D. Reynolds
Knutzen Hall

Krokkus, cont.

Kohler had worked as a roadie for the band, and Von Arby had been his guitar instructor. Besides playing rhythm guitar on Heavensong, Kohler co-wrote two songs for the LP, "Screamings in The Night" and "Ready to Burn." The current Krokkus line-up was completed with the recruiting of Jeff Klevan (an American who came from the group Cobra) on drums, and Andy Tanna on bass, both of whom make their Krokkus debut on The Blitz.

"We're still heavy," Storace asserted in a Hit Parade interview. "Still hard rock. But we're offering a little more music to the kids, and keeping it street-level, because we know what they want. They want to hear rock — the kind of rock that gets you up on your feet. When we're writing, we always imagine an arena. We like to play stuff that reaches to the far end of the hall."

Residence Halls, cont.

Dr. Leidgren said, "There are certain things that have always been the same, that is that students always had some input into the decision-making process for their halls and in terms of what facilities they want. We've also always had some sort of programming in the halls." Leidgren added, "We want the residence hall experience to be a positive one, and we're doing all we can to make that possible."
FOR RENT: Room for male, single room with 4 others in house 4 blocks from campus. All utilities plus finances, non-smoker preferred. Call Paul at 341-5772.

FOR SALE: Road bike, 10-speed, $200. 3rd year road bike, in very good condition. Call Bob at 341-5772.

FOR RENT: Room for rent, $75 per month plus utilities. Location is 244th Pl. E. 5th Ave. Location is right next to Fitch. Call John at 341-2333.

FOR SALE: Room for rent, $50 per month. Room is available July 1st. Call John at 341-5772.

FOR RENT: Room for sale. Male. Location is 252-134th E. 5th Ave. Located in city limits. 1 1/2 blocks from campus. Rent $275 per semester or negotiable. Please call Paul at 341-5772.

FOR RENT: One room male to room with other rooms. Great location, just across from Campus in University Apartments. Pay just $300 a month. Please call Paul at 341-5772.

FOR RENT: One pair of Rocket (Szilagyi) pads. Reward. Call Steve 341-5772.

FOR SALE: 347 1/2 S. Center. Ball. Location is 247th S. Center. 3 bedroom, 2 bath, 5th Ave. Location is a block from Rock Center. Location is 247th S. Center. 3 bedroom, 2 bath, 5th Ave. Location is a block from Rock Center.

FOR SALE: 3100-4th Ave. Location is 1 1/2 blocks from campus. Location is 252-134th E. 5th Ave. Located in city limits. 1 1/2 blocks from campus. Rent $275 per semester or negotiable. Please call Paul at 341-5772.

FOR RENT: Semi-sealed. Indy faces peril and near-pulse sending. Miss Schmidt has been performing professionally for 15 years, beginning in Chicago and moving to the regions of the United States, then Canada and recently western Europe. While her music is formed contemporary, there is no category for which she has evolved a particular style. Admission will be $1 for those with a UWSP ID and $2 for others.

UAB RELEASES EVENTS

The University Activities Board recently announced its schedule of events for the second semester of the 1984-85 school year. Presently included in the UAB calendar are nineteen movies spanning fourteen weekends, mini-courses and seminars, a spring break trip to Daytona, Thursday-night ski trips to Rhib Mountain, and no less than ten comedy or mini-concert dates set for the Encore. The first major concert of the season, Krokus with Dakken, is scheduled for Quandt Gym on February 3.

While the UAB schedule is still incomplete, dates for the annual bartending and wine-tasting mini-courses, in addition to local talent acts will be released during the semester.

"We couldn't be more pleased or excited with our schedule this semester," states Michael Bie, Public Relations Coordinator for the activities board. "Our programmers have booked the best possible acts within their resources," he added. Among the highlights in the UAB schedule are the films Purple Rain, Indiana Jones and the Temple of Doom, a Robert Redford film fest.,

__________________________________________

How 'bout A Movie???

The UAB-Visual Arts team is almost halfway through the first semester of films. Showtimes are at 7:00 and 9:15 in the UC's PBR. The remainder of the film schedule is as follows.

Jan. 31 - Feb. 2
INDIANA JONES AND THE TEMPLE OF DOOM
Feb. 7 - 8
ALL OF ME
Feb. 9
PLAN 9 FROM OUTER SPACE
Feb. 14 - 15
AGAINST ALL ODDS
Feb. 21 - 22
REVENGE OF THE NERDS
Feb. 28 - March 2
Robert Redford Film Festival
THE NATURAL
ORDO HOMO
BUTCH CASSIDY AND THE
BATMAN

U.A.B. PRESENTS:

DAYTONA BEACH, FLORIDA
MARCH 29 - APRIL 3, 1985

SUNDANCE KID
JEREMIAH JOHNSON
March 7 - 8

March 24
THE JUNGLE BOOK
March 24 - 25
NASTY JOHNNY
April 10 - 11
YOU ONLY LIVE TWICE
April 18 - 19
THE KARATE KID
April 25 - 26

SPOKEN WORD:

CLAUDIA SCHMIDT
February 9th, your funky bone (or any other wave of fingerpicking guitarists can off it s semester when Claudia Schmidt plays the Encore on February 1 and 2. Schmidt has been performing professionally for ten years, beginning in Chicago and moving out into the region, the rest of the USA, then Canada and recently, western Europe. As an "integration of all the crafts involved in a live concert" musician, performer, storyteller, improvisor...she is totally unique and versatile at the same time."

Students looking for live entertainment this semester don't have to travel further than the U's Encore to catch a series of comedy and music acts presented by the University Activities Board.

CONCERT, COMEDY DATES SET

Contemporary Music kicks off its semester when Claudia Schmidt plays the Encore on February 1 and 2. Schmidt has been performing professionally for ten years, beginning in Chicago and moving out into the region, the rest of the USA, then Canada and recently, western Europe. As an "integration of all the crafts involved in a live concert" musician, performer, storyteller, improvisor...she is totally unique and versatile at the same time."

the wall humor should warm even the coldest hearts.

The warm, tropical WA-HA sounds of Free Hot Lunch will breeze through the Encore on Saturday, March 9th. Why WA-HA? Well, why WA-HA not? It most accurately sums up the combination of styles so evident in Free Hot Lunch. A capella song, acoustic swing, jazz and samba characterize the rhythms found in such bizarre songs as "I Hate To Wake Up Sober In Nebraska" or "Trees in Love." Based in Madison, WI, the band has performed extensively in the Midwest and Canada and has released two albums: "WA-HA Music" and "Don't Go Out Love."

If the humor of Monty Python and Saturday Night Live has a tendency to tickle your funny bone (or any other bone) then mark your calendar for April 26th as UAB Special Programs presents the Mary Wong Comedy Team. Writing and performing their own material using props, costumes, or sometimes just an empty stage, a mike and themselves, Mary Wong's chemistry has them marked as the number one comedy team of the future.

UAB Concerts is calling May 7th a musical party when the Metro All Stars hit town with "lots of hot music and dancing madness." As far as the Metro All Stars are concerned anything is fair game. They rely on a modern rock and soul combination that sidelines blues and older black influences. Included in their grab bag of tunes are boogies, rockers and bluesy shuffles. With a debut album behind them, the Metro All Stars should provide a hot time in the old town on May 7th.

Connecticut's Preston Reed is being billed as part of a new wave of fingerpicking guitarists who are trying to outstrip role models and develop their own personal style. Reed's style draws on a variety of genres: folk, blues, country, and classical. He'll be in the Encore on April 26th.

Billed as the No. 1 comedy act of the future, the Mary Wong Comedy Team (formerly called The Noid Family) will present its unique brand of humor on April 26 in the Encore. Inset: Guitarist Preston Reed plays the Encore on April 20.

The tropical WA-HA sounds of Free Hot Lunch will fill the Encore on March 9. Inset: Students can say "cheers" to the bartending mini-course offered during the semester at a yet undisclosed date.
