There have been great advances in the area of women's rights over the last several decades. Special interest groups which support and protect women from traditional stereotypical discrimination exist in various levels of feminine stereotype and an unquestionably valuable service.

There are few such organizations for men.

It may be argued that men don't fail prey to the same type or level of discrimination that women do and that a men's organization would be little more than a retaliatory measure against the women's movement.

Perhaps there is some merit in those arguments. But discrimination against men exists in today's society, though perhaps in different areas than it does for women. Men need protection and support as much as women do.

Parents and society as a whole classify children according to their sex from birth on. Girls are often comforted and pampered while boys are told to be tough and to "be a man." Women are taught to express their emotions more freely than are men. As a result, men are more likely to experience ulcers due to suppressed anxiety and tension than are women.

Sexism in advertising is not limited to women. The sleek, thin feminine forms drinking diet soda have their muscle-bound male counterparts. The feminine image is soft, helpless and sexy. The male image is tough, strong and macho. Both images cause equally high levels of anxiety in their respective genders when failure to meet the "ideal standards" of advertising occur.

Men are often ridiculed or mocked if they exhibit behaviors common to the feminine stereotype. In today's society, women exhibiting male behaviors are looked on with more approval than men do. As a result, men are more likely to experience ulcers due to suppressed anxiety and tension than are women.

A rural sociologist from Poland, who is spending this semester doing research at UWSP, will present a series of eight weekly lectures on contemporary issues in his homeland.

Professor Boguslaw Galecki’s talks and question/answer sessions will be from 6:30 to 8:30 p.m. each of the Thursday nights, beginning March 14, in the Founders Room of Main Building. There will be no admission charge and free parking will be available in adjacent lots.

Galecki’s topics will be “Historical Consciousness” on March 14; “Political System of State Socialism and Peculiarities of Poland,” March 21; “Common Economy,” March 28; “Crisis of Polish Agriculture,” April 4; “Ideological Control,” April 11; “Class Structure and Opposition of Interests,” April 18; “Arms Forces in Action,” May 2, and “Role of Political Political Centers Administration—Open Discussion,” May 9.

The professor was head of the department of rural and social policy at the Institute of Philosophy and Sociology of the Polish Academy of Sciences in Warsaw from 1973 until he left the country in 1981. He began teaching on the college level in Warsaw in 1947 and has risen to the status as “one of the leading rural sociologists in the world,” according to Professor Genevieve Summers who chairs the rural sociology department at UW-Madison.

Galecki’s ties to the UW-Madison campus began in 1972 when he was invited to serve as a visiting professor there. He returned there for similar assignments in 1976, 1979, 1981 and 1984.

He also has served visiting professorships in Manchester, England, and Trento, Italy. After spending this semester at UW-Stevens Point, he will go to Cornell University in Ithaca, N.Y.

Galecki’s books on peasants, social structure in peasant societies, rural social structures and rural social change and rural social stratification have been translated into several languages. He was one of the co-founders of the International Rural Sociological Association.

“We have been fortunate to have him on our campus,” said the Medford chair of the UWSP Sociology/Anthropology Department, who also labeled him as “one of the three leading intellectuals in the Solidarity Movement in Poland.”

His lectures are being sponsored by the UWSP College of Letters and Science and Political Science and Sociology/Anthropology Department. Those wishing to earn an academic credit for attending the lectures may arrange to do so by contacting the Office of Registration/Records. We ...
To the Editor:

People can be so thick-headed and so shortsighted as to discount the misadventures and erroneous (sic) statements made last week on Newsline by the candidates for COLA and the CR's. It's very disappointing that the CR Chairmen and the PRSSA Representative do not have a (sic) accurate understanding of the situation in Central America. In order for someone to criticize or favor a candidate in the election, they should be informed in issues. Mr. Zweifel's (sic) off-the-wall and inaccurate statements don't represent the group that has voted for those of us who support the President's policy. After reading the letters to the editor this week, Mr. Zweifel, the President's policy loss dots (apart from this activity) is Nicaragua is a sovereign nation engaged in a civil war and the administration's (sic) democratising the CONTRAS and the printing of the manuals (sic) by the CIA are foreign policy. The Act does not apply to the 1979 revolution Nicaragua has an economic and massive military buildup and has established close ties to the Soviet bloc. Even members of COLA, who need many an argument, have received any offensive weapons (as of yet) the size of their armies. Even students from the USA who are aiding the neighbors of Nicaragua. The recent elections in Nicaragua were free and fair and the stamp style and are a prime example of our solution has betrayed the people.

What is especially upsetting is the misinterpretation of the comments made by the President of COLA. It's hard to believe that members of COLA and others who support the movement regardless of the wrongs confronting the people in Nicaragua can break it as see it. The barometers that are people is Central America is a federal offense and the government has even been accused of political (sic) action is necessary to enforce the immigration laws. The House and Senate both have recognized that those organizations engag- ing in illegal activity. If members of the public don't understand the movement to save money for scholarships. The Depts. have received court or- ders to institute legal action that the organizations, I'm not sure there is any way this can break it as sees it. The barometers that are people is Central America is a federal offense and the government has even been accused of political (sic) action is necessary to enforce the immigration laws. The House and Senate both have recognized that those organizations are illegal.

Question: What does the author believe the students should do?

The author believes that the students should work to change the current laws which they believe are betraying the people. They should work to change the laws so that they protect the people of Central America and not just benefit those who are against them. The author suggests that the organizations, including COLA, should be held accountable and the general public should be educated about the realities of the situation in Central America.

---

March 17-24 the Residence Halls will be abuzz with students tuning in to the sodal celebrations. March 17 - 24 the Residence Halls will be abuzz with students tuning in to the sodal celebrations.

Question: What is happening at the Residence Halls from March 17 to 24?

The Residence Halls will be abuzz from March 17 to 24 with various sodal celebrations.

---

To the Editor:

The students of COLA will be holding elections for the 1986-87 academic year. At this time, the students of U.W.S.P. will be asked to select their representatives for the Student Senate of the SGA, as well as SGA's new President and Vice-President.

Question: What are the students of U.W.S.P. being asked to do?

The students of U.W.S.P. will be asked to select their representatives for the Student Senate of the SGA, as well as SGA's new President and Vice-President.

---

Concern for C.A.

As students attending a university in Central Wisconsin it is easy to ignore and even forget that those countries in Central and South America have many of the same problems that we have here in the United States.

Question: Why is it important to acknowledge the problems in Central and South America?

It is important to acknowledge the problems in Central and South America because they are similar to those in the United States, and by acknowledging them, we can work towards finding solutions that can benefit both regions.

---

Candidates speak

To the Editor:

Decisions, decisions, sometimes it feels like we don't have enough time to make them. This year there were nine candidates running for the 1986-87 student senate and most importantly, their leaders, the associations that have been given an interesting view of the association and the Cont. p.22
$2.1 million addition approved for CNR building

"The education of paper scientists and engineers at the undergraduate level is crucial for the future..."
Write-in candidates for SGA elections

by Susan Higgins

The Student Government Association (SGA) elections are less than a week away, and although there will be only two names listed on the ballot under president-vice president, there is a race for those positions. A candidate for SGA president or for the official candidates run for their money.

Christopher Johnson and Julie Tatham decided to run for president and vice president, respectively, too late to get on the official ballot. But after much encouragement from friends, fellow senators and SGA Executive Board members, they decided to run anyway.

They also decided to run because they feel they can provide SGA with the leadership needed to run the organization. SGA had a rough year this year due to personnel changes, Chris explained, and this caused a lack of leadership.

Student Government's leadership and visibility are important to Chris and Julie. They would like more people on campus to be aware of student government, to talk about it and talk to it, Julie said.

Chris sees SGA as an organization that does more than spend money, but without competition for student government positions, he feels that is what SGA is becoming.

The principal goal if elected would be to provide stronger leadership on campus. They would also encourage more involvement in halls.

Chris is a former resident of Knitter Hall and a one-time member of its hall council, and Julie lived in Thomson Hall. They feel the residence halls should have more input and involvement on campus. They also noted that neither of their opponents have lived in residence halls.

They would also like to work with Athletics to find a better way to fund club sports. Club sports are important, Chris said, but SGA cannot adequately fund them. He feels if the two groups would work together, they could find a better way to fund them.

The team of Johnson and Tatham wants to offer the students of UWSP a choice in their student leadership. Being write-in candidates will not be easy, though, not just because their names will not appear on the ballot. Because they are not official candidates, they are not eligible for the privileges official candidates receive, such as a booth in the Concourse or advertising sponsored by SGA. They also have to make sure voters know their names before they go to the polls March 19, Julie pointed out.

In their own way though, Chris and Julie see their disadvantages as advantages as well. By not being official candidates, they do not have to follow the SGA publicity guidelines, only those set up by the University Center.

Chris and Julie also feel they form a well-rounded ticket. Chris is a political science major, and Julie is a theater major with a history minor. He is a member of the Student Legal Society and Science. As a senator, he sits on the College of Letters and Science. As a senator, he is very familiar with SGA's budget process through his seat on the Finance Committee.

Julie is a theater major with a dance minor. She has been very active in Players and has also worked with SETV. As a senator for the College of Fine Arts, she has worked with the Communications Committee and sits on the Student Recreation and Review Committee (SORRC). Her involvement with SORRC would be particularly helpful if elected because the vice president chairs the committee.

"They also see their position as being more challenging. It's making us work harder," Julie noted.

The challenge of being write-in candidates parallels the theme of their campaign. Chris added, by deciding to run as write-ins, they are challenging the students to vote for them.

"The problem isn't with the other candidates inasmuch as they're write-ins," Chris explained.

If elected, Chris and Julie expect to only body to challenge them, to insure they live up to their goals.

The presidential candidates

by Theresa Boehlstein

Staff reporter

"Diane and I have the same goals, ambitions and leadership experience needed to successfully execute the duties of SGA president and vice president," stated Paul Pietrowski, student government, vice president.

Through their involvement in a variety of activities, Paul Pietrowski and his history minor each bring special skills and expertise to the ticket.

Pietrowski presently serves as student senator for the College of Letters and Science, as well as being a senator for the Legislative Affairs Committee of Legislative Affairs and past president of Young Democrats.

Engelhard also serves as a senator for the College of Letters and Science. Legislative Affairs Committee member, secretary and chairman for UWSP College Republicans, presently serves as executive vice chairman for Wisconsin College Republicans.

If elected, improved communications is a major goal for Pietrowski and Engelhard. "I'd like to provide a vehicle for communication by periodically attending hall council meetings and by having regularly scheduled listening sessions where we can voice their ideas," said Engelhard.

"The concerns of UWSP students must be the concerns of Student Government representa
tives," Paul and I need your help for a fresh approach to shared governance.

"We're also looking for feedback from the students," says Pietrowski. "It's very easy to get heavily involved with student government, yet not be able to step back and see what the students are needing or feeling."

Other areas of improvement will be stability in personnel and procedures to provide a better working relationship between SGA and all other student organizations.

"In the past, transition from old to new administrations was a problem. Vital information wasn't being passed on due to a shorter transition period," Pietrowski stated.

"If, you take time to look at the issues, I believe you'll discover that student government needs to succeed in the 1985-86 academic year," says Pietrowski.

SGA Update

by Noel Radomski

News Editor

SGA Minutes

Student Government Association (SGA) went back to the boards for the process of allocating money to needy organizations. Travel requests for two organizations to Kansas City was decided.

Don Amiot was appointed $750 so that three students, a student trainer, a student manager and a student coach would be funded for the trip to Kansas City for the NAIA Tournament. Amiot originally requested funding for two others; the volunteer assistant coach and the sports information director. The two were denied for funding because they are non-students and SGA felt they should not fund them. As Chris Johnson noted, "Not the other two because they are more or less full time coaches. I don't know if they should come out of our fee."

Joan Olson also stated, "We have limited money left in our travel budget. That way we'll justly some members -- those who try but don't pick up some of their requests."

Also passed was the request for an additional $250 for a trip to Kansas City. A request for $250 for transportation to Kansas City, which would consist of 30 pep band members, 14 cheerleaders, 12 pom pom girls, and two dogs. Joan Olson noted, "This is a really worthwhile request, and it will bring a lot of recognition for the school."

Also passed was the request for $175 for two new typewriters for SGA.

1985 Model Legislature

At the 1985 Model Legislature, two UWSP students took leadership positions. The model legislature is a two-day intensive program in which College Republicans and the College Democrats simulate Congress from college campuses from across the state meet in Madison and use the State Capital Chambers to hold a mock legislature. For this year's session, Diane Englehardt (R-Stevens Point) was elected Lt. Governor. She assisted both Senate and Assembly in passing legislation important to youth as well as all citizens of Wisconsin.
Construction of Treehaven on last stage

Meanwhile, Gibb said he will continue to seek contributions from foundations, corporations and individuals which are to cover the finishing touches at Treehaven. Additional money will be gathered from the sale in his office of a limited number of prints of "Ruffed Grouse in Snow" by award-winning wildlife artist Lee LeBlanc of Iron River, Mich., and Minocqua. The prints sell for $125 apiece and the amount is tax deductible.

The $130,000 collected last summer for the final phase of construction has represented foundation and business contributions plus revenues from the sale of the prints. The largest contribution was $56,000 from the Irvis Young Foundation of Palmyra, which gave nearly $200,000 to cover earlier building projects at the camp. The main lodge at Treehaven is named for Young, an inventor who died in the late 1970s.

Other recent donors of grants are Owens-Illinois, Inc. of Tomahawk; Alexander Foundation of Wausau; Margaret Rivers Fund of Stillwater, Minn.; University of Wisconsin-Stevens Point’s Business Contribution Trust; and Garver Memorial Trust of Madison.

About a year ago, the university secured support from the governor and Wisconsin Legislature to cover costs of building a new classroom center and to secure loans for construction of two small dormitories. Those three structures are to be ready for use by the time of the open house.

With 5,900 square feet, the classroom building includes offices, classrooms and laboratories. Its $600,000 pricetag includes landscaping and the installation of utilities. The new dorms, which will be financed by revenues from people who stay in them, each contain 48 beds and each cost about $240,000.

The first stage of construction, which cost more than $200,000, was financed entirely by private contributions collected by the UW-SP Foundation. Included were $8,400-square-foot Young Lodge for $35,000 plus utilities installation and site preparation, a station manager’s house, service roads and parking lots, workshop, food service equipment and design supervision and planning.

Treehaven is an approximately 1,000-acre tract of wild land in the town of King, Lincoln County. It was given to the UW-SP Foundation in the late 1980s by Jacques and Dorothy Vallier of Faxon Point and Tomahawk.

University officials viewed the gift with special favor because, at a distance of about seven miles north of campus, it is considerably closer to UWSP than the deteriorating facility near Clam Lake that had been leased from the federal government for about 15 years.

Round trip. Anywhere Greyhound goes.

This spring break, if you and your friends are thinking about heading to the slopes, the beach or just for a visit, Greyhound can take you there. For only $99 or less, round trip.

Just show us your college student I.D. card when you purchase your tickets.

Your ticket will then be good for travel for 15 days from the date of purchase. So this spring break, get a real break. Go anywhere Greyhound goes for $99 or less.

For more information, call Greyhound.

Most passengers experience no extra charge for their college student I.D. card when they purchase tickets. However, some carriers may restrict the use of college student I.D. cards for travel on certain bus routes. Inquire at the time of ticket purchase. Most state and federal government issued I.D. cards are accepted, as well as driver’s licenses from New York, New Jersey and Pennsylvania.

Round trip. Anywhere Greyhound goes. And have the driving done for you.

**Sexual abuse: Where the love ends**

"Very few children are physically damaged or hurt by sexual contact. But psychologically it can be very traumatic..."

by Richard Krupnow

Staff reporter

"I knew I wasexceptional from the start but I was scared. I all remember was being scared." Patty, a lonely, attractive homesexa woman who was 12 when her father sexually molested her.

"The first night my father and I just sat around talking about my problems. The second night he took off my panties and I started crying - I screamed 'no' and ran away. I never let him have intimate relation with me..."

Patty's case is not unusual. Many children who were only 12 at the time and are physically damaged or hurt by the act of sexual abuse encounter the process psychologically, which can be very traumatic. It destroys their trusting nature and their emotional relationship with a person, who they formerly had a good relationship with, ruins that trust.

There are a lot of dynamics to sexual abuse and people must be encouraged to recognize its effects. A homesexa woman who was 12 when her father sexually molested her.

"Patty remarked that she still isn't very trusting and often averages the effects of the abuse into one handy category. But clearly the drastic breach of trust between these two people - a girl and a man - she had in esteem since childhood was not.

Reaching the abuse victim can be difficult. They fear that other authority figures may betray their trust just as the abuser did. Thus, the victim may withdraw from police, doctors, or counselors attempting to help them.

Another aspect of sexual abuse that is extremely difficult to deal with is the victim's own guilt. If the perpetrator of sexual abuse often rely on secrecy and the victim's own guilt to instill, then maintain the abuse. Many feel that education is the key to peace because it can helpivate the suffering which is already taking place.

Seidel suggests that the first step is "recognize that the problem exists. For all the cases we have, we have shot our eyes at it saying 'it's so horrible that we don't even want to talk about it.' But as a result, what we did was teach our children how to cross the street safely and not to take candy from a stranger when the more significant threat to the kids was abuse by someone that they knew.

Yet, while progressive steps are being taken to educate children about sexual abuse and help victims recover from the trauma, our judicial system still exposes the child victim to a frightening courtroom appearance.

Some communities have taken steps to protect children from this experience. For example, in Wauwau, the program sponsors kinship with the community. Both the Stevens Point and Wausau community schools have implemented the Protective Behaviors program.

"Protective Behaviors was started by Peg West, in Madison, and is spreading across Wisconsin. The program helps inservice meetings to inform teachers how to teach their students about the child's own and the system. The program spans kindergarten to the sixth grade. The program is not a curriculum, it is not only the only, or primary, solution. Parents must be willing to talk about their feelings, how sexual abuse and its prevention.

At GPU we try to provide support for our members," said GPU President Gert McCann. "In addition, we try to involve the community around us."

"As part of the organization's activities, an "Outreach" program is carried out each year. As part of this program, members of the organization give speeches to classes, discuss sexuality and homophobia issues. McCann said she feels this is a very good way to "reach children and help them recover from the trauma, our judicial system still exposes the child victim to a frightening courtroom appearance."

"We have information concerning a child and a child claims that anything has occurred, we don't have a case." She also points out that currently "children need to be able to go into court and be credible witnesses or we don't have a case."

Even in a case when a child is testified, if an adult is on trial, the court makes the public. So this child, who may have been harboring the pain of sexual abuse for a long time, must not tell only a judge and jury but whoever else decides to attend the trial.

"Here too we have kind of a paradox," Seidel comments. "If the offender is a juvenile, then the offender is afforded all kinds of protection in juvenile court. For instance, the hearings are always closed. But if the offending is an adult, the hearing is open and no regard is given to how difficult this may or may not be for a child who has testified. There is no question that the scale is tilted in favor of the offender with the case."

Wisconsin is experimenting with video taped testimony but the issue is a clowned one. "No one knows the answers to what is possible, what is legal and the defendant still has the constitutional right to confront the prosecution with evidence favorable to him, when do we do it; what is effective and what isn't!"

The purpose of video taped testimony is to protect the child from suffering further trauma.

"So we do need some kind of expert testimony to determine that the child will be traumatized if he or she testifies? It is so overcrowded individuals, "it is not used very much at all."

Thus, children who are the victims of sexual abuse must enter a courtroom "full of big, scary adults and testify or the perpetrator is not going to face a conviction. Understanding how frightening this can be for a child is difficult. But we must remember that in the majority of cases, the child for adult figures has been stalked by the abuser. Now, the child must not only face that abuser, but also a "a room full of other strange people: 12 adults on the jury; the judge sitting up higher, in a black robe, looking pret­ ty frightening and intimidating to a child. Even if they are very real as a laborer, said McCann, "the child doesn't see that, he sees a black robe."

"Defining safeguards to protect the abused child, without infringing upon the rights of the defendant, is extremely difficult. And while our judicial system is designed to protect the rights of the defendant, McCann feels that "somewhere it has to even out because to be a defendant, to be the victim, to be cross-examined by..."

Features Editor

Webster's defines homosexuality as, "A person characterized by having a sexual desire for members of the same sex only."

Kelli Frankenberg, treasurer of GPU (Gay People's Union), interprets homosexuality as, "A lack of inhibition of love to another human being who happens to be of the same sex.

The GPU at UWSP strives toward persuading members of the "straight" community to utilize the gay lifestyle and allow members of the gay community to be themselves and free to live as they desire.

"At GPU we try to provide support for our members," said GPU President Gert McCann. "In addition, we try to involve the community around us."

"As part of the organization's activities, an "Outreach" program is carried out each year. As part of this program, members of the organization give speeches to classes, discuss sexuality and homophobia issues. McCann said she feels this is a very good way to "reach children and help them recover from the trauma, our judicial system still exposes the child victim to a frightening courtroom appearance."

"We have information concerning a child and a child claims that anything has occurred, we don't have a case." She also points out that currently "children need to be able to go into court and be credible witnesses or we don't have a case."

Even in a case when a child is testified, if an adult is on trial, the court makes the public. So this child, who may have been harboring the pain of sexual abuse for a long time, must not tell only a judge and jury but whoever else decides to attend the trial.

"Here too we have kind of a paradox," Seidel comments. "If the offender is a juvenile, then the offender is afforded all kinds of protection in juvenile court. For instance, the hearings are always closed. But if the offending is an adult, the hearing is open and no regard is given to how difficult this may or may not be for a child who has testified. There is no question that the scale is tilted in favor of the offender with the case."

Wisconsin is experimenting with video taped testimony but the issue is a clowned one. "No one knows the answers to what is possible, what is legal and the defendant still has the constitutional right to confront the prosecution with evidence favorable to him, when do we do it; what is effective and what isn't!"

The purpose of video taped testimony is to protect the child from suffering further trauma.

"So we do need some kind of expert testimony to determine that the child will be traumatized if he or she testifies? It is so overcrowded individuals, "it is not used very much at all."

Thus, children who are the victims of sexual abuse must enter a courtroom "full of big, scary adults and testify or the perpetrator is not going to face a conviction. Understanding how frightening this can be for a child is difficult. But we must remember that in the majority of cases, the child for adult figures has been stalked by the abuser. Now, the child must not only face that abuser, but also a "a room full of other strange people: 12 adults on the jury; the judge sitting up higher, in a black robe, looking pret­ ty frightening and intimidating to a child. Even if they are very real as a laborer, said McCann, "the child doesn't see that, he sees a black robe."

"Defining safeguards to protect the abused child, without infringing upon the rights of the defendant, is extremely difficult. And while our judicial system is designed to protect the rights of the defendant, McCann feels that "somewhere it has to even out because to be a defendant, to be the victim, to be cross-examined by..."

Cont. p. 11

---

One of the reasons for the low membership (as compared to the number of gay members) is due to the fact that people don't want their name put on a list. "People are still afraid to admit to their life style, because society treats it as a whole, but rather from only a few individuals," said Marsh.

Kelli Frankenberg expressed that "when people think about homosexuality, they sometimes only think about the sex part. What they don't realize is that it's an entirely different lifestyle."

"Homosexuals aren't always "romantically" involved with one another. There also exists between them the same caring and sharing experienced by heterosexual couples.

"Homosexuals sometimes have a social advantage," said Frankenberg, "because we are often more open-minded to other socially oppressed groups."

Jane Marsh said that when children are raised by two homesexa parents, they sometimes don't necessarily grow up to be homesexa also. "They just sometimes enter society with a more open mind toward persons different from themselves."

McCann said, "Too often do people get the wrong idea about homosexuality. They should try to look more at the love that is shared between individuals rather than just the sex. Love should be more emphasized in every relation­ ship, whether it be hom­ osexual or heterosexual. If the world might be just a little nic­

If you would like to help the men, women and children who are starving in Africa but you just don't have the time or money to send, there is another alternative. You can join Bond for the World.

Bond for the World is a Christian movement that began in 1973 to help curb the hunger that is eating away at the people around the world. Its members work together to obtain government grants and private contributions to help the starving people both in the United States and other countries.

"Congress can supply 10 times as much money by passing just one bill as all of the private donations in the country," said Kim Bohe, a Washington representative for BFW. "That's why it's so important for us to work with Congress to help change government policies."

The organization works by writing or calling members of Congress or other government officials who can help stop policies that are affecting the hungry are being made. For $15 a year, members receive a membership kit that contains information on policies going before Congress and ways to write to Congressmen. The kit is a particular piece of legislation.

Bond for the World is organized by districts. "Our unique "telephone tree" helps spread the word very quickly through every member of a district," said Kim. "This way our members have a great impact on what happens in Congress."

Wanted to be safe rather than sorry? Then maybe you should be looking into some form of birth control. UW-S's Health Center offers counseling and a variety of contraceptives to students at a low cost.

The intrauterine device, or I.U.D., is a device inserted into the uterus that prevents ovulation. It is not quite sure how it works, but it is 95 percent effective.

If interested in an I.U.D. as a method of birth control, contact Dr. Jim Zach at the Health Center. If you have not had a pap and pelvic exam within the last year, you will be made an appointment for one. The U.I.D. will not be inserted at this time, but can be on the last day of your next period, if this method is believed to be appropriate.

Another important program that BFW helped make a reality is the Domestic Women, Infants and Children's (WIC) program. This provides high protein foods such as milk, eggs, cheese and cereals to low income families with children up to five years of age. The funding has tripled for this program, which means that there was a great need for certain people to help change the policy to meet this need. Edna Kim, said, "It's powerful because the Chair of the Foreign Operations Subcommittee in the House of Representatives that deals with all foreign aid money. This gives David Oby the power to regulate the amount of money that goes for foreign aid. And he has a good record when it comes to famine relief programs."

For those people who would like to become part of Bond for the World, they can contact Rev. Art Simms, at the Campus Peace Center, or write to: Bond for the World, 802 Idaho Island Avenue N.E., Washington, D.C. 20018.

**Contraceptive alternatives offered**

**Beware of the Burnouts**

by Tom Raymend

Dear Readers: The following is a word-for-word recounting of the story told by Sam Sledge, private investigator, who swore to bond for the World that if I did not report the story, he would break my thumbs to type, here it is.

When the pigeon was going to be released, you've got to keep an eye open, an ear to the ground and a hand near your gun. It was shaping up after the March 7 issue of the Pointer that word got to me about the weird letter from Edna, who's looking for her father. It could be coincidence, but I've looked at death too close to often to take the chance.

I got one of the locals to ask for info on Edna and everything he knew about Uncle Louie's operation. He said he wasn't sure what he'd got for squawking, I told him 'he'd keep on breathin'.

The next day Uncle Louie figures that he can keep Princess Edna and her one of the kids off the end. He won't have any trouble takin' over Ludoria. Oz. Edna's father, Edna and his little O'Neill. Ludoria plans to take out some time before the big horse runs at UW-Eau at the same time he gets Edna and destroys Trivia.

I didn't know where Edna was or what she looked like. For that matter, I didn't know what Oz or Louie looked like either. Then I got an anonymous phone call from a courageous group of trivi a fanatics informing themselves the Franklin Street Burnouts. The Burnouts told me that they had been in protective custody, but wouldn't say where. They also captured one of Oz's group and interrogated him on videotape.

Amateurs that the Burnouts are, Louie's man got away, but not before spilling the beans about something happening at this year's Trivia Parade. Louie's other two stooges, Toes and Fingers, are walkin' around in suit jackets with "Uncle Louie" written on the back. I've heard of these two, and they sound like all thumbs.

I told the caller that there are more than three other agents in the Burnouts, but I've learned since then that there are at least four or five. The video taped interrogation of Louie's man gone to be broadcast Thursday night on SETV, 9 p.m. However, my sources tell me that Louie will be showing up at the Community College at 7:30 p.m. Monday. But I still say, "If we do get convictions in criminal cases with children witnesses, it's fortunate."

Sexual abuse is frightening and complex. Victims often suffer, silently, with feelings of guilt and shame. They are too afraid to ask for help, and then in seeking help must endure the embarrassment and shame that comes with abuse.

There are no easy solutions.

---

**College costs are going up, but so is the Army College Fund**

Tuition, books, lab fees, college living expenses—all seem to be climbing relentlessly. Well, here's some good news from the Army. Today's Army College Fund is climbing too. You can now accumulate over $25,000 for college, if you qualify.

What's more, you'll study, learn and become proficient in a useful skill. It could be a skill with so wide an application in both military and civilian life that it might help you decide what to take in college.

If you're determined to go on to college, but you don't know where the money is coming from, pick up an Army College Fund booklet from your local recruiter. It offers several options you'll want to investigate.

**ARMY, BE ALL YOU CAN BE.**
The Fisheries Society

The student chapter of The Fisheries Society is dedicated to the study and improvement of fish habitat.

Every September, before the cold weather sets in, our society sponsors a stream improvement day on the Little Flower River. This is an excellent opportunity to get experience in the field of fish management. Of course, the day isn’t complete without a brat and beer get-together afterwards.

This past fall we also helped area FNE researchers electro-shock the Little Flower. Again, this was an excellent opportunity for hands-on experience with a lot of fun.

When the cold weather does move in, freeing area lakes, our projects don’t stop. This February the society held an ice fishing contest on the Big Eau Pleine Flowage, sponsored by area sporting goods stores. Prizes donated by our sponsors were awarded for first, second and third places in the categories of Northern Pike, Perch and Walleye. The contest was a great success and shall be an annual event in the future.

Our D.O. (dissolved oxygen) committee monitors key lakes in the area, checking to see if the oxygen levels are sufficient to support the fish populations throughout the winter.

A look toward spring sees a new society project for the Wisconsin River. It will involve estimating game fish populations of Northern Pike, Perch and Burbot in the Little Flower River.

TAPP!

The UWSP student chapter of the Technical Association of the Pulp and Paper Industries is commonly known by the acronym TAPP! is one of 16 student chapters in the United States. TAPP! is an international professional association of people involved in the paper industry and related fields. The purpose of the organization is to advance the paper industry through the sharing of ideas and technologies and to increase the overall capabilities of its members through continuous education.

The Stevens Point chapter of TAPP! is open to any student at UWSP interested in the paper industry. Any student who majors in paper science and engineering automatically becomes a member of the student chapter. Anyone interested in joining TAPP! only needs to contact their student chapter director to get involved. The paper science faculty has further information. The paper science department office is located in Room D127 of the Science Building.

The aims of the UWSP TAPP! chapter are twofold: the first is to provide its members with additional technical information about the paper industry, as well as additional background information which would be useful to a young engineer. This is accomplished by providing speakers at every monthly meeting who cover topics as varied as water pollution treatment to stress management to managing personal finances. Upperclassmen also attend one national meeting a year where they can interact with other members of the industry from all over the country.

The second function of the chapter, on a more social level, is to provide extracurricular teams in all major sports, and also holds an annual racquetball tournament for its members. TAPP! also holds two picnics a year. The picnic, held at Bolk Park, provides members with an opportunity to relax from studies by taking part in favorite college pastimes; namely, lazing around in the beautiful fall or spring weather and drinking beer.

Sexual Abuse, cont.

But there are clear steps toward solutions: first, is the recognition of sexual abuse as a problem; second, is a willingness to be educated about that problem. Only then can sound decisions be made and positive action taken.

Those who desire further information about sexual abuse can contact local agencies; or the National Child Abuse Hotline at 1-800-422-4453. Students with children may wish to examine such books as No More Secrets for Me, by Oralee Wachter; and for personal accounts by sexual abuse victims, any student who wishes to read I Never Told Anyone, edited by Ellen Bass and Louise Thorton.

College or Natural Resources (CNR) and the university as a whole through its Pierre Paul, and studies. Xi Sigma Pi, in cooperation with STAB, will be co-hosting the University Open House for the CNR Building on March 24, 1986. The following day, March 25, the society will be sponsoring a Graduate School Workshop. Graduate recruiters from several schools around the nation will be meeting to discuss opportunities in graduate school and recruit potential students. Recruitment will specifically be in natural resources, but general topics regarding graduate school will be discussed. The workshop will be open to the entire university.

For the paper science major

The Health Center offers information sessions on contraception and its effective use on Mondays at 2 p.m. (men only) and Tuesday at 2 p.m. (women only), and Wednesday at 10 a.m. (women only).

There's a "commotion" in the vinyl jungle

by Rob Taylor

Like many new bands today, R.E.M., Let's Active, Los Lobos, the British group the Commotions, and the Scottish-British group the Lobos, have found a new sound out of old components. The Commotions (Stephen Irvine on drums, Neil Clark on guitars, Lawrence Donaghey on bass, and Blair Cowen on keyboards) have an arsenal of style at their command, and Cole is an inspired lyricist (even if his influences show a little obviously at times). Their debut album is Rattle and Snap, and it indicates that Cole is a talent to watch in 1985.

The first track on the album is "Perfect Skin," and the song is absolutely brilliant. I'd say that it's a little bit surreal, and it's almost too intelligent to get into the American Top 40. "Perfect Skin" owes a little debt to Dylan ("she's up on the pavement, yeah, she's a weathergirl") and a musical debt to a lyric by David Freeman ("she's been sexually enlightened. ")

The object of Cole's attraction turns out to be a bit vain and shallow ("she's been sexually enlightened. "-Cosmopolitan "), yet he cannot reconcile physical attraction vs. emotional fulfillment. The moral? The moral of this song has been-- there's never been one.

Another standout cut is "Speedboat." This song is so fragmented that it's like trying to put together a puzzle of ancient jigsaw pieces ("she's been sexually enlightened--Cosmopolitan"). Cole's voice periodical- ly blends into the background, where it quivers like Bryan Ferry's. It's hard to tell exactly what the song is about, but "Speedboat" has an ominous feel that's impossible to ignore.

The album's title track was a British hit single a few months back, and it features an acoustic guitar line (a la violent Femmes), with string orchestrations. Because Cole's role model is Lou Reed, with lines that alternate between recognizable and obtuse ("she looks like Eve Marie in Saint in On the Waterfront/she says all she needs is therapy"). There are moments of spite, but also glints of tenderness.

For but for my money, the most outstanding cut is "I'm a" stark, acoustic guitar-backing number, in which Cole is at his most melodic, vocally. The song is a sad little failed relationship, in which Cole surmises the aftermarth with detached observations that sting with bitterness ("I suppose we found some sort of happiness/to fill the empti- ness")

Other cuts that stick out are "Four Flights Up," which, musically, is an apologetic cousin to R.E.M.'s "Don't go back to Rockville." "Down on the Mission Street" is a sort of folk-rock track that has a melody that will instantly stick in your mind. "Forest Fire" is a Motown-ish ballad (from the string arrangement to its cool bass line), but with the usual lyrical twist; "I can never be that girl I once was.

The Commotions are a cohesive band, unceremoniously placing Cole's lyrical flights with appropriate sounds. The music never interferes with, but rather complements the song. So if the Commotions don't sound techni- cally impressive right away, it's because they know what the band "means." There's very little in the way of solo spotlighting here, just fine ensemble playing.

There are a few faults with Rattlesnakes. Some of the songs never do kick in and make themselves noticed. Cole's voice, which I find hypnotic, might be more continuous to others. And, worst of all, the American issue of the album (I own a British import) features some tracks that have been remixed by Ric Ocasek (of Cars fame). I find stabs at commerciality such as this to be annoying and unnecessary. There is absolutely nothing wrong with the original mix, and the sound shouldn't have been tampered with. But this is, after all, a debut album. If The Commotions make a few mistakes, it's ok., because bands with years of experience would have a hard time matching Rattlesnakes. This band has potential to burn, and if they can avoid the sophomore jinx (following a great debut with a mediocre second effort), they'll have a bright future.

Now Appearing -- O.J. Anderson

How does a boy from Detroit who wanted to be a restaurant manager end up perhaps the most influential mime in North America? Easy. You get sidetracked into a brief study of mime while traveling through Europe with a madrigal group and they work up a quick act four years later because you need the money to refurbish an old vaudeville house and the local Rotary Club.

Also, in the case of O.J. Anderson, a brilliant marverick of this ancient art, you add an enormous amount of talent, an appetite for the offbeat, and a deep understanding of the special creativity of the child.

"Mime gives me a chance to play with people, to let them watch me play, and to prolong my childhood," O.J. says. "It also allows me and me to see the absurdity of life and all that it does, and doesn't, have to offer. Besides," he adds, in case all of this sounds too lofty, "I just like the taste of clown white."

He also likes to expand the horizons of his art while working to remove the various forms of modern dance. People are turned off because they know what the word "dance" means. There's so much of the offbeat, and a deep understanding of the special creativity of the child.

"Mime gives me a chance to play with people, to let them watch me play, and to prolong my childhood," O.J. says. "It also allows me and me to see the absurdity of life and all that it does, and doesn't, have to offer. Besides," he adds, in case all of this sounds too lofty, "I just like the taste of clown white."

Besides," he adds, in case all of this sounds too lofty, "I just like the taste of clown white."

Hardy anyone gets lost at an O.J. Anderson performance. Audience members may find themselves as students in a mythical "Mime 101" class that is figuratively transformed into a somewhat ineraticwed wedding reception with a surprise end-

HOW'S YOUR DRIVING IQ?

Remember how hard you studied the driving manual before taking the written part of your first driving test? You probably memorized just about every question in the book. Now that you're an experienced driver, though, how many of those questions do you think you could still answer correctly? Take a minute and test your knowledge with these simple questions taken from various state driving manuals.

1. At 50 miles per hour, you can see clearly: (A) 8 seconds ahead; (B) 4 seconds ahead; (C) 2 seconds ahead.
2. You must start signaling a turn: (A) at least 25 feet; (B) at least 50 feet; (C) at least 100 feet before making your turn.
3. To brake to a stop under optimum driving conditions, a car going 70 miles per hour will require a distance of (A) 190 feet; (B) 381 feet; (C) 75 feet.
4. If you have a blowout or flat tire, you should: (A) apply the brakes hard and swerve sharply to your right onto the shoulder of the road; (B) pump the brakes lightly and ease onto the shoulder of the road after you have reduced speed; (C) stay off the brakes and turn on to the shoulder when the car is almost stopped.
5. The road is most slippery: (A) just at the freezing level; (B) well below freezing; (C) slightly below freezing.
6. At night, well-adjusted headlights light: (A) about 50 feet; (B) about 350 feet; (C) about 150 feet of dark road.

ANSWERS: 1 B 2 C 3 B 4 C 5 A 6 B

Safe driving comes from good skills, quick thinking and knowledge. If you missed some answers, you may want to review the state driving manual. Being up on the rules and facts of the road can make you a safe driver.

Famous Last Words

"I think you've had a few too many."
"You kiddin', I can drive with my eyes closed."
"You've had too much to drink, let me drive."
"Nobody drives my car but me."

"Are you OK to drive?"
"Who, a few beers?"

DRINKING AND DRIVING CAN KILL A FRIENDSHIP
Before hitting the trail, we chose a route. The map offered two options. We could stay at the base and climb a "rugged" terrain, putting us in good position to make it over the pass, or have easier terrain by top of the peak and wanted to slow down, more for the others than for myself.

Nanom was exhausted and wanted to continue but didn't know if we could make it. We took the community gear from her pack and distributed it among us. With the light of dawn, the moon high, the peak had been set and we decided to keep that commitment to ourselves even though we were already tired. We packed up and hit the trail. Our instructors stayed behind, letting us find the route. It didn't take long to dis­cover we mirrored the maps. We were laughing at ourselves and wondered if I would ever be able to survive in the wilderness. The trail soon led to the mid­dle of a boulder field. We re­traced our steps, dropped down and went around it. We were more quickly, rather than around a heavy rainstorm moving in.

Two people, in our patrol were Too far ahead to stop. It was easier for them to keep going across the summit than breaking the cardinal rule in climbing: stay together, stay to­gether.

By the time we made it to the base of the boulder field, it had started to rain. We had to have lunch and set up tarps to dry. Merry and Charlie, the two who continued across to the other side, had rejoined us. We were upset with ourselves for not getting separated and agreed not to split up again.

When the rain stopped, we cleared the boulder field and got back on course. The ascent to the pass was slow but relatively easy, which gave us a chance to relax and enjoy the beautiful surroundings. We left our packs at the pass and climbed the final 600 feet to the summit.

Thousands of meadow flowers covered the ground, as we approached the top of some of Colorado's most dramatic scenery. What a view! With the sun out behind the snow-capped mountain peaks, the view was even more spectacular from the top. Our pleasure was short­ lived, however, as we faced the task of descending the other side of the mountain.

After we grabbed our packs, we discovered the route down wasn't nearly as easy as the one up. Our muscles became noticeably when we faced a

boulder field five times larger than the one we avoided on the ascent. Since we were rapidly running out of time and therefore time, we reluctantly plunged straight ahead.

In my present, I discover I'm still sweating. Even part of my t-shirt is soaked. My pessimism at com­pleting this climb begins to fade as I feel the ground leveling out. There are fewer boulders now. The people ahead of me are starting to rain before we reached the mountain in less than an hour.

Even though I'm exhausted, the adventure is still rushing through me. I need to keep hiking. Everyone wants to try a night hike so we continue our patrol.

Even though we have flash­lights, we can't see the trail just straining to find the rocks and holes. I stay as close as I can to Jatree, the person in front of me. I'm really scared. I don't like this at all.

That two minutes without find­ing the trail, we decided to stop and try a night hike. We woke to find that Rob and Carol had unwittingly found the setting night hike too steep on it. Our emotions were mixed; we were glad we weren't lost and had run out of the "missing trail" had given us a chance to stop.

During the entire climb we were constantly challenging ourselves and each other beyond our limits—to do what we thought impossible. The key was

by Jim B sent report.

Florida offers an Eas­tile Escape for Campers:
The bitter winter weather has a lot of people thinking about escaping to Florida for a warm vacation. But contrary to com­mon belief, Florida offers more to northerners than just sunny beaches. The lower end of the state is a winter paradise for ca­noers as well, according to the state's Department of Natural Re­sources. From Lake Oke­echobee south to Key West there are hundreds of miles of inter­esting canoe trails. Some of the streams are well-marked, main­land canoe trails. [The natural waterways which offer a true wilderness experience.]

Some of the most scenic cla­soaking in the state is offered at the Everglades National Park, where a myriad of wildlife greets the paddler at every bend. The Keys are also regard­ed as a boater's paradise as it offers some of the best fishing in the state. For more information on Florida's rivers, write to the Department of Natural Resources, Building 202, Blount St., Tallahas­see, Fla. 32304.

Pests Poll Chemicals:
Officials report that more than 100 species of insects and mites and at least five major weed species in the U.S. have devel­oped resistance to major pesti­cides, rendering them ineffec­tive as chemical control agents. India's Wolf Boy Dies of Unexplained Causes:
New Delhi, India—The United News of India recently an­nounced the death of Ramu, the Wolf Boy, who passed away a few weeks ago in a home for the destitute near Lucknow in Uttar Pradesh state. Accord­ing to the news agency, Ramu had been raised by wolves, walked on all fours and ate raw meat. The exact cause of death was unknown, but he developed cramps two weeks ago and did not respond to medical treat­ment. According to officials, say Ramu was found at about 10 years of age and died in his 20s. As the story goes, Ramu was captured in 1976 when he was found in a forest under the com­pany of three wolf cubs.
Earthbound

Banquet Benefits Bald Eagle

Apple River, Ill.—Jack Swedberg from Massachusetts and Richard and Susan Knight from Wisconsin received awards from The Eagle Foundation during the Bald Eagle Benefit Banquet, February 16 in Lake Buena Vista, Florida. The Bald Eagle Bene-
fit Banquet culminated two days of paper presentations and panel discussion by bald eagle researchers from Nova Scotia to Arizona and Manitoba to Florida during Bald Eagle Days 1985. This year's event was co-sponsored by The Eagle Foundation, Save Our American Ravens, the Florida Audubon Society and the Florida Game and Fresh Water Fish Commission.

Jack Swedberg from Westboro, Massachusetts, was named the “Bald Eagle Person of the Year” for 1985. This prestigious award is presented, by The Eagle Foundation each year to an individual who has demonstrated his or her concern for the welfare and future of bald eagle by many years of effort above and beyond what is expected of any other researcher. The recipient each year is chosen by past recipients of the award. Swedberg has worked tirelessly toward bringing the bald eagle back into the state of Massachusetts as a breeding and win-
terizing species, through both habitat and legislation. He has also been very effective in his efforts to change the image of the eagle’s plight in the Northeast through his 35mm and 300mm photography.

Richard and Susan Knight were named the Bald Eagle Research Award for their proposed study of bald eagle range, productivity and diet in the Northeast. They are seeking funding to support their study.

The meeting serves two purposes; one, for re-
searchers to learn the latest in information and techniques used for bald eagle research and recovery; two, for members of the public to receive an update on the eagle’s plight and how they may get involved in the effort to keep the eagle flying free.

U.S. Nonfuel Output Steadily Increases

U.S. nonfuel mineral output grew 7 percent in value last year to $22.7 billion, but the metal sector of the industry was still weak as major producers operating well below capacity, according to preliminary figures from the Interior Department’s Bureau of Mines.

Nonmetals posted a 9 percent increase in value to $16.7 billion. The value of metals production, however, was up only 1 percent to $6 billion. In volume terms, 37 of 46 nonmetals showed increased production over 1983, and 18 of 21 metals showed gains.

Bureau of Mines Director Rob-

ert C. Horton noted that “The 9 percent increase in the value of nonmetals nearly matched the 1984 growth of the Gross National Product (GNP), which was 9 percent.” He added that “The relatively poor performance of the metals industry is probably caused by two things: First, metals are traded internationally, unlike most nonmetals, and the high value of the dollar in 1984 made imports especially competitive with U.S. output. Second, our economy is undergoing a restructuring, with the normal demand for metals dropping to permanently lower levels.”

Noteworthy developments in 1984 included a 20 percent increase in the production of aluminum to 4.03 million metric tons. This represented a 1 percent value rise. Production lev-
els still remained low compared to the 1979’s, however, and the industry ended the year with only 75 percent of its capacity in production. Several companies announced their withdrawal from the aluminum business in 1984.

Raw steel production was esti-
mated at 93 million short tons, worth $46 billion as finished steel mill products, an increase of 10 percent in volume and 13 percent in value over last year. Production remained at a relatively low level nevertheless, 23 percent less than in 1981 and 38 percent below the record out-
put of 1983. In 1983, the different steel con-
sumption increased by almost 20 percent as compared to 1984, and the greater output was captured by record high imports.

Iron ore production rose by an estimated 35 percent to 51 mil-

lion long tons, worth $2.2 billion, a 14 percent increase in value. The output represented only 60 percent of capacity, however, and most of the principal mines were inactive for part of the year.

Copper mine production was about 1 million metric tons, very close to the depressed level of 1983. Output value dropped almost 13 percent to $2.1 billion, however, as copper prices fell to a 24-year low in 1984, and by 40 years. At yeared, the min-
ing sector was operating at about 50 percent of capacity.

Gold production rose 18 per-
cent to 2.3 million troy ounces, a 34-year high. The output of gold, however, was 35 percent lower than the 1983 figure of 3.5 million ounces. Gold output value increased 14 percent to $1.2 billion. Exports of phos-
phate rock were down 1 percent, helping to offset a dis-
appointing domestic demand for fertilizer.

Potash output was estimated at 1.1 million short tons, or about 250 million, increased 12 percent in volume and 20 per-
cent in value. Domestic use dropped to 3 percent. Potash cost rose about 7 percent, but imports increased nearly 10 per-
cent.

The output of portland, mason-
ry, and other cement jumped to 76 million short tons, worth $3.6 billion — increases of 12 percent

Interior Surveys’ Mines

Eleven years of domestic sup-
ply-demand data and communi-
cation bridges in the Surveys’ Mines are being published annually for the Interior Department’s Bureau of Mines.

The data, published in the bu-
reau’s “Annual Minerals Survey” series, are aanged to provide a conveniant, "at-a-glance" overview of the major metals industries. This first edi-
tion, released annually in 1973 through 1983; subsequent edi-
tions will be published annually.

Cont. p. 25

Prepared in response to a need for such data on an annual basis, the report covers chromium, columbium, carbon, also, iron, manganese, nickel, titanium, silicon, stannum, tungsten and vanadium. The data are grouped together five headings: World mine produc-
tion, mine production, imports and domestic, U.S. demand by country, U.S. demand by country.

The report shows, for example, how much tungsten the U.S. imported in 1984 (183,137 metric tons), what industry stocks were in December (313,317) of that same year (3,885 and 3,731 metric tons, respectively), how the "demand pattern" was (2,648 metric tons of tungsten went to mining equipment, 615 metric tons for lamps and lighting, etc.), and other salient information. A copy of the re-
port also tells which countries imported lead from the United States.

 charge in the Fox River Valley; to the effects on groundwater from Everglades' expanded new mine near Brandon, Wisconsin.

Thursday night's dinner was followed by an informal reception at the Historical Society's slide presentation of "That's River Lost," a colorful look at the history and character of the Upper Mississippi River. Following Friday morning's technical session was a tour of the U.S. Fish and Wildlife Service's excellent Fisheries Research Lab in La Crosse.

For the students involved, the meeting presented many with their first opportunity to attend a professional meeting. Also, the meeting gave students a chance to associate with people employed in the water resources field, as well as providing a unique educational opportunity.

should definitely become a part of any avid outdoor photographer's book collection.

"Soil: We Can't Grow without Soil" is Protection of our soil this year's National Wildlife Week theme. The theme came at the right time as our nation's soil erosion is reaching epidemic proportions due to unseen conservation practices. Approximately 30 million students, teachers and conservationists are expected to take part in soil conservation activities emphasizing the theme of the National Wildlife Federation's annual. The theme was March 17-23 week.

\section*{Pollution Control Increasing in Third World}

According to the World Environmental Center, pollution control agencies in the Third World have increased 1,000 percent in the past 12 years! Today, 110 developing countries have environmental departments or agencies on the scene, whereas in 1972 there were only 11.

\section*{The Greatest Storyteller ever Told}

by Christopher Dorsey

Environmental Editor

Have you ever heard that old saying, "It's raining if you don't like it!" Well, I think that a few outdoorsmen I've talked with must have heard—they've seldom short on stories. Every hunter or fisherman knows at least one person short on stories. Every Department of Natural Resources: (AWRA) held their annual meeting in La Crosse at the Radisson Hotel. The theme of this year's gathering was "Wisconsin Water Resources: Atmospheric, Surface and Groundwater."

The meeting this year was first-class, from the setting (the plush Radisson lies on the banks of the Mississippi River) to the highly professional manner in which the event was organized and research papers were presented. Present in La Crosse were university faculty and students from all over the state; water resource professionals from the Department of Natural Resources:

\section*{Sporting on Irony}

by Christopher Dorsey

Environmental Editor

The term "sportman," or its modern equivalent, "sportsperson," is normally perceived as a hunter or fisherman—sometimes both. Although there are many sportsmen that combine the pursuits of hunting and fishing, there are also those who are strictly purists—they either hunt or fish, but they don't both.

If you talk to a fisherman about his reasons for not hunting, he will likely comment with some very decisive reasons. Similarly, hunters often have strong opinions why they don't fish. After a few years of listening to these reasons, I've come to realize that there really isn't much of a difference between the justifications given by both the hunting and fishing fraternity.

Fishermen commonly complain of the violence that goes along with hunting; animals are shot, bleed, then die a painful death. Also, anglers claim there is no sporting in hunting; powerful guns, high-powered scopes and other devices make a mockery of a "sporting" challenge. Of course, never mind the facts that hunters are hooked, snared, and left to slowly suffocate. Who cares if anglers use depth finders, glinters, radar, lures and canoe cruisers.

Likewise, a certain percentage of hunters feel fishing is a lazy man's sport; there isn't any real action, just sitting in a boat and fishing. Other hunters claim fishing is merely a matter of luck; a worm's a worm, and a fish is a fish. What about the steelhead fisherman who wades through deep and fast current with only chest-waders to keep him dry, and balanced on the whining, slylyobblestone? Everyone knows hunting has nothing to do with luck. Just ask my brother Jim. He shot a 10-point buck within the first 10 minutes of the first day of the hunting season. It couldn't have been luck either that Jim aimed for the vital organs of the chest, but instead hit the two-inch-wide spine just below the ear.

Whether the fishing fanatic or the exclusive hunter is right isn't the point. Sure there are differences—just as basketball and baseball are different. There's no sporting in hunting and fishing different sports. For purists, the decision about what sport to do is a "one sheep or the other" can't have both. I think the question should be more like: 'why try both?'

What would sportsmen do without each other's company? We've been sharing the same loaf of bread for a long time. Everyone needs the other, and the same holds true with the various species of being. How you do it doesn't matter. It's the taking part that counts.

Outward don't can't, to believe in ourself and each other.

Whether or not we knew it, we each had something to learn from the climb. I needed to learn how to follow and others needed a chance to lead, some a chance to talk and others an opportunity to listen. Then there are other stories to tell. How we made "pizza" over a cookstove with cornmeal and tomato sauce; how the cold of jumping into a freezing swimming hole; how we faced with uncertainty, I pictured myself a day after a bike ride I made it down learning to trust myself and those around me.

How we made "plaa" at every first summer vacation?

Netters have strong opening in Pointer Invite

by Ron Ankley  
Staff reporter

A promising spring season for the UWSP men's tennis team got underway with a successful showing last weekend in the Pointer Invitation at Quadrant Gym.

The meet afforded coach Dave Nass to use his entire varsity squad and the 13-member team responded with victories over UW-Green Bay and Northwestern Illinois.

The Pointers split into two squads and finished 1-2 in the doubles portion Friday. They followed up with dual meet wins over Green Bay, 6-3, and NE Illinois, 7-2, on Saturday.

Nass was glad that his team was able to show its abundance of depth.

"We showed up ready to play," he said, "and with the way the meet was constructed, we were able to play everybody. The play throughout convinced me that the team was ready to open up the season."

The Pointer netters are looking forward to improving last year's 6-7 dual meet record and earning a conference finish in the Wisconsin State University conference campaign. Nass believes that their depth, with all but two players returning, will be a key factor.

"We do have a nice luxury this season and that is our squad is deep," he said. "We have shored up some spots from last season and I think we are strong enough to make a run at the big three" (referring to defending champion Stout, along with Evansville and Whitewater).

Those players that will form the backbone of the squad are letter-winner Bill Diehl, a sophomore who finished runner-up at No. 2 singles in the WSCU, junior Mitch Melotte, and seniors Jim Seeman, Tom Doyle, Scott Kusmann, Hahn Pham. Nass has also inserted freshman Bryan Zwon into the starting lineup.

Nass singled out Seeman and Zwon, who were undefeated in their respective singles and doubles play. Seeman won all six and Zwon five.

In addition, Doyle and Pham were praised for winning all three of their doubles matches to capture the No. 1 doubles crown.

"Tom and Hahn blended very well as a doubles team," said Nass. "They won their matches tactically rather than relying on big shots. That is precisely what you look for in a doubles team."

Nass said he has already set upon a starting rotation for singles. As of Wednesday's match at UW-Milwaukee, Melotte will play at No. 1, followed by Diehl at No. 2, Seeman, No. 3, Pham, 4, Doyle, 5, Zwon, 6, and Kusmann, 7.

The squad's balance has made it hard for Nass to figure the proper doubles teams. "Our doubles are difficult to construct this early in the season," he said. "It will take some time before we get a feel for who are the better doubles combinations."

Nass cited the fact that the entire team was able to participate in the meet.

Nass has been through some tough times but is really confident in his abilities and is looking to top the 1989 mark outward.

Nass, the defending NCAA Division III outdoor champion in the high jump, beat out her nearest competitor by three inches to win her second national title.

"Michelle came up with the best jump of her college career to win the championship," said UWSP's women's coach Nancy Schoen. "She jumped with a lot of confidence, and showed that she definitely has the ability to jump 6'6" and more. We've been working on her approach, which caused some problems this year, but Michelle is much stronger mentally now and really believes in herself."

Walden and Riedi are UWSP's second and third national champions in the last two weeks. Jeff Stapanoski won the 50 yard free-style in the NCAA National Swimming and Diving Championships just two weeks ago.

The Pointers return to action this Wednesday when the men's team travels to Oshkosh for a quadangular meet.

The strong UWSP tennis team was able to gain two victories from good strong playing.

Riedi, Walden national champs

by Kent Welstrom  
Staff reporter

Mike Walden and Michelle Riedi each captured national championships while pacing the men's and women's track and field teams of UWSP to a 12th place finish in the NCAA Division III National Indoor Track and Field Championships held last Saturday.

Walden claimed top honors in the pole vault with a winning height of 15'4", while Riedi, a junior from De Pere, capped the high jump with a top effort of 5'10".

St. Thomas won the men's meet with a 38 point total, followed by Lincoln with 34. UW-Milwaukee placed fifth with 23 points. UWSP notched 10 points for 12th, and UW-Oshkosh tallied three to finish 36th.

Massachusetts-Boston finished atop the women's field with 59 points to outdistance Cortland State, second with 41. UWSP, in registering 10 points for a 12th place finish, was the only Wisconsin school to score in the women's portion of the meet.

"Mike had one miss at his opening height of 14'6", coach Rick Witt commented. "He had a hard time with his steps, due to the fact that his approach is longer than the space available in the annex. But once he got his steps down, he didn't miss until 15'5"."'

Walden earlier tied with Ken Debo's of Mount Union at 15'4" but had fewer misses to win the event. "To be able to come up with this kind of big performance when you have to is the mark of a real champion," Witt continued. "Mike has been through some tough times but is really confident in his abilities and is looking to top the 1989 mark outward."

Riedi, the defending NCAA Division III outdoor champion in the high jump, beat out her nearest competitor by three inches to win her second national title.

"Michelle came up with the best jump of her college career to win the championship," said UWSP's women's coach Nancy Schoen. "She jumped with a lot of confidence, and showed that she definitely has the ability to jump 6'6" and more. We've been working on her approach, which caused some problems this year, but Michelle is much stronger mentally now and really believes in herself."

Walden and Riedi are UWSP's second and third national champions in the last two weeks. Jeff Stapanoski won the 50 yard free-style in the NCAA National Swimming and Diving Championships just two weeks ago.

intramural corner

Women's track

OSHKOSh—The UW-Stevens Point women's track and field team came up with some of its best performances of the young season here Thursday and the result was a second place finish in the "Coward is Away" Invitational Meet.

Host UW-Oshkosh won the four-team meet with 76 points while UWSP was the runner-up and Ripon with nine. Kris Hoel, 1000 yard run, 2:58.1; Ricklefs, high jump, 4'8"; Tammy Stowers, shot put, 32'5"; Kris Hoel, 1000 yard run, 2:58.1; and the one mile relay team of Barb Kreuse, Wallander, Jenny Garski and Nancy Peasley, 4:17.3.

UWSP coach Rick Witt felt the Lady Pointers came up with their top performance of the season and singled out a number of individuals.

"Jane Brillowski and Cathy Ausloos showed that they are versatile and are tough", said Witt. "They excelled in events that they normally don't compete in."

"Kathy Seidl was an individual first place winner for "Point with her performance in the shot put. She had a top effort of 255.85."

"Point's only other first place turned in by the distance medley relay foursome of Kathy Seidl, Elyse Michaleas, Annette Zuidema and Sheila Ricklefs with a time of 12:15.5."

Adding second place points for the Lady Pointers was Betty Miller in the 60 yard hurdles with a time of :33 and Mary Kocher in the two mile run with a clocking of 12:17.4.

Contributing thirds were Seidl, 600 yard run, 1:36.4; Kay Waldander, 440 yard run, 1:04.3; Ricklefs, high jump, 4'8"; Tammy Stowers, shot put, 32'5"; Kris Hoel, 1000 yard run, 2:58.1; and the one mile relay team of Barb Kreuse, Wallander, Jenny Garski and Nancy Peasley, 4:17.3.

UWSP coach Rick Witt felt the Lady Pointers came up with their top performance of the season and singled out a number of individuals. "Jane Brillowski and Kathy Ausloos showed that they are two very talented individuals and they excelled in events that they normally don’t compete in."

"They are very versatile and are tough competitors."

"Kathy Seidl came up with a real fine effort in the shot put and Kathy Seidl looked very good in the 600 yard run. As a whole, the team came up with many new top personal performances which shows the continuing improvement we are looking for. This team did a good job."

Are our endangered species becoming extinct?

by Rick Kaufman
Special to the Pointer

A state legislative program was created in 1983 to help support programs and efforts to reduce Wisconsin’s plant and wildlife endangered and threatened list. Today, the program—Wisconsin Endangered Resources Fund—may find it equally endangered with no funds to carry out its purpose.

The program is failing due to not only state and federal budget cuts, but also Wisconsin taxpayers’ refusal to take in a voluntary checkoff from their state income tax returns.

The checkoff—nicknamed “chickadee checkoff”—was designed for taxpayers to lend their financial support by giving a portion of their income tax return to the fund. Those funds would be allocated for the Department of Natural Resources’ proposed programs in managing, protecting and creating a reversal of the growing endangered, threatened and non-game species list.

Appeals for Wisconsinites to take part in the “chickadee checkoff” have fallen on deaf ears, evidenced by the fact that only 1.6 percent—or 7,000 state residents—gave to the Endangered Fund last year.

A statewide appeal has gone out again this year for taxpayers to take heart in the future of Wisconsin’s wildlife and non-species game, plus the protection of natural and scientific areas.

Over 100 posters and billboards throughout the state advertise the fund. In addition, individual taxpayers will receive a free winter bird poster in exchange for a donation.

In the past (until July, 1984) the endangered species programs received about half of its $500,000 annual budget from hunting and fishing license fees and the other half from general funds, thus the creation of the Endangered Resources Fund. It has been modeled after several other states’ programs that have experienced quite a bit of success.

The following is a partial list of DNR projects that were in the works last year, their proposed budgets and a brief summary of what was done. Several of the programs will be included in this year’s plan also. They include:

- Bald Eagle Protection—The DNR budgeted $150,000 for aerial surveys, nest protection, counting of eggs and nestlings, tending of sick and young, and the rescue of sick and injured birds.
- Barn Owl Propagation and Management—Although this species is particularly found in Southern Wisconsin, no nest sites have been recorded since 1977. The proposed $10,000 budget went toward the construction and placement of 25 nest boxes and the release of five barn owl young raised in a cooperative breeding program with the Milwaukee Zoo.
- Common Terns—Work included managing of vegetation for nesting, induced nesting procedures and monitoring practices. All plans fell under a $7,000 budget.
- Timber Wolves—A reduced budget of $10,000 saw field personnel doing population surveys, monitoring of wolf movement and the outfitting of six wolves with radio collars.

This year, depending on how much Wisconsin citizens pledge toward the Endangered Resources Fund, the DNR has proposed these programs (oral of which were instituted from input by state citizens who spoke out at DNR’s general meetings last year):
- Pine Marten—Working from a proposed $14,000 budget, activities will include the reintroduction of 50 martens in Northwest Wisconsin. An evaluation of survival, distribution and reproduction will follow.
- Non-Game Fish Survey—A survey of the population and distribution in the Chippewa and Wisconsin River basins is planned. This program’s budget is the highest when compared to the other proposed studies, this year’s $27,000.
- Peregrine Falcon—The proposed $20,000 budget calls for the re-establishment of nesting populations along the Mississippi.
- Red-Necked Grebe—Developing management techniques and troubleshooting of population count are planned from the $5,000 budget.

Several of the DNR’s proposed programs don’t fall into your specific area. But those of us who consider ourselves sportsmen are the hope for the future of the state’s endangered and threatened species.

Wisconsin has lost over 35 plant and animal species in the past century; species that play an important role in our ecosystem. So, although several of the endangered programs aren’t slated for your area, we will benefit from any work that is done.

On behalf of other concerned sportsmen, I am urging state taxpayers to plan for the future of Wisconsin’s endangered species by simply checking the Endangered Resources Fund box on your income tax forms. If we can save one species from becoming extinct in our state, then we have done a great service to the future of our wild.
Scarlet's

the area's newest, most exciting junior and contemporary miss fashion shop.

INTRODUCTORY OFFER

Brought to you 20-exposure rolls of color Eastman Kodak colored motion picture (MP) film now adapted for still use in 35mm cameras by Seattle FilmWorks. Its micro-fine grain and rich color saturation meet the exacting standards of the movie industry. Shoot in low or bright light from 200 ASA up to 1200 ASA. Get prints or slides, or both, from the same roll. Enjoy the very latest in photographic technology with substantial savings.

---

Domino's Pizza Delivers™

Not so long ago, in a galaxy not so far away, America's number one pizza delivery company made students an offer:

If your group orders more pizzas than competing groups, you'll win a free pizza party!

It's so easy to play. Call your nearest Domino's Pizza store for details.

---

Dorm Wars™

The Contest:

Domino's Pizza will award free 30 large pizzas and $50.00 cash for liquid refreshments to the group purchasing the most pizzas starting 2/28/85 and running through 3/29/85.

The Rules:

1. Carry-out orders and all deliveries made from your area's Domino's Pizza store will be counted if we are given your group's name and address.

2. Any pizza over $10.00 will be counted twice.

3. The winning group's name will be published in the local newspaper.

4. The location and time of the party will be convenient to both the winners and Domino's Pizza.

5. The 30 pizzas will be 2 item pizzas. The winner will have the choice of items. The pizzas do not have to be the same.

To the editor:
The main theme of the last issue of the Pointer focused on global unity. The articles which dealt with international issues were very enlightening, and informative. However, as a member of Resource Management Organization Internationale, I was disappointed that you failed to include a major world wide issue — our environment. Not only must we join together to solve global social and political problems, but we must also unite to solve the environmental issues of the universe. I realize that our organization is fairly new, and that we are not as well established as some of the other international organizations. Therefore, I understand why our club was not included in the last issue. I would like to take this opportunity to make the students and faculty aware of the fact that our organization was formed with a certain goal in mind. That goal is to promote proper long term management in the utilization of the earth’s natural resources. We hope in the future to serve the needs of all those who are interested in taking steps toward solving the problems of the environment on a world wide basis. Jean Umsch Publicity and public relations Resource Management Internationale

Mines, cont.

have had the greatest and least production capacity (seven years ago, for example, China led 11,500 metric tons; Hong Kong and New Zealand trailed, with only 2 each). Similar 11-year reports on non-ferrous metals and non-metallic minerals will be released by the bureau soon. Questions about the data in the report can be directed to the commodity specialists whose names and phone numbers are listed in it.

The 1973-83 supply-demand statistics for ferrous metals are given in the Mineral Industry Survey, "Ferrous Metals Supply-Demand Data." Single copies can be obtained without charge from the Publications Distribution Section, Bureau of Mines, 4800 Forbes Avenue, Pittsburgh, Pa. 15233, telephone (412)621-4600, ext. 342. Requests should specify the title of the publication.
