Student cleared of cheating charges

by Carol Diser
Staff reporter

Last Wednesday, a student accused of cheating appealed the accusation before an academic misconduct hearing tribu-

nal, and was cleared of the charge.

Jerome Glentz, a Computer Science major, was accused by Stuart Hansen of the Computer Science Department. Hansen be-
lieved that Glentz had obtained the teacher's solution to a problem in a previous class and had presented the work as his own in

the subsequent class.

Both Glentz and Hansen were given the opportunity to explain their side of the story when they appeared before the seven tribu-
nal members. Said Glentz, "I guess I'm the first person in a long time to appeal an instruc-
tor's decision and I'm glad I did. I didn't cheat and I didn't want to lose credit for the assignment or have it go on my permanent record that I cheated."

According to Bob Baruch of Student Conduct, Glentz is the only person to have appealed a charge of academic dishonesty in the past four and a half years. "Most instructors do not follow the proper procedure when confronted with academic dishonesty, and most students do not realize that they can appeal the instructor's decision," explained Baruch.

According to UWSP 17.13 Procedures for Academic Miscondu, when an instructor for a course believes that a student enrolled in that course has com-
mitted academic dishonesty, the instructor shall promptly schedul-
e an initial conference with the student in order to review the evidence against the student and to review the evidence and argu-
ment presented by the student in his or her defense. The instructor must inform the student in writ-
ing of the alleged offense and of the scheduled initial conference.

If, after the initial conference, the instructor believes the stu-
dent has committed academic dishonesty, he shall inform the student in writing. The instruc-
tor may give the student a written reprimand and/or remove the student from the course without a grade or impose an academic response upon the stu-
dent.

The instructor's decision may be appealed to the academic misconduct hearing tribunal ei-
ther as to the issue of whether the student did engage in con-
cers alleged or as to the di-

Results of the appeal were obvious.

"I'm the Computer record that I cheated."

Hansen be-
lieved that Glentz had obtained the teacher's solution to a problem in a previous class and had presented the work as his own.

Dorms without fire alarms?

by Joanne Davis
News Editor

A fire broke out at Hyer Hall in a Resident Assistant's room on the afternoon of October 27. Damage estimated at $9,000 apparently resulted from a can-
die. A gray light panel, a small alarm, was turned on in the room. No one was injured.

Both Protective Services and the UWSP Fire Depart-
ment responded to the fire. The charm areas were unfortu-
nately blown out before the State Fire Marshall had inspect-
ed the scene.

This is the first in a series of interviews with an inside source from UWSP Protective Services, revealing existing safety ha-
rts for students being seem-

ingly ignored.

POINTER: "At UWSP, who responds to situations where fur-
ther investigation may be neces-
sary?

INFORMANT: "UWSP's Risk Management Department - Jerry Barber, manager - re-
deps to speak due to concerned insurance liability claims and so on. We also have a Safety Offi-
cer, Alan Knecht, who does investigations for Risk Manage-
ment."

P: "What were the problems and hazards encountered during the fire episode at Hyer Hall?"

I: "Well, individual rooms have fire detectors. That student appears to have un-
plugged his from the wall, and obviously it never went off."

P: "What other problems were encountered?"

I: "In the hallway is a major fire alarm which is connected to an electric light panel in the basement. Each room smoke detector in each hallway is con-

ected electrically to that panel. If one of the alarms is activated, a light goes on in the basement and in the room."

P: "That seems safe enough. What if a student in the hall gets lazy?"

I: "When they first installed this system, they made a certain light panel, a certain light in the alarm panel would go off, indicating the area of the hall in trouble. It would also set off the alarm sound sys-
tem so that people would know to evacuate the building."

P: "You said initially. Has that changed?"

I: "There have been massive problems with the system. Hu-

P: "How was the Fire Department convinced to go along with this?"

I: "The Fire Department sup-
posedly got along with this as long as the University showed they were trying to cor-
cert the problem and that the Fire Department could see some sort of action on the University's part to correct the problem."

P: "Why do you say, sus-
posedly?"

I: "The Protective Service offi-
cers never saw anything in writing on this."

P: "In other words, there are no smoke detectors on cam-
pus which automatically set off the sound alarm in any of the residence halls?"

I: "In six of the halls on the Debit side, they have hooked the smoke detectors onto a computer-
line. If a smoke detector goes off in a hall, it sets the light off on the electric light panel."

Dorm fire raises questions of fire safety

On October 27 at 1:10 p.m., third floor residents of Hyer Hall noticed smoke seeping from room 318. The estimates placed the damage at roughly $3,000. The Stevens Point Journal initially reported that a candle left burning was the cause of the blaze. It was later learned, however, that faulty wire from a stereo was the likely cause of the fire, not the candles.

The resident of the room was out of town when the fire happened, and injuries occurred. Another problem, however, surfaced when residents who first noticed the fire pulled third floor fire alarms to warn other residents. Nothing happened. Residents pulled alarms on second floor as well — still no alarm sounded. They finally found an alarm on first floor that was connected to the system. There hasn’t been a time frame established yet, he responded.

I talked with the Director of Hyer Hall, Sandy Setterland, to get the details about the fire. Setterland indicated she was told to rest assured that the problem with the alarms in Hyer would be remedied and that everything would be taken care of. As an indication of the kind of support she received, it took a week before the fire extinguisher used in the fire was finally refilled. “I made several phone calls to get the extinguisher recharged, but I just ended up getting the run around,” said Setterland.

Who’s responsible for maintenance and testing of the extinguishers? According to Don Burling, “We (Protective Services) aren’t responsible for them, but if one of our officers notices that an extinguisher needs recharging, he or she will put in a work order on it — your guess is as good as mine when the extinguisher is actually refilled.” With this word, I went to Maintenance Supervisor Tom Krause for some answers. “We inspect all fire extinguishers once a year, and the turnaround time once a work order is placed on a fire extinguisher is pretty quick,” said Krause. Apparently, if a week is considered quick, and when you think of the number of times extinguishers are used, whether for a fire or not, once a year hardly seems adequate. “The Stevens Point Fire Department periodically inspects the campus fire systems,” said Burling. The question remains, however — is “periodically” enough?

Perhaps the greatest paradox is that no one campus department is actually held accountable for continuous inspection and maintenance of fire extinguishers and fire alarm systems on campus. The fact that it’s necessary to place a work order that may take a week or two to complete when recharging a safety device like a fire extinguisher is example enough of a system needing to be changed. I can only imagine the millions of dollars in law suits that would have been brought against the University had…

"If you have faith, you need no weapons. If you have weapons, you don't need faith." 

by Bob Wrezinski
Staff reporter

Daniel Park Teter, a former candidate for the U.S. Senate, was on campus November 6 and delivered a discourse on the "Revolution Against War" in which he gave his views on the solution for total unilateral disarmament.

Teter was hosted by the Philosophy Club and Students Nuclear Information Forum (SNIF), formerly No Nukes is Good Nukes. He was invited to speak here after being picked hitchhiking last summer by Ray Anderson of CNN.

Teter's philosophy is based part on the near future concept of a "collective unconsciousness" and Freud's idea of overdetermination (many causes for an event that can mean different things to different people). Teter adds his views to these theories and came up with what he calls a "Universal Collective Unconscious." He believes that the physical universe is something we unconsciously created. When asked how this is possible, he said, "every man is his own God; what we take as fact we created, therefore we can change it. The universe isn't objective, it's projective; we project objects into the world."

So, he feels, the nuclear arms race would end if everyone would unconsciously project the desire for it to end.

To enter into that fact: "we must change ourselves as much as a nuclear war would, only it would be a creative change instead of a destructive change." Without this radical change in thinking Teter is convinced we will have a nuclear war.

The down-home and informal Teter, who likes to relate in a personal way, says, "we all the same people."

The process of determining how to decide what kinds of work you want you have three steps: a survey of all occupations, the identification of four or five interests or occupations; and researching interesting occupations to find if you will be happy and productive doing the work involved. Come up with possibilities that seem to fit your interests, values and goals. Stretch this list to 10 or 15 by using your imagination, curiosity and daydreams.

The futures rising for Dow Jones

by Sue Higgins
Staff reporter

It takes a lot of time, effort and talent to make a band succeed, but the five UWSP students who have combined to form Dow Jones and the Indus-trials have what it takes.

The three founding members of Dow Jones—Greg Marsicek, Chris Martinsek, and Kirk Strong—began playing together last February. Marsicek plays keyboards and Strong and Martinsek play lead guitar and drums.

They were joined by Dave Mirus and Mike Riba in March. Mirus plays the bass guitar for the group, with Riba on the drums.

Their first public performance was at a UAS sponsored Open Mike in the Encore Room of the University Center, on March 21. Although they were not paid for their first few performances, the group continued to play and fine tune their act. It was not long before Dow Jones was participating regularly and being paid for it.

The group has averaged one performance a week since the beginning of the semester—Strong said. They also have performed regularly at the Campus Activities

tees T.G.I.F.'s in the Encore every Friday.

In the short time they have been together, they have developed a good following, consistently bringing in a nice crowd at the T.G.I.F.'s and other dances they play. They played to approximately 350 people at a dance in the Encore on October 18.

They are hoping to work more second semester, however working more is difficult because they are all students, Strong said. Conflicting schedules and different work loads keep them on a tight rehearsal schedule and from accepting more jobs.

Leake plans to promote men's Home Ec opportunities

A future teacher attending the University of Wisconsin-Stevens Point has been chosen as presi-dent-elect of the Wisconsin Home Economics Association—Student Member Section.

Cathy Leake of Menasha, won an election at a recent state meeting by acclamation to assume leadership of the organi- zation this fall. Her term will be one year.

Cathy says she intends to "promote leadership in future Home Economists professionalism."

"I will be involved in projects to promote the public that home economics no longer is a field that concentrates on sew- ing and baking. We're getting away from technical skills," she reports, and moving into re- quire scholarly preparation. The discipline is centered on family and personal life which "has changed dramati-

ically—we've had to change, too."

Cathy Leake

There is opportunity for men in home economics and she plans to promote their greater involvement in this field.

"Views from the Bench"

A scholarship fund has been estab-
lished at the University of Wisconsin-Stevens Point in memory of a father and son who attended the insti-tution.

The fund will support a $756 annual award in the College of Fine Arts to be known as the Edmund Biskolt Scholarship. It has been established by Mrs. Kathryn Biskolt, wife and moth-er of the two men being memori- lized.

Edmund Biskolt Sr., who headed Ladyslave Canoe Co. at the time of his death in 1960, was an accomplished musician. His son was a student on campus at the time of his accidental death a year earlier.

The scholarship will rotate annually between art, music, and dance students.

Sylvia Myers of 500 S. Cedar Ave., Marshfield, a senior art major, has received the first annual award.

This year, both junior and sen-ior art majors who had not re-ceived other scholarship, who had maintained a 3.0 or better grade-point average and who had demonstrated outstanding abili-ty in art and design were nomi-nated. Each student submitted a portfolio of recently completed work. Mrs. Myers, who will gradu-ate this year with a B.F.A. de-gree, holds a 3.2 grade-point average. She studied for two years at Winona State College in Minnesota and also took courses at UW-Word College in Marsh-field. She has been at UWSP for three semesters.

An artist who works in pen, ink and pastel, Mrs. Myers would like to pursue a career in graphic design.

"The band feels that Madison and Milwaukee would be better markets, but once again, school prevents them from going."

"If we wanted to, I think we have enough potential that we could go out and get jobs, and all live together and work for this band," Strong said, then added "but everyone really wants to finish school."

Despite the amount of time they must put into the band and despite juggling rehearsals around school and homework, they all feel it is worth it. They all love to play music and per-form in it so it time well spent to them.

HELP A FRIEND BREAK A HABIT ON NOV. 21

If you have friends who smoke help them to quit during Great American Smokeout on November 21. Keep a friend from smoking for one day, and you may keep a friend for life.
Feminist view

To the Editor:

As I sit here on a Saturday night, I ask myself why. Why have I allowed myself to get as angry as I am over a simple article in the Pointer*? The answer is because it's on a subject close to heart. Richard L. Krop- now, you have hit a very touchy topic. After having read the article, I was introduced to you by chance or Friday at Ella's and a verbal assault may have taken place had the reason of wanting an unstrucured beginning for the weekend not been at the top of my priority list. The time has come, though, to address this issue.

I'm not going to try to prove that the women's movement is not dead. Marianne Ritzer did this in the first article of the feature. So what is the aim of all this? My goal is to bring to the attention of you and all others who hold your feelings on this issue that the goal of equal rights lies not only in the hands of women, but also in the hands of men. So women do the major- ity of housework. How many men have volunteered to do their 30 percent of it? How many men have asked for changes at work concerning equal pay and child care facilities and paterni- ty leave? How can you expect ERA to pass when the cost of lobbying legislators is higher than women can afford because they earn only a fraction of what men do for the same jobs and quality of work? I'm not saying that women should sit back and let men fight for changes. On the contrary. I'm asking that people wake up and see the light that this battle is not only to benefit women, but to benefit men also and that together it can be won. There are men and women on both sides of this.

Equal opportunities for all of us can only be attained if all of us work together. What have you done to help this fight?

Respectfully,
C.M.L.

Editor's note:

Your restraint on Friday was much appreciated. However, a well focused debate would have been exhilarating. Still, your letter is representative of the type of action my article was calling for. Unfortunately, in support of my article, your letter is the only one I have received. While a number of women, who hap- pened to run into me on Friday, took the time to share their remarks on my article, none of them bothered to write.

It is easy to sit around talking about the need for equality, the action or inaction of feminists, but talk accomplishes very lit­ tle can't be in this age of instant long-distance phone service.

Many women have made great strides toward destroying the archaic, sexist attitudes that have prevailed so long. But destruction necessitates creation. If it is not completed, as in planting a garden, weeds will over-run the soil that has been turned.

I applaud the efforts of women, like yourself, who are act­ ing on their beliefs. I am upset by the inaction that plagues the women's movement today—the present equivocation of misdirected on-again, off­ again feminists.

L. Lionel Kropnow Features Editor

U.A.B. praised

To the Editor:

On Halloween, the UAB spon­ sored the "Rocky Horror Pic­ ture Show" to benefit the United Way of Portage County. I was very pleased with the support and cooperation we received from the over 400 students attending the movie. It was the fun, high spirited evening we had hoped for, with none of the problems we feared.

Our public thanks go out to Karen Shively and Tom Kuesel, and the UAB volunteers who worked so hard to make the event a suc­ cess.

Let's look forward to next Hal­ loween and "doing the time warps again!"

Sincerely,
Mary Pat O'Keefe

McCarthyism?

To the Editor:

I assume agree with the letter about "Accuracy in Academia" that was printed Nov. 7. However the consensus ultra-right is just another form of censorship, and it reeks with "McCarthys­ ism.

The National Conference of Christians and Jews

We, as students, have the right to listen and to express opinions that may be controversial and sometimes unpopular. This is our right and we must not let it be stolen from us by a small group of narrow-minded individuals. These people are more biased than the individuals they are trying to silence.

Unfortunately, Ms. Richards' letter wasn't clear as to how we can stop this kind of nonsense from happening. If students are among us, they will be very hard to detect. I don't know too many classes where notes aren't taken.

Heward M. Hagan

Rally comments

To the Editor,

I would like to take this oppor­ tunity to comment on the "Free Speech Rally" which was held October 31st.

First, I would like to address the Pointer's coverage of the event. Sorry, but it wasn't very good. You did not explain the context of the message being presented by the College Republicans. You told why the rally was held, but not what political ideology the College Republicans held during the speech. Consider­ ing the controversy surrounding this subject, you should have given a little more detail about what was being said at the rally. If you, at the Pointer, are going to write a front page story, put more work into it!

Next, a word to the College Republicans. The rally wasn't such a good idea folks. Because an armed conflict isn't really something to be glorified, you probably alienated a lot of stu­ dents on this campus. Also, in­ stating that the Grenada incident was a rescue rather than an in­vasion is like insisting that the Korean War was a police action, not a war.

Finally, something for the de­ monstrators to ponder. Students paid about as much attention to you as they did to the Republic­ ans. You had flashy slogans like, "Make Jobs, Not War!" Smooth line, but I'm sorry to say that most of our economy depends on military defense con­ tracts. I don't see how we will get out of the Great De­ pression because of World War II and the U.S. economy went into a recession as soon as we got out of Vietnam. One of the easiest ways to create jobs is to start a war.

Over all, the rally was a flop. I hope in the future the intel­ ligence of the students on this campus is not insulted with the poorly designed propaganda presented by both sides of the issue.

Keith A. FitzPatrick

Suicide isn’t as painless as graffiti says

by Erin Woods
Staff Reporter

On Monday of this week in Collins Classroom Center I noted the passage written on one of the window sills. It read “Suicide is Painless.” This modern graffiti (of that’s what it was) shook me. And I started looking for answers.

My research took me to the UWSP Counseling Center by Crisis Center, SPASH, Ruth Gilley Building, Charles-White Library, and First Call For Help (Portage County Mental Health Department). I got specific material relating to young adult suicides.

According to one article I read in People Magazine (10/10/83) the hopelessness is what those contemplating suicide is like “a kind of tunnel vision.” Dr. Pamela Cantor, the author, says that victims “feel that they have no options.”

Is this why suicide is considered painless—to stop the pain of life? In reality, suicide most probably is not painless.

I talked with Dr. Dennis Eichhorn, Psychology Professor, Counseling Center. When asked for his opinion on the above statement that suicide is painless, he said, “I don’t think contemplating suicide is in considerable pain and is hoping suicide will bring relief. It is suicide painless! I don’t think there is any answer to no one comes to their aid, and they don’t see how they fail come out on the other side. We have to be clear with people that there are ways to cope.

Most problems are solved by talking them over. Suicide is a way of escape.

There are choices. Vital people can’t get through life well without support. And who among us has not felt depressed and overwhelmed at times in our lives? It can feel like an unbreakable ways of escape. A key to preventing suicide is a healthy support network. Fewer suicidal people feel hopeless. People are part of a caring system that when they are alone, a way out.

When people have relationships they can get so heavily wrapped up in the relationship that, when a loss happens, they feel very alone. During the relationship they cut themselves off from others. It can be dangerous if a person is without any re- relationship ends. It’s best to maintain a number of significant broad involvement.

We all experience failure but if we are involved with others, we see that we are still okay and that when others fail they are still okay, too. This is all part of life.

High-achieving people don’t conclude that they personally will fail if they try some thing and it doesn’t work. It is a learning experience. Thomas Edison persisted in his determination to create an electric storage battery for an incredibly long time, failing over and over. When asked how he managed to persist in the face of such failure he responded, “Failure, what failure? Now I know 10,000 different ways it won’t work!”

One point to remember through emotional stress is that isolation is not healthy. We need to be emotionally involved in relationships. Often we become a person unless after a relationship ends.

I have dealth with “luck” Call For Help. It is the highest public without charge. The purpose of the student counseling services is to give the assistance, guidance, and the help that is needed. It is possible to help a person recover from emotional, physical, or psychological problems through counseling, therapy, and social work.

The task is to get that person to talk and talk about the problem. It is the first step in getting help. It is important to talk about the problem.

The counselor is there to listen and give advice. The counselor will be honest and will not judge the person. The counselor will try to help the person to see the problem in a different light.

The counselor will try to give the person a new perspective on the problem. The counselor will try to help the person to see the problem in a different light.

The counselor will try to give the person a new perspective on the problem. The counselor will try to help the person to see the problem in a different light.

Belushi lives again on Warner Bros. video

News Release

A Samurai swordman with a penchant for very varied occupations. A cread "Weekend Update" cast member and former coffee shop owner ("Cheeburghah, No. Coke... Pepsi, Na-fries, Cheeburs, Lots' O' Coffee Shop Owners") and famedBlues Brothers, his life reads like a series of "I Made It"
au
tos. Even his love of cars, classic cars, and his penchant for fries... Cheeps.

"Cheeps.")

But he is also a slammin' hot coffee shop owner ("There are so many to choose from because they are just a few of the wildly varied, off-the-wall characterizations created by comedy genius John Belushi during his October 1975 to May 1979 reign as the clown prince of "Saturday Night Live." In addition to the incredibly comic characters, Belushi, along with his fellow "Saturday Night Live" cast members, created a style tailored to the television generation's media awareness—and changed forever the television comedy scene.

Along with his TV successes (which include an Emmy Award for writing during "Saturday Night Live") and second season Emmy nominations for his roles in films, three—"National Lampoon's Animal House" (1978), "Caddyshack" (1980) and "The Blues Brothers" (1980)—are among the most popular, and lasting, of the last decade. "Goin' South" (1986) and his upcoming film, "Old And Friends" (1979), "Continental Divide" (1981) and "Neighbors" (1981) complete the Belushi family legacy. All told, the collective box-office receipts for Belushi's seven feature films exceed $200 million worldwide.

In the music world, Belushi dosed names, narrow tie and rumpled suit and teamed with Dan Aykroyd and some first-class musicians to form the Blues Brothers Band. In addition to performing before sellout crowds everywhere, the Blues Brothers recorded four albums ("A Briefcase Full of Blues," "The Blues Brothers-Original Soundtrack" and "Best of the Blues Brothers") whose total sales exceeded 2.3 million units and which earned Grammy Award nominations in three categories, includ-

tion to performing before sellout crowds everywhere, the Blues Brothers recorded four albums ("A Briefcase Full of Blues," "The Blues Brothers-Original Soundtrack" and "Best of the Blues Brothers") whose total sales exceeded 2.3 million units and which earned Grammy Award nominations in three categories, including

Best New Artist, Rock Vocal Duo or Group and Comedy Recording.

Belushi was born on January 24, 1949. While at Central High School in Westfield, Illinois, he acted in school plays, played a rock 'n' roll star in a several and called the Rains, captained the end of his high school basketball team and dated his high school girlfriend, Judith Jacklin.

He attended several colleges and sharpened his immense talent by performing at coffee houses, comedy clubs and a small newscaster. At age 21, Belushi was chosen to become a member of Chicago's famed Second City improvisation troupe. The group went on to appear on "Saturday Night Live" in New York to appear off-broadway and later on tour in "National Lampoon's Lemmings" and "The National Lampoon Show." During this time he also became a director of the "National Lampoon Radio Hour." Then in 1975, he became an original cast member—and a major American entertainment figure—and successfully launched his nationally successful "Saturday Night Live." On March 5, 1982, Belushi died, leaving a legacy of laughter and music that still entertains millions today. And Belushi fans will be happy to know that what he once left behind will be sure to shine.

Purists may quibble about what we want so we can live. But I don't want to stop. I think they're a lot of clever things. Anything to make it sound as if I'm not really a heavy person. Lately, all of this hilarity seems to me like a form of masochism—I'd rather start asking for things directly. But what do I know? What if all of a sudden some people take me seriously before I can come to my idea about myself? I don't want to have to be straight and straight and straight and straight and straight and straight. The more I think about it, the more I think: I'm not really a heavy person.

Surprisingly, it is often easier to be sexy-the more is left behind, the more is left. The more is left behind, the more is left.

Surprisingly, it is often easier to be sexy-the more is left behind, the more is left. The more is left behind, the more is left.

Historical significance

Video notes Wisconsin's contribution to Civil War

University News Service

An old story with some new slants is being revisited in a 30-minute video production done at the University of Wisconsin-Stevens Point to salute this state's participation in the Civil War. The Wisconsin Department of Veterans Affairs funded the production which will be aired on the state public television network and made available for showing in schools and to organizations, particularly veterans groups.

"Battle Cry of Freedom: Wisconsin Men and Women in the Civil War" was directed and edited by Conrad J. Kelley of the UWSF Office of Telecommunications and written by free-lance Robert Precourt of Baraboo, who served as assistant director.

Kelley said the major intent of the production is to make the public aware of the Grand Army of the Republic Museum which the Department of Veterans Affairs has operated since the early 1900s in the state capital in Madison.

"Battle Cry of Freedom" emphasizes a strong commitment Wisconsin people made to the war effort. Precourt says that on the battlefields, soldiers from this state were held in high esteem by many of the military leaders.

"Wisconsin troops were equal to the finest fighting troops in the world," says, a retired army colonel, in the video. "Among those who went to the Union Army from this state were American Indians, blacks and women, all of whom have been given little recognition in history books for their roles in the war. An estimated 900 Indians were recruited into uniform in Wisconsin as were several hundred blacks.

Precourt was most surprised by what he learned about the role of women. Nationwide, about 400 of them had genuine military records, but Precourt said it is believed several thousand were in fact made-up as male imposters. He found a reference to Sarah Collins of Lake Mills who tried to pass herself off as a man but was "found out because she had an unmasculine way of putting on her shoes and stockings." Another reference was to Ida Peterson of Ellenburg who was at the time the only woman to ever join the Goodrich of Chippewa Falls who insisted in saying her fiancé into battle. Miss Goodridge attended him when he was wounded and married him when he was on his deathbed.

Coretha Harvel, wife of a Wisconsin governor, was credited with getting Wisconsin's Battle of Gettysburg built in the north for wounded veterans. "She said he became active in the Union cause after her husband died while visiting Wisconsin troops in Tennessee.

Precourt believes many counties, particularly in rural areas, did not have personnel to give medical exams to recruits; hence, the reason some women were able to get into regular headquarters. All told, Wisconsin sent between 22,000 and 100,000 soldiers to the Union Army (old records conflict). Precourt called it a major sacrifice for a state with a population of about 500,000. In the videotape, UWSF History professor David Wroe observed that the role of Indians and blacks was especially significant because it represented an extremely large proportion of their respective populations.

Milwaukee businessman William Upham commented in the production about his father, William Upham, a Civil War veteran who later became a wealthy Marshfield lumberman and governor. The senior Upham was wounded during the war and while recovering in Washington, was in-upto have a meal with President Lincoln. During the meeting Upham was asked to bare his arms and show the president his wounds. "He said he took "some shirt off in Washington," the younger Upham said.

The video opens by addressing the question of why it is important to remember the war that was fought nearly 135 years ago. Principles of freedom, American democracy and honor were cited in quotations from President Lincoln.

The video gives a profile of the state at the time of the Civil War, focuses on its overall war effort, cites some of its heroes and the major campaigns of which its soldiers were a part. The heroes included an eagle, Old Abe, which was the mascot of a regiment formed in Eau Claire. There also is a segment in the program on the museum in the capital which contains a collection of artifacts including the flags of many regiments from the state.

A Stevens Point historical buff who has done considerable collecting of Civil War memorabilia has a cameo appearance. Don Sadlernacher is shown in the opening scene wearing a reproduction of a Union uniform, holding an authentic weapon.

The scenes were created from photographs Precourt and Kelley secured from numerous libraries, including the Wisconsin State Historical Society. The background music was from the period of the 1860s and played by the first Brigade Band of Madison on instruments used during the Civil War.

Country music fan speaks out

by Crystal Gustafson

Staff reporter

For several years I have defended my love of country music to my scoffing friends. "How can you listen to that junk?" they jeer. And then, to further off-end them, they make up phon­ country lyrics. "Oh my baby left me," they croon. "For a pickup truck." I've decided to explain-a-song for all, for why I like country music.

First of all, it's important to understand (contrary to what my friends) I'm not the only person in the world who prefers the twang of good ole country music. Radio stations around the country now are popular on both AM and FM frequencies. Even with live country music to exist in almost every town, large or small.

Country music also has a lot of men, like this song that says, "She had a ring on her finger and time on her hands." Or this song, "The angel in your arms is going to be the devil in someone else's arm's tonight." Country songs don't hesitate to tell it like it is, usually with a touch of humor.

And most of the country songs are the deliberately funny ones. "Don't call me a cowboy, till you've seen him ride. That Skel­ lan and them fancy boots don't tell you what's inside, No. And if it ain't good in the saddle it won't be good in bed. Don't call him a cowboy 'til you've seen him ride. Or how about this song, "I didn't come to kiss the bride, so don't make me feel bad. I just came by to see the show. The re­ception line's too long outside and I didn't come to kiss the bride, I did all that years ago." But besides giggles and grins,

Council concerned about hunger

University News Service

The UWSP Interfaith Council, a coalition of student religious organizations on the campus, is concerned about hunger hunger around the world and in Stevens Point. By observing Wednesday, November 20, as World Hunger Day they hope to enable the whole UWSP campus to do something to help the millions of starving people.

Students living on campus will participate in a Miss America program. By giving up one of the meals they have already paid for through their food serv­ contract with the University, they will raise money to contrib­ a food and development aid for African nations facing famine. The food that is missed American Food Management, the company that caters food for the campus will donate money. The money collected will be used by CROP/Church World Service, the relief and development agency for 30 different Christian denominations. Those students wishing to contribute through another agency can do so by designating where they would like their money to go.

Students living off campus, and those on campus who do not have a pre-paid meal plan, will also be given an opportunity to help. A booth will be set up in the concourse area of the University Center to collect mon­ Cont. p. 19

live, (like most music), but when live music isn't available, the radio is the next best thing. As I write, my radio is tuned to the new music station in the area, WYTE, and they're playing a slow love song. "Why would you want to marry me if the very best is you?" the song asks.

Love songs sound great coun­ country style. They're slow, sweet and delivered by a voice that's almost like cuddling up. Country love songs sound perfect, and there's a lot of best to country music often offers advice. This song is directed at those one-legged men. "Show me a man who doesn't talk to his woman, and I'll show you a man whose woman can steal." (Or this advice to people who prepare their own dinner - "If you're sing­ ging heart... will tell on you.")

Country music speaks to our country music.

New Carlsten exhibit

by S. M. Anderson
Staff Reporter

The new exhibition containing
the works of thirty-five artists of
national, international and emergent
reputations is a visual delight of
dye, color, texture and exquisite
skill that ranges from the tradi-
tional to the innovative in woven
and plated con-
structed fibers. Each piece is a
definitive individual as well as re-

flecting the artist's relationship
with the exploration and creation of
distinctive state-
ments in today's art world.

Though each artist utilizes
a mastery of traditional tech-
niques, the variety of alternative
materials and unique and inven-
tive approaches each artist
brings to his or her work gave
me, the viewer, the sensation of
discovering a new woven world,
while still retaining a heritage
from out of the past. I can envi-
examine this beauty, immensely
cracking wallpapers and walls
layered in rich texture. The
work contains touches of humor
and some unusual use of the me-
dia that gives the exhibition as a
whole an aesthetically balanced
overview of what's happening in
the growing area of textiles and
weaving.

Thirteen of the thirty-five art-
ists have received Individual
Artist Grants from the National
Endowment for the Arts, the
highest "official" recognition that
an artist can receive in this
country. Most of these artists
have been featured in a substan-
tial number of articles, reviews,
and books and are represented in
major public and corporate
Country, cont.

often targeted at a young
audience. Songs about being
down to your last dollar are
more understandable to most
people than songs about "Money
for nothing. Checks for free."

Finally, besides understanding
country music, people can sing
along to country songs. They're
easy to learn, and they don't
contain any nonsensical phrases,
like Sire Sue Sadie), and each
word of the song is usually song
clearly. It only takes a couple of
hearings for the listener to com-
prehend and be able to sing
along. I can think of few things
more relaxing than driving in
your car lustily singing along
with the radio.

So, at back, pop a beer, and
turn the radio dial to the coun-
try station. "I wish that I was up on
Rocky Top down in the Tenne-
sesee Hills; ain't no smoky smoke on
Rocky Top, don't pay phone
tickets. Now corm don't
grow at all on Rocky Top, Earth's
too rocky by far, and that's
why all them folks on
Rocky Top drink their corn from
a jar! There. Now don't that
bring a smile to your face?"

Being, cont.

wouldn't have to be afraid of
arguments, because I'll realize
they're just a way of working
things out. I wouldn't have to
stop every three seconds and
ask myself, "Am I acting stu-
pid?"

If I was taken seriously, it
would mean I think I have the
right to be the kind of person
I want to be. Tomorrow it'll go
out there and really start working
at getting some respect. With prac-
tice, maybe it will happen in my

Rogers tells of Amazonian wonders woes

by Jean Unmuth
Special to the Pointer

If the idea of discovering and identifying new plants appeals to you, then Brazil is the place to start your career. Dr. Rogers (CNR faculty member) recently spoke of his experiences in the Amazon basin to a group of people at Resource Management International's November meeting.

In 1976 Dr. Rogers worked on a program sponsored by Partners of the Americas. It develop a seminar on tropical forest inventory. During his travels he visited Bogota, Manaus, Belem, Brasilia, and Rio de Janeiro. He explained that the Amazon River is not just one river but several, intertwined to create the world's longest navigable river. The basin holds one-fifth of the earth's fresh water, and renews approximately one-half of the earth's oxygen supply. The Amazon basin boasts the world's largest tropical jungle. Guiana, palm oil, and latex are the area's most important economic products. Guiana is to the Brazilians as Coca-Cola is to the Americans. The soft drink is derived from a plant.

Dr. Rogers stated that although there is a forestry school in Brazil, the soft drink industry, and tourism is overshadowing the program's importance in the Amazon basin.

The basin is divided into five levels. In fact, they were so large that one could not make out the Amazon River through the trees in many areas. The basin is affected by very dry winters that last for many weeks. Dr. Rogers stated that although there is a forestry school in Brazil, the Amazon River, so it is not just one river.

Dr. Robert Rogers stated that although there is a forestry school in Brazil, the Amazon River, and tourism is overshadowing the program's importance in the Amazon basin.

Fall hunting success a mixed bag

by Tony Dewstatt
Staff Reporter

Waterfowl

"Few and far between" is the answer most waterfowl hunters will give when asked about this year's season. Due to a bad spring, many birds have been bypassed this season. During the breeding season, plus hunting pressure, the waterfowl populations have dwindled to very low levels. In fact, they were so low that it would probably have been better if one bypassed this season for other sorts of recreation—such as watching TV.

Another important factor that has affected this season is the weather. Remember the first three weeks after the opener—those warm, windless, and most of all, dull weather days that all duck hunters dread? Even seeing a duck brought a smile to one's face and hope that tomorrow would be a better day. It never came.

For those of you brave enough to stand on the shooting line at Mead, you probably had a successful day if you were able to find a spot. The DNR reports a high bag limit of mallards and woodcock with few divers mixed in. However there have been a lot of divers moving in and out of Mead Marsh in the past week.

Lake DuPage is prime ground for late season dove ducks. With a week left in the season this, in my opinion, would be the best bet for limiting out.

Grouse

This year's grouse season has been what most people would call excellent. With the grouse at the peak of their ten-year cycle many birds are to be found. My friends and I have found great success on Consolidated Paper Co. owned land, which is open to the public. DNR has also reported good populations of birds at both Dewey and Mead hunting grounds. It has been my privilege this year to hunt on some private land, and my friends and I have been quite successful. So if you can hunt on private land, I highly recommend it.

Squirrels

As the season for small game continue, must have totally forgotten about the squirrel. Like turkey hunters, I'd rather hunt ducks or grous ever any day; but due to those low populations of waterfowl this season, the squirrels have been a lifesaver on many a duck hunt. This season— with a better than average acorn crop and a lot of sunny weather —hunters in pursuit of bushy tails had no problem in getting their share in.

In the Central Wisconsin area, squirrels are abundant along the Wisconsin River, so if you are in a mixed bag hunting is letting you down, give the squirrel a try.

Upland birders enjoyed success

Although the waterfowl season has been disappointing this year in the Central Wisconsin area, all the hunters that I have talked to have reported excellent grouse hunting.

Next issue: deer hunting preview

The first Illinois/Iowa "Deer Classic" is being planned for next year, from April 4, in Des Moines, Iowa. Kube feels that this event will help attract trophies not previously scored. Illinois hunters can qualify for the state's book with scores slightly under those required by Pope and Young and Boone and Crockett.

Spain Estabishes Nature Park

The Andalucian Government in Spain has established the Sierra de Grazalema Nature Park to the northwest of the Cadiz and Malaga Provinces. Its acreage covers many of the areas of Alpes ouenias— a very rare forest type. Large populations of Griffon vulture and Spanish ibex are being protected as well.

Swedish Forest Conflict Rises

The Swedish Government has decided that three tracts of virgin mountain forest covering 632,800 acres in the Liberian area should be preserved. This decision ends a two-year conflict between the Nature Protection Board and the Directorate of Crown Forests.

Illinois Habitat in Trouble

The most pressing problem facing Illinois wildlife is the loss of habitat," warns a report recently compiled by the Illinois Wildlife Habitat Commission. Habitat for most species of wildlife have been reduced greatly in both quantity and quality. The commission wishes to emphasize the severity of the problem because reductions in habitat have been the reason, in most cases, for the dramatic reduction of wildlife in the state.

DNR reports

Dr. Robert Rogers, chief of the Division of Wildlife, states that although there is a forestry school in Brazil, the Amazon River, so it is not just one river.

Cont. p. 14
A well-seasoned bird man once told me, "Son, go hunt Huns on this earth for only one reason—to punish those who spend their Sunday mornings pridetide hunting instead of saving their souls." After encountering several skidding Hun coyotes, I knew I was on the wrong road. I was kidding. He also told my skeptical ears to listen for a faint, "Vengeance is mine" as a covey of Huns completes their escape over the next hill.

My defiant nature wouldn't allow me to heed the old man's advice, so I embarked on another Hun lesson. My equally conscientious counterpart, Bryan Skaar, and I began our journey to the blinn village of Morrison, Wisconsin's early invitation.

We did, after a day of Hun stalking with Whitney when it's easy to see where he gets his inspiration to capture wildlife on canvas. There would be no hunting during this hunt, we realized the whiz of falcons chopping the air, and a falcon too heavy to manage.

Huntsman Hippo

Any who have read an outdoor sporting magazine recently will no doubt have noticed that there seems to be a glut of helpful "how to" articles. The authors of these pieces are intent on improving hunters' success by offering writing articles such as "Dress To Hunt" and "Eat Right To Get Your Buck." The intent are they on improving our lot, in fact, that through their actions they have made the lucky, unschooled, unsuccessful hunter almost a thing of the past. In this column, I intend to show that it is possible, through thought and practice, to become an extremely poor hunter. To reach this lofty state, you must first forget everything your Papa or Grandpappy may have told you about the art of hunting and listen to me. The first step in becoming a lousy hunter starts not with the hunt itself, but with the preparation. When dressing, you must take care to dress opposite of what weather conditions would seem to dictate. If you look through your window on opening day and see that it's going to be another gorgeous Indian summer day, take a hint from me and go get your parka and for. If, however, it looks like it is going to be as cold as Queen Elizabeth, go snatch your gym shorts and muscle shirt from the laundry and be on your way. You will find that dressing contrary to your instincts will practically ensure that your search for the game will be futile. Killer hogs indiscrimately when you are standing in forty degree water on an icy November day wearing only shorts and a polo shirt. Likewise, it is hard to keep your mind on the game on an eighty-degree September day when you can't see from beneath your ski mask.

Hunting experts?

by Kurt J. Heker
Special to the Press

Anyone who has read an outdoor sporting magazine recently will no doubt have noticed that there seems to be a glut of helpful "how to" articles. The authors of these pieces are intent on improving hunters' success by offering writing articles such as "Dress To Hunt" and "Eat Right To Get Your Buck." The intent are they on improving our lot, in fact, that through their actions they have made the lucky, unschooled, unsuccessful hunter almost a thing of the past. In this column, I intend to show that it is possible, through thought and practice, to become an extremely poor hunter. To reach this lofty state, you must first forget everything your Papa or Grandpappy may have told you about the art of hunting and listen to me. The first step in becoming a lousy hunter starts not with the hunt itself, but with the preparation. When dressing, you must take care to dress opposite of what weather conditions would seem to dictate. If you look through your window on opening day and see that it's going to be another gorgeous Indian summer day, take a hint from me and go get your parka and suit. If, however, it looks like it is going to be as cold as Queen Elizabeth, go snatch your gym shorts and muscle shirt from the laundry and be on your way. You will find that dressing contrary to your instincts will practically ensure that your search for the game will be futile. Killer hogs indiscrimately when you are standing in forty degree water on an icy November day wearing only shorts and a polo shirt. Likewise, it is hard to keep your mind on the game on an eighty-degree September day when you can't see from beneath your ski mask.

The next step in preparing for your empty-handed day afield is so simple that most would-be hapless hunters forget it entirely—Neglect to bring your gun. Regardless of your woods knowledge, you will have to agree that jumping onto deer out of trees or throwing rocks at passing ducks is very rarely successful. Any day afield, regardless of careful preparation, stands some chance of being fruitful unless you forget the most important item on your list: the toilet paper. If you do forget, you will find that once in the woods, nature's call will definitely arrive. It is a force to be reckoned with. After a few hours of pain (or longer, depending upon your fortitude), all that can save you will be a death-at-year-heels dash through the countryside to your car, followed by a 30-mile-hour feverish dash to the gas station. Upon returning to the woods feeling ten pounds lighter and fresher than a newly run-up fig, you will probably see that your recent headlong flight left every game animal in the vicinity streaming for the relative safety of the neighboring county. AUTH! OR'S NOTE: The author realizes that some people would advocate using the woods as a lavatory, but feels that true hunters will recognize this as the unseemly activity it is. Let's suppose the big day has now arrived, and the hunt is on. You are well prepared. You are armed to the teeth and ready to hunt. But you have forgotten your gun, and oh my God, you have forgotten the toilet paper. Don't scratch up a Cont. p. 21.
Unhunted animals making a (non) game of it

by Andy Savagian

Outdoor Editor

For those of you who have been reading this outdoor section, or the outdoor section of any other newspaper, you may have noticed something about the fall season in Wisconsin—animals get killed. It’s hunting season in our wonderful state; stories about grouse, squirrels, pheasants, ducks and geese have been appearing on these and many other outdoor pages. Soon deer season will open, so before we continue the fall hunt, let’s take a look at this state’s valuable nongame species.

Nongame species are amazingly diverse and span a number of different classes, but all nongame animals fall under a simple definition; any species not domesticated, hunted, fished, or trapped. “This definition includes animals like the chipmunk, and most of the insects,” said Kelly Kearns, nongame biologist from the Nongame and Endangered Species Section of the DNR’s Bureau of Endangered Resources.

The list of nongame animals ranges from English sparrows, robins and shrubs to badgers, timber wolves and pine martins. Kearns added that the DNR’s main emphasis is on Wisconsin’s native species, because a number of these are endangered; the forests tagged as nongame—so what? Why manage nongame—what are they? To the wildlife biologist, a diverse, aesthetic community of plants and animals is impossible without the existence of all the members in the community. To naturalists, the aesthetic value of nongame animals is a more important factor. To hunters and fishermen, their input and contributions toward game species often benefit nongame ones, and contrary to some anti-hunters’ opinion, this leads to an efforts of hunters and anglers that nongame legislation and policy can reach a successful conclusion.

Though these nongame animals are biologically essential and aesthetically pleasing, their numbers and habitats have suffered. We have tended to put these important natural residents at the bottom of the research and management line, behind more easily manageable and economically important game species. But since 1973 federal and state laws are helping endangered animals like the pine martin, a re-established Wisconsin nongame resident. Also, in 1978 these laws were extended to threatened species and to endangered plants. Finally, the DNR set up the Bureau of Endangered Resources, which includes the nongame classification, that, as Kearns points out, is non-game over-“Our job is really coordinating the (nongame) management: people all over the state are managing non-game species. We work with a number of land management agencies, resource based industries and private land owners.”

Are nongame animals here to stay? Kearns hopes so; many of the current DNR projects seem to be progressing, including one of the most successful. The double-crested cormorant population in definitely improving, Kearns reports, and may be moved from the endangered to the threatened category. The cormorant’s numbers originally dwindled because their main food source, fish, was contaminated with pesticides. Also, the bird’s nesting sites—snags and dead trees—began to dwindle in number with the corrosive. Artificial platforms and pesticide control have given the cormo

Rant new life in the state.

Kearns also stated that projects developed for Forester’s terms, red necked grebes, herons and egrets are proving very successful, and hopes the work in

Landowners urged to plan now

North Central Wisconsin landowners who may be considering improvements to their property by planting trees or shrubbery can get advice on their projects by contacting their county Department of Natural Resources forester. That’s the word from DNR North Central District Forest Staff Specialist Mike Beaufeaux. Beaufeaux also reminds landowners that now is the time to order evergreen and hardwood tree seedlings along with shrubs from the Griffis Nursery in Wisconsin Rapids.

Beaufeaux reminds that the seedlings must be planted to grow wood products, erosion control, wildlife, and control salt and soil as well as for general food or cover.

There are 11 tree species and five varieties of shrubs available. Of the trees, landowners may choose from sugar maples, butternut, red oak, white oak, butternut ash, red pine, white pine, Norway spruce, white pine, white cedar and jack pine. The shrub species include mixed crab, ninebark, silky dogwood, highbush cranberry and mountain ash.

Notes cont.

Not only was the commission concerned with the real and aesthetic losses involving wildlife, but also the monetary losses. The public spends more than $1 billion a year in Illinois on various outdoor-related items—an economic asset the state needs. To alleviate the problem, the commission recommended the acquisition of more public land, tax incentives, and establishing a portion of the state sales tax for habitat purchase and development.

Pointers stop Weigel, Eau Claire for 28-6 WSUC win

by Kent Walstrom

STEVENS POINT, Wis. — The Pointers, who have made a habit of playing their football games under adverse conditions all season long, overcame a fresh blanket of snow and below freezing winds to record a 28-6 victory over UW-Eau Claire here Saturday afternoon.

While the snow had little effect on the passing of quarter­back Dave Geisler, it did hinder the efforts of Eau Claire's teams this Saturday.

Fullback Kevin Knuese struggles for a first down during the second half of Saturday's game against Eau Claire.

Stickers end season at Nationals

by UWSP Sports Information Office

WALTHAM, Mass. — The UW-Stevens Point women's field hockey team had its season end abruptly when it fell 3-1 to Bentley College of Waltham, Mass. here Saturday. The loss came in the opening round of the NCAA Div. III National Field Hockey Championships.

In what was a classic contest between the two top teams, Bentley, the No. 2 seed in the tournament, took a 1-0 lead at the 25:56 mark of the first half. UWSP's top scorer, Kristen Ker­merling, knotted the score at 25:56 of the second half with a goal of her own. The game ended in a 1-1 tie as regulation time expired.

Both teams came out shooting in the overtime period and Lady Pointer goalie Stephanie York, whose fine play in the contest at­tracted the attention of the spec­tators, denied Bentley several scoring opportunities. With just 2:25 left in the overtime period, however, Bentley sent the win­ning shot home.

Bentley dominated the game statistically, 23-4 in shots and 1-3 in penalty corners.

"Bentley was an aggressive team that played a style of hoc­key that we had not seen much this season," commented Lady Pointer head coach Nancy Page. "They just came out and hit the hard ball and took as many shots as they possibly could."

While Page was disappointed with the loss, she was proud of her squad and praised the play of York, who was credited with 25 saves.

"Stephanie played the best game of her career. She was simply fantastic," said Page. "We had as much of a chance to win as they did, even though the statistics were lopsided. I'm very proud of this team. They gave it their best shot and that's all I could ask for."

Due to a lack of competition in the area, field hockey will be dropped as a varsity sport for the women. The sport competed at the varsity level since 1967 and compiled a record of 238-45-36, including an 8-3 mark this season. The team had three coaches in its history: Marjorie Spring (1967-79), Mary Jo Mul­len (1971-73) — and Nancy Page (1974-85).
Women cagers face rebuilding year, says Wunder

by Julie Thayer
Staff Reporter

The UWSP women’s basketball team will open its season Saturday, November 23, at Mary’s College of Winona. The women have 22 games scheduled this year, nine of which will be played at home.

The team has undergone several changes this year, the most obvious one being a new head coach. Linda Wunder was hired to take on the women’s basketball responsibilities. Wunder, who is originally from the Milwaukee area, played Collegiate Division I basketball for four years and has previous coaching experience at the collegiate level.

Another change for the women is that they will be playing a double round robin with each conference team. This is the first time the team will have played a home and away series in which they will have the opportunity to play each school at an even advantage.

There are several key players on the team this year. Returning from last season are Sonja Sorenson, Dina Rasmussen and Karla Wunder, who led the team in scoring. Karla and Mary Miller will return after the volleyball season ends. Karla missed last season due to a stress fracture.

Karla Miller is a senior this year and is one of the three co-captains for the team. She was voted most valuable player in the 1984-85 season as well as making the All-Conference First Team.

Miller averaged 15.6 points per game and was ranked 11th by the NCAA Division III schools in field goal percentage. Dina Rasmussen, setter and co-captain, played her first season with the Little Pointers last year. Rasmussen transferred to Stevens Point from UW-Marathon. She led the team in field goals with 119 and averaged 11.4 points per game.

Amy Graddecki is a junior and also a co-captain for the team. She was voted most valuable player in the 1984-85 season as well as making the All-Conference First Team. Miller averaged 15.6 points per game and was ranked 11th by the NCAA Division III schools in field goal percentage.

The Pointers open the 1985 season on November 23.

Spikers finish 2nd in WWIAC

by Scott Holsclark
Staff Reporter

It might have been cold outside the Kohl Center in Oshkosh due to the year’s first snowfall, but inside, the Pointer women’s volleyball team was red-hot, until the final game.

Steve Foster entered the weekend with a 17-4 conference record and was the top choice to win the conference championship. But after sweeping their first four games of the tournament, the Pointers dropped two straight to La Crosse, finishing second in the WWIAC conference.

The Pointers started off with victories over UW-Eau Claire, 15-10, 15-15, 15-4 and UW-Oshkosh, 15-4, 15-4. During the Oshkosh game Coach Nancy Schoon felt her team needed a lift. “When I put Mary Miller into the game it gave us the necessary boost to take care of Oshkosh,” stated Schoon. “Even though she has been out (with an injury) and only contributed a little bit, the women started playing with more energy.”

Ruth Donner led the Lady Spikers in the two games with 25 spike kills, while Carol Larson had 26 assists and 25 digs.

Ruth Donner led the Lady Spikers in the two games with 25 spike kills, while Carol Larson had 26 assists and 25 digs.

Victories over UW-Eau Claire, 15-15, 15-2 and UW-Oshkosh, 15-4, 15-5 propelled the Pointer spikers into the championship game against La Crosse.

After La Crosse won the first game, 15-13, the Pointers stalked a 15-14 lead and a chance for victory. A crucial call on a ball that was out of bounds went against the Lady Spikers. The momentum shifted and the in

Angelfish lose to EC

by Scott Moser

The UW-Stevens Point women’s swimming and diving team met its first dual meet of the young 1985-86 season to UW-Eau Claire, 43-72, but managed to qualify three swimmers in five events for the NAIA National meet in Spokane, WA., this March.

Earning the trip to Spokane were Jan Gelwick in the 500 individual medley, 100 freestyle, and 50 butterfly; Kathy Frohberg in the 200 butterfly; and co-captain Laura Adams in the 200 breaststroke.

Gelwick, a freshman, also set a new UWSP women’s record in the 200 yard medley relay by winning the event with a time of 2:22.5.

The only other blue ribbon finishes in the meet for Stevens Point were another by Gelwick, this time in 200 breaststroke, 2:38.5, and sophomore Laura Adams in the 200 freestyle.

The Pointer women’s swimming and diving team will compete in the NAIA National meet on March 15-17 at the University of Washington in Seattle, WA.

An aggressive corps of seniors will lead the Pointers this season. Good at the present time. Mazoleni was pleased with the whole line of Jim Kienk, Steve Dolan and Rick Fleming. "Scott and Jim scored a total of six goals today," said Mazoleni. "Rick picked up five assists and is deserving of equal credit. This line is playing very well together." "Our game plan was to control all four corners of the rink. Mazoleni continued. "You must come out of the corners with the puck to be successful. We were able to accomplish that today."

Point jumped out to an early lead when Jim Kienk scored on a rebound just 51 seconds into the game. It took UWSP just over eight minutes before Scott Dolan scored his first four goals. Scott Kuberra tallied the Pointers third goal with just 1 minute and 53 seconds remaining in the period.

Dolan pumped in a power play goal, his second of the afternoon, just 58 seconds into the second period, and 48 seconds later scored his third goal off a pass from Rick Fleming. Super­ or was still unable to score before Dolan put in his fourth goal at 3:18. Mike Nitti later scored his second goal of the season at 10:11 of the second period to put the Pointers up 7-4. Mike Swan­ son finally put the board with an una ssisted goal. Kuberra finished off the Point­ ers second period scoring on a goal assisted by Mike Nitti at 15:38. Superior added their second goal at 17:39 to close out the second period scoring for both teams.

The Pointers scored two addi­ tional goals in the third period, one by Bob Engelhardt and the other by Jim Kienk. Superior's Mike Swanson scored their final goal of the game at the 8:33 mark of the final stanza.

The first year head coach was pleased with his returning players. "I was very happy with the leadership and performance of returning lettermen Scott Kuberra, Bob Engelhardt, Mike Lehtoengel and Jeff McCoy," said Mazoleni. "There's no sub­ stitute for experience and after playing in this league for three and four years, these guys will be able to help guide our fresh­ men through this season."

The Pointers are now 1-1 overall and 1-1 in the WSUC.

At UW-River Falls 27, UW­ Stout 9—Being the favorite doesn't always make things easier.

"Everyone picking us to win the conference put a lot of pres­ sure on this team, but they re­ sponded to that challenge," said Coach Mike Farley of the University of Wisconsin-River Falls. River Falls latest re­ sult was a 27-9 victory over UW­Stout Saturday at River Falls to clinch the championship in the Wisconsin Intercol­ lege Conference. River Falls, co­ champion with Whitewater in 1984, won its first undisputed tit­ le since 1979.

The victory improved River Falls' record to 6-4-1 in the conference and 8-6-1 overall. The Falcons, ranked seventh in the NCAA Division III polls, will host for a spot in the NCAA playoffs when they finish their season against Stevens Point next Sat­ urday.

While the Falcon defense held Stout to 122 yards, 67 on the ground, quarterback Greg Corn­ ing and running back Clark Lemanis did most of the heavy work on offense. Corner ran for 121 yards and scored two touchdowns in 20 carries, and Lema­ nis gained 100 yards and scored twice in 13 carries.

Earning third place finishes were the 600 medley relay team of Kevin Setterholm, A. Wayne, Rudeen, and Brumbaugh, 3:08.2; Johnstone in the 100 freestyle, 1:03.9; Brumbaugh in the 200 freestyle, 1:04.0; Captain John Rudeen in the 200 individual medley, 2:08.5; Fish again in the 200 but­ terfly, 2:00.5; Andy Woyte, 200 breaststroke, 2:27.2; and the 400 freestyle relay of Rudeen, Fish, John Johnstone, and Tom Woyte with a time of 3:18.5.

Grapplers place three in tourney

by UWSP Sports Information Office

The UWSP wrestling team placed three individuals here at the Stevens Point Invitational this past weekend.

Jeff Williams led the Pointers, taking a third place in the 177 pound Silver Division, while teammate Barry Gilbeck captured fourth place in the same division. Gerald King also turned in a fine performance as he finished fourth in the 154 pound Silver Division.

Head coach Dave Groshek was pleased with his entire team's overall performance, but singled out freshmen Nick Swan and Mike Havenport along with junior John Noble for their strong showing.

"It was very pleased with our performance," said Groshek. "The experience and confidence gained should pay dividends in future meets."

The Pointer wrestling team will return to action Saturday, November 16, as they travel to the Northern Michigan Invitational.

Two wrestlers go at it during the Stevens Point Invitational Wrestling Tourney.

Hypnotizing, magnetizing, mesmerizing, energizing, fascinating, captivating, exciting, amusing, entertaining, original Tom DeLuca.

Dogfish cont.

little tired and that showed itself in this meet."

Blair named Fish, Drummond, Trent Westphal, and Thomas as Dogfish of the Week.

The Pointers return to action again this Saturday as they head to UW-Oshkosh for another road dual meet beginning at 1 p.m.

Hockey cont.

They travel to UW-Eau Claire this day and return home to host St. Cloud State Saturday at 7:30 p.m. in the Willett Arena.

Football cont.

The Pointers, who face conference champion River Falls this weekend, still have a chance at a post-season berth in the playoffs. To qualify, however, they must first beat River Falls, which is presently unbeaten in the WCAC.

Volleyball cont.

La Crosse had failed to defeat the Pointers in two previous meetings this year.

The Lady Spikers played the weekend without the services of Sheri Schen, the third leading scorer on the squad, who injured her ankle in practice last Thursday. Behind the team trainer's advice, Coach Schoen opted to reduce Schen's duties to serving, but she should be in top shape for the national tournament in two weeks.

"Sheri being out really hurt us, as it is we're not a team with a lot of bench strength. But with Mary (Miller) playing it was like sacrificing one for the other," commented Schoen.

Four Pointers who were main figures in helping the Lady Pointers to a 25-1 record in the conference were named to the all-conference team. Captain Carol Larson (1031 set assists) Karla Miller (a team high 492 spike kills) and Ruth Dorem (43 kills and 16 percent serving) were all repeat selections, while Sheri Schen (248 kills) was honored for the first time. All seniors except Schen.

The Pointer spikers, who have a 44-14 season mark and are ranked 11th nationally, will return to action in two weeks after receiving a national tournament invitation. Times and places for the tourney have not yet been decided.

Hemorrhage is often a consequence of surgical procedures and can be life-threatening if not treated promptly. To prevent or minimize hemorrhage, healthcare professionals often use techniques such as compression, application of pressure, or suturing. For patients undergoing surgery, it is crucial to ensure good pain management to help control bleeding and reduce stress.
