Scholarships available for students with need

by Joanne Davis
New Editor

Students interested in scholarships should apply during October at the Alumni Office in 281 Old Main.

"We welcome students to come in and look over the listings of scholarships available at UWSP," Karen Engelhard, director of Alumni Relations, said. Students should leave their name, phone number, and major with the office in case new names become available for decoder.

The Steven Walther Communications Scholarship has just recently been made available. Walther, a graduate of Stevens Point, died recently. Walther's brother decided to put $10,000 from the sale of Walther's business toward communication scholarships.

This particular scholarship is available for an undergraduate showing unexpected or extraordinary financial difficulty in paying tuition and/or living expenses. The amount will be worked out according to the need.

Hundreds of other scholarships are available, spanning a variety of criteria, not all academic.

Engelhard indicated that some departments have few or no scholarships available. "We are trying to steer contributors where the dollars are needed," she said, "and toward where the contributors' interests lie."

Companies, departments and other sources are also solicited for contributions in areas that are lacking money for scholarships.

Engelhard advised that students also look to their home towns for scholarships offered by, for example, Kiwanis clubs.

"Ask your high school guidance counselor for any available information or other sources."

Homecoming had its winners and its losers

Trisha Weiss of 3482 Hoffman Road, Wisconsin Rapids, and John Wolter of 434 Winebago Drive, Janesville, were named UWSP's 1985-86 Homecoming King and Queen. They were sponsored by Hansen Hall.

$243,000 renovations in heating plant-Comm Arts Center

University News Service

Renovations on the heating plant and Communication Arts Center at the University of Wisconsin-Stevens Point are tentatively scheduled for next summer.

The State Building Commission has approved requests that will carry pricetag totaling nearly a half million dollars. Designs for the projects are now underway.

Also, the commission has given a conditional approval to the placement of an electronic message center (sign) near the front of the Quad. Construction will be completed by August 1986.

The graphics/photography operations of the Educational Media Service will be moved from the building, but a decision has not been finalized on a new location.

Lockers in hallways of the building will be removed and replaced in some areas by display cases.

The $243,000 heating plant renovation will include structural changes plus repair and replacement of existing equipment.

Horizon yearbooks available

by Joanne Davis
New Editor

UWSP's 1984-85 Horizon yearbooks are available for pickup at IUB in the UC for the 600 students who previously purchased them.

The yearbook may be reprinted for additional student copies if enough demand is shown. Sign up on the waiting list at the Horizon office if interested.

The cost for the yearbook was $12.50. If students want their yearbooks mailed to them, an additional $4.60 is required.

This edition of the Horizon not only sports a dark brown cover with a shiny gold Horizon logo on it, but also 26 full color pages.

In the past, eight pages was the norm for color pages. "The extra cost for the color was absorbed by the Horizon, not the students," former Horizon editor Donna Bauer commented. The extra color cost $800.

Jim Sell, last year's Horizon photographer, was responsible for the majority of the photos in the Horizon. "He did excellent work with the color," Bauer said.

"We're both real, real proud of the outcome of the job," Cost, p. 12
The uneven tracks caused the three-car train to sway back and forth as I sat viewing the glazed peaks of Ecuador's Andes Mountains. I absorbed the scenery while chatting with a friend.

The train struggled to reach the pinnacle of a jagged, young mountain. The train, cresting the cone, rocked from side to side. The peasants seemed desensitized about the death of one of their own people. The dead man lay for nearly an hour before a farmer came with a wooden livestock cart to take the corpse away. The peasants then returned to their hoes and mundane routine of cultivating rocky parcels. Their apathy stems from being surrounded by death. Short lifespans and a high infant mortality rate make death a common occurrence. Life is conditioned to have many joyful experiences worth remembering.

I felt lucky. Americans are, even in death, fortunate in that we can live an existence that allows us to enjoy and celebrate life. We can draw from a bank of good thoughts and memories. Seeing the peasant farmer's death pass by seemingly unnoticed put my own life in perspective. Perhaps my troubles and problems aren't so great after all.

European ski trip offered

by Debbie Kellem
Staff reporter

International Programs is offering a two-week cross-country/downhill ski trip in Austria-Germany during semester break, January 5-18. The program is open to all students and to anyone else interested in a new experience, although it helps to be physically fit and an adventurous nature lover.

$695 covers your roundtrip airfare from Chicago to Munich, transfers, lodging, breakfasts and one credit of phys. ed. tuition. Mark Koeppke, assistant director of the program, said, "Lift expenses are very reasonable, and most of the cross-country trails offer free skiing. The cities of Salzburg, Innsbruck and the Fussen area castles are within easy reach, so side trips to them are a real possibility. Skiers will stay in the mountain village of Seefeld, 14 miles from Innsbruck. According to Koeppke, the area boasts Europe's largest Nordic ski establishment, while the numerous high peaks draw the skiers seeking Alpine enthusiast. Along with the stay in Seefeld, there will be a stopover in Munich, West Germany's cultural center. Besides the natural beauty of the Alps, it is the ever-present European charm and traditional architecture that the participants will enjoy."

A $100 deposit is required for the trip and deadline for applications is December 5. If you enjoy super skiing and breathtaking views, contact Mark Koeppke at the International Program Office, 308 Old Main, for application forms and further information.

Company picks up Financial Aid's leftovers

by Joanna Davis
News Editor

A Post-Labor Day celebration by the University of Wisconsin-Stevens Point Student Government might have been a little too festive for one public address student.

John McAvoy, who lives in Madison, was accused of making lewd remarks in an address to the Student Senate at 4:30 p.m. on Tuesday.

McAvoy, who lives in Madison, was accused of making lewd remarks in an address to the Student Senate at 4:30 p.m. on Tuesday.

He also would show a film, "Voice in a Ear," which depicts the tragedy and eventual triumph of a 15-year-old boy who stutters. The film by Mark Koeppke received an award at the San Francisco Film Festival last summer.

According to the organization's recruitment flyer, there are about three million Americans who stutter. Membership in the National Stuttering Project is open to "children, young adults and adults who stutter; members of the animal kingdom who stutter; friends of children, young adults, or adults who stutter; friends of animals who stutter; parents, teachers, psychologists, speech pathologists, speech therapists, speech clinicians, teachers, public speakers, students of speech pathology or any concerned creature now living or on this planet."

However, people who find penguins ridiculous need not apply.

Bloom County's "Ouij," the penguin, is prominently featured in the project's newsletter.

Police briefs

by Joanna Davis
News Editor

UWSP's Homecoming weekend proved to be very hectic for students and for the Stevens Point Police Department. Police responded to a variety of calls during the 4th through the 6th, many alcohol-related.

Seven people were fined for having open alcohol containers in their cars.

Nearly 20 people were arrested or disorderly conduct.

Police responded to 10 loud party complaints in the city. Five different bars requested police assistance for problems ranging from people on the roofs of their establishments to drunk patrons out of control.

Officers also responded to break up a crowd that had set fire to the 1300 block of Second Street.

Numerous calls were handled pertaining to intoxicated people.
Halley’s comet will become visible in late December

by Bob Wrezinski

It's been twenty years since the last stop before I went over the edge. You keep leaning farther and farther back until you fall and there's a second or so until your feet grab. It's this part, with the upper reach of adrenalin, that most people do this sort of thing for fun experience and like.

For North, the second descent was much smoother than the first. She went on to say that "she may even do it again some time but, I'm not the type of person to do this for recreation."

Making enemies and influencing people

by Elizabeth A. Krapow

Staff reporter

Most of us spend a certain amount of time and energy collecting a circle of friends. There are relatively few individuals, however, who possess the virtuosity required to cultivate enemies. Perhaps the easiest way to obtain enemies is to alienate a friend or two. It is easy to alienate your friends if you are disorganized and uncooperative. You must be ready to begin the alienation process with the simplest and most mundane actions. These actions are probably the easiest or you to perform and, if your friend is quite sensitive, these tabs may be all you need to irritate your friendship. The most basic step of all is to stop staring at your friend. Your friend may or may not notice this at first and will go right on talking.

At this point you must simply interrupt and rudely interject: "I don't want to hear it. Let's walk away." If your friend is angry with you, consider this procedure successful; if not, don't worry—sooner or later he will be. Now you should begin to consistently disagree with your friend, never comment on his suggestions or opinions. Next, if you happen to be lucky enough to pursue this alienation near the time of your friend's birthday, forget the cake. No gift, no card, don't even mention such as "Happy birthday!"

The final exercise in this category is to have someone troll the friend that you aren't with whom you phones. It is important that these calls do not get through and if there are messages left for you. At this point, you must decide whether or not your strategy has been successful. If your friend is no longer pursuing your companionship, consider your task complete. If you are still hanging and still receiving phone calls, however, you would be wise to move on to the next set of operations. These exercises are for the least sensitive or more forgiving friend with whom you can't begin to take a hit. Start here by inviting your friend out to lunch. After the meal, tell him that you've forgotten your money. Next, make a date with him and don't show up; stand him up. Another useful tactic, for those of us who have children, is to ask the friend to babysit. An afternoon with a terrilec category—four may provide just that extra punch.

How to get trashed and maintain wellness

by Brian D. McComb

Staff reporter

I have often been told that this is a wellness campus. One has only to cruise the Square on a Thursday, Friday or Saturday night to see the validity of this claim. Since people are trashings themselves out only three days out of the week, I assume that they are practicing wellness on the other four. I applaud their efforts. Four days in a week, however, is not enough. Wellness is an ongoing process; it must be practiced every day.

But, you ask, must I give up my drinking weekends in order to practice wellness? A difficult question. And so, I will slip it. I will assume that you, the student, are going to be hitting the sauce pretty good, regardless of what questions I do or do not ask. But, you may still feel guilty about such physical abuse. Understandably, you, the student, wish to participate in some semblance of personal contact, of course, having to do too much. At first glance, drinking to excess and taking care of yourself would seem divergent paths in your stumbles through life. But fear not. Answers are at hand. Obviously the problem is one of alcohol. A little won't hurt you, too much will. One must choose the Golden Mean or, for those of you who don't speak English, moderation. Possibly you stand benefit by pecting yourself. This consists of limiting the number of drinks that you consume in, say, an hour. Personally, this approach has never worked for me. Once I walk into a bar, I seem to forget about most anything but my change.

SMTC knows how to dazzle an audience

by R. Lionel Cranog
Features Editor

Flowing, harmonious movement is what you expect from a good mime company. But Studebaker Movement Theater Company gives you much more than poetemic movement. That is why Taylor Watts emphasizes that "SMTC is not a mime company. People coming to see us who expect white-face and people feeling imaginary walls are going to be disappointed." SMTC transcends the traditional definition of mime. It is a revolutionary theatre production.

Those who are dedicated mime fans will not be disappointed by "Madman," set to Elton John's song "Madman Across the Water," you will find a satirical masterpiece. His facial expressions and body movement take you from a dreamy wonderland upon the sea, to the horrifying nightmarish taunting of an uncaring nurse. Or consider the playful punctual-ment of "Relations." Michael Watts (front); L2 to rt. back: Gunst, Bannatyne, Gooch, Bay.

Gunst and Taylor Watts capture the intrigue, nervousness, pleasures, and joy of a young couple's discovery of man-woman relationships. The fun does not stop there. The audience roared with laughter during SMTC's performance of "Martial Motorcycle." "Suzuki" 350 (Taylor Watts) and Kawasaki 750 (Lesley Bannatyne) take pleasure in poking fun at Honda 36 (John Bay), until he outdoes them with his lively and thoughtful performance of "Meteor." Even "Madman" with its humorous moments brings the audience to a point of silence, consideration. "Monopoly," which comprises the whole of SMTC's perform ance after intermission, is a de licate blend of humor and point seriousness. Lesley Bannatyne gives an endearing and convincing portrayal of a mon ey-hungry real estate woman, who is unkempt and smokes ciga rettes. Her gruff, snorter voice as she mutters about having finally placed a hotel on Park Place is at the same moment funny and chilling.

Michael Gunst, dressed in a black suit with a white tie, both symbol of Lady Luck, the early struggle of man withsolve, and seriousa blend of humor and point seriousness. Lesley Bannatyne gives an endearing and convincing portrayal of a money-hungry real estate woman, who is unkempt and smokes cigarettes. Her gruff, snorter voice as she mutters about having finally placed a hotel on Park Place is at the same moment funny and chilling.

UWSP career life planning

by Peggy Kuebel
Staff reporter

Are you a freshman with an undeclared major, a sophomore, junior or senior looking for career alternatives, or are you a career intern looking for help and guidance? If you can see yourself in any of these three situations, Cindy Chelcus is just the person you should see.

Ms. Chelcus is the associate director for Career Planning, and is a member of the Student Enrichment and Retention Services here at UWSP. She works with Career Services, the residence halls and academic departments "...partly helping students make effective career decisions."

Cindy Chelcus examines a student's needs and available options, and then develops a plan to implement those ideas. According to Chelcus, approximately 75 percent of her time is devoted to students. She is currently located on the third floor of the Detrell Hall building where her door is open to those who need her help. Normally, her hours are 8:30 a.m. to 5 p.m., but this may vary depending on her schedule.

If you are wondering what Chelcus does, it isn't hard to answer. She has become very active with "University II." This is a Career Life Planning course for undeclared freshmen. Teaching and counseling are an integral part of her job. Guidance and counseling are nothing new to Chelcus, who is a graduate of UWSP. She is involved in early career exploration and believes in giving alternatives and showing available options. Encouraging involvement in out-of-class learning activities is also important to her.

With a bright smile, Ms. Chelcus stated the best part of her job is "...working with students and faculty." She added quite seriously, "It is a simple answer, but true." When asked about the part of her job she Cont. p. 19

McCalla to perform at UWSP

by Kathryn Jeffers
Staff reporter

Singer, songwriter and guitar-ist Desi Dede Calbo will delight a Stevens Point audience when she makes us a stop on her current national tour. In over a decade of performing, she has become known for the rhythmic undercurrents of her music and the poetic integrity of her lyrics. Desi Dede creates visual textures which glide easily from mocha rich sweetness to high energy intensity. An inspiring, evocative performer, she has both delight-ful, fun, and deeply touched her audiences.

On stage, Desi Dede Calbo will perform a part of a tour to promote her new release on Olivia Records, "Don't Doubt It." A New York Music Award nominee for best album of 1985 on an independent label, it finds Desi singing clear and true at the top of her range with a pleasing hint of huskiness down low. She relies on the quality of her sound and phrasing to put a song across—in her tricks here. And she's at home in the variety of musical styles that come through on the album: there are ballads, rock, reggae and calypso.

You won't want to miss this free concert. Desi Dede Calbo has a music long after the music is over.
Wellness, cont.
If, like myself, you also find it difficult to count in such situations, the old Scottish proverb, "You cannot drink laddie, if you're nae conscious," may be your answer. The theory here is that drinking extravagant amounts in a short period of time will cause you to pass out. While the initial consumption of alcohol is great, it will be much less if you were to drink all night. Often though, the problem of regaining consciousness is encountered.
The best solution, it seems, is to get the alcohol out of your stomach before it can hurt you. A full stomach of beer can generally be cured by two or three shots of tequila taken in rapid succession. Only consume mixed drinks, say? A water glass of Tantilence Sauce will dissolve any number of mixed drinks. And you with those cast-iron stomachs (yes, there are still a few of this species around), please invest in a large feather. In any event, after you have taken your cure, make a dash for the vomitubrium with your sex marked on the door. (Those with feathers, wait until you get there.)
Bar owners, however, will object to this. They do not understand the concept of wellness; all they care about are plugged toilets. A good solution here would be to convince bar owners to construct Spew Walls near their places of business. I'm sure that the cost of any such utilitarian "Walling Walls" would quickly be made up by the owners of drinking establishments because of the increased patronage it would cause.
If, for one, would certainly prefer to preserve an establishment that I knew cared enough to construct such a wall for me. As would, I'm sure, most of the student body.

Enemies, cont.
your attack in this series the next time your phone friends you; answer the phone and tell him, "I'm sorry you must have the wrong number." Repeat if necessary.
You've tried the tactics for the highly sensitive friend and the friend who couldn't quite read your message. If you are unfur­
nate enough to have a true friend still trying to associate with you, proceed with the ap­
proach for the disheard. If your friend is still trying to call you, change your phone number. It is important that you have the number both unlisted and un­
published. It costs a little more on your monthly bill, but getting rid of your friend is worth it. A true disheard will try to visit you when you can't be reached by telephone. When he comes to call, turn off the lights, lock the door, and pretend you're not home. Next you might consider throwing a party. Be sure to ex­
clude your friend. Be prepared to take action to have the friend removed if he should crash your party. By this time most friends have become enemies; however, there is one more tactic available—the formulation and spreading of malicious gossip.
With any luck you have now succeeded in alienating your friend. If you have not, you may want to reconsider. Anyone who can endure this kind of abuse may be a worthwhile companion after all. Although having some friends is necessary, it is impor­
tant that you not lose sight of the benefits of creating a few enemies. After all, how many successful people can you name who have no enemies? This step­
by-step guide is guaranteed to transform even your most loyal friend into your most devout enemy.

Cast, cont.
one shares his high opinion of himself but neither he; he is above petty criticism.
Confounding the protrusions of his sentences, unified paragraph, written organization is like trying to restrain the tide. He will not be dimished by some pedestrian English teacher who tells him he is not James Joyce and orders him to write more conventionally in a course called Beginning English.
Writing.
When he gets a bad grade and reads the explanation of his fail­
ure, the expression on his face says, "Deep for Adenin, he is dying." But the next paper is another stream of unconscious­
ness. He refuses to sacrifice his integrity. Any more than:

The True Believer
He (often she) may believe in any cause, from saving the snail darter to evangelical religion. No matter what the crusade, he never forgets it for a moment. He sees everything—literature, language, personal relationships, truth, justice—through the transforming fog of his obsessive conviction.
He is frighteningly earnest, inten­
sely emotional, irrationally dedicated. One can imagine him in black leather and jackboots, firing up the embers, even when it is Jesus and the gospel of love he extols. The multiplicity of ex­
pertise, the restless search for truth he has no understanding of.
He writes always on the same subject, some variation on his basic theme: Find Jesus, eat no sugar, run or jog to a personal millennium. His prose is inten­
tene, emotional and irrational as he is. He never makes a laugh: life is too serious for hu­
mor or pleasure. He is in class whenever he is not distributing leaflets.
The students I have identified have one thing in common: They are difficult, if not impos­
sible, to teach. They are en­
rolled in the university for social rapsions: to learn a trade, to get a job, to find a partner or com­
patible group, or to extend the period of parental support.
The solid barrier of their indif­
ference, contempt or passionate conviction is the walking wall of teachers everywhere. But there is one character I have neglect­
ed:
The Student
Real students come in equal numbers of males and females and in varieties of shapes and si­
zes. They are Anglo-American, Chi­
nese and Polish, mixed American, black, red, yellow and white. They have open minds, intellectual curiosity, mental discipline, Catholic interests and often—but not always—good hu­
mor, tolerance, compassion.
Their writing styles are vari­
ous and often far from perfect but with two common charac­
teristics: honesty and clarity. They are not symbiotic; in fact, they often disagree with the teacher, either half-heartedly or openly. But all are ready and encouraging the dialogue that keeps the university contempo­
rarily and vital.
They pull their teachers from their schemes, lock them out of their ivory towers and save them from some grave futility.
And, whether at Harvard University or at Stevens Tech, their teachers will rise up and call them blessed.

Real students come in equal numbers of males and females and in varieties of shapes and si­
zes. They are Anglo-American, Chi­
nese and Polish, mixed American, black, red, yellow and white. They have open minds, intellectual curiosity, mental discipline, Catholic interests and often—but not always—good hu­
mor, tolerance, compassion.
Their writing styles are vari­
ous and often far from perfect but with two common charac­
teristics: honesty and clarity. They are not symbiotic; in fact, they often disagree with the teacher, either half-heartedly or openly. But all are ready and encouraging the dialogue that keeps the university contempo­
rarily and vital.
They pull their teachers from their schemes, lock them out of their ivory towers and save them from some grave futility.
And, whether at Harvard University or at Stevens Tech, their teachers will rise up and call them blessed.

Shades of green in store for campus sundial

by Andy Savagian

Landscaping

Andy Savagian

Outdoors

A major facelift is in store this fall for part of the UWSP campus. Landscaping plans for the area around the sundial were recently approved by the Physical Facilities Committee, which is composed of UWSP faculty and administrators.

Mary Williams, Campus Coordinator of Physical Facilities and Chairman of the committee, stated that the designs were approved without a hitch. "There's a tremendous interest and support for additional landscaping on campus," Williams said.

The proposals, which include extensive work around the mural on the south wall of the College of Natural Resources building, are the idea of Dr. Robert Miller, an urban forestry professor at UWSP. "We'd like to improve the aesthetics of the area, and make the forum a place people will use more," stated Miller.

Miller's proposals consist of three phases. The first phase, implemented this fall, involves moving the existing shrubs and trees out of the forum and planting about 25 new trees, including juniper, amur corktrees and Washington hawthornes, around the sundial area. The present shrubs and trees in front of the mural will also be removed, and the ground will be reseeded for spring planting.

The second phase will begin next spring, and will center around the mural on the CNR's southern exposure. Miller hopes the landscaping will "set the mural off, to create a nice setting for it." Besides planting evergreen and deciduous shrubs in front of the wall, trees will be planted around the sides to create the world's largest computer-designed mosaic.

The final phase, if final approval is given, will be completed in the spring of 1987. Work will consist of the construction of raised flower and shrub beds. "The forum will look really nice as the area fills in at the end of the semester," commented Miller.

Dr. Miller developed the landscaping designs last summer for Physical Plant Director Harlan Holfelter, who will be implementing a major part of the plan. The Society of Arboriculture and students from a landscaping maintenance class will be doing most of the physical labor.

Wisconsin River holds key to fall walleyes

by Tony Dewiatt

Staff reporter

Many fishermen know of the Wisconsin River's spring walleye run, but few know of the fishing potential of the fall run.

There are certain environmental aspects that one must take into consideration when fishing for walleyes in the fall. Current is one of the most important aspects—walleyes thrive in current.

The quick-flowing water brings vast amounts of food to the fish, allowing them to feed with little movement or effort. Although walleyes are not going to be out in super turbulent water, one must look for breaks in the water current. These breaks can range from big rocks and log jams to a personal favorite, eddies. Eddies are currents that boil upstream against steady downstream currents. This causes undertow, so fishermen who like to wade should take precautions when venturing into turbulent water.

Eddies fishing has two basic rules to remember: First, find the eddies, cast upstream in downstream current. Let the cast flow into the upstream current until it reaches the downstream current again. Second, when the water's high, fish closer to shore—better yet, look for small tributaries that empty into the river. These are hot spots when the river is at flood stage.

Another element in fall walleye fishing is bait, called live presentation. Due to the large amount of snags on the river, I would leave most plugs and lures in the tackle box because the river takes its toll on bait such as this. Jigs, however, are the one exception in the rule. Due to its rugged mobility, it's my number one choice for river walleye fishing. Live bait rigs tipped with minnows, such as the Lindy, Wolf River rigs and floating jig heads, also turn up good limits of walleyes along the river. Although minnows are my favorite, I have had limited success with leeches and night crawlers. If the fishing is slow, you might want to give these two a try.

The Wisconsin River is blessed with some excellent late season walleye fishing. The many dams and small tributaries offer fishermen a wide variety of habitat for successful walleye angling.

Acid rain bills reach Congress

Congressman Dave Obey (Wausau) said recently that he will sponsor all three of the major acid rain control bills introduced in the House of Representatives this session.

"Frankly, there are some provisions in each of the bills which one might legitimately have questions about," Obey said. "But, the problem is that divisions over each bill to support create a danger of freezing the Congress so that nothing happens."

"I am taking the unusual step of adding my name to all three bills, not because I am committed to each and every provision of any of the bills, but simply to try to help break additional pressure to get the issue resolved so that something real happens and we don't just talk this problem to death."

"I intend to support specific provisions within each of the bills which do the most to protect the natural resources and continued opportunity for a healthy tourism industry in Northern Wisconsin," he said.

Obey said a national approach is needed because air pollution doesn't respect state boundaries. One of the bills Obey will sponsor was introduced by Rep. Morris K. Udall (D-Arizona) and is patterned after a proposal Governor Anthony Earl has proposed on behalf of an environmental committee he chairs for the National Governor's Association.

Cont. p. 12

Though work just started on the forum, Miller added that the idea for improving the area has existed since the mural was completed in 1982.

Many changes are in store for the sundial south of the CNR.

Big Muskie demands $6,000 'ransom'

Winter, 81—Until Scott Petit gets his $6,000 for the story of how he obtained his 180-pound "record Muskie," the big fish will remain unphotographed with its story untold. "I'm not going to give away any information. You make your own decisions," says Petit, owner of the Big Musky Bar and Museum east of Winter.

Many of the dozen mounted muskies in a display room off the bar were caught by Petit or his relatives. Running at 40 pounds on the average, the fish are impressive in themselves. But it's the behemoth in the showcase over the bar that grabs the attention. It's six feet long, has a 34-inch girth and supposedly weighed 150 pounds.

Petit declares his muskie isn't a gimmick to bring in business. "When I tell the interesting story, it'll be worth $6,000," he says. Among the non-believers are Dave Jacobson, Northwest District director for the DNR, and Bob Kitz, director of the National Freshwater Fishing Hall of Fame at Hayward. Both muskie officials believe the fish is a hoax because of doubts about its muskie-like appearance.

Many other discordant notes to the take appearance of the mounted muskie in making their judgments.

Petit has made minor reference to a huge muskie found by Indians on the nearby Chippewa

What's your idea of a fun weekend?
Fishing?
Traveling?
Watching football games?
How about learning to build log cabins Scandinavian style?

Log cabins give environmental station new look

The station is operated by UWSP's College of Natural Resources.

CWES sponsored a log cabin building workshop on September 25-29 as part of an ongoing project to improve the station's living quarters.

The idea for building the cabins was conceived by maintenance coordinator James Palmquist, who heads the workshop and heads the building crews. Palmquist is an experienced woodsman and former UW Extension agricultural agent who has taught many similar log construction courses.

Log building in the traditional Scandinavian way involves the use of a scribe, a tool used to mark the trees. Scribbling allows the logs to be notched and placed one on top of the other.

CWES Director Rick Wilke stated that the proposed four log cabins were being built to accommodate overnight visitors. "We're replacing 50-year-old wood frame buildings that were not winterized and were in very rough condition. Now we'll be able to accommodate people on a year-round basis for lodging."

Wilk added that the project fit in well with the station's objectives. "Since we're building log cabins anyway, why not make it an educational experience, because that's why we're here."

Workshop participants receive instruction on the finer points of log cabin construction.

That's what 38 individuals from across the state did two weekends ago at the Central Wisconsin Environmental Station.

People from various walks of life participated in the 80-hour course, which was taught by professional instructors, with help from Mike Reskin, crew leader for the Wisconsin Conservation Corps. The WCC is providing the labor to do the major log cabin construction. The wood for the project is being supplied by nearby woodlot owners and others.

The idea for building the cabins was conceived by maintenance coordinator James Palmquist, who heads the workshop and leads the building crews. Palmquist is an experienced woodsman and former UW Extension agricultural agent who has taught many similar log construction courses.

Log building in the traditional Scandinavian way involves the use of a scribe, a tool used to mark the trees. Scribbling allows the logs to be notched and placed one on top of the other.

Wilk added that the project fit in well with the station's objectives. "Since we're building log cabins anyway, why not make it an educational experience, because that's why we're here."

The last workshop went so well that Wilke plans to hold another one next year during the first weekend of May.

Notes, cont.

Flowage, but has never outright identified the fish as being his own. To make matters more difficult, Poitl's taxidermist has chosen to remain silent about the issue preferring to let Scott do the talking.

Polar Reversal Underway

According to tests recently conducted by the University of Minnesota, the earth is about to reverse its polarity. University scientists report that evidences from lake-bottom sediments was the major indicator of the reversal.

The earth's poles shift every 100,000 to 300,000 years with the last reversal taking place about 750,000 years ago. Obviously we are long overdue for the next change. Over the past 4,000 years, the earth's magnetic field has weakened by 50 percent—a sure sign of a pending reversal. The shift in polarity may be catastrophic to migrating birds and to our climate and electronic instruments.

NWF Attacks Mining Issue

The National Wildlife Federation has gone to court to restore protection to 173 million acres of federal land in 17 states that the Interior Department has slated for eventual mining. In addition, the suit seeks to halt the department's ongoing effort to lift protective restriction from an additional 50 million acres.

Dakota Big Horn Disease Controlled

North Dakota's bighorn sheep population, which numbers about 200 individuals, continues to head for a brighter future through its lungworm disease treatment. Jim McKenzie, big game biologist with the state Game and Fish Department, reports excellent progress in the treatment program and eventually hopes to have the parasite under control. Lamb survival in sample areas has increased to 100 percent used in 1983.

The second consecutive bighorn season since 1978 will open this fall when six lucky residents win the drawing.

Catch/Release Report

According to a report by the Washington Department of Fish and Game, more than 30 studies concerning catch-and-release trout fishing have indicated that up to 30 percent of the fish caught with live bait died upon being released. On the other hand, trout caught on any kind of artificial lure suffered a mortality of only 5 percent: Steelhead were the only exception as they are not usually hooked in vital areas, even with bust, and so aren't wounded as severely upon capture.

Mississippi Creates Checkoff

The Mississippi Legislature recently passed a law creating a wildlife checkoff on its state income tax return enabling taxpayers to contribute refunds to the Mississippi Department of Wildlife Conservation. In doing so, Mississippi became the 3rd state to kick off such a program.

ication. The legislation requires a reduction of 10 million tons of sulfur dioxide emissions in 31 eastern states. The measure gives states a broad choice of means to accomplish their proportional share of reductions in the most cost-effective manner. Acid smelters would be required to pay for the cost of abatement in accordance with each state's own plan. Reductions would be achieved through a two-phase approach. By one half by 1991, and the full ten million tons to be achieved by 1997.

"One of the advantages of the Leopold's "Earth Day" approach is that it allows for a 'mid-course correction' in between phases in order to account for any newly developed clean-up technology five years down the road," Obey said.

The second bill will be similar to one introduced two years ago by Reps. Henry Waxman (D-Calif.), Gerry Sikorski (D-Minn) and Obey. This legislation requires scrubbing technology to be placed on the top 50 sulfur dioxide emitting power plants in the U.S. Together these plants, including one at South Oak Creek in Wisconsin, are the source of nearly 30 percent of all sulfur emissions in the U.S.

Costs of the smokestack scrubbers would be paid for out of a fund per kilowatt hour tax on all electricity generated in the country except nuclear power. The legislation will also likely require a four million ton reduction in nitrogen oxide emissions from cars by 1991.

The third acid rain control measure incorporates major features from the first two approaches. It would require a 11 million ton 80 percent reduction in nitrogen oxide reductions in two phases.

The second bill, similar to one introduced two years ago by Reps. Henry Waxman (D-Calif.), Gerry Sikorski (D-Minn) and Obey, requires scrubbing technology to be placed on the top 50 sulfur dioxide emitting plants in the U.S. Together these plants, including one at South Oak Creek in Wisconsin, are the source of nearly 30 percent of all sulfur emissions in the U.S.

As the story of the leopold's "earth day" approach is that it allows for a 'mid-course correction' in between phases in order to account for any newly developed clean-up technology five years down the road," Obey said.

A Central Wisconsin couple have been selected as Wisconsin's Outstanding Tree Farmers. Mr. and Mrs. James Joosten of Route 2, Box 6, Wisconsin Rapids, were selected as the best couple from more than 3,000 tree farmers in the state. The booklet used to nominate the couple for their award detailed a very impressive list of accomplishments on their land, along with a strong commitment to utilize complete management of their resources and their willingness to share their dedication with others.

To acknowledge their achievement, the Joosten's will receive a certificate for being selected the Wood County winners, a small dark plaque recognizing their selection as best in the North Central area; a wall plaque designating the couple as the statewide outstanding tree farm family; and a new chain of ownership, the Wisconsin Land Conservancy Association's Outstanding Tree Farmers; and a new chain of ownership, the Wisconsin Land Conservancy Association's Outstanding Tree Farmers; and a new chain.

Warhawks rally to upset Pointers 28-24

by Kent Walstrom
Sports Editor

UW-Whitewater overcame a 24 point deficit with a second half uprising to defeat the Pointers 28-24 here Saturday afternoon.

While the win gave Warhawk first year coach Bob Berewitz his first collegiate victory, it also overshadowed the accomplishments of Pointers' wide receiver Dave Geissler, who set a national record and didn't get the attention he deserved.

The game showed all the promise of a blowout as the Pointers took a 17-0 lead at halftime and added another touchdown early in the third period for a 34-0 spread, but a number of costly turnovers and a change in momentum enabled the Warhawks to fight their way back into the ballgame.

"We made some very critical mistakes in key situations," said coach D.J. Tschetter, "and our players are still seeking their first league victory of the season. "It hurts when you have the opportunity to win, and don't fulfill that opportunity."

After an uneven first quarter, the Pointers drove 54 yards in 26 plays for their first touchdown and a 7-0 lead. Defensive back Rich Smajati intercepted a pass on the Warhawks' next possession, and four plays later Kim Drake nailed a 33 yard field goal to give the Pointers a 10 lead.

The Pointers asserted possession after a missed Warhawk field goal, and following a yard run up the middle by fullback Mike Reuteman, Geissler threw six straight passes, bringing the ball to the Warhawks' 35.

Geissler then found Mike Christmas in the end zone on another pass play that brought the lead to 14-0.

The Pointers drove 96 yards in 11 plays, highlighted by a yard pass completion from Reuterman to Christmas to open the second half and extend the lead to 21-0.

Whitewater fought back for a touchdown on their next possession and closed the score to 21-7.

On the Pointers next series, Geissler threw an interception at the 16, and three plays later the Warhawks scored their second touchdown of the half, cutting the lead to 21-14.

Minutes later, Pointer Mike Reuteman fumbled, and the Warhawks recovered at the Pointer 15. Mike Christmas returned the fumble for a touchdown, and added another touchown of his own to give the Pointers a 21-28 lead.

The Stevens Point offense, off the field the majority of the second half, could not produce any offensive punch and was forced to start in poor field position on most of their second half drives. The game ended with the score at 34-24, and the Pointers the victims of an upset.

"We have to regroup and prove that we can play good football," said LeRoy in a post game interview. "The thing that's going to help us the most is to get back out on the field and try and regain the good qualities that this ball club has."

The Pointers travel to Oshkosh this Friday for another conference contest. The Titans are winless thus far in conference play, but following the loss to Whitewater, LeRoy refuses to

Former athletes inducted into Hall of Fame

UWSP News Release

Pointers who have helped make athletic history for the University of Wisconsin-Stevens Point have been honored Saturday night.

The awards night also focused on four students who are excelling on the gridiron as well as on the playing field, and an administrator whose service to the athletic program has been rated outstanding.

Five new additions to the UWS Athletic Hall of Fame brought the total number in the hall to 22, since its establishment 15 years ago. Plaques including photographs and biographical information about each inductee are on display outside the Quant Gym.

This year's inductees are:

Harold Paukert, Kohler, captained and started fullback on the 1927 football team, which was honored Saturday night. He said in his acceptance speech that athletics was the primary motivation for him to get a college education, which led to a long and satisfying career as a school administrator. He recalled that local jeweler Ferdi Hary paid his expenses. "I could have turned him down and became rich," Paukert joked.

Fred Seidensticker, Plover, was a member of the 1929 basketball team and 1929 who also lettered in football, said that in his days on the gridiron "we used a lot of tape and bandages and didn't get tired by having specialty teams running on and off the field. We just played offense and defense." He said in a lifetime of education and observing school sports, that the pride and perseverance must be cultivated as well as success.

Johnston, Phoenix, who in the 1930's was UWSP's first athlete to gain first-team all-conference honors in basketball, was unable to attend because of health problems. His daughter accepted the award for him.

Clarence "Sonny" Reudigers, Summerville, S.C., who in the 1960's was one of the most versatile and top offensive football players ever to play for the Pointers, expressed delight in having played before local fans and said "people of Stevens Point are the greatest, as ever."

Reed Giordana, Kaukauna, who made his mark during the mid-1970's as the most prolific passer and total offensive producer in the history of Pointer football, paid tribute to his coach, Monte Charles, and said Charles should be regarded nationally as a pioneer in the use of the "shotgun" approach. Giordana added, has become popular at all levels of the sport.

Leonnard Gibbs, director of development and executive director of the UWSP Foundation, was cited for many years of providing special support that has contributed to the school's successes in sports. Athletic director Don Amst led a plaque to Gibbs citing Gibbs contributions of effort, service, time and leadership.

Amst said also that the UWSP Excellence in Coaching Award" to two graduates who have made major contributions in the advancement of athletics on the local level. Recipients were Marcie Engebret, class of 1919, who now is on the faculty at pesthio High, and Don Heis- mert, class of 1969, who serves at losa-Scandinavian High. They also received plaques.

The Hall of Fame "awards, dedicated to the memory of a longtime coach and athletic di- rector at UWSP who died in 1979, was given to: Julian H. Hesser, senior physical educa-

Reudigers fourth at Notre Dame

By Wade Turner
Staff Reporter

The UWSP men's cross country team ran into their biggest challenge of the year as they competed in the Notre Dame Invitational this past Friday. Running against primarily Division 1 (scholarship) athletes, the Pointers could only garner a 15th place overall.

This did not tarnish the performance of junior Arnie Schraeder, who posted a 34:30 clocking en route to a sixth place finish. Chris Brewer of Michigan won the individual title, covering the five-mile course in 25:13.

"I thought Arnie ran extreme- ly well," noted coach Rick Witt. "The only people who beat him were scholarship runners from bigger schools."

At Presthio High, and Don Hei- mert, class of 1969, who serves at losa-Scandinavian High. They also received plaques.

Spikers up record to 19-5

by Scott Hurtskamp
Staff Reporter

After last weekend, the Pointers' spikers only have 48 states left to conquer. The Stevens Point women's volleyball team, ranked 5th in the nation, took a 1-4 record to Minnesota and came back five wins richer despite two losses.

On Friday night the Pointers' Ruth Donner hanged 18 spike kills and Karla Miller 14 en route to victories over host Macalester College 14-15, 14-13, and Bethel College 15-14, 15-10, before moving on to the Gustavian Adolphus tournament Saturday.

The Lady Spikers got off on the right foot in the tournament by mauling Hope University 15-6, 15-8, but then disaster struck as the Pointers hit a brick wall in the form of Gustavian Adolphus, ranked number nine in NCAA Division III, as they lost by scores of 15-14, 15-10. The same brick wall and handed the Pointers their second straight loss, 81 percent.

"We had trouble with serve reception. It was very poor actually," stated head coach Nancy Schoen. "In the games we won, our reception and return was 90 to 94 percent, when we lost, 81 percent."

Karla Miller, Ruth Donner and Carol Larson, who form the central core of the team and have played consistently all season long, pulled the spikers out of their slump while pounding UW-River Falls 15-13, 15-4.

University squad bowed to the Pointers 11-13, 15-7, 15-4. Short Scheu destroyed 11 spikers to keep the team in kills.

"Shirt is consistently good at blocking, and is usually at the top with (spike) after a kill. Her name sometimes gets lost in the shuffle with all the stars on this team," expressed Schoen.

Team captain Carol Larson is the culprit of setting up spike kills (338 for the year), and for her efforts was named in the all-tournament team, with a high of 33-set-ups for kills against South- west State.

Schoen credited the Pointers' improved defense for the weekend.

"Improving the 3-back defense has allowed the players to read the spikers, as well as our blockers to cover a specific territory, which eliminates confusion between teammates. "The improvement showed this weekend. Her name sometimes gets lost in the shuffle with all the stars on this team,' expressed Schoen.

The Pointers were ranked 5th in the nation.

Return service totals escalated to 39 percent in the Pointers' final game of the weekend, as a stingy Southwest State captured a 39-15, 15-8 victory over the Pointers.

Football, cont.

take the game too lightly. "Their defense is tenacious, and their offense can move the ball," Lefty warned. "We've been going hard against some good football teams the last five weeks, and Oakshott is going to be a bit of every challenge, simply because of what happened against Whitewater."

SEMESTER IN SPAIN

Not just for Spanish majors only, but for everyone: beginners, "in between" students, and advanced. Put some excitement into your college career!

SEMINAR/CRUISING/ADVENTURE: Cost is about the same as a semester in a U.S. college $3,480. Price includes jet round trip to Seville from New York, room, board, and tuition complete. Government grants and loans may be applied towards our programs.

Live with a Spanish family, attend classes four hours a day, four days a week, four months. Earn 18 hrs. of credit (requirement for a semester taught in U.S. colleges over a two year time span). Your Spanish studies will be enhanced by opportunities not available in a U.S. classroom. Standardized tests show that language subjects' students' language is superior to students completing two year programs in U.S. Advanced also courses.

Hurry, it takes a lot of time to make all arrangements.

SPRING SEMESTER - Jan. 30 - May 29
FALL SEMESTER - Aug. 29 - Dec. 19 each year.
FULLY ACCREDITED - A Program of Trinity Christian College.

Maybe the playing field isn't in top condition, and maybe the course was scarce, but the Stevens Point rugby club pulled off another Saturday evening rout Racine, 26-5.

The 3-1-0 record of Stevens Point started the scoring bombardment at the 15 minute mark of the first half with a four point try. He tried his own heroism by causing the conversion kicks, upping the score to 8-4. Kryztoff later powered into the zone for the ruggers' second-four-pointer of the half. Russell followed suit in the 2nd. The Wisconsin Conference boycott.

Point's 12-4 lead at half marked the first time since Stout (3 weeks ago) that their opponent had failed to score in the first 40 minute stanza.

"It's a good balanced running attack," expressed captain Rick Larson. "The cohesiveness between forwards and backs (with their passing) was good. It enabled us to get the ball and score.

Racci got the drive to run with Racine in the second half with his second try of the day on a two yard scamp, snapping the score 15-4.

Check the trip made the trip with only 11 members, but a full corps of backs. The Point ruggers were able to win a powerful offensive with a strong defense to claim Racine blankly searching for the try in the zone.

John (Goldie) Golden smashed the ball into the try and knocked out Pat's photo anamol at 204. It was his first score of the season, "Not too bad for my first game," exclaimed Goldie.

"We really needed this win," an elated coach after the game. "The guys were down...

Ruggers pound Racine
Lady Harriers fourth in St. Olaf Invite

by Kent Walstrom

Sports Editor

The UWSF women's cross country team ran into some tough competition and a weather-beaten course, but came away with an impressive fourth place finish at the St. Olaf Invitational last Saturday.

UW-Eau Claire, a perennial conference power and the defending national NAIA champions, finished third runners in the top ten to claim the title with 43 points among the 15 team finish. Oakshott (98), added a second place finish, followed by Mankato, 369, and Stevens Point, 132. Carleton ended up in the fifth spot with 141 total points.

"We were real pleased with the team, but disappointed with the outcome of the meet," said coach Len Hill. "Our fifth runner (Joe Raascher) cramped up with a quarter of a mile to go, through a season of the race. Worshiper (Sue Rauscher) cramped up that area, and these ladies are fending advantage for us." "La Crosse (Olaf) on Friday and ran the conference power and the country team ran into some doubles matches for a 7-2 presentation all last Saturday.

"We run as a team and we worked together, all all in all it was a good weekend for us. I guess the thing we have to work on now is our sixth and seventh runners," Hill added. "We have to try and move those people up, so that we have some insurance in case something happens to our front runners."

In the J.V. meet at St. Olaf, Eau Claire again dominated the field, as their sixth points easily outdistanced St. Olaf, second with St. W. St. Ben's managed a third with 39 points, followed by Stevens Point, fourth with 399.

Kay Wallander was the top individual finisher for the Pointers, notching a 14th place finish, followed by Pam Preyboehl, 15th, Maggie Krochalt, 20th, and Sandy Klise, 24th.

"We fielded a complete J.V. team, and that in itself is a reflection of the depth we have this year that we didn't have a year ago," Hill noted.

Netters drop match to La Crosse

by Kent Walstrom

Sports Editor

The Pointers, stumbling through a season of sagging injuries and inconsistent play, fell again last Wednesday in conference for La Crosse.

The loss dropped the Lady Netters' season record to 6-7.

The Indians, who boast a team record of defeating anyone in the conference, beat off on the Pointers with four single victories and a clean sweep of the doubles matches for a 7-3 win.

"La Crosse is practically an all-new team, and much stronger than last year," conceded head coach Dave Nass. "They're ranked No. 1 nationally, and right now it looks like they deserve to be there.

Kris Hoel led the Pointers with a fifth place finish and ended with a time of 19:27. While teammate Sheila Ricks led the ninth spot with a clocking of 19:36. Amy Cyr (18th place, 19:43). Andrew Bureau (31st place, 20:31) and Kathleen Seidel (39th place, 21:31) rounded out Point's top five finishers in the race, which featured better than a hundred runners.

"We ran as a team and we worked together, so all in all it was a good weekend for us. I guess the thing we have to work on now is our sixth and seventh runners," Hill added. "We have to try and move those people up, so that we have some insurance in case something happens to our front runners."

yearbook. I just wish the cam-
pus would be more excited about it."

The Horizon sends all organi-
zations, groups, and debate
parlaments letters asking them to set dates for the first week of their
yearbook to try and generate
interest in the yearbook. "People
like to see their picture, but we can't force them into one. It's their choice," Baser said.

She explained that this year the
sections in the book were
kept more uniform in length to
try to give equal representation.

Ruggers, cont.

and it was a good morale boost.
We gave them a good, physi-
cal workout,"Adds Quade.

The Stevens Point "B"s dropped a 94-46 decision to Racine in a 31-13 game.

Point's rugers will be at full strength this week as they get their four number state rank-
ing against number one Madison at 8 p.m. at the (rugby) traditional
field.

Coach's, cont.

his basketball teams at Iola-
Scandinavia have compiled a 12-1 record. His teams
include three division cham-
pionships, two conference titles and one league championship.
