pointer: night at the movies
A privilege for the wealthy?

The Reagan Administration is off and running into its second term. And as it races to achieve the “balanced budget,” it’s ripping large financial chunks out of various governmental programs, one of which is education.

Why is it education is one of the first programs to fall under Reagan’s budget cutting ax? Does he, like Assemblyman Tom Lofts, believe that students spend their financial aid checks on stereo and equalizers? Does he believe a shortage of equipment and outdated materials build the knowledge necessary to qualify a student for entrance into a competitive job market?

Reagan entered his first term in 1980 and cut education spending a total of 25 percent. Now into his second term, Reagan is proposing more education cuts totaling almost half a billion dollars.

One of these cuts will be in college work study programs. Having already decreased work study availability in his first term, Reagan is out to do it again. If you receive work study now, chances are you have next to no trouble finding a campus job. But wait. Next year you could be combing the want ads, spending weeks looking for a job like the one you had this year, but no longer qualify for financing.

Work study cuts affect campus employees as well. While planning their 1985-86 fiscal budgets for Student Government a few weeks back, many organizations found themselves increasing their salary budgets. Why? Because it has become increasingly difficult to fill positions which were previously occupied by work study recipients. Once these positions gradually become “regular” which wind up costing the organizations, and indirectly Student Government, more money.

Another major portion of Reagan’s proposed reductions is to limit the amount of federal student aid to $4000 per year. In addition to work study, this $4000 limit would include all grants and student loans. Students from low income families attending all but low cost institutions would be most strongly affected by this potential cut, as would graduate students faced with limited access to GSL’s and federal programs.

In a recent interview, UWSP Director of Financial Aids Philip George told The Pointer that if “Reagan’s proposals are enacted, 49 percent of UW Stout’s students would be affected either by elimination of current aid or severe cuts.” Income students, (providing they are eligible for aid at all) would be faced with the threat of losing much, if not all of their financial aid during the course of their years in college. The severity of these cuts could determine whether or not students would be able to complete their education.

In justification of these $463 million dollar reductions, Reagan is claiming higher education will be come a privilege for those who want to take advantage of it. President isn’t saying that this “privilege” is fast becoming open only to those with the financial means to obtain it: the higher-middle and upper classes.

Education is already a privilege. It’s a chance to be something you want to be. Reagan is not creating that privilege. He’s limiting it. If Reagan’s financial aid cuts would grant the privilege of higher education to those in high income brackets and deny it to those lacking the financial means to meet rising education costs. Where is the privilege in that? The wealthy have no problem in obtaining a college education. It is the low income student who faces the waste of his academic talent due to a lack of funding.

During his 1984 presidential campaign, Reagan bombarded the American public with patriotic messages, calling America “The land of opportunity.” It’s time to make sure that opportunity includes education for...
New teacher program receives certification

The Department of Public Instruction has certified the University of Wisconsin-Stevens Point to prepare teachers to serve the state's emotionally disturbed and mildly/moderately retarded elementary and secondary schools.

In addition, DPI has provided UWSP's School of Education with the first certification of a multicultural teacher preparation program. It is designed to meet a need in elementary and secondary schools for teachers who are qualified to serve children with handicapping conditions in the same classroom.

This new program is geared largely for small school districts in the state. In these places, it is common for schools to have one teacher with a variety of mildly and moderately handicapping conditions but too few of them in each category to justify separate classrooms and a total of remedial provisions in the multicultural certification. Students can now be in one classroom, regardless of their handicapping, providing their needs are quite similar.

Multicultural certification covers the areas of learning disabilities (which has been a special area within UWSP's School of Education for many years), emotional disturbance and mild/moderate retardation.

The UWSP program is unique in its multicultural certification in one or all three of these areas of exceptional education in addition to the regular teacher preparation program. They can obtain it at either the undergraduate or graduate level.

In the multicultural programs, students earn certification by earning less credits than if accreditation were pursued in one distinct program at a time. Professor Darvin Miller, who coordinates UWSP's offerings is in prepared professionals to serve children with emotional, educational needed, said endorsement of the programs will help the university a better serve area educators. There are teachers throughout Central Wisconsin who are only temporarily certified in some area of special education, he explained.

Signs are going up this week in University of Wisconsin-Stevens Point buildings designating smoking areas. These areas are allowed to smoke.

Hoffbeck said these places now are designated for smokers:

- Collins Classroom Center - north lobby on first floor;
- Albertson Learning Resources Center - east and west lounges on first floor;
- Science Building - east lobby on first floor facing Reserve Street and north lobby on first floor facing Fourth Avenue;
- Park Student Services Building - east lobby on first floor;
- Fine Arts Center - court yard;
- Professional Studies Building - east end of cafeteria on first floor, faculty lounge on fourth floor and nontraditional student room on third floor;
- Natural Resources Building - east and west lounges on first floor;
- Maintenance and Material Building - training room;
- Health, Physical Education, Recreation and Athletics - south lobby adjacent to Berg Gym and south lobby adjacent to Quandt Gym;
- Communication Arts Building - lounge in room 110C; George Stien Building - protective services room.

Separate smoking areas are in three eating student centers and in the residence halls were designated earlier.

Religious groups in bid to eradicate hunger

The needs of starving people in famine-plagued Africa are among members of student religious organizations at the University of Wisconsin-Stevens Point into common efforts.

The groups have begun a campaign of lists and prayers about the crisis and are planning to fast as a means of raising money and drawing attention to the massive starvation.

The project involves the LuGraduate-

Festival on women

A seven hour festival focusing on women and their talents and achievements will be held Sunday, March 3, at the University of Wisconsin-Stevens Point.

Womenfest from 11 a.m. to 6 p.m. in the University Center will be open to the public with an on site charge sponsored by the Woman's Studies Program and Women's Resource Center at UWSP.

The program will include performances throughout the day by women of the area who participate in vocal, dance and theatrical groups; a series of films; information booths staffed by members of organizations that provide special services to women; several large photographic exhibits and related programs; demonstrations on food preparation and crafts; a cafe; and the sale of books, recordings and postcards on feminist topics as a fund raiser for the Women's Resource Center.

Alumnus speaks on office of a liberal arts education

An alumnus of UWSP who received the 1984 Wisconsin Entrepreneurial Woman of the Year Award will speak on campus Thursday night, March 7.

Marshall Lindsay, founder and president of the Lindsay and Stone Advertising, formerly a member of the Wisconsin-Stevens Point.
Graduation speakers
To the Editor: As soon-to-be graduating sen-
ers we have been contemplating our commencement ceremonies, and have come to the realization that we do not know who the keynote speaker will be or how one is chosen. We are hoping you will be able to help answer these ques-
tions. In the meantime, may we offer our suggestions for future speakers, assuming ours has already been chosen. Each of the following people would have something to offer college gra-
duates: Elizabeth Dele, Pope John Paul (or Deb McArthur, whichever is available), Jesse Jackson, Edwin Meese (only if he is the Attorney General), Constantine Caramanis (if he is better and not on vacation), Bishop Desmond Tutu, Peter Ueberroth, Judy Goldsmith (we missed her the first time), Billy Carter, Jacky, Tina and/or Ted Turner, Huey Lewis, or Joan Rivers.

Thank you very much Anne Oswald and Roberta Wood

More on the GPU
To the editor:

As a UWSP student with no connections to any campus orga-
nizations, I feel that an outsid-
er’s opinion needs to be directed towards the Gay Peoples Union funding issue. We have heard the irrational biased argu-
ments from people directly affected by the S.G.A.’s funding decision, and now it is time to measure up the pros and cons of the issue with the possible bene-
fits to our student body in mind.

The GPU is required to justify its funding requests each year; but is the organization “helping students recognize their digni-
ty” as quoted from Sharon Wolfe’s letter of last week. And can these cases be documented? If so, how much value should so-
ciety place on such an insightful realization? I feel that if the GPU were to make public such facts and figures it would surely quiet their opposition.

Also, a major problem that faces the GPU rests in the fact that most people immediately associate gays with sexual con-
version. This is only natural for a person who enjoys relations (sexual) with people of the oppo-
site sex. Just as cigarette smoke angers nonsmokers, so do the same sex. Thus, love must be stressed and sex downplayed. As a UWSP student for 4 years I have never heard such an argument from anyone. So it is my belief that the GPU is doing very little for the students of UWSP.

On the other side of the coin, the GPU can do a lot of good for those who oppose their funding.

It is a fact that only 12 UWSP organizations allocate the funds S.G.A. allocates the GPU. Therefore, it is a fact that the GPU must face the facts and that it should be expected. Also, the attendance of GPU events is not too high. This or so I have been told.

The GPU must face this fact— they are one of the few funds that must prove to be beneficial to the student body. And the fact is, the stu-
dent body hasn’t been able to see any great success from the GPU. Unlike to Sharon Wolfe’s dismay, a UWSP Nazi Union or Heterosexual Peoples Union may be very popular and educa-
tionally successful groups. They certainly have as much right to be on campus as the GPU: in such a competitive society one must cater to the customer’s needs and wants in order to re-
main successful in the long run. These factors certainly detract from the GPU situation rather well; the threat of competition should strengthen the GPU’s bonds to its customers. But with their past track record it is hard to believe.

More on civil rights
To the Editor:

I believe that there is no longer a law that prohibits discrimination in federally-fund-
ed educational institutions? Yes, that’s right!

It was just last year when the existing civil rights laws were narrowly interpreted in the Grove City College vs. Bell case.

On February 28, 1984, the Su-
preme Court ruled that a Feder-
al grant recipient must ensure nondiscrimination only in the program which actually re-
ceived the funds, rather than in all its operations.

The Civil Rights Restoration Act of 1985 has come about since that time. The federal funds that were once theoretically required to be e-
herited from national state and local government federal funds will not be used to discriminate against minorities, women, the disabled, or the older.

It requires that any agency or institution which receives fed-
eral funds must have comprehensive nondiscrimination poli-
cies in all areas of operation.

The Civil Rights Restoration Act would restore the four major civil rights statutes to their pre-Grove City scope of the coverage. It would make clear that an entire organization would be prohibited from discriminating when any of its parts re-
ceives funds.

Unless the Civil Rights Resto-
ration Act of 1985 is passed, stu-
dents could legally be discrimi-
nated against. We hope that you will consider this by writing to Senators Proxm-
ire and Kasen, and encouraging them to pass this bill. For more information on this bill, stop in at the SGA office.

Women’s History week
To the Editor:

In July of 1983, an important proclamation was passed by the U.S. Congress for National Wo-
men’s History Week. This week was originally designated because women were being accorded fair mention in history text-
books. With less than 11 percent of the chapters on women, women were being portrayed in shrink-
age. National Women’s History Week was developed in the hope that women and men would find a positive role model and that women wouldn’t be passive non-participants in history.

With a joint annual declaration by a Joint Resolution of the U.S. Congress in coordination with the National Women’s History Week, it is hoped that women and men will find a positive role model and that women won’t be passive non-participants in history.

Women’s History Week is being sponsored by the Women’s Resource Center. We hope that you will make this year a special history week and consider it an opportunity to learn about the heritage and the strength of women in our community.

24 Hour FAST
for World Hunger
Wed, March 13

From 6-9 p.m. on April 7th.
Sign up in your Residence Hall or Call 346-3678 and leave your name and number.

Thanks Point students
Dear UWSP Students:
Thank you so much for caring and sharing. We received your generous gift of $1,415.59 on Jan-
uary 29, 1985. Church World Ser-
vice will put this gift to work in Ethiopia famine relief projects.

In Africa, the difficult condi-
tions that have brought hardship to millions persist. According to the United Nations Food and Agriculture Organization (FAO), the food situation in Africa looks serious for all of 1986. While the FAO has reduced its list of food-short nations from 24 to 21, it estimates these 21 will require almost twice as much food this year as the 24 nations identified in 1984.

Church World Service, along with colleagues in many of these countries, continues to help people in need. For example, at the request of our partner agency in Mauritania, Church World Ser-
vice has shipped 350,000 pounds of mixed foods (honey, beans, sorghum, rice, wheat and vegetable oil) to that coun-
try. The Cape Verde Islands, Ethiopia, Sudan and Tanzania have also received food shipments courtesy of Church World Service.

In Sudan, Church World Ser-
vice is providing assistance through the Sudan Council of Churches. CWSC recently made a grant of $100,000 to the council for the purchase and distribution of food to Ethiopian refugees resettling in camps in the southern part of Sudan.

Please call the toll-free Church World Service hotline, 1-
800-233-1310 for the latest updates on Ethiopia and the food crisis for the U.S. (in New York state, please call 212, 870-3679).

Again, thank you for sharing!

Democrats convene at UWSP

by Noel Radomski
News Editor

Although they may have gotten knocked down in the presidential election, the Young Democrats of Wisconsin are once again confident and united. The Young Democrats of Wisconsin held their state convention on the UWSP campus last weekend and drew up their state platform. The Young Dems also conducted a straw poll for the 1986 U.S. Senate and governor's race.

The convention hosted many state officials, including Ed Garvey, Wisconsin's deputy attorney-general; Tim Cullen, Senate Democratic Majority Leader; Matt Flynn, state Democratic Party chair; and honorary lifetime Young Democrat Midge Miller.

Speaking to a group of 125 Young Democrats, Miller spoke of the responsiveness that keeps the Democratic Party in touch with the public.

"New ideas, new blood, new commitment towards the values. We must not forget about our traditional values... The equality of races, of genders and diminishing the number of poverty," Miller said. He added that because of the new right, there is a growing polarization between the rich and the poor, as well as the races.

Senator Cullen stressed the need for younger people to become active in the state and local politics. "More young adults should run for public office. The Wisconsin electorate is more willing to vote for the younger candidates. If you care about the issues, the age isn't that important."

Cullen went on to add that he would be interested in running for governor in 1986.

Matt Flynn announced he would not seek re-election as party chairman in June. Flynn, if chosen to run, will be a serious candidate for the U.S. Senate race in 1986.

James Shuller, co-chairman of the state convention, spoke of the issues that Young Democrats are addressing now. "The farm Bill calls for an immediate freeze on whatever source, public or private. But we believe the right to sexual privacy between consenting adults is a basic human right. We advocate repeal of legislative restrictions concerning sexual conduct between consenting adults."

We strongly oppose passage of a constitutional amendment to ban abortion.

We support the reintroduction and passage of the Equal Rights Amendment at the federal level.

International Affairs

We support the Kennedy-Flaherty bill calling for an immediate freeze on the site of U.S. nuclear arsenal.

We support a pledge to not use nuclear weapons in a first-strike capability.

We support the Moakley-DeConcini bill calling for extended voluntary departure status to El Salvadoran refugees.

We oppose the South African policy of apartheid, and American investment in South Africa while apartheid persists.

We oppose repression of workers' union solidarity in Poland, and urge its recognition as a legitimate voice of Polish people.

We oppose all economic and military aid to the counter-revolutionaries or Contras who are waging war upon the people and sovereign government of Nicaragua.

We believe that human rights, being the most fundamental of rights, should be the focus for the granting of foreign, economic and military assistance. Efforts should be made such that human rights are not the expense of economic development.

Young Democrats State Platform

James Miller of Polonia, Wisconsin, also supported all economic and military assistance to the government of Grenada as currently administered.

All support for military dictators such as the govern-

Young Dem's straw poll

by Noel Radomski
News Editor

Governor

Tim Cullen: 46 votes, 54.8 percent
Mathew Flynn: 17 votes

David Heilbach: 5 votes, 43 percent
David Obey: 3 votes, 2.6 percent
Martin Schreiber: 2 votes, 1.7 percent
Jim Flynn: 1 votes, 1 percent

Straw Poll Results:

U.S. Senate

Matt Flynn: 44 votes, 38.3 percent
David Obey: 36 votes, 30.4 percent
Timothy Cullen: 14 votes, 12.2 percent
Ed Garvey: 6 votes, 5.2 percent

Martin Schreiber: 2 votes, 1.7 percent
Tom Lofus: 1 votes, 1 percent
Jim Flynn: 1 votes, 1 percent

Ed Garvey: 2 votes, 1.7 percent

The straw poll assumed Governor Anthony Earl would run for the opposite office, and his name did not appear on either list.

Parking lot proposal

by Theresa Bechklein
Staff reporter

An alternative parking proposal was introduced to the Physical Facilities Planning Commission last week Monday by the committee's coordinator, Mary Williams; John Sundt, director of General Services; and Kathy Wachowita, manager of Parking, Telephones and Transportation.

The alternate proposal was recommended by Parking Services for a coin-operated lot which would provide adequate parking for visitors, commuting students and faculty-staff.

The plan begins with Lot X and Lot B. These lots would be paved, strip and be made such a gate for co-operated parking.

Those faculty-staff permit holders from Lot B would be moved to Lots R and M.

Lot X is presently assigned to senior commuting students. Those students would be moved to Lot B which will also be paved and striped.

Students presently in Lot T, junior commuting student, would be placed in Lot P along with sophomore and freshman commuting students now in Lot Q.

Students living in Burroughs, Knuezel, Watson and Thomson will move to Lot J; Baldwin, Neale, Hansen and Steiner will move to Lot Q; and Allen Center dorms will park in Lot L.

"It's hoped the new proposal will alleviate the parking problem as well as delay or even postpone the present proposal, that is developing a lot on the corner of Fourth and Jardine," said Mary Williams. "We'd like to make the best use of our current resources before expanding or spending on a new lot."

The proposal will go before the Cabinet of Administration next week for final approval.
Proposal to trim student aid criticized

by Al P. Wong

Secretary of Education William Bennett has voiced his support for a Reagan plan to trim federal spending on student aid programs, a recent report says.

Bennett's comments drew heated criticisms when he sug­gested that continuing aid now may have to be cut from those students who are "like some dark, immoral, evil, vicious"—a stereotype of drug users, welfare recipients, criminals or others—"who seem to be just taking advantage of the system," Bennett quoted a reporter.

"If I knew he would make these kinds of statements, he would have to resign as Secretary of Education," Senator Robert Stafford, Republican of Vermont, said. Stafford was a mem­ber of the panel that recommended the new Secretary's confirmation as the Secretary of Education in the Senate.

Although Bennett explained in his defense that he did not make the comments about street and violence at the University of Illinois, the American Civil Liberties Union (ACLU) of Illinois on Monday announced it would file suit to challenge the Secretary's conduct.

"It is a public official's responsibility to stop making these kinds of statements to get political mileage," said an ACLU attorney.

The ACLU, along with students, teachers and others who have been targeted by Bennett's statements, will file a petition to challenge the Secretary's remarks, the attorney said.

The full weight of the Califor­nia governor's threats was laid out in the California State University System, which provided a $1.67 billion budget in 1986.

The school board's budget, which includes $1.67 billion in state aid, would be reduced by more than $2.7 billion under this proposal. Forty-three percent of the students who receive state aid in the state have incomes of less than $6,000, and more than 40 percent of the students' families come between $6,000 and $18,000; it would have their aid cut substantially.

"Almost 22 percent of aid re­cipients attending independent colleges and universities should be able to go," he asserted.

Bennett felt that the federal government's first responsibility should be to assist the neediest students before giving aid to other students.

According to a report by the National Institute of Independ­ent Colleges and Universities on the effects of the president's plan, "More than one-fourth of all aid recipients attending inde­pendent colleges and univer­sities would have their financial aid reduced by $2.7 billion under this proposal. Forty-three percent of the students who receive state aid in the state have incomes of less than $6,000, and more than 40 percent of the students' families come between $6,000 and $18,000; it would have their aid cut substantially.

Scores on graduate tests drop

by Al P. Wong
News Editor

College student scores on most of the standardized tests used for admission to graduate and professional schools dropped from 1964 to 1982, a report issued by the National Institute of Education said.

The reason seems to be that students who major in the professional and occupational disciplines, which have grown rapidly since the 1970's, have lower scores than do students who major in arts and sciences, the report said.

In studying the test scores of college graduates, Clifford Adelman based most of his analysis on test-score data published by the testing services. He criticized those organizations for not providing policymakers with consistent and comparable test scores and data about those who take the tests.

Adelman called the test scores "a recognized common current measures or whether the quality of test performance predicts performance in graduate school, professional school, or a subsequent career is beside the point in the symbolic environment of public interpretation," he said.

The Educational Testing Service, after learning of the study, issued a statement that said, in part, "If the students taking these tests were a good cross-section of the full graduating class each year, their scores would be useful as partial indicators of student learning, especially when combined with other relevant information. But these test-score data are not this useful. The students who take these tests are an unrepresentative and changing sample of people."

According to the report, the arts and sciences, particularly in mathematics, economics, philosophy and chemistry, are "characterized by formal thought, structural relationships, abstract models, symbolic languages, and deductive reasoning."

"Students with those skills do better on standardized tests," Adelman said.

Noting that his conclusions had been drawn mostly from published data, Adelman called on researchers at the testing services to study the issues and verify his conclusions using the more ample primary data to which they have access. He also urged test administrators to require all test-takers to provide background information, and to ask the same questions about factors as na
ture language, work experience and undergraduate major.

Religions

You have ever been curious about the beliefs and practices of religious faiths and denominations other than your own? The UWSP Interfaith Council is beginning a series of presentations this semester which will look at various religious faiths and denominations. The presentations will be on five separate Tuesday evenings in the Nicolet-Margaret Room of the UC at 7:30.

Here is the list of presentations for this semester:
March 5, Bahai-Baha'i Club
March 12, Lutheran Student Community
April 9, United Presbyterian, United Methodist, United Church of Christ, United Minstes in Higher Education
April 23, Roman Catholic
March 30, Episcopal-Canterbury Club
If your group is interested in doing a presentation, please let us know. Contact Nancy Moffatt, 3155 Clark St. Phone 341-6955.

Not so long ago, in a galaxy not so far away. America's number 1 pizza delivery company made students an offer:

If your group orders more pizzas than competing groups, you'll win a free pizza party!

It's so easy to play. Call your nearest Domino's Pizza store for details.

Domino's Pizza Delivers™

DORM WARS™

The Contest:

Domino's Pizza will award free, 30 large pizzas and $50.00 cash for liquid refreshments to the group purchasing the most pizzas starting 2/28/85 and running through 3/29/85.

The Rules:

1. Carry-out orders and all deliveries made from your area's Domino's Pizza store will be counted if we are given your group's name and address.
2. Any pizza over $10.00 will be counted twice.
3. The winning group's name will be published in the local newspaper.
4. The location and time of the party will be convenient to both the winners and Domino's Pizza.
5. The 30 pizzas will be 2-item pizzas. The winner will have the choice of items. The pizzas do not have to be the same.

Fast, Free Delivery

101 N Division St
Phone 345-0901

Our drivers carry less than $20.00. Limited delivery area.

The Pointer Movie Awards

and the nominees are ...
by Lari A. Herne

Are you in the mood to see a light, humorous, easy-going movie or one that is serious and tense with superb acting? If you prefer the latter, the current screening of "The Falcon and the Snowman," currently playing at the Campus Cinema here in Stevens Point, is a must.

Fashioned from the book by New York Times reporter Robert Lindsey, this true story is based on the life of Christopher Boyce, an ex-marine who turned on his native American country and sold top secret information to the Soviets. How could any true American turn on his country like that?

What's even worse is that he sold top secret information to our worst enemies—the Soviets! When you think of someone engaging in this type of activity, he is immediately coined as a traitor punishable in the worst possible way.

Then why did I end up feeling sorry for Christopher Boyce? Was it the superb acting ability of Timothy Hutton who played the part? That was probably part of it. But the other part was because Chris Boyce really believed that he was doing the right thing. He thought it very wrong that the United States government was taking advantage of weaker governments, so he turned against the United States. It's hard to accept Chris Boyce as a criminal because he is so much like you or I; basically a good person.

The minute Chris Boyce bitches up with his drug dealing friend, Dalton Lee, who is played very well by Sean Penn, it is inevitable that something will go wrong. There is a feeling of tension that stays with you for the remainder of the movie because these two young men are not professional spies. Christopher is just bent on getting back at the United States for taking advantage of less fortunate countries, and Dalton Lee is just interested in making lots of money to support his drug habit and keep himself out of the eyes of the law. Neither of them has espionage in their choices as a future career.

This movie will keep you questioning your own basic principles. I had to keep reminding myself that these two young men had turned against my country, and I knew in my heart that this was very wrong. But on the surface, my basic thought is..."The real India," thus they ask the most reasonable

Christine, cont.

character image than is achieved from reading King's novel.

The impact on viewers is one of awe and terrified disbelief as we observe the car communicat- ing through her radio with "Golden Oldies," lock her victims inside while they choke, or hunt them down and kill them with chainsaws in addition to repairing herself.

The characters portrayed by Keith Gordon, John Stockwell and Alexandra Paul are well developed in the movie along with the plot.

Christine is a classic horror flick without a lot of blood, swinging maniacs or chainsaw wielding psychos.

It simply can't give you a good scare. A word to the wise: You might want to watch this one before going to the movies. One never knows when your car may become jealous of you or your date!

Robert Redford

"Jeremiah Johnson"

by Amy L. Schroeder

Features Editor

Robert Redford can be seen at his peak best in the 1972 film, Jeremiah Johnson, directed by Sydney Pollack.

Harold Redford plays the part of an ex-U.S. soldier (Jeremiah Johnson) who leaves frontier civilization in 1828 to live freely in mountain top isolation.

His first encounter with the mountain, Redford, who is nearing starvation, encounters the "mighty, grizzly bears," Bear Claw, portrayed by Will Geer.

Geer becomes Redford's companion and teacher, showing Redford how to survive in the bitter isolation of mountain wilderness.

Cop, cont.

trouble with the local police.

They warn him to stay off the case, so Axel assures them he is merely interested.

Nevertheless, the Beverly Hills police force puts him under surveillance, which Axel has no problem thwarting whenever necessary, often with humorous results.

Some of Axel's unethical and self-centered tricks actually lead to some concrete evidence, which in turn leads to a big conflict between Axel, his friends, his enemies and the law.

The climax is very entertaining.

The smaller roles in the movie are very well acted. John Ashton as Sergeant Taggart and Judge Reinhold as Detective Rosewood deserve special praise. And the villains really act like high class, ruthless, smug villains that can't help but detest them.

And for those who are turned off by Eddie Murphy's character foul mouth, don't miss the movie just because of a four-letter word. He keeps his cursing at an infrequent, effective tempo.

The sound track, while entirely a matter of taste, includes such current smash hits as "The Natural" and "YMCA."
In the past 35 years, the ensemble has been on regular performing tours of the United States and through more than 25 other countries. Its recordings are played on radio stations in this country and overseas with "Serenade in Blue," which was produced for the Air Force Recruiting Service, as the most widely heard series. The Airmen of Note also appear frequently on network and regional television programs. They shared the spotlight with Jimmy Stewart and June Allyson in the movie, "The Glenn Miller Story." The leading American jazz magazine, acclaimed The Airmen of Note, "One of the best bands anyone interested in big band jazz or good dance music can hope to hear today." Count Basie who once appeared with the ensemble said it was, "an absolute gas — one of the best I've heard."

The director, who doubles as lead trombonist, is Chief M/C Sgt. Dave Steinmeyer, a Florida native who began playing the piano at age 7 and switched to trombone at 12. He has been in the Air Force since 1961 and with the band since 1965. Steinmeyer has performed with Urbie Green, Phil Wilson, Bill Watrous, Woody Herman, Dizzy Gillespie, Grady Tate, Peggy Lee and Frank Sinatra Jr. The vocalist is Sgt. Bobbie McCleary who is featured in blues, swing jazz standards, ballads, pop rock and easy listening tunes. She began her career as a professional singer in her hometown of Baltimore when she was 18. She moved to Burbank, Calif., in 1973 to work as a secretary for Don Piestrup, former writer/arranger for the Buddy Rich Orchestra. Later she

Cont. p. 13

Cop, cont.

Heat is On" performed by Glen Frey, and "Neutron Dance" by the Pointer Sisters. There are several other catchy tunes in the movie including "Don't Get Caught in Beverly Hills" by Shalamar, "BHC (I Can't Stop)" by Rick James, as well as "New Attitude" and "Shir It Up" by Pati LaBelle. Except for a couple of unrealistic scenes such as policemen enjoying the challenge of facing men armed with machine guns, or Axel's ability to bounce back from a severe beating, Beverly Hills Cop is a well made production worthy of the $37.5 million admission charge. Murphy's talents seem to be limitless, and Beverly Hills Cop catches Eddie in his prime. This one can be put in the "don't miss" category.

Beverly Hills Cop is currently showing at Roger's Cinema 1 on Church Street. Show times are nightly at 7:00 and 9:00 with a matinee at 1:45 p.m. on Sunday.

Falcon, cont.
turned to human compassion which is what compelled Christopher Boyce to betray his country.

Wilsa Dancers
The Wilsa Polish Dancers at Stevens Point are sponsoring an Open Dance Evening on Tuesday, March 5, at 7:00 p.m. in St. Peter's School Gymnasium on Fourth Avenue which will be open to the general public. The purpose of this gathering is to give the community and surrounding area an opportunity to become better acquainted with the Wilsa Polish Dancers and Polish dance. Polish dances, as well as the American Polish Hop, will be taught for all inter-

Jeremiah, cont.

And the mountaintop scenery adds a breathtaking beauty to the film. There is a large amount of hardship and tragedy portrayed in this film, but it is realistically paired with the beauty and self-gratification experienced by this extraordinary breed of men who actually lived this lifestyle. Viewing Jeremiah Johnson brings out the rugged outdoorsman in all of us. And for most people it may be the closest anyone will ever come to experiencing mountaintop existence and total dependence on nature and oneself.

Passage, cont.

On the River Kwai, Lawrence of Arabia, and Doctor Zhivago, is visually beautiful, or perhaps breathtaking is a more descriptive word. The acting, highlighted by Banderas as Dr. Aziz and Davis as Miss Quested, is superb. Lean's exceptional abilities as a director are evident in each frame of the motions picture; however at 2 hours, 43 minutes it may seem a bit long. Despite the length, Passage to India is an enjoyable film, which accounts for its 11 Academy Award nominations.

Airmen, cont.

worked for Warner Brothers. While hearing The Airmen of Note on a tour of California in 1978, she auditioned and won a part.

Wilsa, cont.

estimated. The dancers will also talk about their group and show slides of folk dance ensembles from Poland. Refreshments will be served for those attending. There will be no admission charge or cost for the refreshments.

DRINKING AND DRIVING CAN KILL A FRIENDSHIP

Why is Campus Marketing Creditable?

—First, of all Campus Marketing Inc. was founded by two individuals, Brad Nelson and Bill Ryan formerly of Echo Travel and incorporated it.

—Second, they are headquartered in Glen Elyn, Ill. and sponsored trips on 85 campus last year and over 130 campus this year. (Never offered at U.W.S.P. before)

—Third, Campus Marketing promotes the trip package without promoting the name of the hotel so they don't make any false advertising promises if the trip over sells, and the hotel has to be switched—which happens all the time with the competition in the tour industry.

—Finally, as our record shows, Campus Marketing Inc. is creditable; but don't take our word for it, find out for yourself as you should when considering any service or product by calling the better business bureau, sec. of state of corp. etc. and we furnish these numbers upon request.

Fish & Wildlife: A Question of Funding

by Christopher Dorsey

Have you ever wondered where all the体育 and hunting license fees paid each year for permit to hunt and fish end up? Understandably, Wisconsin sportsmen are asking these questions. This money generated from license fees goes to a variety of ventures which will be needed just to maintain the Wisconsin natural resource treasures: forestry, parks, wildlife, and water quality. And, what is the future for outdoor sports in Wisconsin?

It's important to remember that hunting and fishing activities are just two of the many areas regulated by the Department of Natural Resources. Using a $734 million budget, the DNR is involved with everything from solid waste disposal to acid rain. With this in mind, we can branch the DNR into several smaller departments and sub-programs. These agencies which are charged with management of Wisconsin's fish and wildlife resources are funded by the Wisconsin government.

Specifically, the Conservation Fund is divided into five separate sections: forestry, parks, game, fishing, and natural resource enforcement and related administrative services such as technical service for projects.

The DNR budgets on a two-year basis for most of the programs. However, the 1985-87 biennium is the final two years of a four-year fee funding package for fish and wildlife programs. A license fee increase during the 1985-86 biennium will be needed just to maintain the status quo. This isn't all; the department has recommended that a compensation for crop and other damages be sought through appropriate DNR channels.

EPA has administered agricultural units, isolated deer damage areas, and will add an additional $1.6 million for wildlife management. The DNR Board is responsible for determining whether the request is granted or not. The seven-member board, to the charge of many hunters, approved the fee increases. The Wildlife Damage Abatement Program is centered on three different approaches: bear, deer and goose population control; abatement and technical assistance (assisting landowners in reducing damage); and compensation for crop and other damages that can be sought through the appropriate DNR channels.

This summer, the DNR spent $734 million to support the continued management of Wisconsin's wildlife. In Wisconsin, bears are well, reserved ruins of a once-inhabited region of northwestern part of the province. During the 1990s, the EPA has said it was thinking of an asbestos ban, but didn't follow through with it. When Barns was asked why it took until December 1984 to learn that the act required EPA to defer to other agencies, he was asked, "I don't have a good answer to that. It turns out the agency did not have the focus on the issue as it should have had.

The new law governing trespass is designed to make enforcement easier in the future. The DNR feels the hunter-landowner issue is a major topic facing the wildlife subprogram. This in consideration, the DNR has implemented a modest private land program. Using hunting along with fishing licenses, the program is to pay for full-time personnel to work with private landowners, assisting them in planning, implementing and designing projects to benefit wildlife and wildlife habitat on their property.

The project will start in 1985 and will cost about $500,000 during the next biennium. Species expected to benefit under this program include: gopher, quail, bobcats, ducks and geese. As part of this, the conservation programs in 1980 were successful in the cause of preserving a few more than 5,000 acres of land.

During the past 20 years, a substantial portion of farmland has been converted to other uses, (urban sprawl, etc.) and agriculture has been improved to the point that much more of the remaining land is used to grow crops and can be sold. The excesses are to be removed such as PIR (Payment In Kind) by way of the excise tax.

The excesses are to be removed such as PIR (Payment In Kind) by way of the excise tax. The advantage for hunters is that they receive heavy discounts on federal and state, which are planning to use a swap plan to develop an area for private land has been purchased in southern Wisconsin.

With poor waterfowling in recent years, hunters are wondering what duck stamp funds are being used for. The White House said that Chinese explorers have not taken until December 1984 to learn that the act required EPA to defer to other agencies, he said, "I don't have a good answer to that. It turns out the agency did not have the focus on the issue as it should have had.

Many hunters and wildlife enthusiasts are asking why it took until December 1984 to learn that the act required EPA to defer to other agencies, he said, "I don't have a good answer to that. It turns out the agency did not have the focus on the issue as it should have had.

China Completes Bass Piling. China—the official New China News Agency reports that Chinese explorers have completed their first research base in the Antarctic. The project is part of a joint project with the United States to develop a major research and training center.

Fishing. Wisconsin is enjoying a good fishing season. The Department of Natural Resources has reported that the season is shaping up well. However, there have been some concerns regarding the future of fishing in Wisconsin. The DNR is working with the Wisconsin legislature to ensure that the fishing regulations are enforced.

Eco-Briefs

by Jim Burns

Staff reporter

U.S. Archaeologists

One of the famed "lost cities" of the Andes has been found! U.S. archaeologists have located the well-preserved ruins of a pre-Incan settlement. Dated to about A.D. 500, preliminary inspection of the site, in an uninhabited region of northern Peru, has already turned up a cluster of two-story stone buildings and many artifacts. Terraced mountain sides, stone-paved roads and raised causeways that disappeared into the jungle were also found.

Architectural evidence suggests that the previously unknown culture flourished for about 1,000 years until it was consumed into the vast Incan empire which mysteriously collapsed at about A.D. 1530. Archaeologists hope to find the cause of the Inca's demise after probes are made into cliffside tombs.

"It's the perfect situation for an archaeologist to encounter," said Thomas J. Lennon, one of two leaders of the expedition from the University of Colorado at Boulder that found the site. "The preservation is just excellent due to very little disturbance over the years." Lennon and co-leader Jane C. Wheeler plan to make additional trips to the remote site in the future.

EPA Lacks Power to Outlaw Future Asbestos Use

Washington—An Environmental Protection Agency official recently stated that the agency has the power to ban the use of asbestos without action by two other government regulatory agencies which it is turning the question over to. Acting EPA administrator James Barnes said he concluded the statement after meeting with White House budget officials. The phrase "Most people" is pointed to a 1978 law which requires that the Occupational Safety and Health Administration do what the National Research Council recommends as a matter of public policy.

Earthbound
Funding short.  A $196,000 check this year. Of this, $190,000 (half $70,000) will go to ward Canadian waterfront hab itat where over 70 percent of North America's ducks are pro duced. With Canadian wetlands being exploited at alarming rate, the need for financial as sistance is obvious. Since so many sport species, including duck, geese, pheasants, sharp-tailed grouse and muskrats, just to name a few, are benefiting from duck stamp sales.

According to DNR studies, Wisconsin duck hunters are gaining 254,000 recreational days as a result of funds raised by the sale of state waterfowl stamps. The dollar nestling program from duck stamp funds also serves as a needled pheasant nesting habitat. This has produced an estimated 9,100 pheasants into game birds through out Wisconsin.

Wisconsin's other stamp (trout) has been instrumental in making Wisconsin's trout management program nationally recognized as a highly successful resource management program. Wisconsin's glorious brooks and streams provide abundant populations of trout of many different species. The $400,000 that is generated annually from Wisconsin trout stamp goes to improve trout habitat throughout Wisconsin. The project streams are decided at the annual DNR resource allocation hearing. Streams are chosen as priority by the Budget Bureau get most of the available funding. Stream projects are designed on stream project.

To save fishermen money, the DNR spends $500,000 annually for enforcement of fish and wildlife regulations. These activities are aimed at locating game and fish violators. Both resident and non-resident sportmen. In many areas of the state, sportmen provide the life blood of the local economy.

As most Wisconsin residents know, certain lakes and streams of our state contain fish which are polluted with wide-spectrum of contaminants. Monitoring these toxic lakes is a crucial job for DNR personnel. The said fact that many of these fish are not fit for human consumption is a problem facing the DNR as well as fishermen. The purpose of monitoring fish for contaminants is three-fold: public health protection, fish management evaluation and pollution control. The department will spend over $100,000 per year to test both fish and animals. Current pollution-tubed species in Wisconsin include the double-crested cormorants which show high rates of deformities in offspring. Joining the cormorants on the troubled list are the foresters tern and bald eagle.

The DNR samples representa tive species which they deem as indicators of pollution. These indicator species are usually the first to show signs of “bio-stress” pollution. For nearly a decade, the department has collected and tested a random sampling of fish and wildlife from toxic, such as toxic dyes as PCB's and mercury. The samples are used to indicate that fish in several waters of Wisconsin contain higher concentrations of contaminants than recommended. Along with more contaminants, soil run-off and pollution are destroying many productive spawning beds in lakes and rivers throughout Wisconsin.

Eco-Briefs, cont.

Data showed that current emissions of sulfur dioxide sometimes had an adverse effect on the health of Wisconsin citizens. The new rule replaces a formerly ineffective regulation by providing for company relief in times of economic hardship or technical difficulty, and brings Wisconsin into compliance with the federal Clean Air Act.

Killer bees Near Mexico

Mexico City-Mexico is preparing for the arrival of the African "killer bees" which are expected to come later this year. The African bees, a far more aggressive breed than the European variety used for honey production in the Western Hemisphere, will pose a threat to Mexico's $36-million-a-year honey industry, officials say.

The greatest threat the bees pose lies in their power to gene rally "overpower" the European bees. The African bee is now in Mexico, Columbus is experimenting with queen bees in an attempt to keep the African bees from becoming genetically dominant. Officials are also training beekeepers to identify African queen bees so that they can be removed from hives and replaced with European queen bees.

The bees are expected to enter the United States in three to eight years. But they are not expected to pose a serious problem, said Thomas Rinderer, a bee specialist with the U.S. Department of Agriculture.

Snowmobile Trails Pass 10,000-Mile Mark

Madison—Wisconsin's extensive snowmobile trail system will pass the 10,000-mile mark this season with 300 miles of new trails soon to be completed. According to Larry Freidig, recreation specialist in the DNR's Bureau of Aid Programs, the state's 182 registered snowmobiles now enjoy high quality trails that are capable of carrying them almost anywhere. Freidig attributes much of the system's success to Wisconsin snowmobile clubs which are responsible for much of the trail upkeep and the purchasing of land for new trails. With the increasing inter est in snowmobiling, trail spending will be spending $1,732,000 on improving the trail network this year.

Whey Away

RHINELANDER, WI — A seminar for cheesemakers and the public on the marketing and selling of whey will be held at St. Joseph's Hall in Stratford at 7 p.m., Thursday, March 7, announced Diane Die trich, Environmental Specialist for the Department of Natural Resources.

Participating in the program will be a representative of the University of Wisconsin Extension; Dan Hanson of Land O Lakes, Incorporated; Dean Joy of Kraft Foods; Michael Waldvogel, hauler for Kraft Foods; Jim Benison of Dairy Row Foods; and Dietrich.

The meeting will review environmental acceptable methods of utilizing whey, the watery but nutritious byproduct that remains following every cheese manufacturing process.

Understanding the funding complexities of an agency such as the DNR is difficult, yet so are their tasks. Without a doubt, hunters and fishermen are playing the most important role in providing a future for Wisconsin's fish and wildlife. We must remember that agencies such as the DNR are merely striving to meet the requirements set by a very demanding public. As with any agency the size and scope of the DNR, bureaucracy can be cumbersome, but their track record and success.

With our fishing and hunting license dollars supplying the third largest source of support to hunting and fishing programs, it's our responsibility to understand that it's being done with our money. Even if we occasionally don't agree with funding decisions. With the department can sometimes be too close to the hearts of Wisconsin outdoorsmen, decisions by the department can sometimes be unpopular, but as the old adage goes, "it's a dirty job, but someone has to do it."
After 2 years of undercover in
vestigation, the United States Fish and Wildlife Service arrests of
wildlife agents began serving arrest and search warrants and
filed 42 criminal complaints aga
nin 36 people for illegal
commerce in fish and wildlife, including striped bass from Chesapeake Bay stripped bass.

Robert Jantzen, director of the U.S. Fish and Wildlife Service, said this morning’s action in
volves State and Federal law enforcement agen
tives from Pennsylvania, North Caro
olina, Maryland and Virginia. It cap
ped a federal joint investigation that began in Pennsylvania and North Carolina, respectively, and ultimately spread to Con
necticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Virginia, and the District of Columbia.

“The arrests,” Jantzen said, “are tangible demonstrations of the Department’s commitment to enforce the laws protecting our nation’s fish and wildlife resources. Secretary Clark and the Administration place the highest priority on the enforcement of these laws.”

The federal joint investigation, Federal and State agents uncovered a significant illegal market in striped bass from both the Chesapeake Bay and inland waters of North Carolina. The Chesapeake Bay fish included large fish important to recreational fisheries from North Carolina; whereas, even the striped bass, which are also known as rockfish. The investigations also revealed numerous violations involving illegal taking and sale of deer, waterfowl, hawks, eagles, song birds, and game birds.

Jantzen noted that the illegal harvest of large striped bass has been documented at a time when Atlantic coastal States have been trying to reduce the catch of this important commer
cial fish.

“Striped bass stocks in the Chesapeake Bay and elsewhere are declining at an alarming rate and have been declining for more than a decade,” Jantzen said. “We believe that more than 275 fish of this important spawning fish has contributed to that decline.”

The federal investigation began in the fall of 1983 after information indicated the existence of increasing illegal

activities in several species of fish. The Service and the Pennsy
vania Fish and Game Commission established an undercover opera
tive on the Eastern Shore of Pennsylva
nia, involving State and Federal officers. Early in 1983, the Caro
olina Wildlife Resources Commission set up an independent undercover involv ing State and Federal officers.

The investigations revealed that “oversized” striped bass (larger than legal size limits) were being taken from Pennsy
vania and Maryland waters of the Chesapeake Bay and its tributaries and sold to fish markets and buyers in Philadelphia, New York, Maryland, Virginia, and the District of Columbia. To doc
ument the illegal activity, agents posing as fish dealers purchased some 5,000 pounds of
oversized striped bass measuring between 30 and 45 inches and weighing 30 to 50 pounds each. Virginia law permits the taking of no more than two striped bass over 40 inches per day, while Maryland law at the time prohibited the taking of only one striper more than 32 inches for 90 days during a closed season.

Further investigations indicated that the illegal taking and sale of striped bass from the Chesapeake Bay is of particular concern to Federal and State wildlife officials. The Chesapeake Bay was historically the major spawning and nursery ground for striped bass. That was due to the Atlantic Coast and the estuaries of the Patuxent and the York rivers where striped bass fishery is the nation's heritage, Jantzen said.

services of individuals interested in

volunteer activities. “In the past, such donations were somewhat complicated by gov
ernmental regulations and liabili

ty concerns. The foundation’s establishment, patterned after a long-standing effort and de
crated with the National Park Service, should remove most of the obstacles encountered in the past and prove to be of great benefit to this nation’s wildlife programs and this nation’s wildlife heritage,” Jantzen said.

Ice Fishing Reminder

Minnesota and Iowa boundary waters have been established as the Special Management areas by March 31 and February 20, re

respectively.

Following those dates, port
able shelters may be used by persons actively engaged in fish
ning. The portable shelters shall be re

moved daily while not in use.

Ice conditions can deteriorate rapidly and suddenly, and fishermen often remove the shelters early to prevent flooding and reimag
ing. A depth finder integrated into the ice base, says Law Enforcement Staff Specialist Jim Blanken
heim of the Department of Natu
ral Resources.

General Fishing Season Closures

Blankenheim also noted that the general fishing season for game fish runs through March 1. Some named waters have con

sistent season for game fish af
ther that date including the Wino
nicon River below the dam at

Rhinelander, the Lemoweur in Juneau and Monroe Counties, the East Fork Lemonweir up

stream of the South Fork Lemonweir, the North Fork Lemonweir up
stream to the Tomah Dam, and the Door County mainland. There is no closure in the East Fork Lemonweir of the Cas

Le Rock Flowage in Juneau County upstream to the High
way 13 bridge.

Many other waters in Wisconsin also have a continuous game fish season.

Tip Ups OK for Catching Panfish - The Wisconsin Department of Natural Resources said that tip ups may be used for fishing on cutthroat trout streams, where ice conditions allow, following the closure of the general game fish season.
Secretary Clark appoints board members

Secretary of the Interior William Clark will establish the National Fish and Wildlife Foundation Tuesday and has named seven of the nine individuals experienced in wildlife conservation matters who will serve on its board of directors. The board held its first meeting following an introductory meeting with the secretary.

The foundation was created by Congress to provide a better means of encouraging and accepting donations of property and funds on behalf of the U.S. Fish and Wildlife Service (FWS), an Interior Department agency. Funds raised by the foundation will be used to support FWS activities and programs, as well as for other efforts related to the conservation of America's fish, wildlife and plant resources.

"Establishment of this foundation marks a significant step in encouraging the private sector—both individuals and organizations—to aid in the accomplishment of national conservation goals. The coupling of public and private efforts through this foundation should help us better protect and enhance our wildlife heritage and supports President Reagan's initiative to increase private sector involvement in areas where it can increase efficiency and reduce taxpayer burdens," Secretary Clark said.

The Fish and Wildlife Service is the federal government's primary wildlife agency and is responsible for management, conservation and research activities involving migratory birds, endangered species and inland and anadromous fisheries, among others, as well as operation of the national wildlife refuge and national fish hatchery systems.

Congress created the foundation during its last session with passage of the National Fish and Wildlife Foundation Establishment Act. The act authorizes the Secretary of the Interior to provide personnel, facilities and administrative services to the foundation for five years, at which time it is hoped the organization will have become self-sustaining. The board of directors, whose members serve without pay aside from reimbursement for travel expenses, can appoint officers and employees, including a Secretary of the Board. Its offices are to be located in Washington, D.C.

In general, board members will serve six-year terms. However, of those named as initial members, three will serve two-year terms, another three for four-year terms, and the remaining three will serve for six years. Those whose appointments were announced by Secretary Clark include:

- Thomas G. McMillan, Reno, Nevada, an investment and property developer who has been prominently involved in outdoor sports and conservation activities. A director and founding member of the Pacific Gamefish Foundation, McMillan has worked on a variety of wildlife protection programs in North America and Africa.

- G. Ray Arnett, Arlington, Virginia, who recently completed a four-year term as Assistant Secretary of the Interior for Fish and Wildlife and Parks, is an internationally known conservationist and two-term former president of the National Wildlife Federation. Arnett served as Director, California Department of Fish and Game during President Reagan's two terms as governor. He is a member of numerous conservation organizations concerned with protecting international fish and wildlife resources.

- Mrs. Beatrice G. Pickens, Amarillo, Texas, is the former President of the Amarillo Chamber of Commerce Board of Directors and one of the Texas Southwestern Cattlemen's Association and the American Quarterhorse Association. Actively engaged in ranching in Texas and Oklahoma, Mrs. Pickens is also involved in numerous civic organizations including membership in the Amarillo Chamber of Commerce Board of Directors and the Texas Commission on Art.

- John F. Bookout, Houston, Texas, President of Shell Oil Company and one of the charter members of the "Preservation Wetlands and Duck Resources" (POLDWR) task force which was formed in 1980 by wetland resources and suggest legislative and private sector initiatives to stem the nationwide loss of wetlands. An avid outdoorsman, he is a member of Ducks Unlimited and The Nature Conservancy.

- Michael H. Shlaudeman, Altadena, California, Director of Corporate Operations for Bradshaw Inc., a food brokerage firm, a member and then president of the Monroe Duck Club which spearheaded a long-term

 starts march 1st at a theatre near you.
Summer... Army ROTC can help put yours into shape. With six weeks of challenging, no-obligation leadership training. With earnings of about $672 plus free room and board. And with opportunities for up to $5000 more during your next two years of college. All leading to your commission as an Army officer, full time on active duty or part time in the Reserve or National Guard.

Things are shaping up.

Start shaping up for summer. Find out more today about the Army ROTC 2-year program.

Victorious Pointers win WSUC championships

by Alan Lenke
Sports Editor

Once again the UW-Stevens Point men's basketball team has figured into the WSUC conference title for the fourth straight year, this time winning it outright by defeating UW-Stout in Quandt Fieldhouse by a score of 63-46.

Although the struggle came down to the final game of the regular season, the Pointers started down the conference trail last Friday night against UW-River Falls. River Falls made a game of it, but Point prevailed by beating them, 63-38.

Jeff Olson led the Pointer cause in this game by dropping in 15 points. He was followed by Kirby Kulas and Terry Porter, who each had 14 points. Pointer mentor Dick Bennett felt that despite those numbers, his team had a poor night on the offensive end of the game. The Pointers were only able to connect on 38 percent of their shots for the game, which Bennett reflected on a bad portion of the game for his team.

"We were rushing for the first 10-12 minutes. I don't exactly know why; we would get into that position, but we did. We took some hurried shots. It wasn't so much that they were bad shots, it's just that we rushed them," Bennett said. "I felt we let down a little from the previous games. We were a little flat, and we didn't play with the usual intensity we have."

One area that Bennett was very pleased with, despite the turnovers. The Pointers committed only 13 turnovers, compared to River Falls' 25.

It was the strong Pointer defense that accounted for this difference. Bennett points to one specific period as an example of this.

"Our defense is so related to our offense, that when we're playing good defense, we have to be nice and patient at the other end to capitalize."

In the next game, the Pointers assured themselves of at least a tie for the WSUC title by beating UW-Superior, 68-39. Although their overall total was higher for the night (54 percent from the floor) the Pointers still found themselves in early shooting trouble in this game. Bennett noted that it was very similar to the Friday game.

"I think it comes from an eagerness to just go out there and dominate. I have told our players many times that we're not going to dominate anyone, we have to do it the right way and sometimes that requires a little more time."

Another point Bennett made about the Superior game was the rebounding comparison. The Pointers were able to out-do the Yellowjackets, 25-27, but this was a statistic that Bennett thought would be more in Point's favor.

"Actually, we didn't rebound very well and I was disappoint ed in that. But, River Falls is a very good rebounding team and I didn't think it would be easy there. Superior was not as good a rebounding team and I felt we should have done a better job in that one."

In the Superior contest, Tim Naegel and Kirby Kulas led the Pointer attack with 17 points each. Jeff Olson threw in 16 points and Porter was the other Pointer in double figures with 12 points.

But, the real action took place Tuesday night in the Quandt Gym as the Stout Blue Devils faced the Pointers in a dual that would decide if Point would share the WSUC title with Eau Claire, or take sole possession of the honor. When the contest was over, the P.A. announcer spoke for the entire crowd when he said, "We won't share, with Eau Claire."

And share we didn't! The Pointers came off a struggling first half with a seven point advantage and took control in the second, and outdistanced the Blue Devils, 65-46.

Bennett said although his team had the conference championship in hand there were times he had feelings of apprehension.

"I thought we had a real shaky first half. We had one spur where we played well, and then we ended the half on a downer. I then thought our second half was much more intense."

Bennett continued, "Our big people; I shouldn't say our big people; Kirby was just so much more active in the second half."

Bennett notes the activity of Kulas was reflective of the entire Pointer squad in the second half. "It was the most intense game we've won this year. It was the most intense game we've won in a period."

Jeff Olson drops in two as Mike Janze and Kirby Kulas look on.

"We had a stretch against River Falls where we played excellent defense. We built that first half lead over about an eight minute period with excellent defense."

Bennett continued by showing how his offensive power is diluted at times when his defensive pressure they are able to put on a team.

"I don't know what the answer is to get some of our people to play hungry. I'm still searching for that, but I'm certainly not going to complain about a championship."

And yes, this is yet another championship for Bennett and his Pointers. But does he view this title any different than the others before it?

"I think it was the most difficult to get. And what began way last spring as a real hopeful adventure, took on a new dimension come fall. I just wondered if this was a possibility, but a lot of faith and hard work was the difference."

Bennett continued by saying that the overall toughness of the league was a helpful factor to his team. He notes the fact that the other teams that were in contention for the conference title just seemed to keep bumping each other off, and that Point was fortunate enough to just sneak right through.

And once again in the front of the pack is Terry Porter, who not only dropped in 23 points in the Stout contest, but now holds the second spot on the UWSP all-time leading scoring list. He needs just under 100 points to surpass Tom Risthaler with 1,501.

The next stage for the Pointers will be the NAIA District 14 playoffs to be held in Quandt Fieldhouse Monday night. They face the winner of the UW-Stout-Lake-Lake College game to be played Saturday. If they should win this game, they will then play in the championship game Wednesday night to see if they will earn a return trip to Kansas City, and the NAIA National Tournament.

Tickets

Tickets for the NAIA District 14 semifinal game between UW-Stevens Point and the winner of the UW-Stout vs. Lake-Lake College game are now on sale at the athletic ticket office of the Phy Ed building.

Ticket prices are $4 for adults, $2 for UWSP students with ID's and $1 for non-adult students.

Tickets may be ordered by calling 36-3403 or by stopping by the Quandt Fieldhouse at Room 126. Tickets must be picked up by 4:30 on game day, or they will be sold to the general public.

If Point wins its semifinal, tickets for the final game Wednesday night will go on sale Tuesday.
The highest honor that may be bestowed upon a collegiate athlete or coach is given to Lynn "Red" Blair, the longtime men’s swimming and diving coach at the University of Wisconsin-Stevens Point, on February 27th.

At that time Blair will be inducted into the NAIA National Hall of Fame. His induction will take place as part of the NAIA National Swimming and Diving Championships in Indianapolis, Ind.

Blair, who will also be inducted into the NAIA District 14 Hall of Fame this summer, is the first person associated with UW-Stevens Point to receive this prestigious honor.

Blair has established a reputation for swimming success throughout the state, Midwest and nationally through the successful teams he has been involved in national swimming circles.

He has been the head mentor of the Pointers for the past 19 years in both the men’s and women’s swim coach the men’s swimming program has ever known. Since arriving on the UWSP campus in 1960, Blair has put together one of the most successful non-scholarship programs in the country. His teams have compiled an impressive dual meet competition five times.

Blair has produced 39 All-Americans at UWSP, including 35 since 1977. In addition, 59 individual titles have been won in WSU meets by his swimmers and Dan Jesse and Jon Gombe each won national championships in the 106 yard breaststroke in 1982 and 1983, respectively.

The 46-year-old Blair is a three-time winner of the WSUS’s swimming coach of the year award, an honor which came his way in 1966, 1975 and 1977. Nationally, he was president of the NAIA Coaches Association in 1981-82 and was also president of the NAIA Swim Coaches Association. He also served as the vice president, secretary-treasurer and director representative of the NAIA Coaches Association.

Blair is currently a member of the United States Olympic Swimming Committee and in 1979 was an assistant coach for the United States team which competed at the World University Student Games in Mexico City.

A native of Beardstown, Ill., Blair earned his bachelor of science degree from MacMurray College in 1961. He went on to receive his master of science degree in physical education from Missouri Southern in 1964.

Blair began his coaching career in 1963 as an assistant basketball coach under Lee Ford at Southern Missouri. He became the head swimming coach upon his arrival at UWSP in 1965 and has featured powerhouse teams since then. Other coaching duties at UWSP have included tennis, 1965-79; assistant football, 1971-73; golf, 1974; and women’s swimming and diving, 1975-78.

Don Amiot, UWSP director of athletics, expressed delight with the selection of Blair to the respective hall of fame and paid him special tribute.

"Induction into the hall of fame at both the district and national levels is the highest honor his fellow coaches and university officials can give Red for 30 years of dedicated service to student athletes," Amiot proclaimed.

"Red is known nationwide for his involvement and commitment to swimming.

"We are all very pleased and proud for Red."

Blair and his wife, Kay, are the parents of three sons. One of those sons, Brett, is currently a member of the Pointer swim team.

"Red" Blair meet record of 16:63 (a winning percentage of .566 percent), won one Wisconsin State University Conference championship, been the runner-up eight times and finished in the top 10 in national tournaments through the National Association of Intercollegiate Athletics.

Bednar in the 220 yard intermediate hurdles, 33; Al Hilgen- dorf in the 300 yard dash, 33; and Scott Lauren in the triple jump with a leap of 47-3/4.

Pointer coach Rick Witt was happy with the meet.

"We had a very good meet," he said. "We did not lose the meet but we were beaten by a team that has more depth than we do at this time. We definitely performed to our capabilities. There are some places where we might have scored a little better but by and large we had excellent efforts from the entire team."

Witt cited numerous individual efforts.

"We had many good efforts but the top individual performance had to be from captain Mike Welden. Mike set a school record of 15-7/16 in the pole vault and also qualified for the national meet. Scott Patza, a freshman, won the high jump for us. Mike Christman won three events and was named the meet’s Most Valuable Runner. Al Hilgenorf ran in four events and did an excellent job."

The Pointers return to action next Saturday when they travel to Milwaukee for the UW-Milwaukee Invitational.

The Pointers are proud of the one-mile run, 3:13.2; and Arnold Schram in the 110 yard hurdles in 9:15.49.

Earning second place finishes were Scott Gombe in the 220 yard intermediate hurdles, 25.8; and Jim Whitley in the 800 yard run 2:01.32.

The Pointers landed a host of third place finishes. Don Reider in the one mile run, 4:23.8; Kevin Seay in the three-mile run, 15:33.1; Perona in the 440 yard dash, 52.54: Tom Shannon in the 1000 yard run, 3:28.1; Jim
Lady cagers fall to Warhawks in play-off opener

by Ron Ashley
Staff reporter

The basketball season for the Lady Pointers came to an abrupt end last week as UW-Whitewater dashed any Pointer hopes of advancing in post-season play.

The host Warhawks showed little sympathy for visiting UWSP last Tuesday with a 74-45 victory in the opening round of the Wisconsin Women's Intercollegiate Athletic Conference playoffs. UWSP winds up the 1984-85 season with a 6-16 record. Pointer coach Bonnie Gehling attributed the season-ending defeat to fear and lack of patience. "We let fear take over and we played scared," she said. "When you play scared, you make a lot of mistakes, a lot of errors and that's exactly what happened. "We also weren't very patient. We did, we did. put the ball up and then ran to the other end of the court."

A major crutch for the Pointers was the lack of an inside game. Whitewater enjoyed a healthy 46-27 rebounding edge and as a result had numerous shot opportunities.

"We went down, put the ball out of bounds we got were accidental," said Gehling. "Those were the ones that landed in our lap. We just didn't go to the boards at all."

As a result, the Pointers fell behind early and never recovered. Whitewater nearly doubled UWSP's output in the first half, 43-24, and led the Pointers in the second half, 54-24, to walk away with the victory.

Besides winning the board battle, the Warhawks also had the Luxury, losing 31 of 67 shots (46 percent) to the Pointers' 16 of 54 (30 percent), and in assists, 26-11.

Gehling noted the squad's young players, with only two seniors, played a part in their poor field goal shooting throughout the season.

"If they feel lucky, they are going to hit," she added, "and if they have the luxury of being a way. You need patience and you have to work the ball around to the players."

Sonja Sorenson led the Pointers in scoring against her former teammates with 18 points and grabbed eight rebounds. The Warhawks were led by Beverly Parish with game-high totals of 26 points and 16 rebounds.

Sorenson, only a freshman, developed into the team's leader since coming from Whitewater at the semester break.

"One of the brightest spots of the season was the play of Sonja," said Gehling. "She came in and for a freshman did an outstanding job. Usually, you don't call on your freshmen to do the kind of work she did. She had one of her better inside games of the season against Whitewater."

Gehling thought the players matured during the course of the season.

"These kids wanted to play and as individuals grew wise," she said. "It takes a great desire to play a team sport and it takes a lot of giving up your own ideals and being able to mesh those with the other players on the court. We really never hit that point. I think it is a growing factor."

"When you have leadership and have players who have been around, they can run the team and control the tempo of the team. So it was pretty helter-skelter this season with figuring out who was going to be the leader."

"If we learned anything, we learned to be humble, but we never lost faith in ourselves. That is what I think will make this team stronger next year."

AN OLYMPIC SUCCESS!
The first annual R.H.A. (Residence Hall Association), Snowlympics ended with a feeling of great success to all who participated. The simulated Olympic events were the Toboggan Slalom (4 person team and 1 person teams), Bell Whopping (4 person and 1 person teams), Speed Skating, Figure Skating, Snow Sculpture, Cross Country Ski Race, and ending with Snow Softball. The events ran from Feb. 7 to Feb. 15 ending with Wally Cleaver the evening of the 15th.

The 3 top places of each event are:
1st person Toboggan Slalom - 1st Team 1 Roach Hall, 2nd Knudsen Hall, 3rd Team 2 Roach Hall
1st person Toboggan Slalom - 1st Bob Repishack, 406 Thomson Hall, 2nd Tim Puhin, 143 Burroughs Hall, 3rd Moe, 201 Nelson Hall.
Female Speed Skating - 1st Bobbi Peterson, 206 Burroughs Hall, 2nd Allison Moore, 204 Burroughs Hall, 3rd Pam Nelson, Smith Hall.

Male Speed Skating - 1st Terry Burn, Burroughs Hall, 2nd Lloyd Leipoldt, 124 Burroughs Hall, 3rd Tim Nelson, Smith Hall, 4th person: Tim Nelson, Tim Nelson Hall.

The overall participation was a real ward was given to the Hall with the best overall participation, "NOT WINS!" 1st Burroughs Hall with 215 points, 2nd Nelson Hall with 210 points, 3rd South Hall with 178 points. A big big THANK YOU to all the people who helped make the games such a success. And congratulations to all of you who won the events.
Lady runners finish third at Oshkosh Invite

OshKosh—The University of Wisconsin-Stevens Point women’s track team ran to a third place finish at the 14 team Invitational here Saturday.

UW-La Crosse took top honors by scoring 186 points with host UW-Oshkosh finishing second with 131 points. Rounding out the scoring were UW-Stevens Point, 95; UW-Whitewater, 75; UW-Eau Claire, 55; St. Norbert College, 41; Winona State, 17; Carroll College, 13; and Ripon, 4. UW-Platteville, Carthage, Lawrence, and Northern Michigan did not score.

The Pointers captured their first place finish at Annette Zuidema’s time of 5:08.6 earned her top honors in the mile. Her time was only 1.2 seconds off of the time required to qualify for the National meet.

Michelle Redi placed first in the high jump, 5’7” and Cathy Ausloos gained second place in the two mile with 13.1 points.

In addition, the mile relay team of Ausloos, Zuidema, Karri Seidl and Nancy Peasley placed third in 4:13.9.

Overall, the Pointers showed strong performance in the dual meet competition. This season’s team compiled a dual meet record of 5-1 and a season overall mark of 26-6.

Dr. Huettig earned her doctorate degree in adaptive physical education and special education at Texas Women’s University. She also did graduate work at Florida State University and received her master’s degree in physical education from Illinois State University. She did her undergraduate work at Carthage College where she majored in physical education.

Carol Huettig College where she majored in physical education.

Prior to attending Texas Women’s University, Huettig was the swimming coach at Carthage College from 1979-1979. She was also selected as the Wisconsin Special Olympic Coach of the Year that same year. She was also selected as a coach of the Wisconsin Special Olympics team which participated in the International Special Olympics in Brockport, N.Y. in 1979.

Carol Huettig has been listed in the Who’s Who of American Women since 1976 and was also picked as an Outstanding Young Woman of America in 1976. In addition, Huettig has also been included in the listings of Who's Who Among Students in American Colleges and Universities.

Huettg earns "Coach" honors

Carol Huettig, the fourth year women’s swimming and diving coach at the University of Wisconsin-Stevens Point, has been selected as the Swimming and Diving Coach of the Year in the Wisconsin Women’s Intercollegiate Athletic Conference.

Huettig was accorded the honor after leading the Lady Pointers to their best finish ever in a conference meet. UWSP, which had never placed higher than fourth, captured a second strong place in the 1985 WWIAC Meet which was held in Eau Claire last weekend.

In her four years as the mentor of the team, Huettig has built a team which has excelled in dual meet competition. This season’s team compiled a dual meet record of 5-1 and a season overall mark of 26-6.

Dr. Huettig earned her doctorate degree in adaptive physical education and special education at Texas Women’s University. Her top effort in the mile.

The team returns to action next weekend when they travel to Milwaukee to take part in the UWM Invitational meet.

Cress gained an additional 1/4 on her shot put toss.

The NCAA Division III National Meet will be held this week at Augustana, Ill.

We had the best day of any conference team and were delighted with the strong showing of our freshman,” Munson proclaimed.

“We had the best day of any conference team and were delighted with the strong showing of our freshman,” Munson proclaimed.

It was a great way to see Bill Zakrzewski win, as he had suffered a concussion at the conference meet and really didn’t have a chance to show his skills.

It was a great way to finish the season and shows that we have a fine team coming up.”

Wigert concluded his 1984-85 season with a record of 14-11 while Kiefer was 19-4; Calnin, 15-6; and Zakrzewski, 13-6.

The NCAA Division III National Meet will be held this week at Augustana, Ill.

Branch of the Service's call dou-
hed after the name change. The
Service is operating twenty-four
hours a day, seven days a week,
and may be reached at 346-0718.

Capsule, cont.
the-board food price increases in the
face of protests from both of-
cial unions and Solidarity,
which said the proposals would
severely hurt the poor. The com-
munist government said it
would replace the rises with
gradual increases cushioned by
cash compensation for the poor.

Greyhound gives
the Pointers
a break on Spring Break.

Round trip. Anywhere Greyhound goes.

This spring break, if you and your friends are
thinking about heading to the slopes, the beach or
just home for a visit, Greyhound can take you there.
For only $99 or less, round trip.
Just show us your college student I.D. card
when you purchase your Greyhound ticket.
Your ticket will then be good for travel for 15
days from the date of purchase.
So this spring break, get a real break. Go any-
where Greyhound goes for $99 or less.

For more information, call Greyhound.
