Gramm-Rudman

The middle class starts to ask questions

by Joanne Davis

New Editor

In mid-December, Congress passed the Gramm-Rudman deficit reduction plan with President Reagan’s approval. This plan requires a balanced budget by 1991 as well as annual deficit reductions. If this annual feat is not accomplished — automatic across-the-board cuts will go into effect.

This controversial plan has its supporters and opponents. Nonetheless, the series of targets the law sets for reducing the budget requires Congress and the President to compromise or the automatic cuts will take over.

Most agree, however, only the poor and the elderly will be the “safest” from the cuts: the middle-class will most likely take the brunt of the blows. Tony Coelho, Head of the House Democratic Campaign Committee, was quoted in Newsweek as saying, “Democrats have taken care of the middle class and you’re going to see those middle-class folks who have been able to buy homes and send their kids to college start asking questions.” One of the 1986 proposals will raise Guaranteed Student Loan fees; the loans themselves will not be affected.

Currently, the Gramm-Rudman law is before a three-judge federal panel trying to make a decision of the constitutionality of the law. A decision is expected before mid-February. Democrat Rep. Mike Synar is arguing in the pending suit that the General Accounting Office is a part of Congress and therefore binding executive decisions. The issue then, is whether or not the GAO is the appropriate agency to finalize the end result cuts.

Even if Gramm-Rudman is found unconstitutional, a provision calls for automatic cuts by joining non-resident students to the private sector in an effort to meet the deficit reductions. The possible list of programs and agencies is highly speculative at this point, but the Bonneville Power Administration, Dailies International Airport and certain areas of the U.S. Postal Service are tentatively slated to go.

But that’s not all, deep cuts are expected in many areas close to the middle class’ belt. For example, farm credit loans, food stamp benefits, Medicare, Medicaid, rural cooperative lending subsidies and so on are on what same call the administration’s “hit list.” Mid-America and the rest still will not have long to wait for the outcome in the decisions this law will force Congress to make.

Comm. dept. head to leave

Myron Christopherson, head of the University of Wisconsin-Stevens Point, has been chosen as president of Dana College in Blair, Neb.

The private school is affiliated with the American Lutheran church and has an enrollment of about 500 which is down from previous highs. It is noted for its offerings in the arts and humanities, saltatory music, teacher training, art, and a unique reading program. The campus is built to serve a student body number up to 1,000.

Christopherson will assume his new duties July 1. He and his family will move to Blair, about 30 miles north of Omaha, at that time.

Christopherson has been on the UWSP faculty since 1969 and has had a key role in the development of the communication program, which ranks among the state’s largest. It has about 700 majors.

In his new position, Christopherson said his “biggest challenges will be to continue to develop and maintain excellence in the programs, to build enrollments and endowments.”

Christopherson has long had personal ties with Dana. He attended it, served as its student body president, and after graduation in 1961 represented the school as an alumnus and was student counselor and fund raiser.

On Church and Society, a corporation of heritage, which is one of the reasons he went to Dana. The school was founded by Danish immigrants as a seminary for clergy to serve Danish American congregations.

Last year, the college named Christopherson as one of 100 individuals and organizations to be among “The Dana Hundred” which received recognition during the centennial. Other recipients included Steve Allen, Vicute Borg, Queen Margrethe II of Denmark and U.S. Senator Paul Simon of Illinois who is a member of the college’s board.

Very few former faculty members at UWSP have become presidents of other colleges and universities. One of them is Robert Powless who heads Seneca State College in Ladymarsh.

Long active in university government, he currently serves as chairman of the UWSP Faculty Senate, a position he has held previously. He also has headed summer seminars programs at Taiwan and England. The university gave him its annual distinguished service award three years ago.

The professor said he will leave UWSP “with very mixed emotions. I’ve grown to love this school, and community. I’ve had outstanding colleagues. My family has built many friendships. It’s a marvelous opportunity.”

Pointers’ Terry Porter finds life in NBA challenging but rewarding. See page 25 for details.

Metz calls for out-of-state student tuition hikes

Rep. Sharon Metz (D-Green Bay), today called for a reduction in the proposed tuition hikes for in-state students to less than $10 per semester. She also proposed that the smaller increase in resident tuition be balanced by increasing tuition for out-of-state students enrolled in the University of Wisconsin system. Metz said that "Wisconsin students are unfairly being asked to shoulder all of the burden of the recently proposed tuition increase. Out-of-state students should pick up a larger share of the costs."

"The issue is largely one of equity and common sense," the legislator said. "The newly proposed round of tuition increases would apply only to resident students. My alternative proposals would make the tuition increases more even-handed."

"Raising resident tuition by just 10 percent would produce $4.7 million in additional revenue for the system. That would go a long way in cutting the deficits." Governor Earl has introduced a measure which calls for 15 percent tuition increases.

Governor Earl has introduced a measure which calls for 15 percent tuition increase, to begin next fall, to help deal with the projected revenue shortfall facing the state. The governor’s measure would raise about $8.4 million from resident students.

Vice Chairman of the Joint Finance Committee, pointed out that any increases in tuition will be up to a 10 percent increase already scheduled for next year. "With my plan, cont. p. 23

The middle class starts to ask questions
New faces join Pointer staff

Graduation meant changes for many campus organizations and The Pointer was no exception. Leaving The Pointer were Senior Editor Alan Lemke, Copy Editor Amy Zeihen and Advertising Designer Mark Lake.

Replacing Lemke at the senior editor post is last year's Features Editor Amy Schroeder. Schroeder, besides having a wealth of journalism experience, is also the assistant director of Sims Hall. She started her association with Residence Life back in 1983 when she was hired as a resident assistant at Hyer Hall. Shortly thereafter, Schroeder began working for The Pointer as a staff reporter doing both feature and news writing.

Part of Schroeder's new responsibilities will be to provide readers with her perspective on an issue facing UWSP students every other week in the editorial page of The Pointer.

Lending her literary talents to The Pointer at the position of copy editor will be Jodi Rymer. Rymer honed her proofreading skills first as editor of her high school yearbook and newspaper. More recently, however, Rymer co-edited the Thomson Hall yearbook and helped with the Public Relations Student Society of America newsletter.

Ken Drezdzon will add his creativity to The Pointer advertising department. Drezdzon's experience includes extensive work with the American Advertising Federation and the Reference Point, a campus advertising newsletter. Part of Schroeder's new responsibilities will be to provide readers with her perspective on an issue facing UWSP students every other week in the editorial page of The Pointer.

Next week:
How are state budget cuts affecting your education?

On behalf of Pointer staff members new and old, welcome back and best wishes on a new semester in Point.
'Amadeus' chosen for regional competition

For the third time in four years, a drama production from the University of Wisconsin-Stevens Point has been chosen for regional competition in the American College Theatre Festival.

Peter Shaffer's "Amadeus," directed by Arthur Hopper, chairman of the theatre arts department, was selected to compete in the Wisconsin-Illinois regional festival. The play was critiqued by two American Theatre Association judges who attended one of the local performances last month.

The play will be performed during the event at Northern Illinois University in DeKalb.

New pizza rules called for

WASHINGTON, D.C. - Congressman Dave Obey today called on outgoing Agriculture Secretary John Block to speed up implementation of proposed rules requiring honest consumer package labelling of frozen food products.

"For about two years now the USDA has been mulling the issue of ingredient labelling for frozen pizzas and other frozen foods, but the department has still to issue final regulations," Obey said in a letter to Block.

As originally proposed, the new USDA rules would set minimum requirements for the amount of real cheese in certain frozen pizzas and require pizzas containing fake cheese to be clearly labelled as such on the packaging.

Obey said that these rules would benefit consumers who currently don't know if they are getting real or fake cheese when they buy their frozen pizza, and it would help dairy farmers having to cope with mounting dairy surpluses.

"By requiring more real cheese to be used in frozen food products, and by letting consumers know exactly what they are getting when they buy pizza with fake cheese, USDA can help take back a small part of the market for real cheese from the eroding products containing casein," Obey said.

"There's the added benefit that USDA may even help itself and cut the budget deficit by eliminating some of the huge dairy surplus that the government is having to buy and pay storage costs on."

How did you spend break? Brian Pinkalla "catching air" at Steamboat over Christmas break.
Additional tuition hikes meet Shaw's approval

Reprinted courtesy Milwaukee Sentinel
by Bill Hurley
Sentinel Madison Bureau

Kenneth A. Shaw, who took over the helm of the University of Wisconsin System recently, said tuition increases to help deal with a state budget crisis would help preserve quality education.

The increases authorized by the Board of Regents and Gov. Earl range from $50 to $77 over two semesters next year and are in addition to previously approved hikes of up to $126 for next year.

Shaw said UW tuition was not high, compared with public universities in other states.

"Clearly, there comes a point when it gets out of the reach of too many people," he said.

"But at this point, I think you've got to look at the quality question, and what we basically did was come down on believing at this point that the taxing of students was in the larger best interests and in effect in their long-run best interests.

"What we can't afford to have is a lessening of the quality educational experience for our young people."

Maintaining that quality is one of the challenges Shaw believes lies ahead of him.

"That's what I look for is challenges," said Shaw, 46, the former chancellor of the Southern Illinois University System.

"And I look for areas where I feel I can make a mark. And I think I can here.

"I think I'm a leader. And I think leadership means management...troubleshooting...conflict resolving...communicating, and I think it means defending the institution."

During a wide-ranging interview in his new office 17 floors above the sprawling UW-Madison campus, Shaw said his most immediate concern was the budget crisis created by a shortfall in state revenue.

But another goal is to improve the relationship between the university and the Legislature, while, at the same time, reducing rules, regulations and laws that place undue restrictions on the operation of the system.

A recent study in New York, for example, found that various unnecessary restrictions in areas such as purchasing "were keeping institutions from being as productive as they could be," he said.

In Wisconsin, he cited as an example a law that any unexpected tuition revenue (from higher than expected enrollments) must be set aside until the Legislature approves its use by the university.

"That needs to be looked at very seriously," he said.

"We really ought to be spending more of our time planning and effectively marshaling our resources as opposed to that kind of activity."

WOULDN'T YOU LOVE TO LIVE HERE?

Fortunately, this fire call was a false alarm for the remodeled LRC.
Art integration in classroom topic of conference

University News Service

The area’s elementary and secondary teachers will receive an overview on how the arts can be integrated in the total curriculum of schools during an annual conference Feb. 4, at the University of Wisconsin-Stevens Point.

Faculty from the UWSP College of Fine Arts will be joined by specialists from the Wisconsin Department of Public Instruction (DPI), organizations and public school systems in leading 15 different workshop sessions. The “evening focus presentation” closing out the conference will be given by Richard Lewis, director of the Touchstone Center for Children, Inc. in New York City.

The UWSP School of Education and Division of Continuing Education and Outreach, the Stevens Point chapter of Phi Delta Kappa and the Wisconsin Alliance for Arts Education are sponsoring the conference.

Lewis has authored numerous books which identify, encourage and sustain the poetic and imaginative life of children and adults, and he has edited several anthologies and collections of children’s original writings. As an educator interested in experimental and innovative teaching, Lewis has been on the faculties of the Walden School, the Manhattan Country School and the Arts Center of Northern New Jersey. His Touchstone Center, which he has headed since its founding 17 years ago, has developed offerings in public schools involving the integration of arts with other disciplines.

Lewis’ topic here will be “Beyond the Expected — The Use of Imagination in the Curriculum.”

The conference will begin at 4:15 p.m. with a general session on “The Arts: A Portrayal” by Paul Palomo, dean of the UWSP College of Fine Arts. Participants may elect to attend one of the following presentations during the first round of sessions from 5:15 to 6:15 p.m. Barbara Alvers, coordinator of music at UWSP, on “The Development of Problem Solving Skills Through Music Education”; Arthur Roper, chair of the UWSP theater arts department, and Frieda Bridgeham, a member of the department faculty, on “Theater — A Preparation for Living”; Susan Camper, director of the UWSP Writing Lab, on “Why Caterpillar Eyes Have No Lids”; Susan Hedge Giegrass, head of the dance program at UWSP, on “The Power of Knowing Through Moving”; Gary Haugen of the UWSP art faculty, on “Early Cultures as Visual Art Content — Sources and Influence”; and Karen Studd of the UWSP dance faculty, on “How to Look From the Inside Out.”

Concurrent sessions in round two from 6:15 to 7 p.m. will feature Linda Christensen, director of instruction for Vernon Area Schools, on supervising art education for DPI, on “Satisfying Your Art Desire — Arts World”; H. Michael Hartman, social studies consultant for DPI, on “Art — The Creative Link to Knowledge”; Bob Kahn, professional storyteller and juggler, on bringing an Artist into the School, or How to Avoid Having a Terrible, Horrible, No Good, Very Bad Day”; Joe Koebert, principal of Roosevelt Middle School in Madison, on “Infusing Art Into the Other Disciplines”; three members of the Deerfield Schools faculty on “An Integrated Arts Approach”; Chris Marks, artist in residence at20

right job. UWSP provides a wide variety of majors which meet many of the needs. Students majoring in home economics-food service management, conservation- environmental education, education, physical education-recreational art, and music are especially trained to meet many of the open jobs.

Last year, approximately 40 students were hired as a result of their efforts. Collectively, the students earned approximately $45,000 during the summer at their jobs.

40 camps to attend Camp Recruitment Day

by Jacque Biggle

Camp Recruitment Day, Feb. 11, will be held in the Wisconsin Room from 9 a.m. to 3 p.m. For the second year, approximately 40 invited summer camps on hand to showcase the summer jobs they have to offer UWSP students.

Camp Recruitment Day provides students and camp counselors an excellent opportunity to speak with each other to match the right person with the right job. UWSP provides a wide variety of majors which meet many of the needs. Students majoring in home economics-food service management, conservation-environmental education, education, physical education-recreational art, and music are especially trained to meet many of the open jobs.

Last year, approximately 40 students were hired as a result of their efforts. Collectively, the students earned approximately $45,000 during the summer at their jobs.

Heaven Van Proyen, student employment director, said, “Not only did we get jobs through this recruitment day last year, but many other camps heard about it and placed jobs with our office as well.”

The Student Employment Office in conjunction with John Zach, a career counselor at Career Services, are hosting this year’s Camp Recruitment Day. Just stop by the Wisconsin Room, fill out a Job Location and Development application, and talk with any of the camp counselors available.

Rubella used to occur in major epidemic cycles every six to nine years. It usually produces only a mild illness and three-day rash in school children, and it is rare for adults. But it can produce severe effects on fetuses if contracted by pregnant women. In the last and worst epidemic, 1964-65, approximately 20,000 babies were born with a fatal rubella syndrome (CRS). At least another 11,000 unborn and newborns died as a result.

Rubella vaccine was made possible by the Nobel prize-winning laboratory growth of viruses sponsored by the March of Dimes Birth Defects Foundation during research on polio. In the 1960s, the March of Dimes key research into the nature of CRS, and the birth defects, such as hearing loss, blindness, and heart defects, caused by an expectant mother’s exposure to rubella. The March of Dimes makes CRS preventable birth defect.

According to Arthur J. Salisbury, M.D., March of Dimes, vice president for medical services, “It has now been proven that if she has rubella antibodies, a simple blood test done in advance of pregnancy shows whether she has had rubella at any time in her life. If the blood test shows rubella antibodies are present, then the woman has had the disease and can’t get it again. The March of Dimes says the test is important for all women of childbearing age who think they have had rubella. They may be mistaken, since many infections may look like rubella but really are not.

If a woman is pregnant, she should have a prenatal series, which has been active in educating women of childbearing age to the fact that their children are immunized.

The March of Dimes, in its efforts to promote birth defects, has been active in educating women of childbearing age to the fact that their children are immunized.
Free advice

To the Editor:

Before any major events rock the university or someone makes a controversial social statement, I thought I would take the opportunity to pass along an idea. Let's start with a question. How were your grades last semester? I would like to share a little advice which could raise your G.P.A. by half a grade point. NOW is the time to start.

The advice is simple, get to know your teachers. More important, make sure that they know you. If you ask at least one question during class every week your teacher will begin to recognize you. But do not quit once you are recognized. Asking questions doesn’t just get you recognized, it helps your class performance.

Next, compliment your teacher. By compliment I do not mean to tell your teacher that he has a nice tie or that she is wearing a very pretty dress. Teachers enjoy the classes that they teach. You can compliment your teachers by showing enthusi-asm in the class. Occasionally go to his or her office for help. This is not brown nosing; this is a legitimate way of getting help for yourself and establishing a good teacher-student relationship.

This is guaranteed to raise your G.P.A. Also this will help anybody get more out of a class. The best time to start is now. Get yourself known, good luck and enjoy the better grades.

John Bennett
Director of Academic Affairs
Student Government Association

Sink or swim

To the Editor:

I write in order to share my frustration. The last issue of the Paiker included an article about the Women’s Swimming and Diving Team. The article was excellent and for that I am grateful. The author, Scott Moser, a former NAIA All-Americans for the UWSP Men’s Swimming and Diving Team, writes very well and obviously understands the sport and its dynamics.

My frustration came from the picture that accompanied the article. The picture was of a woman splashing in an inner tube! In fact, unless you looked closely, it appeared she was drowning. If this was meant to be a joke, then a caption should have been included. I have a good sense of humor and could have appreciated a joke. However, it appears the picture that was included because you did not care enough to seek one that depicted women’s intercollegiate swimming and diving.

The members of the Women’s Swimming and Diving Team are talented, dedicated athletes who take their commitment to excellence very seriously.

Sincerely,

Carol Hurtig
Women’s Swimming Coach

Mandatory health test supported

To the Editor:

This is in response to the article written by Joanne Davis about Student Government and the Women’s Resource Center’s opposition to the Women’s Health Issues class at the Health Center prior to a pap and pelvic exam. As a Resident Assistant, I presented this very same program by having a Lifestyle Assistant come in to hall and teach the same things they do at the Health Center. I have attended the class myself prior to the program I had presented, and feel very strongly that the Health Center should keep the class mandatory.

First of all, most women need their first pap and pelvic at age 18-19, and for many, that means their first year of college. Most are nervous about the exam, because they’re not sure what happens during the exam. After I had the program on my wing, my residents expressed great relief and were less apprehensive about making an appointment. If cervical cancer is not discovered early, the results can be devastating. As women, we have a responsibility to making sure that doesn’t happen to us by having pap and pelvic exams every year.

Secondly, about half of the women who go for pap and pecvices are going in because they are, or are planning on being sexually active and desire birth control. A knowledge of how contraceptives should be properly used and how they will affect your body is imperative. If you think you know everything you need to know about birth control, think again. Too many girls think the same thing and end up pregnant.

Thirdly, we pay $45 of our tuition to the Health Center for unlimited services. A pap and pelvic at a doctor’s office costs about $80. Also, consider that birth control at the Health Center is about $1 a month, while at any pharmacy it is about $12. The Health issues class takes about one hour and you only have to attend once. A pap and pelvic at our Health Center is free. Don’t you think it isn’t too much to ask for an hour of your time for this service?

Kimberly Anderson

Winners

UWSP students get just rewards

University News Service

A nontraditional student at the University of Wisconsin-Stevens Point is Robert St. John, a senior who is graduating this spring with a B.A. in business administration. He will graduate with honors in May.

John, a Minocqua native and 1971 graduate of the high school there, currently works part-time in the UWSP Office of Registration and Records. He has previ­ously worked for the U.S. Navy and worked as a supervisor in a Wausau plant.

He is active in the Church of Jesus Christ of the Latter Day Saints in Wausau and partic­i­pates in a number of community activities.

The scholarship he received in memory of a student who died while enrolled at UWSP more than 20 years ago is a $400 scholarship to the University of Wisconsin-Stevens Point.

The first winner of the James Persoon Photography Award has been chosen at the University of Wisconsin-Stevens Point.

The recipient of the $150 prize is Jim Dilling of 138 North Point Drive, a nontraditional student.

Persoon, an alumnus of UWSP, spent his entire career teaching photography and English at the university during the years 1932-1983. The award was established in his memory.

Dilling graduated from UWSP in December with a bachelor of fine arts degree in art, specializing in jewelry and aesthetic photography. He had been enrolled on campus off and on the past decade. He partic­i­pated in the University Activities Council Art League and won a Kate Freeman Award in a photogra­phy competition.

Students in the class included a student with a minor in history, a student with a minor in education and a student with a minor in fine arts.

Northern women can adapt to anything

Career seminars planned by Joanne Davis

University News Editor

Thirteen career planning seminars are scheduled this semester. They will provide stu­dents access to speakers ad­dressing job search strategies, life planning/academic, special interest areas and many more.

An announcement of the dates and times of the career planning seminars will be mailed to all students.

Career planning is not simple. We’re simply trying to encourage students to recognize the complexity and deal with it.”

University Telecommunica­tions will videotape all of the programs so that they may be available for viewing later in the semester.

For further information on topics, dates and times, contact any of the following sponsors of the series: Student Enrichment and Retention Services (x2350), Career Services (x2595) and the Counseling Center (x6565).
CATHOLIC STUDENTS

Newman University parish is a Catholic community for students, faculty, staff and interested persons of UW-Stevens Point.

Newman University Parish has its source and center in being a worshipping community.

CATHOLIC MASS SCHEDULE

Saturday 4:00 P.M.
Sunday 10:15 A.M.
Sunday 6:00 P.M.

All weekend Masses are celebrated at the St. Joseph Convent Chapel, 1300 Marla Drive. Everyone welcome.

Tuesday and Thursday, 12:00 Noon Mass in the Newman Center Oratory-Chapel Fourth and Reserve.

Other Masses upon request.

Newman Catholic Center Office—Fourth and Reserve Street across from Berg Gym, next to Pray/Sims Hall.

Office Hours: 9:00 A.M. - 12 Noon
1:00 P.M. - 5:00 P.M.

Phone: 345-6500.

Program Opportunities:
- Inquiry Classes for Catholics and non-Catholics
- Pre-marriage seminars
- Retreats
- Bible Study
- Peer Ministry—Students ministering to students
- Small growth groups
- Counseling in Spiritual and Faith growth

King's life proved that dreams need not die

by R. Lionel Krupnow

FREE at last, free at last, thank God Almighty, I'm free at last.

Those now famous words, taken from Martin Luther King Jr. 's "I Have a Dream" speech, are now carved on Dr. King's tombstone. It was those words that endeared me to him.

The first time I heard Dr. King's famous speech I— he had been dead for 11 years. But for an instant, through the magic of television, he was brought back to life.

"I have a dream," the fuzzy figure sounded, "that one day this nation will rise up and live out the true meaning of its creed: 'We hold these truths to be self-evident; that all men are created equal.'

Those words are now carved in my mind. Something about them, their delivery, no doubt. He was one of the greatest orators I have ever heard. But there was something beyond that; something that words couldn't capture; something that could be satisfied only by a shiver that sent my spine and invaded my eyes.

King began his nonviolent resistance for civil rights in 1960. He led a bus boycott in Montgomery, Alabama to protest the unjust practice of blacks having to sit in the back of buses.

King's protests continued. In 1963 he led a big march in Birmingham, Alabama to protest citywide discrimination. In August of the same year more than 250,000 blacks and whites marched from Washington Monument to Lincoln Monument, in Washington D.C., where King delivered his speech to millions of television viewers.

He also staged a sit-in demonstration in St. Augustine, Florida in 1964. But King's achievements cannot be measured by the success of his demonstrations alone.

In 1957 he established the Southern Christian Leadership Conference (SCLC), and became its first president. In that year he received the Spingarn medal from the National Association for the Advancement of Colored People (NAACP). And in 1964 he won the Nobel Peace Prize.

King never saw the development of the "Poor People's March" he had planned in 1968. On April 4, 1968 he was shot and killed by James Earl Ray in Memphis, Tennessee. But King's ideals live on. That we commemorate his birth, as a national holiday, is evidence that his ideals haven't been forgotten.

Martin Luther King Jr. during one of his imprisonments.

Students receive Chancellor's Leadership Awards

University News Service

Twenty-seven graduating seniors received the Chancellor's Leadership Awards during the midyear commencement ceremonies held at the University of Wisconsin-Stevens Point.

By being chosen for the award, which are given in recognition of involvement in extra-curricular activities on campus, the recipients become eligible for the more prestigious Albertson Medalists presented once a year at spring commencement.

The Chancellor's Leadership Award winners from the class of 1985-86 midyear graduates are:

APPLETON: Kathryn M. Huiling, a sociology major, is the daughter of Mr. and Mrs. Theodore J. Huiling, Route 5, Bayrd Court.

CAMBRIDGE: Lisa Marie Johnson, a chemistry major, is the daughter of Linda Johnson, 382 Rodney Road.

CLEAR LAKE: Troy Burns, a geography major, is the son of Mr. and Mrs. Eugene Burns, Route 2, Box 118B.

COLEMAN: Brand C. Bergeron, a communication major, is the son of Mr. and Mrs. Jim Bergeron, Route 1, Box 49.

COLUMBUS: Claire Thorpe, a communicative disorders major, is the daughter-in-law of Mrs. Verdel Thorpe, 282 Farm Parkade, Apt. 2.

EAST TROY: Sheila Rackley, a communicative disorders major, is the daughter of Mr. and Mrs. Marshall Sheerick, 91B Bluff Road.

HILLSBORO: Deborah L. Landon, a vocal music major, is the daughter of Barbara Neumeier, Box 386, and of Robert Landon, Route 1, Box 195, Lancaster.

HUDSON: Dennis Ostendorf, forestry recreation major, is the son of Mr. and Mrs. Richard Ostendorf, Route 2, Box 296.

MIDDLETON: Todd M. Varnes, a wildlife and biology major, is the son of Colleen Kay Varnes, 5802 Taft St.

NEENAH: Tammy A. Peterson, a resource management major, is the daughter of Mrs. James Lucas, 803 Helen St.

NELSONVILLE: Raymond Young-Cheng Koong, a business administration and management major, resides 1700 Woodward Lucas, P.O. Box 87.

NEW BERLIN: Timothy R. Blats, a communicative and liberal science major, is the son of Mr. and Mrs. Robert Blats, 4914 S. Courtland Parkway.

NEW HOLLSTEIN: Tammi Jo Smith, an elementary education major, is the daughter of Mr. and Mrs. Palmer Smith, 1925 Park Ave.

OSKOSH: Carol Beckman, a soils and resource management major, is the daughter of Mr. and Mrs. John Beckman, 1719 Cheston St.

OXFORD: Sherry Hayes Daniels, a home economics education major, is the daughter of Mr. and Mrs. Lowell Hayes, Route 2, Box 103.

SHERWOOD: Reed C. Kabesovsky, a wildlife and resource management major, is the daughter of Mr. and Mrs. Lee Kabesovsky, Route 2, Box 49.

"The professor concludes that Catholic bishops were aware of evils in the Third Reich but also recognized they had a responsibility to preserve the institutional church.

"After all, the church had lasted 1,900 years and the bishops didn't believe the influence of Hitler would last that long, so they wanted to be able to bring back their institution after he was gone. In that vein, you can't take all of their statements as sheer cowardice."

He believes "the rub of the problem" was that church leaders viewed politics as a "very narrow" aspect of life and wanted no part in it while Hitler "saw politics as everything."
Cure the winter blues
Winter music festival planned in Rhinelander

Press Release

"Why would anyone want to go to a folk and traditional music festival...in the winter?"

That’s the question the people at WXPR Public Radio in Rhinelander asked themselves six years ago. It turned out that there were several good answers. Nearly all of the big music festivals in the Midwest are in the summer; a February festival would have nearly no competition. Musicians whose schedules are booked solid from May to October weren’t too busy to come to Rhinelander for a weekend of music and fun in midwinter. There, the ski and snowmobile vacation season in the Northwoods, is in full swing in February. That meant many people looking for entertainment in the evenings.

With these answers, the folks at WXPR planned a festival which they named “White Pine Jamboree” as a benefit for the public radio station. They hoped 100 people might attend. Instead, more than 300 showed up on sunny Saturday in 1981. It’s been growing ever since.

Unlike its summer counterpart, the White Pine Jamboree is an indoor festival. The sixth annual Jamboree begins on the evening of Friday, February 7, in the Memorial Building in downtown Rhinelander. Following its own tradition, it opens with the Late Night Brunch. Old Time Fiddling Contest, a fun competition between traditional fiddlers of all ages. The contest honors Lettee Brune, Rhinelander resident who won a world championship fiddling contest in Chicago in 1928. Brune later became a regular performer with the WLS Barn Dance. The contest will be followed by an old time dance with music provided by Minneapolis musicians Bob Rossee and Gail Hall, and guest appearances by many of the fiddling competitors.

The Saturday program moves to James Williams Junior High School in Rhinelander for an afternoon of concerts and workshops. "Workshops" mean opportunities for those who attend to be more than spectators. Bring your guitar, fiddle or harmonica along, and you might get a lesson or a chance to swap tunes with the professional musicians. If you can’t pick or strum, you’ll probably find yourself trying out Appalachian clogging or English step dancing, or singing along.

Meanwhile, the 400-seat theatre will host an "open stage" where any talented local performers will provide the entertainment.

The Saturday evening concert is the finale and high point of the White Pine Jamboree. The musicians who have been leading workshops and activities take the stage for nearly four hours of music and fun. This year’s headliners include Sally Rogers, singer and songwriter from Connecticut; Sparky Walbridge, singer and songwriter from Tennessee who recently completed a series of concerts in New Hampshire; and the late-night concert featuring the Carter Family and the string bands of the 1940’s. Encore for the concert will be Central Wisconsin singer Tom Robak, who will entertain the children’s concert at noon Saturday.

While the White Pine Jamboree can’t advertise itself in the major newspapers or on television, it has been building a loyal following. This year, seating is limited to 400. For information on attending areas found at many summer music festivals, inexpensive lodging is available in the area. For information on accommodations, call the Rhinelander Area Chamber of Commerce at 715-362-7464. General information on the White Pine Jamboree can be obtained by calling WXPR Public Radio at 715-362-6000.

Just out ducking the hills

by Elizabeth A. Kropnow

Staff reporter

I strategically positioned myself atop a thin, plastic toboggan. Eyeing up the short, steep slope, I contemplated the unknown performance of my sled. I grasped the plastic handles firmly, and with one foot, another with a patch of missing feathers, the flock. They continued to waddle. As I neared the hill, I glanced once more at the river. When I returned to the slope, I found a tangle of bags tangled with snow. I turned back and watched them. As they reached the hill, they watched me as I near the base of the hill. I mounted my sled for a closer look. The ducks stumbled to the water and tossed them into the flock. They found the open stage where "on location." Dare might get a chance to play on the Saturday evening concert.

They were the ducks that surprised me in the park along the river. Their feathers took on a few sheens against the winter backdrop: vivid grey, brown, blue and green. Removing my glove, I fumbled for tickets for any forgotten coins. I found a few and ran up the hill. When I returned to the slope, a loud of day-old bread dangled from each of my gloves. The ducks awaited the feast.

I tore the bread into bite-sized morsels and tossed them into the flock. They squawked and scrambled after the food. Some of them were more aggressive than others; a few went up on the hill, another with a shine or harmonica along, and you might get a lesson or a chance to swap tunes with the professional musicians. If you can’t pick or strum, you’ll probably find yourself trying out Appalachian clogging or English step dancing, or singing along.

Meanwhile, the 400-seat theatre will host an "open stage" where any talented local performers will provide the entertainment.

Admission to the sixth annual White Pine Jamboree is $3 per person for the Friday night fiddling contest and old time dance; $3 for the Saturday afternoon workshops and performances; and $5 for the Saturday evening concert. A weekend ticket is $15. Children 12 and under are admitted free. Reservations are being taken for tickets to the White Pine Jamboree this year, since seating is limited to 400.
December graduates

University News Service

A historian told midyear graduates at the University of Wisconsin-Stevens Point on Saturday that what they do with the knowledge they have acquired on campus will "ultimately determine the real value of that education."

Justin Paul gave a traditional charge to the class: "Take what you have learned and build on it. Live and love alike. Participate in society, run for elective office. Be a volunteer in support worthwhile causes, help those who need help, at home and in the wider world. Make the most of the skills and education you have, continue to grow and change. Then the true value of your education can be measured."

Paul, in his 38th year on the faculty, has been chair of his department most of that time and has also been a leader in faculty government.

He told the graduates that as they enter the work force, many of them will not find the perfect job immediately. Competition for jobs has led to many college graduates being forced to compete for positions for which they were overqualified.

The problem is that for the large number of midyear graduates in the labor force, many have been denied, the number of jobs required of the college degree has not grown near enough.

Unfortunately, he added, people in higher education have been telling young people for quite a long time that they should acquire a college degree and get a good job. We received in statistics showing, average college graduates would earn so much more than the graduates of a few years ago.

"This is not purely the case today," Paul said, and it should not be used as an argument for the same.

"The world needs people, and to have a more fruitful life, people need education through squinting as he goes by."

Looks like he's had too much of that. I make a fast grab at the handle. If I get it first, maybe Clint won't hurt him too much.

Of course, I'm not sure about the people with those surgically implanted Walkmans and that permanently dazed look. They might hurt me. I think it's a combination of music and drugs. But, male or female, I'm afraid of this person. I walk in the other side of the hall and hope he or she doesn't see me. Usually doesn't. Looks straight ahead. Glanced at me once. Manson family candidate.

Don't get me wrong. There are people I have to avoid, too, because it would be my own fault if I ran into them. Like those people grouped right past the doors at the end of the hallways. Smoking cigarettes and talking. Hands waving. Their in coming and prepare for impact. Not so with the individuals standing in front of me as I walk down the hallways of California.

And I don't know how to prepare for the people who run into me as I'm standing next to the wall waiting for class. It's kind of scary, waiting, standing halfway down the hall, watching a lone kamikaze, bouncing from wall to wall right at me. Move? Make a run for it? Only, see, I know this person's related to Mr. Heat-seeker from the UC. Nothing I can do but wait.

Then there's the bathroom. Going in is fine. You just push the door. Going out is tricky. I walk up-step-then my hand makes out to grab the handle, because I know Clint Eastwood has come through that door before. Door bursts open, my fingernails smash, Clint strides through squinting as he goes by.

UWSP drama and dance students attend festivals

by Mary Ringlestad
Staff reporter

Over 40 UWSP drama and dance students have been selected to attend the regional American College Theatre and Dance Festivals this weekend.

The cast and crew of the University Theatre's production of Peter Shaffer's AMADEUS will travel to Northern Illinois University in Dekalb. AMADEUS is one of the six shows chosen from colleges and universities throughout Wisconsin and Illinois to participate in the ACTF Region Ill-West Festival. Twelve regional festivals are held nationwide. From these 12 "regions," students are selected to perform at the Kennedy Center in Washington, D.C. in April. Director Arthur Hopper is confident that AMADEUS may be one of the lucky six.

Hopper, who feels the show to be "perhaps my greatest challenge as a director," believes that AMADEUS is the type of show that would be chosen for the national festival because it is so difficult, especially for college undergraduate actors.

In addition to the actual show, two actors from the cast have been nominated to participate in the Irene Ryan Acting Competition. Steven Senatki and James Post, who play Salieri and Mozart, respectively, will travel to the Kennedy Center. Post is up for the acting competition, and Senatki is up for the costume award.

While the cast are "motivated" in Illinois this weekend, the dancers will be "expressed" at the University of Iowa in Iowa City.

Linda Caldwell's "Fantasy for Four Good Men" and John Millard's "Doors" are the two choreographic pieces entered in the American College Dance Festival's formal competition.

SOMETIMES IT TAKES AN ARMY TO PAY BACK YOUR COLLEGE LOAN.

Paying back your college loan can be a long, uphill battle. But the Army's Loan Repayment Program makes it easy.

Each year you serve as a soldier, the Army will reduce your college debt by $500, whichever amount is greater. So after serving just 3 years, your college loan will be completely paid off.

You're eligible for this program with a National Direct Student Loan or a Guaranteed Student Loan or a Federally Insured Student Loan made after October 1, 1975. And the loan can't be in default.

And just because you've left college, don't think you'll stop learning in the Army. Our skill training offers a wealth of valuable high-tech, career-oriented skills. Call your local Army Recruiting Office and find out more.

Your local Army Recruiter is located in Stevens Point, call 344-2356 ARMY. BE ALL YOU CAN BE.

University News Service

Guitarist Michael Hedges and pianist Lin Story, Windham Hill recording artists, will perform at 7:00 p.m. Monday, Feb. 3, at the Stryent Theatre.

The performance is sponsored by the University Activities Board in conjunction with Arts and the Women's Resource Center at UWSP.

Reserved seating tickets are available at Stryent World Headquarters, the University Center Information Desk, Campus Records and Tapes or by mail through the Campus Activities Office. Student price is $6 per person and $6 for UWSP students.

An Oklahoma native, Hedges studied four years at Peabody Conservatory in Baltimore before switching to classical guitar, electronic music and composition. Following his graduation from Peabody, he spent a summer at the Stanford Computer Music Center in California.

At Stanford, Hedges played guitar at a local theater where he met Windham Hill founder Will Ackerman. A year later, he had his debut album, "Breakfast in the Field," released.

Since that time, Hedges has toured extensively throughout the U.S. as well as in West Germany with Ackerman. He has appeared as an opening act for the Jerry Garcia Band, Robin Williams, Doc Watson, Jerry Jeff Walker and David Grisman.

His second LP, "Aerial Boundaries," was named the top jazz album by Digital Audio Magazine in July of last year. Frank Nibombo of Music Connection described his playing as "...absolutely the most unorthodox guitarist I have ever seen."

Story got involved with Windham Hill after sending the company a three-tape demo tape. She had developed her improvisational style while appearing at a Los Angeles restaurant where she "...just sat and played."

"I had to sit there for three or four hours and get involved in the themes and ideas that would come up. A couple of songs, like 'Bradley's Dream,' just came out one night. The whole album actually evolved during that year and a half of playing in the restaurant."

Her first album of mainly original material was "Solid Colors" released in 1979 and her new LP, "Unaccountable Effect," was achieved at the Windham Hill magazine as "Platonic's only legitimate solo piece (which) veer toward a more impressionistic pole, augmented on the title track by Maxi's synthesizer textures."
University News Service

A total of 82 students from the University of Wisconsin-Stevens Point are participating in overseas travel during the spring semester either in England, Greece or Australia.

They left campus about two weeks ago and will return at the end of April.

Recently retired professor Robert Anderson has opened his classes in Greece to people there who are interested in joining the Stevens Point contingent in the study of environmental degradation and geography of the Mediterranean area. This is the first time UWSP has provided such an opportunity to residents in areas where it has branch centers.

Anderson has taken the 30 students in his group on a tour of parts of Italy and Greece and has taken up residence with them in an Athens hotel. In March and April, there will be other tours in Italy and Turkey.

The 32 students in the Australian group are being led by Ron Zimmerman, director of the Schmeecke Reserve and a member of the College of Natural Resources teaching staff.

Every other year, the spring semester in Australia is devoted to environmental studies. Helen Cornish, director of International Programs, said numerous students from all parts of the United States have transferred to UWSP specifically to be eligible to participate in the Australian program.

Lee Barrera, professor of English and Richard Face, professor of history, are serving as faculty for the students in England. A Women Meeting Women program has been added this semester as an extracurricular activity for Stevens Point women who would like to get more firsthand information about the everyday lives of their British counterparts.

In late March, this group will begin a tour of the continent which will include stops in Belgium, West Germany, Austria, Italy, Switzerland and France.

By homes昨日, here is a list of the students in the three programs:

ALMOND: Lena Faye Bledsoe, Rt. 1, Box 132, Britain; Baraboo: Ann Marie Burke, Box 223, Australia; Beslin: Renee Petit, 547 Leffert St., Britain; BROOKFIELD: Caroline Hinke, 16416 Harrigan Ct., Britain; Lisa Shay Probst, 306 Granview Dr., Britain; De Pere: Tyler Holt, 2003 Lost Dauphin Rd., Greece; Joseph Janssen, 308 Marsh St., Green Bay; Elm Grove: Rodney Anderson, 12083 Gebhardt Rd., Britain; Fontana: Vanessa Haven, P.O. Box 602, Australia; FREEMONT: David Plank, Rt. 1, Box 164, Steuben County; GREEN BAY: Erin Marie Killiam, 829 Gray St., Green Bay; George Lalumiere, 419 South Quincy St., Greece; Nicole Swo- bela, 326 S. Monroe, Greece; Carolyn Brown, 682 W. Briar Ln., Britain; Sara Lynn Lubin, 506 Rolfmeyer Dr., Britain; Patrick Duffey, 97 Oak Creek Trail, Australia; Lisa McGin­­

Ice fishing in Wisconsin — a cold-blooded sport

Middlesex — The radio had said it was 14 below zero on the official thermometer at nearby Trust Field.

There was no reason to doubt it last Tuesday (January 7) as John Fagan's snowmobile was grinding its way across the ice of Lake Mendota, pulling Jim Addis and me out there, as fast as he could be-bund.

A hard-fall power plant was exhaling that white vapor that tells of bitter cold, and the wind cut like a razor at any exposed body parts.

My non-outdoor friends, I thought, would have no all their opinions of icemen confirmed they had been there. Of the sort of fellow who can face the weather and outdoor people, the one that doesn't sports, folks find the strangest is for fishermen.

Other fishing they can accept, thinking of it as styler summer days spent watching a bobber or battering plant waiting. There is no way to tell them how cold a cold rain can be during the April wallow run, or how a snow chin can slither after three frigid days of harking a heavy muskie trek with a board-riffing marker rod.

Denting these non-outdoor fish can also appreciate, changing a leatherbackswimskin tracking his prey across an endless nothing, with no knowledge of the difficulty of staying alert during endless hours, endless days of walking on the ice, above the ground in a uncomfortable buttoning stand.

DOE dump site supervision a joke, says Garvey

U.S. Senator candidate Ed Garvey says Wisconsin should demand any efforts to put a high level nuclear waste disposal site in the state because the Department of Energy (DOE), which is selecting the sites, has "a massive conflict of interest."

The Department of Energy, which oversees nuclear waste disposal, is also the sponsor of a nuclear waste disposal company, that also produces nuclear material, Garvey said at a Wausau news conference. "Besides that, the Department of Energy runs by law for promoting nuclear power, which produces civilian nuclear waste.

"Aiding the DOE to supervise nuclear waste disposal is like asking the guard to guard the car," Garvey said.

The DOE considered 20 locations in 17 states as potential disposal sites. It narrowed to search to a list of 15 to 18 sites announced on Jan. 16. It is likely that at least one Wisconsin site will be among the group of 15-18 to be recommended for possible license.

Major concerns about location of a repository include transportation of waste, possible groundwater contamination, disruption of local community, and damage to the state's tourism and farm economy, Garvey said.

Garvey also said responsibility for choosing a site should be taken away from DOE and given to another federal agency, such as the Nuclear Waste Agency or EPA.

EPA, he said, is to protect the environment, not the nuclear industry. Garvey said there would be much more credible than citizens of Wisconsin."

Then he clipped on an eight-inch monofilament leader with a snap swivel on one end and a brightly colored jig on the other. Three squirming grubs were threaded onto the jig's hook.

Then Addis screwed out the drag on the wide reel attached to his two-foot fish rod until the reel allowed line to pay out slowly. When the line copper stinger reached bottom and the reel stopped turning, Addis backed the reel a turn or two and ran the line over a clip on the reel.

That set the bait just off the bottom and made sure the reel would stop at the same place whenever the bait was dropped down again.

The lantern hung softly as we watched the tip of our four rods. Soon one of Addis' rods dipped slightly toward him as it and he grabbed it and pulled up to set the hook far below. A minute later he had a perch flopping on the fiberglass floor of our shelter.

The perch was about 10 inches long, fat and healthy, with the dark gold background color and vivid green stripes of an inland perch. There may be no prettier fish in Wisconsin, and there are no tastier ones. Addis, who directs all fish management programs for the Wisconsin Department of Natural Resources when he is at work, confessed that he had become addicted to panfishing on his three-day break from Addis' condominium home, and he said Mendota just might be the best perch fishing lake in Wisconsin.

Not only that, Addis said, but there were good crappie and bluegill populations, white bass were increasing, and there were good-sized walleye swimming in Mendota.

We had, you should know, plenty of time to talk. The action was not as fast as it had been the week before, according to Addis' classic version of "you

Alaskans' Eagles Decline

Bald eagles soaring the skies of the "Last Frontier" are experiencing low breeding rates, according to biologists in southeastern Alaska. In nesting surveys sponsored by the National Science Foundation, researchers found that up to 86 percent of the adult eagle population in southeastern Alaska were either non-breeders or breeding birds that had abandoned their nests. "Known breeders composed less than half of the adult popula-

WPRA meeting, Wisconsin Parks and Recreation Association is holding a general meeting on February 4 in the Green Room of the UC. Everyone is invited to attend.

Resume Workshop. Once again Mike Pagel is holding a workshop for resume writing this semester. The course is at 7:00 p.m. on February 6 in room 312 of the CNR. All CNR and science majors are urged to attend.

Earthweek Resp. Only 12 more weeks until Earthweek! Help is greatly appreciated and needed. Stop in room 106 at the EKRA desk for more information, or to volunteer suggestions.

Fishing cont.
should have been here last week." But we caught a dozen or so nice perch and missed a few more of the softly-biting fish. The lantern soon warned the inside of the shelter to well above freezing, and mittens stayed off and zippers came open; to keep us from overheating.

Tri-Beta Talk. Dr. Stanley Kaplan from the Medical College of Wisconsin in Milwaukee will speak on "Human Genetic Defects" on Thursday, January 30, at 6:30 p.m. Tri-Beta is sponsoring the talk, which will be held in room 112 of the CNR.

Izaak Walton League Fishing Contest. The Bill Cook Chapter of the Izaak Walton League will hold its 22nd annual fishing contest on Sunday, Feb. 2. Fishing hours are noon to 4 p.m. and the site is McDill Pond on Stevens Point’s north side. The chapter uses the fisherie proceeds for its conservation projects.

We talked business some, fishing business, and Addis’ voice rose in excitement as he described the possibility of some day splicing a new gene into a bluegill that will make it grow twice as fast as bluegills do now. The beauty of that technique, Addis said, is that the fast-growth trait would be inherited by subsequent generations.

Notes cont.
Sleep Research
New studies show that a creature’s sleep time may depend not only on its metabolic rate, but also the species’ “danger factor.” Animals that have few natural enemies, like the quon and the bat, sleep as much as 20 hours of 24. But the rose deer, which has many enemies, naps only 2½ hours a day.

Aide Admits to Emissions
In a major step for the Reagan administration, the president’s special envoy on acid rain has admitted the problem comes from industrial sulfur emissions that can be controlled. In a meeting with New England governors, whose states are most affected by acid rain, Drew Lewis promised he would recommend some type of cleanup program.

According to a Lewis spokesman, the proposed program will likely concentrate on developing clean coal-burning technology while aiming for a modest reduction in sulfur dioxide emissions of one to two million tons a year.

Chesapeake Clean-up
Officials representing Pennsylvania, Maryland, Virginia, the District of Columbia and the federal government are diligently working to clean up America’s most famous bay. While the plan has been hailed as a new beginning for the beleaguered estuary, it’s not seen as a cure-all. "It is very likely that the current population, the existing amount of deterioration, the constant alteration of the shoreline and many present fishery harvesting practices will inhibit recovery," predicted the plan’s authors.

Fire Hinders Sheep
Fire ecology has been an important tool in wildlife management due to the new growth it encourages. But for wild sheep, fire is actually a hindrance. Recently, D.R. Seip and F.L. Bunnell of the University of British Columbia compared populations of Stone’s sheep in Canada.

Winter thaw holds fear for mice, food for hawks

Each year, after the midwinter blizzards, there comes a night of thaw when the tinkle of dripping water is heard in the land. It brings strange stirrings, not only to creatures abed for the night, but to some who have been asleep for the winter. The hibernating skunk, curled up in his deep den, uncorks himself and ventures forth to prove the wet world, dragging his belly in the snow. His track marks one of the earliest datable events in that cycle of beginnings and ceasings which we call a year. The track is likely to display an indifference to mundane affairs uncommon at other seasons: it leads straight across country, as if its maker had hitched his wagon to a star and dropped the reins. It shows, curi-

ous to deduce his state of mind and appetite, and destination if any.

The months of the year, from January up to June, are a geo-
morphic progression in the abun-
dance of disasters. In January

one may follow a skunk track, up search for bands on the

chickadees, or see what young pines the deer have brau-

ed, or what muskrat house.

The mouse, started by

my approach, darts daintily across the skunk track. Why is he

afraid in daylight? Probably because he feels.grabbed by the

thaw. Today his maze of se-

cret tunnels, laboriously chewed

through the matted grass under the

snow, are tunnels no more, but only paths exposed to public

view and ridicule. Indeed the

chasing sun has mocked the basic premises of the microcosmic econ-

omy!

A rough-legged hawk comes sautling over the meadow ahead. Now he steps, bowers like a kingfisher, his long, drooping like a feathered bomb into the marsh. He does not rise again, as I am sure he has caught, and is now eating, some worried mouse-engineer who could not wait until night to inspect the damage to his well-ordered world.

The rough-leg has no opinion why grass grows, but he is well

aware that snow melts in order that hawks may again catch mice. He came down out of the Arctic in the hope of thaws, for to him a thaw means freedom from want and fear.

UWSP INTRAMURALS
SPRING SEMESTER 1985-86

Hello, and welcome to the UWSP Intramural Program for semester II, 1985. Once again, a variety of activities and programs will be offered for your enjoyment. It is the philosophy of this Intramural Department to provide as many quality programs and activities as budgets and facilities will allow. Hopefully, this little pamphlet will aid you in trying to find some kind of activity you are interested in. If you have any questions or suggestions, feel free to contact the Intramural Desk.

Thank You

First Semester Intramural Champs

Men Women
1. east Baldwin (5/6) 4. west Hansen (256)
2. south Stein (361) 5. Watson Slammers (150)
3. east Knutzen (240) 6. south West (121)
4. the Parish (389) 7. south Sins (190)
3. east Pry (256) 8. Nelson Hall (30)

BUILDING PROCEDURES

Open recreation may occur when and wherever facilities are not scheduled for specific activities as

announced by the priority use policy. Please remember to use the facilities and equipment with care for the bene-

fit of everyone, including yourself. Facilities are open to the following people:

1. Currently enrolled students and their spouses,
2. Faculty, academic staff, and classified personnel and their spouses,
3. Children of the above persons when accompanied by their parents during open recreation hours.

In the one under age of 16 is allowed unless ac-

companying by a parent or guardian.

HEALTH ENHANCEMENT CENTER

The weight training center is located in room 146 of the

fieldhouse at the middle of Oxnard Gym balcony. With the

remodeling and addition of new equipment, it is now regarded as one of the best facilities in the state. Because of

this, our fees are placed on the facilities.

Memberships for admittance into the facility can be pur-

chased through the Intramural Dept.

Open Hours: Monday through Sunday Monday through

Friday, 10 a.m. to 10 p.m. Saturday and

Sunday

Membership: One semester ($15) Exp. June 10, 1986

Annual (300) Exp. August 1, 1996

All dates are tentative, although the schedule will stay as close as possible to the way they are writ-

ten here. Changes will be posted well in advance on the intramural boards and other areas as possible.

All entry forms and rules are available at the IM

Desk during hours of operation.

TRAINING ROOM

The athletic Training Room will be open to any student for first aid treatment only of injuries sustained during intramural activities or free recreation. A student trainee will be on duty to assist injured students and arrange transportation in either the Graduate or Undergraduate Medical Center if needed. Training Room hours are 3-11 P.M. on Monday through Thursday and 3-6 P.M. on Friday.

GELWICKS MEMORIAL POOL

The pool is available, free of charge, to all university personnel. All swimmers are required to have ap-

propriate swimwear and to have shaved before enter-

ning the pool.

Open Swim Times: Monday (8-9 a.m., 12-1 p.m., 8-11 p.m.); Tuesday (8-10 a.m., 11-1 p.m., 8-11 p.m.); Wednesday (8-9 a.m., 12-1 p.m., 8-11 p.m.); Thursday (8-10 a.m., 11-1 p.m., 8-11 p.m.); Friday (8-10 p.m.); Saturday and Sunday (2-4 p.m.).

RACQUETBALL AND TENNIS COURTS

Racquetball courts are available for reservation on a first come first serve basis. Only one time per day is allowed. The reservation sheet is located at the IM Desk when open, otherwise it is located on the bulletin board.

If you wish to play anytime before 4:00 p.m., the sign-up starts at 9:00 a.m. the night before. If you wish to play after 4:00 p.m., the sign-up starts at 9:00 a.m. the same day.

Outdoor tennis court is the same as racquetball, however, open court time is limited due to scheduled activities.

QUANDT AND BERG GYMNASIUM

Open recreational activities are permitted during open hours when other activities are not occurring.

A weekly schedule will be posted in each residence hall, but is subject to change. Check with the Intramural Desk.

AEROBIC DANCE AND EXERCISE

Aerobic dance sessions are scheduled for the semester during the following times: 6:30-7:30 a.m., Mon.-Thurs., and 11:00-12:00 noon, Mon.-Fri. in the Quandt gym. 12:30 noon, Mon.-Fri. in the Central gym.

Every weekend an average of 50,000 people stroll through the forest, directly on the ground, in rain or white croiss painted on dead and dying trees. The cause of this forest's ailment, German scientists believe, is air pollution deposited directly on the trees by fog, mist, rain or dry particles, as absorbed through the soil—or a combination of these factors. Nationwide, the effect of this pollution, coupled with insect infestation and other natural forces to which the ailing trees are doubly vulnerable, is numa.

"By November 1984, 56 percent of Germany's forests showed some degree of stress and 34 percent of mature trees had mortality. The problem of the Northern Hemisphere, indeed, high elevation forests in the North and East of the United States are rearing in vitality and productivity, instances, dying. Yet, it has been known for over a century that air pollution causes vegetative damage. An English scientist noted this in 1822, and during the last decades the U.S. Environmental Protection Agency (EPA) corroborated it with research showing crop damage from air pollution.

The current scientific debate, therefore, centers on whether pollutants or pollutants contribute to forest stress. Dr. Peter Schuetz, professor of forest biology at the University of Munich, believes that "it is difficult to look for the answer in a single (air pollution) component." The question, then, is first, which of the many air pollutants are the principal contributors to forest death and second, do these pollutants operate alone or in combination with another?" Dr. Ellis Cowling, forest biologist at North Carolina State University, recently echoed his German colleague's uncertainty, noting, "We do not know what airborne chemicals are important?" he asked. "This is the most crucial question facing us today."

In an effort to find the elusive answers, Congressman Jim Weaver (D-OR) held hearings on July 17 on the effects of air pollution on forest ecosystems. Following representatives from the EPA, the U.S. forest industry, and the scientific and environmental communities testified on both the issue at hand and Weaver's bill—H.R. 2963—authorizing a 10-year research program within the U.S. Forest Service. Meanwhile, the U.S. forest industry is investing $1.3 million this year into researching the health of U.S. forests. NSU scientists are conducting research similar to that of the German colleagues. At a field research station outside Raleigh, miniature conifer stands are encircled by open-top plastic chambers which briefly contain pollutants pumped among the trees. Before the pollution escapes from the topiaries, the health of U.S. forests.

Notes cont.
with and without access to
burned ranges. One area had
been burned repeatedly over a
number of years; the other had
not been burned for at least 125
years. It was concluded that the
quality of forage available to
sheep with access to burned
range was not superior to that
available to sheep on unburned
ranges.

Qualif Count
A cooperative study between
the Kansas Fish and Game
and the Nebraska Game and Parks
Commissions may help clear up
the age-old issue of whether or
not hunting regulations affect
the quail recovery. Bobwhite
numbers in the region have
dwindled due to bad winters fol-
lowed by poor nesting condi-
tions. As a result, Nebraska
may decrease both the season
and the daily bag limit, while
Kansas has left its regulations
untouched.

Biologists plan to continue
comparing whistle counts and
harvest figures until the popula-
tions are back to normal, which
might take four years.

Fishing cont.
Addis acknowledged the
importance of such fish as wal-
eyes and muskies, especially
as bait to entice tourists to north-
er Wisconsin, but he said a
large number of fishermen
would appreciate anything
that could be done to improve
pan-fishing.

"I'd rather be known as Pan-
fish Addis than Muskie Jim," he
said with a laugh.

Popp came by time to
time to report that fish were
hard to find that day, so
Addis and I stayed put. We
had about a dozen in
12" plastic buckets, comfor-
tably warm while the
arctic wind out-lode
rugged at the
tent's flaps, sipping coffee,
munching on liverwurst sand-
wiches and waiting
for a fish to bite.

There is no way of telling
them, so they'll just have to
spend the rest of their lives in
darkness of ignorance.

While the rest of us go fish-
ing.

DIABETES — SELF CARE CLASS
An opportunity to learn more about diabetes
and how to manage it.

Mondays 3-5 P.M., Feb. 24th-April 21, 1986
Worth one credit through the H.P.E.R.A. Department
Limit: 15 persons, with diabetes given preference
Classes will meet at library of Health Center UWSP

Register at Health Center Office or by calling 346-4646
Choosing a long distance company is a lot like choosing a roommate.

It's better to know what they're like before you move in.

Living together with someone for the first time can be an "educational" experience.
And living with a long distance company isn't any different. Because some companies may not give you all the services you're used to getting from AT&T.
For instance, with some companies you have to spend a certain amount before you qualify for their special volume discounts. With some others, voice quality may vary.
But when you choose AT&T, there won't be any surprises when you move in. You'll get the same high-quality, trouble-free service you're used to.
With calls that sound as close as next door, Guaranteed 60% and 40% discounts off our Day Rate—so you can talk during the times you can relax. Immediate credit for wrong numbers. Operator assistance and collect calling.
So when you're asked to choose a long distance company, choose AT&T. Because whether you're into Mozart or metal, quality is the one thing everyone can agree on.
Reach out and touch someone.

AT&T
The right choice.
Pointers climb into first place tie in WSUC

by Kent Walstrom
Sports Editor

The UWSP men's basketball team, who entered the new year two games below .500, have come on like gangbusters to win nine of their last ten while climbing into a first place tie in the WSUC.

The Pointers of first year Coach Jay Eck, now 6-2 in conference and 12-6 overall, share the lead with UW-Whitewater and UW-Eau Claire, both of whom UWSP will face once more during regular season play.

Following a dramatic 74-71 victory over UW-Oshkosh last Tuesday in the Quandt Fieldhouse, the Pointers entered a tough but successful two-game roadstand, facing UW-Eau Claire on Friday and UW-La Crosse on Saturday.

UWSP's flair for the dramatic continued against the Blugolds, as the Pointers fought into an overtime period, with Tim Naegeli scoring on a last second to clinch a 40-39 victory.

"We just played a very good defensive game," observed Coach Eck. "Eau Claire is ranked 3rd in the country and were on their home court, so anytime you go in there and beat them, you feel very fortunate."

Despite coming off such a physical game the night before, UWSP traveled to La Crosse on Saturday and came up with yet another consistent performance by beating the Indians 73-60.

Naegeli, UWSP's leading scorer all season, netted 16 points in the win. Kirby Kulax added 15 points and also grabbed five rebounds, while Jeff Olson notched 14 points and dished out seven assists.

Olson scored the Pointers' first four points at La Crosse and added four more points at the 11:21 mark to extend UWSP's lead to 30-25. Olson finished the half with 13 points, but the Indians managed to cut the deficit to 38-33.

No Grain, No Gain
Kirby Kulax (22) looks on as teammate Walter Grain (40) slams home two for the Pointers in their game against Oshkosh at the Quandt Fieldhouse.

Angelfish beat La Crosse

by Scott Meuer
Staff reporter

STEVEN'S POINT—The UWSP women's swimming and diving team made it look easy as it defeated the UW-La Crosse Indians by a score of 81-50.

Leading off a long string of first place finishes for the Lady Pointers was the 200 medley relay team of Laura Adee, Jan Gelwicks, Joannie Slauces and Theresa Calcher, 1:57.6; Deb Hadler (100 freestyle, 1:53.6); Pam Steinbach (100 and 100 freestyle, 1:47.9 and 1:48.9); and Calcher (50 freestyle, .28.1). Continuing the run was Gelwicks with a school record in the 200 individual medley, 2:17.9; Kathy Frohberg (100 butterfly, 1:05.7); Laura Adee (100 backstroke, 1:06.7); and Lynn Palmquist (500 freestyle, 5:44.9).

Taking second places in the meet for UWSP were the 200 medley relay team of Deb Hasanhauger, Roxie Fink, Frohberg and Grain; and the 200 breaststroke of Gene Proctor, 2:35.3.

Cont. p. 22
Dogfish earn weekend split

by Scot Mosey
Staff Reporter

STEVENS POINT, WI - The UW-Stevens Point men's swimming and diving team hosted the last Friday and Saturday afternoon to both U.W.-Madison (JV) and U.W.-La Crosse in what turned out to be an up and down weekend for the Pointers.

The meet on Friday against U.W.-Madison saw the Pointers drop a 68-45 decision, while Saturday's affair with U.W.-La Crosse was downed down 147-57, last event with Stevens Point coming out on top 58-52.

Posting winning times against Madison for the Dogfish were Jeff Stepanski in the 100 freestyle with a NAIA National qualifying time of 22.3 and 1:46.7; Bert Fish in 1:00 individual medley; and: 1:01.7 Woyte (200 breaststroke; 2:18.75); and Tim Thoma in the one meter required and optional diving events with a combined score of 20.35.

Finishing second in the meet was the 400 medley relay team of John Ruden, Wayne, Kevin Setterholm and Stepanski, 3:59.3; Ken Brumbaugh 1:00 freestyle and 200 backstroke, 1:01.5 and 2:14.9; Ruden (200 butterfly, 2:09.9); Fish (500 freestyle, 5:06.1); and the 400 freestyle relay of Brumbaugh, Setterholm, Fish and Jeff Shaw, 3:56.9.

Against La Crosse, the event champions for the Pointers included the 400 medley relay team of Setterholm, Wayne, Ruden and Johnstone, 3:53.7; Brumbaugh (200 and 500 freestyle, 1:47.7 and 5:45.3); Johnstone (500 freestyle, 2:21.6); and Stepanski in the 200 butterfly, 2:06.4.

The remaining blue ribbon swimmers for Stevens Point turned out to be the meet winner as the 200 medley relay team of Brumbaugh, Fish, Shaw and Johnstone, won the event by 1.1 seconds with a time of 1:39.4.

Scoring second place points were Stepanski, 200 and 500 freestyle, 1:45.6 and 5:46; Ruden, 200 individual medley and 200 butterfly, 2:06.4 and 2:03.5; Tim Thoma, one meter required, and optional diving, 1:51.8 and 203.3; and Wayne, 200 breaststroke, 2:19.8.

Coach "Red" Blair felt the Pointers gave a great effort. "Saturday's meet was an exciting one, going down to the last relay. Again, these guys rose to the occasion and that's the kind of team I enjoy coaching. I feel we are swimming extremely well and are on track for the championships at the end of the year."

Blair was also pleased to point out that for the first time in recent weeks UWSP's diving performance was a big plus for the Dogfish. "I've always said diving kills as in these meets but today Tim Thoma saved the meet for us with his performance."

Blair named Thoma, Dan Miller, Brumbaugh, Johnstone, Ruden, Stepanski, Paul McElhan, and Trent Westphal as Dogfish of the Week for their efforts on Saturday. Worked together on the best honor for his performances in both of the weekend's competitions.

The Pointers will be back in action this weekend as they travel to Cedar Rapids, IA. for the Coe Invitational.

Watch next week's Pointer for full coverage of UWSP's ice hockey team as they face UW-Eau Claire.
Porter’s transition to the NBA a smooth one

by Scott Haebelkamp
Staff Reporter

The Portland Trail Blazers came to Milwaukee on January 19 sporting a 25-18 record, sole possession of second place in the NBA’s Pacific Division and Terry Porter.

Porter, a two time All-American while at UW-Stevens Point and a graduate of South Division High School (Milwaukee), made his one and only return to Wisconsin this season as a member of the Trail Blazers. Portland made Porter the 36th player chosen in last year’s draft.

And how did the people of Wisconsin welcome him home? Does a sell-out MECCA, a pre-game standing ovation, and $600 Stevens Point residents (tickets distributed courtesy of Stevens Point alumni association) give any clues?

Despite the constant jingling of his phone at the Hyatt Regency hotel and hundreds of interview requests, Porter was able to contribute six points in three quarters of action in the Bucks 96-90 victory. "He was pretty happy to be back, even if only for a little while," said long-time girlfriend Susan Kardrich. "I got so hectic when I was visiting him we just took the phone off the hook."

Since joining the Blazers, Porter is averaging 6.8 points in 15.7 minutes of playing time. Earlier in the season he hit a career high 24 points against the Los Angeles Lakers.

Porter is seeing less and less bench time due to the wishes of veteran guard Darrell Valentine, who wished to be traded and has since been dealt to the San Diego Clippers. The added playing time, according to Porter, "has helped me perform on a more consistent level."

Porter doesn’t seem to be intimidated by other first round rookies such as the Knicks Patrick Ewing or Wayman Tisdale of the Indiana Pacers, and appears to be making the transition to NBA ball smoothly.

"I gained a lot of confidence in the Olympic Trials and all-star games," Porter noted. "I don’t think the big school players have an advantage over me. They’re rookies just like I am."

"No one really told me anything about my role when I got there, except that I would make the team (a guaranteed two year contract)," said Porter. "Beyond that, it was just a matter of how I played."

And play he has, pitching 45 assists and making 38 steals. He has also gained the admiration of Portland Coach Jack Ramsay, who said of Porter, "He’s a strong, tough kid; he plays hard all the time, and has good work habits."

Known as an all-around player in college, Porter’s defensive abilities have been pushed to the limits in the physical NBA.

Lady cagers up record to 11-2

by Julie Thayer
Staff Reporte

The Lady Pointer basketball team has won five of their last six games this semester, including an upset against the Lady Green Knights of St. Norbert's College. The Pointers defeated the Green Knights, who are ranked 4th nationally in Division III, with a 9-0 record. The women also find themselves ranked 19th nationally in Division III.

Four of those wins were conference games, as the Lady Pointers remain undefeated and leading the conference with an 8-4 record. The women also find themselves ranked 19th nationally in Division III.

The Pointers had the troubles against Green Bay earlier this month, losing to them by a score of 68-46. But the high scorer of the game was Sonja Sorrenson with 14 points, followed by Dina Rasmussen with 12. Rasmussen left the game early due to a leg injury.

Despite the absence of Rasmussen in the next three outings, the Lady Pointers were victorious over UW-Superior, UW-Whitewater, and UW-Parkside.

The team had a tough game against Superior, beating them by a score of 56-54. The Pointers were down by one point with 13 seconds left in the game, but Karla Miller sank two free throws to win the game. High scorers for Point were Sorrenson and Amy Gradecki, who netted 15 points each.

The Lady Cagers have had a much easier time against UW-Whitewater, beating them by a score of 85-62. Again, the high scorers were Sorrenson with 26 and Gradecki with 24.

ASSESSOR HALL DIRECTOR OPENINGS

ấ

An informational meeting will be held on Monday, February 3, 1986 at 7:00 P.M. in the Debord Blue Room.

This meeting will provide information regarding the assistant director positions in the residence halls and on the screening process. A number of halls will be hiring.

How to apply: Applications are available beginning February 4. Applications are due February 10. You may obtain an application from the Residence Life Office in Delzell Hall.
DNR implements changes in resident licenses

Beginning last month there's a new procedure in effect for the purchase of Wisconsin resident hunting or fishing licenses. DNR chief.warden Ralph Christensen said, "The new system is simple." Christensen explained, "License agents will allow only four types of identification for the purchase of a resident license." Acceptable forms of identification are:

1. Valid Wisconsin driver's license.
2. Wisconsin Department of Transportation (DOT) letter of suspension or revocation.
3. Wisconsin DOT identification card (non-driving license).
4. Wisconsin DNR sportsperson identification card.

The new procedure is designed to cut down on the fraudulent license purchases in Wisconsin and simplify the license issuance, "Christensen said. "With the old procedure of issuing licenses, the issuing agents were required to be a judge in deciding who was a legal resident or non-resident."

Only Wisconsin residents are eligible to purchase resident licenses. "In the past, some non-residents took advantage of the loose identification requirements and at times fabricated names, house numbers, and even streets to obtain the lower priced resident licenses," Christensen said. "Under the new system, residents have nothing to fear from filling out a declaration of residency if they do not have a Wisconsin driver's license."

The Wisconsin DNR sportsperson identification card is designed to be issued to residents without a driver's license or DOT identification card. Persons under 18 years of age are exempted from the new law. This was done to allow persons between 16 and 18 to obtain a driver's license. Licenses for residents under 18 years of age will continue as they had in previous years.

A resident is anyone who has a permanent abode in Wisconsin for a period of 30 days or more declaring domiciliary intent that a person is maintaining his or her place in the state. Evidence of domiciliary intent includes, without limitation, the location where the person votes, pays personal income taxes, or obtains a driver's license. More ownership of property is not sufficient to establish domiciliary intent.

There's something wild lurking in your Wisconsin income tax form.

Pointers, cont.

La Crosse worked its way back into the game early in the second half to trail by five at 46-41, but an eight point run by UWSP put the Pointers back in control and the Indians never seriously threatened the rest of the game.

Despite the 73-43 victory, Eck did not appear entirely satisfied with the win. "Everybody contributed at different times during the game, but we never got everybody going at the same time," said Eck, whose Pointers entertain Stout at Quadfield House Saturday. "Stout will be a very hard game for us," said Eck bluntly. "We're in a pretty good position (in the conference), but we can't get complacent." Gametime on Saturday is slated for 7:30 p.m.

Porter, cont.

He has been able to hone his skills guarding All-Pre's such as Mag Johnson of the Lakers and Sidney Moncrief of the Bucks.

Bucks director of player personnel, Art Leimon, has said of Porter, "He's a throwback player with old-fashioned values, one of the better defenders in the league already, and a natural lead guard."

Leisure time for Terry has been spent familiarizing himself with Oregon and adding his personal touch to a new apartment. When he's not playing basketball, Porter is playing big brother to a boy named Joshua. Along with Porter, teammates Steve Colyer and Jerome Kersey are also involved in youth programs in the Portland commun-

Porter no longer wears the Polish, Purple and Gold. Blazer black and red. And if his rookie season is any indication of his future, he'll be wearing those same colors for many years.
Lady cagers up record to 11-2

by Julie Thayer
Staff Reporter

The Lady Pointer basketball team has won five of their last six games this semester, including an upset against the Lady Green Knights of St. Norbert's College. The Pointers defeated the Green Knights, who are ranked 8th nationally in Division III standings in the NCAA. Four of those wins were conference games, as the Lady Pointers remain undefeated and lead the WWLAC conference with an 8-0 record. The women also find themselves ranked 9th nationally in Division III.

The Pointers had their troubles against Green Bay earlier this month, losing to them by a score of 58-46. The high scorer of the game was Sanja Sorenson with 14 points, followed by Dina Rasmussen with 12. Rasmussen left the game early due to a leg injury.

Despite the absence of Rasmussen in the point situation, the Lady Pointers were victorious over UW-Superior, UW-Stout, and UW-Parkside. The team had a tough game against Superior, beating them by a score of 58-49. The Pointers were down by one point with 10 seconds left in the game when Karla Miller sank two free throws to win the game. High scorers for Point were Sorenson and Amy Gradecki, who netted 13 points each.

The Lady Cagers had a much easier time against UW-Stout, beating them by a score of 85-62. Again, the high scorers were Sorenson with 36 and Gradecki with 14.

UW-Parkside also had little luck against Point as the offensive drive of Sorenson, Miller, and Gradecki gave the team an 84-39 victory. Sorenson scored 28 points and Gradecki and Miller each netted 25.

Two more conference wins were chalked up on the road last weekend as Point defeated both Eau Claire, 78-43, and Oshkosh, 87-74. Karla Miller had the game-high against Eau Claire with 29 points, followed by Sorenson with 27, who also shot 100 percent from the free throw line.

Sorenson continued her hot shooting against the Titans of Oshkosh while setting a new Lady Pointer record with a game high of 36 points. She shot 80 percent from the field and had another perfect game at the free throw line. Karla Miller added 27 and Gradecki 15 for UWSP.

The Pointers hosted St. Norbert's College last Monday evening, downing them by a score of 75-71. Miller shot four field goals within the first five minutes of the second half to turn an eight-point deficit at half into a tie game. A foul followed by a technical called against the Green Knights brought Miller to the line with under 4:00 left in the game. Miller sank four of four free throw attempts to pad the Pointer lead to 70-63.

The St. Norbert team fought back and scored seven quick points, but UWSP held on to defeat the Lady Green Knights.

Karla Miller took scoring honors with 22 points and Amy Gradecki added 20.

Coach Linda Wunder is extremely happy with the team's 11-2 overall record. What was originally thought to be a rebuilding year is turning into a winning season for the Lady Cagers. "I think the players adjusted easily to me as a coach," explains head coach Linda Wunder. "And I also think the team now believes they can win ball games. We've had a tough schedule in playing six games within the last ten days, but this team has done a really good job, especially last weekend against Eau Claire and Oshkosh."

The Pointers have a busy week, having traveled to La Crosse on Wednesday and facing Platteville on Friday and the undefeated Whitewater team on Saturday. The next home game will be Tuesday, February 8th against La Crosse at 7:00 p.m.

---

ASSISTANT HALL DIRECTOR OPENINGS

An informational meeting will be held on Monday, February 3, 1986 at 7:00 P.M. in the Debot Blue Room.

This meeting will provide information regarding the assistant director positions in the residence halls and on the screening process. A number of halls will be hiring.

How to apply: Applications are available beginning February 4. Applications are due February 10. You may obtain an application from the Residence Life Office in Delzell Hall.
DNR implements changes in resident licenses

Beginning last month there's a new procedure in effect for the purchase of Wisconsin resident hunting or fishing licenses, DNR chief warden Ralph Christiansen said.

"The new system is simple," Christiansen explained. "License agents will allow only four types of identification for the purchase of a resident license." Acceptable forms of identification are:

1. Valid Wisconsin driver's license.
2. Wisconsin Department of Transportation (DOT) letter of suspension or revocation.
3. Wisconsin DOT identification card (non-driver license).
4. Wisconsin DNR sportsperson identification card.

The sportsperson identification card is easily obtained by an applicant filling out a declaration of residency form. The initial license will be issued on the basis of the declaration of residency form. The form is then forwarded through the county clerks to Madison where a sportsperson identification card will be issued to legal residents. The card will be valid for two years for future license purchases.

This new procedure is designed to cut down on the fraudulent license purchases in Wisconsin and simplify the license issuance," Christiansen said. "With the old procedure of issuing licenses, the issuing agents were required to be a judge in deciding who was a legal resident or non-resident."

Only Wisconsin residents are eligible to purchase resident licenses.

"In the past, some non-residents took advantage of the loose identification requirements and at times fabricated names, house numbers, and even streets to obtain the lower priced resident licenses," Christiansen said. "Under the new system, residents have nothing to fear from filling out a declaration of residency if they do not have a Wisconsin driver's license."

The Wisconsin DNR sportsperson identification card is designed to be issued to residents without a driver's license or DOT identification card.

Persons under 18 years of age are exempted from the new law. This was done to allow persons between 16 and 18 to obtain a driver's license. Issuance of licenses to persons under 18 years of age will continue as they had in previous years.

A resident is anyone who has maintained a permanent abode in Wisconsin for a period of 30 days or declaring domiciliary intent that a person is maintaining his or her place in the state. Evidence of domiciliary intent includes, without limitation, the location where the person votes, pays personal income taxes, or obtains a driver's license. Mere ownership of property is not sufficient to establish domiciliary intent.

There's something wild lurking in your Wisconsin income tax form.

Pointers, cont.

La Crosse worked their way back into the game early in the second half to trail by five at 40-35, but an eight point run by UWSP put the Pointers back in control and the Indians never seriously threatened the rest of the game.

Despite the 73-43 victory, Eck did not appear entirely satisfied with the win. "Everybody contributed at different times during the game, but we never got everyone going at the same time," said Eck, whose Pointers entertain Stout at Quandt Fieldhouse this Saturday.

"Shout will be a very hard game for us," said Eck bluntly. "We're in a pretty good position (in the conference), but we can't get complacent."

Gametime on Saturday is slated for 7:30 p.m.

Porter, cont.

He has been able to hone his skills guarding All-Pro's such as John Johnson of the Lakers and Sidney Moncrief of the Bucks. Bucks director of player personnel, Shu Inman, has said of Porter, "He's a throwback player with old-fashioned values, one of the better defenders in the league already, and a natural leader."

Leisure time for Terry has been spent familiarizing himself with Oregon and adding his personal touch to a new apartment. When he's not playing basketball, Porter is playing big brother to a boy named Joshua. Along with Porter, teammates Steve Cotler and Jerome Kersey are also working on the Quandt Fieldhouse basketball. The Pointers have the inside track on who will wear the same colors for many years.

Win history award

University News Service

A $10 prize will be awarded for the winning entry in the 10th annual competition for the Rothman Local History Award. The competition is open to all Portage County history majors. Entries must be submitted by the April 1 deadline.

Examples of projects being sought are research papers, oral histories, written materials in scripts or documentary materials, research on local memorabilia for the historical society, collection of historical usefulness, collection and identification of historical artifacts for preservation and display. Anyone is eligible to enter.

The winner will be announced at the annual meeting of the Portage County Historical Society on April 16. Written materials in the entries should be typed if possible, and cases which are being entered, papers of explanation should be provided if the work or collection cannot be sent.

Credit overload policy

There has been some confusion recently regarding the credit overload policy with our graduate students. As our catalog states (p. 72): "Full-time graduate students may, with permission of their advisor, schedule up to 15 credits during a semester. Special students and graduate and research assistants and students with incomplete outstanding should not be expected to carry maximum loads. Extraordinary students may exceed the maximum cited above by securing written approval of their advisor and the Graduate Dean." In practice, this means that graduate students other than those on an assistantship may carry a maximum of 12 credits per hour (total credits, both graduate as well as undergraduate) with the approval of their graduate advisor. Graduate students may, however, be required to carry more than 15 hours a semester unless the advisor must approve signature change to the Dean of Graduate Studies. Overloads in excess of 15 hour credits are granted only under exceptional circumstances. The overload request to the Dean of Graduate Studies must be accompanied by a written rationale from the graduate advisor explaining the extraordinary circumstances which require the extra credit load. Overload cards may be obtained from the offices of the Registrar or the Graduate Student Services Office.

The Student Assistance Center (SAC) is not involved in the approval of any overload for graduate students.

Graduates

From p. 10, continue the capacity to synthesize, study societal goals and purposes, and implement them.

About 900 people received either associates, bachelor's or master's degrees in the morning ceremony.

German Catholics represented about a third of their nation's population and had a long tradition of support for the local class. They attempted to compensate for their lack of political power through patronage as a means of support for their church, Dietrich suggests.

Nevertheless, there was considerable resistance from the Catholic clergymen to the Catholic brothers who believed the priests and their parishes to be institutions of the Church. The Catholic community opposed the idea of the local government as a force. Dietrich says German Catholics, like Catholics, faced dilemmas. They, too, belonged to the majority denomination, the state religion but unlike the Catholics, had no hierarchical religious body to back them up. They "became an abstraction," according to Dietrich.

Most of the courageous actions by Catholics against the Nazis took place on "the local level," adds Dietrich. There is a story of a local priest who went to his church on a Sunday morning and slugged an officer who was threatening local boys away from an outlaw when they were supposed to be at a Mass. Several of the boys were spared before the whole parish was sent to the church. The government wanted to quell the protest.

Dietrich says German Catholics, like Catholics, faced dilemmas. They, too, belonged to the majority denomination, the state religion but unlike the Catholics, had no hierarchical religious body to back them up. They "became an abstraction," according to Dietrich.

Transaction Books at Rutgers University is publishing the book in hardcover and soft­ cover.

Given little mention in history books, Jehovah's Witnesses and neoconscripts shared the same fate as the Jews. Die­ ing of the watches to several thousand Witnesses went to the watchtowers. Also, many Ger­ man officials who defied the swastika, spoke angrily at Nazi leaders and rejected offers of em­ ployment were sent to prison.

Dietrich has been doing re­ search for his book for a dec­ ade. He has received grants to travel in this country and in Eu­ rope and to be the leaves from his classroom. His funds have come from the UWSP Personal Development Committee, the Institute for Historical Research, the National Endowment for the Humanities and the Rockefeller Foundation.
Indian history traced

University News Service

A new course which will trace the history, culture, and science of the art from the Menominee Indian will be the second as part of the UWSP's Weekend College during the spring semester.

Professor David Wrote of the history faculty will serve as the major instructor of the class meetings from 9 a.m. to 1 p.m. on Saturdays and Wednesday, February 14 and May 3.

Joining Wrote with some of the lectures will be two drivers of the Menominee reservation, Manuel Boyd of Keshena, who will discuss the history and culture of his people, and James F. Frechette Jr. of Rhinelander, who will explain the tribe's traditional art.

Three credits in history can be earned in the course. To date, more than 30 Wisconsin Indians have signed up for it plus another 12 non-tribal students. At least 15 more students will be accepted. Registration is being handled by the Native American Center staff in the Park Student Services Building.

chambers, the experiment mimics levels of pollution to which many of our high-elevation forests are routinely exposed.

This research is aimed at closing the gap between policy-makers' desire to go ahead with air pollution reductions and the scientific information necessary to achieve reductions. As Professor Schaffner observed, the ongoing debate is "not a scientific discussion alone, but a political and economical one as well."

Pollution control equipment is expensive, especially if it is designed to trap multiple air pollutants. The question of who shall bear the cost of reducing pollution is as troublesome as is the question of what air pollutants must be controlled.

However, the time for finding the answers to our questions is now. West Germany's experience has proven this, with the increase from eight percent of its forests damaged in 1962, to 34 percent in 1982, to 50 percent damaged in 1984.

The Menominees and the Winnebagoes are believed to have lived within what are the present boundaries of Wisconsin longer than any other Indian people. Wrote says the Menominees have a complex culture and an "animated tribal life that have served as a strength of the tribe's society through the centuries." The members have been noted, he adds, for their "physical beauty as a tribe and their loyalty."

Wrote has done extensive research and writing about various Indian groups in the state, particularly the Menominees. Frechette has become widely known as a woodcarver and in his segment of the course he will teach basic skills involved in it. He also will impart the principles involved in approaching traditional art and demonstrate the Menominees use to teach the next generation.

Boyd, 78, has been active in recent years working for the preservation of his tribe's history and culture and has given demonstrations and lectures.

STEVENSON POINT — In Wisconsin this year, 900 women are expected to die from breast cancer. It is currently the second one cancer killer of American women.

The American Cancer Society states that one of every 11 women will develop breast cancer at some time during her life. Many go on to live long, fulfilling, productive lives, thanks to advanced methods of detection and treatment. Others, due to fear or lack of knowledge, are less fortunate.

Ron Riggins, manager of radiology, St. Michael's Hospital, stresses that one of the most important factors in dealing with the disease is awareness. "Knowledge of mammography and other methods, such as self breast examination can eliminate many fears, because the procedures can lead to early detection and treatment," he said.

According to Riggins, the radiology department at St. Michael's has seen a recent increase in the number of mammograms performed when the media has spotlighted how thorough exams can save a woman's life.

The exam itself is simple, requiring more drugs may have, with some minor discomfort. St. Michael's will adhere to the guidelines established by the American Cancer Society for examining women without symptoms:

- Women between 35 and 40 — a one-time baseline examination for later comparison.

- Women in between 45 and 50 years of age — an examination every one to two years.

- Women over 50 — an annual examination.

Those women having a personal family history of breast cancer are encouraged to have examinations at an earlier age and more frequently.

The radiology department will also provide educational material to patients awaiting the examination. A film and instructional brochure on self-breast examination will be offered.

The above information, on the mammo gram system can call St. Michael's Radiology Department at 286-5100.

DRUGS AND DRIVING

Careful driving requires complete attention and skill. Driving while under the influence of drugs is dangerous. To avoid this problem, we can make judgement errors in driving. That's why it's important to be aware of the effect drugs may have on our judgement and ability to react quickly.

As a responsible driver, you should remember the following precautions:

1. Alcohol is the most widely abused drug and is a factor in over 50 percent of America's highway deaths. It's a depressant and slows down your ability to react quickly and correctly.

2. Marihuana is a hazardous drug. It alters the mind by slowing down reflexes and thinking ability. Research shows that normal driving performance is not regained for as long as 4 - 6 hours after smoking just one marihuana cigarette.

3. If your doctor prescribes a drug, be sure to ask how it will affect your ability to drive.

4. When taking over-the-counter drugs, read the label thoroughly. Heed any warnings about drowsiness or other side-effects that may reduce your driving ability.

5. Drugs that cause drowsiness or make you feel dizzy and edgy, slow your reflexes and impairs your judgement.

6. Using alcohol with other drugs, particularly other depressants, alcohol increases the effect of other drugs, making driving extremely hazardous.

Drugs and driving never mix — the combination often leads to disaster. Use good judgement and give your driving all the attention it deserves.

County Fair is a bright winner for Government Employees Insurance Company.
On Campus Interviews

ANNOUNCEMENTS

ANNOUNCEMENT: The Mary K. Croft Academic Achievement Center/Writing Lab will soon be administering impromptu essays for students requiring writing clearance. Impromptu dates are February 4, at 8:00 a.m. and on Wednesday, February 5, at 7:00 p.m. Please stop by the Lab to sign up for the impromptu program. Students having taken the impromptus in previous semesters need not take this impromptu.

ANNOUNCEMENT: I am incorporated at the state prison in Virginia and am seeking a pen pal relationship with anyone who would like to write to me, as I have no family in the free world. Please write: Billy Reehard, No. 143305, Route 6, Box 50, Chatham, VA 24532.

ANNOUNCEMENT: All CNR majors eligible to attend 1996 Treasure summer sessions: Information meetings will be held on Monday, February 3, at 4:30 p.m. or on Wednesday, February 5, at 5:00 p.m. in Room 122 of the College of Natural Resources Building.

ANNOUNCEMENT: University radio station WUSP 88FM is now taking applications for the position of production director. Students applying must carry a minimum of six credits and have at least a 2.0 grade point average. Interested students may pick up an application and job description at the WUSP studio. Deadline is February 14.

ANNOUNCEMENT: STUDENT EXPERIMENTAL TELEVISION ANNOUCEMENTS NEW SHOWS! SUBS on February 13 at 7:00 p.m. SETV will premiere a new show called "The Feed." It is a game show type show and will include student organizations. The format is similar to that of the network show, "The Family Feud." The show will be aired every other Thursday evening, beginning February 13 at 7:00 p.m. If you are a student organization and would like to compete on "The Feed," please call the Student Experimental Television Office at 366-3606 during regular business hours.

ANNOUNCEMENT: Hey all you wild Ones, creative people out there—enter the Homecoming Theme and Logo Contest! Just submit a theme and logo idea for Homecoming '96 to the UAB Office, lower level UC by 4:30 p.m. February 22. First prize is an entry into Homecoming week events, as fired up.

ANNOUNCEMENT: Get into ACT student participation for Community Tasks can you offer, as a volunteer, several opportunities to gain experience.

This Saturday night to take on UW-Stout. The game starts at 7:30 p.m. in Quandt Gym.

Monday-Thursday 7:45 a.m.-11 p.m.
After Hours 11 p.m.-1 a.m.
Friday 7:45 a.m.-4:30 p.m.
After Hours 4:30 p.m.-11 p.m.
Saturday 9 a.m.-5 p.m.
After Hours 5 p.m.-11 p.m.
Sunday 10 a.m.-11 p.m.

Protect your unborn baby with good prenatal care. Call your local chapter for a free booklet: *Be Good To Your Baby Before it is Born.*
A defense against cancer can be cooked up in your kitchen.

Fruits, vegetables, and whole-grain cereals such as oatmeal, bran and wheat may help lower the risk of colorectal cancer.

Foods high in fats, salt- or nitrite-cured foods like ham, and fish and types of sausages smoked by traditional methods should be eaten in moderation.

Be moderate in consumption of alcohol also.

A good rule of thumb is cut down on fat and don't be fat. Weight reduction may lower cancer risk. Our 12-year study of nearly a million Americans uncovered high cancer risks particularly among people 40% or more overweight.

Foods that may help reduce the risk of gastrointestinal and respiratory tract cancer are cabbage, broccoli, brussels sprouts, kohlrabi, cauliflower.

Now, more than ever, we know you can cook up your own defense against cancer. No one faces cancer alone.

PRIVATE ADOPTION AGENCY

Private adoption agency has many families wanting to love your child. Birth parents interested in adoption services, please call 715/845-6289. Collect, if long distance.
