News Editor

Recently two UWSP students were placed on probation for one year by the Office of Student Conduct. It was the result of breaking certain UW-system codes while publishing a spring break trip to Daytona Beach. Student representatives Mike Van Hefty and John Leszynski, hired by Campus Marketing Inc., were cited with illegally putting posters on students' residence hall room doors and for putting announcements of the trip in residence hall mailboxes. Van Hefty, however, feels he and Leszynski were not given all of the required rules they should have (followed)—when they were originally confronted by Campus Activities. The copy they were given originally is called the Solicitation Policy of Residence Life. The portion of the policy that Van Hefty and Leszynski misinterpreted, according to Student Conduct, reads: "No person may enter or remain in a building, room or office occupied by the state or state or in direct letter or other notice for the purpose of requesting or collecting a contribution." Van Hefty maintains this definition is vague and subject to different interpretations. They felt they were not asking for a contribution, nor did they solicit door-to-door without permission. Only after they had asked and received sponsorship by the American Marketing Association did they set up a booth in the concourse of the UC. The students were then told they had not followed the bidding procedure for advertising their trip. "We were told the only way we could advertise was word of mouth and in The Pointer," Van Hefty said. "People would call us after seeing the ad in The Pointer and then we'd go see them. If the trip was sold, we'd ask if they would put the poster on their door. They (Student Conduct) said that was in violation because the door is part of the room and we were not allowed to solicit a bid. But we did not go door-to-door," he reaffirmed.

Later Van Hefty and Leszynski received notice of the alleged charges and were told to attend a hearing by Student Conduct. The notice explained the alleged violation, listed the Office of Student Conduct's responsibilities, and it named the students' responsibilities and options. Only then were they given the "Student Disciplinary Procedure" (Chapter 17 University of WI System) and the Conduct on University Lands" (Chapter 18 UW-Stevens Point). These two charges, upon review, are legal and detailed. "This explains exactly what we can and cannot do. The previous rules we were given at Campus Activities leaves out a lot of things. If we had been told that earlier, we would have known exactly what was illegal," Van Hefty asserted.

SGA landslide
Thiel/Geis Victorious
by Christopher Desory
Pointe Editor

Linda Thiel and running-mate Steve Geis emerged victorious in Tuesday's Student Government presidential and vice-presidential elections. The Thiel/Geis ticket won with a whopping four-to-one margin over second place finishers Mike Ormond and Diane Barton. Others receiving votes included student candidates Kris Olszewski and Jane Jamiaczek and Joe Lundke who rounded out the field of candidates.

Thiel is a communications and business administration major who is also current student president of the University Activities Board. Geis is majoring in water chemistry and is presently a SGA senator from the College of Natural Resources. Thiel and Geis

COPA

President Lisa Thiel and Vice-President Steve Geis.

Geis will assume his new role this summer as they succeed current SGA president Chris Johnson and vice-president Diane Engelsgard.

The elections also included these running for Senate positions. Overall, 775 students voted in the election which was on a par with last year's eight percent turnout. Not surprisingly, the College of Natural Resources tallied a total of 251 voters to lead all colleges. Letters and Science followed second with 394 voters, then came the College of Professional Studies with 112 voters, Communications registered 96 voters while the College of Fine Arts totalled 88 voters.

The College of Professional Studies, due to the lack of student participation, was unable to fill three of its six important Senate seats. L & S

Two UWSP students on probation for publicity violations

Campus open house huge success

by Joanne Davis
News Editor

UWSP's fourth annual Open House was held this past Saturday. More than 4,000 people attended the over 200 special programs scheduled throughout the day a huge success. "Peggy lacyrko, Open House coordinator with University Relations, remarked, "The day was well organized and the departments all put together their programs very well. If the many faculty and students are willing to give up the beautiful Sunday that it was to make it work, the credit really belongs to them." The many CIN organizations, SGA, PRSSA, and many, many more organizations were cited as high volunteer contributors for the day by Karin Bostic, student intern working on Open House.

"I saw a lot of people following their classmates around as they maneuvered from building to building—but most had big smiles on their faces. This event helps make the community more aware that UWSP has to offer and helps them become less intimidated by it," Bostic said.

The movie E.T. and the Scott Jordan Comedy Show drew large crowds and were especially popular with children. The animal exhibits was, as always, a big attraction and drew many wide-eyed looks from the young ones. The free soil pil testing by the Soil Conservation Society also drew good response, and anyone present could see that the free balloons distributed by several groups were a hit with young and old alike.

More involvement and better communication challenge

New SGA leaders:

"If we took the one hundred most powerful men in America, the one hundred wealthiest, and the one hundred most celebrated away from the institutional positions they now occupy, away from their resources of men and women and money, away from the media of mass communication that are focused upon them—then they would be powerless and poor and uncelebrated. For power is not of a man, wealth does not center in the person of the wealth. To have power requires access to major institutions, for the institutional positions men occupy determine in large part their chances to have and to hold these valued experiences."

It is my hope as a student at UWS that the "valued experiences" that sociologist C. Wright Mills described in the previous passage will no longer be taken advantage of by SGA officials. Now that Lisa Thiel and Steve Gels have won the election, I genuinely want to believe that the promises they made during their campaign (many of them seem a little too idealistic) are promises they intend to keep.

Thiel and Gels have assured us, now that they have been elected, that we are "guaranteed progress." Progress, as they see it, comes in the way of better communication between SGA and the student body (they have not yet indicated how this communication will occur).

Our new SGA president and vice-president have also said that they want to coordinate themselves with the student-elected Senate to activate students to become informed on issues, take stands, and become active voters on issues that affect them. I hope you can do that too, Lisa and Steve, because if you do, we may finally have an organization in SGA that lives up to its name—STUDENT Government.

Increasing the involvement of students who are generally apathetic is a difficult task. There are limits as to what one can do. Since this seems to be a part of the campaign of Lisa and Steve, I hope they will consider some of the suggestions that have been made to them by other students.

One of the best I’ve heard was described by Chris Dorsey in last week’s issue of THE POINTER. He described an idea first brought up by a professor at the University of Michigan. It suggested that students should be able to allocate their money to the organization of their choice. Logically this would be the most accurate representation of a budget that is devised to serve the students, since those organizations which are "used" more by students will receive the most money.

This may seem a little too simple to actually work, however, it does lay the foundation for some very good ideas or improvements in the present budget allocation system. For instance, since it is fairly well known that there are a large number of students who really don’t care where their money goes, it is a safe bet to say that there would be several organizations that

SA periodecer earlier decision

**A1O:** If at first you don’t succeed, try again

by Bob Wrotnski
Staff Reporter

A decision on the budget for the American Indians Resisting Chipewa, was made at Quandt Gym this past weekend. Running from 10 a.m. to 6 p.m. on Saturday, March 12, and from 11 a.m. to 4 p.m. on Sunday, March 13, it drew 67 antique dealers and collectors from throughout the Midwest. The event serves both as a fundraiser for the Athletic Department and also as an opportunity for antique buffs, both local and national, to share their hobby with the public.

The idea to use an antique show as a fundraiser was suggested in 1978 by the Athletic Director at that time. Due to his own interests in antiques, he recognized the nationwide interest in antiques and saw the potential for a lucrative fundraiser. Since then, interest in the show has spread and now becomes a major means by which the Athletic Department achieves financial support.

Diane Roeker, this year’s Show Manager, stated, "We have had a very good turnout this year. The dealers are very happy with the amount of selling taking place here.”

Dan McGowan, a collector and dealer from Round Lake, Illinois, said, "This is our second year here at Stevens Point, and we've done much better than last year—business has been good.

Both the dealers and the browsers of the show showed a tremendous amount of enthusiasm for their hobby. Elaine Stanelle, a dealer from Brilliance, WI, said, "I've always loved history, and I soon realized how much history could be seen through antiques." She points out that there is a great deal of traveling, hard work, and long hours involved. Many dealers spend up to 40 hours of their weekends traveling and preparing for displays. Besides being hard work, very little monetary profit is gained by dealers. "We never get rich doing this,” says Stanelle, "but we all love the business.

Other antique enthusiasts also based their love of antiques on a desire to trace the past. Mr. Bishop, of Bishop's Antiques here in Stevens Point, states, "They (antiques) are not just collections of junk found in someone's closet. Every antique has a story behind it.”

Lorenda Beard, a Plover resident who has been collecting antiques for 26 years, says, "It's looking back and seeing who had those things. I just love them. I could live among them.

Browsing through the thousands of tarnished trinkets, chipped dishware, and tattered books, one outside the world of antiques may wonder why antiques stimulate such enthusiasm. "We are just a special breed of cat,” claimed Elaine Stanelle. Whether one of the "cats" or a mere passerby, one could certainly sense the sentimental and nostalgia which filled Quandt Gym this past weekend.

Accuracy in Academia

Conservative group suffers credibility blow

by Christopher Dersey
Pointer Editor

In a recent survey conducted by the National On Campus Report, the conservative group called Accuracy in Academia (AIA) recently suffered a blow in its campaign to gain credibility. The survey polled college newspaper editors and student leaders to learn what they thought about the group.

"Similar to McCarthyite witch hunts, AIA could be deviating to the creative exchange of all ideas which is fundamental to genuine, quality education. This group attempts to feed a blind, anti-communist hysteria, and in doing so, obscures the fundamental violation of civil rights—freedom of expression that can occur should such labels lead to discrimination in faculty hiring and firing,” wrote one campus leader.

AIA was spawned as part of the recent conservative trend in America and was designed to identify so-called Marxist professors. Some conservatives, however, want no part of AIA’s activities. "I am a conservative Republican," wrote one student president, "and a firm believer in academic freedom as to education. If meaningful, AIA will severely restrict academic freedom and leave us with brainwashing or propaganda.

Overall, 47 percent of the respondents felt there was little or no harm caused by AIA. Most people in this category felt that AIA was obviously a one-sided organization that most people would turn off to. Other respondents felt stronger. "The group’s anti-intellectual stance will be threshed by the intelligent academic community," Roughly 20 percent of the respondents, however, felt AIA would have a harmful effect both in academic freedom and the loss of quality professors who have grown tired of this type of censorship.

On the flipside, seven percent of the respondents thought that AIA is a beneficial organization and that it is a good idea to have a broad spectrum of representation.

Whatever the case, AIA seems to have fallen short in its attempt to hook the public sentiment, and it doesn’t look as though college leaders are willing to take the bait either.

Small city conference begins today

by Joanne Davis
News Editor

The Seventh Conference on the Small City and Regional Community will be held at UWSP once again. The conference will cover a wide range of issues and will begin at 9 a.m. today through 12:30 p.m. tomorrow.

"This is one of our strongest programs ever," said Robert Wolensky, one of the conference coordinators. "The topic is very hot right now," he added.

This year 190 speakers from 23 states and three foreign countries will address this year’s theme: Economic Development—sources, issues, and impacts.

The conference is held every other year, beginning in 1978. The conference coordinators and originators, Wolensky and Edward J. Miller, Dept of Political Science, established the Center for the Small City at UWSP in 1975. An academic minor, Small Cities Analysis, is now offered at UWSP as well. The Center is located in Room 405A.

There is no cover charge for faculty, students, and staff of UWSP for the conference. The public is welcome and can register in the Communications Room 404.

Participation in the Easter Seals Tournament in Fort Lauderdale, Florida. The Senate also gave $500 to the Student Nuclear Information Forum and held a resolution opposing a nuclear waste disposal site in Wisconsin.

Pai Chi, a psychology club, was recognized also on Thursday night.

Antique show draws large crowd

by Al Edwards
Staff Reporter

The Eighth Annual University Antique Show and Sale, sponsored by the UWSP Athletic Department, was held in Quandt Gym this past weekend. Running from 10 a.m. to 6 p.m. on Saturday, March 12, and from 11 a.m. to 4 p.m. on Sunday, March 13, it drew 67 antique dealers and collectors from throughout the Midwest. The event serves both as a fundraiser for the Athletic Department and also as an opportunity for antique buffs, both local and national, to share their hobby with the public.

The idea to use an antique show as a fundraiser was suggested in 1978 by the Athletic Director at that time. Due to his own interests in antiques, he recognized the nationwide interest in antiques and saw the potential for a lucrative fundraiser. iew what the figures were.”

Following more discussion about the spring Pow-Wow, the largest part of A1O’s budget, the motion for funding clearly passed and was followed by a round of applause.

Earlier in the evening the Senate gave $1,061 to the Rugby Team so they could attend and participate in the Easter Seals Tournament in Fort Lauderdale, Florida. The Senate also gave $500 to the Student Nuclear Information Forum and held a resolution opposing a nuclear waste disposal site in Wisconsin.

Pai Chi, a psychology club, was recognized also on Thursday night.
Saddened by authoritarian views

To the Editor:

As a student I was greatly saddened to read the letters of Mark Shepherd and Robin Engel. I was amazed that such dominant and influential voices could be had, not only in the 1980s, but to follow gay students who have at their disposal much information about the actual facts about gay people fighting for. Instead of present- in, please, as a complex, po- litical, and above all, humani- tan issue, they argue with Christians.

This type of argument can go on until the day of Revelation without being re- solved. The two men take a fun- damentalist interpretation of the Bible. But, whatever the ethical approach, the Bible is a historical narrative. As such, many points of view are in- cluded and therein lies the problem. They have no right to make their point as well as Tra- ditional Christians.

The issue as I see it, is not one of gay rights, but of censorship in the name of religion. Our country was founded on the basis of religious belief and of state. Indeed, many of our immigrant ancestors came here to get away from religious discrimination. Our country has also dealt with issues of religious freedom. To grant- ed: women’s rights and the right to vote were also opposed by "NOR- MAL PEOPLE," namely actual and from a Christi- an standpoint.

Glory Porter

Represent yourself

To the Editor:

I hope Robin Engel gets the chance to read today’s letter to the editor written by Ann Lein- inger and Suzanne Quijano. Robin doesn’t want homosex- uals to represent this campus — I hope Robin knows I don’t want him to represent my be- ter-interests on campus. I could easily think of better ex- amples.

And Savagian

Worry yourself first

To the Editor:

In response to “heterosexual- ly-dominated — why not?” (March 6 issue) we would like to say the following:及 topics should be more concerned with your attitude and narrow-mindedness seem to be more important than your father and future employer than any sign on a wall. We give you the right to ask for censorship of any topic you feel just isn’t what you agree with their ideas? Do you think that a fellow community member should be asked to agree on your line of thinking? Please don’t try to quell qualifications to revolve the first thing you read a speech? Would a computer science major have the right to ask for the “elimination” of a whole subject simply because he felt the study of animals was gross? Should a high-paying job as your goal at the end of college career, try to take the time to make yourself aware of other thoughts of the world. How can you possibly hope to succeed, much less be successful, with such a shallow view of other people?

Ami Leininger (Biology)
Suzanne Quijano
(Economics and Spanish)

Reputation

Editor’s Preface: The deadline for letters to the editor was waived for this letter as it was received past our deadline. THE POINTER feels that you, the reader, might want to read one SGA representative to had to say.

To the Editor:

When thieves and thugs can’t have living in our com- munities, by us, we punish them by locking them up and keeping them out of our society. When fagboys and dykes cannot handle living in our society, we give them special consideration and hu- manize them.

What are the norms of our so- ciety? Is the idea we need to deviate before action is taken? Is there no biological excuse for these sexual freaks? They don’t know how to handle our society, they should not be allowed to be part of it. My desire to have two wives would not be treated as usual.

In regard to THE POINTER staff and its job of reporting the annual budget hearing and deliberations, you people should face at one single meeting throughout the entire university except for the last day, I call that reporting error and is only an addition to your existing repu- tation.

Matthew Scott Szacka
SGA Senator

Editor’s Note: Speaking of reputation, need we say more?

Steed’s reputation

To the Editor:

In response to R. Lionel Krupnow’s interview (March 6 issue) I would like to share with you a letter from Senator Steed: I, as a follower of Steed, wish to respond, first to clarify the errors in Krupnow’s report and second to answer a flurry of charges made against Steed in the past.

Krupnow’s interview is a sham. He complains that he was compelled by his editor to interview Steed, but really Krupnow had a vicious, perhaps communist, goal in mind, name- ly, to portray Steed as a fellow who is opposed to this queer backlash. Krupnow has not hesi- tantly presents Steed as an anti-gay, paranoid, prudish, but because of my intimate contacts with Bunny Cake (as I, of course, would know), I can verify that Steed is a gentle, loving individual and would treat no one with arrogance, unless he or she got Bunny Cake mad.

For as the other charges raised during the week, please let me handle them suitably:

1. Senator Steed is not gay.
2. Senator Steed was not in the habit of trying to hide his homosexuality with a tough ex- terior. He is rugged and fun-loving.
3. Senator Steed and Senator Christian never masturbated each other in a car parked across the street from the UC.

We don’t have to accept this misattribution from Krupnow. The Pointers, you see, have Buck Droppings (Name Withheld)

Theft ring

This letter is about a serious problem. The theft is in question is by far a larger crime.

I am having a good year. In the fall, my husband and I had this bicycle stolen right off our front porch, which is in front of a huge picture window. I went out to the bike and boy, the bikes weren’t much, but they would do. The bike, and it could afford. The simple pleasurable of riding is truly missed.

Well, I got hit again, Sunday, March 16, 1980. Around 3 1/2 p.m., Room A100 of the Fine Arts Building, someone stole a ring. My husband and I were doing metallurgy demonstrations in the arts pro- grams, which is very important in our lives. We want to eventu- ally make our art livelihood. I can’t be sensitive enough to appreciate the arts, and were at the open house Sunday, try to appreciate the arts. I did a casting demonstration in the fine arts and went to a wedding I was making for my mother. I had her try it on and she was happy. I was going to take my parents upstairs to find out. I told my husband we would be back in about a half- hour. I went into my room for the room about two minutes while we were gone.

When my parents and I re- turned, the closet, was gone. It was worth approximately $100, which doesn’t seem much to some, but it is for us. We are both students and live on a student income, which isn’t much. Now we have to cover this loss, in fact, to maintain the sentimental value it had to my mother.

If you took this ring, all I ask is that you return it to us. If you do, no questions will be asked. Just leave it in the office. If not, It isn’t a very nice thing to happen. I will personally rip off your knuckless. I will not tolerate being rip off, nor will it be the only one being investigated, and we are determined.

Parents, please take notice of any, new jewelry your children may have made which was made of silver. My husband and I were at the open house, and they asked me if I had any jewelry. It would be $1 or $2 per night. That would be $45 per night. We would be charged the $42 by the 17 nights for reservations. the total comes up to $74.

The $74 that we charge to cover the movies covers part of the 1980s’ production, which we run to run the projector, the electricity for the projector and the annual maintenance of the projector. The technician gets slightly less than $3 an hour, ranging from $3.50 to $3.75.

To show movies in the Pro- gram Banquet Room, we use a Film Kit Professional pro- gram that costs about $10,000. To keep it in the best operating order, we perform routine mainte- u. If we assume 8 for the technican’s rate goes to ward maintenance, based on six hours each night, we accrue $40 for 17 nights, which can be a rich consideration for clipping film or costs which might occur due to emergency breakdown or red placement parts of the projec- tor.

Technical Services is a ser- vice, that operates out of the Conference and Reserva- tion Office of the University of Illinois. Our policy is to design and provide to audio-visual, sound and lighting support to various organizations on campus, in the community, and the Department of Technical Services is run by a student.

If you have any questions, please feel free to call or stop by our office.

Sincerely,

Greg Damrow
Student Manager
Technical Services

Input for repository

To the Editor:

The April 15 deadline for public in- put regarding the siting of a high-level nuclear waste facility in Southern Illinois was de- postion in Wisconsin draws to a close. As a resident of Texas, I have asked the DOE for a briefing on the preliminary design of this project. Such an extension is unofficially admission that they will consider input made only up to 45 days after the April 15 deadline.

Let’s not take a chance that our thoughts on this issue reach the DOE too late. And let’s not take a chance that our thoughts reach the DOE ineffectively.

Portage County Extension Director Miller has told this project will "listen to a grass-roots movement that says "uh, uh, here!" Grass-roots movements have won bottle walls, saved swimming pools, changed drinking laws. Grass-roots movements have even won in our most recent, most recently in the Philippines. Grass-roots movements can work. If we band together on the issues we care about as common public, we can write a hefty document for the DOE to answer to. With the support of our government, with the support of our citizens, with the support of our𝑛𝑡𝑖𝑛𝑑𝑒𝑛𝑡𝑖𝑎𝑙 representatives, will be a

Spring Break
Bake, brao, and block traffic—but stay alive

by Edei Daley
DAYTONA BEACH, Fla.—Spring Break was the week they’d all been waiting for. Planning for, living for: Sean, April and Jeff.

Sean, the 21-year-old Canadian college student, may have planned his trip for months, or perhaps it was a last-minute decision, a “road trip” he had talked him into.

April may have dictated into a whole new wardrobe and spent two weeks going to a tanning salon so she’d be the “babe” maybe this pretty 20-year-old� could get her friend to use her tax return money to even finance her Spring Break trip.

And then there was Jeff. He may have sat in his class at the University of Central Florida dreaming of the place he would meet. Perhaps this 21-year-old accountant found it impossible to study the week before he left. On the other hand, maybe he didn’t have to that his Spring Break trip was all he needed to hit the fast side he white sand and the ocean waves.

Sean, April and Jeff, like thousands of college students in 1986, traveled to a Spring Break location to spend a week of their lives having fun. The only difference between these three Daytona Beach Spring Breakers and the others who never returned to their classes.

Autopsy reports showed a blood alcohol content of 3 percent.

Death accounts were similar that the four candidates could’ve only taken up half of the space by affixing their names to either piece. And it wouldn’t have made any difference.

Both “positions” were concerned with tuition increases, student participation in decision-making, student organization, and allocation of budget. This, that, and every other well-out phrase you could think of, culminating in, “We want to serve you.” Uh-huh.

Twenty years from now, these people’s day-to- day political careers will reach their zenith with four elections in the next 14 years of administration in Backward, USA. They all will have run on the milk and toast platform.

And students on this campus are apathetic! Well, four students for sure.

So what’s going on in student politics? Is this the backlash of dastardly conservatism? Sorry, right-wingers, but it looks like it.

What happened to name-calling and mudslinging? That’s the stuff that gets people’s attention. I would’ve voted for that.

And what happened to the split between students and alumni? Between students and alumni? How about the split that was expected when the university made the decision to cut back on the number of students who could enroll?” We want to serve you.”

How do you guys miss your chance? Why didn’t you run a couple of candid- nate? You’ve run on a “Gay Awareness” plat- form.

And whatever happened to controversy? How? You guys missed your chance. Why didn’t you run a couple of candidates? You could’ve run them on a “Gay Awareness” platform.

The average fall is four stories, the average winter is zero stories. April 7, 1986. There were six students survived an eight-story plunge. In 1985, four students fell in a three-week period. Two of those students fell in one day. In 1984, two students fell in one day. Daytona Beach, with the geographically placed high-rise hotels that line the beach, has been marred with these tragedies. Because it’s home for me, it’s in my forefront. These accidents are not something that Daytona Beach holds alone. Other Spring Break cap­i­tals from Myrtle Beach, S.C., to Palm Springs, Calif., to Panama Island, Tx., all have had stu­dent accidents, some with he­culty falls, others with car accidents. Most always involving alcohol. All cities share in the concern.

What’s a city to do?

One of Daytona’s leading Spring Break hotels, The Plaza Hotel, is activating a balcony-safety plan this year. All balconies and windows are now bolted and sealed shut until midnight.

For a small fee, the hotel provides two two- way service to the intoxicated. Our Motel Hall Association voted in a Spring Break Code of Ethical Conduct which includes 13 regulations that the hotel will enforce.

Students’ response so far? They hate it.

The safety measures that the hotels and police endorse in our city are NOT with the intentions of damping anyone’s fun. If, for one, am sick of the news that another student was splat­ tered over the pool deck.

Students’ response to the death? Sadly enough, the party continues. As one reporter wrote last year … the very next night, “loud music came from room 23A, from which April had fallen.”

Of course, you must take into account the entire context of the accident. The hotel owner was not aware of the accident before it happened and therefore could not have acted to prevent it. In addition, the hotel owner had repeatedly warned the guests about the dangers of the balcony. Finally, the hotel owner had installed safety measures to prevent such accidents in the past.

If you want danger, thrill and adventure by way of danger from high places, join the circus. If you want to have a blast, come to Daytona.

Now, if you sleep through physics like I did, or failed to learn a few facts in college so far, I’ll put them together for you:

1. When you drink a lot, a little bit, you do crazy things.
2. If you are standing on the 14th floor of a high-rise and fall off, chances are you will not grad­uate.
3. Dead. Gone. Get it? Responsiblility. April was loved, but her friends didn’t even know she was missing until the clock on the door—for someone to identify the body.

And Sean’s friends traveled home alone. And Jeff’s seat in accounting was empty. And parents are missing their children.

It’s not just your duty to take care of yourself. It’s your duty to make sure your friends are safe when you travel for miles with to reach your Spring Break desti­nation are back at school showing off that T-shirt and that sun­tan. Reporting stories. Brag­ging.

I don’t care if you make me wait in Daytona traffic as A is blocked, kids screaming and yelling from their cars. I don’t care if the clubs and beaches are overcrowded and the lines are long. Go to a Spring Break capital. Come to Daytona. Re­lax. Whatever you say, you have to get out of your system, do it. Get a tan, drink, get laid, just don’t get caught red-handed.

Remember, you’re responsible for the person next to you.
I run out of photo ideas a month ago. It's hard coming up with ideas for Feature articles. "Photographs are essential to a newspaper. They get the readers' attention." That's what the boss kept telling me.

I don't think he understands the problem. It's a simple matter of probability. Consider for a moment an article written about the theological beginnings of the universe.

"Peter (our photo editor), needs a picture of God." 

"You know how much I hate having my picture taken." He leans back in his chair. "But I might be able to arrange a self-portrait." 

"What does that picture have to do with higher learning?"

"No, I have to keep it simple. Something that everyone can grasp at a glance. Something that won't leave the reader wondering once they have finished reading the article.

With news it's easy. If you're writing about an article the chancellor, you get a picture of the chancellor. If you're writing about a visiting speaker, you get a photo of that speaker. If you're covering a fire, you get pictures of the burned building. See, nothing complex in that.

Sports are the same way. If the Panthers are playing East Claire, you get a picture of the game. How difficult can it be to decide what photo to run with your article when you have six to choose from? Try having to think of what to photograph in the first place.

Take as an example the article I wrote about Saint Patrick's Day. "Peter, I need a photo of Saint Patrick."

"He's dead."

"I don't want excuses. I want photos." I pondered for a moment. "What about a four-leaf clover?"

"There's snow on the ground."

"You own a shovel don't you?"

"He's dead."

"Okay, a picture of someone wearing green."

"We don't have enough advertisements to run a color photo this week."

"You're not helping."

"Sure I am. I'm narrowing your options."

"I've got it. We can get a picture of someone with a leprechaun hat."

"I was thrown out of the last AA meeting that I took a camera to. Why don't you just have Tyndr run a graphic for you?"

"And so it goes. The plight of a Features Editor trying to develop ideas for another photo. I wonder if I'll be able to come up with an idea for this story."

"I know, a picture of some student taking a picture. It's a cliché. If I can catch Pete not looking..."
Great exhibits, weather top CNR open house

by Jim Burns
Staff Reporter

This past Sunday marked the third consecutive year that the College of Natural Resources held open house, presenting yet another dynamic environmental display. Warm, spring-like weather, coupled with an interesting schedule of events and services, enticed hundreds from their homes to experience the "great outdoors."

The main theme of the CNR Open House was centered around current issues in the four major environmental disciplines—forestry, wildlife, water and soils. However, this didn't leave out other major CNR organizations, which were involved in the more than 27 different displays and programs.

The highlight of this year's open house, according to CNR Dean Dr. Trainer, was the inclusion of the hot groundwater contamination issue. New additions to the scene included a groundwater center display and a program on pollutant movement in groundwater—both of which were sponsored by the American Water Resources Association. In addition, free well-water testing was conducted by the Environmental Task Force.

Returning for his fifth consecutive appearance, herpetology authority Dan Nedrelo provided to live up the day with still another slithering display for those bold enough to enter the confines of the LRC's Reading Room.

"Contrary to popular belief, the Wildlife Society and I are not here to promote pet ownership, but to educate the public about a very misunderstood section of the animal kingdom," said Nedrelo. "By desensitizing youngers to the presence of snakes, etc., we can make headway in destroying the myths surrounding these creatures."

Environmental Educators and Naturalists Association (EEAM) also collected favorable responses on painting their third annual "Wisconsin Birds of Prey" exhibit. Project leader Al Grossman mentioned that a record turnout accompanied this year's display, facilitating a possible future exhibit.

Dr. Trainer, in commenting about this year's program, stressed the point that the students, through involvement in their organizations, are the key to the success of the open house.

"An educational display allows the public to see what the students are doing at this university," said Trainer. "In accordance with the fine presentations, the public has responded positively, making the future for the CNR Open House a bright one."

Feverishly springing into April

by Tony Devistal
Staff Reporter

February and March bring two things to outdoorsmen—attending UWSP—midterms and spring fever. Neither one is accepted or considered pleasant, but they still coincide every year.

During this period, the typical student outdoorsman must face many strenuous dilemmas that would even put Hercules to shame. These finals of mental strength include the end of ice fishing, the wait for the start of the spring walleye run, and the most dreaded one of all, studying.

When you add these three factors together, plus the dismal elements of the months February and March, wild things are bound to happen. This is the psychological breaking point of a student's sanity, or what we call spring fever.

Here is an outdoorsman's partial list of spring fever maladies:

- Deer Burnout—suffered not just by outdoorsmen, but by the majority of students on campus. Its symptoms include a growing dislike for one's room, roommates, fellow hallmates, and practically anything associated with one's hall. Early signs include an expanded vocabulary, violence to articles within one's room or hall, and great desire to be somewhere else. Example: Florida.

- Conch Potatobad—this is another popular form of spring fever. The conch potatobad is a person who falls under the spell of the TV. Symptoms include loss of touch with reality and a renewed love for soap operas.

Beer Drinker (a.k.a. Story teller)—now it's no one's surprise that many of the students on campus fall into this category. However, if you're an outdoorsman it can be your worst nightmare. For example, how many times have you been out at your favorite bar with your fishing poles and you didn't talk about fishing or hunting?

- No one's right, and when it comes around February and March, and you've heard the same hunting, or fishing story, or joke for the hundreds of times, you get a little sick of it.

Precaution—this is probably the most severe of all cases of spring fever. The main symptom of this form of spring fever is boredom. No matter what one tries to do (staying, for example) the person usually finds no excitement in it. Be careful— this form of spring fever is lethal.

So fellow feverish outdoorsmen and classmates, if these symptoms start showing up around your neck of the woods, just remember—we're lucky that February and March only come once a year.

Beer Drinker (a.k.a. Story teller)—now it's no one's surprise that many of the students on campus fall into this category. However, if you're an outdoorsman it can be your worst nightmare. For example, how many times have you been out at your favorite bar with your fishing poles and you didn't talk about fishing or hunting?

Acid rain project in full swing

by Frank Savage
Outdoor Reporter

A cloudy night sky foretold nasty weather last Monday, a unique evening to be talking about acid rain at the College of Natural Resources.

The American Waters Resource Association and Soil Conservation Society of America sponsored a talk last Monday on the Little Rock Acid Rain Project, featuring Carl Watras, the project's coordinator.

By the US EPA, the project was sponsored and was patterned after the American Waters Association Project, the first project run by the US EPA, the Natural Resources Defense Council, and the US Geological Society. Over the past five years, the acid rain issue has been in need of hard, factual evidence on which to base legislative decis-

A cloudy night sky foretold nasty weather last Monday, a unique evening to be talking about acid rain at the College of Natural Resources. The American Waters Resource Association and Soil Conservation Society of America sponsored a talk last Monday on the Little Rock Acid Rain Project, featuring Carl Watras, the project's coordinator.

The program began in 1983 and was patterned after a similar project run in Canada in 1976. The research team was funded $1.3 million and was sponsored by the US EPA, the DNRE, UW-Madison and Superior, University of Minnesota and the US Geological Society.

The project contains three phases. The first phase involves a site characteristics study; the second phase was completed in August of 1984. The lake was divided into two parts, one side was "acidified," while the other half was kept "natural" for a control factor in the experiment. Phase three consisted of the actual acidification to half the lake. The target pH's were set: April '86-87 recorded a pH of 5.5, '87-'88 pH's of 3.0 are expected, and a pH of 4.5 is the goal for 1989-90.

CARL WATRAS

The program began in 1983 and was patterned after a similar project run in Canada in 1976. The research team was funded $1.3 million and was sponsored by the US EPA, the DNRE, UW-Madison and Superior, University of Minnesota and the US Geological Society. Over the past five years, the acid rain issue has been in need of hard, factual evidence on which to base legislative decisions. The project objectives should bring this evidence to light. These goals are: document biological effects of acid rain, determine local and non-local causes, and the formulation of a predictive model for future use.

Little Rock Lake, located in Vilas County in northern Wisconsin, was chosen because of its natural structure and acid sensitivity. The lake is shallow (about 30 feet deep), has an initial pH of 5.9 and is classed "very sensitive" to acid deposition.

The project contains three phases. The first phase involves a site characteristics study; the second phase was completed in August of 1984. The lake was divided into two parts, one side was "acidified," while the other half was kept "natural" for a control factor in the experiment. Phase three consisted of the actual acidification to half the lake. The target pH's were set: April '86-87 recorded a pH of 5.5, '87-'88 pH's of 3.0 are expected, and a pH of 4.5 is the goal for 1989-90.

Opinion
Pulling the wool over wilderness

by Larrelle Knuth
Outdoor Writer

Under a plan proposed by Montana economist John Ba- den, executive director of the Bozeman-based Political Econo- my Research Center, environmentalists would be given con- trol over wilderness areas.

Baden views his plan as an alternative to government wil- derness management policies. He claims that allowing envi- ronmentalists to oversee both the expansion of wilderness areas and the development of areas with high mineral poten- tial would "resolve the endless dispute between environmentalists and commercial concerns."

Under the plan, Congress would create a Wilderness Endowment Board comprised entirely of environmentalists se- lected by Congress for their dedication to wilderness values. The Board would have control over wilderness areas, "but as managers, they would be forced to make rational economic choices, instead of pressuring for pro-environmental political action without concern for opportunity cost," says Baden.

Board members would have incentives to compare wilder- ness value and potential com- mercial value of lands. In such a scenario, for example, the Board might decide to sell or lease lands with little wilder- ness significance and use the revenue in finance purchases of other, more sensitive, lands.

Thus, what at first glance appeared to be a plausible idea is really just another attempt to subject intra-economic values to the calculus of economics. R.P. Schumacher, in his book Small is Beautiful: Economics as If People Mattered, states that "...the proper use of land poses not a technical nor an economic, but primarily a met- aphysical problem..." (which) "...belongs to a higher level of ra- tional thinking."

Of course, Schumacher, and I, are in the minority opinion. Some things in this life we do for their own sakes: ends in themselves. Many other things we do for some other purpose: means to ends.

"One of the most important tasks for any society," says Schumacher, "is to distinguish between ends and means to ends, and to have some sort of cohesive view and agreement about this. Is the land (and the creatures upon it) merely a means of production or is it something more, something that is an end in itself?"

by Linda Keener

By stating that the proper use of land is a metaphysical prob- lem, or meta-economic, Schu- macher believes, as do I, that the proper use of the land is an end in itself. There is no doubt where Baden stands on this issue. And I offer the proposal... whereby a highly popular proposal...that society has taken its stand with the Badens, and it is precisely this stand which will be the ruin of our civilization. When people think that we cannot "afford" to care for the land and the wilderness upon it, to work with nature in- stead of against it, the resultant sickness of the land will invari- ably impair sickness to all other facets of civilization.

Science and technology have brought us great improvements in our standard of living since the Industrial Revolution. But misapplication of that technolo- gy in the last 30 or 40 years is fin- ally catching up with us, and our standard of living by many reports is actually declining.

Technology is not a self-bal- ancing system: it does not self- adjust, self-limit, or self- cleanse. We, the inventors of technology, must curb the con- cerned growth of technology for the sake of growth alone. We need technology with a human face, and we can achieve that only by rehumanizing economic val- ues away from bottom line eco- nomics.

We must begin again to be- lieve that there is more to life than economic profit.

April 8 (3:30 p.m.) — Wusapa High School
April 9 (3:30 p.m.) — Ashland High School

This past weekend 35 members from UWSP’s Student Chapter of the Wildlife Society attended the 49th Annual Midwest Student Wildlife Conclave held at the W.K. Kellogg Biological Station in Hickory Corners, Michigan. The conclave was co-hosted by Michigan State University and Michigan Technological University.

The Wildlife Society returned with the title of “Quiz Bowl Champions.” In the first round, Point beat Purdue University 60-31; second round, Point beat University of Minnesota 90-35; and in the final round, Point had a tough battle against Iowa State but managed to win by the last two minutes to win 61-59.

Team members were Jim Hoffmiller, Dan Ekland, Jerry King and Rick Breunewitz (Fisheries Society member).

Other universities participating in the conclave were: Kansas State, Michigan, North Dakota State, Nebraska, Missouri and Wayne State, NE.

NOTES, cont.

approved by both the US Congress and the State Department, would encourage the showing of ideas, fire equipment test results and forest firefighting experience. In addition, the pact would readily permit those states involved to come on the same basis mutual aid in the event of a catastrophic fire.

Commission Makes Plans

The Penokee County Parks Commission endorsed a resolution Thursday, March 6, to use county fish and game funds for development of a new boat launching area at Wolf Lake in the town of Almond.

The project would eliminate a road along the south shore of the lake, helping to control erosion, and develop a day-use area on the eastern shore between the lake and a new parking area.

Lunar Birth

Astronomer Richard Durieux’s new theory presupposes that the moon didn’t form as a solid body, but rather as a molten mass, as a molten earth evolved, a thick ring of material developed around it and was flung off to form the moon. Though much of it was lost, enough remained to form the moon.

Lead Shot in Its Way Out

Lead shot would be banned in Wisconsin starting next year under a bill given preliminary approval by the Madison Assembly. The Assembly rejected 64-33 an amendment that would have delayed the ban until after 18 other states in Minnesota, New York, Pennsylvania and New Jersey outlawed lead shot. The high-penetrating use of lead shot statewide for duck, goose andcoon hunting. It would take effect September 1, 1987, so manufacturers will have time to make sure they have adequate supplies of steel shot for the 1986 season.

RainForest Receive Aid

Congress has begun action to protect tropical rainforests by introducing two new bills. The bills would require the Agency for International Development (AID) to stop supporting such harmful large-scale development activities as slash and burn and would direct AID to provide not less than $15 million to assist developing countries in conserving biological diversity.

COASTAL PELICANS

Return a gift to Wildlife

Ever wish you could do something for Wisconsin’s wildlife? Now you can. By donating to the new “Endangered Resources Fund” or your state income tax form you can help manage and protect wildlife like bald eagles, gray wolves and bluebirds.

Over a hundred of Wisconsin’s wild plants and animals are threatened by changing land use, pollution and illegal killing. Your donation will be used to give these wildlife a second chance and to prevent other Wisconsin wildlife from becoming endangered. The Endangered Resources Fund on your Wisconsin income tax form is your opportunity to invest in a wild Wisconsin.

For more information about endangered and nongame wildlife write:
Bureau of Endangered Resources, Dept. of Natural Resources, P.O. Box 7823, Madison, Wis. 53707.
Travel to Venezuela for spring break

Pointers hungry for start of baseball season

by Kent Walstrom
Sports Editor

There is resounding optimism in camp as the 1966 Pointer baseball team winds up spring training.

"Yes, we have the potential to be a real fine team," agreed fourth coach Ron Steiner. "Our positions are pretty well covered."

Although the Pointers are coming off a sub-par season in which they finished third in the Southern Conference of the WSUC while posting a 10-18 overall record, there is talent abound as the club heads to Caracas, Venezuela, for a series of games over spring break. UWSP will open the regular season at home April 15 against Concordia.

Along with the arrival of several gifted newcomers, Steiner returns a multi-talented cast of veterans to the infield.

Kevin Nehring hit .302 with 21 RBIs in 38 games last season and also finished with a .372 fielding percentage at first base.

Dan Thies, a former all-conference selection, drew 23 walks as the leadoff man last year while playing solid defense at second base.

Third baseman Kevin Lyons, also a former all-conference pick and an honorable mention a year ago, hit .360 and performed well in the field.

Two-time all-conference shortstop Phil Haashe also returns, carrying a consistent glove and a season-ending .350 BA to his credit.

Jim Tomczyk and Paul Speth will battle for the starting catching position. Tomczyk caught the majority of games last season and has the edge in experience. Speth, a sophomore, saw action in only four games last year but did a credible job behind the plate and adds power to the lineup. Both are capable starters.

While the Pointers have a number of question marks, they may have the personnel to erase them, including transfers Mike Rausch from Cleveland State, John Lindauer from Northwest Louisiana and Greg Daniels.

Rausch brings power and speed to the lineup and should challenge for a starting job in the outfield. The talented freshman will also see action in a designated hitter role.

Lindauer will serve as a utility player as well. The senior offers adequate backup as an infielder and will also add depth to the pitching corps as a short relief man.

Daniels is a capable reserve at first base.

The outfield, directed by two-time all-conference pick and reserve Dan Nokwatk, is also last year's team MVP, appears stellar.

n games and takes a .507 fielding percentage into left field, while sophomores Dan Dan Dantoin and D. J. Borchardt return to right field.

The Pointers catcher is the status of his pitching rotation, which remains suspect. The Pointers, who hit .236 as a team in '65, will again need hot bats to offset a pitching staff that has performed only adequately in the past.

Fourth-batter Brad Baldeshef heads the list of probable starters.

The junior hopes to return to the all-conference form of his freshman year and has shown good control so far this season.

Steve Natvicich pitched some respectable games last year but overall was inconsistent. The rangy senior looks to fill the number two spot in the rotation.

Sophomore Darin Leverus has potential after developing an effective slider, but his control remains questionable.

Steve Pompe appeared in eight games last season and should find a spot in the starting rotation.

Jeff Spiller will be used primarily as a short relief man. The left-bander was 1-2 in five games last season and has good control of his pitches.

Jay Christenson will come in for long relief and could work into the starting rotation if his control improves.

Randy Janikowski could also see some action, but has been hampered by arm problems.

The Pointers have lost the services of pitchers John Shane, Randy Janikowski and Dave Vreeland.

Women's athletics: a startling progression

by Julie Thayer
Staff Reporter

The WWIAC may only be in its 14th year but women have been competing in athletics at Stevens Point since the 1900s.

The first athletic event in the school's history was a women's basketball game which resulted in a 4-4 tie. Basketball was the primary sport for women at that time and it was not unusual to have over 100 women play on teams each season. Teams were formed on the basis of academic departments or the player's year in school.

Women's athletics have undergone numerous changes since then, including the caliber of play and the level of competition, as well as the attitudes of spectators and athletes alike.

It is known that women were involved in various activities through documentation found in both the school newspaper and yearbook. Events such as track meets, basketball tournaments, and hikes sponsored by the Hiking Club were evident, but did not appear to be formalized or organized from year to year.

Field Hockey was added to the program in 1917 and in the following year, the Girls Athletic Association (G.A.A.) was recognized as a school organization. This brought an opportunity for women to become involved in a sport each season with field hockey, volleyball, basketball and softball being offered.

As the years progressed, so did the minds and attitudes of females actively involved in women's athletics. In 1923, the school yearbook examined the function G.A.A. served to women: "The development of character, that quality without which a girl is unable to do justice to herself and others, is the chief aim of girls athletics. The physical training and contests develop the fundamental qualities of courage, self-control, determination, cooperation, enthusiasm, cleanliness and that intangible something which we call sportsmanship, all of which play an important role in a girl's life."

G.A.A. changed its name to the Women's Athletic Association (W.W.A.) in 1929 and was considered one of the more active organizations on campus. Recognizing the need for involvement, the W.W.A. adopted the slogan, "Sports for all and all for sports." By 1932, the number of activities increased with the addition of track and field, hiking, archery, tennis, trap shooting and horseback riding.

The opportunities continued to grow for women as it was apparent they had a goal in mind. The caption found under the W.W.A. section of the 1940 yearbook reads, "The W.W.A. was organized mainly to give the women of the college an outlet for their athletic abilities. The W.W.A. has fulfilled its duty to the women of the college. As each year goes on, we are sure to find this organization growing until it may someday vie with the athletic department of the men."

Cont. p. 12
unlearned, inborn behavior. De- ciding what is good and what is learned, for any species, has been a topic of continuous re- search and debate. For exam- ple, recent research suggests that the migratory habits of birds may not be instinct. A group of geese were raised by researchers and exposed to a different night sky than they would experience in their natu- ral environment. When returned to their natural habitat, these geese were unable to migrate.

Not all athletes must risk danger to themselves, but they are driven by the desire to compete. How much of this drive is learned and how much is genetic will continue to be argued. But if all motives were learned, logic suggests that some sports would soon become obsolete because the great amount of abuse they receive.

Consider the boxer. Each time he fights, he risks great harm, even death. Quipping "for that money I would, too," some boxers may have p artici­ nated in boxing. But archaeologists might have thought that the warriors' members may have p artici­ nated while the first half was scored, leaving the game with the point margin. Those with the greatest ac­ curacy might have been selected as the tribe hunters. The swift­est runners might have served as messengers, while the best wrestlers and bowmen may have served the king or served as warriors.

The origin of sports is obs­ cure. But archaeologists be­ lieve that they originally served as survival training. Tribe members may have partici- pated in races, wrestling, box- ing or javelin throwing as prepara­ tion for hunting and war­ fare. Those who could throw a javelin with the greatest accur­ acy might have been selected as the tribe hunters. The swift­est runners might have served as messengers, while the best wrestlers and bowmen may have served the king or served as warriors.

Nutrition: a key to potential

The Nutrition program at R. Lyle Knaprow, Features Editor

Research offers a variety of hypotheses as to why sports continue to thrive. A few theo­ ries include the role of physical fitness still plays in survival, the drive to compete which is only satisfied through physical competition, and the role of sports as a means of social gathering.

The presence of being phy­ sically fit is a theme echoed in the news, on television and radio. Hearing about the ben­ efits of aerobic exercise has be­ come commonplace. Explaining the presence of sports in human culture by not­ ing its health benefits does not account for competitive sports. Many people exercise without ever feeling a desire to com­ pete, and other people may rely on large to compete in sports. Even busi­ nessmen or students who compete and succeed on a physical leve­ l would experience in their sport.

It seems that sports have changed a great deal, but many athletes still com­ pete and people still flock to them. The sporting event exist­ ed even before 776 B.C. when the Olympic games were first recorded. Cities have become more populous, man has evolved further away from tribal needs of hunt­ ing and fighting, but the sport­ ing eventingers.

Entries for softball and inner­ tube waterpolo for both men and women, and indoor soccer and tennis for women only will be due Thursday, March 18. The Intramural Desk and Physical Education Building will close for Spring Break on Friday at 3 p.m. and reopen Monday, March 31 at 9 a.m.

BREAK HARVEY FOR THE WEIGHT ROOM AND BUILDING (the desk will be closed), ONLY! WILL BE MONDAY-FRIDAY FROM 10 A.M. TO 9 P.M. HAVE A GREAT BREAK!

Blugolds nipped in NAIA tourney

KANSAS CITY, Mo. — The Eau Claire Blugolds were defeated in the second round of the NAIA men's basketball tournament by the Southwestern Texas Pirates, 84-80.

Southwestern dominated the first half of the game leaving a half­time score of 38-18. Bobby Denston of the Pirates scored 13 of his 15 points in the first half, while the Blugolds made only nine of 33 field goal attempts.

Eau Claire sparked up a pres­ sure defense in the second half, narrowing the point gap to 44-42 with 1: 42 left to play. With 28 seconds to go, Chuckie Graves kept the Blugolds close with a three point shot resulting in a 47-46 score. The final point was scored from free throws by Jim Rathbun and Richie Doutler of the Pirates.

High scores for the Blugolds were Graves with 17 and Brian Krueger with 10.

Coach Ken Anderson of the Blugolds said, "We probably played the longest feel of the pressure defense, but I'm real pleased with the way we came back in the second half, we had a chance to win."
and composition with Roger Sessions. After World War II, he worked in France with Nadia Boulanger. In 1948 he won First Prize at the International Piano Competition in Ostend, Belgium and during the following decade he became one of the Bell Telephone Hour's most frequent guests. The pianist can be heard on PANHEEN, VAX, Golden Crest and CRJ recordings.

A dedicated teacher, Johanne sen has been president of the Cleveland Institute since 1977. His appearances at Sentry and at UWSP are supported by a grant from the Wisconsin Arts Board with funds provided by the state of Wisconsin and the National Endowment for the Arts.

**SGA challenges, cont. from p. 5**

serve many people that would go unfunded due to a lack of knowledge on behalf of the students, for example, Arts and Lectures. These organizations could possibly be the recipients of funds not willed to other organizations.

A more workable idea might be for SGA to conduct surveys amongst the student body listing the top 10 organizations they would like funded. Then they could plan their budget allocations according to what the students' responses were.

Little is known about the next year. No one has all the answers or solutions to what could be done; I only hope that next year at this time, the number of negative and somewhat hostile feelings toward SGA will have diminished. As a student, I have no choice but to place my faith in Lisa and Steve. I think that they, along with many other students, now realize that elections, group competition, and formal parliamentary procedure are no guarantee of individual rights and a fair representation of the student body.

I hope the next year will be a "good" one for SGA, and if it is, it should be a good year for UWSP students.

**Probation, cont. from p. 1**

Putting the trip notices in the residence hall mailboxes was the illegal advertising referred to in chapter 17 and 18 rules before they put the notices in the boxes. Personnel from Campus Activities maintains that this was explained.

Marsha Konz, Adjudicating Officer in the hearing, sent a "Letter of Decision" to Van Hefty stating: "You did not see that there was any difference (between mailing and hand-stuffing the mailboxes) and that the university was merely attempting to thwart your attempts to sponsor a trip that was in competition with the one recognized by the university (UAB's trip)."

"Campus Marketing Inc., one of the largest companies of its nature, has 3,000+ reservations made for students in Florida and elsewhere during spring breaks this year. Through Van Hefty and Lemensky's work, CMI has booked 35 UWSP students to Daytona this spring break. Many more are repeat visitors through CMI's trip last year."

In the end statements of M. Konz's "Decision on Alleged Misconduct" letter to Van Hefty, she stated, "Advertising a trip that is not sponsored or approved by the university is all right provided that all rules have been established and adhered to. You failed to do this."

The students were told they could run the trip next year, but if they do anything against university policies, they would not be allowed to run the trip for CMI.

"I do not understand who they are to tell us we can't run a trip. I know on campus we can suspend us from school, but where is the free enterprise system? Why can there be only one university-recognized trip?" Van Hefty questioned.

The two students sought legal advice, but decided the legal hassles would take away time from organizing the trip. "I know Student Conduct could really come down on us. We just want to be left alone to run a good trip."

The universities at Whitewater, Eau Claire, Milwaukee and Madison are having no problems with running CMI trips, according to Van Hefty. "Bill Ryan, our boss, told me it's ridiculous all of the hassle we are getting here at Point. He just wants us to stop the 'over-the-counter probation,'" Van Hefty said. "If he advertised the same way the other UW schools did, it's just UAB seems to have control over all the trips here," he added.

Students interested in running similar trips are advised to become familiar with the codes previously mentioned. Contact Robert Rusch, Director, University Center, for specific information on placing or posting anything in the residence halls. The information desk or the Campus Activities Office must approve any printed materials that will be posted on university property. And, to be recognized trip by the university, bidding procedures must be adhered to.

**Mail, cont. from p. 4**

force with which the DOE must reckon.

A petition opposing the sitting of a high-level nuclear waste repository in Wisconsin will be available for signing today, Thursday, March 20, in the concourse, as well as the week of March 31 through April 4. If you don't sign it before you hit the Southern beaches, sign it when you return. Your signatures—or signatures—are the very least we can do for tomorrow's children.

Sincerely,
Lorelle Knaul

Don't Do it
Furnaces turned full blast don't heat any faster.
Some people treat their furnaces like wood stoves. They jack up the thermostat when they come in from outdoors, thinking they will “stoke up the fire.”
But unlike wood stoves, most furnaces run at only one speed, or heating rate. The thermostat tells the furnace only how long to run.
So if you come into your 55° apartment and want it to be 68°, it will take the same amount of time to reach 68° whether you set the dial to 68° or any higher temperature.
The problem is that if you set it above 68°, the furnace will stay on longer and the temperature will climb past a reasonable level.
The longer it's above this level, the more you pay in heating costs.
