10th Annual Bratfest

by Joanne Davis
News Editor

UWSP's 10th annual Bratfest, sponsored by the Sigma Tau Gamma fraternity, drew approximately 1,000 people to Bukolt Park for an afternoon of brats, beverages, and sunshine in Stevens Point.

This year's Bratfest, the first ever to be held on a weekday, had no major problems or mishaps during the 3 to 6 p.m. designated hours.

Bob Booth, President of Sigma Tau Gamma, said, 'There were a lot of people against Bratfest this year; aldermen, city councilmen, and neighboring residents were 'screaming.' The occasion was required to be held under certain criteria which met many codes and regulations.

The weekday date was imposed as a safety factor—apparently in an attempt to hamper rowdy behavior. The afternoon seemingly took place without any major problems, so the weekday may have been a factor in the relatively low number turnout. The mood was mellow and the numbers easily manageable. Many participants mentioned that they liked the fewer people as it gave them the chance to get a drink and a brat when they wished without fighting a crowd.

Six Stevens Point police officers had to be hired to patrol within the compounds during the afternoon; this was another imposed criteria of the many set down. A parking plan was also required, but really not necessary in retrospect to the number of vehicles on hand during the afternoon.

Advisor Oliver "Bud" Stainier commented on the relaxed afternoon and that "he was pleased students were having a good time—without any problems."

The fraternity used "the eyes of the university and community are upon us" as an internal slogan. The fraternity worked with Mayor Haberman, Police Chief Joe Fandre, Al Hill, Director of Parks and Recreation, and the City Clerk's office to meet all licensing and regulations imposed.

Joel Muhvic, chair of the Public Protection Committee in Stevens Point, according to Booth, "was very segment of the community."

Operation Bootstrap
Hands Across America

The "Hands Across America" effort has come to Stevens Point. In an effort to involve every segment of the community, Cap Services is sponsoring a human chain in Stevens Point, May 21. Participants are asked to contribute $1 or canned food to aid Stevens Point's local emergency food and shelter provider—Operation Bootstrap.

Ten percent of the contributions will be provided to the national "Hands Across America" effort.

The human chain, beginning at 4 p.m. from the Clark Street Bridge, will stretch to the Sunset Plaza in Park Ridge. Local church bells will ring throughout the city at 4:38 p.m., while WISN's WXIX will participate in the playing three special news items beginning at 4:30 p.m.

Stevens Point's need for funding is similar to the national needs, with funding very scarce and the need great. Students and others are encouraged to pre-register with Clancy Mertes, Cap Services at MS-330, and show their concerns by becoming involved. Groups, schools, and businesses volunteering will each be responsible for one city block of the chain. Everyone is encouraged to bring portable radios along.

The national effort, "Hands Across America," will cover 4,335 miles from the Pacific to the Atlantic Oceans on Sunday, May 23, at 3 p.m. (EDT). This chain will not enter Wisconsin, hence the local effort. The national effort is estimated to have over 11 million people involved in the name of eliminating hunger right here in the United States.

Student organizations across America are encouraged to try these activities to help make an impact: volunteer personally or as a group and hold a 10-k run, donating entrance fees to the cause; contact your campus and local radio stations for support; or pledge your organization or fraternity and challenge others to match you.

On the corporate side, local businesses are asked to contribute as well, whether it be to pay for someone joining the chain or simply making a contribution. Corporations on the national level have responded enthusiastically to the efforts.

RHA awards

by Joanne Davis
News Editor

The National Residence Hall Honorary held its annual award night May 1. President Ken Alvin summed up the feelings of all when he said, "Your (the volunteers) efforts have defined where we are going and helped us get there."

Three special awards were given: the Residence Hall Association Cornerstone Award for Organizational Excellence, Hall Council Leader of the Year, and Resident Volunteer of the Year.

The Cornerstone Awards are designed to recognize individuals and organizations which have contributed significantly to the purpose of RHA. Awards were sent to Deb Middendorf, Jim Vanderbilt, and UAB.

The Hall Council Leader of the Year Award is designed to recognize a hall council executive board member or committee chairperson who has contributed beyond what would normally be expected. Finalists were Lawrence Isg and Cindy Margulender. Sara Hiligpret was the recipient.

The Resident Volunteer of the Year Award is to recognize an individual who has donated his time, talents and efforts in some way to improve life within the residence halls. Finalists were Lori Linnmayer and Cindy Volkas. Joseph Andrews received the award.

Fifteen new members were inducted into the National Residence Hall Honorary. The criteria for this is 3.5 cumulative GPA after at least two semesters and involvement in other organizations. Recipients were: Joseph Andrews, Patricia Baier, Margaret Berlick, Bill Cass, Sara Hilgret, Brian Hoare, Lauren Isg, Linda Jahnke, Lori Linnmayer, Cindy Margulender, Stephanie Muska, Jessica O'Keefe, Matt Strombeck, Chad Volka and Jennifer Warmbold.

Defining the role of a college newspaper

I received a call, just last week, from Liz Minden, a South Dakota State graduate student who is working on a journalism thesis aimed at targeting the greatest problems faced by college newspapers in America. Gannett Newspapers, publishers of USA Today and others, saw merit in the project and decided to fund it.

Minden has sent surveys to over 300 university newspaper editors and advisors. Questions in the survey range from, "Has your university's administration ever tried to stop you from printing certain material?" to "What is your view of a free press and the role of the college newspaper?"

The second question, however, has been the most intriguing to me and warrants an answer. According to Minden, many people don't understand the role of the press.

I doubt there's any phrase which makes an editor love it. "This is going to be a really big event. Your readers will love it." This is especially exciting when this free advice comes from an important organization like the Goldfish Club or Hacki Sack International. No doubt front page material.

I think Hemingway best understood the role of an editor when he said, "The most essential gift for a good editor is a built-in shock-proof stilt-detector."

I've seen a number of newspapers, not simply college newspapers, reduced to little more than what is referred to in the industry as "dog dish liners." For many people, a good college newspaper is one that devotes its pages to public relations and hype. You know, name of event, date, time and "we hope you can make it."

Obviously, some events are newsworthy and will be of interest to some in the UWSP community of 10,000 individuals. The trick, then, is to weigh which event or activity will be most likely read by our community. Sorry Goldfish.

According to Minden, many college newspapers struggle to maintain their identity as newspapers—not newsletters. One way to do this, of course, is to let readers know when groups or individuals are messing up and report the facts. It is always interesting, however, to see that people like to know when someone else is messing up, but when their faults are reported, cries of "yellow journalism" are soon heard. I guess there's a little kid in all of us.

Newspapers, like all medias, aren't exempt from bland-ers, but their mistakes, it seems, stem largely from trying to serve a reader which they never see but know exists. John Doe newspaper reader, so to speak. It may seem a simple task, but it's sort of like planning a menu without knowing the guest list.

Supports US intervention in Libya

Opposing ideas reveal truth

Warmonger disputes opinion

To The Editor:

Yes, it is the "Imperialist War' the "Conservative can Fascist Pig," or the "Mother f- ing Republican" (as I have been so graciously addressed this past week). This time, as with radio, round-tables, my country, I write in defense of myself, hoping to clarify a few misleading and derogatory statements about me in last week's Pointer.

In response to J.B. Miller's "Opinion" column (and I stress opinions) last week, not only did I find myself quoted out of context, but the entire column directly and intentionally maligned me for an audience as to what I really said during my rally speech/reporter to the editor. Mr. Miller so kindly takes it upon himself to incorporate speech, Engel's speech with mine, selecting statements from both speeches, then quoting me as saying so. I am not saying anything about Mr. Khadafi's daughter -- sorry pal! Also, this fanatie is the right commonly referred to the "left" and to "left-wing fanatics." I mentioned "leftist" one time and one victim came forward and filed a statement which accuses me of being sexist. I交给 a member of my staff the statement of mine which refers to the only declaration that accuses me of being sexist. You asked me if I saw any value in the statement of mine which refers to the only declaration that accuses me of being sexist. I交给 a member of my staff the statement of mine which refers to the only declaration that accuses me of being sexist. I交给 a member of my staff the statement of mine which refers to the only declaration that accuses me of being sexist. I交给 a member of my staff the statement of mine which refers to the only declaration that accuses me of being sexist. I交给 a member of my staff the statement of mine which refers to the only declaration that accuses me of being sexist. I交给 a member of my staff the statement of mine which refers to the only declaration that accuses me of being sexist. I交给 a member of my staff the statement of mine which refers to the only declaration that accuses me of being sexist.

Finally, in response to William George Paul's "Republican Propaganda" letter last week, I am sorry to say Mr. George Paul, that I fail to see logic in your argument that includes the statement which accuses me of being sexist. It is too bad that my speech was taken the wrong way by some -- I simply just voiced support for the United States' efforts to eliminate Khadafi's terrorist attacks, while at the same time condemning the US for bombing innocent Libyan villagers. Is that so hard to comprehend?

In conclusion, it is time to eliminate Khadafi's terrorist attacks, while at the same time condemning the US for bombing innocent Libyan villagers. It is time to eliminate the difference between the United States and Libya's war on terrorism. We have both discussed this issue, and we both agree that there is one major offensive by the terrorist that was uncovered who is using our own money and our international world. It is too bad that we must resort to force, but if we decided to never use force again it would make us sitting ducks. But the uninvolved element of our world will not stop but will increase its brutality. Mr. Miller, you have all the rights in the world to your opinion but if you are so ashamed of being an American, please do yourself a favor and renounce your citizenship and maybe you should move to Libya and ask Mr. Khadafi for his forgiveness! I would hate to live for you in agony, because you're an American.

I support the U.S.A. and would want to see our country and protect it. I hope this country never comes under leadership like yours, for surely it would lead to the fall of this great land.

Michael R. Mikula

Help offered for sexual assault victims

To The Editor:

We have been asked to disseminate the following information about the services available to victims of sexual assault.

VICTIM SUPPORT.

The Sexual Assault Support Centre (SASC) is a non-profit, community-based, volunteer organization dedicated to assisting women and children who have been sexually assaulted. We provide emotional support, information and referral services to empower and educate survivors to make informed choices about the treatment they wish to receive.

SUPPORT GROUPS.

We run a weekly support group for women who have been sexually assaulted. The group provides a place for sharing, understanding and support. The group is facilitated by a trained volunteer.

INTERVENTION.

We provide support to those involved in the intervention of survivors of sexual assault. We can offer support to those involved in the legal system, such as police, social workers and doctors.

REFERRAL.

We can provide referral services to other organizations that provide support and treatment for survivors of sexual assault.

If you or someone you know is experiencing the effects of sexual assault, please call the Sexual Assault Support Centre at 100-605 Lakeshore Drive, Suite 200, Oakville, ON L6J 7L3.

Discontinue letter to the editor outlining atheism without religious or medical follow-up. These complaints should continue on a mandatory basis, twice a week, all students, and participate in the mandatory Health Issues Class.

- Offer a class on contraceptives for those students wanting to obtain contraceptives (for the first time) from the Health Center.

- Offer the class to Residence Halls and organizations promoting the benefits of education.

- Implement a positive public campaign, aside from the worn out "Wellness" theme and target the sexually active people desiring information on contraception.

- After submitting these proposals to Dr. Hettler, it became apparent to us that he did not take our suggestions seriously. This was quite evident when we returned to the Women's Affairs Committee and suggested that an "alternative method" to their policy be drawn up.

- Out of frustration, the Women's Affairs Committee then compiled a survey, sent out to students at random, seeking input about the mandatory Health Issues Class. Approximately five-per-cent of the students returning surveys said they sought medical attention elsewhere because of the mandatory class. Dr. Hettler maintains this "minority" of students is unsubstantial, but unimportant. When asked if students felt the class should continue on a mandatory basis, twice a week, all students said it should. Many students took the opportunity to attach extra sheets to their survey, addressing situations when they were turned away from the Health Center, or their medical needs were put on hold until they attended the class.

An option to the Health Center's policy is to "opt out" from the class by substantiating why you feel you would not benefit from the class. One of the students wrote a personal experience, summarizing what several students suggested about being exempt: "I ended up not going to the class -- somehow I got around it, but the Doctor (Hettler) was a prick about the fact I didn't go. He treated me like shit.

In talking with a Police officer reporter last week, we learned that a close friend of the reporter was lectured for good portion of her "consultation" with Dr. Hettler. He insisted it was

- Describe the four stages of human sexual response for males and females.

- It is our opinion that these options being asked of students are an invasion of privacy. Even at a higher institution of learning, morality (sexual response) cannot be taught.

- Finally, regardless of the happenings at the University Affairs Committee meeting on Tuesday, May 4, we contend the Health Center should not mandate their own policy without a checks and balance system.

Next week their "preventative care" consist of a mandatory class for students with what appear to be certain needs. It will be necessary for students to consume whole wheat bread and bran muffins before being allowed to consult with the physicians.

To The Editor:

Marriage before graduation?

This is in response to your article, "Anne and Murray," filed under M for married? A recent graduate from UWSP, I resent the advice you forwarded to a newly engaged couple attending a university, saying: "Women should not go married while attending college. Women can't be married while attending college, and even if a woman is married to a good man there is no guarantee that he will remain good."

I simply informed my professor of the name change and followed all the proper procedures and regulations. There were very few mix-ups. Graciously, I am not the mother of a three-year-old, but I did concern myself with maternity and academia. I was a full-time student, and part-time employee. I managed all at once. Any responsible female college student, decides to get married before graduating, should also be intelligent enough to realize when he is going to be a party, it will be mandatory and suggested. I found the best roommate ever had was my husband. The fact that he was also a student made things easier. Having lived off campus before we were married, my husband knew what it was like to cook his own laundry so he's not afraid or unwilling to do things for himself. Getting married before graduating was the best decision I ever made.

Sincerely,

Mrs. Susan L. Bell

Litter on campus

To The Editor:

Who can we blame for their careless attitudes? (Every person who walks by the mess...you too.) Students cannot be held responsible for their carelessness, such rude treatment of the world to whom we are caretakers? (Keep Pick up the junk.) 

We simply like to request that all of us--students, teachers, and human beings--take action on this messy matter immediately. Please be kind enough to pick something up.

Janel M. Coorens

AN INVITATION TO TOUCH THE SKY

Your hard work, education and determination can lead to a special life. Serve your country as an Air Force pilot. The rewards are great. The opportunity to work with some of the brightest, most committed individuals; see the world; and know that you have contributed to our nation's defense. If you are a graduating senior and think you have what it takes to be an Air Force pilot, call to an Air Force recruiter for complete details. Accept the invitation to touch the sky.

Special Olympics to be held at UWSP June 6-8

by Joely Thayer
Staff Reporter

More than 2,000 athletes will gather in Stevens Point June 6, 7 and 8 for the summer games sponsored by the Wisconsin Special Olympics.

Special Olympics is an international organization which provides a year-round training program for over two million mentally retarded children and adults. The organization was founded by the Joseph P. Kennedy Foundation and has programs in each of the 50 states as well as 38 foreign countries.

The summer games in Point are only a portion of what Special Olympics involves. The athletes train throughout the year in preparation for events such as state bowling and softball tournaments, an indoor sports camp and a ski championship. But according to Carol Huettig, Stevens Point coordinator, the summer games are the highlights of what the athletes look forward to each year.

Stevens Point's is a favorite location among the organization's board of directors. Point has been selected not only for its central location, but an even more significant factor, community support.

"One of the reasons the board feels so strongly about coming back to Stevens Point is that this community is remarkable. They continue to lend a hand both in person and by their hearts and their dollars to our athletes," said Huettig. "This makes this a very special weekend," she said.

This is Huettig's 11th year with Special Olympics. In 1979, she was the director of the swimming program for Special Olympics in Kenosha and served on Kenosha's board of directors. Her involvement has increased as she is currently the secretary of the Wisconsin Special Olympics board of directors and serves as chairman of the sports council.

Opening ceremonies are scheduled for Thursday June 6 at 7 p.m. Forthcoming for the athletes and their families will be a Variety Show emceed by a Blues Brothers Review Group. The athletes will begin competition on the June 6 and 7 in track and field, swimming, soccer and walking events.

Clinics are provided during interim periods when athletes are not competing. Several staff members from the Physical Education Department have combined their skills and developed some alternative activities. J.D. LeRoy will head a football clinic, Jerry Gotham will aid the athletes in their basketball skills, Nancy Page will demonstrate personal defense techniques and Len Hill will provide an opportunity to teach them folk dancing.

Volunteers are a vital part of the success of Special Olympics. Frank O'Brien is this year's Volunteer Coordinator and is in charge of helping people help out in many areas. The games average 300 volunteers each year among the university and community. They include the National Guard, police, timers for the track and field events, food service people and countless other people in areas that do not require special skills.

"We have so many needs," said Huettig. "Sometimes people feel if they don't have experience with the mentally retarded and nothing could be farther from the truth."

Special Olympics can be a very special way to spend a weekend. In the years of her experience, Carol Huettig enjoys every opportunity in working with this exceptional group of people. "One of the incredible things about working with this population is if you care about them, they care back so quickly, so easily, so warmly, so genuinely and honestly, all these things...it's awesome."

For more information concerning Special Olympics or if you are interested in becoming a volunteer call either Frank O'Brien at 3800 or Carol Huettig at 2208.

The new SGA executive staff are from left to right: Steve Geis, Casandara McGraw, Mary Ameigh, Lisa Thiel, Steve Cady, Sue Wilcox, William G. Paul, and Chris Steiner. (Mark Murphy is not pictured.)

SGA's new exec board hired

by Joean Davis
News Editor

UWSP's 1986-87 executive staff have all been hired and have begun their duties in their respective positions at Student Government. The organization is under the new direction of President Lisa Thiel, a communications major and Steve Geis, Vice-President, a junior and former CNR senator.

The new Executive Director is Chris Steiner, a senior at UWSP. An English Secondary Education major, Mary Ameigh, stepped into the Women's Affairs Director position. Casandara McGraw, a former Secretary for S.T.A.R., assumed the Minority Affairs Director position. McGraw is a Communications major.

Mark P. Murphy will continue as the Legislative Affairs Director. Murphy, a sophomore, is an active Political Science and Social Science major. A Junior Business Administration and Economics major, Stephen J. Cady replaces Nancy Mayek as SGA's Communications Director.

Former Women's Resource Center Director, Susan Wilcox, assumes the Budget Director position. Wilcox is a junior in Pre-Business Administration.

Obey supports sending dairy products to victims of nuclear plant disaster

WASHINGTON D.C. - Congressman Dave Obey today asked Secretary of Agriculture Richard Lyng to investigate the possibility of sending surplus dairy products to the victims of the Soviet nuclear power plant disaster.

In a letter to Lyng, Obey noted the growing fears of contamination by particles of radioactive iodine throughout central Europe and Scandinavia which have led to the Polish government banning the sale of milk from grass-fed cows in the affected region. Obey also noted that Polish television was warning the Polish people in those regions to avoid drinking milk from grazing cows.

"In light of this," the letter said, "I urge you to investigate the possibility of the United States providing Poland and other affected nations with surplus milk and dairy products currently in government storehouses to replace the contaminated products."

Obey also urged the Secretary to consider what other humanitarian aid the United States might offer to the people affected by the disaster, which would enable the federal government to reduce stores of surplus commodities at the same time.

The current dairy surplus is around 13 billion pounds a year.

Obey was joined in the letter by Congressman Bob Kastenmeier (D-Iowa).
Tips offered to students on buying a used car

by Greg Pederson
Staff Reporter

Ugh, I never should have bought this lemon! All too often that statement has been shouted out on America's highways. If a person follows a few simple steps, that statement may never be shouted by you.

A seminar for any interested UWSP student, was recently given at Scalford Motors providing tips for buying a used car.

Gary Paige, Scalford's service manager, gave the presentation. He gave tips on buying used cars from dealers as well as from private parties.

"State law requires all car dealerships to fill out a disclosure receipt stating everything that is wrong with a car when it is brought in," Paige stated. Paige also said the buyer has to sign this receipt when buying the car. Or the buyer can get a complete safety check; all items on the list aren't required, according to Paige. If however an item doesn't work it must be so stated, and any vehicle must have something wrong with it, then the buyer can bring the car back to either get their money back or get the car's value from the bank of charge. "Don't ever buy a used car from a dealer without a "disclosure statement," Paige reassured.

Another document that the dealer should give you is a "set-up sheet." A set-up sheet is a list of everything the garage dealer did to prepare the car for sale. "Everything from changing the oil to putting in a new transmission will be on that sheet," Paige stated. "If a dealer says that the sheet is lost or that they don't have one is a pretty good indication that something major is wrong with the car, I wouldn't buy a car if they are hesitant to show me the sheet.

When buying a car from a private party, you should ask about a half of an hour to check everything out that should be checked," said Paige. "The best thing you can do is start at the front of the car and work your way to the back," he added.

The first thing to do, according to Paige, is to turn on the lights and make sure that they all work. Look for the paint to be shrunk tight and feel if they are out of alignment or balance. To check if the tires are out of alignment, a person should feel along the side of the tires for an edge in it. If there is — there is out of alignment. To check for balance feel along the tire surface for lumps. After these checks a person should check under the car for something.

"One little thing to check that most people don't think of is the windshield washer fluid. If there is fluid there, that's a pretty good indication that the person takes pretty good care of their car," Paige stated.

Check the oil level in the engine and look for a door sticker to see when the last time was that the oil was changed. If there is no sticker then a person will have to look at the oil. If it is black and gritty it is overloaded, and if it is brown and slippery it is still good. If an excess of oil is on the engine itself, that's a sign that there could be a leak in the engine. If someone cleaned the engine car a car that looked a lot of oil there will be a residue on the exhaust manifold caused by the oil.

Next, check the transmission fluid. If the fluid is red or brown it smells burnt, the transmission is on the way out.

Make sure everything with a pulley has a belt on it. If it doesn't have a belt connected to it that usually means it doesn't work. "When someone tells you that they took it off to get better gas mileage is just telling you that there is a bunch of garbage. With today's cars, the increased wind resistance from driving with the windows down lowers gas mileage more than the time for a cooling system," Paige quoted.

Make sure to turn on the heat and see if it is out of heat, even if it is summer. Do the same to the air for the car.

Check to be sure that every- thing that has an air filter has one. "If a car doesn't have an air filter in place and the people who own the car hide, don't buy it. It's as simple as that," Paige said. "If a car has been run for just one week that carburetor has proba- 
ably sucked 60 pounds of dirt into that engine. Every little piece of dirt, every little piece of bag or whatever that gets into that engine will cause the rings to bind up and that will greatly shorten the life of that engine," Paige added.

One of the last things to check is the catalytic converter. If a car came with one make sure it still has one. To check if it has been removed take a hard object and hit it up against the exhaust tube. If it sounds hollow then the converter is gone.

"Today if your car comes with a catalytic converter and you take it out you can be liable for up to $100,000 fine," Paige explained. Another tip-off of a missing converter is a punched out gas cap so the regular gas can't fit in there. The car will act sluggish because the area where the converter was is getting plugged up. Eventually the area will become so clogged that the car will either go 20 miles an hour or it won't go at all," Paige declared.

The last and most important thing is to take the car for a test ride. Some more important points Paige pointed out were to ask the owner how many miles the car has, if the owner has been driving the car a lot, how many tires have been replaced and if the owner knows how much the car costs.

Residence Life Programming premiers video

by Jackie Riggle
Staff Reporter

On Wednesday, April 30, the Residence Life Programming and Educational Opportunity Programs premiered their video, "The Daily Life Image," a training video. This video is designed to increase awareness as well as understanding of minority groups and cultural differences.

UWSP sent four students to participate in a cultural exchange with Florida A&M University. This university is a predominantly black institution in Tallahassee. Kim Marshall, Bob Kimko, Patti Butzler and Stephanie Millsteinstad were the students interviewed and selected to attend the Southeastern Association of Educational Opportunity Programs Student Conference. During this conference, they collected their ideas and their impressions and were videotaped in an interview-type situation. They discussed and expressed their experiences and their insights about life as a minority on a college campus and/or life on a minority campus.

The tape is a learning device with a set of discussion questions to be used in classes. It can be played in small groups to fail for interested instructors.

Awards Announced

The Pointer takes first place

by Shane Peters
Staff Reporter

For the second consecutive year, the Pointer was awarded First Place with Special Merit in a contest sponsored by the American Scholastic Press Association.

The Pointer was one of 23 college newspapers in America selected for the award. It is the highest award given by the association.

Judges from the association critiqued six areas of the over 500 newspapers entered: content coverage, general plan, page design, editing, art and creativity. The Pointer was given a score of 900 out of a possible 1,000 points.

Some of the other college newspapers receiving this award included: The Daily Orange from Syracuse University, the Villanovan from Villanova University, the Vanderbilt Hustler from Vanderbilt University, the Minuteman from the University of Miami, and the Indiana Daily Student of Indiana University.

Guest Artist Jazz Concert May 8

The third annual Guest Artist Jazz Concert, featuring saxophonist Bill Sears of Chicago, will be held at 8 p.m., Thursday, May 8 at the University of Wisconsin-Stevens Point.

The performance in Michelsen Hall, Fine Arts Center, is open to the public without charge.

The University Jazz Ensemble, under the direction of Mike Irish, and the University Jazz Lab Band, conducted by Steve Zenz, will join Sears in playing works by Turner, Mantooth, Baker, Bernstein, Ellington, Stotes, McConnell, Carmichael, Klemmer-Lewis and Ellis.

Senior recital May 9

Percussionist Tracy Whitrock, 8221 S. Park Rd., Wisconsin Rapids, will perform in a senior recital at 8 p.m., Friday, May 9, at the University of Wisconsin-Stevens Point.

The performance in Michelsen Hall, Fine Arts Center, is open to the public without charge.

Ms. Whitrock will be assisted by pianist Lenna Xie and clarinetist Kristine Schreiber.

They will perform "Drawings: Set No. 2" by Hofhaino, "Fantasy on Japanese Wood Prints" by Novhannsen, "The King of Denmark" by Feldman, three pieces from "Eight Pieces for Four Timpani" by Carter and "Levendal" by Albeniz.

Military Science Awards

University Navy Service

A Hillspoint woman has received the top citation given annual­ly to an outstanding student in the military science department at the University of Wisconsin-Stevens Point.

Nanette L. Cobb, Route 1, Box 134A, Hillspoint, is the recipient of the George C. Marshall Award, demonstrating proficiency in military studies and leadership. She was invited to attend a one­week leadership conference with other Marshall Award recipi­ents from across the country that was held in April at the Vir­ginia Military Institute in Lexington, Va.

The presentations were made at the recent UWSP Military Ball at the House of Prime. Brigadier General Gerald R. Matte­son was the guest speaker at the event.

Floyd W. Carlson of Wausau was the recipient of the Dean's Award which was presented by Joan North, who heads the UWSP College of Professional Studies. The cadet liaison com­mander of the ROTC unit receives the annual citation in recog­nition of special contributions to fellow cadets.

Carlson also received the Disabled American Veterans Award.

The Professor of Military Science Award was presented to John M. Leebrock of Neenah in recognition of superior ser­vices, dedication and leadership.

Robert L. Schooled of Colby was given the $250 Leon Belle Mem­orial Scholarship.

The Alden Partridge Award was presented to Andrew Bangs­berg of Madison. This recognition was established to honor an advanced course student who is a science or engineering major at UWSP.

Military Order of World Wars medals were presented to Wen­dy J. Kiragor of Garrison, Minn.; Jacqueline L. Mueller of St. Charles, Minn.; and Robert C. Moldk of Neenah.

Other recipients of medals, ribbons and/or certificates in­cluded: Michael F. Nolan of 3723 Simonita St. and Wesley B. Vogel of Relati, Association of the U.S. Army Awards; James L. Bartels of Neenah, American Defense Preparedness Award; Greg E. Pradal of Cato and Peter A. Martin of 3338 Forest Cir­cle, American Legion Award; Michael S. D'Ornall of Wisconsin Rapids, American Veterans of WWII, Korea and Vietnam Award; Roy A. Outlow of Niagara, Daughters of the American Revolution Award; Penny L. Lowry of Willim, Daughters of Founders and Patriots of America medal; Scott A. Bartels of Tomahawk, Marine Corps League Award; Karen M. Kromplo­sk of Milwaukee, National Sojourners Award; Jeffrey A. Han­del of Milwaukee and Carolyn F. Robert of Milwaukee, Reserve Officers Association Award; Timothy V. Marschinsk of Shawano, Society of the War of 1812 medal; Jeffrey R. Eames of Green­dale, Sons of the American Revolution Award; Danielle J. Main­guth of Dane, the Retired Officer's Association Award; and Joclas J. Wolfs of Wisconsin Rapids and David W. Wood of Rochester, Minn., Veterans of Foreign Wars medals from the Stevens Point and Plover Posts.
Michael Jackson conducts private Point Bock taste test

**Press Release**

CHICAGO, IL—Michael Jackson of London, an international beer expert, has concluded his recent tour of the Midwest by conducting a private taste test of beers selected from the extensive selection of Midwest-brewed ales. Jackson sampled eight beers, covering a range of brewing categories: recently at State Restaurant in Chicago, Point Bock Beer, a Stevens Point Brewery season favorite of Central Wisconsin, was selected as one of the exclusive brews by Jackson for the taste test.

Jackson has been recognized as one of the few international beer experts. He has made frequent appearances on British television and radio and has appeared in the US on the CBS Morning News and the David Frost Show to discuss beer.

Point Bock Beer was selected as a favorite by Jackson and because Point Bock represents one of the finest beers available in the Midwest. Ken Shibli, President of Stevens Point Brewery, attended the private tasting so that Jackson could share in the evening's experience. Jackson encouraged the audience to share in the taste test and added, "the results were absolutely remarkable!"

BOOK BUY BACK
MAY 14 & 15
9am to 3pm
UNIVERSITY CENTER CONCOURSE

CASH PAID FOR USED BOOKS

Things to know: If the book will be used again during the following semester, you will usually receive 50% of the publisher’s list price.

If the book will not be used on our campus but is still a current edition, we will offer you the amount listed in a used book company’s buyer’s guide. We will be buying these books for the used book company.

The buy back percentages used are the normal standards for the used book industry.

We CANNOT buy back lab manuals, workbooks, annual editions, or books checked out from the Textbook Rental Department. Books must be in good condition. All buy backs are at the discretion of the Bookstore staff.

When shopping for books at the beginning of next semester, check our stock of used books for the greatest savings. The used books purchased now will be resold for 75% of the current publishers list price.

Debbie Kellom new Pointer chief

Kellom is aware of the criticism that the Pointer has received during the last year and she is concerned. But, she agrees, "I want to hear from students. I've heard things like 'The Pointer sucks,' it's stupid, but I haven't heard specific reasons as to why those people feel that way."

Kellom realizes that it is difficult to please everyone. But she also believes that the Pointer is "not here to please people. We are here to inform people about what is going on. People don't like to hear the bad things about themselves, or the university they belong to. They just want to hear the nice stuff but that's not what we are about."

Kellom's interest in journalism is part of her overall interest in writing. She enjoys looking at photos that are submitted and seeing her own work. However, she is realistic. After graduating her plan is to become a full-time reporter, and maybe work for a magazine someday. In the meantime, Kellom binds her time with reading, writing, biking, listening to Bob Dylan's music, and juggling three part-time jobs, although she does plan to give up two of those jobs while she is working at the Pointer.

Joining Kellom next year will be Berni Bleak, Senior Editor; Greg Pederson, News Editor; Dan Dieterich, Features Editor; Kent Waltsen and Chris Des- seys will be returning as Sports and Outdoor Editors, respectively; Paul Becker, Photo Editor; Jenny Sall and Brenda Prochnow will work together as Graphic and Layout and Design Editors; Becky French, Copy Editor; Tom Kelley, Ad Sales; and Mr. David Fox will serve as Office Manager.

The position of Business Manager is still open and applications are being accepted for that position.

Good luck! We wish you a successful year.

Obnoxious pros and good times

by R. Lionel Kroupnow

Features Editor

It all started when I was driving a school bus one December morning two years ago. All I had to do was drop the kids off at the school and bus me to my other job. A typical job.

Then it hit me. No, no, not like a ton of bricks falling across the bus windshield at 30 mph. It was all so clear, so visible to me. I didn't want to be losing 72 junior high aged kids for the rest of my life. I didn't want to be running to old ladies' houses or middle aged divorcees' apartments to fix leaking faucets, clogged air conditioners, and extinguishing plato's in ancient furnaces.

My vision was much more dignified than that. I wanted to be grazing slowly written, un-derdeveloped, fragmented fras- mer English papers. Yup. That was my dream. I was a paper pow- er; a position where young wom- en clinging to a job that all men hold be the epitome of masculinity.

Well, the first phase of that dream ends on May 18 with the anticipation of having my diplo- ma mailed to—me—who knows how many weeks later. And I wonder, has it all been worth it? Has listening to the grunts and groans of creditors, the excuses of the Financial AIDS Department, the giggles of family members, has all of that been worth a paper graduation gown and a $2 mailing fee?

You bet your pitcher of Point- it has been. Let's get into whether or not I'd do it again, right now. Let me get on a roll first. Or at least have another pitcher of beer.

I'm going to pretend, at a moment that I don't have seven years of teaching and gradu- ate studies ahead of me, I want to ponder, for a time, the past. Obnoxious professors. That's the first subject that comes to my mind. Especially one profes- sor who spent 6 minutes of a 30-minute class period telling us all about her worldly travels and how nice all the people were, only to conclude by assur- ing us that she didn't want to paint a rosy picture of the world. Then she asked if we had any questions on the ma- terial we were supposed to be discussing but never did.

Abhh. I'll never forget that. Nor am I likely to forget the night I tried to implement the Paul Morel method of winning friends and influencing people. (That is a literary allusion that will be understood only by those who have read Lawrence's Spen and Lovers—and one I don't want to expand upon.) Oh, the look goes on: last-mi- nute papers and assignments: professors who gave their lec- tures by reading directly from the text, that students were sup- posed to have read anyway: late hours at the Pointer.

What's the point? You're all experienced similar instances or you will. But would I do it again? Yup. You know that.

Ten years from now, maybe 15, most of the horridness of frustrations will change to ros- tacia. It's a human condition and one that I am particularly subject to.

I'll forget how Kent and I were always bumping into each other during layout, and re- membring the pipe, the light- hearted insults, the things that made layout a bearable task af-

Cont. p. 15

A last chance

by Brian McCambridge

Staff Reporter

This is my last contribution to the Pointer and, as such, I'd like to thank a few people before I get to the real writing. First, to the Pointer's President, Assistant, and Mr. Authority are coming across nicely.

First, I'd like to thank my editor, Richard Kromke, for running everything I've written, and I'd like to thank him personally. I've been a little faithless at the Pointer. I'd also like to thank all the Pointer staff for living and dead, I've pardoned, borrowed from and outright ripped off. Couldn't have done it without you.

And could I not thank the teachers and administrators of UWSP for providing me with so much material? Whenever I was stuck for something really silly to write about, they came to the rescue.

I don't want to forget that the president and the teachers, who attacked Libya and gave me the material for an article. And that SGA, too, for the fact that it really anti- GPC—also good for an article. I don't want to forget these Wellness people for naming their organization with no, not get into one instance,

...And that's all. I'd like to thank my readership. Week in and week out, you ass of readers have given me the will to write. And I haven't forgotten all of you who never read my articles, much less the Pointer. Knowing that I would be ignored by 9,000 people allowed me to write just about anything I wanted to without having to worry about offending you. My thanks to all you literal types.

Now I'll turn it over to Jim- mie and Mr. Authority.

Hey, Mr. Authority, "Jimmie, we've had that disaster over in Russia?" Me: "I did, Jimmie, Mr. Authority answers. They're saying's. Right is that the U.S. is in that league, the world is full of bookshelves. "I think that the way they're doing. The President doesn't seem to have the 'Evil Empire' for nothing."

"Yeah. Jimmie, I'm afraid it is."

Against us?" No, Jimmie, Mr. Authority chimes in. Some people believe that the blacks in Russia are getting the nuclear plant to get back at us for bombing Libya.

But that's terrible, Mr. Authority.

"Especially if you're planning to vacation in Europe, Jimmie."

"Europe?"

"Europe, Jimmie. The Russ- ians dumped all that radiation over here in Europe for thousands of health-conscious Americans."

"And how's it going to get us back for Libya?"

"How would you feel, Jimmie, if you were planning to tour Eu- rope—and ended up escaping to Washington?"

I'd be stumped. Mr. Authority.

"That's the way those Rus- sians work. First, they incite discontent, then they're in the government—and the next thing you know, you're invading."

"Invasion?" Jimmie shrugs.

He gets pretty worked up. He's
Wright appointed new artistic director of Guthrie

Press Release

David C. Cox, Chairman of The Guthrie Theater Board of Directors and head of Search Committee, and Martha Atwater, President of The Guthrie Theater Board of Directors today announced the appointment of Garland Wright as Artistic Director. Mr. Wright will assume his new position June 1, 1986.

Mr. Wright has charted a remarkably diverse career directing both classical dramatic literature and new American plays. His work has been seen on Broadway and in virtually every major regional theater across the United States, including the Mark Taper Forum in Los Angeles and the Arena Stage in Washington D.C. Winner of an Obie Award, he also staged Vanities, the longest running non-musical in Off-Broadway history. Garland Wright has excelled in nurturing new drama as well as rededicating the classics with bold directorial strokes, earning accolades from American theater critics.

As Artistic Director, Wright will guide the entire Guthrie Theater, and will become the only staff member reporting exclusively to the Board of Directors. In addition to being responsible for play selection, casting and directing, Mr. Wright will be working on a transitional basis with Managing Director Donald Schoenbaum relative to the overall management of the Guthrie.

Mr. Schoenbaum has previously indicated the Board that he would not be interested in renewing his present contract which ends in 1986. It is assumed that a search for a new Artistic Director would commence soon under Mr. Wright's request and direction. The new Artistic Director will report to Wright as the leader of the organization.

Chairman David C. Cox stated, "Mr. Wright's accomplished artistic vision clearly coincides with the goals set forth two decades ago by Dr. Guthrie himself." Mr. Wright will pursue three priorities with vigor: continuing to build a resident acting company, attracting world-class directors and stimulating audiences with adventurous new work and interpretations of the classics.

"Garland Wright's contemporary insights into the masterworks for the twenty-first century have made him one of the most sought after directors in America today," said Martha Atwater, Board President. She continued, "Mr. Wright was the only candidate to whom we made a formal offer. We are very excited he has accepted our invitation to lead the Guthrie.

Wright commented that he intends to build upon the tradition of excellence established by Tyron Guthrie and brilliantly continued most recently by Live Ice. "We must maintain the Guthrie as a leader on the cutting edge of the American theater," he said. "The concept of a resident company at the University, Wright in residence and actors and designers is the essential life blood of this theater," continued Wright. "It is my hope to enlarge our acting company and provide a platform for playwrights and new American plays — both on the mainstage and in a second space, a production laboratory. The actual site is yet to be determined but hopefully will be in place by the start of the 1986-87 season.

A native of Midland, Texas, and alumnus of Southern Methodist University, Wright is known for his professional career as an actor at the American Shakespeare Festival, Stratford, Connecticut. Appointed Associate Director of that organization, he headed its New Playwright Series producing over thirty new scripts. A co-founder of the Lion Theater Company in New York, Mr. Wright staged among others, E. E. Cummings' 'The Triumph of Faith' for which he received two Drama Desk nominations and an Obie Award. For Joseph Papp, he directed Len Jenkins' 'The Mandolin Played Inexactly.'

His Broadway credits include James McLure's 'Lone Star/Flat. Halls and Paris/Porch' by Jack Heffner. Other New York productions include the critically acclaimed Das Lastachtage, Segefeld, written and starring Sigourney Weaver and Christopher Durang, the national touring production of The Country Wife for John Houseman's-'The Acting Company,' and the Dramatists Guild's Young Playwright's Festival at the Circle Repertory Company. Mr. Wright was awarded the Winston Churchill Fellowship enabling him to work with and observe the Royal Shakespeare Company and the National Theater of Great Britain.

He served as Associate Artistic Director of The Guthrie Theater from 1982-1983 and was a guest director during the last two seasons. Twin Cities audiences will recall his staging of Camille, Mary Stuart, Ell, Summer Vacations Madness, the award-winning Candidate, Guys and Dolls, the importance of Being Earnest (and its subsequent national tour) and the recently opened 'Mystery Girl.'

In 1985 he resigned his post to pursue other directorial opportunities which took him to the Seattle Repertory Theater, the Denver Center Theater Company and the Arena Stage in Washington D.C. where he became an Artistic Associate. He now has agreed to a three-year contract that begins in June 1986, at which time he will assume the leadership of the Guthrie Theater.

Five UWSP students recognized

University News Service

Five representatives from the University of Wisconsin-Stevens Point received recognition for papers they presented at a recent statewide conference for minority students held at UW-La Crosse.

Barbara Elguta Tucker of Shawano, Kim Marshall of Milwaukee, Adam Mata of Almont, Ginger Womack of Whitewater and Molly Shawano of Bowler were asked to present their writings at the American Minority Student Leadership Conference. Sixteen students from UW System campuses had their papers accepted.

Thomas Harris of Mequon also served as a discussion leader and session moderator. Each of the student presenters received a certificate, a $15 honorarium and an expense-paid trip to the event.

The faculty advisors participating in the conference were Jim Vance, director of the Educational Opportunity Program at UWSP, and assistant director Deborah Ansett. Three other students, Dominic Roseboro and Robert Haywood, both of Milwaukee, and Jose Vasquez of Wisconsin Rapids were participants.

According to Ms. Ansett, about 200 people from throughout the state had an opportunity to get acquainted, develop networks, practice leadership skills and discuss issues pertinent to minority students on college campuses.

The UWSP student papers included "Merging Two Worlds," by Tucker, a personal account of her experiences as a non-traditional Indian student; "Fighting the Media in the Classroom," by Womack, a discussion about black stereotypes portrayed on television and their carryover into the collegiate world; "Students Together Achieving Results," by Mata, a description of the STAR organization at UWSP and what participation in that group has taught him; "Is Race Life Possible After College?", Shawsana's discussion of her return to the reservation; and "Thinking on a Unique Opportunity," by Marshall, a recounting of her trip to an all-black campus in Florida.
Sly Stallone writes and stars in "Cobra"

Press Release

"Cobra" is a new police action-thriller starring Sylvester Stallone in the role of a street-smart, big-city detective. In the film, for which Stallone also wrote the screenplay, the actor portrays a tough cop named Marion Cobretti, a.k.a. Cobra, who is turned loose against a vicious serial killer or killers.

Real name is Cobretti. But to those who knew him—and to those who wish they didn't—he's Cobra.

If crime is a disease, Cobra's the cure. A street-tough, big-city detective, Cobra is a specialist. That's a cop who does those "impossible" jobs nobody else wants or dares to do. Not only does his name send shock waves throughout the crime community, but his single-minded purpose and unorthodox methods have created a paranoia even within his own department.

But, at the moment, an equally deadly terror has intruded into the pulse of the city, and the word has come down: the top brass wants to cut Cobra loose on the trail of a vicious serial murderer who's been striking at random—killing arrogantly, and with the savagery of a beast escaped from hell. But is this killer acting on his own? Are others involved? Marion Cobretti, a.k.a. Cobra, is one tough cop who plans to find out... .

With the first "Rocky" movie, Sylvester Stallone established himself as a popular hero with audiences throughout the world. "Rocky II," "Rocky III" and "Rocky IV" followed. Then came "First Blood," followed by "Rambo: First Blood Part II," both immensely popular with Stallone fans.

Now comes Cobra. Stallone introduces yet another type of fighter that many will undoubtedly applaud, just as they have cheered Rocky Balboa and John Rambo.

Brigitte Nielsen, starring opposite Stallone, portrays a beautiful and attitude model being stalked by a killer or killers who apparently have no motive for the series of random murders involving the young, old, poor and wealthy alike.

International filmmaker George P. Cosmatos directs the new action-thriller from a screenplay written by Stallone. "Cobra" represents Stallone's first foray in the detective field with the actor since the immensely successful "Rambo: First Blood Part II," which he also directed.

James D. Brubaker is executive producer. Menahem Golan and Yoram Globus are the producers. The director of photography is Ric Waite, Bill Kenney is the production designer, Don Zimmerman is the editor and the costumes are designed by Tom Bronson.

A Warner Bros. Presentation of a Cannon Group Inc./Golan-Globus Production, "Cobra" is a George P. Cosmatos film.

"Cobra" is the next Stallone-starrer to open throughout the United States since "Rocky IV," which opened November 27, 1985.

Penny-Wise? Pound-Foolish?

Lights are cheaper than hot water.

Lighting costs $3 to $6 a month to run. If you cut lighting by, say 15%, you could save 50¢ to $1 a month. Now that's nothing to scoff at; it'll buy you a cup of coffee at Pac-Man. If nothing else.

But you'll save substantially more by cutting back on hot water use.

That's because heating water takes a lot of energy and that means it costs you money. For perspective, a shower is 500 to 1000 times more expensive than lighting a 60-watt bulb for the same time period.

So the next time you're standing in the shower in the dark, think about it.

University News Service

Ray Strick, 325 Meadow St., Stevens Point, has been appoint- ed by Bishop John Paul as chairman of the La Crosse Catholic Diocese's Justice and Peace Commission.

The commission, with about 20 members, meets five times per year to plan ways of advancing the church's teachings on social justice among lay people. He was one of its founding members in 1980.

Priorities for the next year will be overseeing establishment of justice and peace committees in all parishes, working for greater grassroots understanding of the pastoral letter on the American economy by the American Catholic Bishops, and development of jail ministry.

Justice and peace issues "can't go anywhere without permeating the parishes," he contends.

A native and longtime resident of the city, Strick is employed as assistant archivist at the University of Wisconsin-Stevens Point. He previously served as an assistant professor of history and social ethics at St. Norbert College in De Pere, instructor in sociology at UW-Eau Claire and teaching assistant in philosophy at UW-Madison. He holds a Ph.D. in history from UW-Madison.

Ironically, Strick was introduced to Catholic social teaching about 30 years ago by an avowed atheist who became Strick's longtime friend and mentor—his sociology professor at UWSP, George Oxam. Consequently, Strick changed his plans of becoming an ac- countant and pursued a deeper study of social issues.

He says his strong interest today is in the history of ideas and the sociology of knowledge. "These disciplines enable me to understand ways in which social change, attitudes toward the diocese, support social injustices and armed conflict or nurture justice and peace."

A veteran of duty in a field artillery unit during the Korean War, Strick now participates in local chapters of Bread for the World and Pax Christi USA, the Central Wisconsin Peace Coalition, Portage County Committee for Nuclear Disarmament, and the La Crosse Diocese Committee for the Campaign for Hu- man Development. He is also a chairman of the Brother James Miller Day Committee. He was one of its founders.

In working on projects sponsored by those groups, Strick has been meeting with other supporters. He explains that unlike his brother's who is a Jehovah's Witnesses and comforts the afflicted, "I really am more of a proponent. I afflict the comfortable." In a different vein, he says he is a "proponent" at the place where he "I want to get in touch with people, try to make a difference — to change the world for the better."

Survive finals and the Barth
Student text

Curtis is co-author

University News Service

A professor at the University of Wisconsin-Stevens Point is the co-author of a new book, "Basic Laboratory Instrumentation for Speech and Hearing.

Jack F. Curtis, associate professor of communicative disorders, says the 238-page page book will be used as a college-level textbook. Little, Brown and Company of Boston, the publisher, has begun to market more than 5,000 copies from the first press run.

Curtis was joined in the project by Martin C. Schults of The Children's Hospital in Boston. The two have done research jointly in the past. Also, Curtis is a former graduate student of Schults.

Their text is intended to acquaint students with the use and care of electronic instruments that are employed in diagnosis and therapy for people with speech and hearing problems.

"The text is a helping profession," Curtis explains, "and many of the people who are in it have a basic aeration for equipment. So, the book is geared mainly for them. The content involves the authors' analysis of equipment design, their discussion of problems and of needs of clinicians and researchers, and their interpretation of equipment construction.

Curtis says he had worked on development of the manuscript about eight years and later invited Schults to be a co-author. "I credit him with the book's salability," Curtis adds.

Equipment used in communicative disorders is, like in many other fields, under constant change; consequently, Curtis found himself doing a lot of revisions before the final draft was set in type.

A 13-year veteran of the UWSP faculty, Curtis is a native of Zanesville, Ohio, who holds a Ph.D. from Case Western Reserve University.
"Work like hell to show that you’re competent."

University News Service

A 1973 graduate of the University of Wisconsin-Stevens Point, returned to his alma mater recently to offer a formula that business students might use if they aspire to corporate presidency — especially early in their careers.

Harry Colcord, 34, chief operating officer for the Windows Fabrication Division of Apogee Enterprises in Wausau said: "Work like hell to show that you're competent" and then put in more long hours to "demonstrate to your employees that you're looking out for them."

Colcord, who was reared in Wausau, studied political science and history at UWSP and had hoped to become a lawyer. His plans didn't pan out, however, a disappointment at first, but now he prefers what he's doing. He has headed Apogee's Wausau plant for three years, being responsible for about 350 employees.

Colcord and Louis Gentine, head of Sargent's Cheese of Plymouth, were on campus to represent the Young President's Organization, a national group that draws together corporate moguls under age 36 for educational and social activities.

They came to campus as part of a YPO public service project. Gentine, whose company was started by his father and now has about 300 employees, says people wanting to move to the top of a company could be helped by seeking successful men and women in high places to serve as their mentors.

He further suggests that "being open-minded to all functional areas of a company and to get a good understanding of them" is a prerequisite to success for those seeking upward career mobility.

Gentine and Colcord agree that Wisconsin is on the right track for business development, but they suggest that it is more likely to reach its goals by reducing state spending and eliminating aids programs to local units of government.

Gentine specifically cited a need to reduce state support for the UW System by eliminating some programs that are duplications and by raising student tuition. "The UW System is too good of a bargain," he argues.

Colcord, who was a leader in Democratic party activities on campus as a student and now is active in the Republican party in Wausau, says it is important to have state and local personal income taxes in order, and that current executives in the state agree.

"They may be new from afar, who can advance economic development," he said.

A $50,000 executive's salary in Wisconsin, he boasted about $46,000 in Wisconsin in order to achieve the same take-home pay, Colcord reports. He said he does not object to Wisconsin pay raises.

Gentine believes that if labor unions had less grip on Wisconsin than it would be a "right to work" state, new firms would be more inclined to locate here. But, he added, prospects of change in that area are not likely.

Their YPO organization, a select organization whose members are limited to corporation presidents or board chairmen who attain their positions before age 40 and employ at least 25 full-time workers.

Colcord said use of the organization's benefits he has appreciated is the opportunity for involvement it offers wives of executives. Their lives are different than those of most wives, he says, mainly because the husbands are spending so much time at work.

Good times, cont.

A day of exams. One day I'll be sitting at a bar, with new friends, and I'll remember the old ones: the time Drew tried to put President Reagan's picture in the place of his own; the times I beat The Der (Dorney) at darts, with one swift sure strike of the plastic weapon—or was it twice or trice?

I'll remember the talks Cyndi and I had about whatever and the counsel Jeanne and I shared. Pete will always be God to me—you know what I mean. Fred, I may not remember every game of chess that I lost to Brian, but I'll remember the one that I did win. More than the obvious professors, I'll remember the ones who have shaped my view of what a professor should be.

When that Ph.D. is tucked to my arm, collecting dust, I'll be telling students about Steve Oden: that Rodney-Dangerfield-twitch, the Gene-Wilder-hair, and the Elmore-like geniust combined with a Mark-Twain-wit. But more than telling, I'll be showing his influence by trying to imitate his dedication, concern, and ability to teach.

And there are others: John Drnaka, Larry Watson, Dave Holborn, Nancy Moore. All of them people who made the nose-press professor tolerable.

Sure this piece is sappy. sure it's waning sentimental. But after boasting many hands this semester, I feel like taking the time to shake some hands, offer some thanks, before I have to go long-distance to make that bill do it.

Have I included everyone? No. But this isn't an acceptance speech. Yes, I'm grateful for the others — particularly myself. But it's just a floundering attempt to say that yes, driving is hell of a lot easier but not as rewarding.

We can wire flowers for Mother's Day, Sunday, May 11.

It's her day, so let her know she's special. No endless search for you to find the right card and that perfect something this year. We'll deliver the perfect gift of flowers with a card to her doorstep.

Place your order early!

Give mom the Floral Teapot Bouquet or the Floral Teacup and Saucer Bouquet. Both are made of fine stoneware, with delicate hand-painted blossoms, the loving gift that will be cherished for years to come. Or ask to see our Teleflora Book with other floral arrangements.

STUDENT TEXT

CURTIS IS CO-AUTHOR

University News Service

A professor at the University of Wisconsin-Stevens Point is the co-author of a new book, "Basic Laboratory Instrumentation for Speech and Hearing."

Jack F. Curtis, associate professor of communicative disorders, says the 350-page paperback will be used as a college-level textbook. Little, Brown and Company of Boston, the publisher, has begun to market more than 5,000 copies from the first press run.

Curtis was joined in the project by Martin C. Schultz of The Children's Hospital in Boston. The two have done research jointly in the past. Also, Curtis is a former graduate student of Schultz.

Their text is intended to acquaint students with the use and care of electronic instruments that are employed in diagnosing and therapy for people with speech and hearing problems.

Summer Travel

Chicago museum reveals schedule

News Release

Meitei—Dance, Song and Martial Arts from Manipur. Sunday, May 11, 1 p.m.

Celebrate the performing arts of Manipur with acrobatic drum dancing, mesmerizing devotional songs, and ritualistic ancient martial arts. Thirteen Meitei performers bring a rare glimpse of performances seldom seen outside of Manipur, a lake and stream-filled valley located in northeastern India.

Performances feature the Nang Pala (women's devotional songs), the Pung Cholam (acrobatic drumming) and Thangta, the ancient martial arts combining animal-like movements used in ritual with the swords, spears, shields and knives used in warfare up until the end of the 19th century.

This performance is offered in cooperation with the American Institute of India Studies Committee on the Performing Arts. Tickets $5 (members $3). Seating is general admission. James Simpson Theatre doors open one hour prior to performance. Call (312) 322-8844 for ticket information.

Shisha Embroidery—Mirror Work from India. Sunday, May 11, and Saturday, May 17, 3:30-5:30 p.m.

Examine different examples of the symbolic designs used in shisha embroidery. Jewels, silver butterfly wings, and chipita mirrors are used to beautify the embroidery of India. Using elements from these traditional patterns, create your own design and make the fabric come alive with light. Free with museum admission; tickets are not required. Call (312) 322-8844 for information.

To Maori: Maori Art from New Zealand Collections, an unprecedented presentation of 174 of the most prized and remarkable works of traditional art created by the Maori people of New Zealand, ends its national tour with a presentation at Field Museum of Natural History, Chicago, Illinois, Thursday, May 14 through June 18, 1986.

Organized by the American Federation of Arts, in association with the New Zealand government, the Maori people, and the New Zealand lending museums, Te Maori will make an important contribution toward increasing awareness of the rich artistic heritage of the Maori people, the Polynesian original settlers of New Zealand.

Although a great deal of Maori art is in the care of the New Zealand museums, it remains the property of the Maori tribes who nurture these objects as ancestors of cultural properties. To Maori marks the first time the Maori people have allowed their treasures to journey abroad.

Te Maori has been made possible by a major grant from Mobil. In addition to funds from Mobil, the exhibition is being supported by the National Endowment for the Arts, the National Endowment for the Humanities, an indemnity from the Federal Council on the Arts and Humanities, Air New Zealand, and the National Patron of the American Federation of Arts.

To Maori presents major paintings and carvings in wood, stone, jade, bone, ivory and shell, from all periods of Maori art—dating from about 1600 to 1880 A.D. In dimension, objects range from the monumental 13-foot-high elaborately carved Pukarua Gateway to small tikis (jade pendants).

"Work like hell to show that you're competent."

University News Service

A 1973 graduate of the University of Wisconsin-Stevens Point returned to his alma mater recently to offer a formula that business students might use if they aspire to corporation positions—especially early in their careers.

Harry Colcord, 34, chief operating officer for the Window Fabrication Division of Apogee Enterprises in Wausau said: "Work like hell to show that you're competent" and then got in more long hours to "demonstrate to your employees that you're looking out for them."

Colcord, who was reared in Wausau, studied political science and history at UWSP and had hoped to become a lawyer. His plans didn't pan out, a disappointment at first, but now he prefers what he's doing. He has headed Apogee's Wausau plant for three years, being responsible for about 200 employees.

Colcord and Louis Gentine, head of Sargent Cheese of Plymouth, were on campus to represent the Young President's Organization, a national group that draws together corporate magnates under age 30 for educational and social activities. They came to campus as part of a YPO public service project.

Gentine, whose company was started by his father and now has about 500 employees, says people wanting to move to the top of a company could be helped by seeking successful men and women in high places to serve as their mentors.

He further suggests that "being open-minded to all functional areas of a company and to get a good understanding of them" is a prerequisite to success for those seeking upward career mobility.

Gentine and Colcord agree that Wisconsin is on the right track for business development, but they suggest that it is more likely to reach its goals by reducing state spending and eliminating aids programs to local units of government.

Gentine specifically cited a need to reduce state support for the UW System by eliminating some programs that are duplications and by raising student tuition. "The UW System is too good of a bargain," he argues.

Colcord, who was a leader in Democratic party activities on campus as a student and now is active in the Republicans party in Wausau, says it is important for the state to contain personal income taxes in order to keep current executives in the state and attract new ones from elsewhere who can advance economic development.

A $50,000 executive's salary in Texas must be boosted to about $54,000 in Wisconsin in order to achieve the same take-home pay. Colcord reports. He said he does not object to Wisconsin's high taxes.

Gentine believes that if labor unions had less grip on Wisconsin, so that it would be a "right to work" state, new firms would be more inclined to locate here. But, he added, prospects of change in that area are not likely.

Their YPO organization is a select organization whose members are limited to corporation presidents or board chairmen who attain their positions before age 40 and employ at least 50 full-time workers.

Colcord said one of the organization's benefits he has appreciated is the opportunity for involvement it offers wives of executives. Their lives are different than those of most wives, he says, mainly because the husbands are spending so much time at their jobs.

Good times, cont.

A day of exams. One day I'll be sitting at a bar, with new friends, and I'll remember the old ones: the time Drew tried to put President Reagan's picture in the place of his own; the times I beat The Dorsey at darts, with one swell strike of the plastic weapon—or was it twice or three times?

I'll remember the talks Cyndi and I had about whatever and the counsel Joanne and I shared; Pete will always be God to me—you know what I mean, Pete. I may not remember this game of chess that I lost to Brian, but I'll remember that I did win. And more than the obvious professors I'll remember the ones who have shaped my view of what a professor should be.

When the U.O.P. is tackled to my den wall, collecting dust, I'll be telling stories about Steve Odden: that Rodney-Dangerfield-retic, the Gene-Wilder-haired, and the Einstein-like genius combined with a Mark-Twain-wit. But more than telling, I'll be showing his influence by trying to imitate his dedication, concern, and ability to teach.

And there are others: John Draneke, Larry Watson, Dave Holherr, Norm More. All are telling stories about people who made the not-so-great professors tolerable.

Sure this piece is sappy; sure it's wailing sentimental. But after bailing so many hands this semester, I felt like taking the time to shake some hands, offer some thanks, before I have to run those long-distance phone bills to do it.

Have I included everyone? No. But this isn't an acceptance speech for the Academy Awards either. It's just a fewecampus students and faculty members who I would like to thank for their help with this project. I hope you all enjoy reading it as much as I enjoyed writing it.

Campus vandalism barking up the wrong tree

John Okonek, student manager of the Student Life Grounds Crew, voices concern over the tree vandalism, which keeps the grounds crew busy establishing and maintaining a healthy and attractive tree population.

Okonek is a Student Life infantryman, a group of volunteers, mostly students, who assist full-time workers on general clean-up and maintenance of the campus landscape.

The whole process of purchasing, planting, and caring for trees is an expensive one, said Okonek, and is even more costly when the trees are vandalized.

He also stated that the vandalism can be from a variety of causes: clipping, poisoning, burning, or throwing garbage. However, the biggest problem, added Okonek, seems to be the overall rowdiness of weekend partiers.

Weekends are when most of the incidents occur—Okonek estimates half a dozen on the average—and with the end of the year's celebrations coming up, the grounds crew will have their hands full.

To make matters worse, another thing to remember is that the relative young age of the present campus landscape. Okonek points to the older, more established campuses, with acres of beautiful, old trees, and hopes someday this campus will look like that. But the vandalism has to stop.

How? “The only way to stop vandalism is to make people aware,” said Okonek. On Arbor Day, April 25, the Grounds Crew and American Marketing Association sponsored a Grounds Awareness Day. Pamphlets, flyers and questionnaires were distributed, and the group ran a concession booth outside the UC. Okonek felt positive with the results. “It was effective.”

Tree vandalism is still present, though, along with another big problem—littering. Okonek said the crew spends a great deal of time picking up the large amounts of trash students carelessly fling onto the grounds. “Don’t expect a ‘save the tree’ statement to end this story, though. Think this one over for yourselves—see if you care or not. Who knows? There may not be any trees worth noticing next year.”
May brings the graceful return of the Plover

This is the last excerpt from a Sand County Almanac, I enjoyed bringing the words of Aldo Leopold to the Pelican, and for those of you who read it, I hope it made you feel as good reading it as I did typing it up—Andy Sevageas.

When dandelions have set the mark of May on Wisconsin pastures, it is time to listen for the final proof of spring. Sit down on a toadstool, cock your ears at the sky, dial out the beethovenian meadowlarks and redwings, and soon you may hear it: the flight-song of the upland plover, just back from the Argentinian. If your eyes are strong, you may search the sky and see him, wings aguiver, circling among the woolly clouds. If your eyes are weak, don't try it; just watch the Dike. Soon a flash of silver will tell you on which post the plover has alighted and folded its long wings. Whoever invented the word 'grace' must have seen the wingfolding of the plover.

There he sits; his whole being says it's your next move to absent yourself from his domain. The county records may allege that you own this pasture, but the plover artily rules out such trivial legalities. He has just flown 4,000 miles to reassert the title he got from the Indians, and until the young plovers are a-wing, this pasture is his, and none may trespass without his protest.

Somewhere nearby, the hen plover is brooding the four, large-pointed eggs which will abortly hatch four precocial chicks. From the moment their daws are dry, they scampers through the grass like mice on stilts, quite able to elude your clumsy efforts to catch them. At 30 days, the chicks are full grown, no other fowl develops with equal speed. By August they have graduated from flying school, and on cool August nights you can hear their whistled signals as they set wing for the pampas, to prove again the age-old unity of the Americas Hemisphere soldierside. He follows the black-and-white buffalo, which now pass through his prairies, and finds them an acceptable substitute for brown ones. He nests in the hayfields as well as pastures, and his unassuming nature, as he is observed, does not get caught in hay nets, and shooed away from the hay ready to cut the young plovers a-wing and away. In farm country, the plover has only two real enemies: the gull and the drainage ditch. Perhaps we do not know them as well as these are our enemies, too.

There was time in the early 1890s, with Wisconsin farms nearly lost their immemorial timespces, when May pastures groaned in silence, and August nights brought no whistled reminder of impending fall. Universal gunpower, plus the lure of plover-on-feast for post-Victorian banquets, had taken too great a toll. The protected part of the federal migratory bird laws came just in time.

See you next year!

Boys and girls aged 12 to 15 will have an opportunity to learn about wildlife, hunting and fishing at a week-long program being offered in four locations this summer by the University of Wisconsin-Stevens Point.

"Dr. Kerk’s School of Wildlife, Hunting and Fishing" will be taught by Dr. Keith Birtie, associate professor of wildlife, in seven locations from July 7 to 13 at UWSP; in Marshfield, July 21 to 27 at the UW-Wood County Center; in Wakulla from July 22 to Aug. 3 at the UW-Marshfield County Center; and in Wisconsin Rapids from Aug. 4 to 10 at Mid-State Technical College.

Clases begin at 8 a.m. and end at 5 p.m. for seven days, with the majority of time spent in outdoor activities. Parents will be asked to provide transportation to and from the classes and students will need to bring a sack lunch each day.

Birtie, a UWFP faculty member for seven years, has been involved with outdoor recreation for more than 20 years as an avid hunter and angler.

The program will include sessions on firearms, hunting and trapping, fishing methods and equipment, game and fish range practice, archery hunting and range practice, simulated hunting, and a family field day and wild game cookout.

The fee for one week is $49.50. Registration is on a first-come, first-served basis.

Further information and registration are available through the Office of Continuing Education and Outreach, 163 Old Main, UWSP.

LeGrande honored

A biologist at the University of Wisconsin-Stevens Point is the recipient of a National Science Foundation grant for $75,000 to conduct research on fish chromosome-based studies in applied research.

William LeGrande, associate professor of biology, was awarded the grant through the Research Undergraduate Institutional Grant program sponsored by NSF to increase funding for research opportunities under undergraduate institutions.

The two-year grant will also support two upper level undergraduate students to work with LeGrande as research assistants.

The study will involve extensive fieldwork doing samplings, according to geographical location, of fish specimens in the Chain of southern Missouri and Arkansas.

The professor will examine variations in the number and structure of the chromosomes of a catfish species known as "mudcat." Several of the species are considered to be rare and/or threatened fishes.

According to LeGrande, information on the variations in chromosome numbers provides insights into the processes of classification and evolution. Such information could be used to evaluate other chromosome studies in applied areas such as fishery biology and anatomy. LeGrande predicts the research will serve as a model of the practical and geographic sampling for chromosome variation. The research could then be used as an alternative means of defining different “stocks” of commercially important fish.

LeGrande, a native of Wisconsin, holds a PhD in biology from Louisiana State University and a Ph.D. from Western Illinois University, and has been on the UWSP faculty since 1977.

Active as a fishery biologist and teaching innovator, he received a substantial in 1980 to revise and update curricular and teaching materials about fishes.

In 1983, he received a UW System Faculty Development Grant in designing expertise in the use of microcomputers for modeling and simulation in the life sciences. He is also a former recipient of an NSF grant to do research with a computer.

Faculty funding

Three projects by College of Natural Resources faculty members at the University of Wisconsin-Stevens Point have been approved for funding under the Renewable Resources Extension Act.

John Houghton and Robert Rogers are being assisted in their efforts to reprogram computer software to include a mortality function in red pine yield programs.

Lowell Kinsman and graduate student David Kuhns are receiving support in the development of a series of pamphlets on acid rain in this state.

And, Andrew Koone is receiving an allocation to purchase computer hardware as he develops a new instructional program about fire as a management tool.

The funds are from the US Department of Agriculture and are to be administered by the Wisconsin Cooperative Extension Service.
Environmental Controversy
Support grows for first Wisconsin dove hunt

by Chris Dorsey
Editor

A new controversy lurks around the corner for Wisconsin's environmental community. Thanks to a new organization, Wisconsin Hunters Organized to Hunt Doves (WHOHD), the state Legislature may soon be faced with a battle between hunters and anti-hunters.

Proponents of the dove season have developed a long list to support their case for establishing a season on Wisconsin's dove. The sheer numbers of the bird, claim proponents, make it an ideal game resource for Wisconsin hunters. A direct result because of the shortage, says DNR farmland wildlife specialist Ed Frank, is that there has been a sharp decline in hunting license sales over the last several years. "In 1954," said Frank, Wisconsin sold 64,176 small game licenses, and in 1984 sold only 137,726 small game licenses.

This is an alarming trend to the DNR's wildlife bureau because they derive much of their funding for wildlife management from the sale of sports licenses. The money from sports license sales goes directly to benefit all wildlife - not simply game species. This is a fact, say many sportmen, which anti-hunters have long chosen to ignore. Also on a financial note, many dove hunting supporters say Wisconsin stands to benefit from increased gas tax and tourism dollars should a Wisconsin dove hunt become a reality.

Many opponents to the dove hunt also oppose other types of hunting. According to one animal protectionist, Sue Anderson of the Alliance for Animals, "We do not believe it is ethical to harm or kill living creatures for sport."

Much of the anti-hunting argument centers around emotional pleas. "The dove in a peaceful song bird," say many dove hunting opponents. Hunt- ers argue that there is no such thing as a 'violent' bird and that the dove, according to the American Ornithological Union, is too primitive in its taxonomic classification to be considered a song bird.

Other anti-hunters claim that the dove is too similar to make a decent game bird. Doves are, however, roughly the same size as bobwhites and quail, woodcock and other very popular game birds. The ensuing debate is expected to be fierce between hunters and opponents to the dove season, but WHOHD Chairman Bill Cress of Kenosha looks forward to the forthcoming battle. WHOHD is backed by several influential organizations including: The Wildlife Foundation, National Wildlife Federation, Wisconsin Wildlife Conservation Congress and the Wisconsin DNR.

"What seems ludicrous," said Bill Cress, "is that we are spending several hundred thousand dollars a year to bring back the wild turkey to Wisconsin. While this is great, we have a renewable resource like the dove which is simply going to waste." "Moreover," says Cress, "we're spending over $500,000 a year to bring quail, pheasants and geese onto public hunting grounds. Contrary to what some people think, these birds are merely intended to provide live targets for hunters and do nothing to re-establish wild pleasant numbers. This, in light of the current dove situation, angers many hunters.

"We're going to rectify this," said Cress.

DNR sets up acid rain monitor

A DNR air monitoring van began operating in Birons on May 1, 1986. The van, which is located along William Street between Otter and Bear Streets, is equipped with a sulfur dioxide (SO2) sampler and wind equipment. The SO2 sampler will continuously monitor the ambient air for sulfur dioxide.

This monitoring is being conducted by the DNR for a two-year period in order to address public concerns about health problems related to the area's air quality. These concerns were generated by last year's public hearing in regard to Consolidated Paper's request for an alternate SO2 emission limit for its Birons Division.

In addition to the DNR van, Consolidated will also begin operating an SO2 monitor around the end of this year. The Consolidated monitor will be located in Wisconsin Rapids south of the Kraft Division. Results of this monitoring will verify the amount of SO2 in the ambient air.

SO2 is typically generated by the burning of coal and residual fuel oil. Pulp and paper mills also emit SO2. Kraft pulp mills emit other sulfur-containing compounds, such as hydrogen sulfide and mercaptans. These compounds have odor thresholds at very low concentrations, but in the ambient air they generally have no adverse health effects in spite of their unpleasant odor.

On the other hand, SO2 can affect the respiratory system, irritate plants, and corrode metals. Exposure to high concentrations for short periods of time can cause bronchial constriction and increased mucous flow, making breathing difficult. Children and asthmatics are especially susceptible to these effects.

In order to protect public health and welfare against the effects of SO2, the US Environmental Protection Agency (EPA) has established ambient air quality standards. A primary standard is set to protect public health, while a secondary standard protects public welfare. The most recent SO2 monitoring in Birons conducted in 1980-81 showed no exceedances of these standards. However, if this study shows violations of these ambient standards, a rule-making process will begin and new emission limitations will be established to limit the amount of SO2 emissions from sources in the area. The new limitations will be set to guarantee that the ambient standards will be met.

If you need additional information, contact Joe Ancel at the Wisconsin Rapids Area Office, (715)423-5470.

Wild About Trivia

What is the only trivia question that cannot be answered?
Obey co-sponsors acid rain bill

Press Release
Congressman Dave Obey (D-Wis.) recently co-sponsored a major bipartisan comprehensive measure which would establish a national acid rain reduction program while insuring that Wisconsin businesses are not placed at a competitive disadvantage.

House leaders in the effort to require nationwide controls on sulfur dioxide emissions from electric power plants and smelters have been meeting to work out differences over how best to achieve necessary reductions.

Obey said that the new legislation represents major approaches, requiring the states to act with under State lines, so right now we're getting everyone else's sulfur dioxide dumped on our lakes too, he said.

"Federal efforts are needed to force all states to take action so that we can stop the acid rain which comes into Wisconsin from other states. Unfortunately, air pollution doesn't respect geographical boundaries like state lines, so right now we're getting everyone else's sulfur dioxide dumped on our lakes too," he said.

The Wisconsin Department of Natural Resources has estimated that as much as 50 percent of the acid deposition over central and northern Wisconsin originates in other states. More than 1,000 lakes in Northern Wisconsin may be susceptible to acidification.

Obey said that the comprehensive bill would establish tighter sulfur dioxide restrictions on new power plants, non-ferrous smelters and nitrogen oxide emissions on new cars and trucks.

It is being widely supported by environmental and conservation groups including the Sierra Club, League of Women Voters, National Wildlife Federation, and the Izaak Walton League.

Other members of the Wisconsin delegation supporting the House bill include Reps. Kautzemier (D-Sun Prairie), Aspin (D-East Troy), Petit (R-Fond du Lac), Gunderson (R-Ocone), Kleczka (D-Milwaukee) and Moody (D-Milwaukee).

"I urge all of my colleagues to vote for this legislation, which will provide Wisconsin and other states with the opportunity to avoid an environmental disaster," Obey said.

Conservation Congress draws colorful crowd

by Christopher Dowery

The annual Conservation Congress hearings held last week at UWSP's College of Natural Resources brought spartans from all corners of Portage County. Over 200 hunters and anglers assembled to vote on proposed fish and game rule changes.

Both the DNR and Conservation Congress posed their questions to participants in public meetings on current issues. The hearings were held statewide and the results of the voting will, in many cases, directly affect future fish and game regulations.

The hearing in Stevens Point was run as smoothly as any I've been to around the state. The crowd was as colorful and expressive as one could hope for. Some of my favorite comments included: "Don't change something that is tradition," said one older gentleman. I guess I'd tend to agree, blacks should still be slaves and I really don't think women need to vote.

Perhaps the most humorous comment, however, came about midway through the second period when a scruffy man stood up and asked in a serious voice, "Is this a closed meeting?" The M.C. (cleverly disguised as a wasp) said, "What do you mean sir?" He responded, "Can we get our hands in here?" The mostly male crowd moaned and muttered their anger. Wimpy outdoorsmen, they can't even take a little heat. (Bel, I bet they wouldn't complain if they were sitting in an early-season bear hunting stand.)

The setting couldn't have been more appropriate, giant deer horns over one door (or were they moose?), a flock of sorry looking Canada goose 어렵다 and a "new goose" as one hunter said, over the other door, I'd like to be a warden when he's hunting. Only in Point would one find such an array of outdoor flavor.

As for the guts of the meeting itself, well it seems quite apparent that these hearings are little more than a gripe session for sportmen to vent their frustrations as hunters or anglers. I did find some of the DNR's responses to these comments quite pathetic. Can't anyone in that agency string together more than one thought in a coherent pattern? Most of the questions suffered from the old doublethink syndrome (kind of a brainwash syndrome considering the subject matter). I'm sure much of this "loaded" wording was intentional since the DNR is like the rest of us — they like to get their way on issues.

Just a personal note, however, these types of public hearings actually serve an important purpose. They really aren't effective in terms of accomplishing concrete work, but it's always good to get a sense of what the other side — even if it doesn't seem to make a wit of sense.

The book was written by a
team of researchers and field
biologists under the direction of
Anrea Eno, National Audubon's
legislative director for wildlife.
It is apolitical, unbiased,
exhaustively researched, and
checked for accuracy by offi-
cials in the agencies covered.
Roger Di Silvostro, the project
editor, said that much of the in-
formation is pulled together in
one place for the first time.
The Audubon Wildlife Report
is intended to aid serious con-
servatovs, congressional
staff, natural resource agency
personnel, wildlife biologists,
and upper-level students.
"We expect the report to be-
come a standard reference,"
Ene said. "Sometime, conserva-
tionists wisely wonder how they
ever survived without it."
Each year, a new edition will
be published, with complete
updates and expanded cover-
age. In a few years, Ene said,
the reports will comprise "an
catalog of wildlife manage-
ment in America."
The first edition is available
now for $10.50 (includes post-
age). To order, or for more in-
formation, write: Wildlife Re-
port, National Audubon Society,

Audubon Report
New wildlife guide hits the stands

News Release
THE AUDUBON WILDLIFE REPORT 1985, a 600-page field
guide to government natural re-
sources agencies, is now avail-
able. The first in a series of
annual publications, the Wildlife
Report shines a light into the
complex inner-workings of the
federal agencies primarily re-
ponsible for stewardship of
America's wildlife. Because the
Fish and Wildlife Service is the
lead federal wildlife agency, it
receives special attention.
The report explores programs
as well as agencies, with com-
prehensive accounts of the
endangered species program,

Aland Islands and Certain Other Benefits
A recent Ph.D. dissertation by
Stephen Holland at Texas A&M
University on the values fishers
place on a fishing outing
discovered something interest-
ing: catching fish was not the
goal of a fishing trip. Most angl-
ers sought other values—enjoy-
ing the outdoors, feeling free,
and seeking stimulation and
change from an urban environ-
ment. Catching fish was a bo-
lus that enhanced a trip, but if
no fish were hooked, the trip
wasn't ruined.

Kirby, cont.
in many quarters to be the lead-
er in promoting the organiza-
tion's causes. Kirby said, "I
like that, and I would like to
work to enhance it so we can
do even more."
TAWU membership at Stew-
ens Point is more than 200,
he reported, representing a
third of the full-and part-time
faculty and academic staff
members on campus.
Kirby said he may suggest
that a survey be conducted
soon to determine attitudes of
the members.
The outgoing president
said Kirby is "full of energy
and ideas and will be good for
TAWU."
Kelley reflected on his own
presidency and said that as he
leaves office "many mem-
bers here are much more sen-
tive to the issue of salary and
alert to the idea that if anything
is done, it has to be done right.

Of the new UW System Presi-
dent Kenneth Shaw, Kelley said,
"I have the greatest confidence
that his intentions are the very
best." However, "Visions be-
come very foggy beyond the
Madison city limits when you
have headquarters in Van Hise Hall
on the Madison campus."
Kirby added that the Madison
campus "is very good and very
important" and is recognized as
such. "But so are ours (the for-
mer smaller university) and I
don't believe we get the credit
we deserve."
In addition to Kirby, others
who will hold TAWU offices
during the ensuing year, begin-
inning in April are: Ruth Steffen
of the library staff, vice presi-
dent; Mel Bloom, foreign lan-
guage, secretary; Joan Rum-
sey, English, legislative chair-
man; Hazel Koskonuina, Eng-
lish, treasurer; Lillian Speng-
berg, English, academic staff
committee chair; Kelley, academic
freedom and tenure; Clifford
Morrison, history, collective
bargaining; Leon Lewis, Eng-
lish, educational policies; and
Richard Dostal, English, sal-
ary and fringe benefits.

**Finish second in WSUC**

Pointers eliminated from post-season play

The Titans, aided by two walks and two base hits off reliever Brad Baldschun, came back with four runs for a 4-3 lead in the fourth.

The Pointer, however, responded with their finest inning of the doubleheader, posting three home runs off starter Jim Godfroid to take a 6-4 lead after the fifth.

Lindcarr contributed a two-run shot, while Phil Hustler and Chris Kohle powered solo homers.

It wasn't enough, though, as UW-O rallied for two runs in the sixth and fourth in the seventh to snap the tie.

Brian Wesley came on in relief for the Titans in the sixth to earn the win.

Lindcarr's two-run homer and double led the Pointers. Kohle added a single and a solo homer, and Kevin Lyneis managed two singles. Both teams registered nine hits in the opener.

The Pointers, who needed a victory against UW-O to strengthen their chances for a post-season bid, did little right in the final game.

Steve Nativick started for the Pointers but gave up three runs and three hits before giving way to reliever Randy Jankowski in the first inning.

UW-O, the most talented team the Pointers faced all season, continued the beating with four hits and three runs off Jankowski.

The Pointers finished the season with a pair of doubleheader losses to UW-Oshkosh here Saturday.

**Wunder announces recruits**

*by Julie Thayer, Staff Reporter*

Linda Vonder, the women's head basketball coach, announced earlier this week the names of six Wisconsin area recruits for next season's Lady Pointer squad.

Reese Bourget is a 1986 graduate of Eau Claire Regis High School. She has received Academic all-state honors and is a member of the Coaches all-Star Team, playing for the Class B North division team. Bourget is a 6'9 forward who will be enrolling at UWSP as an Arts and Science major.

Debbie Metzger will join the team from Wausau North High School. She is also a member of the Coaches all-Star Team for the Class A South division team, and was a 1st Team all-Conference selection this year. Metzger, a 1986 graduate, is a 5'7 guard enrolled at UWSP as a Psychology major.

Brenda Van Der Buirg is a 1986 graduate of Kaukauna High School. Van Der Buirg is the third UWSP recruit who was selected as a member of the Coaches all-Star Team for the Class A North division squad. She was most valuable player and was a 1st Team all-Conference and First Team all-Fox City pick this past season. Van Der Buirg is a 5'7 guard enrolled as Physical Education major.

Krista MacLean, also a 5'7 guard, is a 1986 graduate of Fond du Lac Springs High School. MacLean will enroll at UWSP in the Physical Education major.

Missy Vande Voort is from Little Chute High School. She was a 2nd Team all-Conference selection this year and a 6'1 center who will major in Speech Therapy.

The Titans, held at 2-2 after two innings, added a run in the fourth off the Pointers' pitcher, Scott Pompe. Pompe's game was early, running the lead rule with three runs in the sixth off the final UWSP pitcher, Tom Karst.

Although the Pointers could not break the spell of mastery, the Titans held over them, earned the season at five games and incurred a solid second place finish in the WIAC.

**Netters finish 4th at WSUC tourney**

*by Karen Kalinski, Staff Reporter*

MADISON — The young UW-Stevens Point men's tennis team made a name for itself with a fourth place finish at the Wisconsin State University Conference championships held at Nielsen Tennis Center in Madison.

UW-Stout won the WSUC title with points followed by Whitewater with 47, Oshkosh 28, UW-Eau Claire 26, La Crosse 16, Platteville 2 and River Falls.

"The team performed well and jumped up two spots from last year's sixth place finish," said Pointer coach Dave Nuss.

"The significant fact is that we used predominantly first year players and have accomplished more than any UWSP team in several years. We finished with a conference record of 11-4, the best in over a decade."

UWSP's No. 4 singles entry, Doug Greenberg, captured second place, defeating Lance DeRouald (Eau Claire), 6-1, 6-4, and Tim Kopas (Oshkosh), 6-2 before bowing to No. 1 seed Mark Polston (Stout), 6-1, 6-1 in the finals.

"This was definitely the high point of the meet," said Nuss. Doug came into the meet unseeded and proceeded to knock off the No. 2 seed to earn a spot in the championship finals. He went down to Polston, but not before giving him some problems. Doug is a spirited and intelligent player. Achievements at these meets have amazed the competition. I'm proud of him and couldn't have a better quality individual around."

The No. 3 doubles duo of Petre and Mike Brown were also captured a runner-up spot. They defeated Scott Meade and Tom Griffin (River Falls), 6-3, 6-1, and the No. 2 seeded team of Mike Petsch and Charle (Whitewater), 6-1, 6-2. The pair lost the championship match to the No. 2 seed, Joel Vogler-Tony Finder (Stout), 6-4, 6-2.

"Bretten and Benedict made UWSP history by making it to the finals at State position," said Nuss. "In their match against Whitewater, Benedict had a spectacular serving coupled with Brown's superior net play. Both guys were returning serves well, too. In the finals, they started hitting with each other, however, to defeat Javier Avila (Oshkosh), 6-4, 6-4, 6-3 for third place.

"Bill's match against the highly touted Avila had to be the best of his career to date," said Nuss. "Avila is an awesome baseline player and Bill played an aggressive all-court game to defeat him."

Other Pointer singles entries were Bryan Spaans (Eau Claire), No. 1, 6-3, 6-1 and 7-5, 6-1; Gary Polston (Eau Claire), 6-1, 6-2 and Tim Kopas (Oshkosh), 6-2 before bowing to No. 1 seed Mark Polston (Stout), 6-1, 6-1 in the finals.

"Zowin outdistinguished Avila to help him be the best of his career to date," said Nuss. "Avila is an awesome baseline player and Bill played an aggressive all-court game to defeat him."

"Zowin outdistinguished Avila to help him be the best of his career to date," said Nuss. "Avila is an awesome baseline player and Bill played an aggressive all-court game to defeat him."

Harriers second in WSUC meet

by Wade Turner
Sports Information Office

The men's track and field team placed a solid second in the WSUC conference outdoor meet held here over the weekend.

UW-La Crosse ran away with the team championship amassing 243 points. Following the "ru-r-up" Pointers included Oshkosh, 81; Eau Claire, 80; Stout, 68; Whitewater, 66; Platteville, 38; River Falls, 9; and Superior, 8.

Coach Rick Witt was extremely pleased with the outcome of the meet. "I think all our guys really rose to the occasion," he said. "We had our backs against the wall after the first day, but bounced back well Saturday. It was a total team effort."

Even though the Pointers were without an individual conference champion, second place finishers included Andy Sackman, 10.60MM, 3:14.95; Ben Baumgart, high jump, 6'8"; Ric Perona, 400M intermediate hurdles, 53.77; Pete Larson, 300M, 32.86; Don Heltier, 300M steeplechase, 9:13.5; and John Zastrow, decathlon, 3,325.

Third place efforts were registered by Jim Kowalczyk, 10,000M, 31:53.42; 400M relay team (Wolfgang, Heimark, Jahnke and Larson), 44.96; Larson, 300M, 11.27; Scott Lauren, triple jump, 46'9"; and the mile relay team (Larson, Watry, Allison and Perona), 3:51.22.

Four places were recorded by Perona, 500M, 50:46; and Kurt Krusger, decathlon, 3,811.

Netters, cont. from p. 24—

seasons and that is a great accomplishment for a tennis player. Bryan has been selected as the team's most valuable player, and I must say that he certainly deserves it." The No. 1 doubles team of Dieder-Zwanz finished in third place. The two defeated Joe Kallay-Monte Kahl (Platteville), 16, 6, 6, 2, last to Mike Frey

Man-Rob Oertel (Stout), 6, 1, 3, 6, 2, but bounced back to defeat Jay Schumert-Tim Hoven (Oshkosh), 7, 6, 3. "After a shaky start, but with victory, Dieder and Zwanz got back on course and the team is ranked eighth in the country," said Nax. The first set was all Stout, but in the second, Dieder was getting his first serve in and Zwanz was all over the net. The duo extended their match to three sets, but Dieder lost his serve. Stout had the momentum, and Zwanz broke too. They ended their season in fine fashion though, capturing third place.

The No. 2 doubles team of Polston-McElhaney won the consolation bracket, fourth place. The pair lost to Artis-Koppa (Oshkosh), 7, 6, 4, but defeated Dave Kiwinski and John Kumpf, 9, 6, 4 and Kurt Krawczyk-Matt Richards (La Crosse), 6, 6, 2 to finish in fifth.

"Polston and McElhaney are a tough first match to Oshkosh," said Nax. "The two played exceptionally well and were just a few crucial shots away from victory. Gary and John got tough, learned from that match and came back to defeat River Falls and La Crosse. The key to their two wins was Polston's serve and returns and McElhaney's first volley after serve."

"I am very proud of the team. They performed to their full potential this season. For the first time in years, a UWSP tennis team has made it to this conference. Our opponents now know that we are strong, we are for real, and that as a young team, we will all go back and improve." 

FINAL WSUC TEAM STANDINGS

UW-Platteville 16; Whitewater 14; Oshkosh 11; Stevens Point 10; Eau Claire 9; La Crosse 4; Platteville 4; River Falls 2.

Falcons dump Lady Pointers

by Kent Walstrom
Sports Editor

RIVER FALLS — UW-River Falls defeated UW-Oshkosh on Saturday to remain undefeated in the Wisconsin Intercollegiate Athletic Conference women's track and field meet. The team scored 109 points to 89 for Oshkosh.

The Falcons, who entered the meet with a record of 2-0, managed to defeat their conference rivals, who entered with a record of 1-1. The omen continued with a 10-4 victory over UW-Platteville.

The women's track team finished with a strong showing, led by Senior Claire Riedl, who won the 800M sprint. Riedl's time of 2:14.87 was the fastest time of the day and helped propel the Falcons to victory.

In the men's meet, the Falcons defeated UW-La Crosse to move to 3-0 in conference play. The men's team scored 102 points to 87 for La Crosse.

First place finishers included Cathy Ausloos, 800M, 2:14.87; Michelle Riedl, 600M, 1:56.47; and Michelle Riedl, high jump, 5'9½".

Second place finishes were recorded by the mile relay team (Enger, Brilowski, Krause, and Ausloos), 3:59.23; and Wilkom, triple jump, 36'2½".

Third place efforts included the 400M relay quartet (Brilowski, Enger, Ausloos and Wilkom), 46.68; Carrie Enger, 400M, 56.20; Tammy Swiders, discus, 122'3"; and Brilowski triple jump, 36'2½".

Fourth place efforts included the Pointers, with a 10-4 victory over UW-La Crosse.

DNR return fish to Wisconsin’s waters

Press Release

Consider for a moment the size of the job facing the Department of Natural Resources’ Fish Management Program. Annually, more than two million anglers cast their lines into Wisconsin waters. Fish management extends to 15,000 inland lakes, 9,000 miles of trout streams, 17,000 miles of warm water streams and rivers, and more than 6.4 million acres of the Great Lakes and Wisconsin’s portion of the Mississippi River.

It all amounts to a commercial fishery valued at more than $4 million and a sport fishery program that directly contributes more than $277 million to the state’s economy each year.

For a program that is as large and diverse as Fish Management, the Hatchery Program has become in the 1980s, it is interesting to note that in many ways, a key to the entire program rests in the DNR fish hatcheries like that in Woodruff.

At the Woodruff Hatchery, the product each year is young walleyes and muskies. Last season, production goals exceeded all expectations, as Hatchery Manager Elburne Mertz reports raising more than 1.3 million young walleyes and more than 75,000 young muskies. The fish were netted from their rearing ponds last fall and planted into state waters to fend for themselves in the wild.

This spring, the whole process of spawning and rearing at the Woodruff Hatchery is underway again with every prospect for a productive season ahead. Mertz says, “Last year’s success was primarily due to the cooperation of Mother Nature with near perfect weather during the warm summer months that the young walleyes and muskies spend in their rearing ponds.” Mertz says a repeat of a last year’s hatchery performance will hinge on good weather this summer.

But, even if production at the Woodruff Hatchery should fall slightly below last year’s levels, consider the tangible and intangible benefits those young fish represent in the waters of Wisconsin in which they eventually will be released. For, in large measure, the Woodruff Hatchery does what Mother Nature cannot do alone: ensure that sport fishing in Wisconsin will remain a strong and vital force that can be counted on in the future.

Catch and release tips for avid anglers

Press Release

The line is taut, the reel straining, and the rod is bowing with the weight of a fighting fish. The decision anglers have to make now is whether to keep the fish or release it.

Increasingly these days, due to site limits of the growing practice of catch-and-release, anglers are opting to return their live catch back to the lake or stream in which the fish was caught. Here are a few tips to ensure your hard-earned catch can survive to fight another day:

- Play a fish only enough to land it, since the fish could weaken and die from the stress of a prolonged fight.
- Use a net to land fish quickly and to ease handling.
- Don’t squeeze the fish or put fingers in its gills, as the fish may suffer fatal internal damage.
- Hold the fish belly up when removing the hook—the fish will struggle less.
- When a fish is deeply hooked, don’t rip out the hook. Instead, cut the leader as close to the hook as possible. Two-thirds of the fish handled in this manner survive, while almost no fish survive if a deep hook has been removed.
- If the fish is sluggish when attempting to release it, hold the fish upright in the water and move it back and forth as it gets oxygen and to let it regain its equilibrium.

Thanks UWSP! UAB Luvs Ya!!

WELCOME 1986-87 UAB BOARD MEMBERS!!

Top Row: Left to Right John Fremstad - Concerts, Kurt Joseph - Travel, Beth Ludeman - Contemporary Music, Carla Thurber - Public Relations, John Exo - President, Scott Lopez - Special Programs, Lori Nelson - Administrative Assistant, Bottom Row: Joe Andreska - Budget, (Seductive Woman) Julie Trzinski - Homecoming, Chris Wanta - Athletic Entertainment, and (Biting Wolf) Pat Hopkins - Vice President.
These works have been drawn almost entirely from the collections of 13 New Zealand museums with one object in mind from the University Museum, University of Pennsylvania. Te Maori is free with museum admission. Field Museum's public programs for Te Maori are funded in part by a grant from the National Endowment for the Humanities, a federal agency. Call (312) 335-6100 for information on Te Maori exhibit; (312) 335-6854 for information on Te Maori public programs.

Out of the Night of Darkness: The Māori Legends Thursday, May 14, 7 p.m.

Te Maori Family Program. Come to the Māori meeting house for a dramatization of some of the many Māori legends about the clever and amazing Maui. Some say Maui was born at the edge of the sea; some say he was born fully grown; some say he can change into many different shapes. Don't miss these fascinating glimpses into Māori folklore. Free with museum admission; tickets not required. Call (312) 335-6854 for information. Te Maori Film Program. Saturday & Sunday, May 24 & 25, 1-3 p.m.

"Children of the Mist" (30 min.)—A brief history of the tribe of New Zealand is followed by a depiction of the life and problems of this contemporary rural Maori tribe that has migrated to an urban area. "Tehero Tiki Tiki, The Making of a Maori Canoe" (30 min.)—Explore the superb craftsmanship that goes into the design and production of these seaworthy vessels. This program is free with museum admission. Call (312) 335-8864 for information.

Theater of Masks. Saturday & Sunday, May 24 & June 1. All day. Come to the Field Museum's two-day celebration of masks, mask-making and masked performances of peoples from around the world. View demonstrations of mask-making from different cultures and hear explanations of their making traditions. Take the time to explore the museum and find masks from various parts of the world. Attend workshops which are offered throughout the weekend giving families the opportunity to make their own masks based on the numerous examples seen at Field Museum. Musical and dance performances using masks from different cultures are featured both days. A special display of masks made by Chicago area school children will be on high light of the celebration. All activities are free with museum admission; tickets not required. Call (312) 335-6854 for information.

Museum Admission

Adults $2; families $4 (2 adults, unlimited children); young people 6-17 & students with I.D. $1; senior citizens 60+ $1; children under 6, free. Free to all on Thursdays. Field Museum is open seven days a week, 9 a.m.-5 p.m.

Psychology department awards outstanding students and faculty

The top faculty awards went to Nancy Shyam for teaching, Padmanabah Sudevani for scholarship, and Douglas Rendleman for service. They were chosen by fellow professors in the department.

Seven students received the Junior Leadership Award certificates in recognition of general academic performance, service and contributions to the university and their communities and promise for future achievement in psychology. They include: Karen A. Ellmen, 1053 Briggs Street, and Denise J. Hubbard, P.O. Box 11, Junction City.

Twenty-two students, who have earned grade-point averages of 3.3 in their major and 3.1 in all of their classes, were inducted into Psi Chi National Honor Society in a ceremony conducted by Dr. M. Harris. The new members include: Karen A. Ellmen, Susan L. Herlache, 1208 North Point Drive; Karen L. Hettich, 717 Johns Drive No. 1; Denise J. Hubbard; Kathleen M. Kovach, 7494 County Hwy. Z, Verona; Carleen Jones, 1033 Smith Street; and Jan L. Manowski, 5965 Hwy J.

The making of a song

Hands Across America product of inspiration

When Ken Kragen started looking around to pen the song "Hands Across America," Kenny Rogers suggested he give the nod to Look and Co. in New York, the folks who wrote his hit single, "The Pride Is Back (Born in America)." Look and Co.'s writers, Marc Balle, John Carney (Arty Carney's nephew) and Larry Gottlieb, turned in the perfect choice. Their dramatic pop anthems "Hands Across All the World" has sent a growing chill up the nation's spine ever since its release. Like its predecessor "We Are The World," the song is sung by a diverse collection of commercial singers Joe Cerrito and Sandy Farina. Also heard on the track are the haunting backup vocals of the New Jersey Mass Choir, the same gang that put the goose bumps on Foreigner's "I Want to Know What Love Is." The song was co-produced by Look and Co.'s Rich Look and Quincy Jones.

Jeannie Neary, Rich Look's partner in Look and Co., points out that there is a touching irony in the fact that her firm was chosen to write "Hands Across America." "Our company was called Look and Co. for nine years, when Steve Chapin, Harry Chapin's brother, was my Look and Co. partner," Harry Chapin was real

the one who got this whole ball rolling when he founded World Hunger Year. Harry used to say he never would have gone on after nine nights in three pieces of clothing to Washington to lobby for legislation to fight world hunger. He had all this thought that we could think of, like ways for getting farm surplus money to hungry people around the world. Some of his concepts have now been implemented. He looked like that constantly for about seven or eight years, up until his death, in 1981.

And of course, one of the people Harry Chapin most admired and inspired was his manager. A man named Ken Kra-

Sensations and the track are the haunting backup vocals of the New Jersey Mass Choir, the same group that put the goose bumps on Foreigner's "I Want to Know What Love Is." The song was co-produced by Look and Co.'s Rich Look and Quincy Jones.

PERSONAL: Otner: You big, fat wall. I can’t believe it, but the end of the $6. Pit Endurance Run is in sight. The next person that it “looks like a resume” can hit right “Up Cal’s.”

PERSONAL: Mango K and buddy C. Thank you for making this special, lovely gathering. I love you both. Yours, Neelybear.

PERSONAL: Geode lovers: Our five-year-old birthday party is in one month. This is a month to celebrate! We will be serving ice cream and cake and all of our geode friends. We would love for you to come and enjoy the fun. The party will be held on May 7th from 2:00 to 4:00 PM at 346-2073.

PERSONAL: Kelly at Junction summer. All singles, close campus. Can 341-3092.

PERSONAL: To the wonderful women who reside at 1230 Illinois (and the many pseudo-residents) next semester: What an awesome year! What awesome friends! Happy summer to you all. Love ya, Jo.

PERSONAL: To do I really have to live with you this sum­ mer? I can’t handle any more “I never” games. Sincerely, Yours.

PERSONAL: Desperate! In need of graduation tickets. Willing to make trade. Please call 346-2966.

PERSONAL: Vangii: Good luck in Alabama. We’ll miss you. And don’t worry, we’llerville, Love, and Let and.

PERSONAL: “To my Schneekleeptoi Greened”: Seemed forever in Oz and will seem even longer in H.C. without you. Please let me know if you’re ever in our area. Nice picture of a rather sexy smiling, pretty little blonde with a reaching up to the sky (11), miss you much! T. Adora love.

PERSONAL: I need graduation tickets! Call John at 346-4232.

PERSONAL: Graduation tickets. I need as many as possible. Am willing to pay for them. If you have extras, please call 341-1035 and ask for Led
devance message.

PERSONAL: Seniors, I am in dire need of graduation commemorative tickets. Am willing to pay. Call Joe at 346-3245, late evenings.

PERSONAL: I need one graduation ticket! If you have an extra please call Suzanne at 341-1235.

PERSONAL: Campus market­ ing needs your opinion for statement for summer and fall. Sales and marketing students. Brief fi­ led. Send resume to: Collegiate Furnishings, PO Box 101, White­ wood, WY 53380.

PERSONAL: To Lori, Kay, Amy, Joy: Thanks so much. You helped me when I needed it most. The Wolf.

PERSONAL: Keith and everyone at maintenance. For the fun and chal­ lenge these past two years. I wish you all the best. Wishes for the future.

PERSONAL: Sandy and Hyer Staff. Thank you for all you’ve done to make me feel special. I’ll always remember you deep in my heart. Good luck. I’ll be back soon. Love ya.

PERSONAL: Jennifer Jones: Je’s a great one and you just can’t forget it. Piosoup! To a commit­ teefamily.

PERSONAL: To the ones...out of control...need help...you do too much memories to get into in­ ternet buddies always, I love you.

PERSONAL: Attention THWP: Alson and Wendy are not twins, we are not sisters, or even remotely related. Jake’s on your thank you! For Amy R.: Point’s loss was DeForett’s gain. It’s too bad you’re not still up here anymore. We could have had a great time de­ fining the perfect man and woman. See you in June, Chris D.

PERSONAL: The Sigma Tau Gamma chapter is excited to announce that today is a great day! This year was great fun and the great success and the many, many fans that we’ve had this year. We will miss you, Bea, Schmar and Jen.

PERSONAL: Edwardo: Have you ever thought about the fact that you, in fact, are the greatest man of the future but Sugarbush will be waiting! Sid.

PERSONAL: Mary: It’s a great year. You’re the best round ever. Take care over the summer, remember Ram­ ington Beach. Hope next year is great. I’ll always be there if you need someone to talk to. Love ya.

PERSONAL: PLC Candi­ dates: Good luck at OCI this year! You’re a 119 percent at the stoke. Keep thinking of those great days at OCI.

PERSONAL: To INE Neale: You are all super. Thanks for making my last year a great one. Good luck on finals and what­ ever you do in the future. I love ya all, Kavra.

PERSONAL: Todie: How about dinner soon? Not before finals. Before finals, I know a lot of fun and games with all of us. From someone giving you a free ride.

PERSONAL: To Gerbier: thanks for a fantastic first se­ mester! I know we’ll always remember you deep in our hearts. Love ya, Little Red Cor­ rals.

PERSONAL: Special Olym­ pics needs volunteers June 5-7. Pick up applications at desk, on first floor Debell Hall.

PERSONAL: Scott: One I never love you like I do. You’re the best around. Hope for the future. Love ya will always be here. By the way...one year and counting! Love ya.

PERSONAL: Desperately want to ride to St. Paul anytime after 3 on Thursday, May 15. Taking only one bag. Please call Mary Ellen at X378.

PERSONAL: To Sarah, my Carmen Bunney buddy: Thanks for all your support, care and friendship. Let’s get together again. P.S. It was a boy.

PERSONAL: Attention Gar­ ments: The Hoods are on their way.

PERSONAL: Tuna: You’re a good friend and I wish the best for you. No idea if you can do it. F/A, Terri.

PERSONAL: To the most amazing hugs, we love you. Thanks to all your supporter, it was a great experience and a great success. Look for us next year. Mother “T” and the Monk.

PERSONAL: Pray-Sims Staff: thanks for a fantastic year. I’ll miss you all! Good luck on finals and have a great time next year.

PERSONAL: Bob: Looking real smooth with those shades again. Good luck in the future. Where do you get your hair cut?

PERSONAL: To Pat B in 222 long walks on the beach. Finally made it! Be sure to come back and visit. Love ya.

PERSONAL: After 54 years of langauge arts, I’m retired. Saturdays and Sundays, it’s time for me to get a real job. I’m out of here. The Web.
In 5/18 al 5/9 '3 ,500 School , and approximately Kamil Haferbecker $100 Tombstone league,, $250 ship in student Carl Crappie Lane, received Lasko”3kl Leadership major , centrally set and a year's dates-an almost of Wipfli to . Allen share enthusiasm, individualism, imagination . The Lawrence City, Keith Kulas than Wisconsin Medford, and James Lindholm of Wisconsin Rapida , each recipients of a plaque for outstanding scholarship . The top citations to a graduating senior went to Alan E. Bar-dole of 2716 S. Felker, Marshfield, an accounting major originally from Lyttle, Iowa. He is married with two children and recently accepted a position with the Wausau accounting firm of Wipfl and Ulrich. Bar-dole received the Wall Street Journal Award in recognition of having the highest academic score among business graduates—an almost perfect straight A average. He was given a pen set and a year's subscription to the publication plus a $150 prize to the outstanding senior sponsored by First American National Bank of Wausau.

Other winners:

Jean Anderson of Wisconsin Rapids, Nancy Kramer of Cleve-land, Keith Rulak of Medford, and James Lindholm of Glenwood City, each recipients of $300 John C. Seramur Scholarships; Ronald Christensen of Scandinavia and Suzanne Dickinson of Wisconsin Rapids, each recipients of $250 W.B. Gaytan Scholarships; Deborah Eblington of Niagara, $200 Kamil Mahdi Memo­rial Scholarship; and Koen Pang Margaret Ha of Singapore and Allen Thurbeg of Wisconsin Rapids, each $100 Sentry Scholarships.

Mui-Sin Koh of Malaysia, $100 Tombstone Award for Leader­ship in Student Organizations; David Gelander of Chippewa Falls, $100 Carl N. Jacobs Outstanding Senior Award; Marlene Lashowski of Wisconsin Rapids, $150 Carl N. Jacobs senior Leadership in Student Organizations; Carol Sotul of Marshfield, $100 Tombstone Senior Academic Excellence Award. Lawrence Wesier, an economist who has taught on campus the past 14 years, received a plaque for being chosen by his col­leagues as the outstanding faculty member in the division for 1986.

Richard Judy, head of the division, announced that the First American National Bank of Wausau and Tomahome Pizza of Madison will each contribute $100 to the scholarship program.
