Historically, convocations date back hundreds of years. Nancy Moore, Interim Director of Continuing Education, said the tradition goes back to church times in the twelfth and thirteenth centuries. The caps and gowns currently worn by professors were in the twelfth century, monks' hoods and black capes. "Most of the people who went to universities were studying to be clergy or some kind. Monks would sit in a big cathedral in the choir loft and might do religious chants. There wasn't much of a separation in early universities between the church and the university."

Some universities use black for the whole gown—the hoods are the distinguishing factor," explained Moore. "For the doctors gown, they usually have the three stripes of velvet and the hood color inside is the school colors. There is also a differentiation made for what college they are in. The velvet color inside the hood is for the discipline, and the satin colors are for the school."

Speakers for convocation are picked by a committee appointed by the Faculty Senate. "Everybody wants to hear people whose names are in the news," said Feldman. "But what appears as household news is no measure of academic worth."

So, you ask, "Convocation? What's it for me?" Maybe you think it is a silly tradition, a waste of time, uninteresting. Of course not, whether this speaker is going to interest you or not." Feldman pointed out, "It's the symbolism of the occasion, the symbolism of being together as a community."

Feldman said he hopes that freshmen, at least, will participate. "Most of our students are first generation college students which means that the average freshman is not familiar, from her own background, with what college and a university is all about, and what symbolically and ideally, we stand for."

Moore agreed and said she feels that if people know what conversation is all about, it may be of more interest to them. Although attendance at convocation is not required at UWSP, she pointed out that many campus passes do require students to attend. "The principle behind it is that you should be interested in things other than just what you get credit for," she said.

The new UWSP Convocation "in celebration of our academic enterprise" is scheduled for 10:30 a.m., Tuesday, September 18 in Berg Gym.

Classes that would have been held at ten and eleven a.m. have been cancelled. A question and answer period will also be held that day at 2 p.m. in the Wisconsin Room of the University Center.

A one-credit course will be offered in conjunction with the convocation, dealing with the topics of classical and progressive liberalism. It will be taught jointly by professors from the departments of economics, history, philosophy, political science and sociology. Information about the class is available in the office of Continuing Education and Outreach.

New student housing?

by Greg Pederson

A new enrollment plan has been proposed at UWSP. Enrollment in the UWSystem has been breaking the last few years; this proposal will hopefully curb the problems caused by overcrowment.

The plan is twofold:
1. Recognize that budgets are inadequate to properly educate the number of students currently enrolled.
2. Recognize there is some unevenness within the system; some campuses can absorb students more readily than others.

Of the four-year campuses, three universities, Parkside, Goodman and Wisconsin, will receive no maximum number of students allowed to enroll. They are encouraged to accept all students that apply and meet their admission requirements.

The rest of the UW System, including UWSP, will allow a maximum number of students to be in the system. Most of these are currently being considered for UWSP in 1986, as compared to the current enrollment of 9600. It is proposed to go into effect in 1986.

There is more than one possible chance for the bargaining table. The front runner is a proposal to raise the entrance requirements as well as the requirements for probationary continuing.

This proposal, regarding the admissions changes, will have three points. If any of these three points are met, admission will be granted:
1. Students graduating in the top half of their graduating class.
2. Students, regardless of class rank, who score a 23 or better on the ACT.
3. Having an admission standard number of 50 or better. This student ranking is in the 35 percent and having an (ACT score of 20, 35 = 50).

The third point is a way of controlling the number of students entering as freshmen. This number is very flexible depending on the number of freshmen needed to enroll 9300 students.

The target number of freshmen is the WSSP for 1986 is 1700 to 1750. In the past, the first two points would generate approximately 1500 to 1550.

by Greg Pederson

New enrollment plan hopes to curb overcrowding
One of the clearest impressions of high school that stays with me today is that it sucked. It sucked because always, at all moments before graduation, someone was watching or had hold. Getting out was great. I was free. No more having to come home at 1:00. No "Did you do your homework?" or "Eat your lima beans." No lima beans at all. It was me and the real world—no one in between.

I came to college.

And I found that I had to live in a jailized cement cubicle. That I had to eat prepackaged institutionalized slop. That I was supposed to go to useless walk and wing meetings and "developmentals" (but didn't). That I had to have friends out of the room at 2:00 a.m. That I had to shower in a lockerroom. That I had a new parent.

It was supposed to go to useless hall and wing meetings and "dent Life has so much to talk about because they've given themselves several thousand freshmen and sophomores to take care of.

It's as if college freshmen need sort of an interim parent, someone to fill in for the old parents until they get used to all that new freedom. Freshmen must be a special breed—after all, nobody else qualifies for that much attention. Most high school graduates hit the real world head on—"the school of hard knocks"—and that's the way it should be.

With the new raise in drinking age, Student Life will undoubtedly push itself further into the lives of freshmen and sophomores. As it is they have adopted a parental role, mainly through RA's. RA's can set quiet hours. They can act as counselors to dorm directors if it gets too loud. At night they patrol the halls like police. They can even have people sent to alcohol counseling if they suspect a problem.

In many ways there is a need for RA's. They act as counselors, as willing connections to the University that freshmen can't easily get. But too much of their time is spent on discipline, on controlling and patrolling, on being parents.

It's no wonder there is often hostility toward dorm leaders. They've given themselves too much power.
More than 100 students from the University of Wisconsin-Stevens Point are heading overseas this fall in seven different study tours to France, England, Poland, Spain, or Germany.

The four groups left campus recently and will return in mid-October. Professors Richard Pace of History, Leslie Gardner of English and his family will lead the 40 students in Great Britain. The trip will begin with a one-month tour of the country, visiting travel to London, Ireland, Italy, Austria, West Germany and Belgium. In mid-September the group will arrive in Paris, the home of 40 UWSP students in London since 1969, attend classes and tour England for about three months.

A Women Meeting Women's program will be offered as an extra-curricular activity for female students. This women's program will focus on the everyday lives of British women.

UWSP dance faculty member Melissa Lowell will lead the 30 students in Poland who will begin their trip with a short stay in Venice, Italy, followed by a week in Austria, Hungary and Spain. The group will live for two and one half months in the city of Krakow and attend the University of Jagiellonian University, one of the oldest schools in Europe.

The trip to Poland was chosen by Dr. Dave Coker, who has been appointed the position of Acting Assistant to Chancellor Phillip Marshall.

Dr. Sands was appointed for a one-year term and her major duties include developing international student exchange programs, assisting the Affective Action committee, which oversees the monitoring of all hiring done at UWSP, and coordinating all international sexual harassment and the UW's policy concerning equality of men and women in the class room.

The duties held by Coker have been distributed among administration and, for the most part, have been absorbed by Ms. Waters, who was selected by Chancellor Marshall.

According to Chancellor Marshall, Sands was chosen because of her strong knowledge of administrating and felt this could be based in her strong background in job.

"It also meant less expenditure of funds," said Sands, "probably the biggest reason is because I'm an assistant, and it's only a temporary placement. After a year is up, the Chancellor will decide what he wants to do in terms of my position."

The Chancellor explained that the University is in the process of re-evaluating and changing the system by which the salary is paid. He added that Ms. Williams will have her salary increased, though he was unable at this time to say by how much. He also explained that Coker had been involved with the University for twenty years, and the duties which he fulfilled, along with occasional marital raise, brought his salary up to the level it was at the time of his departure.

It should be noted that in the future there is the possibility of having one assistant to the Chancellor, and the second assistant will then become "the assistant," this too, may elevate the system of pay which is based in the developing stages now.

The students will travel in groups of two on the first trip, and four on the second.
To the Editor:

Connection Variations -

In regards to last week's Va-

ciations as an opinion letter to the

Poster Editor, I would like to take this opportunity to thank Mr. W. Paul for the free publi-

licity. Yet Mr. Anti-Everything seems to have his eyes and ears closed once again. Just for the fun of it, let us take a deeper look at these fictitious courses in the Department of Wisconsin's economic climate:

Governor Earl 101: Wisconsin has lost approximately 25,000 fac-

tory jobs since Mr. Earl has been our governor; had we matched the national growth rate, we would have created about 200,000 jobs. Was your fa-

ther one of those 90,000 Wil-

liams? Obviously not.

Don't work in Wisconsin 102:

Wisconsin's personal income tax is currently ranked as the six-

thighest in the U.S., and thirty-

five percent above the national

average. Believe me, you will feel it in a few years.

Don't die in Wisconsin 103:

Wisconsin inheritance tax is currently ranked as the eighth highest in the nation. You will not feel this stat in a few years, but someday your beneficiaries will.

Don't do business in Wiscon-

sin 104 (perequity 102): Wis-

consin corporates are currently ranked as the fifth biggest in the

nation. New business start-

ups were ranked as fourth lowest in the U.S. last year (46 of 50).

Taxes Tony 105: Our Gover-

nor created a record state bud-

get of last year of about $14 Billion. To make this easier for Mr. Paul, this money comes out of the taxpayers' pockets; with Terrible Tony steadily increas-

ing our budget, tax increases consequently become an annual event.

To the Editor:

Due to a slight oversight, The Young Republic independent study courses were printed (Pointer 9-25-86) without their Young Republic counterpart parts. In the interest of fairness to all concerned we herewith provide these independent study courses for the fall.

YD-10: Expansion of the Media and Church. Join a study group to discover the Oney strategy to prop up a Mars-

ist/communist regime in Nica-

ragua by closing cooperative radio stations, tapping church leadership phones, and financing Daniel Ortega's Park Avenue Oplomentar. (3 cr.)

YD-24: Economic Growth Without Even Trying. This course will allow you to skip visits to the placement office as you shop and compare the vari-

ous levels of social service ben-

efits in the 50 states and the residency requirements thereof. (1 cr.)

YD-20: Separation of Church and State. Here you will study the intricacies of why it is all right for Reverend J. Jackson to run for President, but why it would be an abomination if Reverend P. Robertson did. (1 cr.)

YD-43: Separation of Church and State. Here you will study the intricacies of why it is all right for Reverend J. Jackson to run for President, but why it would be an abomination if Reverend P. Robertson did. (1 cr.)

YD-94: Women in Politics. Gerry Ferraro will be guest lec-

turer for this series which ex-

plores the concept that Sandra Day O'Connor, Lai Deta, Joan Kirkpatrick, Nancy Kassebaum, Paula Hawkins, and the like, are really men in drag. After all, comments Prof. Ferraro, everyone knows Republicans oppose opportunity for women. And why is everyone always

uninformed on your organization's activities and current issues.

If you are interested in corre-

spending with our committee, please stop by the Student Gov-

ernment office or call at x.4036. It would be greatly appreciated.

Let's work together on creat-

ing a network of communication and keeping the lines open!!!

I trust that this semester will be a prosperous one for your or-

ganization. Thank you for your consideration.

Sincerely,

Cassandra McGraw

Minority Affairs Director

Student Government Association

(From p. 1)

Students also end up staying in the lounges longer than they have to. "People go home for the weekend or have class and we can't get ahead of them to tell them about the openings on campus. On paper, we could have them all out of the lounges by today, but those communica-

tion gaps slow down the proc-

ess," Armstrong stated.

These students are not given any reimbursement or refund.

They know when they register that there is a possibility that they will be asked in a floor lounge. The problem of overcrowding should be elevated by the new proposal of enrollment manage-

ment, however, will be moved.

In the past, transfer students needed a 1.5 GPA. That standard would also be raised to a 2.5 GPA.

The target date for a final de-

cision on this proposal is Octo-

ber 1. That is the date when ap-

plications start to be processed for the next school year. This proposal must first pass the Senate in the UW government. Other campus in the UW sys-

tem have similar proposals.
Get a taste of life at the top.

CRIMEWATCH

One male student was stopped in the Oebot Circle Hospital via ambulance at 1:58 p.m. Total dollar amount of loss was estimated at $75.00. A charcoal grill was taken from the front porch of Nelson Hall without the owners consent between August 25 and August 27. The grill was valued at $50.00.

Five male juveniles were stopped in Lot Q, between 12:30 a.m. and 1:30 a.m. A bicycle was stopped in the rear area, between 10:30 p.m. and 11:30 p.m. Damage was estimated at $150.00. A charcoal grill was taken from Nelson Storage. The theft occurred sometime over summer break. Total dollar amount of loss was $25.00. An underage person was found in the 500 block of Reserve Street. The area was quiet.

A female resident was stopped in the Oebot Circle Hospital via ambulance at 1:58 p.m. Total dollar amount of loss was estimated at $75.00. A charcoal grill was taken from Nelson Storage. The theft occurred sometime over summer break. Total dollar amount of loss was $25.00. A charcoal grill was taken from Nelson Storage. The theft occurred sometime over summer break. If you’ve ever dreamed of being behind the controls of an airplane, this is your chance to find out what it’s really like. A Marine Corps pilot is coming to campus who can take you up for real flights. We’re looking for a few college students who have the brains and skill—as well as the desire—to become Marine pilots.

If you’re cut out for it, we’ll give you free civilian flight training, maybe even $100 a month while you’re in school. And someday you could be flying a Harrier, Cobra or F/A-18. Get a taste of what life is like at the top. The flight’s on us. I’ll see you in the cockpit.

Students learn valuable business experience

Each year, about 20 area business executives put part of their firms' future in the hands of student groups at the University of Wisconsin-Stevens Point.

The record of achievement of these young consultants from UWSP's Division of Business and Economics has been impressive, according to Clifford Jacobsen, new program director for the Small Business Institute.

"Students can be very ingenious," he explains.

The institute provides junior and seniors on campus with opportunities to gain real life experience plus academic credit while providing free and confidential services to businesses with special problems.

In the past few years, more than 106 cases have been handled by student teams. For example, two women who had a good retail idea that wasn't working were helped to get on track to profitability. An engineering firm was given tips on how to land more government contracts. An electric company needed information on whether there was a market for a new product it had developed. A banker needed to know how customers perceived his financial institution.

An image study done for the bank by the students would have cost about $6000 if a consulting firm had been called in on the job, it was estimated. There are dozens of other examples.

Jacobsen, who is beginning his 19th year on the UWSP faculty, says his involvement with the institute is a source of professional satisfaction as well as education. "My faith is renewed in the good job students can do," he explains.

This fall, he will oversee about eight projects, each conducted by three-member student teams. Among them: another image study for a financial institution (the seventh of its kind conducted by the institute); development of marketing and merchandising plans for a women's clothing store; study of the kinds of new businesses that could be developed on neighboring building locations to complement an existing firm; feasibility study for a new service.

The Small Business Management Consulting Practices offer students opportunities to earn two or three academic credits for their involvement. Most of the participants are pursuing degrees in business but the program is open to all students. Interior design majors in the School of Home Economics have been involved.

Once enrolled, the young consultants meet with Jacobsen who prepares them for the project by giving them and taking them to the business for an initial meeting with their clients.

The students focus on information gathering and analysis for companies, which is accomplished through the designing of surveys, computer programs, business and financial plans and information/controls systems.

There is no textbook for the course because, as Jacobsen explains, authors of such publications have generally ignored small businesses. The irony is that, he adds, is that many of the new jobs that have been created in recent years have been in small businesses.

At the end of the semester, each team writes a report and develops a presentation for the client.

The institute is an extension of both the UWSP Division of Business and Economics and of the federal and state funded UWSP Small Business Development Center. Firms in Portage, Marathon, Wood, Lincoln, Lake, Oneida and Shawano Counties are eligible to receive free assistance from the institute. Heads of companies desiring to submit requests for assistance contact Jacobsen on campus by phone at 346-5004.

The University Centers
The Farmers’ Market: Season’s end approaching

Looking at the past
Looking at the present

by Julie Kirchoff
Staff Reporter

Bright yellow, forest green, deepest green, sunset orange, silvery white, luscious, rich colors of every hue abound in the stands at the Farmers’ Market on The Square.

The Farmers’ Market is a tradition on The Square of Stevens Point where area farmers come to sell produce. It takes place on weekdays and all day Saturday in the center of The Square downtown. Even at close inspection, the produce for sale is healthy, bright and an excellent purchase—a must for college students on budgeted money and time.

Farming is hard work and these farmers work hard and for long hours. The latest the selling starts is at five in the morning (before the sun rises). Sometimes, the farmers have to drive their trucks out the night before just to guarantee a parking spot the next morning. This is especially true on the weekend when people leave cars parked in The Square overnight.

Each farmer tends to his/her own station—setting it up, selling the produce, handling each customer and packing it all up again at the end of the day. The farmers selling their produce come from all around the area. Many are second generation farmers whose ancestors did the same thing way back when. Only when their ancestors were selling goods, there was a fountain with a horse statue located in the middle of The Square. People would park their horse-pulled wagons all around it. At that time, the farmers brought more diverse items to sell. Some brought cows and pigs and others sold only apples.

Obviously, The Square has changed quite drastically since then. The latest renovation has taken place within the last two years. The traffic pattern was rerouted, the road and sidewalks were repaved, and a new concrete square emerged.

This postcard shows the Farmers’ Market and The Square in 1939.
(All other photos by Paul Becker.)

Today the Farmers’ Market of Stevens Point has concrete sidewalks to walk on and for the farmers to set up on. In fact, the entire area is concrete with some trees and grass. There are bright yellow canopies above the Market so that it’s very visible and can keep operating even in the rain. This year the Farmers’ Market started in early May and is expected to run to the end of October or Halloween. Most of the farmers sell pumpkins and that will be their last crop of the season. Farmers are selling their produce daily, except for Sunday, with Saturday being the biggest day. Some farmers only come out for Saturday and the best crowds. Theresa Chojnacki has been selling her goods on The Square for about three years. Whereas it used to be a hobby, this business has now become her main source of income. Others, who only sell on Saturday, consider it as a side income.

Flowers are the earliest in season and in May, The Square looks dressed for a parade. Many different types of flowers are sold ranging in all colors of the rainbow. Some flowers are for planting outside and others for indoors.

Also, early in the season, small vegetable plants, such as tomato and green peppers, are sold so that people can start their own garden for the summer.

This year, the season was early in every respect. Everything was approximately two weeks in advance of the normal schedule. The first crops were ready for sale at the beginning of July and the flower sales began early in May.

The end of the season is approaching quickly. The first frost occurred in August which had an adverse effect on the crops. Who knows? Maybe the farmers won’t be out there selling through October!

Because of the restructuring on Highway 10, the traffic through the Market has definitely decreased. Not only is the Market less visible, but it also creates a problem for those people needing to return to Highway 10 West since there is no direct way of getting back on it. Tradition, beauty and economy are good reasons to visit the Farmers’ Market on The Square. Being there and experiencing the tradition gives one a sense of history of the area and promotes a good relationship with the people. Observing the Market can offer pleasure by being able to enjoy the quality produce and breathtaking colors. Economically, the Farmers’ Market is a good buy because of the top quality and fresh produce offered to one and all.
Preston Reed: A clearer perception of reality

by Dan Dietrich Features Editor

He stands on the stage by himself, again. One spotlight,
from above, illuminates a shadow of a lone figure
and the neck of his guitar on the black stage, empha-
sizing the singleness of this per-
former.

His shoulders are hunched, and rise slightly during tough
passages. His head, cocked slightly to the left, looks down,
as if in examination at how his fingers bounce on the neck of the
guitar. The image is one of intense, yet intimate concentra-
tion.

About 6′1″, the performer is dressed in brown pants and a blue
Hawaiian shirt purchased at a Salvation Army store for a
dime.

The performer was acoustic guitarist Preston Reed. The
scene was the Encore last Sat-

Saturday night. Reed, who performed on both
Friday and Saturday, courtesy of the University of Wisconsin-
Platteville department of music, has played guitar since he was eight. In 1973, Reed decided to leave college to see if he could make a living playing his guitar. Currently 31, he makes his living at a job he has four albums released under the Flying Fish label, and travels around the country performing in places similar to the Encore.

The setup in the Encore was quite simple. Preston Reed, sometimes playing a twelvestring, sometimes a six-string, guitar, two microphones, and a small stool that supported three small electronic gadgets. Although the image was simple, the audio generated gave testimony to quite the opposite.

With eyes closed, I guessed at three or four guitars, all rhythmically interacting with one another. This description doesn’t do justice to his sound. His music must be listened to, to be perceived.

Several of the songs, all of which were written and com-
posed by Reed, began with a brief introduction, such as for the beginning of a song. This is about a groundhog that is
tired of being a weather indica-
tor and goes to Hawaii to vege-
tate.”

In popular music, lyricists tell the reader sometimes show what the atmosphere was like what when good-old-Sally-up-an'-left-with-

Bobby-Joe. One becomes accla-
tomized to, and relies on, lyrics through the repetition.

But Reed’s music has no lyr-
ics. At first I had a tough time re-

cognizing the introductions with the
songs because of the lack of verbal direction. But as his
guitar whispered on, and his fingers unsettlingly bounced over the strings, it reminded me of George Winston or other Wind-

ham Hill instrumentalists.

His music acts as a type of release, defining the static that clutters one’s perceptions. It’s something like a mother’s car-

crass on their child’s forehead; an act that somehow minimizes those things that have been maximized and don’t need to be. Reality is clearer after lis-
tening to him.

Reed himself appears to have a clearer perception of reality. In his no-b.h. manner and style, he is casual yet intense, apparently in love with his pro-
tession.

One could assume that when someone leaves society’s accepted norm of going to col-

lege, follows one’s “inner drive,” makes a living by fol-

lowing that drive, gets reviewed in Playboy, s New York’s Vi-

lage Voice, that satisfaction would be imminent. Reed is not.

“If this satisfying? No,” said Reed between sets on Saturday night.”Traveling around like this and doing a set of per-

formances is expensive and tire-

ring.”

“Right now I’m waiting and hoping for this new deal that my manager is working on-

an agent stuff,” he said.

After Reed casually walked to the stage for his final set, I felt like I could associate with him as he beat out a tune on stage by himself, again; hop-

ing for something bigger, bet-

ter. There is something real, re-

spected, unpolished, new and

unheaded about the way he plays.

Travel Service opens at UWSP

The newly opened University Travel Service in the U.C.

by Bonnie Trygell
Staff Reporter

Whether you are planning that long anticipated Caribbean cruise, a trip to Florida for spring break, or perhaps a trip home to Chicago for the holidays, you may not have far to go to make your travel arrangements. In June, construction began on the University Travel Service. Located across from the Corner Market in the University Center, it is now open for business. The new agency's services are available to students, faculty, and the general public.

Owned and operated by Sally and Rick Frederick, University Travel Service acts as an outlet for the Travel Shop located in downtown Stevens Point. The Frederick's have owned the Travel Shop for the past 13 years.

Just why do we have a travel agency at the University Center and how did it all come about? Jerry Lineberger, Assistant Director of the U.C. said, We wanted to provide a service and a convenience to the campus. According to Lineberger, it was Bob Buech, Director of the U.C. who originated the idea and marshalled it through faculty senate last year. Ideas for the travel service were borrowed from UW-Madison's agency, the best of which were implemented here. A copy of their contract was also obtained.

After the idea was approved by faculty senate, bids were given for the travel service from several local and out of state agencies. We're really happy that local folks got it, said Lineberger. They know the needs of the people and the campus.

The University Travel Service should prove to be a financial boon for the U.C. in the future, said Lineberger. First of all, it was built at a minimum expense to the university. It was merely a matter of painting a few walls and putting in a door, said Lineberger. We provide the office space and they will bring in their own people, computers and furniture.

The university is guaranteed one percent of the agency's net sales or $1,000 per month, whichever amount is greater. This money will help defray expenses that otherwise we would not be recovering, said Lineberger. It will cover part of the buildings operations, such as general maintenance, and in the long run will hopefully prevent a hike in fees.

One of the conditions in having the University Travel Service is a mandatory ruling requiring all university programs, that is, those involving university monies, to use the service when making all travel arrangements.

The reasoning behind this ruling is mainly one of convenience. Instead of receiving several bills from various agencies, the Purchasing Department will now receive invoices directly from one, supposedly resulting in a less confusing, budget saving operation.

After arrangements have been made, counters deliver the tickets directly to the departments.

Although many students may be unaware that this service exists, Sally Frederick explained that some have already utilized the service. For instance, one group of students is arranging a trip to the Padre Islands. Foreign exchange students do a lot of traveling, and that's why Helen Lim, from Malaysia, is glad that he and his friends can get special prices on a group flight to Asia.

Traveling reservations through the service can be arranged on any mode of transportation, from plane and bus to train and ship. Many traveling options such as a super saver flight and special group fares, will be available as well. Their prices are guaranteed to be the lowest, said Sally. If lower fares are found elsewhere, we will refund the difference. In the future, the Fredericks will be adding passport picture taking to their list of services.

The University Travel Service will be open from 9:00 a.m. to 1:00 p.m. Monday through Friday. Hours are from 8:00 a.m. to 5:00 p.m. Any calls made when the University Travel Service is closed will ring at the Travel Shop downtown.

CATHOLIC STUDENTS

NEWMAN UNIVERSITY PARISH is a Catholic community for students, faculty, staff and interested persons of UW-Stevens Point.

Newman University Parish has its source and center in being a worshipping community.

CATHOLIC MASS SCHEDULE

Saturday 4:00 P.M.
Sunday 10:15 A.M.
Sunday 6:00 P.M.

All weekend Masses are celebrated at the St. Joseph Convent Chapel, 1300 Maria Drive. Everyone welcome.

Weekday Masses are celebrated in the Oratory in Newman Center, Fourth and Reserve. For weekday Mass schedule inquire at Newman Office.

NEWMAN CATHOLIC STUDENT CENTER OFFICE: Fourth and Reserve (across from Berg Gym, next to Pray/Sims).

Office Hours: 9:00-12:00 Noon
1:00-5:00 P.M.

Phone: 345-6500

Program Opportunities:
- Inquiry Classes for Catholics and non-Catholics
- Pre-marriage seminars
- Retreats
- Bible Study
- Peer Ministry - Students ministering to students
- Small growth groups
- Counseling in Spiritual and Faith growth

LONG SWEET DREAMS
WHAT GOES ON!

by Jon R. Phe
Staff Reporter

You know, I think the guy who said, "The more things change, the more they stay the same," must have been talking about rock'n'roll. Think about it. In the past, whenever rock'n'roll got stagnant, it always relied on its immediate predecessor to nourish its rebirth. Way long ago, in an era known as the Sixties, rock'n'roll fed on folk music. It turned out okay, as anyone who remembers Bob Dylan and the Byrds can tell you.

Today, rock'n'roll has dined on a diet of folk-influenced artists like Dylan and the Byrds to fortify itself. Mainstream rock has even picked this up, and you can hear its echoes on top-40 stations.

Also, in the past, rock'n'roll trends in America have been found throughout the world, from the Beatles across the sea to Europe, European rockers eager to break into their American records and spout out their faithful reproduction.

It's this spirit that Sweden's Playmates present Long Sweet Dreams. This is not however, plagiarism; I mean, let's face it, truly original ideas only exist in abundance in a white and, most "original ideas," are usually sincere imitations of something else.

Sincerity is what this disk is all about. These guys sincerely put all the recognizable elements of folk rock into their album. Soft bass lines and light percussion supply the steady but gentle pulse. Acoustic and 12-string guitars lead coupled with tambourines and harmonicas provide the jangle and jangle. The two and three part harmonies provide the lift. Finally, the echoing production provides the depth.

If you haven't glanced already by the title of the album, most of the songs are heartfelt ballads about growing up and losing one's innocence. The song titles italicize, "Remember," "Days After Tomorrow," and "Wanted Years." Songs like these, about actual people and actual feelings, are a lot more believable than MTV video stars complaining about how hard it was to sacrifice their innocence for major recording contracts, or Bryan Adams singing about the bad trip he had at 16 years of age and covering with his band "...in the summer of '84."

This LP is one likable piece of petroleum by-product. The music is played sincerely, the lyrics are sung sincerely; heck, on the flip-cover, these guys even look off to the horizon sincerely. But, it gets to be a bit much. After a while, sincerity can be boring. If you keep haring nobody's going to believe you're sincere.

This band has a good sound and good intentions, but even this can become a cliché. On the other hand, this album, with its wittily jangling tunes and good lyrics, if you need a lift from severe funk.

It is my hope that this talent-ed group can on subsequent albums find different sounds and themes to play with. I mean that sincerely.
UPCOMING MINICOURSES
AND TOURNEYS

Monday, Sept. 8 - Friday, Nov. 21

FALL FISHING CONTEST
Great prizes for the top 2 heaviest fish in 5 categories: Walleye, Northern, Small Mouth Bass, Perch & Crappie. Weigh in fresh fish at Recreational Services.

Sunday, Sept. 14, 21, 28; Oct. 5, 12, 6:00-9:00 P.M.
KAYAK MINICOURSE SERIES
Course is a basic pool session with individual instruction on strokes, eskimo roll, safety & equipment. 15 max. to each session. Located at the UWSP Pool. All equipment provided. Cost $1.00. Meet at the pool.

Sunday, Sept. 21 - 10:30-4:00
SUNSET LAKE FUNDAY
Learn how to sail, windsurf, kayak and canoe from our instructors. Cost $4.00 - equipment & transportation provided.

WE ALSO HAVE NEW BIKES
Check out our men’s & women’s . . .

Pipeline 1
For years, the Peugeot Pipeline has been a popular way to get around town or to the beach. It is classy yet sturdy with its elegant mountain bike frame geometry. Its aluminum tires provide the easy ride of a lightweight bicycle and its stainless steel spokes provide adequate protection against corrosion. The extra wide saddle and foam handlebar provide the much needed comfort for such a recreational bicycle. A ladies version is also available.

For more information call:
Located in the Lower University Center

One of the hardworking vendors you may meet at the Farmers’ Market on the Town Square.
Right now is peak season for vegetables, but better hurry—cold weather is moving in fast.

QUESTION #1

WHAT IS THE RIGHT CHOICE FOR MOST COLLEGE STUDENTS?

a) AT&T—for everyday discounts of 40% to over 50% off weekday rates on out-of-state calls.

b) Short bursts of intense study followed by hours of frantic partying.

c) AT&T—for exceptional value and high quality service.

d) AT&T—for collect, third-party and operator-assisted long distance calls.

e) Any class that does not conflict with “The Love Connection.”

If you picked A, C and D, you’re destined for great things.
Like AT&T Long Distance Service. AT&T offers so many terrific values. Like a 40% to over 50% discount off our day rate on night, evening, and weekend out-of-state calls.
Imagine what you’ll do with the money you could save.
Imagine what your parents would do if they found out.
Of course, you can count on AT&T for clear long distance connections anywhere you call. And AT&T gives you immediate credit for wrong numbers.
To find out more about why you should choose AT&T, give us a call.
And if you picked B and E, call anyone. You could probably use someone to talk to.
Call toll-free today, at 1 800 222-0300.

AT&T
The right choice.
DOMINO’S PIZZA WELCOMES BACK UW-POINT STUDENTS

Even today, there are still a few students who don’t have an HP calculator.

That’s because there are better than 2500 software packages available for them—more than for any other calculator.

There’s even a special plug-in software package (we call it the Advantage Module) that’s designed to handle the specific problems an engineering student has to solve in his, or her, course work.

No wonder professionals in engineering and the physical sciences widely regard HP calculators as the best you can get.

So check one out. Then, when your mother calls to ask if you’re getting enough sleep, you won’t have to lie.

By the way, if you want more information, just give us a call at 800-FOR-HPPC. Ask for Dept. 658C.

Jehovah's Witnesses aim for one-on-one conversation

by Dan Dietrich
Features Editor

It's with skepticism that I talk with religious people standing on sidewalks. They seldom seem excessively practical or reasonable. Religion requires faith, and Webster defines faith as being "an unquestioning belief in something." An unquestioning manner of believing does not always lend itself to reason, from my perspective.

We walked past members of the local Jehovah's Witnesses congregation on the sidewalk outside the University Center. But then it occurred to me that my skepticism was based on my own "unquestioning belief" that religious people on sidewalks would be unreasonable.

Interested in understanding what it was that they wanted me to understand, I began talking with two members of the local congregation: Karen and Andy. The outcome was surprising.

This is not a "How I came to know God through the Jeho­" va's Witnesses" article. This is simply an attempt to understand what they stand on the sidewalk and what their beliefs are.

Many are religious, but few frequent sidewalks. In contrast, central to Jehovah's Witnesses philosophy is "witnessing," speaking to people one on one about the Bible, believing that all people must witness, and one of the best places to do that is right on the street," said Andy.

"We take the Bible literally," said Karen. "And in the Bible, Jesus commanded that we publicly preach the good news: love one another." Surprisingly, the conversation candidly visited such topics as the accuracy of the Bible, the Gospel of Thomas, homosociality, and why someone who smokes cannot actively worship with other Jehovah's Witnesses (because they are engaged in "defilement of the flesh," said Andy).

Karen and Andy sat on the couch in The Pointer office. Attentive, they anticipated the questions, and not forward when a topic excessively interested them (which must did).

Throughout the discussion, there was little if any judgment that were verbally acknowledged. My questioning of the Bible's historical was not met with a statement of how I was in the express line to hell. As they discussed different topics, they looked intensely for that verse that would add emphasis and support. Seeing it with their minds eye, they paged religiously and vigorously to a book and the Bible.

Finding that verse, there was a degree of elated joy: a confident smile, a resounded book, a more confident posture. Their abilities had been tested, and they had succeeded.

They held the Bible as all people holding Bibles and speaking do: the left hand holds the Bible on its spine, slightly elevated and away from the body; the fingers of the right hand follow the words across the page.

They spoke with a familiar religious rhythm, pausing and emphasizing important passages while raising their eyebrows as if to look at you with them. That rhythm is intoxicating (to me) as the well-practiced voice appears to slow the more meaning and emphasis on rhythm than content. The Bible is their bible, said Andy.

But what about topics not directly addressed in the Bible? What about TV evangelists? Andy was reluctant to answer, because the view would be based on his own personal view, rather than one biblically supported.

"I guess you would need to ask, 'Would Jesus do it that way?'" Andy said. "To do it on a mass scale, that's not doing it correctly: instead you must sit down and talk one-on-one.

As with several religions, their's does not always conform with the philosophy of governments. But according to Andy, they believe that governments and existing authorities "stand placed in their position by God."

"We subject ourselves to that authority, unless it disagrees with our moral teachings," as in the case of serving in the military, said Andy. "No Jeho­va's Witness can fight in a war, because it is a command from Jesus. There are no exceptions.

But although these governments "stand placed in their position by God," Jehovah's Witnesses believe that "actual govern­ments will be physically de­stroyed," said Andy. At that time, "Christ will come, evil will be eradicated, and the earth will be a renewed paradise. There is no 'burning hell.'"

Andy and Karen, who can frequently be seen outside the U.C., held regular jobs, as do the majority of Witnesses, said Karen.

But despite these ties and activities, they attempt to be "no part of this world," said Andy. "We try not to clutter. We try to keep our lives simple, not materialistic."

Interestingly, Karen had curled black hair, tortoiseshell glasses, one inch circular ear­rings, a lace-like shirt, red共建, -shaped mirrored neck­lace, and hosiery. The style was complex, not simple. I questioned her about it.

Andy responded, citing the importance of first impressions, and its particular significance of it given their undertaking. The response, although significant in slight contradiction to their stated philosophy of simplicity, was understandable.

It is, in the midst of a slighter de­gree of skepticism that I walk past religious people on side­walks.

It's with skepticism that I talk with religious people standing on sidewalks. They seldom seem excessively practical or reasonable.

Religion requires faith, and Webster defines faith as being an "unquestioning belief in something." An unquestioning manner of believing does not always lend itself to reason, from my perspective.

All too often the bridge from faith to fanaticism is too easily built. I submit the "religious wars" and TV evangelists as testimo nials.

So it was with skepticism that I walked past members of the local Jehovah's Witnesses congregation on the sidewalk outside the University Center. But then it occurred to me that my skepticism was based on my own "unquestioning belief" that religious people on sidewalks would be unreasonable.

Interested in understanding what it was that they wanted me to understand, I began talking with two members of the local congregation: Karen and Andy. The outcome was surprising.

This is not a "How I came to know God through the Jehovah's Witnesses" article. This is simply an attempt to understand why they stand on the sidewalk and what their beliefs are.

Many are religious, but few frequent sidewalks. In contrast, central to Jehovah's Witness philosophy is "witnessing," speaking to people one on one about the Bible. "We believe that all people must witness, and one of the best places to do this is right on the street," said Andy. "We take the Bible literally.''

Improved hunting awaits fall sportsmen

by Chris Dorsey
Outdoors Editor

"The overall picture for Wis­consin small game hunters looks pretty good this year." said DNR small game wildlife specialist Ed Frank. Hunters, for several reasons, can expect more productive outings this year. Here's a species-by-species forecast of what you can look forward to:

Pheasants: We noted a 55 percent increase in cock pheasants and a 10 percent increase in nesting hens this spring," said Frank. He cautioned, however, that "a 55 percent increase of a small number of birds is still a small number of birds." Because of heavy rains and early snow last fall, roughly 30 percent of the state's corn crop remained unharvested. This prevented the winter of 1986-87 from becoming a disaster for the Wisconsin pheasant hunter. Many pheasants took shelter in the standing corn and simply spent the duration of the winter there. Many cornfields were isolated from other cover areas and didn't attract many predators which was additional incentive for the birds to remain in the corn.

The increase in pheasant numbers in the first time since 1979 that DNR censuses have shown a marked increase in the pheasant population. Wisconsin's flock, however, is a long way from its glory years of the 1960's. Most hunters remember that era as the last time this state had a prolific and plentiful game population. In­creasing agribusiness has since squeezed fencerows, siphoned wetlands and sprayed fields with chemicals on the land.

There has been a reduced pheasant population in some areas and decimated them in others. Wild populations that still remain, have been and will, continue to time be supplemented with penned pheasants raised at the state's game farm near Portage. The latest word from the game farm is that this year's production is on a par or even better than last year's record crop.

Ruffed Grouse: Good news for grouse hunters: "We're hearing optimistic reports from most areas of the state," said Frank. Grouse appear to be climbing out of their 1986-87 tailspin and are likely to be more scarce heard from aspens thickets this fall.

One reason for the improvement was last year's early snowfall. The early snow pre­cured some of the coldiest days of the winter which provided a roosting site that in­cluded them from the bitter cold. The best grouse hunting re­mains in the coulee region of southwestern Wisconsin. Good populations also exist in the central part of the state and hunters will be wise to find mixed-aged aspen stands. Work­ing the thickets along the edges of these stands will likely pro­duce the most flushes.

Hunting Permits

Hunting permits near for applications

by Dave Daniels
DNR Information Officer

SHINELANDER, Wi.—As the days of August fade into the cool autumn—like tempera­tures of September, thoughts of sporting clays and fall sports come to the fore. For many in north central Wiscon­sin, that means hunting, and now the time is proper to prepare for the 1986 hunting permit application deadline.

1. Canada goose hunting Horison Crown or Central Zone; Post­marked no later than September 12 or received by the DNR License Section, Box 970A, Madison, 53701, no later than 4:30 p.m. on that date.

2. Canada goose hunting-Mis­issippi Valley Population (MVP) Zone (counties sur­rounding Horton Zone): No deadline. FREE permit avail­able about September 10.

3. Canada goose hunting-Theresa Zone: Apply in person at DNR Station, Theresa Wild­life Area between 9:00 a.m. and 4:00 p.m. during the 3 days before the goose season or be­tween 9:00 a.m. and 3:00 p.m. throughout the goose season.

Sandhill Wildlife Area deer hunt: Postmarked no later than October 3 or received by DNR, Sandhill Project, Box 156, Bab­cock, 53004, no later than 4:30 p.m. on that date.

Hunters' Choice deer hunting permit: Postmarked no later than October 3 or received by the DNR License Section, Box 7984, 101 South Webster, Madison, 53707, no later than 4:30 p.m. on that date.

4. Turkey (1987 season): Post­marked no later than October 31 or received by the DNR Lic­ence Section, Box 7984, 101 South Webster, Madison, 53707, no later than 4:30 p.m. on that date.

10. Disabled persons (permit to hunt or shoot from a station­ary automobile): Apply to your local warden at least 10 days before date of use.

11. Pheasant hunting on select properties (includes tags): Ap­ply and receive anytime prior to hunting; available after mid­July.

Hunters can expect best suc­cess in counties near lakes Wis­haws and Michigan. Harvest­ed fields of corn, wheat and oats surrounded by broad fenc­elines are preferred by par­ticipants—successful hunters.

Cottontail Rabbit: Rabbits appear to be suffer­ing from the same acute case of intensified farming that's af­flicted pheasants in past years. Rabbits, like pheasants, have shown a marked decline since the advent of modern farming techniques. Despite the large acreages of corn left standing last winter, rabbits didn't show an upsurge this spring. This trend has biologists like Frank concerned about their fu­ture in Wisconsin. "It use to be," said Frank, "that hunters would expect to find a rabbit in at least 10 percent of the brush piles they picked, that isn't the case anymore." Rabbits will be found in varying numbers throughout the state for the hunters who look for them. Look for the best rabbit hunting along brushy fencerows, stump piles and woodlots carpeted by blackberry brambles.

Squirrels: In a nutshell, increased acorn and walnut production has pro­duced a bumper crop of squirls. Frank explained that Wis­consin squirrels have normally range from abundant to very abundant. They're very abundant this year, says Frank, because of the increased acorn crop. Through August, squirrels have been found throughout Wisconsin, the best hunting remains in the southern two counties. Numerous caches of mature oak, hickory and walnut will yield the most bountiful

Hawks begin annual flight southward

Glen Haven, Wis. — The annual southward migration of hunting hawks, eagles and vultures will highlight weekend activities at Eagle Valley Nature Preserve throughout the fall. Visitors to the preserve will be able to observe from hundreds to thousands of hawks per hour as they migrate overhead. The greatest migration ever docu­mented to date has been over 300,000 hawks per hour during the migration peaks.

Weather: especially wind plays a very important role in regular migrations. If the wind is blowing from the south or southeast the migration may be very strong with just a few birds to day one or two, but when the wind is blowing from the northwest the migration picks up in earnest. It is especially stimulating to observe the migration right as for a wind change during the day.

The public is invited to come and enjoy this fantastic bird watching opportunity. There is a small entrance fee for non­members of Wisconsin Birdes and Breeds. Come take advantage of the opportunity to visit the 350 acres of preserve, watch migrating birds and relax in the peaceful setting.

Each weekend through the season, the cost of which is covered by the en­trance fee, the birders will have the opportunity to visit the 350 acres of preserve, watch migrating birds and relax in the peaceful setting.

Experienced observers are needed to man the hawk tower at the preserve and record the hawk migrations for seven days. Volunteers are needed to stand at least 4 hours a day from mid–September to mid­October. Volunteers will receive refreshments and be offered to the guides for the park.

For more information about the migration and migratory seasons, contact the Nature Pres­erve for more information by calling (608)772-2327.

OUTDOORS

Hunting for pheasants, along with other small game animals, is expected to improve this season. (Photo by C.T. Dorsey)
Ther e is no doubt about it, the success and effectiveness of the Department of Natural Resources rests in great part on the shoulders of its employees. Indeed, our Department strate­
gic plan states that employees "are our single and most valu­
ated asset."

So what should we look for in those hundreds of prospective
employees who approach us for work each year? What attrib­
utes and skills should we, the employer consider important in
making hiring decisions?

In addition, what guidance should we give high school counselors and college instruc­
tors who prepare youth for nat­
ural resources careers? More basically, what should we tell
the young people themselves about natural resource work? What skills will they need and
what values must they have to
be resource managers in the
public arena?

These are important questions
any time of year, but especially
important now as high school
students choose colleges, an col­
ge students select majors and
college instructors plan the
next school year's course con­
tent.

Given the trends affecting our
work and the course we have
charted for the future, it is safe
to say that department em­
ployees will need a wider range
of skills than might have been
the case in the past. And while
we clearly will need scientists,
researchers, specialists and
managers competent in special­
ized fields, competence in a
narrowly defined discipline
won't be enough.

So, recognizing the impor­
tance of employee recruiting and selection, what should we
look for in candidates?

1. Our employees must be ser­
vice-oriented. "We serve the
people of the state, treating
them as we would wish to be
-treated ourselves," reads
DNR's philosophy. A philosophy
of service and an attitude of
helpfulness are critical and
should be deeply held by pro­
spective employees.

2. Our employees need periph­
eral vision. They need to reject
narrow, short-sighted and paroch­
ial views of the natural envi­
ronment. They need to embrace
the ecological truth that "every­
things is linked to everything
celse and practice their craft or
profession accordingly.

3. Our employees must know
how to anticipate problems
within their areas of respon­
sibility and synthesize informa­
tion from numerous sources to
deal with those problems. Cri­
tical thinking is not a high in­
structional priority in our col­
ges. That's too bad, because
both the private and public sec­
tors need people who can cope
with a complex, ever-changing
environment.

4. Our employees must be
creative and be comfortable
-taking initiative. They should
not be afraid to take calculated
risks. These attributes are hard
to find for, yet if we are to be a
flexible, progressive and vi­
brant organization, they are
needed for the future.

5. Our employees must work
well with others—with other em­
ployees and with the people we
serve. Our approach to resource
management requires the shar­
ing of responsibility, authority
and costs. Sharing often means
placing others before yourself
and working as a member of a
team. It means a willingness to
become involved with and
accept the legitimate sugges­
tions of private citizens. Indeed,
in the long run, the state and its
resources might benefit from a
selfless individual pulling to­
together with others than a bril­
liant star who tries to do the
job alone.

There is more to look for, of
_course, and some things you
must always keep in mind: in­
tegrity, quickness, communica­
tions skills, etc. But employees
possessing the five attributes I've
listed will be positioned well for the future.

They are attributes that
should influence the way we se­
lect, review and promote em­
ployees. And they are factors
that should influence the advice
and decisions of high school
and college counselors, curricula de­
development specialists and facul­
ty.

In the long-term, we need the
understanding and support of
high schools and college, where
young people first become inter­
ested in natural resource mat­
ters and where they gain the
knowledge for entry level con­
sideration. We need to tell edu­
cators what we are looking for
and the kinds of individuals we
will hire.

In the short-term, however, I'm asking each of you to help
the department on the road to
the future as we enlist others to
meet a shared challenge. The
message should be clear: As
always, the Department of Nat­
ural Resources needs quality
employees. But the ingredients
that contribute to that quality
are changing. The extent to
which we are recruiters, man­
agers and supervisors are sensi­
tive to those changing ingre­
dients will determine the future
success of our organization.
LET THE CELEBRATION BEGIN!
We'd like to invite you to join us as we celebrate the goodness and greatness of God at Peace Campus Center — Lutheran. Keep your Christian faith alive and strong as the new school year begins.

SUNDAY WORSHIP CELEBRATION: Sunday, Sept. 14, 10:30 a.m.

BIBLE STUDY SUPPER: Wednesday, Sept. 17, 5:30 p.m. (call 345-6510 and let us know you're coming!)

PEACE CAMPUS CENTER — LUTHERAN
Vincent and Maria Drive
(behind Hal’s Grocery Store)
Phone: 345-6510

DNR seeks public input on Weyerhaeuser expansion project

RHINELANDER, WI — An international forest products firm is seeking to expand its operational facilities in Central Wisconsin. The Weyerhaeuser Company has informed the Department of Natural Resources of its plans to add a new production line at its Marshfield Mill for the manufacture of low density particleboard. The ten-million dollar project will produce approximately 8 million square feet of particleboard per year. This approved expansion will include a furnish dryer, a particleboard press, raw material and fuel conveying systems, and various forming and trimming material recovery systems. The expected operating schedule will be 24 hours per day.

The Bureau of Air Management of the Department of Natural Resources has reviewed the project and preliminarily determined that the expansion should meet applicable criteria for permit approval of air emission limits and ambient air standards.

A detailed Environmental Assessment has also been prepared that addresses all aspects of the proposal plan. The assessment concludes that the project would not significantly affect the environment. Therefore, the Department has made a preliminary determination that an environmental impact statement is not required for the proposal. Copies of the Environmental Assessment are available to the public by contacting Joe Ancel, Wisconsin Rapids Air Management Engineer, DNR Area Headquarters, Room 103, 384 Second Avenue South, Wisconsin Rapids, WI 54494, or by calling (715) 423-3970.

Comments from the public are encouraged and should be made to Ancel by Thursday, September 11, 1986.
Experience awaits CNR students

by Bob Cramer
Staff Reporter

With the present budget cuts in most natural resource agencies, it is becoming almost impossible for students to obtain job-related training and experience in their profession. But experience is easy to come by in UWSP's College of Natural Resources. The CNR is home to 14 student organizations which offer experience in different facets of natural resource management, leadership, and many other areas which are valuable for natural resource managers. Students also have the opportunity to meet with and gain extensive knowledge from natural resource professionals who regularly speak at regular meetings.

One organization, The Society of American Foresters (SAF) is an important organization for all forestry students, especially those interested in management and administration. SAF allows students to meet professionals in their field as well as gain practical experience in many areas of forestry, such as fire fighting, pruning and cutting pulp.

The Wildlife Society (TWS) is a must for all wildlife students. It offers excellent experience in many areas of wildlife management. TWS often works with the Wisconsin Department of Natural Resources on many projects throughout the state as well as maintaining a muzzle animal control service.

The Student Society of Arboriculture (SSA) provides excellent experience for many students in urban forestry. Many enjoyable projects are offered such as climbing trees, pruning and numerous field trips.

Wisconsin Parks and Recreation Association (WPRA) offers many opportunities for the student interested in outdoor recreation. WPRA members participate in local park projects, conventions, and several outdoor recreation funders.

Resource Management International (RMI) helps students to learn about natural resource job opportunities and wise use of natural resources throughout the world. They generally import many speakers who have had natural resource work experience in foreign countries.

Environmental Educators and Naturalists Association (EENA) offers its members many opportunities to work with young people in an outdoor setting. Many of their members can be found working at School Reserves and the Central Wisconsin Environmental Station.

Environmental Council works very hard at developing environmental awareness throughout our campus and the state. They are most famous for their 200 mile walk for the eagle held each year.

Isaak Walton League is a group interested in preserving and improving our natural resources. They are privileged to own a parcel of land along the Flower River which includes a shooting range and a very attractive cross-country ski trail.

If you're interested in the conservation of our soil and the many resources which depend on it, then the Soil Conservation Society of America (SCSA) is the organization for you. There are many interesting learning opportunities to be found there.

American Water Resources Association (AWRA) is involved in the advancement of water resources research, planning, development, management, and education."

Fishing Society is a very active group and are commonly found improving trout streams or sponsoring several fishing contests each year.

XI Sigma Pi (Natural Resources Honor Society) is a national organization which recognizes students who have achieved a high standard of scholarship in their field.

TWO groups charged with administering all of these organizations are the CNR Student Advisory Board (STAB) and the CNR Student Senators. STAB works at coordinating the various student organizational events, while the student senators help to allocate funding for many projects these organizations are involved in.

Tonight in the upper Allen Center at 8:00 p.m., STAB is holding a CNR Organization Awareness Night, in which all of these organizations will give an introduction to their group which will be followed by free refreshments and musical entertainment. Anyone interested is welcome to attend.

SAF, AWRA kickoff year

Natural Resources 496 is a very informative course on pulp cutting which is sponsored by the Society of America Foresters. This course allows students to gain hands on experience in common forestry practices.

SAF conducts this course each fall in an effort to increase funding for its many activities. This fall they will be cutting approximately 79 cords of red and jack pine pulp between September 26 and November.

To fulfill the requirements of this one-credit course, a student merely needs to work 2 days (one weekend) and attend mandatory training sessions which will be held September 1 at 1:00 p.m. in the Wright Lounge of the University Center.

Questions may be directed to Todd Thompson at 345-6508 or stop by the SAF office on the third floor of the CNR.

The American Water Resources Association will be holding a meeting on Wednesday, September 17 from 7 p.m. to 9 p.m. The meeting will be in the U.C. Turner Room. There will also be a guest speaker from the water faculty. Everyone is welcome—you don't have to be a Waters major. For more information, contact Bruce Bush at 345-1048

### ENTERING EVENTS

- **Instant Scheduling**
  - Instant scheduling will be used to schedule all events unless a sign-up event is indicated. All intramural events will take place on the days indicated below. Hours are from Monday through Thursday, 3:00 to 8:00 p.m. during the Fall and Spring quarters.

### FACILITIES

- **Outdoor Facilities**
  - There are twelve tennis courts, seven flag football fields, a10rack track, a lacrosse field, a softball diamond, a tennis court, and open play areas. Facilities are open for student use on a first come, first-served basis unless previously reserved. For more information call Conference and Reservations at 346-2467.

- **Aerobic Exercise Sessions**
  - Aerobic exercise sessions are for all University Personnel and students who are interested. Sessions are held in the Fieldhouse and at the University Center.

- **BUILDING PROCEDURES**
  - The Intramural Office is located in the Fieldhouse on the first floor. Facilities are open Monday through Thursday, 3:00 to 8:00 p.m. and Saturday 1:00 to 5:00 p.m. on a space available basis. There is no charge for use, however a fee of $1.00 per person is charged for use. This fee is non-refundable and is used to offset the cost of operation.

- **FACILITIES**
  - **Quaco & Berg Gymnasium**
    - Open recreation facilities are permitted during open deck hours when other activities are not scheduled. A weekly fee of $1.00 per person is charged for use.
  - **Health Enhancement Center**
    - Intramural activities are permitted during open deck hours. Use of weight rooms for strength training is permitted during the open deck hours. Use of weight rooms for normal exercise is not permitted.
  - **Recreational and Tennis Courts**
    - Recreational tennis courts are available for reservation on a first-come, first-served basis. Reservation times are for 21 hours and are arranged through the Recreational Services Office. Call 346-2467 for information.
  - **Archery Range**
    - The Intramural Office is located in the Fieldhouse on the first floor. Facilities are open Monday through Thursday, 3:00 to 8:00 p.m. and Sunday 1:00 to 5:00 p.m. on a space available basis.

- **Recruitment and Tennis Courts**
  - These courts are available for reservation on a first-come, first-served basis. Reservation times are for 21 hours and are arranged through the Recreational Services Office. Call 346-2467 for information.

- **Weight Training Facilities**
  - These weight training facilities are located in the Health Enhancement Center.INTRAMURAL DEK: 103 BERG GYM

**CONGRATULATIONS!!**

Underdog Pointers drop season opener

by Kent Walsstrom

Sports Editor

South Dakota State University, a budding power in the NCAA Division III North Central Conference, used an expulsive running attack while also taking advantage of an inexperienced Pointer offensive line on their way to a 16-7 win Saturday in the season opener for both teams.

The Jackrabbits, whose defensive unit returns nine starters from a year ago, forced five interceptions, several of which halted potential scoring drives for the underdog Pointers deep in SDSU territory.

While the final score seemed to reflect a close game, the statistics denoted.

SDSU's offense churned out 491 total yards, 264 of those coming on the ground. UWSP could do little to slow the performance of freshmen running back Kevin Klappigu, who rushed 37 times for 173 yards, including a seven yard touchdown plunge in the first half.

The Pointers, meanwhile, managed just 54 yards in 25 carries and finished the day with 279 total yards. All-American halfback Mike Christiansen, despite scoring UWSP's only touchdown, failed to gain much steam on the ground and wound up with just 22 yards on 16 carries.

Following a scoreless first quarter, the Pointers took possession after a missed field goal attempt by place kicker K.C. Johnson. They moved 64 yards in seven plays and tied the game with 4:12 remaining in the quarter.

On the next play from scrimmage, Christiansen bolted 16 yards around the left side after taking an option pitch from Dantoin for a touchdown.

SDSU had the final laugh, however, as they put together a 19-play, 83-yard drive for the go-ahead touchdown with 7:30 remaining in the quarter.

"It's always tough to lose a game when you know you had an even chance to win," said LeRoy, referring to the miscues that cost him a loss.

The Pointers, despite struggling against a more than five-to-one defensive advantage, missed an important scoring opportunity midway through the first half.

Starting on their own 31, the Pointers drove 43 yards for a first down at the SDSU six yard line. The drive stalled after passing 26 yards up the middle, was sacked for a six yard loss. A 23-yard field goal try was batted away by an SDSU lineman to make the goal line stand complete.

Jeff Tiefenthaler with a pass good for 31 yards. Wahl then hooked up with light and Steve Schlutte in the end zone on the next play for the touchdown. K.C. Johnson booted the PAT to give the Jackrabbits a 7-6 lead with 1:27 remaining in the half.

The Pointers, held to 68 yards of total offense in the first half, turned the game around in the third quarter by capitalizing on a crucial SDSU mistake.

The Jackrabbits, forced into a fourth down situation, snapped the ball high over the head of punter Jon Felker, who was downed by Pointers Rick Perme and Brent Harder for a 27-yard loss.

"It's still enough to lose a game when you know you had an even chance to win," said LeRoy, referring to the miscues that cost him a loss.

George Cheryl, coach of the Pioneers, senses a bit of game-management being employed here. Platteville gave River Falls one of its toughest games last year before succumbing, 25-14. He sees the situation differently.

"We smack up on some people last year," Cheryl explained. "You don't sneak up on them this year.

"Some coaches look at the season and say, "I'm three plays away from the Rose Bowl, or I'm three plays away from the national championship.'

"That's a lot of baloney. We were four plays away from 9-8 or 9-11. Stoud played us without a quarterback. We were using a wide receiver at quarterback and we were behind at half. Mike Hintz blocked a field goal and then we took it 26 yards for a score. That's how our league is."

"Steven's Point's D.J. LeRoy noted the WSU at one time had an upper echelon and a lower group but he says that's not the case anymore. It's the old "on any given Saturday" cliché now. LeRoy likes River Falls chances, though.

"I can't remember when Mike Farley had a losing team," LeRoy stated. "That's because of the discipline his team has and coaching staff he has. They do things right and don't make any mistakes."

"They're not in our office every day talking about chang­ ing systems. They found a system they like and they keep im­ proving on the same system."

"Superior coach Gil Kremer like River Falls, La Crosse and Stevens Point but said, "There isn't that much difference be­ tween them and anybody else in the league."

"And the reason the league is so balanced is there are hard working, hustling coaches who are all recruiting. They prob­ ably could beat half the NCAA III teams in the country."

"Stout's first-year coach Rich Lawrence said as "new kid on the block he isn't sure what to expect this season", and White­ water coach Bob Berowski doesn't see any frontrunners."

"Oshkosh could be one of the surprise teams," Berowski re­ marked. "Platteville was last year but people expect him (Cheryl) to be a force to be reckoned with this year."

"It's too early to tell on Stout with a new coach, but we know Gil Kremer's background. If you're not ready to play ball week after week, you're going to get beat."

"Wisconsin State University's coach found a system in four non-conference games Saturday with defending NCAA Division II champion La Crosse whipping Winona State, 37-7."

All nine teams see action this week in another round of non­ league action. Defending WSU, River Falls starts its season Saturday at the University of Minnesota-Morris. La Crosse hosts St. Ambrose, which routed Eau Claire, 46-3, last week. Oshkosh raised some eyebrows with a convincing 21-point victory at Ripon. The Titans managed just a 15-point victory over the Redmen a year ago. Platteville launched its season with a 37-13 victory over Loras, while Whitewater was downing Dubuque, 15-4, in Warhawk Sta­ dium."

Stevens Point dropped a 14-7 decision at South Dakota State, Stout lost to Grand Valley (Mich.), 35-9, and Superior bowed to UM-Duluth, 27-4.

St. Ambrose figures to provide La Crosse with more of a test than Winona this week, and Stevens Point faces another dif­ ficult test at Dayton (Ohio). Platteville takes another trip to Dubuque, this time playing the University of Dubuque, while Superior goes to Belmont and Whitewater to Ferris State. Eau Claire returns home to play Winona. Oshkosh hosts Valparaiso and Stout will try to bounce back. Rich Lawrence faces his first victory against Moor­ head at Monmouth. Running backs stole the show Cont. p. 27

The Northwestern Mutual Life Insurance Company is currently taking applications for a campus repre­ sentative.

The individual selected will be involved in our Corporate internship program. For further information contact our Corporate Internship Director at our Stevens Point office 344-3934

SETTLES HELPING STUDENTS
Stevens Point Center 344-2527
Seating changes made in Quandt

by Mike Klauke Staff Reporter

The athletic department hopes to be able to generate an extra $10,000 in reserve seat sales by changing the seating arrangement for men's basketball games this upcoming season.

Clint D. Donley, athletic director, said the seating arrangement would be almost the opposite of last season. The reserve seats, team benches and the scorer's table will be moved to the former student section while the students will get all of the old reserve seating plus the balcony.

The pop hand will no longer be at center court but will instead sit where the visiting team's fans used to sit.

This shift will allow an extra 300 reserve seats to be sold while student seating should stay the same. About 150 reserve tickets have already been sold and interest in tickets is high, according to Amiot. "In the past people didn't buy reserve seats because they were being pushed too far off center court, but hopefully that won't happen this year," said Amiot.

"Visiting fans will be in the farthest, darkest part of the gym, just like we are when we go to their gym," Amiot said.

Come in to the UNIVERSITY STORE and spice it up with a wide variety of posters, stuffed animals, nicknacks, calendars, and items with your school's logo.

Soon it'll be looking just like HOME!

Oshkosh, with six letterwinners back from last year's fourth-place team, also figures to be strong. Coach Deb Ver- couteren expects Mary Towers (senior-Wagner), Maureen Mul- doen (senior-New Holstein) and Cheryl Niederberger (soph.-Ver- ona) to lead the way.

Stout has just two letterwinners back from a team that fin- ished fifth last year. But Coach Lew Klische expects big things from a trio of sophomores: Sue Rahn (Luxembourg), Liz Lund (Greenfield) and Leslie Drall (Green Bay).

Whitewater placed sixth last year but with six letterwinners back is looking to improve. The top runner back for Coach Jef- frey Miller is Theresa Sequest (senior-Beloit), who took 14th last year. Also back are Wendy Walton (soph.-Milwaukee) and Sarah Erdman (junior-Shawano). Schwartz has a new coach in Frank Kurbatsch, who has eve- ryone back from last season's team. Leading the way should be Karen Tullis (Westby), who placed 15th last year.

WWIAC – Athletic Director
Three changes have taken place concerning athletic direc- tors in the WWIAC.

At Superior, Nancy Bradley has replaced Deb Niemisto as the school's women's athletic di- rector. Niemisto remains at Superior as the volleyball coach.

At Eau Claire, Lisa Herb will serve as acting women's athlet- ic director for this year. She is taking over for Marilyn Skrue- neth, who is on leave to pursue her doctorate at the University of Iowa.

At Whitewater, basketball Coach Dianne Jones will serve as acting women's athletic di- rector in place of Marty Van Steenderen, who is on sabbati- cal leave.

WWIAC – New Fall Coaches
The fall seasons will begin with several new coaches at the helm of conference teams.

In cross country, there was just one change as Frank Ku- bratsch has taken over for Shar- on Studek as the coach at Platte- ville.

In volleyball, there were two changes. At Platteville, Kim Pecknold has taken over for Krist- ine Otto, and at River Falls, Vicki Smith has replaced Jen- nifer Gorecki.

There were four coaching changes in tennis. At Madison, Page has replaced David Han. At Whitewater, Sal- ty Somervill has replaced Con- nie O'Neil. At Eau Claire, Ja- net Tomlinson has taken over for Marty Skruevuth, who is pursuing her doctorate degree and is on leave. Also, Kelly Meyers will head the new pro- gram at Platteville.

Football, cont.
In Saturday's opening games, with LaCrosse's Ted Pretlaksky leading the way (13 carries and 116 yards rushing against Winona), the Bluejays beat Winona, 13-0.

Oshkosh's Mark Matake, a sophomore from Green Bay Preps, led the Titans with 120 yards rushing against Winona, including an 85-yard touchdown run.

Oshkosh's Mark Matake, a sophomore from Green Bay Preps, led the Titans with 120 yards rushing against Winona, including an 85-yard touchdown run.

Oshkosh's Mark Matake, a sophomore from Green Bay Preps, led the Titans with 120 yards rushing against Winona, including an 85-yard touchdown run.

The POINTER would like to introduce freshman Kyle White as our student cartoonist.

Kyle, who says he is inspired by "The Far Side" would like to go into professional cartooning and illustration of children's books.

Waldo and the Pordnorskis are strictly fictional characters created by the author. Any similarity to any actual person, living or dead, is purely coincidental.

The easiest puzzle you'll ever solve.

ACTROSS
1 & 4: What 18-year-old guys have to register with? (2 words)
7: Installs of 1 and 4 across.
9: As a fad—like Selective Service registration.
11: Selective Service is a draft.
12: You must register within a month of your birthday.

DOWN
2: Which 18-year-old guys have to register?
3: What you broke if you're in prison—as in Selective Service registration? (2 words)
5: With Selective Service
6: Not difficult—like Selective Service registration.
8: Where you register—the office.
10: How long registration takes—minutes.

If you're a guy about to turn 18, you need to know the answers to this puzzle. Don't worry, it's easy. Within a month of your 18th birthday, you must register with Selective Service. Just go to the post office and fill out a card.

That's all there is to it.

Register with Selective Service. It's Quick. It's Easy. And it's the Law.

Presented as a public service message by the Selective Service System.

PERSONALS

Nelson Hall, get revved up for a great year! We are the movers and shakers. First jam is the Corn Roast September 18. Nelson Hall Staff Services following.

Welcome back students!!! A.C.T. hopes you had involved with A.C.T.'s numerous volunteer activities this semester. So fire up and stop by soon.

Hey all you Education 100 tutors volunteers! Don't forget about the school sign up taking place between 1:00 - 2:00 p.m. in the Wisconsin Room on the University Center on Monday, September 19. Don't forget to come on over and sign up! Sponsored by A.C.T.

Hey Mr. Big Budge — My summer was great, thanks for asking. What did you think of the All Hall Wed. night? I didn't see you...I'd love to have my ears cuddled on. Take it easy and keep in touch! You know where.

Craig — WOW, WOW, WOW

Hey Daddy-o's...You're invited to join the hippest, grooviest campus TV station around. Give SETV a call at 346-3088. The "Win It" Guy

Get into the A.C.T. student Association for Community Tasks can offer you, as a volunteer, several opportunities to gain experience in your fields of interest, be of service to the community and have fun. Our General Meeting will be held on Wednesday, September 27, at 6:30 p.m. in the Wisconsin Room of the U.C. Refreshments will be served. Hope to see you there.

1st Floor Ladies: Friday at 4:30 is our time to escape to the Sentry happy hour. Be there.

Laura

To: All the Mamas and the Papas: It's been a while since we sang together. What's the matter...Thyme got your tongue? Keep on dreaming—California style of course! Mama Cass

Welcome back students! Just because summer has come to an end doesn't mean the bus has to stop. So stop by and see what we can offer at the A.C.T. office.

Don't pick your nose in public...but do get involved with SETV. Call us at 346-3088.

Ladies of 3 North Thomson: These two weeks have been fun, it's gonna be a great year! You are Marvelous! Becky

To my Big Brothers and Best Buddies of Hyer Hall, I hope this year is everything you wish for and more! Good luck! Love, Mark

Do your friends call you Mr. Graphic Artist? SETV is looking for experienced and interested artists! Stop down in Room 111 in the Communications Building.

To 3 West Thomson Hall Women: Thanks for making the first week easy. Hope you have a great year and enjoy yourself while you're in Thomson. Have a great weekend! Your friend - Rhonda S.

Biology Faculty/Student Picnic will be held Thursday, Sept. 18 from 5 - 7 p.m. at Schumack Reserve Shelterhouse. Sign up by Monday, Sept. 15 in the Biology Departmental office, Rm 118 CNR. We hope to see a lot of new faces!

Hey Happy Staff of Thomson Hall...We love you and hope you have a great year! But raw gotta go...tons of hugs, Becky & Rhonda

Deb & Sue: Training was awesome as elephants! You were Marvelous. Thanks for all you time and support. We love ya. Becky & Rhonda

To my Big Brothers and Best Buddies of Hyer Hall, I hope

“THIS IS A DEFINITE PLUS FOR YOUR RESUME!”

Renée Babia is a senior marketing major at UWSP. She’s also a telemarketer for Sentry’s new Payback car insurance policy that rewards people who don’t drink and drive.

“This is a chance to work for a really good company — a definite plus for your resume. And, no matter what field you’re in, I think it trains you to think faster and get better at communicating.

You’ll probably make more money at this than at a lot of other jobs students have. You get a nice hourly wage plus bonuses, $3 per hour wage for appointments so you can make 5 to 6 dollars an hour.

“I also like what the Payback policy is about. Something that helps prevent drunk driving is important — a good idea. And here you’re not doing the selling, but you’re trying to tell people about the idea — trying to set appointments for sales agents.”

To find out more about getting a great job like Renée’s, you can meet with Sentry representatives Sept. 18, 10, noon to 3:30 p.m. Call Career Services to set an appointment. 346-3106, or stop at 134 Old Main.

Sentry Insurance

ACTIVE OR INACTIVE?

For legal and practical reasons, student organizations need to be re-recognized each Fall to maintain formal recognition status. To complete the re-recognition process, the following is required:

1) A list of current officers with addresses and phone numbers;
2) An Advisor Agreement form (forms are available in the Campus Activities Office) which your advisor needs to sign, stating that he/she will advise your group;
3) Attendance at one of three re-recognition meetings scheduled through the Campus Activities Office (PRESENCE GROUP).

Services will be provided to your group until the above process has been completed. Please re-register, AS SOON AS POSSIBLE, in the Campus Activities Office, University Center.

Groups not re-recognized by Friday, September 19, will have their organization names appear under the INACTIVE SECTION of the Student Organization Listing. PLEASE VISIT CAMPUS ACTIVITIES ROOM 17 if YOUR GROUP IS TO REMAIN ACTIVE!
A Piece A Pizza Aplenty

When you need to appease a pizza appetite, how many pieces a pizza are appropriate? It depends on the portion proportions of the pizza.

If it's Rocky Rococo Pan Style Pizza—thick, crunchy, chewy, cheesy, saucy Pan Style Pizza—a piece a person, in other words, a piece a piece is probably appropriate.

That's why Rocky Rococo Pan Style Pizza is available by the slice. That satisfying sizeable (1/2 lb.) single serving size.

Whether you come call at our counter or drive through our Drive-Thru, The Slice is untailingy fresh, fast and filling; a luscious lightninglike lunch; always available almost instantly.

So, when you need to appease a pizza appetite, appease it appropriately.

With a Slice of Rocky Rococo Pan Style Pizza. A piece a piece appealingly and appropriately proportioned so that a piece a pizza a piece is pizza aplenty.
