Lions convention conflicts with commencement

by Greg Pederson

The Lions Club is having its state convention in Stevens Point May 14th, causing conflicts with UWSP's May 17th commencement date.

The Lions' convention runs from the 14th through the 15th. All hotels and motels within a 100 mile radius are booked for the weekend. This causes conflicts with parents coming to Stevens Point to see their daughters and sons graduate.

In the past, many parents would come to Point on Saturday and stay in a motel overnight. Such a problem has never occurred before because the state Lions convention has never been held in Stevens Point. This year however, it was set up by a new bureau, the Convention and Visitors Bureau, which handles most conventions and conferences in the central Wisconsin area.

The problem is unavoidable and has to be dealt with. There are many possible proposals to solve the problem. One is to move commencement back to May 10th. This would require students to take final exams after graduation. Another possibility is to leave the time unchanged and expect parents to drive to Stevens Point the morning of commencement. Still another proposal is to move the ROTC and Albertson receptions up an hour, thus pushing graduation back to 3:00 p.m.

Senator David Helbach to speak at SGA Senate meeting

by Debbie Kellem

State Senator David Helbach is stated to speak at tonight's Student Government Association Senate meeting. 7:30 p.m. in the University Center Wright Lounge.

Helbach will preview "Choices," a videotape distributed by the Wisconsin Association of Manufacturers and Commerce. The pro-business video has caused controversy because of the claims it makes about the amount of money Wisconsin spends on education.

"What the association is trying to do is that there should be reductions in the monies that go toward higher education," said Lisa Thie, SGA President.

They feel this will result in reductions in property and income taxes. They judge high taxes to be one reason we don't have thriving business in Wisconsin, why businesses are folding and people are leaving the state.

SAGA's "Choose" directs its attention specifically to spending in the university system, many of the figures used are misleading, and the matter of where the money we spend comes from is overlooked.

According to a statement made by Kenneth Shaw, President of the University of Wisconsin System, only 3.6 percent of the total budget of the UW System comes from state tax dollars. Most of the budget is from other sources such as student fees and tuition, donations by alumni associations and foundations, and self-supporting operations such as dormitories, student unions and athletic events.

Thiel said she expects Helbach to refute some of the claims made in "Choices," as well as to urge students to become informed about the issue. "If students don't get involved, we'll ultimately be telling the legislators that we don't care if they cut spending that goes to education, we don't care if they raise our tuition. Right now, out of 127 legislators, 123 are up for re-election. If we don't let them know what we feel, if we sit here with a dawning silence, the decision will be made for us," Thiel stressed.

Thiel anticipates that Helbach will also make a plea to students to exercise their right to vote. "The governor has directed this week Voter Registration and Higher Education Awareness Week," she stated. Along with this, United Council and student governments across the state are trying to register as many students as possible, get them informed about the issues and get them to take a unified stand saying that they don't want tuition increased.

Steiner memorial fund aims at $50,000

by Dan Dieトリch

The UWSP Foundation hopes to raise $50,000 for the Robert Steiner Memorial Scholarship Fund, said Karen English, acting director of the UWSP Foundation.

Current donations have raised only $15,000 has been amounted.

The family has challenged us to raise $25,000," said Engelhard. "If we reach that amount, the family will match it.

Interest from a $50,000 endowment will be used to establish two scholarships, said English.

"One $2,000 scholarship will go to a current Sigma Tau Gamma member, and one additional scholarship will go to a Health Promotion/Wellness major," said English.

The scholarship was established at Steiner's memorial service on June 20th.

Steiner and UWSP student Robert Booth had completed a 1,000 miles of their planned 1,500 mile cross-country road trip in May. Their cause was to raise money to help the victims of a Japanese earthquake.

Contributions are being received by the UWSP Foundation. Old Main Building.

For further information contact Karen English at 368-3811.
Leaders: Who needs to see them?

There seems to be a hang-up on "leadership" at UWSP. There are leadership seminars, dinners, even a leadership camp. We have a corps of close-knit leaders who are obvious and well-defined.

I've always been suspicious of leaders. They're usually just too good for me. They plan their days in neat little schedules, slicing time to fit their lives like pieces of cake. They always have clear and well-defined goals. Leaders say: "This is what I want and this is what I'm going to go out and get." Just like that. Leaders have purpose, definition, strength, meaning, and aim.

And they always want to help. Why not? After all, the rest of us are lazy, weak souls without the strength and inner drive to make ourselves happy. We wander aimlessly, blind to all the great purpose in the world, caught up and befuddled by all the lazy pleasures like alcohol and television. We need someone to guide us, to show us the way. Leaders obviously know the way. It is why they are leaders.

I still don't trust them. Perhaps it is the military that I can't get out of my mind, the general or sergeant who I see lurking behind every leader. Generals have it easy. They feel like saying "go" and everyone goes. It is a leader's dream to have everyone do exactly as they want. It is my nightmare.

But I think it is mainly a leader's ego that bothers me. Leaders, we are led to believe, are to be respected. They have some way or someway better than the rest. They have the strength or purpose or the organization or the power to get something done that no one else can. They are better.

But really they aren't. They may be better organized or richer or whatever, but they obviously aren't better people. They are not the elite. In fact, they, of all people, should work hardest not to be.

Someone good once said: "The best leaders are those who remain unseen." I like that. Leaders shouldn't be seen unless they are obviously doing something to help the rest of us. Remember, we elect them. Leaders aren't better people, just better at some things—usually organization. As soon as they believe they should be respected or admired they cease to be leaders.

What I'm beginning to see on campus is a tight group of elite leaders. Organization presidents who go to camp together. RA's who stick with other RA's. In short, leaders who feel different from the rest, who feel they are better people than the rest.

I'm sure there are good intentions within the group. Organization leaders especially can use help when starting out—and budget would be nearly impossible to work without help (except possibly in the Accountants Club). But still, campus leaders are told they are elite, that they should be looked up to and admired. So, many leaders wander campus telling themselves they have a responsibility to change others, that they are special.

That is wrong. I question an open rebellion to remedy the situation. Anarchy has its faults. Perhaps if leaders better understood their situation, their rights and responsibilities, perhaps then they might change. Perhaps if they understood that they are no different from the rest.

Students consume such a large amount of alcohol that it is almost impossible to function. These people need medical assistance, and those who are brought to the Student Health Center. When the student goes to the Student Health Center, the counselor will need to know the student's limits and behavior such as referring to student conduct.

Another option is a friend's referral, which involves expressing concern for the person, relating details of the person's drinking behavior, telling the person how you fell during the incident, and finally, making a referral if appropriate. The friend's referral is a very caring, emotional way of letting the person know you are concerned about their drinking habits. Whipple explained.

After the confrontation, if the person feels the problem is big enough, the person can come in and talk to Whipple. "We ask the friend about the incident, and we ask them to help us, in helping the person. They can also talk to the person. Both the friend may be able to give important information the person knows about alcohol use especially if the person is blacking out. Based on this we can recommend whether they go through the assessment or not," Whipple said.

The assessment itself is very complete. It is composed of five written assessments and an oral interview. If a person is determined to need help, the center will either get the person to their facility or refer them elsewhere.

The assessment and group treatment are handled on campus by Alcohol Assessment Process Outlined.

by Greg Pederson News Editor

A group of friends went out one Friday night to have a good time. One of the members of the group was a lot more than his friends should have. His friends bought him back to their hall and put him to bed, where he passed out. The door was closed as his friends left, and would not be opened for three more days, causing the members of the group to believe that the student was dead. However, the student was able to awaken and walk into the Student Health Center the next day.

One underlying reason for the caring, emotional way of letting the person know you are concerned about their drinking habits is that we lost two students due to alcohol consumption of alcohol. This combination leads to problems down the road in the future. One of the members of the dracula's club was able to give information on the student. The student is given a set of options, which one may be to go through the alcohol assessment process.

Representatives from the Women's Resource Center, Student Conduct, Protective Services, and the Portage County Sheriff's Department are meeting to discuss the procedure for handling cases of sexual assault on the UWSP campus. Deb Anstatt of the Sexual Assault Victim Services Board of Portage County chaired the meeting.

Anstatt cited three major problems involved in the issue of sexual assault on this campus. First, "If somebody is not telling us about sexual assault in a college campus, it is a crime we don't like to talk about. The statistics are not good, so we don't know how large a problem it is. Second, there is no reporting of sexual assault. Third, it is mandatory that we report sexual assault." Anstatt cited the need for information on how sexual assault should be handled on the UWSP campus. She explained the need for information to be presented to all students, so they know how it will be handled before such a situation arises, has become a top priority for all those concerned.

The university is not separate from the society we live in. We are not interested in stopping any civil law enforcement," said Robert Nicholson, Director of Student Conduct.

Protective Services, Student Conduct, the Department of Public Safety, and the University Police Department all agree on the immediate need for a uniform policy on how sexual assaults should be handled on the UWSP campus. The need for this information to be presented to all students, so they know how it will be handled before such a situation arises, has become a top priority for all those concerned.

Immediate need for campus sexual assault policy debated.

Toward a World of Learning and Understanding

by Trudy Stewart
Staff Reporter

What's bothering most UWSP students today is the ethical problem of the decay of values inherent to our educational system. At least that was the majority consensus from interviews conducted with five nontraditional students about college and ethics. Although the problems were stated differently, most were rooted in the belief that the university system, as well as the student body, are failing to provide viable solutions to many of the problems that have arisen as our society hurst itself into the future.

The first student interviewed was Wolfgang S., a junior majoring in chemistry. He did not hesitate to name chemistry as the source of greatest ethical concern on campus. As an example, he cited incidents where students shared the laboratory results of others to avoid doing the assignments themselves. But he real concern is concerned with the consequences of cheating, a sin that has become a valuable survival skill geared toward preparation for the job market. Like in business, where before including side tips and taking the ideas of others are used to get ahead.

"It's quite a competitive sport in which the best grades translate into the best future. The temptation to cut corners and earn a profit! A competitive sport in which the best grades translate into the best future. The temptation to cut corners and earn a profit!"

Wolfgang replied, "No. I've never been tempted to cheat. I've always been a competitive sport in which the best grades translate into the best future. The temptation to cut corners and earn a profit!"

The second interviewee, Ron L., felt that there is no such thing as a "cheating student." A theatre arts education major in his junior year, Ron did perceive some lesser problems, the foremost of which is the assimilation of different ethnic groups into the university system.

"When foreign students come to UWSP, they segregate themselves culturally," he said. "They are here to study, not to help in their own countries, then they return home. They study business, computers or the sciences. Little effort is made to encourage interaction among the cultures."

Ron was aware of organizations such as the international Club and the Foreign Student Office which attempt to address this issue, but wished more could be done to promote greater communication. "Perhaps the general degree requirements for courses in non-Western cultures will generate interest in students to mingle with students from places like Taiwan, Costa Rica and Algeria. But most of all, more students have to get involved," he concluded.

In the opinion of Anne M., a senior, "There is no such thing as a "cheating student." A theatre arts education major in his junior year, Ron did perceive some lesser problems, the foremost of which is the assimilation of different ethnic groups into the university system.

"The students are here to study, not to help in their own countries, then they return home. They study business, computers or the sciences. Little effort is made to encourage interaction among the cultures."

Ron was aware of organizations such as the international Club and the Foreign Student Office which attempt to address this issue, but wished more could be done to promote greater communication. "Perhaps the general degree requirements for courses in non-Western cultures will generate interest in students to mingle with students from places like Taiwan, Costa Rica and Algeria. But most of all, more students have to get involved," he concluded.

"Students are trying to do what is expected of them: to get good grades, not to cheat. They're just following the rules." They're just following the rules.

In conclusion.

Toxic waste issue at a standstill

No progress has been made to resolve the toxic and hazardous material that is being stored in the UWSP campus since the Presser last reported on this issue August 31, said Al Kursevski Monday. "I'm waiting to hear from Mike Schmidt," said Kursevski of the UWSP Risk Management Office. "He's supposed to contact me sometime this week - at least that's my understanding."

A June 23 Stevens Point Journal article cited Kursevski as saying that the toxic waste at UWSP is stored in the chemistry stock room.

Commencement, cont.

The proposal that is leading this list of possibilities is that of offering parents a room in the Residence Halls. Lisa Thiel, a student in the College of Business, said that parents arranged to have rooms located in Residence Halls. Lisa Thiel, of Stevens Point, said that parents are here to be trained for jobs, not to be educated. There is an overall trend to simply grade-uprate, to take in and spit back. They take a test, then, a week later, can't remember anything from it. They remain ignorant, and in this case, ignorance is not bliss."

He cited the earth of new inventions and innovations as an indication of the problem. "People are just changing what's been done before and making things smaller or bigger, not developing new ways to use them. Inventive genius is stagnant. There's a lack of progress. Philosophy and politics are in a rut, and all goes back to kindergartner-please the teacher, get a star. Now it's please the professor, get a degree."

One possibility Dan saw for improving the quality of education would be to leave the job training to the technical schools. Another would be to de-commercialize colleges and universities but only are departments expected to operate on a profit basis, such as the arts, they are supposed to earn a profit! A third solution, more easily put into action now, would be to institute smaller classes, restructure the graduation procedure and reduce the professors," he said.

you realize that some students here don't even know how to balance a checkbook? In college, they should not be allowed to declare a major as they go, instead, they should be required to take general information courses, then, be encouraged to declare their major in an area of interest, not where the largest salary can be earned."

A senior studying psychology, Dan said, that the primary problem is the lack of real learning in what passes for education. "Students are here to be trained for jobs, not to be educated. There is an overall trend to simply grade-uprate, to take in and spit back. They take a test, then, a week later, can't remember anything from it. They remain ignorant, and in this case, ignorance is not bliss."

Tips on protecting bicycles offered by Protective Services

by Deb Meyer

Your bicycle represents a way of life you can't afford to lose in today's expensive and energy-conscious world. Yet each year students, faculty, staff and visitors at UWSP lose thousands of dollars worth of property to bicycle thieves. In almost all of these thefts, the single contributing factor was the manner in which the bicycles were locked. The sad fact is that many of the thefts could have been prevented had the owners known how to properly secure their property. This article has been written in response to this "need to know" and provides some valuable tips on how you can prevent a bicycle theft.

CHOOSING A LOCK- Don't be fooled by manufacturer's claims of a "burglar proof lock," it doesn't exist. There is no lock that can withstand a forcible attack for any length of time. The most ingenious locking device is still only a deterrent. Resistance to cutting or forcing is directly proportional to the thickness of the padlock, shackles, cable, or chain. And thus the cost. Remember, you get what you pay for. So buy the very best you can afford.

Your bicycle represents a value to you of at least $7/16-inch hardened alloy steel. If the steel is hardened, the word "hardened" will be stamped on the shackle. Hardening makes the steel more difficult to cut with bolt cutters. If more security is desired, a lock with a larger shackle can be purchased. Choose a padlock with a live pin tumbler and a double locking mechanism for the heel of the lock.

CHOOSING A CABLE OR CHAIN- Either one will give you the ability to securely secure your bike as long as it remains from the front and back wheels simultaneously to a fixed object. Neither however, will give adequate protection if locking in strength.

If you choose a chain, get the heaviest one you can comfortably carry. A chain using 5/8-inch diameter hardened alloy steel is the best choice. Examine the chain for welded link construction. A snapped or twisted link chain can easily be defeated by opening a link with a spreading tool.

For maximum security, buy a chain that is not hardened all the way through. Sometimes it is possible to break a 5/8 -inch hardened chain with a hammer blow. With a nonhardened inner core, breaking the chain with a hammer or cutting it with bolt cutters is made difficult while the hardened outer jacket still protects the chain from the hacksaw. If you choose a cable, inspect it closely. A vinyl coating may "magnify" the ineradicable, making it appear stronger than it really is. Check the cable to insure that the loop clamps are not crimped around the vinyl coating. The clamps should be crimped to bare cable. If it isn't, the clamp can be heated causing the vinyl to melt beneath it, loosening the clamp and allowing the loop to be opened.

As with chains, cables should be as thick as possible. A cable of 3/4-inch diameter or greater provides excellent protection. Smaller cables can easily be defeated by wire cutters.

HOW TO LOCK YOUR BIKE- The best lock and chain are useless unless you USE them: Always try to anchor both wheels, as close to the frame as possible, with your chain or cable to a fixed object. Make sure the bike cannot be taken by merely lifting the object. Position the lock as high off the ground as you can. It will be harder for the thief to slide around some portion of the bike and the handlebars to meet your support. This will reduce the likelihood of the lock being smashed or prised off and makes it much more difficult to cut off with a bolt cutter.

Park your bike where there is a high degree of pedestrian traffic - thieves don't like crowds. At night, choose a well lighted area in which to secure your bike.

INSURANCE - The best looking devices are NOT an absolute guarantee against a determined thief. While care in locking gives a high degree of protection, insurance is still a

Protective Services reports campus incidents

Thursday, September 18
At 3:34 a.m. a UW officer observed tailights kicked out on four vehicles parked in lot Q. The victims were notified of the damage to their vehicles in the morning. Total estimate of vandalism was not known.

At 5:54 p.m. a student reported that her purse was taken from off of her backpack when she left the backpack unattended in a classroom for a short period of time at the Fine Arts Building. Loss was estimated at $100.

At 11:01 p.m. another resident of Thomson Hall reported she was harassed by a male on campus approximately one day ago. The victim decided to report the incident after a female who was followed about campus by this individual last semester encouraged her to do so.

At 7:09 p.m. a male student reported his bicycle taken from the south door of the Allen Center between 11:30 a.m. and 12:15 p.m. The bicycle was recovered at the time. It was a men's orange Schwinn ten-speed. Value approximately $250.

Thursday, September 18
At 5:54 p.m. a student reported the theft of her watch while she was in the Dance Studio at the LRC. The victim had left the watch unattended in the best room. Loss was $20.

At 5:54 p.m. the last fire drill to be conducted this semester in a resident hall was completed. At 11:04 p.m. a report of a male having been in the Quadri Women's Locker Room, Phys. Ed., watching those showering was received. This has reportedly occurred on several occasions. The incident that occurred this date was reported several hours after occurring.

At 11:07 p.m. a report was received of a female student that had been assaulted. Investigation revealed that the victim had been struck by a male known to her during a verbal confrontation which occurred in the Debit Circle.

Friday, September 19
At 10:35 p.m. a staff member of Neale Hall reported that a window at Neale was kicked in by a group of individuals who then fled to Hansen Hall. Investigation of the incident continues. Estimated damage was unknown at this time.

Saturday, September 20
At 11:38 p.m. a complaint was received that three males were harassing women in Steiner Hall. The individuals had been escorted from the hall by staff, and were attempting to re-enter the hall. A description of the individuals was given. No identification had been obtained. No one matching the description was located.

Who's in the Dark?

To the Editor:

The Athletic Department's recent decision to change the reserved seating arrangement in Quandt Gym is preposterous! Not only does it reduce the so-called "student section," but it spreads it around like stars on a clear night. What I mean by the so-called student section is just that, so-called. In the years that I've attended basketball games, the students have never had a pure section to themselves (and the west center section of bleachers are appropriate for our needs). It is always shared with everyone from the ages of 1 to 101, and in most cases with fans from the opposing team. Granted, you would not know this from your seat, but you're hearing about it now.

Take a much closer look to what this means to us, the students. We are the ones that make up this institution, and what it stands for. May I also remind you that it is the students, both athletes and supporters that make up the backbone of the athletic department. It means a lot to us students to be able to congregate in a large section and cheer on our team. By moving us around you're taking away our fan enthusiasm.

Does making an extra buck mean that much to the Athletic Department? If this is the case, then you can count me (and I'm sure I'm not alone) out. I'll stay home and listen to the games on the radio (maybe). See where your loyal student fans cheer from then.

James Brown

To the Editor:

The lack of vocal support and encouragement from the fans was pitiful. If anyone is interested, we will be at the top of the south end of the stadium next week and for every home game. Let's show the rest of the people in the stands what a real fan is like.

Show support for the Pointers.
North Watson

To the Editor:

Our wing attended the first UWSP home football game on Saturday, September 25. We all agreed it had been the most boring game any of us had ever attended. Not because of lack of excitement in the game, it was an action-packed game. The problem was the major lack of participation by the "DEAD-BEAT" crowd. They didn't even sit on their butts with their fingers up their noses. They showed absolutely no interest in the game. The biggest reaction from the crowd came when the cheerleaders threw little plastic footballs onto the stands.

We tried our best to fire up the team and the crowd by screaming encouragement. If anyone who was at the game would know, we wore the real fans, sitting at the top part of the stadium on the south end.

By the fourth quarter, we finally got the cheerleaders down to our end of the stadium, where they would be appreciated. After the game we went down to talk with them and they thanked us for our support and we thanked them for the job that they do. We also asked them to print the cheer in the Pointer so we could all learn them.

The lack of vocal support and encouragement from the fans is pitiful. If anyone is interested, we will be at the top of the south end of the stadium next week and for every home game. Let's show the rest of the people in the stands what a real fan is like.

Show support for the Pointers.
North Watson

To the Editor:

We, the men of the far south section, would like to invite all interested personnel to join us in the far south section of the home side of Goette Field. We realize that football is a sport that is damaging to a fan's mental health. Hoping that one person can beat the life out of the next guy is a dangerous attitude.

We also realize that it is too late for us. If you have the same type of problem, don't hesitate to come on up to the far south section to cheer on the Pointers. No Deadbeats Allowed.

The Men of the Far South Section

To the Editor:

This November 4th is the day in which the voting population of Wisconsin elects our local, state, and federal representatives. Consisting of approximately 9,886 students - the majority of which are voting-age or older - the UWSP student population takes up a considerable chunk of the local, state, and federal districts of the area. But due to a more or less apathetic student body, our representatives on every level of government seem to be politically unresponsive to the interests of students. Beware underclassmen, our tuition will go up at least $200 in each of the next two years, with no cap in sight. Heads up Pointers, we will lose approximately $3.3 billion in federal financial aid in the next year alone, with cuts in everything from GSB's to work-study.

Blue jeans—Survivors in the turbulent theater of attire

by Dan Dieterich
Features Editor

It's a volatile market, that world of fashionable attire. New clothing styles are ushered in like children at a Sunday matinee. Some leave before seated; others find good without being seen. And still others leave, only to be ushered back in, only to leave again. But among these one-legged trends there is an adult, a grandfather if you will. He has sat in the theater of attire for more than 130 years.

"He's Levi's," the authentic, the originator, the classic blue jeans in the blue jean market.

Somewhere in the eight miles of hallways in Paris' Louvre, Levi's are displayed. The Smithsonian Institution has one. Calvin Klein, Jordache, and Levi's are displayed. The Four "ol American males have claimed them, calling them "classic Americans." Even Webster's recognizes Levi's, defining them as "light-fitting trousers of blue denim; blue jeans."

Although Levi's may be synonymous with blue jeans, there have been others. "Blue jean" characters have been ushered in (like Lees and Wrangler's) and it appears as if some (like the Ginger jeans) have purchased their way into the turbulent theater of attire.

Today there are more than 200 brands of jeans. Annual sales total more than $8 billion. It is little wonder why Willie Nelson and J.R. have their own lines. They appear in "The Four" as Vogue magazines refer to them: Gloria Vanderbil, Calvin Klein, Designer and Jean Sasson. But despite the hoopla, designer jeans have never claimed more than 10 percent of the market.

Despite more than 200 brands of blue jeans, Levi's are the originals — the classics.

Levi's have. They deserve a look.

It was Levi Strauss, a German immigrant who "invested" in jeans. In 1853 Strauss went to California with rolls of canvas. He intended to sell tents and sell them to gold prospectors. But when an old miner told him "You should've brought pants," because ordinary trousers didn't hold up in the digging, Strauss changed his plans.

He took his rolls of canvas to a tailor who made them into trousers. Strauss called them by their lot number 501.

Near the end of the 1850s, Strauss switched to a cotton material that was imported in Nurne, France. The fabric was known as serge de nimes — a fabric that dangles from an ear ring will make them look handsome or matro; a stud will make them a stud, if you will. When in doubt, wear a pair of jeans, two figures come to mind: Brutus, the swashbuckler of the "Popeye" cartoon, and Mr. Clean. Handsome? Maybe, if you're Olive Oil or Mrs. Clean. Instead of looking like a bedsock, most guys with pierced ears look like cheese-cake.

No other observation I've perceived held so clear an ear piercing is "Jeet" and reflects the taste, mood and tone of society. As I see it, fashion is a power- ing wave of influence and imitation. While no one wants to be passive to fashion, it is important that one becomes a victim of fashion. A man who wears an earring that dangles from his ear like some out-of-season Christmas-tree ornament is definitely a victim of his own needs.

The third reason why men pierce their ears may be the most ironic of all. I honestly believe that some men pierce their ears in an attempt to be one of the guys. Real men don't wear earrings. Just think about it. An earring makes a man "one of the guys." That's like a woman shaving her face in an attempt to be "one of the girls."

by Brenda Berglin
Staff Reporter

"How do you like it?" a friend of mine asked me the other day. "It was a diamond stud in his right earlobe." "Pretty sharp," I boasted. "It it beaming grinning from ear to ear is important that no one becomes a victim of fashion. A man who wears an earring that dangles from his ear like some out-of-season Christmas-tree ornament is definitely a victim of his own needs.

Daniel and Mario Perez grew up together, lived in the same house for many years, and had times together, like all brothers.

When Daniel came to the United States to get an education, Mario decided to stay home, in Nicaragua, to fight for the Sandinista cause.

Mario was shot and killed last week in Nicaragua.

Daniel, a UWSP student, still doesn't know who is responsible for Mario's death.

As the Sandinista government bracres a wider with the U.S. government, the Sandinistas known as contras, the Nicaraguans are concerned with more mundane matters: how to find food and clothing.

Daniel said he is uncertain what is really going on in his country. "All I know is what my friends tell me in letters. Most of them are happy with the revolution, but patience is wearing thin for many others."

The cost of living is ten times today what it was when the Sandinistas came to power in 1979. In the last six months alone, Daniel said, inflation has climbed 300 percent.

"It's really hard to say what the future holds in store because this problem has been going on for so many years," Daniel said. "I don't think the U.S. is going to stop helping the contras. I feel thought the contra's are fighting for democracy. The contras are inside the country trying to boycott the Nicaraguan economy. They can't win militarily; the U.S. is trying to defeat us economically."

Daniel feels many Americans don't get much information about the revolution. "I know there are a lot of people inter­ ested in knowing about Nicaragua, about Central America, South America, what's going on in all over the world. I've been talking to people and they ask, 'Who are the Sandinistas? What are they fighting for? Who are the freedom fighters? Will those people be killed? What is going on? Will they be killed? Who is going on?'"

Terrorism: Keeping it all in perspective

by Dan Dieterich

Terrorism. It's in the headlines, again. Americans are avoiding travel abroad. The following statistics are not presented to deter the subject of terrorism, but to put its impact in perspective.

- 3500 killed in terrorist attacks (1985)
- 750 killed in automobile and airplane accidents (1988)
- 327 killed in automobile accidents in Nicaragua from Jan. 1 to Sept. 21, 1986
- 23,000 automobile accidents in the U.S. (1986)
- 3,000 murdered in New York City (1986)
- 1,093 killed in boating accidents (1986)
- 180 died in their own bath (1984)
- 3,100 died choking on food (1984)

Understanding Jack Nicholson

UFS plans double feature

by Ed Trepy Staff Reporter

Last week, the Pointer ran an article about student film societies. In that article, Jeff Heine was quoted as saying that he didn’t know how to make University Film Society more appealing. Well, this isn’t exactly true.

As a former president of University Film Society, I am well aware of how frustrating it can be to get people interested in films. But Jeff Heine and UFS are not just sitting back and complaining about poor attendance at many of their films.

Tonight is the last night of a Jack Nicholson double feature with "Easy Rider" (1969) showing at 9 p.m. and "Five Easy Pieces" (1970) at 9:15. "Easy Rider" was Nicholson’s first big movie. Even though he only had a supporting role, he stole every scene he was in. "Five Easy Pieces" is one of the first big movies in which he starred. It’s a must see, just for the famous chicken salad speech.

"Easy Rider" and "Five Easy Pieces" are required viewing for anyone that wants to understand Jack Nicholson’s career. As Jeff Heine said, "Everybody knows of him now," Cont. p. 19

The new Datavue 25 portable computer system makes going back to school easier than ever. Because now the powerful Datavue 25 is on sale to students for over 65% off. Just $550 buys you a complete 12 lb., IBM-compatible system with 1,280 words; a full sized 80 x 25 line display, built-in 7” floppy disk drive, serial and printer port. Datavue 25 comes ready to run packages like 1-3 Wordstar, MultiMate, D.H.A.S.E. II and Ill, Flight Simulator, and many others.

All this makes Datavue 25 a cinch for report writing, research organisation, programming practice…heck, even the most difficult of class assignments, if only after a tough day of class.

Lights out this fall. Pick up Datavue 25 before school begins and save a bundle.

Find out more about this powerful, affordable portable computer today. See the Datavue 25 on display at Academic computing, Room 10, Learner, Renovations Center, University of Wisconsin, Stevens' Tower, Stevens' Point, 915 9481. (715) 346-3229

"Stand By Me" is a nostalgic look at childhood friendship in 1959. The plot concerns four 15- year-old boys who go on an expedition to find a dead body. This two day excursion starts out as a lot of fun, but they do a lot of growing up by the time they get home.

The gang consists of four stereotypes: the obnoxious fat kid, the cool, tough punk from the wrong side of the tracks, the oddball with troubles at home and the smart kid who should know better than to hang around with kids like this.

"Stand By Me" has some genuinely good moments. The movie shines in scenes where the four lads are biking through the woods. As the narrator Richard Dreyfuss says, the boys talked about everything that seemed important before they discovered girls. Things like the debate whether Mighty Mouse could beat up Superman.

Director Rob Reiner succeeds in creating a few good emotion­al scenes. Reiner has taken a big shift in his style of movies. After seeing Reiner's "The Sure Thing," it is easy to see how he would do an emotional film about growing up. It is hard to believe this movie comes from the same man who gave us the rockumentary "This Is Spinal Tap." Reiner gets good perform­ances out of all four of the boys. The dialogue is very believable. The actors work well together, especially the smart kid and the punk (Will Wheaton and River Phoenix). Reiner does a good job of shooting to comic relief when things get too serious.

"Stand By Me" does its flaws. There are several flash­back scenes of the bigger movie, but the film is too long. The boys areayed by a gang of kids that could have walked off the set of "Happy Days." There is a campfire story that distracts from the flow of the movie. And the narration by Dreyfuss doesn't seem to fit the movie. He sounds more like the "I-know-when-that-happens" character of Christopher Guest on "Saturday Night Live."

On the whole, Reiner delivers a charming, if flawed, movie. If he continues in this vein, we can expect more heartfelt looks at the simple, meaningful things in life.

Movie reviews: Explaining the rating

by Andrew Beischer
Staff Reporter

I rate movies on a four-star basis. For this system to have justification, I submit my critique.

When I see a movie I react at a gut level as to whether I liked it or not. Then I compare it to the movies I have seen in the past to come up with a star rating.

Let me run through the list with examples to show where I am coming from.

No stars. This is a real stinker. No plot, acting, or directing. Example: "Missing in Action II."

One star. Similar to no stars, but some redeeming quality of the film would cause me to give it a star. Example: "Portnoy's Revenge."

Two stars. I equate two stars to a TV movie. It isn't bad, but it could be better coming from Hollywood with a big budget. Example: "Endless Love.

Three stars. This type of movie leaves me feeling good. I feel I got my money's worth. I was entertained. Examples: "Ferry's Bueller's Day Off."

Four stars. Just plain great. Thoroughly entertaining with good direction, acting, and writing. That distinguishes this from a three-star affair is consistency. A three-star movie will lapse at times, whereas a four-star film delivers without fail. Examples: classics like "The Seventh Seal," "Vertigo," "Midnight Cowboy" or more recently "Annie Hall" and "Kiss of the Spider Woman."

Jack Nicholson
Cont. from p. 9

but this is how he got started. They know the star of the '50s and they don't know the actor of the '80s. Film Society thought there would be a great interest in Nicholson's early work because of his big box office draw now.

Jack Nicholson is one of this country's finest actors. As Mike Nicho­lson, who directed Nicholson in "Heartburn" (1986), said, "There is James Cagney, Spencer Tracy, Humphrey Breg­gart, and Henry Fonda. After that, who is there but Jack Nic­holson?" Ray Leub Kirshkri, who directed Nicholson in "The Shining" (1980), said that he brings to a role the one unact­urable quality — great intelligence.

The intelligence and ambition of Jack Nicholson can be seen in the fact that he has written several movies and has directed two: "Drive, His Said" (1971) and "Goin' South" (1978). He also hopes to direct other movies that are currently too busy working with director "Mad Max."

On an adaptation of John Updike's "The Witches of Eastwick" in which he plays the devil.

Jack Nicholson was far from his first. He made his first movie in 1968 with a starring role in Roger Corman's "The Cry-Baby Killer."

But after that, his career went somewhere. He took acting classes between attempts at getting work when he could. It wasn't until 11 years later that he would receive the recognition the role he was given with "Easy Rider."

Two other Roger Corman films he made during this time were low budget films that were shot in three days or less. One of these films is "The Little Shop of Horrors," a comedy from 1960 in which Nicholas is a small part as a masochist who dies on dental instruments. He also played a motorcycle trip. "Easy Bi­rider" was another film in which the hippie movement and the drug culture were so strong that it was probably responsible for a great deal of the popularity of the film because he plays the sort of character that a middle­class audience can identify with.

Nicholson also plays a disillu­sioned middle-class character in "Drive Easy" (1984). In this film, he plays a promising musician from a well-to-do fam­i­ly which he chooses to break away from. The movie is a good example of the thin line between liberty and irresponsi­bility. Instead of following in his parents' footsteps and becoming a musician, he becomes a part­time all-rougser and a full-time drug user.

Both "Easy Rider" and "Five Easy Pieces" represent the spirit of the '60s and a large part of Jack Nicholson's philo­sophical philosophy. He complains that people only seem interested in getting a job and making man­ey. He also warns of corporate conglomerations and sees them as destroying individuality. He sees everything becoming one big ugly conglomerate, and no one seems interested in fighting against it. "If we're not ca­tion of idealists who fight against these things, I guess it's because we don't understand what it's costing us anymore," he said in Rolling Stone interview.

"Easy Rider" and "Five Easy Pieces" are two of the best movies of the late '60s and early '70s, with one of the best actors of our time. Both movies will be shown tonight (9/25) in the UCB-PRT with "Easy Rider" at 7:00 and "Five Easy Pieces" at 9:15. Admission is only $2.00 for both films. If you like Jack Nicholson, don't miss this one.

Special thanks to Jeff Fields, student of University Film Society.
LawnDale: "Beyond Barbecue"
on SST records

by Jon Pilk
Staff Reporter

Hey Hodads and 'Nochicks! Grab your boards and catch a wave! Let's do some twirlin' daddy~ to the swingin' sounds o' what? Oh, Hrrrrmph, I'm sorry, I just got lost in an episo de of "Gidget." Onto this week's Album Spot-Lite. With all the 60s style music being revived, it's sure refresh ing to see that someone remember ed to salvage a couple of old woodys from the scrap heap. That's right folks, from out of the wilds of suburban California comes the swingin', surfin' gui tarist of "LawnDale." One look at the album credits should tell you what you're in for: guitars, guitars, and drums. Yup, a whole album of surf guitar in strumentals. The LP, "Beyond Barbecue," is an endless summer of tunes, like "The Days of Pup and Tan." And one can only guess what inspired these looks to write, "The Story of Vanna White." This disc has its even wilder moments, too. "Interstellar Car avan" somehow manages to steal from both early Pink Floyd and Duke Ellington. Don't ask me how, it just does. I realize it's hard to be totally original with this type of music, but, "The Grotto," sounds just a little too much like that classic Venture's big, "Walk Don't Run." These nuts however, are just crazy enough to let this small indiesnation pass. Let's just hope the lawyers do too. Their most inspired musical quote occurs in the song "Alta Boy Luther." It's dedicated to Luther Heggs, Don Knotts character in that cinema classic, "The Ghost and Mr. Chick en." If you've seen this master piece (by far Knotts' best screen appearance, right up there with "Mr. Limpette"), you'll immediately recognize LawnDale's use of the sound track score. This is one album guaranteed to keep you warm during those long Wisconsin winters. Don Knotts, Vanna White, grottoes, interstellar caravans, pups and tacos. How do you sum a record like this? How about using the band's own motto: "Some things are just beyond words."

---

Rock and Roll Time Tunnel show and display to visit UWSP

New Release

Imagine yourself in a large concert hall. The lights dim, the crowd breathes...the show is about to begin. Bill Haley opens up with a rave-up rendition of that old favorite, "Rock Around the Clock." Suddenly, Elvis Presley appears crooning the classic "Heartbeat Hotel." And then, Little Richard is singing "Tutti Frutti." Sound anything like an early Live Aid? Not quite. But it is The Rock and Roll Time Tunnel.

Kodak Film and UAB will be presenting the show on September 29 at 8, 9 and 10 p.m. in the U.C. Esmore.

The Rock and Roll Time Tunnel is a Salute to the 1950s rock and roll era. Using film and video clips, the show chronicles the history of rock and roll from its earliest roots in the '40s through the current trends. Using laser disc technology, photos and other promotional materials, each separate image will be projected onto a 6 by 24 foot screen.

The show was conceived and produced in Los Angeles by the Museum of Rock Art. Hundreds of film and video images were amassed to put the show together.

Kodak's Film Division (a sponsor of Live Aid) first became involved with the Time Tunnel show in 1985 when they decided to sponsor the contemporary rock perspective show in the college market. Through Brian Winthrop International, a promotion and booking agency, an 8-date college tour was implemented for Fall 1986 and Spring 1987.

In addition to the show and promotional materials, each campus also displays, for one week, the Kodak Rock and Roll Time Tunnel Photo Exhibit. It is a 35-panel display which features photos and posters from artists in the show, including a 3-page Rock Roll Time Tunnel program. This display will be in the U.C. Conference on September 29.

The Time Tunnel made its college debut at the University of Maine, where 1,300 students attended for four shows. Attendance has averaged 850 students per campus.

After performances at such campuses as M.I.T., Michigan State, Southern Illinois University, and Princeton, Kodak decided to send the show to Daytona Beach for Spring Break. For three weeks this March, thousands of students in Daytona sought sun and fun by day, and Kodak's Rock and Roll Time Tunnel by night.

New, the show is back on tour on campus, including an additional 45 dates to the 1987 tour. Admission for the show is free.

Business Is Life
(Mind Your Own Business)

We all got together one night and someone had this bright idea. "Hey," he said, "why don't we have a business section?"

"We cheered and bought him another beer. It was the beginning.

So the next day we went out, got our stock together and damned if we didn't have a boring business section. It looked like the end of that idea.

Then one of those "guy" people said "well what are our goals for this business section?" We ignored him, not liking the "goal" people because they make everything we never get done too obvious.

But we did wonder exactly what a business section did, and what we wanted ours to do. It looked like the end of the business section.

Then someone said, "Let's write about grades." We weren't sure what grades had to do with business but we were too lazy to think of anything else so we went with that.

And we realized that grades had a lot to do with business. In fact, we thought, just about everything has a business aspect. Is life! We could write better because we had something to go with.

So that's our business section. Business is Life. (Actually, money is life, but this isn't called the "money section.").

by Bernie Bloksie Senior Editor

It is difficult to discuss grades without bias. If they're good, fine—well, not, that's where the arguments usually start.

But businesses do use grades when hiring, and they have plenty of good reasons for doing so. Grades are, as John Zach in Career Services points out, the only judgement that can be quantified on a number system. That is grades alone can specifically judge an applicant. Grades say: "He was in the top 20 percent of his class," or "Her A in biology makes her better in biology than the other applicants." Grades indicate hard work and dedication. But grades are also easiest to see, easiest to identify, and easiest to judge, so they are often the first step in the job application process. Past experiences, while important, takes time to evaluate. Grades are right there, one number, that's it.

Perhaps that is why there is so little apprehension over them. (I personally began to lose hair during a particularly bad grade semester.) Grades have such overriding power. An F is an F, no excuses. In business, a bad grade can be like a lifelong brand.

But that isn't exactly the way businesses see them. Grades, like any single characteristic, present an incomplete picture. is no accounting says nothing about writing ability or enthusiasm.

Employers routinely try to get a complete picture of who they are hiring. Thus, grades only play a part in the whole job scheme—a part that can change with employer and how it is presented. And of course every employer looks for different things. Grades may lead one job, but they aren't the end. Many businesses don't look at grades, treating grades as a screening device. But after that, future employers are really only interested in work experience.

So what does all this add up to? Grades are very important, if you're going into a technical field. However, you need more than grades in most cases to get a job.

grades are also easiest to see, easiest to identify, and easiest to judge, so they are often the first step in the job application process. Past experiences, while important, takes time to evaluate. Grades are right there, one number, that's it.

Notice, though, that nothing is absolute. Different employers impose different things. One employer may not hire anyone with a high GPA simply because theirs was low. Grade importance can also hinge on demand, which fluctuates. If an employer has many applicants to choose from they can afford to place more value on grades.

Still, a low GPA should be offset with something else—say, valuable experience. Balance is the key. Even high grades can be "wasting without the brain." A 4.0 with no experience can also lose one a job.

Of course there is always the choice of not putting a low GPA in the application at all, but, more often than not this would be a stupid move. The employer sees an obvious blank spot, and even though they may not have been concerned about grades before, it would become a question to them after.

Graduate school is a different story for obvious reasons. Low undergraduate grades are a good indicator that graduate grades won't be high either.

There is a great deal of controversy among students talking about grades. Employers aren't going to hire you because you got the best possible worker, while grades are often important in the decision, they aren't everything (except in those cases where the company uses them to screen applicants). Which brings an obvious conclusion: Grades aren't important everywhere, but worth the effort. They may lose you one job, but alone they won't lose you all (unless you apply enough). And by the same token, they can mean the difference between two grades (all information was taken from John Zach and Larry Walters in Career Services. Thanks).

Do Grades Matter Out There?

by Mike Klanske

Staff Reporter

How important are grades? The "real world" likes to tell us grades are important, but when you apply for a job grades don't often seem to matter. After all, how many of your grades appear in the paper with a grade point requirement stated? "Help wanted" sections seem much more interested in experience than grades.

Amy Halaska, a 1985 business graduate, landed a job as a saleswoman with Russ Berry and Company with a grade point of under 3.00. She said that many companies she interviewed with never even asked about her grades. What she cared about was that fact that she graduated from college and that she had business experience on campus.

Halaska said, "Burroughs and IBM cared about grade point more than consumer product companies like Revlon." She went on to say that the more technical the product was, the more the company was interested in grades.

In general, however, that grades may become more important because of all the college graduates hitting the work force. She feels that some companies are going to use grades as an initial screening process. It should be noted that many companies do use grades as an initial screening device to cut down interviewing costs. "If a college graduate has over a 3.00 feel that with hard work they will be able to fill a job," stated Halaska. Halaska sent over 200 resumes and had 14 interviews before she chose Russ Berry.

Big Bagels (some people call him the world's greatest mile­ man) states in his book, "The Secret of Closing the Sale" that grades are only as important as a graduate makes them. If he or she can show the employer that they will put in as much work as they will be paid, the employer will not care about grades.

Robert Taylor, a district agent from Northwestern Mu­ tual Life, pointed out that grades usually only matter in getting the first job. After that, future employers are really only interested in work experience.

So what does all this add up to? Grades are very important, if you're going into a technical field. However, you need more than grades in most cases to get a job.

Halaska's advice about getting grades is a 3.00 is advised. If you have lower than that you will probably have to work a little harder to land that first job.

UWSP Personnel Activities

UWSP Newsletter

Herbert Sandmann, art, is exhibiting 27 paintings in the Lincoln Center Gallery, located in the Portage County Commission on Aging's Lincoln Center, through September.

Ryan Kim, communication, has been re-elected president of the Korean American Communications Association (KACA) to serve another term for 1986-87. The re-election was made at a meeting held in Chicago.

Lee Barres, English, wrote an article on the current situation concerning censorship to be published in the fall issue of Spectrum.

He is also presenting the keynote address on the role of the humanities in criticizing, conserving and reinforcing the values of this society, at a conference in the Wisconsin English Journal.

Jim Missey, English, delivered a paper on "Orwell's Politics in Homage to Catalonia" at a conference on the Spanish Civil War, held at Siena College.

Don Dietrich, history, has reviewed two books for the journal History of European Ideas. The books are Gunther Birerd Gimel's Judenleben in Deutschland, 1783-1945 and John H. Hess's Vom Uberleben: Wie ein Weltbild entstand Antihistoriography.

Tom Ryan, business/economics, was selected as one of 26 American educators to attend the annual meeting and seminars of the Society of Chartered Property and Casualty Underwriters which will be held in Atlanta, September 30 to October 1.

Cleanliness, carefullness key to preventing parasite

Wisconsin residents who handle wild animals can take a few simple precautions to protect themselves against a raccoon parasite that can infect people, advises the Department of Natural Resources Bureau of Wildlife Management.

Baylisascaris is a roundworm that lives in a raccoon's intestinal tract. The eggs are in the raccoon's body in the manure or feces. When people accidentally eat these eggs, they can get a Baylisascaris infection. After the ingested eggs hatch, the larvae move throughout the body, damaging tissues as they travel.

Human health risk

"We don't want to alarm the public, however, we do want to make them aware of this parasite," says Sue Marcquenski, DNR fish and wildlife project assistant.

The raccoon has been a parasite of raccoons for a long time, but biologists have only recently discovered its ability to cause disease in people.

With the aid of Wisconsin Trappers Association members, DNR staff examined 213 raccoon livers from 62 counties and found that 31 percent of the raccoons had Baylisascaris eggs.

"The parasite is present throughout Wisconsin and its occurrence appears to be related to the density of raccoons in the state," Marcquenski says.

About 77 percent of the raccoons in southern counties carry the roundworm, while 18 percent of raccoons from northern counties were infected.

The worm infected young raccoons more often than adult ones.

Symptoms associated with Baylisascaris infections include weight loss, lethargy, nausea, lack of coordination and vision impairment.

Lyme disease: Sportsmen not out of the woods yet

"The health risk could be minimized if people realize that the eggs are present in raccoon scat, and the eggs must develop for 30 days in the environment before they can infect people or other wildlife," Marcquenski explains.

Specific precautions include not leaving scat or liquid manure to leave their scat. Often, raccoons will establish latrines and oddball openings, such as holes in lawns. You should remove any accumulation of raccoon feces and burn it, plus disinfect the area with boiling water and Lysol. Wear disposable gloves and a mask when you burn large amounts of dried scat.

Hunters, trappers and wildlife managers should wear gloves when processing animals because the worm's eggs can be attached to the animal's fur. Clean up and disinfect work areas daily to prevent any egg buildup.

When you skin a raccoon, any Baylisascaris present in the raccoon's intestine have not reached the stage where they can infect people.

"But if you leave some of this material in the skin, or you accidentally eat these eggs, you may get a disease," Marcquenski says. Now, treatment includes laser surgery to remove worms from the eyes. There is no drug available to treat worms present in other organs or tissues.

Nearly 80 percent of Wisconsin raccoons are infected with Baylisascaris roundworms. The parasite has prompted health officials to issue precautionary warnings.

"find out what is attracting the animals and to remove it. People are told to store garbage in a garbage or shed, and place bird feeders in an area inaccessible to raccoons.

Currently, Purdue University is doing research to develop a diagnostic blood test to identify if a person has been exposed to Baylisascaris. Marcquenski says. Now, treatment includes laser surgery to remove worms from the eyes. There is no drug available to treat worms present in other organs or tissues.

DNR invites public to hawk watch

Press Release

MADISON, WI - Fall in Wisconsin offers more than scenic drives through multi-colored hardwood forests. Look above the trees if you're near the Lake Michigan shoreline or the Wisconsin River, and chances are you'll see birds that are good that you'll be able to observe hawks and other birds of prey in their fall migration.

Bioscience from the Department of Natural Resources Bureau of Endangered Resources invites you to join them Saturday, October 11, 9 a.m. to 4 p.m., watching birds of prey migrate south for the winter.

Staff members will be at Wisconsin State Park, located at the confluence of the Mississippi and Wisconsin rivers near Prairie du Chien, and at Harrington Beach State Park, located seven miles south of Port Washington on Lake Michigan.

For novice hawk watchers, don't worry about your untutored eye being unable to discriminate among different species. The Bureau's biologists will be on hand to answer questions and help identify birds.

They recommend you bring a pair of binoculars, a picnic lunch, and a field guide to help identify birds. A birds of prey handout is available for those people who don't have field guides.

If the weather is good, observers will be able to see a variety of hawks and other raptors, according to Bill Smith, biologist for the Bureau of Endangered Resources.

Many birds of prey are reluctant to cross large bodies of water, which results in the birds of northern Wisconsin and Michigan's Upper Peninsula moving south along the Lake Michigan shoreline.

The Mississippi River is a corridor for birds coming from Minnesota, Wisconsin and Canada's lake region. Updrafts from the steep bluffs along the river aid the hawks' soaring flight. In southern Wisconsin, the Mississippi River is the only wooded corridor amid large "oceans" of open fields.

During mid to late September you might see sharp-shinned, broad-winged Cooper's, red-tailed and immature Northern harrier hawks, American kestrels, merlins, peregrine falcons, osprey and turkey vultures.

In October you might see migrating sharp-shinned Cooper's, Northern harrier and red-tailed hawks, goshawks, American kestrels, peregrine falcons and turkey vultures. Bald and golden eagles, and red-shouldered and rough-winged swallows usually are among the last to migrate, moving in largest numbers during November.

The DNR's Bureau of Endangered Resources sponsors the event.
Season's end
Fall colors appear

by Dave Maddux
DNR Information Officer

Every fall, the weather triggers changes in summer fishing patterns, bird migrations and even brought twinges of fall color for woodland hikers.

The Door/Keewauna vacation area, fishing pressure has dropped considerably. A few perch were taken at the new bridge in Sturgeon Bay, at the shipyard and off the island near the mouth of the Menominee River caught salmon and trout. Leaf color is about 40 percent in the area. Recent rains spawmed a nice crop of fall漫usquin. The Spread Eagle Chain of Lakes is producing panfish.

lander MADISON, WI - The record site for a pink salmon caught in Wisconsin waters has been tied by Tim Krajnik of Manistee.

Krajnik pulled the fourth-pound, seven-ounce salmon from Lake Michigan late in August. It measured 31 inches and had a girth of 13 inches.

The fish matched in size a pink salmon taken from Stoney Creek in Kenosha County in September of 1993.

Krajnik will receive a certificate from the Natural Resources' Bureau of Fish Management acknowledging his record catch.

A week-long cold snap signaled an early start to enjoying fall outdoors. The cold weather triggered changes in summer fishing patterns, bird migrations and even brought twinges of fall color for woodland hikers.

The Door/Keewauna vacation area, fishing pressure has dropped considerably. Wisconsin's black bear rebounds from record low

by Sherry Wise
DNR Information/Education

The black bear is Wisconsin's largest resident mammal. An adult male black bear averages 34-76 inches in length and weighs 250-500 pounds. Female bears are smaller, weighing 170-180 pounds and measuring 50-58 inches long. One black bear killed in Wisconsin in 1963 weighed over 300 pounds.

Generally, black bears appear bulky, thickset and rounded with short, sturdy legs. Their round shape is due to a thick layer of fat under the skin and the dense, coarse hair. This fur is usually glossy black above and below, except for a tan ground vegetation and abundant layer of fat under the skin and velour interspersed with numerous swamps and stream bottoms. Bears prefer thick ground vegetation and abundant sources of nuts and berries. Winter dens are usually dug out under a fallen tree and lined with leaves, moss and bark. Other dens also include caves in rocks, hollow trees or stumps, dense thickets or small conifer stands. Black bears also occasionally use summer shelter which consist of concealed places in dense shrubbery by a log, tree or rock.

Bears tend to wander considerable distances from their dens. Home ranges are usually 5-20 square miles for males and about 5-8 square miles for females. Black bears prefer twilight, but may be out any time of the day or night. They are most active between mid-May and late-September.

Solitary animals, bears are not normally friendly toward other bears except when a female and her cubs stay together. Often, a bear will signal its presence in an area by marking a "bear tree." These trees are bound along trails and other areas which bears frequent and are repeatedly clawed, bitten and rubbed. They may also be marked with a bear's scent.

During the winter, bears go into their dens where they fall into a deep sleep. They do not hibernate, however. The bear's body temperature, heart beat and respiration do not drop to the level where hibernation occurs. Dormant bears can be easily awakened from their winter sleep. During this time, they live off of the body fat they have accumulated in the fall. In the spring, the bear awakens from its sleep and the cubs follow their mother out of the den. She communicates with her cubs by voice signals including a loud "woof-woof" and other whispering sounds. Bears follow when in pain or when threatened by other bears, animals, or humans. In most encounters between bears and humans, though, the bear will be the first to flee.

Black bears are quite healthy, long-lived animals. Their only predator is man and hunting is by far the most frequent cause of bear mortality. Bears are rarely seriously affected by diseases and parasites. Ticks and fleas have been found as external parasites and internally a roundworm sometimes causes trichinosis in bears. Because trichinosis can be transmitted to humans, all bear meat must be thoroughly cooked before eaten.

Wisconsin's black bear population is currently at about 2,000 bears. During the 19th century, large-scale logging and settle ment created even greater pressure on the bears. During this time, bear numbers reached their lowest point. Today, the black bear is carefully managed by Wisconsin's Department of Natural Resources.

DNR to sponsor deer management hearings

MADISON, WI — People interested in Wisconsin's white-tailed deer should note that the Department of Natural Resources will hold hearings on September 29, 30 and October 2 to receive your views about their big game management policy.

The proposed rule revises the current knowledge of habitat management and actions to be taken in winter. The proposed policy specifies the following five actions the department will take to positively impact wintering deer in northern Wisconsin.

1. Maintain deer populations at established goals that reflect the long-term average carrying capacity of a particular management unit.

2. Emphasize summer range conservation.

3. Monitor wintering deer herd by surveying yarding areas and measuring winter severity.

4. Implement existing deer yard plans to maximize browse and perpetuate priority cover.

5. Provide technical assistance and guidance on feeding privately acquired foods at any time.

The hearing schedule is as follows:

- September 29 - Learning Resources Center, Neosho College, Rhinelander, at 1:30 p.m.
- September 30 - County Board Room, Elliott Bldg., 159 W4th Avenue, Shell Lake, at 10:00 a.m.
- October 2 - Room 40, Milwaukee State Office Building, 819 N. 6th Street, Milwaukee, at 10:00 a.m.

Written comments can be submitted to hearing officer Al Phelan, Bureau of Legal Services, P.O. Box 7921, Madison, WI 53707 no later than October 9 of this year. Written comments will have the same weight and effect as oral statements presented at the hearing.

A copy of the proposed rule and fiscal estimate may be obtained from Frank Haberland, Bureau of Wildlife Management, P.O. Box 7921, Madison, WI 53707.

Hawk watch, cont. from page 14

Fall hawk watch, contact Bill Smith, (608)764-9940, or Mark Martin, (608)764-9940, or write the Department of Natural Resources, P.O. Box 7921, Madison, WI 53707.

black bear, cont. from p. 16

managed and valued both as a trophy game animal and as an important species in Wisconsin's northern forests.

Current Status in Wisconsin

Currently, Wisconsin's black bear population is at an abnormally low level of about 4,500 bears. Because the optimum bear population in the state is about 5,000, hunting seasons will be very restrictive for the next few years to allow the population to recover to this level.

Nearly all of Wisconsin's black bears inhabit the northern forested areas, especially a band across the northern quarter of the state (Fig. 3).

Resources' efforts are funded by donations made to the Endangered Resources Check-Off on the state income tax form.

For more information on the Black Bear, contact the Wisconsin Department of Natural Resources.

Table 1. Black bear hunting harvest in Wisconsin.
To the Editor:

Education Secretary William Bennett, in the guide sent to public school superintendents, entitled, "What Works: Schools Without Drugs," recommends to authorities that they crack down and get tough. The secre-
tary gives his blessing for stu-
dent searches and urinalysis tests when authorities have a reason to suspect drugs.

Bennett recommends that authorities monitor bathrooms and playgrounds and randomly inspect these areas. He recommends that schools call the police when drugs are found. Perhaps we should pay more attention to the source of the problem as opposed to the effects. I feel that we need to look to preventive measures and not as intensely at sailing, restricting and suspending users. We need to address the problem of what encourages the "users" to "use." To just stamp on the "users" will not work in the long run.

A young person growing up in society today has all the reason in the world to be confused about drug use. Just look around and see people using for a variety of reasons-alcohol, caffeine, marijuana, crack, co-
caine, nicotine. The list goes on. We see parents, role models, brothers and sisters and TV characters using substances. So-
ciety is giving mixed messages.

Children and youth are not at any greater risk than anyone else. However, the school sys-
tem can help and reach the younger members of society by teaching them alternative ways to deal with problems. Young people need to learn ways to fill themselves up using their own inner resources as opposed to reaching externally in a physi-
cal substitute. Much more needs to be done in addition to crack-
ing down and getting tough.

Humans in general seem to love the thrill of being high. Some get their greatest high from running, downhill skiing, prayer, playing music, or mak-
ing money.

"There are so many ways to get high that it is not worth try-
ing to list them."

"Ways of getting high without drugs often do not work as fast or as powerfully as popping a pill."

"Those that do use drugs regu-
larly may have to work hard to get high in other ways."

"The fact is, that if one is de-
termined enough, they can elimi-
nate drugs from their life and never miss them." (Cheeslake to Morinrne p. 172-173, Weil M.D., Andrew and Rosen, Winifred, 1983)

People make decisions based upon the information available to them. They need current, accurate and complete informa-
tion. The truth about drugs can-
not hurt anyone. The public school system should provide a solid drug education program to the youth-of all ages. A young person needs to hear more than a critical parental view point of: "No-drugs should not be used."

A young person needs to know the hazards of the drugs, the risks in using the drugs and most importantly, where they can get more information on drugs-where help is available for those that need it or desire it. Knowledge will enable people to make intelligent choices about the use of drugs. This should help to prevent drug abuse before it starts.

In addition to that, we need to teach young people how to use alternatives to drugs. The school system can play a large role in the situation. However, a preventive attitude needs to be taken not only by the public school system, but together by society as a whole.

Valerie Stone

Editor's Note:

In our last issue, Jeffrey Plu's name was inadvertently left off the end of his letter. The Pointer apologizes for any in-
convenience or loss of credibil-
ty the absence caused Plu.
by Kent Walsewren
Sports Editor

UW-La Crosse, the No. 1 ranked NCAA Division II school in the country, held off a late fourth quarter rally by UW-Stevens Point to claim a 13-12 decision here Saturday in the conference opener for both teams.

The Indians (1-4, 3-4) took advantage of several Pointer turnovers on their way to a 13-0 halftime lead, but nearly lost the game thanks in part to the debut performances of UWSP reserve quarterback Kirk Baumgartner.

With UW-L on top 36-7, Baumgartner, a freshman from Cadiz, directed the Pointer defense to an 83-yard touchdown drive with 1:10 remaining in the game. Then, following a fumble by UW-L tailback Ted Pesnack, Baumgartner completed five straight passes to the Indian 34 before the shaken La Crosse defense stopped the rally.

The Pointers (6-1, 9-10) outgained La Crosse 213-203 in total yardage and also recorded twice as many first downs, but turned the ball over seven times, three of which resulted in UW-L scores.

"We gave the game away in the first half with those turnovers," said UW-L coach D.J. LeRoy. "I felt we played as physical a game as they did. We were outreiated but La Crosse got the breaks and took advantage of them."

UW-L scored early in the second half to gain a 36-0 margin, but the Pointers came back with a touchdown of their own on a 35-yard drive behind starting quarterback Dan Dantoit. Kim Drake's extra point try cut the gap to 36-7.

The Indians threatened to score early in the fourth quarter, but an interception on their second touchdown, a zandle-dangle play that put the Pointers back in the game. On the touchdown play, split end Dave Stevapack took a lateral pass from Baumgartner, then threw a pass into the arms of halfback Mike Christian who raced into the end zone untouched.

The Pointers, hoping for a repeat of last year's game at La Crosse where UWSP scored an incredible 31 points in the final 3:59 to salvage a 34-33 tie, recovered a fumble with 1:28 remaining.

But La Crosse defense, after allowing five straight pass completions that brought the ball to the 34, forced four straight incompletions by Baumgartner to ice the game.

Baumgartner, who drew words of praise from LeRoy, should see some action in Saturday's game against Northwestern Illinois State.

LeRoy was also pleased with the play of cornerback Greg Dano, who snared three interceptions, and linebacker John Bechard, who recorded nine solo tackles and two assists.

Kevin Enns led the Pointer rushing attack with 63 yards in 11 carries, while Mike Christian grabbed seven catches for 79 yards.

The Pointers entertain Northwest Missouri State this Saturday at Goede Field, kick-off is 1:00 p.m.

In other WUSC games, UW-Whitewater opened UW-Platteville 26-10, UW-Shatt halted UW-Superior 34-4, and defending conference champion River Falls cruised to a 42-12 victory over UW-Oshkosh.

River Falls, Waukesha quarterback Lance Leipold completed 19 of 30 passes for 333 yards and one touchdown. Ran­back George Aasen added 94 yards rushing and also threw a 65-yard halfback option touch­down pass.

At Superior, Kyle Gunderson scored five touchdowns and threw for 449 yards in a 49-13 win over UW-Oshkosh.

While the game was largely dominated by the defense, it was also plagued by penalties—four fouling the passers penalties by the fierce La Crosse pass rush.

The Indians outgained the Pointers 409-268 in total yardage and also recorded three times as many first downs as UWSP.

"I don't know if we really outplayed them or not, but they beat us," said LeRoy. "But the Indians didn't play as physical as they did. We were not surprised at 12-12."

However, Schraeder and Tom Morris placed first and second overall, a feat they accomplished at last week's meet. Considering the poor shape of the course, the duo's final times of 35:37 for Schraeder and 38:13 for Morris deserve special mention.

Wooster College finished third behind the Pointers with a score of 74, followed by Lewis University (99), Valparaiso (101), Illinois-Southern (123), Chicago State (131), St. Ambrose, Triton and the University of Illinois-Chicago.

Though North Central was the dominant team at the meet placing runners third through seven individually, Coach Rich Witt had high praise for his Pointers.

"This was an excellent meet for us. We went to this meet to run against two of the top Division III teams in the country, North Central and Wheaton. They were second and third in last year's NCAA meet."

Other UWSP runners in the top twenty included Mike Nelson (36.39), who finished twelfth overall and was voted the men's Pointer Runner of Week. "Milk's improved immensely since his last race" added Witt. "He was only one minute behind Arne, which is a great sign if we are to have a good team."
Point ruggers pound Eau Claire 47-0

by Scott Hertskamp
Staff Reporter

It rained early Saturday morning in Stevens Point. But the mud and puddles did not hinder the Stevens Point rugby club as they outmatched and out-

splashed the Eau Claire Blu-

golds to a 47-0 victory.

Scrummer O.J. fell on a loose ball in the corner of the end zone for his first try of the season and the score was quickly 13-0.

Point continued to dominate the game offensively as Joe Werth pounced on another loose ball in the try zone and Tim Kever added another score two minutes later. Rapp made the conversion kick on the second score and Point had a comfortable 23-0 halftime lead.

Point coach Dave Flaisance said, "Handling the ball was tough because of the puddles and the ball was always wet, but we still passed well."

Point continued the offensive explosion in the second half. Rapp caught a pass from Dan Vaughn and lateraled to Kever for the try.

Werth tacked on his second try of the contest, upping the score to 31-0. Dean Rummel used his speed to outrun the tired Eau Claire backs for two easy tries. Rapp made one of the conversion kicks and added two penalty kicks, both from 15 yards away, to make the final 47-0.

"We practiced hard and ran all week, and we were just in better condition than Eau Claire," said Dan Vaughn.

The Stevens Point rugby club is 5-0 and will face Oconomowoc at home on Saturday at 1 p.m.

The Stevens Point rugby team continued its strong early-season showing by dominating the Blugolds here Saturday. Photos by Tom Charlesworth.

Spikers struggle during weekend series

by Scott Hoelsch

The Stevens Point women's volleyball team had a rough weekend in La Crosse and returned with two wins and four losses.

The Pointers lost their first two games Friday to Division II-Augustana (South Dakota) 4-15, 14-16, and to St. Catherine's (MN) 15-13, 12-15, 11-15.

UW-Milwaukee, a team that has always given the Pointers problems in the past, downed the Pointers 3-15, 15-13, 12-15, 15-17.

Scheri Sches was the Lady Pointer top spiker with 33 kills. Deb Welepski had four solo blocks and five assists for the Pointers.

"We weren't doing well when we started. Number one, they were good teams, and number two, we weren't playing well," said coach Nancy Schoen.

"Against Milwaukee it was really close up until nine points, and then we just ran out of gas."

The Pointers lost their second game to Carleton (MN) 15-10, 10-15, 15-10.

"We're still trying to figure out what will work for us this year. Our top hitter, Mary Miller, injured her shoulder and we had to put in another freshener."

It helps to play a lot of matches and I think we improved over the weekend."

The Pointer spikes are 6-1 in conference play, 5-8 overall.

Hill's harriers take 1st at North Central

by Kent Waldstrom

Sports Editor

LEILE, ILL. - Coach Lee Hill's youthful women's cross-country team continues to impress. The team is one that has underclassmen and freshmen.

The Pointers registered a first-place finish at the UI North Central College Invitational here Saturday with 30 points to outdistance runner-up Wheaton College (44). Best North Central (37) finished third.

"We're still trying to figure out what will work for us this year. Our top hitter, Mary Miller, injured her shoulder and we had to put in another freshener."

It helps to play a lot of matches and I think we improved over the weekend."

Last weekend, the UWSP ran to a strong second place showing at their own Stevens Point Invitational.

Four teams - the University of Illinois-Chicago, Lewis College, Morton Grove College and Illinois Benedictine also participated in the meet at North Central, but did not field complete teams.

The Pointers were led by individual second place finisher Amy Cyp (20:09), along with Kris Helein, fourth in 20:40, and Beth Weiland and Cheryl Cymer.

Recruiter will be in the 10:00-4:00 pm University Center Concourse and 4:00-10:00 pm in the Student Center. All majors/degrees for information on Officer programs. No sign up necessary.

HAMLIN LAW SCHOOL Date: September 28
Recruiter will be in the University Center Concours from 10:00-4:00 pm. For more information talk in all majors attending the career fair. Hamlins. No sign up necessary.

ANNOUNCEMENTS

The university has several new developments that will increase the attractiveness of the university. The most noticeable is the new residence complex, which will be ready for occupancy in the fall. The complex will house approximately 500 students and will feature modern amenities such as air conditioning, washers and dryers, and internet access. The university is also expanding its offerings in the area of health sciences, with the addition of a new college of medicine and a new school of pharmacy. Additionally, the university is investing in new technology, with the installation of new computer labs and the expansion of the library's online resources.

One of the most exciting developments is the new student union, which will feature a state-of-the-art student center, a new dining hall, and a newly renovated bookstore. The student center will feature a large multipurpose room that can be used for a variety of events, including concerts, lectures, and workshops. The dining hall will offer a wide variety of food options, including vegetarian and gluten-free options, and the bookstore will have a expanded selection of textbooks and other academic resources.

The university is also working on several capital improvement projects, including the renovation of the gymnasium and the construction of a new stadium. These projects will not only improve the physical facilities on campus, but also enhance the overall student experience. The university is committed to providing a first-class education and a world-class student experience, and these projects will help us achieve that goal.

The university is also expanding its international programs, with new partnerships being announced with universities in Europe, Asia, and Latin America. These partnerships will provide students with opportunities to study abroad and gain valuable international experience. The university is also expanding its online offerings, with new courses being added each semester. These courses will be available to both on-campus and off-campus students, providing flexibility and convenience for all students.

The university is also working on several sustainability initiatives, including the installation of solar panels on campus buildings and the development of a new composting program. These initiatives will help the university reduce its carbon footprint and promote a more sustainable future.

Finally, the university is committed to providing a safe and welcoming environment for all students. The university is working to improve campus safety by increasing the number of security officers and by implementing new technology, such as license plate recognition systems. The university is also working to promote a culture of diversity and inclusion, with new initiatives being announced to support students from underrepresented backgrounds.

In summary, the university is committed to providing a world-class education and a world-class student experience. The university is investing in new technology, expanding its international programs, and implementing sustainability initiatives. The university is also working to promote a culture of diversity and inclusion, and improving campus safety. These initiatives will help the university remain a leader in higher education and continue to be a place where students can achieve their fullest potential.
Press here for a great data processing career.

The right time. The right place.
State Farm is hiring.

If you're a senior with a data processing, computer science or math background, there may be a very special career opportunity waiting for you in one of the largest corporate data processing facilities in the country.
There are actuarial and auditing jobs open, too.

Blue Chip. Green light. State Farm is one of America's leading insurance companies. Through innovative marketing and a proud service tradition it has become the nation's leading auto and homeowner's insurer, and one of the top life insurance companies in the country.
You'll receive expert training.
You'll work on state-of-the-art data processing equipment. You'll go as far and as fast as you can.
You couldn't have a more solid base to build a career on.

Contact your campus Placement Director about State Farm today.
Or visit the State Farm Recruiter. Our representative will be on campus 10-2-89.

 Bike tips, cont.

sound investment when you own a bicycle. UWSP is NOT liable for the theft of private property which occurs on the campus.
You must carry your own insurance for personal property.

IDENTIFY YOUR BIKE - If your bike is stolen and you don't have any means of identifying it as yours, chances are that you'll never see it again.
Record the serial number and other identifying information about your bike. Keep this information where you won't lose it.
Engrave your bike with your social security number in a place on the frame. Fewer registered bikes are stolen, so take the time to register yours, (for more information on bicycle registration contact the Stevens Point Police Department at 346-1500).

REPORT - If your bike is stolen or you have knowledge pertaining to the theft of a bike or you observe any suspicious activity near bikes on the UWSP campus, immediately contact Protective Services at 346-3666. Protect your way of life!

Harriers, cont.

who finished seventh and eighth, respectively. Teammate Jenny Schoch wound up tenth.

"Marge Walsh of North Central earned the individual title with a 19:46 first place clocking.
"This young squad (eight first year collegiate runners and four second year runners) really worked together as a team," said Coach Lee Hill. "We had eight finishers in the top 15 and all 13 of our runners were in the top 35."

The Pointers resume action this Friday at the Wombat Invitational in Sheboygan, WI.
