Brain drain: a growing concern

by Bernie Blieske
Senior Editor

Over the last decade, more and more college graduates have been leaving the midwest for southern and western states. In fact, says a recent US Census Bureau report, the midwest lost 60,000 college graduates in 1983-84, and Wisconsin, says professor Robert Enwright at UWSP, lost 80,000 people between 1980 and 1984, "which is quite high." (That 80,000, however, includes non-college graduates.)

The loss, now termed "Brain Drain," has raised serious questions throughout Wisconsin and the midwest. Early last year, several southern Wisconsin business organizations argued for cuts in education used brain drain as a reason for less spending and increased tuition. The argument was, more or less, that students were getting a free ride—using the Midwest's (Wisconsin in particular) cheap and well-recognized land grant colleges, then leaving the area. This idea, argues Dr. Enwright, is both dangerous and misleading. "In fact," says Enwright, "Wisconsin, in comparison with other midwest states, particularly Ohio and Illinois, is not losing a disproportionately large number of graduates.

"In fact, the population on the whole has remained relatively stable through births—we've had more births than deaths. Ohio and Illinois didn't do so well.

Dr. Enwright also points out that the midwest brain drain has largely been a result of the recession of the 80's. "The loss is probably over," he contends.

"Also," says Enwright, "Wisconsin is one of those states that are highest in terms of having a native born population. Eighty percent of Portage County's population is Wisconsin born.

"Then, while the state loses some graduates, it gains few from other states. In fact, only Eastern states gave more graduates to the midwest than the midwest gave to them—a net gain of only 9,000 persons."

Enwright says that many states, when they grow economically, end up giving lots of good jobs to people from elsewhere. Wisconsin doesn't have that problem.

"It's not so much brain drain, as a no brain gain."

"The important point to realize," cautions Enwright, "is that brain drain raises questions like 'should they cut higher education?'

"For example, people in Kentucky were so worried about out-migration (people leaving the state) that they cut funding."

But because we don't get many college graduates coming in from outside the state, "we could very well be cutting our own threats if we cut back."
Money vs. shrubs

Sometimes, perhaps more often than not, greed is not recognized as greed.

The current budget requests are a good example of this. Across the board, with the exception of the state and federal government, student fund organizations include on-campus housing, food, Health Services, Text Rental, parking, and the University Center. These organizations get no additional funding from the state or federal government.

They have many excuses for needing more money.

The University Center now gets $69 a year from each student. Next year they want $79.20, a 14% increase. This, they say, is to pay for Debtor Center renovations. On-campus housing prices will go up over 10%, a $100 or more increase. These increases are in response to projected enrollment cuts, as are food service increases - which will go up 2.1% ($24 a year) for a meal plan, and 5.3% ($50) for points.

Health Services wants a 6.4% increase, $4.50 more per semester. This is in response to a combination of enrollment cuts, salary increases and inflation, and follows a 14% increase proposed last year.

And finally, Text Rental needs $9.60 more from each student to finance the mandatory SMART program, which was passed earlier this year by the Faculty Senate. (That, by the way, was a tricky, extremely low-handed move in light of the massive student opposition to SMART.)

The excuses are valid, of course, and those making them believe in their reasoning. But they are ignoring one thing: Us.

A key here is in who they are supposed to serve:

students. They are here to help students. It is a matter of scales - how much the students can afford before it hurts them vs. the cost of the benefits.

Unfortunately, students can afford less and less these days. Tuition is rising steadily and eligibility for financial aid has plummeted. They have many excuses for needing more money.

Campus organizations are unwilling to suffer. In fact, in many cases suffering is last on their minds. Debtor renovations? Come on. Debtor looks fine.

Student opposition to SMART.)

The facts, however, seem to say that they are in it for themselves, for someone's well-padded job, for self-serving accomplishments like shrubbery.

The Pointer (USPS - 098340) is a second class publication published 38 times on Thursdays during the school year by the University of Wisconsin-Stevens Point and the UW System Board of Regents, 230 Communication Arts Center, Stevens Point, WI 54481. Distributed at no charge to tuition-paying students. Non-student subscription price is $38 per academic year. Second class postage paid at Stevens Point, Wisconsin.

Postmaster: Send address changes to Pointer, 117 Communication Arts Center, Stevens Point, WI 54481. Pointer is written and edited by the Pointer staff, composed of UWSP students, and is solely responsible for its editorial content and policy.
Tradition dies

Bratfest '87 cancelled

by Keith Uhlig
Staff Reporter

The traditional Bratfest will not be held this year. According to Bob Booth, Bratfest chairman for Sigma Tau Gamma, the fraternity that sponsors the event, there are a number of reasons the event will not take place. The major reason: financial difficulties. The chapter lost money last year because the city of Stevens Point insisted on the Fest being held on a weekday. City representatives say they did not object to the Fest itself, but rather the possible increase in vandalism.

"The chapter lost a fair amount of money," said Booth. He says Sigma Tau cannot take a loss again this year. "It's a fundraiser for us. We would have probably lost several thousand dollars.

Earlier this spring, Sigma Tau Gamma tried to get a permit to hold the event in Bakot Park. Tom Schrader, head of the Park Department, said there was an eight-to-three vote in favor of having Bratfest there on Friday. As were concerned, they could have held the event there. We had to cancel," said Schrader. "But since Bakot Park was closed for the year, as the parking lot year, said Schrader.

The next step for the chapter would have been to see the Public Protection Committee, according to Scott Schultz, former chair of the committee, Sigma Tau Gamma came to talk about a permit for the event. "They chose not to come to us, said Schultz. In the past there has been a city policy to hold the event on a Monday, Tuesday, or Wednesday, and not on a weekend.

Consequently, Sigma Tau Gamma did not bother to go to the committee with the proposal to hold the event on a weekend again. Booth feels there was not much of a chance, "The city this year wasn't cooperating as much as last year," he said.

Schultz said he did not know what would have happened since it never came to a vote.

Sigma Tau Gamma looked at another option: to hold Bratfest on university grounds, on the football field behind Quandt Fieldhouse. He said, "The university was very cooperative, but since food service costs would be higher, the idea was scrapped.

In spite of the problems this year, Booth said, "This doesn't mean the event is dead." However, in view of the drinking law changes, the nature of the event may change. "I'll be less of an alcohol event, and more of an evening event," he said. The chapter will try to bring in more popular bands and try to make it more of a band festival, according to Booth.

Business prof shortage raises salaries

by Bernie Blecke
Senior Editor

Business schools across the nation are facing the shortage of qualified business professors, says a recent study of the AACSB (American Assembly of Collegiate Schools of Business). To draw doctorate level faculty to their departments, business schools are raising salaries. Average nine-month salaries for many tenure-track faculty positions range from $40,000 to $50,000, some going as high as $70,000, but still only 16% of the doctorate level positions business schools remain unfilled. Recent business graduates with doctorate degrees have an average of four academic jobs from which to choose. The AACSB is concerned that the shortage of qualified professors will stunt the growth of business schools across the nation. The shortage is largely the result of a swelling increase in students who wish to study business. Nearly 200,000 students are now studying for MBA degrees, and schools of business now award 24% of all bachelor's and master's degrees, an increase of nearly 100% since 1965. Professor Richard Judy, associate dean for UWSP's Business and Economic Department, says that "the demand for business courses does seem to exceed our current capabilities. However," he adds, "we have not seen the impact yet. For example, the grade point needed to get into freshman business classes was raised from a 2.5 to a 3.0.

Two years ago, the faculty of the UW System were paid salaries that were considerably lower than those of other state institutions. In order to raise the salaries of the UW System's faculty, a faculty pay raise catch-up plan was designed. Since the UW System's faculty will now be paid $10.15 to $14.75 per hour, or $7,400 to $11,900 per year, the plan has been widely publicized.

At UWSP, the pay raise began in the mid-1980s. "It's a pay raise that was much of a chance," said Dean of Fine Arts, John C. Asst. Chancellor, and Dean of University Advancement, James Vance, director of the Equal Opportunity Program, said, "We brought in key experts, says Vance, to assist us and took most of their top-level recommendations, implemented them, got some additional resources, and really had the advantage of a new drive towards minority supportive services. The EOP program now actively recruits, retains, and tutors the minority student population at UWSP. A minority student cannot get into one of our courses, the office receives allows them to award scholarships and grants to needy students. Academically, the EOP sponsors labs and special course development.

The university's commitment to minority programming is evident in this area's budget allocations. For 1993, the minority and other non-traditional student areas received $1,102,784, giving UWSP the third largest minority budget in the UW System, after UW-Milwaukee and UW-Madison. The rest of the UW school budgets ranged from a low of $64,920 at River Falls to $652,894 at La Crosse.

UWSP's success in minority recruiting comes despite a poor location, in a congressional district that has fewer minorities than any other in the United States, and a past track record of racial abuse.

In the early 1980's, the beatings of several Nigerian students was widely publicized over the national media. It earned the Stevens Point campus considerable media attention. However, UWSP's recent minority recruiting efforts are drawing positive national feedback. In a 1989 report from the American Council on Higher Education entitled "Minorities in Higher Education," William T. Beatty, the council's director, "commended for its program initiatives and strong reputation: excellent data base, clearly articulated goals, good pre-college efforts and commitment of institutional funds."
The change in the drinking age is bringing about a change in the number of people who drink. "Most importantly," Hettler says, "we have an intensive alcohol education program at UWSP." There also are student reaction teams in many of the residence halls and campus buildings, and the number of referrals we get from serious alcohol problems.

Send yourself abroad! It's easier and more affordable than you might think.

Prof. shortage from p. 3 to get into the business department, 2.5, has not changed, nor has the requirement to stay in, also 2.5.2.

However, the business department (and most other departments) has been asked to cap its program. "We certainly want to hold class sizes constant," says Judy, and to keep the program at a manageable size.

The cap requests are a result of both a shortage of faculty and money, and will probably go into effect regardless of faculty shortages.

Judy says that the department is short several professors and "will continue to make offers to qualified faculty within the University's guidelines."

Currently, most business faculty at UWSP make well over $30,000 a year. "We still want people we can afford," says Judy, "and to keep the program at a manageable size."

UWSP does have a graduate program in business, but does offer several graduate courses through UW-Oshkosh. UWSP is also not accredited in business. "It's a long, expensive process," says Judy, "and it hasn't had any impact on the kinds of students we get, or how they do getting into graduate school, or employment. We still offer an excellent program."
Wellness Study, from p. 4

halls to respond to people who have abused alcohol.
Part of the impact upon the university is in programming. UWSP recently received approval to establish a new major in health promotion/wellness which will become fully opera-
tional this fall. Students will have opportunities to specialize in child and family, gerontology, nutrition, psychology, social foundations of health, sport specialist, and youth agency programming and camp manage-
ment.

A FAKE BIRTH CERTIFI-
CATE SCHEME uncovered at the U. of Wisconsin led to the arrest of a UW student on felony charges. The freshman allegedly made the fakes and sold them for $30 to underage students, who used them to get into campus bars. Officials dis-
covered the ruse when two stu-
dents used the doctored docu-
ments to apply for state ID cards.

SOUND FAMILIAR? The UW-
Milwaukee Student Association went into the publishing business by starting its own news-
letter, The Pulse. SA officials say they were unhappy with the way the UW Post—the official student newspaper—"dissem-
inates information" on the cam-
pus.

The sixth annual Point-Iola Metric Century will be held in Stevens Point on April 26. The ride starts at 11:00 a.m. in the winter sports area of Iverson Park.

The Point-Iola Metric Cen-
tury, sponsored by the Stevens Point Freewheelers Bike Club, offers 40, 60 and 100 kilometer loops (25, 38 and 64 miles). Deb Bannach, a member of the club and one of the key organizers for the last five years, said that food, water and a support van will be available along the route. Beer and soda will be waiting for participants at the finish. Everyone receives a T-shirt.

"We try to plan the ride so that bicyclists of most abilities can enjoy it. We’ve already had several families inquire about the ride," Bannach said. "The course is gently rolling and fol-
ows quiet back roads. The long-
er route winds through Iola and has a food stop next to the lake there."

"The bicyclists go at their own pace. Some people will race it, but most are just out to enjoy a long bike ride on a spring day," Bannach continued.

Anyone interested in participa-
ing in the ride can pick up a registration form at area bike shops, the YMCA, or the Cam-
pus Activities Office in the University Center. Cyclists may also register at Iverson Park the day of the event.

Several insect movies are set for the fourth annual Insect Fear Film Festival held by the U. of Illinois Entomology De-
partment. Three films and two cartoons featuring an assort-
ment of “dominant female” in-
sects will be shown. Titles in-
clude Lady in Red, about a la-
dybug nightclub dancer, and Of 
Thee I Sting, about mosquitoes.

A 30-year policy restricting in-
terracial dating has been lifted at Pillsbury Baptist College, af-
fer several black students filed complaints with the state De-
partment of Human Rights. The college also agreed to drop the requirement stating that stu-
dents must have parental let-
ters of permission in order to date someone of a different race.

INTERNATIONAL ROCK
LETTERS
Life in Greece

To the Editor:
Annie, who read my first sto- ry about our semester abroad in Greece knows of our difficulties in getting there. We found ourselves in the middle of a blizzard that swerved across Eu- rope and encountered airport and train strikes and numerous other travel difficulties on our way to Greece. But that journey ended weeks ago and we have found the job we call Greece. Do we like Greece? Yes, we do!

Our hotel is comfortable, we have our own bathrooms and we are close to the most popu- lar square, and many of the most famous archeological sites in Athens. The hotel people are pleasant, helpful and they let us practice our Greek on them.

Our Greek teachers are mem- orable. Energetic Marinetta, our Greek language teacher, (It's tough to be a die-hard fan, but somebody's got to do it!)

Sincerely,
Susan H. Meshak
Senior, UWSP

Hangry? How 'bout a Big Mac? Or a Whopper? Those burgers are quite a deal—and so convenient!

Are they?
It has come to my attention that I've been overestimating the general awareness of people on an ever-increasing and frightening problem: fast food beef.

Now, I'm not worried about the cholesterol and carcinogens you put into your body. That's your problem. My concern is the source of this beef. Did you know that one-third of all fast food beef consumed in the U.S. is imported from South Amer- ican counties? The key words here are beef, the U.S., and imported.

In order for these cows to live where no cows have lived before, millions of acres of dense forests must be cleared for pasture.

My question is this: Where do American corporations get off raising our beef and exploiting other countries' diminishing natural resources so we can stuff our faces with burgers and Spam? Fact is, the beef imported is the least quality allowed for human consumption by the USDA! It's only allowed to be used for fast foods and canned meats... yum yum! And the cost? It's scary.

The most recent estimate I've heard (about a year ago) is that land equivalent to the size of Montana is being cleared annually to create pastures. Once this land is cleared, the trees are gone forever.

O.K., a quick ecology lesson is in order here. You see, thou- sands of species living in the rainforests are "endemic." This means they grow nowhere else in the world. Some plants grow in areas only the size of a foot- ball field! When Ronald (something about that name!) McDo- nald has an million acres cleared for pastures, the consequences can amount to the loss of hun- dreds of species of living things—extinction is forever! (Lesson No. 2: The plants that eventually replace these forests are called "pandemic." Dande- lions and crabgrass fall into this category, and the types of life that they can support is limited. Rats and ants, which are also pandemic, might do all right, but they can't replace the loss of things like rare orchids, 70- foot-high trees, wooly monkeys and macaques. (In case it isn't clear, "pandemic" means they are hearty, aggressive and can live almost anywhere.) Where thousands of species, and thou- sands that haven't even been counted yet, can get things like beef, which is eaten by cattle and weeds are taking over.

Another thing about the plants that are being destroyed: they're not like oak trees, which have seeds, and where the for- ests left floor. What is called a "seed bank" to ensure future generations. There is a seed bank for each species of tree/plant that grows in the rainforests in South America. Solheim, a botanist from UW-Madison who has seen and studied the de- struction, says that if the forest is cleared, the primary species must be present for the primary species to reproduce.

An example Solheim gave was "Sentinella Ridge" in Mad- agascar. This ridge had 90 spe- cies of trees that could not be found nowhere else on earth. This is past tense, be- cause this ridge was cleared. (I don't remember if it was for
cattle or broomsticks, but both are用药.) (Lesson No. 3: All 90 species are now extinct!)

For a moment, I want you to think of just how concentrated these life forms are down there. Fifty percent of all the world's animal life in the world is found in rainforests, and upwards of 8 million species of insects alone! Wisconsin has about 80 species of trees. Choc, which is one of the smallest species of trees found in Wisconsin, has 7,000 species of trees! Wisconsin has 10 species of frogs, Madagascar has 900 getting the picture?

What makes me sick is that I am a member of a society where money comes above all other things. The United States is directly responsible for the unchecked destruction—thou- sands of acres daily— in South America. Corporations prey upon the naive and impover- ished, lives are ruined, and inc- ludingly small payments to raise the cattle and start log- ging productions—only to bene- fit the almighty U.S. (Interest- ingly, the average South Amer- ican consumes less beef in a year than an American cat!) When the native land is used up (it can't support cattle for more than a couple years—then rainforest must be cleared), the people are left with nothing but weedly sands and a few dol- lars.

Another result of deforesta- tion is the destruction of rainforests. Anyone who ever had to take a biology class has learned, plants take carbon dioxide out of the atmosphere and produce oxygen. Scientists are still working it out exactly, but it is presently estimated that be- cause one-fourth and one-third of the earth's oxygen is pro- duced from the world's rain- forests. Without these plants to photosynthesize, people may soon be wearing oxygen tanks and No. 15 sunscreen to protect them from ultraviolet suns.

I know what you're saying— Gee, what can I do? Glad you asked that.

1) For one thing, stop patron- izing fast food restaurants and lower the demand for beef. Be- lieve me, your body won't even miss it!

2) Educate yourself. What you don't know can hurt you and many others!

3) Join organizations. Groups with a lot of members have clout and can get things done!

4) Encourage the education of others who are about to go on their study semester abroad so they can learn ecology, etc.

Contact me and I can recommend some sources. And remember, that beef does not belong to a lot more than what you pay at the counter!!

A concerned member of this planet
Brittany Stewart

ROOMMATES WANTED
2 People for the Summer

For the Fall

Bring in Bobby

"Goodbye doesn't mean for- ever..." but Jay Eck will defi- nitely be missed! After two suc- cessful seasons and a skill re- cord, the University of Wiscon- sin-Stevens Point will be losing a brilliant young coach who put the "S" back in Spirit.

After the recent weekend in my life, I awoke to hear the dis- appointing news that "my good buddy Jay" was saying "Avior" to Stevens Point, Joe's Pub and Phil Pieper.

My first thought was "Let's bring in Bobby Knight." He's the only man to fill Jay's shoes and continue the winning tradi- tion that made Stevens Point fla- mboyant. But then I thought again and decided that Ray Schrieter could do the job just as well. And so, if we can't have Bobby, let's give "Ray Baby" a chance at continuing that Pointer SPIR- IIT. After all, "Peppe" has reached his potential as a num- ber one halfplayer yet and needs that help and guidance of an "Appleton native."

Personally, I've seen Ray work free throw techniques, this upcoming "star" and found his enthusiasm astounding.

If we must say goodbye to Jay Eck, let's hang on to Ray Schrieter and the Pointer Spirit. (It's tough to be a die-hard Pointer fan, but somebody's got to do it!)

Sincerely,
Sam M. Menhak
Senior, UWSP

Fortunately, the monsters weren't out this time, so we got out alive, with all of our fingers and all of toes.

Most of our field trips in- cluded visits to museums near the archeological sites where Nanno brought the ancient and their beliefs back to life.

Athens itself offers a variety of entertainment—pubs, taverns (inexpensive restaurants), plate breaks, and much more. I know some of the beaches around the world and, at the Athens Center where we attend our regular classes, folk dance workshops and foreign films. We have also been able to par- ticipate in their Carnival cele- brations, which last for three weeks before Lent.

During our stay the weather has ranged from the 30s to the 70s, when we dug out our sum- mer clothes and tried out some of the beaches. For the most part, though, daytime highs have been in the 40s and 50s.

In my next letter, I will tell you more about the other towains and some of the islands we have also visited.

Destroying the rainforests
Where does America get off?
Success: only a dream away?

by Betsy Jacobson  
Staff Writer

You can discuss physics with Einstein, propose to Marilyn Monroe or fly like Superman. "Dream on," you say? Exactly! For nearly 20 years, scientists and psychologists have been researching methods of controlling the content of dreams based on "lucid dreamers" or people who realize during their dreams that they are dreaming. Two of these psychologists, Stephen LaBerge and Jayne Ackerman from (from Stanford and the University of Northern Iowa respectively), recently released their findings on dream control in the April issue of Omni magazine.

According to the study, their techniques can turn non-lucid dreaming into lucid dreaming. You can lucidly dream and control your dreams. Two of these psychologists, Stephen LaBerge and Jayne Ackerman (from Stanford and the University of Northern Iowa respectively), recently released their findings on dream control in the April issue of Omni magazine. According to the study, their techniques can turn non-lucid dreaming into lucid dreaming. You can lucidly dream and control your dreams.

People are excited about this university's jazz program. Sometimes, though it's hard to say why, no jazz program exists in the community; the faculty in the program differ in their goals for the program and, for the second time, their funding and facilities could be better.

Maybe, by looking at it historically, we might understand why; no jazz program exists in the community; the faculty in the program differ in their goals for the program and, for the second time, their funding and facilities could be better.

According to Steve Zenz, the facilities could stand improvement. "The facility is see no fish. We're growing faster than the bureaucracy can handle."

"We've been faced with a problem with recognition, here in Point, for the vocal jazz program, and because people know that it is available and not enough people know to hear it. We have had more money we could do more things, like go to a national festival," said Mike Irish.

"We're the third largest program in the state, but we're not funded like we are," according to Steve Zenz, the facilities could stand improvement. "The facility is see no fish. We're growing faster than the bureaucracy can handle."

"We've been faced with a problem with recognition, here in Point, for the vocal jazz program, and because people know that it is available and not enough people know to hear it. We have had more money we could do more things, like go to a national festival," said Mike Irish.

"We're the third largest program in the state, but we're not funded like we are," according to Steve Zenz.

Of course, the true test of any academic program is how well it meets the needs of the students enrolled in it. This past year, 10 students transferred from River Falls to enroll in Point's jazz program. Al Lind, a drummer, who's in his third year of school (first year at Point) feels fortunate, "to be my own instructor." He also feels, "the bands are very well-rounded, versatile and work well together." Robert Cherry, another transfer student feels, "Feel good," students we have more money we could do more things, like go to a national festival," said Mike Irish.

"We're the third largest program in the state, but we're not funded like we are," according to Steve Zenz. The facilities could stand improvement. "The facility is see no fish. We're growing faster than the bureaucracy can handle."

SLEEPER OF THE SUMMER
Raising Arizona

by Bernie Blekse
Senior Editor

The New York Times, Time Magazine, and a host of other notable critics have called Raising Arizona one of the funniest movies of the year.

Without question they are right.

In fact, it is the funniest movie of this year, and years before this year, and possibly years after this year - unless directors Joel and Ethan Coen decide to make another comedy.

The movie, written by the two director/brother/screenwriters in four months, concerns Hi and Edwina, a criminal and a cop who meet and romance each other time Hi is caught robbing convenience stores - his specialty. Hi and Edwina want a baby, and since Edwina is sterile, they steal one from the Arizona's, who have been blessed with quintuplets. That's the beginning, just the beginning.

The story, which turns really bizarre when the Biker of the Apocalypse hits the scene hand-granading bunny rabbits, actually sounds simple enough. A couple steal a baby and are pursued - Jerry Lewis could have thought it up.

Simple, however, the movie is not.

Much of the comedy rests in the Coen's camera work and editing. The chase scenes, possibly the funniest ever made, are a high speed carnage of the bizarre and exaggerated, zipping through backyards, living-rooms, and supermarkets to a continual barrage of gunfire.

And of course the characters are superb. Nicholas Cage, who plays the continually somewhat confused Hi, looses through disaster after disaster, finally being humiliated by his semi af­ter-ego, the Biker From Hell, as he's contemplating the universe, in a nice way. Edwina, played by Holly Hunter, acts as if she's in a continual state of PMES. One minute she's serene, cooing over her just-stolen baby, the next she's bawling hysterically over how much she loves the baby.

The movie is not, however, just a simple slapstick comedy, and its quality ultimately rests in its certain charming rustic thinking.

The characters talk as if they're grown up on Gilligan's Island, old-King Arthur novels, and the The Wall Street Journal. "We came through your window," says Cage in a typical scene. Cage's two prizzly buddies, who have escaped, discuss a bank robbery as if they were Harvard graduates mailing career options in hillbilly accents.

Without a doubt, Raising Arizona is one movie nobody should miss this year.

Dream

from page 8

Become skilled at height and maneuverability before attempting speed.

Exercise Three: The researchers say that "dream spinning" can help you stay in a lucid dream and can also be used as a "means of traveling to whatever dream world you desire." Simply choose a person, place and time that you want to visit before you go to bed. It may be Sigmund Freud, Vienna, 1900, or even the president of the solar system. Write down your target and memorize it. Picture yourself visiting that person and resolve to do so in a dream that night.

To make the trip, repeat the person, place and time you have targeted, spin yourself (in your dream, of course) while you are standing with your arms outstretched.

Use this same technique when you notice that your dream is starting to fade. Spin while repeating your target and you should be able to stay in your dream longer.

Exercise Four: The last exercise is an attempt to "access the creativity of the dream state" to try to solve problems. Before you go to bed, choose a problem and frame it in the form of a question. For example: What is the answer to my next book? (Or research paper?) How can I become less shy? How can I regain my health?

As with your target person in the last exercise, you should write down and memorize your question. While trying to induce the lucid dream, keep your question in mind and visualize yourself searching for the answer in the lucid dream. Then, look for the answer the next time you dream.

LaBerge and Gackenbach suggest that you try a direct approach in problem solving. For instance, if you are normally shy, be aggressive in your dream. If you are sick, try to heal yourself while dreaming. When you awaken, see how your dream solution can relate to the real problem. Possibly, you might ask a dream character for the solution to your problem.

The psychologists offer Einstein as a source if you are trying to solve a physics problem. Use this exercise in combination with dream spinning and flying.

This whole album is folk music, performed by people who know rock 'n' roll. Side one kicks off with an anthem, "New Generation," proclaiming, "we are the looksouts of the new generation." The other originals are gently rocking folk ditties about love. For example, "Lay Down Your Arms" and "Daylight." For cover songs, they offer up the traditional "Samson and Delilah" and "Walls (The Polish Union Song)."

Is it mere coincidence that this LP appears on the same label as Peter, Paul and Mary's 1967 comeback album? Is Goldstar Records planning some sort of conspiracy? If so, they can count me in as a co-conspirator.

"HOW I MADE $18,000 FOR COLLEGE BY WORKING WEEKENDS."

When my friends and I graduated from high school, we all took part-time jobs to pay for college. They ended up in car washes and hamburger joints, putting in long hours for little pay. Not me. My job takes just one weekend a month and two weeks a year. Yet, I'm earning $18,000 for college.

Because I joined my local Army National Guard.

They're the people who help our state during emergencies like hurricanes and floods. They're also an important part of our country's military defense.

So, since I'm helping them do such an important job, they're helping me make it through school.

As soon as I finished Advanced Training, the Guard gave me a cash bonus of $2,000. Then, under the New GI Bill, I'm getting another $5,000 for tuition and books.

Not to mention my monthly Army Guard paychecks. They'll add up to more than $11,000 over the six years I'm in the Guard.

And if I take out a college loan, the Guard will help me pay it back — up to $1,500 a year, plus interest.

It all adds up to $18,000 — or more — for college for just a little of my time. And that's a heck of a better deal than any car wash will give you.

THE GUARD CAN HELP PUT YOU THROUGH COLLEGE, TOO. SEE YOUR LOCAL RECRUITER FOR DETAILS, CALL TOLL-FREE 800-638-7600,* OR MAIL THIS COUPON.

Brewers unable to go 14-0

13-0 record ties National League’s best start

by Dan Dietrich

Despite cheers from the crowd of, “Here we go Brewers, here we go,” the Milwaukee Brewers were unable extend their winning streak to 14 Tuesday night. For the first time this season the Brewers were defeated, losing to the Chicago White Sox 7-1 at Comiskey Park.

Their 13-0 record prior to Tuesday night’s game, however, ties the 1981 performance of the Atlanta Braves for the National League’s best start.

“We’ve obviously played better, but there’s nobody better than the Brewers,” said Joy Keller of UW-Milwaukee. “They’re going to take the series this year.”

If they do, we’ll see more cheese-headed people in the stands. Besides Brewer caps, the most popular headgear for the 46 degree weather was cardboard chunks of cheese—proudly worn before the national media and White Sox fans. Said one banner, “We may be cheeseheads, but we’re 13-4.”

Chicago had 11 hits Tuesday, four of which came in the second inning, resulting in three runs.

The Brewers had six hits, but the only score came in the seventh inning when Paul Molitor singled to right, scoring Jim Gantner from second.

Yesterday’s game against the White Sox was cancelled because of rain.

Three Milwaukee Brewer fans look on with anticipation (above), hoping the Brewers will find that Milwaukee Magic and their 14th straight win. But Greg Walker’s (29) seventh inning home run (right) put the score at a distant 7-1. Dennis Hill (15) also scored on Walker’s 422 foot, upper deck home run in Comiskey Park.
"No, I don't think this is a fluke either. They have a new manager and new people. I think they'll do well this year."

---Pat Virtues

A baloney ball and run around four bases. The media shouldn't affect them. Besides, how did they get this far?"

"It's a balance between three things," said Darin Leveraus, another star on the Pointer baseball team, "defense, pitching and hitting. They have a good group of young players along with the veterans."

"Their offense has made them the No. 1 team," said Femal, Leveraus' roommate. "Tom Treblehorn has given them a fresh look. Their win streak is awesome."

"Whether it was in a Village apartment with Leveraus, Femal and friends or other places, Pray-Sims agreed. "No, I don't think this is a fluke either," said Virtues. "They have a new manager and new people. I think they'll do well this year."

Dinant offered another intelligently-phrased opinion. "They are playing errorless ball, no mistakes," he said. "They are also coming up with the big hit.

Brewer fever is sweeping the country and not only Wisconsin. Milwaukee baseball is a hot item. But will it also come and go like Wisconsin weather? Remember the 80-degree temps on Monday? And remember Tuesday? It was as cold as the Brewer bats. But hot or not, the Brewers are making believers.

"That's good for Wisconsin sports," said Ruedinger. "The image got tarnished after what happened with the Packers. This will bring respect back to the state."

Even though the Brewers trailed the entire way, Ruedinger and many other die-hard fans remained at Ella's. Why? Because they still had a full pitcher of beer. And remember, the Brewers have proved it's not over until the fat lady sings. I think she may have sung the national anthem in Chicago on Tuesday.

Despite the loss, Brewer fans (below) still appreciated the effort.

The possible "dream season" of the Brewers is nowhere near over. "Right now, they're saying a team is going to have to win 85 games to win the pennant," said Burke. "But it's still early in the season. The teams that were picked to do well are losing. It's hard to tell. If the Brewers keep playing like they have been, they'll do well. This might be the team to put it all together.

The Brewers didn't beat themselves Tuesday night, a good ballclub did. Will the young Brewer squad learn from the defeat? "Maybe it's good that they lost so they can touch ground again," said Ruedinger. "They probably feel relief now. It's over now and they can start to build again. Every game was getting more and more intense. Now they can start another streak."

A majority of the Brewer watchers were males. What were all the women doing? Watching the guys? Not Stephanie Hough. "Baseball is fun," the Neale Hall resident said. "Yeah, I think this win streak is a fluke. They are starting off good, but it could turn around at any time."

Winning is great, especially for the fans, but if the Brew Crew starts losing, will you still watch them, Stephanie? "Sure, just like I do the Cubs."

The 1987 Milwaukee Brewers. Just look what a bunch of farmers can accomplish when they put their cheese heads together. 

Brewer craze

Pray-Sims residents (above) attentively watch the Milwaukee Brewers on TV Tuesday night. Brewer manager Tom Treblehorn (right) bares no smiles for a post-game interview.
First place finishes by Arnie Schreder, Tom Morris and Scott Laurent vaulted the UW-Stevens Point men's track team to a first place finish at the Metric Invitationals at Eau Claire on Saturday.

The Pointers scored 148 points, topping UW-Eau Claire, 140; Michigan Tech, 120; UM-Duluth, 96; UW-Stout, 96; Beth-

Senior standout Schreder set a new meet record with a 1:51.21 clocking in the 800 meters. The time also enabled the Port Edwards native to qualify for nationals in the event.

Laurent took top honors in the triple jump with a meet record 14.40 meter run. Moris captured the final first with a 4:04.2 win in the 1500 meters.

"Arnie and Scott both qualified for nationals and Tom (Morris) ran a strong race. These athletes pointed the way for the Port Edwards native to qualify for nationals in the event.

As for the meet itself, coach Randy Handel said, "I was extremely pleased that Pompe five men on base. Chet Sergo had nines of 39 and 40 and two-for-four runners on once action this weekend when we travel to UW-Platteville on Friday and UW-Stout on Saturday. Both games are doubleheaders.

Here's a secret about acid rain

Secret: Environmental release of sulfur dioxide -- an air pollutant has fallen 25% in the U.S. since 1970. Yet, coal burning is producing more coal today than in 1970. And that's important if you care about acid rain.

Because sulfur dioxide is a gas which promotes acid rain. In the eastern U.S., most sulfur dioxide comes from coal burning.

Locally, Wisconsin Public Service has done even better. Since 1970, we've cut sulfur dioxide emissions by 40 percent at the coal-burning plants we operate.

For more information about coal energy and the environment, write: Wisconsin Public Service Corporation, Corporate Communications P.O. 19001 Green Bay, WI 54307-9001 or call (414) 433-1630.

Golf team wins spring opener

by Karen Kulinski

Sports Editor

The Pointer men's golf team started its short and sweet spring season with a first place showing at the Tusculum Golf Club last week.

Stevens Point topped the nine-team field on the par-71 course with a 467. Oshkosh placed second at 472 followed by Eau Claire 412, Marquette 421, Milwaukee Area Technical College 422, St. Norbert College 427 and Green Bay 435.

"This was a good win for us," said Pointer coach Pete Kasson, "especially with both Oskosh and Eau Claire competing." Pointer Kurt Rebholz captured runner-up honors with the score of 75. Rebholz is expected to compete in next week's Wisconsin Intercollegiate Championship at Sauk Run Country Club.

In the opener, the Pointers' bats were quiet. Stoll did not manage a hit, scoring two runs and stranding three runners on base. Coach Smith pointed out that this was only one of seven games this spring and the team will improve as the season progresses.

In the first game, Darin Laveau combining for five hits, five runs, three RBIs and two home runs. Laveau batted .500. The Pointer's defense was very solid. The Pointers will compete in the Drake Relays today through Saturday.

by Andy Goeehe

Staff Writer

Perfect weather conditions, solid team defense and outstanding pitching spelled victory for the UW-Stevens Point men's baseball team last Thursday at Bukolt Park in Edgerton.

The Pointers swept a non-conference doubleheader from St. Norbert, winning the opener 11-1 and earning the night cap, 2-0. One out, former Point native Shawn Sullivan of St. Norbert hit a ball up the middle for a base hit. Karst went the distance, pitching seven scoreless innings, only giving up two base hits, four bases on balls while striking out three batters in his second complete game of the season.

"Karst battled really well today," Handel said. "He didn't have his good stuff early, but he kept on fighting back."

Defensively in the nightcap, the Pointers played solid errorless baseball for seven innings. Handel added, "We were unable to get the big hit in game two but our defense was very solid and that was very important." The Pointers bats were in game two. UWSP had six hits, scoring two runs and stranding five runners on base. Coach Smith led the way going one-for-three with an RBI double. Ruchel went one-for-one with an RBI double. Ruchel went one-for-one with a sacrifice fly.

Point will return to conference action this weekend when they travel to UW-Platteville on Friday and UW-Stout on Saturday. Both games are doubleheaders. Pointers are scheduled to start at 1 p.m.

Baseball team sweeps St. Norbert

Lady runners capture Metric Invite

by Craig Roberts

Staff Writer

The UW-Stevens Point women's track team found the new polyurethane track at Simpson Field to their liking as they won the fifth annual UW-Eau Claire Metric Invitational Saturday.

"I was very pleased with the efforts and the performances of everyone," said Lady Pointer Coach Len Hill. "I was surprised that some of the times were as fast as they were in that we had a very hard week of workouts."

"This was a super effort in that she did not have anyone that could run with her," Hill said of Hoel's performance.

"She actually ran alone right from the gun. It was 93 degrees out yesterday. We had a very hot day, and the performances of everyone," Hill commented.

"I was very pleased with the efforts and the performances of everyone," said Lady Pointer Coach Len Hill. "I was surprised that some of the times were as fast as they were in that we had a very hard week of workouts."

Conference notes

MADISON—Keith Kulas has been selected as a Wisconsin State University Conference Scholar Athlete following winter sports competition.

Kulas, a senior in business administration and managerial accounting at UW-Stevens Point, represents basketball.

Kulas played on four WSUC championship teams and was named co-captain his senior year. Besides winning athletic awards, including the Most Valuable Player and high scorer, Kulas earned University Honors every semester on campus.

Besides winning the Elda Bark Walker freshman honor scholarship, the John C. Sera­nich sophomore and the Dean's List in 1986.

Kulas beat out Anthony Bourger of Sapier and Scott Thompson of Whitewater for the basketball award. Stevens Point's John Basili (hockey) and James Wayte (swimming) gave him stiff competition to the other two winners, Tom Griffith of River Falls in hockey and Steve Hollman of Eau Claire in swimming.

The Runner of the Week award goes to Kris Hoel of Ste­vens Point. Hoel, a junior from Cornell, placed third in the 5,000 meters in 10:34.30 and third in the 1,500 meters run. The 4x100 meter relay team of Beckie Sher­wood, Cheri Schopper, Enger and Willkom also took home a first-place finish.

Willkom, who was named as the Lady Pointers' field athlete of the week, was the top point-getter for Stevens Point as she collected 23 points in five events while anchoring the win­ning relay team. In addition to her two first places, she added second place showings in the triple jump and 200 meter dash while placing third in the javelin.

Intramural Insight

It may have taken 33 innings to play, but the Outrageously Outrageous softball team finally topped the Blasters for the title in the Big 8 intramural softball tournament.

Homerun queen Wanda Fisch­er led the Outrageous group with help from Donna Pitcher, and Kathy Ellis, who delivered the famous big. Other team members included: Mary Mill­er, Karla Miller, Debbie Shane, Deb Metzger, Gary Guasler, Mark Zander, Jay Christiansen, Dave Shepard, and Dave Daily. The IM staff would thank everyone who participated.

Upcoming events include an outdoor track meet which will be held on April 30. Ride/Stride is scheduled for May 1 and is open to men and women. Registration will take place at the event.
Netters split duals

by Karen Kulinski
Sports Editor

After winning a preparation match against Lawrence College, the Pointer men’s tennis team couldn’t deliver an upset win over Stout.

Stevens Point dumped Lawrence, 7-5, before being blanked by the Blue Devils, 9-6.

All of the singles matches were decided in two sets except for Bill Diehl at No. 1. Diehl won the first set 6-4, dropped the second 6-3, but captured the match by only surrendering two games in the final set. At No. 2 singles, Bryan Zowin only dropped two games, winning 6-4 and 6-2. Other Pointers winning singles matches were Gary Polston, Doug Greenberg, Peter Benedict and Steve Stone.

The doubles portion of the meet offered a little more excitement with the No. 3 team of Polston-Greenberg losing a tiebreaker. The pair easily won the first set 6-1 but were forced into a tiebreaker, which they won, 7-6.

The No. 3 doubles team of Benedict-Stone won the first set 7-6, lost the second set in a tiebreaker, which they won, 7-5.

The Pointers split duals against Lawrence College, winning 6-0 and only extending one match to three sets.

Against Lawrence, the No. 2 doubles pair of Polston-Greenberg lost a tight first set, 7-6, but won overwhelmingly in the second, 6-1. In the deciding match, the Pointer duo fell 6-3.

"Polston and Greenberg played very good doubles in order to come close to bumping off John Leethy-Mark Paine," said Droste.

Inability to win the deciding points was a major factor in the outcome of the Stout match.

"Overall, we lost most of the big crucial points at 3-3, which we had upwards of 25 during our matches," said Droste.

Droste named Greenberg as Pointer Player of the Week.

In a rare home performance, the Pointer netters host River Falls today at the SentryWorld courts.

Vandals destroy campus trees

by Chris Dorsey
Outdoor Editor

The recent stretch of warm weather in the area has prompt ed increased outdoor activity, but it hasn’t been enjoyed by everyone. Lately, vandals have been destroying trees on campus and it has frustrated at least one university professor.

During the last three weeks, says UWSP urban forestry professor Dr. Robert Miller, the incidents have been particularly bad. So far this year, six trees have been damaged and the vandalism is the worst Miller has seen in his 15 years at UWSP.

One vandal even went so far as to literally pull a young, big-tooth aspen tree out by its roots, said Miller. Other incidents include breaking stems and branches off several trees, but it was the destruction of a red bud, a relatively rare tree that is difficult to obtain and even more difficult to propagate, that particularly disappointed Miller. Each of these trees is worth about $50, said Miller, so it’s not only frustrating to see these trees destroyed, but costly.

Most of these trees are planted by students in campus organizations or by students in Miller’s forestry classes. Past President of the Student Society of Abercrombie Cory Rusch said, “It’s sickening to see the needless damage done to so many trees.” Rusch and several other members of SSA have expressed their anger about the current rash of vandalism.

If people only knew how much work goes into planting and caring for the trees, says Rusch, “They probably wouldn’t be doing the vandalism. It’s really disappointing because we have hopes of seeing these trees when we return 10 or 15 years from now. But at the rate the trees have been destroyed, I doubt we will.”

The majority of vandalism occurs on Thursday nights and during weekends, says Miller, and it has frustrated at least one student.

State hunters gear-up for gobblers

Stevens Point honored as Tree City

MADISON, WI — Twenty-two Wisconsin cities have been named as Tree City USA Communities by the National Arbor Day Foundation, according to Tree City USA Designation upon recommendation by state foresters. The communities qualify after meeting standards which include: adoption of a city tree ordinance; creation of a tree-planting body, funding of a city tree program, and observance of Arbor Day.

The Wisconsin cities honored are Appleton, Bloomer, Chama qua, Chippewa Falls, Eau Claire, Green Bay, Kenosha, Manitowoc, Marshfield, Meno sha, Merrill, Milwaukee, Neen ah, Oshkosh, Racine, Sheboy gan, Stevens Point, Tomahawk, Waukesha, West Bend, and West Bend, Frank said.

This swan enjoyed the waters at Iverson Park last week.

Spring is putting on a fine display throughout all corners of Wisconsin and this weekend should be highlighted by migrating birds and waterfowl, fishing activities of all types and mild weather urging many to the woods and waters of the state.

Of the activities to check out include fishing along the eastern coast of the state. Sheboygan County is reporting catches of brown trout with a few coho and chinook mixed in the bag. Suckers are running in the Pigeon River and smelt were being taken near the Port Washington power plant.

Panfish are moving into shallow water and anglers are reporting excellent bluegill and crappie success on most lakes in the Milwaukee area.

Near Green Bay, the warmer weather has helped pull clear young harbors of ice along the western shores of Door County. Brown trout are being taken by trolls working surface waters in depths from 10 to 30 feet. Smelt fishing has also improved.

Walleye are still providing activity on the Wolf River in Waupaca County. Some crappies are also being caught on the Wolf. In the Wisconsin area, mixed bags of perch, crappies, bluegills and bullheads are being taken on the west end of Lake Poygan. In the Madison area crappies are being taken on Squaw Bay in Lake Monona. Swans, cranes, ducks and numerous waterfowl are in the area. Bullheads are hiding on Yellowstone Lake in LaFayette County and on the Mississippi River backwaters in Grant County.

Lake Columbia is producing good catches of catfish and hybrid stripers. Wisconsin River fish activity is also improving with several mixed bags of bass, crappies, sauger and walleyes reported. Lake Wisconsin bays are providing panfish.

In the LaCrosse area fishing on the Mississippi has been rated as good. Largemouth bass are doing well, and it seems to start over Trivia weekend.

Anyone with information about the vandalism should contact Dr. Miller at 346-4189 or stop by his office in Room 328 of the CTR Building.

The season includes four, five-day hunting periods this year, which end on seven zones. The dates are April 22-25, May 3-5, May 10-12, and May 17-19.

The hunting hours listed in the 1987 Wisconsin Turkey Reg ulations are in error for the first four days of the hunt as daylight savings time began three weeks earlier this year. Hunting times for those dates are: April 22, 5:39 a.m.-noon DST; April 23, 5:37 a.m.-noon CST; April 24, 5:36 a.m.-noon CST; and April 25, 5:34 a.m.-noon CST. The hunting hours for the other dates are correct as listed in the regulations pamphlet.

The Nebraska-based Foundation honors entering communities with the Tree City USA designation upon recommendation by state foresters. The communities qualify after meeting standards which include: adoption of a city tree ordinance; creation of a tree-planting body, funding of a city tree program, and observance of Arbor Day.

These 22 Wisconsin communities are among 741 communities honored nationally for 1986 according to a report issued by the National Arbor Day Foundation.

Tree City USA communities receive a flag with the program’s logo and an engraved plaque. Winners also receive Tree City USA community entrance signs. The signs may be used by the community for a period of five years and maple leaf stickers will indicate additional qualifying years on the sign, a Foundation spokes man said.

“Trees add much to our communities. They provide beauty and shade, help reduce temperatures, cut noise and help clean the air. In many cities, over half the trees are on public property in parks and along streets," Frank said. "Tree City USA communities are to be congratulated for recognizing the importance of managing this valuable public resource.”

The National Arbor Day Foundation is a nonprofit corporation working toward improved tree planting and tree care programs throughout the country.
Three states recognize Wildlife Prevention Week

RHINELANDER, WI — The week of April 19, 1987, has been set aside by the leaders of three mid-western states and the Canadian province of Ontario as Wildfire Prevention Week. The states of Wisconsin, Michigan, and Minnesota have joined with Ontario to remind citizens that the springtime is the period of greatest concern for wildfires.

DNR North Central District forest fire staff specialist, James Miller, says, "Spring can be a particularly hazardous time for fires because many use fires to clean up debris and so forth around the house or farm. If the conditions are not just right, fire can easily get away from even the most experienced user."

Because of that, Wildfire Prevention Week is used to educate the public to respect fire as a valuable tool so long as precautionary measures are taken to "keep fire a friend and not a potential enemy." Miller says that rule should be applied all year long but that those who use fire should be especially vigilant this time of year. He adds and stresses, that before burning, a home or property owner must obtain a burning permit once the snow has disappeared. Burning permits may be obtained by contacting the local emergency fire warden or at a DNR ranger station.

Miller advises that the terms of the burning permit be followed closely. "If they aren't, individuals may be held liable for costs associated with the suppression of a fire that gets out of hand or any damages that might occur as a result of a wildfire." As Miller points out, "those costs could be considerable, which is reason enough to treat fire with great respect."

As a final note, if an individual should happen across or spot a wildfire in progress, they are asked to call authorities for help right away. Don't try to put out a fire by yourself. Similarly, if someone is spotted setting a fire, Miller reminds that the toll-free Arson Hotline may be used to get that information to the proper authorities. Please call 1-800-363-3005, if you suspect a possible arson case. Your name will be kept confidential, if you prefer.

Larry Long to entertain at UWSP Friday

Larry Long is an international minstrel rooted in the midwest. Like a troubador son of Woody Guthrie, Long has washed down the Mississippi to Natchez where old plantation mansions are crumbling in to the murky waters. He knows the migrant harvest workers autumn trail, beginning in the hot, dusty fields of Texas and cutting north through Kansas, Nebraska, and the Dakotas. This year Long troubadored on the first ever "Soviet/American Peace Cruise" on the historic Delta Queen Steamboat from St. Paul to St. Louis with 34 Soviets and 106 Americans. Next year Long will be performing on the "Volga Peace Cruise" in the Soviet Union.

As a performer, Long combines a contagious ambience of silliness mixed with seriousness that startles people prompting unabashed participation. In Long's music there is honesty and a freshness that you'd like to bottle and the world gets you down.

Long will be performing on the UWSP campus on Friday, April 24 from 8 p.m.-10 p.m. in the Wisconsin Room of the University Center. Stop by at Earth Tunes on the CNR's north lawn, Friday, April 24 from 11 a.m.-3 p.m., for a sneak preview of Long's music.
Point grad takes to peaks

by Dorothea Levandoski
Special to the Pointer

On June 10, 1986, Bob Levandoski, a UWSP graduate in paper science and engineering, entered his name in the climbers registry after having reached the top of Mt. Shasta in Northern California.

He and a companion were the only two of six climbers to make it to the summit that day. Following graduation in 1984, Levandoski was hired as a process engineer by the Simpson Paper Co. of Anderson, Calif. Equipment. The Levandoski was hired as a process engineer by the Simpson Paper Co. of Anderson, Calif.

London Program Increases Quota

UW-Platteville Study Abroad Office has announced that the quota in its London Program has just been substantially increased for the fall semester.

This program, which has been very popular with UW-Stevens Point students, has always been limited to 150 students per semester, and many students, therefore, have been turned away each year.

Now Ealing College of Higher Education, Platteville's London affiliate, has given the go-ahead to increase the quota to 200 students with a revised application deadline of June 1.

Interested students should contact the UW-Platteville Study Abroad Office right away--308 Warner Hall, UW-Platteville, Platteville, WI 53818, or (608) 342-1726. Qualified candidates will be accepted on a first-come, first-served basis until these additional places are filled.

Outdoor Notes

Free slide show

The Wisconsin Union Travel Center of the University of Wisconsin-Madison is sponsoring a free lecture and slide show on canoeing the new Ontario-Wakakini Provincial Park on Sunday, April 26 at 7 p.m. in the University Center on the campus at UWSP. Corky Siircho, long time canoeing enthusiast and organizer of Escape to Wakakini canoe trips, will give a presentation on past canoeing experiences and provide information on upcoming trips. For more information contact: Wisconsin Union Travel Center, Memorial Union, University of Wisconsin-Madison, 800 Langdon St., Madison, WI 53706. (608) 262-6200.

Public meeting

RHINELANDER, WI - The Department of Natural Resources has scheduled a public information meeting for May 7, 1987, at 7 p.m. in the County Conference Room of the City/County Building in Stevens Point. The purpose of the meeting is to gather public comments on the proposed use of herbicides to control woody vegetation and weeds on the Buena Vista, Leola, and Paul J. Olson Wildlife Areas in Portage, Adams, and Wood Counties. The purpose is to establish and maintain grassland habitat for greater prairie chickens. The proposal calls for the use of approved herbicides to be used during the course of each year.

1st Annual FLEA MARKET

Sat., April 25
5499 Hwy. 10 East
Stevens Point
9 A.M. - 4 P.M.
No Early Sales!
Crafts, Antiques, Amish Baked Goods, Food Stand & Lots of Rummage.
Proceeds To: Family Crisis Center Head Start Program

EVERYONE WELCOME!
Local outdoor action

Stevens Point Area
Several good catches of walleyes were taken on the Wisconsin River in the Wisconsin Rapids area during the week. There are indications that walleyes now are winding down their spawning activities. Some white bass are being caught in the Wisconsin River downstream from the Nekoosa Dam. Smallmouth bass are being caught on the Wisconsin River from the Biron Flowage upstream to Portage County. Anglers are cautioned that the muskie season on the Wisconsin River is closed.

Antigo Area
There is a major goose movement and high numbers of migrating ducks passing through the Antigo area. Woodcock mating rituals are in full swing.

Woodruff Area
The ice went out on all area lakes this past weekend. The weather, for the most part, has been mild and recent rains should temporarily dampen the fire danger. Campground crews are busy getting state forest campgrounds and picnic areas in shape for summer visitors.

Spring, from p. 17
are hitting and some white bass are biting around LaCrosse itself. Turkey gobbling activity is increasing with the warming weather and an excellent spring harvest is anticipated.

North central Wisconsin reports walleyes being taken from the Wisconsin River near Wisconsin Rapids. In the Antigo area a high number of migrating geese and ducks are being seen.

Last weekend the ice left Woodruff area lakes and recent rains have lowered temporarily the forest fire danger. Department crews are busy getting state forest campgrounds and picnic areas in shape for summer.

Smelt are starting to run in the Ashland area. Steelhead fishing in Bayfield County streams has been good, but the Brule River is rated as slow.

In the Cumberland area, northern pike have completed spawning and walleyes are passed the peak. Many lakes are one to three feet lower than normal because of the very dry winter and spring. Deer are now visible during evening hours and caution driving is urged as these deer are seeking the first green shoots of grass near roadways.

Happy Earthweek from the Pointer.

Desperately in need of graduation tickets. Call Gill at 344-2362.

Need 8 graduation tickets. Call 344-7665.

Wanted: up to 4 graduation tickets for May 17 commencement. If you have extras please call—I’m interested. Tom 341-3705.

Leave message if not home.

Large one bedroom apartment—perfect for 2 students close to campus. Laundry, free parking, 1 block from classrooms. Call Heidi 341-4428.

Student house for rent singles with doubles still available, 4 bathrooms, washer and dryer, micro, lots of parking, 1 block from Old Main. Call 344-6688.

Off campus housing. Fall and Summer. Close to campus. Singles and doubles. 344-7037.

Two girls need roommates for summer and/or fall semesters. Call 344-2012.

Hey South Deb: It’s time for the party you’ve all been waiting for. Don’t miss the 1st annual Circle Jerk Party! Buy your tickets now! It’s the day to party in the circle.

It’s here. The Tiger has come. Edgar Award winning author Jack Ritchie’s TIGER ISLAND will be on sale in the UC on the course of the week of April 27. Books will sell fast. Don’t wait! But beware—the Tiger is here. Linder, you little fox, I’m glad I had you for a roommate this year; I don’t even mind your seeds in the fridge. I know you’re going to go far. Don’t forget to keep in touch. Love ya, Dawners.

Amy Walsh: Ten months kind-a hard to believe. Hey—did ya figure it out yet? Love ya, Lyle

Miss McGee we’ll have a great summer together I can tell. Your favorite eena

Lenny the leach don’t be mad at me, remember it’s the paper. I’ll still cut down your trees to show I’m dedicated.

One, thanks for teaching me “the facts” on our long walks last year. I’ll miss you (and your gross muffin) next year. Have a good time with the stud who supposedly cracks your back and your living room floor.

Love ya, Dawners

Margaretia parts, knots parties, and secret probes and with the continuing saga of our love lives, lute rap sessions—I’m going to miss them all. Neen. You’re my best buddy and I’m going to miss your smiling face next year. But I will be back to you. Love ya, Dawners.

Sexy ass Fisk: Never fear the KGB is here. Secret probes and bougs have been in your respective summer residences.

One million dollar, jet transporting van can run away new. Love, the one and only P.S. We’re watching you! Tammi and Mark: Congratulations on your upcoming blessed event. We recommend Helen for your Myron. P.S. Great party last Friday.

Hey Coone: Good luck digest all that cellulose up in ‘dem der north woods. Love the one and only blonde.

Sexy: The one and only blonde has determined the world’s most perfect engagement ring has over 40 facets. I love you and trust you always. Heidi, P.S. I’m still starting.

Doughboy: Guess what? I love you...a lot. Love, Goodie

Doughboy: Last weekend was fabulous! I couldn’t of asked for a better time. The shooting stars were beautiful and so was the time we spent together. I love you, Goodie

To one of the D.C. boys: I missed you a lot over Easter. Stay close, from now on... we don’t have much time.

Hey, you—Me

Heidi: It’s your first personal from me—despite the injuries I got it in. Bruised and mangled. To my favorite Federal Express Man—this is two weeks in a row—have you checked your personal today? Where’s mine? Thanks for all the fun.

Kim: Timothy (Oops I mean Tim) R. from Rappers: Are you really as shy as people say you are or are you just pretending?

Kay: I made a big difference.

L.K.: Thanks to Santa-Bunnies. Good luck baby, on your upcoming exams—especially with the old war horse battle axe.

Experience Real Adventure!

Visit TIGER ISLAND

Learn more about this beautiful surprise-ridden island, its intriguing people, and its dangerous inhabitants through the pages of the suspenseful novel.

You won’t be able to put it down! Written by the Edgar Award winning author Jack Ritchie.

Books will be on sale the week of April 27th in the U.C. Concourse and in area book stores.

Published by First Class Publishers: A non-profit organization developed by Dr. Dan Dieterich and English 254 students.
You probably won't see this until after your tests but the thought was there. Have fun in Chi-town. I love you: K.S.K.

Michael Kurinsky: Thanks for the personal and my keys. Let's go to another Brewer game so I can get even. A fellow Sports Associate

Congratulations Karen on being a Razzleth. We're very proud of how fabulous you're being a career with the Career Services Office. Stop by 134 Old Main Bldg., or call 346-3356 for further information.

Tuesday, April 28
The Foreign Language Department, by popular demand, presents a replay of a French Play. Again from 1 to 4:30 p.m. in the PBR.

Sgt. Pepper’s at 7 in the Brass Hat, Allen.

The Foreign Language Department presents a French Play. Again from 1 to 4:30 p.m. in the PBR.

This year’s panel will focus on the positive aspects of being a minority student as well as the roles and relationships that exist within the Stevens Point community. The members of the panel are Casandra Mc-Craw, Walter Grain, Thomas Harris and Consuela Contreras.

Topics of discussion will include role models and leaders, athletics, academic achievement and community involvement. The in- tant of the panel is to share positive experiences from UWSP that may benefit minority stu- dents on other campuses.

U.S.-Israeli relations

What will be the impact of the recent flurry of espionage cases involving the United States? Will our foreign policy and reputation suffer in the long run?

Rabbi James Gibson will address this issue on Monday, April 27, in his presentation on the state of U.S.-Israel relations in the wake of the Pollard spy incident. A question and answer session will follow his speech.

Gibson has lived and traveled extensively in the Middle East, and has recently returned from Israel to his duties at the MT.

Minority Leadership Conference April 24-26
Students from UWSP will participate in the fourth annual American Minority Leadership Conference, April 24-26 at UW-River Falls. The members from Stevens Point will be the first to implement a student panel dis- cussion at the conference. The idea of the panel is to bring stu- dents together from different universities to develop better communication among minorities across the campuses in the UW System.
