CHRISTMAS

THE POINTER

DECEMBER 15, 1988
VOLUME 32 NO. 13
If someone was to compile a list of the five nicest people in the world, my girlfriend, Sammi, would probably make the top of the list. Take yesterday, for example. I was having a really great day and what did she do? Upon hearing of my distress, she ran into the kitchen and whipped up a batch of her own to be world famous Christmas Cookies — oatmeal raisin, shaped like Christmas trees — my favorite. She even sprinkled them with the little green sparkly stuff!

Last night, as she was washing the dishes, her last words had been, “don’t eat all of the Christmas cookies.” I laughed, “Who me, eat all of the cookies? I’ll only have one in the morning.” Given me some credit, I pleaded. She said, “Stud­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­­…
Absolutely thrilled

I am absolutely thrilled with Speaker Mike Mikalsen’s invitation for students to come forth with their criticisms of the Student Senate. The Dec. 1 issue from a “frustrated student” hits the nail on the head with its accurate description of the Senate. It is very unfortunate, however, that coming forth with criticism only leads to defensive insults from our speaker himself. The “guys in charge,” the representative of the Student Senate, instead of considering these criticisms or asking how he can work to improve the Senate’s public relations problem with both the students and the members of the Senate themselves, publicly turns on the students he claims to have done so much for.

The author’s withholding of a signature does not change the fact that the Senate can barely make its way through one meeting without argument breaking out. How many times a day she calls the SGA office does not change the fact that any time a student requests a campus organization or a new-forming activity has any dealings with Student Government they are put through such a ridiculous barrage of Perry Mason questions and scrutiny that they wish to avoid all contact with them from then on. What kind of support is that? Why does Mike Mikalsen purposely try to put the students of this university on the defensive, then claim he’s giving of his time to serve so proudly?

Speaker Mikalsen is absolutely correct in saying the Student Senate has accomplished some good things this year. Thanks to people like Ginger Wosnak, R.J. Porter, Cassandra McGraw or Sue Henrich, just to name a few, we can see encouraging and refreshing directions our Senate is moving towards.

But Senator Mikalsen is not justified in claiming their accomplishments as his own. His bullheaded, brusque demeanor in dealing with people who deal with the Senate is the source of complaint for students, faculty, local politicians and community members. He complains loudly about the tarnished image of the university and the students who attend it, and how we must look in the community, yet his own image needs a thorough polishing. It is unfortunate that his hypertirical attitude must prevail as the view of our entire Student Senate. Why doesn’t he consider what he could do to improve his own image and the image (sometimes) bad rap that the Senate has may disappear. After all, he is the key representative of the Senate as the position of Speaker of the Senate. This is his responsibility. Maybe then he’ll think less about attacking the people he urges to voice opinions. By the way, I did vote in the last SGA election. A frustrated member of SGA

TWO MEDIUM PIZZAS
with cheese and 1 topping
$829

Addtional topping, just $1 extra per topping—cover both pizzas. Valid with coupon at participating Little Caesars. Not valid with any other offer. One coupon per customer.

Excludes extra cheese. Expires December 29, 1988

Church Street Station 345-2333 Stevens Point, WI
LIMITED DELIVERY AVAILABLE
Check our everyday lunch specials with sandwiches, salads & pizza by the slice 11 a.m.-11 p.m. Friday & Saturday until 1 a.m.

MIX OR MATCH!
USE THESE COUPONS FOR:
• PANPIZZA (2 SQUARE PAN PIZZAS)
• PIZZAPIZZA (2 ROUND PIZZAS)
• OR ONE OF EACH (1 SQUARE PAN PIZZA AND 1 ROUND PIZZA)

At Little Caesars you always get 2 pizzas—
one low price.

Scholarship fund for overseas study

A new scholarship program has been announced at UWSP to assist students who could not otherwise afford the cost of participating in overseas study programs.

The fund has been named for Professor Helmi Corneli, who has spent the past seven years as director of the UWSP Office of International Programs. She is returning to full-time teaching in the Department of English.

Friends of Cornell donated about $2,000 to establish the new scholarship fund, and announced its formation this week during a surprise reception for her in the Founders Room of Old Main.

Tax deductible contributions will continue to be received for the fund in the Office of International Studies. Checks are to be made payable to the UWSP Foundation.

In addition to announcing the new scholarship program, Mark Koczaga, assistant director of International Programs, presented Corneli with a plaque "in honor of your extraordinary service in inspiring us to look beyond ourselves; to see ourselves as members of the global community with empathy and appreciation for all cultures." UWSP has semester study programs in England, Germany, Poland, Spain, Greece, Taiwan, Australia, and the South Pacific. Cornell arranged for the establishment of the offerings in Greece, Australia and the South Pacific; plus an interim study course in Costa Rica during late December and January.

At the time she announced her plans to leave her administrative position and return to the classroom, she said that the declining values of the dollar in foreign markets and tighter eligibility standards for student financial aid have taken a toll among participants in the programs she supervised. Hence, her colleagues' decision to establish the scholarship fund.

Corneli experienced living as a young person and has always recognized the benefits of it. She was born in India where her father was the third generation of his family to serve in a Church of Christ missionary. After her marriage, she and her husband, Kip, lived in Paris where he studied agronomy. The couple lived abroad seven years later when they led a semester abroad program for UWSP in Taiwan.

Helen Corneli is in her 27th year as a member of the English faculty on campus.

Lang elected to American Chemical Society

A UWSP professor has been elected a director-at-large of the American Chemical Society (ACS), the world's largest scientific society devoted to a single discipline.

C. Marvin Lang will begin his three-year term on Jan. 1, serving on the board with 11 other directors plus the president, immediate past president and president-elect.

The ACS has 157,000 members and a budget surpassing $167 million, with approximately 3,000 employees, most of whom are located at the Chemical Abstracts Service in Columbus, Ohio. The national headquarters is located in Washington, D.C.

Lang was eligible to be elected to two additional three-year terms, said he hopes to be involved in the Society's international, public affairs and chemical education activities.

"This is a great honor for Mary and me," said Chem-  cellother Philip Marshall, a chemical himself. "It recognizes a lot of dedicated service to his profession and the organization," he added.

The Myers-Briggs Type Indicator is a valuable tool

Willard and Sam are college freshmen rooming together in a residence hall. Willard is a down-to-earth, practical, analytical person who possesses a knack for managing facts and details. He takes great pains to systematically organize his personal belongings and he lives his life according to a schedule.

Sam is sociable, outgoing, enthusiastic and creative. He has difficulty with details and appears disorganized. His study habits are erratic and he enjoys interacting with a variety of people all hours of the day and night.

Can this odd-pair learn to live together peacefully, or will they split up a week after school starts?

An administrator at UWSP says the relationship is salvageable— the roommates may even become friends with a little help from Myers-Briggs.

The Myers-Briggs Type Indicator (MBTI) is a tool designed to assist people with varying personality traits learn to interact more effectively and live together more amicably. Fred Leaflain, Assistant Chancellor for Student Life, has given the MBTI to several groups coming to the program at UWSP.

The MBTI, which Leaflain introduced on campus about 12 years ago, was developed by a mother-daughter team, Katherine Briggs and Isabel Briggs Myers. Based on the personality traits first pointed out by the Swiss psychologist Carl Jung in the 1920s, it has been used in higher education, business, military, and with couples and families. More than 4,000 people throughout the world, members of the Association of Psychological Type, are MBTI practitioners.

The first step in rectifying Willard's and Sam's situation would be the completion of a questionnaire. Individually, they will answer more than 100 questions about how each one feels or acts in certain situations.

For instance, "In a group, do you often introduce others, or wait to be introduced?" "Do you find it harder to adapt to routine or to constant change?" "Would you rather work under someone who is always kind or always fair?" All freshmen are asked to take the MBTI when they enter UWSP.

The test measures whether people are extraverted or introverted, sensing or intuitive, thinkers or feelers, perceivers or judges. Extraverts pay more attention to the outer world of people and things, introverts are more attuned to the inner world of ideas and feelings. Sensors turn in to detail, while intuitors focus on the big picture. Thinkers make decisions based on logic, feelers do more subjectively. Perceiv­ ing individuals tend to be flexible and to collect a lot of infor­ mation, judgers want to settle things. People can be categor­ ized into 16 personality types according to these four main pairs of characteristics.

Sam may be an ENFP (Ex­ travert-Intuitive-Feelers- Percep­ tion) and Willard an ISTJ (Introvert-Introvert-Thinker-Judger). Following the test, the roommates will meet with a counselor who will discuss their test results and help them find ways to understand and accept each other's behavior.

Since the test is a self-reporting tool, it is important for indi­ viduals to work with a trained consultant who can verify the results and help the participants apply the findings to themselves and others. Leaflain's assistant, Rob Bassant, is an MBTI facilitator on campus. He estimates that he works with 800 to 800 students, plus faculty and administrators, each year.

At UWSP, the MBTI has been used with students associations, faculty groups, dormitory staffs and residents, administrative groups, office units and for career planning.

Bassant says the program helps people to know themselves better and to see the world through the eyes of others. It enables individuals to app­preciate personal differences rather than becoming frustrated by varying styles and ap­proaches.

In an office situation, for instance, the work is better co­ordinated with all types of people, according to Leaflain. While participating in the MBTI process, one unit on campus listed all the area's job duties on a board and then took turns pick­ ing the tasks each person would like to perform. Using this technique, participants re­created their job descriptions, enabling each person to get more favorable tasks and fewer onerous ones on their lists, increasing efficiency and creating a happier staff.

At UWSP, the program also has been used by teachers to modify their approach in the classroom. Teachers teach according to type and people learn according to type. The best learning situation is to have a good fit between teacher and student, according to Leaflain.

He says people tend to think their way of behaving is wrong. Taking the test and having it evaluated helps to create toler­ ance of opposite behaviors, al­leviates stress, verbalizes feelings and look at reasons for why oth­ ers act the way they do. Then, compensation may be arrived at. He says the secret to using the MBTI is to recognize individual gifts, realize we are all different, learn from others, and focus on positive interac­tions.

MERRY CHRISTMAS TO ALL! SANTA'S COMING!
Some ability more stroke each year of men. More than 250,000 of them the number one cause of death moderate-aged coronary heart disease (usually heart disease specifically cholesterol, high blood pressure and cigarette smoking. Furthermore, high blood pressure is the single most important risk factor for stroke, the third leading cause of death among women. More than 100,000 women die of stroke each year.

A "risk factor" is a characteristic that increases the probability of developing a disease. Some risk factors such as age, sex and family history for a disease cannot be changed, but others can.

The three major risk factors for the development of coronary heart disease are elevated blood cholesterol, high blood pressure and cigarette smoking. Furthermore, high blood pressure is the single most important risk factor for stroke, the third leading cause of death among women. More than 100,000 women die of stroke each year.

Research has shown that black women are at increased risk for heart disease and stroke. Black women have nearly double the stroke risk of white women and from two to three times the risk of death from heart disease than do white women.

Awareness of these risk factors and of their prevention and control is the first step toward reducing the chances of developing these diseases.

In fact, death rates from heart attacks and stroke have been declining over the past few decades. In 1980, the death rate for women from heart disease was 35% lower than in 1970. During the same period, the death rate for stroke decreased 39%, and this trend is continuing. So consult your physician to determine the extent of your risk factors and the ways to control them.

Women: heart disease and stroke
by Darian Brown

Contributor

Heart disease (specifically coronary heart disease) usually is considered a disease of middle-aged men, so it may be surprising to learn that it is also the number one cause of death among women. More than 500,000 Americans die each year of heart-related causes; more than 250,000 of them are women. That is a larger number by far than deaths of all forms of cancer combined. In addition, more than 100,000 women die of stroke each year.

A "risk factor" is a characteristic that increases the probability of developing a disease. Some risk factors such as age, sex and family history for a disease cannot be changed, but others can.

Students are pictured in a collage of dances representational of the variety of styles featured in "Afterimages," a concert choreographed and performed by faculty and students, Thursday and Friday, Dec. 15 and 16, at the University of Wisconsin-Stevens Point. Dancers, from left to right, are:

front row—Paul Nygro of Franklin and Kelli Cramer of Wisconsin Rapids;

second row—Beth Papacek of Lakeville, Minn., Geri Kipydowski of Milwaukee, Sara Ebba of Wausau, Tara Volk of Barneveld, Minn.;

third row—Nicole Kirchner of Marshfield, Scott Schoenag of Milwaukee, Lisa Moberly of Brookfield and Alan Petras of Ladymith.

In addition, Graziano has created "Boom Before the Burst," set to Charlotte Suite," composed by Leon Smith of the UWSP music faculty. The choreographer says the piece is a metaphor for the breakdown of society during the heyday of American society, before the Stock Market Crash of 1929. It was selected for performance last month at the Wisconsin Composers and Choreographers' Alliance Concert in Madison.

Theresa Dorangrichia of South Milwaukee has choreographed a 1960s "fun" piece to rock music of that era. It will be performed by seven women and three men.

Dennis Schultz of Baraboo, Jodi Kobaek, Stevens Point, and Guy Adkins of Chippewa Falls have collaborated on "Shadow," performed by Schultz and Adkins. A modern, ecstatic piece set to contemporary music, it tells the story of a shadow which draws the life's blood from a man, kills him, then dies with him to sustain him. "Smooth Criminal," created by Scott Langefelt of Seymour, takes place on a dimly lit New York street corner where the citizen, one by one, are slain by a criminal. The piece is about violence, determination and eventual victory over the aggressor. Thirteen dancers will perform to the music of Michael Jackson.

Features Writer

Snow is on the ground, ornaments are in the tree, Jack Frost is nipping at our respective noses and somewhere in the world, chestnuts are roasting on an open fire, and Christmas time is here. The joyous holiday season of gift giving, togetherness and peace on earth is upon us. Or maybe it's the frightening holiday season of commercialization, head colds and frayed nerves. I always get the two mixed up.

Anyways, as you plan your shopping schedule around Rudolph's visit to the Isle of Misfit Toys, A Brady Kind of Christmas and thousands of showings of It's A Wonderful Life, don't forget to make room for the story that's destined to become a Christmas classic, It's Gonna Be A Capitalist Christmas. Yes, a brilliant new Claymation holiday special with thrill, chills, spells and catchy little songs. For those of you who just won't be able to fit this terrific new bit of Christmas cheer into your mid-December rush of activity, we now present a plot summary so you too can have your heart warmed:

The activity in Santa's work shop had grown enormously during the past few weeks as Christmas had drawn closer and closer. All the elves were running around the big work tables as fast as their little legs would carry them. Santa was desperately trying to catch up on his paperwork since a computer virus had set him back two weeks by putting naughty boys and girls on the nice list, putting nice boys and girls on the naughty list and creating an all-new grouping, the no-so-list. All this hustle and bustle came to an abrupt halt when the front door of the workshop was pushed open and in walked a man wearing a business suit with the letter "T" emblazoned in gold on the left breast pocket. He walked right up to Santa and offered his hand. Glad to meet you, Mr. clones, he said with a smile. It will be a pleasure working with you.

What do you mean? asked Santa.

I just bought your company, the man announced. But we're owned by Religious Holiday Incorporated, Santa protested.

Not anymore. They decided that your outfit here wasn't serving their best interests so they sold you off and I'm the guy who snapped you up. Picked up Easter as well. That rabbit sure is an irritable fellow, isn't he?

Now just wait a minute, said Santa. This has to be a mistake.

Nope, no mistake here. I'm the new owner. And there's going to be a lot of changes around here too.

Like what? asked Santa.

Well, for one thing, we're changing the name of this location to Trump Pole. Yes, that's much better. And this shop will be called Trump's Workshop.

What?

Yes, and we have to start a major media campaign. I've arranged for Mrs. Claus to have a cover story in People magazine and for you to go on the David Letterman show.

David Letterman?

And maybe Donahue too, but that's not final. Oh, and I talked to NBC and they said they'd get Rudolph a guest shot on the Cosby Show.

It's at this point that Santa faints and we get our first commercial break. The second half of the show begins featuring the Rudolph and Trixie campaign and Christmas day itself. In the end, the man who bought Santa's business makes a lot of money and is happy. Rudolph gets critical acclaim and an Emmy nomination for his role as Santa. The show begins dating Molly Ringwald and is happy. And Santa gets a headache, winds up on Geraldo instead of Donahue and is miserable.

And all of this is coming to a twelve-inch screen near you. Merry Christmas, everybody.
1988 Milwaukee Holiday Folk Fair

by Paul Eichelkraut

The Milwaukee Holiday Folk Fair; a chance for people to experience and see the world without packing a suitcase, applying for a passport, or buying an expensive airline ticket. It was an experience that I, and everyone else who went, will never forget.

While wandering through the great Mecca and Convention Hall, I learned much about the cultures of many different countries, some of which I had never heard of before! Did you know that "budge schools" were illegal schools during the time of learning prohibition in Ireland? They were taught behind stone fences so that the pupils and teacher would not be seen. And contrary to popular belief, Count Dracula was not a blood-sucking ghoul, coming out only at night, transforming people into creatures like himself. In actuality, he was a Romanian prince who had a quick temper and put his enemies' heads on wooden stakes for the public to view after he had killed them. This was a symbol to all that he, being a country ruler, was powerful and in absolute control. He who betrayed him or wasn't doing what he ordered was either killed or tortured. His name was feared throughout Europe and today, along with many other legends, he is symbolized as being a "vampire." I also learned that "glog" is not something that comes from slime molds, but is a Swedish hot cider Christmas drink that tastes good on those cold many nights in front of a crackling fire.

As we first walked into the Convention Hall, we saw excitement. There were booths with food from 32 countries such as Latvia and Lithuania. On the second floor, "The World Market" offered clothes, hats, shoes, mittens, ornaments, dolls, jewelry, glassware, maps, toys and much more from countries such as Holland, Poland, Germany, and Spain. The second floor also housed the Coffee Room with many different brews and international desserts. While socializing, one could dance to the Venetian music being played here. ATK&T also provided free two-minute international calls anywhere in the world. As if all this wasn't enough, spectators could walk across the skywalk to the Mecca Arena Center and enjoy the many different melodies being played in "Old Pabst Park," while ethnic dancers danced before a huge audience. Periodically, old-fashioned polkas and waltzes would be played, allowing young and old to dance and have a great time! In the Ju-
ness Hall, just around the corner, hourly demonstrations in areas such as kite making, Indian palm painting, making of Polish Christmas ornaments, international folk dancing and even conversational Japanese. Last, but definitely not least, in the Mecca Arena was the "Folk Spectacle Performance," where all foreign dancers performed in front of an eager, waiting audience. India, being the 1988 Folk Fair honor country, performed many intriguing dances; one of which was a ceremonial

Sleigh bells ring: Are you listening?

By Dean Overacker

Twas the night before Christmas when all through the house, not a creature was stirring, not even a mouse. The children were nestled all snug in their beds, while visions of sugarplums danced in their heads.

The cause of death this month of an 8-week-old girl was listed as Sudden Infant Death Syndrome. But the medical examiner could just as truthfully have summed it up in one other word: cocaine.

Mamma in her kerchief and I in my cap, had just settled our brains for a long winter's nap. When what to my wondering eyes should appear, but a little old driver so lively and quick, I knew in a moment he must be Santa Claus.

Autopists showed a salvage yard operator, found dead with his wife, was bludgeoned to death, but failed to reveal what killed her, authorities said.

So up to the house top the couriers they flew, with a sleigh full of toys and Saint Nicholas, too. And then in a twinkling I heard on the roof, the prancing and pawing of each little hoof.

A fraternity has apologized for a mocking at Centre College that had racial overtones and members said they are waiting for their punishment.

His eye, how they twinkled! His dimples, how merry! He had a broad face, a little round belly that shook when he laughed like a bowl full of jelly.

And then is a twinkling, I heard on a door
The knocking and knocking of knuckles so sore.
As I walked to my room and was turning around
Down the hall Stan came with a bound.
He was dressed in his uniform
And pizza stains told me of all his woes.
A bundle of pizzas he had on his back.
And he looked like a peddler out on attack.
His eyes how they squinted, his dimples how warry
His cheeks were like flour, his nose so hairy.
His little mouth was drawn up in a scowl
And under his chin he had shot a jowl.
The stub of his pen he held tight in his teeth
And the ink it encircled his mouth like a wreath.
He had a round face a real chubby belly.

Twas the night before finals,
When all the students were wondering
To give objects around a serial tune.
When what to my wondering eyes should appear
But a miniature box and eight tiny bears.
With a little old smile and the nameplate said "Santa"
I knew in a moment, the Dometos Mane.
More rapid than eagles his routes he must make
And make him be must not take a mistake.
Now Kruezers, then Steiner, then Baldwin and Watson
Next Burroughs, and Hansen, then Ryer and Thompson.
To the top four floors to the top of them all
Now dash away, dash away, dash as they call.
As late students for their classes do run
Poor Stan was having almost as much fun.
Up to the "dorms" he must race and must drive,
With a carload of pizzas for us to survive.

THE POINTER PROFILE is a new section of our newspaper. If you would like to have a professor, friend, mother, father, wife, husband or anyone interviewed for The Pointer profile please send name, address and phone number to The Pointer 104 CAC.

**Name: Gabrielle Wyant-Perillo**
Staff Position: Editor-in-Chief

As you read the profiles of The Pointer staff it becomes clear who is the same one in this operation.
Gabrielle is a communication major with a minor in creative writing.
Since 1985 to present she has been the manager of The Radley House, a quilt/fabric shop in Waupaca.
She has a mother and father, Anthony and Harriet. She also has three sisters and one brother, Roxanne, Michele, Sandra and James. Four in-laws, Tom, Bob, Ken, and Nancy. A bunch of nieces and nephews, Ian(10), Dominique(7 almost 8), Erin(7), and Anthony(ii almost 3), and a dog, Ch'iuming.
Gabrielle enjoys publishing, Alabama, pattern publication, preparing for trade-shows, triathlons and Yogi Boyer.

Note: wallhangings such as above can be purchased through The Radley House!!

**Name: Brenda Boutin**
Staff Position: Senior Editor

Ms. Boutin is a senior majoring in Communication.
In September of this year Brenda was asked to join The Pointer staff. Her experiences are endless.
Brenda is 5'3", blonde hair, blue eyes. She is not at blond as she looks!
Ms. Boutin is single and looking.

You better hurry because she graduates in May.
If you need someone to talk to, she's just the person to do it!

**Name: Rich Feldhaus**
Staff Position: Advertising Manager

Rich is a boy. We wear boxers and combs.
In his spare time he sometimes works at The Pointer selling advertising space to local businesses.

Who loves ya babe??

**C. Troy Sass**
Staff Position: Graphic Artist/Layout Design

"My goal in life is to become just like my idols... Jimmy Swaggart & Jim and Tammy Baker. I will rob from the poor and disillusioned. I also hope to build my own amusement park where Sammy Davis Jr. will always be allowed in free!!"

---

**Editors Note:** Thank you for your support, wisdom, charm and wit.
Rich is a boy. We wear boys' shorts and like to frolic nude on the open prairie. Most of his time is spent finding that perfect open patch of land in which to joyously run.

On the dark side of Rich's character is his violent temperament. He has been observed smashing several freshmen skulls and spreading their brains over sidewalk slabs as ifuttering toast.

In his spare time he sometimes works at The Pointer selling advertising space to local businesses. Who loves ya babe?!

Tim is a junior majoring in Communication and a career college student, having attended UWSP in 1981. Tim has taken several vacations from school, including a three year stint in Jacksonville, Florida, where he worked on the staff of the Gator Bowl University of Florida.

He feels that as outdoors editor, he will be able to draw upon what he has seen in conservation and outdoor recreation. Among his past activities are two cross country ski trips and going on a fishing trip in sixth grade.

Mike is a seventeen semester junior majoring in Field Social Science. Although he will be as cool as Stud Weasil... he won't lose his coolability.

Bryant is a senior majoring in Communication and a career student, having attended UWSP in 1981. He is a copy editor. Bryant feels that as outdoors editor, he will be able to draw upon his vast experience in conservation and outdoor recreation. Among his past activities are two cross country ski trips and going on a fishing trip in sixth grade.

Kathy was recently honored in her hometown of Pittsville, WI, for capturing first place in the Central Wisconsin Seed Spitting contest.

The entire Pointer staff is very proud of our Kathy!

Ami a senior English major who is hell-bent on becoming a pop rock music star while raising seven kids and a dog.

"Smooth as peanut butter" is how The Pointer describes Amy.

Amy is a living legend at The Pointer office with her incredible witt and unbridled beauty. Amy will go as far as she can see.

Bill Roeber is a Communications major and will graduate in May. Tim is in search of... ah... well...

Pointers split LaCrosse, Eau Claire

by Jimmy Cullen

Sports Columnist

On Friday night the persistent Pointers outscored the previously unbeaten LaCrosse Indians 35-3 in the last few minutes of the game, as they defeated their opponent 73-68. An enthusiastic crowd cheered the Pointers on to what would have been an upset of the highly touted and nationally ranked Eau Claire team, but the Blue-golds proved to be too hard to handle, as they defeated the Pointers 80-61.

Although the Pointers shot a meek 34 percent (22-61) from the floor against LaCrosse. They shot a blazing 34 percent (25-71) from the free throw line, as LaCrosse had to resort to fouling Pointer players, instead of allowing the penetrating offense of Point to free baskets. This strategy backfired on the Indians as 14 of the Pointers last 20 points were a result of free throws. The first half of the game was relatively foul free, as only 13 fouls were called in the entire half, compared to 27 witnessed fouls in the second half. In this first half of play Jon Julius and Scott Anderson each scored 10 points. Anderson opened the scoring for the Pointers with a 14 jump shot and scored seven of the Pointer's first fifteen points in the early going. Julius, on the other hand, scored eight of Point's last 10 points with his last two points of the half coming off a feed from Michael Lehman (11 points in the game) where Julius scored the half in. The Indians scored the first basket of the game, but that would be the only time they would lead the entire half as the Pointers went into the half with a nine point lead and led 35-26 at the half.

LaCrosse finally regained the lead, 46-45, at the 11:50 mark of the second half. The Indians were able to tie the game at 50-50 before Pointers built up to eight points twice in the next eight minutes. The Pointers didn't give up though and because they relentlessly drove towards the basket, the Indians constantly fouled them and enabled Point to tie the game with just less than three minutes left, and eventually regain the lead and secure the victory on the free throw line.

On Saturday night the Eau Claire Blue-golds entered Quandt gymnasium with a 5-1 record and undoubtedly were looking to revenge their previous nights defeat by Whitewater. If this was their intention they succeeded. The Blue-golds shot down two of the most potent for the Pointers, Anderson and Julius, as Anderson, who scored 14 points against LaCrosse, only had six against Eau Claire, and Julius, who scored 29 against LaCrosse, only found the hoop twice for four points.

The Blue-golds controlled the tip and the game as they never relinquished the lead from the seventh minute. Although Jim Glazner and Mike Hatch scored 15 points each for the Blue-golds, the Blue-golds had four players in double figures and shot approximately 60 percent from the floor. The Pointers shot only 43 percent (21-49) in the game. Eau Claire used a pressure defense to help them win the game as this defense at times seemed to confuse the younger Pointer team and resulted in Point committing 14 turnovers to Eau Claire's 11. The Blue-golds were also able to block six shots by the Pointers.

The Pointers gained an early lead of 21-11 over the Pointers by turning two Pointer turnovers (steals) into easy lay ups, two more lay ups off of set plays and two 3 point field goals along with a dunk accounted for a partial of their 23 points. A time out after a technical foul on the Pointer's bench seemed to spur the team on as the Pointers cut the lead from 22-11 to 31-23 with just over four minutes left in the first half. This led the Blue-golds coach to reinstate his team to its starting lineup, he had previously replayed many of the starters with players off the bench, wherein they built their teams lead up to 11 points by the half 43-32.

Although the Blue-golds encountered foul trouble early in the second half, the Pointers were in the bonus with less than seven minutes gone in the second half. Their taunting defense enabled them to build a point lead at the 14:56 mark. Two timeouts by the Pointers in this final half did not have the same result as the one they had called in the first half, as both timeouts did not allow the Pointers to cut the Blue-golds lead. Instead, it seemed to urge the Blue-golds to play harder and this resulted in them building on their lead.

With 1:46 remaining in the game, Coach Bob Parker of the Pointers conceded the game to Eau Claire, as he made full substitutions of his starting team. His final score read 81-46 Eau Claire.

The Pointers now stand at 1-1 in the WISUC and are 1-3 overall. The Pointers will play seven games over the semester break with four of these games being at home. Coach Parker said, "I'm very pleased with the team so far, we have nine freshmen on our entire squad of 14 and their moral is just great." Coach Parker also said, "the team is getting along real well together and next semester Tom Rowe, a 6-9 and 240 pound junior center will join the team."

Women swimmers victorious over Titans

by Sam Segel

Propelled by double-winner Debby Hadler, the UWSP women's swim team claimed a decisive victory over UW-Oshkosh last Tuesday. Hadler's victories came in the 1,000 freestyle in a time of 11:38.71 and 200 freestyle in a time of 5:38.77.

Diver Tricia Wentworth added to the score by claiming first places in both one- and three-meter diving. Overcoming a year-long illness, Ann Bensen placed first in the 50 freestyle in 27.57 and second in the 200 backstroke in a time of 2:33.30.

Two swimmers qualified for the upcoming national meet in March. They were Teri Calches and Markie Glowniak in the 200 breaststroke and Janet Getnick in the 200 butterfly. Both swimmers placed first in their respective events. Another notable performance was that of Anne Watson in the 250 breaststroke in a time of 2:46.1.

She provided the team with more first-place points. Other notable performances came from sophomore captain Stephanie Iwan, as well as Pam Gilford, Michelle Steed, Karla Lenatke, Darcey Hessenthalger, Kelly Hess and Karlie Renniewicz. The women's victory against Oshkosh completes their first semester schedule. Their next competition will be against Georgia State University in mid-January.

Dogfish dominate Oshkosh

by Sam Segel

Andy Connolly covered both sides of the spectrum last Tuesday by swimming first-place finishes in the 100 and 100 freestyle. Connolly's time of 10:22.54 in the 500 was his best of the year. Even more impressive was a 49.50 second place in the 100 butterfly. He covered in :48.99.

More than Connolly's time, was his defeat of one of the country's premier sprinters, 8'8" Tom Huebner. Huebner's natural height advantage seemed only to act as an impetus for a much shorter 5'10" Connolly. Huebner, who was ahead by almost a second at the wall-way mark, was overcome in the last 10 yards of the race by Connolly, who set his head and did not breathe for approximately eight yards.

Other top performances came from junior Dave Martorano in the 200 individual medley and the 200 breaststroke. After coming off of two difficult seasons, Martorano is having the best season of his career, and is providing inspiration for the entire team.

Coming off of an injury, Mike McLellan achieved 22:51 in the 500 freestyle, his best performance in that event this season.

Diver Scott Thompson triumphed in both 1 and 3 meter diving, both excellent performances.

Tom Zeno achieved his best time of the season in the 200 butterfly in a time of 2:04.67. Freshman Paul Kramer placed first in the 200 breaststroke in a time of 2:32.67, his best time of the season. Freshman Jamie Weigel placed first in the 500 freestyle in a time of 5:46.22.

Other impressive performances were contributed by Toby Skow, Tom Worthis, John Below, Scott Krueger, Jim Chamberlin, Bill Pursell and Sam Segel.
Women’s b-ball undefeated in conference by Kevin Crary

"It wasn’t pretty, but we’ll take it," 12th-year coach Anne Kaiser sums it up. The UWSP Women’s Basketball team, playing their first conference game of the year, defeated visiting UW-Stout, 70-59, Friday in Berg Gym, despite what Coach Kaiser describes as the worse team she has played all year.

The 118 people attending the game were witnesses to 57 turnovers, 21 of which were Stevens Point’s.

Point came out a little on the cold side as they found themselves down 7-4 after the opening three minutes. But it was Point who put a chill in Stout for the next six minutes, as they went on a 14-4 run that put them ahead 18-7, giving them a lead that would never be broken.

"We all knew we had to win, solutely, when we needed to and got the job done," explains Kaiser.

Deb Metzger, Point’s 5 foot 8 junior guard, earned game-high-scoring honors by turning in 31 points for the winners, including a six for six shooting from the floor. Tricia Peake tied 11, followed by Barb Bronnette and Amy Felauer with 11 each.

Stout was led by Lisa Schuetz with 17. "She (Metzger) has had to come alive for us. With Cheryl (Gross) being out, we had to move her from the perimeter to the paint and she loves it. She’s got a lot of heart and a great attitude," Kaiser said.

In the second half the Pointers’ used the free throw given to them by Stout to build a 19 point lead with 5:35 remaining in the game. Point scored 36 of 36 free throws finishing over 99 percent. Metzger converted on 9 of 13, Amy Felauer made 7 of 7.

Stout gave Point a scare, however, by reducing the margin to just seven points on three occasions, and a steal resulting in a break-away lay-up. But two key free throws each by freshman Abby Panosh and QUANDT Turner, insured the Point victory.

The Pointers will remain idle until January 27th when they host Osuahk.

In college basketball, the rankings have come out weekly for the last month and a half, but what good are they? The best measure for the top team in the country is how well it holds up to top-notch competition.

Among the "Division I" teams which have lost to top ranked competition are: James Madison (now 6-4), Jackson State (1-9), Western College and Chicago Circle. Why are GeorgiaTech, Iowa, and many other ranked teams playing competition like this? Probably just to get some good roads under their belts to look good for the polls.

That takes care & Striking Out for the season. Merry Christmas to all!

Outdoor report

Eco-Briefs by Cindy Byers

Outdoor Writer

One important environmental event to remember over Christmas break is the winter solstice of Dec. 21. On that day at 3:20 p.m. the long slide to short days begins and it will take another four months to get longer again. Because of the lag between astronomical events and climatological ones, the average weather won’t be too good for another five weeks—in late January. That means there will still be plenty of cross-country skiing opportunities for you!

Just two days before Christmas will be the full moon. It has long been folk tradition to name the full moons and this one is no exception. It could be called the “Moon Before Yule,” “The Long Night Moon,” or “The Cold Moon.” Each one is a good description of the winter season! As you have probably noticed, it is dark earlier in the winter and does indeed travel a higher path in that sea- son’s sky. That means there is no making up for the absence of the sun.

This Christmas season is one more thing that has been affected by the drought. It seems that there has been a great increase in tree hunters for the demand, but even future years may feel the dryness we experienced. Foresters in Pennsylvania reported that even some older trees are resisting fast, tall felled out. Pruning was also difficult as trees grew more laterally than straight up, because of the hot summer weather.

Land Trusts and conservation efforts have been sprouting up across Wisconsin in an effort to protect open lands. This is to insure that Wisconsin’s present and future development doesn’t threaten the pastoral landscape we all like to see over the Christmas season.

New Hampshire recently has a Land Conservation Investment Program (LCIP). This program is designed to purchase development rights for salt marshes, forests, open spaces, and other unspoiled natural areas. So far, it’s working and has been hailed as an economical, innovative way to protect open lands.

There are many areas in Wisconsin that have been preserved through public and private efforts. One such area is the Ridge Sanctuary in Baraboo. Baraboo Harbor is the unique location and orientation to the Sun, that will provide forest or forested land to grow there. Most forested forest growth hundreds of miles north in Canada. A good Christmas gift might be to plan a trip in the near future or for a future-winter for self-sustained hunting.

MADISON—A nearly empty state park, the silence broken only by the cracking of a fire, the rustling of snow, the falling of a snowshoe, or the pecking of a woodpecker.

Too good to be true? Not for those campers hardy enough and well prepared, to enjoy winter camping.

Twenty Wisconsin state park and forest campgrounds are open to winter camping. From wilderness backpacking camp- sites to drive-in campgrounds with electrical hook-ups, winter campers can choose parks offering a variety of conditions and activities.

The growing popularity of cross-country skiing has generated more interest in winter camping, according to David Weisentrauer, director of the DNR’s Bureau of Parks and Recreation. Every state camp- ground open to winter camping offers access to cross-country ski trails.

Several parks gear event to-ward skiers. Mirror Lake State Park is one of Wisconsin’s 10 state parks designated for cross-country skiing where ski lessons, rentals, and storage are available.

Outdoor report

State parks offer a variety of winter camping experiences

By Timothy A. Bishop

Outdoors Editor

As the snowfall and final excitement of the season pass, it is time to consider one of the important facets of the holiday season, the Christmas tree.

Whether you buy that tree from a lot of the local Christmas trees, or you cut it down yourself, the tree is moving into your home.

One of the things to remember is you must watch for the green needle characteristics of the tree. It is vital to have the tree survive the week it is in your house.

Pine trees will always have green needles. So, if you are looking for a tree to buy, you must have the tree with green needles.

One of the most common mistakes is to bring a tree home and put it by the window. The window is usually the warmest place in your house. If you put the tree in a window, you must remember to water it every day.

The tree will dry out in your home and will become brown and dry.

Our holiday tree can be a great gift to the outdoors. But, if you are not careful, it can become a great gift to the environment.

The tree will dry out and will become a great gift to the environment.

Our holiday tree can be a great gift to the outdoors. But, if you are not careful, it can become a great gift to the environment.

The tree will dry out and will become a great gift to the environment.

Our holiday tree can be a great gift to the outdoors. But, if you are not careful, it can become a great gift to the environment.

The tree will dry out and will become a great gift to the environment.

Eco-Briefs

For 5 years TU has been working with property owners to preserve stream banks. While the goal of this organization is better fishing, there are many other benefits as well. Any protection of riverside habitat promotes good water quality and less soil erosion. Much of TU's work has been with farmers to develop ways cattle can have access to water without destroying stream banks. Trout Unlimited is located at 501 Church Street, N. E., Vienna, Virginia 22180.

For a good, brief overview of world problems, interesting natural phenomenon and possible solutions check out this month's National Geographic. Nine articles with excellent photos document a variety of areas and problems from the equatorial rain forest to the arctic circle. Whales and the problems of representing the round earth on a flat piece of paper are also included. The last piece is a fascinating comparison of the lifestyles and environmental impacts of six world families.

Very soon the round of Christmas meals and parties will begin. Good, hearty food will be served in abundance. But how can we be sure it's good? Americans for Safe Food has published an Organic Mail-Order Suppliers Guide that lists organic growers and distributors of organic meat, poultry, grain, fruits, vegetables, and dairy. The label organic is being used on many food products but does not mean they are. Some states have guidelines that define organic but most do not. Wisconsin does have guidelines. The catalog is available at Americans for Safe Food, 1501 Sixteenth Street, N. W., Washington, D. C. 20005.

Finally, many problems go with our presence on the earth, but there is much good as well. Much of the above shows the good things that can be done by ordinary people who have a little information and an inclination to do the right thing. With just a little help their efforts will be successful. Enjoy your holiday break!

Name: Timothy Krueger
Staff Position: Business Manager

Tim is a wild and crazy guy. All of the women on staff wish that he wasn't married because he is one heck of a guy. He is happily married to Ruth and has two terrific children, Molly and Olivia.

The Pointer describes Tim as a little uptight. Tight with the Pointer funds, that is! If you want a deal on something Tim is just the guy to search and search and search for the least expensive item.

Timothy will graduate this December. The Pointer staff wishes Tim the best of luck in the future. We love you and will miss you Tim!

Name: Amy Krueger
Staff Position: Business Manager Trainee

Here comes another one, just like the other one! Amy is the newest member of The Pointer staff and is in training for the business manager position.

We are looking forward to working with Amy and spending more money than Tim allowed us.

Welcome to The Pointer Amy!

Name: Peter Hite
Dan Bernerd
Staff Positions: Photographers

We don't see too much of Peter and Dan in The Pointer office but we know they're out there.

Peter has supplied The Pointer with many of his cover photographs. We hope to see more of Peter's work in the future. Hey, stop by sometime Peter! Dan, Dan he's our man! If you have any ideas for photos then call Dan.

We don't know if Dan is available but he's pretty darn good lookin'!

Name: Molly Rae
Cindy Byers
Staff Positions: Reporters

Molly and Cindy are two of our regular reporters/columnists. We like to call Molly our little groupie. If there is a band in town she knows about it and is at the scene. Thanks for your help Molly.

Cindy has a weekly column in our outdoors section. She has done a terrific job. However, we just cannot understand why week after week Cindy keeps losing her disk!!

Eagle watchers wanted

MADISON--Whether you're an armchair eagle watcher or a wilderness wanderer, you can help the National Wildlife Federation and the Wisconsin Department of Natural Resources with the 19th annual Mid-Winter Bald Eagle Survey.

The 1989 nationwide survey will be held Jan. 6-19. In Wisconsin, the survey is sponsored by the DNR's Bureau of Endangered Resources. Volunteers interested in participating in the Wisconsin count are asked to confine their observations to Jan. 6-7 to minimize duplication.

To serve as an eagle watcher that weekend, volunteers should obtain an observation form from the Bureau of Endangered Resources.

"We need observation locations are being assigned," said Charles UNCharlesJGlick of the Bureau. "Anyone seeing an eagle during this time can supply us with valuable information by telling us where and when the observation was made."

"It also helps us if watchers note the weather conditions and type of terrain where the eagle was spotted, such as near a lake or river."

UNIVERSITY STORE
BOOK BUY BACK
DECEMBER 19, 20, 21 9am-3pm &
DECEMBER 22 9am-12noon
University Center Concourse
CASH PAID FOR USED BOOKS

Things to know:
1. If the book will be used again during the following semester, you will usually receive 50% of the publishers list price.
2. If the book will not be used on our campus but is still a current edition, we will offer you the amount listed in a used book company's buyers guide. We will buy these books for the used book company.
3. The buy back percentages used are the normal standards for the used book industry.
4. We CANNOT buy back lab manuals, workbooks, study guides, annual editions, or books checked out from the Textbook Rental Department. Books must be in good condition. All buy backs are at the discretion of the University Store staff.
5. When shopping for books at the beginning of next semester, check our stock of used books for the greatest savings.

The used books purchased now will be resold for 75% of the current publishers list price.

Prevent back injuries

by Paul Schanke

In today's fast-paced society, many of us find ourselves over-stressed, overweight and out of shape—all of which can lead to back injuries. Each year, millions of Americans suffer from back pain and it is estimated that eight out of ten Americans will experience back pain at some time during the course of their lives. The reason for this stems from the common myth that "only the elderly experience back problems." Ask your practitioner or anyone that you know of, who has ever had back troubles and they will be more than willing to share with you the reality that this problem is shared by young and old alike.

It is estimated that of the 2.2 million injuries incurred each year on the job in the U.S., 30 percent are back injuries. This often results in poor productivity, missed work days and increased employee turnover—not to mention the $10 billion a year that it costs employers. Because of these outrageous numbers, we as the future leaders of America need to be more concerned about taking care of our backs. Through a combination of exercise, stress reduction and proper diet, we can help to alleviate many back problems.

Approximately 80 percent of back pain can be attributed to lack of exercise. Many of us are not aware of the many benefits we receive from exercise. It is important to get involved in an exercise program that strengthens the muscles in the back, upper legs and especially the abdomen to increase the support of your spinal column. It is also important to remember to stretch before and after exercise so that you can stay flexible while strengthening your muscles. Tight muscles can lead to muscular imbalance which increases the chance of back pain.

High stress levels can also be a contributing factor to back pain. We must remember that our spine is sensitive to the muscular tension that can build up throughout the day. By practicing simple relaxation techniques, we can help to alleviate some of that tension.

Obesity also increases chances of back pain. Although losing weight is often difficult for many people, we must remember that the farther the stomach protrudes, the more force it puts on the back.

It is important to remember that back problems are not limited to the elderly, but that we are all susceptible. With the number of people affected by back pain and the phenomenal amount of money being spent on chiropractors, we need to pay more attention to preventing it. It is up to the individual to make the right choices. Don't wait until it is too late.

Title: "I Like The Natural Look Of My New Contacts"

Author: Dawn Barkow

The newly-established University Employee Wellness Program is now in action. All members of the faculty, classified and academic staffs (including those who are temporary or part-time) are eligible to participate in the program. Marjorie A. Lundquist, a long-time local nurse, is the coordinator of the program. She received a degree in nursing from Mankato State College in Minnesota and served on the nursing staff at St. Michael's Hospital for 29 years.

Several programs have already been administered for the employees. A health-risk appraisal (Life-Scan), walking clubs, aerobic dance, stress management and a personal wellness evaluation program are already in progress. Gail Allen, an employee of the university library, has been participating in the walking club and expressed that the program was very flexible and helpful in accommodating her needs.

The goal of the program in the first year is to increase the employees’ awareness of wellness issues, develop a profile of employer and employee wellness needs and evaluate the programs being offered. Eventually, significant health care cost savings should be accrued by the individuals participating and by the university.

Chancellor Philip Marshall, who attended the Wellness Evaluation Program, stated that he and his fellow attendees benefited from careful evaluation of their diet and level of fitness. He feels the program is an important part of the ongoing efforts to improve this university and its service to its students, staff and the community.

Future programs the employees can look forward to and that are added under the starter exercise program for beginners in exercise, weight management, body toning and continuation of aerobic dance.

The majority of the services offered by the program will be provided at no cost to the participants. Financing for these services will be generated from the soft drink vending machines on campus.

If you have any questions about the Employee Wellness Program, please feel free to call Marge Lundquist at Ext. 638 or stop by her office which is located in the Personnel Service Unit in Old Main.

Point of Law

by Jim Bablitch

Attorney-at-Law

One of the most frequent legal questions students ask is: “What are my rights if my landlord fails to return my security deposit?”

Failure to return a security deposit is governed by Wisconsin’s administrative Code. Agricultural Rule 134.06 in general requires a landlord to return a security deposit within 21 days after surrender of premises by a tenant. If the landlord fails to return the deposit, he must furnish the tenant at his or her last known address, with written reasons why the landlord is withholding the deposit.

Among the reasons a landlord may legally give for failing to return a security deposit are the following:

1. Tenant damage.
2. Waste or Neglect of the premises.
3. Nonpayment by the tenant of:
   (a) rent
   (b) utility bills
   (c) mobile home parking fees

The administrative code requires the landlord to be rather specific if s/he has decided to withhold a portion of a security deposit. The code requires the tenant to leave a forwarding address with the landlord. It is a defense under this section if the landlord can’t mail written notice that he or she is withholding a deposit because the landlord can’t find the former tenant.

The administrative code itself contains no specific penalties if a landlord fails to abide by its provisions. But the statute authorizing the Agricultural Department to promulgate rules of this type does provide a penalty. Wis. STAT. 100.35 (3) provides that a landlord may obtain double damages if a landlord fails to notify the tenant as required by law that the landlord is withholding a portion of the student’s deposit. Thus, if the deposit is $350.00, and the landlord violates rule 134.06, absent other considerations, the student can demand $700.00 from the landlord.

Students should be cautioned that failure to notify a tenant in writing within 21 days as to why a landlord is withholding a deposit, does not end a dispute. If back rent is owes, if the premises have been damaged, if utility bills are due, or if the landlord has some other claim against a tenant, all these can be considered by the court when awarding damages.

Thus, if the tenant failed to pay the last month’s rent under a month-to-month tenancy, and the landlord has withheld the rent is $350.00 and if the landlord violates rule 134.06 and if the security deposit is also $350.00, a probable decision by a court would be as follows:

A. Tenant
   $130.00
B. Tenant
   $250.00
C. Landlord
   $130.00
D. Due Tenant
   $500.00
E. Landlord
   $500.00
F. Failure to provide written notice when withholding deposit.
   $500.00

Double Damage Provision.

Failure to pay last month’s rent.
Or $700-$500.00
Most multiple unit landlords are very much aware of the duty to provide a tenant with written reasons why the landlord is withholding a security deposit within 21 days after the tenant has delivered the premises back to the landlord. Many landlords of a few units of rental property are unaware of the provisions discussed in this article.
