Landlord Tenant Workshop discusses problems

by Paul Jankowski
News Editor

"Be pro-active," says Steve Cady, when looking for off-campus housing. Cady was speaking as a student tenant at last Tuesday's Student Government Association Landlord/Tenant Workshop.

The meeting was put on by Ann Moran, SGA's Communications Director. Moran hosted a panel consisting of various people: Henry Karger, from the Central Wisconsin Apartment Association, representing landlords; Don Bexmiller, Stevens Point Building Inspector; John Gardner, Stevens Point Community Director; Attorney Jim Bablich, Student Legal Society; and Steve Cady, SGA President, representing student tenants.

Karger emphasized that all students thinking about moving off-campus should get their groups together as soon as possible. He recommends this be done as early as December before the next school year. Karger strongly recommended students pick up the Off-Campus Survival Guide available at Del-Net headquarters as a very important thing.

Karger noted that if a tenant has problems with his landlord, the first thing he should do is have a talk with him. "When you talk, problems get solved," he also suggested that all agreements with landlords should be in writing. "Have everything written down."

Bexmiller, Stevens Point Building Inspector, said past before signing anything/safety considerations should be carefully weighed. Smoke detectors should be working and there must also be adequate fire escape exits. Students should also ask the landlord how many parking spaces will be available.

If a tenant has a problem with his landlord, he suggested that he first take it up with the landlord himself. The Building Inspector should only be called as a last resort.

Gardner, Stevens Point Community Director, represented Stevens Point Mayor Scott Schultz who couldn't attend the meeting. Gardner stressed the conflicting interests the mayor faced when dealing with students and the community. On the one hand, the mayor welcomed the students as an important part of the neighborhood, but also recognized the need for older residents to co-exist with the students in a neighborhood setting. Gardner said the mayor wanted to "make sure that the neighborhood stays a neighborhood."

Atty. Bablich, representing the Student Legal Society, noted that as a lawyer for the society, he is NOT an advocate. Rather, he says his role is to provide a skilled first step to resolving tenant/landlord legal problems. Similar to Karger and Bexmiller, he also suggested talking was the first step to solving problems. However, if that didn't work, he suggested writing out the complaint, making a copy of it for your records and sending it via certified mail to your landlord.

Bablich noted if your problem resulted in taking legal action, you must establish credibility. If you have similar complaints from five or six other tenants, your case is greatly strengthened. However, be noted that tenants must do their own homework before calling in legal aid.

Attorney fees aren't cheap either, with average fees running $500 in dealing with a SIMPLE landlord/tenant case. Subsidized legal service could be provided by Wisconsin Judicare Inc. out of Wausau, but the chances of

Madison Plan well received

by Paul Jankowski
News Editor

Madison Chancellor Donna Shalala has developed a new plan concerning minority retention and recruitment on the Madison campus. Shalala's proposal, known as the Madison Plan, has received favorable responses from both minority leaders and administration officials in the last few weeks.

The Madison Plan combines several ideas to improve minority retention and recruitment on the Madison campus. Shalala says the motivation behind her proposal is education. "It ought to be for educational reasons, not political ones."

Her proposal comes on the heels of UW System President Kenneth Shaw's one for a minority tuition waiver to increase minority students enrolled on UW campuses. With the criticism that Shaw's proposal sparked, Shalala's is now seen as more viable alternative to the problem.

Debbie Sakai, Minority Affairs Director for Student Government Association, said of Shalala's proposal, "I'm totally for it 100 percent." Shaw's proposal, however, appears to be going nowhere. At the last United Council meeting all the minority affairs directors opposed his idea.

Sakai likes Shalala's proposal because it would benefit all low income, disadvantaged students, not just minority ones. She said this would have a definite decrease on racial tensions as opposed to Shaw's. She also noted that it placed education first, and "that's really important to me."

The Madison Plan has several student financial assistance programs including FASTrack, Minority Retention Scholarships and Minority Graduate Professional School Fellowships and Aid. FASTrack (Financial Aid Security Track Program) is designed to help students regarding length of their ethnic background pay for college through a combination of grants, jobs, internships, and small loans.

The Madison Plan also targets increasing minority recruitment from Wisconsin and also from around the Midwest. Student retention is also stressed as well as new student orientation and tutorial programs emphasized.

Faculty recruitment and retention are also major goals. The university hopes to hire 70 minority male and female faculty by the end of 1985. In addition, it hopes to employ 25 tenured faculty over three years and 45 tenured tracked faculty as well hiring at the rate of 15 a year.

Lastly, it proposes an ethnic studies core requirement for all undergraduate students. That goal is expected to be implemented by next fall. The university is planning to create a multi-disciplinary course center around the theme of "understanding other cultures."

UW-Madison Chancellor Donna Shalala recently announced the Madison plan for improved minority faculty and student recruitment & retention.

It's a UWS Winter wonderland

Thanks to an especially snowy winter and the efforts, so to speak, of the UWS snow removal crew, snow & ice have been no strangers around campus this semester.

Stevens Point News

More studies are being done on the proposed new jail for Portage County. The $6 million jail is being delayed to study need analysis concerns raised by some of the Portage County Board Supervisors. The Jail Building Committee was recently authorized to spend $18,000 to bring in an architectural consultant to assist in the studies. County Board Chairman Robert Steinke wondered if this was a stalling tactic to delay construction of the new jail, according to the Stevens Point Journal.

Governor Tommy Thompson's Property Tax Initiative has sparked considerable interest here. Close to 800 people appeared Monday afternoon at the Lincoln Center to attend an Assembly Ways and Means Committee hearing on the proposal.

According to the Stevens Point Journal, one of the features of the proposal would be the state's 5 percent sales tax levied on commercial rent payments, sewage services, and residential heating fuels purchased during the winter months. This was the sixth of seven statewide committee hearings about the proposal first outlined in Thompson's State of the State address last month.

TOWN have lost their case for official university recognition. The District of Columbia Court of Appeals ruled, however, that the university must give homosexual groups the same privileges, such as meeting rooms, it gives other student groups. The court ruled that a local anti-discrimination law does not cover Georgetown, a private university.

ACADEMIC ADVISING, ALCOHOL POLICIES, exam schedules, and parking problems are among the top issues the U. of Virginia student council should address, according to a poll of 240 UV students. The poll, conducted by the Daily Cavalier, also found that in order to increase student voter turnout, voting machines, direct-mail ballots, and increased candidate expenditure should be used.

Last Thursday, the mammom 
fedated budget was re- 
leaded by President Reagan. 
The new federal budget 
will be $1,094 trillion for the 
each day.

For the first time in seven 
years, the amount of money 
allocated towards education in the 
Campus. The new federal 
government projects spending $37.4 billion on it for 
1989, up roughly 13 percent from 
this year.

Commenting on the budget, 
Mary Preston, Legislative 
Affairs Director for the United 
States Student Government 
Association, said the increases 
"were not regarded as a political 
document," and she said it 
was "far from perfect.

Preston said this was the first 
budget in the Reagan adminis- 
tration where educational needs 
were placed over the Reagan 
administration's own. This was 
the first budget from his adminis-
tration where he did not try to 
gut education.

While Reagan proposes spend- 
ing more money for Pell grants 
next year, the first time in sev- 
en years, other programs aren't 
are included in the budgets. 
no more Perkin Loans, the na-
tional student loans, would be 
made. What money that is allo- 
cated for the program only cov-
cers the program's administra- 
tion costs on current loans already 
out.

Many of the proposed in- 
creases in the educational bud- 
get are small and a number of 
programs were money shuffled 
around as well. College work-

Soviet students work harder

by Paul Jankowski

Soviet students are required 
to fast in a university. Up to 
12 courses are taken each semes- 
ter. Classes run straight 
from 8 a.m. to 3 p.m., with only 
10 minutes for a break. Accord- 
ing to Detwyler, a student is 
unable to choose his major. How-

er, once in, he's committed. 
He can't change to another.

Detwyler said our system is 
much more relaxed. "Your edu-
cation is a lot easier. You're not 
rushed; you go at your own 
speed." She also added there 
were no make-up courses in the 
Soviet system.

Sports are also emphasized on 
the university level. For the stu-
daughter's two years in school, 
he's required to take at least 
two hours of play. ed. weekly.

Senators work for tuition cap

by Blair Cleary

Staff writer

Last week, four members of the Student Government went to the state capital to support the Tuition Cap bill that was appearing before the State Assembly's College and Universities committee.

This bill states that students in the U.W. system will not pay more than 33 percent of their instructional costs. This is not to say that tuition will never go up. According to Brenda Leashy, the Legislative Affairs Director of UWSP's Student Government, "The 33 percent cap will encourage the government to be more responsible when increasing tuition costs." What would it come down to is that for every dollar they increase tuition, the state will pay 67 percent, and the student will pay 33 percent. Students currently pay approximately 32.9 percent.

"As American as apple pie and the Fourth of July oration," wrote Brooks Atkinson, drama critic of the New York Times, in his review of what he called a musical translation of "the thump and razzle-dazzle of brass-band lore into a warm and genial cartoon of American life.

"The Music Man" is the tune-filled tale of "Professor" Harold Hill, a lovable rogue who comes to an Iowa town in 1912 with an original scheme to fleece its citizens. He plans to excite the townspeople into a desire to organize a brass band, to collect their money for instruments, uniforms and sheet music, and to quietly disappear with the loot without being fulfilled of his promises.

The trick works, but the plot's complications bring about Hill's reform and he wins the heart of "Marian, the librarian." The score contains 17 songs, including the world-famous "Seventy-Six Trombones." The show ends with what New York drama critics agreed was one of the most stirring "happy endings" of any musical comedy in state history.

The four senators who attend the committee meeting, Lynn Roneson, Kathy M. Akstine, Brenda Leashy, and Blair Cleary, sat with senators from Green Bay, Oshkosh, and Madison.

Most of the testimony at the Colleges and Universities Committee was in favor of the tuition cap. United Council Legislative Affairs Director Jim Smith said that "Tuition is the greatest barrier that faces a student who wishes to enter the UW system." Smith also stated that during the last 10 years tuition has doubled and that students are going further and further into debt to pay for their education.

There was testimony against the bill. UW-system executive Vice-President Katherine Hyll was quoted against the bill because it would make out-of-state students, many of whom attend U.W. Madison, pay 106 percent of their total tuition.

Smith estimated the bill will pass the committee at either 5-3 or 9-2. Stevens Point area representative Stan Dworzynski, who chairs the Colleges and Universities Committee, is expected to vote in favor of the bill.

"Many of the representatives who sit on the committee were impressed with the participation of the various student senators from around the state. Leashy, who spoke for the Stevens Point delegation, said that it is important for the representatives to be heard on important issues like this.

If the bill passes the Universities and Colleges Committee it will move on to the Joint Finance Committee. If it passed there, to the floor of the Assembly's main assembly.

Milk, new Wisconsin state drink?

Chilson news release

State Senator Walter John Chilson (R-Wausau) said today, "I'm delighted the Assembly has given final approval to my bill designating milk as our state beverage.

"Although I've received some good-natured needling about this bill, I have been very serious about making milk Wisconsin's state beverage. I think it's a most appropriate and symbolic gesture to underscore the importance of the dairy industry to our state."

Chilson stated. Turn to page 5

$10,000 received for dance study

GWingrasso describes LMA as a vocabulary and theory for understanding movement communication. It enables dancers and choreographers to describe, analyze and record the messages of human motion.

"In order to describe what music theory is to music," she continues, "As the most widely accepted theory for the analysis, comparison and instruction of movement, it is quickly becoming the accepted or university level instruction in dance."

She says upon completion of the LMA studies, she plans to develop new curricula on campus for the dance program and promote LMA as a basic educational concept.

Students praised in Iowa
United Council News

"The Wisconsin student involvement in the Iowa Presidential Caucuses will be a spark to increase student participation in the political process here in Wisconsin," said Adrienne Serrano, United Council President.

"We salute the students and the groups that went to Iowa. One of United Council's goals for the year is to increase the student voter turnout here in Wisconsin," Serrano added.

Wisconsin student awareness and political participation is on the rise if last weekend's Iowa trips are the judge. Approximately 100 Wisconsin student supporters for both Democratic and Republican candidates showed their enthusiasm and willingness to work by traveling to Iowa to see the campaigns. Students praised "the Wisconsin who went to Dubuque, for the night." (Gosh!) to increase student voting in the primary for Bush, said the Madison Students praised "the Wisconsin voter turnout in Iowa." Smith who went to Dubuque, said, "We didn't sleep Saturday or Sunday night." (Gosh!) These students are already gearing up for the Wisconsin Primary on April 5. Brian LeClair, the UW-Madison contact for Bush, said the Madison campus already has over 100 supporters for Bush. The campus organization for U.S. Rep. Kemp currently has 40 members, but Scott Silva, campus contact for Kemp, expects to double that number during the next month. Le Clair plans to set up home headquarters for the Bush campaign during the next few weeks. He said their primary goal is to "canvas the campus and get the word out." Fourteen Madison students campaigned for Dukakis last weekend and 24 students pounded the pavement for Simon. Said one student supporting Simon, "I feel strongly about doing all I can to get Paul Simon elected. I also believe this direction this election is going in, as well as the direction this country is going in, is critical to the next four years of my life."

There's no doubt that students are starting to get involved in the presidential election. United Council Legislative Affairs Director Jim Smith said last weekend's student turn-out in Iowa is a good sign that student interest will escalate over the coming months.

"It's really good sign to see that many students are giving up their weekends and going down to Iowa. We are working to increase student voting in general and these students and groups will help by bringing information about their candidates to their campuses," Smith said.

Other activities planned by Fast Trackers this semester include a workshop on creating resumes led by Larry Walters of the Career Counseling Office; a tour of the Woodward Governor plant led by company official Dick Robbins; a workshop on interviewing led by Werner; a trip to the Wausau Center for meetings with mail manager Scott Olsen and a representative of Jacobs-Viseon-Jacobs firm that owns the facility; a workshop on dressing for success led by Eunice De Baker; and a workshop on law as a career led by Terry O'Brien, president of the Wisconsin Bar Association.

The Wausau lawmaker pointed out, "Wisconsin produces more unsweetened whole and skim sweetened condensed milk than any other state. Wisconsin ranks first in the production of dry whey, whey solids and lactose – and second in the production of butter milk." Senator Chislen said, "Dairy farmers who have just been locked by another cut in dairy price supports need a little something to cheer about. For those who like to joke about state symbols, I'd suggest they contact the Wisconsin Farm Bureau, AMPI and the Wisconsin Manufacturers Federation who supported making milk our state beverage. I'm pleased the bill passed, and I'm sure Governor Thompson will sign it into law."

He noted if the landlord doesn't know what the energy bill is, Wisconsin Public Service will provide an average energy bill for the place. Cady also noted that WPS also has a budget billing option to level out energy costs through the winter. He said that it "works out really well." Cady said you should check out a future landlord as well as a place to stay. He encouraged students to consult with Student Legal Society to see if a questionable landlord had any complaints.

This is remote at best. Babitch noted that most of these cases end up in small claims court. He noted that students shouldn't be discouraged from representing themselves in such a case. Students have "better than average ability to present their cases," he said.

Lastly, Steve Cady emphasized that looking for an off-campus place shouldn't be put off. He suggested students start looking early and read the ads as well. Questions should be asked such as who's paying for water bills and what the average energy bill is like.

He noted if the landlord doesn't know what the energy bill is, Wisconsin Public Service will provide an average energy bill for the place. Cady also noted that WPS also has a budget billing option to level out energy costs through the winter. He said that it "works out really well."

UWSP delegation heads to Harvard

by Jodi Ott
Staff Writer

A UWSP student delegation attended the 33rd Annual Har­vard National Model United Na­tions Conference at Boston Mar­riott Copley-Place Hotel this past weekend, Feb. 18-21.

“The fabulous four” consisted of head delegate James De­ Cruz, assistant head delegate Llia Kay Lietz, and delegates Steve Szymanski and Kwame Addo.

De Cruz, a sophomore communications major, is a mem­ber of the United Nations Asso­ciation of the United States of America. Being interested in the United Nations, De Cruz got the backing of Philip Marshall, Chancellor; Dennis Riley, Poli­tical Science Department Chair; and Bhola Singh, a Political Science professor who teaches the course, “United Nations at Work.”

“The three gurus gave us their blessings; without them we wouldn’t have gone,” said De Cruz.

After receiving the letter of application on Dec. 8, De Cruz quickly started to organize by finding funds and looking for potential students. The win­ning combination was chosen with the help of the political science department.

Leitz, a political science ma­jor with a pre-law and interna­tional emphasis, is a senior.

Szymanski, a sophomore social science major, participated in the Minnesota-Wisconsin Re­gional Model UN as a delegate from Lebanon. The conference was held in Stevens Point in

1986. Addo, a senior political science major, is also a native of Ghana.

Although the delegation only consisted of four people, they received a letter of commend­ation recognizing their efforts.

“The fact that we had actual national representatives there from Cuba and Luxembourg made it a truly national confer­ence,” said Leitz.

“It just wasn’t the interna­tional aspect, but these were top-notch people from all over the country from some of the best-of-the-best universities,” said Szymanski.

The conference is an opportu­nity to sharpen up on debating and conference skills required in the UN. Strict parliamentary procedure is practiced, and the quality of debate is high. Dele­gates also had the chance to help support keynote speakers, such as Jordan Ambassador, Abdullah Salah.

“I learned that the U.N. can be looked upon as a large dino­saurs. When you shake its tail, it takes a while for the message to reach its head. The U.N. is bureaucratic because of its size. But in its 4th year, the U.N. has clearly shown that it has helped third world nations to come out of the rut and poverty to become better nations,” said De Cruz.

Although the learning opportu­nities were tremendous, there were certain drawbacks. The main problem being the fund­ing. A majority of the colleges were privately funded, whereas UWSP wasn’t.

“This needs to be an ongoing project and it shouldn’t stop just because of funds,” said De Cruz.

Four UWSP students spent last weekend at the National Mod­el UN Conference in Boston. From front to back, Steve Szyman­ski, Kwame Addo, James De Cruz and Llia Kay Lietz.

Picking the president

by Chris Assmus
Staff Writer

Having trouble deciding which one of the presidential candi­dates you are going to vote for? Does it even matter? What hap­pens if all the candidates drop out before Wisconsin has a chance to vote?

The Wisconsin primary may play a bigger role in this year’s nominations, bigger than what we may give it credit for. This year the candidates are focusing more on the Wisconsin vote than they have in the past. For example, Al Haig, who has dropped out, still has his name on the ballot.

It is important for the resi­dents of Wisconsin (and that does include UWSP) to pay close attention to what the can­didates are doing, just listening to the mudslinging will not be enough. We have to follow all of the candidates, not just the one we plan on voting for. Because if that candidate drops out, he’ll endorse another candidate to re­ceive the votes originally for him. An example of this is when Haig dropped out and then en­dorsed Dole. So, if you were going to vote for Haig, you should now vote for Dole, even thought Haig’s name will still be on the ballot.

However, if my candidate dropped out, I don’t think I’d just vote for the candidate he chose to endorse. What happens if the candidate he endorses is an asshole?

It’s important to evaluate the candidate you are going to nom­i­nate for president, because he just might become president. You may have the right to vote for anyone, but you also have the right to make a mistake and elect an incompetent president.

This whole idea of nominating a person to run for president is unnecessary and unfair. Why not vote for the president the first time around? Why waste the money to run two races?

All the states should vote for the president at the same time, count the votes, and the person with the most should become president. Likewise, the person with the second highest amount of votes should become the vice president. Is that too complex?

Who cares if the president and vice president are from dif­ferent parties? The fairest way to elect the president and vice president is the way I just de­scribed. The two top candidates become the holders of the two top offices.

Need a summer job? Career Services and Student Pro­gram Banquet Room of the UC.

This year, representatives from over 50 summer camps all over the nation are going to be here to assist students in find­ing jobs that reflect their inter­ests.

According to John Zack of Ci­eer Services, there are over 100 positions available, and the types of positions are numer­ous. Assistants, sports director, and food service personnel are all needed. The need for people at specialized camps, such as musical and theater arts, is even greater.

Zack also said that working at a summer camp is a golden opportunity for students: An opportunity to make money, be outside, have a good time, and work at a particular major.

Certainly a good experience that keeps you in touch with real life.
The American Birkebeiner: Everyone wins

The start of the 16th American Birkebeiner

by Jim Malzewski
Features Editor

With temperatures hovering in the single digits for most of Saturday, the 16th American Birkebeiner took off to a rather brisk and frigid start.

The Birkebeiner is North America’s largest cross country ski race, covering 55 kilometers from Cable to Hayward, Wis.

United Nations

Cruz. “There needs to be an effort made to set up alternative funding.”

“It needs to be institutionalized,” said Leitz. Because of lack of funding, the students had to pay for their own room and board. They stayed at the Boston International Hostel and commuted a mile and a half each day to the conference.

Students do have a chance to participate in the Minnesota-Wisconsin Regional Model United Nations Conference, which will be held at Carlton College in Minnesota during April. Singh has been sending teams to the regional conference for the past 13 years.

“Not enough people interested in Political Science know that

President,

Running the election this way would help give all the candidates an equal chance of being elected. Rabbi and Haig had to drop out of the race because that it combines both world class and amateur skiers into the same race. Skiers from 17 nations and over 30 states took part this year, adding that international flavor to what some term the layperson’s Olympics.

This year’s winner was Oerjan Blomquist of Sweden, who completed the course in 2 hours, 38 minutes, 53 seconds. His fellow countryman, Hans Persson, finished 8 seconds behind for second place. Locally, Mark Koepeke of International Programs finished 72nd, and

despite the fact that he had traveled to the race from New Zealand.

from page 6

these model U.N.’s are held,” said Szynanski. “They’re suffering from a lack of exposure.”

The fabulous four will be doing a presentation in April to create a greater awareness.

On campus organizations that helped with funding were: the Chancellors’ Office, the Department of Political Science, the Peace Studies Institute, the College of Letters and Science, Student Government Association, and the Equal Opportunity Program and Student Life.

Deserving credit for the student coalition were: American Savings and Loan, K-Mart, Travel and Tour, Citizens Marine National Bank and First Financial Savings Association.

...and the end

Going for it all

Tom Wood, a freshman from Rhinelander, took second place in the Korteloppet cross country ski race held in Hayward this past weekend. Wood completed the 29 kilometer course in one hour and 25 minutes.

Wood started skiing five years ago, and got into racing a year later. This upcoming weekend he’s headed for the Junior Olympics at Lake Placid, where he will stay for a week and race in a 19 Kilometer, 15 Kilometer, and relay against national competition.

When it comes to the 1992 Olympics, Wood says, “I’m not really thinking specifically of the Olympics, I’m going to keep racing and I won’t rule out any possibilities.”

Well Tom, we all wish you good luck this upcoming weekend at Lake Placid.

Freshman Tom Wood

The American Birkebeiner: Everyone wins
In the midst of Gay Awareness Week, our question this week is straightforward: "What do you think of Gay Awareness Week?"

Name: Daryl Rutkowski
Hometown: Eagle River
Major: Biology
Year: Sophomore

Although I am not really fond of gay people, if they want to have an awareness week and let everyone know who they are, that is fine with me.

Name: Michael Martin
Hometown: Marshfield
Major: Business/Political Science
Year: Sophomore

My opinion on it is that it’s OK for them to have a club or group. But is it really necessary to have a week on campus to think about it?

Name: Heather Kluge
Hometown: New Richmond
Major: Elementary Education
Year: Freshman

My opinion on it is each to their own. I think it’s super on the gay community, but I’ll have other things to keep me occupied this week!

Name: Jeff Bishop
Hometown: Stevens Point
Major: UlS
Year: Sophomore

It does not bother me too much. They don’t really do much to make a statement. I don’t really see what they accomplish.

Name: Russ Schirmer
Hometown: Wasota
Major: Communications
Year: Junior

Great, I hope they learn a lot!

NOTES FROM ABROAD...

"Que’ tal en Espana?" (What’s up in Spain?) Thirty UWSP students are currently studying in Spain. This week in Notes From Abroad, we present their adventures and experiences of the past month and a half spent abroad. Next week we’ll be traveling down under to see how the Australian group is doing.

by Cindy A. Brantmeier
Special to the Pointer

"You’ll never go hungry in Madrid," Dr. Cornell said last semester, and that’s exactly right! Although it took awhile to get used to the new hours of eating, most of us foreigners have adapted well to "La Comida Espanola."

We arrived in Madrid on Jan. 13 after 10 hours of flying, only to discover we had no reservations at the hostel for the first two nights. So Doug Henderson, our fearless group leader, used his Spanish-speaking talents (which consisted of "Hola" and "Adios") to find our group of 30 a place to reside.

We met our first Spanish friends at the local pubs. They greeted us with a kiss on both cheeks, an act many of us have easily grown accustomed to. Something a little harder to get used to was the crepe paper that they hang on the walls.

The freezing cold water that always seems to shoot out of the shower nozzle just as our heads are full of shampoo is another part of our culture shock syndrome. But these little quirks are now old hat after a month in Spain.

Our group of students are now spread out over the city of Madrid, living with families or Senores. Some of us live only walking distance from the Center of International Studies, where we attend classes. Others live a few metro stops away, while a few have to board a bus each morning just to reach the nearest metro station. But it doesn’t really matter what the distance is, because we’ve all picked up the Spanish habit of never being on time.

Our group seems to fit right in with the custom of stopping after school to buy the "tapas," which are little plates of squid, mushrooms, crab, intestines, olives, and other Spanish delicacies. Of course, we always manage to quench our thirst with the beer or wine, which is consumed lightly at almost any hour of the day. Our local hangout is just around the corner from school, and is called, "Chao Chump!"

Even though none of us have studied the Spanish language in the states, speaking seemed hopeless to most of us at first. "Mas despacio, por favor," which means more slowly please, was a phrase we quickly learned. Something as simple as the "peseta," or Spanish money, was often erroneous upon one student almost paid $100 for a pair of shoes, when the actual price was only $8. But the Spanish people are friendly and helpful, and they enjoy talking and answering all of our questions.

While most of you Pointers were walking to classes with mittens and boots on during that big snowstorm you had, we were outside with only the shirts on our back, as the sun brightened our day. It was so exciting for us to hear that in Point there was 10 inches of snow on the ground. We celebrated our warmth by spending the day in the Retiro, a beautiful monumental park in Madrid.

We attend classes Monday through Thursday, and each class period lasts an hour and a half. Most of us are involved in Art History courses. We study the paintings and sculptures, and then we go to the Prado Museum to actually see the original works of art.

Dramatic performances of Spanish theater are also seen by some pupils who have the Spanish Drama class. Of all of us take at least one course that is taught in Spanish. The courses are challenging, and we have to take the time to study. However, most of us find it easy to study here because the Spanish history, language, people and culture are so very interesting.

Last weekend our group took a bus to some small villages and toured some castles and cathedrals. It was awe-inspiring for us to see the Spanish people’s pride in their historical sites and their deep-rooted Catholic traditions. We also devoured the lamb and bread that we feasted on at a famous restaurant in Gormar.

Right now, our group is planning the 10-day break we get in the beginning of March. We’ll be busing to Portugal for a few days, and then we’ll visit the National Park of Spain, where we get to use jeeps to truck around in. The rest of the days we will spend touring (and, of course, catching rays) in the south of Spain.

But, before this excursion, we have to face our mid-term exams.

Study in Spain

Emphasis in Liberal Arts
International Business
Courses available in Spanish and in English
Fluency in Spanish not required
All courses approved by UW-Platteville and validated on an official UW-Platteville transcript
$3225 per semester for Wisconsin & Minnesota residents.
$4775 per semester for non-residents.
Courses include
Tuition and Fees
Room and Board with Spanish families
Part-time jobs
All financial aid apply

Warning: Tipping a few may be hazardous to your health

by Toni L. Wood, R.D.

C2H5OH, the chemical terminology for ethanol or ethyl, is the drug of choice used by nearly 68 percent of the nation. C2H5OH is the alcohol which wine, beer, and liquor, and in the so-called vodka, which is predominately ethyl alcohol. Eight percent of Americans consume alcohol, of that 68 percent, 12 percent are considered heavy drinkers and 5 percent are defined as alcoholic.

Alcohol is toxic and, in essence, a cellular poison to the brain, heart, liver and gastrointestinal tract. The human has the capability to metabolize alcohol, to detoxify it and convert it to utilisable energy; however, this capacity has its limits. The more alcohol consumed, the harder the liver has to work to detoxify the blood of alcohol. When more alcohol is circulating in the blood than can be metabolized at a given time, the person will be drunk.

A person is drunk due to the anaesthetic effect the alcohol has on the brain; in short, alcohol puts the brain to sleep. As various parts of the brain are anesthetized, the individual will lose reasoning ability, resulting in a loss of inhibitions, followed by speech and visual disturbances, and eventually loss of volunteer movement and coordination. Hence the term, "falling drunk." If sufficient alcohol is consumed in a short period of time, brain function becomes so depressed that coma and death may occur.

Those who drink heavily run the increased risk of liver disease, gastrointestinal damage, cancer, and death in automobile accidents. Alcohol stimulates the release of insulin, thus if drinking is done on an empty stomach, it can result in the symptoms of hypoglycemia (low blood sugar) and pi, absolute havoc with the blood sugar control of those with diabetes mellitus. Alcohol may precipitate gout, interfere with sleep patterns, and inhibit the body's ability to fight infection.

Pregnant women who drink put their child in danger of developing fetal alcohol syndrome, resulting in birth defects and growth abnormalities. As such, a safe level for alcohol has been determined: abstinence is recommended for women who plan to become or are pregnant.

As an aphrodisiac, alcohol may let you down. While alcohol loosens inhibitions and may stimulate interest in sexual activity, it also causes the excess production of an enzyme in males, which results in the breakdown of testosterone, resulting in temporary impotence. Alcohol is unique in that it is a toxic drug that is also a source of energy, which in the form of absolute alcohol provides 7.0 Calories per gram. Aside from calories, alcohol itself provides no other nutrients. In order for the body to metabolize it, alcohol preferentially demands the use of the two B vitamins, niacin and thiamin; this preferential demand may divert these vitamins from other essential functions. Some alcoholic beverages may have small amounts of B vitamins present; for example, beer has riboflavin, but in not significant enough amounts to make it worthwhile as a routine source. You would have to drink 11 cans of beer a day to meet the daily Recommended Dietary Allowance for riboflavin.

In addition to alcohol providing empty calories, and being metabolized prior to other necessary metabolic reactions, alcohol may interfere with the absorption of vitamins and minerals. If you drink routinely or heavily, you may displace nutrients. In other words, the alcohol fills you up and replaces the food you would have normally consumed with empty calories, thus displacing the intake of vital nutrients. If this happens on a continuous basis you will become malnourished and compromise your health.

Abroad, from page 8

We've only been here a month, but we've already learned and experienced so much. I'm proud to say that Dr. Henderson's (Doug's) Spanish vocabulary has greatly increased, and the language is no longer a barrier for the rest of us either.

Time is going so fast, and we plan on making the rest of our voyage even better than the first month. We're scheduled to return to the states on May 21, but most of us are staying longer to tour other countries.

When we all return, be prepared to hear some wild and adventurous stories.

Beer, from page 9

The alcohol content of a drink depends upon the proof of that alcoholic beverage; one degree of proof equals 0.5 percent of alcohol. Thus, an 80 proof whiskey has 40 percent alcohol and a 100 proof spirit has 50 percent alcohol. Wines vary between 8-12 percent alcohol and beer 3.5-7 percent alcohol. One drink could be defined as 1.5 ounces of liquor, a 12 ounce beer, or 4 ounces of wine. calorically, a shot of liquor will be between 88-128 calories, a light beer 80-95 calories, regular beer about 125-150 calories, and wine in the range of 100-200 calories per glass. Various mixers will add additional calories and, possibly, limited nutrients.

It has been suggested by some studies that one to two alcoholic drinks a day raises the level of high density lipoproteins (HDL's) in the body (i.e. the substances thought to help rid the body of cholesterol); thus, implying that this level of alcohol consumption has a protective effect. However, more recent studies indicate that HDL have different fractions or forms, and alcohol raises the levels of HDL fractions that aren’t thought to be beneficial.

Athletes may think that consuming beer after a workout or during an endurance competition replaces lost electrolytes and fluids. Alcohol, however, is a poor choice for fluid replacement, due to its diuretic affect on the kidney. In other words, alcohol causes you to urinate and lose fluids which leads to dehydration, the opposite of what you were attempting to achieve.

Contrary to popular belief, coffee, walking around in circles, and cold showers do not sober you up after a drinking episode; they only make you wide awake, dizzy, and cold drunk as they stimulate the body. Due to its water content, coffee will dilute the alcohol in the blood and the caffeine content will stimulate your body, but it does not speed the metabolism of the alcohol. Only your liver can detoxify and metabolize alcohol. Detoxification takes place at the rate of about one ounce of beer per hour. Only time and rest will sober you up.

Choosing to drink or not is an individual choice. If you choose to drink, do so in moderation, don’t drink on an empty stomach; check with your doctor if you have any illness or if you’re on any medications that may react with the alcohol, continue with a varied and balanced diet; and please don’t drink and drive.

S.P. Foundation will distribute $6,000

UWSP News Service

The Stevens Point Area Foundation will distribute $6,000 this spring as seed money for community betterment projects.

President Gil Oelke said directors of the foundation distributed $6,000 to organizations throughout Portage County last year and were pleased by the results.

The new money to be allocated was donated by foundation directors and by county residents who responded to a mail solicitation in December.

Oelke said the charter of his organization authorizes support for educational, cultural, literary and community improvement projects for the benefit of residents throughout Portage County.

Applications are available from Helen Godfrey, chair of the foundation grants committee, in care of the Office of University Relations, 210 Old Main Building, University of Wisconsin-Stevens Point. Her phone number is 346-2461.

The deadline for returning the forms is April 1.

There was broad interest last year when the foundation made its first offer to help area organizations with their special projects. The recipients of funding: Big Brothers/Big Sisters of Portage County, $1,325; Portage County Literacy Council, $700; Portage County Child Passenger Safety Association, $800; Mental Health Association of Portage County’s “First Call for Help” program, $600; Hospice of Portage County, $1,500; Stevens Point’s Historic Preservation/Design Review Commission, $500; Reinholt Hornet Booster Club summer recreation program, $300; and Stevens Point School System communicative disorders program, $275.

Though the foundation was unable to fund all of the requests it received last year, its officers did value the information received in the application process. The foundation is establishing itself as an umbrella organization for collecting individual, corporate and other contributions for projects throughout the county.

Established five years ago, the foundation’s best-known activity is its living memorial program in which trees are planted in public parks in honor of special events in people’s lives or as memorials to deceased members of the community. In addition to its grants last year, the organization previously provided financial backing for construction of the senior citizen fitness trail along the Stevens Point riverfront, historical museum development in Plover, athletic programs “Meals on Wheels” for the elderly and disabled, arts programs for children and people with learning the physical handicaps, research on the county’s Polish roots and activities for gifted and talented youth.

Contributions are received from the general public on an ongoing basis. Check can be addressed to the Stevens Point Area Foundation, Inc. in care of post office box 963, Stevens Point.

In addition to encouraging local residents to make annual contributions, the foundation board also has urged individuals to consider making bequests in their will for the organization.

opment in the future. A new conservation component will be added to future funding for logging, road-building, hydro-power, and other large scale wilderness conversions. Another change will be to shift development emphasis to already degraded lands. Critics say the policy should be closely watched to avert cheating.

RESTRICTED

FRESHMEN ORIENTATION 1988
LEADER POSITIONS AVAILABLE

Applications are now being accepted for the Summer Orientation Leader Positions. Full-time from June 2-July 14, 1988. Applicants must have a minimum 2.5 GPR and be in good standing at the university. $300 plus room and board. Applications and job descriptions are available in Rm. 103 Student Services Center. Applications must be submitted by Friday, March 11, 1988.
One has to wonder about this new liberal food and drink policy. Is there really a need to remove more student privileges on this campus in light of the kind of damage taking place in the library from food and drink that Arne Arneson states? Or is this just his way of venting his newfound authority and making the use of our library a little less convenient? I will say that our faculty and staff should seek the opinions of the students when it comes to change. Arneson gives us justification: "Irreparable damage" has been done to library materials and pride must be restored to our campus through policy changes as these.

Today we are going to talk about stress. Can you believe stress? Sure, I know you could. But do you know how to deal with it? Do you let stress run your life? Do you really understand what stress is all about? Stress causes people to feel like doggy doo - doo. Stress causes people to say things that do not mean what they mean. Stress causes people to drink Joe Beam and smoke funny little cigarettes when they get home from class. Most people agree that stress is public enemy number one.

The funny thing about stress, however, is that nothing is fun­ny about stress, which reminds me of a little joke - why did the stressed out frog cross the road? Answer: I don't know, but he got run over by a semi. Stressed out people do things not because they really have to be done, but because they think that they have to be done. Roughly 96% of the students at UWSP are stressed out; and, how is the primary cause of this stress? Exams, exams, and more exams...Oh my God, not another one! But do you know how to deal with stress? Sure, I knew you could. Most people agree that stress is public enemy number one.

However, is the jour­ney to build one of them. If you buy the funny thing about stress, however, is that nothing is fun­ny about stress, which reminds me of a little joke - why did the stressed out frog cross the road? Answer: I don't know, but he got run over by a semi. Stressed out people do things not because they really have to be done, but because they think that they have to be done.

The Pointer (USPS-092260) is a second class publication published 32 times a year by the University of Wisconsin-Stevens Point and the UW-System Board of Regents. Distributed at no charge to tuition-paying stu­dents. Non-student subscription price is $8 per academic year.

Second class postage paid at Stevens Point, Wisconsin.

POSTMASTER: Send address change to Pointer, 104 Commu­nication Arts Center, Stevens Point, WI 54481.

Pointer is written and edited by the Pointer staff, composed of UWSP students, and they are solely responsible for its editorial content and policy.
UWSP News Service

High school seniors appear to be applying earlier than ever to attend the University of Wisconsin-Stevens Point.

At least that's the revelation offered by John Larsen, director of admissions, when he is asked for his opinions about the huge increase in applications that are coming in for next fall from prospective students.

The school received 2,359 applications, as of last week, compared to 1,977 at the same time last year.

Larsen said most of the UW-Stevens Point campuses are experiencing increases, though he is not certain of specific numbers.

"I expect things will start to taper off earlier than in the past," he predicted.

If, however, the trend does continue, the University would be forced to continue tightening its admission standards because an agreement between local campus officials and UW System administrators calls for Stevens Point to have 1,700 freshmen.

Not all of those who apply qualify for admission and a certain number are "no shows" when classes begin each September. Therefore, establishing in advance what the size of a class will be and then trying to come close as possible to that number is tricky business. Last fall, for example, the University came within 11 students of hitting its target, which was 1,700 freshmen.

Because there are a few more high school graduates in the state this year than last year, University officials decided to tighten standards even more.

Seniors are admitted either by ranking in the top 50 percent of their classes or by earning a perfect ACT score. The third standard is the one that has been tightened a tad. Students who do not meet the first two requirements are eligible to attend if the combination of their high school rank and their ACT score add up to 97. Last year, the University used a combined figure of 55.

The matter of keeping close tabs on the students most likely to enroll at UWSP is done, in part, through a monetary deposit system. The University charges applicants $100, which is used to offset tuition and fees for the fall semester. In this category, 612 students have paid. There is no comparison to last year because the policy wasn't fully in operation at this time last year.

In addition, about 500 students have paid deposits for rooms in a residence hall, almost exactly the same number of prospective students who had done so at this time last year.

Mei Karg, director of high school relations, says that despite the fact UWSP is limiting its size, "we haven't eased up in terms of telling the Stevens Point story."

University officials are skillful about moving back from an aggressive recruitment posture because the day may come when the system may not work as well. If filling the institution may or may not be

Employment

SCA summer jobs

The Student Conservation Association is continuing to accept applications from persons interested in utilizing experience, expense-paid internships in national parks, forests, wildlife refuges, and other conservation areas across the United States (including Alaska and Hawaii) this summer.

Selected participants will work independently or as a member of a team, and will be responsible for their own travel and living expenses. The program is available to non-students and students of many academic backgrounds regardless of whether or not they are seeking a conservation career.

A late addition to our Resource Assistant Program is an exchange program with several Bavarian State Forests in the Federal Republic of Germany this summer. Five positions are available between early June and September. Free housing, a living stipend and local transportation will be provided. Participants will be responsible for their own round trip transportation to Germany.

Because the selection process for summer positions begins in March, interested persons should call or write the Student Conservation Association as soon as possible. Applications are being accepted now and will be considered for as long as there are available.

The selection process for fall positions does not begin until June 1, 1988. Interested students may request an application and listing of positions by contacting the Student Conservation Association, PO Box 5500, Laconia, NH 03246 (603) 528-5741/5706.

Farewell to fallen comrade

"Fuzz," we called him affectionately. A self-educated, independent, home-grown naturalist in our midst, he left all who knew him with a lasting impression of his hearty, curious character. In manner, he was quite literally "one of those guys," and yet profoundly distinct from everyone in a most agreeable way.

Don's passion was birds, and his intimate knowledge of them, was reflected in a continuous stream of popular-accounts of his observations afield. To a legion of nature-themed fans he provided the field for fires of curiosity sought in the Wisconsin Society for Ornithology's The Passenger Pigeon where he frequently "commanded its helm" with his technical but digestible communications.

Don understood well that if the public was to catch-fire on the idea of wildlife preservation, it was of primary importance that they be provided the information in a manner they could understand and appreciate. To this end, he was a marvelous success. With his influence, ornithological literature has expanded its ranks in Wisconsin.

In over a quarter century afield, Don developed and distributed his wealth of information on an incredible number of species, many of which were endangered, threatened, or of questionable status. His passion for raptors was reflected in an emphasis on hawks and owls, where he devoted considerable time investigating such mysteries as the status of the Great Grey Owl in Wisconsin, the movements of Snowy Owls, the breeding success of Ospreys, and a myriad of other, equally-important inquiries into bird life within our borders.

We who knew and came to love this remarkable man will hold the memory of him as a special gift. His presence in our lives has enriched us. We mourn but rejoice in his success. He has passed the baton to us...let us run.

Somewhere I see him still, his inquisitive eyes trained on a distant skyline, a spotting-scope slung over his shoulder, a pad and pencil in his pocket...and a smile on his face.

C. Cold and those who shared the privilege of knowing him.

Integrated resource management endorsed

An alumnus of UWSP endorses this state's approach to integrated resource management and private forestry in the February edition of the internationally-circulated "Journal of Forestry."

Glenn M. Stoddard, executive director of the Wisconsin Land Conservation Association, writes that enactment of the Managed Forest Law has been an "innovative and effective" way of using property tax incentives to encourage private forest management for the benefit of landowners as well as the public.

He reported that during 1987, the first year of the new law, 29 percent of the 114,000 acres that were enrolled was open to public use.

"The figures for open and closed acres in the initial signing-up were more favorable than expected and clearly indicate that the program is off to a successful beginning," Stoddard noted.

Stoddard noted that given the state's recent experience, using property tax incentives to encourage integrated resource management of private forests according to the objectives of the landowner should be an "innovative and potentially effective model for other states to consider."

Stoddard received his degree from UWSP in 1962. Before taking his present position, he served on the staff of the Wisconsin Assembly's Committee on Forests, Parks and Lands Development, and he was responsible for coordinating drafting the state's managed forest law.

Great Lakes cleanup

MADISON—

A comprehensive water pollution clean-up effort for Green Bay and the Lower Fox River will be launched when officials sign the Green Bay Remedial Action Plan at a ceremony scheduled for 1:30 p.m. on Tuesday, February 23 in Green Bay.

Attending will be Wisconsin Department of Natural Resources Secretary C.D. “Buzz” Besadny; Lyman White, Department of Energy’s Nuclear Regulatory Commission’s Special Counsel for Wisconsin; and John Rose, chair of a citizen advisory committee that helped prepare the plan; and Sam Hallion, mayor, City of Green Bay.

“I view this plan as one more of Wisconsin’s major contributions to cleaning up the Great Lakes,” Besadny said. “I am especially proud of the tremendous cooperation this planning effort has brought about among Department personnel, citizen groups and communities, other agencies, the University of Wisconsin, businesses and the many other people who have spent the last two years creating this plan.”

Besadny also praised the plan for its “ecosystem approach,” and said that it is one of the first remedial action plans in the Great Lakes region to reach the implementation phase.

Lower Green Bay and the Fox River comprise one of 42, Great Lakes “areas of concern” identified for clean-up by the International Joint Commission (IJC), a treaty-authorized organization between the United States and Canada that recommends policy for joint management of the Great Lakes. In 1983 the IJC’s water quality board recommended that states and provinces prepare remedial action plans for the 42 problem areas to restore water quality, recreation and other beneficial uses.

The Lower Green Bay plan focuses on 16 key actions needed to restore the bay and the river that include reducing phosphorus and sediment loads to the bay, eliminating the toxicity of industrial and municipal discharges, improving shoreline and recreational uses, and re-storing an edible fishery.

“A major challenge will be reducing toxic chemicals from contaminated sediments,” Besadny said. “Currently no state or federal program adequately addresses this problem.”

Environmental protection award

Nominees sought

Nominees are being sought for the 1988 John Brogan Award, which is given annually to a private citizen, organization or municipality for outstanding achievement in environmental protection.

The Wisconsin Department of Natural Resources sponsors the award, which is funded from the proceeds of a blind trust set up by former Natural Resources Board member John Brogan, Green Bay.

Nominees for the award should be individuals, organizations or companies in the regulated community that have aggressively and effectively controlled operations to minimize or eliminate environmental pollution.

Consider the following criteria when submitting nominations:

-Nominees must have demonstrated a record of commitment to environmental protection. Generally, the award recognizes long-term efforts, although exceptions may be made for significant short-term achievements.

-Nominees regulated by the DNR that do business in Wisconsin are preferred. Organizations that have performed exceptional environmental accomplishment are also acceptable.

-The award is given to a nominee whose activities are carried out within the state.

-The facility must be in compliance with state environmental laws and rules.

Department employees can also nominate candidates for the private sector award. An award is also given annually to a DNR employee who demonstrates outstanding achievement in environmental protection.

Nominations should be sent by March 7, 1988, to: Wisconsin Department of Natural Resources, Attention: Lydia Gilson, AD/5, P.O. Box 7821, Madison, WI 53707.
Do we want this?

by Andrew Fendos

Outdoors Editor

Undoubtedly, there have been times when you and I didn’t like something that the DNR did or approved. You may have wanted to do something about it and didn’t know what to do, or you may have felt that you wouldn’t be heard anyway. However, a revision in the DNR’s administrative code NR 150 on the Environmental Impact Process has a provision for public comment on some issues. If you hear about a project and would like to express some concern with it, call or write to the DNR’s North Central Headquarters at Box 818, Rhinelander, Wisconsin 54501.

Environmental Assessments statements concerning projects of interest are also available through the DNR. These statements provide you with details of all aspects of a proposed plan. Below is a project that might be of some concern. If it is, express your feelings. Don’t discredit the importance of public opinion.

WI Dept. of Natural Resources

The Wisconsin River Power Company has applied for a permit to deepen approximately four acres at Barnum Bay on the Petenwell Flowage. The site is located on the northeastern shore of the Flowage at the end of Archer Lane in northwestern Adams County. The power company is proposing to remove between 15,000 and 20,000 cubic yards of sand and silt with the use of backhoes, bulldozers, dump trucks, and scrapers. The dredging work is scheduled to get underway after the water level has been lowered about five feet on the Flowage. Plans call for the project to begin by March 1, 1988, and for completion in early April 1988.

Portions of the four-acre area will be deepened from two to eight feet, depending on the existing conditions on the bottom of the bay. The overall goal is to create a normal depth of water between six and eight feet in this portion of the bay. The additional four acres of deeper water will allow for more marine docking facilities and more room for boats to safely enter and leave the bay.

Since its completion in 1984, the Barnum Bay Sailing Center and boat service facility has become a very popular area for water-related recreational activities on the Flowage. Increased use of the bay is anticipated after the present construction of five town houses by the time the power company is completed. It is anticipated that additional docking facilities will be needed once the town houses are sold and occupied.

Outdoor Reporters Needed
x9031

Once work on the proposed dredging project commences, spoils from the bay will be hauled a short distance to a previously cleared site for land disposal. On December 1, 1987, the power company employed a private engineering firm to collect three samples of the bottom sediments at the project site. The samples were analyzed for contaminants, as required by law. The analysis of sample number three taken near the southeastern end of the proposed dredging area indicated low levels of dioxin and furan. However, the results of all the sediment analyses showed all potential contaminants to be within acceptable levels to permit the placement of all dredge spoils in the designated disposal site.
Swimmers finish second, fourth at conference meets

Sports Information Office

The UWEP men's and women's swimming and diving teams entered the final day of conference competition in second and fourth place and concluded in the same place.

The Pointers scored 418 points, second to Eau Claire's 624.5. Other team finishes had La Crosse in third at 311, followed by Whitewater 218, Oshkosh 117.5 and Stout 114.

Nino Pisciotta won his second WUSC title in the final day of events, this time topping the 100 breaststroke in a time of 1:05.60. Sophomore Kevin Parham of Chicago, Ill., captured top honors in the 50 free in 21.77 to lead the first-day efforts. Second places were won by Sam Siegel in the 500 free in a lifetime best 4:47.06. Parham, Jeff Shaw, Nino Pisciotta and Ken Brumbaugh also finished second in 7:13.81.

Third places went to Ken Brumbaugh in the 100 freestyle (:48.44), and Andy Wolfe in the 200 breaststroke (2:20.96).

Winding out Point's top finishers with fifth place showings were Kevin Parham in the 100 freestyle (:49.95) and Peter Zoboli in the 200 butterfly (2:02.31), while the lone sixth place finish went to Jeff Shaw in the 100 freestyle (49.78).

"The men were very consistent and swam a very strong meet," said Head Coach Lynn "Red" Blair. "Again, Eau Claire was extremely strong with a lot of depth, and their diving was even stronger."

"They beat us by 105 points in the water, which is 16 events average to beating us by less than seven points per event. In the two diving events, we outscored by 101 points."

Our divers did a nice job, but Eau Claire is so strong with their diving program and they also have a great diving coach."

"Seigel was probably our men's biggest bright spot of the entire meet. He didn't break his personal bests; he shattered them."

Eau Claire also topped the women's side for the WWIAC crowns, scoring 677 points. The Bluegolds were followed by La Crosse with 379, Stout 352, Stevens Point 312, Whitewater 230 and Oshkosh 118.

The 100 free relay of Lynn Palmeiro, Sarah Kohl, Darcey Hessenhalter and Anne Watson placed first after Eau Claire was disqualified.

The Lady Pointers' finish in the final day of competition was Karen Petrick who captured second in the 1,050 freestyle in 18:22.48. Third places went to Teri Calhoun in the 100 freestyle in 13:44, and the 600 freestyle relay in 3:48.42, while grabbing fourths were Debby Hadler in the 1,650 freestyle (18:33.34) and Petrick in the 200 butterfly (2:21.30). Anne Watson placed sixth in the 1,650 freestyle (18:32.19).

"I thought our women national qualifiers swam better than I expected because I didn't rest them for this meet," said Blair.

"They swam super, especially Petrick, Hadler, Watson, Calhorns and Jan Gelswicks."

"Petrick, as she has been all year, was the bright spot for the total meet."

The NAIA National Meet will be March 4-5.

Last home game spoiled for hoosiers

Two close games still spell two defeats

by Kevin Crary

Staff Reporter

The Stevens Point men's basketball team erased their hopes of having that fourth-place advantage in the first round of the District 14 playoffs when they suffered two defeats this weekend.

The Pointers' record dropped to 6-9 in the conference, 14-11 overall, after losing to Strives Point 82-75, Thursday at River Falls, 79-77 Wednesday and 81-67 Saturday at River Falls.

The two setbacks eliminated any chance Point had of catching fourth-seeded La Crosse and playing their first playoff game at Quan­dt Fieldhouse. The Pointers are currently seeded sixth in the eight-team bracket.

Stevens Point senior forward John Holmes said "good-bye" to the supportive fans in a grand way, finishing with a season-high 29 points, with 19 coming in the second half, and a team-high six rebounds.

Holmes couldn't miss as he hit 13 of 19 shots from the floor, more than doubling his season average.

Stevens Point junior forward Mike Christiansen's 14 points and five rebounds were the most of any four at the line.

Senior guard Todd Christiansen and senior center Craig Wessel added 13 of 17 and 13, respectively.

Point put together one of their best outings of the year as the Pointer defense limited them shoot 59 percent from the field and 73 percent at the line.

But as astounding as those numbers, Point lost the two games by 19 points. The Pioneers finished 10-3 in the WWIAC, 14-4 overall.

The Pointers' second individual crown with a winning performance in the 100 backstroke in a time of :55.60.

Sophomore Kevin Parham of Chicago, Ill., captured top honors in the 50 free in 21.77 to lead the first-day efforts. Second places were won by Sam Siegel in the 500 free in a lifetime best 4:47.06. Parham, Jeff Shaw, Nino Pisciotta and Ken Brumbaugh also finished second in 7:13.81.

Third places went to Ken Brumbaugh in the 100 freestyle (:48.44), and Andy Wolfe in the 200 breaststroke (2:20.96).

Winding out Point's top finishers with fifth place showings were Kevin Parham in the 100 freestyle (:49.95) and Peter Zoboli in the 200 butterfly (2:02.31), while the lone sixth place finish went to Jeff Shaw in the 100 freestyle (49.78).

"The men were very consistent and swam a very strong meet," said Head Coach Lynn "Red" Blair. "Again, Eau Claire was extremely strong with a lot of depth, and their diving was even stronger."

"They beat us by 105 points in the water, which is 16 events average to beating us by less than seven points per event. In the two diving events, we outscored by 101 points."

Our divers did a nice job, but Eau Claire is so strong with their diving program and they also have a great diving coach."

"Seigel was probably our men's biggest bright spot of the entire meet. He didn't break his personal bests; he shattered them."

Eau Claire also topped the women's side for the WWIAC crowns, scoring 677 points. The Bluegolds were followed by La Crosse with 379, Stout 352, Stevens Point 312, Whitewater 230 and Oshkosh 118.

The 100 free relay of Lynn Palmeiro, Sarah Kohl, Darcey Hessenhalter and Anne Watson placed first after Eau Claire was disqualified.

The Lady Pointers' finish in the final day of competition was Karen Petrick who captured second in the 1,050 freestyle in 18:22.48. Third places went to Teri Calhoun in the 100 freestyle in 13:44, and the 600 freestyle relay in 3:48.42, while grabbing fourths were Debby Hadler in the 1,650 freestyle (18:33.34) and Petrick in the 200 butterfly (2:21.30). Anne Watson placed sixth in the 1,650 freestyle (18:32.19).

"They swam super, especially Petrick, Hadler, Watson, Calhorns and Jan Gelswicks."

"Petrick, as she has been all year, was the bright spot for the total meet."

The NAIA National Meet will be March 4-5.

Falconsswoop, snatch win from Point

Last week's 26-point loss to the River Falls Falcons was embarrassing, but last Saturday's game was for the birds.

The Lady Pointer basketball team played the Falcons almost even in every aspect of the game and almost came back from a 13-point second-half deficit before losing 63-42.

Shelly Kostick put River Falls up by one and ended the Pointers' hopes of upsetting the conference's top team by hitting a rim-ringing free throw with only three seconds left in the game, breaking a 62 tie.

The game itself was as close as the final score indicated. River Falls held a slim 22-20 lead at the half. Point was out
Barahona has four goals

Two wins put icers in playoffs

by Scott Huelskamp

Sports Editor

Anyone who was watching last weekend's hockey games between UWSP and St. Scholastica and lost the puck, well, they could probably find it in between UWSP and St. Scholastica goals.

Butler rattled the nets for 19 goals in two games, en route to two victories. UWSP shelled the Saints 11-3 Friday and Saturday 9-5.

Although the Pointers won both games their hopes for the home ice advantage in the NCHA playoffs were ended when Semidji State beat UW-Eau Claire, 7-2, Saturday.

In Friday's game eight different Pointers found the goal. Three Stevens Point icers, Ralph Barahona, Mike Stanley and Tim Coghlin, each had two goals.

Goals by Shawn Wheeler, Joe Butcher, Jason Wessler, Mike Waldron and Pete Supple all helped to bury the lowly Saints, who had only one conference win and only three victories in 26 games this season.

Supple's first period wrist shot on Saturday gave him his second goal of the weekend and started another big scoring night for the Pointers.

Rick Fleming increased the lead by one and the rout was on once again.

Pat McPartlin added his name to the Pointer weekend scoring list Saturday in the second period. The Saints got their only goal of the first two periods three minutes later in the powerplay, cutting the score to 9-1.

Coghlin knocked in another goal to give Point a three goal cushion after the second period. By scoring twice in as many games Coghlin broke out of a slump in which he tallied only one goal in 24 games.

UWSP got scores from Tim Correaud, Mike Green, and two more from Barahona, in between two St. Scholastica scores to escalate the advantage to 8-3.

The Saints made one last futile attempt by hitting the net twice more to draw with a couple at 8-5.

Point regained control during the last few minutes and the Saints could get no closer.

"It was hard to stay up after so many emotional games in a row," said head coach Mark Mazzolini.

The Pointer skaters finished in third place in the National Collegiate Hockey Association with a 19-7-2 record.

"It's important not to rely on one line for our scoring going into the playoffs," he said. "We need multiple production so that if one line gets shutdown we're still not hurt by it," said Mazzolini.

The Pointers take to the ice Saturday and Sunday to take on Semidji State. The winner goes to the NCHA championship to face the winner of UW-River Falls - Madison State match.

"This is something we've strived for (the playoff) and it's a great stride for our program. Everybody is even now and we have to be at the top of our game. We're confident we can do well," said Loy.

We're full of Blarney!

Point soccer advances to finals, loses to GB

by John Clark
Special to the Pointer

The UW-Stevens Point men’s soccer club silenced a lot of critics both on and off the field as they won their division, advanced to the playoffs, and eventually lost to finalist UW-Green Bay during the recent seventh annual UW-Oshkosh indoor soccer tournament.

The 16-team field was divided into four divisions of four teams each. Stevens Point was grouped with UW-Oshkosh, Marian College and UW-Fox Valley. Each team played each other once, with the top two teams advancing to the playoffs.

In their first game, Stevens Point faced Fox Valley. It wasn’t much of a match, however, as Point shot them out 8-0.

“At first, things looked a little shaky,” said Point Coach Jan Skully. “But after the first few minutes it took us to adjust to the playing field, we had things under control.”

Point started the attack early, and at 3:22 Dave Valentine scored off assists from Tim Foye and Mike Harbert. Paul Herold made it 2-0 at 4:15 off a pass from Mitchell. Valentine got another goal at 5:23, and one more at 7:19 from assists by John Schulz and Jon Newman, to give Stevens Point a 4-0 halftime lead.

The second half was again all Stevens Point as they tallied four more goals from Rob Ansen, Foye, Schulz and Paul Herold to round out the scoring.

“We came out strong and didn’t let up,” said Skully. “Every goal could count in the tournament because of goal differential possibilities advancing teams into the playoffs.”

In Point’s second game, they faced host team UW-Oshkosh. Again it was all Stevens Point, as they defeated the hosts 6-0, with goals coming from Valentine, two from Ansen and one from Herold. Point goalie John Clark faced 15 shots in the game to earn his second shutout of the day.

“Against Oshkosh, the boys again showed their determination and goal sense,” said Skully. “This was a team victory; everyone worked equally for it. The offense or defense can’t individually be praised because of the constant overlapping involved with indoor soccer.”

Stevens Point was assured then of advancing to the playoffs. Their final game against Marian College would determine if they would get first or second in their division. If they defeated or at least tied Marian, Point would win. Otherwise, Marian would get first in the division.

Marian proved to be a good team as the game progressed. Marian scored at 4:55 in the first half, but Stevens Point tied the game at 8:01 on a Mike Harbert goal from an assist by Jon Newman. In the second half, Point scored first with a goal by Ansen on an assist by Tim Foye. Marian wasn’t to be outdone as they tied the game 2-2 at 6:58, and then went ahead 3-2 at 9:17. Stevens Point scored the tying goal at 11:35 from Paul Herold pass that deflected off Dave Valentine to score.

“Marian was a tough team, and we had to really dig in to tie them,” said Skully.

Stevens Point thus won their division and advanced to the playoffs. They had to face UW-Green Bay in their fourth game in two days. Point found out that a small club team can do anything against an NCAA Division I scholarship school. In the first half, things were fairly equal until Green Bay scored on a rocket shot past Point goalie John Clark at 17:17.

In the second half, however, things didn’t go too well for Stevens Point as Green Bay scored at 3:02 to take a 2-1 lead. As time dwindled, Coach Skully was faced with the decision of when, or if, to pull his goalie. John Clark was scheduled to be pulled Clark and put in a sixth attacker.

With the sixth attacker, Point took their goal up as Green Bay scored four unanswered goals to win 6-0.

“We could have left John in the goal, but we had to go for the win,” said Skully. “The other team noticed we weren’t as good as the last game, and we had to really dig in to win.”

Point returns to action March 27 when they participate in the River Falls Invitational.

The UWSP soccer team placed a distant second in their league and the men’s team exhibited a strength similar to the women’s squad having several successful individuals in distance events at last weekend’s UW-Oshkosh Invitational.

“This was a fun meet for the team,” said women’s coach Ken Hill. “Some were out to get seed good times for the conference meet while others were changing events and running throwers so that we could do a little speed work. Our team was relaxed and ran very well.”

Men’s mentor Rick Witt said, “The coaches have been telling our people that when we get too warm we get slower. We’ve had a warm weather outside that we would see some big drops in our times and we did. I think everyone ran better than we did last week and on a slower track.”

Women’s results

The distance and middle distance events continue to be the women’s forte as Kris Hoei crossed the tape first in the 3000 meter run in a time of 10:18.1 and Barb Knuese placed first in the 600 with a 1:34.4 clocking.

The lone Pointer first place in women’s field events went to Sue Collor in the high jump, with a leap of 5 feet, 1 1/2 inches.

Pointed second place went to Beckie Sherwood in the 200 yard dash (29.5), Seth Means in the shot put (39-4), and Kris Zander in the triple jump (33-3/4).

“ Sue Collor went 5-2 1/2 in the high jump for her first collegiate win. She is working hard and improving a little each week,” said Hill. “Barb (Knuese) ran another tactical race in winning the 600. She made a move early in the race and took advantage of the race rhythm and race plans,” added Hill.

“If we get some decent weather this week so that we can do some speed work, we will be ready to run some good races in the WIAAC meet in two weeks.”

Although the women’s team placed second with 33 points, they were a distant second to Oshkosh, who broke up 139 points. St. Norbert’s was third with 18 and Ripon last with 3.

Men’s results

“Our people in the middle distances are beginning to live up to our reputation as the premier middle distance school in the state as we won the 400, 600, 800 and 1000,” said Witt.

Mike Christman was the work horse running again by winning the 400 in a school record time of 49.5.

Speedster Astron Kenney flew to another victory in the 60-yard dash in 6.2, his best time of the season.

Other Pointer firsts went to Steve Wolnizer in the 1000 meter run (2:18.3), Steve Allison in the 600 (1:24.3), Tim Olesen in the 800 (1:58.0), and the mile relay team in a time of 3:39.9. Also, Jim Shumway won the shot put with a heave of 43-1 1/2. John Gunderson was second in the put with a 40-10 mark.

Hurdler Brad Houset placed second in the 220 hurdles (26.2 seconds flat), as did Al Gebert in the 1000 meters (2:18.8), Eric Fossman in the two-mile (9:28.4) and the 880 relay team (1:34.1).

No team scores were kept.

“Our distance runners all ran their best times of the year,” said Witt, “and are showing they will be ready for some really good times. The sprinters also showed good improvement as Kenney and Pete Larsen ran their best times of the year.

“I was also pleased with our intermediate hurdlers as all of them showed great improvement, even though we never practice them (hurdles).”

Our weight people have been struggling a little off started to...
Efforts by Holmes not enough

from page 18

The crowded schedule finally took its toll on the Pointers as they fell to River Falls for the second time this season. But the 81-67 final tally does not show how close the meeting actually was.

Despite Point’s stale shooting in the first half (.487 from the floor and 57 percent at the line), they survived a 65 percent field goal effort by the Falcons and managed a 32-31 lead at intermission.

Point was ahead most of the first half, but the Falcons used a freshman guard and leading scorer Dean Cook erased lay-ins, but were held scoreless for 1 minute and 14 seconds due to the Sentry World Sports Center lead at the half. Christianson also led the team with three steals.

Point was ahead most of the nine., and Tim Brown's three-pointers and big moments earned Northern 14-7, 5-7, 5-4. Doug Greenberg (3) rolled to a 6-3, 64-match over Jason Bacon.

Stew Stone would win the team's third match in a row to give Point a momentary 3-1 lead at the Sentry World Sports Center, but that would be the last triumph of the day for UWSP. Stone took a 7-5, 6-4 match from Jimmie Marasig.

The team of Hauge-Hastings put-up the toughest doubles fight before bowing 6-2, 34-6, 62 to the Mike Patneude-Steve Wise team.

Singles strong, doubles week at tourney

by Mike Freidens

Three individual victories weren’t enough for the UWSP men’s tennis team to overcome the better teams in the state as they were beaten last weekend by UW-Milwaukee, six matches to three.

Bryan Zowin, Stevens Point’s number one singles player, dropped a 5-4, 8-2 match to Jeff Aranda. But UWSPs two, three, and Zowin are three with three straight wins.

Gary Poilert (2) came from behind, rebounding from an early tie-breaker loss, to defeat BJ Childs 6-7, 5-4, 6-2.

The Pointers expected to take their double teams to Madison this Saturday for the Cher eke Doubles Tournament.

Tracksters, from page 20

point difference between fifth and sixth place, and only, two points between fifth and sev enth.

The Pointers will gear toward the NCAA III National Qualifier which will be held at Whitewater this weekend. The winner and fourth place will advance to the National Tournament in Wheaton, Ill., on March 6-7.

Sports Shorts

With only one game remaining on the conference schedule for UWSP’s men’s basketball team it is impossible to finish above the .500 mark. It will be the first time they will finish below .500 in the WSUIC since 1976-77 when they went 4-11. Incidentally, that was Dick Schreiner’s first year as head coach. Attendance for this season’s Pointer home games totaled 19,053, for an average of 1,220 per contest. Before losing at River Falls last week-end Point had won 21 of the last 23 meetings between the two teams... Todd Christianson continues to move up the scoring list. He is now 193 all-time with 867 points... Larry Ploch has two of the top three-point tailgainers in the conference in Bob Zenn and Corey Block. Zenn has hit on 63 of 136 attempts (.463) and Block has canned 45 of 106 (.433)... One goalie has not been heckled with the cry of sieve this season is Bemidji State's Steve O'Shea. The junior goalkeeper leads the NCAA with a .907 save percentage through 17 games. He has 338 saves... River Falls forward Aaron Scott tops the conference in points, with 48 on 15 goals... Lady hoosiers Sonya Serensen is number three in the conference in shooting percentage even though she has taken at least 46 more shots than the next closest player. The ’87 All-Americans is sinking a cool 58 percent (112 of 193)... The Oshkosh gymnastics team has won the last nine conference ti tles... John Holmes and Todd Christianson are in the top ten in the WSUIC scoring race. Holmes is sixth, averaging 18.5 and T.C. ninth with 16.5 ppg. Whitewater’s Duane Vance still holds the top spot with a 22.1 mark... Center Craig Weiss is second in conference field goal percentage, delivering 54 percent of the time (64 of 117)... The year’s best collegiate wrestling record in Wisconsin goes to Scott Arneson of Platteville, who is unde feated in 39 matches at 186 pounds... 158 pounder Todd Postick of River Falls is close behind with 38 wins and only one loss... Todd Bennett of Whitewater has an 8-1 mark in 142 class... Stout’s men’s 4200 relay team set a school record time of 8:31.19 in winning its event at the Eau Claire indoor track and field meet two weeks ago... Eau Claire’s Eric Burwell won the 300 in Bisphog record time of .35:45... Three other individu als and the 4x100 relay team also set school records...

Love, Ly

Opening March 21st "The Five Sense" Gift Boutique

Bama, I'm counting the days until we can play. We'll have a lot of fun in the Oregon Gulf. I hope I don't see a nun carrying a skating rink, Tina T.

Oshh, Dick Schelinski

Correction:

In the February 18 edition of the Pointer, it was incorrectly reported that the text rental fee increased by 15.4 percent this year. That amount of increase was proposed by Text Rental to help cover the cost of SMART software, but the increase was denied by U.S., stem administration officials last summer. There, therefore, no increase in text rental fees this year or last year.

For Sale/For Rent
