Nelson's space requested

by Paul Jankowski

News Editor

What's going in South and Nelson Hall next year? Obviously it won't be students, but several other groups have requested the halls for future space. The requests are being handled by the Campus Space Allocation Committee.

According to Steve Cady, Student Government president and student body representative on the committee, Nelson Hall has a number of requests for its space.

Cady says the Women's Resource Center and the Day Care Center will still remain A-OK in Nelson. International House, now located in St. Stanislaus Convent, would like to move into Nelson. Currently, the university is paying \$17,000 in general purpose revenue funds to the parish to house this program. The English Language Institute, also in the convent, has requested space in Nelson as well.

The Educational Opportunities Program has also requested space in Nelson, and the Small Business Development Center would also like space in the

hall. Currently the EOP Program is housed in the Student Services Building and SBDC is in the basement of Old Main.

Educational Media Service, also in the basement of Old Main, is requesting a place in Nelson as well. Finally, space is also requested for an office for foundation development. Cady says this office would be used to write Title III grants. Those requests use money from the federal government for start-up programs similar to campus computerization or, in the future, maybe minority faculty retention.

Operating costs for Nelson Hall should come from general purpose revenue funds (state monies) for next year. Currently, all the residence halls are funded by program revenue funds, that is the monies to run them come from Residence Life funds.

However, According to Greg Diemer, Assistant Chancellor for Business Affairs, the university doesn't yet know if the state will approve this change or not. He added though that in a few weeks they'd definitely

know the state's position.

South Hall should still be covered by PR funds for next year. According to Cady, the Wellness Institute is planning to rent space in the hall. Fred Leafgren, Assistant Chancellor for Student Life and Director for the Wellness Institute, says the institute has requested to rent one floor, but not the whole building. Cady also says a faculty credit union, now located in the Student Services Building, may rent out space in South as well.

The Campus Space Allocation Committee will meet next week to hear and act on the requests. Cady says "the space is needed, but (it's) not pressing."

If the requests are approved, moving will begin this summer, according to Cady. He says costs for it will come out of a small project mini-budget estimated at \$30,000 from the maintenance budget itself.

Cady stressed that the halls were going to be closed to save money, not for the space they could provide. South and Nelson are being closed in "an attempt to par down the Residence Life budget," he said.

Governor Tommy Thompson discussed his property tax initiative at Sentry Theatre last Friday. His plan calls for stringent spending controls on local governments.

Minimum Wage Increased?

National forum

Congress is presently debating legislation calling for a series of increases in the minimum wage. The question is not whether it is appropriate to set a floor below which wages may not fall. There has been a minimum wage set by Congress for over 50 years. The question is how much higher the minimum wage should be—now and in the future. The proposed legislation would raise the minimum wage in gradual steps over the next three years, and then tie the future minimum wage to the average hourly wage in private industry.

The evidence supporting an increase is overwhelming. In the 10 years since Congress last enacted minimum wage legislation, the number of Americans who work full-time but still live below the poverty line has risen by 50 percent. Today, in two out of three poor families, at least one family member is earning a paycheck. Among them are over two million families headed by female minimum wage workers. Across the board, the occupations with the highest percentage of minimum-wage workers are dominated by women.

Many of these women are displaced homemakers: primarily mid-life and older women who have lost their main source of income due to the death, disability or long-term unemployment of their spouse, separation, divorce or the loss of eligibility for public assistance benefits. After many years of working in the home, these women must find paid employment in order to support themselves and their families—usually at minimum-wage jobs.

Minimum-wage workers want what every worker wants—to provide a decent standard of living for their families. But at the current minimum wage level, that goal is an unreachable dream. While the minimum wage of 10 years ago gave workers a chance to climb out of poverty through a job, that opportunity has been robbed by inflation.

For women maintaining families, living on a minimum-wage income is especially painful. Child care alone costs an average of \$7 per week per child. That means that a woman working full-time at minimum wage has to spend more than 40 percent of her weekly paycheck for child care—if she has only

one child. Too little is left for housing, food and other basic needs. In reality, many women earning the current minimum wage keeps workers and their families in poverty. If workers cannot survive on their wages, they will have little choice but to keep turning to the government for assistance.

Lawmakers must also be mindful of the labor market of the future. Seven out of the 10 fastest-growing jobs over the next decade are service-sector jobs that employ large numbers of minimum-wage workers. These are the jobs that will be available for displaced homemakers, welfare recipients and other women entering the workforce. The minimum wage must be raised now if the workers of the future are to be economically self-sufficient.

A one-time increase is not enough. Indexing the wage to 50 percent of the average private hourly wage is the most important provision of proposed legislation raising the minimum wage. The minimum wage is now only 37 percent of the average \$9.11 hourly wage. The three-step increase called for by

Classes after labor day?

United Council News

United Council of UW Student Governments is urging the Assembly Colleges and Universities Committee to strike down the passage of a bill that would mandate that UW System classes begin after the Labor Day holiday.

Jim Smith, Legislative Affairs Director for United Council, argued that the bill (AB-806) has the potential to throw special academic interim programs into chaos as well as jeopardize students' role in shared governance. Smith testified yesterday at the public hearing of the bill.

Smith asked the committee to consider a few points before they make a decision regarding the bill, such as the tentative date of Labor Day each year. "Labor Day is not always the beginning of September," Smith said. "If it comes late, there would be less than 16 weeks of classes before Christmas." This, Smith said, would force students to take final exams af-

ter the December holidays.

"Also," he said, "if we move the calendar further back, students will end up having less time in classes, and faculty will be forced to fill more material into a shorter time period." The bill would also require that students remain in school until after the Memorial Day Holiday, making it more difficult for the UW System student to gain summer employment.

In his address to the committee, Smith proposed alternatives to the bill, suggesting the committee model it after the compromise UW Stout adopted last year. In that compromise, students who wish to work past the Labor Day holiday can register in the spring and report to their classes when they return from their jobs.

In his closing statement, Smith told the committee, "No student government in this state

THE FUTURE LOOKS BLEAK for the Arizona State U. chapter of Phi Gamma Delta fraternity, which is awaiting the results of a university investigation of its alleged hazing activities. The "Fijis" have already conceded guilt to 13 ASU code-of-conduct violations. The attorney representing ASU has asked that Phi Gamma's status as a campus organization be revoked for two years.

AND NOBODY'S TALKING IN TEXAS. The national office of the Gamma Phi Beta sorority has told its U. of Texas chapter to clear the sorority of all current members for the 1988 fall semester. Officials say the sorority had numerous "blatant" violations of chapter policies, but they're not commenting on specifics. Starting this fall, the chapter will consist of all new members. Active members will have alumni status, and pledges may "depledge" or become alumni.

MAKE WAY FOR THE HOVEL. Shanties erected on the U. of Texas mall to protest apartheid in South Africa had to give up their prime location for a few weeks when a new symbol of protest moved in: a hovel, which symbolizes poor living conditions in the Soviet Union.

OLD SHOES, OBITUARIES, AND FUDGE have been used as attention-grabbers when it comes to students applying to colleges. Competition is driving them to send everything from essay-embroidered tablecloths to nude self-portraits. In his "obituary," one student wrote that he graduated cum laude; then went on to list his life accomplishments—so the admissions office could see his career interests and goals. He was accepted.

PSYCHIC SUES U. OF HAWAII. Gharith Pendragon launched his lawsuit after UH cancelled his classes in parapsychology. He says the university did it because there's a lot of fear clouding people's perceptions about parapsychology.

STAR, Performing Arts, vetoed

by Blair Cleary

Staff writer

Student Government met last Sunday to vote on the annual budgets. In the eight-hour session, more than a quarter-of-a-million dollars was allocated to various groups ranging from UAB to the Bicycle and Triathlon Group.

The exact budget figures were not yet available from the SGA Budget Director. Some rough figures were, however, available from the senators. The day's biggest allocation went to UAB who got roughly \$78,000. WWSP 90 FM got \$42,000 and

Performing Arts got \$53,000.

Several groups, including the Pointer and SGA were not funded Sunday. These groups will be budgeted on Thursday at the regular Senate meeting.

Also to be looked at Thursday are the two budget vetoes SGA President Steve Cady used to nullify S.T.A.R., Students Together Achieving Results, and Performing Arts allocations.

Cady stated he vetoed S.T.A.R.'s budget because he felt the Senate spent too little time on it. According to Cady, there was "confusion surround-

ing the vote by the Senate."

The Performing Arts veto was due to a disagreement over the amount allocated to an orchestra performance. To an event that only 300 students, roughly, would attend, \$9,000 was given. This would mean the student body is paying for 300 \$30-tickets for one show that isn't even on our campus. It would take place in the Sentry Theater which holds more people. It is affecting too few students for the price.

"I do not feel we should

Women's Leadership Conference Succeeds

by Sharon Hallett

Staff writer

Shirley Faughn was the keynote speaker for the first Women in Leadership Conference—Competence, Confidence and Credibility—held on campus last Saturday.

Faughn is the co-founder and executive consultant for the Aslan Group, a management training firm in Champaign, Ill. As a consultant, she designs and conducts training programs on listening, assertiveness, time management, supervision and leadership.

She has earned degrees in psychology, social work and counseling. After 12 years of professional experience, she has returned to complete her Ph.D. in higher education administration at the University of Illinois. She has a particular interest in leadership in higher education and gender differences in that role.

As keynote speaker, Faughn explained that as women we must "raise awareness of

leadership, identify behavior of leadership and have and appreciate our capabilities as leaders." Leadership is a relationship in which "women are at an exciting point, as the number of women leaders are growing,"

Faughn explained. Further stressed, leadership is a relationship in which the other person can see the whole world in your eyes. She also said women have the unique capability to bring both competitiveness and femininity into their leadership role.

Women leaders operate out of a male model which says that a good leader is vigorous, firm, assertive and dominant. If women follow this model, then they should not be surprised to be called a bitch.

She also follows another philosophy that she learned through personal experience which is "you are never too busy to invest in people." When women share their strengths, they open the way for those leaders who will come after us.

The conference was a well-planned, informative, daylong event. It was divided into three session blocks that dealt with various topics pertaining to competence, confidence and credibility.

Some topics offered for competence were the Forum of Professional Women, Cultivating Career Skills in College Experiences, and Communication and Self-Expression. Confidence top-

U.S. Republican Senator Bob Kasten stopped by the campus for a short visit last Saturday.

Kasten speaks at UWSP

by Paul Jankowski

News Editor

US Senator Bob Kasten made a visit to the UWSP campus Saturday. Portage County Republicans brought Kasten to the University Center's Heritage Dining Room for a short question and answer session. Scott West, chairman elect for Portage County Republicans, emceed the meeting.

Responding to a question about the Contras, Kasten said that "we're likely to have an important and lengthy debate regarding new appropriations for them. He said that "we have a responsibility (to the Contras) and they're asking us

for our help."

Kasten said that he was in favor of both a presidential line-item veto and a balanced budget constitutional amendment as ways of dealing with the federal budget deficit. However, Republicans should "concentrate on the line-item veto," noting that its chances of success are higher alone than with both measures combined.

He noted the upcoming importance of Republican governors. Claiming that the current political districts are "gerrymandered" against Republicans, he said that they were key to dis-

19 coming back?

by Paul Jankowski

News Editor

A bill to lower Wisconsin's drinking age from 21 to 19 was introduced in the Legislature last month and is now in the State Affairs Committee.

Brenda Leahy, Student Government Association's Legislative Affairs Director, says she is in favor of the bill. According to Leahy, the 21 drinking age isn't right, "it's infringing on people's rights," she said.

Leahy strongly urged all students to get in touch with their representatives in the Legislature. Students should also con-

tact their representatives for a reply "just to get their attention, then they'll have to deal with the issue," she says.

The bill, Assembly Bill 919, has a long, difficult road ahead of it. Leahy says that Stevens Point Congressman Stan Gruszynski said the bill's chances during this legislative session were from fair to poor.

Leahy noted that before the Legislature adjourns on March 25, it must first tackle Governor Thompson's Property Tax Initiative and the state budget as well. Small bills such as this

one and the 33 percent tuition cap "have to really go through quick," according to Leahy, if they want to reach the governor's desk.

Adrian Serrano, President of United Council, said, "There is overwhelming student support to lower the drinking age in the state." United Council of UW Student Governments represents more than 156,000 students in the UW System.

Serrano says, "We know that realistically this bill does not

WHEC changes name, adds Ohio loans branch

Wisconsin student loan guarantor sees multi-state merger likely

by Karen Rivedal

Editor

The Wisconsin Higher Education Corporation (WHEC) announced Monday a name change and near merger with Ohio state lenders.

The Great Lakes Higher Education Corporation, with an operations center in Ohio, has replaced WHEC as Wisconsin's primary student loan guarantor. As such, the new corporation will oversee the federal government's Guaranteed Student Loan program, and protect banks who give loans to students.

The addition of Ohio to the Wisconsin program is good news for Wisconsin students, according to Richard Johnston, GLHEC Vice President for WI Guaranty Programs. "We should be able to generate savings because of our larger size. Our hope and expectation is

that we will be able to charge lower fees to students."

Student GSI borrowers presently pay a one percent fee to the state loan guarantor and an additional five percent to the federal government for servicing and insurance of the loan. Fees are not to increase for the next academic year, according to Johnston, and may decrease if other state loan agencies join GLHEC as planned.

"Michigan is currently working on a piece of legislation to join this year yet," and Illinois and Indiana have been contacted as well, reports Johnston.

As part of the Wisconsin-Ohio agreement, two representatives of the Ohio financial community will soon be appointed to the Corporation Board of Directors, and David Harmon, former director of the Ohio Student Loan Commission will join GLHEC as Vice President for Ohio Operations.

"In my view," adds James Jung, President of GLHEC, "the movement to regional affiliation represents the most logical and effective next step in the development of guarantee entities. State boundaries are becoming irrelevant for purposes of financial services. Regional guarantors will be able to offer high quality, cost effective student loan products and services and at the same time preserve the local focus envisioned by the federal legislation that established the program."

GLHEC reports that the Corporation expects to guarantee \$450 million in loans during the current academic year, over half of which will be made to borrowers outside Wisconsin. A total of \$1.7 billion is currently guaranteed by the Corporation. Loans are made by banks, savings and loan associations, and credit unions.

they can keep.

SCARE TACTICS AND HARASSMENT are being used by local election officials to deter U. of Georgia students from registering to vote, claims the newly formed Student Coalition for Voter Registration. So, the group marched into the Athens courthouse and registered. The Coalition claims two students were recently denied the right to transfer their voter registrations from their home counties. Officials deny the charges, but contend that if the students' legal residences aren't in Athens, then they shouldn't vote in Athens.

Minimum wage

from page 1
The bill will bring the minimum wage to \$4.65 an hour in 1991, an amount that still will not equal 50 percent of the average hourly wage, according to government projections.

Indexing the minimum wage will maintain or increase incomes of minimum and low-wage workers more efficiently than public assistance, according to the Minimum Wage Study Commission established by Congress. Indexing the wage could also provide an incentive for workers to stay in the labor force, and would improve the quality of life for millions of poor women and children without increasing the federal budget deficit.

Legislation to raise the minimum wage and tying it to increases in average earnings would have a profound impact on the lives of millions of Americans. Passage of the bill would guarantee workers a living wage, not just for today but for the future. It is a matter of simple justice, common sense and sound policy.

Labor Day

from page 1
has come out in support of this bill. As far as I know," he said, "no student governments have even been contacted in regard to AB-806."

Besides Smith, three UW-Madison students testified in opposition to the bill.

Federal government sued

State student loan agency refuses to surrender reserves

by Karen Rivedal

Editor

A federal lawsuit is one of the first projects the newly formed Great Lakes Higher Education Corporation may have to deal with. Wisconsin Corporation officials filed the lawsuit on February 26, 1988, to fight the government's attempt to claim \$17 million of the corporation's \$35 million reserve fund.

The call for reserve funds is due to a provision in the recently passed federal budget for fiscal year 1988. It would require the guarantors of student loans nationwide to clean out their accumulated reserves and give them to the federal government. \$234 million would be collected this way and used to trim the federal deficit.

Wisconsin's lawsuit is of the states' view of this plan. "The action is unconstitutional under the Fifth Amendment," states Richard Johnston, GLHEC Vice Pres. for Wisconsin loans. "That amendment says the federal government may not take anything of value without due process and just compensation."

The federal government's claim to the money is unfair, according to Johnston, who says only \$3.6 million of Wisconsin reserves are from federal advances. The remaining \$13.4 million was generated through student loan fees and interest. "We're willing to give back the federal money," says Johnston. "But the rest is ours."

The federal government has 60 days to respond to the lawsuit, before hearings can begin. It could take an additional 18 months, according to Johnston, to settle the claim in court.

Old Main roof decision delayed

UWSP News Service

The state Building Commission has delayed making a decision in the kind of roof it will approve for Old Main Building at the University of Wisconsin-Stevens Point.

Assistant Chancellor for Business Affairs Greg Diemer said state officials are concerned about maintaining architectural integrity in the kind of material it uses on the historic structure.

Samples of a copper standing seam roof and of a fiberglass material with asphalt binding material will be sent to UWSP for inspection by campus officials and anyone else who is interested.

There are low bids of \$258,160 to do the job in fiber-

glass/asphalt and \$403,480 in copper. Although there is a major difference, there would be considerably longer life for the copper material.

Diemer noted that a citizen member of the Building Commission, which met Wednesday in Madison, said fiberglass/asphalt roofing, which is very close in appearance to the slate shingles that were placed on Old Main when it was constructed 95 years ago, could be secured. Later, a tin roof, which is the one that now needs replacement, was installed.

A final decision on which material to use in the replacement will be made at the March 30 meeting of the commission.

Five Senses Boutique opens soon

UWSP News Service

Specialty items from area gift shops and work by local artists will be featured in Five Senses Boutique, a retail project by students in the Division of Fashion and Interior Design at the University of Wisconsin-Stevens Point.

The boutique will be in operation from Monday, March 21, through Friday, April 1, in the Agnes A. Jones Gallery on the first floor of the College of Professional Studies Building.

The boutique operation is an annual project of students in fashion entrepreneurship class. Goods to be sold there will include flavored coffees and teas, stuffed animals, candles and a potpourri of creations.

The public is invited to visit the shop from 9 a.m. to 7 p.m. on Mondays through Wednesdays, 9 a.m. to 5 p.m. Thursdays and Fridays, and 10 a.m. to 5 p.m. on Saturdays and Sun-

days. Usually, the busiest day of activities is the Sunday when UW-SP hosts its annual open house for the public. This year, that date is March 27.

Correction

Off campus calling from the courtesy phones will still be allowed according to Scott Barton, Chairman of the University Center Policy Board. The three phones pictured on page 5 of last week's Pointer will be removed because of vandalism problems.

Also, the Pointer would like to apologize to Christian Ammon and John A. Lampereur whose names were misspelled in last week's article Greeks ratified.

Women's leadership workshop

from page 3

ics included Managing Work Relationships and Balancing and Wellness for Women. Those offered for credibility were Power and Empowerment, Contemporary Issues for Women Leaders and Self-Image for Women Leaders. Some of these discussion sessions were repeated throughout the day.

During the lunch break, there was a further opportunity to learn. At each table a specific topic was discussed. For exam-

ple, stress management, assertiveness, multiple roles, sexual harassment and images of women in the media were some of the table topics.

Many people and organizations were involved in the planning of this conference. Everyone in attendance was pleased with the outcome and it's hoped that next year's conference will have the same enthusiasm.

Vetoes Kasten

from page 3

measure a program's effectiveness purely on the number of students that are served," said Cady. "However, I believe it must be part of the analysis, especially on the heavily funded groups."

The Senate has the choice of either letting the vetoes stand, in which case both groups would get zero funding, overriding the vetoes, where the funding would stand as budgeted on Sunday, or redoing the entire S.T.A.R. and Performing Arts budget.

19

from page 3

have much chance of passing this floor period. The main problem is we will probably run out of time. However, we at least want to have a hearing or two during this period."

He also says "the major arguments in my mind are not that 20 and 19-year-olds who can pay taxes, get married, serve in our armed forces and buy homes cannot drink a beer ... The major arguments are unsupervised drinking and jobs. Young people 20 and 19 years old are still drinking, but they are drinking in unsupervised conditions (sic). A lot of 20 and 19-year-olds lost job opportunities at bars because they are not old enough to work in establishments that sell alcohol."

Leahy noted that students should use the Legislative Hotline number, 1-800-362-9696, to contact their local representatives. The bill has 16 sponsors, including Representative Gruszynski from Stevens Point.

district repositioning in 1990.

Kasten supports the increased allocations for next year's federal education budget. Since Democrats usually raised education spending from the Reagan administration's proposed guidelines, he said that the administration decided to save itself from a "headache."

US Republican hopeful Kevin Hermening also made an appearance. Hermening, touting his bid to defeat Congressman Dave Obey in November, said that Obey's "starting to slip." He thanked his staffers there for the work they've done, and appealed for more help as well. Concluding his brief statements, he said, "Our new Republican president in November is going to need help in January."

A number of UWSP College Republicans, headed by President Mike Roth, also attended the session. Kasten said that of the Republicans, "our strongest segment is 18 to 24 (year olds)." Of political orientation, "you tend to stay where you begin," and of the 18 year olds themselves, "2 to 1 they're for us," he said.

Kasten thanked all of the Republicans for their help over the years, and especially in the campaign against Garvey two years ago.

He concluded that he was proud of his Wausau office. Citing its central location made him a "better Senator for the state."

Over 40 people attended the question and answer session. According to Kasten, "the point of being here was just to say "hi" to friends."

Eating on the road presents new challenges

by Toni L. Wood, R.D.
Staff Writer

Spring break is upon us; within 24 hours many students will be on the road, making the migration to the southern climes of Daytona and Padre. Traveling and vacationing often alters what we eat, how we eat, and where we eat. On a student's budget it can be tough to balance food safety, nutrition, convenience, cost, and taste while on the road; but with some common sense and planning it's not impossible.

Travel, distance, and unfamiliar places go hand in hand with new experiences, including trying different restaurants and unusual foods. Unfortunately, one of the most common new experiences for the traveler is food poisoning. Food poisoning is often jokingly and lightly dismissed, but in reality it is costly, painful, and sometimes fatal. Believe me, it's one experience you'd prefer to pass by. Several years ago I was laid low by a bowl of beef stew. Five hours after eating that stew I felt like I had been kicked in the stomach. I spent the rest of the night huddled on the cold tile floor of the bathroom. It's not the ideal way to spend a vacation.

The most common source of food borne illness is bacteria. Potentially hazardous bacteria generally grow best with adequate moisture, light, and

warmth. Whether a food product will be a source of contamination or not depends largely on the sanitation practices of those involved in preparation and service of the food. It's hard to judge restaurants by their outward appearance, but use common sense. If the dining area of a restaurant doesn't look clean, the odds are the kitchen isn't any better.

Food should be prepared in a sanitary manner, then held and served at appropriate temperatures. Error on the side of caution; don't eat a meat sandwich that's been sitting uncooled in a hot car trunk or potato salad that's been left by the pool all afternoon. In short, if you are at all suspicious about the food preparation, storage or service, don't eat it.

You can bypass a lot of the potential hazards of food contamination by taking your own food on the road and storing it properly. Coolers can be kept both in the car and hotel room; ice should be checked periodically throughout the day, the excess water poured off, and more ice added if needed. Unpack the cooler once a day, keep the food temporarily chilled in a plastic bag filled with ice, clean the cooler with warm water and soap, rinse well, and repack with ice and food. Take advantage of the free ice that most hotels have available via ice machines. Some motels may rent small re-

frigerators and perhaps have hot water dispensers in the room for other food preparation.

Traveling doesn't mean you're doomed to endless junk food; nutrition doesn't have to be sacrificed for convenience if you're willing to do a little planning and pre-trip preparation. Traveling is one of the few times that the purchase of food packaged in individual serving sizes pays off. It may cost more initially, but you won't be wasting food, there is no excess to store, it will pack and travel well, and often can be eaten directly from the container which then can be disposed of, no dishes! Fruit or vegetable juices come in single cans or cartons, there are small cans of tuna, and variety packs of cereal both hot and cold. If you don't object to the increased sugar content there are six-packs of canned fruit, packets of instant cocoa and instant breakfast.

If you want to cut costs you can buy bulk amounts of cereal, granola, crackers, nuts, seeds, gorp, popcorn, dried fruits and fruit leathers, which then can be divided and individually bagged prior to departure. Coolers will store perishables such as fruit, raw vegetables, yogurt, cheese, individual cartons of milk, and condiments. Instant dried milk can be used on cere-

I'll have a greasy pork sandwich-

Eating on the road often means substituting convenience for nutrition. However, most fast food places do offer salads and other healthy items.

Spring Satire...

Keep up the good work

by Chris Asmussen
Staff Writer

Who's going South for spring break? Just because you're going to spend a week in the sun doesn't mean it's going to be fun.

There are certain expectations that you must fulfill. After all, you will be representing UWSP. The burden of properly maintaining our reputation rests on your shoulders.

First off is our reputation as a beer drinking state. You will have to enter into bars and drink the crowd under the table, while eating string cheese.

Our reputation as a fitness capital must also be sustained. Make sure you win any fight you pick, or otherwise enter into. Ladies, your job is to be choosy of the men that you allow to pick you up. If he's too forward, throw a drink in his face.

If you aren't going South, don't feel left out. You can also

Spring Break advice

Common sense can go a long way

by Jim Malzewski
Features Editor

The words "spring break" conjure up various images in different people: To alumni,

they bring back glorious memories of those glorious years known as college. To professors, they mean a week to catch up on papers and quizzes, or maybe a week to slack off on papers and quizzes. To less fortunate undergraduates, they mean a week of going back home, working, eating mom's food, and soon growing anxious to start school again.

And for the fortunate students, those who worked hard enough to afford a trip or happen to have rich parents, they mean vacation time.

Now most people know how to have fun on vacation; it's a given. But for those heading to destinations renowned for partying and tanning, special guidelines apply. Most of these are basic, but they deserve repeating. Somehow, in the midst of scantily clad co-eds, vapors consisting of coconut oil and hops, and the southern sun, students get a little goofy.

First off, drinking. Beer seems to be the center of attention to a majority of spring breakers. It also is attributed to the majority of deaths that

occur during a supposed fun week.

The reason most deaths take place is due to a lack of common sense: Jumping off balconies, hanging out windows, and driving drunk fall into this realm. If you do drink, just chill out. The beer isn't stronger down south. Leaping ten floors into a pool isn't a logical step to gaining popularity or adventure.

Frying too quickly is also a concern of fair-skinned, thick-blooded Northerners. Remember that spring break lasts a week; you don't have to get that Hollywood tan in the first afternoon. Start off using a highly protective sunscreen (the larger the number, the more protection), gradually switching to one that lets in more rays only after you're accustomed to the unfamiliar intensity of the sub-45 lateral degree sun. Nothing dampens a week in the sun like lying in it for six hours on Monday, turning a remarkable shade of red, and having to spend the remaining five days wrapped in towels and smothered in white sunblock.

Well, almost nothing. Beaches are crawling with creatures native to them; remember, you're the visitor. There are jellyfish, man-of-war, sting-ray and

other species of marine life that are known for punishing unwary humans with painful and costly inflections. Respect marine life and keep your distance.

Also, clean up after lying around the beach all day. This isn't a house party suitable for trashing; it's a natural area. Cans, bottles, and plastics don't miraculously disappear.

The bottom line is use common sense; vacation doesn't mean freedom from all responsibility.

So have fun and relax. That's what spring break is for.

And please, come back in one piece.

Lay back, take it easy, and have a few brews.

Go to Florida with a friend of mine, Steve, to a nudist colony to let it all hang out.

They need a break as badly as the rest of us; I hope they stay out of their offices.

Some professors should have a short course on updates of their subjects, and then relax so that they will be in good moods when we come back.

I think all of the profs should relax and get together for a huge party, watch Pink Floyd's "The Wall", and get mellowed out so they'll take it easy on us who are recuperating from our spring breaks.

Experiencing Glasnost firsthand...

UWSP students spend Fast food, break in Russia

by Jodi Ott
Staff Writer

On Saturday, March 12, the Wisconsin Soviet Seminar USSR program will take off from Kennedy International Airport for Russia. The fifty member group will then spend two weeks touring the Soviet Union.

Their first stop will be Leningrad, the former capital, where they will stay for three days. The next Soviet-Asian cities on the tour include Tashkent, Samarkand, Alma-Ata and finally Moscow, the current capital. The group will depart on March 26 for home.

The trip is sponsored by Academic Travel Abroad (ATA), which is located in Washington D.C. There is also an office at UW-River Falls, headed by Steven Feinstein. ATA arranged for visas from the Soviet Embassy.

The seminar may be taken for three credits. Costs range from \$1950-\$2300, but financial aid is available.

Dr. Sarah Kent, a UWSP Russian History professor, will act as group leader. Her past experience includes living in Yugoslavia for two years. The Soviet Seminar USSR Program was open to fifty individuals. These places were divided into three subgroups from UW-Oshkosh, UW-Stevens Point, and UW-Parkside, with students from UW-Platteville integrated.

The UWSP group consists of Kent, a retired couple from the community, and eleven students. Students and their majors are: David Kenney, Russian Studies; Brian Koller and Jeffrey Shaw, psychology; Dennis LaComb and Lisa Lietz, political science; Eric Hagge and Diana Gilbert, communications; Victoria Susa, History; Broad Field Social Science; Margaret O'Donnell, communications/secondary education; Lynda Laszewski, food service management; and Michael Hendricks, a graduate with a business major.

from page 6

al or added to cocoa and sugar to make your own instant cocoa mix.

Don't make the mistake of having just coffee and donuts for breakfast, skipping lunch, and then planning to make up for it at supper. Your body needs more fuel throughout the whole day. While on the road or vacationing, it is important to continue to eat a variety of foods and strive for some regularity of meals in order to provide you with the energy you need to enjoy yourself. Smaller, lighter, more frequent meals may be better tolerated if you're spending a lot of time involved in physical activities.

Lastly, enjoy yourself. A different part of the country gives you the opportunity to try unfamiliar and, perhaps, exotic foods. Ask your guide or the hotel manager to recommend a restaurant that specializes in the local cuisine. You may be delightfully surprised. Have a great and safe break.

satire,

from page 6

get a tan at the local tanning booth. I suggest that you go to a few sessions; that way it'll at least look like you went somewhere over break. In the meantime, enjoy the home cooking and the luxury of having your parents waiting on you hand and foot. You've worked hard these last few weeks, and you deserve the rest.

However, it may be in your best interest to start training for next year, when it's your turn to represent UWSP in the deep South. You can never begin too early: Practice slaming beers and hit the YMCA. Seriously, have a good time, and stay out of trouble.

I travel not to go anywhere, but to go. I travel for travel's sake; the great affair is to move.

— Robert Louis Stevenson

STARTS FRIDAY AT SELECT THEATRES.

1. Sylvester Stallone's ex-wife, Brigitte Nielsen, is engaged to marry which NFL football star?

2. Professional baseball's only woman umpire has a chance of making the jump to the major leagues this season. Who is she?

3. Name the jazz great who appeared this week on Frank's Place.

4. Which major rock act's new album, entitled Naked, is due out next week?

5. A creative ice cream company markets such unusual flavors as Dastardly Mash, White Russian, and Cherry Garcia. Name this company.

Answers on page 8

Money's on our mind

UWSP News Service

The attitudes and goals of students at the University of Wisconsin-Stevens Point aren't too different than those of their counterparts across the United States.

Twenty-five percent of last fall's entering freshmen at UWSP said the foremost reason they were attending the institution was to increase their earning power. That response rate is up from 17 percent in 1979. Meanwhile, the value of gaining a broad general education was cited by 15.8 percent of the 1987 freshmen as their reason for enrolling at the local university. In 1979, that response was cited by nearly 20 percent of the local freshmen.

About 20 years ago, collegians across the country responded in surveys that their foremost desire was to acquire "a meaningful philosophy of life." By the mid-1980s, the value among American collegians showing the greatest upward trend was "be very well off financially."

The trend is seen today as growing numbers of student career-oriented fields that offer higher than average starting salaries.

The comments by UWSP students are included in a study entitled, "Profile of the Freshman Class," an annual campus project done by Frederick Hilpert, who oversees institutional research, and Robert Mosier, director of staff development and research, and Robert Renault, project assistant, both in

the Division of Student Life.

However, the latest study shows continued increases in the number of underclass students who also enter UWSP without a declared major. Only 11.7 percent of last fall's entering freshmen listed definite vocational goals, which suggests, according to some Student Life counselors, a need for expanded services in the Office of Career Services, where staff exerts much of its energy helping graduates find jobs.

The survey revealed that academic expectations expressed last fall are probably too high, if old results are any indicator. In 1985, for instance, 65 percent of the freshman class expected grades of B or better, but only 19.5 percent of them actually received such marks. The same year no one expected grades below C, but 35 percent of those freshmen received them.

When the freshmen were on campus for their summer orientation, one of the tests they took was the Myers Briggs Personality Type Indicator. How is it useful to faculty members? Almost 60 percent of this fall's freshmen were labeled as sensors and the remainder were identified as intuitives. Intuitives, on the other hand, appreciate the abstract, consider error natural to the learning process and rely on hunches to understand new concepts and situations.

When authors of the profile learned that 65 percent of the local university instructors are intuitives and only 35 percent

are sensors, they suggested that overall, the faculty needed to be aware of the differences between themselves and the students.

The majority of UWSP freshmen came from small cities or large towns not too different in size from Stevens Point. Eighty percent of the freshmen said they believe UWSP is better than most universities or one of the best.

More than half of the parents of entering freshmen have never attended college. Authors of the profile said they hope faculty and staff will "help students and parents understand the meaning of a college education in today's world and what they can realistically expect education to do for them."

Be A Star!

The Pointer wants your spring break photos, which will be featured in the March 24 edition. All photographs should be dropped off no later than Tuesday, March 22 at noon—Room 104, CAC. Please include your name, location, and names of people in the picture. Black and white is preferable.

Wisconsin outdoor report

DNR, Madison

Be aware that the season for big game fishing of Wisconsin's inland lakes closed March 1st. Inland anglers are reminded that March 5th is the deadline for removing ice fishing shanties from public waters south of Highway 64. North of Highway 64, the deadline is March 15. Spring-like weather has been bringing out wildlife around the state.

Snowmobiling and cross-country skiing conditions appear to be deteriorating in the northwest. In Rusk and Sawyer Counties, trails are bare in spots, but skiing is still excellent on the Birkie Trail. In the Brule area, frequent grooming is keeping snowmobile trails in good to excellent condition. Iron County's Uhler Trail is reported to have a base of 30 inches. It would be a good idea to check with the local area before heading north for skiing or snowmobiling.

Some nice catches of bluegills are being taken on Lakes Couderay and Chetek. Fishing on Lake Superior remains slow. A few splake are being caught in Chequamegon Bay, and bobbers for lake trout are reporting some success in the island area off Bayfield.

In the north central district, late winter ice conditions will soon be unsafe. Cross-country ski trails are fair in the Antigo area, excellent around Woodruff. Pan-fishing there is very good. Horned larks and rough-legged hawks are returning.

Pan-fishing has been improving in the Lake Michigan district. Anglers are reporting good catches of perch at several locations in Brown and Door Counties, including Duck Creek, Chaudoir's Dock and Fish Haven. Several reported doing well at Red River in Kewaunee County this week.

In Shawano County, snowmobile trails are closed due to warm weather, and cross-country skiing is poor. Many eagles are being cited in the area, and deer are being observed during the day in open fields. Pan-fishing has been improving in Florence County, where most lakes have at least 20 inches of ice. Horned larks, bald eagles and golden-eye ducks are showing up. Most lakes in Waupaca are

producing small panfish, while pan-fishing in Waushara County is fair.

In the west-central district, melting snow has slowed cross-country skiing and snowmobiling; ice-fishing has been fair.

In the southern district, trout fishing is fair in Iowa County, with some panfish being taken. Snowmobile and cross-country ski trails are closed in Richland County, and trout fishing is slow. Panfish action is fairly good at Yellowstone in Lafayette County, with good success at night. In Columbia

County, trout anglers are having good success on Rowan Creek, where a 22-inch brown was taken. The geese are back for their spring migration, and are providing good viewing opportunities in the Horicon area. Good catches of panfish are reported on Fox Lake and Lake Emily.

Pan-fishing is slow on the Madison lakes; Waubesa and Kegonsa are producing some nice catches of perch with a few bluegills mixed in. Remember to keep your dogs leashed—this is the time of year problems arise with dogs chasing deer.

SUNNY SIDE DOWN. West Virginia U.'s Student Administration President Ray Bauer thought he had a great idea. He suggested a "Sunny Stride" race: Students would drink two beers in each of six bars along University Ave. in Sunnyside, a neighborhood near campus. The "race" would celebrate the end of the neighborhood's clean up campaign. But school officials said Sunny Stride would conflict with their alcohol-education programs. Then, Charleston's Alcohol Commission reportedly told bars planning to participate that they might have a hard time getting their liquor licenses renewed. So much for Sunny Stride.

A Multiple Choice Editorial

There's one problem with writing the *Pointer* editorial. People don't always agree with you. That's OK with me, but it can really steam some people up. Everybody knows that freedom of speech is a nice idea, as long as and to the extent that the opinion expressed reinforces your own. It's when opinions clash that things get ugly.

I think I know a way around this, though. A multiple choice editorial is one way to find an opinion we can all agree on. Simply circle what you want to hear. When you're done, count how many times you agreed with yourself. Save the results as testimony to your easy-going attitude.

My name (a. is) (b. is not) (c. used to be) Karen Rivedal.

I am (a. an aborigine) (b. the *Pointer* editor) (c. the anti-Christ).

My dad is (a. an engineer) (b. filthy rich) (c. your dad).

Last week's editorial was (a. tactless) (b. witless) (c. desultory).

This week's editorial is (a. tactless) (b. witless) (c. desultory).

Desultory means (a. low-salt) (b. really sulky) (c. aimless).

I think fraternity activities are (a. altogether great) (b. sometimes questionable) (c. none of my business because I was never in one).

I am of the (a. Lutheran) (b. Catholic) (c. no cream, just sugar) faith.

I have a strong spiritual belief in (a. reincarnation) (b. ghosts) (c. graduation).

When I die, I think my soul will go to (a. a better place) (b. no place) (c. the Sig Tau House).

I think Pat Robertson continually smiles because he is (a. genuinely ecstatic) (b. petrified) (c. secretly Islamic).

I think Pat Robertson would balance the national deficit by (a. raising taxes) (b. cutting spending) (c. announcing at his first State of the Union address that God will take him away unless the American people send him \$100 each).

I think T.V. evangelists in general are (a. very sincere) (b. seldom sincere) (c. sincerely insincere).

I think the *Pointer* should (a. clean house) (b. sell houses) (c. host the 1992 Winter Olympics).

I think the military is (a. a great place to start) (b. a bad place to die) (c. not just a job, a pension plan).

It's time to (a. stop) (b. join something) (c. begin Spring Break '88).

Scoring

If you agreed with yourself:

Not at all. Congratulations. You are the next President of the United States.

1-6 times. Hey, hey! You qualified to write next year's Student Government Association Constitution.

7-15 times. Not bad. You agree with yourself most days. You get to pass go and collect \$200.

On every one. Wow! That's really impressive. Want to be *Pointer* editor?

by Karen Rivedal
Editor

by Stud Weasil

(It occurred to me, as I was sitting down with my chisel, mallet and stone tablet, preparing to spew out my usual overabundance of profundities, that I have never written this column while dressed up in women's undergarments. Therefore, let it be known, that from this moment on, I will be writing "On Life—by Stud Weasil" while dressed only in a black leather garter belt, sequined glow-in-the-dark nylons and a pink satin uplift bra.)

It is common knowledge that I, Stud Weasil, am without a doubt the coolest, hippest and all-around swellest guy currently frequenting this fine university. Men look up to me. They say, "Stud, what do I have to do to be just like you? How can I be more hip and cool? What is your secret with the ladies? How is it that, night after night, you are able to cruise and swing so successfully?"

Being the swell guy that I am, I give them a few pointers, laughing to myself, full knowing that they could never come close to being half the Studmuffin that I have come to be. Although, there is no doubt that I am the Studmuffin of Studmuffins on this campus, one thing still remains to be determined: which male is the number two Studmuffin? Who comes the closest to typifying the stellar qualities which have brought me fame and fortune in my 11 short years as an undergraduate student here at UWSP.

At this time, I would like to announce the nominees for the first annual—soon to be a UWSP tradition—Second Studliest Studmuffin on Campus Award. I leave it up to you—the women of UWSP—to select the winner of this prestigious award (your votes will be tallied on Tuesday, March 14—write ins will be accepted). After carefully considering the nominations, please send your votes to: Stud Weasil—You're Sheek You're Sleek, You'll Never Be A Nim-

rod Geek, c/o The Pointer, Communications Building, UWSP. The winner will be announced in next week's *Pointer*. And now ... bring on the Studs ...

Stud 1) Brad Totten. What can you say about Brad? He's cool, he's on the sly, he's bigger than life. He is a senior majoring in Life.

Stud 2) Shane You Need a Haircut Totten, also known as Pacelli High School as Mr. Totten. Not much to say about Shane other than he is Brad's older brother.

Stud 3.) Biff Sundstrom. Biff, who recently moved to Stevens Point after spending six months as a pro-surfer in Hawaii, is currently the only person in Stevens Point who sports a real tan. He enjoys surfing, kayak-

ing, playing polo and wearing seven Izod shirts at one time.

Stud 4) Mike Eiki 6000 Schmidt. Mike has the style, the class, those down-to-earth boyish good looks that drive the women crazy. At times, Mike has been mistaken for famous television and radio personalities such as Don Johnson and Jay Bouley.

Stud 5) All of the weightlifters on this campus who are either too muscle-bound to bend over and pull their sweat pants down from their knees to their ankles or have a secret desire to have everyone see their bare calf muscles.

(Special thanks goes out to Lynn W. for serving on the Studmuffin nominating committee.)

Spring Break coupon

FRANKLY SPEAKING

FRANK BOSTER

Take this Coupon. Tear along the edges of this page until this coupon is removed. Take it to any popular Spring Break Florida bartender and thank him for the frosty mug of Point Bock, breath deep, throw your head back, you're on Spring Break.

Next, Walk into any beachfront restaurant and order the finest seafood dinner on the menu. When the bill arrives present this coupon to the cashier and show him your Point I.D. Upon receiving your free dinner and mint stroll out into the steaming night air towards the loudest music.

Enter the establishment with the most people hanging around outside and present this coupon to the bartender. Take your free drink to the edge of the dance floor and let yourself ponder the meaning of Plato's anything. You're on Spring Break. Once you've caught the eye of the one person that's been looking at you for so long motion over and show this coupon.

In the morning, Ring room it out and read it and remember service. Tell them you've got her all that is possible.

This coupon. When breakfast arrives be sure to read in the paper what the temperature is in Stevens Point, Wisconsin. Roll your eyes and cut the coffee with the cream and look at this coupon. Read it. Decide that anything is possible with this in your hand. Enjoy your breakfast. Savor the view. Make mental pictures of everything. Let the remainder of the days be spent in similar, fashionable and show him your Point I.D. Upon receiving your free dinner and mint stroll out into the steaming night air towards the loudest music.

Check-out time. Present this coupon to the hotel manager and thank him for the discount certificate. Gas the car. Check the tires. Cruise the coast. Check out the local radio station. Look in the mirror. Consider the distance you've come. Turn up the radio, it's your man, and you're on Spring Break. Do you realize how you'll look back on these days? And when you come back and you're in class and this coupon has become your favorite book marker, take

POINTER

Letters to the editor will be accepted only if they are typewritten and signed, and should not exceed a maximum of 250 words. Names will be withheld from publication only if appropriate reason is given. The *Pointer* reserves the right to edit letters if necessary and to refuse to print letters not suitable for publication. All correspondence should be addressed to *Pointer*, 104 Communication Arts Center, UWSP, Stevens Point, Wisconsin 54481.

Written permission is required for the reprint of all materials presented in *Pointer*.

The *Pointer* (USPS-098240) is a second class publication published 28 times on Thursdays during the school year by the University of Wisconsin-Stevens Point and the UW-System Board of Regents. Distributed at no charge to tuition-paying students. Non-student subscription price is \$8 per academic year. Second class postage paid at Stevens Point, Wisconsin.

POSTMASTER: Send address change to *Pointer*, 104 Communication Arts Center, Stevens Point, WI 54481.

Pointer is written and edited by the *Pointer* staff, composed of UWSP students, and they are solely responsible for its editorial content and policy.

LETTERS

Fraternity member lists organization's virtues

Pointer should clean own house

To the Editor,

Upon reading your last editorial, "Sign up here," I was initially infuriated at the witless, tasteless, desultory attacks on the system (namely the military, the evangelists, and, most interestingly to me, fraternities). I set out to tear you to ribbons, writing a three page response to your pathetic story. Upon completion of my philippic rebuttal, I went on to read Stud Weasli's "On Life," where he made a very profound point:

"Apparently, after reading particularly offensive editorials, people feel inspired to write offensive editorials of their own; then more people get upset and write their own offensive editorials, and the vicious circle continues, thus enriching the lives of many."

This really made me stop and think. I laughed at what the Stud had stated, especially since your own article was directly adjacent to these words. So rather than going through with an offensive response, I'll give you a constructive criticism.

I know that, without a doubt, responses to your poorly researched article will be pouring in along with my own, so I won't give you a dissertation on the facts of fraternity life—the others will do a sufficient job of this. Rather, I'll use my own experience to get the point across.

I was a photojournalist for a small-town newspaper with a circulation of 12,000 for a little more than five years. I think this qualifies me to criticize you. By the same logic, were you ever in a fraternity? Didn't think so. . . How can you criticize us?

Point two: Before setting out on a witch hunt aimed at other organizations, maybe you should look at your own. In the last issue of the Pointer, I read the coverage on the Inter-Greek Council only to find my name, as well as former IGC president Christian Ammon's, misspelled. Furthermore, it contained incorrect information regarding to SGA funding. Contrary to the article, IGC is eligible for SGA funding. As I paged on through your paper, I read GPU president Evelyn Cress's objection to the lack of research done prior to her interview which was published a week earlier. I could continue with more examples until my wrist falls off.

What it boils down to is unprofessional journalism. Before you criticize others, Karen, maybe you should worry about your own organization. Is it performing its duty acceptably? I think not.

Karen, it's time to clean house.

Very truly yours,
John A. Lampereur
President, Tau Kappa Epsilon
President, Inter Greek Council

To the Editor,

"How about those frats? Could somebody please explain just what a frat is for?"

Well Karen, a Fraternity is a brotherhood of members "embarking" on an academic and fun-filled college experience.

Academics are top priority among Greeks on this campus. The Greeks have a higher GPA (2.8) than the rest of the students at UWSP (2.58). Sigma Tau Gamma also gave out \$2700 worth of scholarship funding to members achieving high academics in the Fraternity in the past year.

Community service projects are also on the Greek list of things to do. Karen, were you around when the Greeks helped the March of Dimes with their "Jail and Bail"? Were you here when the TEKs did their annual "Keg Roll" for St. Jude's Children's Hospital? Were you around to take part in Phi Sigma Kappa philanthropy

Editor's note:

The Pointer staff wants to provide the UWSP academic community with a useful, infor-

with the American Legion organization? Will you be involved in any way with the Point Parks Fun-Run sponsored by Big Brothers and Big Sisters and Sigma Tau Gamma? Maybe Karen ought to get more sleep at night so she doesn't walk around in a fog all the time.

In response to "act-like brothers," what other organization can you join on this campus that will roll out the red carpet when you come back for Homecoming 10, 15, or 25 years other than Greeks. Karen, wouldn't you rather have 40-50 close, personal friends than to have a whole campus angry with you?

As for "wearing empty beer cases covered with underwear on their heads and swallowing live minnows," this simply does not apply to Greeks, because it is defined as "Hazing." If a Greek society at Point hazed a person, the newly formed Inter-Greek Council would urge the

negative and entertaining student publication. We invite Sigma Tau Gamma fraternity members and all Pointer readers to

SGA Source Committee to remove recognition from that Greek society and that society would no longer exist. I also don't think the Siassefis want to be considered a Greek organization, because they are a fellowship, not a Fraternity.

As for drunk leaders on campus, this is some more of Karen's "B.S." There are four Greek student senators and one Greek candidate for alderman of the city. Over 50 percent of the U.S. Congress has a Greek background. The president of the United States is also Greek.

In conclusion, I think the major reason Karen wrote this particular article was to add some spice to a once award-winning paper that has since gone bad. The article written by Karen is an example of how bad this paper has become.

Respectfully,
Daniel J. Grosskopf
V.P. of Membership
Sigma Tau Gamma Fraternity

write in with concrete complaints, suggestions, and new ideas that we are missing. See page 19 for more information.

SGA clarifies IGC funding

To the Editor,

For the benefit of the potentially confused members of Intergreek Council, I would like to clarify some points that were mentioned in Paul Lehman's article "Greeks Ratified" which ran last week.

Most importantly, Intergreek WILL be eligible for SGA funding. It is an organization made

up of both male and female members, and therefore does not discriminate on the basis of sex. Individual fraternities and sororities are not eligible for SGA funding for this reason.

Secondly, Intergreek will be responsible for recommending actions to be taken on infractions by members, rather than merely reporting infractions to

the SOURCE committee. The Intergreek Council is the embodiment of the idea that no one knows more about greek organizations, or cares more about their image, than the greeks themselves.

Sincerely,
Paul Stollenwerk, Chair
SOURCE Committee

Computer lab manager reacts to Pointer article

To the Editor,

In response to the article titled "SMART users not so smart" in the March 3rd edition of the Pointer, I have these comments. I do not feel that the views of the article accurately reflect the views of Academic Computing, myself, or many of the 45 other lab assistants. From the tone of the article, I feel this lab assistant is frustrated, and I wish he would have vented his frustration through me, his supervisor, instead of the Pointer. Do not get me wrong, he has every right to express his opinion, and I do not discourage anyone from doing so, but the article could have been written in a more constructive manner.

About the labs and the lab

assistants: Academic Computing is funded for the purpose of supplying and supporting computing for the students, faculty and staff of the University. The student computing labs, the campus wide network, and the fact that each faculty member has PC in their office attest to the fact that Academic Computing is trying to supply and support computing on this campus.

The lab assistants are in the student computing labs to assist students in computing activities. Their job is to help students help themselves. If a student has a computing problem, the lab assistant is there to direct them by pointing out "help" functions within the application packages and other reference materials, such as manuals and books. The lab assistant's job

does not include answering content questions about assignments.

The main point that I stress to the lab assistants is to be helpful and courteous to lab users. I do not want the lab users to feel intimidated to seek lab assistant help. If a student is intimidated because a lab assistant is not being helpful or is rude, I invite them to tell me so that I may identify that person and more fully explain the job requirements of being a lab assistant.

In defense of the lab assistants: While it is true that lab assistants are there to help students, they are not required to be skilled in all packages available in the lab. The lab assistants are students just like the users in the lab. Many of them

are doing the same assignments that the lab users are doing. Also, students should not ask the lab assistants to interpret an instructor's assignment. If the assignment is vague, students should meet with their instructor to clarify the requirements of the assignment.

UWSP has a unique system in that all the computer labs are staffed for every hour that they are open. The computing labs are also conveniently placed in each of the academic buildings and each lab contains the same software and manuals. This allows the user the convenience of going to any one of five labs to complete their computing activity. If lab users compare our support against the other universities within the UW system, which have computing

help centers where students have to leave the lab and possibly go to separate buildings for computing assistance, they can begin to appreciate the assistance they receive in each of the labs.

There is a computer lab user's guide available in each lab which explains lab policies and the role lab assistants play when consulting with lab users. I invite all lab users to pick up a copy of the guide, and also to make suggestions and comments which may enhance the learning environment in all labs.

Thank you,
Scott Gile, Microcomputer
Laboratory Manager
Academic Computing Services

OUTDOORS

Preserving our national symbol

by Andrew Fendos

Outdoors Editor

In 1782, the bald eagle was adopted as the symbol for our nation. By 1976, our bicentennial, its existence was endangered in 43 states and threatened in five other states. Loss of habitat, pesticides and illegal shooting are the major causes for the decline.

Before man entered the area, bald eagles nested along waterways throughout Wisconsin. When logging, agriculture and tourism became part of the community, the big birds were driven away from their traditional nesting grounds. What was left for eagles to use as nesting areas were the territory around inland lakes and rivers in the northern third of the state and some places around the Great Lakes. The Great Lakes eagle sites are not very healthy and there have been many nesting failures in recent years.

Fish is the staple food in the eagle's diet in Wisconsin and the inland lakes that the eagle uses for hunting are relatively clean and free of chemical contamination. Having a clean source of food is important to the health of eagles. When eagles feed repeatedly on fish that have collected toxins in their systems, the poisons add up in the eagle's body. Harmful

amounts of toxins are then stored in the body fat reserves of the bird. In times of stress when these reserves are called upon for energy needed in the breeding season or in conditions of starvation, these accumulated poisons are released into the bird's blood system. Thin-shelled eggs that crack and break are the result of toxic chemicals in the bird's system at breeding time and embryos may not develop properly. Fertilization may be blocked completely. If the release of toxins in the bird's system is high enough, the bird will become disorientated, confused and unable to feed itself, death then results.

Many farm and industrial chemicals such as dieldrin, PCBs, DDT and its derivatives, as well as some heavy metals are the cause of the trouble. Most of these chemicals are under some type of state or federal control and some are now banned. Unfortunately, some chemical residues are still in the environment from their past usage.

A lot of eagles die of old age and natural causes. For those that don't, shooting takes its heaviest toll. It accounts for 50 percent of the annual deaths despite the threat of a heavy fine and imprisonment. Often mistaken for other birds, bald eagles do not have their distinc-

tive white heads and tails until the age of four. Until then, they resemble big, brown hawks, which may not be shot either. Some people deliberately kill eagles because they hate birds of prey. Others do it just to kill.

Bald eagles mate for life, which may be as long as 50 years. They breed early in Wisconsin and around February begin their acts of courtship. Typically, they nest in tall pines or on high rock cliffs. It takes about a week for a mating pair to shape hundreds of branches and debris into a suitable nest. This is no small task. One record eagle nest weighed two tons. Usually they return to the same nest year after year and in Wisconsin several nesting territories have been occupied for 40 to 50 years. One nest site in Sawyer County has been used since 1918, more than 60 years.

Occasionally a nesting pair will have two or more nests and rotate between them in different years. No tree lasts forever and when the weight of the nest finally breaks a tree, the nest is abandoned. Windstorms and lightning also take a certain toll of nest trees as does tree diseases and insects.

Eagles are best not disturbed, but nesting eagles should always be left alone. If disturbed, eagles may give up breeding for the season. Activities such as hiking, snowmobil-

ing, hunting and other recreational partakings need to be well away from any nesting tree.

If all goes well, one to four eggs are laid by early April and hatch about 40 days later. From then on there's not a moment's rest. Eaglets grow from three inches to 36 inches in just 12 weeks and that means hauling a lot of food.

The bald eagle has been on Wisconsin's endangered list since 1972, but the federal list carries it as only threatened here. Threatened means in trouble, but not as bad as endangered. The federal classification came after several successful breeding seasons slowed the long-term decline in eagle populations.

Wisconsin's population now appears to be holding its own. In 1978, we had 140 active nesting sites in our northern forests. These sites must be closely managed if populations are to remain stable and grow. A national Wildlife Federation survey census taken in 1984 tallied 14,836 eagles in the lower 48 states. Of these, perhaps half were year-round residents. In all there were about 2,800

breeding pair.

Today, the Endangered Species Act and the Bald Eagle Protection Act of 1940 ensure protection of all bald eagles within the continental United States.

In Wisconsin, the DNR and the U.S. Forest Service have adopted management practices to help slow the loss of nesting habitat and identify replacement sites for disturbed nests. Timber cutting, road construction and other disruptive activities are prohibited within 600 feet of a nesting site between March 1 and August 1. Many wolf and large trees are saved for roosting and nesting within this zone. Smaller trees are also saved to take over as succession occurs. Landowners whose private properties contain eagle nesting sites are being asked to provide similar protection. These practices will ensure a long range supply of nesting trees.

This management accompanied by strict pesticide control and obedience to protective laws will help save the bald eagle populations. It's a good program and we all should support it.

Managing wildlife at Eagle Valley

Eagle Valley is a 1400 acre nature preserve located on the eastern bank of the Mississippi river in southwestern Wisconsin, one mile south of the village of Glen Haven and directly across the river from Guttenberg, Iowa. It lies in the heart of the Driftless Area, a region which escaped glaciation during the last Ice Age. The topography of this area is hilly and varied, and the landscape is extremely beautiful.

The preserve is owned and operated by Eagle Valley Environmentalists (EVE), a nonprofit corporation. About three miles long and a mile wide, Eagle Valley is composed of a diversity of small ecosystems.

Limestone bluffs rise 350 feet above the Mississippi River here. There are numerous other features such as: large rock outcroppings, goat prairies, upland meadows, river valleys, and spring fed streams. Ancient Indian mounds line the two ridges.

The heart of the preserve is a valley more than two miles long which is used by large numbers of bald eagles as a winter roosting site.

Eagle Valley Nature Preserve is managed as a wildlife refuge and environmental education and research facility. It is a place where human beings and nature can exist together in harmony.

1988 Eagle walk

News release

A seventh Eagle Walk is planned for this year, beginning at the University of Wisconsin-Stevens Point on Friday, March 11, and ending on Saturday, March 19, at Eagle Valley.

This 200-mile hike raises money for the support of the nation's endangered symbol. It has been held annually for the past six years during UWSP's spring breaks. Last year 14 students walked between campus and Eagle Valley Nature Preserve near Glen Haven in Grant County. The money raised goes to the Eagle Foundation.

The Eagle Foundation is a nonprofit group dedicated to eagle research and land preservation. The proceeds from the walk are used to help maintain

the 1400-acre preserve, where an eagle roosting area has sheltered up to 50 of these birds.

The Environmental Council at the University of Wisconsin-Stevens Point has contributed almost \$20,000 toward the preservation of three acres of land in Eagle Valley, a nature preserve in southwestern Wisconsin.

Dayna Kuntzsch, coordinator of the project, said the group will take the same route used by previous walkers. "People in the small towns have gotten to know us and know what we're doing and they think it's great," she explains. "Organizations and individuals along the route have become helpful in arranging overnight accommoda-

The students will travel diagonally across the state, staying in these communities at night: March 11, to the Mid Wisconsin Youth for Christ in Wisconsin Rapids; March 12, Monroe Center; March 13, to Bethel Lutheran Church in New

Turn to page 14

These members of the Environmental Council are a few of the past eagle walkers who have helped preserve eagle nesting sites.

Garbage, beef, brown tree snakes

OUTDOOR NOTES

By Cindy Byers

Almost 90 percent of the garbage generated in the United States is buried in landfills. Estimates are that one-half of all American cities will run out of landfill space by 1990. Environmental regulations and citizen opposition are making it harder to find places for new landfills. Four states and one major city are moving to solve this problem with legislation to encourage or require separation of recyclables from the rest of the garbage. Paper, metals, glass and leaves are currently the biggest items separated, but it is thought that more difficult materials such as plastics, batteries and motor oils will be added as programs mature.

There is growing evidence that chlorofluorocarbons (CFCs) used in aerosols, refrigerants, air conditioners and plastic foam are depleting the ozone layer that protects the earth from the sun's ultraviolet

radiation. A historic document was signed in Montreal last year by 38 countries that pledged to cut CFC use in half by the end of the century. The cut would be phased in over the last 11 years of the century. The United Nations Environment Program drew up and presented the agreement.

Repercussions continue to be felt from the 1986 Chernobyl nuclear reactor disaster in the Soviet Union. Italian voters recently sent a clear message to their legislators by voting up to 90 percent against additional nuclear developments in that country. Only three nuclear plants are in operation in Italy and three more are under construction. Heavy radioactive fallout from Chernobyl over the northern portions of the country have reignited Italian opposition to nuclear power.

Recent estimates by nuclear power analysts say that there could be three more Chernobyl-size nuclear accidents by the year 2000. When Reactor 4 at Chernobyl exploded in 1986, it had the best operating record of all Soviet nuclear plants. Figures used for the estimate were from government studies that say there should be one core-damaging nuclear accident per 10,000 "reactor years" of operation. There are 366 currently operating world nuclear plants producing 366 reactor years annually. It is assumed that 500 plants will be on line by the 1990s.

United States nuclear submarines regularly cruise under the arctic polar ice cap. This fact has Canadians somewhat upset. Canadian Prime Minister Brian Mulroney has proposed the construction of 10 to 12 Canadian nuclear submarines to establish a greater Canadian presence in those waters. This proposal has interesting side effects. If Canada builds nuclear submarines, they will need highly enriched uranium to power them. This means they will be the first nation without nuclear weapons to use weapons-grade uranium for non-explosive military purposes.

There is growing recognition of the problem of international transportation of toxic wastes. There is some documentation of such shipments but much of the traffic that is thought to exist takes place illegally. There is little in the way of worldwide notification or enforcement of rules. Much of the traffic goes from heavily industrialized nations to poorer third world nations that may not have environmental regulations as stringent as the generating nation.

Mainland China is the world's most populous country at 1.2 billion. They have also taken strong steps to curb population growth with limits to family size and economic incentives to follow the rules. A recent upturn in China's birth rate after a steady decline may threaten that country's future.

Some of the benefits of modernization have acted to turn the birth trend up again. Some Chinese citizens have prospered enough to be able to afford larger families. Future development will be closely tied to population growth.

Per capita beef production in the United States has now fallen behind poultry. Beef had been number one since World War II when it surpassed pork. In 1976, beef was consumed at an average of 90 pounds per person annually. Today beef consumption is at 76 pounds. Poultry (mostly chicken) has risen to 78 pounds. This has prompted new ad campaigns and beef diet programs to produce leaner beef for consumers.

The South Pacific island of Guam is experiencing a wildlife catastrophe. The southeast Asian brown tree snake has appeared on the island, probably after an accidental boat ride. With no natural predators, the snake has multiplied and has extirpated at least three species of birds found nowhere else. The snake is threatening three more bird species and a type of fruit bat. A further complication is the U.S. Navy's proposal to construct a huge radar installation (rumored to be a Star Wars project) right in the middle of the area identified by the Fish and Wildlife Service as essential to protect threatened species.

Winter survey finds record number of eagles

Thanks to good management programs and the development of areas for eagle nesting sites, eagles are experiencing an increase in their numbers.

Wisconsin's overwintering bald eagle population increased by 47 percent in 1988, according to the Department of Natural Resources. Volunteers counted eagles statewide in January as part of the Mid-winter Bald Eagle Survey, which is sponsored annually by the DNR's Bureau of Endangered Resources (BER).

At least 524 adult and juvenile bald eagles were counted during the survey period of January 8-9. That's up from 357 eagles counted last year during the same period.

DNR nongame biologist Charlene Gieck cites last summer's "exceptionally productive breeding season" as one of the major factors for higher mid-winter populations. Last summer 420 young were counted in a record number of nesting territories.

Another factor is the cold temperatures experienced this winter in Wisconsin and Canada, which reduced the amount of open water available for feeding. During the January survey period, temperatures in Wisconsin barely reached above zero.

"When it really gets frigid, eagles tend to concentrate in traditional wintering areas where waterways don't freeze and fish are more accessible," explained Gieck.

Wisconsin's harsh winters drive many Wisconsin eagles south to warmer climates. But to eagles in Canada, Wisconsin represents a warmer climate. What we may lose to the south, we may gain from the north.

The Wisconsin River from Sauk City to Prairie du Chien is a favorite spot for wintering eagles. Volunteers counted 180 adults and 111 immature bald eagles in this area during the survey period.

The extreme cold didn't stop more than 400 people from converging on Sauk City January 9 and 10 during Eagle Watching Days, an annual event sponsored by BER. The eagles put on quite a show, diving and soaring above the Wisconsin River for visitors who came from throughout the state to watch.

The other Wisconsin "hot spot" for eagles was along the Mississippi River from Prairie du Chien to Dubuque, where 97 adults, 38 immatures and seven eagles of an undetermined age were seen.

Polk County surveyors counted 20 adult bald eagles in that area. In all, 33 counties were surveyed.

Eagles will begin migrating north soon, according to Gieck. They mate for life and return to the same nesting territory year after year.

"We anticipate a good breeding season this spring," Gieck added. "We will continue to survey spring breeding territories and band young in the nest. The Wisconsin Adopt an Eagle's Nest program and donations to the Endangered Resources Fund on the Wisconsin income tax form support our eagle recovery efforts."

"The endangered bald eagle is beginning to look less endangered every year, but we can't start getting complacent about habitat loss and contaminants. We've got a good thing going. Now's the time to insure that trend with good management and continuing public support."

Make Your Prairie Chicken Reservation Now

Participate in central Wisconsin's annual prairie chicken inventory, from April 4 to April 29, 1988. Observers are placed in blinds adjacent to booming grounds allowing close observation and recording of greater prairie chicken mating rituals.

This is an early morning event (approx. 4:00 a.m. to 8:30 a.m.). Transportation will be provided.

Make reservations in Room 302 CNR starting March 21, 1988, between 9:00 a.m. and 2:00 p.m., Monday through Friday.

A \$3.00 deposit is required to reserve an observation position. The deposit will be refunded at a debriefing session when the observer returns from the field.

THE MOST IMPORTANT CAREER STEP YOU EVER TAKE MAY START IN ECUADOR

Or in any one of 60 countries in Asia, Africa and Latin America. Your first job after graduation should offer you more than just a paycheck. As a Peace Corps Volunteer, you will handle responsibilities and meet challenges far greater than those you would be faced with in a starting position in the United States. International firms and government agencies acknowledge and value that kind of experience.

25 years of PEACE CORPS
The toughest job you'll ever love.

Eyes in the sky may see peregrines

Dept. of Natural Resources

Biologists and falconers have their eyes on Wisconsin's late winter skies in the hopes of spotting any of the 10 young peregrine falcons released last summer in Milwaukee.

"The potential for the peregrines' return is there," said Department of Natural Resources nongame biologist Charlene (Charlie) Gieck. "As hopeful as we are that some might return, we aren't looking for any of our falcons to establish nesting territories and breed this spring. They're just too young."

Although the peregrines released here in 1987 won't breed this spring, some of the peregrine "visitors" who came to Milwaukee late last summer could be of breeding age, according to Gieck. The "visitors" may have come from an earlier peregrine release in Chicago in 1986.

Falcon watchers may see per-

egines migrating north along the western shores of Lake Michigan. Peregrines may also be seen flying above some of the larger riverways like the Wisconsin or Mississippi. Many of those birds will be migrating north to other historic nesting sites in Canada.

Peregrine falcon populations are beginning to increase nationwide. Some of those birds are natural nesting birds, but many are part of captive breeding and release programs active in Minnesota, Michigan, Illinois, New York and other states.

Biologists involved in peregrine falcon recovery programs throughout the country have released 2,000 peregrines over the past 12 years. More than 100 have been released in the Midwest in the last five years.

Peregrines reach sexual maturity when two to three years old, so many of these birds have the potential to breed and raise young in the mid-west this

year, said Gieck, coordinator of the Wisconsin peregrine recovery program.

"We plan to release 15 to 20 captive-bred peregrines at two locations this spring. They'll be released at Milwaukee, where five peregrine chicks are scheduled to arrive in June, and at Muscoda, where 10 to 15 chicks will be released in late May or early June.

According to Gieck, peregrines have returned to two historic nesting sites along the Mississippi River near Alma and Maiden Rock in the past two years. Another active site is located across the river in Minnesota. Although a great horned owl killed all of the chicks, biologists hope that the pairs will return to these sites this spring.

Wisconsinites are still enjoying a bout of peregrine fever—even through the long winter, according to Ron Nicotera, director of the Bureau of Endan-

Chicago and Milwaukee releases of falcons have been highly successful.

gered Resources.

"Teachers are especially interested in peregrines and other endangered species," said Nicotera, "because they can use it to teach a variety of subjects from traditional biology to social studies and even English and art."

"With peregrines they can

emphasize the socio-economic decisions made after World War II and the impact of those decisions on endangered species worldwide. DDT almost destroyed a number of species, including bald eagles.

"Students are writing about peregrines in English classes; they are sculpting and drawing peregrines in art classes, and of course, they are learning about predator-prey relationships in biology classes too," noted Nicotera.

Adults are sporting peregrine T-shirts, thanks to the Fond Du Lac Audubon Society; and thanks to the efforts of members of the Wisconsin Federation of Women's Clubs, lapels and shirt collars statewide are adorned with peregrine falcon pins.

The peregrine falcon recovery effort is dependent on the sale of T-shirts and pins, along with direct donations, to support the purchase of peregrine chicks. Those chicks cost \$2000 each.

"We're looking forward to a busy spring with peregrines coming to two sites," said Nicotera. "But donations will determine the amount of management and protection we can give, and determine how many peregrines we can support."

Donations to the peregrine falcon recovery effort can be made directly to the project by writing to the Bureau of Endangered Resources, P.O. Box 7921, Madison, WI 53707, or through the Endangered Resources Fund on the state income tax form.

Eagle Walk

Lisbon: March 14, Hillsboro High School; March 15, UW-Center Richland Center; March 16, Blue River Community Center; March 17, Woodman Town Hall; March 18, St. Mary's Catholic Church in Bloomington; and March 19, arrival at the 1,400 acre Eagle Valley Nature Preserve. They will return by van to campus on March 20.

Two members of the group have been on every hike—they met on the first one and are now married. They are Tim and Cindy Byers who have not totaled 1,200 miles on foot for the Eagles. Tim is working as a naturalist and writer in Door County. Cindy is a student here at UW-Stevens Point.

During their walk, the students, who pay for their own expenses, will encourage members of the public to make financial contributions to their cause. Donors also may send their checks directly to The Eagle Foundation, 209 N. Main St., Galena, Ill.

You Want A Great Display Of Portable Power?

The Zenith Data Systems
Z-183 Laptop PC

Hard-Disk Drive with Single Floppy:

Suggested retail price:

\$3,499.00

Special Student Price:

\$1799.00

The Zenith Data Systems Z-183 PC gives you all the power of a desktop in a lightweight, laptop PC. Plus, it's equipped with one of the most vivid, readable screens in today's laptop market. And added to this, are some important extras...

Now, the Z-183 Laptop PC can be yours at a great student price when you call your Zenith Data Systems Campus Contact. We'll give you information, and match you up with the right software and peripherals. So you'll end up with a computer that can take you all the way from college to career!

The Z-183 is PC compatible, and runs the latest PC/XT® software. The dazzling blue back-lit LCD screen allows you to adjust brightness and contrast to fit virtually any lighting. And the Z-183 PC generates longer battery life than most competitive, hard-disk laptops. Plus the 20 megabyte hard-disk with single floppy drive allows for expanded storage. It's even got its own handle.

So call us today, and get your very own Z-183 Laptop PC at a great student price. And check out the Z-181 Laptop PC while you're at it... complete with dual 720K 3.5" floppy drives. Either one will get you where you're going.

Aatron Kenney won two individual events and joined a relay en route to the conference championship at the WSUC meet held over the weekend.

Despite his efforts, the Pointers were only able to finish in fifth place. La Crosse was crowned the WSUC champs with 190.75 points followed by Oshkosh with 93.08, Eau Claire 93, Whitewater 84.33, Stevens Point 80, Stout 47, Platteville 16.08, River Falls 12.75 and Superior 0.

"It's very hard to put into words how I feel about this meet," said Head Coach Rick Witt. "I know that everyone gave us the very best effort that they were capable of giving. While I am pleased with the efforts, I am very disappointed and somewhat embarrassed with our fifth place finish. I know the men on the team feel the same way. Fifth place is our worst finish in the 11 years that I have been here.

"The WSUC has become so competitive that you have to be at your absolute peak or else you can find yourself losing two or three places in the standings. La Crosse is definitely the superior team in our conference.

"It is hard to be critical of my athletes when 19 of the 38 people who made the trip either equaled or bettered their best mark ever. I just need to make sure that next time their best efforts are even better."

Kenney's victories came in the 60-yard dash in 6.38, the 300 yard dash in 32.13 before joining teammates Mike Christman, Tim Jahнке and Pete Larsen to win the 880-yard relay in 1:31.80.

"Our sprinters did a nice job as Kenney showed he is the conference's best sprinter while Larsen was, also excellent," said Witt. "Assistant Coach Sheila Miech really has those two along with Christman and Jahнке ready to go. She deserves the credit."

Second places went to Christman in the 600-yard run in

1:12.90, Steve Allison in the 880-yard run in 1:56.98 and Scott Laurent who tied in the high jump at 6-4 while the lone third place went to Tom Morris in the 5,000-meter run in 14:41.59.

"Steve hurdlers—Jim Sekel, Theo Blanco, Brad Houslet, Mike Nevins—ran well but all came up a little short. Our jumpers were OK but none of them were able to come up with their best efforts. I was very pleased with Jim Shumway, John Gunderson and Andy Weyker. They all made the finals and had their best efforts ever.

Kenney and Morris will represent the Pointers this weekend at the national meet in Northampton, Mass. Point begins its outdoor season hosting the Pointer Invitational on April 2.

Women's Results

Three third places allowed the Lady Pointer track and field team to tie for fifth place at the WWIAC Indoor Championships held over the weekend.

UW-Oshkosh broke La Crosse's string of four consecutive titles, outscoring the Runies 223 to 143. Third place went to Eau Claire with 67 followed by River Falls 55, Stevens Point and Whitewater 42, Stout 16, Platteville 1 and Superior 0.

"As predicted, this was an exciting conference meet," said Head Coach Len Hill. "Oshkosh came out to run, got on a roll, and never let go. Several conference records were broken, including the 300y, 400m and 3000m runs. All three of them are unusual in that this is considered a slow track in the 300 and 400 due to the tight turns. The 3000 record is amazing because it went out very slow.

"Our squad competed just sort of average even though we had some season-best efforts and all-time personal-best efforts. This was a tough meet for us in that wherever we had a strong event, Oshkosh was stronger."

Stevens Point received thirds from Kris Hoel in the 3000m run in 10:13.76, Jenny Schoch in the

1500m run in 4:50.44 and Sue Collar in the high jump with a jump of 5-3.

"In the 3000m, Kris Hoel of Point and Tiffany Fox and Cheryl Niederberger of Oshkosh all wanted a fast race to improve their chances for nationals," said Hill. "However, no one would take the lead until halfway through the race."

Finishing fourth for Point was the distance medley relay team of Barb Knuese, Maureen Seidl, Carrie Enger and Beth Weiland in 13:00.46, Knuese and Beth Weiland in 1:32.14, Tammy Stowers in the shot put with a throw of 40-4 and Weiland in the 1500m run in 5:54.24.

"In the relay, Weiland made a diving finish to beat La Crosse, however, La Crosse was disqualified for dropping the baton before crossing the finish line," said Hill. "This was a good event for us as it seemed like all of the teams stacked this relay. Our women did a nice job

Pisciotta wins second title in two days Men seventh, women 12th at nationals

Sports Information Office

year.

Nino Pisciotta, a sophomore swimmer on the UWSP swim team, earned another NAAIA title in the final day of competition at the National Swimming and Diving Championships in Orlando, Florida last weekend.

Pisciotta adds to his list of national titles a victory in the 200 butterfly in a NAAIA record time of 1:50.9. His time surpassed the old record of 1:51.26.

Pisciotta won the 400 individual medley in 4:01.1 during the first day of competition, two seconds faster than his winning performance from last year. He then joined teammates Andy Woyte, Chris Larson and Ken Brumbaugh to win the 400 medley relay in 3:27.74. This was the first relay ever to win a national title for Stevens Point and the time was two seconds faster than the previous school record.

On Thursday, Pisciotta was disqualified from the 200 IM, one of three events he won last

As a team, the Pointer men placed seventh with 234 points. Drury College won the NAAIA title with 494 points, followed by Eau Claire with 329.5, Central Washington 327, University of Puget Sound 282 and the University of Denver 265.5. UW-Milwaukee, with a 243.5, rounded out the teams that finished ahead of UWSP.

To round out the meet for the Stevens Point men, a number of swimmers turned in All-American performances. The 400 free relay team of Ken Brumbaugh, Jeff Shaw, Chris Larson and Pisciotta placed sixth in 3:10.03; Brumbaugh was seventh in the 100 freestyle in :47.02; Larson grabbed 12th in the 200 butterfly in 1:58.57; and Sam Seigel was 12th in the 1650 freestyle in 17:04.56.

Point also suffered another disqualification as Andy Woyte would have won the consolation heat of the 200 breaststroke in

Burns returns as All-American

Sports Information Office

Ryan Burns ended his career at UW-Stevens Point as a wrestling NCAA III All-American at the National Meet held over the weekend.

The fact that Burns is only one of a handful of All-Americans at Stevens Point pleased Head Coach Marty Loy. Another senior on the team, Bob Calnin, finished in the top 12. Both wrestlers totaled six points in the meet.

"I'm proud of the way Ryan and Bob wrestled," said Loy. "They both gave it all they had. It was especially gratifying for me to have my first All-American in my first year as a college coach.

"There have only been a handful of All-Americans at this school and I believe Ryan is only our second or third NCAA All-American."

Ryan Burns, a 118-pound Pointer senior, won two matches and lost one Friday to move into the top eight for the final day of competition.

After receiving a first round bye, Burns beat Brian Maw (Lacombe), 3-1, in the quarterfinals, then lost to Joe Dasti (Kean College), 5-3. In his final match of the day, Burns beat Brian Segfried of Wabash, 10-2.

In the final day of competition

Burns lost to Scott Martin of Rhode Island by a pin in 1:56, and then lost a close 8-6 decision to Chris Hoffman of Central for seventh place.

Point's other national qualifier, Bob Calnin at 142 pounds, finished in the top 12 after posting a 2-2 record. Calnin came out with back-to-back wins over Dave Weiland of Thiel, 7-4, and Todd Hibbs of Mount Union, 7-5. However, he then lost two consecutive matches to Rodney Smith (Western New England) by a pin in 6:03 and Larry Pilcher (Buena Vista), 12-4.

"Bobby wrestled his heart

Sorenson, Shane capture All-WWIAC honors

Sports Information Office

Senior Sonja Sorenson and sophomore Deb Shane were named to the 10-member All-WWIAC team. It is the third straight year that Sorenson has been honored while Shane is a first-time selection.

The 5-11 Manawa native led the Lady Pointers to 12 wins this season, averaging 21.3 points, 11.2 rebounds and 2.3 steals per game. She shot 56.6 percent (180-318) from the floor and 75.1 percent (130-173) from the line. In addition, she was named to the six-member all-defensive team. She led the conference in scoring (22.5) and rebounding (11.8), was second in field goal percentage (57.6) and 10th in free throw percentage (72.3).

Shane, a Hortonville native, averaged 12.0 points, 3.6 rebounds and a team-high 4.4 assists. She was fourth in the league in assists (4.4) and sixth in field goal percentage (47.8). Head Coach Ruth Anne Kaiser felt both were well-deserving of their awards.

"Sonny (Sorenson) and Deb (Shane) truly deserved all-conference recognition," she said. "Coaches select the all-conference team based on game performance, but equally as impressive is their ability to prepare for game day—both were hard workers in practice.

"They are tremendous leaders both by example and expression. I'm proud of them and I know I speak for their teammates as well."

Joining Shane and Sorenson on the first team are Shelly Kostick and Stacie Robey of conference champion River Falls. Marion Bialobrzeski and Maureen Vorwald from La Crosse, and DeAnn Lehman of Whitewater. Rounding out the team are Eau Claire guard Sue Christiansen, Laura Finnegan from Platteville, and high-scoring forward Lisa Kirchenwitz of Oshkosh.

for fourth on the scoring list, while making 34 of 46 free tosses for 73%. The scoring duo was also two and three in three-pointers made; Robey with 30 of 80, and Kostick with 29 of 74.

Announcers had as much difficulty in pronouncing the last name of La Crosse's Marian Bialobrzeski as defenses had stopping her from putting the ball in the hoop. The senior from Milwaukee was sixth in

and contributing to the team's 72.8 offensive output per-game, tops in the conference for team play.

DeAnn Lehman brought a small amount of satisfaction to a somewhat dismal season for Whitewater with her selection to the first team. Despite playing for the 11-13 Warhawks, 7-9 in the conference, Lehman averaged nearly a third of the team's offensive average at 19 ppg, second only to Sorenson for the scoring title. The Hawks averaged 67.1 offensively a game, fourth in the league, but still finished one game behind UWEC in seventh. She also grabbed 119 boards for a 7.4 average and hit 111 of 201 shots from the field for 55 percent.

As only a sophomore, Kirchenwitz established herself as a leader by taking the Titans to a 17-7 overall record and a tie for third in the WWIAC at 10-6. The Freedom native finished third in the scoring race, averaging 17.1 an outing. Her aver-

age of 7.5 caroms was tops on the team that led the league in boards per-game with 46.7.

Eau Claire's Sue Christiansen is the fourth sophomore on this year's squad. She contributed 16.5 points (fifth), and 9.7 rebounds (fourth) for the 17-9 Bluegolds.

Laura Finnegan of Platteville, the lone junior on the first team, was ninth in league scoring with 13.7 mark. All eight players ahead of her also made the WWIAC first team. The Pioneer, who hails from Beloit, hit on 47.7% of her shots (82-172), and dished out 3.2 a game.

Three first teamers also were voted to the '87-88 all defensive squad. Kris Buhr, from the conference's top defensive team (River Falls), which allowed only 59.2 an outing, leads the team. Also rewarded for their defensive expertise were Sue Christiansen (Eau Claire), Lehman (Whitewater), Micky Mill-

Turn to page 18

Shane

Sonya Sorenson

Kostick and Robey were a main reason why the Falcons went 22-4 overall and 13-3 in the WWIAC in winning the conference. Kostick was seventh in the league in scoring with a 15.3 average and third in assists with 4.8 per contest. Robey's 16.8 average was good enough

scoring (15.8), fifth in free throw percentage (78%), and fourth in the three point category (23 of 50) while playing in all 16 league games. Vorwald, also a senior, outdistanced her next closest passer by almost 30 assists as she led the WWIAC in that area with a 7.5 average

Underdog hopes end for Point

by Kevin Crary

Staff Writer

"If at first you don't succeed, try, try again" is the motto that ended the season for the Pointer men's basketball team Saturday.

It took three tries by UW-Parkside this season to finally knock off Point, but the 70-69 final score came at the most crucial point in the season.

The Pointer loss left them with no where to go and advanced the Rangers of Parkside into the second round of the NAIA District 14 Playoffs.

The one-point difference told the same story of the two regular-season contests between the two teams. Point won both games by a total of five points.

It was Parkside's Roderick Wade who made the difference in the game. The 6-6 freshman forward sank a free throw with two seconds remaining to give Parkside a one-point lead.

"It's tough to have an official's whistle determine the game at the end," Coach Bob Parker said about the final call of the game. "And I fully realize that happens sometimes but it's just a shame that they can't let the players decide."

Point was down 69-63 with only 30 seconds left, but back-to-back three-pointers by Todd Christiansen tied the score at 69 with just eight seconds to play.

The final foul of the game, called on Mike Lehrmann, Parker described as "interesting."

Point was unable to get a shot off in the closing seconds, after rebounding the missed second free toss by Wade, because time had expired.

The Pointers finished with three players in double figures. Christiansen led the team with 18, Lehrmann had 14 and John Holmes chipped in 13.

Christiansen and Lehrmann also grabbed five boards each to lead the team.

The Rangers' Mike Henderson led all scorers with 19. Andy Schmidtman and Wade chipped in 15 apiece.

The Pointers performed well against the zone defense shown by Parkside, who used a man-to-man the previous meeting, and built a 33-29 advantage at the break.

"They played much more zone defense because they felt they couldn't get the job done with a man-to-man," commented Parker. "We anticipated that and were prepared for it."

"I thought we played well against it, as indicated by the final score."

Parker, despite the loss, was proud of his team's effort in the final game as well as the entire season.

"I'm proud of our players this year. I'm proud of the effort that they gave and of the attitude they had. It was a fine year coaching them."

"They hung in there through thick and thin, and I think that's just evidence of the type of character these players have."

Point finished the year one game above the .500 mark, at 14-13.

TENNIS

FREE TENNIS LESSONS AT SENTRYWORLD FOR FACULTY AND STUDENTS WITH VALID UWSP I.D.

Beginner and novice tennis lessons will be offered free of charge to persons who have not participated in leagues or lessons at SentryWorld within the last six months. The free group lessons will meet once a week for four weeks. Tennis balls, racquets*, and the court will be provided free of charge (*bring your own racquet if possible). All classes will be conducted by SentryWorld pros Mark Medow and Dan Stablein. The minimum age is seven years old. Lesson participants will be placed in classes according to age, skill, and convenience of hour. We suggest you ask friends and relatives if they would be interested in this "no strings attached" offer.

We are offering this opportunity of free tennis lessons simply to create enthusiasm for the sport and potentially encourage people to develop a lasting interest in the game of tennis.

For more information, contact USPTA pros Mark Medow and Dan Stablein at 715-345-1600

The Pointer icers will face off against UW-River Falls this weekend in the first round of the Division III playoffs. They received one of the two wild card bids last Sunday.

Mazzolini selected league coach of the year

Sports Information Office

In just his third season as head coach of the UW-Stevens Point ice hockey program, Mark Mazzolini has been named the Northern Collegiate Hockey Association Coach-of-the-Year by his peers.

Mazzolini, 31, led the Pointers to their first-ever NCAA III National Playoff berth this season and currently has guided his team to a glossy 20-8-2 record and a third place finish in the highly-regarded NCHA.

After inheriting a program that had won just 14 games in four previous years, Mazzolini reached the 500 mark at 12-12 in his initial season, capturing the school's first Wisconsin State University Conference title and District 14 Championship along with loop Coach-of-the-Year honors. The following year, his second, the Pointers joined the NCHA and finished a respectable fifth and were 17-12 overall.

This season the Pointers reached the 20-win plateau, another first in the school's history. In addition, his squad placed third in the NCHA with a 15-7-2 mark. His career record of 49-32-2 is amazing considering he

inherited a team that was 4-20 the year before.

Mazzolini came to UWSP after a four-year stint at the University of Illinois at Chicago. There he served as assistant coach and recruiting coordina-

Mark Mazzolini

tor under Val Belmonte and guided the junior varsity to an impressive 41-7-2 record. He also is credited with helping recruit Ray Staszak who became All-American and the CCHA's

Most valuable Player in 1985. Mazzolini has had seven of his recruits drafted into the National Hockey League.

A fine player himself for the Michigan State Spartans, Mazzolini was a four-year letter-winner as a goal tender and was named to the All-Academic first team in the Western Collegiate Hockey Association. In addition, he was named the team's most valuable freshman athlete and was also the recipient of the President's Award for academic excellence.

UWSP Athletic Director Don Amiot commented on the resurgence of the Pointer hockey program.

"What Mark has accomplished with our hockey program in three years is phenomenal," he said. "He took a program that was on the bottom and has now put us among the elite hockey programs in the country."

"Our attendance has climbed from about 100 fans per game to better than 1000 per game."

"Mark is known throughout the country as one of, if not the, outstanding young coaches in America. He has set the standard in the NCHA for recruiting the scholar-athlete."

Tennis team takes two

by Dan Vaughn

Special to the Pointer

The UWSP men's tennis team improved their record to 2-1 with two victories at Madison over the weekend.

Point won two of three doubles matches to overtake Bethel College and win 5-4. UWSP then proceeded to crush Carthage College by winning all six singles and three doubles matches en-route to a 9-0 triumph.

Against Bethel, Point split the six singles matches with victories going to Gary Polston (playing at number two singles) in three sets, 7-6, (7-5), 6-3; number four Tim Hauge, 6-2, 4-6, 6-2 and Pat Davidson (6) beat Jay Substack 6-1, 7-6, (7-4).

After losing their singles

matches, Point's number one and three players teamed up for the first doubles victory. Bryan Zowin and Doug Greenberg defeated the Weber-Holm team in straight sets, 7-5, 6-1.

Stew Stone and Polston sealed the team victory for Point with a win over Anderson and Sivinski, 7-6, (8-6), 6-2.

"I was very proud of our guys," said head coach Dave Droste. "They played a very tough match against a very good team and came out on top."

Zowin used his serve and volley tactics to perfection to rebound from an earlier singles defeat. He defeated Dave Schlicht of Carthage in straight sets 6-4, 6-3. But that was only the beginning of a very long

day for the Carthage squad. They would only win one set in the remaining eight matches, and that would not happen until the first doubles match.

Polston, Stone, Hauge, Davidson and Hastings all mopped up the court with their opposition, giving Point a 6-0 match lead. Only one player from Carthage won more than one game during the pointer domination...Todd Anderson at number five against Davidson.

Zowin and Greenberg had to go to three before knocking off Schlicht-Anttila, 7-6, (8-6), (6-3). The teams of Polston-Stone and Hauge-Hastings crushed their foes on the opposite side of the net, 6-0, 6-1, and 6-1, 6-0 to com-

Baseball squad has positive work ethic, attitude for season

by Andy Goehle

Staff writer

"Optimism" and "potential" could be the key factors that will spell success for the UW-Stevens Point men's baseball team this season.

The Pointers will begin their 1988 baseball campaign on the road over spring break, playing several colleges in Arkansas. Second-year head coach Randy Handel noted, "The past six weeks of practice have been very productive and positive in work ethic and attitude of the players, as they prepare for the up-and-coming season."

UWSP will try to improve on a respectable 18-14 overall record from a year ago. The Pointers finished third in the conference, behind Whitewater and Oshkosh, with a 6-6 mark.

"The coaching staff has had a year to get adjusted to the players. We have a little better grasp on what our team's capabilities are this year compared to where we were last year," Handel said. Handel's staff includes assistant coaches Fred Hebert and John Lindauer.

The Pointer pitching staff consists of 12 pitchers who will be tested for their strengths and weaknesses on their up-and-coming Southern road trip. Senior Darin Leveaus who was a first-team all conference (WSUC) pitcher last year is on injured reserve with an elbow injury, and probably will not see any action this season.

"One real disappointment has been the injury to Darin Leveaus. In my opinion, Darin is the best pitcher in the league, plain and simple."

Handel added, "This is just an opportunity for someone else to step forward and prove himself."

Defensively, Point's infield has many returning veterans and appears to have good depth at most positions. Dan Dantoin at shortstop gives excellent leadership to the Pointer squad. The team has average speed, but with their experience and sound fundamental play, this defense will be one key toward a winning season this spring.

Offensively, UWSP will have some solid bats in their lineup. With a much deeper bench, Point has four or five athletes who can hit the "long ball" at any given time.

"We're not a great team, but with smart play and solid hitting we can be," said Handel.

Handel feels that Oshkosh will be the pre-season favorite. The Titans (last season's NCAA Division III runner-up) return a veteran ball club with excellent pitching.

The team captains for this year's Pointer squad are seniors Dan Dantoin and Mike Reuchel.

The first home game for Point will be Friday, April 1, against UW-Milwaukee.

Softball team young but experienced

Sports Information Office

After starting with an all-freshman roster last season, UW-Stevens Point softball Coach Nancy Page was taking a risk.

However, after finishing the season 8-20, 10 veterans return to this year's team. And of the 10, seven are returning starters.

The gamble Page took last season may begin paying off this year.

"Our realistic goal this year is to finish 500 or above," said Page. "We have been really impressed with the poise and confidence of the returning players. I've noticed a big improvement in their hitting. Most of the players have been working with weights all year and that's really showing in the batting cage."

Although there will be improvement in the batting cage, Stevens Point's biggest strength will be on the mound. The top recruit this year is freshman Ellen Paul, a pitcher from Stevens Point Area Senior High. As a varsity at SPASH, Paul had a 32-4 record in two seasons.

"Ellen will make an immediate impact on the team," said Page. "She's strong, consistent and has a variety of pitches. Last year Stephanie Sobieck had to pitch a majority of our games and physically wore out

at the end of the season.

"Stephanie has been throwing hard in practice and seems to have gained some speed over the summer. Sherry Neubauer is also much stronger and her consistency has improved a lot."

With Sobieck pitching almost all of Point's games last year, mainly doubleheaders, having three pitchers will be a relief for Page. "All of our games are doubleheaders so it will be essential to have two pitchers," said Page. "That'll be a big plus."

The outfield was one of Point's strengths last year and will be again this year. The only all-conference performer for the Lady Pointers, Heidi Singer, returns in left field. She will be joined in the field by Tammy Kuester in center and Denise Starke in right.

There has been one change in the infield lineup from last year, and that is Wendy Renk at third base. Experienced players returning in the infield will be Becky Lundberg at shortstop, Rosanne Dworak at second base, Karen Scarseth at first and Ann Lux behind the plate.

"The outfielders all have really strong arms and they're quick," said Page. "The infield looks strong. It seems like they

are throwing harder this year and that is again a result of working with weights. They are smart players who analyze situations well."

Page will get an early look at her team during a spring break trip to Florida where the Lady Pointers will play 10 games. Teams that will also be competing include: William Patterson (NJ), West England, Onondaga Junior College (NY), Macomb Junior College (IL), Montclair (NJ), Princeton (NJ), Southwest Michigan Junior College, Stockton (NJ), Kean (NJ), and Wilmington (DE).

"I'm looking forward to going," said Page. "We'll be playing some really strong teams who are consistently in the top 20 in the national rankings."

"Another nice thing is that we'll be playing junior colleges and those games don't count on our record. They'll be experience games so we can experiment with the freshmen and also with the people at different positions."

"We'll also be able to get the kinks out, play together as a team and develop teamwork. This will be a major factor in the success of our season."

Stevens Point opens its WWIAC season at Oshkosh on April 5, this year's favorite to

win the conference title.

"Oshkosh was second last year and they have eight returning people," said Page. "They'll be the team to beat. River Falls won the title last year and they have four returning players."

Assisting Page for the second year is Kirby Schultz. "I'm looking forward to an improved

season, and with Kirby back it's a big plus," said Page. "He's very knowledgeable of the game and the players respect him a great deal."

Co-Captains of this year's team are Singer and Scarseth.

The Lady Pointers will play their first game of the season March 14 against William Patterson of New Jersey.

Sport's Shorts

The recent conference championship by the Platteville Pioneer men's hoop team was their first buckets title since 1975, when they shared the top spot with Stout. It is their first outright crown since 1959 ... UWSP's Mike Christman won indoor titles in the 220 intermediate hurdles in '84 and the 600 in '86 ... La Crosse Indian sprinter Earl Novotney's hopes of a fourth consecutive 300-yard dash title were ended by a blaze from UWSP—Aatron Kenney ... Stevens Point is currently second on the All-Sports contest in the WSUC with 38½ points. Whitewater is first with 39. Points are awarded according to the final standings in each sport on a 9-8-7-6-5-4-3-2-1 basis. Points have been awarded for completed competition in cross country, football, golf, basketball, wrestling and swimming ... The only school shut out at the men's and women's indoor meets last weekend was Superior. Not one runner on either squad earned a point as the Yellowjackets finished in last place in both meets with ... By being selected coach of the year in the NCHA, Point mentor Mark Mazzolini became only the second conference coach since 1982 to earn the award besides the head man from Bemidji State. Mankato State's Don Brose won last year. Before that, Bob Peters from Bemidji garnered the most votes in 1982, '84, '85 and '86. Beaver interim coach Mike Gibbons earned the selection in 1983 ... The UWSP men's swim team went to the national meet in Orlando, Florida, last weekend with something they did not have last year—hair. Following their slogan last season of "skin to win," each member shaved his head before nationals. Nino Pisciotto took the slogan to heart and brought home three individual titles ... How ironic. Former Pointer men's basketball player All-American and three time All-Conference choice Tim Naegli is currently taking classes at UW-Parkside near his home in Racine. His alma-mater buckets team was knocked out of the District 14 playoffs last weekend by Parkside, 70-69. We won't consider you a traitor yet, Tim. The 1987 WSUC Player of the Year is attending classes until he begins his new job in two months ...

—Scott Huelskamp

swim, from page 15

2:10.36.

With only seven swimmers at the national meet, the Lady Pointers captured 12th place with 131.5 points.

UW-Eau Claire won its second straight title with 472 points. Other teams that placed ahead of Point were: 2. University of Puget Sound 456, 3. Central Washington 451.5, 4. Pacific Lutheran 339, 5. UW-Green Bay 315, 6. UW-Stout 248, 7. UW-La Crosse 213, 8. Shepherd College 211, 9. Lewis and Clark 165, 10. UW-Milwaukee 151 and 11. Simon Fraser 141.

Stevens Point had three swim-

mers crack All-American status in the 400 IM on opening day. Anne Watson captured ninth place in 4:52.20, Jan Gelwicks was 10th in 4:54.20 and Karen Petrick was 12th in 4:55.17.

Other top performances were turned in by the 200 free relay of Teri Calchera, Lynn Palmquist, Petrick and Gelwicks which placed ninth in 1:42.91. Calchera was 16th in the 200 freestyle in 2:02.21 and the 400 medley relay of Calchera, Gelwicks, Petrick and Palmquist also placed 16th in 4:19.42.

In the prelims of the 200 freestyle, Calchera swam a lifetime

best of 1:59.99.

Point's top performance on Saturday came from Teri Calchera who placed seventh in the 100 freestyle in :55.22. Her preliminary time of :54.49 was a school record.

In the 1,650 freestyle, Deb Hadler grabbed ninth in 18:14.34, while Karen Petrick placed 11th in 18:18.14. The 400 free relay of Calchera, Petrick, Lynn Palmquist and Jan Gelwicks placed 10th in 3:44.94.

Despite two DQs and a swimmer who suffered a broken hand, Point head coach Lynn "Red" Blair was pleased with the final outcome. "I'm extremely happy with what happened," he said, "other than the misfortunes. There was bad officiating, but I don't like to get into that. I don't want to take anything away from our swimmers."

Sweep, from page 17

plete the team shut-out. Said Droste, "Bryan (Zowin) played a very tough match even though he was having some problems with muscle cramps. Our doubles play was much improved over our prior matches."

The UWSP tennis team will take their 2-1 record south on March 14 when they travel for a Spring Break tour in Orlando, Florida.

All-Co., from page 16

er (Platteville), Sorenson (Stevens Point), and Vorwald (La Crosse).

UW-River Falls coach Dennis Bloom was a runaway choice as coach of the year. The Falcons are currently hosting the Great Lakes Regional Tournament.

Intramural Burns

from page 15

This past weekend we had three tournaments take place. The winners for the Broomball Coed competition were the Huege Jorgans.

We also had a horse competition which concluded with Steve Janssen defeating Brad Bergeron for the men's division and Lisa "Shake" Bouche beating out Heather Seering for the women's title.

Mike Peltier once again defended his racquetball championship.

The men's intramural basketball tournament has begun. By Thursday, the field will be down to eight teams and an intramural league champ will be declared after Spring Break. The bracket is in the hallway of the Phy Ed building.

Get your teams and sign up for floor hockey, indoor soccer, badminton, and water polo, which are all coming up after Spring Break. Entry deadlines for all events is March 23rd.

out," said Loy. "We're happy about his finishing in the top 12. This was probably one of the toughest weight classes."

Both seniors finished with great careers at Stevens Point, topped off with respectable performances at the national meet. Calnin ended his career with a 32-13-1 record, the most wins ever in one season by a Pointer wrestler. Burns was right behind with a 31-13-1 mark.

Whitewater had two All-Americans, while Platteville produced one to highlight other performances in the WSUC.

WSUC Indoor

from page 15

of coming out of the slow section and running a faster time than River Falls who was in the fast heat. The women cut their time by over four seconds without any competition."

Fifth places went to Schoch in the 3000m run (10:23.20), Enger in the 800m run (2:23.06), Kris Helein in the 5000m run (18:22.34) and the mile relay of Beckie Sherwood, Knuess, Seidl, and Enger in 4:16.47.

Fat McPartlin (above) and teammate Tim Coglun were both named to the NCHA first team all-conference recently. Their stats and the rest of the team will be in the Sports in two weeks.

CLASSIFIEDS

ANNOUNCEMENTS

Form I for the Evaluation of Administrators is now available in the chancellor's office (for pick-up or by phone, X2123) and a supply has been provided to the department secretaries for your convenience.

The administrators being evaluated this year are:

James Schurter, Dean, Academic Support Programs
Joan North, Dean, College of Professional Studies

Mary Williams, Special Assistant to the Chancellor

Robert Nicholson, Assistant to the Assistant Chancellor, Student Development

Robert Busch, Director, University Center

Ronald Weseloh, Director, Telecommunications

The completed forms must be returned to the chancellor's office no later than March 25, 1988, in order to be included in the final analysis of the evaluations.
