While there is no theme for Barney Street, most of the pieces will deal with world views. The short story deals with a young boy's view on the world.

Barney Street will become available on April 6, during the Festival of Writing. It will sell for three dollars and be available at the university bookstore, Bookworld, and at the Rites of Writing.

The magazine was named after a street that had a short 13-year existence between 1947 and 1960. It ran between Fourth and Franklin streets and was located where the Gilbert W. Faust Lecture Hall now stands. It was named after the man who donated the land, William A. Cooper. The University Writers help insure that Barney Street lives on, in paper if not cement.
War faculty visit UWSP

Tuesday several students from the Army War College visited the campus. Their visit, sponsored by the Wisconsin Institute for the Study of War, Peace, and Global Cooperation, included a public forum as well.

SGA elections next week

Brian Neville, Brenda Leasy, and Mike Mikhalen are running for next year's Student Government Association's Presidential positions. Last Tuesday saw a heated debate between the candidates.

Back to the books

With Spring Break behind us take one last look at the adventures and experiences of Foley Pointers.

Shop until you drop

The Five Senses boutique is now open in the OPS building, selling everything from candy to running tights.

Souvlaki anyone?

Notes from Abram comes to us this week from Greece, the birthplace of modern civilization.

Streak stopped

It has been six years since anyone has beat UWSP for the WCST's omn's basketball title. Sports has this year's upset.

Honored icers

Two members of the UWSP hockey team that made it to the Division III Championship were named to the NCHA first team.

Spring's wildlife

Spring brings many of the wonders of nature. The most important of these is the miracle of birth. All newborn animals draw attention, and rightfully so, as they are a treasure to behold. Learning where this attention ends can sometimes spell the difference between the life and death of a wild animal, and it may even save your life.

CITY BEAT

City Beat: President George Bush will make campaign stop at Sentry Sports World on Tuesday, March 28, at 2:30 p.m. The public is invited to attend.

The Vice President's appearance for public office to speak before Sentry employees and the community.

To date, only Vice President Bush has scheduled an appearance at Sentry.

Learning about six Democratic and four Republican presidential candidates were mailed March 1. Since then, some have dropped out of the race, but we're keeping open our invitation to the remaining candidates.

Sentry World is located at 601 Michigan Ave. Doors open at 1:30.

The North Central Association visiting team members would appreciate the opportunity to speak with students as part of their evaluation of our university for continued accreditation. To assist them in this endeavor, there will be an open meeting for students to speak with them on Monday, March 28, at 4 p.m., in the Founders Room of Old Main. This is another opportunity for students to have input into the evaluation process.
Leahy totes experience
by Paul Jankowski

Brenda Leahy and Joe Andreska say they are “best for the job,” vice president and vice president of Student Government Association. At Tuesday’s debate they said their experience was a plus for them. Leahy noted she had experience which “encompasses the whole campus” and through which she’s gained “knowledge and contacts at the campus level.”

Leahy also noted that Andreska commented her in that he was a hall president and was involved with Residence Hall Association and the University Activities Board. Andreska was budget coordinator and special programs coordinator for UAB. He also has experience on SGA’s Finance Committee and that was important to Leahy.

There are three main points to the Leahy-Andreska campaign. They concern communication, money and opportunity. For communications, if elected, they would put out a regular SGA newsletter. Leahy later added that she wanted this newsletter “to be a regular part of everyone’s life.” As of now though the finances were still unclear regarding how often it would be published.

With money, Leahy noted she wanted to stabilize tuition by working with the accounting office. Tuition cap in the state Legislature if that wasn’t successful this year, she said she’d continue the fight next year as well.

To get students involved, they would hold regular office hours in the UC concourse. If elected, they would hold these hours at least once a month. These office hours would be their main weapon in combating student apathy on campus.

During the debate Tuesday, Brenda Leahy noted that a large share of SGA’s keeping in touch with the students was the Senate’s responsibility too. She stressed motivating the Senators “to go out and talk to their constituents.”

While “Steve Cady has done a pretty excellent job,” Leahy says she will improve the president’s job. Also, she says the vice president’s job will be split in two. “There will be a SOURCE Director and a vice president next year.” (This change, currently being undertaken, has yet to be approved by the Senate though.) The vice president will then be more involved and “he said they receive leadership education. He noted that their involvement significantly improved UAB in just its first year on campus. He says that next year he hopes to improve SGA as well by utilizing people from that organization. Commenting on that, Leahy noted students have to “start young” to be able to work up, in time, into the higher leadership positions of SGA.

Mikalsen stresses SGA/student contact
by Paul Jankowski

Mike Mikalsen and J. Bradley Washa running for next year’s president and vice president of Student Government Association positions. The main points of their campaign include support of a 15-year-old Wisconsin drinking age bill, a 33 percent tuition cap and keeping the drinkers palms.

In addition, if elected, Mikalsen says he will work to have a new chancellor who is “responsive to students’ rights” (and acknowledging the facts of STUDENTS’ rights).” Currently Chancellor Marshall plans to retire this January.

Mikalsen also says he’s looking for a variety of opinions on Marshall’s replacement. “You can get too centralized” on looking for a new chancellor, he said he wanted to avoid that. Mikalsen and Washa both want next year’s SGA to go back to the basics of shared governance. One example of how this isn’t being achieved was when Washa noted that on the South and Nelsen Hall closings in student gatherings were contested until the decision was already made.

In Tuesday’s debate, Mikalsen says students aren’t apathetic. Rather, “you have to go at an issue in a way to get students excited.” The present problem with the Senate and it goes with the president and vice president,” he believes the Senators should be pressed into getting more student input on the issues. They aren’t alone in the problem though. Students should question their representatives as well.

He chose Washa as his vice president because “we work very well together, but the big thing is we can critique each other and learn from each other.” He says that Washa’s experience as a Resident Assistant in Burrroughs Hall is important in dealing with students. Also, he adds that Washa is very well known throughout the College of Natural Resources.

Washa later added, “My involvement as an RA has brought me into one on one contact with students. This, along with his work in the College of Natural Resources, are some of the skills he says he has.

Dealing with student apathy, he says he will get out and meet with students again. Tuesday he charged that the other candidates already being in SGA should “put their money where their mouth is” regarding communication and apathy.

Neville chooses Dan Weitzel for his running mate because “simply he’s the best. He has the same values, the same ideas... and he’s easy to talk to.” While noting his time in the U.S. Navy, he said Weitzel was “a hard worker” and had good communication skills.

Weitzel says the skills he brings to the vice president’s position “is second-hand to me. I know it very well.” “He also said,” I know how to handle money, I know how to handle paperwork.”

To keep in touch with the students once elected, Neville says he will talk to them. Furthermore, he says the Senate as well must talk to the students too. Right now Senators are not talking to their constituents. He charged that the Senate should take a more active role in

Neville’s not radical
by Paul Jankowski

Brian Neville and Dan Weitzel are running for Student Government Association’s president and vice president positions as write-in candidates. Neville says the reason they’re going as write-ins is that “I just want to get out of the red tape and get on with my campaign.”

Neville is critical of the other candidates. He says he is a “Barbie Doll contest. ‘’ day’s debate, he said the race between Mikalsen and Leahy was a “Bartle Didd contest.”

Neville and Weitzel have four major points to their campaign. These include a valentine-point card system for Stevens Point, an organization to buy back class required books, an SGA more accountable to student concerns, and an SGA more concerned with campus issues.

Neville’s expansion of the duties would include both off-campus restaurants and retail stores. At Tuesday’s debate, when Joe Andreska questioned him about the cost of phone lines going off campus for the system, Neville said it would cost El. However, he didn’t elaborate on that. He also says, if elected, he would organize opinion polls gathering to find out what the students think. He will also form a committee to look into students’ complaints such as snow removal and garbage on campus. Right now there’s nothing like that, and if there is, it’s not doing its back
Indian development meeting set

by Blair Cleary

Staff Writer

Tuesday afternoon the candidates for the Student Government Association Presidential/Vice-Presidential race met in the Encore room of the UC for a debate.

The debate lasted roughly 70 minutes and consisted of 9 questions from the media and 3 from the attending students. The 3 tickets: Mike Mikalson and J. Bradly Washa, Brenda Leahy and Joe Andruska, and Brian Neville and Dan Weidel, who are running for write-ins, answered questions ranging from student apathy to the administrative chargeback issue.

Scott West, Assistant Director of Student Development for Student Leadership, was the debate's moderator and Kurt Joseph, the Senator in charge of elections, was the time keeper.

In his introduction, Scott West commented on the importance of this presidential race. According to West, "The people you elect next Tuesday and Wednesday play an important role in the government and operation of this university." West added, "The people in SGA manage a budget of over $700,000 a year and administer one of the most powerful student government organizations in the country." "Your vote counts next week!"

The debate ended with the candidates each getting a few minutes to introduce themselves. They then took turns answering each of the 12 questions, as well as commenting on each other's statements.

Some of the comments about each other got a little spirited. When Leahy commented about her ticket's desire to improve communication between SGA and the students Mikalson brought up how Leahy didn't ask for student input for the Food Service Committee she sits on. Neville called the race between Mikalson and Leahy a "Barbie Doll contest" because he charges that neither of them have done much for students in their present governmental positions. Leahy asserted that Mikalson would over-dominate the Senate. Finally, when Neville repeated his accusations that SGA didn't keep in touch with student opinions Mikalson addressed the fact that in his semester as a senator, Neville missed several senate meetings including the important budget deliberations of a few weeks ago.

Credit union assets climbing

UWSP News Service

Assets of the University of Wisconsin-Stevens Point Credit Union grew by 12 percent last year to reach an all-time high of $27.7 million.

President Rick Rothman announced the figure at the organization’s annual meeting at the Sky Club.

The value of loans was increased during 1987 from $13.3 million to $18.6 million. A new venture was in the area of real estate loans. The board set aside $200,000 for this purpose with mortgage for six principal residences.

Homicide, from page 1

Among white victims, about 45 percent of them are men. Nationally, homicides among men are three times more prevalent than among women.

Johnson, who has a bachelor’s degree from Augustana College and master’s and Ph.D. degrees from the University of Illinois, did his homicide study as part of the work for a fourth degree, a master’s in public health, from the University of Minnesota. With special interest in epidemiology (anything harmful to human life), he initially planned to explore diabetes problems among Native Americans. An adviser urged him instead to do the study on homicides.

Johnson, a native of Fort Dodge, Iowa, has served on the UWSP faculty since 1970.

Net earnings for the year were $237,978, up 14 percent from the previous year. The operating expense ratio declined seven percent.

Treasurer John Birrenkott reported that the gross income from all sources was up $51,000, while expenses increased only $2,300. This made possible an increase in dividends from $134,000 in 1986 to $137,000 in 1987.

Birrenkott, director of business operations for the Student Life Division, was elected credit union chairman to succeed Rothman, who had served in that capacity two years. Rothman, however, will continue on the board as vice chair. Vern Gamm was elected treasurer to replace Birrenkott in that post.

The credit union serves employees and their families at the university and the Wisconsin Intercollegiate Athletic Association.

The War College, located in Carlisle Barracks, PA., is used as a training ground for officers being considered for promotion to general.

Point park run set

UWSP News Service

The first annual Point Park Run will be held on Saturday, April 9, beginning with registration from 10 a.m. to noon at Goerke Park. The fund-raising event is sponsored by the Stevens Point Parks Department, Sigma Tau Gamma, a social fraternity at the University of Wisconsin-Stevens Point, and Pepsi Cola of Wisconsin Rapids.

All proceeds will be donated to Big Brothers/Big Sisters of Portage County.

Pre-registration forms are available at the Student Activities Office in the lower level of the University Center and at the YMCA. The cost for pre-registration is $2, and registration on the day of the event is $5. All participants are guaranteed a T-shirt, and men and women may compete for individual trophies.

The races, which begin at noon at Goerke, will include a one-mile fun run for children under 12, a 5K run through several parks and back to Goerke, and a 10K event also through city parks and ending at Pfiffner Pioneer Park, west of the downtown area on the Wisconsin River.

The competitors will be divided into categories according to age. The divisions are: 19 and under; 20-29; 30-39; 40-49; and 50 and over. First place trophies will be awarded to the top male and top female racers in each category. Planners say the event will be held regardless of weather.

The Party's Over: A look at Break '88
by Jim Malzewski
Features Editor
The only drawback of any vacation is that eventually it has to end, and that's certainly true of any trip to the monotony and routine of day-to-day living.
For those who spent Spring Break down South, the ending this past Sunday was especially harsh. Good old Mother Wisconsin welcomed us back on all rights—with 14-degree temperatures and snow flurries. Riding shotgun on the final leg of our journey from South Padre, I couldn't help but reflect on the past 10 days. How much fun they were. How many new people I met. How many old friendships that were strengthened. But most of all, the realization once again of life outside Stevens Point.
It began on Thursday, March 31. With mudflaps behind us, Bill, Jeff, John and myself jammed our bodies, luggage, cooler, three cases of Miller Oklahoma brought with it into Wisconsin border. We were station, to see. Our journey from South Padre, I place at around 2 a.m. We couldn't help but reflect on the monotony and routine of life. But we knew the guy in back of us in Wisconsin. Even living, clock read 11:11 p.m.
At home we knew the St. Louis arch was going to be a thrill to see. And, in fact, we'd been with contest with just that. However, we were to get much more: Our first brush with that unflinching, inarticulate Southern drawl. It took place at around 2 a.m. We noticed the guy in back of us flashing his brights repeatedly in our rearview mirror. He pulled alongside and the passenger sitting in front rolled down his window to mutter some utterance. It went something like this: "Say, y'all got your bright lights on, don't ya?" This quote would be repeated in just frequency throughout the week, always providing a good laugh.
Our most memorable moment was when the lights were awaiting us here, and our predictions were right. Soon after arriving in San Antonio on Friday night, we were in a bar drinking beer. Soon after we started putting down beer, we were putting down Jalapeno peppers. Soon after swallowing the Jalapieno, I thought, "God, if my mouth wouldn't be so numb this would really hurt." Our first sweat soon followed.
We came our destination, Texas. We knew many highlights were awaiting us here, and our predictions were right. Soon after arriving in San Antonio on Friday night, we were in a bar drinking beer. Soon after we started putting down beer, we were putting down Jalapeno peppers. Soon after swallowing the Jalapeno, I thought, "God, if my mouth wouldn't be so numb this would really hurt." Our first sweat soon followed.

Soon after swallowing the Jalapeno, I thought, "God, if my mouth wouldn't be so numb this would really hurt." Our first sweat soon followed.
As outgoing Mexican merchant eagerly demonstrates his dexterity to Jeff, John and I (left to right).
Saturday was spent lying poolside working on that first bit of darkness, all the time enjoying effects of the previous night's saga. Then it was downtown to an Irish Fest along the river. Followed by the false haul to South Padre.
Padre was a blast. We layed on the beach. We drank beer. We got rained on. We drank margaritas. We burned. We marveled. We were two of new people. We peeped on the locals. We paid $10 for a drink. We drank on a linoleum floor. We.
Boutique awaits business

The class has created the "Five Senses," a unique gift shop open to students and the public. The shop is located in room 2109 OPPS and will be open from March 21 through April 1. Store hours are:
Monday- Wednesday: 9 a.m.-7 p.m.
Thursday and Friday: 9 a.m.-9 p.m.
Saturday and Sunday: 10 a.m.-4 p.m.
Being the fourth year that a shop has been created, Co-managers are Jill Hesselin and Doni Huelker. The remaining students are divided into the following groups: inventory, personnel, display, promotion and merchandise.
Students involved are Beth Bradshaw, Ann Brindisi, Susie Besharat, Kelly Carter, Julie Ettis, Paul Gittel, Lynn Hurn, Sue Johnson, Gail Laube, Melissa Moderson, Diane Myers, Ruth Pauli, Nancy Roberta, Linda Sindert, Jean Schemschek, Sue Skidmore, Kathy Stockmore.
The class decided the type of merchandise, the store hours, layout and policies. Merchandise is on consignment from local artists and craftsmen. The shop contains a selection of clothes, scarves, coffee, candy, posters, jewelry, sunglasses, pottery, stuffed animals. Running lights made by Jaji of Lakeshore. Items were purchased especially for the store.
A high profit made by the "Five Senses" is used to purchase equipment for next year's class.
"It was very fun acting as a boutique owner," said Rachel Albert, a senior.
"It was a lot of work and was also a lot of fun," said Kim Kupfer, a sophomore.
Music corner
by Molly Rae
Student Writer
Unit One. They've been together for four years traveling the contiguous Wisconsin and the Upper Peninsula in their tiny bus, playing bars, outdoor festivals and appearing with national acts such as Firefall, Cheap Trick, Black Oak Arkansas and the Thompson Twins.
They describe their music as "high energy" and do a mixture of cover material from the likes of Rush, Bon Jovi, Def Leppard and Whitesnake, as well as a mixture of original material.
Hailing from Wisconsin Radio, the band is made up of four very professional musicians. Al Schroeder is on rhythm guitar, Craig Vreeman plays lead guitar. Both handle vocals with a true rock and roll feel. A hard-pounding rhythm section with Harold Hardeman on bass guitar (and keyboards) and drummer Tim Gesmer. They have an impressive stage show that includes moving lights, fog, explosions and a few surprises. In 1986, Unit One took second place at the WAPL Battle of the Bands. They are also the 1987 regional, winner of the Seara gram talent search.
"Where do they want to go?" was asked by a Central Wisconsin hand go? The answer is anywhere. Right now, Unit One is concentrating on their goal to get signed to a major record and professional studio album.
They're playing here in The Ballroom at the end of the week for an exciting vacation. It was time to become a student again.
Nothing like home
by Jeff Kirchman
Special to the Pointer
Greetings from halfway between Central Wisconsin! Judging from the number of buses parked outside the U Hus last Friday, I'd say the half of the campus will be returning on March 31 with varying degrees of excitement. So how are we? I decided to set off a few miles away from my haven, the Spring Budget Break in the middle-latitude zone of the U.S. Since Spring Break activities have been the topic of any number of magazine stories, newspaper stories, TV stories, it might be a pleasant change of pace, at least for those of us who didn't stay behind.
I started out my first week end and of adventure by going to the Sun dance and Sunday. Most people would consider this a breach of Spring Break etiquette, but I look at it as a way of living. I stay outside the snow for four hours turn a side street and have a surprisingly similar to a good tan. And no hazard of burnout. Too bad it only lasted six hours. I started drinking that night, due to my insufficient funds.

Turn to page 9
What do you find most depressing about returning to Stevens Point after spring break?

International Club: One World for peace

by James De Cruz

The International Club calls for one united people striving for international peace, goodwill and solidarity. With a foreign population of about 220 USWP students from some 30 countries around the world, the club typifies that constant bridging and building of international links, goodwill and camaraderie unique to most UW System campuses.

Most universities have their own Spanish, Mexican or Asian clubs, but quite rarely do they have an established foreign student program supporting an international club embracing all these cosmopolitan cultures under one roof.

In retrospect, its beginning owes origins to Marcus Fang, director of the Foreign Student Program (FSP) and advisor to the International Club, who, with the expertise of co-adviser Bill Clark from the English department, gave the club its official birthright in 1969. Since then, the club has taken great strides to organize international events and activities for all USWP students, faculty and the community at large.

Of particular interest was the recently concluded 19th International Dinner held on Saturday, March 5, at the Allen Food Center. For the past 18 years, a dedicated cohort of foreign student leaders and supporters have willingly scrubbed, washed, cooked, cleaned, served, entertained and danced their way into the hearts and minds of all the invitees and guests. Their sole intent and purpose: to spread the international gospel of goodwill, understanding and culture.

Michael Yong, president of the International Club, was responsible for coordinating the dinner and "looks forward to the continued support of all members and guests in the years to come."

Evidently, it was the food and entertainment galore that stole the thunder for the evening. With the excellent joint maneuvers by A. Leng Hong, a Singaporean, and Anumar Adabiham, a Syran, the food items of rujak, egg roll, chung su, kiyaki, kibbeh, japo and hot-kake were introduced and digested according to their countries of origin and compositions. And to add color and entertainment, there was an Indian traditional dance, Oriental folklore, Tai Chi Chuan demonstration, Malay harvest dance, Japanese fan dance and the Indonesian medley was the grand finale.

According to Fang, "It is largely a labor of love on the part of these students, and the International Dinner introduces a slice of the world to the Stevens Point community by way of foreign cuisine blending with their unique cultures and lifestyles."

Secondly, he said, "It brings together students to work side-by-side giving them the hands-on experience of being a leader and follower as part of their experiential learning process."

Fang said, "Some student leaders have aptly demonstrated beyond their classroom levels that they can rise to the occasion whenever called upon." Both Clark and Fang are grateful to these students for sacrificing precious study and work time, and for the staunch dedication these members bring with them from their homelands. Already, both of them have plans in the pipeline for the next major project: the International Festival 1988 on November 4.

I want a new drug...

Drug-free cure for headaches

by Beth A. Miller

There’s no doubt about it—headaches cost money. For the college student, the cost may be more than they can afford to spend. There is no reason to open your wallet to expensive headache remedies with this simple and drugless way to both relieve and prevent them.

Most headaches, caused by chronic muscle contractions, are usually tension-induced. By practicing a few simple techniques, you can control this tension and prevent the throb of a headache or stop one that’s already hit.

For a minute relax, take a deep breath, and as you inhale, tense your whole body. Hold it. Don’t forget to hold your breath and keep all your muscles tightly. Remember to clench your teeth. Hold for 5 to 10 seconds, then let go by exhaling. Sigh. Let it all out. Allow your body to be loose, limp and relaxed. Think to yourself, "Let go." Repeat two or three, and do it throughout the day to relax muscles.

If you have more time, sit comfortably somewhere and close your eyes. Each time you exhale say to yourself silently, "Let go." With each breath, let go even more. After 3 to 5 minutes, stretch your arms and legs and slowly open your eyes. Take your time getting up.

Anytime you notice tension in your shoulders, neck or head, increase it by contracting your muscles. Then release it with your emission of "Let go." With every "Let go," you’ll feel the tension缓解 down your spine un-كريهودي and close your eyes. Slightly tell yourself, "My jaw is loose, limp and relaxed." After 30 seconds to 1 minute, very slowly bring your head back up, one vertebrae at a time, if you’re stacking building blocks.

The next time you have a headache, it may simply be your body’s reaction to a stressful situation. If so, learn to relax your body through these simple techniques and you will learn that headaches are easily prevented and cured.

"For the Professional Look"
Greetings from Wisconsin,

couldn't hit the high-priced bar scene. So I chose to do the next best thing—drink at home. I still couldn't afford it, so I had to use some ingenuity. A startlingly simple idea struck me. I just modified the popular B.Y.O. (Bring Your Own) to B.Y.O. (Bring Your Dad's). After half a case of Old Milwaukee, I was ready to do some serious partying. Then Dad came home and I faced my inevitable major crisis. Eviction.

Depressed at first, I soon perked up. I was on Spring Break, so what would they do in South Padre? Simple—sleep on the beach. I was soon back on the road on my way to scenic Lake Schroeder.

The rest of my vacation was the standard Spring Break fare—wine, women and song. Of course, I had to settle for heifers and polkas. I spent nights on the beach huddled against the cold, sharing my sleeping bag with a hot yogi thing. She was a 100-watt space heater with a long extension cord.

As all vacations go, the day finally came when I had to pack up and head for home. With a tear in my eye, I said good-bye to the beach I had called home for five nights. I had a long drive ahead of me, and I had to make it back in time for my Monday morning class. Another 22 hours later, I saw the Point Beer sign for the 45th and last time, and I knew I was home for another year.

Well, I guess these are the highlights of my Go-Nowhere Vacation Package. I'll be looking forward to hearing how my break sized up to the others. Who knows, maybe I've got something here. Even Fort Lauderdale had to start somewhere.

"Bad officials are elected by good citizens who do not vote."  
—George Jean Nathan

"No matter how bad they are, Grandma loves to hear the latest jokes."

Kim Cohen—University of Wisconsin—Class of 1990
Welcome to yet another journey into this sublime, with host Stud Weasal (real thundered Thund reporters) and a kooky high school girls, etc.) Thank you, thank you, ladies and gents.

This week I will be addressing the following questions: Should proms stay be protected, or is abortion, really murder? Should the government of the United States continue to fund the Olympics? If the Equal Rights Amendment is passed into law, will men and women be required to take showers together in the residence halls? And, finally, with the inevitable advancements in computer chip technology, which will be introduced after the year 2000, will we continue to be socially unacceptable to use the word "penis" in casual conversation, while eating croissants and talking about the latest foreign films in big-city gourmet tea and coffee shops? But first, a little story: A long time ago, in a place far away, lived a little girl named Milly Bity. There was one thing that Milly Bity loved to do more than anything else in the whole world - eating sugar cookies, more than watching TV, more than friend's neighborhood, and even more than playing with the many different scientific software packages that her daddy, a professor of Environmental Dance at the local university, had bought for her. It is known that a baby is a bundle of joy, or a home computer. Milly loved to climb and swing on the Jungle Jim in her backyard. At breakfast every morning, until her mother would ring the bell for supper in the evening, Milly could be found playing in the backyard, swinging on the swings or hanging upside down from one of the trapeze bars. She practiced each trick on her own, hoping that someday she would be as good at the circus, which came to her town once a year.

But, by the time she had reached adolescence, it was all hanging on her dream of someday being a famous circus performer, she was spending less and less time playing on her Jungle Jim. Then one day, with tears running down her face, she was for the first time able to admit to herself that she was not meant to be a famous trapeze artist, but instead, a computer operators consultant. It was time for her to move on - and to leave her Jungle Jim behind.

Milly Bity grew up to be a world-renowned computer ace, with a six-digit income, while, over the years, her childhood was never lonely, for he always had more than his share of new friends in the neighborhood. And the moral of the story little boys and girls: Whether you're talking about the legality of the act, the rights of an unborn human fetus, the possible ramifications of the pro-choice movement, or if you've just plain upset about people who use the word "penis" out of context - there are no easy answers.

There are no easy answers.
Healthy tips

Dear Editor,

We all attend one of the greatest wellness campuses in the nation. Students here, with extra work, are bound to live a healthy life. What people need to understand is that complete wellness is more than just exercising and eating well-balanced meals. It’s not that easy. Personal "wellness" includes six vital areas in our lives. These areas involve physical, spiritual, occupational, intellectual, social and emotional well-being. So in order to live a healthy life, we need to understand that complete wellness involves mental, occupational, intellectual, emotional and social well-being. Vital wellness means exercising at least four times a week and eating a variety of foods that give us energy. Spirituality and emotional satisfaction is our search for meaning and feeling in our lives. Related to that is occupational, which is the satisfaction one receives from their work. Continual expansion of our knowledge and potential is what is wrapped up in intellectual health. Social health is basically how well we are able to interact with the people around us, as well as the world around us.

Everyone has the power to lead a healthy life. Leading a healthy life means enjoying life and living it to the fullest. Granted living a healthy life is not easy, but the benefits of a well-rounded life are well worth the extra effort.

Sincerely,
Cheryl Cynor

Revising guide available

A new Recycling Study Guide, designed for Wisconsin educators, is available from the Wisconsin Department of Natural Resources. The guide is intended to help teachers and students understand what solid waste is, what it contains, why it’s a problem, and what can be done about it. The guide includes an overview of solid waste and recycling, a glossary, suggested educational activities, and a list of resource publications, audiovisual materials and organizations.

For your copy of the Recycling Study Guide and its companion publication, Special Recycling Edition, contact: Education Section, DNR Bureau of Information and Education, P.O. Box 7221, Madison, WI 53705, (608) 267-1229.

LETTERS

Where Jesse Jackson stands on protecting our environment

To the editor

Nearly 28 years ago, the United States made a firm commitment to protect the earth and clean up the environment. We passed laws and set up regulatory agencies. We spent billions of public and private dollars. But we have largely failed. Since the early 1970s, some pollutant levels have improved, but only by 10-15 percent. Some states have become worse. In the 1980s, this environmental crisis was exacerbated by an administration committed to environmental deregulation. President Reagan attempted to sell off our national trust of parks, forests and other resources to big business, tried to cut the Clean Air Act, refused to prosecute polluters and slashed the budget of the Environmental Protection Agency.

Restoring and preserving the environment for this generation and those to come will require more than a change in administration. We need a shift in values away from those that create technology designed for mass destruction of people as well as of the earth. We need a fundamentally new approach based on the following:

International Cooperation: We live in an era of international environmental problems that make no distinction based on nation, ideology, race or class. The world's resources should be devoted to preserving and restoring the environment rather than to amusing even greater armies.

Clean up and prevent toxic pollution: We demand the prompt elimination of the unsafe toxic waste sites and the aggressive enforcement of the Toxic Waste Superfund program. Industry should be made responsible for future clean-up costs as an incentive to stop polluting. We need regulations and federal research assistance to find new manufacturing techniques, thus finding substitutes for the most toxic chemicals. We must develop and promote new farming methods to reduce the use of pesticides and the destruction of our precious groundwater.

Reduce air pollution: We need vigorous federal support for recycling as a substitute to the construction of new trash burning incinerators. To prevent acid rain and reduce rising carbon dioxide levels, we need to transform how we produce power starting with energy-conserving plants such as co-generation and shifting to alternative energy sources.

Turn to page 18

Can the trash

Dear Editor,

You may have noticed them. They are bigger than a bread box, green, and spread strategically around campus. Weekly, an insect-looking vehicle empties them. These have often been referred to as dumpsters. Rumor has it, these large containers are for trash. This, alas you may not be on campus-plastered to fences, hiding under bushes, fleeing across your path whenever the wind blows. New form of animal life? Product advertising? It's called trash.

The trash on this campus is humiliating. Who's cleaning it up? The same person who put it there, NOT ME!

When the snow melts, I for one like to see green grass, and spreading plants, not Stickers wrappers, trash bags and beer cans!

Let’s clean it up! "But it smells!" Put a clotheshpin on your nose. "But it feels horrible!" Put gloves on. (They are even washable!) Better yet, leave your gloves and clothesh-pin at home. Smell the things we are littering our campus with. Feel the filth. Be aware of the trash that fills your sight no matter where you look. It wasn’t so “green” when you ate it, drank it, or read it. Why is it so ugly now? Because it’s TRASH.

Show some pride in UWSP. Use the dumpsters.

Looking out for Spring’s Wildlife Additions

by Andrew Fendos

Outdoors Editor

Spring is the time of year that brings birth and renewal. For many people, the warm weather and longer days of spring allow for increased outdoor activities. With this increase of activity comes the chance of contact with spring’s young wildlife. You may not run into newborn deer or bear in your backyard, but you may very well run into some smaller forms of life or their young. If you find some young wild life, remember, they are not as helpless as they seem. They should not be picked up, inspected or taken home as pets. There are dangers in handling young or old wildlife, both for the animal and for the person involved.

When you come across young animals that are alone or seemingly abandoned, look around. The outdoors is home to wildlife and chances are very good that the parent is somewhere nearby watching.

Finding a baby animal that appears alone is no cause for alarm; young animals do not necessarily wander away from their parents. Nature and evolution have given young animals no spot or other type of camouflage at birth so they are able to go undetected while resting, waiting for a parent to return with food. Babies do not run or jump the day. Juvenile animals also need the opportunity to be weaned from their parents. Without this weaning the young will become dependent and probably die an early death.

It’s hard to remember when handling some little, adorable bundle of fur that wild animals are born for life in the wild. Their genes are wild, and they do not change overnight. The survival instincts of a wild animal are completely contrary to those of a domesticated pet.

Wild animals are not worthy pets; they cannot be raccoons are one of the most popular animals kept as pets, but they are a good example of how a young animal can quickly change from cute and cuddly to a dangerous pest. A raccoon may behave perfectly as if it gets what it wants, but if you try to grab a raccoon from a tree or make it do what it wants it may become aggressive on you. The U.S. Department of agriculture warns such events every spring and follow up on these warnings with reports of injuries and maltreatment caused by wild animals.

Many times people will pick up and take care of quiet little wild animals. While they are watching it, it will seem very calm and nice. Likely, the poor thing will purr in your hands or be the center of a box without causing any harm. Some people maintain that your actions as a tourist will provide animals substitutes for humans for their parents. This is very common in many species, especially those that are nocturnal. Once alone and in the darkness of night, nocturnal animals forget the new and strange environment of a house and act a little more normal. They do what wild animals do; they get wild in your house. Chances are very good that any wildlife taken home for a pet will not be in the same place in the morning that you put it at night. Chances are good that your house won’t be the same either.

A hidden danger with taking wild animals as pets is disease. Diseases can be carried and spread by any wild animal. A fatal disease, rabies, can be spread to humans through a simple scratch from an innocent bundle of fur, and raccoons are the common rabies carrier but raccoons, foxes and squirrels, as well as rabbits, may also transmit the disease.

Another problem that arises with the handling of wild animals is Associate Professor Paul Donaldson seldom found in pets, but they are always found in wild animals. Mites, ticks, heartworms, tapeworms and, fleas which are parasites for wildlife are a common health threat for domestic pets.

Improper imprinting prevents animals from being able to learn and grow with their true parents. Animals that are improperly imprinted cannot be successfully released into the wild, as they will not have learned enough about feeding and protecting themselves. They are doomed to a life of captivity; they die of stress, starvation, or they become a victim of predation.

The care and handling of captive pets as wild animals often ends in injury to them. Unintentional or at times intentional, being a wild animal requires knowledge and understanding.

The state of Wisconsin has proposed legislation that would allow state rabies testing. Public buildings, schools, local communities and camping areas require a permit to keep wild animals. The Department recently announced that $6.07 for $6.07 for $6.07 for cleaning these areas was also required. The state of Wisconsin has expressed support for the incubation of wild animals. The Wisconsin Department recently announced that 120,000 of these animals were taken from the wild for use in their own research.

The Coast Guard cutter Mobile Bay recently completed one month of ice breaking in the Euxina and Straits of Mackinac area. Two to three feet thick of ice was encountered in northern Green Bay. The cutter was assisting seven freighters.
CNR Aviary hosts Angolan Cordon Bleus twins

Mary Griesbach, who oversees the aviary at the University of Wisconsin-Stevens Point, is hopeful a pair or exotic African birds that hatched there recently will survive to adulthood.

"The birds are believed to have hatched about Feb. 27 and since then, students and others who enter the aviary are cautious not to disturb the nest.

"But we're sure they're alive because the nest wiggles," Griesbach reported.

By the time of the University's annual open house on Sunday, March 31, the young birds are expected to be out of their nests and within sight of visitors. The nest is located in the southeast corner of the aviary.

Birds in the aviary have been productive in laying eggs, but whenever the eggs are handled, it was determined they were sterile. Griesbach said diet is important in the reproductive process and there have been a lot of live grubs, eggs and meal worms in the bird feed that has been used lately. She attributes the "live" food to the success of the hatching.

"The stuff smells just awful, though," she added.

Griesbach said she had first thought of arranging with another aviary to trade the newcomers for a different pair of exotic birds. She's changed her mind because "I've decided the parents need the experience of raising them all the way. I don't want to upset anything now that we have something positive going." The aviary has about a dozen different kinds of birds, plus a pond inhabited by turtles and native Wisconsin game fish.

Wt. Dep. of Natural Resources

Wisconsin furbearer harvest value for the 1966-67 season jumped 44 percent over the previous season, putting $1.1 million into circulation in the state economy, Chuck Pils, Department of Natural Resources wildlife furbearer specialist said. "Muskrat continually comprise the largest number of individual species harvested in Wisconsin, this year making up 67 percent of the harvest total," Pils said. "Raccoon was second comprising 21 percent of the total, while topping all of the state's furbearers in dollar value, producing $2.2 million of the harvest.

An estimated 662,000 muskrats were harvested with an average price of $3.10 per pelt. Raccoon averaged $18 per pelt with some 360,000 harvested. Together, muskrat and raccoon accounted for 6.0 million, or 74 percent of the state's total fur harvest value. The total number of furbearers harvested was estimated at 981,500.

"Beaver ranks third as the most valuable furbearer in Wisconsin," Pils declared. "The estimated harvest this year of 64,750 beaver statewide is the highest take of this valuable furbearer ever reported in Wisconsin's history." Relatively high pelt prices and excellent trapping conditions were factors creating the high beaver harvest. Generally the increase in furs purchased and prices received are influenced by fluctuations in demand from the fashion market and the strength of the U.S. dollar.

"The harvest level for every species, except bobcat, was up from last year, which caused the substantial rise in total for harvest value," Pils added. "Average prices were up for all species except for skunk and weasel. Fisher and bobcat average pelt prices increased substantially, up 29 and 21 respectively to $186 and $85.

A fisher season has been provided trappers since 1985. This season ran from December 1 through 11, 1987, to insure prime- ness of the pelts. A total of 295 permits were issued within three specific fisher management units and 98 were allocated. Mild December weather conditions resulted in better trapping conditions to produce the increase over the 186 trapped in 1986.

Another record was set with 1,348 otters harvested during the past season. This is the highest since 1960 when records were started. The leading counties where otters were taken include Oneida, Sawyer and Price. Pelt prices averaged $37.

Pelt prices, individual fur condition and bargaining power affect the variability of prices paid to hunters and trappers for their pelts, Pils explained.

The bobcat harvest for the state totaled 183 with 49 percent taken with the aid of hunting dogs. Another 45 percent were trapped, and six percent were hunted without dogs. The average pelt price was $26.

The number of licensed trappers in Wisconsin decreased during the past trapping season. The general decline in fur prices over the last few years may have discouraged some trappers from trapping.

Other furbearers harvested, listed with the average price per pelt, include: mink, 30,000, $115; red fox, 30,000, $22, gray fox, 3456, $20; opossum 3,740, $1.36; the coyote, 2,500, $16. There were 273 skunk harvested with an average pelt price of $2.44 and 250 weasel harvested with an average price just under $1.
Environmental award winners and scholarship recipients

UWSP News Service

C.D. "Buz" Bessey, secretary of the Wisconsin Department of Natural Resources, received the "Environmentalist of the Year" Award. "He demonstrates what dedication, commitment and leadership can do," Trainer said.

Reganid, who began work for the former Wisconsin Conservation Department now DNR in 1952, became its secretary in 1960. Among the honors he has received are his election to the presidency of the International Association of Fish and Wildlife Agencies and The Wildlife Society.

The "Outstanding Alumnus Award" was given to John Olson, class of 1973, who now serves as area wildlife manager for the DNR in Mercer. His agency honored him in 1986 as the "Wildlife Manager of the Year." His most notable accomplishments have been with endangered and non-game species. For example, he was instrumental in developing a program for re-establishing eagles and osprey on Turtle Flambeau Flowage. He also designed and implemented a method for inventorizingloon productivity, a key role in the re-establishment of the trumpeter swan in Wisconsin and initiated a successful nuisance bear management program.

Bud and Janet Kerr, Trena­ hawk, and Robert Skiera, Mil­ waukee, were given plaques in recognition of making "Out­ standing Contributions to the College of Natural Resources." The Kerrs were managers of the property at Clam Lake where UWSP operated its summer natural resources camp for about 13 years, beginning in 1979. Since the creation of Treehaven, as an environmental field station, they have served as its managers besides having major roles in its development. Janet also serves as the baker for meals served at the camp. Skiera is Milwaukee's city forester and has provided assistance to the urban forestry program at UWSP since its inception in the early 1960s. He was instrumental in helping the school in getting its own chapter of the Wisconsin Arborists Association and being designated as a special interest group in the International Society for Arboriculture. He has served on the UWSP Forestry Advisory Committee, lectured for classes of local students and arranged field trips for them.

The "Outstanding Natural Resources Student" for 1988 is Michele Bormett, whose recognition was announced last month with the names of the other top students in each class and each academic discipline. Bormett, from Plain, is a senior majoring in wildlife who has earned numerous scholarships for her high academic achievement. She has also been active in wildlife projects, most recently working on a study of Eastern bluebird productivity and habitat preference. She plans to eventually earn a Ph.D. in ornithology.

Trainer announced that one of the largest scholarships ever received by a natural resources student has been recently approved for Laura Katzman, a freshman from Horicon. The high school valedictorian, who received an A in every college course she took last semester, has been pledged $14,000 for four years of college work by the Wisconsin Garden Club Foundation.

Among Portage County residents, the largest amount of scholarship money was awarded to Gregg Kessler, a graduate student who lives at 204 Flower Springs in Plover. He received $1500 from the Wisconsin Bearhunters Association and $500 from the Green Bay conservancy organization that sponsors the annual Jack Massopust Memorial Scholarship.

Other local winners: John Bugan, senior wildlife major of 3498 Highway Y in the west, received a scholarship from the Wisconsin Trappers Association and $800 from the Wisconsin Wildlife Federation's Gordon Babcock Scholarship Fund; Michelle Platoff, senior biology major of 136 Lakes Lane, Junction City, $300 Junction State Bank Scholarship; Jeffrey Kalinch, senior water resources major of 1568 Wisconsin St., Stevens Point, $150 Portage County Parks Scholarship; Roy Dyer, senior soils and water management double major of 2717 Ellis St., $150 Edward Sarkey Scholarship; Joseph Ma­ son, senior soils major of 2523 Water St., Stevens Point, $1000 Wisconsin Garden Club Federation.

Thomas Toepfer, formerly of Stevens Point and now of Athens, $300 Anonymous Schol­ arship; Kimberly Wensch, Marshfield, $400 Associated Citizens National Bank Scholarship; and $750 Co-Ida Scholarship; Elizabeth Jones, Madison, Philips $300 Central Wisconsin Sportsman's Alliance Scholarship; Walter Tekat, Wisconsin Wetlands Conservation League Scholarship and $400 Whitetails Unlimited Scholarship; Jeffrey Pirtel, Marshfield, Central Wisconsin Sportsman's Club Scholarship and $100 Allen Kreykowski Memori­ al Scholarship; Robert Keni­ czkowski, Neenah, and Stephen Kohnky, Oshkosh, First 300 Ella's Restaurant and Bar Scholarship; Teresa Hartle, Kenosha, $200 Joanne Eiser Memorial Scholarship; Jane Ter­ vo, Waupaca, $100 wildlife service Center Scholarship.

Jane Wiedenhoff, Phillips, $300 Marjorie E. Godfrey Memori­ al Scholarship; Gay Nelson, Madison, $150 Leo Guld Scholarship; Brian Brashaw, Two Rivers, $350 Ruth Anne Hensel Memorial Scholarship; Christopher Timko, Roselle, Ill., $250 Scott Irons Treethaven Scholarship; Douglas Aylen, St. Paul, Minn., Scott Leonard, Wausau, and Kris Revel, West Union, Ind., each $150 Izak Walton League Scholarship winners; Tim Cunningham, Beloit, $400 Janesville Conservation Club Scholarship; John Hammus, Rogers, $400 Kennings Conservation Club Scholarship; Chris Tomlinson, Marshfield, $500 Sheboygan County Conservation Association Scholarship.

Todd Quick, Eagle River, $500 Land O'Lakes Fish and Game Club Scholarship; Marcy Domen­ hagen, $200 Wisconsin Department of Natural Resources Scholarship; Tim Cunningham, Beloit, $150 Wisconsin Department of Natural Resources Scholarship.

UWSP to hold Lake protection and management convention

MADISON—

The 1988 Wisconsin Lakes Convention will be held on Fri­ day and Saturday, March 25 and 26, in Stevens Point at the Univer­ sity Center. The convention is sponsored by UW-Extension, UW-Stevens Point, Wisconsin Department of Natural Re­ sources, Wisconsin Association of Lake Districts and the Wis­ consin Federation of Lakes.

The convention will kick off Friday afternoon with the pre­ viewing of the new lake man­ agement slide show, "One Paddle - A Thousand Ripplons," and continue with reports from active community lakes asso­ ciations on weed harvesting and dam ownership. State Rep. James Holpeter will participate in a panel discussion on the use of motor fuel taxes for lake management. Saturday's program features a variety of workshops including:

- Controlling aquatic plants and algae
- Shoreland zoning
- State and local responsibility for lakes
- Working with local officials and civic leaders
- Local lake control
- Renewing lake organizations
- Wetland appreciation and management
- Liabilities
- Natural recycling

Vendors providing lake man­ agement equipment and ser­ vices will have literature and exhibits at the convention. For more information about attend­ ing the convention contact Conwell or Siard at 232-4791.

Hidden Contradictions

There are hidden contradictions in the minds of people who claim they "love nature" while deploying the "artificialities" with which "man has spoiled nature."

The obvious contradiction lies in their choice of words, which imply that man and his artifacts are not part of nature, separate from the beaver and their dams are. But the contradictions go deeper than this primadonna absurdity. Conservationists (created by beaver for beaver purposes), and his hatred for dams erected by man (the beaver's "natural" rival) reveals his hatred for his own race—i.e., his own self-hat­ edness.

In the case of "naturalists," such self-hatred is understand­ able. As they are such a sorry lot, but hatred is too strong an emo­ tion to feel toward them, personifying them as their self-hate.

As for me I am a human being, not a beaver, and H. Spengler is the only race I have or can have. Fortunately, I have found a way to make a fine arrangement and perfectly "natural". L. Long
Six, not seven, lucky number for Point
by Scott Huelskamp

It has been a long time since any other basketball team except UW-Stevens Point has won the WSC Conference title outright—six years, to be exact.

When Platteville won this year’s title a couple of weeks ago, they ended Stevens Point’s six-year stranglehold on the conference crown. UWSP has either won or shared the top spot since the conclusion of the 1981-82 season, when the string began. They shared the championship with Whitewater in 1982-83—twice with Eau Claire (1981-82, 1986-87).

When John Mack was leading UWSP to the promised land during the 1981-82 campaign, Ronald Reagan was in his first term as president, Indiana University was rolling through the NCAA basketball tournament (being led by sophomore guard Isiah Thomas) on their way to a national championship, and the College World Series was being held at the University of Wisconsin-Milwaukee.

Reagan is now in his last year of office, Thomas is a six-year NBA veteran on the Boston Pioneers, and I am graduating from college in seven weeks. Now that’s a long streak!

Although UWSP won the WSC in 1957, 1960 and 1969, the true foundation of the Pointer basketball program was laid during the last six seasons.

Along the way, the streak produced seven all-conference players (four of which received the honor for more than one season), the fourth player of the year, two first team All-Americans and two NBA draft choices.

Two-time All-American Terry Porter was selected in the first round of the ’86 draft by the Portland Trailblazers. He is currently averaging around 16 points and 11 assists (third in the league) as the team’s starting point guard. The Boston Celtics picked Tim Neageli in the final round during last season’s draft.

The all-conference members were Kevin Kulus (1983), John Mack (1981-82), Brad Soeder (1985-86) and Tim Neageli (1981, 1982, 1986), Craig Hawley (1987), Tim Neageli (1985, 1986, 1987) and Terry Porter (1985, 1986, 1987). Each player also made the All-District 14 squad. Mack, Neageli and Porter were players of the year both in the conference and district. Porter received the honor twice, along with an Olympic try-out invitation from 1984 Olympic team coach Bobby Knight after the season. He made it to the final 19 players before the Olympic team cuts.

One of the most famous stories concerning the career of Terry Porter still circulates on campus. After his departure three years ago, Porter was not even on head coach Dick Bennett’s recruiting list when he was in high school. Bennett and his wife attended a game between Porter’s school, South Milwaukee, and a rival team. Bennett was there to scout a different prospect and his wife asked him to take notice of Porter’s play.

And the rest, as they say, is history. Porter’s jersey is retired and hangs in Quandt Fieldhouse by the trophy case.

Over the period which spanned more than half a decade, the UWSP men’s basketball team racked up an amazing total of 146 wins and only 32 losses. The most victories for one season (37) came during the 1980-81 season. Three of those wins came in the NAI A National Tournament. Point lost the championship game that year in overtime, 68-67.

The Pointer Page 15

Baseball team has perfect spring break
Pompe pitches no-hitter

by Andrew Goethe

Staff writer

The UW-Stevens Point men’s baseball team opened their 1990 season in fine fashion, supporting an unblemished 4-0 record after playing three colleges in Kansas during Spring Break. The Pointers took all four games from the University of Arkansas-Monticello, while sweeping a pair of doubleheaders from Central Arkansas and Harding University.

Offensively, the Pointers hit at a .300 clip as a team. Leading the individual batting during the Southern trip was Paul Specht. Specht was 11-25 at the plate, for a .434 average and had 10 RBIs. Dan Danhous also had a solid bat, hitting .444 and scoring 10 runs. Other batting leaders for Point were Chad Kolen at .400, Mike Ruchel with .360 and Dave Lindauer with .330. The Pointers also stranded 80 men on base during the eight games.

"We had a balanced attack offensively, which is very important. Different players came through from game-to-game and our bench also played well," said UWSP coach Randy Handel.

The Point pitching staff showed much promise, as several solid outings were recorded from Tim Zajkowski, Scott Pompe, Scott Anderson and Joe Kinnem. Zajkowski threw a one-hitter in his first appearance as a Pointer and also pitched two complete games for Point.

One highlight of the road trip was Scott Pompe (Watertown, WI), the senior hurler recorded a no-hitter against U-Monticello, the first since 1980 for a Pointer. Pompe had a career-high 10 strikeouts, picked four runners off base and faced a minimum of 21 batters in the game.

"Our pitching was pretty consistent the entire trip. The defense was a bit erratic, but that will improve with more play," Handel added. "The catching was good. Langbehn and Dean Lamers were both very solid behind the plate and made some big contributions at bat."

Defensively, the Pointers will continue to work hard at improving play in the infield and outfield positions. "We have a great deal of work ahead to be a quality team, but I really believe these players want it and will work for it," said Handel.

"As a whole, I was pleased that we had a winning trip and got to look at a lot of players. Coaches Herbich and Lindauer really have done a nice job. It is great to work with such fine people," Handel noted.

The Pointers are now off for a week of practice and preparation for their next game, which is a doubleheader at home against UW-Milwaukee, Friday, April 13, at 1 p.m.

The Pointers are also present in the week in the USA Collegiate World Series games scored scheduled for April 9 against Concordia College and April 12 against UW-Eau Claire.

Kenney, Morris win national track titles

Sports Information Office

Aston Kenney (Dallas, TX) and senior Tom Morris (Dresser, WI) both took home national indoor titles at the NCAA II Indoor Track and Field Championships held in North肠ent (Wausau, WI) placed seventh in the triple jump with a leap of 13.34 meters.

UW-La Crosse won the meet with 34 points and was followed by St. Lawrence (NY), 32; North Central (IL), 25; Methodist Univ. (NC), 21 and Wisconsin-Platteville.

Aston Kenney

hampton, Massachusetts, March 11.12. Their efforts propelled UWSP to a fifth place finish.

Kenney ran to a 5.23 cloning in the 60-yard dash, while Morris tied the national record in the 3,000m in a time of 8:25.87. In winning his title, Morris defeated two runners who had bested him in the conference meet just a week earlier.

In addition, senior Scott Laur-

ent (Wausau, WI) placed seventh in the triple jump with a leap of 13.34 meters.

UW-La Crosse won the meet with 34 points and was followed by St. Lawrence (NY), 32; North Central (IL), 25; Methodist Univ. (NC), 21 and Wisconsin-Platteville.

Point out of hockey playoffs, swept by UWRF

by Scott Haeckelkamp

Sports Editor

After receiving a wild card bid to the JCAA Division III hockey playoffs, the UWSP hockey team's championship dreams were shattered by UW-River Falls. River Falls swept both games by winning 6-5 and 9-4.

In Friday's first game, a wild third period decided the game as UW-River Falls' Rachel Kae-bel tipped in a shot from the point by Arren Scott at 13:20 for the game winner.

The first period ended in a 1-1 tie. River Falls' Chad Hansen scored at 3:00, and Pointer Craig Porazinski tied the game at 6:49.

The second period also ended in a tie, 5-5. Ralph Barabans started the scoring for Point with a goal at 1:07. Falcon Joe Lago tied the game at 3:00 with a power play goal at 1:49. Point's Shawn Wheeler gave his team a lead again at 6:08, but Falcon Tom Griffith tied it again at 10:38.

The Pointers took a 5-3 lead with the first two goals of the third period. Pat McPartlin got both of the goals, the first at 1:18 and the other at 3:09. But the Falcons scored the final three goals of the game. Tom Niles scored a power play at 12:12, and Lago got his second of the game at 11:58. Then Kae-bel got the winner.

Pointer Pat Watson had 48 saves and Falcon goalie Chris Hanson, 35.

Saturday, the contest was in doubt until about midway through the final period.

Barabans scored the first goal of the game, at 9:24, but Falcon Tom Niles scored at 10:21 to tie the game. At 11:13, Rick Flemming scored, but again the Falcons tied it when Griffith scored at 13:15. All four goals came while the teams were in the power play.

The Falcons took a two-goal lead after one period when Gor-dy Hahn scored at 17:55, and Mark Verigin at 19:06. The Falcons retook a two-goal lead with a 2-0-3 record overall and took the third spot in the Northern Collegiate Hockey Association. UWSP was also ranked sixth in the February 29 Division III coaches poll.

The Falcons tied the game at 4-4 in the second period. Joe Butcher scored at 1:19 and Rick Flemming scored, but Butcher's goal, a power play effort, and Flemming's came while his team was shorthanded.

The Falcons took a two-goal lead with a goal by Jeff Schaff at 8:17 and by Scott at 15:37. This time Schaff's goal was a shorthander, and Scott's a power play.

Falcon goalie Hanson had 22 saves, while Point's Watson had 19 in two periods and John Bas-sil had 10 in the third. Point finished with a 26-9-3 record overall and took the third spot in the Northern Collegiate Hockey Association. UWSP was also ranked sixth in the February 29 Division III coaches poll.

Track from page 15

be just blew everybody away.

"Both Tom and Aatron are now very motivated for the out-door season and both should get better outdoors."

"It'll be a joy to watch Aatron run the 100 and 200 outdoors, where he can really use his speed." Laurent just missed All-American status with his seventh place finish. "Witt was happy with his performance nonetheless."

"Scott did a heck of a job," said Witt. "He was disappointed that he didn't make All-American, but he did get his second-best jump ever."

For Hol, there was no doubt that her fourth place showing was the best run of her career. She surpassed her personal-best time by an amazing 13 seconds. "She ran extremely well," said Lady Pointer track coach Len Hill. "She ran her best race ever as a Lady Pointer. It was an extremely strong field where most of the other participants had been All-Americans, and she rose to the occasion."

seven titles from page 15

Perseverance and determination played a major role in the year-in, year-out success of the teams coached by Bennett (who coached the team to the first four titles before leading for the big time at Division I UW-Green Bay) and Jay Eck (who won the next two in only two years at the helm). Even though Ben nett and Eck were known to always produce well disciplined, tough teams, they were not picked to win the WSUC every year. But somewhere they seemed to be able to pull of the upset when they needed it most.

During the 1984-86 season they traveled to Eau Claire for what was billed the conference show-down. Even today Eau Claire rarely loses at home and then they were heavily favored. But when the game started the final two minutes of the game, Point was down by only one with possession of the ball.

The ball was inbounded to Tim Naegeli who pulled up from the corner of the free throw line, pulled the trigger on his silky smooth jumper, and watched the ball slide through the hoop at the buzzer.

Point escaped with a 40-39 victory and another WSUC championship trophy.

If not for those six years, the Pointer record book would be left with some serious gaps. Naegeli finished as the school's all-time leading scorer, followed by Porter (Mack is fourth). Nae geli and Porter are also number one and two in the field goals made in one season department and two and three (in the oppos­site order) in career field goal percentage.

Hawley, Kevin Kulas and Porter occupy the top three spots for career assists. Hawley also owns the records for most three-point goals in one game and in a season.

A pretty successful six years, wouldn't you say?

Not only did this year's team not finish number one, they dropped all the way down to the number six spot in the WSUC with a 6-10 mark. Incidentally, it is the first time since 1976 that Point has finished below 30th in the WSUC. Interestingly, that was Bennett's first year as coach, so there may be hope yet.

TENNIS

FREE TENNIS LESSONS AT SENTRYWORLD FOR FACULTY AND STUDENTS WITH VALID UWSP I.D.

Beginner and novice tennis lessons will be offered free of charge to persons who have not participated in leagues or lessons at SentryWorld within the last six months. The free group lessons will meet once a week for four weeks. Tennis balls, racquets*, and the court will be provided free of charge (*bring your own racquet if possible). All classes will be conducted by SentryWorld pros Mark Medow and Dan Stabilein. The minimum age is seven years old. Lesson partici­pants will be placed in classes according to age, skill, and convenience of hour.

We suggest you ask friends and relatives if they would be interested in this "no strings attached" offer.

Lady Pointers finish strong

Sports Information Office

The UW-Stevens Point softball team closed out its 18-game spring schedule with four consecutive wins and came home on a very confident note. "We really turned things around the last four games," said Lady Pointer coach Nancy Page. "We didn't get much hitting in our first six games, but we hit the ball well over the last four games."

Officially, UWSP played seven games, going 4-3. (A 1-2 record against junior colleges isn't reflected in the official win-loss column.)

Tammy Kuster (So., Rhinelander, WI) was the team's offensive catalyst, going 8-for-18, while scoring five runs and driving in five more. She had 13 total bases (4 singles, 3 doubles, 1 triple) for an .813 slugging percentage, while stealing three bases and reaching base 13 times in 22 plate appearances.

Kuster's defense was also a key as she gunned out four base runners from her position in center field.

Rocky Dworak (So., Denmark, WI) was a pleasant surprise as she hit .275 with three doubles and five RBI. As the team's number nine hitter, she batted just 226 in 24 games last season, while driving in six runs.

Heidi Singer (So., Stevens Point, WI (SPASH)), the Lady Pointers' only All-WIAC selection last year, hit .381 and drove in three runs. She belted two home runs and slashed .422. Last year she hit .381 with 12 RBI and seven doubles.

Steph Sobieck (So., Denmark, WI) and Ellen Paul (Fr., Stevens Point (SPASH)) handled the pitching duties, with Sobieck going 5-3 and Paul 1-2.

Sobieck, who set six single-season school records as a freshman in 1987, posted a 3.82 earned run average in 22 innings. She allowed 22 hits and seven walks while fanning seven.

Paul allowed 39 hits in 18.1 innings, while posting a 3.75 ERA with four strikeouts. She went the distance in each game she pitched, as did Sobieck.

Both pitchers (each named first team all-state their senior year in high school) give Page optimism for the upcoming schedule.

"They both pitched well," she said. "We played some good teams down there, including Division I Princeton, as well as some good NAIA and Division III schools last year." The Lady Pointers return to action Tuesday, April 5, at UW-Oshkosh and will take on St. Norbert, Friday, April 8, in their home opener.

Two UWSP icer on first team

Two members of the UWSP hockey team were among the 12 players picked by coaches in the 1987-88 All-Northern Collegiate Hockey Association first team.

Tim Coghlin was one of four defensemen named to the squad, while Pat McPartlin joined five other forward selections on the elite group.

Coghlin, a 175-pound junior from Chicago, Illinois, joins the first team for the second season in as many seasons. He had four goals and 19 assists this season for the Pointers, who were eliminated in the playoffs by River Falls.

McPartlin, a native of Pemberton, British Columbia, finished sixth in league scoring with 17 goals, 22 assists and 39 points. The other three defensemen included Dan Hern of maskate State, Joe Lague of UW-River Falls and Greg Robertson of UW-Eau Claire. Hern, who received honorable mention last year, had six goals and nine assists this year. Lague scored nine goals and 23 assists this year and led all defensemen in the league in scoring with 32 points. Robertson, an honorable mention pick last season, had one goal and 22 assists this year.

The five other forwards were dominated by Bemidji State. The Beavers' three all forwards are Ian Rasch, Dan Richard and Tim Tyler. Rounding out the forwards are Aron Scott of conference champion River Falls and Duncan Rybchuk of UW-Superior.

Rasch was second in league scoring with nine goals and 25 assists, for 44 points. Tyler, who finished third in scoring this year, had 34 goals and 26 assists.

year, had 33 goals and 19 assists for 42 points, followed by Richards in fourth. He led
the NCHA in goals with 36, while adding 15 assists for 41 points. Scott won the league scoring ti-
tle for the second straight year with 16 goals and 21 assists for 47 points. The only freshman
named to the team was Ryan
chuk, who was eighth in scoring with 18 goals and 15 assists for 33 points.
The two goalies were Chris
Hanson of conference winner
UW-River Falls and Steve
O'Shea of Benndji State. In
NCIIA play Hanson had a 1.31
record and 3.12 goals against
average. O'Shea had an 11-5-3
record and 3.23 goals against
average. Last year Hanson was
named to the first team and
O'Shea received honorable men-
tion.

Pointers who received honor-
able mention were goalies Pat
Watson and forwards Ralph
Baratona and Rick Fleming.

The state losing 5,000-plus
jobs in Kenosha and another
1,000 jobs in Wisconsin Rapids is certainly bad news for all of us,
and the amount of attention
given to the problem tells point
out. But how many people
and officials noticed that we
have lost more than 6,000 farms
in the last three years?
