Burress defends secular humanism
by Paul Jankowski

English Professor Lee Burress delivered one of two keynote presentations Friday night to commence the eleventh annual conference of the Wisconsin Intellectual Freedom Coalition. The conference took place in the Stevens Point Holiday Inn last Friday and Saturday.

Burress discussed secular humanism in the public schools. Recently, many groups, especially radical conservative ones, have advocated that books and materials be censored on the grounds that they endorse this philosophy.

Burress spoke out strongly against such groups. He claimed that they have the most to lose if their censorship efforts fail, and the greatest threat to themselves is an educated populace that reads widely and thinks critically. Also, fundamentalist groups exhibit a lack of historical knowledge we ought to expect.

What exactly is secular humanism? Burress says that this is an educational system developed by Renaissance humanists who strove for the best possible education. This system became the liberal art curriculum that has governed the Western world since then.

Five principles are stressed by secular humanism. Freedom, naturalism, history, science, and religion.

Religion stresses a person's beliefs as a basis for correspondence to a higher being. It also teaches about the fundamental unity of all religious faiths.

Science and history are also emphasized. Renaissance humanists studied both areas. What really happened is a question that could apply to both human history and physical phenomena.

Naturalism is also included. This asserts that man is a part of the natural world. Above all though, freedom stands. Free thinking individuals are paramount to secular humanism.

Roman Catholic Renaissance priests, one of whom was St. Thomas Aquinas, developed these ideals into an educational system espoused by Renaissance humanists.

Secular humanism though is often attacked because it is viewed as worldly or atheistic. Burress says that this is false. To be in the world is not to be an atheist. Right wing groups falsely associate those who advocate secular humanism with atheists.

Humanism itself is deeply rooted in Judeo-Christian beliefs. Burress says that it asserts the high value on and equal value of, every human being. Traced as far back as the eighth psalm, the belief in the high value of human beings is ancient.

Burress took issue with prayer in public schools. He noted that Wisconsin in 1883 outlawed prayer from the public school system. Why? Catholics didn't want Luthers leading their children in prayer and...
Robertson rocks
Pat Robertson is making a strong showing in the Republi- can presidential candidate races. The former television evangelist for the Christian Broadcasting Network has some interesting presidential views.

Inter Greek Council
IGC was officially sanctioned by the UWSP Student Govern- ment Association last Thursday evening as forty plus "Greeks" looked on. The new organization will bring together various alrea- dy-existing greek organizations on campus.

G'day mate
Notes from abroad comes all the way from Australia this tors. According to Stevens Point College Republican President Mike Roth, Stevens Point will see two prominent Republicans this Friday and Saturday.

Everybody was Kung-fu fighting
Our organization spotlight shines on the judo club this week. Self defense, physical fitness, and fun are all a part of the judo club's philosophy.

See the world
International Programs offer semester abroad all over the world. We look at the trips scheduled for fall, including a brand new program in the South Pacific.

Runners' weekend
Both the men's and women's track teams made strong showings at last weekend's meets in Oshkosh.

Grappling glory
Ryan Burns' hot streak continued and Bob Calvin overcame a 25 point deficit at both wrestlers earned births in the National Wrestling Tournament.

In short:

Campus Notes

HERE'S A TWIST: A West Point cadet with a 2.6 GPA says he's been kicked out of the academy because he refused, as an uppertclassman, to haze freshmen. At the academy, upperclassmen are supposed to enforce the "Fourth Class Sys- tem," where plebes are forced to do things like walk at a quick pace around the place and eat at a position of attention. He re- fused to support the practice, and upon returning from winter break, officials told him he was dismissed.

IT'S SAFE TO GO BACK INTO THE WATER—but hot tub water, that is—at Ricks College. School officials decided to delay until next fall the adop- tion of a rule restricting men and women from sharing hot tubs because of complaints by the only hot-tub owner in town—who also runs a university-ap- proved residence hall. The rule states that hot tubs may not be served men and women at the same time and that, if a university-approved residence hall says the tubs couldn't go to class. Also, the-3575 set who wouldn't around the last time there was a tubus epidemic, and thus did not acquire natural immuni- ty) were banned from basket- ball games.

CAMPAIGNING IN HIS NA- TIVE SOUTH, Reverend Jesse Jackson told students at the U. of Alabama that he would help create a "New South" as pres- ident. The longtime Chicago res- ident won an enthusiastic recep-

Weekend Forecast

Thursday, March 2: Partly cloudy and cool, with a high of 32 degrees. Winds north- east at 7-12 miles per hour.

Friday, March 3: Mostly sunny, with a high of 36 degrees.

Saturday, March 4: Partly cloudy and pleasant, with a high of 43 degrees.
Women leaders share insights  

UWSP News Service  
The first of what is expected to be an annual Women in Leadership Conference will be held Saturday, March 5, at UWSP.

Shirley Faughn, co-founder and executive consultant for the Asian Group, a management training firm in Champaign, Ill., will be the keynote speaker. She repeatedly tells audiences that "the most difficult challenge facing the woman leader today is not the question of "can she do the job," but "will she be perceived as being able to do the job."

Faughn, who is in the process of completing work on a Ph.D. in higher education administration at the University of Illinois, conducts programs on listening, assertiveness, time management, supervision and leadership.

Robertson running strong  

by Paul Jankowski  

News Editor  
In spite of competition, Pat Robertson is no joke. The former television evangelist who hosted the 700 Club is now a significant factor in the race for the Republican Presidential nomination for this year. Given almost no chance of success early on, he decisively won the first GOP caucus in Hawaii, came in second in Iowa, and from then on was a significant force in Republican straw polls, caucuses, and primaries. Just last Monday he finished second in the Maine caucus behind Vice-President George Bush.

Unlike Bush, Dale or Kemp, Robertson is running as an outsider in the Republican party, picking up the remnants of the Moral Majority where Reagan left him, and also registering thousands of new Republican, Robertson, voters.

Robertson claims that he is the only candidate having extensive experiences in education. He cites having founded and served as chancellor of a fully accredited university, Christian Broadcasting Network University. Similar to Senator Robert Dole, he also favors a voucher system for education, and competition in education as well. As a result, the schools delivering quality education would flourish, yet those that don't would fold.

Colleges as well should be subject to the disciplines of the marketplace. His campaign seeks research that confirms an indirect relationship between growth in student aid and higher college costs, but fails to cite which university or what study concluded this. Rather pricing policies, lower overhead, and more productive facilities combined with larger private sector involvement round out his college curriculum.

Robertson is adamant about reducing the federal budget deficit. He says The American people want government services, but they want a government that is lean and efficient and free from the wasted excesses of the past. The current federal deficit is a reflection of the excessive world debt, which his campaign says is $20 trillion, a trillion of that total is in the U.S. alone.

He offers a host of solutions to tackle the deficit. They include a balanced budget amendment, a presidentially line-item veto, a biennial rather than annual budget, and implementation of the Heritage Foundation, Grace and Packard Commission budget recommendations. These include cutting out obsolete weapons systems, dismantling 3000 obsolete military bases, privatizing the Postal Service, selling Amtrak, eliminating Small Business Administration lending, spending on governmental consultants, and permitting low cost loans and credit to communist

Remodeling delayed  

Paul Jankowski  

News Editor  
It won't be until 1990 or 1991 that the Foreign Language Lab will be remodeled according to Dr. Mark Seller, Chairman of the Foreign Language Department and William Johnson, Assistant to the Dean of the College of Letters and Science.

Under the Lab Modernization Program, several labs are scheduled for improvement. Unfortunately, for the Foreign Language Lab, it's not too high on the priority list. Seller says that after the Biology, Chemistry, and Physics labs are completed, then it'll be time for the Foreign Language.

Costs of the modernization are estimated to be between $25,000 and $60,000. According to Seller, almost everything would be replaced inside the lab. Furniture, master control and tapes are among the new things slated.

Mike Mikelson, Student Government Association Academic Affairs Director, says that the modernization wasn't completed earlier because the lab's budget was stifled due to campus cost-cutting.

The Greeks are back. InterGreek Council is now a reality.  

by Paul Lehman  

Staff writer  
Last Thursday the UWSP Student Government Association recognized the InterGreek Council (IGC), allowing it to use university facilities and resources. Because fraternities and sororities discriminate against opposite sexes, IGC will receive no funding from SGA. IGC has been temporarily recognized since mid-October, giving it time to write its constitution.

According to John Lampert, president of IGC, the InterGreek Council will be a subsidiary of the SGA SUBCOMMITTEE and will make only recommendations. SOURCE will make all final decisions.

Watling, Heil display set for lighting improvement

Two senior art students at the University of Wisconsin-Stevens Point will exhibit their work at the Lincoln Center during March and at the Ruth Gilfry Center during April.

Nancy Watling of Rothschild will show 13 abstract watercolors and Joyce J. Heil of Fond du Lac will show about 10 abstract handmade paper pieces and watercolors. The displays are open to the public without charge between 7:30 a.m. and 4:30 p.m. Monday through Friday.

This is Watling's exhibition to satisfy the requirements for a B.F.A. degree.

The daughter of Russell and Ruth Watling, 207 Urban, Rothschild, she is a 1983 graduate of D.C. Everest High School. A senior art major with minors in art history and psychology, she plans to study psychology in graduate school following her graduation next spring.

A member of Phi Kappa honor society, Watling was a recipient of the Hanford Memorial Exhibit Grant for her senior thesis project in art history.

Her exhibition will be entitled "Food Thought" and "Letters." All pieces will be available for purchase.

Watling's exhibition opens with a reception on March 3, 10 a.m., and will continue until March 23.

Lighting Improved

Blair Cleary

Staff writer

Action has been taken on the lighting problem brought up earlier in the semester by Lynn Rosen's security walk. Rosen now brought to the attention of the university several places in need of better night lighting.

These locations included sites on campus and off.

Andy Hauck, an L.S. and S. senator, met with several key people last month to work on solving the lighting issue. These people included Marjorie Stiebeck, director of physical plant; student safety; Ron Bergstrom and Bob Nicholson, the student development director.

Hauke said that much was accomplished on the lighting problem in the hour-long meeting.

Seven places were mentioned for lighting improvement.

A Baldwin Hall light was repaired 5 hours after the meeting.

Lights on the south side of the Indiana University Building were re-directed to light the entire area.

Several new lights are on order for the Fine Arts Building and should be in place by next semester.

The delay the leaves came in the spring they will be trimmed

Johnson, Tufts moving up

UWSP News Service

Two faculty members at the University of Wisconsin-Stevens Point have been named to administrative positions after serving in those jobs recently on temporary appointment.

Joseph Johnson of the chemistry department was recommended by the research and faculty committee and named by J. Paul Piel, dean of the college of Letters and Science to be associate dean of that college, beginning in January.

Johnson, who is chair of the faculty Senate, will have a half-time teaching assignment and half-time administrative duties. He holds a doctorate from the University of North Carolina and Chapel Hill and has been at UWSP since 1976.

La Rene Tafts, who has served the university since 1967, has been recommended by the faculty in the School of Communicative Disorders to be head of that unit and associate dean of the College of Professional Studies. Holder of a doctorate and a master's in education, she was appointed to her position by Joan North, dean of the College of Professional Studies.

countries. A new accounting sys-
tem is necessary.

Welfare is also attacked. Wil-
fare in America is on the cusp of a fail-
ure, he says. Citing his Opera-
tion Blessing, a private sector relief program he began in 1972, he claims that it assisted 25 million people without any gov-
ernment assistance whatsoever. His campaign staff say ninety-
and one half percent of all contribu-
tions reach the poor.

In foreign affairs he says that the United States has a special responsibility to defend freedom and peace wherever it is threatened, and to work for the long and

term of the free world. How-

ever, aside from the doctrine of containment that followed World War II, and the unrealis-
tic truth policy of deterrence which succeeded it, a coherent strategy for U.S. foreign policy has yet to be formulated. One of the first priorities of his admin-
istration would be to formulate a foreign and defense policy comprehensive to national strategy.

Still, the Soviet Union is our greatest danger. Citing Soviet non-
compliance with SALT I and II, he opposes any arms central agreements, including INF, until this is accounted for.

Welfare would be replaced by workfare—payment by state and local authorities for produc-
tive work. He also wants legis-
lation to force fathers regardless

of their marital status to pay for the cost of raising their own children.

Morgan donates 200 books to L.R.C.

**UWSP News Service**

The library of the University of Wisconsin-Stevens Point has been given books on Latin America, Spain and Poland as memorials to a longtime faculty member and to a former participant in public programs at the school.

Mrs. Mary Morgan and her husband, Michael, who died in November after teaching Spanish in the foreign language department about 25 years. The books are primarily about Spanish and Latin American literature and some focusing on the medieval period. They have been placed in the general collection of the library and some have been sent to the federal correctional institution in Oxford where Morgan taught courses in a special program UWSP provides for prisoners there.

During his early involvement with the prison, the professor translated its rules from the English to Spanish for use by Hispanic inmates.

The other gift, provided by Margaret Bohariewicz, is a collection of books in the Polish language. This memorial to Mrs. Bohariewicz’s late husband, Jan, includes about 75 books of literature, many of which are by the leading authors in the country during the 19th century.

Bloodmobile comes to campus

The Red Cross Bloodmobile will be on campus March 8, 9, and 10 in the Wright Lounge of the University Center, from 9 a.m. to 3 p.m. Make appointments in the Concours Center, Allen, and Debott Centers on March 2, 3, 4, and 7.

Again this year, University Center Building Managers will donate a free pizza party at Jeremiah’s to the residence hall wing that donates the most blood.

If you can’t donate blood, or are afraid to donate, you can still help by volunteering to work for the Bloodmobile.

Workers are needed to set up, escort donors, cater, type, sign up and do a variety of other jobs. The more help we get the more successful the Bloodmobile will be. Dates to sign up for volunteer service are March 3, 4, and 7, in the U. C. Concourse.

The Bloodmobile, which visits the UWSP campus once every semester, is being coordinated this year by Randy Smith, a Building Manager at the University Center. Each Bloodmobile visit is vitally important since the Red Cross depends heavily on university students and faculty for their blood donations.

Jan Bohariewicz attended many public programs at UWSP, most of which dealt with Polish culture, history and politics. He often became engaged in lively debates with the speaker during question and answer sessions.

He was living in the Plainfield area at the time of his death several years ago.

Local artists display work

Two local artists are showing their work in Milwaukee, Beloit and Green Bay this winter.

Gary Hagen, a faculty member at UWSP and Lois Freeburg-Hagen, a free-lance artist, have their work included in shows throughout the state. Hagen’s “Buffin 13.2,” a rice paper and acrylic piece with wooden frame, is part of the Dynamic Dimensions: Creations in the New Age exhibition at the Milwaukee Art Museum’s Guda Gallery at Wisconsin Art Center.

Freeburg-Hagen’s “Treway,” a ceramic stone ware sculpture, was selected for the 31st Annual Beloit and Vicinity Exhibitions which opened Feb. 21 and will continue until April 3.

**Musical revue performs**

**UWSP News Service**

A new musical revue group has been formed at the UWSP to provide entertainment for community organizations.

Onstage is the name of the 10-member song and dance ensemble which performs a half-hour program entitled “Gotta Sing, Gotta Dance.” According to its founder and director, Susan Rush of the theatre arts faculty, the show is about the joys and struggles of young actors auditioning for Broadway, the musical theatre capital of the world.

The group is available for performances in schools, hospitals and nursing homes and for other community organizations.

Conceived and directed by Rush, who was a professional actress for several years, the program is choreographed by Rosalie Murf of Norway, Mich., and accompanied by pianist Michael Cuetara of Sheboygan.

The 10 Onstage performers are Guy Jenkins of Chippewa Falls; Kelli Cranmer of Wisconsin Rapids; Lori Thompson of Neenah; Paul Nygren of Franklin; Todd Flurter of Milwaukee; Scott Schaff of Sheboygan; Dennis Schultz of Baraboo; Lisa Soppa of Arena; Susan Specker of Greendale; and Cristina Van Valkenburg of Waupaca.

Further information and show arrangements are available through Rush, the Fine Arts Department, UWSP, (715) 346-3527.
Wonders of nature explored

Children and youth will explore the wonders of nature this summer when they participate in one of the camps at the University of Wisconsin-Stevens Point's Central Wisconsin Environmental Station.

Environmental organizations and sports, conservation and service clubs throughout Wisconsin lend their support to the camps and workshops by providing scholarships to participants who wish to learn more about their natural environment or who are interested in pursuing careers in natural resources.

Natural Resources Careers Workshops for high school students have been held for more than a decade and are in their sixth year of co-sponsorship by UWRF and the Wisconsin Department of Natural Resources. The three one-week workshops for students in grades 10 through 12, as well as high school graduates, focus on career possibilities and give students a wide range of field experience in areas of natural resources and environmental protection. Participants meet and talk with professionals in forestry, fish and wildlife management, park services, environmental standards and law enforcement.

Workshops are scheduled for June 5-9, June 26-July 1, and August 14-19. The cost is $160.

Treaty course offered

A course on treaties negotiated between 1817 and 1866 between the federal government and the Indian tribes in the state will be the subject of a new history course to be offered on seven Saturdays, beginning March 30, at the University of Wisconsin-Stevens Point.

Professor David Wroe said he decided to develop the course because "there is a lot of concern about treaties, and many of them are rooted in imperfect knowledge of the way they are to function."

The offering is believed to be the first of its kind in Wisconsin.

In addition to lectures by Wroe, there will be several guest speakers including a representative of the Wisconsin Attorney General's office who will address public law questions regarding state relationship to Indian laws.

Other topics of class meetings will be the basis for the treaties, their history, method of negotiation, problems in implementation, tribal government structures, history of tribes, sovereignty questions, federal and state laws and current problems with the agreements.

The professor explained that it would be inappropriate to have speakers who oppose the treaties because the course is foremost established to provide historical and legal facts—a definition of the object.

In addition, two specially targeted Natural Resources Careers Workshops will be held. From July 19-26, a workshop for minority high school students will take place. This camp is co-sponsored by the Educational Opportunities Program at UWSP. From August 25-27, senior girls from a five-state area will be encamped. This session is co-sponsored by Woodland Girl Scout Council.

A Boundary Waters canoe trip is scheduled from July 9-20 for 14 and 15-year-olds. Along the canoe route participants will discover the natural and cultural history of the area. The fee is $375.

Nature Adventure Camp is a residential camp for 9 to 13-year-old boys and girls who have a special appreciation for nature and its bounty. Activities will include swimming, boating, canoeing, arts and crafts, and investigations of beavers, fish, deer, hawks, owls and insects in their natural habitats.

The regular Nature Adventure Camp sessions for 9 to 11-year-olds are scheduled for June 15-17 and June 19-24. Sessions for 11 to 15-year-olds will be July 31-August 5, and August 7-12. The fee is $385.

Timbertop Nature Adventure Camp is for boys and girls between ages 9 and 13 who are in learning disabilities programs. In addition to the regular Nature Adventure Camp activities, the participants will receive reading instruction and practice. Timbertop runs from July 10-22. The fee is $390.

Organizations interested in information about sponsorship, or students requesting application materials, should write to: Summer Camps, Central Wisconsin Environmental Station, 7200 County MM, Amherst Junction, WI 54407. Telephone 715-824-2428.

Judo club flipping with enthusiasm

by Jodi Ott
Staff Writer

Are you afraid to walk across campus by yourself at night? Would you like to become more physically fit? Do you enjoy flipping people over your head? If you answered yes to any or all of the above questions, then you should think about joining the UWSP Judo Club.

Judo, which in Japanese means the gentle way, has been practiced in Japan for approximately 900-1000 years. Dr. Jiro Kano is credited with originating this art in the Olympics since 1964. Women's Judo and Karate will be exhibition events in the upcoming Olympics.

Karate is like boxing, whereas judo is like wrestling, said Kelly Kossow, a UWSP Judo Club member.

The UWSP Judo Club welcomes all students of the university and any member of the community. The club now consists of a variety of ages and sizes. This is an advantage because it is good to practice with more weight and different body types to prepare for competition.

Although practical competition maneuvers are taught, with some modifications these techniques can be used for self-defense. Techniques taught are: arm bars (the locking of any joint), choke holds, throws and hold downs. You also learn sacrificing techniques where a competitor puts himself in an undefendable position to gain competition points from a maneuver. The sport is still relatively safe because you are taught to fall properly and absorb the impact.

Katas are also performed in competition. A kata is two people working together in a set routine. Each one knows what the other will do next. There is Nage-no-kata; the kata of throwing techniques. Kata-me-no-kata is the kata of held-down techniques and Ju-no-kata is the gentle kata. To be a black belt you must know one kata.

The ranking system in judo belts is: white, yellow, blue, green, brown, and black belt. This is half written and half practical. The written part involves translating English phrases into Japanese, and a few general questions. Six men have attained the tenth degree black belt and only one man has ever reached the thirteenth degree black belt.

The UWSP Judo Club, which is affiliated with the United States Judo Association, also competes in tournaments. The club sponsored a tournament on January 3 in the Berg Gymnasium Judo club from Oshkosh, Milwaukee, West Bend, and Edgerton participated. On February 5, Madison hosted an eight-state competition.

International programs announce South Pacific trip

The experience of a lifetime awaits students

by Jim Małezewski
Features Editor

As you walk into the International Programs office there is a large world map hanging on the wall; colored thumbtacks mark locations of various semester's abroad. A sign below says, "Hey, there is more to the world than Stevens Point...and we want to help you see it." And they will, if you let them.

Destinations are as varied as individual interests: Britain, Poland, Greece, and a newly announced South Pacific trip take place in the fall. In the spring there is Britain again, Greece, Korea, Australia, and Taiwan.

Although the trips offer extensive travel, classes still come into play. Students are required to take 15-17 credits, the majority of which are humanities. Director of International Programs, Dr. Helen Cornell, says that the combination of actual experience and coursework adds a whole new dimension to learning. "Participants not only gain extraordinary knowledge about countries, art and history, but they also learn a lot about themselves. They really find themselves," Cornell said.

Cornell believes that taking a semester abroad can be beneficial to future career plans, especially for teachers and those going into international business. "More and more our programs will count, if we are doing what we should," Cornell said. "We are preparing students for an interdependent world. The day of the self-sufficient American should be over." Cornell said that students who want to go abroad this coming fall should get moving, especially those interested in the South Pacific trip. Just announced this week, the trip "down under" already has ten applicants and will be limited to 25. Most of these are overflow from the spring Australia trip, which currently has 4S members in Australia and is already filled up for next spring.

Total plans for the South Pacific include a week in Rarotonga or Fiji, nine weeks in Sydney, Australia at Dunmore Lang College, and five weeks in New Zealand. The cost of the program isn't definite, but is expected to compare with current Australia trip, which is $925.

Both trips "down under" are the most expensive of all the programs, due to the distance and high air fares. Acting costly trips are available, and in fact, keeping costs reasonable for all students is often a factor in designing the programs. Itineraries and destinations, along with exact costs, although tentatively set, are flexible. "That must have been its original until a month or two before the trip. This enables Cornell to get the budget rates possible, and thus, keep the programs as inexpensive as possible.

Poland is the least expensive of all trips. Unfortunately, the cost for the fall in Poland is not expected to rise much above this past year's cost, $350. This is true in spite of rising tuition rates, higher airfares, and the poor state of the dollar.

Turn to page 14
by Jeannie Finley
Special to the Pointer

G'day Mates! Hello from Down Under!

The photo that accompanies this article is us, the 1988 Australia group. I'll admit that it's a little scary, but you'd look like this too after a 19 hour flight. After touching down in Auckland, New Zealand, we were whisked away to a bus for a tour of the city, which ended up on an extinct volcano, Mount Eden. Here we viewed the city and the infamous group photo was taken, in the rain. It was a glorious beginning but, nevertheless, the adventure had begun.

In every adventure there are a few rough spots, and our group has been no exception: Pat's lost luggage that arrived six days late; Molly and Julie's stolen beach bags, including their Visa's; countless spiders and cockroaches that extend the length of my palm; numerous hours on the beach sacrificed so that we could go to classes. But "no worries" (no major problems) have come up, and everything has somehow worked out fine.

Since we have no cars and the trip into Sydney is 8 miles (45 minutes) by bus, trains and buses have become a way of life. It's not as bad as you may think: You don't have to deal with traffic, learn how to drive on the left side of the road, or search for parking. You can also read, write in a journal, or even write an article for the Pointer. However, the best part about riding the bus is the people we meet.

Aside from the main tourist attractions-Opera House, Center Point, Botanical Gardens, Taronga Park, Harbour Bridge, The Rocks, etc.-Sydney is a typical harbor city. It has exclusive stores and flea markets, with both fancy restaurants and food vendors both licensed and B.Y.O.B.), and only takes a couple days, but it's taken more-ask Dr. Wiedner and Tom Gustin, Lake Emily Park Supervisor, are instructors for the club. Wiedner and Gustin are both up for their third degree black belt promotions. Karen Camille, a first degree black belt will also be instructing.

The club meets Monday nights in the wrestling room at Fair High School from 5:30-6:50 p.m. It also meets on Tuesday nights on campus in the gymnasium room from 6:30-8 p.m. Anyone is welcome to join the sessions at any time. The class can be taken as one active physical education credit if you go through the physical education department.

Notes from Abroad comes to us this week from the land Down Under. Are Australia. Next week it's off to the birthplace of civilization, Greece.

Judo, from page 9

Tournaments are double-elimination or single robin elimination and the clubs compete as individuals. One match can last from three to twenty minutes. There is one referee and two time keepers. You must be physically fit and mentally alert.

You have to keep your mind open at all times to catch your options. You have to feel what your opponent is going to do so you can defend yourself, said Kossow.

Kossow, a green belt, is secretary/treasurer of the club and Sher Ringlesteiter, another green belt, serves as president. Peter Kasson, a physical education instructor, is the club advisor.

Jim Wiedner, a physics teacher at SPASH and Tom Gustin, Lake Emily Park Supervisor, are instructors for the club. Wiedner and Gustin are both up for their third degree black belt promotions. Karen Camille, a first degree black belt will also be instructing.

The club meets Monday nights in the wrestling room at Fair High School from 5:30-6:50 p.m. It also meets on Tuesday nights on campus in the gymnasium room from 6:30-8 p.m. Anyone is welcome to join the sessions at any time. The class can be taken as one active physical education credit if you go through the physical education department.

No worries-

This picture sent by the 1988 Australia group raises one question: We know water goes down a drain counter-clockwise in the Southern Hemisphere, but do negatives get reversed?

brought in some incredible professionals to lecture on controversial natural resource topics, and Mrs. Heaton has been showing Australian movies and bringing in famous authors, such as Alan Fox (author of the Kackadi Man).

One of the nice things about classes is their emphasis on learning outside the classrooms, as well as in. The Australians know that the real spirit of their people, and all that has happened since the first aborigine set foot on the continent, goes back to the land itself.

It's a continent that's almost the size of America, the population is about a third of the US; most of that is on the edges of the continent, since about two-thirds of Australia is desert. Aussies are more continent than America. It's a land where eucalyptus and gum trees are abundant, and dins and oaks are considered exotic species. Even more striking are their birds. They tend to be bigger than ours in the states, with fullers colors and mannerisms. The blue, green, orange and red colors of the owls that feed on oranges slices on our balcony. There are also parrots, bobbies, galahs, and, of course, the laughing hooka-burras that add to the jungle-like atmosphere. From Ayers Rock in the center of Australia to the Great Barrier Reef, differences abound that convince even the most confused tourist that he is in Australia; it's one of the most beautiful and unique places in the world.

Both the spirit of the land and that of its people came together on a very special day, January 26. All of us went to a 4.5 million Australian in Sydney to wish them a happy birthday. A small group of us accompanied the crowds of people in the botanical gardens to watch the harbor festivities. As we set on a patch of grass and listened to these symphonies play traditional Australian songs, a stream of digitaries got off yachts and made their way up the Opera House steps. The crowd surged excitedly and gave a loud cheer when Prince Charles and Princess Di stepped off the royal barge about 300 yards from us almost as exciting as when Olympic diver Greg Lagganu stayed in our dorms.

Then came the parade of tall ships from all over the world. Magnificent, large vessels with billowy sails, firing cannon and parading sailors. The rest of the day was a blur of activity; there were hands playing in every part of town. "The Rocks," dating back to early convict days as one of the oldest and most unique sections of Sydney with a wild, seafarer reputation, was as wild as ever. The scene must have resembled what would have been happening 200 years ago. All the crowds from the pub had spilled onto the streets and everyone was dancing and singing to the crazy 60's, 70's and 80's, 90's, 20's and 30's, 40's and 50's. It was quite a sight to see.

The evening ended with 60 minutes of non-stop lights and colors, as fireworks erupted around the Opera House. It was a spectacular sight, one I haven't the ability to describe, but will remember forever.

The thing I'll remember clearest about the day, however, is that for a short while I celebrated Australia's birthday with all of the Aussies. I felt like an Australian, and not like an American looking in.

Well, the ball is almost at the station, and this article is beginning to become a novel. We think of you guys often, usually when we're at the beach. Everyone here sends their best wishes. (Note: I'm writing this with a 0:32% beer.)

Vegetable forever.

P.S. If you happen to have a spare postcard lying around, we all would love to hear from you. Our address is Denmark Lang College, 136 Harring Road, North Ryde, N.S.W. 2113, Australia.

defensive-robbed-kricket

Australian Vocabulary

take away - take out food
cash - no good, rotten
eyahuda - loan
pop-crawling - bar hopping
blonde - guys
jagermeister - sopping
blonde - girls
faceless, blank-intoxicated
Assie - Australian
cobbers, mates - good friends
absolutely - to buy something for someone
rare - as a drop of the amber beer
root - to have sex
stuffed - pregnant
naturalist - naturalist
screener - a large glass of beer (16 oz.)
Trade imbalance sparks rhetorical babble

by James DeCruz

Staff writer

The four Asian vaudevilleurs have come of age. The recent monthly General Agreement on Trade and Tariffs (GATT) meeting in Geneva was re- responding to the General System of Preferences (GSP) and how the so-called "four dragons of Asia" (principally South Korea, Taiwan, Hong Kong and Singap- pre) had graduated and come of age. The recent audiences that after South Asia "meets in Geneva was re- meeting international marketplace. "God's sake use your brain once in a while. What do you think HELP means?"

Professors: Don't assume that everyone needs to be spoon fed. You may think all teachers should be this way and this tru- ly leads to brain damage. I admit that one credit class shouldn't be too demanding, but some students think that if any- thing is missing from their reci- pe assignment it can't be done. I wish more principles and me- thodologies of the specific assign- ments would be stressed, rather than more examples. There is a reason for each assignment, sometimes.

Lab Assistants: We are not Gods. If we know everything, what must we still ask in school? I sympathize with students that ask for help only after reading their manuals (remember what those are?). Formating a disk: This should be explained so people don't think they have to refor- mat a disk every time they use a new software package. Disks are formatted to use operating systems, not one particular soft- ware package.

Printing a file: There is a dif- ference sometimes between what people print and what they want to print. Unless your file hasn't been changed in any way since the last time you saved it, you can select it from the pop-up menu during the print sequence; otherwise, se- lect default. The only thing de- fault means is current. My sug- gestion is to use default, and save your work when you're done printing. If you want options, be sure to press def- ault.

Finally, enhanced print should only be used when you are changing your font or your docu- ment contains a graph.

Name withheld upon request

Special to The Pointer

This is a short description of some of the fault that I, a lab assistant/coordinator, feel the teaching faculty could learn a thing or two from.

First off, I will never profess to know everything, but after assisting students in doing their homework and taking a class on it myself, I think I possess a better understanding of it than most students and possibly a few teachers.

Users: Computers do only what you tell them to. If you think that computers are stupid, look in the mirror and admit that you are just as guilty. If you have questions, ask, but for God's sake use your brain once in a while. What do you think HELP means?

Professors: Don't assume that everyone needs to be spoon fed. You may think all teachers should be this way and this tru- ly leads to brain damage. I admit that one credit class shouldn't be too demanding, but some students think that if any- thing is missing from their reci- pe assignment it can't be done. I wish more principles and me- thodologies of the specific assign- ments would be stressed, rather than more examples. There is a reason for each assignment, sometimes.

Lab Assistants: We are not Gods. If we know everything, what must we still ask in school? I sympathize with students that ask for help only after reading their manuals (remember what those are?). Formating a disk: This should be explained so people don't think they have to refor- mat a disk every time they use a new software package. Disks are formatted to use operating systems, not one particular soft- ware package.

Printing a file: There is a dif- ference sometimes between what people print and what they want to print. Unless your file hasn't been changed in any way since the last time you saved it, you can select it from the pop-up menu during the print sequence; otherwise, se- lect default. The only thing de- fault means is current. My sug- gestion is to use default, and save your work when you're done printing. If you want options, be sure to press def- ault.

Finally, enhanced print should only be used when you are changing your font or your docu- ment contains a graph.

This could go on and on, but I'm sure you get the idea. If you use the labs, practice some common sense and courtesy. Don't print 30 pages first, only to find out that you did it wrong and need to print it all over. Test your paper with one or two pages before printing everything.

Things like this do help!

No! A little food and beverage while studying helps people think. We're in college. I think we're responsible enough to dispose of our trash properly.

I think if there is a big mess being left behind there should be something done, at least temporarily. Maybe once people have the privilege taken away they will be neater when the privilege is restored.

Yes and no. Only on certain floors where the materials are used frequently and have the most chance of getting trashed (periodicals and government documents).

It shouldn't be necessary, but it's obvious some people don't know how to clean up after themselves. So until they grow up I guess the rest of us have to suffer. Personally, we should put up some spy blinds, catch the ones that leave their mess, then fine 'em. They'll burn and the rest can eat in peace.

---

**What can I do?**

**Quit canning it**

by Sheri Hall
Special to the Pointer

UWSP students are affected by many major environmental problems every day, most of which can't be solved by students. However, students can make an impact on the environment and start to solve part of the problem by recycling nonrenewable mineral resources.

So let's go UWSP students! We can start with the common mineral, aluminum, found in our beverage containers.

The advantages of recycling are substantial. Recycling aluminum reduces air pollution associated with its production by 95% and requires 92% less energy than mining and processing virgin aluminum ore. If returnable bottles replaced the 25 billion thrown away beverage cans produced annually, enough energy would be saved to provide electricity for 45 million people.

Although surveys indicate that 75% of all Americans favor recycling, only about 15% of the waste in the US is now recycled. This leaves room for a 90% improvement.

How can we do it?

For non-profit, purely environmental reasons, dispose your cans into the blue, "aluminum only eating containers" that are scattered across campus in the various buildings.

Next time you drink a soda, for example, make an effort to throw your empty can into an aluminum can receptacle. If you can't find one in the building, inform the dean of that college of the need.

If you're interested in making money, which most of us are, then save your cans. They're worth hard, cold cash.

Three places are available to students: The Northside IGA has the Golden Coat can-eating machine. This is open 24 hours a day, close to campus and offers 40-45 cents a pound.

The Mid-State Distributing in Industrial Park pays 40 cents a pound and is located across from Herschener's. Intra-State

- Free jukebox
- Beer and mixed drink specials for students of legal drinking age.
- College Club dart tournament — prize awarded for best team (8-10 p.m.)

Located in the G2 Level of Sentry Headquarters.
Midterms got you down?:
Sure bets for acing tests

by Vicky Braun
Special to the Pointer

It’s that time of year again—midterms. Along with them comes an abundance of stressed out college students.

Why is so much stress caused by these tests? Mainly, it’s the fact that they all fall during the same week. But what, then, is the best way to handle a week with three or four midterms in it?

First, priorities have to be set straight and study time needs to be allotted for all tests. Second, there has to be personal time set aside; all the time can’t be spent studying. You would go nuts.

A good study break that works great is exercise. After running one or two miles, you can go back to your books refreshed.

Even if you don’t exercise, there’s the option of going for a walk. This will get you outside and your mind off of homework.

If neither of these appeals to you, you might try being alone. This can give you time to think about personal things or do something you’ve always wanted to do, like work on a scrapbook or write letters.

So when you are tired of studying and your mind needs a break, do something completely different. This will give your brain a chance to relax, and coming back to the books won’t be so hard. Nothing is ever as bad as it seems.

Best of luck on midterms!

Big Brothers and Big Sisters needs you

Special to the Pointer

Big Brothers and Big Sisters of Portage County is a non-profit organization that needs your support.

Imagine yourself growing up all over again, except this time with only one parent and no one around to play baseball, go fishing, baking cookies, or just talk with.

Today, there are over 1,000 kids growing up in single parent families in Portage County alone. Their parent cares for them, but because of jobs, younger brothers or sisters, maintaining the household, or just being too busy, they often have a hard time giving these kids the attention they need.

Big Brothers and Big Sisters strive to make a difference with these children.

It is a non-profit organization, which means that it has to supply its own life-line by having to raise money to help these needy kids. You as volunteers or even donors can help supply the blood for this organization.

If you are 16 years or older and are willing to make a difference in some child’s life stop and fill out an application at the Big Brothers/Big Sisters head-quarter’s in Stevens Point, O’Fallon Theatre Drive., just 2 min. South on Business st. And if you feel that you just don’t have the time, you can help just as much by attending the 2nd Annual Bid-A-Date Fundraiser being held April 6, 1988 in the University Center Encore Room.

by Jeff Griepentrog

Recycle,
from page 12

Recycling Center, located on Hwy. 54 and Hoover Road, is also an option for the student recycler.

If you live in a residence hall, suggest the program of saving cans on your wing to your RA. An inter-wing/hall competition could generate a lot of money for wing activities or a donation to a needy charity.

Whatever you do, be an actively concerned, environmentally aware consumer.

We continually take from a planet that has very little left to give; we must give the earth the respect that it’s due and recycle the resources we use. Aluminum is a good start.

The future of our existence depends on it. Take an active role today and start recycling!
Fine Arts Activity

Soprano Jean Saladin, a member of the music faculty, will perform in a recital at 8:15 p.m., Monday, March 7 at the University of Wisconsin-Stevens Point.

The performance in Michelsen Hall, Fine Arts Center, is open to the public without charge. The vocalist will be assisted by pianists Charles Gean and John Radd, reader Susan Rush, guitarist Glen Stuuffer, and clarinetist Andrea Splittergerber-Rosen.

A Kansas native, Saladin has performed extensively in opera, oratorio and musical theatre. She has been in residence at the Central City Opera Company in Colorado and has had numerous performances with the White Heron Opera Company in Wisconsin. Saladin has taught voice at Florida State University and South Dakota State University. Saladin holds the Master of Music degree in vocal performance from Florida State.

The Wind Ensemble, conducted by Dennis R. Glicks, will perform at 8 p.m., Friday, March 4 at the University of Wisconsin-Stevens Point.

Tickets at the door of Michelsen Hall, Fine Arts Center, are $1.50 for the public, $1.00 for senior citizens and $1.00 for UWSP students. Proceeds will benefit the music department's scholarship fund.

The program will include Shostakovich's "Festive Overture." Hindemith's "Symphony on R. Glocke," Kravmmer's "Octet," and Grainger's "Irish Tune from County Derry."

Evangelism

Ever watched the 700 Club or Jimmy Swaggart's sermon? The evangelists make the people believe that they are saviors of the world. Pat Robertson used to heal people over the TV airways, but now that he's running for president he denies it. I'm surprised to see Robertson running for president and not God. It seems that all of the TV evangelists claim to have a direct link with God and they all act as if they can heal, save and control the average person. I've never seen the clergyman in my church act in this manner. Furthermore, he has never proclaimed he could act in this manner. The TV ministers are just using the people to earn an extra dollar and they are making a list of extra dollars.

I would like to see some proof. If these TV evangelists are what they claim, or imply, I would like to see the facts. I remember one time when I watched one of the God squad members heal a cripple and allowed him to walk.

I want to see one of these healers come to Stevens Point and put on a show in the U.C. We can all come with our problems and he can cure them. If the minister has a true link with God, then no problem should be too big or too small for him to handle.

Abroad,

Because of the sensitivity of the areas visited, the Polish semester is limited to around 15 members. Consoli said that the Poland usually attracts experienced travelers and second time visitors to Europe, although this isn't necessarily the case. People who go to Poland want more than the typical European experience. She calls Poland a "life changing trip."

The semester in Germany is becoming increasingly difficult to keep affordable, due to the decline of the dollar. One of the plans for this fall is to spend close to three weeks in the less expensive East German city of Dresden. Although not definite, this would alleviate the higher Western costs and also provide the invaluable experience of living in an Eastern bloc country.

The British trip, although rising in cost, always remains a popular program; hence, it is the only program that takes place both semesters. The group for next fall will be limited to around 40 members.

All of the leaders for the trips this fall should be announced in a week or two. They are currently being finalized and awaiting respective department release.

Students from all across America have taken part in past semester's abroad. While permission is given to UWSP and other Wisconsin state students, out-of-state students are taken when room is available. That allows for lower costs and the high diversity of trips.

International Programs emphasize that they are not a travel agency. If you want a vacation, go to Miami Beach. The purpose of a semester abroad is to learn. Students should approach a semester abroad "with humility, with open minds, and with a spirit of giving in the hope that they may be taught and they may learn," an International Programs booklet reads.

If the above definition describes you, then go abroad.

You will never be the same.
Log cabin building workshop sponsored

UWSP will sponsor a log cabin-building workshop from April 8 through 10 at its Central Wisconsin Environmental Station about 17 miles east of campus.

Participants will learn the fine tradition of building with logs from standing trees to finished building. Emphasis is on blending new tools and technology to old Scandinavian methods resulting in construction techniques practical for today.

The workshop will include instruction on site selection, foundations and basements, costs of construction, tools needed, methods of construction, hints for good design, log handling techniques and timber fitting secrets.

In addition, there will be practical demonstrations of notching and setting logs, saddle notch and lateral groove making and proper tool use. And there will be discussions about problems peculiar to log construction such as the installation of doors and windows, log settling and shrinkage, roof design, trusses, heating systems and preservation of wood.

The participants will actually work on a log cabin under construction at the environmental station.

Instructors will be Dave Eschenbauch and Kim Tonione. Eschenbauch has been involved in log construction 15 years and had taught numerous workshops dealing with the Scandinavian full scribe method of log construction. Tonione is a Wisconsin Dells native.

The workshop will be located at the Central Wisconsin Environmental Station just south of Wausau.

The cost is $195 per person which includes all materials, food and lodging for the entire weekend. A limited number of spaces are available, so early registration is suggested.

For more information, contact Dave Eschenbauch at 715-502-6874 or 715-445-2039.

The Shape Of Things To Come

A square pizza slice. Not the usual shape for pizza slices...but then Rocky Rococo Pan Style Pizza is not your usual pizza. It’s a generous 1/2 lb. single serving, conveniently boxed to stay hot and fresh. Ready almost instantly to eat-in or carry-out.

Some Rocky Rococo restaurants even offer drive thru service. And all our slices are specially prepared with extra care, made by hand with heart. Try Rocky Rococo Pan Style Pizza slices. They’re the shape of things to come...and go!

And Go.

to run him over on a sidewalk by the square. When he jumped out of the way, the driver went around the block and tried it again. He missed.

A representative of the Stevens Point Journal noted that twenty years of affirmative action in Stevens Point has had no results.

A number of people commented that people’s attitude toward minorities must be changed first. One person suggested that only by minorities continuous community exposure would people be able to change things.

Ideas were discussed on how to ease the transition of minorities into the Stevens Point Community. Advanced love, host families and community mentors were some of the ideas raised.

A number of people in the Adult Indian Weekend College Program were pleased at the appreciation and kindness shown to them. However, one Indian administrator commented that after years of rejection and ostracism by the community, “It’s the little things that are hard to deal with.”

I saw that tender message on a UAB booth in the U.C. Concourse a few weeks ago. They were trying to recruit new stu-
dents for the organization. It assumed me to be:

a. Threatening
b. Thought-provoking
c. Funny.

I thought it was funny then. I still do: you know, you're walk-ing through the U.C. on your way to get a soda from the Corner Market for $5.65, get the banner, turn to a friend, and say, "Well, I just be-gin to live. Do you have a pen?"

But since then I've waxed philosophical, become introspec-tive and xen, desperate for edi-
torial ideas. But these are the conclusions I came to:

I didn't realize, before I came to college, how cheap the world is on joining things. Be a leader, be a pal, be your par-ents' favorite kid. I hold a Resi-

name, study hard, and have a beer, and I'm burned out.

It's not just UAB. I don't mean to alienate them, really. I'm just bummed inside. It's just, well, the whole atmosphere. This is the land of Leaders. Join FRANKLY SPEAKING

Positive vibrations, yeah? Where does she get off attempt-ing to reach into our private and personal lives and accu-
ses of murd er and treachery? In the name of all humanity, I will no step in and holler, "FOUL!" How long will we have to endure this literary from the Peace Lady? Perhaps this is the year of the Dragon but, please Nancy, enough is enough.

Here we go another year... I know if you have Republican military might part-
tly to thank for the fact that Castro has yet to sell cigars at our door. Par ty it doesn't hurt to consider the alterna-
tives.

Like not joining. Being your own party. And just getting on-
school, (for counting the days between weekends).

But the military tries. Every listen to their radio commer-
cials? "Hi, my name is Jim. I lacked the self-discipline and maturity to go right to college. " Who didn't? And how do you get grown up by letting people scream at you?

And Tina. She joined the army to learn a skill. "But I got something else. Self-re-

spect. Pity you weren't born with it. Think of all the push up you could've saved.

And then there's Tim: "Hi, I can't talk to insiders. We're out here on manuevers to smush another squad. But it's not a game."

Tim. Sorry. I can't take you seriously. It would sound like you're fifteen and is a game. And how did you get a microphone and tape recorder on maneuvering?

So that the military. How 'bout our frats? Could some-
body explain just what a frat is? I know it has something to do with academics and commu-

nity service. But I've yet to see it.

Part of the inflation rite into one of them involves wearing empty beer cans covered with underwear on their heads. And swallowing live minnows. Well, fish in brain food. They're on the right track.

Mainly I don't understand why someone would go off to school, embark on something new, and then seek the security of a bunch of lunches, act line "brothers." It seems counter-prod uctive.

Let's not forget the evangel-

ists. The ones who never 1 earn a soul. I saw a bumper sticker on somebody's car in hall's parking with the title. "Assume I'm not a Christian." Was Christ collecting?

by Stud Weasli

I was informed recently that a fact that On Life By Stud Weasli (that's me) appears on the Pointer. The time has come, therefore, for Stud Weasli to take a stand.

What follows are several of my opinions, which will hopefully be logical and physiological traits.

In the following: nobody ever had to know.

In addition, student letters to the Editor have suggested that, although my articles have shown incredible insight and un-

countered regards to the meaning of life and other things, I have never really ta
t a stand. A stand. People obviously are doing too soft - that I am also as soft as an eggshell.

I have also been informed, by high people in places, that the pointer enjoys reading offensive either-

ers. Apparently, after reading this material, people feel inspired to write such materials of their own; then, more people get written by others.

Mainly I don't understand why someone would go off to school, embark on something new, and then seek the security of a bunch of lunches, act line "brothers." It seems counter-prod uctive.

Let's not forget the evangel-

ists. The ones who never 1 earn a soul. I saw a bumper sticker on somebody's car in hall's parking with the title. "Assume I'm not a Christian." Was Christ collecting?

by Stud Weasli

I was informed recently that a fact that On Life By Stud Weasli (that's me) appears on the Pointer. The time has come, therefore, for Stud Weasli to take a stand.

What follows are several of my opinions, which will hopefully be logical and physiological traits.

In the following: nobody ever had to know.

In addition, student letters to the Editor have suggested that, although my articles have shown incredible insight and un-

countered regards to the meaning of life and other things, I have never really ta
t a stand. A stand. People obviously are doing too soft - that I am also as soft as an eggshell.

I have also been informed, by high people in places, that the pointer enjoys reading offensive either-

ers. Apparently, after reading this material, people feel inspired to write such materials of their own; then, more people get written by others.

A question of definition

To the Editor:

I'm writing concerning the article in the Feb. 23, 1988 issue of the Pointer entitled "Gay People's Union Explained." This article was written about me. I was interviewed by Paul Letham who thought he didn't know a gay or lesbian person. He also admitted to not knowing anything about the subject. I feel the interviewer should have researched the subject, which I got the impression he didn't want to do. This is a common approach when the media is dealing with the gay population.

If he would have had some background in dealing with gay people, he would have known that there is a difference between a gay person and a homosexual. A homosexual is an individual who has feelings of love, emotional attachment and sexual attraction towards people of their own gender. This has no indication of the gender of the individual. A gay person means a male homosexual and a lesbian is a female homosexual.

The Pointer should, in my opinion, instead of referring to us as homosexuals, refer to us as either gay or lesbian. The word "homosexual" seems to us to refer solely to sexuality and our orientation means far more to us than that. Men prefer to be called gay, while women prefer to be called lesbian, a word which derives from the Greek island of Lesbos. This was the home, in the 6th century B.C., of the great poet Sappho, whose works often celebrated love between women. The use of the word homosexual in my quotes was incorrect.

The Gay People's Union is celebrating its 10th anniversary because of the hard work of many people. It is not "my organization," as seemed to be stated in the article. The purpose of the Gay People's Union is to educate and inform the students and the community that gays and lesbians have been, are and will always be part of the community.

I think it is fair to the lady in the picture next to the article it might be a good idea to have a caption underneath the picture. This would cause less misunderstandings.

I'm glad the Pointer took the initiative to write the article, but I feel it should have been done in a more knowledgeable way.

Evelyn Cress

Editor's note:

The Pointer agrees that the picture on page 3 of last week's paper should certainly have been captioned. The woman who was pictured is Professor Natalia Detweiler of the UWSP foreign languages dept. Our apologies for any confusion this omission may have caused.

SNIF notes poster mystery

To the Editor:

Due to the fine quality of art work on our posters, members of SNIF have found that our illegally posted flyers disappear soon after being put up in various locations around campus. Because this leads to difficulties in advertising for meetings and events, SNIF has decided to give Pointer readers access to these dates:

March 7 - Film "Dr. Strange-love"-7 p.m. in the Nicotet-Marquotta Room, U.C.
March 8 - Film "Salvador"-7 p.m. in the Communications Room, U.C.
March 9 - Speaker, Dorothy Legutia on the Health Effects of Low-Level Radiation. Reception at 7 p.m. in the Blue Room, U.C. Lecture at 8 in the Communications Room, U.C.
March 10 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 11 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 12 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 13 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 14 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 15 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 16 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 17 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 18 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 19 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 20 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 21 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 22 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 23 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 24 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 25 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 26 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 27 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 28 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 29 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 30 - Film "Hair"-7 p.m. in the Communications Room, U.C.
March 31 - Film "Hair"-7 p.m. in the Communications Room, U.C.

In years past, there have been out-of-state students who have not had the opportunity to savor these memories. Each year there are those who have lost their lives due to driving impaired by drugs or alcohol. Please come to Florida, enjoy our beaches and all our state has to offer, but do not drink and drive. Make your spring break safe.

Sincerely,
Betty Jane Spencer

Florida MAID

SETV PROGRAMMING SCHEDULE

Spring Semester - 1988
3:30pm- 4:00pm ...... SETV Programming/Cartoons
4:00pm- 4:30pm ...... Campus America-NTCV
4:30pm- 5:00pm ...... Mad Dog Cartoons-NTCV
5:00pm- 5:30pm ...... Universi­ty Scene Source-NTCV
5:30pm- 6:00pm ...... Uncen­sored-NTCV
6:00pm- 6:30pm ...... Richard Browne's Screwing Room-NTCV
6:30pm- 7:00 ...... Richard Diamond Private Detective-NTCV
7:00 p.m.-8:00 p.m. ...... New Grooves with Max Griffin
8:00 p.m.-10:00 p.m. ...... SETV programminh
10:00 p.m.-9:00 a.m. ...... SETV Message Board
Tentative-schedule may change without notice.

Take the plunge this summer.

Sign up for Army ROTC Basic Camp. You'll get six weeks of challenges that can build up your leadership skills as well as your body. You'll also get almost $700.

But hurry. This summer may be your last chance to graduate from college with a degree and an officer's commission.

See your Professor of Military Science for details.

The Evolution of a Sportsman

"A Perfectly Natural Thing To Do"

by Andrew Fendos

Outdoors Editor

Some people think we evolved from apes. Others don't, and I don't know. Realistically, I don't think anyone else does either. I do think evolution is an interesting idea, however, and there is a lot of evidence to support the concept. In fact, we see a little of evolution everyday, whether we want to or not.

Evolution is change, but more than that, it's growth. It's becoming tomorrow what we cannot today. From the sperm and egg to the maturing of a mind, change and growth takes place. Materializing through everyday experiences, the friends we make, the objectives and goals we set and overtake, and from our attitudes, change and growth is the most constant parameter of daily life. The sum of changes not only defines our current position in life, but also directs our evolution.

People also grow in their attitudes toward life...life, in general and the life with which they share this earth. How people react to other forms of life says a lot about how they look at life in general. In the beginning, security and survival shape our attitudes. With evolution, life becomes the attitude. Perspectives change too. Hopefully they change for the better; change for the worse doesn't benefit anything. With the evolution of perspectives, we develop an understanding and feeling for the natural order of things. It is done step-by-step, year-by-year, and sometimes mistake-by-mistake.

The respect people do or don't have for themselves, their environment and the planet as a whole is a reflection of this change.

This reflection can be watched in the boy who has never caught a fish or shot a pheasant. At first he looks forward to the casting and killing. It's a perfectly natural thing to do, just as it is natural for an expectant mother to anticipate a child. Each is just as exciting a prospect as the other to the person involved. Each is a part of life, each a step in the evolution of a mind. Each determines things to come.

The boy who lands that blue-gill or pops a ringneck for the first time will undoubtedly want to go afield again. Though he may have thought at one time that he'd be satisfied with one fish or one bird, he will know before the successful trip is over that it is not only possible to catch and kill, but that it has other rewards as well.

He'll grow up. His muscles and coordination will develop to the point that shooting a pheasant is easy. He'll evolve. Perhaps he'll wind up fishing only flies, or shooting only the occasional rooster, and that with the 28-gauge. Eventually, he may not want to take anything at all. His hunting and fishing will become excuses to roam, free of the pressures that tell him where to go, when to buy, how to be a success and why he should yield to the pressures.

The outdoors will bring him to his senses, it will pluck him from the whirlpool that sucks at his sanity. It will give him the peace that is missing. It will take him to a place where life again means something.

He'll not want to take then, just listen. When he does, we call it mellowing. It's really advancing. It's really evolution at work.

Not all people evolve that way. Some find their way over the excitement of taking. Like little children at Christmas, they would rather get than give. They have changed but they have not evolved. They see in field sports a chance to prove themselves over and over again. The catch and kill are the proof.

Not very many of these people ask themselves what the proof is of, though, and that's a shame. If you're going to take a life to prove something, you ought to know what it is that you want to prove. It's all very plain to the youngster out for his first bird. He wants to prove that he can, he hasn't killed yet and doesn't know if he can. He must test his abilities under the ultimate pressure. He must know if he is as good as the people who have killed pheasants. He doesn't know really if he can go one-on-one with nature and win.

After the first bird, he knows.

If you've climbed Everest once, you don't climb it every year to prove you still can do it. Everest is the same. The pheasant is the same. If you're evolving, growing normally, you're getting better. Proving that you can still do the same thing you did as a 12-year-old is not a mark of achievement. Evolution is not measured in quantity, but in quality. The mountain can be appreciated again, but it can only be conquered once.

People who never get enough to show others where they're going. Or perhaps they are afraid of going anywhere at all. They measure the hunt by the number of birds killed. Just like they did in high school. They keep their fish so they can show them. They talk not of what they saw or heard or smelled in the field, nor of what they felt or learned or experienced. Their talk is all of the bag, of weights and measurements and comparisons. Because they catch and kill more effectively now, they simply catch and kill more. It's often a competitive game with them, pitting themselves against others in their clique, jousting for position, vying for recognition.

How childish.

And what a waste of life.

There is a time for killing and I will yet kill. But there also is a time for slacking the trigger finger or cutting the hair and I find that it comes more frequently now. I probably won't kill all that I once wanted. Evolution has caught up with me before I'm ready for it. But I won't fight the inevitable.

Life isn't here only to take. And it would be a shame if I took a rooster that might have seen some boy's first.

The mountains can only be conquered once

Helping Out Where You Can

Feeding Wisconsin's Wildlife

by Andrew Fendos

Outdoors Editor

Outdoorsmen can do much to replenish food supply and habi t at for wildlife with little effort and practically no expense. In the fall, gather walnuts, hickory nuts, acorns, and buckeyes. Then, in future outings, carry along a small bucket of nuts. To plant, simply scrape clear the ground, drop one down and push it into the ground with your heel. Scrape the leaves over the planting to prevent small animals from eating it and then move a few yards and repeat the process.

Elderberry plants provide shelter for animals and food for birds. Gather a bushel of the ripe berries with the stems attached. Scatter them on a clean floor and let them dry until very brittle. Run the stems and seeds through a kitchen colander to separate the seeds from the chaff. Store in a closed container in the refrigerator until early spring, then scatter the seeds in likely places. After clearing the ground of leaves and debris, plant the elderberry seeds. Cover lightly with leaves.

Mulberry trees are a source of shelter and food for crows, squirrels and birds. The best way to propagate these trees is to plant seedlings found under mulberry trees in the spring. Plant with a trowel and then water the seeding.

Deer like apples. To plant them, scrape a shallow hole about an inch in diameter, drop a few seeds or a core, and cover with loose dirt.

Deer, coons, and squirrels also like corn. Scrape a hole two inches deep and six inches in diameter. Drop in four to five kernels of corn and cover with loose soil. Do this along creeks, in forest clearings and on marginal or submarginal land along timber lines.

Sunflowers are great food for game—plant the seeds as you would corn.

If you are on private land, ask the landowner for permission. You may just get some help.
Chernobyl, toxic traffic and snakes

By Cindy Byers

Almost 90 percent of the garbage generated in the United States is buried in landfills. Estimates are that it will take hundreds of years for most of this waste to break down. Some of the toxic substances in landfill gas are thought to be harmful to human health.

The Wisconsin Farm Bureau Federation is an independent, non-governmental, voluntary organization of farm and ranch families. They are co-op partners for the purposes of achieving educational improvement. They are seeking to improve the economic opportunities in all forms of farming life styles. They also provide what happe to happen to the environment. This comes to light when one reads the WFBF policies that were set forth at the 1987 WFBF meeting. After reading the following WFBF environmental policy, it should be noted that farmers must be business and do their part when it comes to sharing the job of keeping our earth liveable.

WFBF policies

Farmers are proud to do their part in maintaining the high standard of environmental quality in Wisconsin. Farmers have made their efforts to comply with and have committed major capital expenditures to meet federal and state guidelines or standards relative to water, air, and solid waste.

These efforts are frustrated and often nullified by the imposition of poorly developed standards and regulations. Any regulations which are restructed of individual farm operations should be repealed unless research has developed practical methods of maintaining air and water quality consistent with efficient and economical farming operations. Pollution problems, occurring where previously accepted guidelines and regulations have been complied with, should be remedied at public expense.

We favor tax incentives and increased cost sharing of pollution abatement and structures to encourage their use and to diminish potentially devastating costs.

GROUND WATER: A continuing and abundant supply of clean groundwater is essential to agriculture and rural families across the state. There is a need for increased monitoring, research and education relating to groundwater problems.

We believe that there should be uniform national pesticide residue standards and that any regulations should be applied as uniformly as possible, depending on geological conditions.

ANIMAL WASTES: We believe that animal wastes should be economically sound and administered by the Wisconsin Department of Agriculture, Trade and Consumer Protection.

SOIL CONSERVATION: We urge all farmers to work with local land conservation committees to establish good farm practices in the interest of pollution control and land conservation.

Retaining soil and agricultural chemicals on the land is in the best interests of the farm community both economically and environmentally.

Soil conservation programs should be of a voluntary nature with a minimum of regulations. Such programs should be administered at the local and state levels and closely associated with agriculture, which provide for farmer representation.

Because of new farming practices and outstanding research in the area of minimal till, which greatly reduce soil losses we reseed used land.

Number one since World War II when it surpassed pork. In 1976 beef was consumed at an average of 90 pounds per person annually. Today beef consumption is at 72 pounds. Poultry (mostly chicken) has risen to 76 pounds. This has prompted new efforts in commodities and beef diet programs to produce leaner beef for consumers.

World energy concerns

France cuts emissions in half

Press INFO

Nuclear electricity is not only giving France the cheapest electricity in Europe, but large scale use of the stern has helped to reduce deep toxic emissions of sulfur dioxide.

Jean-Pierre Capron, head of the French Energy Department, cited this environmental benefit of the French nuclear energy program in an address to the Energy Forum held in Los Angeles last November. The annual meeting is sponsored by the energy industry trade associations.

Capron said nuclear energy has advantages over other major fuels used worldwide in terms of environmental impact and occupational risks. Nuclear energy is an "extremely clean" energy source, he said.

"It is demonstrated that in France, between 1980 and 1988, the reduction of sulfur emissions amounted to only 30 percent. But this achievement has been made possible by decommissioning a large number of conventional power stations and concurrently increasing the number of nuclear facilities. In other European countries, where the penetration of nuclear energy is slower, the reduction of sulfur emissions amounted to only 20 percent," he said.

Capron said there is "increasing evidence that acid rains are linked to discharge of large quantities of sulfur dioxide in the atmosphere."

Capron went on to note that, despite large global reserves of energy, OPIC may once again be able to dictate world oil prices. "These are the producers with rather short reserves."

Farmers doing their part 1987 WFBF

by Andrew Fendos

Outdoor Editor

The Wisconsin Farm Bureau Federation is an independent, non-governmental, voluntary organization of farm and ranch families. They are co-op partners for the purposes of achieving educational improvement. They are seeking to improve the economic opportunities in all forms of farming life styles. They also provide what happens to happen to the environment. This comes to light when one reads the WFBF policies that were set forth at the 1987 WFBF meeting. After reading the following WFBF environmental policy, it should be noted that farmers must be business and do their part when it comes to sharing the job of keeping our earth liveable.

WFBF policies

Farmers are proud to do their part in maintaining the high standard of environmental quality in Wisconsin. Farmers have made their efforts to comply with and have committed major capital expenditures to meet federal and state guidelines or standards relative to water, air, and solid waste.

These efforts are frustrated and often nullified by the imposition of poorly developed standards and regulations. Any regulations which are restructed of individual farm operations should be repealed unless research has developed practical methods of maintaining air and water quality consistent with efficient and economical farming operations. Pollution problems, occurring where previously accepted guidelines and regulations have been complied with, should be remedied at public expense.

We favor tax incentives and increased cost sharing of pollution abatement and structures to encourage their use and to diminish potentially devastating costs.

GROUND WATER: A continuing and abundant supply of clean groundwater is essential to agriculture and rural families across the state. There is a need for increased monitoring, research and education relating to groundwater problems.

We believe that there should be uniform national pesticide residue standards and that any regulations should be applied as uniformly as possible, depending on geological conditions.

ANIMAL WASTES: We believe that animal wastes should be economically sound and administered by the Wisconsin Department of Agriculture, Trade and Consumer Protection.

SOIL CONSERVATION: We urge all farmers to work with local land conservation committees to establish good farm practices in the interest of pollution control and land conservation.

Retaining soil and agricultural chemicals on the land is in the best interests of the farm community both economically and environmentally.

Soil conservation programs should be of a voluntary nature with a minimum of regulations. Such programs should be administered at the local and state levels and closely associated with agriculture, which provide for farmer representation.

Because of new farming practices and outstanding research in the area of minimal till, which greatly reduce soil losses we reseed used land.
WFBF
from page 19

Soil Conservation Service establish new standards for contour strip cropping allowing wider contour strips. This practice would encourage large farmers with bigger equipment to participate. We urge relaxing the requirements for entry into the Conservation Reserve Program for those farmers who are already using good soil conservation practices.

DRAINAGE AND WATER LAW: We urge the Legislature to revise our laws pertaining to navigable waters, to provide less regulation and to ensure that the riparian rights of landowners are better recognized.

We believe that the Wisconsin Department of Agriculture, Trade and Consumer Protection should be given more authority over agricultural drainage matters. Drainage laws now stand permit public and municipal fields to get by on little or no payments on drainage clean projects. Agricultural lands that border on or are land locked behind such public holdings have no recourse but to pay the entire cost of the needed projects even though on a benefited acres basis the public holding in many cases would have over 50 percent of the benefit. We support a uniform ruling on "benefit acres" based on drainage benefits and not cropped acres benefits as pertaining to Wisconsin Drainage Statutes.

We oppose DNR interference with water control and construction of dams, including those on cranberry operations.

RECYCLING: We support more recycling and expanded use of biodegradable packaging materials. We believe that rules and regulations should be established to drastically reduce the amount of material, including glass, being taken to the landfill.

We support stricter enforcement of our current litter laws and urge that beverage container suppliers have a significant return deposit to reduce the cost of cleaning up roadways and to reduce the losses incurred by farmers due to damaged equipment and injury to livestock.

FORESTRY: We support efforts to promote the proper utilization and management of our forest resources. We urge greater effort by the DNR to enforce compliance with the management contracts entered into under the Managed Forest Law.

WILDLIFE: In certain areas of the state the excessive wildlife population is causing severe loss of crops and income for farm families. We recommend the following actions be taken: reduce the deer herd by at least DNR goals, allow a two deer limit in problem areas, ensure night shooting permits where required to use effective large prey-shooting extensive crop losses, continue and expand the wildlife damage and abatement program including increasing the damage payment ceilings and lowering the damage payment deductible paid by farmers to $150, seek greater participation by farmers in Conservation Congress activities, allow landowners to transfer their preference rights for future services permits to relatives or the persons managing the farm for which the permit will be issued. We also recommend that the DNR and the federal government make every effort to raise sufficient funds to prevent mass March for the geese and increase the yearly goose harvest in proportion to flock growth.

We support legislation to permit counties to offer bounties on related control. We urge the use of leghold traps for continued predator control. We urge state and federal action to control blackbirds.

We urge that elected representatives of the Wisconsin Conservation Congress accurately represent the wishes of the Wisconsin sportmen and not just echo DNR staff.

AG CHEMICALS: We recognize the problems involved in the use of agricultural chemicals as they relate to our environment. We are concerned that farmers may lose the opportunity to use essential agricultural chemicals and drugs in an appropriate and safe manner. We urge users of these products to be aware of the dangers involved and to conform to recommended usage.

We believe that compliance with federally approved label instructions when applying ag chemicals should absolve farmers from liability for any contamination that may result.

We oppose a complete ban on the use of any agricultural chemical or drug unless it can be demonstrated positively by prolonged and responsible research that use of the product represents a clear and present danger to health or that its use would seriously jeopardize our environment.

We support research by the university system that will result in less reliance on agricultural chemicals for weed and pest control.

We support an expanded program by the Bureau to inform and educate the public on the need for agricultural chemicals.

We support federal indemnities to relieve catastrophic losses from accidentally contaminated farm products.

We support the use of alternate environmental protective chemicals for weed and pest control and urge the use of less dangerous chemicals. We oppose a complete ban on the use of any agricultural chemical or drug unless it can be demonstrated positively by prolonged and responsible research that use of the product represents a clear and present danger to health or that its use would seriously jeopardize our environment.

We support research by the university system that will result in less reliance on agricultural chemicals for weed and pest control.

We support an expanded program by the Bureau to inform and educate the public on the need for agricultural chemicals.

We support federal indemnities to relieve catastrophic losses from accidentally contaminated farm products.

"State of the States"

Wisconsin ranks atop FREE ratings again

MADISON, WI- A representative of Gov. Tommy G. Thompson has accepted, on behalf of the state, a national award recognizing-for the second year in a row-Wisconsin's environmental protection efforts.

State Energy Director Schott Neitzel accepted the award from the Fund for Renewable Energy and the Environment (FREE), which said Wisconsin ranked tops following evaluations in six separate environmental categories.

In accepting the award for Thompson, Neitzel, who coordinates intergovernmental programs for the Department of Administration, said:

"In his commitment to economic development, Governor Thompson reflects the views of state citizens who want to hand down a clean environment to their children. Wisconsin's natural resources have been the foundation of our economy since statehood and-if we properly care for them-cannot be allowed to erode in the hands of public and private investors alike."

"We recognize the need for a strong and uniform national approach to environmental protection," Neitzel added. "With this national commitment and support, progressive states like Wisconsin will be pitched against states that drag their feet."

This is the second year of the FREE award and the second year Wisconsin has ranked number one. This year, Wisconsin shares the top spot with Massachusetts.

Neitzel added that this year's honor is viewed by Gov. Thompson "not as an award, but as a challenge," to return next year as the number one state.

FREE is a non-profit, tax-exempt educational organization working toward a viable future by promoting a safe and healthy environment. Chairman of the organization is Denis Hayes, a San Francisco, California attorney.

Each year FREE selects a listing of six environmental topics to grade all 50 states to provide a "State of the States" perspective. Last year the states tied for the second place in air quality, solid waste management, hazardous waste management, groundwater protection and renewable energy and conservation.

Categories for judging the 1988 award included surface water protection, reducing pesticide contamination, land use planning, eliminating indoor pollution, highway safety, and energy pollution control.

Rounding behind Wisconsin and Massachusetts in the top five were California and New Jersey tied for third with 44 points, and Connecticut with 43. The lowest-ranking states included Nevada, Oklahoma and Texas, tied with 19 points, Arkansas and Mississippi tied with 17, and Wyoming last with 13 points.
Wisconsin cougars

Large cats roam Wisconsin again

"I'm convinced we've got them," says Bill Creed, wildlife research biologist for the DNR in Rhinelander. They're probably pets that escaped or were intentionally released, however, according to the biologist, and not a remnant population of the wild cougars that once existed in this region.

Still, Creed relates, cougar sightings have been made in Wisconsin, Minnesota, and the Upper Peninsula of Michigan. Sightings in the U.P. are not as uncommon as they are here, he says, but in both states the cats have been seen by DNR and U.S. Forest Service personnel. Reports from other reliable observers are just too numerous and geographically clustered to doubt that these people are seeing anything other than the real thing.

"For instance, we had a report of a sighting on Highway 47 between Rhinelander and Woodruff recently, and another sighting down on Highway 8."

Creed himself is "ninety percent sure" that pug marks he saw near one of his bobcat survey areas last September were those of a mountain lion. "And the big set had another set, small ones, probably a cougar kitten, next to it," he reported. Some other large feline tracks the biologist has observed in the wild also appear to have been made by cougars, he believes, but like the good, distinct track he saw in September, the others were obscured by mud or were difficult to identify with any degree of confidence.

According to records kept by the DNR's Bureau of Endangered Resources, cougars have been sighted in all different Wisconsin townships between 1973 and 1985. Regarding the status of the cougar in the state, the Bureau's "Endangered and Non-game Species Handbook" states:

This large, solitary cat, also known as the mountain lion, probably occurred throughout most of Wisconsin before the 1890's, particularly in valleys of the Mississippi and Fox rivers. The last verified recorded cougar in Wisconsin was in 1909. However, scattered reports have been received of cougar sightings, so it is possible that a few cougars may be found in the state today.

"Large scale logging of Wisconsin's forests in the late 1800's deprived the cougar of needed habitat, driving it from the state. While good populations of the western subspecies of the cougar exist, the eastern cougar is rare in the U.S. and listed as federally endangered."

The protected status of the cougar in Wisconsin is important to note; killing one can bring severe penalties. Besides, the animal is usually shy and retiring, and there would be little justification or defense for shooting one.
"Drain America first"

"Oiling" in arctic national wildlife refuge

by Andrew Feindl

Outdoors Editor

The U.S. Department of the Interior calls it "Section 1001," but to environmentalists and the like it is the Arctic National Wildlife Refuge (ANWR). Spanning a hundred miles of pristine coastline in Alaska's northeastern corner, ANWR is one of a handful of unspoiled arctic regions protected under national laws.

Although cold and forbidding most of the year, ANWR is the host of a rich and diverse ecosystem. Located off shore from the ANWR, the Beaufort Sea's frigid waters are home to whales, seals, walruses and a variety of marine life, while the tundra of the ANWR supports arctic foxes, wolves, grizzly and polar bears, ground squirrels, wolverines, muskoxen, Dall's sheep, and the majestic herds of Porcupine caribou. Hidden in the spring bloom of grasses and wildflowers are nests of ptarmigan, peregrine falcon and snowy owl. The ANWR is a prime example of a full-spectrum arctic environment. And it is here that the U.S. government wants to drill for oil.

Critics call the policy "drain America first." Promoted by U.S. Secretary of the Interior Donald Hodel, it calls for opening up much of the coastline and ANWR to oil drilling, ostensibly to end "our dependence on foreign oil." It is by far the most controversial plank of the administration's energy policy.

When the Alaska National Interest Land Conservation Act was passed eight years ago, pressure from the oil industry stopped ANWR from gaining the permanent protection it deserves. Instead, Congress instructed the Department of the Interior (DOI) to study the region for its oil and gas potential and to make recommendations to Congress.

In 1983 DOI reported back, recommending that drilling begin. Under this pristine wilderness lies 600 million to 8.2 billion barrels of oil. The mean estimate was 3.2 billion barrels, or enough oil to supply the United States for a little over six months.

For some, a six month supply of oil is enough reason to start tearing apart the tundra to build the massive infrastructure required to extract the oil. But a closer look at the reports calls even this prediction to question! DOI scientists admit that the chances of the oil being concentrated in such a way for cost-effective recovery are less than one in five. According to the Rocky Mountain Institute, the chances are one in a hundred that the region will produce a yield comparable to that of ANWR's productive neighbor, the oil field at Prudhoe Bay.

It is the premise of another petition that brought the oil industry here in the first place. And it is in this premise thatangers environmentalists. Contrary to industry assertions, Prudhoe Bay has not been the paragon of ecological integrity. Road and building construction has caused thawing of the permafrost and flooding, with effects on wetlands that extend well beyond the confines of the construction area itself. "Flaring gas and liquids spew black smoke into the arctic sky, and air pollution from Prudhoe is a whole rival to that of the city of Chicago."

According to the Natural Resources Defense Council, some 63 million gallons of waste water containing varying amounts of hydrocarbons, chemical additives, lead and arsenic have been released directly into the environment at Prudhoe Bay.

Regulators report up to 600 oil spills a year and five hazardous waste sites at Prudhoe are already candidates for clean-up under the Federal Superfund law. In addition, oil companies have been cited for numerous violations of federal and state environmental laws.

Opening Alaska's wilderness to oil exploration is only one example of the federal policies that favor short term oil supply over the nation's ecological integrity. Other DOI plans include leasing the entire Washington and Oregon coastlines for offshore oil drilling, a plan that analysts predict will yield roughly two months worth of oil. Also on the block are the environmentally sensitive waters of the Florida straits, where the DOI says that the chances are even that a major oil spill will occur in the next 35 years and the abundant New England fishing grounds called Georges Bank.

Risking these natural areas for a few months supply of oil is a crime against the environment, and against common sense!
Learning about Indian treaty rights

A course on treaties negotiated between 1817 and 1856 between the federal government and the Indian tribes in the state will be the subject of a new history course to be offered on seven Saturdays beginning March 30, at UWSP.

Professor David Wrone said he decided to develop the course because "there is a lot of concern about treaties, and many of them are rooted in imperfect knowledge of the way they are to function."

The offering is believed to be a first of its kind in Wisconsin. In addition to the lectures by Wrone, there'll be several guest speakers including a representative of the Wisconsin Attorney General's office who will address public law questions regarding state relationship to Indian laws.

Other topics of class meetings will be the basis for the treaties, their history, method of negotiation, problems in implementation, tribal government structures, history of tribes, sovereignty questions, federal and state laws and current problems with the agreements.

The professor explained it would be inappropriate to have speakers who oppose the treaties because the course is foremost established to provide historical and legal facts, "a definition of the subject."

The period when Uncle Sam and the Indians worked out agreements was, in Wrone's estimation, "a wonderful chapter in our national history--it's when we treated people decently even though we didn't have to. The treaties were believed to be the right thing to do and they happened," he observes.

The professor, an expert in reform movements, has spent recent years doing extensive research on the history of the state's Indian tribes. Last year, he penned a major piece published in the Wisconsin Magazine of History on the history of Indian treaties.

There were upwards of twenty treaties negotiated with Indians in lands now within boundaries of Wisconsin. Wrone says one of the more interesting ones to him was in 1838-the Treaty at the Cedars (between Kaukanua and Green Bay) in which the Menominee Indians ceded lands they owned between Appleton and Stevens Point, and Shawano and Portage for guarantees that they could keep their remaining properties and receive small annuities for each of its tribal members.

Wrone's course will be offered from 8 a.m. to 4 p.m. on March 30, April 2, 16, 23, 30 and May 7 and 14 in the Helen Parkhurst Lecture Hall (Room 116) of the Professional Studies Building.

People associated with the Wisconsin Indian Resource Council, headquartered on the UWSP campus, were among those who encouraged Wrone to develop the course, the professor said.

Students may sign up in advance at the Office of Registration and Records in the Park Student Services Building or at the first meeting of the class.

Greyhound also offers an unlimited mileage fare for $59.00 each way. Some restrictions apply. © 1998 Greyhound Lines, Inc.
**SPORTS**

Wild card bid still alive

**UWSP skaters split games, lose mini-game**

by Scott Huelskamp

Sports Editor

Sports can be exciting. Sports can be thrilling. But sports can also be cruel. Sometimes cruel enough to let one 15 minute mini-game decide the future of the UWSP hockey team.

In last weekend opening round of the NCHA Invitational playoffs UWSP defeated the Bemidji State Beavers 4-1 in the first game but were soundly defeated in game two, 8-1. With the series tied at one game each, a 15 minute mini-game would decide who would go on to play River Falls for the NCHA championship, and a berth in the NCAA Division III tournament.

Bemidji State's Tim Tyler won it for the Beavers just two minutes into the overtime period with a goal.

The Pointers, with a record of 20-8-2, still have a chance to get one of two at-large bids to the NCAA Division III Tourney. The bids will be given out in two weeks.

The Pointers executed dominating play on the ice early in Saturday's game and took command in the opening minutes. Ralph Barahona slapped in two goals to extend his goal-scoring streak to ten games.

Even though they weren't in need of points Pat McPartlin and Mike Green added one more to the tally. Goalie Pat Watson was credited with the shutout and saved 31 shots.

Coach Mark Mazzolini said of Barahona's play, "He took charge and dominated play when we were on the ice. I think it's great when they put someone on the ice whose sole purpose is to stop you but he still can't.

"All-in-all I thought it was an excellent team victory as everybody contributed in their own way."

"We executed our system to a "T". This was the most system-oriented game we've played in my three years here," said Mazzolini.

Sunday was a complete turnaround from the previous day's play as the Beavers shot the puck through Watson like he was a piece of Swiss cheese. They knocked in five goals in 21 shots in the first period to rack out to a 5-0 lead and Point was virtually out of the game after only one stanza.

The lone Pointer goal came off the face-off to start the third period. Shawn Wheeler was victorious in a one-on-one confrontation with the NCHA's leading goaleader, Shaw O'Shea. Barahona got credit for the assist. "After they got the first goal it was just a snowball effect," said Mazzolini. "They did things we expected them to do but we didn't do the things we needed to do. They outworked us and really dominated on the first period."

"It's very disappointing. We come out and play the best game of the season and turned around and played or worse game in three years here." – Mark Mazzolini

The Pointers entered the game as the fourth ranked team in the NCAA Division III-Coach poll and, despite the loss, have an excellent chance of receiving a tournament bid.

Bemidji State, 18-3-5, entered the contest ranked sixth.

**Men and women sprint to third, fourth finish**

by Scott Huelskamp

Sports Editor

"On the whole, I thought we looked tired and did not have what I considered great performances. I have worked our people very hard the last two weeks and it looked that way," said coach Rick Witt of his men's track team.

Despite being fatigued, the men's team still racked up 113 points and a third place finish at the Oshkosh Invitational last Friday.

The host team placed first with 180 and second place went to Whitewater with 171. The Pointer s finished seventh with 225 points.

The women's team could not come up with the four points necessary to overtake Whitewater for third place, and had to settle for the fourth position with 171 points. The Oshkosh women took the meet Saturday at Oshkosh by crushing the opposition and garnering 227.5 points.

North Central College placed second with 228, followed by Whitewater with 75. Rounding out the women's field was Carroll College, St. Norbert, Carthage, Ripon, Lawrence University, UW-Platteville, and Beloit.

"Things are going to be a lot tougher for us," said coach Len Hill. "This was a very interesting meet for us. We ran good times and overall we was very pleased. We did make some mistakes that we cannot afford to make next week at the WIAAC meet."

**Men's Results**

The 800 relay team of Peter Larson, Tim Jakave, Mike Christensen and Theo Blaine ran a first place finish in 1:33.1. Ben Baumgart's high jump of 6' 8" was good enough for first, as were runs by Steve Allison in the 800 (1:55.1) and Brad Houset in the 200 hurdles (25.7).

Second places went to Jon Elmore in the 3,000 (9:37.1), Tim Olson in the 3,000 (3:53.9) and Larsen in the 60 yard dash (6.5) and 100 dash (22.3).

The mile relay squad of Houset, Greg Sikora, Christensen and Allison was second in 3:38.0.

"I was not particularly happy that we finished third in the meet, as you never like to lose, but we did use this meet as a final test to find out how we would up set our conference team for next week," said Witt. "We rested some of our men and then ran others in off events."

"We did have some bright spots on the team as I was especially pleased with the 800 relay team. They ran extremely well. Our men in the 1,500 did a nice job, as some of those needed to have a good time to have a seed for conference while others needed to use it as a tune-up.

"Next week is the big one for the indoor season and we need to have every man do his part, as we have some people who need to win next week, while others need to get second, third, fourth, fifth, or sixth if we are to have a good showing at the conference meet," said Witt.

**Women's Results**

Although there were no first places among the women's team, the distance events produced

**Wessel's efforts not enough in Point loss**

by Kevin Crary

Staff writer

Point closed out their regular season play with a 90-97 overtime-timeout-battled back against fourth place La Crosse, Saturday.

The loss was the Pointers third straight and placed them in a tie for sixth place in the WSC with Superior at 6-10. Point finished with a 14-12 mark overall.

Craig Wessel had been the most overall outing of the season, finishing with a game-high 23 points and 30 rebounds. "Wessel played his best game ever," said Coach Bob Parker.

The seven-foot center made 8 of 10 field goals and was seven for nine at the free throw line. His 20 rebounds, including seven offensive, is a season-high. Todd Christianson and John Holmes, Point's two leading scorers, were held to just eight points each. Tim Sonnenstag and Chas Prenchoske added seven apiece.

"We played very hard," stated Parker, "but for only three quarters of the game." The Pointers, sparked by eight Wessel points, including a dunk, and three-pointers from Christianson and Sonnenstag, built a 43-25 advantage with 8 minutes 21 seconds to play.

But just two minutes later, after a nine-point Indian charge and a Holmes technical that resulted in his disqualification from the game, the once lopsided score was at 43-38. The Pointer drought was due to numerous turnovers. They committed a total of 20 in the contest.

Point continued to have trouble putting the ball in the hole as they found themselves down by nine with just 1:30 remaining. Wessel then tied the score at 49 with 1:22 left by hitting two free throws after grabbing a missed second free toss by Prenchoske and getting fouled. Neither team was able to score the rest of the half as the buzzer sounded, ending play in regulation.

Point controlled the tip in overtime but couldn't control La Crosse's Bob Zenz as he scored seven of his 16 points, including a three-pointer, in the extended play and helped the Indians outscore Point 11-4.

Paul Everard had a team-high 18 points for the winners. The Pointers will travel to Kenosha to begin their District 14 Playoffs against UW-Parkside Saturday at 7:30 p.m. in first round game.
WSU names all-conference squad

Sports Information Office

Senior Todd Christianson of the UWSP men’s basketball team topped off his career as a Pointer when he was named to the Wisconsin State University Conference All-Team. John Holmes, another senior on the squad, received honorable mention.

During his four years at Stevens Point, Christianson is currently 16th in the Point scorer list in Pointer history with 875 points. This season, he has 484 points for an average of 18.3 per contest. He also has pulled in 5.4 rebounds, dished out 2.6 assists and has 1.3 steals per game.

He shot 47 percent from the field, 41 percent from three point range and sank 74 percent from the free throw line. Christianson, who has started every game this season for Point, was co-captain of the team.

While at Stevens Point, Christianson was a part of three WSIC title teams while gaining two berths in the NAIA National Tournament in Kansas City. ThePointers finished in the runner-up spot his freshman year, losing by two points in overtime to Fort Hays State KS.

"Todd is a fierce competitor who certainly deserves to be all-conference," said Head Coach Bob Parker, "and not only for what he has done this year, but all four of his years. He is a fine outside shooter who also has the ability to score inside which makes him a great all-around player.

He is the type of individual that typifies the kind of person that has been our program at Stevens Point.

Holmes, a transfer from Valley City State (ND), became eligible at the semester and since then has made many contributions to the team. He currently leads the scoring leader and rebounder on the team, averaging 17.3 points and 6.2 rebounds per outing.

He is shooting 52 percent from the field and 62 percent from the line. He has also dished out 2.6 assists while picking up 1.2 steals per game. While at Bemore Junior College (OK), Holmes was named to the all-conference team as a sophomore.

"John is one of the elite players in the conference," said Parker. "He would’ve been all-conference had he played more than one semester. He is an outstanding player who also has the ability to shoot from outside.

"His trademark is how consistently tough he plays every game. And he’s even better when the chips are on the table."

Team of Greenberg and Zowin play tough at Madison

by Scott Huelskamp

Sports Editor

Only one of the three UWSP men’s tennis teams doubles squad’s came back from the Cherokee Invitational Tournament in Madison, with a chance.

The number one team of Bryan Zowin and Doug Greenberg split their four matches to four different competitors to finish with a 2-2 record on the day.

The number-two team of Gary Palmer and Steve Showalter took their first match to Wheaton, Illinois, rebounded to beat Platteville, and then lost their last to LaCrosse.

Tim House and Todd Smith (4) were defeated in their first two matches and were eliminated from the one day tournament. Bryan Banziler and Pat Smith (4) were beaten by LaCrosse and were sent packing after bowing to their next opponent.

But Zowin and Greenberg played each of their challenger tough, playing the full three sets in three of four games. They dropped a 6-3, 6-7, 6-4 loss in the opening match. After getting rid of the winning game jitters, they responded by taking a sweeping Osbourn 7-6, 6-3 and taking Rose-Hulman, Indiana, to three before winning 7-6, 6-4, 6-3.

Palmer also pulled off a 6-4, 7-6 win over LaCrosse to the limit before bowing 7-6, 4-6, 4-6.

The Wheaton match was de-

Weighting 154 pounds from Wauupaca, beat Eric Chia of UWSP’s 9-4, in the championship match. It was Burns’ first win over Chia in four attempts. He advanced to the finals by beating Kevin McGraw of Whitewater, 3-5, in overtime.

Ryan wrestled a spectacular travel match with Chia, said Heat Coach Marty Lory. "He had never beaten Chia in four tries but wrestled the best I have ever seen him in winning the first."

Wrestling at 141, Burns, a junior at UWSP’s Men’s Wrestling, qualified for nationals with a wild card bid.

"Bob also wrestled well all day," said Loy. "He wrestled the same guy (Bender) as he did in the conference finals last year and also had a good match with him this time and the score was a lot closer."

Both of these wrestlers who fared well but did not advance are junior Gregg Kuzynski who placed third and senior Wayne Bou-

Two grapplers advance to Nationals

Sports Information Office

UW-Stevens Point seniors Ryan Burns and Bob Cabin played in the NCAA III National Wrestling Tournament in a West Regional Qualifier over the weekend at UW-Whitewater.

Burns, a 138-pounder from Wauupaca, lost to Eric Chia of UWSP’s 9-4, in the championship match. It was Burns’ first win over Chia in four attempts. He advanced to the finals by beating Kevin McGraw of Whitewater, 3-5, in overtime.

Ryan wrestled a spectacular travel match with Chia, said Heat Coach Marty Lory. "He had never beaten Chia in four tries but wrestled the best I have ever seen him in winning the first."

Wrestling at 141, Burns, a junior at UWSP’s Men’s Wrestling, qualified for nationals with a wild card bid.

"Bob also wrestled well all day," said Loy. "He wrestled the same guy (Bender) as he did in the conference finals last year and also had a good match with him this time and the score was a lot closer."

Both of these wrestlers who fared well but did not advance are junior Gregg Kuzynski who placed third and senior Wayne Bous-

Joining Christianson on the first team are: Steve Showalter and DeAndre Woods of conference champion Platteville; Duane Vance and Robert Barnes of second place Whitewater; LaCrosse guards Corey Block and Bob Zem, Eric Davis of Eau Claire; Rie Kurzynski from Oshkosh; and Superior guard Max Christianson.

Also being named honorable mentions were Tim Blair and Craig Campbell of EC, Mark Ziefel (Oshkosh), John Kinney (Romine Falls), Mark Stevens (Stout), and Whitewater forward Jeff Jeffs.

Showalter, a 6-4 senior from Baraboo, finished second in the WSU in scoring with 20.3 points a game with a high game of 31-2 during the Pioneers to a conference championship. Showalter’s teammate, DeAndre Woods, led the conference in assists, dishing out 6.1 a contest. He also made 81 percent of his free throws and averaged 16 points. Woods’ basket in the final seconds in last week’s game gave Platteville the conference crown.

Whitewater guard Duane Vance was an unstoppable force in the WSU this year. He captured the scoring crown with 21.3 average. Vance, a 6-5 guard from Beloit Memorial, led the Warhawks in either scoring, assists or rebounds in almost every game this season. Barnes, a former Wisconsin high school player-of-the-year at Racine in the field, was the number three in the scoring race to seventh, finishing with a 17.6 mark.

Both of LaCrosse’s gunners guards made the first team. Known for their three-point accuracy Corey Block made 36 of 67 three- pointers for 53 percent, first in the WSU. Bob Zem took the number-three spot by canning 39 of 61 (48 percent). Zem also contributed 17.1 points a contest, and his 99 percent free throw shooting was good for the number-one position.

Eric Davis pulled down 9.3 boards a game, second only to Burns, and contributed 14.3 ppg with tough inside play.

Rie Kurzynski, a 6-4 sophomore from DuPage, leads in assists with 8.4 boards and 19.1 points (finth), which included an smashing 27 of 55 (49%) from three- point range, despite being a center in the Titan offense.

Despite playing for the sixth place Yellowjackets, Max Chris- tile finished third in the scoring race with 20.4 a ppg in free throw percentage with 85%.

Platteville coach Bob Ryan garnered the WSU coach of the year honors by winning the conference with a 14-3 mark. In addition to finishing on top of the conference, Ryan’s Pioneers finished second in offense average (83.8) and tops in team shots behind only the team lead goal (78)% average.

Drews who finished fourth. There were no team scores kept in the regional qualifier.

Turn to page 23
Sports information Office

With LaCrosse looking like the oddman favorite to capture the WSC indoor track and field title this weekend in Oshkosh, head coach Rick Witt and the UW-Stevens Point men's track and field team will battle a host of schools for an upper division finish.

"On paper LaCrosse should win the meet," said Witt. "They really have no weaknesses."

"After them it is wide open with Eau Claire, Oshkosh, Whitewater and us all battling for the top spots."

Witt believes the Pointers have as many as a half-dozen individuals and two relays who could garner conference championships.

Astron Keysen should be amongst the favorites in both sprints while Mike Christian will challenge in the 800, Steve Allion, in the 1,000, and Tom Moris in the 5,000 will also give the Pointers legitimate contenders.

In the field events, triple-jumper Scott Laurent and high-jumper Ben Baumgart are the Pointer hopefuls.

The 880 relay of Pete Larsen, Tom Jabkine, Christian and Keysen along with the mile relay of Brad Houndt, Kenney, Christian and Allion should also be amongst the WSU elite.

The two-day meet is dominated with preliminaries on Friday but the finals for the pentathlon, pole vault, long jump, two mile and shot put will take place on the opening day.

"Friday may put us in a hole because we have inexperienced people in many of the finals."

Also, Ron Schraml, who would have had a good chance to place in the shot put, will not compete due to back problems.

Witt says the lack of an indoor facility and the cold weather has slowed the training effort of his team.

"I'm not sure how far we have come because we have only had the opportunity to train outside for the past two weeks. This will really be the first meet that we will have trained hard for, and been properly rested going in."

Witt feels that if UWSP is to mount a serious challenge, the freshman will have to come through.

"We are really asking alot of our young people," he said. "We know we have five or six veterans who will score for us but we need to get personal records from a large percentage of our freshmen.

"We have tried to tell them what this meet is like but you really do have to experience it to get a feel for the level of competition. Our ability to handle pressure will be a key."

Those athletes that meet the national standard and are in the top 11 in the country will qualify for the NCAA National March 11-13 in Northampton, Mass.

Applications are now being accepted for the Summer Orientation Leader Positions. Full-time from June 2-July 14, 1988. Sport's shorts

Lady Pointer superintendent Sonya Sorenson won her second consecutive WWTAC scoring crown, averaging 11.6. She also finished second in rebounding with 11.5 caroms a game, and third in field goal percentage (.946). ... The Lady Pointers will not have a chance to defend their national championship. They finished the season in third place in the WWTAC with a 10-4 record.... UWSP women tennis player Doug Greenberg, when asked how the conference competition looked for the upcoming season, said, "LaCrosse looks to be tough again this year and Eau Claire, Oshkosh, Whitewater, as well as our team, are all in the middle of conference. But Platteville and Superior are still looking for people who don't play with wooden rackets..." Craig Wessel of the Pointer mens team was named District 14 player of the week for his third point, 39 rebound performance in a losing effort against LaCrosse last Saturday.... In District 14 playoff history, the last team in to win the title besides Eau Claire was Stevens Point in 1985, 84, and 83. ... Prior to that, Eau Claire had won four consecutive district championships from 1979-82. The last team other that Eau Claire or Stevens Point to win the district title was Parkside, with four straight championships from 1975-78. Parkside will start two freshmen Saturday in the opening round of District 14 action against Point. They are 64 forward Everett Henderson and 66 forward Rodrick Wade....

Applications must be submitted by Friday, March 11, 1988.

UNIVERSITY OF WISCONSIN - STEVENS POINT
1987-88 SEASON
BOX OFFICE - 346-4100

THREE SISTERS
Women by Anton Chekhov
Translated by Lamford Wilson
March 4, 5, 6, 7, 11, 1988

This modern classic of the post-revolution Russian playwright contains the elements of two of the 20th century's most distinguished dramatists: Chekhov and Brecht combined in one remarkable play. "Theatre and Dance in the College Classroom" reviewed in the Wall Street Journal describes Three Sisters as "aadminerably effective way of life in the Russian House".

Jansen Theatre '88
April 22, 23, 24, 1988

An evening of dance, choreographed in theme and style, featuring original music and song, interpreted by and students talented, imaginative, entertaining and humorous.
March Madness: Pointer's in District Playoffs

Sports Editor

March in Northern Wisconsin usually signals two things: 1) a spring thaw, and, 2) the District 14 men's basketball playoffs. This season UW-Stevens Point finds itself in a strange position. The are not seeded number one or two and they do not have the home court advantage. UW-Platteville is currently in the top one position in the Dunkel Ratings. UW who you are probably saying. The Pioneers of Platteville aren't usually in the top six of the eight team playoff field, let alone number one. They received the top spot by winning the WSUC championship last week and they are now favored to win the district and start singing “Kansas City here we come.” The teams have earned their seeds and the pairing have been set. Games will begin this weekend.

Platteville (1) hosts Marian (8)

Pioneer coach Bo Ryan will be waiting for the Sabres of Marian at UW-F, 1-2 in the WSUC, will hold the home court advantage as long as they keep winning. Steve Showalter, the WSUC's second leading scorer at 10.1, and 6-3 swingman DeAndre Woods, who led the conference with a 6.1 assist average, should give the Sabres all they can handle. And if they aren't enough, Rock Ripley and Randy Katin can take care of any loose ends. Marian's defense is anchored by senior forward center Joe Bausboeuf, a transfer from Division I Centenary. Guard Casey Jackson and Robis Talbot can also fill-up the hoop, but it will take a herculean effort to upset the Pioneers.

(2) Eau Claire hosts (7)Viterbo

Eau Claire, 19-7 overall, boasts all-conference center Eric Davis, 14.3 pgp, and honorable mention selections Tim Blair, a transfer from UWSP, as the number two team in the district. The Blugolds were last year's District 14 representative, beating Stevens Point in the final game, and it is usually twice as tough to beat them in the playoffs. Eau Claire is coached by the dean of WSUC mentors Ken Anderson. They have been in the championship game the last three years, so experience is definitely on the side of the Blugolds. Viterbo is a relative stranger to the district playoff and they should remain strangers to the rest of the field after their opening game.

(3) Parkside hosts (6)Stevens Point

In the two games between Parkside and Point this year Point is 2-0, but both games have been close. Point won 55-48 at the Quandt Fieldhouse back in December and again at the Parkside PCC center a week later 67-66. All-Conference guard Todd Christiansen and honorable mention pick John Holmes, fourth in WSUC scoring with 19.4 pgp, lead the Pointers, who finished sixth in the conference with a 4-10 record, 14-15 overall. UWSP has won the district two of the last four years and first year head coach Bob Parker will be trying to lead the underdog Pointers to KC once again. One of Parkside's top players, guard Al Steel from Kenosha St. Joe's, was ruled academically ineligible several weeks ago and will not play. This one should be a carbon copy of the last two meetings.

(4) LaCrosse hosts (5)Oshkosh

LaCrosse will probably rely on outside shooting and the three-point bomb to advance in the playoffs. The Indians have two of the WSUC's top shooters from three-point land in Corey Block (33%) and Bob Zen (40%). Zen is also averaging 17.1 a game, including 90% from the free-throw line. Both players were named to the WSUC first team. The Indians, who finished at 4-8 in the conference and 17-4 overall, also have Willie Arnold hitting the boards for 7.5 a contest. While LaCrosse will be taking the outside shots, the Oshkosh Titans will be going inside to their own All-Conference player, 6-6 center Ric Kuenert. Kuenert collects 8.4 rebounds a game and scores 19.1. But if it gets too crowded underneath the hoop for his liking he can also hit the three-pointer from outside. He was second in the WSUC in percentage from the promised land, hitting rock bottom on 27 of 56 attempts for 48% for the 7-3 Titans (14-12 overall).

Point has beaten Eau Claire once this season and almost knocked off Platteville, losing only by two. Both LaCrosse and Oshkosh have played the top two seeds tough on their home courts this season also. The home court advantage will be a definite key throughout the tournament. But don't give up hope yet, stranger things have hap-pened in the District 14 play-

Stevens Point plays UW-Parkside at Parkside, Saturday.

50 Free Champ

Qualifiers

Several members of the Pointer men's swim team earned all-conference honors at the conference meet two weeks ago. The first two finishers from each event comprise the all-conference swimming team. The National Meet is this weekend.

50 freestyle, Kevin Parham, 21.77, 1st
100 freestyle, Ken Brumbaugh, 1:45.90, 2nd
100 backstroke, Nino Pisciotta, 55.60, 1st
200 backstroke, Nino Pisciotta, 2:00.61, 1st
100 breaststroke, Andy Wayne, 1:32.40, 2nd
400 medley, Nino Pisciotta, Andy Wayne, Chris Larson, Ken Brumbaugh, 3:38.18, 2nd
400 freestyle relay, Ken Parham, Tom Wayte, Jeff Shaw, Ken Brumbaugh, 3:14.77, 2nd
800 freestyle relay, Brett Fish, Mike McLellan, Tom Wayte, Nino Pisciotta, 7:13.81, 2nd

Nino Pisciotta
2 Individual Titles

Woods' shot is gold for Platteville

How fitting that the game between UW-Platteville and UW-Whitewater would come down to a last second shot for the WSUC men's basketball championship.

Platteville had the ball with 13 seconds remaining in last Saturday's game, played at Whitewater. Platteville's 6-2 swingman, DeAndra Wood, hit a spinning one-handed 12 foot jump shot, over two defenders at the buzzer to give the Pioneers an 84-82 victory.

Both teams entered the game with identical 13-2 conference records. Both teams had one of the top scorers in the conference (Steve Showalter, UWP and Duane Vance, UWU). And the two teams were ranked one and two in offensive average per-game in the WSUC, with Platteville first. For Platteville, it is their first conference crown in more than ten years. It is also the first time they have finished in the top three in the WSUC in a decade.

But for Whitewater it is simply another case of almost winning the title.

Warhawk superstar guard, Duane Vance, tied the score at 82 by hitting two free-throws with 13 seconds left. Despite going into the bonus situation with 11 minutes to play, Platteville was not able to capitalize on it.

The Pioneers opened up a 40-39 halftime lead behind first half points by Showalter, Showalter, second on the conference scoring list, bettered his average by ten and finished with 29.

The game stayed close throughout the second half until Woods' shot gave Platteville the win.

The win increased Platteville's record to 14-2 in the WSUC and 22-4 overall, while Whitewater's mark falls to 13-3 and 11-4.

Intramural News

Congratulations to the "Horse Tourney" champs. Men's first place Russ Lange and men's second place Burre Hinken. Women's first place Stacey Stephens and women's second place Julie Vehmichen. This past weekend the excitement was not only in Calgary, but also in the Quinte Fieldhouse. The champs of the first annual Intramural Basketball tourney were "The Woods." As action-packed championship game featured "The Woods" against "The Brothers." These teams met twice in the tourney. Members of "The Woods" included: Mike Mack, Jim Kasib, Tom Sullivan, Brian Donner, Pete Miller, Jim Patterson, Mike Molinki, Tim Frichetti and honorary player Brad Sible. Thanks to all who participated! A special "Thanks" to the professional I.M. staff who helped make the tourney a success, and a special, special thanks to Tom Polkover for his outstanding job as coordinator. Thank you, Heather.

IT'S HAPPENING AGAIN!

Make appointments in the U.C. Concourse, Allen & DeBot Centers March 2, 3, 4, 7.
From trees to cabins

A new log cabin to be used by overnight guests and a new bathroom will be constructed this year at the Central Wisconsin Environmental Station near Necedah.

The facility, which has gained national recognition for its environmental education, can serve to advance environmental education for youth, adults, and also will be getting a new home.

Mary Daritis, who has headed the station nearly two years now, has grown aware of the importance and value of having an accessible director and will be moving to Alaska. A national search for a successor will be conducted.

In the annual report of the station, compiled recently, it was announced that construction has already begun on the fifth of six new log cabins scheduled. The cost is about $67,000, most of which has been collected from donations from individuals and businesses through cash and in-kind awards. Construction will be done by a crew from the Wisconsin Conservation Corps.

The bathhouse, which, like the guest cabins, is expected to be completed this summer and is currently seeking funding sources. A private contractor will be hired for the work.

During 1987, the station provides reservations at its cabin facility for public parks throughout the region and is serving many groups and adults. The total was about 900 less than the all-time high counted one year ago. Activities are held there all year.

Uwharrie Duo playing here

An exhibition by "Wisconsin Artists" has been opened this spring season in the Edna Donhauser gallery at the University of Wisconsin-Stevens Point.

The mixed media show which will run through March 3 features work by art faculty members Diane Bywaters, Kathryn Vajda, Robert Stowers, Norman Keana, Richard Schroeder, David Hope, and student gallery director Gary Hagen, plus a number of works by UWSP's visitors.

The annual juried student exhibition will open with a public reception from 7 to 9 p.m. Wednesday, March 23 and continues until April 6. The art work will be judged by Paul Demoua, professor of art at UW-Oshkosh. The top cash award will be $50 and purchase awards also will be made by the gallery.

The season will conclude with two student B.F.A. shows from April 4 to 28. One show is entitled "Promises" and the other is entitled "Promises, Promises." The exhibitions will be open from 10 a.m. to 4 p.m. Monday through Friday, 1 to 4 p.m. Saturday and Sunday, and on the evenings of events in the College of Fine Arts.

Tennis, from page 25

came our feelings of fatigue, we were still excited.

"In the consolation finals against LaCruse, it was a case of not winning the big points," added ZOWN. "Saturday's play gave us a positive outlook for the season as we head into spring break."

"I think the reason we work fairly well together is because we communicate well on the court with each other."

ROTC members pull double time as UWSP athletes

by Darin Leveraus

ROTC Special to the Pointer

ROTC in a student's curriculum presents great demands. As UWSP students, we all know the commitment required to do well in our academics. In the Point Battalion ROTC Program we have six students who have gone beyond the normal expectations placed on any student. Not only do these students perform well in academics and ROTC, but they are also on the university's first varsity athletic team.

Six students from the "Point" Battalion compete in varsity athletics. Brent Harder, was an outstanding outside linebacker who helped lead the UWSP football team to the NAIA Division II National Championship. Assistant Coach John Miech states, "In order to play Brent's position it is very important that the player have a great deal of self-discipline. One mistake on his part would likely cost him a score for the opposition. Brent works very hard, he is off-season, which is essential in to-day's football. Brent shows aggressiveness and intensity, as well as being a team player and fits in well with the rest of the players. He provides leadership and is a key part of our team."

Tammey Fieck, an MS IV, is a member of the UWSP swim team. "The unique thing about Tammy," says Coach Red Blair, "is that Tammy didn't start swimming competitively until she got to college, which is a major accomplishment in itself. Tammy has a great deal of determination. When she puts her mind to something, she's got it set done. I work them hard. I don't know of too many other people that could jump into a sport as difficult as swimming at the college level and perform as competitively. I guess you could say that I'm a Tammy Fieck fan.

Troy Torgerson, an MS III, is a member of the UWSP cross-country team. "Troy found out how difficult the transition was to the college level," states Coach Rick Witt. "He made the transition very well and quality for you can see that in his first season. Troy is very competitive and will be an asset to the team for the next few years."

Tami Fieck, an MS II, is a member of the UWSP cross-country team, also coached by Rick Witt. "Tami is the type of person you like to have on your team. He's not the big scorcher, but he's always there to do the little things that aren't listed as points on the score sheet. Scott is the model team player."

These students are typical examples of "Point" Battalion cadets - some of the finest students on campus. Commitment and dedication are words very familiar to these students who will be leaders in tomorrow's Army.

Participation in varsity athletics at UWSP has not affected the students in their academic work.

Dr. Troy Torgerson, an MS IV, is a member of the university's football team. The team competes in varsity with the other WIAC schools. He is a valuable asset to the team. "I'm a football player and fits in well with the rest of the players. He provides leadership and is a key part of our team."

The consequence of early rising

by Karen Rivedal

Early that morning I decided to do it. I woke up, walked to the bathroom, and knew. The face that stared back at me in the mirror was bored. Fed up to the eyebrows with aimless sameness. Turning away, I marched down the hall to the phone and dialed a number. I would test my hair.

The woman at the door, I paused to see her. Her look was not that of a woman. It was a male look. She stared back at me in a white towel. "What do you want?" she snapped. "So, you go to school here?" she asked. "Karen, you can step over to the middle chair now." I said OK and wandered over. My hairdresser was busy so, I sat down and studied my reflection in the mirror. It replied, "You have made a grievous error."

Just then Bobbie-Sue-the-beautician arrived. She unclothed a white towel with a quick snap and fastened it around my neck. "Hi Howareyou? Whaddyyu havent mindday?" she exclaimed. I stared at her eighteen-year-old dark-rouged, red-lipped face and the remnants of my courage ebbed away. "Oh, well, I thought I'd get a few highlights. Blond maybe, or slightly auburn." "Oh!" she screamed. "Why don't you come back here to the bowl and we'll give you a shampoo?" I figured I didn't have much of a choice.

Back in the chair, she began to comb through my hair and smears on highlights. "So, do you go to school here?" she asked.

I told her I was a paper science/pre-med major.

"Oh," she said. "One of my friends is taking that too."

Five minutes later, the highlights were on and she wrapped a big plastic bubble around my head. I sat there looking like a very large June bug and wondered why I wasn't somewhere, anywhere. Later, she came back and undid my turban. When it was off, she looked down and said "Oooh!" the way you do when something slimy brushes your leg in a lake.

Heads turned, and the chief beautician ran over. I looked up at the girl and repeated "Oooh!"

"No, no, it's fine, just fine," the owner assured me in soothing tones. "You have to comb through it. See, isn't that nice?" I was unconvinced. The mirror they gave me showed no damage, but very little change. (I decided on another coat, and it was back to the shampoo bowl for me.

During the rinse, the girl told me how everyone who worked there asked the owner for her opinion, since she knew so much, but how they usually
