Students may invite any number of guests to the ceremony. She noted that in years past they were limited to 3 or 4 people a page.

There is no rain site though. She noted that “If it rains we will be wet.” However, she noted that Madison’s outdoor commencement was only postponed once in over two decades due to dangerous thunder and lightning.

Confidently she asserted that the ceremonies at Goerke field would solve two major public relations problems. One was graduation ticket scalping and the other was the low number of guests each student could invite.

She noted how, in the past, there were some “ugly public relations incidents.” Some of the students turned scalpers at others expense.

Parking should be no hassle. The department had made an additional street parking traditionally allowed during major events at Goerke, the lots of P.J. Jacobs and Mid State Tech will also be open. She was exploring the possibility of using a shuttle from lot Q to Goerke as well.

### No Brat Fest?

#### by Paul Jankowski

**News Editor**

This year may mark the second consecutive year of UWSP going without a Brat Fest. According to John Mielke, Vice-President of Education for Sigma Tau Gamma, there is as of yet, no location nor date for the once annual festival.

Recently, the Public Protection Committee of the City of Stevens Point recommended to deny a beer license to Sigma Tau Gamma’s proposed activity. According to Alderman Jerome Kaczmarek, “the beer license and the holding of the festival were considered as a set. Hence the denial of the license torpedoed the fest. Brat Fest was proposed to be held in Pfiffner Park, Friday, May 1st.

City Police Captain Leonard Perlak said that he wasn’t opposed to it provided that it was held on Tuesday or Wednesday. He said that “I have no objection to (it) being held in the middle of the week.” He noted that this would be the best time for the department because Thursday, Friday, and Saturday nights were their busiest night.

Kaczmarek is ardently opposed to the festival being held in a city park. Of the aldermen, he said, “Most of us want a family park,” and we “consistently had the problem of the intoxicated from Brat Fest. He noted that some of its problems were vulgar language and urinating on people’s lawns.” Concerning vandalism, he said, “that’s a known fact especially along the “Briga Street Corridor.” He reiterated that the vandalism instances he was noting occurred during Brat Fest.

Mielke said that the fraternity is being unjustly blamed for all the student vandalism in Stevens Point. He said, “I definite­ly feel that we’re getting blamed for anything had done by college students.”

At the recent Public Protection Committee meeting, Mielke said there was “a lot of animosity” between the students and the aldermen. While there he noted, “we got blamed for all the bad things,” that happened.

### Le bois/Andreska wins SGA elections turn to page 4 for all the election totals

#### by Sharon Hallett

**Staff Writer**

A First Aid/CPR certification mini-course was instructed by Becky Bauer from the Red Cross and sponsored by the University Activities Board. The course was conducted over a two week period. First Aid certification took place on Monday and Thursday last week and the CPR certification was held this week on Tuesday, Wednesday, and Thursday.

Many people in attendance needed the certification because of summer employment. Bauer began the class by demonstrating artificial respiration on "Anna," (the artificial respiration dummy), and then students viewed films on first aid and bandaging techniques. Between films students had time to practice and certify for artificial respiration and other techniques.

Bauer stressed the importance of the Emergency Medical System (EMS). There are three steps to this system: 1. Immediate care when you come on the scene. The most important procedure in this step is artificial respiration. Why? The page 13

#### Budget figures released

**by Paul Jankowski**

**News Editor**

Official budget figures for Student Government Association annually funded organizations are now available. Over $250,000 was allocated in the process. See the table for each annually funded organization’s total.

Highlights of the 5 month long budget process included SGA’s mammoth annual budget session Sunday, March 6th, a veto of appropriations for STAND and the Performing Arts, and finally a follow up budget session at last Thursday’s Senate meeting. At that Senate Meeting, five groups, who could not be heard on the Sunday, (March 6th) meeting, due to a dictograph failure, had their requests deliberated and approved. In some cases, such as the Pointer, SGA and SETV, these allocations were modified.

According to Susan Wilcox, SGA Budget Director, money for these allocations comes from student segregated fees. Each full time student contributes $1.48 in segregated fees to be allocated by SGA.

Wilcox says that next year’s SGA will manage roughly $618,000 from segregated fees and interest earnings on the auxiliary reserves. Allocations for next year though are also around $618,000. Wilcox says that next year’s meeting, including and rejecting allocations will “break even right now.”

Wilcox stressed that if students want more money for a particular group, they are encouraged to contact their Senator. Tom Gessinger, for example, made an Appropriations request for the Hospitality Committee.

Bush-Whacked!
United States Vice President and Presidential candidate George Bush took some time out in Stevens Point this week to make his pitch for the presidency. Like it or not, given the recent drop-out of rival Republican candidate Bob Dole, Bush’s speech may have been a preview of future State of the Union addresses.

Bratfest ’88 or not?
City fathers’ fears of vandalism again play a role in this year’s debate to fest or not to fest. News has what’s known as group.

Volunteers needed for Hunger Day
April 16th is the Day!
The Hunger Clean-up program is on the way and we need your support. The Hunger Clean-up program is a nationwide effort of students and the community coming together to clean up their environment for hunger.

Volunteers need to donate only a few hours and some muscle for this event. We will raise money through donations and concessions.

The way it works: We will find several work sights throughout the community (example: parks, senior citizen and disabled centers) to be worked on between 10 a.m. and 1 p.m. The volunteers will find someone to sponsor them in their efforts per hour or work sight.

The money collected from the volunteers will be divided in this manner: 50% to Operation Bootstrap of Portage County and 50% to the National Student Campaign which will go to domestic and international efforts against hunger.

We invite everyone to participate, not only the students, but faculty, staff and community members. Mayor Scott Schultz has been supporting this effort along the way and has recently made April 16 officially Hunger Clean-up Day in Stevens Point.

A.C.T. (Association for Community Taskus) is locally sponsoring this event along with the support of E.G.A. and R.I.A. So contact A.C.T. if your interested in volunteering. For more information call 346-2560 A.C.T. Office or Kris Mund 346-3260.

UWSP tips the System scales with $300,000 student fee chargebacks

Chancellor reports $50,000 less in next year

by Karen Rivedal
Editor

Students at the University of Wisconsin-Stevens Point pay the highest student fees and highest auxiliary chargeback amounts of all students at the UW System. When the dust settles this summer on the still-to-be-passed state budget, UWSP students may pay the highest residence room rates in the System as well.

What’s going on? Has Central Wisconsin suddenly become an upper-income area? No, but there are some expensive trends in public university financing afoul. The practice of assigning administrative chargebacks is a fairly new expression of these changes.

The heart of administrative chargebacks assumes some basic knowledge of the way a public university is funded. UW schools, with two major fund sources. The first is general purpose revenue (GPR), the tax dollars, provided by all state tax payers. The second is auxiliary enterprise revenue, which comes from student fees and other user fees. This has created a system-wide need for centralized service like power, plumbing, and parking. An administrative chargeback is an amount charged to an auxiliary enterprise for centralized services like power, plumbing, and parking.

The remaining one-third of the budget comes from the students’ pockets. Student payments are the second source of university funding. UW currently pays for one semester at state tuition level. The majority of that bill reflects a base tuition fee, weighted in the formula at $602.50. This fee joins the tax-supported, GPR fund pool, to finance the non-academic study results. Ninety percent of tuition paid is used to support the general fund, and some administration salaries. The rest covers books, supplies, and maintenance of academic buildings on campus.

Two years ago, UW System Administration made it legal for GPR areas to charge fees for work done in auxiliary areas. This happened by audit of the state Legislative Audit Bureau at this time demanded that auxiliary enterprises become self-sufficient. GPR areas would no longer provide these centrally staffed services like purchasing and mailing to auxiliaries for free.

Chancellor Philip Marshall-shall cites this System mandate to not subsidize auxiliaries as partial justification for UWSP’s $300,000 annual chargeback amount. “You want something that is defensible to the legislative audit. You shouldn’t create a policy which out and outsays we’re going to subsidize.”

UWSP Student Government President Steve Cady and some auxiliaries are now being charged $300,000 per year.

Administrative chargebacks resolution

Whereas: The UW System has allowed centralized services (e.g. Bursar, Payroll, Purchasing, etc.) funded by GPR dollars to “charge back” auxiliary operations on a yearly basis for services rendered; and

Whereas: UWSP’s auxiliary operations which include Residence Halls, University Center, Student Activities, Health Center, and Parking are being charged back a total of approximately $50,000 per year; and

Whereas: This amount is almost twice the amount of the next highest school, UW-Milwaukee, which has an enrollment almost three times larger than that of UW-Stevens Point; and

Whereas: The abuse of these chargebacks cause UWSP students to pay more in segregated fees (highest total in UW System) to augment a marginal GPR (academic) budget; and

Whereas: These chargebacks are not always reflective of services rendered to auxiliaries, although they have not provided for auxiliaries to charge for services rendered to support GPR funded programs; and

Whereas: A UW System committee was formed to review administrative chargebacks and provide a policy that would help standardize and define what auxiliaries should be charged for (and to what extent) their use of GPR funded services; and

Whereas: The recommendation of this committee would exempt some auxiliaries and lessen the burden on others that UWSP and other UW System campuses would be charged; and

Whereas: The proposal was not adopted due in part to the negative response of those Chancellors who help subsidize their GPR budgets by the excessive use of chargebacks; and

Be It Resolved: That the UWSP Student Government Association recommends that UWSP student representatives opposed to the excessive chargebacks on this campus that are clearly “back door” tuition increases; and

Be It Finally Resolved: That if the administrative chargebacks are not assessed at a level of that of comparable UW institutions next year, the UWSP Student Government Association will first seek UW Administration, then UW Board of Regents, and finally legal action to tide the abuse of these chargebacks.

The UW System Point Student Government Association unanimously passed the above resolution on March 2. SGA President Steve Cady, who wrote the resolution, has since mailed copies to UWSP officials, UW System President Ken Shaw, and UW System Vice President Ray Mannscha for review and action.

Campus officers talk chargebacks

A healthy mix of opinions on administrative chargebacks exists among campus officials throughout the diverse, 16-school UW System. Lack of a system-wide policy for the activity has created nearly as many battles as methods as there are campuses. The people who determine the current procedures at each university had this to say about the issue.

UW-Parkside

Business officer Gary Goetz said the administrative chargeback issue was "really a can of worms." The rationale for charging in terms of availability is obvious. But it’s a ripoff to auxiliary services, he said. "But regardless of that, I guess it just has to be." At UW-La Crosse, "We split the chargeback 50-50 between tuition and all segregated fees. We do not nickel and dime charges out to specific operations," said Chancellor Philip Marshall.

UW-La Crosse

"The way the chargebacks are being done at the moment places a greater burden on students in terms of what they’re getting," said Chancellor Philip Marshall. "There isn’t anybody in this day and age who can afford anything anyway," said Johnson. UW-Eau Claire, "officials at this campus are generally in favor of the auxiliary chargeback method that was proposed by UW Task Force who studied the issue system-wide. "We think that it (the suggested plan) needs some reform," said Chancellor Philip Marshall. "Our chargebacks method is already pretty much consistent, with what the paper proposes." UW-Eau Claire does not charge back the student-fee supported areas of student activities and student health, in keeping with Task Force recommendations.

UW-Superior

Richard Johnson of Superior said chargebacks were "an opportunity and a problem at the same time." UW-Superior’s chargebacks are calculated in the following way: administrative chargebacks are calculated in the following way: chargeback amounts come from the above categories of student activities and student health, in keeping with Task Force recommendations.

A UW System comparison

UW-Stevens Point $300,000

Milwaukee $197,500

Oshkosh $175,000

Eau Claire $142,000

UW-Platteville $136,000

Stevens Point $105,000

River Falls $47,000

Whitewater $46,000

Platteville $35,000

Green Bay $28,000

Superior $20,000

Residence Hall $22,000

Bilking

The rationale for assigning administrative chargebacks is an example of the kind of vandalism frequent-

**Grosskopf eyes 3rd Ward seat**

by Mark Murphy

Special to the Pioneer

"I am making a personal request of thousands of you students of the 3rd ward to turn out this Tuesday, April 9th, and vote a student into City Council," said Dan Grosskopf about his candidacy for 3rd Ward Alderman. "I need every student in Hansen, Pray/Sims, and those living between the Fine Arts Building and Jefferson Street to vote for me on Tuesday; if they do, I will win," said Grosskopf.

Grosskopf is a Junior majoring in Communications. He is also Vice President of Membership for Sigma Tau Gamma fraternity. When asked why he is running, he replied, "I am running to improve relations between the community, the university, and the students. I also am seeking this office because I think the Council should have a student representative on it, seeing that there are 9,000 of us and that the university itself regenerates up to $100,000 a year in local revenue."

He also stated that he would like to help create more jobs in the area by encouraging new business to look at what Stevens Point has to offer. Grosskopf has been an "active leader" in campus organizations and describes himself as having "a sincere interest and pride in our community."

Grosskopf's student-campaign organization, Students for Grosskopf, will be submitting 3rd Ward voters to-and-from the Emerson School polling location every top of the hour from the Hansen Circle and every one-half hour from the front of Pray/Sims.

Grosskopf encourages anyone with questions concerning his campaign or the shuttles to contact him at 341-4627 for more information. Grosskopf's prediction about Tuesday's contest: "I feel good about it; it could go my way if I get the turnout."

---

**Annual budgets**

- from page 1

- dents were unhappy with the allocations, they said "I don't want to touch with their Senators." This was noted because the Senate approves all the SGA allocations.
- She also praised organizational treasurers for their work.
- Says Wilcox, "they're the unsung heroes of the budget process."

- Wilcox notes that the annually funded organizations benefit from the budget process in that they have a set programming schedule. At the submission of a budget, an organization already knows what plans it has for the upcoming year.
- The major disadvantage to the process though is time. The time commitment for an organization to learn and use the budget process is taxing, Wilcox noted that "state money has a lot of red tape," and learning how to work with those funds takes time.

- New organizations seeking annually funded status are encouraged in their first year of recognition to use the Student Senate for Funding. SGA has reserves for travel, programming, and office expenses. This first year of the budget experience will be valuable in assisting the group in the annual budget process Wilcox noted.

**ON THE NEW UPPERCLASS RESIDENCE HALLS.**

"As you enter a hallway, you see walls, you see lights and people, but you see nothing of any substance. Is this a university?" Pete Armstrong, the assistant director, said.

"As you enter a hallway, you see walls and lights and people, you see nothing of any substance. Is this a university?" Pete Armstrong, the assistant director, said.

**Baldwin Hall:** the winning tradition continues! Hyer Hall; for a Hyer quality of living!
All aboard the Student Transit Van

by Jim Malzewski
Features Editor

All aboard!

That's the message the Student Transit Program (STP) sends out every weekday, providing free transportation to students from campus to any nearby location within a five-mile radius.

Sponsored by the Women's Resource Center, the student transit van picks up students at various locations, Monday through Thursday. It also stops at the campus coffee shops, the campus bookstore, the student government offices, the student bookstore, and the student center, as well as other locations nearby.

With the student transit van, students travel in comfort, with free transportation available to all students, regardless of gender.

Features Editor

Where to?

Sponsored by the Women's Resource Center, the Student Transit Program provides free transportation to students in an effort to reduce sexual assaults.

Easter Calories add baggage

by Toni Wood, R.D.

It's early spring again with blustery, unpredictable weather and Easter. For many, Easter means a family gathering which may include special-occasion day foods and extra "treats". Chocolate bunnies, Easter eggs, jelly beans, and hard-boiled eggs dyed in bright colors are common items found in many Easter baskets; but these treats may not be the most nutritious choices.

Traditions are part of what makes holidays special, and the child in most of us still enjoys an occasional piece of chocolate or candy. However, the candy that often comes in Easter baskets, such as chocolate marshmallow eggs and jelly beans, provide empty calories (primarily from fat and sugar) without much benefit of other nutrients, and in a form that can be particularly damaging to teeth.

Candies that are high in sugar and have a sticky consistency provide an ideal medium for bacterial growth when the sticky sugar coats your teeth. This medium allows bacteria to produce acids which in turn erode the enamel of your teeth, thus producing dental cavities. Good dental hygiene will help prevent cavities, but it is better to avoid or limit sticky candies or sugar altogether.

Easter candy will not only play havoc with your teeth, but also can contribute calories without the benefit of nutrients. Tea jelly beans will yield 68 calories, a peanut butter filled egg about 15 calories, and a Cadbury cream egg 128 calories. Calories do count and it doesn't take much peanut butter to fill you up.

Rites of Writing set for April 6-7

by Jeff Miller
Staff Writer

Do you have a passion for the pen; a love for the line? Interested in writing, reporting, publishing your works, or becoming a better writer, whatever the reason.

Once again, in response to these desires and more, the Academic Achievement Center is sponsoring the 11th annual Rites of Writing. Free to the community, the workshop begins Wednesday, April 6, and concludes the following night. The 21 sessions are spread out amongst seven authors and editors, representing various literary fields.

The featured speakers this year are Alex Wilkinson and Terry McMillan. Wilkinson is a staff writer for The New Yorker magazine. Terry is the author of the novel, "Mama," published last year.

Complete with a reception and autograph session, the Rites of Writing promises to be interesting, as well as instructional. Dan Dieterich, professor of English and staff member in the AACC, points out the uniqueness of the workshop. "I urge UMBF students to take advantage of this opportunity. I know of no other campus which provides this sort of writing symposium, free of cost," he said.

This writer will attend Alex Wilkinson's Writing and Reporting. See you there.

"Never let a fool kiss you or a kiss fool you."

**Answers on page 7**

**Sexually Transmitted Diseases:**

During the month of March, 7.5% of all trips to the University Health Center were for sexually transmitted diseases; of these, chlamydia and venereal warts are the most prevalent. The following article briefly describes the various diseases that those who are sexually active are at risk of getting.

**By Dr. Jim Welsh**

UWSP Health Center

Sexually transmitted diseases (STDs) are infectious diseases passed from one person to another during intimate physical contact. STDs are very common in a sexually active university population, and are among the most common reasons for student visits to the Health Center.

There are two important factors that contribute to acquiring a STD: the number of sex partners and one's choice of a contraceptive. The more partners, the greater the risk of coming in contact with someone who has a STD. The number of sexual partners an individual has, either as a succession of relationships or at the same time, increases one's risk. STDs are unusual if a person limits his/her sexual relations to one other person whether the same or opposite sex.

However, it is important to understand that people can be asymptomatic carriers of most STDs and may bring an infection to a sexual partner or be asymptomatic in either person at a later time. The occurrence of STDs has very little to do with social or economic class or personal hygiene.

This is a list and brief description of the STDs commonly acquired by university students in order of frequency. If you have concerns or questions, please discuss them with a Health Center staff member, or read other literature available at the Health Center.

**CHLAMYDIA:** Studies indicate as many as fifteen to twenty percent of a sexually active population may have this bacterial infection in their reproductive system. Up to one half of the people may be asymptomatic carriers for as long as two years. Carriers may unknowingly spread the infection to others or may become ill themselves at a later time. In men, chlamydia may cause urethritis, epididymitis, or prostatitis. In women, the symptoms of these infections in a man include urethritis with urethral, vaginal, or possibly in the scrotum. Gay men may also get a rectal infection.

Women may get urethritis (burning with urination), cervicitis (vaginal discharge), or pelvic inflammatory disease (PID), infection of fallopian tubes and uterus. PID is especially dangerous because it may cause fallopian tubes to become permanently scarred or blocked. PID is a leading cause of infertility and may also result in ectopic or tubal pregnancy. People who have oral sex may get a chlamydial pharyngitis or throat infection.

There are easy, convenient tests to detect the presence of chlamydia, even in the asymptomatic stage. It is easily treated if found. Testing should be done routinely if one has more than one partner or with changes in relationships.

**VENEREAL WARTS:** This is a viral skin infection which causes warty tumors to grow on the genita of men and women. Their presence is much more than a cosmetic problem; some types of viruses are being linked to causing cervical cancer in women. Treatment to eliminate the warts may take many weeks and it is usually done by painting certain chemicals on them and/or freezing them with liquid nitrogen.

**HERPES SIMPLEX:** This is a viral disease that causes painful blisters and ulcerations on the genita or lips of the mouth (fever blisters). Once infected, people may get a single episode or periodically have recurring blisters and sores for years. While there are medications that can be used to suppress recurrences several months at a time, there is no cure as yet. It has been assumed that the virus was only transmitted in a man mother/father, during birth/infant care phase, but recent reports indicate that it may sometimes also be transmitted by people in asymptomatic phases. Condoms are protective if they cover the affected area. Herpes, infections of the cervix have been thought to contribute to cervical cancer. More recent studies indicate that the venereal wart virus has more to do with causing cancer.

**MOLLUSCUM CONTAGIOSUM:** This is a viral infection that causes small pimple-like lesions on the genital area. They may spread to surrounding areas from the original site. They aren't known to cause serious complications and can be treated by freezing, chemical applications, or burning with electric current.

**GONORRHEA:** A bacterial infection which is similar to chlamydia in its symptoms and types of disease caused in men and women. It does not occur as frequently as it used to; however, like chlamydia it can cause serious complications and people may be asymptomatic carriers. It can be detected by a culture done at the Health Center and then treated with antibiotics.

April springs Easter, with music
by Molly Rae Hall

Attention rock and roll fans. This month is full of music.

The University Center is sponsoring a "Battle of the Bands" contest on Tuesday, April 5th, from 7-11 p.m. in the Wisconsin Room of the University Center. Bands slated to compete are: Cold Shot, Cold Wisconsin Room of the University of Wisconsin, and John Schofield. They will register in the Stevens Point on April 29.

The first ever concert in the Irish, Belgium, and John Schofield are: John Radd, keyboards; Robert Kase, trumpet and Eric Clapton the night that if you’re into jazz, blues, soul, trash, hard core, etc... it is here for you. Some native sons, the Beach Boys, played at the University of London Union one weekend. With whatever concert is over and underway in Point, we’ve been trying to jam in as many things as possible. Visiting Ireland, Wales, and the Lake District were all on the agenda. A pilgrimage to the Power Station, made famous by Pink Floyd, was also completed. Last minute souvenir shopping is our only remaining task.

On April 9 we are off to the continent: France, Germany, Italy, Switzerland, Luxembourg, etc... We get to view all of it from a bus. Three weeks in a bus will either create great friendships or a couple of ax murders. We’ll all be back on April 25 in order to cheer you on in your final! Giao

Books, small bags, water color palettes, colored pencils and European Tour Fund. Members of the ensemble are: John Radd, keyboards; Robert Kase, trumpet and flugelhorn; Mike Irish, guitar; Tim Zent, drums; and Don Joremba, bass.

The program will include compositions by Kase, Irish, and John Schofield.

 "If fifty million people say a foolish thing, it is still a foolish thing." - Anatoile France

Disease, from page 6

SYPHILLIS: Fortunately an uncommon bacterial infection in most of the United States, but it still occurs in some large urban and farm areas. The initial presentation is usually a raised, firm, ulcerated lesion at the site of entry of the bacteria, usually on the genitalia, occurring two to six weeks after exposure. If not recognized and treated with antibiotics at this stage, it may spread to many other body organ systems and cause serious chronic illness and death.

AIDS: AIDS is still a relative or rare disease in Wisconsin, but deserves mention in a discussion of STDs. AIDS is an eventually fatal viral infection of the body’s immune system. There is no effective therapy as yet, it is spread from an infected individual to another mainly by contact with blood, semen, or vaginal secretions. Currently the virus most frequently in men who have had sex with other men, or intravenous drug abusers.

However, potentially it can be spread by sexual contact between a man and a woman as well. It is evident that now and in the future AIDS will also be increasingly spread to the heterosexual population by intravenous drug abusers male or female, homosexuals, sex workers, prostitutes, or by bisexual couples. It is probably spreading initially in metropolitan areas of the East and West coasts and less so in the Midwest.

The most effective way to prevent spread by casual contact with an infected person is to have questions or concerns regarding AIDS you can get pamphlets entitled "AIDS - Protect Your Health, Know the Facts and Guidelines for AIDS Risk Reduction, at the Health Center, or talk with a staff member.

Eggs are an excellent source of proteins of high biological value (HBV); that is, the quality of protein is improved. It provides enough of the essential amino acids (blocks of protein) to promote adequate rates of growth.

Concern regarding cholesterol is justifiable, but the eggs have many valuable qualities that are often overlooked in the effort to limit cholesterol intake. The cholesterol content of foods is impossible, but equally likely is your overall calorie intake, particularly the amount of saturated fats consumed, the amount of routine exercise you undertake, your genetic make-up, and your current blood cholesterol level.

A day with the regional campus.

The campus activities have a block of 500 tickets. For information call X 4342.

1. Name the pitcher who ended Paul Molitor’s 3-game hitting streak last season.
2. Which automobile was named the 1980 Motor Trend magazine car of the year?
3. Who is marketing Easter Bunny ice cream cakes for the Easter holiday? (Hint: It’s not Belt’s!)
4. Name the new John Waters film whose cast includes such diverses stars as Johnny Izzo, Debbie Harry, Pia Zadora and the late Divine!

Finding the best of spring walleye fishing

by Andrew Fendos

Walleyes are tolerant to a great degree of environmental situations, but they appear to reach their greatest abundance in large, shallow, turbid waters. The Wisconsin River offers walleyes the best opportunity to fish these, from the many dams that control it. The river also provides abundant food, cover, and spawning grounds. It is the spinal column of these walleyes, and the downstream areas of these dams become the territory of spawning walleyes, the place where they can spawn safely, away from disturbance. First, then, we'll take a look at these spawning movements to these dams.

Successful fishermen who successfully fish the walleye's spawning movements and know where the spawning grounds are are the only successful fishermen who know about the spawning movements to these dams.

First, though, we need to understand where the walleyes are at the beginning of the season. First the walleye is a very finicky fish and is easy to spook. They can be caught in the spring but with a lot of effort to lure the fish to the correct area. So we need to understand where and how the walleyes begin to spawn.

Spring spawning for walleyes begins when the water temperature reaches 4 to 5 degrees. This is also when the females will start to deposit eggs. The eggs are then broadcast downstream and contribute to the fertility of the spawning grounds. The eggs then develop into fry, which move up river to find suitable habitat. The fry then become juveniles and continue to grow and develop.

Spring spawning fish can be caught on virtually any type ofpresentation, including live minnows and baits such as jigging. Walleyes can be caught in deep water and shallow water, so it is important to understand where the fish are located. Spring spawning fish can be caught in water temperatures ranging from 5 to 10 degrees.

Walleyes are usually found in the deeper areas of lakes and rivers, so it is important to understand where the deeper areas are located. Walleyes are usually found in areas where the water temperatures are warmer, so it is important to understand where the warmer areas are located. Walleyes are usually found in areas where the water temperatures are warmer, so it is important to understand where the warmer areas are located. Walleyes are usually found in areas where the water temperatures are warmer, so it is important to understand where the warmer areas are located.

Spring spawning fish can be caught on virtually any presentation. Walleyes can be caught on live minnows, baits, jigs, and artificial baits. Walleyes can be caught in deep water and shallow water, so it is important to understand where the fish are located. Spring spawning fish can be caught in water temperatures ranging from 5 to 10 degrees.
The United recycling fines for violators may be the city’s trash by the year 2000. Current recycling efforts recover waste. Supporters say that current recycling has reached all Chicago groups to develop new uses for tires. Our Environment” is said to be ideal for conservation education programs and Arbor Day observances. It is designed to help children in the 4th grade and higher understand how humans and other animals depend on green plants for food, water, shelter, and oxygen. It also shows how the action of growing and conserving green plants is necessary for a quality environment. Teachers are asked to order before April 6 and receive a free teacher aid.

Exotic species are posing a threat to U.S. National Parks. Exotics are species that are not of their natural habitat. That usually means natural checks in the past. Why don’t you try to help too? Look for the checklist.

Lead arsenic contamination in Door County has come under DNR scrutiny. DNR officials have decided in June to move on what to do. The contamination comes from the use of lead arsenic as a pesticide in the first half of this century. Mining sites in orchards show the most concern. The DNR has placed a high priority on the cleanup of these sites which are located primarily on the bay side of the peninsula in Sturgeon Bay, Egg Harbor and Liberty Grove.

The Greenpeace sailing ship FVII visited Green Bay in 1985. Greenpeace has tried over the years to use non-invasive methods of confrontation to bring attention on and sometimes ship pollutants or the environment. The group says the next visit will be of a more scientific nature than the last one.

Tax is once again upon us. You may not think you have a very lucrative form, but you can help in the restoration of endangered resources. The state of Wisconsin has a checkoff line on tax returns which earmarks money for natural resources recovery efforts. The Bureau of Endangered Resources of the DNR is funded this way. Last year’s checkoff funded the Bureau $52,000. Director Ron Ni­cotera said that the work done so far has been due to the thousands of people who donated to the checkoff in the past. Why don’t you try to help too? Look for the checkoff.

The state of Illinois has de­clared Waukegan Harbor toxic in a recent study. It has for some time been called one of the most polluted waterways in the nation. Tests were conducted in which microscopic organ­isms were exposed to a mixture with 10 percent concentration of Waukegan Harbor sediments. Of those organisms, 87 percent died. Scientists say they’ve never had that high a mortality rate before. PCBs have been a known element in the sedi­ments, but even where PCB concentrations are low the bottom is highly toxic with other kinds of poisons such as lead, aluminum, and grease. Current research is trying to find a way to clean up the harbor.

Japanese fishing trollers have been accused of violating United States territorial limits while fishing in the Bering Sea off Alaska. The United States and the Soviet Union have scheduled talks about the Sea which both nations claim. Japan has not been invited to the meeting and officials are saying that this is a message to the Japanese that there is displeasure with their recent action in the Bering Sea. Videotapes have been recorded which allegedly show Japanese ships fishing 24 miles inside the 200 mile fishing zone claimed by the U.S. U.S. representatives say Japanese explanations about the incident have been incomplete.

“Earth’s Best Baby Food” will be on the market in December. This new product is 100 percent organic baby food “made in the Green Mountain of Vermont” claims the new food can be free from pesticides that other commercial baby foods often contain. The two brothers are making and selling the product in Vermont. It sells for $9.95 and the three times the price of large company products. The twins say the new baby food is grown in chemical free soil, is un­treated by synthetic herbicides, and is monitored by inspection and certification. They will only produce vegetarian varieties and specialize in fruits and juices.

An organization that tries to meet the needs of rural water users has opened an office in Whiting, Wisconsin. The 7-town­al Rural Water Association will be at 2715 Post Road in Whit­ing. The group is federally funded and non-profit. On-site technical assistance and training for operators and local offi­cials is offered. Any water sys­tem serving less than 10,000 people is eligible for help.

A new conservation cartoon booklet is available from the Soil Conservation Society of America. “Plants, Improving Our Environment” is said to be ideal for conservation education programs and Arbor Day observances. It is designed to help children in the 4th grade and higher understand how humans and other animals depend on green plants for food, water, shelter, and oxygen. It also shows how the action of growing and conserving green plants is necessary for a quality environment. Teachers are asked to order before April 6 and receive a free teacher aid.

New low acid, chilled foods may not be as safe as we think. The foods are usually full meal varieties which are kept in the frozen section of food stores. The foods are cooked and not as efficiently processed as other types of prepared foods. Problems can occur if refrigeration is not efficient or if foods are exposed to non-refrigerated areas for short times. Scientists have also discovered four types of food poisoning bacteria that survive and multiply below 45 degrees. 45 degrees used to be consid­ered the threshold of safety for age. Some of the bacteria can grow at temperatures as low as 33 degrees.

The environmental group Greenpeace will once again set sail on the Great Lakes. The BEULGA is a 77 foot boat equipped with state of the art analytical equip­ment. It will be in Green Bay in July this year. The Greenpeace sailing ship FVII visited Green Bay in 1985. Greenpeace has tried over the years to use non-invasive methods of confrontation to bring attention on and sometimes ship pollutants or the environment. The group says the next visit will be of a more scientific nature than the last one.

By Cindy Byers

Chicago Mayor Sawyer has revived a recycling plan that was started under the late Mayor Washington. The plan hopes to reach all Chicago neighborhoods by 1989. The goal is to recycle 25 percent of the city’s trash by the year 2000. Current recycling efforts recover waste. Supporters say that current recycling has reached all Chicago groups to develop new uses for tires. The Wisconsin “Tire Bill” is now law. Starting May 1, 1989, people who buy new vehicles will pay a $2 per tire fee. About $2.3 million is expected to be collected annually. The money will be used to develop plans for how to dispose of old tires. More than 700 million old tires are now in Wisconsin. Grants will be distributed through this fund that will encourage indi­viduals, business and non-profit groups to develop uses for old tires.

The Ultimate Student Housing Brand New TOWNHOUSE - 4 Blocks to Campus

Includes:
- 4 bedrooms with closets, den, guest room with bathroom
- 2 full baths with tub/shower
- Full modern kitchen
- 16 washer/dryer/laundry/oven
- Built in dishwasher
- Built in microwave
- In unit private utility room
- Private 100% cotton dryer - NOT coin-op
- Large living room
- 100% privacy
- Deluxe carpet - thermal drapes
- Ceramic flooring

Terms:
- Group rates up to 7 persons (family groups can check our list of others interested)
- Dependable references required
- Have your own room box line at $60/semester
- Lease and deposit required
- Lease runs for 2 semesters
- Plug in the unit for summer - FREE! So stay for free or sublet and pocket the money!

Quarterly offers each semester based on rates for groups of seven

Scuba Club helps out Manatees
by Andrew Fendos

Outdoors Editor

Manatees were the focus of the UWSP Scuba Club spring break when they visited the Crystal River National Wildlife Refuge. In cooperation with the Department of the Interior's Fish and Wildlife Service and Florida State University, seven UWSP students completed surveys and public awareness studies in hopes of saving the manatee.

An estimated 1,390 manatees inhabit Florida's coastal waters. An endangered species, these "gentle giants" can reach up to 13 feet in length and weigh up to 3,500 pounds. Defenseless and slow-moving, manatees cannot evade their only major enemy, the speedboat. Boat-related deaths, combined with the manatee's slow reproductive cycle, threaten the survival of the endangered species.

Manatees eat only vegetation and with the urbanization of Florida's water front, many problems have developed with the manatee's food supply. Underwater surveys were needed to monitor the effects pollution, boating, and other recreational activities have on the manatee's food source and habitat. Club members also helped promote public awareness of the needs and habits of manatees. Scuba club members also took their campaigns to the manatee's waters where they worked to notify boaters and others to check on their awareness of the manatee current endangered status, informing them of laws and regulations, as well as reporting rule breakers to law enforcement officials.

The scuba club plans to present a seminar of their trip to the College of Natural Resources sometime in the future, and will also use the collected information in the LRC's museum. Anyone wishing more information about the Scuba club or their trip is encouraged to stop at one of the club weekly meeting, which are listed in the UC Daily, or they may call Korgas Kafura (scuba club member) at 345-6310.

These gentle creatures are endangered throughout their range. High morality and low reproduction continue to keep their numbers low.
UWSP offers seven weekly acid rain lectures

UWSP News Service

The first of seven weekly lectures on problems associated with acid rain begins Thursday night (March 24) at the University of Wisconsin-Stevens Point.

The sessions are open to the public without charge, from 6:30 p.m. to 8:15 p.m., in the Helen Parkhurst Lecture Hall (Room 116) of the Professional Studies Building. Special arrangements can be made for people in attendance in a non-academic credit.

The speakers will include educators, representatives of governmental agencies, business/industry and concluding with an address by U.S. Rep. David R. Obey of Wisconsin-Stevens Point.

The sessions will be Wednesday, March 24: "Overview of Acid Rain Issues and Principles" with Dan Trainer, dean of the College of Natural Resources, discussing international perspectives and the impacts of acid rain on trees, plants, people and wildlife. The audience will receive a copy of the book "The Effects of Acid Rain: Are We Overreacting or Underreacting?"

Wednesday, April 7: "Acid Rain Impacts on Lakes" by Steve Grab, Department of Natural Resources Bureau of Research.

Wednesday, April 14: "Impact on Wildlife" by Ray Anderson, professor of wildlife, and "Cultural and Health Effects of Acid Rain" by Lowell Keesing, professor of resource management.

Wednesday, April 28: "Electric Power Industry Perspective on Acid Rain and Economics of SO2 Control" by Tom Meins and Mike Charles of Wisconsin Public Service Corporation.

Wednesday, May 5: "Political Process and Conflict in Controlling Acid Rain" by Congressman Obey who also has invited Ed Hornby of the Canadian Consulate to join him.

Addition to the schedule of presentations will be "Overview of Acid Rain Sources and Trends" with Ron Henschel and James Johnson, soil science professors; "Potential Impacts on Acid Rain on Soils" by Ron Henschel and James Johnson, soil science professors.

The speakers will address the audience with a copy of the forthcoming book "Acid Rain: A Report for the Public" by David R. Obey with an address by U.S. Rep. Ron Shaw, professor of water resources, and the session will be open to the public on a first-come, first-served basis.

Waterfowl bill passed by Assembly

Madison, Wis.

Wisconsin waterfowl will be more protected with a better breeding habitat under a bill passed by the State Assembly on Wednesday.

The bill (SB 345) will alter state law in order to allow the Department of Natural Resources (DNR) to use two techniques that will greatly improve breeding habitat, according to State Representative Stan Gruszynski (D-Stevens Point), the chief Assembly sponsor of SB 345.

The first of these techniques is the construction of artificial nesting islands, which provide waterfowl and shore birds with a breeding place that is safe from predators.

The second technique is the use of a machine called the "cookie cutter," which was developed by Ducks Unlimited.

The machine creates areas of open water in cattail marshes. This open water is crucial to the survival of waterfowl broods.

"I have heard from many Wisconsin waterfowl owners who feel that we must do everything we can to maintain a larger and healthier waterfowl population in the state," Gruszynski said. "This bill is one way to accomplish that goal."

"SB 345 will not harm the environment and will actually save the DNR some money," Gruszynski continued.

SB 345 will enable the DNR to make more efficient use of the limited dollars it has available for waterfowl. Included in these funds are revenue from the sale of duck stamps and money the DNR receives from Ducks Unlimited for waterfowl projects.

SB 345 has now been passed by both houses of the Legislature and has been referred to Governor Thompson for his signature.

"If Governor Thompson signs the bill into law, the DNR will be able to begin work on some of these much-needed projects this spring," Gruszynski said.

Gruszynski said that SB 345 was strongly supported by the Conservation Congress, the Wisconsin Wildlife Federation and the Wisconsin Waterfowlers Association.

Tax break for water protection

DNR - Madison

Uncle Sam is giving a tax break to many rural land or small business owners who have received grants to replace failing septic systems or prevent soil and barnyard runoff into streams, a Department of Natural Resources grant official said today.

Tim Kessenich, specialist in the Department's Bureau of Community Assistance Management, says a recent decision issued by the secretary of the U.S. Department of Agriculture means most people who receive Wisconsin grants to replace or upgrade failing septic systems or clean up agricultural pollution may exclude those grant payments from all or part of their gross taxable income.

"This decision will mean a welcome tax break for many landowners, rural home dwellers and some rural small business owners who have received or are eligible to get water pollution prevention grants from the government," Kessenich said.

Under the new federal policy, grants made to people who qualify for funding under certain state conservation programs are exempt from taxation because the money is being used for soil and water conservation purposes, protecting or restoring the environment, preserving forests or improving pastures.

Turn to page 16
Misplaced funds equal homeless injustice

An editorial is a magazine or newspaper article explicitly stating the opinions or beliefs of an appointed editor or staff writer.

What do these Fortune 500 companies, who now are also national newspapers, who also are a part of the United States Defense Department, have in common? Lockheed, Tenenco, Tezaco, Dupont, Harris, and Boeing.

Give up? Each one of these companies made BILLIONS OF DOLLARS from 1981 to 1984 under the Reagan-Bush Administration and all of them paid 0 dollars to the US government in taxes. Not 1$000, not even 1$00 in taxes but - nothing - nada.

This fact alone may be bearable for some. Let's face it, we need these companies for our healthy defense department. Is it necessary for the US government to give free tax rebates totaling over $500,000,000 million to these companies after they didn't even have to carry their load of financial responsibility for the rest of the nation?

These huge businesses are already making their millions. Why then is it okay to give them $500,000,000 million in rebates when they never paid anything to receive a rebate from?

What's the big deal? Where is this going? Why do I care?

There are 35 million Americans who don't have a place to sleep tonight, no food and now coming in the near future. Taking a shower is a dream to them, and being warm is only a mental delight.

We can all put this picture together. The US government has placed $35,000,000 million for every one homeless man, woman, and children. Shelters could be built.

I was here back in '85 when the full-fledged first Special Forces took place. I, and a number of people, not just a few, town over from the place of the people, I was following the war outside for that reason. When I arrived back on Sunday, it looked as if tree-toppling had rippled through parts of the campus. Trees, newly planted trees, were destroyed and garbage cans demolished, and this wasn't even where the "first" took place. How much more so at that unlucky site?

After these excesses, the 96 First Special Forces seemed considerably toned down. And of course, never ever.

I don't consider myself to be a very religious person. However, I will be the first to admit that on my irregular visits down to the bars, I was never on the receiving end of student vandalism.

I had no reason to believe that it would be a day different from any other. I went to my classes, worked for a couple of hours and then I was off to the library to do some serious cramming. The library was almost too quiet-no parties, no excitement, nobody talking to one another. It was just my usual 100 dB level. There were even empty tables in the reserve-reading room.

It became evident that before I could begin the process of memorizing a whole semester's worth of material in four hours, I would have to relieve myself of some bodily wastes. So there I was, on the toilet, when just as I was finishing the editorial section of the Wall Street Journal, I realized that I was in big trouble-there was no toilet paper in sight-I had a serious problem on my hands (I never could resist a good pun).

Suddenly, in the far corner of the stall, a glowing roll of toilet paper appeared. It was the most beautiful roll of toilet paper I had ever seen. Much to my dismay, it spontaneously burst into flames. If this was not enough, the image of a very old person appeared amidst the flames. He informed me that he was the true god, and that I had been chosen to deliver the New Improved and Ten Commandments to his people.

But then, just as I had started into some particularly profound small talk, with a flash of light and a hearty whoop Silver, the Big Cheese was gone (God, being the swell guy that he is, left me a used toilet paper). I was surprised, so I too had to find out for myself what was going on.

After these excesses, the 96 First Special Forces seemed considerably toned down. And of course, never ever.

I don't consider myself to be a very religious person. However, I will be the first to admit that on my irregular visits down to the bars, I was never on the receiving end of student vandalism.
Establishing a sense of community and the development of social interactions are important roles in solving problems.

First aid, from page 1

Brain can only last four minutes without oxygen.

1. Someone needs to get a basic understanding of the problem. Everyone should know what to do if someone is in trouble. This is done by specifically identifying roles and assigning roles (or 450 if on campus). When calling in an emergency be as specific as possible.

2. If necessary, continue care at the hospital as well.

Dukakis needs student support

Dukakis supports equal education

To the Editor,

With financial aid getting tougher and tougher to come by, students should be concerned about who their next president will be. In 1988, the Reagan Administration has cut federal support for education, including college loans, by 29 percent. As president, Jesse Jackson would reverse these cuts to education.

Jesse Jackson supports an education program that provides equal opportunities for every student for the miracle of learning to build quality schools for all children.

I stand for Jesse Jackson because Jesse Jackson stands for education.

Andrew Buechger
Students for Jackson

Environmentalist's candidate?

Many different issues should be considered in selecting one's choice for President. Among those, which are important by the way in recent years is the environment. Witness Ronald Reagan and the effects of his former EPA Chief Anne Burford and the former Secretary of the Interior James Watt. No longer do we as a country believe that the environment is a minor issue.

The case for Al Gore as the environmentalist's candidate for President is easily stated. Gore has the longest history from the League of Conservation Voters for the Senate, the EPA chief under the Carter administration, the Environmental and Energy Study Conference - the leading environmental protection group in Congress, has been working on environmental issues since he was elected to Congress in 1976. Gore was a principal author of the landmark Superfund Act to clean up hazardous waste dumping sites. Gore has faced up to the realities of the clean up of toxic waste sites can be done, and he has been working for years on such environmental projects.

Al Gore has been a strong supporter of environmental issues and has been active in many organizations. Gore is a co-sponsor of the acid rain amendments to the Clean Air Act and has co-sponsored bills to research clean coal technology. Gore has

Homeless, from page 12

$200,000,000 million is certainly enough money to start this program and keep it going for one year.

Taxpayers who are slipping through the cracks and not paying their fair share keep reaping the benefits of the community who can't afford to be able to do without the privileges of this community. I realize that only a minority of students are causing this trouble, but as the saying goes, `You can't judge a book by the cover.' As of now, with nine months left, the problems of housing is still being ignored.

Paul Jaakowski
News Editor

President Gore will be the first campus president to shake hands with members of the Student Senate and the statewide Wisconsin Student Association. The Student Senate will vote on whether to extend President Gore's contract.

Brat Fest comments

If the student government holds the festival, we should be the first students to think of the Point community too, has its share of partiers, students, members of the community who can't afford not to be able to have Brat Fest back in the city. But until then, its prospects of EVER being held inside Stevens Point appear bleak to me.

Homecoming '88 shows
'Wild Side'

by Jim Malezewski
Features Editor

UAB has announced that "Take a Walk on the Wild Side" will be the theme of this year's Homecoming. Homecoming Week is scheduled to take place September 27 to October 1.

Current Homecoming Coordinator Joe Andrekson said this year's Homecoming is going to be a lot of revisions. He noted, "We want to put more fun into Homecoming.'

Andreks stressed that no plans for Homecoming Week are staid in stone as of yet. More students are needed to help plan the different games and activities that coincide with the event.

Anyone who's interested in assisting with Homecoming '88 is urged to contact UAB at 967-2412.

Bush visits Stevens Point

By Paul Jankowski
News Editor

Vice-President George Bush paid a short campaign visit to Stevens Point Tuesday. His speech, at the Sentry World Sports Center, was part of Sen­ tay World's Political Awareness Program.

Security was tight for Bush. Secret Service agents sealed off the complex where he would speak 15 minutes prior to his arrival. It remained sealed until 5 minutes after he left. Numerous Secret Service agents were visible all through the afternoon policing the complex and stage.

Wisconsin's governor Tommy Thompson introduced Bush to a standing room only crowd. He cited Bush's experience fighting in World War II as a member of the House Ways and Means Committee, and his experiences in China, the United Nations, and the Central Intelligence Agency as evidence of his leadership.

Bush noted two of Tuesday's important political events being the re-election of his one-time political rival Bob Dole's withdraw from the campaign.

Bush thanked UWSI's College Republicans for their ushering duties as he began his presentation.

He noted that the federal deficit were "the only things on the horizon that threaten our five year economic recovery." He again pledged to cut spend­ ing, not raising taxes, as a means to deal with the deficit problem. He said, "If Congress won't cut. let the President do it for them." If Bush said he would refuse to sign an omnibus spending bill as Reagan did last December. If, as President, he received such legislation, he would shut the government down rather than sign it and "make Congress correct what they've done wrong.

Bush spoke for roughly 15 minutes before leaving Sentry.

Spring Walleye Fishing

from page 8

now, to cast it far enough ahead of the wing dam to allow it to sink into the walleye's positioning. Lures should be weighted to keep them down and live bait should be placed in the back of the flasher. Non-live and non-live-sinker with 3 or 4 feet of line. This 3 or 4 feet of line and floating jig will keep the current from forcing the minnow into the rocks and away from the fish. Cast the bait over the wing dam and allow it to sink, once it is near the bottom, reel it in over the wing dam where the walleye might be. A person is able to fish the whole wing dam this way and find exactly which part of the fish are using. Fishing the areas between the dams in fruitless, walleye need structure around them to feel secure and without it they will not feed.

Walleye fishing this spring should be a little easier now. Knowing where walleyes are when they start on their spawning

run can spell the difference between catching the water going by and catching fish. Knowing how to fish the structure with the current best to locate where the fish are using and understanding where important fish hold combinations to be the key of the successful fisher­ men. Do the research on dams before you get, monitor the wa­ ter temperature, use the cur­ rent and watch how you present your bait, it all affects your fishing success.
Citing no audience, WWSP ended broadcasting sometime last week. No one knew when the actual transmissions ceased. One crack Pointer reporter accidentally tuned into the station only to find static. Upon investigating, he found the WWSP offices empty. Overjoyed with jubilation, he dropped to his knees and praised God for his divine intervention.

After bits and pieces of the story broke in the Powers, Student Government Association commenced an emergency session. The issue: What to do with the $41,000 saved by the station's demise. After the 12th roll call vote, one thing was certain: The meeting was dragging on for a hell of a long time.

Meanwhile, a large crowd gathered to watch the meeting. The strange thing was that they actually wanted to watch the meeting, and were not a part of the group seeking recognition. Enraged by parliamentary procedure and overawed by Robert's rules of order, they stood, mesmerized through all 147 hours of debate.

In a show of unity, Mike Mikalsen, Brenda Leahy, and Brian Neville together pledged to solve the surplus problem. They embraced each other and laughed off last week's debate as "good PR." Neville spoke for the trio stating, "Really, we're drinking buddies."

The results were immediate. To liven up its meetings, SGA allocated itself $2,000 for No Daze. A Pointer/SGA double agent estimated that each Senator would receive enough to wire a sperm whale, or enliven John Jarvis.

Alarmed at what History would say about this year's SGA, the Executive Board led a shockingly fight to give the remains, $40,000 to the History Club. The reason...to write a history of this year's administration.

The club's treasurer, Mark "Zally" Zelazoski, died of shock when he received the actual check. His last, historically significant words were, "God, don't let it bounce!"

As a background to writing this mammoth project, a club spokesman said that a ten year "club Med" study tour was in order. Immediately, SGA learned of this plot. Several College of Natural Resource's Senators expressed concern about the club's expenses in the Wisconsin wilds. Things looked bleak for the History club. Then Cady acted.

Toasted parliamentary procedure to the wind, slamming his comme teor on the floor, he said, "Damn it, I'm the President! I'll do as I see fit! Get me Budget Director Wilcox on the main screen!"

"Willy, Willy, I need full funding for the History Club. Repeat, full funding," shouted Cady.

Wilcox protested, "But Cady, this reserves, they've been strained already. If we give 'em all we got, we'll have to beam in doughnuts to the Corner Market."

"Then we'll do it," Cady shot back.

"But Cady, why?"

"Hell, what's money to an education?" Onward SGA. Warp factor six.

"Where to Cady?"

"Stevens Point Municipal Government! Offices! Shields up, arm phaser on!"

WWSP folds, Cady acts

"Willy, Willy! I need full funding for the history club. Repeat, full funding," shouted Cady.

The Stevens Point city council last week invited the students from the UWSP to have their annual Brat Fest here in the city. The votes were all ayes with no nayes as the council continued their active search of ways to assist and please what they called, "the most important group on town", the students of the UWSP.

Among the plans approved were, providing the riverfront park at no charge, the suspend of all drinking ordinances for the weekend and free rides for all people with out cars to be provided by the police department. Some of the comments of the council members included, "we should have gone in half and half with the students on the beer", and "the students are good eggs, we all love them." At the next council meeting, plans to rebuild the square are to be released.
aren't you forgetting someone?

School's got you pretty busy now, but take a moment and think about it. Who baked you cookies for the Cub Scout meeting? Who watched the Little League games? Who wrote you notes to get out of gym class? That's right, Mom did. Give her a call. Go home to visit. Send her a bill.

Every day is Mother's Day.

chargeback from page 3 district area officials, however, claim that the charges assessed auxiliary do not accurately reflect services rendered. They argue that data used to compute the $500,000 charge for the past two academic years was taken from 1982-83 records and never revised. UWSP Budget controller Ron Lomottor concedes that this is a "point of controversy. It's true that criteria from 1982 was applied, but it's also true that auxiliary budget amounts are also from 1982. This isn't really anymore. Inflation has not been figured in for five years."

Student leaders point to comparisons of chargeback amounts levied at similar-sized UW campuses as evidence of Stevens Point's inaccuracy. UW-Stevens Point is about $150,000 over the average for mid-size schools, having the highest chargeback amount of all UW schools. The UW-Stevens Point Student Government Association has passed a resolution that demands a reduction in chargeback amounts comparable with sister institutions for next year's assessment. Lacking that, the student group says it will approach System administration or even outside legal attorneys to lower the chargebacks.

UW System Vice President Ray Marnocha, contacted for his reaction to this request, said he was not aware of the issue but would handle it in standard investigative manner.

Fuck Milk!
by Kareen Rivedal

Editor
That's what a majority of Wisconsin state representatives said last week at the close of the fiscal eight legislative session. Rather than pass an amendment making milk the official state "Drink for all Sons," various legislators instead remarked, "Who really cares? We've been in session long enough. Let's just go have a brew!"

When two dissenting senators objected to the motion, on the grounds that "Hey, we haven't passed anything yet. Maybe we ought to stop drinking so much beer," they were loudly overruled by a unanimous voice vote from the majority. Individual speakers pointed out that it was almost 5 p.m. and that the bars don't stay open forever, you know.

Espionage
from page 16

"On's morning Tab. afternoon Tab. and yes, even her evening Tab.

This prompted all sorts of interesting editorials which culminated with the now famous "I hate frats and the Army editorial." Public opinion was rapidly turning against the Pointer. I had only to make the final push and it would have been all over.

But then I had an attack of the morals. I couldn't kick this "hand dog" any more. If there wasn't a Pointer someone else would come along. Perhaps UWSP Today would come back, or as an all new Pointer. I'd kill paper after paper and it would never end. I couldn't take it. I took a transfer.

My next assignment will be to crumble the Soviet economic, political and military systems. It should take about 21 days, drive or take 15 minutes.

Located in North Point Shopping Center
Undercover work

Four juveniles were arrested Wednesday afternoon for allegedly smuggling cases of Point beer across the city limits.

As seen in the accompanying photo, the youths apparently disguised themselves as Mexicans and attempted to conceal the local brew by carrying it in Corona cases. One of the youths, Juan Hookpoker, said that their overall plan was flawed. However, they overlooked the clumsiness of the boxes that concealed the contraband. "The damn boxes were all dirty and ripped," Hookpoker said. "I tried so hard to keep that one bottle from falling out, and I did a pretty good job for awhile."

When Hookpoker finally slipped and the Point bottle fell out, an undercover officer was on the scene to detain the four.

The officer had been observing the alleged racket for a week, sensing something suspicious. His name has been withheld to protect his identity, but he's the guy in the picture with the black mask over his eyes. When asked to comment over the phone, he said, "I finally got the varmints. I knew I would get them sooner or later. Imagine, Point beer in Corona cases. What blasphemy!"

(Actually, I think this is what he said. In order to protect his identity, a towel was placed over the mouthpiece.)

Point Brewery Public Affairs Director Tommy Thompson rewarded the officer with a complimentary case of Point Bock. Thompson was quoted as saying, "It's a great day for all of Stevens Point. We just can't let this stuff get out of town."

Sorenson named Kodak All-American

Sports Information Office

Senior Sonja Sorenson, the University of Wisconsin-Stevens Point all-time leading scorer and rebounder, has been named to the 1988 Kodak Women's All-America Basketball Team for Division III colleges. Selections for the teams are made by the Women's Basketball Coaches Association (WBCA). Sorenson averaged 33.3 points and 11.2 rebounds per game this season while shooting 56.6 percent (189-338) from the floor and 75.1 percent (150-200) from the line. She concluded her star-studded career by scoring in double figures in 65 consecutive contests. This season she had no fewer than 13 points in a game and topped the 20-point mark in 13 of 23 outings. She had a season high of 53 points in a 79-50 win over Platteville.

She also reached double-figures in rebounding in 16 of 23 games with a high of 22 vs. Eau Claire.

Also a standout defensively, she was named to the WWCAC All-Defensive team as she led UWSP in both steals and blocked shots. In 1987-88, she set school marks for points average in a game (21.3), field goal attempts made in a game (14) and free throws made in a season (130).

Sorenson currently holds 23 school records, including career marks for both points (1,403) and rebounds (922). Sorenson goes up for a shot in a game earlier this season. Head coach Ruth Anne Kaiser said Sorenson is a well-deserving recipient of the honor.

"To be named one of the top 10 players in the country is the ultimate compliment. She does not just happen, one must work for it, and Sonny did just that."

"Kodak All-American is a great honor for Sonja, her family, Stevens Point, our program and the university. I cannot say enough about her as a player and as a person. We'll miss her a great deal, in more ways than one on the court."

Tennis team splits matches, Zowin wins three

by Scott Huelskamp

Sports Editor

Senior Bryan Zowin displayed the talent last weekend that has earned him the number one singles spot on the UWSP men's tennis team all season.

Zowin won both his singles matches and one of two doubles matches with teammate Doug Greenberg to help the Point hitters split a pair of games, played at Ripon College.

Point was beaten two matches to seven to nationally ranked Ripon but turned around their fortunes to crush Green Bay, 6-1.

"Both the guys I played were server and volley players," said Zowin. "I am more of a player who likes to wait until they make their move and then capitalize on it."

"They (Ripon) have two rubber-type courts and two wooden surfaces. I was lucky to play both my matches on the rubber courts, which is the surface my game is more accustomed to. Since the ball gets to you faster on rubber, the ball was getting to me quicker than the balls and volley players were getting to the net, which made it a bit easier."

Zowin defeated Ripon's Mark Baladad in his opening match, 3-6,6-2,6-4, and followed with a decisive 6-1,6-2 victory over Hiro Notaney (G.B.).

"My first match was pretty even until he (Baladad) started getting frustrated," said Zowin. "I just got in the groove of the match and was really hitting my passing shots."

Baladad got his revenge when he teamed with Zolt Juhasz to beat Zowin and Greenberg in doubles 6-3,6-4. Zowin-Greenberg rallied over Notaney-Smith of Green Bay 6-3,6-3.

"Doug played tough considering he had a fever and didn't feel well all weekend," said Zowin of his partner.

The number two doubles team of Gary Polston and Stew Stone captured Point's only other match versus Ripon, 6-3,4-6,6-4, over Nick Bowman and Brett Roesler. Polston-Stone doubled their pleasure by beating Green Bay's Kurt Schenberger and Rob Downey, 6-4,6-2,6-3.

UWSP's tandem of Pat Davidson and Bryan Baselier also were doubles winners over G.B.'s Dan Jensen and John Klock, 6-2,6-4,7-6,7-3. Polston, Greenberg, Stone and Davidson all recorded singles wins over G.B. opponents.

"They played some very consistent tennis up and down our line-up, especially considering we were jumping back and forth between a wooden gym floor and tarant gymn floor," said head coach Dave Drouet.

Which track is better: Indoor versus Outdoor

by Scott Huelskamp

Sports Editor

Track is a very diversified sport. Weather conditions, shoes and physical ability can all affect performance. But additional factor has to be considered by the track athlete. Is it indoor or outdoor track season?

"Indoor track is as much like a circus because you have everyone in such a confined area at one time. Once you get outside things are a little bit more spread out and you don't have everyone on top of each other."-Witt

The major difference between the two, says UWSP head track coach Rick Wilt, is the weather. The turns are so much tighter on the indoor track and the people who are in the shorter races, the high velocity races, it takes a lot more force to be able to hold yourself in the turns. Instead of using your speed to run fast you are using it to maintain yourself around the curve." Wilt says the turns are the main factor why indoor times are slower than outdoor times.

A standard indoor track is 200 meters (220 yards) in circumference, while an outdoor circle is 400 meters (440 yards).

"All your times in the short races will be much slower indoors...probably all races up to the 800," said Witt. "Once you get up to the 1000, the speed slows down enough that it is not going to be that much of a disadvantage to you."

Only a 60-yard sprint is run indoors, compared to 100 meters outdoors. 300, 600 and 800 are only run outdoors.

Although not in the best shape, the Colman Field is the only track at UWSP. Two meets have been slated for the track this season (April 2 and 9).

Wind, weather slows Lady Trackster

Talented SP 4x1,600 team wins

by Scott Huelskamp

Sports Editor

The UWSP womens track team competed in the Crescent Provocing Relays at UW-La Crosse last weekend and the 4x1,600 relay team surprised the host school with a win by more than 50 yards.

The team of Beth Welland, Kris Heien, Kris Hoel and Jenny Schoch crossed the tape in 11:36.3.

"They did an excellent job as La Crosse had their relay loaded with talent," said head coach Len Hill. "Beth Welland gave a good lead leg. Kris Heien ran the second leg and was just three steps ahead of La Crosse's All-American Sara Gil- len. Kris Heien did a great job of keeping us in the race, Kris Hoel was able to get us a 60 yard lead which Jenny Schoch stretched to 50 for the win."

Point, La Crosse and Rochester Community College were the only competing school’s at the meet. No team scores were kept.

Pointer second went to the 4x100 relay of Becky Sherwood, Maureen Seidl, Barb Knuese, and Carrie Enger in 4:21.5, the sprint medley squad of Sher- wood, Knuese, Traci Beier, and Michele Hansen in 2:30.4, and the 4x800 team of Beth Mears, Kay Walland, Hoel and Schoch, with a 9:36.3 clocking.

But Collar went 8-4 in the high jump, while Mears threw the javelin 94+ and boxed the shot-put 37.5/7 to garner sec- ond in their field events.

Lady Pointer third places were earned by Hansen in the triple jump (33-4), Mears, in the sprints (10.26-5), and in the relay.

"I was pleased with the perfor- mance of Carrie Enger, Barb Knuese, and Becky Sherwood although their times were not all that great. Each ran on the same relay as they wanted to. For them, it was an internal workout at race pace."

Both the UWSP womens and mens track team will kick-off their home outdoor track season when they host the Pointer Invitational this Saturday, April 2, at Coleman Field. The meet will begin at 11am Saturday. Officials are still needed. Call coach Hill at 346-4415 or coach Rick Witt at 346-3677 if interested.

Two different tracks, different strategies, from page 19

also popular distances at college meets and 200s and 400s are reserved for outside.

Sprint speed is also affected by the use of spikes. Times are slower without the extra grip of spikes on the running sur- face. Only about half of the eighth or quarter-inch spike have every one in such a con- fined area at one time. Once you get outside things are a little bit more spread out and you don't have everyone on top of each other."

When it comes to personal preference, Witt says his answer is split in half due to Wisconsin's chronic, unpredictable weather. "A lot of the runners probably like indoors better be- cause it could be raining or windy or whatever. But a lot of the field events people, like the javelin and discus throwers, don't get a chance to compete indoors but have to pick it up outside."

Strategy also varies, whether runners are indoor or outdoors, and favors the less talented run- ner or the underdog. "There is no room in this sport for a sure-thing. You really can't pass on the course, it's just too hard because you are running that much extra distance, therefore, your straightaways are half as fast," said Witt. "If you get the lead indoors, it is very difficult for someone to beat you...you may be slower than someone but if you can hold them off for 30 yards, you are at a huge advantage."

Most indoor surfaces are built with polyurethane/rubber with an inch to an inch-and-a-half solid base. The UWSP's outdoor track, is one of the older tracks and has a pre- dominantly asphalt base."

"I like track in May when it's really warm and nice outside. That's when track is meant to be," said Witt.

Sports Shorts

Point guard Todd Christannann has added another accom- plishment to his accolades as a senior. Christianann has been nominated for the NCAA Basketball Player of the Year award. ...Among the other WSUC players nominated by their coaches include Steve Shawalter of Platteville, Eric Davis of Eau Claire, and Duane Vance of Whitewater. ...The UCLA's Jackie Stiles has been nominated for the NCAA Senior Scholastic Academic All-American Award. To be eligible for the award, a student-athlete must have competed in the NCAA meet and have a grade point of at least 3.5...College Spring Training...Seven WSUC schools, including UWSP, have taken a week of games in warmer southern or western weather over spring vacation. Teams that have just returned are: UWSP (from the Arkansas area), Eau Claire (Texas and Florida), La Crosse and Platteville (Florida), Oshkosh (Missouri) and Arkansas, Stout (SE Louisiana), and Whittier (Califor- nia)...In the NCAA Division III track and field championships two weeks ago, La Crosse field event specialist Terry Strout set Division III records with tosses of 38.8 meters in the shot put and 18.8 meters in the hammer. ...Whittier finished eighth, their best finish ever in national competition...Warhawk Steve Moyer finished second in the 800 meters in 1:54.30 to earn All-American honors for the third time...Hockey all-conference selection Arron Scott of UW-River Falls set school record for points scored (88) and assists (43) in a single season...If the 21 hockey player recently named to the NCBA All-Academic team three of them are sopho- more's...Also, almost half (nine) are majoring in either Business Administration or Accounting. Top accounting major's are Accounting (2), Sports Recreation Management (2), Computer Information Systems (2), Psychology, Biology, Finance, and Journalism (1).
**Ruggers routed by Eau Claire**

by Tom LaBoda  
Jeff Griepentrog

Staff Writers

The Stevens Point Rugby Club ventured to Eau Claire this weekend and suffered a 24 to 6 setback. Point, which was playing its first match of the spring season, was missing four key personnel, backs Dan Vaughn, Dean Duni, Dean Diniel and Tom Zellner. Eau Claire which in turn, at full strength, was playing their second match of the season.

After a tough fought first half Point only trailed 4 to 0, but then inexperience caught up to them. Long time Point rugger Dave Peterson said, "We played good defense in the first half, but the combination of inexperience and the missing of key personnel caught up with us in the second half." Point had to use six players with little or no A-side experience. Hard headed scrummer Jeff Griepentrog said, "The inexperience hurt us at times, but you can't blame just certain individuals for a game that was played by a team. You have to blame the team as a whole. We just have to tip our hats to Eau Claire, who simply outplayed us. I guarantee things will be the other way around once the fall season rolls arrives."

Another factor in the game that hurt Point was the weather. "Our kicking game was hurt by the bad weather, which kept us in bad field position all day," Peterson said.

In the second half Eau Claire added four more tries and one extra point kick to put the game out of reach. Prop Bill Johnson stated that, "The scrum played pretty evenly, but we didn't wrap up on our tackles and were caught out of position a few times."

The Point B-side however, fared better as they came out on top 3 to 0. Joe Paligara kicked the penalty kick for the only score of the match. Rough and tough back Jim Olshanski, who played a super A-side match, said, "If our A-side would have played as well as our B-side we would have won, no doubt."

Point, who has this weekend off, travels to Appleton in two weeks to take on the very good Appleton Rugby Club. "We need to iron out a few wrinkles in a short period of time in order to compete in two weeks, said swift back Matt Murphy. Point's only home match of the season is April 30th against Ron.

**AFB slates Wellness Day**

The School of HPERA formed the first Association for Fitness in Business (AFB) - Students Chapter organization in March of 1987. AFB, in conjunction with Chancellor Philip Mar- shall is demonstrating the University's commitment to wellness by declaring a Wellness Day.

The first annual Wellness Day, 1988, will be on April 13 from 9:00 a.m. to 5:00 p.m. in the Quandt gymnasium. A variety of experiences will allow for hands-on self-assessment to be performed in all areas of wellness (which includes spiritual, occupational, social, physical, intellectual, and emotional assessments).

The AFB Executive Board invites all to come and participate in assessing their individual wellness lifestyle.

**Tennis**

from page 19

The UWSP tennis squad currently has a 4-4 match record and will host St. Lawrence this afternoon on the UWSP campus at the tennis courts behind Allen Center.

**Northern Collegiate Hockey Association members UW-River Falls won the NCAA Division III national championship, two games to one, over Elmira College, New York, last weekend in Elmira.**

The Falcons, under the direction of head coach Rick Kornbeck, won Friday's game, 7-1. Saturday Elmira took a 5-4 win to set up the dramatic 15 minute mini-game. In the contest, the Falcons took a 3-4 win to claim its first NCAA title. In Friday's game, the Falcons exploded for four third period goals to take the win.

River Falls grabbed a 1-0 lead after one period when John Albert scored a power play goal at 16:32. The Falcons held a 1-0 lead in shots late in the period. The Falcons held a 3-1 lead after two periods. Jeff Schaal scored a power play goal at 7:11, but Elmira scored to make it 3-1 at 9:43. Just 41 seconds later Butch Kastell scored to make it 5-1-3. In the third period the Falcons scored four times in three minutes to clinch the win. Arron Scott scored at 14:29. At 15:23 Steve Hammer scored the team's third power play goal. At 15:57 Mark Verigin scored, and 36 seconds later Tom Niles scored an unassisted goal.

Game goeis Chris Hanson stopped 37 of 38 Elmira shots, while the Eagles' goalie stopped 38 of 45 Falcon shots.

Saturday, Elmira drew first blood with a goal at 10:33 as they outshot the Falcons, 16-4. In the second period Elmira scored a power play goal at 9:5. But Falcon Tom Niles scored at 11:29 to make it 5-1. Just 13 seconds later Elmira scored again, and they netted their fourth goal at 12:56.

The Zenith Data Systems Z-183 PC gives you all the power of a desktop in a lightweight, laptop PC. Plus, it's equipped with one of the most vivid, readable screens in today's laptop market. And add to this, some important extras...

The Zenith Data Systems Z-183 PC generates longer battery life than most competitive, hard-disk laptops. Plus, it's equipped with one of the most powerful ways to take you all the way from college to career!

The Z-183 is PC compatible, and runs the latest PC-DOS software. The dazzling blue back-lit LCD screen allows you to adjust brightness and contrast to fit virtually any lighting.

And the Z-183 PC generates longer battery life than most competitive, hard-disk laptops. Plus, the 20 megabyte hard disk with single floppy drive allows for expanded storage. It's even got its own handle.

So call us today, and get your very own Z-183 Laptop PC at a great student price. And check out the Z-181 Laptop PC while you're at it... complete with dual 720K 3.5" floppy drives. Either one will get you where you're going.
Three UWSP skaters placed on NCHA All-Academic team

Three members of the UWSP hockey team were among the twenty-one student-athletes named to the 1988 academic all-Northern Collegiate Hockey Association (NCHA) team.

The three academic All-Americans are John Basil, Tim Coughlin, and Jim Klenk.

Basil, a senior goalie, is majoring in Business Administration, while Coughlin, a junior defensiveman, is majoring in Communications. As a junior forward, Klenk is also majoring in Business Administration.

To be named to the team a student-athlete must have a 3.0 cumulative grade point average, have earned at least 39 semester or 75 quarter hours, and be recommended by his head coach.

The UWSP hockey team, after finishing third in the NCHA conference, was eliminated in the playoff's by eventual national champion UW-River Falls.

SUCCESSFUL IN LEAGUES AND LESSONS AT SentryWorld

Twelve students have participated in leagues or lessons at SentryWorld within the last six months. The free group lessons will meet once a week for four weeks. Tennis balls, racquets, and the court will be provided free of charge ("bring your own racquet if possible"). All classes will be conducted by SentryWorld pros Mark Medow and Dan Stablein. The minimum age is seven years old. Lesson participants will be placed in classes according to age, skill, and convenience of hour. We suggest you ask friends and relatives if they would be interested in this "no strings attached" offer.

We are offering this opportunity of free tennis lessons simply to create enthusiasm for the sport and potentially encourage people to develop a lasting interest in the game of tennis.

For more information, contact USPTA pros Mark Medow and Dan Stablein at 715-345-1600
